J. I. Nuber.

## ANNUAL REPORT ON THE FINANCES

> Treasury Department, Washington, November 19, 1927.

Sir: I have the honor to make the following report:
In the process of preparing estimates of future revenues and of carrying on current financing it is necessary for the Treasury to have at its command all available information concerning business and financial conditions.

## bUSINESS CONDITIONS IN THE UNITED STATES AND ABROAD

A surrey of the available data suggests the following summary conclusions as to business in the past year:

First. A large volume of business was done simultaneously with declining. commodity prices-an unusual combination of circumstances.

Second. The volume of new construction remained large, as engineering and industrial and public works projects were in sufficient volume practically to offset a decline in construction of dwellings.

Third. High wages, due to increased average productivity per worker, and lower living costs, due to declining prices, resulted in a sustained purchasing power for a large variety of consumers' commodities.

Fourth. Business was free from the accumulation of excessive inventories, advance ordering subject to cancellations, and unreasonable speculation in commodities, and a spirit of caution prevailed generally among business men.

Fifth. Automobile production continued at a pace somewhat reduced from the year before, and dangers of a serious slump have been lessened as demands for replacements are now sufficient to absorb about half of the year's output.

Sixth. Competition became more intense and the largest profits were made by those concerns capable of introducing economies or capturing the market by adaptation of their products to the demand.

Seventh. Charges for the use of fixed capital were reduced both on industrial and Government securities and on farm loans.

Eighth. Banks in the United States increased their loans and investments about $\$ 2,000,000,000$ at the same time that they reduced somewhat their dependence upon the Federal reserve system, due mainly to gold imports and a decline in requirements for currency.

## Business Conditions During the Fiscal Year

Volume of business.-The volume of business transacted during the year, when measured by the total money value of check payments through banks outside New York City or by recognized indexes of the physical volume of production, was about 3 per cent larger than during the prior fiscal year and larger than in any preceding year. There were three principal exceptions to this increase in business volume-the construction, automobile, and iron and steel industries did not move in harmony. New construction, measured by the value of contracts awarded, declined very slightly, but the year previous had registered such large totals that the fact of a decline is not so important as the smallness of the decline. Automobile production declined about 11 per cent and nearly to the level of the fiscal year 1924. The iron and steel industry, drawing its sustenance from many other sources of demand as well as from construction and automobiles, showed a gain in ingot production of about 1 per cent over the previous fiscal year. The increase in general business volume was made with the monthly average of factory employment, 2 per cent less than in the prior year, reflecting a higher degree of industrial efficiency.

The industrial advance made during the fiscal year just closed was not uniform. Overproduction occurred in oil, followed by price readjustments and declines in earnings of many oil-producing companies. The cotton textile industry, on the other hand, stimulated by the low price of cotton, was more active than for some years past. Other textile industries also reported a generally larger output. Profits reported by a selected group of 456 corporations for the first half of the calendar year 1927 showed gains, as compared with the first half of 1926, for public utilities, motors and accessories, food and food products, mining and smelting, chemicals, and miscellaneous, but losses for oil, steel, machines and machine manufacturing, building supplies, and railroads.

Commodity prices.-The prices of all commodities at wholesale began a decline in 1925, according to the index numbers of the Bureau of Labor Statistics, which continued throughout the fiscal years 1926 and 1927. Since May, 1927, there has been some recovery. The actual decline, in terms of 1926 as a base, was from 104.8 (in March, 1925) to 93.7 (in June, 1927), or nearly 11 per cent. The decline in the fiscal year 1927 alone was $53 / 5$ per cent.

The prices of agricultural commodities followed much the same course except that their drop in the past fiscal year was slightly less than that of nonagricultural products, and their recovery since June has been vigorous and has accounted for most of the recent increase in the general average of prices.

Foreign business conditions.-The past year has, on the whole, been one of continued improvement in the economic and financial status of important foreign countries. Legal stabilization of currencies on a gold basis has been achieved by seven countries during the past year. With only a few exceptions, the countries whose currencies remain legally independent of the value of gold are now within measurable distance of legal stabilization.
Industrial production in Europe has risen throughout the year. The volume of exports, as well as the domestic trade, was larger, and commodity prices have been fairly stable in the last few months. Unemployment has been declining recently, and, in general, it may be said that the position of labor in Europe is better than a year ago; where wage increases have not occurred, a fall in the cost of living has brought about the same results. Capital issues were much larger in many countries, and with few exceptions savings-bank deposits have increased.

## Banking and Finance

Federal reserve banking.-During the past fiscal year there was a decrease of more than $\$ 100,000,000$ in the total amount of credit the Federal reserve banks were called upon to provide, due largely to gold imports and a decrease in the requirements for currency, reflecting smaller factory pay rolls and probably further economy in the use of currency by an increase in the use of checks. The decrease in Federal reserve credit took the form principally of a decrease in borrowing by member banks, and the banks therefore found themselves at the close of the year in a position to lend somewhat more freely than a year previous. As a consequence, money conditions have become somewhat easier and money rates slightly lower.

The discount rates of the Federal reserve banks have been unusually stable during the past two years. The rate at all Federal reserve banks, except New York, was 4 per cent from November 23, 1925, to July 28, 1927, inclusive. The New York bank maintained a 4 per cent rate, except for the period April 23, 1926, to August 12, 1926, inclusive, when a $31 / 2$ per cent rate was effective. Shortly after the close of the past fiscal year the discount rates at all Federal reserve banks were reduced from 4 per cent to $31 / 2$ per cent, the first reduction being made at Kansas City (July 29) and the last at Minneapolis (September 13).
The general banking situation.-Total loans and investments of all banks in the country increased during the fiscal year about $\$ 2,000$,000,000 , or about 4 per cent, an increase not inconsistent with the usual year-to-year growth in bank credit required by the normal increase in the country's trade. An unusually large proportion of
this increase in credit took place in bank investments and loans on securities, accompanying great activity in the security markets.
New security issues.-The new security issues of domestic borrowers totaled $\$ 5,524,189,000$ in the fiscal year ended June 30, 1927, or about. 2 per cent above the previous year, and those of foreign borrowers totaled $\$ 1,319,083,000$, or 13 per cent above the previous year. The distribution of this large volume of securities has been facilitated by rising bond prices, the monthly average of bond prices being about 4 per cent higher than during the previous fiscal year; and by increased bank loans, based on securities as collateral and increased bank inv̄estments in securities.

The business effects of this large amount of new financing are to be seen principally in increases in construction for public utility companies, and of public works and highways.

## The present situation of business

Total volume of business.-Business activity began in the spring months of this year to fall below the totals of last year. As a result of this recession business is now being conducted on a basis that conforms more nearly to the normal expectancy as judged from the regular rate of growth of the country that has prevailed on the a verage for some years. While business is not as active as in most of 1926, it can hardly be said to be subnormal and the underlying fundamentals appear to be sound.

Commodity prices.-Another indication of healthy business conditions is the recent recovery in commodity prices due in the main to the rise in agricultural prices. The Bureau of Labor Statistics index of wholesale prices for September was 3 per cent over the low point of May. The growing stability of prices in Europe moreover is favorable to our export commodities.

Agriculture.-The crop estimates of the Department of Agriculture now promise larger crops of wheat, corn, barley, flax, and potatoes than were realized last year. Although the cotton crop has been reduced about a third in quantity, it will probably sell at a price sufficiently higher so that the total return from the crop will be considerably larger than last year.

Judged from the group price index numbers of the Department of Labor the purchasing power of farm products, measured in terms of nonagricultural products, advanced steadily in every month since March, 1927, and reached a figure in September that was 12 per cent above that of March, nearly 11 per cent greater than in September of last year, and higher than in any other month but one since early in the year 1920 .

Credit conditions.--The peak load of crop financing this year was handled without strain and the prevailing interest rates eased somewhat in the middle of October. Reporting member banks located in the larger cities have in general continued to expand their commercial and collateral loans and holdings of investments; the banks. in New. York City having done likewise, except for a reduction in their holdings of investments. The total credit expansion of member banks was $\$ 317,000,000$ between the last week of June and the last week of October, of which sum $\$ 55,000,000$ is accounted for by banks located in New York City. New financing, as represented by securities issued, has continued in very large volume.

## RECEIPTS

Principal sources of revenue in 1927

Diagram 1.-principal sources of ordinary receipts for the fiscal years 1920 to 1927
The fiscul year ended June 30, 1927, gives the first opportunity for analyzing the changes in the principal sources of revenue and in the distribution of the burden of internal taxation effected by the revenue act of 1926, approved February 26, 1926. The increase in the total ordinary receipts from $\$ 3,962,755,690$ in 1926 to $\$ 4,129,394,441$ in 1927, or $\$ 166,638,751$, came mainly from sources other than internal revenue taxation. The receipts from principal sources as compared with earlier years are shown in the following table and graphically in diagram 1, above.

Ordinary receipts, fiscal years 1920 to 1927
[On basis of daily Treasury statements (unrevised)]

| Year ending June 30 | Customs | Income and profits taxes | Miscellaneous internal revenue | Miscellaneous revenues, including Panama Canal |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Proceeds from foreign obligations | All other |  |
| 1920 | \$322, 902, 6 | \$3, 944, 948 | \$1,460, 082 | \$74, 296, 622 | \$892, 334, 542 | \$6, 694, 565, 389 |
| 1921. | 308, 564, 391 | 3, 206, 046, 158 | 1,390, 779,823 | 114, 821, 206 | 605, 121, 383 | 5, 624, 932, 961 |
| 1922. | 356, 443, 387 | 2,068, 128, 193 | 1, 145, 125,064 | 75, 222,068 | 464, 185, 439 | 4. 109, 104, 151 |
| 1923. | 561, 928, 867 | 1,678, 607, 428 | 945, 865, 333 | 232, 989,156 | 587,744,697 | 4, 007, 135, 481 |
| 1924. | 545, 637,504 | 1, 842, 144, 418 | 953,012, 618 | 221, 774, 675 | 449, 475, 487 | 4, 012, 044, 702 |
| 1925 | 547, 561, 226 | 1,760, 537, 823 | 828, 638,068 | 183,637,677 | 459, 773, 890 | 3,780, 148,684 |
| 1926 | 579, 430, 093 | 1, 982,040, 088 | 855, 599, 289 | 194, 237, 957 | 351, 448, 263 | 3,962, 755, 690 |
| 1927 | 605, 499, 983 | 2, 224, 992, 800 | 644, 421, 542 | 206,089, 173 | 448, 390, 943 | 4, 129, 394, 441 |

DIAGRAM 2.-Income tax collections for the fiscal years 1923 to 1927, distributed according to individual and corporation taxes and according to back taxes and current collections. (The former distribution was not made until 1925 and the latter until 1924)
Internal revenue collections, which include income taxes, tobacco, and other miscellaneons internal taxes, increased from $\$ 2,837,639,377$ to $\$ 2,869,414,342$, or $\$ 31,774,965$ over the preceding year; while receipts from customs and such miscellaneous sources as Governmentowned securities, Panama Canal tolls, etc., were $\$ 134,863,786$ larger than in 1926 , or $\$ 1,259,980,099$ as compared with $\$ 1,125,116,313$.

Closer analysis of internal revenue collections shows more definitely that tax changes were responsible for the failure of such receipts to increase. Income taxes, the most important internal taxes, yielded $\$ 2,224,992,800$, or $\$ 242,952,712$ more than in 1926.

However, larger back tax collections on incomes- $\$ 331,476,826$ in 1927 as compared with $\$ 295,982,056$ in 1926-were responsible for approximately $\$ 35,000,000$ of this increase. Such collections depend not upon current tax returns but on the administrative work of completing the audit and closing of returns for former years. The large volume during the fiscal year 1927 resulted from intensive work on returns for war years, the majority of which are now closed. Making allowance for receipts from this temporary source, current income tax receipts during 1927 increased about $\$ 208,000,000$. This is the increase in collections depending on the new law in which rates of tax on individual incomes were decreased, and credits and exemptions increased, while rates on corporation incomes were increased. Income and profits in the calendar years 1925 and 1926 were at an unusually high level, and collections on these incomes, half of which came in the fiscal year 1927, were larger in spite of the substantial reduction in individual income tax rates. Offsetting the additional current income tax collections of $\$ 208,000,000$ was a decline of about $\$ 211,000,000$ in collections from other internal taxes. These miscellaneous internal revenue taxes were seriously cut by the 1926 act from $\$ 855,599,289$ in 1926 to $\$ 644,421,542$ in 1927. If, therefore, allowance is made for collections not affected by the tax revision, internal revenue collections during 1927 were approximately the same as during 1926.

Receipts other than from internal revenue taxes come from the tariff and from a variety of other sources not of a taxation nature. These sources were responsible for the bulk of the increase in total ordinary receipts of the past year. Customs increased from $\$ 579$,430,093 to $\$ 605,499,983$, or $\$ 26,069,890$, the second successive year with a big gain, and the first time for customs to pass the $\$ 600,000,000$ mark. The additional customs accrued during the autumn months. Diagram 3, page 8 , shows customs receipts, monthly, for the fiscal years 1925 to date. During the first three months of the fiscal year 1927 customs rose sharply over the same months of the preceding year until November, then declined rapidly until January, and remained about the same as in former years during the last six months, to June 30, 1927.

Miscellaneous receipts include a variety of sources, a few yielding as much as some of the more important miscellaneous internal taxes, a large number each producing a small amount from year to year. Among the more important miscellaneous receipts in recent years, shown separately in the following table, have been the proceeds from Government-owned securities (including foreign obligations, railroad securities issued under the transportation act of 1920, and Federal farm loan and other securities), sales of surplus property, and Panama Canal tolls. Less important individually are the items included
under " all other"-public domain receipts, profits from coinage and bullion receipts, fees, fines and penalties, interest on public deposits, receipts from revenues of the District of Columbia, receipts in administering trust funds, and smaller items. Revenues grouped under "all other" have not varied much during the last four years, ranging from $\$ 230,000,000$ to $\$ 272,000,000$. There have, however, been wide fluctuations in the receipts from certain of the more important sources. Receipts from railroad securities have fluctuated from $\$ 36,700,000$ to $\$ 143,900,000$ and from Federal farm loan and other securities from ' $\$ 9,600,000$ to $\$ 63,500,000$ during the four-year period.

Diagram 3.-Customs recelpts, by months, for the fiscal years beginning 1925
Miscellameous receipts, 1920 to 1927
[On basis of dally Treasury statements (unrevised); in millionś of dollars]

| Fiscal year | Proceeds from Governmentowned obligations |  |  | Sale of surplus supplies | Panama <br> Canal <br> tolls | All other | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Foreign | Railroad | All other |  |  |  |  |
| 1920.. | 74.3 | (1) | (1) | 309.3 |  | ${ }^{2} 5777.4$ | 961.6 |
| 1921-- | 114.8 | (1) |  | 183.7 | 12.3 | ${ }^{2} 409.18$ | 719.9 |
| 1922. | 75.2 |  | ${ }^{3} 23.1$ | 113.6 | 11.7 | 312.8 | 539.4 |
| 1823 | 233.0 | 99.3 | 46.3 | 91.7 | 17.3 | 333.1 | 820.7 |
| 1924. | 221.8 | 94.4 | 9.6 198 | 46.8 23.8 | 27.1 | 271.6 249.2 | 671.3 643.4 |
| 1925. | 183.6 | 143.9 36.7 | ${ }_{34.6}^{19.8}$ | 23.8 25.6 | 24.7 | 249.2 229.9 | 643.4 545.7 |
| 1927-- | 200.1 | 89.7 | 63.5 | 18.1 | 25.8 | 251.3 | 654.5 |

[^3]The total received from miscellaneous sources was larger in the fiscal year 1927 than from either customs receipts or from miscellaneous internal revenue taxes, or $\$ 654,480,116$ as compared with $\$ 605$,499,983 and $\$ 644,421,542$, respectively. The increase over similar receipts during the preceding year was from $\$ 545,686,220$ to $\$ 654,-$ 480,116 , or $\$ 108,793,896$. Government-owned securities other than foreign securities yielded $\$ 153,200,000$ in 1927 as compared with $\$ 71,300,000$ in 1926 , about $\$ 82,000,000$ of the entire increase in miscellaneous receipts. The principal sources in years of the more immediate future will be foreign obligations owned by the Government, sale of surplus property other than war property, Panama Canal tolls, and all other, the total receipts from which varied from about $\$ 460,000,000$ to $\$ 530,000,000$ during the last four years.

## Income taxes

The changes in principal sources of receipts reviewed above show the general effect of the revenue act of 1926 from the point of view of total revenue for the Government and the productivity of main revenue producers. During the operation of the law to date information has become available showing the effect on individual sources of revenue and individual groups of taxpayers. The most important information is the compilation of statistics from income tax returns of corporations and individuals for the calendar year 1925 , returns of which were filed during 1926, under the provisions of the new revenue act. Actual tax collections on these returns were made during the calendar year 1926, or during the last half of the fiscal year 1926 and the first half of the fiscal year 1927.
Not only did the 1926 revenue revision change the rates for different individuals subject to income tax but, through the increase in the income tax rate on corporations, it adjusted all income taxation so that corporations, as a group, pay an even larger proportion of the income taxes than formerly. The following table shows the percentage distribution of income tax returned by corporations and individuals for the calendar years 1922-1925:

| Corpora- |
| :--- | :--- | ---: | ---: |
| tion |$|$| Individ- |
| ---: |
| ual |

When the excess-profits tax on corporations was removed and surtax rates on individuals reduced in the revenue act of 1921, the normal rate on corporation income was increased from 10 to $121 / 2$
per cent. Individual rates were further reduced in the act of 1924, retroactive on returns for the calendar year 1923, but corporation rates remained unchanged, and corporations then returned more than half of the income taxes. The increased proportion of income taxes returned by corporations for the calendar year 1925 reflects only part of the last tax revision since the rate was set at 13 per cent for 1925 and at $131 / 2$ per cent for subsequent years. For the calendar years 1926 and following corporations will be returning well over threefifths of the income taxes.

Individual income tax.-The revenue act of 1926 made sweeping changes affecting the taxation of individual incomes by increasing the personal credit exemption for single persons 50 per cent and that for married persons and heads of families 40 per cent, by increasing the earned income credit and by decreasing the normal and surtax rates. More than 44 per cent of the individual taxpayers were relieved from income tax payments. In 1924, 4,489,698 individuals returned taxable net income, whereas in 1925 the number fell to $2,501,166$, a decrease of almost $2,000,000$. Under the new law the rates of normal tax were reduced from 2 per cent, 4 per cent, and 6 per cent to $11 / 2$ per cent, 3 per cent, and 5 per cent, respectively. Surtax rates were cut from a maximum of 40 per cent to a maximum of 20 per cent. The earned income provision was so extended as to apply to a maximum of $\$ 20,000$ of such incomes as compared with the limit in the former act of $\$ 10,000$.

It was very naturally anticipated that these changes would result in considerable loss of revenue. In fact, the report of the Ways and Means Committee submitted to the House estimated a reduction of $\$ 46,000,000$ in normal tax paid and a reduction of $\$ 98,575,000$ in returns from the surtax. As a matter of fact, however, the individual returns for the calendar year 1925 showed a larger tax than did those for 1924. The individual income tax returned for 1924 was $\$ 704$,265,390 , and for $1925, \$ 734,555,183$, an increase of $\$ 30,289,793$. As estimated, there was a very large falling off in the normal tax return. Before the deduction of earned income and capital loss credits, the normal tax returns decreased $\$ 41,434,565$. On the other hand, surtax returns decreased only $\$ 4,687,627$, while the capital gains tax increased $\$ 68,967,907$. There was a net gain of $\$ 22,845,715$, to which must be added $\$ 6,067,280$, representing a decrease in the earnedincome credit, and $\$ 1,376,798$, representing a decrease in the capital loss credit.

The results are attributable to several causes: First and most important was the increased prosperity of the country as exemplified by the increased income from certain sources, despite the reduction in number of returns. The income from dividends returned, which were $\$ 3,250,913,954$ in 1924 rose to $\$ 3,464,624,648$ in 1925 despite
fewer returns and the reduction in total income returned. More important than any other changes was the enormous increase in the income reported from the sale of property, both under the capitalgains section and under the general provisions. Income from the sale of property under the general provision reported for 1924 amounted to $\$ 1,124,565,658$, while in 1925 this figure had jumped to $\$ 1,991,659,499$, an increase of $\$ 867,093,841$, or 77 per cent. In addition, income under the capital net gains section increased from $\$ 389,148,434$ to $\$ 940,569,341$, an increase of $\$ 551,420,907$, or 142 per cent, and the tax from $\$ 48,603,064$ in 1924 to $\$ 117,570,971$ for 1925. In fact, the increased revenue from the capital gains tax more than offset the loss of $\$ 46,122,192$ in normal and surtax returns.

In the second place, the entire decrease in taxable incomes occurred in the classes not in excess of $\$ 5,000$, while for those in excess of $\$ 5 ; 000$ it materially increased. The number of taxable returns with income of less than $\$ 5,000$ decreased 55 per cent, while the number in excess of $\$ 5,000$ increased 18 per cent; in excess of $\$ 25,000,32$ per cent; in excess of $\$ 100,000,67$ per cent; in excess of $\$ 300,000,104$ per cent, and in excess of $\$ 1,000,000,176$ per cent.

The Treasury Department has always contended that in the long run the taxation of income at moderate rates would be more productive than at very high rates. The soundness of this contention appears to have been amply borne out by the tax returns under the law of 1926, for both the calendar years 1925 and 1926.

The sources of the income returned for the calendar year 1925 as compared with 1924 clearly illustrate the effect of the new revenue act. The total national income was undoubtedly greater in 1925 than in 1924, due to increased prosperity, but the income actually returned for individual income tax purposes was less, due to the entire exemption of over 40 per cent of the 1924 income tax payers. The income returned on account of wages and salaries was about $\$ 3,875,000,000$ less; from individual businesses about $\$ 1,100,000,000$ less; from rents and royalties about $\$ 538,000,000$ less; and from interest and investments about $\$ 467,000,000$ less. On the other hand, increased income was returned from dividends and from sale of property. Dividends increased about $\$ 214,000,000$, while the gains from the sale of property, including that returned as capital net gains, increased about $\$ 1,418,500,000$. The largest reductions in net income reported for tax purposes, in the income from wages and salaries and in the income returned on account of individual business, were in the lower tax brackets. The reductions in returns from "rents and royalties" and "interest and investment income" were almost entirely in the lower brackets. The greatest beneficiaries of the 1926 act were, therefore, people of small incomes, wage earners, salaried men, and men operating small individual business enterprises.

Paradoxical as it may seem, the average tax paid for 1925 was $\$ 136.83$ greater than for 1924 , an increase of over 87 per cent, in spite of lower normal and surtax rates in 1925. This is likewise true of the rate. In 1924 the average rate of those returning taxable net income was 3.62 per cent, while in 1925, despite all reductions, it increased to 4.20 per cent. The explanation is found in the elimination of about $2,000,000$ of the small taxpayers and in the increase of the number of taxpayers reporting larger incomes.

Analyses of the returns made under the 1924 and 1926 acts indicate that the income tax in this country has become a class rather than a national tax. For the calendar year 1924, 259,808 individuals with net incomes of $\$ 10,000$ and over returned about $\$ 627,800,000$ of income tax out of a total tax of $\$ 704,265,390 ; 4,229,890$ returned the remaining tax of about $\$ 76,500,000$; about $2,880,000$ made returns but paid no tax; and the balance of our population made no returns whatever. The average rate of tax of all those returning taxable incomes not in excess of $\$ 5,000$ was 0.49 of 1 per cent; and for those making taxable returns in excess of $\$ 5,000$ and not in excess of $\$ 10,000,0.99$ of 1 per cent.

For the calendar year 1925, in contrast, 327,018 individuals with net income of $\$ 10,000$ and over returned $\$ 701,497,726$ out of a total of $\$ 734,555,183$, and $2,174,148$ individuals returned the remaining tax, approximately $\$ 33,000,000$. According to these returns, less than 0.3 of 1 per cent of our population returned $951 / 2$ per cent of our total income tax, about 1.9 per cent returned $41 / 2$ per cent, and the remaining 97.8 per cent of the population returned no tax whatever. Furthermore, in returns for 1925 the average tax rate for those returning taxable net incomes not in excess of $\$ 5,000$ was 0.29 of 1 per cent, and for those returning taxable income in excess of $\$ 5,000$ and not in excess of $\$ 10,000,0.58$ of 1 per cent-rates about 40 per cent lower than those under the preceding tax law.

Corporation income taw.-The largest number of corporations scheduled as making returns for tax prior to 1925 was 417,421 . The returns for 1925 , however, numbered 430,072 . In no other year has this number reached 400,000 . In 1924, of those making returns, only 236,389 reported net income and 181,032 reported no net income. For 1925, 252,334 corporations returned net income and 177,738 returned no net income. The net income for 1924 was $\$ 7,587,000,000$, while for 1925 it was $\$ 9,584,000,000$, an increase, due to the great corporate prosperity. For 1917 the net income of the 232,079 corporations making return of income was $\$ 10,730,000,000$. The net income returned for 1925 , with this exception, was the largest on record.

The income tax returned by corporations for 1925 amounted to $\$ 1,170,331,206$ as compared with $\$ 881,549,546$ for 1924 , an increase of
about 33 per cent. There were two reasons for this increase in the tax-the extraordinary prosperity, resulting in larger returns both in number and amount, and the slight increase made in the tax rate. The tax for the year 1925 was at the rate of 13 per cent instead of $121 / 2$ per cent as for the years 1922, 1923, and 1924. The tax returned for 1925 , at the rate of 13 per cent, was $\$ 1,170,331,206$. Had the rate been $121 / 2$ per cent, the tax would have been about $\$ 1,125,318,000$, a difference of about $\$ 45,013,000$. That is, of the increase in corporate tax returned for $1925, \$ 45,000,000$ was due to the increased rate of one-half of 1 per cent and about $\$ 243,800,000$ due to increased pros-

Diagram 4.-Principal sources of miscellaneous internal revenue collections for the fiscal years 1923 to 1927
部
perity. Corporate prosperity was also illustrated by the fact that the deficit of those returning no net income was collectively less than for any year since 1919 and about 12 per cent less than for 1924.

## Miscellaneous internal revenue

Revision in the revenue act of 1926 of internal taxes other than income taxes reached a wide variety of taxes on people in all economic groups through their manufacture or use of goods and services. The total burden of these levies was reduced about one-fourth. The effect of the changes on receipts, as compared with preceding years, is indicated graphically in diagram 4, above, showing collections of miscellaneous internal revenue by principal sources for
the fiscal years 1923 to 1927. During that period miscellaneous internal revenue collections declined almost one-third, due to tax reductions in the revenue acts of 1924 and 1926. The loss of revenue in the latter act was even greater than in the former.

Taxes in each of the major remaining sources were reduced, either by lower rates, increased exemptions, or omission of certain taxes. The collections as compared with the fiscal year 1926 were as follows: ${ }^{1}$
[In millions of dollars]

| Source | Fiscal year | Fiscal year 1927 | Increase or decrease |
| :---: | :---: | :---: | :---: |
| Tobacco taxes. | 370.7 | 376.2 | +5. 5 |
| Automobile taxes. | 138.2 | 66.4 | -71.8 |
| Estate tax. | 116.0 | 100.3 | -15.7 |
| Documentary stamps, including playlo | 54.0 | 37.3 | -16.7 |
| Admissions and dues. | 34.1 | 28.4 | -5.7 |
| DIstilled spirits. | 26.4 | 21.2 | -5. 2 |
| All other. | 122. 5 | 15.9 | -106. 6 |
| Total. | 861.9 | 645.7 | -216.2 |

${ }^{1}$ The figures are based on collectors' reports and give a slightly different total than from the daily Treasury statements shown above.

Tobacco tax collections, which had increased from $\$ 16,000,000$ to $\$ 25,000,000$ during each of the three preceding years, gained only $\$ 5,500,000$ in 1927 over 1926. The loss in revenue from the reduced rates on cigars and the omission of the special tax on manufacturers almost offset the gain in collections on small cigarettes. The effect of the revised tobacco rates on the importance of small cigarettes as revenue producers is shown in diagram 5, page 15. Collections from small cigarettes now yield almost three-fourths of all tobacco collections and over 40 per cent of the total miscellaneous internal revenue. The loss of taxes on automobile trucks and autowagons, and on tires, parts, and accessories, and the reduction of the rates on passenger automobiles from 5 to 3 per cent resulted in a reduction of $\$ 71$,800,000 in collections on automobiles, the greatest loss in any one group of taxes with the exception of the capital stock tax. The decline in estate tax collections was not great- $\$ 15,700,000-n o t$ because the tax was unchanged but because the increased exemptions, reduced tax rates, and increased credits for State inheritance taxes will not be fully reflected in collections until the fiscal years 1928 or 1929 and later. Documentary stamps collections decreased $\$ 16,700,000$ as a result of the omission of certain stamp taxes; also admissions and dues, because of the increased exemption for admission; and distilled spirits, because of the reduced rates on nonbeverage distilled spirits. The omission of a number of taxes not shown separately accounts for the decline in the "all other" item. Among these are the capital stock tax, collections on which amounted to $\$ 97,400,000$ during the
fiscal year 1926; the gift tax, and miscellaneous excise taxes and occupational taxes.
Miscellaneous internal taxes, which yielded almost a third of the internal revenue collections in the fiscal year 1925 and about 30 per cent in the fiscal year 1926, produced less than one-fourth of the total in 1927, the remaining receipts coming from income taxes. Of the miscellaneous taxes, those on tobacco products now produce almost three-fifths ( 58 per cent) of the total, as compared with about twofifths in 1925 and 1926, and will net an even larger proportion when

Diagram 5.-Principal sources of collections on tobacco taxes for the fiscal years 1920 to 1927
the revisions in the 1926 law on estates and nonbeverage distilled spirits are fully reffected in collections. The burden of the tobacco taxes is, however, widely distributed among the numerous users of tobacco, particularly cigarette smokers. The other taxpayers benefiting especially by the 1926 act are those formerly paying the tax on passenger automobiles, trucks, and tires, parts and accessories, and those paying taxes on estates of decedents when all collections are made under the new rates. The removal of the capital stock tax resulted in little actual change in the tax burden of corporations because of the increased rate on corporate incomes.

## EXPENDITURES

## Increases and decreases in the fiscal year 1927

During the fiscal year ended June 30, 1927, the ordinary expenditures of the Federal Government decreased $\$ 124,000,000$, or over 4 per cent, as compared with the preceding year. As a result of this decrease, coupled with increased receipts, many of them of a temporary character, $\$ 258,000,000$ more were applied to the reduction of the public debt than in the previous year.

The expenditures of a government summarize its activities. The scope and relative importance of the various tasks required of the Federal Government are shown more clearly by a classification of its expenditures according to the various functions performed. As pointed out in my last report, there are several main groups of these functions. The first in importance at present is the service of the public debt, which includes debt retirements and interest payments; second, the military functions, which include aid to war veterans and the cost of special agencies for strictly military purposes as well as the military expenditures of the War, Navy, and other departments; third, expenditures for all other purposes from which must be deducted the amount of refunds, losses, contingencies, payments from trust funds and other nonfunctional miscellaneous disbursements in order to obtain the cost of the ordinary civil activities of the Federal Government. These ordinary civil expenditures may be further subdivided into six parts as follows: (a) "General government," which includes expenditures for Congress, the Executive office, and for administrative operations of a general character, such as the Treasury fiscal service, the work of the Civil Service Commission, and the maintenance of public buildings; (b) "Internal security," which includes disbursements for law enforcement, immigration, naturalization, public health, and special relief; (c) "Development and regulation," which includes outlays for education and research, the promotion or regulation of special groups of industries, such as, for example, agriculture, banking, commerce, labor, and railroads; (d) "Public domain, works, and industries," the most important item of which in recent years is that for the promotion of good roads; (e) "Local governments and Indians," which covers costs of the governments in the Territories and the District of Columbia, the subventions to the States, and the cost of the Indian wards of the Nation; (f) "Foreign relations," which is self-explanatory.

An interesting exhibit showing the relative importance of the functions of the Federal Government and comparisons between the last two fiscal years is given in the following table in which expenditures are classified according to the functional groupings above
described. Obviously there are other items included in "ordinary expenditures" which are nonfunctional in character and therefore not shown in these groups and not included in the table, such as repayments of trust funds and refunds of excess collections of taxes.

Comparison of expenditures in the fiscal years 1927 and 1926, by functional groups

| LIn millions of dollars] |
| :--- | :--- | ---: | ---: | ---: | ---: |

${ }^{1}$ Excess of credits, deduct.
From the facts presented in the foregoing table it appears that the principal saving during the past fiscal year was in expenditures for interest on the public debt, which decreased nearly $\$ 45,000,000$. Increases as compared with the preceding year will be noted of $\$ 21,000,000$ in military expenditures and $\$ 15,000,000$ in expenditures for development and regulation. A steady enlargement is to be expected in this developmental and regulatory group, as I pointed out in my last report, because of the rising standards and expanding sphere of governmental activity. These widespread modern tendencies are caused in turn by the increasing congestion of population and the ever-widening commercial and humanitarian horizons that are making apparent in growing numbers the cases in which unsystematic private agencies are unable to cope adequately with large-scale undertakings of intimate public interest. This group of developmental and regulatory activities is the only one under ordinary civil functions that shows a material change in the amount spent in 1927 as compared with 1926. There were actual decreases in the expenditures for General Government and for local governments (including Indian affairs), and the three other groups show almost insignificant increases. It is interesting to note that the large group of civil expenditures designated "Public domain, works, and industries," remained practically stationary, showing that the Federal Government has not been making further invasions into the field of private business. The net change as compared with the preceding year in the total for all expenditures, excluding debt retirements and excluding nonfunctional items, was a decrease of $\$ 6,400,000$.

## Percentage distribution of expenditures

The relative fiscal importance of the different functions of the Federal Government in any one year is concisely shown by the percentage of total expenditures which is due to each group. Such a percentage distribution for the fiscal year 1927, with corresponding 1926 data included for comparison, is given in the accompanying table. Diagram 6 gives the 1927 data in graphic form.

Diagram 6.-Functional distribution of expenditures, by percentages, for the fiscal year 1927
Functional distribution of expenditures, by percentages, fiscal years 1927 and 1926

|  | 1927 | 1926 |  | 1927 | 1926 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Ordinary civil functions.-...----- | Perct. | Per ct. <br> . 17.9 | Military functions.-.-.-.-.-. - . | $\begin{array}{r} \text { Per cl. } \\ 31.8 \end{array}$ | Per ct. 33.5 |
| General Government.........-- | 2.7 | 2.9 |  | 51.1 | 48.6 |
| Internal security ----.-.-...... | 2. 0 | 2.1 | Interest | 20.9 | 23.6 |
| Development and regulation. | 3.3 | 3.1 |  | . .2 | $1 .^{2}$ |
| Public domain, works, and industries $\qquad$ | 7.3 | 7.8 | Statutory retirements..........- | 13.8 16.2 | 13.8 10.8 |
| Local governments and indians. | 1.4 | 1.6 |  | (1) | (1) |
| Foreign relations....--------- | . 4 | . 4 |  |  |  |

[^4]Probably the most striking fact brought out by such a percentage distribution is the small fiscal importance of ordinary civil expenditures. These are often thought by those who have never looked into the matter to be typical of practically all the disbursements of the Government. When the average citizen grumbles over the size of his income tax payment he often visualizes his hard-earned money being spent by the Government to compile reports on business or agricultural conditions, or to erect public buildings, send diplomats abroad, carry on scientific investigations, or make and enforce laws. As a matter of fact, a small part of the taxpayer's dollar goes into work of this sort, only about one-sixth being used for all the multitudinous types of ordinary civil functions added together. One-half of each tax dollar is used for the service of the public debt, the equivalent of 20 cents being required for interest and premium payments and 30 cents for debt retirement. The remaining one-third of the taxpayer's dollar is spent on military expenditures for national defense or payments to military veterans.

## Percentage of expenditures attributable to war

It is well known to students of public finance that the peace-time budgets of modern occidental nations are largely concerned with the costs of past and future wars. The question often arises as to the percentage of United States Federal expenditures that is attributable to actual or potential wars. Needless to say, many expenditures of the Government are either always partly military and partly civil or else are predominately military in war periods but change to a distinctly civil character in times of extended peace. Any definite figure of expenditures for war must, therefore, involve many judgments that are far from mathematical certainty. Nevertheless, such approximations are worth while. The best-known compilation of data in readily available form for use in answering this inquiry was made for the years 1910 to 1920 by the late Edward B. Rosa, of the United States Bureau of Standards. His classified figures were later brought up to the year 1924 by the United States Bureau of Efficiency. In the accompanying table is shown the percentage of Federal expenditures attributable to wars, based on these data. A similar computation that excludes from expenditures for wars the amount of public debt retired from payments by foreign governments, and the cost of civil agencies used for war purposes, such as the United States Emergency Fleet Corporation and the United States Railroad Administration, is also included in the table for comparative purposes. The period covered by this latter compilation is from 1915 to 1927, inclusive.

Percentage of net Federal expenditures for wars, past and future
[Source of Rosa's data: Rosa, E. B., Expenditures and Revenues of the Federal Government, opp. p. 12]

| Fiscal year | $\left\lvert\, \begin{gathered} \text { By Rosa's } \\ \text { classifi- } \\ \text { cation } \end{gathered}\right.$ | Excluding civil agencies used for war purposes : | Fiscal year | By Rosa's classification | Excluding civil agencies used for war purposes ${ }^{1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1910 | Per cent 67.7 | - Percent | 1919. | Per cent ${ }^{88.4}$ | Per cent 85.5 |
| 1911 | 68.4 |  | 1920 | 93.7 | 70.7 |
| 1912 | 67.8 |  | 1921 | 287.7 | 72.6 |
| 1913 | 68.3 |  | 1922 | 287.5 | 87.4 |
| 1914 | 69.0 |  | 1923 | 386.7 | 83.5 |
| 1915 | 66.0 | $62.8{ }^{\circ}$ | 1924 | 889.1 | 85.0 |
| 1916 | 70.1 | 66.7 | 1925 |  | 80.2 |
| 1917 | 81.7 | 86.1 | 1926. |  | 81.2 |
| 1918. | 97.4 | 90.2 | 1927 |  | 82.0 |

[^5]This table shows that in modern times the Federal tax burden of one generation is largely determined by the military activities of the preceding one. In the fiscal year 1927 expenditures for interest on the public debt exceeded by over $\$ 140,000,000$ the aggregate amount of ordinary civil expenditures, while military expenditures were almost twice civil expenditures, and exceeded the amount of all retirements of the public debt by nearly $\$ 70,000,000$.

## THE SURPLUS

Since 1920 each fiscal year has shown an excess in the ordinary receipts of the Government over expenditures chargeable against those receipts. This excess, called "the surplus," in the eight-year period since 1920 has totaled $\$ 2,692,000,000$. For the fiscal year just passed it amounted to $\$ 635,000,000$, the largest surplus in any one year from the operations of this Government." The following table presents the figures for each year since 1920 :

Ordinary receipts and expenditures chargeable against ordinary receipts, 1920 to 1926
[On basis of daily Treasury statements (unrevised)]

|  | Fiscal year | Total ordinary receipts | Expenditures chargeable against ordinary receipts | Surplus |
| :---: | :---: | :---: | :---: | :---: |
| 1920. |  | \$6, 694, 565,388 | \$6, 482, 090, 191 | \$212, 475, 197 |
| 1921. |  | 5, 624, 932, 960 | 5, 538, 209, 189 | 86, 723, 771 |
| 1922 |  | 4, 109, 104, 150 | 3, 795, 302, 499 | 313, 801, 651 |
| 1923 |  | 4, 007, 135, 480 | 3,697, 478, 020 | 309, 657, 460 |
| 1924. |  | 4, 012, 044, 701 | 3, 506, 677, 715 | 505,366, 986 |
| 1925. |  | 3, 780, 148, 684 | 3, 529, 643, 446 | 250, 505, 238 |
| 1926. |  | 3, 962, 755, 690 | 3,584, 987, 873 | 377, 767, 817 |
| 1827. |  | 4, 129, 394, 441 | 3, 493, 584, 519 | 635, 809, 922 |

The surpluses since 1920 have occurred in general because expenditures have been reduced in greater amount than have receipts under the various revisions in the tax system and because of the gradual liquidation of assets acquired during the recent war. Although receipts fell off rapidly during 1921 and 1922 on account of the cut in taxes in the revenue act of 1921 and the depression of those years, receipts exceeded expenditures because expenditures were cut in greater proportion. In 1923 and 1924 total receipts changed little, but expenditures continued to decline and the surplus increased. In 1925, when expenditures increased slightly and receipts declined, the surplus of the previous year was cut in half. The increase in surplus in 1926 over 1925 was due to the large yield of taxation.
In 1927 receipts increased over the preceding year and expenditures decreased, resulting in a large surplus. The increase in total receipts amounted to $\$ 167,000,000$. Ordinary expenditures decreased $\$ 124,000,000$. Public debt retirements chargeable against ordinary receipts increased $\$ 32,000,000$, giving a net decrease in total expenditures chargeable against ordinary receipts of $\$ 92,000,000$. The principal items of change are shown in the following table:

Principal change in ordinary receipts and expenditures chargeable against ordinary receipts in the fiscal year 1927 over 1926
[On basis of daily Treasury statements (unrevised)]

| Receipts-Increases | Expenditures |  |  |
| :---: | :---: | :---: | :---: |
|  | Decreases | Increases |  |
| Customs........-...-- \$26,000,000 | Interest payments | General expendi. |  |
| $\begin{array}{cc}\text { Internal revenue (large- } \\ \text { ly income taxes) } & 32,000,000\end{array}$ | Customs and internal revenue | tures_...- | $31,000,000$ |
| Foreign repayments 11,000,000 |  | surance fund...- | , 000, 000 |
| Railroads (primarily | Civil service retire-: | Debargeable against |  |
| securities sold) -...... 53, 000,000 | ment fund.......- 11, 000,000 | ordinary receipts.- | 32,000, 000 |
| Federal farm loan | Other items.-......- $15,000,000$ |  |  |
| $\begin{array}{rr}\text { bonds, etc............ } & 20,000,000 \\ \text { Miscellaneous (net).... } & 16,000,000\end{array}$ | - ... |  |  |

The surplus of 1927 was an anomaly, resulting from a combination of unusual and nonrecurring items in both receipts and expenditures. Almost two-thirds of the surplus of $\$ 635,000,000$ was due to receipts on account of the disposal of capital assets, of back collections in excess of tax refunds, and other items of a fast-disappearing or nonrecurring character.

About $\$ 103,000,000$ of the surplus consisted of receipt items which will not occur again. The Federal farm loan bonds owned by the Government, which contributed $\$ 60,000,000$ in 1927 in the form of receipts from capital assets, have all been repurchased by the Federal land banks, so that no further receipts from this source can again
occur. The War Finance Corporation, accounting for $\$ 27,000,000$ in the 1927 receipts, has practically completed the liquidation of its assets. Receipts from minor securities amounted to $\$ 3,000,000$. The capital stock tax, which produced $\$ 8,000,000$ in 1927, has been repealed. The surplus was further increased by $\$ 5,000,000$ received from a judgment of the court relating to the naval oil leases.

Among the temporary or fast-disappearing receipts received in 1927 are those on account of railroad securities, which aggregated about $\$ 89,000,000$. Railroad securities to the amount of only $\$ 230$,000,000 were held by the Government at the end of the last fiscal year. It is estimated that whereas $\$ 169,000,000$ will be received on account of principal and interest on these securities in the fiscal year 1928 the revenue from this source will drop to approsimately $\$ 24,000,000$ in the fiscal year 1929 , and after that little or no revenue is anticipated under this head. Back income tax collections in 1927 amounted to $\$ 331,000,000$, which, when reduced by the sum of $\$ 117,000,000$ paid in tax refunds, leaves a balance of $\$ 214,000,000$ in revenue from this source. The work of the Internal Revenue Bureau is becoming more nearly current every year, and while some net receipts on this account will continue to be realized it is expected that after the fiscal year 1929 the amount will be greatly reduced. Moreover, tax refunds in 1927 were $\$ 35,000,000$ less than Treasury estimates, due to a change in the application of the revenue law. This reduction represents merely a postponement of expenditures, the payment of which will swell expenditures in 1928, thus cutting down net receipts from back taxes for that year. Receipts from the sale of surplus war supplies amounted to $\$ 8,000,000$ in 1927.

Without the nonrecurring and fast-disappearing items listed above, aggregating about $\$ 414,000,000$, a surplus of only about $\$ 221,000,000$ would have resulted. The important part played by these temporary and nonrecurring receipts in producing the surplus of the last few years is shown in the table on page 23.

Principal receipt items of a nonrecurring or temporary type increasing the surplus in the fiscal years 1923, 1924, 1925, 1926, 1927 , and 1928 ${ }^{1}$

${ }^{1}$ Estimated.
${ }^{2}$ Back income tax collections tor fiscal years 1923 and 1924 are best available estimates. Figures of actual collections were not kept separate for those years.
${ }^{3}$ Excess payments.
Figures of actual collections were not kept separate for those years.

The surpluses since 1920 have been applied to a reduction of the public debt. Public debt retirements thus made do not occur at the end of each fiscal year from excess receipts accumulated during the year, but throughout the year, and especially as a part of Treasury financing from quarter to quarter. A few weeks prior to the 15th of each September, December, March, and June the Treasury determines what income it will need to meet the expenditures during the coming quarter, taking into account on the receipt side the net balance in the general fund and the Government receipts to be expected and on the expenditures side the amount of cash required to meet obligations maturing during the quarter and the probable expenses of the Government during the same period. The estimated excess of required expenditures over probable receipts during the ensuing quarter is met by the issue of new securities. If, therefore, receipts are running ahead of expenditures chargeable against such receipts, the amount of new securities sold at the quarterly date is less than the amount of maturing securities.

The following table shows the actual application of the surplus to public debt retirement, by quarters:

Surplus applied to public debt retirement, by quarters, flscal year 1927
[On basis of daily Treasury statement (unrevised)]

|  | Quarters | Amount |
| :---: | :---: | :---: |
| Sept. 30, 1926. |  | \$36,296, 262 |
| Dec. 31, 1926. |  | 164,975,456 |
| Mar. 31, 1927. |  | 5, 019. 100 |
| June 30, 1927. |  | 405, 463, 720 |
| Total. |  | 611,754,538 |

As a result of the foregoing operations $\$ 611,000,000$ of the fiscal year's surplus of $\$ 635,000,000$ was applied to the retirement of the public debt during the fiscal year, and the $\$ 24,000,000$ carried over as an increase in the net balance in the general fund of the Treasury at the close of the year over the net balance at the beginning was immediately used for the same purpose.

The existence of a surplus in any particular year or group of years is not prima facie evidence that the Government has sources of revenue in excess of normal needs for the exercise of its functions. The foregoing analysis of the surplus of 1927 should indicate clearly that that surplus can not be taken as a criterion of the future. Temporary and nonrecurring revenues must be discounted in estimates for coming years, the swing of the business pendelum must be taken into account, normal increases in expenditures must be provided for, and possible further effects of changes in the revenue act must be allowed to show themselves before reduction of taxies can be under-
taken. It is only if genuine surpluses occur after such provision that taxes can safely be cut to leave in the hands of the people that income which is unnecessary for the execution of Government activities.

## ESTIMATES OF RECEIPTS AND EXPENDITURES

## Estimates of previous years

Reductions in taxation since the war have been based on estimates of future receipts and expenditures of the Government, the estimated tax receipts and certain of the estimated miscellaneous receipts having been prepared by the Treasury. During the past five fiscal years two downward revisions of taxation have been made-in the revenue acts of 1924 and 1926-and another change is now in prospect. In making such tax revisions the estimates of Government income and outgo for coming years are important in determining how far taxation can be reduced. In this connection a reasonable accuracy in estimates of Government tax receipts is particularly important.

The three diagrams which follow on pages 26 and 27 have been prepared to show the discrepancies that have occurred in preparing estimates during the past five years, and the allocation of such amounts among the principal sources of revenue. The estimates shown are those submitted to Congress seven months before the end of the particular fiscal year, with the exception of 1926 , for which year estimates are those prepared just after the passage of the revenue act of 1926. The first diagram (diagram No. 7, p. 26) shows the estimated and actual receipts, expenditures, and surplus during the five-year period, thus indicating the relation of differences between estimates and actual receipts and expenditures to the difference in the estimated and actual surplus. The two subsequent diagrams (diagrams 8 and 9 , on pp. 26 and 27) show the estimated and actual receipts from each of the four general sources-income taxes, miscellaneous internal taxes, customs, and miscellaneous receipts. Percentages of difference inserted over the bars for each year permit a comparison of the discrepancies in the various sources.
There are two significant observations to be made from these diagrams: (1) Discrepancies in estimates of surplus have not resulted entirely from underestimation of receipts. This was especially true of the past fiscal year when expenditures ran 4.3 per cent below the estimate. (2) The greatest differences in estimated receipts have occurred in income tax receipts and in miscellaneous receipts. On the whole, the error in estimating miscellaneous receipts has been larger, both in amount and relative to the importance of the source, than the error in estimating income tax receipts.

Diagram 7.-Estimated ordinary receipts, expenditures chargeable against ordinary receipts, and surplus or deficit, compared with actual amounts for the fiscal years 1023 to 1927

Diagram 8.-Estimated receipts from income taxes and miscellaneous internal revenue for the fiscal years 1923 to 1927 compared with actual receipts

The Treasury estimates have been made in the face of a number of difficulties of no minor importance:
(1) Two thoroughgoing revisions have been made in internal taxation and one revision has been made in the tariff. The changes in internal taxes affected not only exemptions, credits, and tax rates on individual incomes and the rate on corporation income but also a large number of miscellaneous internal taxes. The effect of a tax change on the base of a tax, especially under changing business conditions, can be estimated with only a certain degree of accuracy. This accounts, in part, for discrepancies in estimates of income taxes and miscellaneous internal revenue in the fiscal years 1925, 1926, and 1927. The tariff act of 1922, approved September 21, 1922, accounts for the unusually large error in customs receipts for the fiscal year 1923.

Diagram 8.—Estimated receipts from customs and miscellaneous sources for the fiscal years 1923 to 1927 compared with actual receipts
(2) The five-year period has been, on the whole, one of unusual prosperity for the Nation, which it was not possible accurately to forecast. It is because of such prosperity that incomes of corporations and individuals made a great increase in the calendar year 1923, sustained a remarkable part of these gains during the recession in the calendar year 1924, and reached new high levels in the calendar years 1925 and 1926.
(3) During the same five years the Bureau of Internal Revenue has concentrated on a program of disposing of the accumulation of tax cases outstanding, especially income tax returns of the war years, and a reorganization of the bureau to promote prompter administration of current returns. The chief result has been large collections on prior year returns outstanding and therefore much larger back tax collections than anticipated. The unexpected size of these items has also added to the discrepancies shown in income tax estimates in the past three years.
(4) Receipts from miscellaneous items have been affected by unusual receipts from Government-owned securities, especially the railroad and Federal farm loan securities, due to favorable financial conditions. The Treasury has consequently reduced its holdings of such securities much faster than anticipated, and total receipts from miscellaneous sources have been much larger than estimated.

Estimates for the fiscal years 1928 and 1929; compared with actual amounts for the fiscal year 1927

The following table summarizes cash receipts and expenditures during the fiscal year 1927 and the estimated receipts and expenditures for the fiscal years 1928 and 1929 on the basis of the latest information received from the Bureau of the Budget:

Summary of receipts and expenditures on the basis of daily Treasury statements (unrevised)

|  | Actual, fiscal year 1927 | Estimated, fiscal year 1928 | Estimated, fiscal year 1929 |
| :---: | :---: | :---: | :---: |
| Net balance in the general fund at the beginning of fiscal year. | \$210,002,027 | \$234, 057, 410 | \$210,002, 027 |
| Receipts: |  |  |  |
| Ordinary Public debt | $4,129,394,441$ $12,756,410,766$ | $4,075,598,091$ $3,238,115,237$ | $3,809,497,313$ $1,319,176,324$ |
| Total | 7,095, 807, 234 | 7,547, 770, 738 | 5, 338,675, 664 |

| Total | 7,095, 807,234 | 7, 547, 770, 738 | 5,338,675, 664 |
| POSTAL SERVICE |  |  |  |
| Postal receipts | 683, 121, 889 | 710, 500,000 | 753,000,000 |
| Postal expenditures | 710, 385, 180 | 740, 870,400 | 768,270,042 |
| Deficiency in postal receipts ${ }^{\text {? }}$ | 27,263,191 | 30,370, 400 | 15,270, 042 |

${ }^{1}$ Other public debt expenditures and public debt receipts, as shown in this statement, are exclusive of $\$ 2,428,673,500$ Treasury certificates issued and retired within the same fiscal Year.
${ }^{3}$ The postal deficiency for 1927 and the estimated postal deficiencies for 1928 and 1929 are included in the ordinary expenditures shown above and in the general classification of ordinary expenditures and estimated ordinary expenditures on p. 31.

Ordinary receipts, and expenditures chargeable against ordinary receipts, for the fiscal years 1926 and 1927, on the basis of daily Treasury statements (unrevised), with corresponding estimates for the fiscal years 1928 and 1929, are shown in the table on page 30. Ordinary receipts include all receipts other than those from public debt transactions. While ordinary expenditures similarly exclude expenditures for the retirement of the public debt, expenditures chargeable against ordinary receipts include, in addition to ordinary expenditures, the statutory retirements of the public debt from the
sinking fund and from special earmarked receipts, such as repayments of the indebtedness of foreign governments. The estimates in the table are on the basis of the latest information received from the Bureau of the Budget.
Public debt expenditures and receipts for the fiscal year 1927, by types of issue, with corresponding estimates for the fiscal years 1928 and 1929, are given in the table on page 33. The figures for 1927 are on the basis of daily Treasury statements (unrevised). Public debt expenditures and public debt receipts, as shown in this table, are exclusive of Treasury certificates issued and retired within the same fiscal year. They include, however, the amount of exchange transactions in public debt issues.

Receipts and expenditures for the fiscal years 1926 and 1927, and estimated receipts and expenditures for the fiscal years 1928 and 1929, on the basis of daily Treasury statements (unrevised)

i Includes $\$ 2,000,000$ estimated by Department of Commerce for tonnage tax, receipts on account of which are covered into tbe Treasury as customs revenue.
${ }^{2}$ During the fiscal year 1927 allotments for veterans' relief have been made to the Treasury Department in the amount of $\$ 249,386.20$, to the War Department in the amount of $\$ 4,664,400.36$, to the Navy Department in the amount of $\$ 5,900$, and to the Interior Department in the amount of $\$ 30,000$. Similar allotments in the fiscal year 1926 to the Treasury Department were $\$ 372,878.53$, to the War Department $\$ 4,933,149.13$, to the Navy Department $\$ 754,451.62$, and to the Interior Department in the amount of $\$ 41,000$. Expenditures under these allotments, however, appear as expenditures of the respective departments and not of the Veterans' Bureau.
${ }^{8}$ Add.
Includes $\$ 5,821,883.67$ for 1926 and $\$ 2,401,478.49$ for 1927 , accrued discount on war savings certificates of matured series.
Excess of credits (deduct).
${ }^{6}$ For details of this account see p. 134. The difference between amounts of above charges and the amounts appropriated for investment is due to working balance required for use of Veterans' Bureau in making authorized payments from the fund.

Under provisions of the amendment of July 3, 1926, to the act establishing the civil service retirement and disability fund and regulations issued pursuant thereto, beginning July 1, 926 , expenditures for salary, pay, or compensation of employees entitled to the benefits of the act are at the full amount due. Retirement-fund deductions are deposited bearing interest at the compensation. The figures for the fiscal years 1925 and 1926 represent only investments of employegs' contributions not required for current expenditure. For a more detailed explanation of this account, see p. 135.

## THE PUBLIC DEBT

General review of operations in the fiscal year 1927
During the fiscal year 1927 the gross debt of the United States was reduced from $\$ 19,643,183,079.69$ outstanding at the beginning of the year to $\$ 18,510,174,266.10$ outstanding at the close. The reduction accordingly was $\$ 1,133,008,813.59$. This reduction was brought about (1) through normal retirements of $\$ 519,563,844.78$ chargeable against ordinary receipts in accordance with the established debtpayment program, and (2) through the application of $\$ 613,444,968.81$ surplus revenue to debt payment.

The changes in the debt outstanding during the fiscal year 1927 are presented graphically in diagrams 10 , below, and 11 on page 35.

Diagram 10.-Gross public debt outstanding and average annual interest rate from January, 1919, to October, 1927

Diagram 10 shows the gross public debt outstanding and the average interest rate since January, 1919. The amount of interest-bearing debt outstanding at the end of the year, by type of issue, as compared with preceding years since 1917 is shown in diagram 11.

During the year in regular course five issues of interest-bearing securities were offered to the public for cash subscription, all on quarterly tax-payment dates. The issue of September 15, 1926, was in the form of $31 / 2$ per cent nine months' Treasury tax certificates of indebtedness, the amount of the issue being $\$ 378,669,500$. A similar issue was made on December 15, 1926, the rate, however, being $31 / 4$ per cent, and the amount of the issue $\$ 229,269,500$. On March 15, 1927, two series of Treasury tax certificates of indebtedness were
issued-one with six months' maturity at $31 / 8$ per cent, in amount $\$ 169,888,000$, and the other with one year maturity at $31 / 4$ per cent, in amount $\$ 314,408,000$. The rates at which these securities were issued, as compared with rates on similar issues in preceding years and as compared with the average yield on 4-6 months' certificates of indebtedness, are shown in diagram 12, page 36. The issue of June 15,1927 , took the form of $16-20$ year $33 / 8$ per cent Treasury bonds, and through this issue $\$ 249,598,300$ cash was brought into the Treasury. This issue was also offered in exchange for second Liberty loan bonds, and exchange subscriptions amounting to $\$ 245,256,450$ were received and accepted, making the total of the issue $\$ 494,854,750$, only $\$ 467,801,650$, however, having been issued to June 30, 1927.

Diagram 11.-Interest-bearing debt outstanding at the end of each fiscal year from 1917 to 1927, by type of issue.

For the necessary financing for the first quarter of the fiscal year 1928 two offerings were made for September 15, 1927, an issue of Treasury tax certificates of indebtedness, bearing interest at 3 per cent and maturing in six months, in amount $\$ 250,577,500$, and an issue of $31 / 2$ per cent Treasury notes, maturing in five years but callable on and after three years from date of issue. This latter was a combined offer, cash subscriptions and exchange subscriptions payable in second Liberty loan $41 / 4$ per cent bonds being invited. Cash subscriptions amounting to $\$ 250,522,600$ and exchange subscriptions amounting to $\$ 368,973,100$ were accepted; the total of the issue was $\$ 619,495,700$.

In addition to the five regular issues of interest-bearing securities in the course of the year, above referred to, an issue of $31 / 2$ per cent Treasury notes maturing in five years, but callable on and after three years, was offered on March 15, 1927, in exchange for second Liberty loan $41 / 4$ per cent bonds. In response to this offer $\$ 1,360,456,450$ Treasury notes were issued against the surrender of a like amount of second Liberty loan $41 / 4$ per cent bonds. Details regarding the issue of September 15, 1926, may be found in report for the fiscal year 1926. Details concerning the other issues may be found elsewhere in this report.

Diagram 12.-Yield on outstanding 4-6 months' certificates of indebtedness and rate of interest on new issues for the calendar years 1920 to 1927

The effect of the year's operations on the amount of debt maturing in the near future is indicated graphically in diagram 13, page 37, which shows the amount of interest-bearing debt outstanding at the end of 1927, as compared with preceding fiscal years, distributed according to period before maturity.

The Secretary of the Treasury is required to invest and reinvest the moneys available on account of the adjusted service certificate fund, the civil service retirement fund, and the foreign service retirement fund. Investments are made in a special series of Treasury notes and Treasury certificates of indebtedness bearing interest at 4 per cent.

## Refunding the second Liberty loan

Early in the present calendar year conditions were such as to warrant the belief that the Government could sell securities with a maturity in excess of two or three years at $31 / 2$ per cent. In the circumstances the desirability of retiring $41 / 4$ per cent bonds was obvious. It was also desirable, from a Treasury viewpoint, to make some rearrangement of maturities in more convenient amounts and on more convenient dates for serving the permanent debt-payment program.

There were outstanding, on February 28, 1927, \$2,160,006,900 third Liberty loan $41 / 4$ per cent bonds due for payment on September 15,

Diagram 13.-Interest-bearing debt outstanding at the end of each fiscal year from 1919 to 1927, distributed according to the period before maturity

1928, but not callable before that date, and $\$ 3,083,671,700$ second Liberty loan converted $41 / 4$ per cent bonds together with $\$ 20,848,350$ second Liberty loan 4 per cent bonds, maturing in 1942, and callable, in whole or in part, on and after November 15, 1927, on six months' notice. As a practical matter these were the only two issues available for early retirement. Accordingly plans were considered for effecting a substantial reduction in the amount outstanding of either or both of these two issues. Both issues commanded substantial premiums in the market, and it was certain that some inducement must be offered holders, otherwise exchange offers, at lower interest rates, would not be availed of in advance of maturity or redemption date. As between these two issues the situation was more favorable
with respect to the second's for undertaking refunding operations. A conclusion was accordingly reached to offer to holders of second Liberty loan $41 / 4$ per cent bonds, an issue of $31 / 2$ per cent Treasury notes, dated March 15, 1927, due in five years, but callable at the option of the United States on and after three years from date of issue. These notes were issued only against the surrender of second Liberty loan $41 / 4$ per cent bonds, exchange being made at par, but as an inducement to holders of second Liberty loan $41 / 4$ per cent bonds to make the exchange, interest on the bonds surrendered was prepaid in full to May 15, 1927. In response to this offer $\$ 1,360,456,450$ second Liberty loan $41 / 4$ per cent bonds were exchanged for a like amount of $31 / 2$ per cent Treasury notes.

The response to this exchange offer, which reduced the outstanding second Liberty loan $41 / 4$ per cent bonds from $\$ 3,083,000,000$ to about $\$ 1,723,000,000$, made certain a successful refunding of the entire loan. Accordingly, on May 9, 1927, by public announcement, and through the issue of Department Circular No. 381 of the same date, all outstanding second Liberty loan bonds were called for redemption on November 15, 1927, with notice that interest would cease on that date.

Because of the intensive nation-wide campaigns conducted when the Liberty loans were issued, at which time every available facility u as used to reach the public and secure subscriptions, which resulted in unparalleled widespread distribution of the bonds, the Treasury recognized an obligation to the holders of second Liberty loan bonds to make every effort through the use of every available facility to notify them that their bonds were called for redemption. The press, as usual, responded and carried the announcement widely as a matter of public concern. Banks and trust companies throughout the country were asked to cooperate and generously gave their assistance. The cooperation of the Postal Service was whole-heartedly given. Placards setting forth the call were displayed in practically every banking office and post office throughout the United States. The announcement in the form of an advertisement was placed in all daily, weekly, and semiweekly general newspapers throughout the United States which could be reached. For the first time the radio was used by the Treasury Department as a means of reaching millions of bond holders, the announcement of the call being broadcast through the courtesy of the National Broadcasting Co., its entire facilities being placed at the disposal of the Treasury, covering the country as far as Kansas City. Simultaneously similar broadcasts were made from Denver and from San Francisco by Treasury representatives.

At the time of the issue of the call it was intimated that at some time prior to the redemption date the Treasury might extend to
holders an opportunity to exchange their bonds for other interestbearing securities of the United States. This privilege was extended in connection with the June 15, 1927, issue of $33 / 8$ per cent Treasury bonds of 1943-1947, limited amounts of which were offered for cash subscription at $1001 / 2$, and at the same time offered at par in exchange for second Liberty loan bonds. In response to this exchange offer $\$ 2,966,700$ second Liberty loan 4 per cent bonds and $\$ 242,289,750$ second Liberty loan $41 / 4$ per cent bonds were exchanged for like amounts of the new $33 / 8$ per cent Treasury bonds.
As a further step in the refunding, holders of second Liberty loan $41 / 4$ per cent bonds were offered the privilege of exchanging such bonds on September 15, 1927, for the identical issue of $31 / 2$ per cent Treasury notes, offered for that date for cash subscription. For this issue of Treasury notes, the terms and conditions of which were similar to those of the March 15 issue, the price on exchange subscriptions was fixed at $1001 / 8$. Interest on second Liberty loan $41 / 4$ per cent bonds surrendered for exchange was prepaid in full to November 15, 1927. Under this offer $\$ 368973,100$ second Liberty loan $41 / 4$ per cent bonds were exchanged for $31 / 2$ per cent Treasury notes.

Meanwhile under authority of section 2 of the act of Congress approved March 3, 1881, purchases of second Liberty loan bonds from time to time were made from surplus moneys in the Treasury. Such purchases for the most part were made under established procedure, authorizations being given the Federal Reserve Bank of New York for execution in the New York market, or through other Federal reserve banks in other markets. This procedure was varied on June 16, 1927, when, through Department Circular No. 384 of that date, proposals were invited from holders of second Liberty loan bonds for the sale of such bonds to the Government, the offer providing that purchases of such bonds would be made at the lowest acceptable prices offered. Under this offer $\$ 324,700$ second Liberty loan 4 per cent bonds were purchased at a total principal cost of $\$ 326,010.81$, the average price being 100.40369 , and $\$ 62,641,550$ second Liberty loan $41 / 4$ per cent bonds were purchased at a total principal cost of $\$ 62,945,487.09$, the average price being 100.4852 .
Other purchases from surplus moneys aggregated $\$ 182,442,200$ par amount of second Liberty loan $41 / 4$ per cent bonds, at a total principal cost of $\$ 183,166,231.21$, the average price being 100.39686 .

Since July 1, 1927, second Liberty loan bonds have, from time to time, been purchased for the cumulative sinking fund, a total of $\$ 126,-$ 767,250 par amount having been purchased to October 31, 1927. Until October 17 purchases were made under usual procedure at the market. On that date the Treasury, in calling attention to the fact
that the second Liberty loan had been called for redemption on November 15,1927 , announced that for the convenience of holders the Federal reserve banks had been authorized to purchase, at the option of holders, second Liberty loan $41 / 4$ per cent bonds at $100_{3 \frac{3}{3}}$ and accrued interest during the week October 17-22. A similar offer was made for the following week, October 24-29, the principal price for the week being fixed at $100 \frac{2}{32}$. On October 31, 1927, announcement was made that purchases would be made at $100 \frac{1}{3} \frac{1}{2}$ during the period October 31 to November 7, and that thereafter until the close of business November 12, both 4's and 41/4's would be purchased at par and accrued interest. Under these offers $\$ 48,280,800$ were purchased at $100_{3 \frac{3}{3}}, \$ 24,945,600$ at $100_{\frac{2}{32}}, \$ 18,028,450$ at $100_{\frac{1}{3}}^{\frac{1}{2}}$, and $\$ 2,314,100$ at par.

Through these various operations conducted since March 1, 1927, the second Liberty loan was reduced from $\$ 3,104,520,050$ then outstanding to $\$ 757,545,500$ outstanding on October 31, 1927.

Except for such amounts as may have subsequently been retired through purchases for the cumulative sinking fund, the balance outstanding on October 31, 1927, was the amount outstanding and due fior payment on November 15, 1927.

The various steps taken to effect the refunding of this loan are recapitulated in the following table:

Second Liberty loan
(Second 4's and Second 41/4's combined)

| Original issue Nov. 15, 1917 ----------------------------------83, 807, 865,000 |  |
| :---: | :---: |
| Outstauding Feb. 28, 1927: |  |
|  |  |
| Second 41/4's.--------------------------3,-383, 671,700 |  |
|  | 3, 104, 520, 050 |
| Retired Mar. 1 to Oct. 31, 1927: |  |
| Mar. 15, exchanged for $31 / 2$ per cent Treasury notes, Series |  |
|  | 1, 360, 456, 450 |
| June 15, exchanged for $33 / 8$ per cent Treasury bonds 1943- |  |
|  | 245, 256, 450 |
| Sept. 15, exchanged for $31 / 2$ per cent Treasury notes, Series |  |
| B-1930-1932 | 368, 973, 100 |
| Purchased for cumulative sinking | 126, 767, 250 |
| Purchased from surplus money | 245, 408, 450 |
| Forfeitures, gifts, etc. | 112, 850 |
| Total | 2, 346, 974,550 |
| Outstanding Oct. 31, 1927 | 757, 545,500 |

From the foregoing it will be observed that since March 1, 1927, to October 31, 1927, $\$ 1,974,686,000$ par amount has been refunded into other issues, and $\$ 372,288,550$ par amount has been redeemed. A comparison of the annual interest charges on account of the second Liberty loan on February 28, 1927, and on October 31, 1927, the exchange issues being included on the latter date, may be of interest. It follows:

| Title | Amount outstanding | Interest rate | Annual interest charge |
| :---: | :---: | :---: | :---: |
|  | Feb. 28, 1087 |  |  |
| Second Liberty loan bonds. | $\$ 20,848,350$ | 4 | \$833, 934.00 |
| Do. | 3, 083, 671, 700 | 41/4 | 131, 056, 047.25 |
|  | 3, 104, 520, 050 |  | 131,889, 981.25 |
|  | Oct. 91, 1027 |  |  |
| Second Liberty loan bonds. | \$17, 171,100 | 4 | 686,844.00 |
|  | 740, 374,400 | 414 | 31, 465, 912. 00 |
| Treasury notes, Series A-1930-1932. | ${ }^{1} 1,360,456,450$ | $31 / 2$ | 47, 615,975. 75 |
| Treasury notes, Series B-1930-1932. | 2 368, 973, 100 | 31/2 | 12, 914, 058. 50 |
| Treasury bonds, 1943-1947. | ${ }^{2} 245,256,450$ | 33/8 | 8, 277, 405. 19 |
|  | 2,732,231,500 |  | 100, 960, 195.44 |

${ }^{1}$ Amount issued on exchange; $\$ 1,300,014,650$ outstanding Oct. $31,1927$.
2 Amount issued on exchange.
Redemptions as of November 15, 1927, of the balance of the second Liberty loan bonds then outstanding, which will have been made in part from remaining proceeds of September 15 issues of $31 / 2$ per cent Treasury notes and 3 per cent certificates of indebtedness, and in part from proceeds of $31 / 8$ per cent Treasury certificates of indebtedness, issued November 15, 1927, will show a further reduction in interest charges.

## CONDITION OF THE TREASURY

The cash position of the Treasury on June 30, 1927, is set forth in the following table, which is on the basis of daily Treasury statements, revised on account of reports received after July 1. Assets in the form of securities held by the United States Government are shown in Table 65, page 626; and outstanding liabilities in the form. of public debt issues are listed in Tables 23 and 24, pages 502 and 505.

## Condition of the Treasury, June 30, 1927 <br> \section*{[Revised Agures]}

General tund:

In Treasury offices-
Gold
Standard silver doliars
United States notes.
Federal reserve notes
Federal reserve bank notes
National-bank notes.
Subsidiary silver coin.
Minor coin.
Silver hullion (at cost)
Unclassifed (unassorted currency, etc.)
In Federal reserve banks-
To credit of Treasurer of the United States.

The gold reserve fund was increased by $\$ 1,231,834.78$ during the year, and now amounts to $\$ 155,420,720: 98$. Redemptions of United States notes (greenbacks) unfit for circulation amounted to $\$ 280$,500,000 during the year, and an equal amount was issued as required by law.

## RECOMMENDATIONS FOR LEGISLATION

## Revision of the revenue act

My statement before the Ways and Means Committee on October 31, 1927, was as follows:

As an essential preliminary to any program of tax reduction, it is necessary to estimate revenue and expenditures not only for the present but also for the next fiscal year. It is further desirable to ascertain if possible, by eliminating temporary and unusual items, what the normal revenues of the Government are under existing tax laws, given average business conditions. Financial policy to be sound must not be based upon the experience of a single year. We must not be unduly impressed by the revenue results of a year of unusual prosperity or a year of large receipts from temporary sources.

In cooperation with the Budget Bureau, the Treasury Department has prepared its estimates, but before presenting them it seems desirable to say a word or two about past estimates, and in order to avoid similar errors in the future to point out the reasons for such miscalculations as have occurred in the more immediate past.
The last estimates for the fiscal year 1926 were made just prior to the passage of the revenue act of 1926. As published in the Congressional Record, they showed total internal revenue collections of $\$ 2,612,500,000$, whereas actual collections aggregated $\$ 2,835,999,892$, or, in other words, internal revenue collections were underestimated by $\$ 223,499,892$. The return from corporation taxes was overesti-
mated by $\$ 55 ; 000,000$, and that from miscellaneous internal revenue underestimated by approximately $\$ 20,000,000$. But the two principal items which contributed to this large underestimate of revenue were individual income taxes, the yield of which was estimated at $\$ 603,800,000$, whereas collections aggregated $\$ 745,392,481$, and back tax collections which were estimated at $\$ 180,000,000$ but which reached the figure of $\$ 295,982,056$. The revenue act of 1926 eliminated about $2,000,000$ individual taxpayers; it increased by 50 per cent and 40 per cent, respectively, the exemptions for single and for married persons; it cut the normal tax rates drastically and reduced maximum surtax rates from 40 per cent to 20 per cent; it doubled the limit of income to which the earned income provision applied. It was very naturally anticipated that these changes would result in a considerable loss of revenue. In its report the Ways and Means Committee estimated a reduction of $\$ 46,000,000$ in normal tax, over $\$ 98,000,000$ in returns from the surtax, and a further loss in revenue of $\$ 42,000,000$ due to increased exemptions. As a matter of fact, however, the individual returns filed for the calendar year 1925 showed a larger tax return than did those for 1924, the total (net income) tax returned increasing from $\$ 704,000,000$ to $\$ 734,000,000$. The Treasury Department had always contended that lower rates would be more productive than the very high rates which prevailed, but neither the Treasury Department nor the Congress had anticipated such an immediate increase, an increase which was, of course, greatly accelerated by the rising tide of prosperity. Had the reductions contained in the 1926 act been applied to the 1924 returns, the tax would have been over 30 per cent less than that actually returned for 1924.

Back tax collections exceeded the estimates by approximately $\$ 116,000,000$.

In October, 1926; after the new act had been in force for about nine months, the Secretary of the Treasury submitted estimates for the fiscal year 1927. In these estimates the return from the corpora'tion income tax was estimated at $\$ 1,120,000,000$. Actual collections aggregated about $\$ 1,125,000,000$, or an underestimate of $\$ 5,000,000$. Individual income tax returns were estimated at $\$ 820,000,000$, whereas actual collections aggregated approximately $\$ 763,000,000$ or an overestimate of $\$ 57,000,000$. Back taxes were estimated at $\$ 250,000,000 ; \$ 331,000,000$ were actually collected, or an underestimate of $\$ 81,000,000$. Miscellaneous internal revenue was estimated at $\$ 619,000,000$, whereas actual collections aggregated $\$ 646,000,000$. The total internal revenue taxes were estimated at $\$ 2,809,000,000$, and actually $\$ 56,000,000$ more than the estimate were collected. But had there not been such a large increase in back tax collections, the estimate would actually have been some $\$ 25,000,000$ too high.

Turning now to the question of surplus, we find that the surplus for 1927 exceeded the estimate by $\$ 252,000,000$. This is accounted for by an increase of $\$ 102,000,000$ in total receipts and a decrease of $\$ 150,000,000$ in expenditures. On the receipt side, the increase is accounted for by two items-an increase of $\$ 81,000,000$ in back tax collections, and an increase of $\$ 57,000,000$ in receipts from the railroads on account of the realization of capital assets. The increase in these two items more than offset an overestimate of current revenue.

If the items going to make up the surplus be analyzed, it will be found that 65 per cent of the surplus of $\$ 635,000,000$ is due to receipts on account of the disposal of capital assets, back income tax collections in excess of internal revenue refunds, and other items of a fast disappearing or nonrecurring character. Without these special and nonrecurring items, which aggregated $\$ 414,000,000$, the surplus would have been $\$ 221,000,000$. This is likewise true of the fiscal year 1926. The surplus that year was $\$ 377,000,000$, but exclusive of net back tax collections and receipts from capital assets of a nonrecurring character, the surplus only amounted to $\$ 162,000,000$. In 1926 back tax collections, less revenue refunds, amounted to $\$ 113,000,000$, and in 1927 to $\$ 214,000,000$; receipts from railroad securities amounted in 1926 to $\$ 36,000,000$, and in 1927 to $\$ 89,000,000$; receipts from Federal farm loan bonds and other minor securities amounted to $\$ 34,000,000$ in 1926 and $\$ 63,000,000$ in 1927 ; receipts from the War Finance Corporation assets amounted to $\$ 19,000,000$ in 1926 and to $\$ 27,000,000$ in 1927 ; receipts from the capital stock tax, which was repealed in 1926, amounted in the year 1927 to $\$ 8,000,000$; receipts from the sale of surplus war supplies amounted to $\$ 13,000,000$ in 1926 and to $\$ 8,000,000$ in 1927; while the surplus was further increased to the extent of $\$ 5,000,000$ received from a judgment of the court relating to the naval oil lease.

All told, the receipts from these items of a nonrecurring character amounted in 1926 to $\$ 215,000,000$ and in 1927 to $\$ 414,000,000$.

One of the principal items that has caused errors in past estimates is that of back taxes. In the fiscal year 1927 back tax collections on incomes alone were underestimated by $\$ 81,000,000$, whereas internal revenue funds were overestimated by $\$ 35,000,000$, these two items accounting for an error in the estimates aggregating $\$ 116,000,000$. The Treasury Department has made every effort to ascertain prospective back tax collections and probable refunds, but there seems to be no test which will determine accurately future yield. Accordingly, it seems wiser to segregate back tax collections and internal revenue refunds and present them in a separate part of the estimate as items more or less speculative in character. After the close of the fiscal year 1929, with the closing of all of the cases arising under the excess profits and other war taxes, it is reasonably certain that there will be a falling off in back tax collections.
In presenting the estimates of probable total revenue, the revenue from temporary sources that must disappear in the course of the next year or two is likewise presented separately. In this connection it should be noted that whereas $\$ 169,000,000$ will be received on account of principal and interest of loans made under sections 207 and 210 of the transportation act in 1928, the revenue from this source will drop to approximately $\$ 24,000,000$, or a falling off of $\$ 145,000,000$, in the fiscal year 1929, and after that little or no revenue is anticipated under this head, as only $\$ 49,000,000$ principal amount of railroad obligations will be left out of the $\$ 230,000,000$ held on June $30,1927$. This item and a difference of $\$ 87,000,000$ in estimated net back tax collections more than account for the difference of $\$ 181,000,000$ between the estimated surplus for 1928 and that for 1929.

I am submitting herewith two tables. The first shows for the fiscal years 1928 and 1929 estimated current or normal receipts, extraor-
dinary or temporary items, total receipts exclusive of temporary items, expenditures as estimated by the Budget Bureau, estimated surplus exclusive of extraordinary revenue items, and estimated actual surplus. The second table shows the principal receipt items of a temporary character for the fiscal years 1926, 1927, 1928, and 1929.

Estimated receipts and expenditures, fiscal years 1928 and 1929

| Surplus exclusive of above net receipts. | 162,000,000 | 221,000, 000 | 137, 000, 000 | 199, 000, 000 |

${ }^{1}$ Exclusive of amount paid in Liberty bonds aggregating $\$ 5,500,000$ principal amount.
Estimated surplus, exclusive of extraordinary revenue items, will amount to $\$ 137,000,000$ in the fiscal year 1928 and $\$ 199,000,000$ in the fiscal year 1929. Estimated total surplus, including extraordinary revenue items, will amount to $\$ 455,000,000$ in the fiscal year 1928 and $\$ 274,000,000$ in the fiscal year 1929.

In estimating the amount by which we can safely reduce the tax revenues in 1928 and 1929, the actual surplus figures are the important ones. But looking to the future, it is essential that Congress should take into consideration the temporary character of some of our existing resources.

The factor which definitely determines the extent to which we may reduce taxes is the 1929 surplus. Assuming that a tax revision bill becomes law prior to March 15 next, the reductions will only affect the revenue for the last six months of 1928. That is to say, tax reductions will be only 50 per cent effective during the present fiscal jear. They will, however, apply to the full 12 months in 1929. Therefore, even leaving out of consideration the fact that thie 1928 surplus largely exceeds the prospective surplus for 1929, a reduction in revenue which would be fully justified if the present year were considered alone would almost certainly produce a substantial deficit in the fiscal year 1929.

It may be urged that the estimated surplus for 1929 is placed at too low a figure in view of the actual large surplus in 1927 and the size of the estimated surplus in 1928. The answer is that these surpluses were in the main due to certain resources which can not be available in 1929, since by that time they will have been exhausted. In so far as current revenue is concerned, it should be noted that the Treasury estimates that substantially the same receipts will be available in 1929 as in 1928 and as were actually collected in 1927. There is no evidence available to justify the assumption that they will be larger. There are certain definite indications that they may be smaller, but the department hopes that these unfavorable factors will be offset by the normal growth of the country.

For a number of years past the Treasury estimates have underestimated the revenue which was later realized. It is not true, however, that this was the result of deliberate intention or policy. Every effort to avoid a repetition of this result has been made in the preparation of the estimates here presented. It would be unwarranted and unwise to assume that in the present estimates there is any concealed surplus. In these figures the Treasury has not consciously nor as a matter of policy played safe. If tax reductions are made or appropriations voted on the assumption that the present figures understate probable future receipts, responsibility for such reductions or appropriations must be assumed by those who advocate them. The Treasury has placed the probable receipts at the highest figures compatible with the most dependable forecasts and facts which careful and disinterested investigation could secure. As far as expenditures are concerned, the estimates have been furnished by the Bureau of the Budget. It should be remembered that estimates do not include any expenditures that may be incurred by reason of new legislation. The Treasury believes that tax reduction should not in any event be in excess of approximately $\$ 225,000,000$.

I suggest the following:

1. A reduction of the rate of tax on corporate income from $131 / 2$ per cent to 12 per cent. It is estimated that such a change will result in a loss in revenue of approximately $\$ 135,000,000$.
2. Amending those provisions of the law that apply to the tax on corporate income so as to permit corporations with net income of $\$ 25,000$ or less, and with not more than 10 stockholders, to file returns and pay the tax as partnerships at their option. It is estimated that such an amendment will result in a loss of from $\$ 30,000,000$ to $\$ 35 ; 000,000$ in revenue.
3. A readjustment of the rates applicable to individual incomes that fall in the so-called intermediate brackets according to the plan
outlined below and the table contained in the body of this report. It is estimated that such a change will result in a loss in revenue of approximately $\$ 50,000,000$.
4. Repeal of the estate tax, resulting in a revenue reduction of $\$ 7,000,000$.
5. Exemption from taxation of the income derived from American bankers' acceptances held by foreign central banks of issue.

I shall now discuss these recommendations in greater detail.
Corporation income tax.-Corporations last received relief from taxation in the revenue act of 1921, which repealed the excess profits tax, and even then the income tax rate was increased. Since that time, while other classes of taxpayers have been benefited either by the repeal of war taxes or the sharp reduction of war-time rates, corporations have continued to bear a heavy burden. The time has come to revise the corporation tax rates downward. Business conducted under the corporate form is to-day overtaxed as compared with individual business enterprises and partnerships, a condition which spells particular hardship to the small corporations with a limited net income and to the stockholder of limited means, whether he be a stockholder in a large or a small corporation. Corporations are not only large contributors to the Federal Treasury but they pay their full share of the cost of local and State governments.

In the calendar year 1924 all corporations reporting net income reported a net income, before all taxes, of $\$ 8,890,821,499$. They paid in taxes other than income tax $\$ 1,304,169,207$, and in income tax $\$ 881,549,546$ at the then rate of $121 / 2$ per cent, making a total of $\$ 2,185,718,753$. In other words, 24.58 per cent of their net income was paid in taxes. In the same year these corporations paid $\$ 3,994,-$ 990,754 in cash dividends, which was 44.93 per cent of their net income. For every dollar paid in dividends 54 cents were paid in taxes.

If all corporations be included-that is to say, corporations reporting a deficit as well as those reporting net income-the percentage of net income paid in taxes is 36.28 per cent. Including both the Federal and State taxes the percentage of taxes to net income paid in some of our principal industrial States ranges from 26.25 per cent in Michigan to 41.04 per cent in Connecticut, 47.72 per cent in Minnesota, and 49.78 per cent in Massachusetts.

Corporation taxes are paid either by the consumers or by the stockholders. No general rule can be laid down as to the incidence of this tax. It is estimated that there are not less than $3,000,000$ individual owners of corporate stock in the United States. There are probably more. Through the corporation income tax these individuals are taxed at the rate of $131 / 2$ per cent on their proportionate share of the income of the corporation, and this irrespective of whether their individual income is sufficiently great to subject them to the individual income tax. If we include the tax paid by individuals on the dividends received from corporations, the rate of tax on net corporate income is 15.27 per cent, whereas had all the corporations been taxed as partnerships the average rate of tax on their net income would have been 9.1 per cent.

There are only $2,500,000$ individuals who return taxable net income, and the average rate of tax on their income has been reduced to 4.2
per cent, as compared with $3,000,000$ stockholders who are virtually taxed on a part of their income at the rate of $131 / 2$ per cent. There are less than 9,000 individual income taxpayers whose average tax as returned equals or exceeds $131 / 2$ per cent of their taxable income.

Thus we have a strange and inconsistent situation, in which the owners of our corporations, some $3,000,000$ individuals, are taxed indirectly, at the rate of $131 / 2$ per cent on all or part of their income, whereas under the present individual income tax law this rate of $131 / 2$ per cent or more is paid by less than 9,000 individuals, and these with net incomes in excess of $\$ 110,000$.

It is interesting to note that according to the 1925 returns, of $\$ 5,189,000,000$ distributed in cash dividends, $\$ 1,724,000,000$ went to sources other than individuals making income tax returns. While, of course, a large part of this was paid to other corporations, it is certain that a very considerable sum was paid to individuals with incomes insufficient to require an income tax return. Of the dividends distributed, $\$ 740,000,000$ were returned by persons with net incomes of less than $\$ 10,000$, and the average rate of tax on all incomes not in excess of $\$ 10,000$ was 0.26 of 1 per cent.

The Treasury Department made a study of a number of corporations owned by a comparatively few people and with net incomes moderate in amount. It found that the chief stockholders in corporations having net incomes of $\$ 55,000$ or less would, without exception, have paid a smaller tax to the Federal Government had they done business as partners rather than as a corporation, whereas in 86 per cent of the cases where the net income of the corporation was $\$ 100,000$ and less a similar conclusion was true. Out of 252,334 corporations reporting net income for the calendar year 1925, no less than 232,346 had incomes of less than $\$ 50,000$ a year. So that the latest figures available show that 92 per cent of the corporations reporting net income paid higher taxes in a given year than they would have had they been partnerships. The situation is not quite as bad as these figures would indicate, for whereas the number of corporations with incomes of less than $\$ 50,000$ is high, the amount of income reported by them is comparatively small. One-third of the total corporation taxes is paid by 196 corporations with net incomes in excess of $\$ 5,000,000 ; 53$ per cent of the corporation income tax is paid by 1,113 corporations with net incomes in excess of $\$ 1,000,000$; over 70 per cent is paid by 4,469 corporations with net incomes of over $\$ 250,000$. But even so, the discrimination appears to weigh with more than usual severity on the stockholder in the closely held corporation whose net income falls in the smaller amounts.
It may be urged that the owner or owners of a closely held corporation with a limited income are no worse off than the stockholder of limited means in a very large corporation who is taxed $131 / 2$ per cent on his proportionate share of the net income of the corporation, whereas the tax which the latter might have to pay on that net income were it derived from some other source might not exceed $11 / 2$ per cent. While this is apparently true, it is probable that the latter class of stockholder looks upon his stock purchases as strictly of an investment character. In other words, he buys this share of stock, just as he would a bond, on the basis of its actual income yield, and to that extent in making the purchase he has completely dis-
counted the corporation tax. Therefore, as I see the situation, while it is desirable to reduce the rate on all corporations, some additional relief should be granted the stockholders of the small, closely held corporations, whose situation is substantially the same as that of a partnership, though they do business in corporate form.

The Treasury Departnent recommends that the present corporation. rate of $131 / 2$ per cent be reduced to 12 per cent. This will cause a loss of revenue of approximately $\$ 135,000,000$.

In order to give further relief to the owners of the closely held corporations with a small net income, the Treasury recommends that all corporations with a net income of $\$ 25,000$ or less, and the number of whose stockholders does not exceed 10 , be allowed to file their income tax returns as if they were a partnership and be taxed on the partnership basis. It is estimated roughly that this will occasion a loss of revenue of from $\$ 30,000,000$ to $\$ 35,000,000$.

Surtax rates.-The revenue act of 1926 reduced the rates of the normal tax from 2,4 , and 6 per cent to $11 / 2,3$, and 5 per cent, and cut the maximum surtax rate from 40 per cent to 20 per cent. While there was a readjustment of the intermediate surtax rates, the effect of the drastic cut in the maximum surtax rates and the sharp reduction in normal rates was to benefit the small taxpayers and the large taxpayers somewhat more than those whose taxable income fall in the brackets running from $\$ 18,000$ to $\$ 70,000$. In view of the above; I recommend a revision of the rates applicable to the so-called intermediate brackets.

Under the revenue act of 1926 , incomes from $\$ 14,000$ to $\$ 24,000$ are graded by steps of $\$ 2,000$. That is to say, the income tax rate increases. 1 per cent for every additional $\$ 2,000$ of income. From $\$ 24,000$ to $\$ 64,000$ the brackets are graded by steps of $\$ 4,000$.

By the simple expedient of adjusting the rate so that it will rise uniformly, increasing 1 per cent for each additional $\$ 4,000$ of income on incomes from $\$ 10,000$ to $\$ 70,000$, some reductions will be granted to all surtax payers, but more particularly to those whose incomes fall in the intermediate brackets. Thus, under the act of 1926 a 10 per cent rate applies to incomes ranging from $\$ 36,000$ to $\$ 40,000$, whereas under the proposed plan the 10 per cent rate will apply to incomes ranging from $\$ 46,000$ to $\$ 50,000$; the 15 per cent rate, instead of being reached at $\$ 56,000$, will be reached at $\$ 66,000$; the 18 per cent rate at $\$ 80,000$ instead of $\$ 70,000$; and the 19 per cent rate at $\$ 90,000$ instead of $\$ 80,000$.

There are attached hereto two tables, the one showing the suggested changes in surtax rates from those of the 1926 act, and the second showing the individual income tax upon certain specified taxable net incomes under the revenue act of 1924 , the revenue act of 1926 , and under the suggested rates.

## Surtax rates-Suggested change in surtas rates from those of the 1926 revenue act

| 1826 revenue act. |  | Proposed plan |  |
| :---: | :---: | :---: | :---: |
| Income tax zones | Rates | Income tax zones | Rates |
| \$10,900 to \$14,000 | Per cent | \$10,000 to \$14,000 | Per cent |

Estate tax.-The Treasury Department renews its recommendation that the Federal estate tax be repealed. By tradition, legal theory, and revenue necessity this tax belongs to the States. They and not the Federal Government have developed inheritance taxation in the

United States. It is true that they have made many mistakes, but: it is not apparent that the entrance of the Federal Government into. this field has had any beneficial effect. The Federal Government has only made use of the estate or inheritance tax four times in its history, and then during war emergencies. As soon as the emergency was past the tax was repealed. There is no occasion to change this policy. It is not based on opposition to the inheritance or estate form of taxation but on the theory that some taxes inhere to the States and can more properly be levied by them than by the Federal Government, and that the estate tax is one of these. It is beyond dispute that the States need this revenue and that the Federal Government does not.

Ever since the war Federal revenue needs have steadily diminished as the cost of government was reduced. It has been found possible to repeal most of the war taxes and to cut rates drastically. The contrary is true of the States and of their political subdivisions. Their cost of government continues to mount steadily. Taking the long point of view, this position, in so far as the Federal Government is concerned, is likely to continue. As the national debt is paid off the burden of Federal taxes should grow lighter. But it is impossible to foresee the point at which the upward movement of State and local expenditures will be arrested. Moreover, Federal taxes are fairly well diversified and bear some relation to the taxpayer's ability to pay; State and local taxes rest on altogether too narrow a base. The Federal Government should, therefore, retire from the inheritance tax field and should definitely announce the policy not to resort to this form of taxation save in emergencies.

The loss in revenue will be insignificant. Owing to the 80 per cent credit on the taxes paid the States it is estimated that in five years the Federal estate tax will not produce more than $\$ 20,000,000$. Should it be repealed, the loss in revenue in the fiscal year 1929 will not exceed $\$ 7,000,000$.

Automobile tax.-I realize that great pressure will be brought to bear on the Congress to repeal the excise tax on the sale of automobiles. I can not agree to the advisability of such a repeal.

The Federal appropriation for good roads in the fiscal year 1928 runs as high at $\$ 71,000,000$, and in the fiscal year 1929 will be $\$ 75,000,000$. These expenditures by the Federal Government are for the direct and immediate benefit of automobile owners. They should make some contribution in return.

There is another aspect of this situation deserving consideration from the standpoint of justice and fairness. The automobile is one of the railroad's chief competitors. Our railroads are paying heavy taxes to the United States Government, a part of which is being used for highway purposes. The revenue act of 1926 materially reduced the tax on automobiles designed for the transportation of passengers, and repealed the tax on trucks and accessories. The latest available figures for railroad corporations having taxable net income indicate an increase in the income tax paid by them to the Federal Government from $\$ 57,000,000$ for the calendar year 1924 to $\$ 94,000,000$ for the calendar year 1925. Is it quite fair to ask the railroads to contribute to the construction and maintenance of the
roads on which their rivals operate while exempting the latter from any contribution?

The automobile is a semiluxury article of such widespread use that it furnishes a broad base on which to apply a low tax. The rate being low, there is no appreciable hardship to the taxpayer; the base being broad, the tax is a good revenue producer. Unless we are to rely almost exclusively on direct taxes paid by a few and are prepared to see our National Government supported, not by the entire body of our citizens, but by a limited class, this is the kind of tax which should be retained.
The income tax has gradually become so restricted in its application that it is a class rather than a national tax. For the calendar year 1925, 9,560 taxpayers returned about 49 per cent of the total tax returned. Three hundred and twenty-seven thousand and eighteen individuals returned $\$ 701,497,726$ out of a total of $\$ 734,555,183$. Out of our entire population of $114,000,000$ only $2,501,166$ individuals returned taxable income, and of these $2,174,148$ returned only $\$ 33,000,000$ of tax, the balance of $\$ 701,000,000$ being returned by 327,018 individuals. Accord.ng to these returns, less than threetenths of 1 per cent of our population returned 95.5 per cent of our total income tax, about 1.9 per cent returned 4.5 per cent, and the remaining 97.8 per cent of the population returned no tax whatsoever. Obviously some other taxes should be retained.

Once the automobile tax is repealed, it can not be reimposed in time of peace. This creates a situation which should squarely be faced at this time. Both the Treasury Department and the Congress desire to reduce taxes to the greatest possible extent consistent with the prospective revenue needs of the Government. The reduction will be made under the reasonable assumption that business conditions will continue to be fairly prosperous. Should this assumption prove to be false and should there be a falling off in business, with a consequent immediate reduction in the yield of the corporation and individual income taxes, or should the day come when taxes as revised at this session of Congress are inadequate to meet the cost of government, it is obvious that revenue needs will compel an increase in rates of the taxes then existing. It is equally obvious that under such circumstances corporation income tax rates and income tax rates on individuals will have to be increased to an extent where they will not only make good the loss of revenue resulting from the reduction of income returned but will in addition be required to contribute the $\$ 66,000,000$, more or less, that the present excise tax on automobile sales now yields. In other words, the narrowing of the tax base in days of prosperity inevitably means that when the time for increased tax burdens arrives those taxpayers who are unfortunate enough to remain on the rolls are compelled to pay more than their just share. Injustices in the field of taxation are inevitably committed under the pressure of necessity, and the time to preserve the integrity of a wellrounded, well-balanced system is in days of prosperity when rates can be kept at a minimum and no particular hardship is inflicted on any one class. Under such circumstances to yield to the temptation to dispense with a tax which some day may prove to be an essential part of the tax system is to be guilty of the most short-sighted
economic error. It should never be forgotten that in taxation the ideal to be aimed at is a broad base and low rates.

We have eliminated most of our excise taxes. There remain for revenue purposes the excise tax on tobacco and automobile sales, the admissions tax, and a few stamp taxes. All of these should be retained in the interest of a well-balanced tax system. I have not seen it suggested that the excise tax on tobacco should be reduced, but when we consider the burden borne by the users of tobacco, an article which is likewise of the semiluxury type-though many would classify it as a necessity-the 3 per cent automobile sales tax appears insignificant in character. Because this 3 per cent is levied upon the factory, or wholesale price, which is much smaller than the retail price, the automobile tax amounts to but 2 cents for every dollar paid by the ultimate consumer. Contrast this with the fact that for every dollar spent by our citizens for the articles enumerated, there is a tax required of 2 cents to 5 cents on cigars, 9 cents on theater and other admissions, 20 cents on playing cards, from 4 cents to 22 cents on chewing and smoking tobacco, and from 17 cents to 40 cents on cigarettes.

For the fiscal year 1927 the tobacco taxes yielded $\$ 376,170,205.04$; as compared with $\$ 66,437,881.32$ from automobiles. The use of tobacco in its various forms is widespread, and the Federal tax on tobacco no doubt affects a greater number of our citizens than does any other class of tax. The man who smokes a nickel cigar now pays one-fifth of 1 cent in tax to the Government. This is at a rate double that upon automobiles. The man who smokes an 8 -cent cigar pays a tax of three-tenths of 1 cent to the Government on every cigar that he smokes. Out of every 15 cents paid for a package of 20 cigarettes, 6 cents, or 40 per cent of the total retail cost, is paid to the Government. Chewing and smoking tobacco is now taxed at the rate of 18 cents per pound. During the fiscal year 1927 it accounted for $\$ 65,070,195.26$. That is, chewing and smoking tobacco alone produced practically as much tax as all of the automobiles sold that year in the United States.

Admissions tax.-The same reasoning applies with equal force to the tax on admissions. It is difficult to imagine a more ideal tax than one on the $\$ 40$ ringside seats at the recent Tunney-Dempsey fight. Surely no one will contend that the men and women who were willing to pay $\$ 40$ for a seat for 30 minutes of boxing could not well afford to contribute $\$ 3.64$ to the United States Government. The revenue yield from that particular fight was $\$ 242,065.71$. The tax of 60 cents for a box seat costing $\$ 6$ for a world-series baseball game and the tax of 30 cents for a $\$ 3$ box seat at a representative theater is not considered excessive. The exemption of all admissions of 75 cents or less eliminates the tax on the recreation and amusement of an overwhelming majority of our citizens. Those who pay more than 75 cents can well afford to make a contribution to the Government, and such an excise tax can not be held to be burdensome or to impose a restriction on legitimate recreation.

Tables showing the exact amounts paid as tax, and the percentage of the tax to the retail prices, for the various makes of automobiles, the different kinds and brands of tobacco, and for selected samples of admissions are submitted in an appendix.

Taxes on the income received from bankers' acceptances held by foreign banks of issue.-Under the provisions of section 230 of the revenue act of 1926 a tax of $131 / 2$ per cent is imposed upon the discount received by any foreign corporation on American bankers' acceptances. Sections 233 and 217 of that act, however, exempt from taxation any interest on bank deposits received by a foreign corporation not doing business within the United States and not having an office therein. Under the terms of section 236 interest upon obligations of the United States is not subject to tax.

An increasing number of countries have adopted the gold exchange standard. This means that banks of issue in those countries must carry large balances abroad, largely in the American market. Unless appropriate investments are available, however, these balances will be lost to London or to some other gold standard country.

Generally speaking, the chief ways in which a foreign bank, especially a foreign bank of issue, employs its surplus funds in this market are: (1) on deposit, (2) in short-time Government securities, and (3) in bankers' acceptances. At the present time the law exempts from taxation income derived from the first two, but taxes the third. Foreign banks of issue with surplus funds to invest must seek the most liquid short-time investments available. Many banks of issue are prohibited by law from investing their funds for longer than three months. Others are prohibited from investing their funds in any Government securities which are not issued on a discount basis. In such cases as these, where funds can not be invested in Government securities for one reason or another, a bank of issue must invest its funds either in bankers' bills, subject to the tax, or else place its funds on deposit at materially lower rates of interest.

The serious effect of this is the resulting tendency to withdraw funds from this market for investment either in London or elsewhere. In other words, the present law places a serious handicap on the free development of our dollar acceptance market. In effect it tends to keep foreign funds out of our market and to force American merchants to finance their transactions abroad rather than through the dollar acceptance.
One of the main purposes of the Federal reserve act was to authorize and foster the development of the American acceptance market as an effective and economical means of financing our foreign trade. Congress has done its part in aiding this development by a series of amendments to the Federal reserve act. Undoubtedly, however, the present provision of the revenue act, which imposes a tax on the discount earned from our bankers' acceptances, is proving an obstacle to the full accomplishment of this purpose.
I recommend, therefore, that the revenue act of 1926 be amended so as to exempt from the income tax income derived from American bankers' acceptances held by foreign central banks of issue.

> Improved administration of income taxes

For the purpose of acquiring exact information upon which to base recommendations designed to simplify the internal revenue laws, particularly the income tax, and to improve the efficiency of their
64761-FI 1927-6
administration, a special administrative committee made a comprehensive survey.
I agree unqualifiedly with the conclusions and recommendations stated by this committee and published in its report entitled "Survey of the Administration of Income and Excess-Profits Taxes," which I transmitted to the chairman of the Joint Committee on Internal Revenue Taxation.

This is the first comprehensive inventory that has been made of the work of the Bureau of Internal Revenue since 1923, and portrays conditions as they existed on June 30, 1927. It is hoped that this survey will assist the Joint Committee on Internal Revenue Taxation, the Committee on Ways and Means, the Committee on Finance, the Members of Congress, and the public in an appreciation of the task imposed upon the Treasury in the administration of eight recent and separate acts imposing internal revenue taxes, of the manner in which that responsibility has been borne, of the unprecedented administrative problems imposed, of the situation as it exists to-day, of the problems confronting the Treasury and awaiting solution, and of the soundness of the solutions suggested.

The more important facts, the conclusions, and the recommendations contained in the report follow:

## Summary of causes contributing to congestion.

## (1) The size of the Job.

Over $\$ 35,000,000,000$ were collected and more than $62,000,000$ returns were filed for the years 1917 to 1926, inclusive. Little real progress toward administrative organization could be made during the war years. Government officials, as well as taxpayers, were confronted with problems never before presented. The intricate facts surrounding practically every transaction of importance occurring during this period required ascertainment and analysis and their legal consequences determined. Principles for the valuation of most of the assets of the country had to be evolved and the valuation made. The books of the largest corporations in the world had to be audited. Methods of accounting adaptable to the determination of tax liability had to be installed. The Government had to develop a system in the offices of collectors competent to handle a business in tax collections ten times as large as during any previous period of its existence. The amounts contingent upon intangible theories are staggering. It is not surprising that attempted solutions have provoked delays and litigation.

## (2) Personnel.

It has been impossible to build up and retain an adequate personnel. The Government and the public have a right to demand that the personnel charged with the administration of the internal revenue laws possess extensive experience, ability, unquestionable integrity, and sound judgment. Persons capable of holding important positions have been developed by the Treasury, but in many cases it has been impossible to retain them. The turnover has been and is devitalizing. Each resignation imposes delay and immediate real loss to the taxpayer and the Government, for a knowledge of the
cases must be acquired by the successor. But the resulting delay to individual cases is relatively of minor consequence. The individual who resigns can not leave with his successor his experience, background, ability, and judgment.
Ability alone is insutticient. An: individual must have had the necessary experience, that only time can give, to have an adequate insight into the effect of the decisions he is called upon to make. New men can not be trained rapidly enough to assume the positions of those who resign. The field from which persons competent to carry on the work can be selected has been and probably always will be decidedly limited. It is only by the retention of persons capable of holding positions of importance that an adequate personnel will be obtained.

The bureau loses regularly a large proportion of its ablest employees because it can not meet the terms offered by others. A certain amount of this leakage is inevitable. But the present turnover is excessive. Surely the bureau should be able to compete for the services of efficient employees whom it desires to retain with State tax commissions and business concerns of moderate size. The bureau should not remain indefinitely a training school in which young men and women of talent educate themselves and then resign to find a permanent career outside. The Government should find means in higher salaries and more attractive tenure to induce a larger proportion of its ablest employees to stay and find dignified careers in the public service. If this can not be done, it will be the body of taxpayers and the Treasury-not the employees of the bureau-who will suffer most.
The Government can well afford to retain a substantial portion of the personnel it has developed.

## (3) The policy to decide upon a basis of absolute accuracy.

The difficulty in the past in closing big cases and in settling cases without litigation has arisen largely as a result of the attempt of the bureau to settle with mathematical accuracy and with pure logic questions which by their nature are not susceptible of mathematical or logical determination. The bureau in the past has attempted to determine such questions as the valuation of natural resources, the valuation of intangibles such as patents, the determination of the amortization of war facilities, and the computation of depreciation by the use of formulae and with mathematical accuracy. By far the majority of the questions arising in disputed cases can not be solved with exact precision, but should be settled by administrative action within the bureau on the basis of the best judgment of competent )fficials.
Important questions of law must, of course, be decided finally by judicial tribunals. But the best interests of the Government and of the taxpayer will be promoted if the great majority of the disputed questions involving no important principle are settled by administrative action within the bureau. Even a casual analysis of the history within the bureau and through the courts of various cases set out in this-report will demonstrate that both the Government and the taxpayer will benefit by such action.

The nature of the problems involved in many classes of cases makes their solution adaptable to administrative and not judicial action. It. is impossible to predict the decision of a judicial body upon such questions of fact as valuations of natural resources, patents, or good will; upon questions presented in an amortization determination; upon a case involving contemplation of death; upon the propriety of depreciation allowances; or upon similar questions.

Furthermore, the bureau is not as well prepared as the taxpayer to litigate with any success these questions of fact and of opinion. It does not have, and so far has not been able to secure, sufficient attorneys to present properly to the Board of Tax Appeals and the courts the Government's position in these cases. The statistics show that the bureau has collected through the Board of Tax Appeals only about one-half of the tax claimed by it. It is apparent from a study of the board's decisions that the great majority of the reversals of the bureau have been in cases involving questions of fact, judgment, and opinion. It is believed confidently that as much or more tax can be secured by settling these cases by administrative action within the bureau than by litigation. But even more important than the tax collected will be the benefit both to the Government. and the taxpayer of disposing of these old matters without protracted controversy.

## (4) The áttitude of the taxpayer.

The taxpayer and his attorney must assume their fair share of the responsibility for the present situation. If the attitude of the Government is to change, the attitude of the taxpayer and his attorney must change. The taxpayer must be willing to review his entire case and to settle upon a basis fair both to the Government and himself. He must abandon his desire to litigate every doubtful point decided against him and to accept without question doubtful points decided in his favor. It is believed that a substantial majority of taxpayers will alter their attitude to conform to that of the Government.
It happens not infrequently that the presentation of the taxpayer's case to the bureau is insufficient. This fact is attributable to many causes, among them being the employment of incompetent representatives and the desire to avoid expense necessary to a complete and proper presentation. Many of the cases in which the bureau is reversed by the board would have been decided by the bureau in sonformity with the board's decision had the taxpayêr presented his case to the bureau in the manner in which it was presented to the Board of Tax Appeals.

Much of the criticism urged by taxpayers that they are unable to obtain a decision from the bureau is misleading. What is really meant is that the taxpayer can not obtain a favorable-decision. The taxpayer's realization that an unfavorable decision will be forthcoming prompts him to seek delay.

## (5) Reopening cases.

Of cases for the years 1917 to 1921, inclusive, 1,109,939 once closed by the bureau have been reopened. An analysis of the causes occasioning the reopening of cases is given hereinafter. The opportuni-
ties to reopen must be brought to an end if an intolerable situation is not to continue.

## (6) Shifting responsibility.

It is admitted that there has been a failure on the part of the personnel of the bureau to assume responsibility in the disposition of cases. Final decisions have been shifted from place to place in the bureau and from the bureau to the Board of Tax Appeals. "Passing the buck" undoubtedly exists. This is, in most instances, merely a consequence of the Treasury's inability to retain individuals competent and willing to assume responsibility and to make final decisions. A changing personnel can not grasp adequately vital and far-reaching problems of policy and law involved in final decisions of tax cases. An individual who does not possess an adequate appreciation of the decision he is asked to make can not be criticised for refusing to assume responsibility.
(7) Determinations made because of the running of the statute of limitations.
It is admitted that in the past many deficiency letters have been mailed in order to protect the interests of the Government from the bar of the statute of limitations. The chart showing the status of the work of the Board of Tax Appeals reveals an extraordinary increase in the number of petitions docketed immediately following the expiration of the statutory period upon assessments for any particular year. The necessity for this practice in the past is apparent. There must be a considerable and immediate reduction in the number of deficiency determinations made in order to prevent the running of the statute of limitations.

## Summary of outstanding facts.

(1) For the first time since the war it can now be said that the auditing work of the Bureau of Internal Revenue is practically current.
(2) Of the number of old cases still pending in the bureau, an almost negligible number are awaiting original audit. To a very large extent they are cases that have been reopened by taxpayers through the filing of claims for refund:
(3) More than 19,000 undecided cases are pending before the Board of Tax Appeals, involving aggregate deficiencies of approximately $\$ 550,000,000$. The petitions being filed with the Board of Tax Appeals exceed the number disposed of by more than 200 per month.
(4) The office of the general counsel is literally swamped with work.
(5) Although the nature of the problems remains substantially the same, the burden has been transferred from the Bureau of Internal Revenue to the general counsel's office and the Board of Tax Appeals.

- (6) In cases before the Board of Tax Appeals involving amounts of $\$ 10,000$ or more, the Government has succeeded in sustaining only about 50 per cent of the deficiencies asserted.
(7) The period of delay between the date of the bureau's action and the final decision of the Board of Tax Appeals prevents the decision from becoming a precedent for the action of the bureau upon similar points. Taxpayers not involved in the proceedings before the board can protect their interests. The bureau can protect the Government's interests in doubtful cases only by deciding against the taxpayer or, after obtaining waivers, by failing to decide.
(8) There are only eleven attorneys in the office of the general counsel who have served in the office more than six years. Since July, 1924; 52 attorneys have resigned from the general counsel's office. There have been in the Income Tax Unit alone $4,72 \%$ resignations of professional and technical officials during the last seven years.

## Analysis of the problems.

(1) Relleving the present congestion berore the Boapd of Tax Appeals.

It is essential that effective measures be applied in order to relieve the congestion before the Board of Tax Appeals. There should be an opportunity to withdraw from the board cases which may be settled properly by administrative action within the Treasury and without the necessity of a decision by the board.

The Board of Tax Appeals is functioning at present at as great a speed as is consistent with sound decision. A material increase in its production should not be sought or expected. There are, however, some requirements occasioning unnecessary delays in its proceedings, and these should be removed.
(2) Preventing future congestion.

Unless methods are found for more effective and final closing by administrative action within the Treasury, the accumulation of cases before the board will increase. Notwithstanding the fact that the percentage of cases going to the Board of Tax Appeals is extraordinarily small ( 0.6 per cent of the total cases disposed of by the bureau), the actual number of petitions docketed by the board establishes conclusively that administrative settlement is essential in every case susceptible of administrative settlement.
(3) Elmimnatine delay in decisions by the Board of Tax appeals.

At the present time the decisions of the Board of Tax Appeals are frequently handed down so long after the action of the bureau that the decision does not serve as a precedent for the bureau in its action in similar cases. The bureau can not tie up its cases, postpone its action, and await final decisions of the board. In the opinion of the Treasury, one of the most important functions of the Board of Tax Appeals is to render decisions upon important questions of law expeditiously, so that the decisions will serve as guides for the future action of both the Government and the taxpayers.

Failure to settle cases within the bureau creates a major problem which deserves the most careful attention. The problem can best be stated by an illustration. Take a disputed question such as the taxation of gain or loss resulting from the sale by a parent corpora-
tion of the stock of an affiliated subsidiary. The bureau holds that such gain or loss must be recognized. Many corporations take such losses to their advantage while the companies with corresponding gains promptly appeal their cases to the Board of Tax Appeals. In any important question of this kind, two or three years are likely to elapse before the bureau makes a final ruling. After the bureau rules, two or three years additional are likely to elapse before the board renders its decision-and the more congested the board's docket, the longer the delay. After the board decides, two or three years may be required before the Supreme Court speaks. The interval elapsing before a point of this importance is finally decided can hardly be less than six years and may be eight or nine years.

This means that the period of limitations will have expired in many cases in which the disputed point was decided in the taxpayer's favor.-The bureau-if the Supreme Court reverses its ruling-can not go back and disallow the losses already allowed in cases barred by the period of limitation; and the taxpayers who paid taxes on the gains will have protected themselves by the filing of claims for refund, while others will have appealed to the board. The period consumed in appeal exceeds the statute of limitations, and this means for the Treasury-" heads we lose, tails you win."

Whatever the ultimate remedy for this evil may be, the evil is aggravated by congestion and delay, and may be mitigated by a wider settlement of cases through administrative action.

The above illustration is typical of a large number of cases, affecting many millions in tax liability, in which the bureau's decision however made affects adversely one group of taxpayers and is favorable to another group.

## (4) Relieving the general counsel's office.

The primary functions of the general counsel's office are to advise the bureau upon questions of law (with the facts necessary for the determination of tax liabilities ascertained by the bureau) and to protect the best interests of the Government in litigation. It is a physical impossibility for an attorney responsible for the handling of from 200 to 500 active cases to represent the Government properly in each case. He is forced to assume the defensive and to resort to every available device and technicality. A substantial step toward solution will be made if problems (1) and (2) above are solved satisfactorily.
Summary of outstanding conclusions.
(1) An opportunity to retain trained, experienced, and competent personnel is essential.
(2) The burden has been transferred to the Board of Tax Appeals and the general counsel's office, and this burden must be relieved if their true functions are to be performed properly.
(3) The Government is handicapped in litigation. It can well afford to settle many more cases without resort to litigation.
(4) Cases must be closed fairly and finally by the bureau. The shifting of responsibility to the general counsel's office and to the board and the constant reopening of cases, as a result of decisions of the courts or the Board of Tax Appeals or a change in regulations, should be brought to an end.
(5) The Treasury is cognizant of its fair share of responsibility.
(6) Taxpayers should cooperate. They are by no means blameless for existing difficulties.
In order to present the situation in broad outline, the above conclusions must be supplemented by three truisms-
(1) At root, the major problem is one of personnel.
(2) All tax cases can not be closed upon a basis of absolute accuracy. To attempt to do so is to sacrifice accomplishment to unattainable ideal. Prompt and final settlement is often more important than meticulous accuracy.
(3) The collection of revenues is primarily an administrative and nôt a judicial problem. As far as the Federal income tax is concerned, a field of administration has been turned into a legal battle field.

## Detailed recommendations.

## (1) Personnel of the office of the general counsel

It is recommended that-
(a) The positions of the heads of the six divisions of the general counsel's office and of the two assistant general counsel should be classified in grade 7 of the professional service of the classification act, which specifies a salary of $\$ 7,500$ a year; and there should be at least 15 positions classified in professional grade 6 , which specifies a minimum salary of $\$ 6,000$ a year.
(b) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, should be authorized to make original appointments in the office of the general counsel in professional grade 5, which allows an entrance salary of \$5,200.
(c) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, should be authorized to appoint in professional grade 2 (at an entrance salary of $\$ 2,400$ ) graduates of law schools, without the professional experience now required.

## (2) Personnet of the Buread of Internal Revenue.

It is recommended that-
(a) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, should be authorized to classify in grade CAF 14 the positions of three technical advisors to the commissioner, at salaries of $\$ 10,000$ a year.
(b) The positions of at least 75 technical experts of the Bureau of Internal Revenue should be classified in the grade CAF 13, which specifies a minimum salary of $\$ 6,000$.
(c). The positions of 20 revenue agents in charge should be classified in grade CAF 13, which specifies a minimum salary of $\$ 6,000$, and the remaining revenue agents in charge should be classified in grade CAF 12, which specifies a minimum salary of $\$ 5,200$.
(d) The positions of the personnel in Washington and in the field should be reclassified so that their salaries will be increased to accord with the responsibilities imposed.

## (3) The special adjibory committee.

The organization and functions of the special advisory committee are discussed in detail hereinafter. It is hoped that the outline of work to be accomplished by the committee will be approved and indorsed, and the committee will be accorded fullest cooperation.

Every effort should be made to instill in the committee the spirit essential to its success.

## (4) Change in attitude toward settiement of cases.

The change in attitude necessary for the effective closing of cases by administrative action within the Treasury has been discussed. It is appreciated fully that this change can not be accomplished except gradually. It is also appreciated fully that the use of sound discretion in the settlement of tax cases can not be expected from any but the most experienced, trained, and competent men. It is necessary to begin at the top. The authority should not be granted indiscriminately. Responsibility must at all times be fixed definitely. The special advisory committee is an experiment, admittedly. If the experiment proves successful, in time it may result in a change of attitude on the part of all concerned and the collection of income taxes become, as it should, an administrative problem rather than a legal battle.
(5) Closing agreements.

The movement already begun to stimulate closing agreements under sect:on 1106. (b) of the Revenue Act of 1926 should be continued. Closing agreements offer the greatest opportunity for the final closing of cases. Section 1106 (b) should be amended, as recommended by the Joint Committee on Internal Revenue Taxation, so as to permit closing agreements (subject to subsequent approval of the Secretary of the Treasury) whenever the taxpayer and the Government's representative agree upon the tax liability.

## (6) Deficiency determinations.

It is believed that the bureau is capable of making better determinations of deficiencies in many cases. Soundness of the determinations is far more important than volume of production. Determination should not be postponed so that the running of the statutory period requires hasty action.

## (7) Revision of defficiency letter.

It is believed that many petitions are filed with the Board of Tax Appeals because the taxpayer is unable to understand from the deficiency letter the exact decision of the bureau. The proposed revision of the deficiency letter, so that it will state accumulatively all prior adjustments and determinations, is indorsed.

## (8). Stipulations.

Although the general counsel's office has disposed, by stipulations, of more cases pending before the Board of Tax Appeals than the board has disposed of by decision, it is believed that there is a substantial opportunity for increasing the number of stipulations. Stipulations of unimportant facts should be encouraged in order to facilitate proceedings before the board. Whenever the attorney in charge of the case can enter into stipulations of fact properly, he should do so. It should be borne in mind, however, that a proper personnel is essential before the practice of entering into stipulations can be increased extensively.
(9) Regulations of prospective rather than retroactive application.

Many of the reopenings by the Government can be prevented by giving, in every instance where sound judgment will permit, only prospective effect to changes in regulations. The authority granted in section 1108 (a) of the revenue act of 1926 has been exercised in several recent instances. It is recommended that this practice continue. It should be noted, however, that the power granted by this section is limited to amendments not occasioned by a court decision.
The application of decisions of courts, decisions of the Board of Tax Appeals, and decisiens of the general counsel's office to cases already closed by the bureau, or to cases in which a definite decision upon some particular issue has previously been made, presents an exceptionally difficult problem. Efforts to find a sound solution should be continued. There must be some method by which the practice of constantly reworking cases, after a fair and satisfactory decision of one or more of the issues involved have been reached, may be stopped.

## T'ax exemption of Federal bonds

As early as 1921 the Treasury favored an amendment to the Constitution permitting the United States to tax incomes derived from securities issued by the States and their political subdivisions after the ratification of the amendment, and conversely permitting each State to tax the income derived by its residents from securities issued under the authority of the United States. As recently as 1925 the Treasury Department has called the attention of the Congress to the evils arising from the existence of great masses of tax-exempt securities which offered to the wealthy the means of avoiding the payment of income taxes to the Federal Government. In the Sixtyseventh Congress a resolution providing for an amendment to the Constitution along the lines above indicated passed the House, but was not acted on by the Senate. In the Sixty-eighth Congress a similar resolution was defeated in the House by 41 votes. No further action looking to the submission of such an amendment to the States has been taken.

It is probable that the time when such an an endment could have been effective has passed. There are now outstanding $\$ 15,946,000,000$ of wholly tax-exempt securities, of which $\$ 11,841,000,000$ have been issued by the States and their political subdivisions, $\$ 145,000,000$ by Territories and insular possessions, $\$ 2,165,000,000$ by the United States Government, and $\$ 1,795,000,000$ by the Federal farm loan system. Since these securities are being issued at the rate of over a billion a year, it is apparent that so many will be in existence before the constitutional amendment in question could be submitted and adopted by the necessary number of States that it would be ineffective. Moreover, the revenue act of 1926 reduced surtax rates to such an extent that the inducement to avoid them by resort to investment in tax-exempt securities has to a very large extent disappeared.

The Statistics of Income for 1925 show that the total amount of tax-exempt securities returned by individuals was $\$ 5,041,000,000$. The income received from these securities amounted to $\$ 230,000,000$. Had these securities been fully taxable, the revenue to the Government would not have been in excess of $\$ 11,000,000$.

Given all of these circumstances, I have reached the conclusion that the reasons which led the Treasury to urge the adoption of a constitutional amendment relating to tax-exempt securities have been so modified by time and subsequent events, including the failure of two separate Congresses to act in the matter, as to justify a reconsideration of the problem and the following conclusions:

If States and their political subdivisions are to continue to issue tax-exempt securities at the rate of a billion dollars a year, there is no logical reason why the Federal Government should continue to issue its securities under a provision of law which only permits exemption from the normal tax. This puts the Federal Government at a serious disadvantage, a disadvantage which is very considerably mitigated, however, owing to the fact that corporations are subject only to the normal tax and that United. States securities held by corporations are therefore tax exempt. On the other hand, this very situation makes it difficult, if not impossible, for the United States Government to sell new issues of its securities to individual investors. United States securities are sufficiently attractive to corporations so that the latter are more than willing to take the entire block of new issues offered from time to time. This being the case, the price which corporations are willing to pay inevitably fixes the price at which the United States is able to market its securities, and since the corporations are wholly tax exempt on their income from such securities, whereas the individual income derived from these securities is subject to the surtax, the former are in a position to pay a price which might well make the securities unattractive from the standpoint of the individual investor. Thus, for instance, the Treasury $33 / 8$ per cent bonds were selling on October 4 on a basis to yield 3.25 per cent. On that basis they would have yielded to a man with an income of $\$ 100,000$ from other sources, after tax payment, but 2.60 per cent; to a man with an income of $\$ 50,000,2.83$ per cent; and to a man with an income of $\$ 25,000,3.02$ per cent; whereas the corporation would get the full yield of 3.25 per cent. Three and one-half per cent three to five year Treasury notes were selling on October 4 on a basis to yield 3.51 per cent; they would yield but $2.81,3.05$, and 3.26 to individual investors with incomes of $\$ 100,000, \$ 50,000$, and $\$ 25,000$, respectively, as compared with a yield of 3.51 to the corporation. The corporations were thus able to obtain the full advantage of the extraordinary quality of a United States security from the standpoint of safety, and, because of this tax-exempt feature, obtain a
return equivalent; in so far as the $33 / 8$ per, cent Treasury bonds are concerned, to 3.76 per cent on a taxable security, and in so far as the $31 / 2$ per cent Treasury notes are concerned, equivalent to 4,06 on a taxable security. But this, obviously, is not true of the individual investor.
The Treasury Department is sometimes criticized for not making a greater effort to distribute its securities more widely. The situation above described under which United States securities are wholly tax exempt when held by corporations, but not wholly tax exempt when held by individuals, makes it impossible to do so. Such a situation is undesirable. During the: war Government securities were very widely distributed, as the result of vigorous campaigns conducted in every community, and which reached almost every home. At that time it was held, and rightly held, that it was desirable, if Government securities were to be issued in large blocks, that they should be held by as many separate individuals as possible rather than in the hands of a few large holders. Such a feeling was sound. It is still sound to-day. But under existing circumstances, as the war loans are gradually being refunded into securities bearing a lower rate of interest-and there would be no justification, of course, for not refunding them-the number of holders of United States securities tends constantly to become more limited.

How could it be otherwise, when States and municipalities are in a position to issue their securities free from all taxation? The average rate of interest paid by all States on their total indebtedness during 1926 was about 4.14. New York City municipal stock with a life of 30 years sells on a basis to yield 4 per cent to the individual investor, while the man with an income of $\$ 25,000$ will receive but a net yield of 3.02 per cent on a $16-20$-year $33 / 8$ per cent United States Government bond. Moreover, even after Federal taxes, he can receive approximately 4 per cent on the highest grade of public utility bonds.

These figures make it perfectly apparent that in so far as the individual investor is concerned, the United States Government is at a serious disadvantage to-day in marketing its securities because of the provisions in the Liberty loan act which limits the tax-exempt privilege to the normal tax.

To be sure the Treasury Department has the authority to issue notes exempt from surtaxes, but, because of the Treasury's position on tax-exempt securities, it was not thought advisable to make use of this authority. Moreover, the individual investor is interested in bonds rather than in notes and certificates.

Under these circumstances, I believe that the Congress should give serious consideration to an amendment of the second Liberty loan bond act, as amended, authorizing the Secretary of the Treasury in issuing long-term securities in the future to make them exempt from the surtax as well as the normal tax.

The enactment of such an amendment would not in any way interfere with the adoption of an amendment permitting the taxation of so-called tax-exempt securities, should Congress and the States deem this to be desirable. But pending its adoption there is no reason why the Treasury Department should be put at a disadvantage in the marketing of its securities as compared with States and their subdivisions, or why individual investors who desire to acquire United States Government securities should be discriminated against. Taking the long-time view of the situation, I believe that the enactment of such a constitutional amendment is desirable, for I consider it inconsistent with our principles of democratic government that our laws be so framed as to permit any class of our citizens to escape their just tax obligations.

Disposition of sequestrated alien property and payment of mixed claims

Though the war ended nine years ago, the United States Government is still holding property of the German, Austrian, and Hungarian nationals of a value in excess of $\$ 250,000,000$. In addition there are certain claims against the United States Government for damages arising from acts of the United States during the war. On the other hand, there are pending and unpaid claims of the United States Government and its citizens against the German; Austrian, and Hungarian Governments for damages arising from the war aggregating many millions of dollars.
The property held by the Alien Property Custodian is property seized under what is known as the trading with the enemy act, which provided that it should be held until after the war and disposed of as Congress shall direct. Congress has amended the trading with the enemy act from time to time, and as a result of these amendments much of the property originally seized has been returned.
Under the decision of the Supreme Court in the case of United States $v$. Chemical Foundation (Inc.) and under the provisions of the treaties of Berlin, Vienna, and Budapest there seems to be no doubt that the United States Government has the legal right to confiscate the property held by the Alien Property Custodian and to apply it to the satisfaction of the claims of American citizens, though it should be noted that the preamble of our treaty with Germany,
known as the treaty of Berlin, includes in full the provision of the joint resolution of Congress declaring peace, approved July 2, 1921, which provided that the property of German nationals held by the United States Government " shall be retained by the United States of America and no disposition thereof made, except as shall have been heretofore or specifically hereafter shall be provided by law until such time as the Imperial German Government * * * shall have made suitable provision for the satisfaction of all claims against said Government * * *." Moreover, a program of confiscation is repugnant to the American sense of justice and would constitute a violation of the sound policy hitherto pursued by our country of recognizing the inviolability of the property of private citizens in time of war. There may not be a legal duty to return the property to the alien owners, but there is most certainly a moral duty.
There is, however, an even stronger obligation on the part of the United States Government to protect its own citizens and to see that their just claims arising from the war are provided for, and inasmuch as the alien property is held as security for the payment of these claims, it should not be returned until suitable provision has been made for their payment.

Under agreements made with Germany, Austria, and Hungary, commissions were set up, known as the Mixed Claims Commission and the Tripartite Claims Commission, the duty of the former being to determine and to adjudicate all claims of the United States and its nationals against Germany and its nationals, based on the terms of existing treaties, and the duty of the latter being to perform a similar task in respect of all claims against Austria and Hungary and their nationals. So far as claims against Germany are concerned, the commission has about completed its work, while the Tripartite Commission has reached a point where it is in a position to make a fair estimate as to what the claims allowed against Austria and Hungary will amount to.

As compared with the claims against Germany the latter are insignificant in amount. Those against Austria can be met in large measure, if not wholly, by property of the Austrian Government at present held by the Alien Property Custodian. If this sum is inadequate, it should be possible to reach some agreement with the Austrian Government which will insure the payment of the claims allowed by the Tripartite Commission in full. And this is true likewise of Hungary. Once the Austrian and Hungarian Governments have made such an agreement and furnished adequate guaranties, there is no reason why the property of their nationals now held by the Alien Property Custodian should not be returned to them.

The situation in so far as Germany is concerned is somewhat different. The awards of the Mixed Claims Commission constitute a direct
obligation of the Government of Germany, But Germany has found herself unable to meet all of her treaty obligations. Accordingly, in 1924 the powers entitled to reparations, but not including the United States, signed what is known as the London protocol, under the terms of which the so-called Dawes agreement was adopted. Subsequently, in January, 1925, the representatives of the powers who had signed the London protocol and representatives of the United States signed what is known as the Paris agreement, allocating the Dawes annuities to the various governments having claims against Germany and allowing the United States Government, for the purpose of meeting the awards of the Mixed Claims Commission, an annual payment of $21 / 4$ per cent of the Dawes annuities after certain deductions. Under the terms of this agreement the United States Government will receive out of the Dawes annuities $\$ 11,000,00$ a year when the maximum annuities are reached. But inasmuch as the amounts due American claimants aggregate over $\$ 175,000,000$, it is obvious that an annual payment of $\$ 11,000,000$ will take many years to extinguish the debt. It would be obviously unfair to our own nationals to return all of the property held by the Alien Property Custodian immediately and so deprive them of their security while asking them to wait many years for the ultimate satisfaction of their claims. While this would be doing justice to the German claimants, it would be doing considerably less than justice to American claimants.

There is a third phase of the problem which must be mentioned. During the war our Government seized ships, radio stations, and patents belonging to German nationals. Having received the benefit of the property taken and used, it is only fair that we should pay just compensation. But here again the question arises as to why German claimants should receive immediate payment while American citizens should be compelled to accept installments over the period of a lifetime.

In March, 1926, the Treasury prepared a comprehensive plan for the settlement of the existing questions, which embodied all of the principal matters left over from the war, and would have made provision for the payment of the just claims of all concerned. Serious opposition developed to this plan and it was accordingly laid aside. At the last session of Congress the Ways and Means Committee reported a bill which had the approval of both German and American claimants and which passed the House of Representatives with substantial unanimity. The plan proposed was essentially of a compromise character, but it was a compromise based on equity. Each of the three groups of claimants were to be asked to make a sacrifice, not a sacrifice of any part of their claims but a sacrifice entailing a delay in the payment of part of their claims. Ultimately all would be paid in full, but all claimants were asked to agree, in the interest of a com-
mon and early settlement, to extend the payment of a portion of what is due them over a period of years. If the plan is not an ideal one, it is at least fair and practicable. If it does not give each man all that he is entitled to immediately, it at least imposes an equal measure of sacrifice upon all and it does not satisfy the just claims of one group at the expense of the equally meritorious claims of another.
The Treasury believes that the bill which passed the House during the Sixty-ninth Congress contains all of the elements necessary for a fair and lasting solution of this difficult problem, which so seriously demands an immediate settlement.

## Acquisition of land for Federal buildings in the District of Columbia

A bill authorizing the acquisition of all lands within the so-called triangle area, excepting property owned by the Government or the District of Columbia, and excepting square 256, was passed by the Senate December 15, 1926, and passed by the House of Representatives with amendments February 7, 1927. Conditions in the Senate between that time and the close of the session prevented its consideration of the House amendments and the bill failed of enactment. It is the recommendation of the Treasury Department that the first session of the Seventieth Congress authorize the purchase of the necessary land within the "triangle" as a preliminary to carrying out the projected scheme for the group of Federal buildings in the District of Columbia.

## Surety bonds

There is a notable increase in the number of bonds that are now being taken by the various departments and establishments of the Government with individuals as sureties. Since the department has no direct supervisory control over the resources of individuals and is therefore unable to follow their continuing solvency, it is believed that bonds with such individuals as sureties should not be accepted in large amounts, if at all. Suitable legislation along this line is necessary, however. When the original law was enacted in 1894, uncollectible judgments and claims against individual sureties amounted to $\$ 35,000,000$. Such a situation should certainly not be allowed to develop again. In order to accomplish this and other desired results, however, it will be necessary to amend the existing law on the subject. I, therefore, reiterate my recommendation contained in previous annual reports that there be authorized higher standards of financial requirements of surety companies writing bonds in favor of the United States, adequate and satisfactory control of records pertaining to claims against them, and the number and character of obligations which they assume in favor of the United States, and
uniform procedure with respect to the forms of bonds taken by the various departments and establishments of the Government. It is urged that such revisions of the existing law as will meet these requirements as they exist to-day shall have the careful consideration of the Congress.

## OTHER SUBJECTS OF IMPORTANCE

## Federal reserve system and gold movements

In my annual report a year ago I called attention to the desirability of an early rechartering of the Federal reserve banks. This end has now fortunately been achieved by the passage last February of the McFadden bill, one of the clauses of which provided that the charters of these banks be indeterminate. The unanimity of public opinion upon the rechartering provision has indicated general public appreciation of the value of the reserve system to this country.

This value has again been demonstrated during the past year, during which Federal reserve policy has contributed largely to the stability of the domestic money market, and has in addition proved a powerful force for world stability of monetary affairs and trade. The present transitional stage through which the nations are passing in their progress toward the return to a gold basis has placed peculiar responsibilities on the United States as the custodian of nearly half of the world's monetary gold. Several of the countries of the world are once more practically on a full gold standard; others have adopted various forms of gold exchange standard; and still others have achieved practical, but not legal, stabilization. This confused world monetary situation affects our money market in many ways. Foreign countries have balances here amounting to upward of $\$ 2,000,000,000$, which constitute a claim upon our gold reserves which may be exercised at any time. Foreign loans of many countries and many kinds are being offered in our market at a rate of over $\$ 1,000$,000,000 a year. Large movements of gold to and from the United States have continued. For the present calendar year gold exports and imports, purchases and sales abroad, and changes under earmark have already totaled more than half a billion dollars. When gold is earmarked in the United States, or sales made of gold held for us in foreign countries, it is equivalent to an export of gold from the United States. The character of these gold movements is shown in the following table, which is brought up to November 7, 1927, and also includes the whole of uncompleted movements under way at thăt time.

$$
64761-\mathrm{wI} 1927-\ldots 7
$$

Exports or their equivalent:
Exports to
Brazil

Other countries_-_---.---- 9
Sale of gold held abroad-.--- 62
Increase in gold earmarked.- 131

The huge movements of gold which have made up these totals would, in the absence of offsetting influences, have created serious disturbance in credit conditions in this country. But the reserve banks, largely by the purchase or sale of securities, have so offset these gold movements that money rates have been unusually steady during the year and the money market undisturbed.

Moreover, Federal reserve policy during the year, as during several preceding years, has been an important influence in avoiding still heavier gold movements. By their purchase of $\$ 62,000,000$ of gold abroad in May the reserve banks without doubt kept that gold from coming to this country. Later they were able to dispose of the gold abroad, which would have been difficult had the gold come here. In August and September reductions in discount rates relieved somewhat the pressure upon European money markets and probably prevented gold movements to this country, as well as enabled foreign countries to buy American products more freely.

In this connection it may be interesting to observe that since the autumn of 1924, when the Dawes plan went into effect and England and certain other European countries were preparing to return to a gold basis and were in a position to use gold, there has been no net movement of gold either to or from the United States, when account is taken of changes in gold held under earmark. The country's total gold stock on October 31, 1927, was $\$ 4,548,000,000$, compared with $\$ 4,554,000,000$ on October 31, 1924. For this result reserve policy is at least in part responsible, not simply through specific operations designed to deal with gold movements, but principally by the pursuance of a larger plan, which has had as its objective the restoration of the gold standard throughout the world and which has found expression in the granting of credits to a number of the European banks of issue, and in a discount and open-market policy which as far as possible has avoided a rate position which would attract gold to this country and would put a strain on the European money markets.

It is indeed fortunate in this disturbed period in monetary affairs, when so large responsibilities for world stability have been placed upon this country, that we have had in the Federal reserve system an agency capable not only of exercising an important influence toward stability in our own money markets, but also of aiding in financial reconstruction abroad. For financial stability abroad is almost as important to the American farmer or business man as stability in our own money market.

The presence of the Federal reserve system as an agency for dealing with monetary problems relieves the Treasury from a responsibility which in former days frequently fell upon it. In times of stress the Treasury frequently had to consider means of relief, such as advancing the date of payment of interest coupons or the deposit of gold in the banks. It is a more wholesome situation to have responsibilities of this sort borne entirely by an agency independent of the Treasury and devoted solely to the preservation of sound monetary conditions.

## Federal farm loan system

The unsatisfactory conditions which developed in some of the banks of the farm loan system were discussed in my last annual report. When rumors of these conditions came to my attention it appeared advisable as chairman ex officio and member of the Farm Loan Board to report the situation to the full board.
In the fall of 1925, upon the order of the Farm Loan Board, special examinations were directed to be made of certain of the joint-stock land banks, and these examinations disclosed improper and unsound practices as well as apparent violations of the law. These disclosures were brought to the attention of the Department of Justice, which department took action resulting in the indictment of some of the officials of three of the banks. Early in 1926 the assistance of the Bureau of Efficiency was enlisted and, at my request, a survey was made by that organization of the office operations and procedure of the Farm Loan Bureau.

These steps developed the fact that the regulations of the Farm Loan Board were defective in many respects and that the examining department of the Farm Loan Bureau was inadequate and unable to cope with this important phase of the situation. The farm loan act requires that Federal land banks and joint-stock land banks shall be examined twice a year by examiners appointed by the Farm Loan Board, and the act creating the Federal intermediate credit banks provides that they shall be examined and audited at least once a year. With nearly 80 banks in the system, the board was attempting to make the required examinations with a force of only five examiners.

As a result, some of the banks were not examined for periods ranging from 12 to 18 months and many of the examinations that were made were superficial. A number of the national farm-loan associations, of which there are more than 4,600 and through which the loans of the Federal land banks are made, had not been examined for several years and some of them not at all. Furthermore, there was no adequate analysis of examination reports received by the bureau, important matters covered by them and requiring attention were neglected or ignored, and in many instances appropriate remedial action was not taken to correct abuses which had grown up in some of the banks over a period of years. The staff in Washington was insufficient to properly handle the business of the bureau, several important phases of the work were not coordinated or systematized, and many of the files and records were in unsatisfactory condition.

At the instance of the Treasury, additional funds were made available by the Congress to the Farm Loan Bureau during the latter part of the fiscal year 1926 and an examining division was organized, with a chief examiner in charge and an enlarged examining staff. The rules and regulations of the Farm Loan Board also were revised in June, 1926, at the instance of the Treasury and other improvements in practice and procedure were effected.

As the Treasury continued to study the situation, however, it became more and more apparent that the action taken by it met the problem only in part. There continued to be lack of harmony in the board, as well as confusion and indecision in fundamental matters of policy, and it was clear that the bureau was not organized or equipped to meet its large administrative and supervisory responsibilities.

At the last session of Congress there was introduced, at the suggestion of the Treasury, a bill proposing certain amendments to the farm loan act. The bill provided, among other things, for the transfer to the Treasury of the work of examining the banks of the farm loan system and the handling of accounting matters in connection therewith. The purpose of this measure was to make more effective the supervision of the banks of the system. The matter was considered by the Banking and Currency Committee of the House, but no action was taken thereon.

Reorganization.-In the early part of May, 1927, three members of the Farm Loan Board resigned and Messrs. Eugene Meyer, George R. Cooksey, and Floyd R. Harrison, directors of the War Finance Corporation, were appointed by the President as their successors, taking the oath of office on May 10, 1927, and Mr. Meyer was designated by the President as Farm Loan Commissioner. The other members of the board are Messrs. A. C. Williams, John H. Guill, and L. J. Pettijohn.

The new members were selected because of their demonstrated ability and wide experience in the field of agricultural finance gained largely through the extensive and successful operations of the War Finance Corporation, which, during the emergency that confronted agriculture in 1921 and immediately thereafter, made loans aggregating more than $\$ 300,000,000$ to hundreds of thousands of farmers through country banks, livestock loan companies, and cooperative marketing associations. Their work with the corporation brought them into contact with agricultural problems throughout the country, and it was felt that they possessed the special qualifications required for the task of improving and developing the administration and supervision of the farm loan system. Since their appointment, the board has been functioning harmoniously and the work of the Farm Loan Bureau has been undergoing a thorough reorganization. Although much remains to be done, substantial results already have been accomplished.

With the reorganization of the bureau that is in process, the Treasury feels that it is not now desirable or necessary to transfer the examining and accounting functions from the bureau, but the enactment of some of the other provisions included in the bill proposed by the Treasury at the last session of Congress, which were designed to clarify or correct defects in the act is, it is believed, very necessary.

There has been some public discussion about "Treasury domination" of the farm loan system. This discussion is undoubtedly due to a misunderstanding of the situation. When conditions exist in the Farm Loan Bureau, or any other bureau of the Treasury Department, which require correction, the Secretary of the Treasury would fail in his duty if he did not immediately take such steps as lie within his power to remedy them. The farm loan system has rendered a valuable service to the farmers of the country, and everything possible should be done to preserve its integrity and to maintain it on a sound basis. The ability of the system to extend and develop its usefulness to farmers depends upon its ability to market, in large amounts at reasonable rates, the bonds of the Federal land banks and joint stock land banks and the debentures of the Federal intermediate credit banks, and this in turn depends upon the manner in which the operations of the system are conducted and the effectiveness of the supervision exercised by the Farm Loan Board. The only purpose of the Secretary of the Treasury has. been to improve the administration of the system and to see that adequate safeguards are provided against the recurrence of the unfortunate conditions which resulted, in considerable part at least, from the lack of proper supervision, so that the system may continue to grow and increase its service to the agricultural interests of the country.

Federal land banks.-During the fiscal year ended June 30, 1927, the Federal land banks closed 40,921 loans, amounting in the aggregate to $\$ 147,560,875$. Net earnings for the same period amounted to $\$ 9,372,017.80$. Against this amount real estate aggregating $\$ 4,393,-$ 202.08 was charged off, and a portion of the remainder was used to increase reserve and undivided profits accounts from $\$ 12,605,498.71$ to $\$ 13,342,757.14$. The net amount of mortgage loans outstanding as of June 30, 1927, was $\$ 1,130,647,908.35$. The amount of farm loan bonds issued by Federal land banks and outstanding as of June 30, 1927, was $\$ 1,102,196,980$. On May 1, 1927, all the outstanding Federal land bank bonds issued in 1917, 1918, and 1919, aggregating $\$ 92,800,000$, bearing interest at the rate of $41 / 2$ per cent, and dated May 1 and November 1, 1917, November 1, 1918, and May 1 and November 1, 1919, were called for redemption, and at the same time a new issue of $\$ 100,650,000$, bearing interest at $41 / 4$ per cent, was sold for the purpose of refunding the called bonds and providing additional funds for current requirements. 'During the year the loan rate of 3 Federal land banks was reduced from $51 / 2$ per cent to $51 / 4$ per cent, of 4 banks from $51 / 2$ to 5 per cent, and of 1 bank from $51 / 4$ per cent to 5 per cent, so that on June 30, 1927, 8 banks were on a 5 per cent basis, 3 on a $51 / 4$ per cent basis, and 1 on a $51 / 2$ per cent basis.
National farm loan associations increased in number during the fiscal year from 4,664 to 4,667.

The combined capital stock of all Federal land banks on June 30, 1927 , amounted to $\$ 60,574,983$, of which $\$ 59,060,420$ was owned by national farm loan associations, $\$ 672,555$ by individual borrowers, and $\$ 842,008$ by the Federal Government. The last named figure is the balance outstanding of the total of $\$ 8,892,130$ originally subscribed by the Treasury to the initial capital of the Federal land banks, which aggregated $\$ 9,000,000$. Under the law, the capital provided by the Treasury is retired out of the proceeds of stock subscriptions by national farm loan associations. On June 30, 1927, such capital had been retired entirely in eight of the banks.
Joint-stock land banks.-During the fiscal year one joint-stock land bank was chartered, two were liquidated, one was placed in the hands of a receiver, and one was being voluntarily liquidated. At the end of the fiscal year there were 54 joint-stock land banks in operation, all of the States of the Union being covered by one or more joint-stock land banks except the New England States, Delaware, Florida, and New Mexico. Since June 30, 1927, two additional banks have been placed in receivership, reducing the number of going banks to 52 .

Loans numbering 6,668 were made by joint-stock land banks during the fiscal year in an aggregate amount of $\$ 25,725,057$.

The combined capital stock of all joint-stock land banks on June 30, 1927, as shown by reports submitted by them to the Farm Loan Board, was $\$ 40,720,485.24$; legal reserve, $\$ 4,545,538.74$; surplus, undivided profits and other net worth accounts, $\$ 6,759,392.76$. The net amount of mortgage loans outstanding as of June 30, 1927, was $\$ 607,516,796.92$, and the amount of farm loan bonds issued by jointstock land banks and outstanding on June 30, 1927, was $\$ 576,531,200$.

Receiverships.-Since the close of the fiscal year 1926, three jointstock land banks have been placed in the hands of receivers in order to conserve their assets and protect the interests of all concerned. A receiver of the Kansas City Joint-Stock Land Bank, with capital stock of $\$ 3,800,000$ and outstanding bonds of $\$ 44,376,500$, was appointed by the Farm Loan Board on May 4, 1927, and immediately took charge of its affairs. The bank did not have on hand sufficient funds to meet the interest due on its bonds on May 1, 1927, and a short time before the receivership a number of the officers and directors of the bank were indicted in the Federal court at Kansas City, Mo., for alleged improper conduct in connection with its operations, involving misapplication of funds of the bank and falsification of its books and records. The receiver on May 6, 1927, with the approval of the Farm Loan Board, applied to the United States District Court for the Western Division of the Western District of Missouri for authority to issue receiver's certificates, not exceeding $\$ 700,000$ in the aggregate, for the purpose of meeting the interest due on the bonds of the bank on May 1 and subsequent dates prior to November 1, 1927. This authority was granted by the Court on May 9, 1927, and the receiver issued certificates in the amount of $\$ 500,000$, all of which have since been retired. The condition of the bank and its income did not permit or warrant the receiver to pay the bond interest falling due on November 1.

The receiver found the affairs of the bank in a chaotic condition; and relations with subsidiary or affiliated concerns have complicated the situation greatly, making it exceedingly difficult for the receiver to trace the various transactions and determine the exact condition of the bank.

The Bankers Joint-Stock Land Bank of Milwaukee, Wis., with capital stock of $\$ 1,200,000$ and outstanding bonds of $\$ 15,771,600$, failed to pay the interest due on its bonds on July 1, 1927, and as a result a receiver was appointed by the Farm Loan Board on that date to take charge of its affairs. The difficulties of this bank were due largely to mismanagement.

The Ohio Joint-Stock Land Bank, of Cincinnati, Ohio, defaulted in the payment of interest due on its bonds on September 1, 1927, and the Farm Loan Board on that date appointed a receiver to take charge of its affairs. This bank was one of the smaller institutions
of the system. Its capital stock was $\$ 250,000$, while its outstanding bonds totaled $\$ 1,369,300$. It had issued no bonds since January, 1924, and had been virtually in liquidation for two or three years.

In all three cases the receivers have been making every effort to ascertain the true condition of the banks of which they have charge, and it is their purpose to make full information available to the security holders as soon as they are in a position to do so.

Federal intermediate credit banks.-The 12 Federal intermediate credit banks authorized by the agricultural credits act of March 4, 1923, have been in operation for more than four years. Each bank, with the exception of that at Columbia, S. C., has a paid-in capital of $\$ 2,000,000$, with the right to call upon the Treasury for an additional $\$ 3,000,000$ of its subscribed capital. In the case of the Columbia bank, an additional $\$ 1,000,000$ of capital was paid in by the Treasury in December, 1926, making its paid-in capital $\$ 3,000,000$ and the balance of its subscribed capital $\$ 2,000,000$.

Original advances to cooperative marketing associations from the beginning of operations to June 30, 1927, aggregated $\$ 201,411,957.86$, while renewal notes totaled $\$ 132,430,890.89$. The amount outstanding at the close of the fiscal year was $\$ 15,520,452.76$.

The advances to cooperative marketing associations were distributed by commodities, as follows:

| Tob | \$62, 614, 909.50 | Broomcorn_ | \$335, 447. 60 |
| :---: | :---: | :---: | :---: |
| Cotton | 83, 721, 406. 85 | Redtop seed | $95,800.00$ |
| Raisins | 17, 600, 000.00 | Olive oil | 107, 520.00 |
| Wheat | 13, 653, 053. 33 | Coffee | 708,500.00 |
| Wool | $6,095,101.95$ | Hay | 75,000.00 |
| Prunes | 1,956, 800. 00 | Grimm alfalta seed | 163, 054.39 |
| Canned fruits and vegetables | 8, 959, 642. 40 | Beans | 50, 000.00 |
|  | 565,530.00 |  | 1, 411, 957.86 |
| Rice | $4,710,191.84$ | - |  |

Original rediscounts aggregated $\$ 148,022,039.13$ and renewals $\$ 64,496,242.51$. The amount outstanding at the close of the fiscal year was $\$ 49,530,809.95$. The corporations through which these rediscounts were made are classified as follows:

State banks. 3, 466, 598. 03

Savings banks and trust companies.
694, 751. 07
$148,022,039.13$
As provided in the law, 50 per cent of the net earnings of these banks each year must be paid into the Treasury as a franchise tax. For that part of the year 1923 during which they functioned the
banks paid as a tax $\$ 152,271.20$; on December $31,1924, \$ 528,313.30$; at the close of $1925, \$ 508,589.86$; and $1926, \$ 413,613.07$. The net earnings in these years, based on invested capital, and after providing substantial reserves, were reported as follows: 1923, 2.7 per cent; 1924, 4.7 per cent; 1925, 4.2 per cent; and 1926, 3.2 per cent. The decrease in net earnings reported for 1926 was occasioned by losses, principally by the Columbia bank; by increased reserves amounting to $\$ 377,734.49$ set apart by eight otber banks; and by the smaller spread, as compared with previous years, between debenture rates and rates charged borrowers. Improper conduct on the part of the officers of a credit corporation for which the Columbia bank had discounted a large volume of farmers' notes contributed to the losses of that bank.

On June 30, 1927, the surplus, reserves, and undivided profits accounts of the 12 banks aggregated $\$ 2,280,731.63$.

It is estimated that approximately 141,485 farmers have been served through the rediscount of their individual notes and that 995,554 have benefited from the advances made to cooperative marketing associations.

Throughout the fiscal year the interest rate on loans to cooperative marketing associations continued at $41 / 2$ per cent and the rate on rediscounts at $43 / 4$ per cent. Debentures issued on September 15 were sold on a $31 / 2$ per cent basis, and debentures issued on October 15, 1927, bore interest at the rate of $31 / 2$ per cent per annum and were sold at par, the lowest rate thus far obtained.

Cotton situation in 1926.-Increased acreage, coupled with unusually favorable weather conditions during the growing season, resulted in the production in 1926 of the largest crop of cotton ever grown in this country. Prices declined sharply as the crop moved to market and in the early part of October, 1926, the President appointed a committee consisting of the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce, Mr. Eugene Meyer, managing director of the War Finance Corporation; Mr. A. C. Williams, then Farm Loan Commissioner; and Mr. George R. James, member of the Federal Reserve Board, to consider the problem with the view of seeing what assistance could be rendered by the Government. The Farm Loan Board cooperated with the committee and tendered the facilities of the Federal intermediate credit banks. Mr. Meyer, as chairman of the committee, and Mr. Williams, of the Farm Loan Board, visited the principal cotton growing States and held a series of conferences which resulted in action looking toward the formation of credit corporations, with an aggregate capital of $\$ 16,000,000$ and having capacity to borrow from the Federal intermediate credit banks a total of $\$ 160,000,000$, if necessary, to assist in financing the storage of the surplus for a period of 18 months, or
until it could be marketed in an orderly manner. These organizations were intended to supplement the facilities of the cooperative marketing associations and other agencies and to provide machinery through which the resources of the intermediate credit banks could be made available on a larger scale during the emergency than otherwise would have been possible. Unquestionably the plan for the formation of the credit corporations, and the readiness and ability of the intermediate credit banks to make advances through them, as well as through the cooperative marketing associations and other agencies, running into the hundreds of millions of dollars, were a vital factor in stabilizing the market and preventing further demoralization in prices. The very fact that machinery was being set up to take advantage of the facilities of the intermediate credit banks in a way and on a scale that would insure an orderly marketing program changed the psychology of the situation, stimulated freer advances by banks and other lending agencies, encouraged the owners of cotton to-slow up on selling, which was going on at a panicky rate, gave greater confidence to buyers at home and abroad, as well as to producers, and steadied conditions generally by providing more time for the absorption and better handling of the crop by the normal agencies. In fact, many of those familiar with the situation have expressed the opinion that but for the action taken there would have been a further substantial decline in prices.

Flood situation.-The Federal intermediate credit banks played a part in helping to meet the problems arising out of the flood conditions in the Mississippi Valley. Following conferences in Washington with representative business men and bankers from the flooded districts, the intermediate credit banks at St. Louis and New Orleans, with the approval of the Farm Loan Board, agreed to make advances to farmers in the affected areas, through special credit corporations organized by the local interests, to enahle them to replant their crops and continue their operations. Special credit corporations were formed in Arkansas and Mississippi, each with $\$ 500,000$ capital, while in Louisiana plans were formulated to utilize the facilities of the cotton financing organization, with a capital of approximately $\$ 750,000$, which was created in the fall of 1926 to assist in stabilizing the cotton situation. Subsequently, at the request of the President, the United States Chamber of Commerce undertook to raise among the business men and bankers of the country outside of the flooded sections sufficient funds to match the capital provided by the local interests and assist in the work of rehabilitation. The facilities of the intermediate credit banks were not utilized to a great extent, but the knowledge that their resources were available in case of need not only facilitated the operations of the credit corporations but helped to maintain confidence generally.

It is expected that these credit corporations will continue to function next year, and that they may make wider use of the privilege of rediscounting with the intermediate credit banks.

## Federal public buildings program

Program for buildings in the District of Columbia.-In my last report there was included a statement of some general considerations bearing on the Federal building program for the District of Columbia. Since then study has been continued on this great project, which is necessarily of vital importance to the development of the National Capital.
From a consideration of the placement for such buildings as the Federal Government may construct under the present authorization, it soon became evident that the future expansion of the Government's bousing needs called for a decision as to whether the Government's policy should be aligned with one or the other of two opposing ideas. According to one of these, Government buildings should be separated by locating them in various parts of the District, each building treated individually, each creating its own center of activities and personnel, all depending for interdepartmental communication on the various methods of rapid transit and transportation that play their part in the equipment of a modern city. Whereas, from the second point of view, the grouping of new Federal buildings in one large area under a system of reasonable concentration interspersed with open spaces would better serve the Government's needs. This department unhesitatingly recommends the latter plan as the means of accomplishing certain very_definite objectives which include the following:

1. With the dominating position which the Capitol Building occupies, and with the White House, the Lincoln Memorial, the Mall, and the bridge to Arlington in their respective locations, there is set up a series of isolated focal points of the major plan. In furtherance of this plan it is proposed to form a connecting link by the establishment of a group of buildings worked out with due regard to the maintenance of a proper relationship to the Mall and to the other focal points of this portion of the city's plan.
2. The grouping of the new buildings places them in such relation to each other that the transaction of public business is facilitated.
3. In reclaiming the south side of Pennsylvania Avenue, the opportunity is presented to dignify that thoroughfare as an important artery between the Capitol and the White House; and by the rehabilitation of B Street; a second important line of circulation is created connecting the Capitol with the Lincoln Memorial and the bridge to Arlington.
4. The proposed grouping gives recognition to the plan of L'Enfant, and accords with steps heretofore taken by officially appointed commissions in furtherance of that plan.

To give assurance that the solution of the problem in hand would be conceived with breadth of vision and a thorough recognition of all the elements involved in it, advantage has been taken of the provisions of the act of May 25, 1926, permitting the employment of advisory technical servicg. Five nationally known architects have been retained to act with the Supervising Architect's Office in giving direction to the problem for Federal buildings in the District of Columbia. By this means, and with a keen appreciation of the importance of the task which Congress has entrusted to the Treasury Department in placing this building program under its supervision, a general plan has been devised for a group of buildings. As now proposed, it looks to the acquirement by the Federal Government of the entire triangle of land bounded by Fifteenth, B, and Sixth Streets and Pennsylvania Avenue. Given the present authorizations for the construction of three buildings for the Department of Commerce, Internal Revenue, and National Archives, respectively, and the very obvious necessity for relating these buildings to other future buildings which are even now needed to eliminate rental charges and temporary housing of a very unsatisfactory character, the general plan as developed gives opportunity for the placement of eight other Federal buildings in an orderly and related way in addition to the three now authorized.

In the composition of the general layout great care has been exercised to avoid overconcentration in the socalled triangle area. With a grouping of public buildings which are to be used for the purposes in view, there is a real problem involved in avoiding congestion of traffic incident to the assemblage of the large number of people employed in the buildings and those coming to this area for the transaction of business. The difficulty in question is avoided by introducing into the scheme a large open plaza which not only serves the purpose of opening up the general plan, but also forms a major point of interest when treated with planting and framed with monumental buildings. In further extension of this principle a secondary plaza, circular in plan, occurs adjoining the first, from which through openings of ample size a vista is obtained between the two open spaces, bringing into the composition that imaginative element which is so essential to success in planning a project of this kind. With these open spaces and a proper treatment of streets and parkways, with the possibility of subsurface levels for automobile parking, and provisions by which rapid transit facilities and vehicular and pedestrian traffic may effectively operate, a comprehensive solution of the entire problem is promised.

In approaching the subject of new Federal buildings for Washington the department has not failed to note the opinions of those who sce in such a project a great opportunity for casting aside the estab-
lished precedent in architectural forms and following in the waise of those who see progress only in the employment of new forms and new relationships of forms; but for the National Capital there are other considerations involved. The early builders have here set a very definite stamp on the character of buildings erected for the Federal Government, and the spirit of this is sufficiently marked to have become a tradition which may not be lightly disregarded. It seems eminently fitting that the United States Government should cherish its national inheritance and should perpetuate in the National Capital the general spirit of the architectural character expressed in the best of the earlier Government buildings in Washington. With this in view, the new buildings will take on the character of the eighteenth century adaptation of the classic style, seeking to maintain such a measure of difference in the treatment of the several buildings as may be necessary to obtain a unified individuality free from the monotony of a stereotyped repetition.

In carrying on the work of this program conferences have been held with the National Commission of Fine Arts and the National Capitol Park and Planning Commission to avoid the possibility of conflict with related matters intrusted to those commissions. The layout as described has received the approval of the Public Buildings Commission, charged with the duty of designating sites for Federal buildings in the District of Columbia, and the approval of space allotments to the various activities to be carried on therein.

Program for buildings outside the District of Columbia.-The Sixtyninth Congress during the second session inaugurated a new policy in respect to public building construction, placing upon the Secretary of the Treasury and the Postmaster General the duty of ascertaining construction needs throughout the country and submitting to Congress recommendations for appropriations.

The act, approved May 25, 1926, authorized a total of approzimately $\$ 165,000,000$ to be expended at the rate of not exceeding $\$ 25,000,000$ per annum, of which $\$ 10,000,000$ may be expended in the District of Columbia.

In order to ascertain building needs throughout the country surveys have been made of 1,950 places, partly by means of questionnaires and in the most important cases by personal inspection; based upon which recommendations have been submitted to Congress in a report which was printed as House Document No. 710, second session. Sixty-ninth Congress. As the bill in the last session of the Congress carrying appropriations for public buildings failed of passage in the Senate, only such projects could be taken up as had been previously authorized and for which appropriations had been made in whole or in part.

The act of July 3, 1926, made appropriation for carrying out a portion of this program involving (under.sec. 3) 69 projects previously authorized but for which the limit of cost was insufficient, and (under sec. 5) 8 additional projects, making a total of 77 projects exclusive of the District of Columbia. To carry out this work it was necessary to make a large increase in the technical force and a lesser increase in the clerical force, which was accomplished with the assistance of the Civil Service Commission within six months. Of the 77 places enumerated in the act, 69 were included in section 3 , of which 23 involve the acquisition of sites. As the titles to only 4 have been secured, 19 projects are necessarily deferred. Of the remaining 50 , there are 6 where the limit of cost is still insufficient, so that there are only 44 workable projects; the working drawings for most of these have been completed, and on June 30, 1927, 24 were under contract, involving $\$ 4,006,465$. It is expected that the remaining 20 will be placed under contract during the fiscal year 1928, besides the 19 involving acquisition of sites, provided titles to the sites are secured in time through the Department of Justice.
Under section 5 eight items are authorized, exclusive of the District of Columbia; three are for the purchase of sites only, which have been acquired; four projects have been placed under contract involving $\$ 899,636$; and the eighth project (Memphis, Tenn.) has been delayed with the intention of securing amended legislation.

## Revision of paper currency designs

In former reports reference has been made to the revision of paper currency designs, which has been before the department for many years, and to the reasons which prompted the restudy of the whole situation which was undertaken two years ago. This restudy has been completed, conclusions have been reached, and new designs are in process of execution.

The most important of the conclusions reached provides for reduction in size. The present size of currency is $7 \frac{7}{16}$ by $31 / 8$ inches. The new size will be $6 \frac{5}{16}$ by $2 \frac{17}{16}$ inches. Public announcement of the reduction in size was made on May 26, 1927. A copy of the announcement will be found on page 369 of this report.

As the reduction in size will require new engraved work throughout, the elimination of unnecessary designs will be greatly facilitated and. correction of the confusion now existing in outstanding currency issues will be insured. Current issues present a different design for each face and back of each denomination of each kind of currency. For the new issues there will be uniform characteristic designs for the face and back, respectively, of each denomination regardless of the class of currency, with only enough variation in minor details of the face designs to indicate the class. As an example, the respective
face and back designs of all $\$ 10$ bills will be substantially uniform, whether the bill is a gold certificate or a Federal reserve note, or any other kind of currency. The finely engraved portraits executed at the Bureau of Engraving and Printing will continue to be the outstanding protective feature against counterfeiting, and the definite assignment of particular portraits as indicative of denomination will be the outstanding protective feature against raising of denominations.

Reduction in size is the first radical change in design since the original issue of paper currency by the Government in 1861. This step will prove of very great practical importance, for apart from important economies in ${ }^{\text {T}}$ production that will be brought about, it will insure that existing facilities for producing currency will be able to meet current demands without difficulty, and provide for a greatly increased output if required.

During the past decade there has been a notable change in the paper currency outstanding. The normal increase in the population and wealth of this country has required additions to the circulating media. At the same time there has been a constant demand for more bills of the smaller denominations. The change in the paper currency outstanding between July 1, 1917, and July 1, 1927, may be appreciated by reference to the following table:

|  | July 1, 1917 | July 1, 1927 | Increase | Per cent |
| :---: | :---: | :---: | :---: | :---: |
| Total gold and silver, money stock. | \$3, 857, 710, 653 | \$5, 398, 836, 963 | \$1,541, 126, 310 | 40 |
| Paper currency outstanding: |  |  |  |  |
| Amount----...-- | \$4, 212, 422,700 | \$5, 715, 031, 422 | \$1,502, 608, 722 | ${ }_{61} 35$ |
| A verage amount per piece. |  | 865, ${ }^{\$ 6.80}$ | 320, 1 \$1.05 | 113.3 |
| A verage number pieces per capita | 5.15 | 7.40 | 2.25 | 43.7 |
| A verage amount per capita.. | \$40.44 | \$48.87 | \$8.43 | 20.8 |

## 1 Decrease.

During the fiscal year 1917 the bureau delivered 514,688,180 pieces of paper currency. During the fiscal year 1927 the bureau delivered $992,339,984$ pieces. Deliveries during 1927 were not all utilized for issue, a portion being set apart as a necessary reserve under an emergency printing program authorized forithe purpose. Accordingly the currency in circulation was maintained at a standard fixed several years ago, with the result that a large part of paper currency outstanding is below a standard acceptable by the public only under protest. The presence in circulation of worn-out bills or bills approaching that condition is a constant menace to the security of the currency, facilitating, as it does, the circulation of spurious issues. Within its facilities the department has been unable to improve this condition and at the same time meet increased demands and set apart during the three-year period the equivalent of three months' reserves of new notes. To meet the situation which has existed for
many years and which continues, it became more and more apparent that plans must be considered for increase in production. Reduction in size will solve all difficulties in this respect and obviate the necessity for greatly increased appropriations. Aside from this practical consideration, however, other benefits will accrue through reduction in size. Convenience of the public will be served through the greater facility with which the smaller notes may be handled or carried. A substantial saving in the cost of production will be brought about, and at the same time it will be possible to improve the standard of bills in circulation.

It is not possible at this time to state definitely when the reducedsize bills will be issued. The change involves entirely new engraved work at the bureau and many changes in the mechanical equipment. The full program will doubtless extend to the close of the fiscal year 1929, and thereafter only bills of the smaller size will be producod. It is now believed that the issue of silver certificates of the $\$ 1$ denomination in reduced size will be made about October 1, 1928, and that the issue of all other denominations of all kinds will be made toward the close of the fiscal year ending June 30, 1929. The program for reducing the size at present makes no provision for national-bank notes. Such provision, however, will be made if later it is determined that national-bank notes shall continue indefinitely after Apris 1, 1930, as a part of the money circulation of the United States.

## The McFadden Act

The legislation, popularly known as the McFadden Banking Act, became effective on February 25, 1927, three years after its first introduction in Congress. The bill originated in the Treasury and its passage was urged by this department throughout its discussion.

The McFadden Act is generally acknowledged as one of the most significant measures passed during the last session of Congress, and represents the most important piece of banking legislation enacted since the passage of the Federal reserve act. It revises the national banking act in a number of ways, bringing it into conformity with administrative rulings and current practice. Its more important provisions, however, are those increasing the powers of national banks, making them commensurate with those of State banks, and that. granting indeterminate charters to the Federal reserve banks. The fundamental purpose of these provisions is to strengthen and perpetuate the Federal reserve and national banking systems, and in this lies the great importance of the act.

We have in the United States two systems of banks-State and National-which enter potentially the same field. They serve the same class of customers and cooperate in the same clearing houses. While the State banks are invited to join the Federal reserve system,
the national banks are the backbone of the system, since they are required by law to become members. The perpetuity of the Federal reserve system, consequently, demands that national banks shall enjoy charter powers coordinate with those of State banks.

Postwar economic conditions developed many changes in the procedure of corporate financing and in business methods and organization, all of which demanded commensurate adjustments in the field of banking. The State banks, in many States, secured a broadening of their charter powers soon after the close of the war, and to some extent Congress also liberalized the national bank act. But the disparity of competitive opportunity between the two institutions was sufficiently great to cause many national banks, in recent years, to withdraw from the national system and take State charters. Although it is yet too early to judge its full effect (only eight months having elapsed since passage) the passage of the McFadden Act has been fully justified as the additions to the resources of the national banking system have more than offset the losses during the three-year period prior to the enactment of the act.

Because of the controversy aroused, the branch banking provisions of the McFadden Act, giving to national banks intracity branch banking privileges commensurate with those of State banks in the same States, were thrown into great prominence. Now that the bill has become law and is in actual operation, the branch banking provisions appear in their proper perspective, and the importance of other provisions of an equalizing nature has become apparent.

Although the section granting the Federal reserve banks indeterminate charters was added to the original bill as an amendment during the $1925-26$ session of Congress, it is without doubt one of the most important and significant sections of the act. Coupled with the similar provision for the perpetuity of national bank charters, it bas placed the entire banking system of the country on a permanent basis, and outside the field of partisan controversy. With the charters of the Federal reserve banks now perpetuated indefinitely, no partisan minority can bring the Federal reserve system to an end, as might have been possible were renewal legislation necessary. A majority of both Houses of Congress and the approval of the President now would be required to terminate the Federal reserve system, and this could be accomplished only if the country as a whole were distinctly dissatisfied with the institution. This system which in so short a life, under such trying circumstances, has proved itself invaluable, both nationally and internationally, richly deserves the statesmanlike confidence which Congress showed in assuring its continuity, and will inevitably further demonstrate its value in our increasingly complex financial world of the future.

64761-FI 1927-8

## Money cost of the World War to the United States Government

The last official statement of the money cost of the World War to the United States Government was contained in the Annual Report of the Secretary of the Treasury for the fiscal year ended June 30, 1920. After deducting the amount of loans to foreign governments, the net cost to that date was estimated at slightly over $\$ 24,000$,000,000 . Since that statement was prepared additional expenditures have been made on account of the war, which, together with certain necessary adjustments, have materially increased the amount as estimated up to 1920 .

For the purpose of a new estimate of the cost of the war, the "war period" has been taken as extending from April 6, 1917, to June 30, 1921. This is based on a proclamation of the President dated November 14, 1921, declaring that the state of war between Germany and the United States officially ended July 2, 1921. It is not possible to ascertain accurately the exact cost of the war on account of the fact that it is necessary to deduct from the total expenditures the estimated normal expenditures of the Government for the war period, and in some instances it is necessary to estimate the value of the assets on hand. During the past year the Treasury has, however, made a detailed analysis of the total expenditures of the Government for the war period, as well as of the continuing costs thereafter up to June 30,1927 . As a result of this analysis it is believed that a conservative estimate of the net cost of the war to the United States to that date has been ascertained.

This estimate makes allowances for the estimated normal expenditures under the War and Navy Departments on a peace-time basis, receipts on account of the sale of war supplies and surplus government property, etc., and assets held on June 30, 1921, except the foreign obligations and the amount due from Germany on account of reimbursement of the costs of the American Army of Occupation which are taken as of June 30, 1927. Some of the assets shown as held on June 30, 1921, have, subsequent to that date, been converted into cash and covered into the Treasury. The receipts and assets are credited against the total war expenditures.

It is not believed that the assets representing obligations of foreign governments and claims against Germany for Army costs should be listed at their face value, but should be stated at their present value based upon the average rate of interest the United States is paying on its public debt. This average rate was on June 30, 1927, slightly under 4 per cent per annum. The payments, therefore, to be received under the various funding agreements have been discounted so as to show their present value on a basis of 4 per cent per annum, payable semiannually. This amounts to approximately $\$ 7,440,000,000$, or
about 60 per cent of the value of these foreign debts based on the terms of the original obligations. Assuming that Austria and Greece will settle their debts on the same average basis, 60 per cent thereof or $\$ 30,000,000$ should be added to the above. On account of the present conditions in Armenia and Russia the indebtedness of these governments has been eliminated from the assets. The total assets representing foreign obligations are, therefore, $\$ 7,470,000,000$.

The amount due from Germany on account of reimbursement of the costs of the American Army of Occupation was on June 30, 1927, approximately $\$ 225,000,000$. The United States is to receive annually out of the Dawes annuities the sum of $55,000,000$ gold marks until this claim is satisfied. Assuming, therefore, that the United States will receive on this account the sum of $\$ 13,000,000$ per annum for 17 years, the present value of this asset, discounted on the same basis as the foreign obligations, amounts to approximately $\$ 158,000,000$.

The continuing costs of the war are the expenses of the Veterans' Bureau, interest on that part of the public debt of the United States created as a result of the war, and construction of hospitals for the care of veterans of the war.

There follows a summary statement showing the net war costs under the various headings, the details of which will be found in Table 78, page 642. The war expenditures of the War and Navy Departments, the United States Shipping Board, and the United States Railroad Administration, have been submitted to those departments and establishments and have been approved as herein stated as fairly representing their war expenditures.

|  | Total war costs | Receipts | $\begin{aligned} & \text { Assets June } \\ & 30,1921 \\ & \text { (partly } \\ & \text { estimated) } \end{aligned}$ | Net war costs |
| :---: | :---: | :---: | :---: | :---: |
| Military activities. | \$16, 283, 569, 220 | \$981, 573, 735 | \$452, 401, 819 | \$14, 849, 593, 666 |
| Naval activities. | 3, 480, 781, 737 | 24, 438, 786 | 55, 000,000 | 3,401, 342,951 |
| War emergency corporations | 4, 387, 600, 269 | 487, 728, 506 | 892, 460, 280 | 3, 007, 411, 483 |
| War expenditures under other departments and war agencies. | 3, 541, 823, 843 | 446, 746, 177 | 283, 370, 479 | 2, 811, 707, 186 |
| Interest on war debt to June 30, 1927.....- | $8,116,343,095$ |  |  | 8, 116, 343, 095 |
| Foreiga obligations (June 30, 1927) ......- | 9, 598, 236, 575 | 1, 743, 930, 407 | 7, 470, 000, 000 | 384, 306, 169 |
| Veterans' Bureau (continuing costs to June 30, 1927) | 2, 548, 917, 695 |  |  | 2,548,917,595 |
| Total. | 47, 957, 272, 333 | 3, 684, 417, 611 | 9, 153, 232, 578 | 35, 119, 622, 144 |

Inauguration of the statement of expenditures on the basis of checks issued

It has been realized for some time that a more accurate method should be devised for exhibiting the detailed expenditures of the Government in the annual reports than the one heretofore observed.

Except in the case of the daily Treasury statements the detailed expenditures have been exhibited on the basis of warrants issued. against appropriations provided by Congress in accordance with section 305 of the Revised Statutes. Accountable warrants, so called. because the disbursing officers must regularly account for expenditures therefrom, are issued to place funds to the credit of disbursing officers upon the books of the Treasurer of the United States, subject to their official check for the payment of Government obligations. Settlement warrants authorize the Treasurer to make direct payments to claimants upon settlements of the accounting officers.

Funds placed to the credit of disbursing officers by means of accountable warrants have been exhibited heretofore as expenditures during the period in which such advances were made. As a matter of fact, some of the money in many instances is not actually spent until the period following the one in which the advance is made, and, to some extent, not at all, the unexpended portion being returned to the appropriation accounts on the books of the Secretary of the Treasury in a subsequent period, which operates to reduce expenditures on a warrant basis for that year. The expenditures on a warrant basis, therefore, do not accurately reflect the trend of governmental expenditures since they include unexpended balances remaining to the credit of disbursing officers at the end of the year but not. expenditures from unexpended balances at the beginning of the year. It may be stated, however, that the differences between the expenditures on a warrant and check-issue basis are not so material in cases where the unexpended balances to the credit of disbursing officers remain more or less constant from year to year.

In the early history of the Government when payments to public creditors were made by direct Treasury warrant, the warrants issued during a given fiscal year represented the actual expenditures of the Government. Subsequently, however, as the expenditures increased with the growth of governmental activities and it was found impractical to make all payments by direct warrants, advances or credits in round amounts were authorized to be established in favor of disbursing officers, so that, at the present time the major part of the general expenditures of the Government are made by means of disbursing officers' checks from funds advanced to them upon accountable warrants as stated above. The funds thus advanced are placed to the credit of disbursing officers practically as a bookkeeping expedient, and, to the extent that the unexpended balances of the funds so advanced vary between the beginning and close of the fiscal year, the warrant expenditures differ from the actual expenditures for that year.

Before the World War these balances averaged about $\$ 60,000,000$. On account of the enormously increased expenditures of the war
period, which gradually increased until they reached orer $\$ 2,000$, 000,000 a month, the balances of disbursing officers averaged over $\$ 2,000,000,000$ for a long period of time. With the decrease in expenditures, these balances have gradually decreased until at present the active balances are about $\$ 300,000,000$ and will probably remain near that figure for some time.

In order to correct the situation described above and exhibit the expenditures on the best practicable basis, the several departments and establishments have cooperated with the Treasury in furnishing the unexpended balances to the credit of disbursing officers under their respective jurisdiction at the beginning and end of the fiscal year 1927, classified by appropriations. These figures, when used in conjunction with the warrants issued during this year, make it possible to include checks drawn during 1927 against unexpended balances of disbursing officers at the beginning of the fiscal year, and to exclude from expenditures all unexpended balances remaining in their hands or to their credit at the close of the year. Detailed expenditures on the new basis are shown in Table 3, page 425.

When comparative figures are obtained for expenditures on the basis of checks issued during the fiscal year 1928, it is contemplated that the exhibit of expenditures on the basis of warrants issued, as shown in Table 5, page 436, will be discontinued.

## ADMINISTRATION AND ORGANIZATION

## Changes in Treasury organization

In my last annual report mention was made of the recommendation of the Treasury for the enactment of legislation to provide for bureau organizations for the Customs Service and the Prohibition Unit. The magnitude of the operations of the Customs Service had long since called for an organization on a basis comparable to that of other major branches of the department in order to secure a more effective and direct supervision of that service. There was equal need for the creation of a Bureau of Prohibition, with the additional necessity for granting relief to the Commissioner of Internal Revenue in order that be might be free to devote his whole attention to the vast operations of the Internal Revenue Service. In accordance with the law then governing, he had exercised dual supervision with the Commissioner of Prohibition over the operations of the Prohibition Unit. By legislative enactment of March 3, 1927, authority was granted to carry out the recommendation of the Treasury for the creation of these two bureaus and steps were taken for their organization, orders being issued effective April 1, 1927, to govern their operations. Further reference to the organization of these bureaus will

be found below on pages 113 and 117, and copics of the orders regulating their operations will be found as Exhibits 33 and 34, pages 340 and 347.

By order of June 3, 1927, the Section of Statistics in the Office of the Secretary (Commissioner of Accounts and Deposits) was changed to the Section of Financial and Economic Research in order more clearly to imply the nature of its functions.

By virtue of legislative enactment in the appropriation act of January 26, 1927, a Division of Supply was established in the Treasury, taking over the functions of the Bureau of Supply and the Division of Printing, the existence of the latter offices being terminated.

Following the appointment of new officials to the offices of Undersecretary and Assistant Secretary, reassignments of bureaus and offices and divisions of the Secretary's office to the administrative supervision of the Undersecretary and the Assistant Secretaries were made on two occasions during the year, as provided in revisions of Department Circular No. 244, of June 7, 1927 (Exhibit 41, p. 378), and of November 1, 1927 (Exhibit 42, p. 380). Under the revision of June 7 major changes in assignments were the transfer from the Assistant Secretary in charge of Internal Revenue and Miscellaneous to the Undersecretary of supervision over the Internal Revenue Service, and of the Federal Farm Loan Bureau from the Undersecretary to the Fiscal Assistant Secretary. Changes of similar importance made under the revision of November 1 were the transfer from the Undersecretary to the Fiscal Assistant Secretary of supervision over the Internal Revenue Service; and from the Fiscal Assistant Secretary to the Undersecretary of the Commissioner of the Public Debt, the Treasurer of the United States, and the Federal Farm Loan Bureau.

## Bureau of Internal Revenue

Previously in this report there have been enumerated certain recommendations for improving the administration of the income taxes. The special administrative committee that proposed these recommendations based them on their findings in a comprehensive survey of the work of the Bureau of Internal Revenue. Certain portions of their report on this survey that I desire to bring especially to your attention are quoted in the following paragraphs:

## Present status of the work.

The work of the Bureau of Internal Revenue is practically current to-day; 99.8 per cent of all returns filed for years prior to 1923 have been closed, and 99.5 per cent of all returns filed for years prior to 1924 have been closed. All the returns filed for 1923 will be closed by December 31, 1927. According to the present program, the returns for 1924 will be audited by June 30, 1928, and the 1925 returns
by September 30, 1928. Seventy-six per cent of the 1926 returns already are accepted and closed, and 87 per cent of the 1926 returns will be finally closed by the end of this year. Following a practice which has recently been adopted, each taxpayer whose return has been accepted has been notified by the Commissioner of Internal Revenue. Stated in numbers of returns, the job before the bureau with respect to returns filed for years prior to 1926 was , on October 14, 1927, as follows:

Number of returns for years 1917 to 1925, inclusive, to be audited as of October 14, 1027

| Year | Number of returns | Year | Number of return |
| :---: | :---: | :---: | :---: |
| 1917 | 512 | 1923. | 20, 445 |
| 1918. | 736 | 1924 | 81, 482 |
| 1912 | 1,035 | 1925. | 213, 824 |
| ${ }_{1921} 192$ | 1,615 | Total. | 325, 129 |
| 1922... | 3,662 | Tolal. | 325,129 |

There appears in the appendix a tabulation showing the results of the survey, by internal revenue agents located in offices of collectors of internal revenue, of returns filed for the calendar year 1926.

## INDIVIDUAL AND CORPORATION RETURNS

Number of returns filed for the years 1917 to 1926, inclusive
The following table gives the number of individual and corporation returns (partnership, fiduciary, and other information returns are not included) filed for the years 1917 to 1926, inclusive. It appears that the total number of returns has fallen off rapidly since 1923. These figures, however, should be examined in connection with the second following table, which shows that the number of larger re-turns-those entailing the greater labor of audit and interpretationhas steadily and strikingly increased.

|  | Years | 1040 | 1040-A | 1120 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1917 |  | 432, 662 | 3,040, 228 | 351,426 | 3,824,316 |
| 1918. |  | 47S, 962 | 3, 946,152 | 317, 579 | 4, 742, 693 |
| 1919 |  | 657,659 | 4, 675, 101 | 320, 198 | 5, 652, 958 |
| 1920 |  | 784. 511 | 7, 253, 272 | 345,595 | 8,383, 378 |
| 1921. |  | 695, 607 | 0, 102, 818 | 356, 397 | 7, 214, 822 |
| 1922 |  | 730, 780 | 6,160, 289 | 382, 883 | 7, 273,952 |
| 1923 |  | 625, 897 | 7, 327, 551 | 398, 933 | 8,352, 381 |
| 1924. |  | 697,138 | 6, 710, 854 | 417, 421 | 7, 831, 413 |
| 1925 |  | 830, 670 | 3, 451, 391 | 430, 072 | 4,712, 133 |
| 1826. |  | 1, 864,332 | 2, 118, 683 | 470, 622 | 4, 453,637 |
|  |  | 7,798, 218 | 50, 852,339 | 3,791, 126 | 62, 441, 683 |

All 1917 returns were forwarded to Washington. All individual returns for 1918 to 1922 filed on Form 1040 and showing net income, and all corporation returns were forwarded to Washington. All individual returns for 1923 showing.gross income in excess of $\$ 15,000$, and all corporation returns were forwarded to Washington. All
individual returns for 1924 and 1925 showing gross income in excess of $\$ 25,000$, and all corporation returns were forwarded to Washington. All individual returns filed on Form 1040 and all corporation returns for 1926 were surveyed by field forces of Income Tax Unit under the preliminary audit theory and forwarded to Washington.

There follows a tabulation showing the enormous increase in the number of returns filed by corporations and the larger individual taxpayers over the five-year period from 1922 to 1926. A corresponding increase for the future may be expected.

Table showing total number of corporation returns filcd in each of the calendar years 1922-1927, individual returns by size of net income for the same years, per cent of increase or decrease over the preceding ycar, and the per cent of increase for 1927 over 1922

1 For 1927 the figures represent returns filed up to Aug. 31. When all returns up to Dec. 31, are filed the small decrease, as compared with the calendar year 1926 , for the income classes $\$ 50,000$ to $\$ 100,000$ and $\$ 100,000$ to $\$ 300,000$ will be overcome.

The manner in which the accumulation before the bureau has been reduced is best shown by study of the following tabulation which indicates the balances on hand at the end of the several fiscal periods from that ended June 30, 1923, to that ended June 30, 1927:

## Balances of returns on hand at end of fiscal periods from 1923 to 1927

In the space of five years the bureau had on June 30, 1927, reduced the accumulation with which it was confronted on June 30,1923 , from $3,032,544$ cases to 474,535 cases, besides keeping pace with the current returns as they were filed.

The following table gives complete statistics for the years 1917 to 1925, both inclusive, of the number of returns audited and the percentage remaining open:

Percentages of returns for 1917 to 1925 remaining open on June 30, 1927

| Return years | Total closed to date | Percentage remaining open June 30, 1927 | Return years | Total closed <br> to date | Percentage remaining open June 30, 1927 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1917. | 1,312,980 | 0.05 | 1922. | ], 552,925 | 0.33 |
| 1918 | 1,274, 134 | . 05 | 1923 | 1, 236, 945 | 2.77 |
| 1919. | 1,498, 590 | . 08 | 1924 | 1, 024,486 | 9. 51 |
| 1920. | 1,642, 268 | . 13 | 1925 | 573,679 | 33.52 |
| 1921. | 1,471,218 | . 14 |  |  |  |

What is meant by "current"
It might be well at this time to explain what is meant by "current." In the opinion of the Treasury, the administration of any particular year is "current" when all the returns for that year are, or will be, audited within a reasonable period prior to the expiration of the period allowed by law for the assessment of additional amounts found due or for the refund of amounts overpaid. For example, in the case of a three-year statute of limitation upon assessments the audit should be completed within two and one-half years after the returns were filed. During 1927 it will be possible to complete all the audits for 1923. This is the first time it has been possible to complete the audit of any year prior to the running of the statute of limitations for that year. There are to-day less than 22,000 returns for 1923 in process of audit, and they will be closed by December 31 of this year, while the applicable statute of limitations will not expire until March 15, 1928. The Treasury is confident that, if given the necessary cooperation, the returns for 1924 and all subsequent years will be completed a reasonable period prior to the expiration of the statute of limitations governing.

Final closing of cases the objective
The responsibility of the Treasury does not end until the amount of tax properly due has been collected. This responsibility for final closing is one of the important factors prompting this survey. No case has been closed finally, from the Treasury's point of view, until the tax has been collected and there is no possible opportunity for reopening.

> The effectiveness of closing by the bureau

The number of cases pending before the Board of Tax Appeals, of suits pending in the courts, and of claims for refund filed might well give the impression to persons not familiar with all the facts that in a large percentage of cases taxpayers must appeal from the decision of the bureau. But the cases before the board or in the courts or the subject of refund claims now pending represent less than six-tenths
of 1 per cent of the cases closed by the bureau. Closing by the bureau means a final disposition of the case in 99.4 per cent of the returnsthat is, petitions in only 0.6 per cent of all the cases closed by the bureau have been filed with the Board of Tax Appeals. It is believed that this fact is frequently overlooked in the various surveys of the administration of the internal revenue laws undertaken outside of the department. During the three-year period ended June 30, 1927, 6,289,567 tax-year cases were closed by the Income Tax Unit alone; 96.5 per cent of these cases were closed prior to the issuance of a deficiency letter. Deficiency letters were issued with respect to 223,659 tax years ( 3.5 per cent of the total tax-year cases). The taxpayers acquiesced with respect to 125,760 tax years (representing 2 per cent of the total). That is, over 50 per cent of the cases in which 60-day letters are issued are acquiesced in by the taxpayers without further action or protest on their part. Agreements in 57,650 tax-year cases were signed and filed by the taxpayers involved ( 0.9 per cent of the total tax years). From the standpoint of cases handled by the Income Tax Unit, 99.4 per cent are closed without petition to the board.

Considering the cases in respect of which deficiency letters had to be issued, in more than 81 per cent of the cases handled during the three-year period the taxes proposed were acquiesced in by the taxpayer. Petitions were filed with the Board of Tax Appeals with respect to 40,249 of the tax years closed during this three-year period, or 0.6 per cent of the total years closed. The following tables present a summary of the above statistics:
(a) Disposition of cases by the bureau

|  |  | Per cent |
| :---: | :---: | :---: |
| Number closed without mailing deficiencs letter- | 6,065,908 | 96.5 |
| No action by taxpayer after mailing deficiency letter- | 125, 760 | 2.0 |
| Agreements with taxpayer after mailing deficiency lett | 57, 650 |  |
| Petitions filed with Board of Tax Appeals with respect to | 40,249 | 6 |

(b) Disposition of cases after mailing of deficiency letters

Analyses and tabulations of the work of the Board of Tax Appeals in respect of the 19 per cent of the deficiency letters in which petitions to the board have been filed are given in the appendix.

## EXCESS PROFITS TAX CASES PENDING

## Number of old cases pending

Statements have been made from time to time to the effect that there were large numbers of old cases still pending in the bureau; that taxpayers had found it impossible to close their cases in the bureau; and that the tremendous burden of the old cases was handicapping the bureau severely in its work upon current cases. The statistics should remove this misapprelension. There are in fact but 3,898 cases in process of audit in the bureau for the years 1917 to 1920 . A statement showing the number on hand for each year, as of October 14, 1927, is as follows:

## Estimate of amounts involved

An accurate determination of the amounts involved in the old cases still pending is impossible. It is estimated, however, that only $\$ 25,000,000$ are involved in cases awaiting original audit, that $\$ 40$,000,000 are involved in cases open because of the filing of claims in abatement, and that about $\$ 100,000,000$ are involved in cases open because of the filing of claims for refund.

## Causes for not closing

An analysis has been made in order to determine why these cases, small as the number is, are still pending. For the purposes of this analysis an "original case" is considered to be one concerning which the bureau has at no date in the past stated a conclusion. All other cases are "reopened cases," reopened at the instance of the taxpayer or by the Government. Under this classification also are included delinquent returns. A detailed discussion of the reopening of cases is given hereinafter. The following analysis is submitted solely for the purpose of determining the status of original cases for the years in question:

1917 cases

The 69 cases described as "original cases" are in the consolidated returns audit division. The following tabulation indicates the reasons why such cases have not been heretofore closed:
Number held pending determination of affiliations in a single large case_-. ..... 13
Number pending recommendations by the office of the general counsel, or awaiting opinions by the general counsel ..... 10
Number held pending engineer's or revenue agent's reports ..... 11
Number in the 30 -day status ..... 9
Number of foreign steamship companies ..... 9
Awaiting information from taxpayer ..... 4
Being transferred to field ..... 3
Pending review ..... 6
Awaiting conference with taxpayer ..... 1
Memorandum, transferring cases to special assessment being prepared ..... 3
J9IS cases

|  | Total cases | Original cases | Reopened cases |
| :---: | :---: | :---: | :---: |
| Field audit review. | 234 | 90 | 144 |
| Consolidated returns division | 323 | 172 | 151 |
| Special assessment section. | 91 | 33 | 58 |
| Total. | 648 | 295 | 353 |

The 295 cases described as original cases are in the three sections mentioned above. The following tabulation indicates the reasons why such cases have not heretofore been closed:
Pending compliance with recommendations by the office of the general counsel or are awaiting opinions to be submitted by the general counsel ..... 25
Held pending engineer's or revenue agent's reports ..... 82
In 30-day status ..... 36
Foreign steamship companies ..... 23
Held pending determination of affiliations in the case of the M Company_ ..... 1
Audit complete-closing letter being typed ..... 13
Being reworked in accordance with memorandum from acting deputy com- missioner ..... 3
Receiving original consideration in consolidated returns audit division. All cases assigned ..... 17
Being forwarded to 60-day file ..... 16
Awaiting information from taxpayer ..... 6
Awaiting completion of assembly ..... 6
Being considered under protest of taxpayer ..... 2
rending conference ..... 5
Being reconsidered in accordance with B. T. A. ruling ..... 1
Statutory invested capital and income being determined prior to trans- ferring case to special assessment ..... 1
Awaiting receipt of taxpayer's agreement ..... 4
Awaiting decision of Board of Tax Appeals ..... 2
Memorandum transferring case to other division being typed ..... 2
Pending completion of conference report ..... 3
Closing letter awaiting signature ..... 2
Pending consideration under section 328, cases unassigned ..... 15
Awaiting receipt of returns requisitioned from collector ..... 2
Letter being prepared allowing special assessment ..... 1
Claims rejection-letter prepared-ready for review ..... 1
Awaiting comparatives ..... 1
Awaiting legal ruling from rules and regulations ..... 1.
In process of review ..... 2
Cases receiving original consideration under Sections 327 and 328 ..... 22

Below is a tabulation of the pending 1919 cases:
1919 cases

The 440 cases described as original cases are in the three sections mentioned above. The following tabulation indicates the reasons why such cases have not heretofore been closed:
Pending compliance with recommendations by the office of the general
counsel or awaiting opinions to be salomitted by the general counsel

In the 30 -day status

In process of audit—cases recently made available as result of receipt of
revenue agent's report, engineer's report or legal rulings_
Fraud not present-returned to consolidated section for audit_-.......-. 3

Closing letter written or mailed

Below is a tabulation of the pending 1920 cases:
1920 cases

The 800 cases described as original cases are in the three sections mentioned above. The following tabulation indicates the reasons why such cases have not heretofore been closed:
Pending compliance with recommendations by the office of the general counsel or awaiting opinions to be submitted by the general counsel.-.-44
Held pending engineer's or revenue agent's report ..... 192
In 30-day status ..... 152
Foreign steamship companies ..... 34
Pending review, typing of closing letters, signature, or in 60 -day file ..... 133

Held pending settlement of related case ..... 10
Awaiting information from taxpayers ..... 69
Awaiting revenue agent's audit ..... 24

Pending conference of completion of conference reports_-........................ 23

Outline of substantial accomplishments.
PRODUCTION
The following chart presents in graphic form, for all years subsequent to 1917 for which information is available, the statistics showing:
(1) The number of returns closed during each year.
(2) The number of returns on hand at the end of each year.
(3) The additional taxes assessed.
(4) The additional taxes collected.

BACK TAXES ON INGOMES
Number of Relurns Closed, Number on Hand, Additional Taxes Assessed and Dack Tax Collections, Fiscal Years 1923-1927.
(Reports of Bureav of Internal Revenve)

The expenditures made for administering the internal revenue laws for the fiscal year 1927 were $\$ 32,967,764.17$, not including expenditures for refunding internal revenue collections and taxes illegally collected, which in no sense are administrative expenses. The aggregate receipts of internal revenue for the fiscal year 1927 were $\$ 2,865,683,129.91$. Accordingly, the cost of operation last year was $\$ 1.15$ for each $\$ 100$ collected, as compared with $\$ 1.23$ for each $\$ 100$ collected for the fiscal year 1926 , or a reduction of 6.5 per cent.
Approximately 40 per cent of the cost of administering internal revenue tax laws during the fiscal year 1927 was expended in the auditing of back-year returns. It is not possible for the bureau to segregate the cost of auditing back-year returns from the cost of collecting the current year's revenue, as the work is interlocking to a vast extent, and the attempt to segregate such cost would require a very extensive as well as an expensive system of cost accounting.
The cost of collecting the internal revenue averaged very close to $\$ 1.80$ for each $\$ 100$ collected for 10 years prior to the World War. Following is a statement showing internal revenue receipts and expenditures, additional assessments, refunds, and number of employees, as well as the relative net cost of collecting each $\$ 100$ for the fiscal years 1917 to 1927, inclusive. The cost of enforcing the narcotic and national prohibition acts is excluded.

# I NTERNAL REVENUE BUREAU

| 1927 | 32,967, 764. 17 | 2,865, 683, 129.91 | $383,965,350.00$ | 103, 858, 687. 78 | 1.15 | 13,211 |
| Total - | 311,134, 683. 51 | 35, 262, 635, 711. 66 | 3,599, 760,988. 00 | 793,410,776. 10 |  |  |

The preceding chart presents in graphic form certain of the data included in the above tabulation; that is, the relation of personnel to product, and of cost of collection to each $\$ 100$ of revenue secured.

64761—FI 1927-_9

The total amount of additional assessments and collections resulting from office audits and field investigations $(\$ 404,537,468)$ for the fiscal year 1926 is made up as follows:

${ }^{1} \$ 285,358,165.32$
20, 540, 328. 39
202. 039.87

7, 800, 434. 54
1, 103, 268. 89
132, 964.61
195, 663.31

Total fiscal year 1926
$89,204,603.00$
404, 537, 467.93
Similar figures covering the fiscal year 1927 ( $\$ 383,965,350$ ) are as follows:

It is interesting to note that the total amount of refunds of taxes illegally collected which were made during the past 11 years, namely, $\$ 793,410,776.10$, is approximately 22.04 per cent of the total amount of additional assessments and collections resulting from office audits and field investigations ( $\$ 3,599,760,988$ ) which have been made during the same period. The percentage of the total refunds made during the past 11 years to the total internal-revenue collections made during the same period $(\$ 35,262,635,711.66)$ is approximately 2.2 per cent.

## SUMMARY OF OPERATIONS

$62,441,683$ individual and corporation returns have been filed for the years 1917 to 1926, inclusive.

906,583 taxpayers have been discovered who had failed to file returns, and collections aggregating $\$ 45,885,129$ have been obtained from them.

Less than one-fourth of 1 per cent of all returns for 1921 and prior years remain open.

The audit for years subsequent to 1921 is practically current.
$1,343,024$ offers in compromise were submitted to the bureau during the period 1919 to June 30 , 1927, and all have been adjusted but 1,803.

2,214,472 claims have been received during the years 1917 to 1926, inclusive, and all but approximately 18,000 have been adjusted.

[^7]
## growth of tee bureau of internal revende

Prior to the year 1913 the greater part of the revenue of the Government was derived from the tax on distilled spirits, liquors, and tobacco. The tax collected in 1913 was only $\$ 344,424,453.85$.

The income tax law was passed in 1913. The provisions were comparatively simple, the amounts involved were not large, and the tax collected for the next few years averaged $\$ 436,137,734$ annually. But when we entered the World War the tax on incomes was greatly extended in order to meet the greatly increased expenditures of the Government.

The following tabulation is indicative of the increase in the size of the undertaking:

Returns filed with and revenue collected by Bureau of Internal Revenue from 1916 to 1920, showing also percentage of increase for years 1917 to 1920 over 1916

|  | Year |  | Return filed | Percentage increase over 1918 | Revente col-- lected | Percentage increase over 1916 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1916 |  |  | 778, 289 |  | \$512, 723, 287. 77 |  |

With the increase in the revenue and the returns shown above went a corresponding increase in the difficulty and burden of the work to be performed. To get immediately a sufficient number of men with the proper qualifications was impossible. Many of the best qualified men were in the war. The bureau had the keenest competition with private industry in securing such accountants and engineers as were not actually in the war. We were unable to meet the salaries that private concerns could pay. Lastly, there were few whose training and experience had equipped them to meet the novel, intricate problems presented.

## Complexities of the work.

A review of the more difficult and technical tasks thrust upon the bureau in the administration of the internal revenue laws may be described briefly.

VALUATIONS
The laws require valuations of all natural resources-mines, minerals, timber, oil, and gas-in this country as of March 1, 1913, and also as of the date any of the above property was transferred to a corporation for stock. The valuation of all tangible property as of the same two dates for invested capital and depreciation purposes was necessary. Valuation of intangible properties, including patents, copyrights, good will, processes and secret formulas (no precedents for the valuation of which existed), for invested capital and depreciation purposes was also necessary.

The allowance of a deduction for amortization of war facilities imposed upon the bureau a unique problem in the determination of which more than $\$ 600,000,000$ was involved. This novel allowance required the determination of such questions as what property is to be classed as a war facility and the value of the property to the taxpayer after the war period.

## DEPLETION

The allowance for depletion has the appearance of comparative simplicity. What is actually involved, however, is the valuation as of March 1, 1913, or some other basic date, of all the natural resources in operation for profit. Practically all the natural resources in this country have been valued in the short space of five years.

## AFFILIATIONS

Some of the most complex problems in the administration of the revenue laws are involved in the determination of invested capital of a closely allied, or consolidated, group of corporations.

The proportions which a single case may assume are brought out by the case of a certain large corporation, where the assessment letter, merely showing the mathematical adjustments, covered 2,267 pages, with 317 pages of exhibits. The difficulty of the questions involved in adjusting cases is shown by the fact that in 15 recent tax cases decided by the Supreme Court of the United States 9 have been decided by a divided court.

A report from several attorneys in the general counsel's office is included in Chapter V showing the issues involved in the cases pending before them. There will also be found in the appendix illustrations of the problems involved in a few typical cases and of the procedure preceding settlement of a case. Undoubtedly, many of the most aggravating complexities will disappear with the final disposition of the excess-profits tax cases. New and unforeseen problems, however, are constantly arising and will continue to do so. We have not yet reached the difficulties involved in reorganizations, for example.

Recent changes in administrative procedure.
Numerous changes have been made from time to time directed toward increasing the efficiency and effectiveness of the work in the bureau. A few of these changes are described below:

## PRELIMINARY AUDIT

In section 274 (f) of the revenue act of 1926 , there appears the following language:

[^8]the purposes of this subdivision or of subdivision (a) of this section, or of subdivision (d) of section 284, as a notice of a deficiency, and the taxpayer shall have no right to file a petition with the board based on such notice, nor shall such assessment or collection be prohibited by the provisions of subdivision (a) of this section.

The purpose of this legislation was to permit the Bureau of Internal Revenue to correct immediately mathematical errors found in current year returns. Prior to this enactment no amount of tax could be assessed in excess of that indi ated by the taxpayer, even though an erroneous amount was plainly indicated, without full compliance with all of the procedure provided for the assessment of deficiency taxes.
To obtain the full benefits of this legislation a force of comptometer operators is assigned to each collector's office to verify the arithmetical accuracy of the returns as submitted. This work is done before the amount of tax to be assessed is listed, in order that the correct charge may be set up against the taxpayer.

This feature of the preliminary audit procedure has saved much time to the Government and has resulted in a more prompt collection of many millions of dollars.

The comptometer process is, in fact, the so-called preliminary audit, but the term "preliminary audit" is directed at this time to a wider range of effort. To-day it means also "job selection." This means that instead of looking upon the job for a current year as an intensive audit of all returns filed, the appropriate representatives of the unit (revenue agents) familiar with local conditions, and who in many instances have conducted investigations of the taxpayers for prior years, now survey all the returns that are to be forwarded to Washington for the purpose of segregating them into the following classifications: "Accepted," "Office audit," and "Field audit."

A case marked for "Field audit" is one which, based upon the experience of the agent making the segregation, ought to be carefuilly examined at the books of the taxpayer. The previous history of the case, deductions which are not properly explained, or a tax result not in harmony with that which ought to have been reached upon the basis of the income statement, having in mind the particular territory and industry involved or other similar circumstances, will determine whether or not a case is to be investigated in the field.
A case marked for "Office audit" is one with respect to which it appears to the agent that it might be beneficial both to the taxpayer and the Government to have the taxpayer called at the proper office and discuss certain features which are not clearly explained upon the. return.
The value of the office audit work (although considerable revenue is derived from the work) is educational in that taxpayers with whom items not sufficiently explained are discussed, will benefit in the opportunity thus presented to learn the manner in which the items questioned should be presented in subsequent years. This, of course, means a saving to the Government in subsequent years' audit.

The "accepted " return is the return which, in the opinion of the revenue agent, reports the tax result to be logically expected upon the basis of the income figures.

Approximately 75 per cent of all returns which under the regulations of the department are forwarded to Washington are marked
"accepted" by revenue agents. It is reasonable to expect that this ratio will increase as the laws are simplified and taxpayers become better acquainted with the laws.

As a consequence of the preliminary audit, the bureau, within a few months after the returns of the current year have been filed, has selected as the job of the Income Tax Unit for audit about 25 per cent of the returns, and 75 per cent have been closed. The confusion incident to an attempt, under the lengthy procedure previously followed, to handle the great number of returns has been eliminated, and the job is found to be an intensive audit, not of $1,200,000$ returns, but of 600,000 returns.

During the fiscal year ended June 30, 1927, there were examined in the field divisions 688,816 tax years. The Bureau of Internal Revenue should be developed and organized as so to handle within two years all the audits for the current year.

DECENTRALIZATION
Perhaps the outstanding change in policy from which more benefits to the bureau were derived and, as a consequence of which more progress was made upon the audit than from any other, is the change which definitely established in the field offices the basic audit activity of the Bureau of Internal Revenue.

For several years the bureau undertook what was called a "desk" or "correspondence" audit. The results of that audit were never satisfactory and in practically every case, where a deficiency in tax was proposed, after the lapse of long periods, it had to be referred to the field. As a consequence of the policy of having the initial action in all audits taken in the field, the department eliminated the waste of time that had theretofore resulted.

Decentralization has resulted as well in benefit to taxpayers, particularly in permitting an opportunity to discuss their cases with a representative of the bureau at their place of business or at their home. It has saved both the taxpayer and the Government money and time. It has resulted in a better understanding on the part of the taxpayer of the tax laws and of the purposes of the audit.

A striking benefit of decentralization of audit is observed in the savings that have been effected for the Government in the consideration of refund claims filed by taxpayers. It frequently occurs that in the course of an examination of the books of the taxpayer and of the circumstances upon which the taxpayer depended for refund, compensating changes favorable to the Government have been made, with the result that the taxpayer, while maintaining the contention the basis of the claim, is not entitled to a refund. If these claims had been considered in Washington and no thorough investigation of the books conducted, they would have been aliowed. During the fiscal year ended June 30, 1927, consideration in the field of refund claims of the face value of $\$ 47,600,000$ resulted in recommendations for the rejection of about $\$ 28,000,000$ and the allowance of about $\$ 7,600,000$. It is interesting to note that as a result of these investigations the bureau also recovered additional taxes aggregating over $\$ 11,000,000$.

Prior to the year 1922 a section designated the claims section handled the adjustment of all claims. It was separate and distinct from the audit section and had no direct relation to the audit of returns. An audit of a case might be under conduct in a separate unit and at the same time a claim might be on file in the claims section. In January, 1922 , the claims section was abolished and the consideration of a claim became an incident of the audit.

## ABOLIEHING SPECIALIZATION IN AUDIT

Until March 21, 1924, the policy was followed of maintaining audit units specializing in the audit of cases involving manufacturing, trading, finance, public utilities, etc.
Un the date above referred to specialization in audit was abolished and audit units were developed based upon a geographical outline. This arrangement was more in harmony with the needs of the public, and developed a better understanding between the field forces and the audit units in Washington.

## CONSOLIDATION OF OPERATING UNITS

A constant and orderly policy has been pursued to eliminate excessive overhead and to bring under one management related undertakings. During the early history of the Income Tax Unit many independent units were established. It appeared that specialization was necessary to handle the task. There was an inventory section, an amortization section, a claims section, an independent review division, and other special units to handle particular problems. This necessitated a constant transfer of cases, with an accompanying loss of time and of files. In the rearrangement and reduction of the units there is a concerted and continued move to correct this unsatisfactory condition.

## SENDING THE MAN TO THE JOB

The policy of sending the man to the job is constantly being promoted. In the early years of the bureau's history the effort appeared to be to move the work to the force. However, it became evident that if it were possible to move the employees to the work much better results could be obtained. This has proved to be a very sound policy. An outpost review has been established. Representatives of the general counsel's office have been placed in the audit units of the Income Tax Unit. By decentralization of the audit the field forces have become the fact-finding representatives of the bureau. Formerly it was customary to attempt to secure all necessary facts by correspondence with the taxpayer.
closings under the provisions of section 1106 (B) of the revenue act of 1926
Within recent months the bureau has adopted the policy of advocating a closing agreement, under the provisions of section 1106 (b) of the revenue act of 1926, in cases involving an amount in excess of $\$ 5,000$ for any one year.

Cases closed under such an agreement will not be subject to claim for refund, with consequent reopening and reconsideration. Neither can it be reopened by the Government.

The bureau hopes to close with final agreements a large number of the cases now pending for 1922 and prior years.
During the months of August and September 582 applications were received. Inasmuch as the average number received per month is fourteen and one-half times the average per month from November 23, 1921, to June 1, 1927, it is evident that the new procedure is responsible for the increase in the number of requests received.

## PROCEDURE WITH RESPECT TO JEOPARDY ASSESSMENTS

After the passage of the revenue act of 1926 changes were initiated in procedure with respect to jeopardy assessments as follows:
(a) No jeopardy assessments are made because of the running of the statute of limitations.
(b) Jeopardy assessments are made (A) where taxpayers are in bankruptey or where corporations are in dissolution, and (B) in cases where it is necessary to prevent taxpayers from disposing of their property in an effirt to defeat the collection of such tax as may be due. Instances of this character would be where it is known or presumed that a taxpayer was intending to leave the country or where fraudulent transactions were developed; also where it is known that the tuxpayer is or intends to dissipate the assets. Usually jenpirdy assessments are made only in cases in which fraud circumstances are developed.

The audit sections work up the case with appropriate schedules, attaching thereto a memorandum addressed to the head of the unit explaining fully the circumstances and basis for the assessments.

The case comes to the office of the head of the unit for approval or disapproval, after which it goes to the proving section for assessment if the jeopardy assessment is approved.

The 60 -day letter is held by the proving section for a period of 30 days after the assessment has been made, so that the collector may advise the head of the unit if his office has secured bonds or if the taxpayer has made payment of the tax. At the expiration of the 30 -day period the 60 -day letter is registered and mailed to the taxpayer.

As a consequence of this change of procedure the jeopardy assessments for 1927 were $\$ 32,704,000$, as compared with $\$ 148,86 \bar{i}, 000$ for the previous fiscal year.

The reasons for making these assessments during the fiscal year ended June 30, 1927, are as follows:
Taxpayers have not sufficient assets ..... 25
Under indictment, using mail to defraud ..... 1
Illegal alcohol transactions ..... 21
Convicted of embezzlement ..... 1
Disposing of assets ..... 60
Taxpayer leaving United States ..... 3
Property in hands of Alien Property Custodian ..... 1
Serving term in workhouse ..... 1
Proof of claim must be filed at once; estate in process of administration ..... 4
Taxpayers transferring assets ..... 5
Question of priority of tax between New York State and Federal Govern- ment ..... 1
Concealing assets ..... 4
Offers in compromise ..... 7
Leaving State ..... 4
Address unknown ..... 2
Total ..... 140

The Treasury's appreciation of the necessity for immediate and effective relief of the burden now imposed upon the Board of Tax Appeals and the general counsel's office, after a careful analysis of the cases contributing to the congestion and of the classes of cases capable of disposition by administrative action within the Treasury, led to the establishment in the office of the Commissioner of Internal Revenue of an agency known as the special advisory committee. In the opinion of the Treasury the best interests of the Government, of the Board of Tax Appeals, and of the public demand that every effort be directed toward practical and effective solutions of the problem. It is expected that the committee will render material assistance in the disposition of cases within the following classes:
(1) Cases involving deficiencies of less than $\$ 1,000$ and not involving important principles:
(2) Cases involving difficult or technical questions of fact, such as valuations, rates of depreciation. bad debts, reasonable salaries, etc., but not involving questions of law;
(3) Cases in which the deficiency letters were mailed in order to protect the interests of the Government from the bar of the statute of limitations;
(4) Cases involving administrative policies in which the interests of the Government require a change in the policy in force at the time the deficiency letter was mailed; and
(5) Cases in which the petition was filed by the taxpayer because of a misunderstanding of the position of the bureau, or on account of a clerical error in the bureau's determination.

In the establishment of the committee every effort has been made to avoid the creation of a new agency to whom the taxpayer may appeal. If the committee is to function properly, it must do so by a careful selection of the cases to be considered by them. No taxpayer should, as of right, be given an opportunity to present his case to the committee. Nevertheless the taxpayer whose case is before the committee should be given an opportunity to have a hearing wherever practical before at least one of the persons by whom the decision will be made.
The committee is organized into divisions, each division consisting of three members. Conferees are assigned to divisions to assist in the expeditious preparation of the case and in hearing and considering the arguments of the taxpayer. Upon the conclusion of the hearing a memorandum is prepared by the conferees and is routed, together with the case, to the three members of the division. Each member of the division passes upon the case individually. If the recommendations made are concurred in by each of the three members, or are revised and the revision concurred in by each of the three members, the case is submitted to the chairman of the board. If the chairman approves, the case is then transmitted to the Commissioner of Internal Revenue for his approval or disapproval. The final responsibility for the disposition of the case, therefore, rests directly upon the commissioner.

The committee has not been operating during a sufficient period of time to permit an accurate prediction based upon its production
record. The final settlements effected by it (averaging about 260 a month) have resulted in a rather substantial reduction in the number of petitions, which would otherwise have required decisions by the board. As its experience and personnel permit effective functioning, the number of cases finally settled without action by the board should approximate 500 a month. The success of the committee will depend ultimately upon its ability to bring cases to a settlement promptly, expeditiously, and satisfactorily, and upon the support and cooperation accorded it.

## Personnel.

The bureau has been handicapped severely in its administration by the constant turnover in personnel, particularly of professional and technical officials; in the Income Tax Unit alone 11,934 appointments were made during the period from October 1, 1919, to June 30,1927 . There were 11,038 separations, of which 5,178 were highly trained technical or professional employees.

It is impossible to estimate the cost to the Government resulting from the loss of experienced and efficient employees. The figure undoubtedly runs into the millions. Considering the cost of train-ing-about one-half of a year's salary-the turnover in the Income Tax Unit has cost $\$ 13,086,750$. And this amount is insignificant in comparison with the actual cost resulting from the loss of ability, experience, and judgment.

The cost of collecting internal revenue taxes for the fiscal year 1927 was $\$ 32,967,764.17$. There was assessed and collected from delinquent taxpayers alone-that is, those who failed to file returns-the amount of $\$ 24,568,996$. In other words, the revenue secured as a consequence of the efforts of the personnel (never more than 1,900 ) directed toward discovering delinquent taxpayers covered approximately 75 per cent of the cost of collecting all internal revenue taxes.

## Bureau of Customs

Customs receipts have continued to increase under the tariff act of 1922, reflecting not only the productivity of the rates in that act but also the effect of general business prosperity on the merchandise imports of the country. Receipts from customs and from the tonnage tax, which are included together under the head "customs receipts," were $\$ 605,672,465$ for the fiscal year ended June 30, 1927, about $\$ 26,000,000$ more than in the preceding fiscal year, and $\$ 61,000,000$ more than in the fiscal year 1924. The latter year was the first complete fiscal year of operation of the new rates.

The growth of customs receipts has accompanied the expanding importations by the country of both dutiable and free goods. This is shown by the following table giving for the calendar years 19221926 the value of total merchandise exports and imports, the value of imports for consumption distributed by those free and dutiable, and the proportion of imports entered free of duty:
[In thousands of dollars]

| Calendar year | $\begin{aligned} & \text { Merchan- } \\ & \text { dise } \\ & \text { exports } \end{aligned}$ |  | $\begin{gathered} \text { Excess } \\ \text { exports }(+) \\ \text { imports }(-) \end{gathered}$ | Imports for consumption |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Total | Free of duty | Dutiable | $\begin{aligned} & \text { Per cent } \\ & \text { free } \end{aligned}$ |
| 1822 | 3, 831, 777 | 3,112,747 | +719,030 | 3, 073, 773 | 1,888, 240 | 1,185, 533 | 61.4 |
| 1923. | 4, 167,493 | 3, 792,066 | +375, 427 | 3, 731, 770 | 2, 165, 145 | 1,566, 622 | 58.0 |
| 924 | 4, 590, 984 | 3, 609,963 | +981,022 | 3, 575, 111 | 2, 118, 168 | 1, 456, 943 | 59.3 |
| 925. | 4, 909, 848 | 4, 228, 589 | +683, 257 | 4, 176, 218 | 2,708,828 | 1, 467, 390 | 64.9 |
| 1926 | 4, 808, 660 | 4, 430,888 | +377, 772 | 4, 408, 076 | 2, 908, 107 | 1, 499, 969 | 66.0 |

During the five-year period, the value of total merchandise exports increased from $\$ 3,831,777,000$ to $\$ 4,808,660,000$, and of merchandise imports from $\$ 3,112,747,000$ to $\$ 4,430,888,000$. There was a similar increase in imports for consumption, both in those free of duty and those dutiable. The increase in imports free of duty has been slightly greater than in dutiable commodities, and correspondingly, the percentage of duty-free imports for consumption increased from 61.4 per cent in 1922 to 66 per cent in 1926. While, therefore, the increasing customs duties have accompanied the development of foreign trade, they have not grown as rapidly as the free importations into the country.

The more important commodities, on the basis of value, which the United States imports are not the important commodities producing customs revenue under the tariff act of 1922 . The ten imports of the United States having the highest value in the calendar year 1926 were crude rubber, raw silk, coffee, cane sugar, paper except printed matter, petroleum and its products, paper-base stocks, furs and manufactures, wool and mohair, and tin, totaling almost half the value of merchandise imports. The imports of crude rubber amounted to $\$ 505,818,000$. This represents 75 per cent of the world's total crude rubber production. Raw silk imports reached the value of $\$ 392$,760,000 , or 77 per cent of the world's total production. The value of imported coffee was $\$ 322,746,000$, this being 50 per cent of the world's total production. Only two of the commodities listed above, cane sugar and wool and mohair, are among the leading customs producers. Looking at imports from the point of view of Government revenue from the tariff, the six leading customs producers are cane sugar, unmanufactured tobacco, manufactured wool, unmanufactured wool, manufactures of cotton, and manufactures of silk. The tariff on these items produced over half the customs during the calendar year 1926, while the imports of these commodities were only about 13 per cent of the total imports.
Important changes were made during the year in the organization of the service for administering the tariff act. Under the act of March 3, 1927, creating a Bureau of Customs in the Treasury Depart-
ment, the activities formerly carried on by the division of customs and the special agency service (customs) were consolidated and organized into a bureau. On March 19, 1927, the Secretary of the Treasury issued an order effective April 1, 1927, prescribing the duties and functions of the Commissioner of Customs. (A revision of this order, dated April 12, 1927, is included on page 347 of this report as Exhibit 34.) In addition to the Commissioner of Customs there were appointed an assistant commissioner and two deputy commissioners. The work of the bureau is divided into eight divi-sions-four legal divisions, the special agency service, legal digest and records, personnel, and finance. The assistant commissioner has immediate supervision of the business administration of the Customs Service; one deputy commissioner has charge of the legal divisions and the other deputy of the special agency service.

Almost coincident with the organization of the Bureau of Customs, the department, with the cooperation of the Bureau of Efficiency, completed an important step in the field organization-the classification of the field service on the basis of comparable positions in the District of Columbia as graded by the Personnel Classification Board. The classification of pos:tions in the field service and the allocation of employees to their respective grades was made by the Bureau of Efficiency after studying and working on the project during the greater part of the year.

The increasing work of administering the tariff act is shown in the following tabulation of the number of entries with the Customs Service for thie past five fiscal years, classified by kind of entry:

| Entries | Fiscal year ending June 30- |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1923 | 1924 | 1925 | 1826 | 1827 |
| Consumption: |  |  |  |  |  |
| Free --- | 2C9, 778 | 206. 154 | 200, 319 | 226, 382 | 246, 257 |
| Dutiable | 389, 511 | 416, 469 | 428.989 | 459, 726 | 486, 274 |
| Informal. | 145. 151 | 104, 102 | 182. 505 | 196, 036 | 209. 002 |
| Mail.. | 560, 498 | 638,773 | 742.917 | 768,811 | 786, 683 |
| Baggage doclarations. | 284, 644 | 339.541 | 340.685 | 383, 607 | 392, 128 |
| Warehouse and rewarehouse.--....-.-.......- | 54, 100 | 55,129 | 58, 983 | 60, 235 | 63.294 |
| Immeriate trausportation witbout appraisement. | 116, 664 | 124,898 | 133, 164 | 144, 664 | 148, 321 |
| Transportation and exportation. | 101, 196 | 103, 401 | 107, 033 | 117,62] | 120,417 |
| Warehonse withdrawals: |  |  |  |  |  |
| Duty paid. | 178, 160 | 205.807 | 216,957 | 222, 097 | 249, 671 |
| All other | 38, 232 | 41,337 | 39,558 | 38. 425 | 38. 677 |
| All other entries. | 1, 059 | 7,247 | 12,457 | 27, 45] | 14, 034 |
| Drawback notices of intent | 66, 004 | 117,757 | 164. 672 | 192, 079 | 220, 871 |
| Drawback entries. | 11,021 | 13, 971 | 21.477 | 24,388 | 25, 230 |
| Total. | 2, 159, 018. | 2, 434, 586 | 2, 658, 746 | 2,861, 513 | 3,000,859 |

Although the tariff rates apply only to merchandise subject to duties, all merchandise, whether free or dutiable, must be entered and cleared through the customs service and subjected to a sufficient examination to determine its character and customs classification.

The total entries in the above table show the amount of work involved, the various classifications of merchandise entering the country, and the changes in such work from year to year. The total entries have increased at the rate of approximately 200,000 a year. The entries of dutiable imports for consumption have also increased; from 1926 to 1927 the increase was relatively greater than that for the total entries. . Other entries of incidental interest are the baggage declarations, the growth in which reflects the very substantial gain made in ocean travel, and entries of mail, which are indicative of the use made of this method of shipping merchandise.

A serious administrative problem which is developing is the steadily increasing volume of automobile traffic across the northern border. This traffic consists not only of tourists but also of many travelers returning from European countries who land at Canadian seaports and later enter the United States. The facilities for the inspection of automobiles and baggage are woefully inadequate, such inspection in many instances having to be made at the side of the roadway, with no protection from the weather. Such conditions not only result in great inconvenience to the traveling public but endanger the revenue. As the Immigration Service has a similar problem along the border, this department asked the Department of Labor to have representatives of the Bureau of Immigration cooperate with the Bureau of Customs in a study of the situation with a view to developing plans for a uniform type of building and facilities for use of Immigration and Customs Services on highways crossing the international borders. The plan contemplates the provision of suitable office quarters for both services and facilities for the inspection of automobiles sheltered from the weather and off the main highway in such a manner as to avoid traffic congestion. Representatives of the respective bureaus concerned are now engaged in an investigation of the problem.

The agenda for the International Economic Conference held at Geneva, Switzerland, in May, 1927, included various phases of customs administration and procedure as a subject of major consideration and discussion. An official of the Customs Bureau was designated to represent the Treasury Department as an adviser to the American delegation. The conference convened on May 4 and concluded its work on May 23. Among other things, the resolutions adopted by the conference favor the principle of "equality of treatment" and the "unconditional most favored nation clause" in the levying of import duties. Recognizing that frequent tariff changes cause uncertainty in trade, the resolutions urge "tariff stability." The conference went on record in opposition to direct and indirect subsidies and export duties and restrictions. As the United States levies no export duties, and as the principle of equality of treatment
was strictly followed in the framing of the present tariff law, there is but little in the resolution not in harmony with the tariff policies and administration of the customs laws of this country.

## Coast Guard

During the fiscal year 1927, persons saved or rescued from positions of peril numbered 3,313 , being 276 in excess of the corresponding number in the preceding fiscal year, 1926, and exceeding all previous records since the present organization of the Coast Guard. The total number of instances of assistance rendered during the year was 5,508 , also the largest in the history of the service, and exceeding last year's record by 677 . The value of vessels assisted, including their cargoes, was $\$ 37,801,357$, being $\$ 14,783,848$ in excess of last year's figures and largely surpassing the record of any one year since 1923. There were 14,496 persons on board vessels assisted as compared with 15,398 for the fiscal year 1926. There were 136 derelicts and other obstructions to navigation removed or destroyed, exceeding last year's number by 35 . Persons in distress cared for numbered 899 as against 490 during the fiscal year 1926.

There were 1,788 vessels seized or reported for violations of law during the year, being 99 less than in the preceding year. In the interests of the enforcement of the laws of the United States 68,223 vessels were boarded and examined in the course of the year by the agencies of the Coast Guard. This exceeds last year's number by 15,143 . It is again gratifying to be able to record that the service operations against smuggling, heavy and onerous as the duty is, have in no way diminished, impaired, or disturbed the accustomed humanitarian work of the Coast Guard.

For many years the Coast Guard has taken an active part in rendering assistance upon occasions of storms and floods in various parts of the country. The service agencies have gone into the stricken areas and removed imprisoned dwellers to places of safety, rescued victims from dangerous situations, furnished food and water to those threatened with famine, saved household goods, livestock, and other property from destruction, and rendered countless other services. Three notable instances of the kind occurred during the fiscal year 1927. First, the Florida hurricane in September, 1926; second, the Illinois River Valley flood in October and November, 1926; and, third, the Mississippi Valley flood in the months of April, May, and June, 1927. The Coast Guard rendered important relief services in all three of these calamities, and the record of the work of the officers and men of the service on these occasions forms an intensely engaging chapter in the history of the Coast Guard. In the Mississippi Valley flood, particularly, the work was of immense
magnitude, almost beyond human reckoning, and of the most heroic order. The Coast Guard threw into the flooded areas 674 officers and men and 128 vessels and boats, and removed from positions of peril to places of safety nearly 44,000 persons and saved from drowning more than 11,000 head of livestock. It would be almost impossible to enumerate all the items of service rendered by the Coast Guard personnel in this overwhelming disaster, or to estimate the value of the work accomplished. The entire personnel of the Coast Guard engaged in the relief work on the occasions named deserve the highest praise.
The enforcement by the Coast Guard of the customs laws of the country and the laws relating to navigation and motor boats was attended during the year with satisfactory results. The general enforcement of the customs laws by the service is annually supplemented by the stationing of harbor cutters, or launches, at the principal ports to assist the customs authorities in boarding incoming vessels and in performing other customs duties. Assistance was also rendered, as needed, to other branches of the public service in the enforcement of the Federal laws.

The law-enforcement work of the service has continued to bring excellent results. The Coast Guard has entirely eliminated the once notorious rum row. The service continues to give unremitting attention toward preventing the reestablishment of that menace on our coastal waters, and to those foreign vessels that endeavor to transfer their cargoes of liquor, many miles at sea, into domestic craft or try to enter our greater ports with their contraband cargoes, hoping to escape detection in the large volume of legitimate traffic. The fact that the Coast Guard must now search diligently to find the rumrunning vessels, a number being undoubtedly engaged in the traffic, necessitates extensive scouting operations over wide sea areas, which really occasions a greater burden and responsibility upon personnel and ships than was the case when rum row existed and the foreign liquor vessels anchored in groups near our shores.

## Prohibition law enforcement

Under the act of March 3, 1927, creating a Bureau of Prohibition and a Bureau of Customs in the Treasury Department. there have been new bureau organizations established in charge of the Commissioner of Prohibition and the Commissioner of Customs, respectively. The supervision of the Coast Guard, Bureau of Prohibition. and Bureau of Customs has been retained under one Assistant Secrecary in order to maintain that close coordination between the three services that is essential to effective enforcement of the prohibition laws.

The operation of the division of foreign control has placed at the disposal of all three services, particularly the Coast Guard, shipping
information that has been a major factor in breaking up the so-called rum fleet on the coast. This division has been very effective in securing information relative to miscellaneous cargoes, and smuggling by sea has become expensive and hazardous.

The decentralized administration of the enforcement and permissive features of the national probibition act bave been maintained in the new Bureau of Prohibition and much has been accomplished in the strengthening of decentralized administration along the lines of uniformity of practice.

The past year has seen an improvement in the permissive control of industrial alcohol and other intoxirating liquors and a consequent tendency to development of the illicit manufacture of liguor. Many large illicit distilleries, employing grain and corn sugar as raw materials, have been destroyed and the administrative districts are giving more of their attention to the climination of these large-scale moonshine operations.

The control of the manufacture and illegal disposal of beer of an alcoholic content greater than one-half of 1 per cent has greatly improved through the special attention given by the administrators to the brewery permit work. There has been a noticeable development, however, of the manufacture of beer from malt sirup and wort in illicit breweries not covered by a permit of any character. This illicit so-called alley brewery has come into existence in a manner somewhat analogous to the moonshine alcohol plant, both characters of violations following improved control of permit breweries and alcohol plants.

Each district has formed special conspiracy squads to work on major conspiracy cases involving violations of the national prohibition act, and many important alenhol and beer cases have been reported to the Department of Justice during the past year. The enforcement work of the distrists is being continually directed to get at the sources of supply and the financial backers of these commer- cially organized illegal operations.

The following table of seizures under the prohibition act epitomizes in concrete form the results of improvements in these various lawenforcement activities:

Prohibition seizures

## Narcotic law enforcement

Enforcement of Federal narcotic laws has vigorously continued. Special attention was given to the problem of apprehending those persons engaged in large-scale operations with respect to illicit drugs with the result that while there has been a decrease in the number of cases reported for prosecution, a larger proportion of convictions has been obtained, together with a substantial increase in the total length of sentences imposed, notwithstanding the decreased number of cases reported for prosecution. During the latter part of the fiscal year the United States Supreme Court sustained the constitutionality of one of the enforcement provisions of section 1 of the Harrison narcotic law, as amended.

A comparatively small quantity of those narcotic drugs lawfully imported and afterwards manufactured in this country is diverted into illegitimate channels. Narcotic drugs that are unlawfully introduced into this country form the chief source of supply of the nonmedical addict. The vast and varied commerce through the principal seaports of our country, particularly along the Atlantic seaboard, makes possible the clandestine introduction into the United States of quantities of illicit narcotics under the guise of legal merchandise, or hidden in personal effects of members of crews.

## Public Health Service

Reports to the Surgeon General indicate that health conditions throughout the country were unusually favorable during the fiscal year ended June 30, 1927. However, the record for the calendar year 1926 was not so favorable. The general death rate increased slightly over that for 1925 , and the infant mortality rate also increased. These increases were due, largely, if not entirely, to the epidemic of influenza which occurred during the winter and spring of 1926. No human plague occurred in the United States during the fiscal year ended in 1927.

In addition to the information regarding the prevalence of quarantinable and communicable diseases in the United States which is required to be given to foreign governments by international agreements, there has been an increasing interchange of sanitary information between the Public Health Service and the Pan American Sanitary Bureau, the Health Section of the League of Nations, and the International Office of Public Hygiene.

The experiment of examining prospective immigrants in the country of origin, which was begun during the preceding fiscal year, continued during the fiscal year 1927 and apparently proved very successful. Early in the fiscal year this work was extended to Copenhagen, Denmark; Berlin, Bremen, Cologne, Hamburg, and Stuttgart, 64761-FI 1927-10

Germany; and Bergen and Oslo, Norway. Later in the year it was inaugurated at Goteborg and Stockholm, Sweden; and Warsaw, Poland. Through representation to the Department of State by the respective governments, arrangements are being completed to open new stations at Genoa, Naples, and Palermo, Italy; and Prague, Czechoslovakia, early in the new fiscal year.

During the time of the Mississippi flood, an officer of the Public Health Service was detailed to serve at the national disaster relief headquarters of the American Red Cross as liaison officer between the Red Cross organization and the national and State public health officials. In this capacity this officer was enabled to secure needed assistance from the United States Public Health Service and from State, municipal, and local health departments throughout the country. From its rural sanitation force the Public Health Service immediately placed at the service of each of the State health officers in the flood area a medical officer thoroughly experienced in public health emergency work and familiar with the localities affected by the flood. The value and efficiency, in this emergency, of the officers trained in the rural sanitation work of the Public Health Service was sufficient proof of the necessity for continued support of this important and valuable activity.
With the recession of the flood, the problem of providing public health protection for the inhabitants of the devastated areas during the period of rehabilitation confronted health officials. At a conference called under the auspices of the American Red Cross a plan for the establishment of county health units in afflicted areas was developed, which was believed to afford the best practical means for the protection of the flood area against epidemic disease during the rehabilitation period. In addition, its character was such as to enable the communities to work out a permanent program of health and sanitation.

Upon the request of the State and local authorities, two medical officers and three sanitary engineers were sent to the disaster area in Florida on September 21 and 23, 1926, to assist in establishing emergency public health measures. Adequate measures for the prevention of the spread of smallpox and other epidemic diseases were effectively carried out through the medium of State and local health officials.

## Bureau of Engraving and Printing

During the fiscal year ended June 30, 1927, the Bureau of Engraving and Printing printed and delivered greater quantities of work than ever before in its history. This was accomplished in spite of decreases in expenditures and in the number of employees as compared with the previous year. At the same time a new low record
for spoilage in all classes of currency was established. Such laudable accomplishments are numbered among the many demonstrable results of the improvements in administration that were put into operation during the year. Elsewhere in this volume are enumerated the improvements which contributed to these accomplishments.

## Division of Supply

By providing an appropriation for personnel for the Division of Supply, the Congress, in the act of January 26, 1927 (44 Stat. 1029), recognized and approved the central purchasing agency in the Treasury Department, which had been created by Department Circular 283, of March 28, 1922, and had functioned for five years as the "Bureau of Supply." The "Division of Supply" became a unit of the office of the Secretary on July 1, 1927. In this division the purchasing work of the department is cons:lidated and coordinated with the accounting, distribution, and traffic duties related thereto. The chief of the Division of Supply is charged also with immediate supervision over the work of the General Supply Committee.

Prior to the formation of this central purchasing office these duties were distributed among various bureaus and offices, in several of which were distinct organizations doing purchasing work for the units they served, in most cases without regard to consolidated and coordinated purchasing power, systematic efforts to effect standardization, or persistent hammering for quantity-purchase or prompt. payment discounts.

The operations of the division of supply during the fiscal year 1927 are summarized in its report printed elsewhere in this volume.

General Supply Committee.-The General Supply Committee's policy of contracting for commonly used items in definite quantities each quarter was described in my last report. This plan of procurement has developed with such excellent results that it has been extended to include staple food supplies, making possible not only the purchase of such supplies at lower cost but also the inspection of each delivery, the latter through the cooperation of the Department of Agriculture. The inclusion of the purchases of the District of Columbia under the General Supply Committee contracts (as provided for by section 6 of the act making appropriations for the government of the District of Columbia for the fiscal year 1928) promises, from work already accomplished, to make possible appreciable savings, both because of the advantage of the larger volume of pur-
chases and also because it has been possible to combine certain of the needs of the District of Columbia with similar requirements existing in the Federal departments and thus to make contracts on a definite quantity basis.

## War Finance Corporation

The War Finance Corporation, which has been in liquidation since January 1, 1925, continued to make steady progress in winding up its affairs. Its charter expires by law on April 4, 1928. The amount advanced for all purposes from its creation in May, 1918, to October 15, 1927, was $\$ 690,278,000$, of which $\$ 685,759,000$ has been repaid. The amount outstanding on the books of the corporation on October 15, 1927, was $\$ 4,407,000$. The corporation's personnel and operating expenses are being reduced as rapidly as the condition of its business permits.

Attention is invited to the attached reports of the various bureaus and divisions of the Treasury Department and to the exhibits and tables accompanying the report on the finances.
A. W. Mellon, Secretary of the Treasury.
To the President of the Senate.

## Obligations of foreign governments

During the fiscal year ended June 30, 1927, the Treasury received on account of the indebtedness of foreign governments to the United States the sum of $\$ 206,089,172.71$, of which $\$ 45,699,572.81$ represented principal and $\$ 160,389,599.90$ represented interest. Since the close of the fiscal year up to November 15, 1927, additional payments have been received amounting to $\$ 10,246,564.00$, of which $\$ 53,424.92$ was on account of principal and $\$ 10,193,139.08$ on account of interest.

Payments were regularly received during the year under the terms of the various funding agreements except the agreement concluded with the Government of France. This last-mentioned agreement has not yet been ratified by either the French Parliament or the Congress of the United States. France has, however, continued to pay the interest amounting to over $\$ 20,000,000$ per annum on the obligations now held by the United States, received in connection with the surplus war material sold on credit. It also paid during the year $\$ 10,000,000$ on account of its indebtedness to the United States exclusive of obligations given for surplus war material. The Treasury applied the amount received as a payment on account of the principal of the demand obligations taken for cash advances under the Liberty bond acts. This payment, together with the interest payments made during the fiscal year 1927, is practically equal to the annuity of $\$ 30,000,000$ that would have been paid under the funding agreement if it had been ratified. Copies of press releases embodying correspondence concerning the $\$ 10,000,000$ payment will be found as Exhibit 26, page 315.

The following shows the amount of payments received from France since June 15,1925 , which will be applied toward the annuities due under the funding agreement upon ratification, and the amounts specified as payable under that agreement:

| Fiscal year | Payments received | Annutities under funding agreement |
| :---: | :---: | :---: |
| $\begin{aligned} & 1926 . . \\ & 1927 . \end{aligned}$ | $\begin{array}{r} \$ 20,367,057.25 \\ 30,367,057.25 \end{array}$ | $\begin{array}{r} \$ 30,000,000 \\ 30,000,000 \end{array}$ |
| Total | 50, 734, 114. 50 | 60, 000,000 |

The Government of the Republic of Liberia, on July 6, 1927, liquıdated its indebtedness in full, amounting to $\$ 26,000$ principal and
$\$ 9,610.46$ accrued interest. This indebtedness was evidenced by demand obligations of that Government which were acquired under the Liberty bond acts for cash advances. Copy of a press statement issued July 6, 1927, from the Office of the Liberian Consul General at Baltimore containing a copy of a letter of the Secretary of the Treasury to the consul general of Liberia regarding the payment and a statement of the consul general will be found as Exhibit 27, page 316.
The Governments of Italy and Latvia delivered to the Treasury on May 19, 1927, and May 3, 1927, respectively, their new obligations provided for in the respective funding agreements in exchange for the old obligations held by the Treasury. Belgium and Czechoslovakia have not exchanged their obligations, although payments have been received regularly under the funding agreements. Yugoslavia has not exchanged its obligations because the funding agreement has not been formally ratified by the United States. Payments have, however, been received regularly under this agreement.

All of the funding agreements concluded contain a provision allowing the respective governments to pay either interest or principal due under the terms thereof in any obligations of the United States issued since April 6, 1917. The Government of Great Britain is the only one that has regularly taken advantage of this provision. On one occasion the Governments of Finland and Italy each paid in obligations of the United States.

There is set out below a statement showing the total payments received up to the end of the fiscal year on account of the principal of the funded indebtedness:

| Country | Cash | In United States obligation |  | $\begin{aligned} & \text { Total } \\ & \text { principal } \\ & \text { payments } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Face amount | Accrued interest to payment |  |
| Belgium. | $\$ 4,200,000.00$$6,000,000.00$$141,000.00$$35,723.62$$29,920.50$$5,000.000 .00$$92,185.00$$500,000.00$$400,000.00$ |  |  | $\$ 4,200,000.00$ <br> , 186,00000 <br> 05, 000, 000.00 <br> 10, 000, 000.00 <br> 92. 185. 00 <br> 400, 000.00 |
| Frechosiovakia |  |  |  |  |

| Poland. |  | 3,500, 000.00 |  |  | 3,500, 000.00 |
| Total | 268, 330.50 | 58, 804, 082. 04 | 563, 859, 150 | 1, 939, 773.92 | 624, 871, 336.46 |

The Treasury recently issued a publication entitled "Combined Annual Reports of the World War Foreign Debt Commission, With Additional Information Regarding the Foreign Debts Due the United States." This publication combines all of the annual reports of the World War Foreign Debt Commission as embodied in the annual reports of the Secretary of the Treasury for each of the fiscal years ended June 30, 1922, to June 30, 1926, to gether with additional data incident to the settlement of the debts. This publication makes available in convenient form a complete history of the debt settlements.

During the past year certain unofficial statements were issued relative to foreign debts due the United States. Some of these statements urged reconsideration with a view to granting more lenient terms; some suggested outright cancellation, and others indorsed the Government's policy in funding the debts. In this connection there will be found, as Exhibits 28 to 31, pages 318 to 336, a copy of a statement made by Senator Smoot in the United States Senate on December 22 , 1926 , replying to a statement issued by certain professors of Columbia University asking for a joint conference of debtor and creditors governments to fix the amount of the debts to be paid; copy of a letter dated March 15, 1927, from the Secretary of the Treasury to Mr. John Grier Hibben, president of Princeton University, replying to a press statement issued by certain members of the faculty of that university, indorsing the statement issued by the Columbia professors and urging reconsideration of the debt settlements; copy of a note from the British Government commenting upon the Secretary's letter to President Hibben; and copy of a reply made by the Secretary of State, together with copy of the press statement released by the Secretary of the Treasury on May 5, 1927, commenting upon the letter of the British Government.
For a detailed statement of the principal amount of the indebtedness of foreign governments as of November 15, 1927, payments made on account of the principal thereof, and the interest accrued and
unpaid thereon as of the last interest payment date prior to or ending with November 15, 1927 , see Table 66, page 628.
Statement of the payments made up to November 15, 1927, on account of interest on all obligations of foreign governments held by the United States, funded and unfunded, appears as Table 67, page 629.

The "present values" of payments to be received from the several foreign governments under the respective funding agreements, calculated a different rates of interest, are shown in Table 68, page 630.

## Receipts from Germany

Under the terms of the agreement providing for the distribution of the Dawes annuities, signed at Paris on January 14, 1925, the United States is entitled to receive annually from Germany certain payments on account of the reimbursement of the costs of the United States army of occupation and the awards of the Mixed Claims Commission established in pursuance of the agreement of August 10, 1922, between the United States and Germany.
Army costs.-The agreement of January 14, 1925, provides that, out of the amount received from Germany on account of the Dawes annuities, there shall be paid to the United States, beginning September 1,1926 , the sum of $55,000,000$ gold marks per annum, as reimbursement of the costs of the American army of occupation. This annual payment constitutes a first charge on cash made available for transfer by the transfer committee out of the Dawes annuities, after the provision of the sums necessary for the service of the $800,000,000$ gold mark German external loan, 1924, the costs of the Reparation Commission, the organizations established pursuant to the Dawes plan, the Interallied Rhineland High Commission, the Military Control Commissions, and the payment to the Danube Commission, and for any other prior charges which may hereafter, with the assent of the United States, be admitted. The annual amounts are cumulative and any arrears bear interest at $41 / 2$ per cent from the end of the year in which payable, until satisfied. The United States is also recognized as having an interest, with respect to any arrears in the annual amounts due on this account, in any disposition of railway bonds, industrial debentures, or other bonds issued under the Dawes plan.

Under this agreement the United States is entitled to receive its payments at the time any cash is made available for transfer by the transfer committee. In order to facilitate the operation of the plan, an arrangement was made during the third annuity year with the agent general for reparation payments, under which the United States received its share in monthly installments. The operation of this arrangement was entirely satisfactory from the standpoint of the Treasury, and an arrangement similar in character has been made
for the fourth annuity year. During the third annuity year, ended August 31, 1927, the United States received on this account the $55,000,000$ gold marks provided for in the agreement of January 14,1925 , or the equivalent of $\$ 13,057,939.47$. The Army cost account as of September 1, 1927, stood as follows:

Payments received-
Under the Army cost agreement of May 25, 1923, which was superseded by agreement of Jan. 14, 1925_------------.---- \$14, 725, 154.40
Under Paris agreement of Jan. 14, 1925_.. 13, 057, 939.47
27, 783, 093.87
Balance due as of Sept. 1, 1927
220, 083, 307.95
Mixed claims.-The agreement of January 14, 1925, also provides that, out of the amount received from Germany on account of the Dawes annuities, there shall be paid to the United States, for the purpose of satisfying the awards of the Mixed Claim Commission established in pursuance of the agreement of August 10, 1922, between the United States and Germany, $21 / 4$ per cent of all such receipts a vailable for distribution as reparations, provided that the annuity resulting from this percentage shall not in any year exceed the sum of 45,000,000 gold marks. The United States is also recognized as having an interest, proportionate to its $21 / 4$ per cent share in the part of the annuities available for reparations, in any disposition of railway bonds, industrial debentures or other bonds issued under the Dawes plan.
During the first two years the bulk of the payments made under the Dawes plan, except those for the service of the German external loan, were made in reichs marks within Germany, chiefly for deliveries in kind and for the costs of the armies of occupation. This appeared to be in accord with the intention of the experts sponsoring the plan, who stated in their report that, in the interest of currency stability and to aid the successful inauguration of the new Reichsbank, the proceeds of the German external loan should be used exclusively for financing internal payments, such as deliveries in kind and that part of the costs of the armies of occupation which represented expenditures in Germany. In view of the fact that the United States had no arrangement for accepting payments within

Germany, its share of the first two annuities was allowed to accumulate to its credit on the books of the agent general for reparation payments until, on August 25, 1926 (practically the end of the second annuity year) in connection with a cash transfer, the United States received $14,858,882.24$ gold marks, or $\$ 3,523,819$. Special arrangements were subsequently made under which the United States received the aggregate of $20,144,639.73$ gold marks, or $\$ 4,780,952.40$.

In order, however, that the United States might realize currently upon its $21 / 4$ per cent share, an arrangement was made about the middle of the third annuity year with the Government of Germany, substantially analogous to an agreement for the financing of deliveries in kind. Under this arrangement the agent general for reparation payments, about three days prior to the beginning of each calendar month, advises the finance minister of the Reich of the reichsmark credit held by the agent general for account of the United States and available for payment during the month in question in accordance with the program established for that month by the Reparation Commission after consultation with the transfer committee. Upon receipt of advice from the agent general as to the available credit for the month, the German Government undertakes to prevail upon German firms delivering goods or rendering services to the United States to deposit each month to the credit of the agent general with the Federal Reserve Bank of New York, out of the dollar credits arising from said deliveries and services, an amount equivalent to the credit specified by the agent general. The agent general then transfers such dollars to the Government of the United States as payment on account of the $21 / 4$ per cent share.

Up to the end of the third annuity year the United States received, through cash transfers and under the arrangements mentioned, the sum of $58,636,148.82$ gold marks, or $\$ 13,920,133.66$, practically extinguishing the credits due up to that time. Due to the fact that Congress has as yet enacted no legislation authorizing the payment of the mixed claims receipts to the claimants, the Secretary of the Treasury, in order to benefit the fund held for this account, has invested the dollar proceeds in obligations of the United States. As further payments are received they will likewise be invested until Congress disposes of the matter by legislation. The account stood as of September 1, 1927, as follows:
Total receipts to Aug. 31, 1927
$\$ 13,920,133.66$
Cost of inrestments in $31 / 4$ per cent Treasury certificates of indebtedness, series TM-1928, maturing Mar. 15, 1928 $\$ 13,920,084.96$
Cost of cable charges 11.25

13, $920,096.21$

## Railroad obligations

The total principal amount of railroad obligations held by the United States on June 30, 1927, was $\$ 230,484,076.05$. During the fiscal year payments amounting to $\$ 69,708,400.42$ were received on account of principal as follows:

$69,708,400.42$
The amounts above set opposite section 7 of the Federal control act and section 207 of the transportation act are the proceeds of sales during the year by the Director General of Railroads at par and accrued interest to the date of sale of obligations acquired under the respective sections of the acts, except a small amount of payments due carriers for services rendered, which was withheld by the Comptroller General and applied to the principal under section 207. For detailed statement see Table 70, page 631. The principal payments received on account of loans under section 210 of the transportation act, amounting to $\$ 24,365,174.59$, represented payments of $\$ 1,191,300$ on account of maturing obligations and $\$ 23,173,874.59$ on account of payments before maturity. The Secretary of the Treasury has no authority, according to a ruling of the Attorney General, to sell the obligations acquired under section 210. Most of the obligations, however, contain a provision which gives the carrier the right to pay them at any time ${ }^{\text {b }}$ before maturity, which has enabled the carriers to take advantage of opportunities to refinance their obligations at lower rates of interest and thereby reduce the indebtedness of the railroads to the Government.

On the basis of the Daily Treasury statement, the total receipts on account of railroad securities for the fiscal year were $\$ 89,737$,958.98 , of which $\$ 69,708,400.42$ was on account of principal and $\$ 20,029,558.56$ on account of interest.

Between July 1 and October 31, 1927, receipts on account of obligations of carriers have totaled $\$ 83,202,341.71$, of which $\$ 43,000,000$ was a payment of principal before maturity and $\$ 17,000,000$ was on account of sales made by the Director General of Railroads of obligations acquired under section $207, \$ 17,327,562.16$ represented payments by the carriers on account of principal of obligations under section 210 , and $\$ 5,868,500.57$ was on account of interest.

Section 204.-This section provides for reimbursement of deficits of the so-called "short-line" railroads during Federal control. Payments during the fiscal year on this account aggregated $\$ 166,981.57$, making total payments to June 30,1927 , of $\$ 10,337,436.84$ under this section. Of this total, $\$ 8,418,918.93$ was paid to the carriers direct,
and $\$ 1,918,517.91$ was paid to the Director General of Railroads on account of amounts certified to be due from the carriers to the President as operator of the transportation systems under Federal control. See Table 69, page 631.

Section 209.-This section provides for the guaranty of net railway operating income during the six months' period immediately following the termination of Federal control on March 1, 1920. During the fiscal year there was paid to the carriers under the provisions of this section the sum of $\$ 605,868.15$, making total payments, to June 30,1927 , of $\$ 533,323,567.29$. This total includes $\$ 3,402$,740.52 due from the following carriers as of June 30, 1927, in cases where the certificates made by the Interstate Commerce Commission were in excess of the amounts actually due, resulting in overpayments under the provisions of paragraphs ( g ) and ( h ) of this section:

| Buffalo \& Susquehanna R. R. Corpo | \$21, 749.31 |
| :---: | :---: |
| Chicago, Indianapolis \& Louisville Ry. Co | 198, 484.95 |
| Fort Dodge, Des Moines \& Southern R. R. | 69,065. 55 |
| Great Northern Ry. Co | 1, 329, 785.98 |
| Minneapolis \& St. Louis Railroad Co., Receiver | 292, 022. 23 |
| Missouri \& North Arkansas R. R. Co., Receiv | 41, 375.46 |
| Northern Pacitic Ry. Co_ | 1, 320, 241. 73 |
| Oregon Electric Railway Co. (subsidiary Spokane, Portland \& Seattle Ry. Co.) $\qquad$ | 25, 741.83 |
| pokane, Portland \& Se | 104, 2 |

## Total

3, 402, 740.52
The carriers in these cases have refused to make payment of the amounts due to the United States. In some eases the matter is now in litigation; two cases are in receivership, and in other cases the carriers have disclaimed any liability in the matter.
For a detailed statement showing payments made during the fiscal year to carriers under this section and total of all payments and advances made, see Table 71, page 632.

Since publication of the last annual report the Treasury has been notified by the Attorney General that no further action can be taken by the Government to appeal from the judgment of the district court in favor of the Interstate Railroad Company.

Section 210.-This section established a revolving fund of $\$ 300$,000,000 to be used for loans to railroads under the conditions set forth in a certificate of the Interstate Commerce Commission authorizing each loan. As the period during which the carriers could file application for loans has expired, it is not anticipated that any further loans will be made. This fund was made available also for paying judgments, decrees, and awards rendered against the Director General of Railroads. The expenditures by the Director General during the fiscal year for this purpose amounted to $\$ 749,182.61$, making total net expenditures to June 30,1927 , of $\$ 32,683,781.82$.

For a statement showing the principal amount of obligations held as of June 30, 1926 and 1927, on account of loans made, see Table 72, page 633.

The following is a list of the carriers in default as of June 30, 1927, on account of their obligations given for loans under this section:

| Name of carrier | Principal | Interest | Total |
| :---: | :---: | :---: | :---: |
| Aransas Itarbor Terminal Ry | \$50, 000 |  | \$50, 000.00 |
| Des Moinus \& Central Lowa R. R |  | \$19,005. 00 | 10;005. 00 |
| Gainesville \& Northwestern R. R. C | 75, 000 | 18, 000.00 | 93,000.00 |
| Minueapolis \& St. Louis R. R. Co. |  | 309, 767. 00 | 309,767.00 |
| Missouri \& North Arkansas Ry. Co |  | 564, 652. 82 | 564,652.82 |
| Sall Lakr \& Uiah R. R. Co.... | 31, 400 | 130,892.00 | 162, 292.00 |
| Virgiaia Blue Ridge Ry. Co | 106,000 | 6,360. 00 | 112, 360.00 |
| Virginia southern R. R. Co |  | 6,840. 00 | 6, 840.00 |
| Waterloo, Cedar Falls \& Northern R |  | $415,800.00$ | 415, 800.00 |
| Wichita Northwestern Ry. Co.. |  | 80, 167, 50 | 80, 167.50 |
| Total. | 262, 400 | 1, 551, 484. 32 | 1,813, 884. 32 |

Securities owned by the United States Government
The aggregate amount of securities owned by the Government on June 30,1927 , as compiled from the latest reports received, was $\$ 11,288,039,038.95$, as against $\$ 11,037,161,411.66$ on June 30,1926 , an increase of $\$ 250,877,627.29$. A summary comparison of the holdings at the end of the last two fiscal years is as follows:

|  | June 30, 1927 | June 30, 1926 |
| :---: | :---: | :---: |
| Foreign obligations: |  |  |
|  | \$6, 818, 154, 785. 43 | \$4, 725, 490, 865. 00 |
|  |  |  |
| Capital stock of war emergency corporations...................... | 10, 912, 548, 625.59 | 10, 532, 553, 050.73 |
|  | 48,911, 396.00 | 53, 167,076. 17 |
|  | 230, 484, 076. 05 | 290, 112, 850. 64 |
|  | 7,000, 000.00 | 7, 000, 000. 00 |
|  | 4, 000, 000. 00 | 1, 500, 000.00 |
| Federal land bank securities: <br> Capital stuck of Federal land banks. <br> Federal farm loan bonds. $\qquad$ $\qquad$ <br> Capital stock of Federal intermediate credit banks. <br> Miscellaueous securities received by War and Navy Depart- <br> ments and United States Shipping Board. $\qquad$ | 842, 008. 00 | 1,180, 440.00 |
|  |  | 60, 495, 000.00 |
|  | 25,000, 000.00 | 24,000,000.00 |
|  | 59, 252, 033.31 | 58, 152, 994. 12 |
|  | 11, 288, 039,038. 95 | 11, 037, 161, 411.68 |

The principal increases are, in round figures, $\$ 380,000,000$ in foreign obligations and $\$ 2,500,000$ in the capital stock of the Inland Waterways Corporation. Principal decreases are $\$ 69,000,000$ in railroad obligations, $\$ 60,495,000$ in Federal farm loan bonds, and $\$ 4,000,000$ net in the capital stock of war emergency corporations. The increase in foreign obligations is due to the delivery of bonds under the funding agreements in exchange for the old obligations held, which bonds included in their face amount the accrued and unpaid interest on the old indebtedness to the date of settlement.

The decrease in railroad obligations is due to sales of such obligations made by the Director General of Railroads and payments received on account from the carriers. The farm loan bonds purchased by the Secretary of the Treasury under the authority of the act approved January 18, 1918, as extended by joint resolution approved May 26, 1920, have now all been repurchased by the Federal land banks at par and accrued interest, as required by law. Treasury purchases of these bonds under the authority mentioned aggregated $\$ 195,925,000$.
A detailed statement of the securities held on June 30, 1927, will be found as Table 65, page 626.

## Trust funds administered by the Treasury

Adjusted service certificate fund.-During the fiscal year the Treasury continued to make investments for the account of the adjusted service certificate fund in special issues of Treasury notes and certificates of indebtedness bearing interest at the rate of 4 per cent per annum, in accordance with the procedure outlined in the Annual Report of the Secretary of the Treasury for the fiscal year 1925.

The new investments made during the year were in Treasury notes and aggregated $\$ 123,400,000$ face amount. The funds available for this purpose were an appropriation of $\$ 116,000,000$ and interest on investments of $\$ 7,400,000$, both available on January 1, 1927. Redemptions during the year to provide funds for authorized payments amounted to $\$ 14,400,000$ face amount; $\$ 23,800,000$ face amount of the one-year certificates of indebtedness held in the investment account of the fund matured January 1, 1927, and after redemption the proceeds of the principal amount were reinvested in like obligations maturing January 1, 1928.

A statement of the condition of the fund as of June 30, 1927, follows:

Adjusted service certificate fund as of June 30, 1927

FUND ACCOUNT

$\$ 312,900,000.00$
Balance to credit of disbursing officer of Veterans' Bureau
(includes outstanding checks)

Civil service retirement and disability fund.-Investments for the account of the civil service retirement and disability fund were made during the fiscal year 1927 in special issues of Treasury notes bearing interest at the rate of 4 per cent per annum in accordance with the procedure outlined in the Annual Report of the Secretary of the Treasury for the fiscal year 1926.

At the beginning of the fiscal year under review there owas held in the fund, among other securities, $\$ 30,500,000$ face amount of second Liberty loan $41 / 4$ per cent bonds at a principal cost of $\$ 30,656,870.50$. In view of the plan of the Treasury adopted during the fiscal year for refunding the second Liberty loan bonds outstanding and the market prices of the bonds at that time, it was decidedly advantageous to the fund to sell the bonds so held and simultaneously reinvest the proceeds in special issues of 4 per cent Treasury notes in accordance with the established procedure relative to investments for account of the fund. The second $41 / 4$ 's were therefore sold in the market, the principal proceeds being $\$ 30,738,281.25$. This sum plus accrued interest on the sale and a small balance in the fund was immediately invested in $\$ 31,200,000$ face amount of 4 per cent special Treasury notes maturing June 30, 1931.

The procedure adopted July 1, 1926, covering the investments for account of the fund assures the maximum amount of investments at all times. Investments are made in amounts of $\$ 100,000$ or multiples thereof, and as soon as this amount is available it is immediately invested for account of the fund. The new investments made dur-

$$

ing the year in this manner aggregated $\$ 14,400,000$ face amount 4 per cent special Treasury notes maturing June $30,1932$.

Credits to the fund during the fiscal year aggregated $\$ 27,168,463.84$, of which $\$ 24,355,882$ was on account of deductions from basic compensation of employees and service credit payments and $\$ 2,812,581.84$ representing interest and profits on investments. The expenditures on account of refunds to employees, annuities, etc., amounted during the fiscal year to $\$ 13,429,092.90$ as compared with $\$ 10,183,345.27$ for the previous year.

The following statement shows the status of the fund as of June 30, 1927.

The second Liberty loan $41 / 4$ per cent bonds held in the investment account on June 30, 1926, aggregating $\$ 202,150$ face amount, were sold on March 16, 1927, in anticipation of the call of these bonds by the Treasury for payment on November 15, 1927. The price realized was $1000_{3}^{2} \frac{5}{2}$ and accrued interest. With the proceeds $\$ 203,000$ face amount of $41 / 4$ per cent Federal farm loan bonds were acquired at a principal cost of $\$ 204,776.24$. The securities in the investment account June 30, 1927, were as follows:

|  | Face amount | Principal cost |
| :---: | :---: | :---: |
| First Liberty loan 41/4 per cent bonds | \$26,850 | \$27, 529.64 |

Foreign service retirement and disability fund.--The foreign service retirement and disability fund, established by section 18 of the act of May 24, 1924 (vol. 43, p. 144), is under the administrative supervision of the Secretary of State, but under the act the Secretary of the Treasury is directed to make investments from time to time of such portion of the fund as in his judgment may not be immediately required for authorized payments, the income derived from such investments to be credited to the fund as a part thereof.

Section 18 (i) of the act of May 24, 1924, requires that in case an annuitant dies without having received in annuities an amount equal to the total amount of his contributions from salary with interest thereon at 4 per cent per annum compounded annually up to the time of his death, the excess of the said accumulated contributions over the annuity payments shall be paid to his legal representatives, and in case a foreign service officer dies without having reached the retirement age, the total amount of his contributions with accrued interest shall be paid to his legal representatives. In view of this requirement, the same considerations as to sarings and simplified procedure are applicable to investments made by the Treasury for account of this fund as are indicated in connection with investments for account of the adjusted service certificate fund and the civil service retirement and disability fund.

The following procedure, therefore, was prescribed effective on and after July 15, 1927 :
(1) Investments for account of the fund will be made in special issues of Treasury certificates of indebtedness and Treasury notes bearing interest at the rate of 4 per cent per annum payable on June

30 in each fiscal year, or on earlier redemption: Such obligations to be issued in denominations of $\$ 1,000$ or multiples thereof, and at par as of dates of issue.
(2) The Treasurer of the United States will act as disbursing officer for the investments in the same general manner as at present. The commissioner of accounts and deposits will be responsible for the investments from available funds, and the commissioner of the public debt for issuance of the securities and safe-keeping thereof in the same general manner as is done with the adjusted service certificate fund and the civil service retirement and disability fund. Credits to meet monthly requisitions of the disbursing clerk of the Department of State for authorized payment will be provided when necessary through redemption of the special issues.

During the fiscal year 1927 the fund was credited with the sum of $\$ 162,024.98$, including $\$ 10,007.54$ earnings on investments. The fund was charged with $\$ 74,000$ on account of advances to the disEursing officer of the State Department for the payment of annuities, etc., and $\$ 87,267.50$ on account of investments, leaving an unexpended balance on June 30, 1927, of $\$ 757.48$. The total interest and profits collected on investments to June 30, 1927, amounted to \$19,805.23.

All of the securities in the investment account of the fund on June 30, 1927, were held in safe-keeping by the Division of Loans and Currency of this department and the Federal Reserve Bank of New York.

The following statement shows the status of the fund as of June 30, 1927:

Library of Congress trust fund.- Under provisions of the act approved March 3, 1925, the Library of Congress trust fund board consists of the Secretary of the Treasury, the chairman of the Joint Committee on the Library, the Librarian of Congress, and two persons appointed by the President. The act authorizes the board to accept, receive, hold, and administer such gifts or bequests of personal property for the benefit of, or in connection with, the Library, its collections, or its service as may be approved by the board and by the Joint Committee on the Library. The moneys or securities given or bequeathed to the board are required to be receipted for by the Secretary of the Treasury, who is authorized to invest, reinvest, or retain investments, as the board may determine. In accordance with the policy adopted by the board, investments and reinvestments of the principal of trust funds are made in interest-bearing securities of the highest rating.

The earnings credited to the fund during the fiscal year amounted to $\$ 7,974.7 \mathrm{v}$, making total earnings received to June 30, 1927, of \$8,748.99.

During the fiscal year the board received a donation from Mrs. Elizabeth Sprague Coolidge of $\$ 124,438.20$ face amount of securities, the income from which is to be used according to the terms of the donation for the purpose of maintaining certain activities in connection with the music division of the Library. A first mortgage note for $\$ 15,000$ face amount was paid during the year at a 1 per cent premium, the proceeds of which were reinvested in $\$ 15,400$ face amount of $41 / 2$ per cent first mortgage bonds of the New England Telephone \& Telegraph Co., making a total face amount of securities held under this donation of $\$ 124,838.20$.

The following statement shows the securities received by the board up to June 30, 1927, including the $\$ 15,400$ face amount of New England Telephone \& Telegraph Co. bonds purchased by the Secretary of the Treasury under the Coolidge donation. All the securities are held in safe-keeping by the Treasurer of the United States, subject to the order of the Secretary of the Treasury for account of the board.

1 Six-sevenths of income retained for the present by the donor.
${ }^{2}$ Life interest in six-sevenths of income retained under terms of donation.
United States Government life insurance fund.-Under the provisions of section 18 of the act approved December 24, 1919, as amended March 4, 1923, the Secretary of the Treasury is authorized to invest in interest-bearing obligations of the United States or in bonds of the Federal land banks all moneys received in payment of premiums on converted insurance in excess of reserve requirements and authorized payments. Under this authority investments were made as and when funds were available upon advice received from the Director of the United States Veterans' Bureau. However, under the act approved March 3, 1927, the Director of the United States Veterans' Bureau is authorized to make loans to veterans upon their adjusted service certificates out of the United States Government life insurance fund. After the passage of this last mentioned act, all moneys received for account of the fund in excess of ordinary requirements were devoted to the making of loans to veterans. In order to meet the immediate demands of the veterans for loans, it was necessary to sell $\$ 3,000,000$ net face amount of the investments in Government obligations to provide additional funds for that purpose. Between March 3, 1927, and June 30, 1927, the
director reports loans aggregating $\$ 20,818,116.70$ made to veterans under this authority. Until the funds were needed to make loans to veterans, the Secretary of the Treasury continued to make investments for the fund in Federal farm loan bonds in accordance with an arrangement between the fiscal agent of the Federal land banks, the Director of the Bureau, and the Treasury. During this period $\$ 32,550,000$ face amount of $41 / 4 \%$ bonds of these banks were purchased, making a total face amount of $\$ 101,750,000$ of all farm loan bonds now held for account of the fund.
Monthly reports are made by the Treasury to the Veterans' Bureau of all securities in the fund and the principal cost thereof as the result of investments made by the Secretary of the Treasury, and periodic verifications of the security holdings are made through reports rendered to the director by the safe-keeping offices.

The securities held in the fund on June 30, 1927, were as follows:

|  | Par value | Principal cost |
| :---: | :---: | :---: |
| First Liberty loan converted $41 / 4$ per cent bonds. | \$6, 639, 900.00 | \$6, 316, 209. 21 |

## Division of Bookkeeping and Warrants

Summary of receipts and expenditures.-A summary of receipts and expenditures during the fiscal year ended June 30, 1927, adjusted to the basis of daily Treasury statements, revised, is set forth in the following table:

Expenditures chargeable against ordinary receipts_-_-_-_-- 3, 493, 507, 876. 75
Surplus of ordinary receipts over total expenditures
chargeable against ordinary receipts_--------- $634,915,010.86$
Surplus revenues applied to reduction of the public debt, in addition to $\$ 519,563,844.78$ debt retirements chargeable against ordinary receipts
$613,444,968.81$
Surplus revenues reflected in increase in balance of general fund of the Treasury on June 30, 1927, compared with June 30, 1926

21, 470, 042.05
Total surplus revenues accounted for, as above....--- $634,915,010.86$
Public debt receipts
$5,185,083,142.93$

| Warrants issued during the fiscal year 1927 adjust aily Treasury statements (revised).-The following t | sted to basis of table shows the |

[^9]total number of warrants issued and the gross amounts involved on account of the receipts and expenditures recorded during the fiscal year, adjusted to basis of daily Treasury statements (revised) :

|  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| General classes |  |  |  |

${ }^{1}$ Includes $\$ 6,370,621.39$ referred to in note 3, p. 431.
2 Exclusive of $\$ 519,563,844,78$ publie debt expenditures chargeable against ordinary receipts.
Includes $\$ 519,563,844,78$ public debt expenditures chargeable against ordinary receipts.
Receipt accounts to the number of 1,188 , representing receipts from customs, internal revenue, public lands, miscellaneous sources, Panama Canal tolls, and public debt and appropriation accounts to the number of 6,887 , covering expenditures for all executive departments, other Government establishments, the District of Columbia, and the public debt, have been credited and charged, respectively, to the general fund of the Treasury, details of which are exhibited on pages 431 to 444 of this report. Of the total receipts and repayments to appropriations deposited during the year, aggregating $\$ 9,595,514$, 487.48, no amount remained uncovered by warrant as of June 30, 1927.

Transfer and counter warrants amounting to $\$ 1,510,704,717.58$ were issued for adjustment of appropriation accounts, largely for the service of the Army and Navy, without affecting the general fund.

Appropriation warrants were issued to the number of 476, crediting detailed appropriation accounts with amounts provided by law for disbursement and transfer-appropriation and surplus-fund warrants charging and crediting detailed appropriation accounts to the number of 363 , a total of 839 .

On August 8, 1927, this department submitted to the Comptroller General for his consideration a revised form of covering warrant,
together with an outline of procedure in connection with its preparation and posting. Under the proposed plan, in lieu of the present 12 classes of covering warrants, there will be a single series, money columns being provided in the warrant for (1) revenues, (2) repayments to appropriations, and (3) counter entries in the Treasurer's revenue account. A column is also provided for departmental designation. The details of deposits will be transferred directly from the certificates of deposits to the warrant, and at the same time there will be written by machine process not only the necessary number of copies of the warrant, but the receipts ledger, a fiscal officer's register of deposits, and a departmental deposit list. The foregoing plan was approved by the Comptroller General on October 5, 1927.

District of Columbia account of revenuesi and expenditures.-The total charges and credits to the District of Columbia for the fiscal year ended June 30, 1927, on the basis of warrants issued, as shown by the District of Columbia ledger of revenues and expenditures established in accordance with the act of June 29, 1922 (42 Stat. 669), were as follows:
[On basis of warrants jssued, see p. 421]

|  | General funds | Special funds | Trust funds | Total |
| :---: | :---: | :---: | :---: | :---: |
| Balance June 30, 1926 | \$10, 164, 873.07 | \$244, 705. 59 | \$468, 625.99 | \$10, 878, 204. 65 |
| Revenues, fiscal year 1927. | ${ }^{1} 24,859,514.55$ | 2,981, 273.45 | ${ }^{2} 2,670,766.74$ | 30, 511, 554.74 |
| United States contribution, act Mar. 2, 1927 | 9, 000, 000.00 |  |  | 9,000,000.00 |
| Expenditures fiscal year 1927. | $\begin{array}{r} 44,024,387.62 \\ 132,572,443.46 \end{array}$ | $\begin{aligned} & 3,225,979.04 \\ & 2,471,417.04 \end{aligned}$ | $\begin{array}{r} 3,139,392.73 \\ 22,722,554.81 \end{array}$ | $\begin{array}{r} \cdot 50,389,759.39 \\ 37,766,415.31 \end{array}$ |
| Balance June 30, 1927 | 11, 451, 944. 16 | 754, 562.00 | 416, 837.92 | 12, $623,344.08$ |

${ }^{1}$ Exclusive of $\$ 468,115.36$ general revenues of the District of Columbia covered into the Treasury to credit of "Policemen and firemen's relief fund (trust fund)" under act of Sept. 1, 1916, vol. 39, p. 718, sec. 12, to meet deficiencies in said fund.
${ }^{2}$ Includes $\$ 468,115.36$ referred to in note (1)
Alien Property Custodian account.-Under the provisions of the act of Congress approved October 6, 1917, and the proclamations and Executive orders issued thereunder by the President, the Secretary of the Treasury purchased and exchanged during the year for account of the Alien Property Custodian United States securities of a par value of $\$ 306,475,000$. There were on hand on July 1, 1926, similar securities of a par value of $\$ 178,639,500$. Securities amounting to $\$ 305,246,500$ were sold or redeemed during the year, the proceeds being reinvested when not required for disbursement. The total face amount of such securities carried by the Secretary of the Treasury in trust for the Alien Property Custodian on June 30, 1927, was $\$ 179,868,000$.

Under decision of the Supreme Court of the United States, dated May 24, 1926, in the case of Max Henkels, appellant, v. Howard Sutherland, as Alien Property Custodian, and Frank White, as Treasurer of the United States of America, and opinions of the

Attorney General, dated August 25, 1926, and July 7, 1927, rendered in connection therewith, there has been paid to eligible claimants to November 1, 1927, upon certificates of the Alien Property Custodian the sum of $\$ 1,968,041.83$, and to the Alien Property Custodian for administrative expenses the sum of $\$ 24,876.36$, a total of $\$ 1,992,918.19$, representing earnings accrued on investments to March 4, 1923, $\$ 1,710,131.43$, and earnings on such earnings, $\$ 282,786.76$. The Supreme Court decision and opinions of the Attorney General mentioned above are printed as Exhibits 44, 45, and 46, respectively, on pages 395 to 402 of this report.

The total amount paid during the fiscal year 1927 upon authorizations of the Alien Property Custodian and the Attorney General was \$16,840,260.94.

Purchase of farm loan bonds.-On July 1, 1926, there were held by the Secretary of the Treasury $\$ 60,495,000$ Federal farm loan bonds, purchased under the provisions of the act of January 18, 1918, as amended by the joint resolution dated May 26, 1920. During the fiscal year 1927 the Secretary made no further purchases, but the Federal land banks repurchased $\$ 60,495,000$, thus leaving no bonds on hand at the close of the fiscal year 1927. The following table shows face amount of purchases of Federal farm loan bonds made by the Secretary of the Treasury and repurchases by Federal land banks:

State bonds and stocks owned by the United States.-The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

| State | Principal | Interest coupons due and unpaid |
| :---: | :---: | :---: |
| Louisiana. | \$37, 000. 00 | \$17, 220.00 |
| North Carolina | 58,000.c0 | 88, 140.00 |
| Tennessee. | 335, 666. $662 / 3$ | 157, 830.51 |
| Total. | 430, 666. $66^{2} / 3$ | 263, 150.51 |

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

## Division of Deposits

For several years past the Treasurer of the United States, Federal reserve banks and their branches, special depositaries, foreign depositaries, national-bank depositaries-both general and limited-and depositaries in the insular possessions of the United States, have comprised the depositary system of the Treasury. During the fiscal year ended June 30, 1927, there were no changes in the system as a whole, such changes as occurred being confined to the normal readjustment affecting individual depositaries; and the high degree of efficiency with which the Government's depositary work has been transacted since the inauguration of the present system was maintained throughout the year. Likewise, there was no modification of the Treasury's policy with respect to deposits of public moneys with banks during the year, which, in recent years, has been to maintain with depositary banks only such deposits as are actually necessary for the conduct of the Government's business.

Amount of deposits.-Government deposits with banks are divided into two broad classes: (1) The active working balances of the Treasury maintained with Federal reserve banks, general national-bank depositaries, and depositaries outside the continental limits of the United States, and (2) the demand deposits with special depositaries for replenishment of the working cash balance of the Treasury with the Federal reserve banks. The following table indicates the distribution of these deposits among the various classes of depositaries at the close of business June 30, 1927:

Government deposits with banks, June 30, 1927

| Type of depositary |  | Amount of deposits |
| :---: | :---: | :---: |
| Federal reserve banks (including branches) |  | \$30,656, 042. 52 |
|  |  | 198, 606, 818.09 |
| Foreign depositaries: |  |  |
| To credit of Treasurer of the United States |  | 93, 159.45 |
| To credit of other Government officers |  | 418, 447.98 |
| National-bank depositaries: |  |  |
| To credit of Treasurer of the United States |  | 6, 832, 264.08 |
| To credit of other Government officers...- |  | 18, 549, 177. 68 |
| Insular depositaries: |  |  |
| To credit of Treasurer of the United States |  | 237, 451. 61 |
| To credit of other Government officers.- |  | 1,211,358.89 |
| Philippine treasury to credit of Treasurer of the United | ---- | 486, 387. 66 |
|  |  | 257, 091, 107.83 |

As stated in the report of last year upon this subject, it is doubtful if there can be any further material curtailment in these deposits until such time as the fiscal business of the Government decreases substantially in volume. This prediction is borne out by a comparison of the average deposits during the past year with those of the two preceding fiscal years. It will be noted from the foregoing
table that the actual working balance of the Treasury with banks (eliminating the official checking accounts of other Government officers) totaled only $\$ 38,305,305.32$ on June 30 , which may be taken as a fair average for the year. Considering the fact that a substantial proportion of the total ordinary receipts and disbursements of the Government pass through the Treasury's accounts with the Federal reserve banks and other depositary banks and, in addition, that the Federal reserve banks perform many fiscal-agency functions, it is obvious that further reduction in this class of deposits is not desirable if the system is to operate properly. The deposits held by special depositaries, which comprise by far the largest part of all Government deposits with banks, are governeds first, by the amount of Government securities issued from time to time for which payment mayl be made by credit, and, second, the extent to which depositaries take advantage of this privilege. Deposits with special depositaries in the future will, therefore, be determined by these two factors.

Interest on deposits.-All Government depositaries, except Federal reserve banks, are required to pay interest at the rate of 2 per cent per annum upon daily balances. The interest received upon deposits with special depositaries during the fiscal year 1927 was $\$ 4,212,265.07$, and the total received from this source, from April 24, 1917, to June 30, 1927, was $\$ 73,646,000.69$. Interest received from other depositaries during the year was $\$ 520,421.69$, and the total amount received from June 1, 1913, when this requirement became effective, to June 30,1927 ; was $\$ 18,930,866.68$.

A brief summary of the changes within the depositary system of the Treasury during the fiscal year ended June 30, 1927, follows:

General national-bank depositaries.-General depositaries are those which are authorized to carry balances to the credit of the Treasurer of the United States, such balances being subject to analysis and ${ }^{\circ}$ adjustment periodically upon the basis of the amount and character of the essential Government business transacted by such depositaries. On June 30, 1926, there were 316 general depositaries and on June $30,1927,321$ national banks held such designation. During the fiscal year 8 general national-bank depositaries were discontinued and 13 were designated. Adjustments in the fixed balances of 16 general national-bank depositaries were made during the year. At the close of the fiscal year 1926 deposits to the credit of the Treasurer of the United States in general national-bank depositaries totaled $\$ 6,485,560.61$ as against $\$ 6,832,264.08$ on June 30, 1927.

Limited national-bank depositaries.-Limited national-bank depositaries of public moneys are designated for the sole purpose of receiving up to specified maximum amounts deposits made by postmasters and United States courts and their officers, for credit in their official checking accounts, with such depositaries. This class of depositaries
is not authorized to accept deposits for credit in the account of the Treasurer of the United States. During the fiscal year ended June 30,1927 , the Treasury designated 45 additional limited national-bank depositaries of public moneys, and 118 limited depositaries qualified by pledging additional collateral to accept increased amounts of deposits made by postmasters and United States courts and their officers for credit in their official checking accounts. During the year 57 limited depositaries were discontinued and, as a result of the withdrawal of collateral, reductions were made in the maximum qualifications of 74 such depositaries. On June 30, 1927, 960 national banks held designation as limited depositaries.

Deposits held by general and limited national-bank depositaries, to the credit of Government officers other than the Treasurer of the United States, on June 30, 1926, totaled \$20,198,204.33 and on June 30, 1927, $\$ 18,549,177.58$.
Insular depositaries.-Insular depositaries are maintained upon substantially the same basis as national-bank depositaries. During the fiscal year ended June 30, 1927, there were 10 such depositaries, located in the Canal Zone, Panama, the Philippine Islands, and Porto Rico. The total Government deposits on June 30, 192C, were $\$ 2,176,441.30$ and on June 30, 1927, $\$ 1,935,198.13$.

Foreign depositaries.-During the fiscal year 1927 the Treasury maintained depositaries of public moneys in foreign countries as follows: 2 in China, 3 in England, 3 in France, 1 in Haiti, and 1 in Italy, with deposits totaling $\$ 154,270.12$ on June 30 , 1926, and $\$ 511,607.43$ on June 30, 1927. The increased deposits during the year were due in a large measure to the increased activity of the Army and Navy in China.

The total of all Government deposits carried with the foregoing depositaries averaged $\$ 26,021,084.50$ during the fiscal year ended June 30, 1927, as against an average of $\$ 25,867,105.50$ for the fiscal - year 1926.

Special depositaries.-Special depositaries of public moneys are designated under the provisions of the act approved September 24, 1917, as amended and supplemented, and are authorized to participate in deposits of public moneys arising from such sales of bonds, notes, or Treasury certificates of indebtedness of the United States offered from time to time, as, under the terms of the official offering, may be paid for by credit. Any incorporated bank or trust company is eligible for designation as a special depositary. During the fiscal year ended June 30, 1927, 138 banks were designated and 392 lbanks were discontinued as special depositaries. At the close of the fiscal year 7,224 banks held designation as special depositaries, of which 3,728 were national banks and 3,496 State banks and trust companies. The deposits with special depositaries during the fiscal year 1927 averaged $\$ 210,613,253.50$, while such deposits during the preceding fiscal year averaged $\$ 196,103,338$.

## DIVISION OF APPOINTMENTS

## Employees of the Treasury Department

Number.-The departmental service of the Treasury Department in Washington shows a decrease in personnel of 662 employees from June 30, 1926, to August 31, 1927. There has been a tendency to decrease the personnel in the Treasury Department as a whole, nineteen of the offices showing a decrease, nine an increase, while two have remained the same. The largest reduction occurred in the Internal Revenue Bureau, where there was a decrease of 1,093 employees, but 844 of these employees were taken over by the Bureau of Prohibition when it became a separate bureau on April 1, 1927. The office of the Register of the Treasury had the second largest reduction with a decrease of 162 employees, which was largely due to the discontinuing of the arranging of coupons. An increase of 125 employees occurred in the Division of Loans and Currency, which was due to the extra work created by the purchasing and refunding of second and third Liberty loan bonds and the redemption of Treasury savings certificates. The General Supply Committee and the Public Health Bureau show decreases. A number of employees of these offices were taken over by the division of supply, for which specific appropriation was made for the year 1928. The division of printing became a part of the division of supply on July 1, 1927. The Office of the Superrising Architect shows an increase of 125 employees, which was due to the extensive building program authorized by Congress. On June $\mathfrak{:}: 0,1926$, there were in the departmental service of the Treasury 14,501 employees, and on August 31, 1927, there were 13,839. The number of employees in the departmental service of the Treasury classified according to bureaus and offices at the end of each month from June, 1926, to August, 1927, is shown in Table 84, page 660 of this report.

An increase of nearly 2,000 employees in the field service was due to an increase in the enlisted personnel of the Coast Guard, in connection with the enforcement of the national prohibition law. A comparison of the number of employees in the departmental and field services of the Treasury on June 30, 1926, and June 30, 1927, is contained in Table 82, page 658.

Retirement.-Since the retirement act went into effect on August 20, 1920, 2;452 persons have been retired from the departmental and field services of the Treasury Department. At the present time

124 persons above the retirement age are retained in the Treasury Department in Washington and 634 in its field service. Several classes of employees formerly retirable at 70 years of age have been placed in the class as retirable at. the age of 65 years by the Civil Service Commission, which accounts for the large number retained. There have been no changes in the retirement law during the year. The division is of the opinion that a more liberalized enactment would be in the interest of the service.

Table 83, page 659, shows the number of persons retired and the number retained in the departmental and field services of the Treas: ury under the provisions of the act of July 3, 1926, amending the act of May 22, 1920, and the amendments thereto.

## Section of surety bonds

On June 30, 1927, 57 insurance corporations held certificates of authority from the Secretary of the Treasury to write direct or reinsure bonds in favor of the United States as provided by existing law, and 28 other insurance companies reported to the department for reinsurance purposes only.

The combined premium income for these 85 companies reporting to the Treasury at the close of the year 1926 amounted to $\$ 1,049,173,097$. They claimed admitted assets of $\$ 1,882,704,299$ and showed combined reserves for liabilities of $\$ 1,441,494,195$, leaving as surplus to policyholders $\$ 441,210,104$, divided as to capital $\$ 170,306,500$ and surplus over all liabilities of $\$ 270,903,604$. The Treasury appraises the assets and liabilities of these companies twice a year for the information and guidance of all branches of the United States Government taking bonds with them as corporate sureties.
The companies holding certificates of autherity reported in their annual statements for the year 1926 approximately 6,000 claims in favor of the United States representing a total gross value of about $\$ 56,000,000$. Most of these claims are adjusted through amicable settlements, it being necessary to resort to litigation in comparatively few cases where the obligors feel that they have a good defense.
As a result of examinations by the department of the financial condition and affairs of the companies, some of them during the past year have reorganized and increased their finances so that they might continue business. In two cases it was necessary to revoke the certificate of authority issued by the Secretary of the Treasury, but the same were subsequently reinstated on condition that a satisfactory financial program would be carried out. This is now in process of completion in both cases.
There is a notable increase in the number of bonds that are now being taken by the various departments and establishments of the Government with individuals as sureties. Since the department has
no direct supervisory control over the resources of individuals and is therefore unable to follow their continuing solvency, it is believed that bonds with such individuals as sureties should not be accepted in large amounts, if at all. Suitable legislation along this line is necessary, however. When the original law was enacted in 1894, uncollectible judgments and claims against individual sureties amounted to $\$ 35,000,000$. Such a situation should certainly not be allowed to develop again.

In order to accomplish this and other desired results, however, it will be necessary to amend the existing law on the subject. In this connection the recommendations contained in the department's previous annual reports are reiterated. There is urgent need for higher standards of financial requirements of surety companies writing bonds in favor of the United States, adequate and satisfactory control of records pertaining to claims against them, and the number and character of obligations which they assume in favor of the United States, and uniform procedure with respect to the forms of bonds taken by the various departments and establishments of the Government. It is therefore hoped that a revision of the existing law so as to meet the requirements as they exist to-day will have the careful consideration of the Congress at its next session.

[^10]
## BUDGET AND IMPROVEMENT COMMITTEE

The budget and improvement committee is responsible, under the direction of the Undersecretary and budget officer, for the preparation and examination of Treasury estimates of appropriations and for the improvement of administrative methods and procedure within the Treasury Department. In addition to examining all estimates the committee makes inquiries as to the reserves which may be set up under the various appropriations and considers other matters affecting expenditures of the department. It makes inquiries along various lines with the purpose of improving methods and procedure, and from time to time, under special instructions, makes a detailed examination of some particular office or service of the department. Its reports and recommendations thereon are submitted to the Secretary of the Treasury through the budget officer of the department.

For the fiscal year 1929, heads of bureaus and offices submitted estimates aggregating $\$ 1,548,650,143.79$, which included $\$ 1,211,623,-$ 393.53 for interest on and retirement of the public debt, payable from ordinary receipts; $\$ 137,000,000$ for refunding internal revenue taxes illegally collected; $\$ 24,929,980$ for public buildings construction under the act of May 25, 1926; $\$ 8,000,000$ for purchase of a building for appraisers' stores, New York; $\$ 27,058,580$ for permanent and indefinite appropriations and special funds; and $\$ 140,038$,190.26 for annual appropriations. The President allocated to the Treasury Department as a tentative maximum amount for annual appropriations $\$ 135,406,276$, or $\$ 4,631,914.26$ less than the estimates submitted by heads of bureaus and offices. After careful examination by the committee and on its recommendations the Secretary made deductions of $\$ 278,793$ in the estimates for annual appropriations and approved $\$ 135,404,283.26$ as the regular estimates, and $\$ 4,355,114$ as a supplemental statement of the absolutely necessary requirements of the department under these appropriations.
During the year ending June 30, 1927, supplemental and deficiency estimates were submitted aggregating $\$ 227,124,964.64$, of which $\$ 175,-$ 000,000 was for refunds of internal revenue taxes. After examination by the committee these estimates were revised and reduced to \$227,023,410.94.

At the beginning of the fiscal year 1927, initial general reserves amounting to $\$ 1,047,525$ were set aside from appropriations for that year to meet extraordinary or emergency demands that might arise. Further reserves amounting to $\$ 1,309,009.60$ were added
on account of the " 2 per cent personnel club" for the purpose of saving not less than 2 per cent of the total amount available for salaries during the fiscal year 1927, such savings to be accomplished by omitting to fill current vacancies. This made a total in reserve of $\$ 2,356,534.60$. Subsequently additional reserves of $\$ 237,100$ were added and reserves amounting to $\$ 433,960$ were released, leaving $\$ 2,159,674.60$ in reserve at the close of the fiscal year. Whenever it was shown toward the close of the fiscal year that the 2 per cent saving could not be effected without serious impairment of the service, the reserve previously set up was released, in whole or in part. The department ended the year with a saving in expenditures for personal services of $\$ 1,812,797.43$, which was well in excess of the 2 per cent requirements, in addition to which there were substantial savings under other headings of expenditure.
For the fiscal year 1928, heads of bureaus and offices have reported reserves of $\$ 1,120,031$. After examination by the committee $\$ 290$, 554 was added, making a total for the year of $\$ 1,410,585$.

## COAST GUARD

The principal operations of the Coast Guard during the fiscal yearended June 30, 1927, were as follows:
Lives saved or persons rescued from peril ..... 3,313
Persons on board vessels assisted ..... 14, 496
Persons in distress cared for ..... 899
Vessels boarded and papers examined ..... 68, 223
Vessels seized or reported for violations of law ..... 1, 788
Fines and penalties incurred by vessels reported ..... \$375, 069
Regettas and marine parades patrolled ..... 39
Instances of lives saved and vessels assisted ..... 2, 791
Instances of miscellaneous assistance ..... 2, 717
Derelicts and other obstructions to navigation removed or de- stroyed ..... 136
Value of vessels assisted (including cargoes) ..... \$37, 801, 357
Value of derelicts recovered and delivered to owners ..... \$120, 290
Persons examined for certificates as lifeboat men ..... 4, 617
Appropriation for 1927, office of the commandant ..... $\$ 236,750.00$
Expended and obligated ..... $\$ 235,809.37$
Unencumbered balance June 30, 1927 ..... $\$ 940.63$
Appropriation for 1927, maintenance of Coast Guard ..... \$24, 050, 187. 00
Expended and obligated ..... $\$ 22,258,092.06$
Unencumbered balance $\$ 1,792,094.94$
Appropriation for 1927, repairs to cutters ..... $\$ 1,768,410.00$
Expended and obligated ..... $\$ 1,720,009.17$
Unencumbered balance ..... $\$ 48,400.83$
Appropriation for construction and equipment, Coast Guard
cutter 1925-March 31, 1927 :
Unencumbered balance June 30, 1926 ..... \$51, 851. 84
Expended and obligated ..... $\$ 15,521.71$

* Unencumbered balance Mar. 31, 1927 ..... $\$ 36,330.13$
Appropriation for construction and equipment, Coast Guard cutters, 1927 and 1928 ..... $\$ 1,000,000.00$
Expended and obligited ..... \$325, 852. 71
Unenčumbered balance June 30, 1927 ..... \$674, 147. 29
Appropriation for repair and reconditioning Coast Guardsteamer for ice breaker, 1926-27:
Unencumbered balance June 30, 1926 ..... $\$ 100,000.00$
Expended and obligated ..... \$86, 558.00
Unencumbered balance June 30, 1927 ..... \$13, 442. 00
Appropriation for additional vessels, Coast Guard, 1926-Dec.
31, 1926 :
Unencumbered balance June 30, 1926 ..... \$92, 257. 43
Expended and obligated ..... \$59, 018. 48
Unencumbered balance Dec. 31, 1926 ..... \$33, 238. 95

Comparisons with the operations of preceding years are important. The persons saved or rescued from positions of peril numbered 3,313 , being 276 in excess of the preceding fiscal year, 1926 , a record never before attained since the present organization of the Coast Guard. The total number of instances of assistance rendered during the year was 5,508 , also the largest in the history of the service, and exceeding last year's record by 677 . The value of vessels assisted, including their cargoes, was $\$ 37,801,357$, being $\$ 14,783,848$ in excess of last year's figures and largely surpassing the record of any one year since 1923. There were 14,496 persons on board vessels assisted as compared with 15,398 for the fiscal year 1926. There were 136 derelicts and other obstructions to navigation removed or destroyed, exceeding last year's number by 35. Persons in distress cared for numbered 899 as against 490 during the fiscal year 1926.

There were 1,788 vessels seized or reported for violations of law during the year, being 99 less than in the preceding year. In the interests of the enforcement of the laws of the United States 68,223 vessels were boarded and examined in the course of the year by the agencies of the Coast Guard. This exceeds last year's number by 15,143 . It is again gratifying to be able to record that the service operations against smuggling, heavy and onerous as the duty is, have in no way diminished, impaired, or disturbed the accustomed humanitarian work of the Coast Guard.

The foregoing summary does not include the hurricane and flood relief work afforded by the Coast Guard described in a subsequent paragraph.

## Protection to navigation

Ice patrol.-During the season of 1927 the international service of ice patrol was carried on by the Coast Guard cutters Tampa and Modoc, based on Halifax, Nova Scotia, with the Coast Guard cutter Mojave as the stand-by vessel. The patrol was inaugurated on March 22, 1927, on which date the Tampa sailed from Boston, Mass., on the duty. The Modoc left Boston in sufficient time to relieve the Tampa after the latter vessel had been on the patrol for 15 days. Thereafter these two cutters, alternatingly, carried on the patrol throughout the season, one of the cutters being on guard in the ice regions continuously. The total period the cutters were on duty was 95 days. There was slightly more ice during the spring of 1927 than occurs in a normal year. The weather generally was good. Both the Tampa and the Modoc on their first cruises experienced unusually fine weather, the opposite of last year, when during the entire first month of the season the patrol encountered a long, persistent rough spell.

About 450 steamships are known to have taken advantage of the service provided by the patrol during the season, and doubtless many more listened in for the daily broadcasts from the cutters of ice conditions.

A commissioned officer of the Coast Guard accompanied the cutters on their patrols throughout the season; as scientific and oceanographic observer, transferring from one cutter to the other as each took up its work.
The patrol was discontinued for the season on June 25, 1927.
Winter cruising.-In order better to safeguard shipping, the President annually designates certain Coast Guard vessels to perform special cruising upon the coast in the season of severe weather, usually from December 1 to March 31, to afford such aid to distressed navigators as their circumstances may require. On November 4, 1926, the President, upon the recommendation of the Secretary of the Treasury, designated the following-named cutters to perform this duty for the winter season of 1926-27: Ossipee, Tampa, Redwing, Mojave, Acushnet, Tuscarora, Seneca, Seminole, Gresham, Manning, Carrabasset, Modoc, and Yamacraw.

These cutters in the prosecution of their duties cruised nearly 66,000 miles, and afforded assistance to 39 vessels in distress, the value of which, including their cargoes, was more than six and onehalf million dollars. There were 435 persons on board the vessels assisted.

The Tampa and the Modoc were detached from this cruising duty on March 15 and 18, 1927, respectively, for assignment to the international ice patrol.

Removal of derelicts.-In the course of the year the vessels and stations of the service removed from the paths of marine commerce 136 derelicts and other floating dangers and obstructions to navigation. The estimated value of property involved, where values are given, amounted to $\$ 120,290$.
Anchorage and movements of vessels.-The utilization of Coast Guard personnel and equipment in the enforcement of the rules and regulations governing the anchorage and movements of vessels at the larger ports and at other places where Federal regulations are in effect was contin'ued throughout the year. There have been no material changes in the general plan and arrangement during the year. At the larger ports, especially, this duty is one of great importance to the maritime interests and others concerned.

Regattas.-The Coast Guard vessels and stations patrolled and supervised during the year 39 regattas, marine parades, and boat races, and, informally, a number of other events of like character of local interest.

## Flood and hurricane service

For many years the Coast Guard has taken an active part in rendering assistance and giving aid and succor upon occasions of storms and floods in various parts of the country. The service agencies have gone into the stricken areas and removed imprisoned dwellers to places of safety, rescued victims from extremely dangerous situations, furnished food and water to those threatened with famine, saved household goods, livestock, and other property from destruction, and rendered countless other services. Three notable instances of the kind occurred during the fiscal year 1927. First, the Florida hurricane in Soptember, 1926; second, the Illinois River Valley flood in October and November, 1926; and, third, the Mississippi Valley flood in the months of April, May, and June, 1927. The Coast Guard rendered important relief services in all three of these calamities, and the record of the work of the officers and men of the service on these occasions forms an intensely engaging chapter in the history of the Coast Guard. In the Mississippi Valley flood, particularly, the work was of immense magnitude, almost beyond human reckoning, and of the most heroic order. The Coast Guard threw into the flooded areas 674 officers and men and 128 vessels and boats, and removed from positions of peril to places of safety nearly 44,000 persons and saved from drowning more than 11,000 head of livestock. It would be almost impossible to enumerate all the items of service rendered by the Coast Guard personnel in this overwhelming disaster, or to estimate the value of the work accomplished. The entire personnel of the Coast Guard engaged in the relief work on the occasions named deserve the highest praise.

## Enfoncement of customs and other laws

The enforcement by the Coast Guard of the customs laws of the country and the laws relating to navigation and motor boats was attended during the year with satisfactory results. The general enforcement of the customs laws by the service is annually supplemented by the stationing of harbor cutters, or launches, at the principal ports to assist the customs authorities in boarding incoming vessels and in performing other customs duties. Assistance was also rendered, as needed, to other branches of the public service in the enforcement of the Federal laws.
The law-enforcement work of the service has continued to bring excellent results. The Coast Guard has entirely eliminated the once notorious rum row. The service continues to give unremitting attention toward preventing the reestablishment of that menace on our coastal waters, and to those foreign vessels that endeavor to transfer their cargoes of liquor, many miles at sea, into domestic craft or try
to enter our greater ports with their contraband cargoes, hoping to escape detection in the large volume of legitimate traffic. The fact that the Coast Guard must now search diligently to find the rumrunning vessels, a number being undoubtedly engaged in the traffic, necessitates extensive scouting operations over wide sea areas, which really occasions a greater burden and responsibility upon personnel and ships than was the case when rum row existed and the foreign liquor vessels anchored in groups near our shores.
Cruises in northern waters.-The regular annual patrol of the waters of the North Pacific Ocean, Bering Sea, and southeastern Alaska is for the protection of the fur seal and sea otter, and of the game, fisheries, and fur-bearing animals of Alaska. The patrol in progress at the close of last fiscal year was carried on for the season of 1926 by the Coast Guard cutters Algonquin, Bear, Haida, Snohomish, and Unalga. The veteran Bear made her accustomed trip to Arctic waters and visited Point Barrow. She returned to Oakland, Calif., on September 13, 1926, successfully completing her last journey to the northern country. The record of this notable 53 -year old craft, no longer suitable for the rigors of the northern service, is remarkably interesting. She is succeeded by the new cutter Northland. In the performance of their duties the vessels cruised more than 44,000 miles.

The patrol for the present season of 1927 is in progress and is being made by the Coast Guard cutters Algonquin, Haida, Unalga, Northland, and Snohomish.

Northern Pacific halibut fishery.-The Coast Guard cutters Unalga and Snohomish were assigned this year to the duty of patrolling certain waters off the coast of Washington and southeastern Alaska in the interest of the enforcement of the law with respect to halibut fishing. This work is performed by the Coast Guard in behalf of the Bureau of Fisheries, Department of Commerce. The Unalga was engaged on this patrol from November 10, 1926, to November 17, 1926, and cruised about 1,000 miles. The Snohomish, on February 14-16, and on February 23-24, 1927, cruised on the halibut banls.

## Communications

The communications service is concerned with the provision, construction, operation, and maintenance of all Coast Guard communication facilities of whatever nature, and with the instruction and training of the personnel connected therewith.
Telephones and cables.-The Coast Guard owns and operates a telephone line system consisting of 183 separate and distinct lines connected with commercial exchanges for local and long distance service. The total mileage of the lines is approximately 2,650 miles, including

480 miles of submarine cable. All Coast Guard stations and a number of other Government agencies are furnished service over these lines.

During the year additions were made to the coastal communication system by the construction of a telephone line to Poverty and St. Martins Islands, in Lake Michigan, thus connecting all the outlying islands at the end of the Wisconsin Peninsula, starting at Gills Rock, Wis., across Porte Des Morts Passage to Plum Island, thence across Detroit Island Passage to Washington Island, thence to Jackson's Harbor, Rock Island, St. Martins Island and Poverty Island. This project provides a telephone circuit for all the isolated lighthouses and important lookouts along the dangerous Detroit Island and Porte Des Morts passages, and is of great value to shipping usiug these passages.
The Manitou Island, Mich., line was completely rebuilt during the year, and the 14 miles of new submarine cable authorized by Congress for connecting the Manitou Islands with the mainland were laid in the early part of the year.

A cable was laid connecting the coastal telephone lines on Long Island, N. Y., with the mainland at Bay Shore, N. Y.

The hurricane which swept the coast of Florida in September, 1926, completely demolished the Biscayne Bay station line, the Fowey Rock Lighthouse line, the Fort Lauderdale station line, the Mosquito Lagoon line, and several other spur lines on the Florida Keys. These lines have been rebuilt and telephone service has been restored.

There is a pressing need of 16 miles of submarine cable to replace the old and greatly deteriorated cable between Cape Henry and Cape Charles, Va. Reference to this matter was made in last year's report. The condition of the present cable does not justify repairs. This cable is an important connecting link for communications north and south of Norfolk, Va.
Radio coordination representatives.-An officer of the Coast Guard continues to represent the entire Treasury Department on the interdepartmental radio advisory committee, which committee coordinates certain govermental radio activities and acts in an advisory capacity to the Secretary of Commerce. An officer of the Coast Guard also represents the Treasury Department on the interdepartmental electrical communications committee, which committee is advisory to the State Department on matters affecting electrical communications. During the year this latter committee was actively engaged in making preparations for the International Radiotelegraph Conference to be held in Washington in October, 1927, in preparing the proposals of the United States for revision of the Radiotelegraph Convention
signed in London in 1912, and in studying the proposals as submitted by other nations adhering to the convention.

Lieuts. E. M. Webster and R. J. Mauerman, United States Coast Guard, were appointed by the Secretary of State as technical advisors to the United States delegation at the forthcoming conference.

## Equipment

Floating equipment.-On June 30, 1927, there were in commission in the Coast Guard 17 cruising cutters, first class; 16 cruising cutters, second class; 25 Coast Guard destroyers; 37 harbor cutters and Jaunches; thirty-three 125 -foot patrol boats; thirteen 100 -foot patrol boats; one hundred ninety-eight 75 -foot patrol boats; 7 other patrol boats, viz, Cook, Cygan, Patrol, Smith, Swift, Tingard, and Vaughan; 73 cabin picket boats and 39 open picket boats. There were also in commission 16 small craft that have been seized and forfeited. The foregoing floating equipment, it should be stated, does not include the primarily life-saving boat equipment attached to Coast Guard cutters and stations.

The thirty-three 125 -foot patrol boats, and the cruising cutter Northland to replace the Bear, mentioned in last year's report as being under construction, were completed during the fiscal year.

The Congress by act approved June 10, 1926, authorized the construction and equipment of 10 Coast Guard cutters to be designed and equipped for Coast Guard duties, at a cost not to exceed $\$ 9,000$,000. In the second deficiency act, fiscal year 1926, approved July 3, 1926, the sum of $\$ 1,000,000$ was appropriated to commence the construction of three of these cutters. Subsequently funds were appropriated to complete the three cutters and to commence the construction of two more. The design plans and specifications for five of the cutters (Nos. 45-1,9) were completed and forwarded to prospective bidders. Bids for the construction of the hulls of these cutters and the installation of the machinery were received June 21, 1927. It is earnestly hoped that funds will be provided at the earliest possible date to the end that the entire program of 10 cutters authorized by Congress may be brought to completion. This is a matter of great importance to the service. The additional equipment is urgently needed for the general duties of the Coast Guard.

Three special 34 -foot shallow-draft cabin picket boats, from specifications prepared by the Coast Guard, were built for the service during the year by a private boat builder.

In addition to the work on vessels at the Coast Guard repair depot, detailed below, the Kickapoo was converted into an icebreaker, under contract with a private shipyard. The work of reconditioning the five 1,000 -ton destroyers, under the supervision of Coast Guard
personnel, at the navy yard at Philadelphia Pa., for Coast Guard duty, was completed early in the fiscal year.

Aviation.-During the year five modern seaplanes of the latest types in use by the Army and Navy were purchased under Navy inspection. Three are Loening amphibian planes and two are of the Voight UO type. An air station with three planes was placed in operation on Ten Pound Island, off Gloucester, Mass., and operated as an auxiliary of the Coast Guard patrol base at Gloucester. In addition to the law-enforcement work of that base, in which seaplanes were used in searching coastal sea areas in cooperation with Coast Guard destroyers and patrol craft, these planes have searched for missing vessels of New England fishing fleets and for lost transAtlantic aviators.

The naval appropriation act approved August 29, 1916 (39 Stat. 600 ), provided in part as follows:

*     *         * That for the purpose of saving life and property along the coasts of the United States and at sea contiguous thereto, and to assist in the national defense, the Secretary of the Treasury is authorized to establish, equip, and maintain aviation stations, not exceeding ten in number, at such points on the Atlantic and Pacific coasts, the Gulf of Mexico, and the Great Lakes as he may deem advisable, and to detail for aviation duty in connection therewith officers and enlisted men of the United States Coast Guard.

In accordance with this intent of Congress, the patrol aircraft have conducted experiments in the direction of life-saving operations, such as the method of carrying lines to distressed vessels by means of airplanes.

Operations were started during the year from another air station, at Cape May, N. J., utilizing existing facilities of the former naval air station at that place, now occupied by the Coast Guard.

Ordnance.-During the year considerable progress has been made toward increasing the efficiency of the ordnance equipment in the Coast Guard. The general condition of the guns of larger caliber has been materially improved by overhauls at navy yards and by renewing parts. The 3 -inch guns of the Ossipee and the Yamacrawo have been'replaced by newer ones. A standard fire-control system has been adopted and installed on all the destroyers and several of the cutters. It is hoped to complete this work during the fiscal year 1928. The plans for new cutters include improvements both in firecontrol system and in the magazines.
Landing-force equipment as uniform as may be obtained is being provided all service units. Defective and obsolete small arms are being replaced as rapidly as funds will permit. It has been necessary to dispose of a large quantity of small-arms ammunition, due to deterioration, and its replacement has been a serious drain on the appropriation.

An earnest effort has been made to improve the gunnery training of personnel. Excellent results are being attained in the Destroyer Force and, notwithstanding the difficulties involved, more cutters have held target practice this year. While the number of cutters firing is still not as great as is desired, it is anticipated that next year will show a marked increase. It is hoped that funds may be had for cash prizes for gun crews, fire-control parties, and shipcontrol parties, as it is believed that the payment of such prizes would greatly increase the interest in target practice and that a higher degree of gunnery efficiency would be attained thereby.
All the Coast Guard destroyers and several of the cutters conducted small-arms target practice.

In the furnishing of ordnance equipment, and in its maintenance, the assistance of the Bureau of Ordnance, Navy Department, has been invaluable. The Coast Guard appreciates this helpful cooperation.

Grateful acknowledgment is also made of the advice and assistance of the Division of Fleet Training, Office of Naval Operations, in the preparation of plans for target practice.

## The academy, stations, repair depot, etc.

Coast Guard Academy.--There were 47 cadets under instruction at the Coast Guard Academy, New London, Conn., at the close of the fiscal year. The resignations of 26 cadets were accepted during the year. On January 28, 1927, 22 cadets were graduated, and commissions were issued to them as ensigns in March, 1927, three months before the usual time, owing to the emergent need for additional commissioned personnel. As a result of the examination held in June, 1926, 54 cadets were appointed, and 1 cadet who had previously resigned was reappointed, making a total of 55 appointed during the year. Entrance examinations were held June 21, 1927, and it is expected that.appointments will issue to the successful competitors during August, 1927.

As stated in last year's report, the practice cruise for 1926 of the Alexander Hamilton was in progress at the close of the fiscal year 1926. The vessel visited Parris Island, S. C.; Hamilton, Bermuda; Halifax, Nova Scotia; Shelburne, Nova Scotia; Bar Harbor, Me.; Rockland, Me.; Portland, Me.; Boston, Mass.; Provincetown, Mass.; New Bedford, Mass.; Newport, R. I.; and New York, N. Y., arriving at the academy, New London, Conn., on the return voyage August 26, 1926.

The Alexander Hamilton entered upon the practice cruise for 1927, leaving the academy June 1, 1927. When only a few days out, however, she lost her propeller and had to be towed back to New London.

The Coast Guard cutter Mojave took up the cruise, leaving New London on June 25. The cruise was in progress at the close of the fiscal year.

The annúal reports for the fiscal years 1924,1925 , and 1926 pointed out the extremely unfavorable physical conditions prevailing at the academy with respect to the inadequacy, unsuitability, and dilapidation of the buildings on the grounds and expressed the hope that means might be found to remedy the situation. It is desired again to invite attention to the matter. It is important that something be done to correct these very unsatisfactory and discouraging conditions.

Stations and bases.-On June 30, 1927, there were 252 Coast Guard (life-saving) stations in an active status. There were 3 floating section bases (Colfax, Pickering, and Wayanda); 1 destroyer floating flag office (Argus) ; and 18 shore section bases, established for law-enforcement purposes. The service craft attached to these bases operate against smuggling activities.

Repairs, improvements, alterations, and additions, more or less extensive, were completed during the year at 33 Coast Guard stations and other shore units. 'Minor repairs were made to the buildings and accessories at 196 Coast Guard stations and 21 other shore units. Contracts were awarded, or work was begun, during the year in connection with construction projects at seven Coast Guard stations and one other shore unit.
Attention has been invited in former reports to the need of rebuilding, repairing, and improving existing Coast Guard stations and for constructing new stations the establishment of which has been authorized by law. It is necessary to rebuild some of the stations and to repair and improve others that have fallen into a state of dilapidation on account of age and usage. The moneys appropriated from year to year are not ample to meet the actual pressing requirements of modernization and sanitation of which many of the stations are sorely in need. The appeal can not be too strongly stated, and it is earnestly hoped that means may be found to correct these very unfavorable conditions.

Repair depot.-The following-named Coast Guard vessels were overhauled during the year at the Coast Guard repair depot at Curtis Bay, Md.: Gresham, Carrabasset, Manhattan, Manning, Kickapoo (outfitted), Seminole, Tuscarora, Apache, and Pequot. Repairs were also made to harbor cutters and launches of the service.

The boat-building shops at the depot constructed 57 standard boats for distribution to units of the service. The depot also constructed six surfboats for power for the Navy Department, ready to receive the engines which were to be installed by the Navy. The reconditioning of a number of 75 -foot patrol boats and the overhauling and repair of a number of 100 -foot patrol boats were also undertaken by the depot in the course of the year.

## Personnel

On June 30, 1927, there were on the active list of the Coast Guard 287 regular commissioned officers and 72 temporary commissioned officers, 47 cadets, 22 chief warrant officers, 388 regular warrant officers, 444 temporary warrant officers, 9,924 enlisted men, and 36 civilian employees in the field.

Recruiting.-The recruiting service of the Coast Guard on July 1,1926 , the beginning of the fiscal year, consisted of 9 main recruiting stations and 28 substations located at suitable strategic points in the East, South, and Middle West.
During the fiscal year 1927 there were 14,773 applicants for enlistment, of which number 3,507 were enlisted, the remainder being rejected for physical disability and other disabling causes. On December 1,1926 , due to the limited funds available for travel, recruiting at all stations was restricted to the enlistment of ex-service men only. On March 4, 1927, due to the fact that the funds for travel of recruits were practically exhausted, and the further fact that the second deficiency bill, carrying a provision for such funds for the Coast Guard for the remainder of the fiscal year, failed of passage, recruiting at all main stations and substations, except in four instances, was suspended. Recruiting at these four stations was continued, as the recruits upon enlistment could be transferred to Coast Guard units near-by without involving cost for travel.
On June 30, 1926, the enlisted personnel of the Coast Guard numbered 8,784 . At the close of the fiscal year 1927 there were 9,924 enlisted men in the service, an increase of 1,140 .

During the year all recruits without former service in the Coast Guard or Navy were trained at the Coast Guard receiving unit, New London, Conn., and in order that the recruits might become fully indoctrinated with service routine, methods, and processes, a destroyer was utilized as a training ship at that station with excellent results.
The introduction into the service of patrol boats propelled by Diesel engines necessitated the training of enlisted personnel in the operation and care of these engines. Through the courtesy of the Navy Department, 165 enlisted men were so trained during the year at the Navy submarine base, New London, Conn.

Also, while these engines were being assembled at the plant of the Winton Engine Co., Cleveland, Ohio, 48 enlisted men were instructed in their operation and care, making a total of 213 enlisted men who were trained for the duty during the year.

Welfare.-Every effort is being made, with the limited funds available, to provide healthful diversion for the enlisted men, as it is realized that the morale of the service depends in a large degree upon
adequate recreational facilities and opportunities to ameliorate, so far as possible, the hardships and privations to which the men are necessarily subjected.

The continued interest of the men in the training courses is gratifying, and the Coast Guard expresses its great appreciation of the courtesy of the training division of the Bureau of Navigation, Navy Department, for making the educational facilities of that department available to the service. All means for recreation and education that have been offered the men have met with hearty response and appreciation.

## Award of life-saving medals

Sixteen life-saving medals of honor, 5 gold and 11 silver, were awarded by the Secretary of the Treasury during the fiscal year, under the provisions of law, in recognition of bravery exhibited in the rescue of persons from drowning in waters over which the United States has jurisdiction, or upon an American vessel.

## COMPTROLLER OF THE CURRENCY

National banles organized, consolidated, insolvent, in voluntary liquidation, and in active operation

From the inauguration of the national banking system in 1863 to June 30, 1927, charters have been issued to 13,097 national banking associations, of which 7,844 are in active operation. By reason of liquidations, consolidations, and failures, $5,2 \check{2} 3$ associations have been terminated.

The capital of the banks in active operation on June 30, 1927, was $\$ 5,481,279,615$, an increase during the fiscal year of $\$ 61,192,210$. While charters were issued during the year to 145 associations, there was a net decrease of 194 in the number of banks-that is, from 8,038 to 7,844 -by reason of voluntary liquidations, receiverships, and consolidations.

Summaries of operations during the last year, relating to the number and capital of national banks organized, increases and reductions of capital, with number of national banks organized unđer various acts of Congress, and number closed for various reasons during the existence of the system, together with the number crganized, consolidated, failed, liquidated, and in existence in each State and geographical division, are shown in the statements following:

Organizations, capital stock changes, and liquidations of national banks during the fiscal year ended June 30, 192\%

|  | Number of brnks | Capital | Total |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\begin{aligned} & \text { Num- } \\ & \text { ber } \\ & \text { of } \\ & \text { banks } \end{aligned}$ | Capital |
| Charters granted. | 145 | \$47, 430, 000 |  |  |
| Increases of capital (214 banks 1) |  | 69, 196, 210 |  |  |
| Restorations to solvency ......... | 3 | 150,000 |  |  |
| Voluntary liquidations | 175 | 42, 515, 000 |  |  |
| Receiverships ${ }^{2}-\ldots$. | 142 | 8,002,000 |  |  |
|  |  | 1,330, 000 |  |  |
| Closed under consolidation act of Nov. 7, 1918, and amount of capital decreasc incident thereto | 29 | 4,337,000 |  |  |
|  |  |  | ${ }^{2} 346$ | ${ }^{2} 56,184,000$ |

## Condition of national banks

The aggregate resources of 7,796 reporting national banks in the continental United States, Alaska, and Hawaii, June 30, 1927, amounted to $\$ 26,581,943,000$, as compared with resources of 7,978 reporting national banks in the sum of $\$ 25,315,624,000$ on June 30, 1926. The increase in resources for the year amounted to \$1,266,319,000.

Loans and discounts, including rediscounts, were $\$ 13,955,696,000$ on June 30, 1927, an increase of $\$ 538,022,000$ over June 30, 1926.

United States Government securities owned totaled $\$ 2,596,178,000$, which is an increase of $\$ 126,910,000$ in the year. Other miscellaneous bonds and securities amounted to $\$ 3,797,040,000$ and show an increase of $\$ 424,055,000$ since June, 1926.
Amounts due reporting banks from other banks and bankers, including lawful reserve with Federal reserve banks, aggregated $\$ 3,374,002,000$ and were $\$ 9,983,000$ more than in June of last year. Cash in banks, $\$ 364,204,000$, shows an increase of $\$ 4,253,000$ in the year.

Capital stock paid in was $\$ 1,47 \dot{4}, 173,000$ and shows an increase of $\$ 61,301,000$ since June 30, 1926. Surplus and undivided profits were $\$ 1,765,366,000$, as compared with $\$ 1,676,486,000$ a year ago.

Circulating notes outstanding of $\$ 650,946,000$ show a decrease of $\$ 209,000$ in the 12 -month period.

Balances on the books of reporting banks due to correspondent banks and bankers, including certified checks and cashiers' checks outstanding, aggregated $\$ 3,395,927 ; 000$, which is a decrease in the year of $\$ 9,321,000$.

Total deposits amounted to $\$ 21,775,123,000$ and were greater by $\$ 1,132,959,000$ than in June of 1926. The total deposits include United States funds of $\$ 139,843,000$, other demand deposits of $\$ 10,923,729,000$, and individual time deposits, including postal savings, in the sum of $\$ 7,315,624,000$. Total individual deposits, time and demand, were $\$ 18,239,353,000$ and show an increase of $\$ 1,146$,941,000 over June 30, 1926.

Borrowed money amounted to $\$ 368,042,000$, which is a decrease of $\$ 53,914,000$ in the year. The liability for borrowed money was represented by bills payable and rediscounts of $\$ 248,018,000$ and $\$ 120$,024,000, respectively.
The percentage of loans and discounts to total deposits was 64.09 on June 30, 1927, in comparison with 65 on June 30, 1926.

The resources and liabilities of national banks at the date of each report since June 30, 1926, are shown in the following statement:

Banks other than national
The aggregate resources of 19,265 reporting banks other than national in the various States, Alaska, and the insular possessions on June 30 , 1927, were $\$ 41,550,615,000$, and exceeded by $\$ 1,972,877,000$ the resources of 20,168 associations on June 30, 1926.

Loans and discounts of $\$ 23,314,682,000$ were $\$ 731,326,000$ greater than in the year previous; investments in United States and other miscellaneous bonds and securities of $\$ 10,861,875,000$ showed an increase of $\$ 888,987,000$; banking house, furniture and fixtures, $\$ 899$,887,000 , were greater by $\$ 39,679,000$; and other real estate owned, $\$ 283,656,000$, was $\$ 40,608,000$ in excess of this item a year ago.

Amounts due from correspondent banks and bankers, including lawful reserve with Federal reserve banks and other reserve agents, amounted to $\$ 3,526,400,000$ as compared with $\$ 3,405,042,000$ a year ago. Checks and other cash items of $\$ 869,936,000$ were greater by $\$ 110,322,000$, while exchanges for clearing house showed a decrease of $\$ 39,320,000$. Cash on hand was increased from $\$ 636,569,000$ to \$643,692,000.

All liability items reported by banks other than national as of June 30,1927 , showed increases over the returns of this class of banks for June 30,1926 , save bills payable and notes and bills rediscounted, which were decreased in the year $\$ 32,990,000$ and $\$ 6,730,000$, respectively.

Capital stock paid in aggregated $\$ 1,902,325,000$; surplus, $\$ 2,507$, 582.000 ; and undivided profits, $\$ 622,785,000$.

Individual deposits, including dividends unpaid and postal savings, were $\$ 32,893,201,000$, an increase of $\$ 1,103,317,000$; certified checks and cashiers' checks outstanding, $\$ 580,953,000$, were greater by $\$ 431,096,000$; and United States deposits were $\$ 54,181,000$, or $\$ 10,858,000$ more than on June 30 of the preceding year.

Bills payable and notes and bills rediscounted in the current year aggregated $\$ 353,363,000$ and $\$ 108,103,000$, respectively,

Comparison of the resources and liabilities of these banks for the years ended June 30, 1926 and 1927, is shown in the following statement:

## All reporting barks

[National, State (commercial), savings, and private banks, and loan and trust companies]

On June 30, 1927, there were 7,796 reporting national banks and 19,265 reporting banks other than national, a total of 27,061 associations, the combined recurns of which showed resources aggregating $\$ 68,132,558,000$, and exceeded by $\$ 3,239,196,000$ the resources of all reporting banks on June 30, 1926.

Loans and discounts, including rediscounts, amounted to $\$ 37,270$,378,000 , in comparison with $\$ 36,233,490,000$ on June 30,1926 , an increase of $\$ 1,036,888,000$. The current figure also did not include customers' liability on account of acceptances executed and outstanding, $\$ 253,131,000$, reported separately by national banks, while a similar item in the sum of $\$ 232,460,000$ was included with loans and discounts of all reporting banks on June 30,1926 . Overdrafts showed a reduction of $\$ 6,020,000$. Investments in United States and other miscellaneous bonds and securities totaled $\$ 17,255,093,000$, and exceeded by $\$ 1,439,952,000$ the amount reported a year ago. Banking houses, furniture and fixtures, and other real estate owned were valued at $\$ 1,979,578,000$, and showed an increase of $\$ 127,611,000$ in the year.

Balances due from correspondent banks and bankers, including lawful reserve with Federal reserve banks, totaled $\$ 6,900,402,000$, an increase of $\$ 131,341,000$; checks and other cash items, including exchanges for clearing house, $\$ 2,181,167,000$, were greater by $\$ 143,-$ 606,000 , and cash on hand, $\$ 1,007,896,000$, was $\$ 11,376,000$ more than on June 30, 1926.

The paid-in capital stock aggregated $\$ 3,376,498,000$, and showed an increase of $\$ 103,195,000$; surplus of $\$ 3,764,527,000$, exceeded the amount a year ago by $\$ 292,559,000$, and undivided profits of $\$ 1,131$,206,000 increased in the sum of $\$ 68,035,000$.

Total deposit liabilities were $\$ 56,735,858,000$, or $\$ 2,679,481,000$ greater than the year previous. With the exception of amounts due to other banks and bankers, which declined $\$ 41,268,000$, each of the other deposit items showed increases as follows: Individual deposits, including unpaid dividends and postal savings, $\$ 2,250,258,000$; certified checks and cashiers' checks outstanding, $\$ 464,294,000$; and United States deposits, $\$ 6,197,000$.

Obligations for money borrowed, $\$ 829,508,000$, represented by bills payable of $\$ 601,381,000$, and rediscounts of $\$ 228,127,000$ were less by $\$ 194,286,000$ than the amount reported a year ago.

The following tables show a comparison of the resources and liabilities of all reporting banks for the year ended June 30, 1926 and 1927, and similar items on June 30, of each year from 1921 to 1927, inclusive :

## CUSTOMS SERVICE

## Volume of business

The comparative statement of entries of merchandise for the fiscal years 1926 and 1927 printed below shows that the increase in business reported last year continued during the fiscal year 1927:

| Class of entries |  | Number of entries, |
| :--- | :--- | ---: | ---: |
| fiscal year- |  |  |

## Receipts

The receipts exceeded all past records, amounting to $\$ 25,955,855$ more than those for the previous record year of 1926. A total of $\$ 605,672,465$ was collected in customs duties and covered into the Treasury during the fiscal year 1927, compared with $\$ 579,716,610$ during the fiscal year 1926.

The increase in the net proceeds realized from the customs collections for the year is even greater than indicated by the total amounts collected, due to a reduction in customs refunds. The total refunds dropped from $\$ 27,811,261$ in 1926 to $\$ 20,285,317$ in 1927. Comparative figures, showing in detail the total collections, refunds, and net receipts from all sources for the fiscal years 1926 and 1927, are listed in the following table:

Fiscal year 1926
Collections:
Duties
$\$ 579,716,610$

Fiscal year 1927
Collections:

Miscellaneous-

Refunds:

20, 285, 317
Net customs receipts from all sources
586, 981, 016
Mention should be made of the fact that the proceeds from the sales of unclaimed and abandoned merchandise and seizures do not represent the total received from such sales and deposited in the Treasury. It is the practice to deposit from the proceeds of these sales as "duties" amounts equal to the duties accruing on the merchandise. The amounts in the above table, therefore, represent only the balances remaining from the proceeds of sales after deduction of the accrued duties.

The legislation prescribing the procedure to be followed in connection with the audit by the General Accounting Office of customs accounts, referred to in the last Annual Report as pending in the Congress, failed of passage, as did also a substitute bill. Through conferences between representatives of the Comptroller General and the department, however, an understanding was reached for the making of audits of customs accounts in the field by the General Accounting Office. Accordingly, auditors from the General Accounting Office during the fiscal year traveled to all the ports in the United States, and periodically examined the accounts of collectors of customs. The differences and disallowances resulting from these field audits were negligible, and such as were reported had in practically every instance been developed by the audit at the seat of government from papers submitted to the General Accounting Office with the collectors' accounts in support of expenditures from annual appropriations. It is gratifying to have the thoroughness and efficiency of the department's administrative examination of customs transactions through the comptrollers of customs thus confirmed.

## Enforcement activities

During the year several seizurès and recoveries involving large sums of money were effected. In one case there was collected a forfeiture value amounting to $\$ 11,200$, and a personal penalty of 100 per cent on certain diamond rings and other jewelry which a passenger attempted to conceal on landing at New York. In another case a member of the crew of a vessel was apprehended in an effort to smuggle cut diamonds appraised at $\$ 102,285$. The diamonds were sold at auction by the United States marshal for $\$ 75,811.25$, which included duty of $\$ 15,736.20$. The offender was sentenced to a year and a day in the penitentiary at Atlanta. Four hundred and forty-one wrist-watch movements, appraised at $\$ 2,386$, were seized from a member of the crew of another vessel, who pleaded guilty to a charge of smuggling and was sentenced by the United States district court to four months' imprisonment.

Large seizures of liquors were made by customs officers at the seacoast ports, as well as by the customs patrols along the international borders. Patrol officers using automobiles covered in their operations a distance of $2,351,577$ miles, at a cost for maintenance and operation of $\$ 0.05$ per mile. The automobile patrols made 1,293 seizures during the year, the liquors of which were valued at $\$ 259,-$ 967, other commodities and the vehicles used in transporting the liquors at $\$ 664,220$, and in connection with which fines amounting to $\$ 34,395$ were imposed.

The table below shows in detail the number of seizures and the appraised values thereof, classified by certain groups of commodities, for the fiscal year ended June 30, 1927, and similar information for the period from January 1 to June 30, 1926. Similar statistics were not compiled prior to January 1, 1926, so that comparative figures for the previous fiscal year are available for only a six-month period:

| Class of commodities | Jan. 1 to June 30,1926. |  | July 1, 1926, to June 30, 1927 |  |

## Expenditures and statistics

Other statistics concerning the volume of customs transactions in the various districts, values of imports and exports, the cost of coflection, collections made, etc., are published in Table 17, p. 490 of this report. It is interesting to note that, notwithstanding the increase of $\$ 25,000,000$ in collections, the total cost of maintenance and operation of the service exceeded that of last year by only $\$ 318,000$, amounting to $\$ 16,964,000$ in 1926 , and $\$ 17,282,000$ in 1927. The proportionate cost of collection per dollar was reduced from $\$ 0.0292$ to $\$ 0.0285$.

With the slight increase in the total expenditures, the Customs Service not only cared for the additional work reflected in the increased receipts, but cared for extraordinary activities at the port of Philadelphia, Pa., due to the Sesquicentennial International Exposition held in that city during the fiscal year. While the duties collected on merchandise sold by exhibitors at the exposition amounted to only approximately $\$ 300,000$, it was necessary to examine merchandise and wares assembled from all the markets of the world, so varied in character that their classification covered almostthe entire range of the tariff act. Every article was checked againsto the exhibitor's invoice, marked for identification purposes, appraised and classified. Experienced appraising officers and liquidators were detailed from other ports to assist the regular force at the port of Philadelphia, which was also augmented by temporary employees in subordinate positions. The detail of experienced officers greatly expedited the customs work at the exposition and resulted in a saving to the Government, as is evidenced by the fact that a special appropriation for the customs work at the exposition was not necessary, although such appropriations were made to care for the customs work in connection with similar expositions in the past.

## Undervaluations

Rugs.-The values at which imported rugs were entered, while maintaining a certain uniformity of invoice prices, nevertheless raised serious doubt of appraising officers at New York as to whether the correct dutiable value was indicated. Domestic manufacturers also complained that they could not compete with the prices at which the imported rugs were sold and intimated that the merchandise was undervalued, although they were unable to submit substantiating. evidence. An investigation to determine the correct basis for appraisement was accordingly instituted. The uniformity of price: in the consular invoices, it was developed, was due to an understanding or agreement in the foreign market to control the invoice values; with the intent to deceive the appraiser and deprive the United States
of a portion of its lawful revenue. The investigation resulted in an increase of approximately 60 per cent in the entered values of the quality of rugs which represent the bulk of importations from Smyrna and Greece, and at considerably higher prices for other qualities.

In order to meet market value, importers increased by $\$ 800,000$ the value on their rugs entered at New York during the last seven months of the fiscal year. This increase, at 55 per cent duty, produced a revenue of $\$ 440,000$. Rugs are heavily imported at other ports and it is believed that the total amount of increased revenue as a result of this investigation is not less than a million dollars. It is believed further that the recoveries on account of importations made prior to the beginning of the investigation will approximate a half million dollars.

Leather gloves.-A similar inquiry was made into market values of leather gloves, which resulted in advances by importers of from 8 to 15 per cent in their invoice values. At New York, since the investigation was undertaken, the importers' increases of entered values amounted to $\$ 80,000$. In addition, several payments approximating $\$ 16,000$ have been collected through the special agency service.

French perfumery.-Early in the fiscal year 1927 appraising officers at-New York became convinced that the entered values of French perfumery did not represent actual market value, in view of the continued depreciation of the franc, and investigations abroar confirmed this opinion. Subsequent importations were returned by the appraiser at a value increased from 100 to 150 per cent. The increased values amounted, in the case of a single importer, to over $\$ 180,000$, on which amount the duty and internal revenue tax will approximate 100 per cent. In addition, the amount collectible under section 489 of the tariff act of 1922 will amount to about $\$ 400,000$.

Other commodities.-Other investigations concerning the market values resulted in a saving of approximately $\$ 100,000$ in connection with importations of Madeira embroideries. Advances were made in the values of tie silks of from 15 to 60 per cent, the total advances amounting to $\$ 200,000$; bismuth metal, $71 / 2$ per cent; carbonic-acid gas capsules, 50 per cent; whiting, 10 per cent; artists' colors from Holland, 30 per cent; and from Germany, 20 per cent.

Classification of wool.-The Supreme Court of the United States rendered an important decision concerning the classification of wool, sustaining the Government's contention that long and short staple wool (combing and carding) both were commonly used and known as "clothing wool." The importers contended that the "clothing wool" was the short-staple wool, and that the long-staple wool was provided for as " wool of the sheep" under the free paragraph. The classification of wool had been in litigation since 1921, and the per-
sistent efforts of the Government resulted in the saving of millions of revenue not only in the duties on raw wool but also on importations of manufactures of such wool.

## Chemical laboratory

The customs laboratory at the port of New York in connection with its varied activities accomplished three outstanding results of unusual interest because of their character and economic importance.

A publication consisting of 200 pages, representing almost five years of work in establishing coal-tar dye standards and determining the appraisement basis of every coal-tar dyestuff imported during that time, has been compiled and is ready for issue. It contains the names of about 1,100 standards that have been established by the Secretary of the Treasury, with the other names under which each standard is known, and an alphabetical index of approximately 3,100 different names (standardized and others) under which dyestuffs have been imported since 1922 , together with their competitive or noncompetitive status at the present time.

The conclusion of a difficult and lengthy investigation to determine the presence of foreign aromatic substances in bergamot oil resulted in establishing the presence of ethyl laurate, an aromatic chemical, in a number of large importations. The amount of duty involved and the ethical aspects of the situation commanded much publicity in this country and abroad.

Through extensive research work in the laboratory, it was discovered that pure acenaphthene had been added to many large shipments of refined naphthalene, with a solidifying point of more than $79^{\circ} \mathrm{C}$., in order to reduce its solidifying point to below $79^{\circ} \mathrm{C}$. in an attempt to secure free entry of a dutiable article.

## Trade routes

There has been a decided increase in importations from Europe through Canada via the St. Lawrence Waterway and the ports of Montreal, Quebec, and St. John. At the port of Chicago heretofore the major part of the importations arrived via the port of New York, and that port still holds the lead in number of importations, but when measured by tonnage the importations received through Canadian ports exceed those received via New York. It is claimed that importers have found the new artery of transportation as fast and more economical than the old route. The dock charges and brokerage fees assessed at New York are practically eliminated at the Canadian ports, and the methods of handling cargoes at these ports for transportation to destination with a minimum of customs formalities, both Canadian and United States, should be given serious
consideration in connection with the study and improvement of the present system of transporting merchandise in customs custody in bond. On two cargoes of cast-iron water pipe imported direct from Brest, France, for the city of Des Moines, it is said that over $\$ 25,000$ was saved in freight and handling charges.

There is also a gradual increase in the number of foreign vessels trading at Chicago-British (Canadian) and Norwegian. During the year $6,740,328$ bushels of wheat and $1,908,191$ bushels of corn were exported by vessel from Chicago, of which $5,648,898$ bushels of wheat and $1,190,906$ bushels of corn were exported in foreign vessels.

The increase in the use of Canadian ports by tourists returning from Europe is also quite noticeable, particularly at the ports along the eastern frontier where the increase in the number of tourists and baggage from Europe arriving by automobile from Canadian seaports is proportionately greater than the increase in the general automobile traffic.
In conjunction with the Bureau of Immigration a system for the collection of head tax and the accounting for such head tax by collectors of customs along the northern border was worked out during the year and placed in operation. Head tax was heretofore collected and accounted for through collectors of customs along the southern border and at all seacoast ports. With the extension of this cooperative procedure in the collection of head tax on the northern border, all such collections are now handled through the Customs Service.

## Air ports

The rapid development of foreign air commerce, with an early promise of further expansion in the transportation of freight and passengers, indicates the necessity of new regulations to clarify the situation. Under section 58 of the Air Commerce Regulations the laws of the United States and regulations made thereunder with respect to the entry and clearance of vessels engaged in foreign commerce are made applicable to aircraft engaged in foreign commerce. It is impracticable in many instances for aircraft arriving from contiguous foreign territory to report at the customhouse nearest to the place where the aircraft crosses the boundary line, as is required by existing regulations. Many cities adjacent to contiguous foreign territory have established, or are about to establish, municipal air ports. A survey and study of the situation with a view to designating convenient places having suitable landing fields as air ports, under the provisions of section 7 of the air commerce act of 1926, will probably be found desirable in the very near future.

## Special agency activities

In accordance with the provisions of the act of March 3, 1927, the special agency service was reorganized as a division of the Bureau of Customs, the offices of director and assistant director being abolished, and the duties formerly devolving upon those officers being now performed by a Deputy Commissioner of Customs, assisted by a staff of eight. All the accounting work formerly done in this divísion is now performed in the finance division, Bureau of Customs, resulting in a reduction of expenses. The number of field districts was reduced from 17 to 9 , each being under the immediate control of a supervising agent, with enlarged powers, who is required to visit every suboffice in his district at least once every 90 days. These changes result in simplified procedure, elimination of duplication of work, more intensive supervision, economy of administration, and more efficient methods and better results.

Examination of the books, records, and accounts of collectors and other officers of customs, for the information of the Commissioner of Customs and the Secretary of the Treasury, was continued systematically by the special agency service. This work is not confined to a mere check of the financial transactions, but comprises also a survey of the administration, organization, personnel, operations, and efficiency of the customs force in each port and district, and as a result of the reports of the agents engaged on this class of work administrative officers of the Treasury Department and Customs Bureau in Washington are able more effectively to supervise and harmonize the functioning of the Customs Service.

The financial portion of the appended tabular statement sets forth the results of the activities of the special agency service so far as they can be reduced to dollars and cents, and represents the salvage of revenue lost to the Government in the regular routine of customs administration, through fraud or other irregularities. It should be borne in mind that this record of tangible accomplishments does not include the increased duties collected in connection with investigations which have cleaned up bad situations and brought about the entry of merchandise at its proper value. The customs revenue suffers the greatest loss through the undervaluation of merchandise, and this class of fraud originates abroad in connection with the preparation of the consular invoices used in the entry of merchandise upon its arrival in the United States. The department, through the Division of Special Agents of the Customs Service, has continued diligently to make inquiries abroad in the ascertainment and verification of market values for the purpose of checking up invoiced and entered values, this information also being of value in connection with the "dumping" of merchandise (i. e., sale at less than its fair value). A dishonest shipper who defrauds the customs revenue by under-

$$
64761-\text { FI 1927-14 }
$$

stating the value of his merchandise obtains an advantage over the honest competitor in his own country, and a dishonest importer who knowingly makes false declarations as to value at the time of entry acquires an advantageous position through his saving of duty whereby he is able to drive out of business the honest importer of the same class of merchandise. The prevention and detection of this class of fraud is clearly the paramount duty of the Customs Service, and a substantial proportion of the force of employees in the special agency service is engaged in this class of work at home and abroad.

The Treasury Department has maintained customs representatives abroad for more than 40 years for the purpose of securing necessary information, as provided by law, and these officers have performed their difficult and delicate duties in this field with commendable tact and success, their reports being of value to appraising officers and to customs agents engaged in domestic investigations, and also being presented as evidence in reappraisement hearings before the customs court. Incident to the visit of the commissioner to the international customs conference, Geneva, Switzerland, in June, 1927, a survey was made by him of the European staff of the special agency service, resulting in the augmentation of the force and the bringing of the business of the offices up to current investigations.

The detail of a customs attache to the foreign-service school of the Department of State for the instruction of newly appointed consular officers in customs law and invoice requirements, mentioned in the report for 1925, has continued. The result of this instruction. has been a measurable improvement of invoicing, and while the saving effected and additional revenue collected due to this arrangement can not be accurately estimated and stated, the aggregate amount has not been inconsiderable. The Department of State and consular officers have been cordially cooperating with the Treasury Department in this work.

The actual cash recoveries set forth in the tabulation herewith take no account of vastly increased sums collected on subsequent importations of similar merchandise, and likewise do not reflect the deterrent influence on unscrupulous importers resulting from the operations of this branch of the Customs Service.
During the fiscal year the Customs Information Exchange continued to function as the clearing house for information respecting market values and classifications for the entire Customs Service. In this capacity the following work was done:

[^13]Drawback investigations have been broadened in their scope to include not only processes of manufacture and the sufficiency of manufacturing records, but also the verification of kinds and quantities of material, whether or not actually manufactured, and whether, or not really used in the actual exported product. Furthermore, reinvestigations have been instituted to bring up to date all drawback authorizations heretofore issued, to revoke and discontinue those not being used, and to revoke any which are found to be used improperly. More intensive supervision and investigation of all doubtful claims has been assigned to specially qualified agents of long experience.

Experience has demonstrated that it is desirable to have all smuggling conspiracies, including liquor smuggling, investigated by trained customs officers rather than to treat liquor cases separately. Arrangements accordingly were made during the last month of the fiscal year to organize in each special agency district a group of picked men to handle liquor smuggling conspiracies. These groups are being assembled and assigned to duty as rapidly as available funds and other conditions will permit.
A new special agency district, comprising territory in the Dominion of Canada east of the eighty-ninth meridian of longitude, with headquarters at Montreal, was instituted May 1, under a supervising agent, the need for this being recognized as urgent.

The statistical summary of special agency activities follows:

| Number of ports examined. | 37 |
| :---: | :---: |
| Number of drawback investigations. | 978 |
| Number of foreign investigations. | 2,116 |
| Number of arrests | 715 |
| Number of convictions | 378 |
| Number of acquittals | 98 |
| Failures to indict | 86 |
| Indictment cases pending. | 325 |
| Number of seizures made | 1, 017 |
|  | 536 |
|  | 27 |
| Appraised value of seized merchandise | \$1, 104, 416. 98 |
| Proceeds of sale of seized merchandise | 125, 475.77 |
| Merchandise entered free but found dutiable | 112, 861.93 |
|  | 406, 134. 50 |
| Fines, penalties, and forfeitures incurred, exclusive of court fines_ | 216, 184. 63 |
| Bail forfeited | 41, 750.00 |
| Amount of increased and additional duties collected | 683,502. 70 |
| Amount deposited in offers of compromise. | 994, 225.40 |

## DISBURSING CLERK

The following is a summary of the work performed by the office of the disbursing clerk during the fiscal year ended June 30, 1927 :

The cash payments and the checks for salaries, expenses, supplies, etc., cover disbursements for all bureaus and divisions of the Treasury Department in the District of Columbia (except the Bureau of Engraving and Printing), and a large portion of the salaries and expenses outside the District of Columbia under the Public Health Service, the Supervising Architect's office, the Bureau of Internal Revenue, the Bureau of Prohibition, the Federal Farm Loan Board, the Comptroller of the Currency, the Coast Guard, the Secret Service, the Bureau of Customs, and the Public Debt Service (Division of Loans and Currency).
Collections represent moneys received and accounted for on account of rents of buildings and sites, sales of public property, etc., under various bureaus and offices of the department.

During the year the Comptroller General adopted the procedure of sending to the disbursing clerk for payment by check, after audit by the General Accounting Office, claims and demands by common carriers covering all classes of service-passenger, Pullman, freight, and express. Theretofore these claims had been allowed and paid by certificate settlement and warrant.

## BUREAU OF ENGRAVING AND PRINTING

During the fiscal year ended June 30, 1927, the bureau printed and delivered greater quantities of work than ever before in its history. Deliveries for the year reached a total of $490,264,868$ sheets as compared with the deliveries for the previous year of $482,307,106$ sheets, an increase over the preceding year of $7,957,762$ sheets, or 1.65 per cent. This net increase is accounted for by an increase of $22,397,061$ sheets of currency, bonds, notes, certificates, and miscellaneous work, and a decrease of $14,439,299$ sheets of stamps.

The average number of persons employed in 1927 was 5,097 , as compared with 5,173 in 1926, a decrease of 76 persons, or 1.47 per cent.

There was expended during 1927 a total of $\$ 10,415,742.42$, as compared with $\$ 10,483,647.68$ in 1926 , a decrease of $\$ 67,932.26$, or 0.65 per cent.

An analysis of the preceding paragraphs will disclose that while the sheets delivered for 1927 represent an increase over 1926 of 1.65 per cent, the expenditures were decreased 0.65 per cent, and the personnel was decreased 1.47 per cent.

The bureau had a balance on June 30,1927 , of $27,913,317$ sheets of currency backs, and $20,945,385$ sheets of currency backs and faces, aggregating $48,858,702$ sheets, as compared with $34,102,815$ sheets of backs, and $15,328,655$ sheets of backs and faces, aggregating 49;431,470 sheets on June 30, 1926, a net decrease of 572,768 sheets. This decrease is accounted for by a decrease of $6,189,498$ sheets of backs and an increase of $5,616,730$ sheets of backs and faces.

A new low record for spoilage was established when the level of 1.96 per cent for all classes of currency was reached. The total spoilage for the fiscal year 1926 was 3.7 per cent, or a decrease in 1927 under 1926 of 1.74 per cent. The spoilage for 1927 was less than that for any previous year for which records are available. The following is a statement of the percentage of spoilage since 1917:

| Year | Percentage | Year | Percentage |
| :---: | :---: | :---: | :---: |
| 1917 | 3.81 | 1923 | 7.11 |
| 1918 | 4.63 | 1924 | 12. 69 |
| 1919 | 6.48 | 1925 | 5.80 |
| 1920 | 5.44 | 1926 | 3. 70 |
| 1921 | 7.39 | 1927 | 1.96 |
| 1922 | 6.63 |  |  |

The reduction in the amount of spoilage during the past two years has been accomplished by the salvaging of parts of sheets in the numbering division, a change in the examination of sheets of currency
backs in the examining division, and adequate seasoning of the paper prior to the various operations through which it passes.

The audit committee of the Division of Public Debt Accounts and Audit of the Public Debt Service has continued its periodical count of securities in process. During the past year the committee conducted approximately 100 audits, and has checked every class and denomination of securities printed in this bureau as well as proof impressions made in the engraving division.

The planning unit, headed by an investigator detailed from the Bureau of Efficiency, has, as a result of its constructive study of methods and procedure, submitted many valuable recommendations and suggestions, which were adopted and put into operation.

The installation of the rotary presses having been completed on June 30, 1926, all postage stamps of the denomination of 10 cents and under were printed by this method during the year. This change reduced the cost of the production of stamps and resulted in a saving to the Post Office Department of approximately $\$ 210,000$ for the year.

The overprinting in the surface-printing division of national-bank currency in one operation and the elimination of the Treasury serial number was completed and in full operation during the fiscal year 1927. This change reduced the cost of production of national-bank currency by $\$ 45,000$.

Reference was made in the annual report for the fiscal year 1926 to the fact that the examination of silver certificates and United States notes, following the trimming operation had been discontinued. The discontinuance of this examination was extended during this year to other denominations of these classes of currency, and also to gold certificates, and has effected a saving to the bureau of approximately $\$ 60,000$.
A more economical use of ink, brought about by cleaning out the ink fountains with much less frequency and the exercise of greater care in issuing it to the printers, created a considerable saving in the quantity of ink used.

The installation of automatic feeders on sizing machines was begun in the early part of this fiscal year, and was completed about the middle of April. Practically all currency is now being sized in eight-subject sheets and is being automatically fed into the sizing machines. The reduction in the cost of sizing during the fiscal year amounts to approximately $\$ 19,000$, and thereafter it is hoped that the savings will reach $\$ 25,000$ a year.

The discontinuance of the use of woolen blanketing on flat-bed printing presses which was undertaken last year, and which was referred to in last year's report, was carried to a successful conclusion during the present fiscal year. Rubber drilling and tag board have been substituted for the woolen blanketing, resulting in an
annual saving of approximately $\$ 100,000$ on a printing program the size of the one for this fiscal year.
Electrolytic printing plates are now being used in printing approximately 75 per cent of United States currency as compared with 50 per cent during the previous year. The cost of producing these plates is less than that for producing steel plates and their extended use resulted in plates now being made to take care of the printing program 20 per cent in excess of that for 1925, with a smaller total engraving cost than the cost for 1925.
Through a rearrangement of the flow of work and a revision of related methods and organization, it was possible to secure an increase in the production in the numbering division where all United States and Federal reserve notes are numbered and sealed. This change resulted in a decrease in production cost of approximately $\$ 100,000$ a year. Readjustment in rates of pay in this and other divisions, however, absorbed this amount.

During the year platering (pressing) currency in eight-subject size instead of four-subject size was undertaken. This change is being gradually made at the present time. A substantial saving was effected during 1927, but a greater saving will be realized when the procedure has been made fully effective.

The installation of a system for a centralized control in the accounting division over all stock supplies maintained in the various storerooms, which was referred to in the annual report for last year, has been completed. Under this system there is maintained an administrative check on quantities of materials ordered and on all balances maintained in the stock rooms. Periodically a representative of the accounting division verifies by a physical count the quantities on hand according to the control records and checks these amounts with the accounts maintained in the stock rooms.

Extensive changes have been made in the testing laboratory during the year. The laboratory has been enlarged and rearranged and considerable amount of new equipment has been purchased and installed. A special room has been built in which all classes of paper are to be tested. For the purpose of maintaining a uniform temperature to make thase tests, humidifying apparatus was purchased and installed.

A new method for maintaining control of proof impressions printed in the engraving division was adopted and put into operation. Copies of schedules of impressions printed are forwarded each day to the Division of Public Debt Accounts and Audit of the Public Debt Service, the accounting division, and the press register division of this bureau. At the end of the month all proof impressions which are not required in the operation of the engraving division are verified by representatives of the three offices heretofore
mentioned and then delivered to the destruction committee. The proofs which have been destroyed are then checked from the record of impressions printed, leaving a balance in the division to be accounted for. At the end of each year the audit committee from the Division of Public Debt Accounts and Audit makes a check of the proof impressions on hand in the engraving division and reconciles the physical count with the records of the three offices concerned.
During the year a number of experiments were conducted with paper as a wiper on rotary and flat-bed plate printing presses instead of cotton rag. Two kinds of paper were used; one a commercial sulphate paper commonly used as toweling, and the other a paper made from macerated currency and bonds. The results were very gratifying, and the experiments are being continued in order to determine the best finish for the paper. The undertaking has every indication of proving successful.

A comparative statement of receipts and expenditures for the fiscal years 1926 and 1927 follows:

| Detail | Year 1927 | Year 1926 | Increaso | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
| A ppropriated by Congress: |  |  | - 0 |  |
| Salaries ....--.-.-...... | \$470,000. 00 | \$460, 540.00 | \$9, 460. 00 |  |
| Compensation of employees | 3, 893,000. 00 | 3, 826,083.00 | 66, 917.00 |  |
| Plate printing------.-. | 1, 916,900.00 | 1, 955, 200.00 | 6, | \$38,300.00 |
| Materials and miscellaneous expenses | 1, 487, 500.00 | 1, 496, 327.00 |  | 8,827.00 |
| New machinery and other equipment, 1925-26.- |  | 112,522.07 |  | 112,522.07 |
| Reimbursements to appropriations from otber bureaus for work completed: |  |  |  |  |
| Compensation of employees.......................- | 1,742,629.11 | 1,780, 831.99 |  | 38, 202.88 |

## COMMITTEE ON ENROLLMENT AND DISBARMENT OF ATTORNEYS AND AGENTS

The committee on enrollment and disbarment, created by Department Circular No. 230 dated February 15, 1921, is responsible for the examination of applicants wishing to practice as attorneys and agents before the Treasury Department, and for the discipline of those attorneys and agents who violate the regulations. The conclusions of this committee in each case are submitted as recommendations to the Secretary of the Treasury.

Approximately 20,000 attorneys and agents are now enrolled and engaged in active practice before the Treasury Department. Nineteen thousand, nine hundred and twenty-five applicants have been enrolled since the organization of the committee in 1921, and applications are being received at the rate of several thousand each year. Some 8,600 persons were enrolled prior to the organization of the committee, and many of them are now in active practice.

During the year, 2,557 applications for admission to practice as attorneys or agents were approved, and 40 were disapproved. In addition, 95 attorneys and agents who were enrolled prior to August 15,1923 , furnished affidavits relative to contingent fees and were therefore enrolled to continue in practice before the department.

Department Circular No. 230, containing laws and regulations governing the recognition of attorneys, agents and other persons representing claimants and others before the Treasury Department and offices thereof, was revised and reissued July 1, 1927. (Exhibit 43; p. 381.) The principal changes in the revised regulations are (1) practitioners not attorneys at law are prohibited from preparing legal instruments affecting or transferring title to property or advising clients as to the sufficiency thereof in connection with Federal tax matters; (2) requiring that all affidavits, briefs, or statements of fact filed by a practitioner shall have thereon a statement by the practitioner showing who prepared the same and whether or not he knows of his own knowledge that the statements of fact contained therein are true; (3) the requirement as to filing affidavits relative to contingent fees is discontinued but the department may at any time require an attorney or agent to make full disclosure as to how he procured employment in a particular case and the arrangement regarding compensation; (4) the causes for rejection of an applicant for enrollment or for discipline of an enrolled person are more fully set forth. The following matters, among others, are specifically prohibited in case of any practitioner : (a) Publishing a so-called "tax
service" in connection with his practice before the department; (b) holding himself out as an attorney at law when not a member of the bar, or as a certified public accountant when not the holder of a certificate of certified public accountant from a legally constituted board; (c) sharing fees with an unenrolled person who is not engaged in the practice of law or accountancy; (d) making a false financial statement for a person, firm, or corporation and certifying that such statement is true and correct.

The extensive interests involved in tax matters and the large fees obtainable have attracted some disreputable practitioners and offered a great temptation for them to adopt unethical and unprofessional methods in procuring employment in tax cases and to perpetrate frauds upon the Government in their practice, resulting in numerous complaints charging such enrolled attorneys or agents with violations of the laws or regulations governing practice before the department. All such complaints are investigated by the Committee on Enrollment and Disbarment, and whenever deemed necessary or advisable action has been taken looking to the discipline of the enrolled attorney or agent charged with such violation. There were 95 cases unsettled on June 30, 1926, and in addition formal complaints were filed against 77 individuals during the year, making a total of 172 complaints before the committee. The answers of respondents to formal complaints were considered by the committee, and formal hearings were held when necessary. In each case the committee reported its findings of fact and recommendations to the Secretary of the Treasury for his approval, disapproval, or modification. In 19 cases the respondent's answer was accepted as satisfactory without a formal hearing. Sixty-nine formal hearings were held. In 24 of these cases the complaint was found not proven. In 45 cases the complaint was found proven in whole or in part and the Secretary imposed penalties as follows: 11 were disbarred from further practice before the department, 5 were suspended from practice for various periods, and 28 were reprimanded. One agent was permitted to resign with prejudice. There were 84 cases pending on June 30, 1927.
It is the policy of this committee, when deemed advisable, to give an attorney or agent opportunity to show cause why formal disbarment proceedings should not be instituted against him, 15 such cases occurring during the year.

## BUREAU OF INTERNAL REVENUE

## General

Internal revenue receipts.-Receipts from internal revenue taxes during the fiscal year 1927, compared with 1926, were as follows:

| Sources | 1927 | 1926 | Increase ( + ) or decrease (-) |
| :---: | :---: | :---: | :---: |

| Total receipts from all sources ${ }^{8}$ | $2,865,683,129.91$ | 2, 835, 999, 892.19 | +29.683, 237.72 |

[^15]Refunds.-In the foregoing statement of receipts no deductions have been made on account of refunds, which during the fiscal year 1927 were made from the several appropriations as follows:

## Net total

103, 858, 687. 78
The interest allowed on claims for refunds under provisions of the revenue acts of 1921,1924 , and 1926 , amounting to $\$ 21,243,900.53$, is included in the above statement. In addition to the foregoing statement of refunds, three schedules containing three claims, amounting to $\$ 11,727.03$, were paid from funds provided under the act of July 27, 1912, which included interest in the amount of $\$ 7,055.96$. There were also 1,159 schedules containing 25,480 claims, amounting to $\$ 3,777,524.15$, which were paid from funds provided under the appropriation for refunding automobile and cigar taxes, 1926 and 1927.

Cost of administration.-The expenditures in administering the internal revenue tax laws for the fiscal year 1927 were $\$ 32,967,764.17$, not including expenditures for refunding internal revenue collections and taxes illegally collected, which are in no sense administrative expenses. The aggregate receipts of internal revenue were $\$ 2,865,683,129.91$, which makes the cost of operation, for the fiscal year 1927, $\$ 1.15$ for each $\$ 100$ collected, compared with $\$ 1.23$ for each $\$ 100$ collected for the fiscal year 1926, or a reduction of 6.5 per cent.

## Income Tax Unit

The total number of income and excess-profits tax returns audited during the year was $2,482,021$ ( $1,772,137$ individual and partnership and 709,894 corporation), compared with the production of $2,155,933$ for the previous fiscal year. This production exceeded that of the next highest year, 1924, by 152,830 returns.

While keeping current with new work received, particular attention was directed to the completion of the audit of returns for rerior years. Notwithstanding a large number of such returns were reaudited, as the result of claims filed or under decision by the Board of Tax Appeals or the United States courts, large reductions were made in the returns outstanding for the years 1917 to 1924, inclusive.

The net reduction effected in the number of returns outstanding for all years was 268,215. On June 30, 1927, exclusive of the returns in the 60 -day file, 474,535 returns were under consideration, compared with 742,740 returns unaudited on June 30, 1926.
Revenue agents' service.-The number of reports of field examinations submitted was 688,816 for 1927, compared with 574,246 for 1926, an increase of 20 per cent. The number of returns sent to the
field for examination was 685,715 compared with 830,498 for the previous fiscal year.

Recommendations were made by agents conducting examinations for the closing of 155,227 returns by assessment of additional tax, of 51,253 returns through the issuance of certificates of overassessment, and of 432,336 returns without change in tax liability.

Adjustment of claims.-The number of claims scheduled as adjusted during the year was 66,755 . In addition 52,262 certificates of overassessment were scheduled in cases in which no claims were filed. Of the claims scheduled, 40,733 were allowed. The total amount involved, including overassessments in cases in which no claims were filed, was $\$ 303,266,847.42$, of which amount $\$ 82,614,-$ 487.25 was refunded and $\$ 221,650,060.17$ abated or credited. The amount of interest paid on amounts refunded or credited was $\$ 21,243,900.53$. The number of claims rejected was 25,981 involving $\$ 520,768,614.82$.

The number of claims received was 47,808 , involving $\$ 462,896$,449.48 , compared with 72,195 , involving $\$ 1,008,290,704.43$, for the previous year. The number of claims on hand at the end of the fiscal year 1927 was 17,462 , compared with 29,234 at the close of the fiscal year 1926, or a decrease of 11,772 . This reduction in unadjusted claims is further evidenced by the progress of the Income Tax Unit in bringing its work to a current basis. The balance of claims outstanding, 17,462 , is the lowest the unit has ever had on hand and was obtained by adjustment of claims as quickly as possible after their receipts.

Additional revenue.-During the year $\$ 276,096,454.33$ was assessed in additional taxes. Included in this sum is an amount of $\$ 32,704,-$ 156.33, which was assessed without a preliminary hearing before the bureau, it being felt that collection was in jeopardy. This, however, did not affect the taxpayer's right of appeal to the Board of Tax Appeals. During the previous year $\$ 148,867,165.26$ was entered under jeopardy assessments.

The great decrease in assessments of this nature during the year was made possible by provisions contained in sections 274,277 , and 278 of the revenue act of 1926 , which allows the extension of the statute of limitations by the mailing of a 60 -day letter to the taxpayer within the statutory period to (1) 120 days from the date of the 60 -day letter if no appeal is filed with the Board of Tax Appeals, or (2) within 60 days after the final decision of the board where an appeal has been filed.

Further revenue in the amount of $\$ 34,703,663.24$ was made possible of immediate collection through the rejection of claims in abatement and claims for credit.

Personnel. - Improvements in organization and procedure adopted during the year permitted the Income Tax Unit materially to reduce
its force. A reduction of 734 was made in the number in the Washington office. On June 30, 1927, the technical personnel in Washington was 1,200 , and the number of clerks 1,430 , a total of 2,630, while on June 30, 1926, the technical employees numbered 1,489 and the clerical force 1,875 .

The field force was increased by 329 technical and clerical employees. There were assigned to the field on June 30, 1927, 2,732 revenue agents and 715 clerks, or a total of 3,447 , while at the close of the previous year there were 2,442 revenue agents and 629 clerks, or a total of 3,071 . Of the additional personnel assigned to the field 146 auditors and 62 clerks were transferred from the Washington office.
The net reduction in personnel of 358 employees results in a direct annual saving in salaries of approximately $\$ 450,000$.

## Miscellaneous Tax Unit

The Miscellaneous Tax Unit is charged with the administration of all taxes other than income tax. The unit is composed of four divisions-namely, capital stock tax division (for completion of the work in connection with the capital stock tax, repeal effective July 1, 1926), the estate tax division, miscellaneous division, tobacco division, and appeals and review section, which is attached to the office of the deputy commissioner in charge.
Capital stock tax.-Collection of the capital stock tax for the fiscal year 1927 amounted to $\$ 8,970,230.93$, compared with $\$ 97,385,755.61$ for the fiscal year 1926, a decrease of $\$ 88,415,524.68$. As the capital stock tax was repealed effective July 1, 1926, no returns were due to be filed for the fiscal year 1927.
During the year the personnel was reduced from 86 employees, with a pay roll of $\$ 169,320$, to 29 employees, with a pay roll of $\$ 65,900$, a net reduction of $\$ 103,420$.
Estate tax division.-The estate tax collections aggregated $\$ 100$,$339,851.96$, compared with $\$ 116,041,036.09$ for the fiscal year 1926, a decrease of $\$ 15,701,184.13$. The number of estate tax returns audited was 16,087 , compared with 13,912 for the previous year. There were 895 cases awaiting audit at the close of the fiscal year.

On July 1, 1926, the number of refund claims on hand was 304, involving $\$ 10,459,350.20$. There were received during the year 3,460 refund claims, involving $\$ 37,287,225.93$. The number of refund claims allowed was 2,810 , amounting to $\$ 9,304,269.87$, including $\$ 502,750.41$ interest. The number of refund claims rejected was 5.67 , involving $\$ 25,594,532.67$. There were 387 refund claims on hand at the end of the fiscal year, amounting to $\$ 13,350,524$.

The number of abatement claims on hand at the beginning of the fiscal year was 16 , involving $\$ 293,592.43$. The number received dur-
ing the year was 398 , involving $\$ 4,916,222.99$, and the number allowed was 401 , the abatements amounting to $\$ 5,034,071.12$. The number of abatement claims rejected was 12 , involving $\$ 171,261.40$. There was one claim for abatement on hand at the end of the fiscal year amounting to $\$ 4,482.90$.
There were pending at the beginning of the year 107 protest letters, and during the year 2,054 such letters were received. There were 1,794 protest letters disposed of, involving \$34,636,661.97, leaving 367 on hand at the close of the fiscal year.
Miscellaneous taxes.-Receipts from admissions, dues, and excise taxes for the fiscal year 1927 amounted to $\$ 95,205,688.69$, compared with $\$ 184,252,680.93$ for 1926 . This decrease is due to changes in tax legislation provided by the revenue act of 1926. Collections from miscellaneous stamp and special taxes were $\$ 40,538,815.28$, compared with $\$ 61,653,757.99$ for 1926. Receipts under prohibition, narcotic, and related laws during the last three months of the fiscal year 1927 were $\$ 5,040,853.55$.
A total of $\$ 210,984,285.90$, representing 209,815 items, was entered on the miscellaneous assessment lists approved by the commissioner. These lists, on which are entered all assessments of taxes administered by the unit, carried additional assessments amounting to $\$ 25,429,-$ 294.02 as a result of field investigations and office audit. The amount of interest paid and assessed aggregated $\$ 1,087,071.30$.
There were 15,305 offers in compromise, amounting to $\$ 527,487.69$, pending in the Miscellaneous Tax Unit on July 1, 1926. There were 30,456 received during the year and 40,022 disposed of, leaving 5,739 on hand June 30, 1927. Of the 40,022 offers handled, 38,896 were accepted for amounts aggregating $\$ 2,009,805.63$.

Tobacco taxes.-Collections from the tobacco taxes were $\$ 376,170,-$ 205.04, compared with $\$ 370,666,438.87$ for the fiscal year 1926-an increase of $\$ 5,503,766.17$. This increase resulted from the unparalleled receipts from taxes on small cigarettes, which amounted to $\$ 278,928,561.81$, an increase of $\$ 24,103,753.62$ compared with the preceding year, and which represents 74.15 per cent of the total tobacco collections. The following seven States produced $\$ 343,338,781.73$, or 91.27 per cent of the total tobacco collections: North Carolina, \$185,941,504.24; Virginia, \$57,775,134.62; New York, $\$ 26,919,774.26$; New Jersey, $\$ 19,956,537.18$; Pennsylvania, $\$ 17,956,264.47$; California, \$12,511,121.61; Ohio, $\$ 12,061,905.69$; Missouri, $\$ 10,216,539.66$.

## Accounts and Collections Unit

The Accounts and Collections Unit, which has to do with the work of the 64 collection districts, is divided into three divisions collection accounting division, collectors' personnel, equipment, and space division, and disbursement accounting division.
64761-TI 1927-15

Collection accounting division.-There were filed in the various collectors' offices during the fiscal year 1927 a total of $5,249,543$ tax returns, of which $4,895,071$ represented income tax returns of various classes. During the fiscal year 1926 a total of $7,015,008$ tax returns was filed in collectors' offices, of which $5,185,593$ were income tax returns of all classes. The enactment of the revenue act of 1926 materially reduced the number of taxpayers required to file miscellaneous tax returns.

The Accounts and Collections Unit and Income Tax Unit, working in cooperation, prepared instructions with reference to preliminary examination of income tax returns in collectors' offices. All individual returns filed on form 1040 and all corporation returns filed during the 1927 filing period were examined in collectors' offices for mathematical errors. The returns were then reviewed by revenue agents, and a large number of cases were definitely closed within a few weeks 'after the returns were filed. As the result of this procedure, taxpayers were notified promptly of corrections in their returns, and a bstantial amount of revenue was produced.

A total of 7,$615 ; 505,838$ revenue stamps, valued at $\$ 439,166,373.74$, was issued to collectors of internal revenue.
The field work was reorganized. During the year 1 collector's office, 11 division offices, and 1 stamp office were discontinued, resulting in an annual saving of $\$ 60,278$ in personnel cost. At the close of the fiscal year there were 64 collectors' offices, 32 division offices, and 47 stamp offices, 18 of which were operated in conjunction with division offices.
The average revenue production of a zone deputy is approximately $\$ 40,000$ a year. Using this figure as a basis, it is expected that as a result of the discontinuance of the 11 division offices and with the assignment of the division chiefs to productive work there will be a substantial increase in the amount of revenue produced, without additional cost to the Government.

Special attention was given by collector's field forces to the serving of warrants for distraint, the verification of information returns, the investigation of returns filed indicating additional tax due, and the conduct of delinquent drives. In 1927, 85,097 warrants for distraint were served, which resulted in the collection of $\$ 54,047,883$. compared with $12 \pi, 571$ warrants served and $\$ 50,249,181$ collected for the fiscal year 1926. An average of 1,836 deputy collectors made a total of 367,658 revenue-producing investigations, including the serving of warrants for distraint, compared with $492,36 \mathrm{r}$ revenue-produc ing investigations, including the serving of warrants for distraint, made by an average of 2,109 deputy collectors for the fiscal year 1926. The total amount collected and reported for assessment by deputy collectors during the fiscal year was $\$ 78,616,879$, whereas the
total collections and assessments for the previous fiscal year aggregated $\$ 78,500,438$. The average number of investigations made per deputy and the average amount of tax collected and reported for assessment for the fiscal year were 200 and $\$ 42,820$, respectively, while the average number of investigations made per deputy and the average amount of tax collected and reported for assessment for the fiscal year 1926 were 233 and $\$ 37,222$, respectively.

The special force of internal revenue agents working under the direction of the Accounts and Collections Unit collected and reported for assessment $\$ 4,791,609$, an average of $\$ 116,869$ per agent.

The total collected and reported for assessment as a result of the activities of both the force of field deputy collectors working under the collectors and the special squads working under supervisors of accounts and collections amounted to $\$ 83,408,488$, compared with $\$ 89,204,603$ for the fiscal year 1926.

Collectors' personnel, equipment, and space division.-At the close of the fiscal year 1927 there was a total authorized force, inclucling collectors, of 5,294 employees, at an annual salary rate of $\$ 10,351,200$. During the year there was a net reduction of 721 in the total number of positions and $\$ 1,040,560$ in the annual salary rate, or, in other words, the reduction amounted to approximately 11.9 per cent of the total authorized force and 9.1 per cent of the total annual rate.

A total of $\$ 88,520.17$ was expended for the employment of temporary help in collectors' offices, compared with $\$ 47,688.34$ expended for this purpose during the preceding fiscal year. This increase was due in a large measure to a change in procedure requiring the preliminary examination of income tax returns in collectors' offices and also to a special drive conducted in the district of Florida to collect delinquent taxes on real-estate transfers.

On February 1, 1927, the fourth internal revenue collection district of Michigan, with headquarters at Grand Rapids, was consolidated with the first Michigan collection district, with headquarters at Detroit. Much overhead expense has been saved by this action. From reports received there has been no complaint on the part of taxpayers residing in the former fourth district of the service rendered under the new arrangement.

Disbursement accounting division.-The disbursement accounting division administratively examined and recorded 1,443 monthly accounts of collectors of internal revenue, revenue agents in charge, and Federal prohibition administrators, together with 104,206 supporting vouchers, in addition to which 8,929 expense vouchers of employees and 10,782 vouchers covering transportation and freight, miscellaneous expenses, special employees, informers, etc., were audited and passed to the disbursing clerk of the Treasury Depart-
ment and General Accounting Office for payment. The monthly pay rolls of the bureau were examined and audited.

With the removal of the prohibition enforcement accounts from the Bureau of Internal Revenue to the Bureau of Prohibition April 1,1927 , there has been a reduction in the volume of work and in the personnel of the disbursement accounting division.

## Genteral counsel

The work of the general counsel's office, which embraces the legal phases of the whole field of Federal taxation, is divided into six divisions-appeals, interpretative I, interpretative II, penal, civil, and administrative.

Appeals division.-The work of the appeals division during the fiscal year consisted in defending proposed assessments of deficiencies from which taxpayers have appealed to the Board of Tax Appeals and, in cooperation with the Department of Justice, handling appeals in the circuit courts of appeals or the Court of Appeals of the District of Columbia from decisions of the board. Special attention was given to settlement of cases without trials. In this regard the division was assisted materially by the 60-day conference section of the Income Tax Unit. The number of cases closed during the year upon stipulations without trials totaled 2,682 .
Thirty-one field trips were made by divisions of the board during the year. Hearings were held at Portland, Me., St. Paul, Minn., Denver, Colo., Des Moines, Iowa, Atlanta, Ga., New Orleans, La., New York, N. Y., Fort Worth, Galveston, and Austin, Tex., Oklahoma City and Tulsa, Okla., Columbus and Cleveland, Ohio, Miami and Jacksonville, Fla., Kansas City and St. Louis, Mo., Boston, Mass., Memphis, Tenn., Portland, Oreg., San Francisco and Los Angeles, Calif., Detroit, Mich., Indianapolis, Ind., Seattle and Spokane, Wash., and Salt Lake City, Utah. From one to five attorneys from the appeals division accompanied each division of the board to represent the commissioner at the field hearings. The field hearings were carried on without interruption to the regularly scheduled hearings before the board and its divisions at Washington.
A special advisory committee was established in the commissioner's office, effective July 1, 1927, to consider settlements of cases appealed to the board. It is anticipated that the work of the committee will be effective in bringing about a greater number of settlements of cases without trials within the next year.

Interpretative division I.-This division considers questions relating to the income and excess-profits tax provisions of the several revenue acts, as well as those questions of procedure (particularly in connection with liens and distraints) which arise in connection
with the administration of the internal revenue laws. It also passes finally upon all matter proposed for publication in the Internal Revenue Bulletin.

The assignment of members of the division to several of the sections of the Income Tax Unit continues. This practice has proved to be of great benefit, in the audit work of those sections of the Income Tax Unit to which members have been asssigned, as there is at hand a representative of the general counsel's office to advise promptly in matters covered by positive precedent. Where there is doubt as to the law in a particular case or where a new proposition of law is advanced, the question is submitted to this office for formal decision.
Interpretative division 11.-The work of this division embraces (1) interpretation of the provisions of law relating to the following taxes-admissions and dues, beverage, capital stock, gift, estate, excise, insurance, legacy, occupational, oleomargarine special stamp, telegraph and telephone, tobacco, transportation; (2) preparing and reviewing regulations, treasury decisions, informal memoranda, and letters relating to such taxes; (3) reviewing and approving claims for refund of all taxes, including income and excess profits taxes, involving a net refund of $\$ 50,000$ or more, and all cases involving a proposed allowance, including interest, for any year or years aggregating $\$ 75,000$, where there is a net refund in any amount; (4) preparing statements of fact to be submitted to the Joint Committee on Internal Revenue Taxation as required by the first deficiency act, fiscal year 1927, approved February 28, 1927, where a. claim has been allowed in excess of $\$ 75,00,0$; (5) assisting in the drafting of contemplated revenue legislation relating to the above taxes; (6) supervising the disposition of real estate acquired by the Government under the provisions of internal revenue laws and, with the approval of the Secretary, authorizing the sale at public vendue of the interest of the United States in such realty; (7) disposing of deficiency protests in income and estate tax cases pending June 30, 1926. - In March, 1927, the work of preparing statements of fact to be submitted to the Joint Committee on Internal Revenue Taxation, required by the first deficiency act, fiscal year 1927, was given to this division.
During the year, the division conducted 134 hearings, and from March 1 to the end of the fiscal year prepared statements of fact to be submitted to the Joint Committee on Internal Revenue Taxation in 188 cases. The following regulations were considered and revised; Regulations 59 and Regulations 43, Part II.

Penal division.-Cases handled by the penal division are classified as (1) interpretative and (2) law cases. These are subdivided so that under each classification there are income tax cases and mis-
cellaneous tax cases, the latter consisting of the large variety of cases other than those involving income taxes.
At the beginning of the fiscal year there were pending in the penal division 767 cases. During the year there were received 1,076 new cases, compared with a total of 639 cases received during the previous fiscal year. During the year ended June 30, 1927, there was a total of 1,843 cases under consideration, while 1,164 cases were disposed of, leaving 679 cases pending June 30, 1927. There was, therefore, a net decrease in cases pending at the close of the year of 88. Special effort was made finally to dispose of the older cases, not only those which had been in the division longest but likewise those involving the earlier tax years. This effort has been quite successful and a considerable number of the older cases have now been closed. However, certain cases of this character, such as those in litigation, can not finally be disposed of until the litigation ends.
An additional attorney attached to the penal division was assigned to the branch of the general counsel's office in New. York City so that for the greater part of the year there have been two attorneys in the New York office. Also an attorney was sent from the Washington office to the branch of the general counsel in Chicago as the general counsel's representative in that city and an attorney from the Washington office also was assigned to represent the general counsel in the Rocky Mountain and Pacific Coast States with headquarters at San Francisco.

Civil division.-The civil division, in cooperation with the Department of Justice and the United States attorneys' offices, handles all civil internal revenue cases pending in the Federal courts. These cases include the prosecutions of suits by the United States to recover unpaid taxes, and the defense of suits brought by taxpayers against collectors of internal revenue or the United States to recover taxes alleged to have been erroneously assessed and collected. While the United States attorneys are charged with the responsibility for the conduct of these cases, the attorneys of the civil division assemble the evidence, prepare and brief the cases for trial both as to the facts and the law, and an attorney of the civil division is usually present to assist at the trial. In most instances the trial of the case, at the suggestion of the United States attorney, is conducted by the attorney of the civil division. Where cases are appealed the attorneys of the civil division assist in preparing the record, and a brief for the appellate court is forwarded to the United States attorney for printing and filing. Cases in appellate courts are frequently argued by the attorneys of the civil division. In appeals to the Su preme Court or petitions for certiorari the petition is prepared in the civil division and forwarded to the Department of Justice, and a
brief is prepared for the use of the Solicitor General in the argument of the case.

The principal centers of litigation with reference to the number of cases pending and the amounts involved are New York, Philadelphia, Boston, Chicago, Pittsburgh, and San Francisco.
The total number of civil internal revenue tax cases decided by the Federal courts during the fiscal year 1927 was 306.

The number of civil internal revenue tax cases pending in the Federal courts at the end of the fiscal year 1927 was 2,808 , compared with 2,400 on July 1, 1926. During the fiscal year 1927, 1,530 new civil cases were received and 1,187 civil cases were closed.

## MINT BUREAU

## Institutions of the mint service

General.-All of the 11 mint service institutions were in operation during the fiscal year ended June 30, 1927-coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which makes large sales of fine gold bars; mints at New Orleans and Carson City conducted as assay offices; and assay offices at Boise, Helena, Deadwood, Seattle, and Salt Lake City. The seven last-named institutions are, in effect, bullion-purchasing agencies for the large institutions and also serve the public by making assays of ores and bullion. Electrolytic refineries are operated at the New York, Denver, and San Francisco institutions.

Deadwood assay office closed.-The Deadwood, S. Dak., assay office was closed June 30, 1927, the Congress having discontinued the appropriations for its support. This office was established 30 years ago under the acts of June 11, 1896, and February 19, 1897, its natural and exclusive territory being the Black Hills region of South Dakota. Its receipts of bullion were never large, except during a period of about three years (1910-1913) when the Homestake Co., the only large producer in that territory, was induced to deposit its product at the Deadwood office; the yearly receipts were then from $\$ 6,000,000$ to $\$ 8,000,000$ in value. During five years the deposits amounted to about $\$ 1,000,000$ annually, but during most of the life of the office the values received varied from a few hundred thousand dollars to a very few thousand dollars in recent years. Only 14 bullion deposits, worth $\$ 2,936.52$, were received during its last two years of operation. The principal work of the office during recent years has been the making of assays of samples of ores for prospectors and others.

## Gold and silver receipts and transfers

Gold operations.-Gold acquired by the Government at the several mint service institutions during the fiscal year 1927 totaled \$224,$246,630.64$. United States gold coin received by the mints for recoinage amounted to $\$ 2,704,940.81$; transfers of gold between mint offices totaled $\$ 11,821,953.15$; the aggregate amount of gold received by the several mint service institutions during the fiscal year

1927 was $\$ 238,773,524.60$, which compares with $\$ 208,493,228.17$ during the prior year.

Silver operations.-Receipts of purchased silver during the fiscal year 1927 totaled $6,747,524.27$ fine ounces, the average cost of which was 59.9 cents per ounce, total cost being $\$ 4,041,552.81$. Silver received in exchange for bars bearing the Government stamp totaled 992,969.28 fine ounces; United States silver coin received for recoinage totaled $2,630,930.19$ fine ounces, the recoinage value being $\$ 3,637$,021.17 ; silver deposited in trust by other governments totaled 285,$\varrho 61.04$ fine ounces; and transfers between mint service offices totaled $969,555.07$ fine ounces, making the aggregate quantity of silver received by the several mint service offices during the fiscal year $11,626,939.85$ fine ounces, as compared with $13,016,507.07$ ounces during the prior year.

Silver dollars remaining to be coined from bullion purchased under the Pittman Act amounted to about 2,000,000.

The New York market price of silver during the fiscal year ended June 30,1927 , averaged $\$ 0.57672$; the lowest price was $\$ 0.518125$ on October 19, 1926, and the highest price $\$ 0.660625$ on July 2 and 3, 1926.

## Refineries

The New York and San Francisco refineries were in operation throughout the year, as usual. The Denver refinery operated only during the last half of the year, on silver bullion only. The quantity of gold and silver in unrefined bullion on hand was reduced during the year by about 45 tons, but there is still on hand about 437 tons, approximately 54 per cent of which is gold.

Production of electrolytically refined gold during the fiscal year ended June 30, 1927, totaled 2,752,093 fine ounces ( 94.35 tons), as compared with $3,272,689$ fine ounces ( 112.2 tons) during the prior fiscal year, and electrolytically refined silver totaled $3,690,118$ fine ounces ( 126.5 tons), as compared with $4,977,646$ fine ounces ( $170 . \bar{i}$ tons) during prior year.

## Coinage

Regular domestic coinage.-The domestic coinage executed by the United States mints during the fiscal year 1927 was greater in value than that of the priot fiscal year by about $\$ 14,000,000$, although the number of pieces was approximately $61,000,000$ fewer. The principal factors in this result were about $\$ 20,000,000$ more gold coin and $68,000,000$ fewer pieces of minor coin. The total domestic coinage was $310,960,019$ pieces, with value $\$ 102,653,129.50$, as compared with the prior year's $372,171,282$ pieces, valued at $\$ 88,614,418$. The 1927 total consisted of gold, $\$ 83,955,000$; silver dollars, $\$ 4,456,900$; sub-
sidiary silver, $\$ 9,5572,659.50$; nickel, $\$ 2,910,100$; and bronze, $\$ 1,758$,470. As is usual, the Philadelphia Mint made most of the minor and subsidiary silver coin, as well as some silver dollars and about $\$ 26,000,000$ in gold. The San Francisco Mint was principally engaged upon gold coin and silver dollars, while the Denver Mint made silver dollars and small coin.

Commemorative coins.-Coins of special design, authorized by Congress, were issued during the fiscal year 1927 as follows:
The Vermont-Bennington half dollar was authorized by act of Congress approved February 24, 1925, in commemoration of the one hundred and fiftieth anniversary of the independence of Vermont and of the battle of Bennington. It was designed by Charles Keck. In addition to the legends and inscriptions required by basic law, the obverse of the coin bears a likeness of Ira Allen with his name as founder of Vermont. The reverse carries a figure of a catamount, the name and date of the battle of Bennington, which occurred August 16, 1777, also the year of the coin's issue, 1927, and the words "Half dollar."

The Oregon Trail half dollar is a special-design coin authorized by act of Congress May 17, 1926, to commemorate the heroism of the pioneers who traveled to the far West and to aid in erection of suitable monuments to commemorate the tragic events associated with that emigration, which resulted in adding new States to the Union. The obverse of the coin bears a likeness of an old-time Conestoga wagon drawn by oxen over the brow of a hill and toward the setting sun. The phrase "Oregon Trail Memorial " appears, as well as other inscriptions required by law. On the reverse of the coin appears the full-length figure of an Indian with typical headdress, blanket, and bow. The left hand of the Indian is raised as if in warning to those of the East. The Oregon Trail is traced across a map of the United States as a background on this side of the coin, which was designed by Mrs. Laura G. Frazer.

Coinage for foreign governments.-Coinage for foreign governments was made during the past fiscal year only at the Philadelphis Mint. The total was $7,099,000$ pieces, which compares with $16,676,000$ pieces during the prior year. For Guatemala 90,000 gold pieces were made, for Venezuela 1,545,000 silver pieces and 2,800,000 nickel pieces, for Peru 620,000 silver pieces and $1,194,000$ nickel pieces, and for Nicaragua, 500,000 silver pieces, 100,000 nickel pieces, and 250,000 bronze pieces.
The 1927 combined total of domestic and foreign pieces, $318,059,019$, compares with last year's $388,847,282$ pieces.

Expenses, income, etc.
Appropriations available for mint service during the fiscal year 1927 totaled $\$ 1,684,750$, and reimbursenients to appropriations for
services rendered amounted to $\$ 58,023.03$, making a total of \$1,742,773.03.

Expenses amounted to $\$ 1,668,244.53$, of which $\$ 1,606,311.35$ was chargeable to appropriations and $\$ 61,933.18$ chargeable to income.

The income realized by the Treasury from the mint service aggregated $\$ 9,416,010.56$, of which $\$ 8,842,025.89$ was seigniorage. The seigniorage included $\$ 1,009,519.98$ on the coinage of silver dollars, which amount offsets an equal loss which was incurred when the silver dollars were melted and sold under terms of the Pittman Act. The seigniorage on subsidiary silver coin was $\$ 3.848,205.08$, on nickel coin $\$ 2,443,230.81$, and on bronze coin $\$ 1,541,070.02$.

Summary of appropriations, expenses, and balances, fiscal year 1927

The number and value of deposits, transfers, gross income, and expenses for the fiscal year 1927 and the number of employees on June 30, 1927, at each institution are shown in the following table:

Deposits of gold and silver, income, expenses, and employees, by institutions

${ }^{1}$ Gold valued at $\$ 20.67+$ per fine ounce, silver for standard dollars valued at $\$ 1.29+$ per fine ounce, and silver for subsidiary coin at $\$ 1.38+$ per fine ounce.

## Gold and silver in the United States

Stock of coin and monetary bullion.-On June 30, 1927, the estimated stock of domestic coin in the United States was $\$ 2,138,004.166$,
of which $\$ 1,304,469,861$ was gold, $\$ 537,944,446$ standard silver dollars, and $\$ 295,589,859$ subsidiary silver coin.

The stock of gold bullion in the mints, assay offices, and Federal reserve banks on the same date was valued at $\$ 3,260,628,275$, a decrease during the year of $\$ 8,105,370$; the stock of silver bullion was $9,068,349.88$ fine ounces, a reduction of $1,005,387.72$ fine ounces.

Production of gold and silver:-Domestic gold production during the calendar year 1926 was $\$ 48,269,600$, as compared with $\$ 49,860,200$ in 1925. The output has declined to under 48 per cent of that for the record year 1915, when the total was $\$ 101,035,700$.

Silver of domestic production during 1926 totaled 62,718,746 ounces, valued at $\$ 39,136,497$; this compares with $66,155,424$ ounces, valued at $\$ 45,911,864$, for 1925 , and with the record production of 1915, $74,961,075$ fine ounces, valued at $\$ 37,397,300$.

Industrial consumption of gold and silver.-Gold consumption in the industrial arts during the calendar year 1926 is estimated at $\$ 74,333,684$, of which $\$ 43,268,236$ was new material.

Silver used in the arts is estimated at $39,408,393$ fine ounces, of which $29,407,601$ fine ounces was new material.

As compared with the prior year, silver consumption was about the same and gold consumption increased about $\$ 8,400,000$.

Net export of domestic gold coin.-The net export of domestic gold coin during the fiscal year ended June 30,1927 , was $\$ 5,500,953$; during the prior fiscal year there was net export of $\$ 46,614,511$. During the 13 fiscal years 1915-1927, since the beginning of the World War, there has been a net export of domestic gold coin of $\$ 941,219,179$, although the net balance of imports and exports of both gold coin and bullion was an import of approximately $\$ 2,000,000,000$ during the same period. Since 1870 the net export of domestic gold coin has been $\$ 1,818,868,243$.

## PERSONNEL CLASSIFICATION OFFICER

A total of 276 appeals from classification allocations which had been presented to the Personnel Classification Board prior to July 1, 1926, were still receiving consideration by said board. During the first five months of the fiscal year these appeals were disposed of as follows: Approved as recommended, 201; disapproved, 63; withdrawn or canceled, 12.

Between July 1, 1926, and June 30, 1927, 657 appeals were presented to the department and transferred to the Personnel Classification Board for appropriate action. Of this number 608 appeals were approved by the classification officer and 49 disapproved as being without merit. The Personnel Classification Board approved 194 appeals out of the 657 presented and disapproved 264 , leaving at the close of the fiscal year 199 cases still pending.

In addition to the foregoing an appeal was presented by an employee in one of the large activities of the department on behalf of a group of 833 persons doing the same class of work. This appeal was disapproved by the Personnel Classification Board and immediately affected 833 jobs.

In addition to the large number of appeals requiring study and investigation by the classification officer to enable appropriate recommendation to be made from the department, an unuşually large number of classification sheets were handled through the department because of certain reorganization in forces, as well as a large turnover in personnel.

During the year considerable was accomplished looking to a uniform procedure within the activities of the department in connection with the handling of efficiency ratings. The annual ratings for the period ended May 15, 1927, were more satisfactory than any previous ratings prepared pursuant to the requirements of law and regulation.

## BUREAU OF PROHIBITION

The act of March 3, 1927, creating a Bureau of Prohibition in the Treasury Department became effective April 1, 1927, on which date the working organization of the Prohibition Unit of the Bureau of Internal Revenue was transferred to the Bureau of Prohibition.

During the year several changes were made in districts with the view to better organizing the forces of the bureau to meet local conditions and to centralizing authority over territory where the problems are similar. The district of Florida was abolished and a new district created consisting of South Carolina, Georgia, and Florida, with headquarters at Savannah, Ga. The State of West Virginia was combined with the western Pennsylvania district, with headquarters at Pittsburgh. The State of North Carolina was attached to the Virginia district, with headquarters at Richmond. The State of Delaware was transferred from the Maryland district to the eastern Pennsylvania district, with headquarters at Philadelphia. The State of New Jersey was detached from the eastern Pennsylvania district and made into a separate district, with headquarters at Newarlz. The middle judicial district of Pennsylvania was attached to the eastern administrative district.

The policy of decentralizing the operations of the Prohibition Service during the past two years has proved to be of material benefit. The control of permits within their districts has given the administrators a larger appreciation of their responsibilities.
Further decentralization of the bureau was accomplished by abolishing the offices of the supervisor of alcohol and brewery control and the supervisor of wine control, the employees of these organizations having been transferred to other agencies in the field. The office of the chief investigator was discontinued and there was created in its stead the office of chief special agent. The chief special agent of the bureau supervises and directs the activities of approximately 120 trained investigators known as special agents. They operate at all times as specifically assigned by the commissioner and frequently assume full responsibility for the investigation of difficult and complicated cases, including interdistrict and nation-wide conspiracies to violate the law. In certain border districts these special agents act as a coordinating agency of the department in the investigation of cases involving major smuggling operations. To accomplish the
desired results in that connection, they are empowered to utilize to the best possible advantage the information and evidence that is being gathered from time to time by the Coast Guard, Customs, and Prohibition Services.
Prohibition agents made 64,986 arrests during the year ended June 30, 1927, and seized 7,137 automobiles, valued at $\$ 3,529,296.70$, and 353 boats, valued at $\$ 316,323$. As a result of the work of such agents, 51,945 prohibition cases against individuals were handled in Federal courts and 36,546 persons were convicted, of which number 11,818 were given jail sentences.
The Federal courts imposed sentences aggregating 4,477 years for violation of the national prohibition laws. In addition, as shown by the records of the Solicitor of the Treasury Department, there were certain collections through the Federal courts, such as fines and forfeitures, incident to enforcing the national prohibition act, amounting to $\$ 4,143,040.02$, compared with $\$ 5,231,130.90$ for the fiscal year 1926.

During the year 2,832 compromise cases involving civil liabilities under the prohibition law were examined and determined, 2,221 of which were favorably acted upon and 611 rejected, the total amount accepted being $\$ 1,018,969.71$.
In the course of the year 322 applications for pardon for persons serving sentences for violation of the national prohibition act were considered, 22 of which were recommended for approval, 217 recommended for rejection, 61 returned to the Department of Justice without recommendation, and 22 referred to other departments.

A total of 995 applications for parole of persons serving sentences for violation of the national prohibition act were considered, 13 of which were recommended for approval, 767 for rejection, 140 were returned to the Department of Justice without recommendation, and 75 referred to other departments.
The technical division conducts the chemical work of the Bureau of Prohibition as well as work of this character for the Bureau of Internal Revenue in Washington. It supervises generally the activities of the chemical laboratories of the Bureau of Prohibition in the field. The laboratory at Washington made 20,835 analyses during the year and 93,323 analyses were made in the field laboratories.

During the fiscal year ended June 30, 1927, 2 concentration warehouses, 2 distillery warehouses, and 2 special bonded warehouses were closed out, and 1 concentration warehouse was established. At present there are 28 concentration warehouses containing 22,053,141.8 gallons of distilled spirits. There are 8 distillery warehouses and 2 general bonded warehouses containing 1,465,820.1 gallons of distilled spirits which have not as yet been concentrated, owing
to the fact that the security, storage, and bottling facilities are adequate, and as most of them are contiguous to a distillery, industrial alcohol plant or industrial alcohol bonded warehouse where Government officers are maintained, no additional expense for supervision is incurred by the Government.
At the close of the fiscal year there were 337 permanent and 7 temporary employees on the bureau roll, and 3,932 permanent and 10 temporary employees on the field rolls, making a total of 4,269 permanent and 17 temporary employees on the rolls of the Bureau of Prohibition on June 30, 1927. The personnel on June 30, 1926, consisted of 3,570 permanent and 19 temporary employees.

## Narcotics

On June 30, 1927, 306 persons were registered under the Harrison narcotic law, as amended, as importers and manufacturers, 1,778 as wholesale dealers, 48,523 as retail dealers, 144,056 as practitioners, and 120,699 as dealers in and manufacturers of untaxed narcotic preparations, the latter number including registrants not required to pay special tax by reason of paying another tax under the act, or a total of 315,362 registrants.

A total of 4,469 convictions under the Harrison and smoking opium acts was had, for which the courts imposed sentences aggregating 7,088 years 10 months and 1 day and fines amounting to $\$ 175,127.90$. A total of 2,083 cases was compromised, the aggregate amount collected being $\$ 104,166.64$. During the year ended June 30, 1926, a total of 10,342 cases of criminal character was reported, whereas during the last fiscal year 8,851 such cases were reported. A decrease of 1,491 cases over the previous year is to be noted. This however, does not indicate less activity or less effective operation of ihe field force, as more effort was concentrated on the larger illicit purveyors of drugs which is reflected by the increase of 290 years 10 months and 21 days in sentences over the sentences imposed for the year ended June 30, 1926. Sentences for the past year totaled 7,088 years 10 months and 1 day, whereas the aggregate for the preceding year was only 6,797 years 11 months and 10 days.

## PUBLIC DEBT SERVICE

## Division of Loans and Currenoy

This division is the active agent of the Secretary for the issue of all public debt obligations of the United States and for conducting transactions in such obligations after issue. It is also charged with the issue of bonds or other obligations of the governments of Porto Rico and the Philippine Islands as to which the Treasury Department acts as fiscal agent. The division undertakes the safe-keeping of public debt and insular loan securities for certain government offices, and counts and delivers to the destruction committee United Statès currency canceled as unfit, and mutilated paper (spoilage, etc.) received from the Division of Paper Custody and the Bureau of Engraving and Printing.

Issue and retirement of securities.-The following is a résumé of the activities in connection with the issue and retirement of securities:

|  | Registered | Nonregistered | Total |
| :---: | :---: | :---: | :---: |
| ISSUES |  |  |  |
| Stock shipments to Federal reserve banks: ${ }^{8}$ |  |  |  |
| For exchange transactions. |  | \$2, 159, 557, 450.00 | \$2, 159, 557, 450. 00 |
| Allotment for original issue | $1 \$ 150.00$ | 3, 659, 366, 250.00 | 3, 659, 366, 400.00 |
|  | 150.00 | 5, 818, 923, 700.00 | 5, 818, 923, 850.00 |
| Original issue by the division. | $22,245,498,110.00$ | $39,839,110.00$ | 2, 285, 337, 220.00 |
| Securities issued on exchange. | 430, 036, 785.00 | 49, 206, 650.00 | 479, 243, 435. 00 |
| Total securities issued and shipped | 2, 675, 535, 045.00 | 5, 907, 969, 460.00 | 8, 583, 504, 505.00 |
| RETIREMENTS |  |  |  |
| Securities retired on exchange. | 180, 546, 165.00 | 298, 697, 270.00 |  |
| Securities retired for redemption -.....-...-.-....-- | $2,307,396,394.25$ | $202,684.80$ | $2,307,599,079.05$ |
| Other securities retired (i. e., claims, credit, and exchange authorization retirements). | 421, 439, 900.00 | 17, 430.00 | 421, 457,330.00 |
| Total securities retired | 2, 909, 382, 459.25 | 298, 917, 384.80 | 3, 208, 299, 844.05 |
| stock activities |  |  |  |
| Securities received from Bureau of Engraving and | 2, $561,845,840.00$ | 6, 875,793, 760,00 |  |
| Securities restored to stock by Federal reserve banks. | , 80. | - $21,345,000.00$ | 21,345,000.00 |
| Securities canceled and delivered to Register of Treasury | 2,995, 600.00 | 909, 283, 300.00 | 912, 278, 900.00 |

1 Deliveries to the Treasury cash room as an allotment.
Includes $\$ 2,016,000,000$ special, one-day certificates of indebtedness.
${ }^{3}$ Does not include standard, full paid interim certificates issued by Federal reserve banks at a value of $\$ 4,823,500$.

The detail of transactions in public debt securities is presented in formal statements elsewhere in the report but of special note are the following data regarding new issues and retirements, covering transactions handled by the division and not including transactions conducted by the Federal reserve banks.

New issues by the division consisted of $33 / 8$ per cent Treasury bonds of 1943-1947 amounting to $\$ 23,942,950$, of which $\$ 21,492,750$ were in registered form; $21 / 2$ per cent postal savings bonds (thirtyfirst and thirty-second series) amounting to $\$ 689,620$, of which $\$ 650,860$ were in registered form; bearer Treasury notes, Series A-1930-1932, amounting to $\$ 35,600,150$; and registered 4 per cent Treasury notes amounting to $\$ 169,000,000$ and registered 4 per cent certificates of indebtedness amounting to $\$ 37,500,000$ for the World War adjusted service certificate fund and the United States civil service retirement and disability fund. In addition, original issues of Philippine Islands and Porto Rican securities were made in total amount of $\$ 2,604,500$.
During the fiscal year two exchange offerings were made in connection with the redemption of the second Liberty loans which resulted in the retirement of second loan registered bonds to the amount of $\$ 164,776,200$. There were also retired second loan registered bonds amounting to $\$ 4,751,200$ purchased with surplus money in the Treasury. On December 15, 1926, Treasury savings certificates began to mature (five years from date of sale), resulting in a great increase in the volume of retirements of public debt securities for redemption. The redemption value of Treasury savings certificates retired during the fiscal year amounted to $\$ 64,298,414.25$, and of War, Treasury saving, and thrift stamps to $\$ 125,584.80$. Other retirements for redemption amounted in the aggregate to $\$ 57,647,680$ with the exception of the special one-day certificates of indebtedness.

Individual registered accounts activities.-In connection with public debt registered issues, individual registered accounts are maintained and interest is paid periodically in the form of checks.
'The interest-bearing accounts open June 30, 1927, were as follows:

|  | Number of accounts | Principal |
| :---: | :---: | :---: |
|  | 12,725 | \$743, 801, 830 |
|  | 1, 629, 127 | 3, 409, 285, 800 |
| Treasury notes and certificates of indebteduess (i. e., special fund accounts)..- | 1, 6 | 358, 500, 000 |
|  | I, 641, 858 | 4,511, 687, 730 |

During the year the amount of Liberty bonds, Victory notes, and Treasury bonds in registered form decreased from $\$ 3,735,249,500$ to $\$ 3,409,586,850$, a loss of $\$ 325,662,650$, and the individual accounts maintained for these bonds and notes derreased from $1 ; 760,378$ to

1,630,443, a loss of 129,935 accounts. A considerable reduction in second Liberty loan registered accounts was evidenced due to the refunding which started in March. From February 28 to July 31 the registered second loan bonds outstanding were reduced by 150,701 pieces, amounting to $\$ 314,726,700$, while the individual accounts were reduced approximately 20 per cent, from 314,456 to 252,825 . There was a net gain in the registered principal of unmatured pre-war loans of $\$ 1,245,530$ but a loss of approximately 336 accounts. There were 206,137 individual accounts for registered Liberty bonds, Victory notes, and Treasury bonds closed and 28,237 accounts decreased, representing the retirement of securities amounting to $\$ 716,355,250$ par value. In connection with the same loans, 76,202 new accounts amounting to $\$ 390,692,600$ principal were opened. $\cdot$ Forty-eight thousand, seven hundred and eighty-nine changes in address for the mailing of interest checks were made on the registered accounts during the year.
Interest on registered Liberty and Treasury bonds was paid on due dates in the form of $3,417,696$ checks amounting to $\$ 150,611,884.06$, and on registered securities of the pre-war loans in the form of 45,747 checks, amounting to $\$ 15,486,946.30$. Interest on registered Treasury notes of the adjusted service and civil service retirement and disability series was paid in the form of four checks aggregating $\$ 6,825,983.54$. There were received from the Bureau of Engraving and Printing $3,383,335$ checks and there were canceled and delivered to the destruction committee 84,355 checks.

Claims.-Claims for relief on account of lost, stolen, destroyed, and mutilated securities handled by the division during the fiscal year were as follows:

|  | Claims | Pieces | Amount |
| :---: | :---: | :---: | :---: |
| Received. | 3,402 | 12,833 | \$2, 102, 098. 50 |
| Settled: |  |  |  |
| By reissue or redemption of securities. | 2, 174 | 6,467 | 783, 632.00 |
| By recovery of securities............... | 975 | 2, 204 | 771, 075.00 |
| By disallowance of claims. | 123 | 1,308 | 32, 570.00 |
| By allowance of credit.. | 2 | 7 | 2,500.00 |
| Total | 3,274 | 9,986 | 1, 589, 777. 00 |

Safe-keeping of securities.-At the beginning of the year there were securities amounting to $\$ 381,174,475$ in safe-keeping for various Government offices, against which formal, audited receipts were outstanding. Throughout the year securities amounting to $\$ 245,098,150$ were received for safe-keeping and receipts therefor issued and securities amounting to $\$ 130,218,850$ were delivered from safe-keeping upon the surrender of outstanding receipts, leaving a balance of securities amounting to $\$ 496,053,775$ in safe-keeping June $30,1927$.

Mutilated paper and redeemed currency.-Mutilated paper verified and delivered to the destruction committee consisted in total of $22,679,258$ and $2869 / 3400$ sheets, of which $22,632,407$ and $1169 / 3400$ were received from the Bureau of Engraving and Printing and $46,8511 / 2$ from the Division of Paper Custody. Redeemed currency counted and delivered to the destruction committee which was destroyed during the year amounted to $636,043,979$ pieces, representing $\$ 1,518,482,117.94$.

Publicity.-The division maintains a mailing list, in addition to its list of holders of registered bonds, for the purpose of placing new public debt offerings and such matters before the public. Approximately $2,554,939$ circulars were distributed during the year by this means.
Personnel.-For the conduct of the foregoing work there were on the'rolls of the division at the beginning of the year 993 employees. During the year there were 13 employees transferred to other bureaus, 72 resigned, and 2 retired, while there were 20 employees appointed, 92 transferred from other bureaus, and 46 reinstated. A net increase in force of 71 employees thus resulted, leaving a personnel of 1,064 employees on the rolls at the end of the fiscal year 1927.

## Register of the Treasury

The Register of the Treasury performs the final audit of all retired Federal securities that evidence debt principal or bearer interest, and is charged with the custody of these documents. It is the duty of the register to determine the credits to which the Treasurer of the United States is entitled on account of the redemption of such securities, and to which the Division of Loans and Currency and the Federal reserve banks are entitled on account of such securities retired otherwise than through redemption.

During the fiscal year 1927, 50,467,077 security documents, with a face value of $\$ 11,243,181,277.38$, were functioned in the register's office. Of that number there were $39,469,076$ that represented cash redemptions aggregating $\$ 6,852,438,058.87$; 2,958,680, aggregating $\$ 2,734,325,525$ in face value, were surrendered in exchange for other securities, and 8,039,321, aggregating \$1,656,417,693.51 in face value, represented canceled securities surrendered because they were no longer appropriate for issue. Of the securities redeemed from the holders for cash, $37,201,801$ were interest coupons that aggregated \$561,272,713.54.
The personnel of the register's office was reduced during the fiscal year from 568 employees to 429 . The reduced number would probably have proved to be sufficient properly to carry on the work of the office but for added clerical effort made necessary by the unanticipated offer made by the department March 8 to holders of part of
the second Liberty loan bonds to exchange them for Treasury notes. The acceptance of the offer by many of the holders so increased the volume of securities transmitted to the register's office for audit that the number of employees was found to be insufficient to prevent certain portions of the work from falling in arrears.

The total expenditures made from funds available for the conduct of the register's office during the fiscal year 1927 aggregated $\$ 745,905.26$. That amount includes the salaries and the rent paid and the equipment, maintenance, and supplies that were purchased for the use of the office.

The following statement sets forth by class, pieces, and amount the securities received, examined, and filed during the fiscal years 1926 and 1927, respectively:

Summary of securities received, examined, and flled in the register's office during the fiscal years ended June 30, 1926 and 1927

| Class of security | 1926 |  | 1927 |  |
| :---: | :---: | :---: | :---: | :---: |

## Division of Public Debt Accounts and Audit

During the fiscal year this division continued to maintain its administrative control accounts over all official transactions in public debt securities of all issues conducted by the several Treasury offices and the Federal reserve banks as fiscal agents of the United States, and over all transactions involving the receipt, custody, and issue of distinctive silk fiber and nondistinctive paper used for printing public debt securities, United States currency, national-bank notes, Federal reserve notes, United States postage stamps, internal revenue stamps, and other miscellaneous securities and documents.

The division has also continuously conducted administrative physical audits of distinctive and nondistinctive paper in the custody of
the Bureau of Engraving and Printing, and of securities in other Treasury offices held as stock or in safe-keeping, unclaimed securities, surrendered securities canceled and retired or in process of retirement; of registered interest checks in stock, held as unclaimed, or canceled and delivered for destruction; of registered bondholders' accounts; of numerical registers reflecting the issues and retirements of public debt securities and those outstanding; and of various accounting records relating to security and security-paper transactions. The following is a summary of the physical audits conducted by the division during the fiscal year:

Physical audits, fiscal year 1927

| Description | Pieces, etc. | Vaiue |

## PUBLIC HEALTH SERVICE

The activities of the Public Health Service during the fiscal year ended June 30, 1927, are summarized by the Surgeon General as follows:

## Division of sanitary reports and statistics

Reports of the prevalence of diseases dangerous to the public health were received throughout the fiscal year by telegraph and mail from all parts of the United States and from foreign countries. They came from officers of the Public Health Service, American consuls, State and local health officers, foreign governments, the health section of the secretariat of the League of Nations, the International Office of Public Hygiene at Paris, the Pan American Sanitary Bureau, and other sources.

Some of the telegraphic reports were summarized and mimeographed copies sent to State health officers. In this way early notice was given of the prevalence of diseases which must be especially guarded against.

The data generally are tabulated, comparisons are made with preceding years, and the resulting statistics are published in the weekly Public Health Reports or in supplements issued from time to time.
The reports from the United States of the prevalence of diseases dangerous to the public health are not as complete or accurate as they can be made. The establishment of definite standards of reporting and the inclusion in a registration area of all States and cities which reach these standards would do much to increase our knowledge of the prevalence of communicable diseases in the United States.
The weekly Public Health Report was issued regularly during the fiscal year. This publication is now in its forty-second year.

The obligations imposed upon our Government by sanitary conventions to notify foreign governments of the appearance of quarantinable diseases and the prevalence of certain communicable diseases were met during the fiscal year, and sanitary information was exchanged between the Public Health Service and the Pan American Sanitary Bureau, the health section of the League of Nations, and the International Office of Public Hygiene at Paris.

Another volume was added to the series of annual compilations of Federal and State laws and regulations pertaining to public health.

Laws and regulations pertaining to smallpox vaccination were collected, compiled, analyzed, and published, together with abstracts of all decisions on this subject by courts of last resort in the United States.

Many requests were received for information as to the laws and regulations on subjects pertaining to health. These requests were complied with as far as possible.

The dissemination of health information of a popular nature by radio was continued by the Public Health Service throughout the fiscal year. Two broadcasts were sent out each month through 49 cooperating stations.

Reports to the Surgeon General indicate that health conditions throughout the country were unusually favorable during the fiscal year. During the first three months of 1927 , although there was a widespread epidemic of influenza in Europe, the United States was fortunate in having comparatively few cases of this disease, and these were generally mild, with few cases in which pneumonia developed.

The record for the calendar year 1926 is not so favorable. The general death rate increased slightly over that for 1925 , and the infant mortality rate also increased. These increases were due, largely, if not entirely, to the epidemic of influenza which occurred during the winter and spring of 1926. Measles was unusually prevalent at the same time.
There was a continuation of the reduction in the death rate from tuberculosis, although the difference between the rates for 1925 and 1926 was small.

In 1925 the death rate from typhoid fever showed a reaction from the steady decline which had been observed for three decades at least. In 1926, however, the typhoid fever death rate in 40 States was 6.7 per hundred thousand, as compared with 8.3 in 1925.

The case and death rates for diphtheria for the year 1926 were the lowest ever recorded in the United States, but during the first six months of 1927 the incidence of this disease increased, although the numbers of cases and deaths were much smaller than those reported a few years ago.

During the fiscal year there was not much change in the number of ports reporting cases of quarantinable diseases. Plague and typhus fever were widespread and cholera was confined to Asia, but appeared to be spreading at the close of the fiscal year. Yellow fever has been eliminated from many places where it was formerly a scourge, but it still exists in parts of Africa and occasional cases appear in South America.
Plague was reported from nearly all parts of the world with which we carry on commerce. It appeared in Asia, Africa, Europe, and South America. Sporadic or imported cases, reported from ports
where the disease is unusual, emphasized the necessity for constant vigilance. Although the number of cases decreased in countries where the disease is usually prevalent, there was little, if any, decrease in the number of ports in which plague appeared.

The number of cases of plague reported in India was less than the number reported for the preceding fiscal year. India is the prin: cipal center of infection for this disease. The incidence of plague also decreased in Siam, French Indo-China, and Java.

The Japanese steamship Manila Maru, from Pacific ports and ports in South America, arrived at New Orleans on October 24 with two human cases of bubonic plague. The cases were removed in quarantine, where one patient subsequently died. Diagnosis in both cases was confirmed clinically and bacteriologically. Repeated cyanide fumigations were made during the discharge of cargo under supervision into barges alongside. After complete discharge the vessel was given thorough fumigation throughout and was then surveyed to locate the breeding places of rats on the ship and permanently to eliminate all these in so far as possible. The vessel left New Orleans on November 17, 1926, bound for Cristobal, Canal Zone; San Pedro, Calif.; Honolulu, Hawaii; and Japan.

Cholera was prevalent during the fiscal year in India, Siam, French Indo-China, China, Manchuria, and Korea. There was a severe epidemic during the summer of 1926 in Shanghai. Just after the close of the fiscal year the disease spread to ports in the Persian Gulf, Iraq, and Persia.

There has been a decrease in the number of cases of typhus fever since shortly after the close of the World War, but the disease is still a serious problem in the Ukraine, Russia, Poland, Rumania, and other parts of Eastern Europe and Asia. The disease is prevalent in Mexico and along the western coast of South America. Cases were. reported in the Irish Free State.

Yellow fever was reported at Bahia, Brazil, early in the fiscal year. The only other cases of this disease reported were in Africa-Liberia, the Gold Coast, Togoland, Dahomey, Nigeria, and French West Africa. In some parts of this territory the disease was more prevalent than it has been for several years.

Smallpox was reported from Europe, Africa, Asia, North and South America, and many isolated ports.

Division of foreign and insular quarantine and immigration
Quarantine transactions.-During the fiscal year 29,229 vessels and $3,054,594$ persons were inspected by quarantine officers. Of these, 20,284 vessels, 820,793 passengers, and $1,140,922$ seamen were inspected upon arrival at stations in the continental United States;

2,991 véssels, 169,461 passengers, and 226,373 seamen were inspected at insular stations; and 5,954 vessels, 424,172 passengers, and 272,873 seamen were inspected at foreign ports prior to embarkation for the United States.

Of the passengers who embarked at European ports 60,774 were vaccinated and 62,995 were deloused under the supervision of medical officers of the service. Their clothing and baggage, amounting to 63,472 pieces, were disinfected.

A total of 7,116 vessels were fumigated either because of the occurrence of disease on board or for the destruction of rodents, $31 ; 073$ rats were recovered, of which number 18,334 were examined for plague infection.

The efforts of the service to exclude quarantinable disease from the United States and its possessions were successful. During the year 17 cases of smallpox, 2 of leprosy, and 2 of human plague reached our quarantine stations. No case of yellow fever, typhus, or cholera arrived at quarantine. The prophylactic measures applied by Public Health Service officers at foreign ports of departure undoubtedly contributed to this result.
During the past year quarantine officers were authorized to accept as competent evidence, fumigation certificates properly visaed by a United States consul, provided the certificate contains the same, or substantially the same, information as Certificates of Fumigation of the United States Public Health Service, and, in addition, indicates the treatment of substantially all parts of the vessel, and if, after a thorough inspection of the vessel the medical officer accepting the certificate is satisfied that the fumigation has been performed in accordance with the requirements of the United States Public Health Service, and the vessel shows a satisfactory freedom from rat infestation.

In view of the fact that the yield of rats after fumigation of oil tankers is relatively low, the extension of the period between fumigation of such vessels has been authorized, provided, upon actual detailed inspection they show no evidence of rat infestation. The necessity for fumigating tankers is now based upon the presence or absence of observed rat infestation and not upon previous ports of call or time elapsed since last acceptable fumigation. If, after inspection, tankers are not free of rats, they will be fumigated. It is expected that this procedure will materially diminish the number of tankers fumigated.

In November of the past fiscal year medical officers of quarantine stations were authorized to begin the use of Zyklon-B in the fumigation of ships. Fumigation with this HCN material not only greatly reduces the amount of equipment necessary, as compared with other
fumigants, but allows the work to be done with much less personnei and will reduce the cost of fumigation.
In conformity with the Pan American Sanitary Code, the Public Health Service has now printed and is now using the form of bill of health set forth in the appendix of said code and adopted as the standard bill of health.
During the past year a great deal of consideration has been given to the possible exemption from fumigation of ships from noninfected ports, provided they show no rat infestation and very slight rat harborage under a careful inspection of all parts of a vessel. In order to maintain a vessel in a rat-free condition, or at least to have the rat population reduced to an unimportant number, fumigation is necessary at least every six months or the vessel must be relatively rat-proof, and a great many steamship companies have come to realize in the past year the importance and economic value of ratproofing their vessels.

In accordance with article 28, International Sanitary Convention of Paris, 1926, a combined form of deratization or deratization exemption certificate was drawn up and was submitted at the last meeting of the Office International in April of this year. Th:s certificate was received very favorably and is now in use at a number of the quarantine stations of the Public Health Service for recording results of inspections for rat infestation and rat harborage.

At the meeting of the First Pan American Conference of Directors of Health, which met in Washington, September 27-29, 1926, a committee was appointed to formulate a program for the investigation of plague. This committee consisted of Dr. Lucas Sierra, of Chile; Dr. Pablo A. Suarez, of Ecuador; and Dr. S. B. Grubbs, United States Public Health Service. This committee recommended that the Pan Amer:can Sanitary Bureau request each of its signatory powers to begin in one or more places, preferably ports, a plague survey of rats and fleas. Some of this work has now been started and reports of these surveys are being received, particularly from Ecuador. Ratflea surveys are now being conducted in New York; San Juan, P. R.; Savannah, Ga.; and Norfolk and Newport News, Va.
Medical inspection of aliens.-There were 881,699 alien passengers and 996,198 alien seamen examined by medical officers at the various stations. Of this number 24,292 passengers and 3,117 seamen were "certified" in accordance with the act of Congress approved February $5,1917$.

The most important causes of certification of alien passengers were trachoma, 412; tuberculosis, 213; feeble-mindedness, 168; insanity, 87; syphilis, 96 ; and gonorrhea, 354.

Of the alien seamen certified 112 were for trachoma, 44 for tuberculosis, 420 for syphilis, 428 for chancroid, and 915 for gonorrhea.

Examination of alien passengers abroad.-There were 148,539 applicants for immigration visas examined by medical officers abroad. Of this number, 1,502 were reported to the consular officers as afflicted with one or more of the diseases listed in class A as mandatorily excludable; 11,485 were reported as afficted with a disease or condition listed in class $\mathbf{B}$ as liable to affect their ability to earn their own living; 1,496 of the applicants reported in class A and 5,084 of those reported in class B were refused immigration visas by the consular officers because of the result of the medical examination.

Of 141,959 aliens who had been given a preliminary medical examination abroad and to whom visas had been issued, only a total of 9 were certified upon arrival at a United States port as being afflicted with class A diseases, resulting in mandatory deportation.

## Division of domestic quarantine

Public health problems resulting from the Mississippi flood were immediately met by the detail of Public Health Service officers to work in cooperation with the American Red Cross headquarters and with the State health officers in the flood area. Through the Public Health Service public health personnel for the affected area was secured not only from the Federal Government but from State and local health organizations throughout the country. In addition to trained personnel, biologic products such as smallpox vaccine, antityphoid vaccine, and the like were obtained from State and municipal agencies in the large quantities required. Response to the appeals for assistance were so prompt and generous that all needs were supplied within a few days from the beginning of the flood.

Upon the return of the people in the flooded area to their homes a comprehensive plan of county health work was developed; which, in the opinion of Federal and State health officials, Red Cross representatives, and representatives of the Rockefeller Foundation, will meet the needs during the rehabilitation period, and afford a foundation for the development of permanent health service. This plan was developed at a conference of public health officials and others held in New Orleans, La., on June 5, 1927.
As presented to the department and approved, the plan provides for the establishment of county health units in the affected counties to be conducted under the immediate direction of the State boards of health and county authorities and made possible through the financial cooperation of the United States Public Health Service and the Rockefeller Foundation. It is proposed that this arrangement continue for a period of 18 months from the time of its establishment, when it is believed that the States and communities will be in position to assume a much larger proportion of the expense, and that a reorganization of the plan will be in order.

Ninety counties in 7 States (Kentucky, Tennessee, Mississippi, Missouri, Louisiana, Illinois, and Arkansas) are included in the plan: During the fiscal year 1928, the cost of the work to the several agencies is estimated as follows:

| State departments of health | \$198, 245 |
| :---: | :---: |
| Counties | 365, 390 |
| United States Public Health Service | 262, 000 |
| Rockefeller Foundation | 130,000 |
| - | 955, 635 |

Through its participation in the plan as indicated, the United States Public Health Service will be enabled to prevent the spread of smallpox, trachoma, and typhoid fever within the flooded areas and to other States, and to meet any emergencies due to other epidemic diseases that may arise. .. Through the program of work thus promptly inaugurated, grave apprehension on the part of the people in the flooded region as to the likelihood of widespread occurrence of pestilential disease following the flood has been allayed and confidence in health protection and conservation is being restored.

A serious epidemic of typhoid fever, resulting in approximately 5,000 cases of that disease and 500 deaths, developed in Montreal, Canada, beginning about March 1, 1927. The problems in connection with the prevention of the spread of the disease to the United States became so acute that a board of commissioned officers was detailed to make a survey of the typhoid fever situation in Montreal, permission having been granted by Canadian health officials. It was ascertained that the cause of the epidemic was infected milk, and the conclusions of the board were to the effect that Montreal for the time being was not a comparatively safe place for visitors. In addition health authorities of the States receiving shipments of milk and cream from Canada were strongly advised to see that all such products were pasteurized or otherwise processed under official supervision, so as to be rendered free from typhoid, tuberculosis, or any other infection liable to endanger human health.
Immediately upon notification of the hurricane disaster in Florida two medical officers and three sanitary engineers were dispatched to the disaster area for the purpose of aiding State and local health authorities in emergency measures for the protection of the public health. Smallpox vaccine and other biologic products were made available, and advice and assistance were given in the safeguarding of water supplies, sanitary disposal of wastes, and prevention of mosquito breeding.

No human plague has occurred in the United States during the current fiscal year. Plague in ground squirrels continues to exist over a large section of California and is a continuous public health
menace. Present methods of operation are not sufficiently intensive to eradicate ground-squirrel plague.

Hospitals for the eradication of trachoma, conducted in cooperation with State and local authorities, were operated at Rolla, Mo.; Knoxville, Tenn.; Russellville, Ark.; and Richmond, Ky.
Activities pertaining to the certification of water supplies used on trains and vessels engaged in interstate traffic were conducted as heretofore, as were activities relating to the sanitary control of shellfish and to sanitation in national parks.

The Twenty-fifth Annual Conference of State and Territorial Health Authorities with the Public Health Service was held on May 20 and $21,1927$.

## Division of scientific research

Although the intensive student of public health is constantly observing the humanitarian and economic benefits which accrue from the application of scientific research in his subject, these benefits are often less apparent to those immersed in other affairs and to the public, unless some large emergency brings them conspicuously to light. During the past year the great emergency precipitated by the Mississippi floods gave opportunity for the application on a large scale of methods which had been developed in the kind of researches carried out by the Public Health Service and here briefly summarized. The malaria researches developed methods of screening the ill-constructed cabins commonly encountered in certain malarious regions, so that a great measure of protection against the mosquito carriers of the disease was afforded at moderate costs. The nutrition researches have ascertained the pellagra-preventing properties of many common foodstuffs, so that it is possible to select a dietary calculated to prevent pellagra. Aside from certain diseases, the method of prevention of which was already known, malaria and pellagra were the most serious menaces to the flood-stricken populations, and these researches have furnished the most practicable and economic means for minimizing the danger.

The stream-pollution studies have furnished during the year additional instances of the value of resorting to scientific inquiry rather than to legal controversy in the settlement of sanitary questions arising from the pollution of interstate waterways, as well as of the indispensable nature of fundamental studies which made these inquiries possible.

The areas in which Rocky Mountain spotted fever is prevalent are becoming opened up more and more to tourist and commercial invasion, thus magnifying the danger of increasing the number of infections with this often fatal malady. The administration of a vaccine devised and prepared by research workers of this service 64761-FI 1927-17
appears to have greatly reduced the number of infections and absolutely prevented fatal outcomes for the exposed persons who received it.

Diversified studies in pressing health problems encountered in industry have continued to furnish reliable and up-to-date information of value both to employers and employed. The studies of certain aspects of child hygiene have been continued with satisfactory progress. The sanitary studies of milk supplies have been of noteworthy benefit in the places where they have been carried out, resulting not only in improving to a marked degree the safety of milk from a health standpoint; but in actually increasing the total supply of market milk, while the administrative difficulties of health officials have been reduced and the producers encouraged to improve their methods. In view of the disasters which can be caused by improperly controlled milk, as illustrated during the year in a large Canadian city, the importance of these studies is self-evident.

The survey of the salt-marsh mosquito menace completed its first full season with several reassuring developments. The problem, which is serious enough from an economic standpoint, appears, however, not to have the stupendous scope which was assumed from a preliminary study of the maps. The immense potential mosquitobreeding area appears to be producing only in certain spots, and it is believed that sufficiently cheap methods of eradication may be developed greatly to ameliorate conditions.
At the Hygienic Laboratory studies of great diversity have been prosecuted, ranging from those in the underlying sciences on which modern health practice is founded to investigations of acute practical problems demanding early solution. Among the latter is the somewhat disturbing increased prevalence of typhus fever in this country, which offers some unexplained differences from the accepted conception of European typhus, although evidently due to an identical ultimate agent.

Among other studies in which satisfactory progress has been made are those of leprosy, goiter, influenza, Malta fever, and trachoma. In the case of tularaemia, accumulating evidence shows this disease, discovered during researches conducted by the service, is widespread throughout many parts of the country, although the actual number of human infections has fortunately been relatively small. The means of avoiding this infection having been shown, it is hoped that still fewer cases will be encountered in the future.

It is apparent that no matter how much knowledge may be available regarding the means of avoiding disease and improving health these ends will not be achieved unless the knowledge becomes applied. For this reason the Public Health Service attempts to bring this knowledge to the attention of health officials, physicians, and the
general public by all available measures. Among these perhaps none is more helpful than the publishing of the results of surveys of health administration in States and cities. During the past year the assembled surveys of the 100 largest cities of the United States were published by the service, thus enabling health officials to become acquainted with current practice in many places and to profit in their own jurisdiction by the advances or the mistakes which were being made elsewhere.

## Division of marine hospitals and relief

The American merchant marine, which in 1789 carried only 201,562 tons of cargo, now carries more than $17,000,000$ tons annually and employs nearly a quarter of a million seamen. The medical care and treatment of merchant seamen was undertaken by the Federal Government in 1798 and has been continued, without interruption, as a tangible contribution to the effort to keep the merchant flag on the seas. Many merchant seamen are still living who contributed to the Marine Hospital fund directly from their wages according to laws existing previous to 1884 , when direct levies were discontinued and the tonnage tax on vessels was imposed. Among these seamen and some others there is a widespread belief that sums greatly in excess of expenditures were thus collected by the Government between 1798 and 1884. This fallacy has sometimes resulted in criticism of the Federal Government and merits a correction. All collections from seamen from 1799 to 1884, inclusive, aggregated $\$ 15,794,807.63$, the amounts collected from each seaman by the customs officers being 20 cents per month from 1799 to 1870 , and 40 cents per month from that time until 1884.

Cost of construction, repairs, and maintenance of marine hospitals, fiscal years 179S-1884, inclusive

| Fiscal year | Cost of construction, repairs, etc. | Cost of maintenance | Fiscal year | Cost of construction, repairs, etc. | Cost of maintenance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1798-1877. | \$3;304, 704.80 | \$13,302,667.06 | 1882 | \$54, 192.02 | \$413, 928.14 |
| 1878... | 8,140.01 | 367, 950.32 | 1883 | 45, 138.16 | 434, 525.29 |
| 1879 | 5, 051.17 | 375, 164.01 | 1884 | 37,460. 08 | 456,767. 37 |
| 18801 | $12,050.74$ $2,042.75$ | $402,185.49$ $400,404.46$ | Total | 3, 468, 779.73 | 16, 153, 502.14 |

It is evident from the above statement that the sums collected from seamen did not equal the expenditures for the period, which aggregated for maintenance and construction purposes $\$ 19,622,371.87$.

During the fiscal year ended June 30, 1927, approximately 300,000 beneficiaries applied at the 25 United States marine hospitals and 126 other relief stations of the Public Health Service, of whom 41,951 were treated in hospitals, 210,252 in out-patient offices, and 62,008
were given physical examinations not related to treatment and requiring a written report to the master of an American vessel or some requesting agency of the Federal Government. Civilian seamen from American merchant vessels continued to be the principal beneficiaries, a complete list of which follows:

Seamen, American merchant marine.<br>Officers and enlisted men, United States Coast Guard.<br>Officers and seamen, United States Coast and Geodetic Survey.<br>Keepers and assistant keepers, United States Lighthouse Service.<br>Seamen, vessels of the United States Army (Engineer Corps and Army Transports).<br>Seamen, Mississippi River Commission.<br>Patients of the United States Employees' Compensation Commission.<br>Lepers.

## PAY PATIENTS

Patients of the United States Veterans' Bureau.
Personnel of the Army, Navy, and Marine Corps.
Foreign seamen and nonbeneficiary seamen.
Immigrants.
PHYSICAL EXAMINATIONS ONLY
Civil service applicants and employees.
Civil service employees for retirement.
Civil service employees suspected of having tuberculosis or other communicable disease.

Applicants for pilot's license.
Able-bodied seamen, for rating.
Applicants for military pensions.
Applicants for Officers' Reserve Corps, United States Army.
Applicants for citizens' military training camps.
Food handlers on vessels engaged in interstate trade.
Applicants for aviator's license to the Department of Commerce.
Medical officers on duty at marine hospitals and relief stations, in addition to their other duties, instruct and examine all ships' officers for American vessels in first aid; give medical advice by radio to inquiring ships at sea; issue permits to ships for medicinal liquor and narcotics and bills of health to outbound vessels; make special investigations of claims for compensation for injury for the Enpployees' Compensation Commission and for the Committee on Claims, House of Representatives; vaccinate Government employees engaged in handling mail or in interstate or foreign travel; inspect immigrants; treat sick immigrants and detained Federal prisoners; and serve on all Coast Guard boards for admission, promotion, and retirement. Twenty-four medical and dental officers are detailed to the commandant, United States Coast Guard, for duty aboard cruising cutters and elsewhere, and 99 contract physicians provide emergency medical care for small Coast Guard stations remote from marine hospitals and other regular relief stations. Medical supplies are furnished to all ves-
sels and shore stations of the Coast Guard and vessels of the Lighthouse Service. The personnel of the Coast Guard now numbers 10,984 officers and men, an increase of 11.62 per cent for the year, and furnish approximately 14 per cent of the hospital and out-patient clientele.
The number of physical examinations has increased rapidly within recent years, particularly among civil service applicants and postoffice employees, and it was not possible to comply with all requests, although a careful physical examination by an impartial medical officer is of great value in determining fitness for specified duties, in preventing sickness and disability, and to safeguard against fraudulent claims for compensation. It is of much greater value than what President Harding termed "the friendly certificate of the family physician." The secretary of the Civil Service Commission, in a letter dated June 27, 1927, states that because of recent legislation enlarging the benefits to employees under the retirement and the employees' compensation statutes an increasing number of physical examinations will be required. The chairman of the Employees' Compensation Commission, in a letter dated June 21, 1927, has also requested a much larger amount of service than that previously rendered because of the longshoremen's and harbor workers' compensation act, affecting approximately 400,000 longshoremen and harbor workers and requiring examinations involving a very special degree of care, amounting often to complete medical surveys. The Post Office Department, in a letter dated June 22, 1927, requests additional services involved in the physical examination of post-office employees to determine fitness for certain duties and for first aid in the large establishments. To comply with the above requests it will be necessary to increase the appropriations to augment the personnel at the relief stations concerned, and estimates to the desired end have accordingly been made by the Surgeon General.

## Division of venereal diseases

Various phases of research in connection with venereal diseases were undertaken during the year. One of the most important of these has been the effort to determine the prevalence of these diseases in the general population, which has been carried out in a number of cities and rural districts. As a result of these studies it has been found that on an average 1.5 per cent of the population of the cities studied are constantly under treatment for gonorrhea or syphilis.

The venereal-disease clinic at the Hot Springs National Park has been continued, 3,682 patients receiving 58,489 treatments during the year. This clinic serves as a laboratory in which various practical phases of venereal-disease control can be investigated. Attention
was given to the prevention of venereal diseases among beneficiaries of the service by the utilization of the facilities offered in certain of the marine hospitals for study of more effective measures of prevention and treatment. A publication was issued which was designed primarily for merchant seamen giving the facts concerning venereal diseases and their prevention. During the year studies were undertaken to determine the value of nonspecific methods of therapy in syphilis, to investigate the immunity which is developed during the course of this disease, and to investigate certain bacteriological problems in gonorrhea.

Although no money has been appropriated since 1925 for allotment to States for venereal-disease control, active cooperation of the States has been maintained, and reports are being received regtilarly from nearly. 500 venereal-disease clinics in which 107,688 patients were given $1,964,233$ treatments during the year.

Educational work consisted of informing the public through bulletins, pamphlets, and motion pictures of the importance of the vene-real diseases, in furnishing material to more than 200 summer schools upon which they based courses in sex education, and a study of methods being employed in the high schools of the country in connection with sex hygiene and venereal-disease control. This study initiated such a large volume of requests for information from school authorities that a symposium on sex education was issued and is being distributed to them.

## Division of personnel and accounts

At the close of the fiscal year the regular commissioned officers of the service numbered 228, which included the Surgeon General, 3 assistant surgeons general at large, 21 senior surgeons, 135 surgeons, 21 passed assistant surgeons, and 47 assistant surgeons. Eighteen officers were on waiting orders. Four resignations and four deaths occurred in the regular commissioned corps during the year.
Seventy-two reserve officers were on active duty July 1, 1927, including 1 assistant surgeon general, 1 senior dental surgeon. 6 surgeons, 3 dental surgeons, 9 passed assistant surgeons, 16 passed assistant dental surgeons, 31 assistant surgeons, and 5 assistant dental surgeons.

The following list shows the total personnel on duty July 1, 1927 :

Pharmacists ..... 35
Administrative assistants ..... 16
Druggists. ..... 11
Nurses ..... 342
Aides ..... 35
Dietitians ..... 21
Laboratorians ..... 26
Scientific-Hygienic Laboratory ..... 26
Pilots ..... 36
Marine engineers ..... 36
Clerks ..... 414
All other employees ..... 2, 305
Total ..... 4, 399

This total does not include 4,418 persons appointed, at nominal compensation, to assist in the collection of epidemiologic data. They are for the most part officers or employees of State and local health organizations who transmit to the service reports of disease preva-. lence gathered by those agencies.

## Financial statement

A statement of appropriations and expenditures for the fiscal year 1927 follows:

[^17]
## SECRET SERVICE DIVISION

On charges involving counterfeiting and forgery, as well as miscellaneous offenses against Federal statutes relating to the Treasury Department and its several branches, 722 persons were arrested by agents of the service or by their direction during the fiscal year ended June 30, 1927. Of the total number apprehended, 331 were note counterfeiters, passers of counterfeit notes, or engaged in raising and passing altered currency; 62 coin counterfeiters; and 249 check and bond forgers and passers.

Twenty-nine new counterfeit note issues made their appearance during the year, several productions being expertly made and widely circulated, although for the most part the specimens were crudely executed and quickly detected. The greater volume of counterfeit notes made and circulated during the year centered in and around New York City. An aggregate of $\$ 239,326.90$ in counterfeit notes, including fractional currency, was captured or seized during the year by agents of this service, and counterfeit coins, aggregating $\$ 16,729.71$, were also confiscated in connection with raids and arrests. Agents also seized or captured 309 plates for printing counterfeit obligations and securities, 43 molds for counterfeiting coins, 1 die, together with a large amount of miscellaneous materials and apparatus, including printing presses, plating outfits, ladles, melting pots, inks, cameras, files, crucibles, etc. A large number of stolen Treasury checks, either in blank or fraudulently prepared for negotiation, were recovered during the year.

Of the persons arrested for the offenses of which this service takes cognizance, 355 were convicted and sentenced, 226 are awaiting court action, and 37 were acquitted. The others were variously disposed of, some being committed to insane asylums, others turned over to military or police authorities, and four died while awaiting trial.

Agents during the year investigated 1,166 forged-check cases and 116 bond cases, as well as a number of miscellaneous matters affecting the several branches of the Treasury Department involving frauds and irregularities.

Cases involving altered adjusted service certificates, representing violations of section 704 of the World War adjusted compensation act, with the investigation of which this service is charged, are being received in this office in steadily increasing volume. In order to carry on more expediently and efficiently the work of the service,
with its added duties imposed by law in enforcing the World War adjusted compensation act, Federal farm loan act; and investigation of counterfeiting and forgery of transportation requests, it will be necesary to increase the personnel of the field force. New districts and divisions of established districts have been planned with a view to securing a wider distribution of agents, thereby enabling the division to handle more thoroughly and effectively the increasing volume of work.

Representing the Treasury Department, the chief of the Secret Service Division attended meetings of a mixed committee of experts in Geneva June 23-28 to consider the subject of suppressing counterfeiting. As a result of the committee's deliberations, recommendations for the establishment of central bureaus, uniform laws, and procedure were agreed upon to form the basis of a draft convention to be submitted to the interested Governments for ratification and approval. More or less extensive circulation in Europe of counterfeit United States currency, including altered notes, influenced the Treasury Department in sending a representative to this conference, and it is believed that the establishment of these central bureaus, charged with the specific duty of suppressing counterfeiting and providing for the direct interchange of information and records between these bureaus, will be a distinct advantage to the participating Governments having agencies engaged in stamping out counterfeiting.

# OFFICE OF THE SUPERVISING ARCHITECT 

## Operations under public buildings construction program

The Sixty-ninth Congress during the second session inaugurated a new policy in respect to public-building construction, placing upon the Secretary of the Treasury and the Postmaster General the duty of ascertaining construction needs throughout the country and submitting to Congress recommendations for appropriations.
The act, approved May 25, 1926, authorized a total of approximately $\$ 165,000,000$ to be expended at the rate of not exceeding $\$ 25,000,000$ per annum, of which $\$ 10,000,000$ may be expended in the District of Columbia.

In order to ascertain building needs throughout the country, surveys have been made of 1,950 places, partly by means of questionnaires and in the most important cases by personal inspection; based upon which recommendations have been submitted to Congress.

The act of July 3, 1926, made appropriation for carrying out a portion of this program involving (under sec. 3) 69 projects previously authorized but for which the limit of cost was insufficient, and (under sec. 5) 8 additional projects, making a total of 77 projects exclusive of the District of Columbia. To carry out this work it was necessary to make a large increase in the technical force and a lesser increase in the clerical force, which was accomplished with the assistance of the Civil Service within six months. Of the 77 places enumerated in the act, 69 were included in section 3 , of which 23 involve the acquisition of sites. As the titles to only 4 have been secured, 19 projects are necessarily deferred. Of the remaining 50 , there are 6 where the limit of cost is still insufficient, so that there are only 44 workable projects; the working drawings for most of these have been completed, and on June 30, 1927, 24 were under contract, involving $\$ 4,006,465$. It is expected that the remaining 20 will be placed under contract during the fiscal year 1928, besides the 19 involving acquisition of sites, provided titles to the sites are secured in time through the Department of Justice.

Under section 5 eight items are authorized, exclusive of the District of Columbia; three are for the purchase of sites only, which have been acquired; four projects have been placed under contract involving $\$ 899 ; 636$; and the eighth project (Memphis, Tenn.) has been delayed with the intention of securing amended legislation.
Statement of post offices, customhouses, courthouses, marine hospitals, quaran-
tine stations, sanatorinms, and miscellaneous work for the year ending June
30, 1927

Number of buildings completed (occupied or ready for occupancy) at the end of the fiscal year 1926, exclusive of marine hospitals and quarantine stations 1, 313
New buildings completed during the fiscal year ending June 30, 1927, exclusive of marine hospitals and quarantine stations_...-8

Buildings placed under contract during the fiscal year ending June 30, 1927, exclusive of hospitals

Total buildings completed and in course of erection June 30, 1927, exclusive of marine hospitals and quarantine stations.

1, 345
Euildings authorized under acts of May 25 and July 3, 1926, and all previous acts not under contract June 30, 1927, exclusive of marine hospitals, quarantine stations, and extensions

Total buildings, miscellaneous projects, etc., completed, in course of erection, or authorized, not including extensions_

Marine hospitals and quarantine stations:
Number of marine hospitals and quarantine stations (both include a number of buildings each) ; new quarantine station, Mobile, Ala. (Sand Point), completed during fiscal year

Public building acts approved May 25 and July 3, 1926, and previous acts provided for additional hospitals, two of them on new sites to take the place of old ones at present in service and two additional buildings on present sites.
Projects completed.-During the fiscal year 1927 eight Federal buildings were completed at Cheboygan, Mich., Comanche, Tex., Fairmont, Minn., Prescott, Ark., Sandusky, Ohio, Tullahoma, Tenn., Walden, N.s Y., and Vineland, N. J.; also an additional story at Sandusky, Ohio, and betterments at Prescott, Ariz.

Eighteen major miscellaneous projects were completed, with a total expenditure of $\$ 267,522.68$, and one quarantine station at Mobile (Sand Point), Ala.

Projects in course of construction.-On June 30, 1927, 24 Federal buildings were in course of construction at Athens, Tenn., Bayonne, N. J., Branford, Conn., Buffalo, Wyo., Central City, Nebr., Chamberlain, S. Dak., Cody, Wyo., East Las. Vegas, N. Mex., Lancaster, S. C., Leominster, Mass., Lewistown, Pa., Madison, Wis., Marianna, Fla., McKees Rocks, Pa., Montclair, N. J., Montevideo, Minn., Mount Carmel, Ill., Newburyport, Mass., Red Bluff, Calif., Sandpoint, Idaho, Shelbyville, Ky., Syracuse, N. Y., Winchester, Mass., and Yonkers, N. Y., at a cost of approximately $\$ 4,006,465$. Also first extension at Missoula, Mont.: additional story at Paris, Tex.; additional story at Birmingham, Ala.; and medical officers' quarters, attendanté' quarters, and rehabilitation of the hospital building and
extension to the power house, marine hospital, Chicago, Ill., totaling approximately $\$ 912,326$, making a grand total of $\$ 4,918,791$.

The office is called upon to make examinations of the structural safety of the various buildings in Washington, D. C., under the control of the Treasury Department, as well as other departments, and also give expert technical advice to various departments, which includes the preparation of drawings and specifications.

Under authority of the acts of June 7, 1924, and of July 2, 1926, the construction of 15 buildings, including water supply, sew-age-disposal plant, and other utilities, aggregating. in cost nearly $\$ 1,000,000$, were completed at the Federal Industrial Institution for Women, Alderson, W. Va. The institution is now in operation with a limited number of inmates. Plans were completed and contracts a warded for 17 additional buildings, in amount $\$ 662,242.15$. This fulfills the requirements of the acts to provide an institution for 500 inmates.

Under authority of the act of March 4, 1924, the construction of a hospital for disabled volunteer soldiers at Sawtelle (Santa Monica), Calif., was completed at a cost of nearly $\$ 1,200,000$, giving a bed capacity of 525 .

Buildings authorized in public building acts approved May 25, 1926, and July 3, 1926, and all previous acts

Detroit, Mich. : New hospital. Cleveland, Ohio: New hospital.

## District of Columbia building program

At the present time the preliminary drawings for the Department of Commerce Building are approaching completion, and their approval in the near future will be followed by the development of the actual working drawings and preparation of the specifications. As the site for this building is now owned by the Government, it may be possible to enter into a contract for general excavation for the new building before January 1 and to proceed with the main contracts for the construction work before the end of the fiscal year. In the meantime a contract is to be awarded for the demolition of existing buildings on the site.
Preliminary drawings for the Internal Revenue Building, revised to conform to the new grouping for buildings in the triangle area, are about completed. The site for the Internal Revenue Building, lying between B and C and Tenth and Twelfth Streets, includes square 350 , which the Government is seeking to acquire by condemnation, and an award is promised in the very near future. Pending the entire removal of the farmers' market, with the cooperation of the District Commissioners, arrangements are being made to vacate the western half of that space, and this will enable the Treasury Department to proceed with the construction of at least one-half of the Internal Revenue Building as soon as the necessary drawings and
specifications are completed. Indications are that the first contract for excavation should be in force about the end of the present calendar year and that contracts for the remainder and for the construction of the building proper will follow in proper sequence.
Under the authorization for additional buildings for the Department of Agriculture, drawings are in preparation for a central wing to connect the two existing wings of the main Agriculture Department Building, and it is hoped to have the drawings ready for the solicitation of proposals in March next. Drawings are nearly completed for a large office and laboratory building to be constructed on square 264. This building is so designed as to permit future expansion to squares 296 and 263 . Condemnation proceedings are necessary to acquire square 264, and this matter is now in the hands of the Department of Justice.

In connection with the proposed archives building a very careful study is being made as to the requirements of the building as affected by the amount and character of the files in the various executive departments and independent establishments. The detail involved in this procedure is considerable and must be completed before any steps can be taken other than the making of preliminary studies which have been prepared for this building.

## Remodeling and enlarging public buildings

There was an appropriation of $\$ 600,000$ for the fiscal year 1927 for remodeling and enlarging public buildings. The limit of expenditure for any one building under this appropriation was $\$ 20,000$. Under this authority 107 buildings received attention. In 51 of these the contracts ranged from $\$ 1,190$ to $\$ 19,867$, totaling $\$ 598,453.95$.

## War claims

Under the acts of August 25, 1919, March 6, 1920, and January 22, 1.926, which permitted the filing of claims for relief to contractors, subcontractors, and others for reimbursement for losses alleged to have been due to war conditions, 193 claims including all special claims were paid up to July 1, 1926, and the balance paid on a special claim up to July 1, 1927, making a total payment of $\$ 2,640,244.52$. Total amount appropriated by Congress, $\$ 2,650,000$; balance, $\$ 9,755.48$.
There are still pending 57 claims awaiting audit, and 2 claims a waiting court decision. The status of war claims at the close of business June 30, 1927, is shown in the following table:

| 340 claims filed, original amount------------------------------13, 202, 113. 29 |  |

[^18]Classifcation of public buildings under control of the Treasury Department, by titles, showing expenditures in each class, prepared pursuant to act approved June 6, 1900 ( 31 Stat. 592)

## DIVISION OF SUPPLY

The Division of Supply (which was known as the Bureau of Supply prior to July 1, 1927), was recognized by Congress as a division of the office of the Secretary of the Treasury in the act of January 26, 1927 (44 Stat. 1029), which provided an appropriation for its personnel. In anticipation of this action on the part of Congress, the former division of printing was transferred to and consolidated with the Division of Supply during the fiscal year 1927, and consequently appropriations for the division of printing as a separate office of the department ceased with that fiscal year.

The Division of Supply is the central procuring or purchasing agency of the Treasury Department, and as such it does the purchasing for all local and field activities, with the exception of those from appropriations for the Bureau of Engraving and Printing (which are exempted by law), the Coast Guard, and to some extent the Bureau of the Mint. It is charged also with certain duties closely related to purchasing, such as accounting for funds appropriated or allotted to it; supervision over printing and binding for the Treasury Department and engraving work by the Bureau of Engraving and Printing for all departments and establishments, unless money, bonds, or stamps are involved; control over newspaper and periodical advertising for the department; routing of all freight, express, and parcelpost shipments; and warehousing and distribution of stationery and miscellaneous supplies, including blank books and forms, to Washington and field offices of the Treasury Department. The appropriations to the department for purchases of stationery, for printing and binding, and for postage are under its administrative control, and it exercises immediate supervision over the work of the General Supply Committee.

Expenditures from various appropriations
The following table gives the total cost of purchases made by the Division of Supply during each of the past five fiscal years from specified appropriations from which allotments were made to the division to cover expenditures made by it, and also purchases chargeable to appropriations from which no allotments were made:

Expenditures by Division of Supply, fiscal years 1923-1927, by appropriations

- Purchasing for Supervising Architect transferred to Division of Supply on Oct. 17, 1922.
- Under supervision of Commissioner of Internal Revenue prior to fiscal year 1927.
' Appropriation accounting for these purchases was done by bureaus and offces for which the purchases were made.

The expenditures detailed in the foregoing table involved the examination and audit for settlement through the disbursing clerk of the Treasury Department of 87,982 vouchers in 1927 and 84,465 in 1926, an increase of 3,517 .
The possible cash discounts for prompt payments of bills aggregated $\$ 12,377.65$ and $\$ 11,153.86$ in 1927 and 1926, respectively, of which only $\$ 234.71$ in 1927 and $\$ 296.99$ in 1926 were lost, due generally to failure of vouchers requiring certifications of field officers to reach the division for settlement within the limited periods for discounts.
During the fiscal year 1927 the purchasing work of the division required the preparation and issue of 38,886 formal purchase orders, an increase of 3,929 over the number for 1926, which was 34,957 .

Open-market purchases by the division required the preparation and circulation among'approximately 95,000 prospective bidders of 7,025 sets of specifications and invitations for proposals in 1927,
compared with 5,993 sets in 1026 , an increase of 1,032 , or more than 17 per cent.
In February, 1923, the department adopted the policy of carefully routing every freight and express shipment made by its several bureaus and offices, with the view of getting the benefit of the most economical transportation. This work has been done vigilantly during the past year, with considerable savings to the department's appropriations.

## Purchases and issues of stationery supplies

The appropriation to the department for stationery for the fiscal year 1927 was $\$ 480,000$, of which $\$ 443,446.53$ was expended, leaving a balance of $\$ 36,553.47$ to revert to the Treasury. In addition, $\$ 15,110.04$ was expended for stationery from other available appropriations, making a total of $\$ 458,556.57$ expended in 1927 , compared with $\$ 436,405.17$ in the preceding fiscal year, or an increase of $\$ 22,151.40$.

The following statement summarizes the appropriations, reimbursements, and expenditures for articles of stationery for the past five years:

Appropriations, reimbursements, and expenditures for stationery, fiscal years

|  | 1023 | 1924 | 1925 | 1926 | 1027 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Appropriation. | \$388, 450. 00 | \$349, 815.00 | \$350, 000.00 | \$437, 760.00 | \$480, 000.00 |
| Reimbursements. <br> A vallable credits <br> Transferred to Department of Commerce.- | 125, 298. 50 | 122, 719.08 | 83, 332.85 | 67, 440.52 | 15, 110. 04 |
|  | 513, 748. 50 | 472, 534. 08 | 433, 332. 85 | 505, 200. 52 | 495, 110. 04 |
|  | 2,400. 00 |  |  |  |  |
| Total expenditures........-...-.-.-.-. ------- | 511, 348. 50 | 472, 534. 08 | 433, 332. 85 | 505, 200. 52 | 495, 110. 04 |
|  | 505, 023. 56 | 441, 764, 69 | 426, 285. 29 | 436, 405. 17 | 458, 656, 67 |
| Balance | 6,324. 94 | 30, 769, 39 | 7,047. 66 | 68, 795. 35 | 36, 553. 47 |

The issues of stationery items, as distinguished from expenditures therefor, during the fiscal year 1927 totaled $\$ 463 ; 666.67$, which were $\$ 10,442.43$ in excess of the issues for the preceding fiscal year, when they totaled $\$ 453,224.24$. Of the total issues, $\$ 448,556.63$ in 1927 and $\$ 385,783.72$ in 1926 were chargeable to the departmental appropriation for stationery, while $\$ 15,110.04$ in 1927 and $\$ 67,440.52$ in 1926 were reimbursed from various other available appropriations.

The value of stationery articles issued in 1927 was $\$ 5,110.10$ in excess of expenditures therefor, but both a cancellation of this deficiency and a further addition to the inventory value of stock on hand resulted from surrenders of surplus stock from some of the bureaus of the department.

The following table shows the value of stationery supplies issued to each bureau, office, and service of the department during each of the last five fiscal years:

Issues of stationery supplies to bureaus, offices, and services of the Treasury Department, fiscal years 1923-1927

1 Included in Division of Supply in 1927.

## Shipments and inventories

Warehouse shipments of stationery and miscellaneous supplies by the Division of Supply from Washington to field offices totaled 14,849 packages, boxes, etc., weighing 629 tons, in 1927, compared with 12,604 packages, etc., weighing 598 tons, in 1926. The shipments in 1927 were made up of 4,597 franked parcels, weighing 13,791 pounds; 1,784 parcel-post packages, weighing 21,560 pounds, and costing $\$ 1,132.69$ in postage; and 8,468 express and freight boxes, crates; etc., weighing $1,223,738$ pounds (of which only 6,732 pounds were shipped by express). The freight and express shipments involved the use of 2,911 Government bills of lading in 1927, against 2,346 in 1926.

Shipments by mail of blank forms in 1927 aggregated 7,725 sacks, containing 254,750 packages, weighing 545,000 pounds, or 272 tons.

Thus, the total of warehouse shipments to field offices was 901 tons, or about. 3 tons for each working day. The increased weight of the shipments over those of 1926 was approximately 28 tons.

A summary of conditions portrayed by the annual inventory of the stock of stationery supplies is shown in the following table:

|  | 1923 | 1924 | 1925 | 1926 | 1927 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| On hand at beginuing of fiscal ye | \$173, 477. 27 | \$215, 442. 22 | \$155, 290.37 | \$162, 070. 26 | \$157, 399. 28 |

The July 1, 1927, inventory rèvealed a stock of $32,239,145$ blank books and forms valued at $\$ 121,665$, compared with $37,285,575$, valued at $\$ 135,905.56$, a year ago. This is exclusive of internal revenue and prohibition forms, the stock of which is held by the Bureau of Internal Revenue.

## Printing and binding

A most gratifying decrease is reported in expenditures for printing and binding during the fiscal year 1927 compared with 1926, this making possible a return to the Treasury of an unexpended balance of $\$ 120,428$ from the appropriation for this service. The total expenditures were $\$ 884,275.95$ in 1926 and $\$ 788,641.70$ in 1927.

Expenditures for printing and binding, by bureaus, offices, and services, for each of the last five fiscal years are shown in the following table:
Appropriations, expenditures, and reimbursements for printing and binding, fiscal years 1929-1927 ${ }^{1}$

## Postage

The expenditures for postage for the fiscal year 1927 to prepay matter addressed to Postal Union countries and for postage for the Treasury Department were as follows: For postage stamps for department use, $\$ 804.34$; for transmission of matter addressed to Postal Union countries through the Bureau of International Exchanges, $\$ 153.95$; for publications mailed by the Superintendent of Documents for the department, $\$ 41.71$; a total of $\$ 1,000$, corresponding with the exact amount of the appropriation for the purposes described. The expenditures for 1927 were $\$ 3.72$ in excess of those for 1926 , when $\$ 996.28$ was expended from a like appropriation.

## Department advertising

Authorizations to publish advertisements were issued to 2,543 newspapers and periodicals in the fiscal year 1927, an increase of 118 over 1926 , when the number was 2,425 , while the expenditures thus authorized increased from $\$ 17,473.26$ in 1926 to $\$ 23,062.39$ in 1927, the actual increase being $\$ 5,589.13$.

## General Supply Committee

Purchases made under General Supply Committee contracts during the fiscal year 1927 show an increase of $\$ 781,323.06$ over those for 1926. Reported purchases, which aggregate $\$ 7,506,923.41$, represent increased consumption of practically all classes of commodities, as there was no general increase in cost.

There was a material reduction in the amount obtained from the disposition of surplus property, caused by both lower prices and smaller quantities. There was realized from public and contract sales $\$ 144,449.05$, and receipts from transfers to Government activi-*
ties amounted to $\$ 33,085.62$, making a total of $\$ 177,534.67$ deposited in the Treasury from this source. This is a reduction of $\$ 85,155.56$ from the amount derived from the disposition of surplus during 1926, which was $\$ 262,690.23$.
The following statement summarizes these transactions for the fiscal years 1925, 1926, and 1927 :

## TREASURER OF THE UNITED STATES

During the fiscal year 1927 the total ordinary receipts from all sources (exclusive of postal revenues) on the basis of daily Treasury statements revised were $\$ 4,128,422,887.61$, an increase of $\$ 165,451,-$ 322.64 as compared with those for the fiscal year 1926. The cash expenditures chargeable against ordinary receipts amounted to $\$ 3,493,507,876.75$. The net result for the fiscal year was an excess of ordinary receipts over total expenditures chargeable against ordinary receipts of $\$ 634,915,010.86$. The postal revenues deposited in the Treasury and credited to the account of the Post Office Department during the fiscal year 1927 amounted to $\$ 683,754,924.75$.
Receipts from tolls, etc., for movement of tonnage through the Panama Canal during the fiscal year 1927 were $\$ 25,544,701.45$, as compared with $\$ 23,941,917.87$ for the previous fiscal year. Disbursements made on account of the canal, exclusive of fortifications, on the basis of warrants drawn (not cash expenditures), were $\$ 7,613$,376.03 for the fiscal year 1927, as against $\$ 8,419,333.57$ for the fiscal year 1926.

The receipts and expenditures on account of the principal of the public debt during the fiscal year 1927 are shown in the following statement:

Receipts on account of-

$147,200,000.00$
Treasury notes and certificates of indebtedness (civil

$59,300,000.00$
Treasury notes
1, $360,456,450.00$
Treasury bonds
467, 801, 650. 00
Treasury savings securities.
13, 572, 408. 43
Postal Savings bonds
689, 620. 00
Deposits for retirement of national-bank notes and
Federal reserve bank notes
$27,828,137.50$
Total
$5,185,083,265.93$
Expenditures on account of-
Certificates of indebtedness
$2,875,354,000.00$
Treasury notes and certificates of indebtedness (adjusted service series)
$38,200,000.00$
Treasury notes and certificates of indebtedness (civil service retirement fund series)
$13,700,000.00$

 260

The retirements of the debt were effected as follows:

The balance in the gold fund of the Federal Reserve Board at the close of the fiscal year 1926 was $\$ 1,717,348,235.12$. During the fiscal year 1927 deposits were made therein aggregating $\$ 1,267,151,059.74$, and withdrawals therefrom amounted to $\$ 1,272,496,358.94$, leaving a balance on June 30, 1927, of $\$ 1,712,002,935.92$.
The gold reserve received an increase during the fiscal year of $\$ 1,231,834.78$ on account of franchise tax receipts. The Secretary of
the Treasury, exercising the discretion given him under provisions of existing law, directed that the aggregate amount of franchise tax receipts paid into the Treasury by the Federal reserve banks and Federal intermediate credit banks on account of earnings for the calendar year 1926 be applied to supplement the gold reserve against United States notes and Treasury notes of 1890 established by the act of March 14, 1900.

Of the amount shown in the general fund $\$ 139,873,094.78$ was held for the redemption of Federal reserve notes.

Public moneys on deposit in designated Government depositaries, exclusive of items in transit, on June 30, 1927, amounted to $\$ 257$,091,107.83, distributed as follows:

Depositaries:

During the fiscal year 1927 interest accrued on balances held by general and limited national-bank, foreign, and insular depositaries amounting to $\$ 520,421.69$, and on balances arising from the sales of bonds, notes, and certificates of indebtedness, amounting to $\$ 4,212,265.07$, making a total of $\$ 4,732,686.76$.
Funds aggregating $\$ 121,539,768$ were transferred by wire through the Federal reserve banks and branches to national-bank and insular depositaries and the Philippine treasury to restore balances depleted by cashing Government checks and warrants during the fiscal year 1927, as against \$122,519,401 during the fiscal year 1926.

United States bonds to the amount of $\$ 666,991,130$ pledged to secure national-bank note circulation were in the custody of the Treasurer at the close of the fiscal year 1927. United States bonds and other securities held to secure public deposits in national banks amounted to $\$ 46,741,500$ and securities held for the safe-keeping of postal deposits in postal savings depositaries amounted to $\$ 165,485,622$. Under provisions of law or by direction of the Secretary of the Treasury the Treasurer of the United States is custodian of several special trusts consisting of bonds and other obligations to the amount of $\$ 11,452,641,497.44 \frac{2}{3}$. The aggregate amount of the trust accounts is $\$ 12,331,859,749.442 / 3$.

The proceeds of currency counted into its cash by the National Bank Redemption Agency during the fiscal year amounted to $\$ 522,596,266.57$. Of this sum $\$ 503,680,969.50$ was in national-bank notes, $\$ 917,073$ in Federal reserve bank notes, $\$ 17,828,962.50$ in Fed-
eral reserve notes, and $\$ 169,261.57$ in United States currency. Canceled and uncanceled Federal reserve notes amounting to $\$ 1,370$,635,100 were received from Federal reserve banks and branch Federal reserve banks for credit of Federal reserve agents. Such notes are settled for between the Federal reserve banks and the Federal reserve agents either direct or by adjustments in their redemption funds, and are therefore not taken into the cash accounts of the National Bank Redemption Agency. The number of notes counted, sorted, and delivered by the agency during the fiscal year was $211,056,618$.
The number of pieces of paper currency issued directly by the Government (gold certificates, silver certificates, and United States notes) during the fiscal year 1927 was $634,132,800$, with a valuation of $\$ 1,406,168,000$, as against $646,267,503$ pieces, with a valuation of $\$ 1,575,650,000$, for the fiscal year 1926, a decrease of $12,134,703$ in the number of pieces and $\$ 169,482,000$ in the amount.
The gold certificates outstanding decreased $\$ 65,895,350$ and the Treasury notes of $1890, \$ 32,000$, while the silver certificates increased $\$ 12,065,700$ and the United States notes remained the same. Treasury notes are no longer issued, and the amount outstanding is gradually being redeemed. Under the provisions of the act of May 31, 1878, United States notes are issued and redeemed in the same amount, and the amount outstanding does not change.
The shipments of United States paper currency from the Treasury in Washington to Treasury offices, Federal reserve banks, and others during the fiscal year 1927 amounted to $\$ 1,345,635,218$, as against $\$ 1,522,778,857$ for the previous fiscal year.

During the current fiscal year the Treasurer's office authorized and directed shipments of current gold, silver, and minor coins between the Treasury, mints, assay office, New York, and Federal reserve banks and branches for use in public disbursements and exchanges and for special purposes to an aggregate amount of $\$ 41,710,429.50$. Shipments of uncurrent coins to the mints from the Treasury and Federal reserve banks and branches were authorized in the amount of $\$ 8,900,132.01$. Transfers of gold bars were also authorized from the assay office, New York, to the Federal Reserve Bank of New York, amounting to $\$ 190,027,308.94$.
During the fiscal year 1927 funds requisitioned and advanced to United States disbursing officers by accountable warrants aggregated $\$ 2,387,473,404$ and Treasurer's checks issued on settlement warrants in payment of claims settled by the Comptroller General of the United States, General Accounting Office, aggregated $\$ 93,577,522.85$, which latter amount includes claims settled in foreign currencies by drafts purchased at a total cost of $\$ 63,331.93$. Drafts in foreign currencies were also purchased for other departments and bureaus at a cost of $\$ 40,733.92$. Accountable warrants aggregating
$\$ 7,114,486,226.99$ were also issued increasing the gold reserve and reimbursing the Treasurer for public debt principal and interest payments.

Checks drawn on this office by Government disbursing officers were paid during the fiscal year 1927 to the number of $32,741,718$, an increase over the previous fiscal year of $2,433,095$ checks. Balances to the credit of disbursing officers and Government agencies in 3;334 accounts on June 30,1927 , amounted to $\$ 396,903,153.36$, an increase of $\$ 15,778,259.26$ over the total of such balances in 3,382 accounts on June 30, 1926.

## WAR FINANCE CORPORATION

The War Finance Corporation, which has been in liquidation since January 1, 1925, continued to make steady progress in winding up its affairs. The last annual report indicated the status of the corporation's business on October 15, 1926. From that date until October 15, 1927, the expense advances made by the corporation aggregated $\$ 237,000$. During the same period the repayments on account of the corporation's agricultural and livestock loans, including $\$ 243,000$ on account of expense advances, totaled $\$ 5,057,000$. Of this amount, $\$ 1,588,000$ was repaid by banking institutions, $\$ 3,174,000$ by livestock loan companies, and $\$ 295,000$ by cooperative marketing associations, while $\$ 16,545,000$ was repaid on the corporation's war loans, making the total repayments for the year $\$ 21,602,000$.

The amount advanced by the corporation for all purposes, from its creation in May, 1918, to October 15, 1927, was $\$ 690,278,000$, of which $\$ 685,759,000$ has been repaid. The amount outstanding on the corporation's books on October 15, 1927, was $\$ 4,407,000$, of which $\$ 200,000$ represented war loans and $\$ 4,207,000$ agricultural and livestock loans (including expenses advances of $\$ 25,000$ ).

The corporation's personnel and operating expenses, both in Washington and in the field, were greatly reduced during the year, and further reductions are being made as rapidly as the condition of its business permits.

The charter of the corporation expires by law on April 4, 1928.

## Exfibit 1

## Offering of certificates of indebtedness, Series TS-1927 (31/4 per cent) (Department Circular No. 373 , December 8, 1926)

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal reserve banks, Treasury certificates of indebtedness of Series TS-1927, dated and bearing interest from December 15, 1926, payable September 15, 1927, with interest at the rate of three and one-quarter per cent per annum, payable on a semiannual basis.

Applications will be received at the Federal reserve banks.
Bearer certificates will be issued in denominations of $\$ 500, \$ 1,000$, $\$ 5,000, \$ 10,000$, and $\$ 100,000$. The certificates will have two interest coupons attached, payable March 15, 1927, and September 15, 1927.

The certificates of said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate $\$ 5,000$, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates. The certificates of this series will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. The Secretary of the Treasury also reserves the right to make allotment in full upon applications for smaller amounts, and to make reduced allotments upon, or to reject, applications for larger amounts, and to make classified allot-
ments and allotments upon a graduated scale; and his action in these respects will be final. Allotment notices will be sent out promptly upon allotment, and the basis of the allotment will be publicly announced.

Payment at par and accrued interest for certificates allotted must be made on or before December 15, 1926, or on later allotment. After allotment and upon payment Federal reserve banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depositary will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal reserve bank of its district. Treasury certificates of indebtedness of Series TD-1926, maturing December 15, 1926, will be accepted at par, in payment for any certificates of the series now offered which shall be subscribed for and allotted, with an adjustment of the interest accrued, if any, on the certificates of the series so paid for.

As fiscal agents of the United States, Federal reserve banks are authorized and requested to receive subscriptions and to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal reserve banks of the respective districts.

A. W. Mellon, Secretary of the Treasury.

## Treasury Department, Office of the Secretart, December 8, 1926.

## To the investor:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above. If you desire to purchase, at the market price, certificates of the above issue after the subscriptions close, or certificates of any outstanding issue, you should apply to your own bank. or, If it can not obtain them for you, to the Federal reserve bank of your district, which will then endeavor to fill your order in the market.

## Exhibit 2

Subscriptions and allovments, certificates of indebtedness, Series TS192" (press release, December 13, 1926)

Secretary Mellon today announced that the total amount of subscriptions received for the issue of $31 / 4$ per cent Treasury certificates of indebtedness, Series TS-1927, dated December 15, 1926, maturing September 15, 1927, aggregated some $\$ 1,096,000,000$, and that the total amount of subscriptions allotted was $\$ 229,269,500 .{ }^{1}$ As previously announced, holders of Treasury certificates, Series TD-1926, maturing December 15, 1926, were permitted to subscribe to the new issue to the extent of 50 per cent of their holdings of the maturing certificates and of these exchange subscriptions $\$ 103,888,000$ were received and allotted. All cash subscriptions in amounts not ex-

[^24]ceeding $\$ 1,000$ were allotted 50 per cent, but not less than $\$ 500$ on any one subscription; while allotments on subscriptions in amounts over $\$ 1,000$ were allotted 10 per cent, but not less than $\$ 500$ on any one subscription.
The subscriptions and allotments were divided among the several Federal reserve districts as follows:

|  | Federal reserve district | Total cash subscriptions | Total exchange subscriptions | Total subscriptions allotted |
| :---: | :---: | :---: | :---: | :---: |
| Boston. |  | \$102, 191, 000 | \$1, 208, 500 | \$13, 293, 500 |

## Exhibit 3

Offerings of certificates of indebtedness, Series TSZ-1927 (31/8 per cent) and Series TM-1928 (31/4 per cent) (Department Circular No. 378, March 7, 1927)

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal reserve banks, Treasury certificates of indebtedness, in two series, both dated and bearing interest from March 15, 1927, the certificates of Series TS2-1927 being payable on September 15, 1927, with interest at the rate of three and one-eighth per cent per annum, payable on a semiannual basis, and the certificates of Series TM-1928 being payable on March 15, 1928, with interest at the rate of three and one-quarter per cent per annum, payable semiannually.

Applications will be received at the Federal reserve banks.
Bearer certificates will be issued in denominations of $\$ 500, \$ 1,000$, $\$ 5,000, \$ 10,000$, and $\$ 100,000$. The certificates of Series TS2-1927 will have one interest coupon attached, payable September 15, 1927, and the certificates of Series TM-1928 two interest coupons attached, payable September 15, 1927, and March 15, 1928.
The certificates of said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and ( $b$ ) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits
of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate $\$ 5,000$, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. The certificates of these series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates. The certificates of these series will be acceptable to secure deposits of public moneys, but do not bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates of either or both series applied for and to close the subscriptions as to either or both series at any time without notice. The Secretary of the Treasury also reserves the right to make allotment in full upon applications for smaller amounts, and to make reduced allotments upon, or to reject, applications for larger amounts, and to make classified allotments and allotments upon a graduated scale; and his action in these respects will be final. Allotment notices will be sent out promptly upon allotment, and the basis of allotment will be publicly announced.

Payment at par and accrued interest for certificates allotted must be made on or before March 15, 1927, or on later allotment. After allotment and upon payment Federal reserve banks may issue interim certificates pending delivery of the definitive certificates. Any qualified depositary will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal reserve bank of its district. Treasury notes of Series B-1927, maturing March 15, 1927, will be accepted at par in payment for any certificates of the series now offered which shall be subscribed for and allotted, with an adjustment of the interest accrued, if any, on the certificates of the series so paid for.

As fiscal agents of the United States, Federal reserve banks are authorized and requested to receive subscriptions and to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal reserve banks of the respective districts.

> A. W. Mellon, Secretary of the Treasury.

## To the investor:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above. If you desire to purchase, at the market price, certificates of the above issues after the subscriptions close, or certificates of any outstanding issue, you should apply to your own bank, or, if it can not obtain them for you, to the Federal reserve bank of your district, which will then endeavor to fill your order in the market.

## Exhibit 4

Subscriptions and allotments, certificates of indebtedness, Series TSO1927 and Series TM-1928 (from press releases, March 10 and March 12, 1927)
Secretary Mellon announced that subscriptions for the two issues of Treasury certificates of indebtedness, Series TS2-1927, $31 / 8$ per cent, dated March 15, 1927, maturing September 15, 1927, and Series TM-1928, $31 / 4$ per cent, dated March 15, 1927, maturing March 15. 1928, closed at the close of business on March 8, 1927. Holders of $43 / 4$ per cent Treasury notes, Series B-1927, maturing March 15, 1927, were permitted to subscribe to the new issues to the extent of 50 per cent of their holdings of the maturing notes, and on these exchange subscriptions about $\$ 24,000,000$ have been allotted. Allotments on the other subscriptions for both the $31 / 8$ per cent and the $31 / 4$ per cent series were made as follows: All subscriptions in amounts not exceeding $\$ 1,000$ for any one subscriber were allotted 50 per cent, but not less than $\$ 500$ on any one subscription; subscriptions in amounts over $\$ 1,000$ but not exceeding $\$ 1,000,000$ for any one subscriber were allotted 40 per cent but not less than $\$ 500$ on any one subscription; and subscriptions in amounts over $\$ 1,000,000$ were allotted 30 per cent, but not less than $\$ 400,000$ on any one subscription.

The total amount of subscriptions received for the two issues of Treasury certificates of indebtedness, Series TS2-1927 and Series TM-1928, was $\$ 1,255,082,500$. The total amount of subscriptions allotted was $\$ 484,296,000$, of which $\$ 24,416,000$ represents allotments on subscriptions for which Treasury notes of Series B-1927, maturing March 15, 1927, were tendered in payment. All of such exchange subscriptions were allotted 50 per cent. Allotments on other subscriptions were made on a graduated scale on the basis already announced.

The subscriptions and allotments were divided among the several Federal reserve districts as follows:

| Federal reserve district | Total sub. seriptions received | Total sub. scriptions allotted | Federal reserve district | Total subscriptions received | Total subscriptions allotted |
| :---: | :---: | :---: | :---: | :---: | :---: |
| SERIES TS2-1927 |  |  | SERIES TM-1028 |  |  |

## Exhibit 5

Offering of Treasury notes, Series $A-1930-32$ ( $31 / 2$ per cent), in exchange for second Liberty loan bonds (Department Circular No. 379, March 8, 1927)

Treasury Department, Office of the Secretary, Waṣington, March 8, 1927.

To holders of second Liberty loan converted $4 \frac{1}{4}$ per cent bonds of 1927-42:

1. Second Liberty loan converted $41 / 4$ per cent bonds of 1927-42 are callable for redemption, in whole or in part, on and after November 15, 1927.
2. The Secretary of the Treasury offers for subscription, at par, through the Federal reserve banks, in exchange for second Liberty loan converted $41 / 4$ per cent bonds of 1927-42 (hereinafter referred to as second $41 / 4$ 's), Treasury notes of Series A-1930-32 of an issue of gold notes of the United States authorized by the act of Congress approved September 24, 1917, as amended. The amount of the issue will be limited to the amount of second $41 / 4$ 's tendered and accepted. The notes will be dated March 15, 1927, and will bear interest from that date at the rate of $31 / 2$ per cent per annum payable semiannually on March 15 and September 15 in each year until the principal amount becomes payable. The notes will mature March 15, 1932, but may be redeemed at the option of the United States on and after March 15, 1930, in whole or in part, on any interest day or days, on six months' notice of redemption given in such manner as the Secretary of the Treasury may prescribe. In case of partial redemp= tion the notes to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the notes called for redemption shall cease. The principal and interest of the notes will be payable in United States gold coin of the present standard of value.
3. Bearer notes with interest coupons attached will be issued in denominations of $\$ 50, \$ 100, \$ 500, \$ 1,000, \$ 5,000, \$ 10,000$, and $\$ 100,000$. The notes' will not be issued in registered form. The notes will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege.
4. Applications will be received at the Federal reserve banks. Payment for any such notes subscribed for may be made only through the surrender of a like principal amount of second $41 / 4$ 's. Interest on any such second $41 / 4$ 's so surrendered and accepted will be paid in full to May 15, 1927.
5. The notes of this series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.
6. The notes of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the notes, and, with respect to any such notes that may be called for prior redemption, will be receivable in like manner and for the same purpose at the redemption date fixed.
7.. The right is reserved to reject any subscription, in whole or in part, and to allot less than the amount of notes applied for, and to close the subscriptions at any time without notice, and the act of the Secretary of the Treasury in these respects will be final. Payment for notes subscribed for should be made when the subscription is tendered, and may be made only in second $41 / 4$ 's, which will be accepted at par. If any subscription is rejected in whole or in part, any bonds which may have been tendered and not accepted will be returned to the subscriber.
7. Surrender of coupon bonds.-Second 41/4's in coupon form tendered for exchange for Treasury notes issued hereunder should bepresented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder. Facilities for transportation of bonds by registered mail insured may be arranged between incorporated banks and trust companies and the Federal reserve banks, and holders may take advantage of such arrangements when available, utilizing such incorporated banks and trust companies as their agents. Incorporated banks and trust companies are not agents of the United States under this circular.

Coupons dated May 15, 1927, and all coupons bearing dates subsequent thereto, must be attached to such coupon bonds when presented. At the time of delivery of the Treasury notes of Series A-1930-32 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from November 15, 1926, to May 15, 1927, on the coupon second $41 / 4$ 's surrendered in exchange.
9. Surrender of registered bonds.-Second 4114's in registered form, tendered for exchange for Treasury notes issued hereunder, should be assigned by the registered payee or assigns thereof to "The Secretary of the Treasury for redemption," in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange into coupon bonds, and thereafter should be presented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder. At the time of delivery of the Treasury notes of Series A-1930-32 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from November 15, 1926, to May 15, 1927, on the registered second $41 / 4$ 's surrendered in exchange.
10. The Federal reserve banks, as fiscal agents of the United States, are hereby authorized and requested to receive subscriptions for Treasury notes hereunder, to receive second $41 / 4$ 's tendered in exchange, to make allotments of subscriptions on the basis and up to the amounts indicated to them by the Secretary of the Treasury, and to make delivery of Treasury notes on full-paid subscriptions allotted, and, pending delivery of definitive notes, to issue interim certificates.

1. Any further information which may be desired as to the exchange of second $41 / 4$ 's for Treasury notes under the provisions of this circular may be obtained upon application to a Federal reserve bank. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations. governing the exchange, and may terminate the offer at any time in his discretion.

A. W. Mellon, Secretary of the Treasury.

#### Abstract

\section*{Exhibit 6}

Exchange subscriptions and allotments, Treasury notes, Series A-1930-32

Subscription books on the offering of $31 / 2$ per cent Treasury notes of Series $\mathrm{A}-1930-32$ in exchange for second Liberty loan $41 / 4$ per cent bonds closed at the close of business March 22. The total amount of subscriptions received was $\$ 1,360,456,450$.
The allotments, by Federal reserve districts, are set forth below.

| Federal reserve district : | Total amount of allotments | Federal reserve district : | Total amount of allotments |

Financing transactions of June, 1927

## Exhibit 7

Notice of call of second Liberty loan bonds (press release, May 9, 1927, with Department Circular No. 381)

Secretary of the Treasury Mellon announces that, in accordance with the terms of the second Liberty loan bonds, requiring six months' notice of call, he is, on Monday, May 9, 1927, calling for payment on November 15, 1.927, all outstanding second Liberty loan 4 per cent bonds and second Liberty loan converted $41 / 4$ per cent bonds. Interest on these bonds will cease on November 15, 1927.
While the bonds will be paid on November 15, 1927, the Secretary said that it is quite probable that some time prior to that date the Treasury will extend to the holders of second Liberty loan bonds an opportunity to exchange them for other Government securities. The Secretary explained that this call does not mean that the bonds will be paid at the present time but merely places the holders on notice that their bonds will be redeemed on November 15 next and will cease to bear interest on that date. If holders of second Liberty loan
bonds desire to have their bonds redeemed, they should present them for payment any time after October 15 and prior to November 15, 1927; but if they desire other Government obligations in place of their seconds, they should await a further announcement and notify their bank to keep them informed of any exchange offering that may later be made by the Treasury.

The Secretary recalled that when the Government was selling bonds of the several Liberty loans, an intensive nation-wide campaign was' conducted, every available facility being used to reach the public and to sell the bonds. Under the circumstances the Treasury Department recognizes its obligation to the holders of second Liberty loan bonds to make every effort to notify them that their bonds are called for redemption. While such an elaborate canvass as took place in 1917 is out of the question, the Treasury nevertheless is making a special effort to reach individual bondholders. Banks and trust companies throughout the country have been asked to cooperate with the Government in spreading the news of this call for redemption and in advising the holders of bonds that the Treasury may offer new securities in exchange. At the request of the Treasury, banking institutions generally will display in their banking offices placards announcing the call for redemption. In addition, through the cooperation of the Postmaster General, a placard setting forth the call for redemption will be displayed in every post-office station and branch, including all contract stations, throughout the United States.

The announcement in the form of an advertisement will be carried on Monday, May 9 , in every daily paper printed in the American language throughout the United States and in many of the foreignlanguage newspapers. This same announcement will be carried during the week beginning May 9 in every weekly and semiweekly newspaper throughout the United States.

For the first time the radio will be used by the Treasury Department as a means of reaching millions of bondholders. On Tuesday next, through the courtesy of the National Broadcasting Co., Assistant Secretary of the Treasury Dewey will broadcast the announcement of the call from station WEAF and associated stations. The company has placed its entire facilities at the disposal of the Treasury, and the hook-up will include both its "red " and "blue " networks, extending as far west as Kansas City. Simultaneously, a similar broadcast will be made from San Francisco, to include the stations on the Pacific coast.

The importance of acquainting bondholders with the fact that their bonds have been called is emphasized by the Treasury records of previous calls for redemption or exchange. These records show that there are still outstanding at the present time in the hands of the public about $\$ 30,000,000$ in Government securities on which interest has ceased. It is for this reason that the Treasury Department is making a special effort to see that the present announcement reaches as many second Liberty loan bondholders as possible, through the press, the radio, and the post offices and banks of the country.

The second Liberty loan was offered for subscription on October 1, 1917. Subscriptions amounting to $\$ 4,617,532,300$ were received from $9,400,000$ subscribers. A total of $\$ 3,807,865,000$ was alloted. The bonds issued were dated November 15, 1917, bore interest at 4 per cent, were
payable 25 years after date of issue, but were subject to redemption on and after 10 years after date of issue at the option of the United States. These bonds carried a conversion privilege which might be exercised in the contingency of the first subsequent issue of bonds at a higher rate. This contingency arose when the third Liberty loan was issued on May 9,1918 , and thereafter $\$ 3,707,933,850$ of the 4 per cent bonds were converted into $41 / 4$ per cent bonds. The terms of the $41 / 4$ per cent bonds were identical with those of the 4 per cent bonds except for the interest rate.

Of the original issue of $\$ 3,807,865,000$ about $\$ 750,000,000$ have been redeemed on various accounts, and about $\$ 1,360,000,000$ have been refunded into $31 / 2$ per cent Treasury notes of 1930-32. A balance of nearly $\$ 1,700,000,000$ is now outstanding and the bonds representing this amount are now called for redemption on November 15, 1927, the tenth anniversary of the issue.

A copy of the official circular is attached.

## [Department Circular No. 381]

> Treasuri Department, Office of the Secretary, Washington, May $9,192 \%$.

To holders of second Liberty loan bonds and others concerned:

1. Call for redemption.-All outstanding second Liberty loan bonds, otherwise known as second Liberty loan 4 per cent bonds of 1927-1942 (hereinafter referred to as second 4's) and second Liberty loan converted $41 / 4$ per cent bonds of 1927-1942 (hereinafter referred to as second $41 / 4$ 's), are hereby called for redemption on November 15, 1927, pursuant to the provisions for redemption contained in the bonds and in Treasury Department Circular No. 90, dated October 1, 1917, and Treasury Department Circular No. 114, dated May 9, 1918. Interest on all second 4's and second 41/4's will cease on said redemption date, November 15, 1927.
2. Payment or exchange.-Holders of second 4's and second 41/4's will be entitled to have the bonds redeemed and paid at par on November 15, 1927. Such holders may, however, in advance of November 15, 1927, be offered the privilege of exchanging all or part of their bonds for other interest-bearing obligations of the United States. Holders who desire to avail themselves of the exchange privilege, if and when announced, should request their bank or trust company to notify them when information regarding the exchange offering is received.
3. Presentation and surrender of coupon bonds.-Second 4's and second $41 / 4$ 's in coupon form should be presented and surrendered to any Federal reserve bank or branch, or to the Treasurer of the United States, at Washington, for redemption on November 15, 1927. (Note.-If to be presented for exchange, see subsequent announcements.) The bonds must be delivered at the expense and risk of the holder, and should be accompanied by appropriate written advice. Facilities for transportation of bonds by registered mail insured may be arranged between incorporated banks and trust companies and the Federal reserve banks, and holders may take advantage of such ar-
rangements when available, utilizing such incorporated banks and trust companies as their agents. Incorporated banks and trust companies are not agents of the United States under this circular.

Coupons dated November 15, 1927, which become payable on that date, should be detached from any second 4's or second 41/4's presented for redemption on November 15, 1927, and such coupons should be collected by the holders thereof in regular course. All coupons bearing dates subsequent to November 15, 1927, must be attached to any such bonds when presented for redemption on November 15,.1927, provided, however, if any such coupons are missing from bonds presented for redemption, the bonds will nevertheless be redeemed, but the full face amount of any such missing coupons will be deducted from the payment to be made on account of such redemption, and any amounts so deducted will be held in the Treasury to provide for the redemption of such missing coupons as may subsequently be presented.
4. Presentation and surrender of registered bonds.-Second 4's and second $4 \frac{1}{4}$ 's in registered form presented and surrendered for redemption must be assigned by the registered payees or assigns thereof, or by their duly constituted representatives, to " The Secretary of the Treasury for redemption," in accordance with the general regulations of the Treasury Department governing such assignments, and thereafter should be presented and surrendered to any Federal Reserve Bank or branch, or to the Treasury Department, Division of Loans and Currency, Washington, for redemption on November 15, 1927. (Note.-If to be presented for exchange, see subsequent announcements.) The bonds must be delivered at the expense and risk of the holder, and should be accompanied by appropriate written advice.
If assignment for redemption is made by the registered holder of record, payment of principal and interest will be made to the registered holder at his last address of record, unless written instructions to the contrary are received from such registered holder. If assignment for redemption is made by an assignee holding under proper assignment from the registered holder of record, or by a duly constituted representative of such registered holder or assignee, payment of principal and interest will be made to such assignee or representative, at the address specified in the form of advice. Assignment in blank, or other assignment having similar effect, will be recognized, and in that event payment of principal and interest will be made to the person surrendering the bonds for redemption, since under such assignments the bonds become in effect payable to bearer. In case it is desired to have payment of the registered bonds made to some one other than the registered holder of record, without intermediate assignment, the bonds may be assigned to "The Secretary of the Treasury for redemption for account of $\qquad$ (Here insert name and address of payee desired)
but assignments in this form must be completed before acknowledgment and not left in blank. Assignments in blank, or assignments having similar effect, should be avoided, if possible, in order not to lose the protection afforded by registration.

The transfer books for registered bonds of the second Liberty loan will not close prior to November 15, 1927. Final interest due on that date will not be paid by interest checks in regular course but will be

$$
\text { 64761—FI 1927— } 20
$$

covered by payments to be made simultaneously with the payments on account of principal.
5. Presentation prior to November 15, 1927. -In order to facilitate the redemption of second 4's and second $41 / 4$ 's on November 15, 1927, any such bonds may be presented and surrendered in the manner herein prescribed, at any time after October 15, 1927, for redemption on November 15, 1927. Such early presentation by holders, in advance of November 15, 1927, will insure prompt payment of principal and interest when due on November 15, 1927. This is particularly important with respect to registered bonds, for payment can not be made until registration shall have been discharged at the Treasury Department. It will expedite redemption if bonds are presented to Federal reserve banks or branches.
6. Further information.-Any further information which may be desired as to the redemption of second 4's and second 41/4's under this circular may be obtained from any Federal reserve bank or branch, or from the Commissioner of the Public Debt, Treasury Department, Washington, where copies of the Treasury Department regulations governing assignments also may be obtained. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the matters covered by this circular.

A. W. Mellon, Secretary of the Treasury.

## Exhibit 8

Offering of Treasury bonds of 1943-47 (3 3/8 per cent) (press release, May 31, 1997, with Department Circulair No. 383)

The Treasury announces an offering of Treasury bonds of 1943-47, dated June 15, 1927, bearing interest at $33 / 8$ per cent, maturing June 15,1947 , and callable on four months' notice, in whole or in part, on and after June 15, 1943. The offering will be a combined offering for cash and in exchange for outstanding second Liberty loan bonds.

Cash subscriptions are invited at $1001 / 2$ and accrued interest. The amount of the cash offering will be $\$ 200,000,000$, or thereabouts.

On exchange subscriptions second Liberty loan bonds and the new Treasury bonds of 1943-47 will be exchanged at par for each, and in addition interest from May 15 to June 15 on second Liberty loan bonds accepted in exchange will be paid in cash. The amount of the exchange offering will be limited by the amount of second Liberty loan bonds tendered and accepted.

It will be remembered that the second Liberty loan bonds are called for redemption on November 15, 1927, and that interest thereon ceases on that date. The present exchange offering gives holders of second Liberty loan bonds an opportunity to secure a long-term Government bond in place of those they now hold. The exchange offering will in all probability be kept open until June 15, 1927, but the Secretary of the Treasury reserves the right to close the exchange offering, as well as the cash offering, at any time without notice.

A copy of the official circular is attached.

# Treasury Department, Office of the Secretary, Washington, May 31, 1927. 

The Secretary of the Treasury invites subscriptions, from the people of the United States, for $33 / 8$ per cent Treasury bonds of 194347 , of an issue of gold bonds of the United States authorized by the act of Congress approved September 24, 1917, as amended:
Cash subscriptions are invited, at $1001 / 2$ and accrued interest. The amount of the issue for cash will be $\$ 200,000,000$, or thereabouts.
Exchange subscriptions, in payment of which only second Liberty loan converted $41 / 4$ per cent bonds of 1927-1942 (hereinafter referred to as second $41 / 4$ 's) or second Liberty loan 4 per cent bonds of 1927 1942 (hereinafter referred to as second 4's) may be tendered, are invited, at par with an adjustment of accrued interest as of June 15, 1927. The amount of the issue upon exchange subscriptions will be limited to the amount of second $41 / 4$ 's or second 4 's tendered and accepted.

## DESCRIPTION OF BONDS

The bonds will be dated June 15, 1927, and will bear interest from that date at the rate of $33 / 8$ per cent per annum. payable semiannually on June 15 and December 15 in each year until the principal amount becomes payable. The bonds will mature June 15, 1947 , but may be redeemed at the option of the United States on and after June 15, 1943, in whole or in part, at par and accrued interest, on any interest day or days, on four months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the bonds called for redemption shall cease. The principal and interest of the bonds will be payable in United States gold coin of the present standard of value.

Bearer bonds with interest coupons attached will be issued in denominations of $\$ 50, \$ 100, \$ 500, \$ 1,000, \$ 5,000, \$ 10,000$, and $\$ 100,000$. Bonds registered as to principal and interest will be issued in denominations of $\$ 50, \$ 100, \$ 500, \$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000$ and $\$ 100,000$. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds and for the transfer of registered bonds, without charge by the United States, under rules and regulations prescribed by the Secretary of the Treasury.

The bonds shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excessprofits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and
amendments thereto, the principal of which does not exceed in the aggregate $\$ 5,000$, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The bonds will be acceptable to secure deposits of public moneys, but do not bear the circulation privilege and are not entitled to any privilege of conversion. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter issued, governing United States bonds.

## APPLICATION AND ALLOTMENT

Applications will be received at the Federal reserve banks, as fiscal agents of the United States. Banking institutions generally will handle applications for subscribers, but only the Federal reserve banks are authorized to act as official agencies.

The right is reserved to reject any subscription and to allot less than the amount of bonds applied for and to close the subscriptions at any time without notice, and the act of the Secretary of the Treasury in these respects will be final. The Secretary of the Treasury also reserves the right to make allotment in full upon applications for smaller amounts, and to make reduced allotments upon, or to reject, applications for larger amounts, and to make classified allotments and allotments upon a graduated scale; and his action in these respects will be final.

## PAYMENT

Cash subscriptions.-Payment at $1001 / 2$ and accrued interest for any bonds allotted on cash subscriptions must be made on or before June 15, 1927, or on later allotment. Any qualified depositary will be permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal reserve bank of its district. Treasury certificates of indebtedness of Series TJ-1927, maturing June 15, 1927, will be accepted at the Federal reserve banks at par, to be applied in part payment for any Treasury bonds of 1943-47 now offered which shall be subscribed for and allotted.

Exchange subscriptions.-Payment for any bonds allotted on exchange subscriptions may be made only in second $41 / 4$ 's or second 4 's, which will be accepted at par with an adjustment of accrued interest as of June 15, 1927. Payment for bonds subscribed for should be made when the subscription is tendered. If any subscription is rejected in whole or in part, any bonds which may have been tendered and not accepted will be returned to the subscriber.

SURRENDER OF BONDS
Surrender of coupon bonds.-Second $41 / 4$ 's or second 4 's in coupon form tendered in exchange for Treasury bonds issued hereunder should be presented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder.

Facilities for transportation of bonds by registered mail insured may be arranged between incorporated banks and trust companies and the Federal reserve banks, and holders may take advantage of such arrangements when available, utilizing such incorporated banks and trust companies as their agents. Incorporated banks and trust companies are not agents of the United States under this circular.

Coupons dated November 15, 1927, and all coupons bearing dates subsequent thereto, must be attached to such coupon bonds when presented. At the time of delivery of the Treasury bonds of 1943-47 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from May 15, 1927, to June 15, 1927, on the coupon second $41 / 4$ 's and second 4's surrendered in exchange.

Surrender of registered bonds.-Second 41/4's or second 4's in reg. istered form, tendered in exchange for Treasury bonds issued hereunder, should be assigned by the registered payee or assigns thereof to "The Secretary of the Treasury for redemption," in accordance with the general regulations of the Treasury Department governing assignments, and thereafter should be presented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder. At the time of delivery of the Treasury bonds of 1943-47 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from May 15, 1927, to June 15, 1927, on the registered second 41/4's and second 4's surrendered in exchange.

The Federal reserve banks, as fiscal agents of the United States, are hereby authorized and requested to receive subscriptions for Treasury bonds hereunder, to receive second $41 / 4$ 's or second 4 's tendered in exchange, to make allotments of subscriptions on the basis and up to the amounts indicated to them by the Secretary of the Treasury, and to make delivery of Treasury bonds on full-paid subscriptions allotted, and, pending delivery of definitive bonds, to issue interim certificates.

## FURTHER DETAILS

Any further information which may be desired as to the issue of Treasury bonds under the provisions of this circular may be obtained upon application to a Federal reserve bank. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the exchange, and may terminate the offer at any time in his discretion.

> A. W. Mellon, Secretary of the Treasury.
To the investor:
Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above, and to the fact that second Liberty foan bonds may be exchanged for the Treasury bonds offered.

## Exhibit 9

Cash subscriptions and allotments, Treasury bonds of 1943-47 (from. press releases, June 10 and June 14, 1987)

Secretary Mellon announced that the allotment of cash subscriptions for the issue of $33 / 8$ per cent Treasury bonds of $1943-47$, dated. June 15, 1927, maturing June 15, 1947, and callable on and after June15, 1943, has been made on the following basis: All cash subscriptions in amounts not exceeding $\$ 100,000$ for any one subscriber were allotted 50 per cent, but not less than $\$ 50$ on any one subscription; cash subscriptions in amounts over $\$ 100,000$ but not exceeding$\$ 1,000,000$, were allotted 40 per cent, but not less than $\$ 50,000$ on any one subscription; and cash subscriptions in amounts over $\$ 1,000,000$. were allotted 30 per cent, but not less than $\$ 400,000$ on any one subscription. Cash subscriptions for this issue of Treasury bonds were invited at $1001 / 2$ and accrued interest.

The total amount of cash subscriptions received for the Treasury bonds of $1943-47$ was $\$ 617,604,800$, and the total of subscriptions. allotted was $\$ 249,598,300$.

The subscriptions and allotments were divided among the several Federal reserve districts as follows:

| Federal reserve district | Total subscriptions received | Total subscriptions. allotted | Federal reserve district | Total subscriptions received | Total subscriptions allotted |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Boston | \$68, 536, 500 | \$29, 535, 750 | St. Louis | \$13, 539, 600 | \$6, 442, 850 : |

Ехнibit 10
Time extended for exchange subscriptions for Treasury bonds of 1943-47 (press release, June 15, 1927)

The Secretary of the Treasury announces that exchange subscriptions for the issue of $33 / 8$ per cent Treasury bonds of 1943-47, for which second Liberty loan 4 per cent bonds and second Liberty loan. converted $41 / 4$ per cent bonds are exchangeable at par for each, will not close on June 15, as previously announced, but will remain open. until the close of business on June 30 .

On the basis of reports received to date from Federal reservebanks exchange subscriptions aggregate approximately $\$ 170,000,000$. They have come in steadily at the rate of about $\$ 12,000,000$ a day and, with few exceptions, have been received in comparatively small lots. There has been a marked absence of large blocks, such as were offered for exchange for notes in March last. This confirms theopinion of the Treasury Department that outstanding second Liberty loan bonds are still widely scattered in the hands of individual investors, many of them original subscribers, and many not familiar with investment securities nor in contact with such matters. In;

March, of approximately $\$ 1,360,000,000$ bonds offered in exchange, no less than $\$ 1,021,000,000$ were of $\$ 10,000$ denomination and over. Approximately $\$ 751,000,000$ exchange subscriptions for the March offering were received through the New York Federal Reserve Bank. It seems probable, therefore, that the banks, insurance companies, and other large holders of Government securities, rather than the individual investor, were those to whom the March offering appealed, and that most of the large holdings were exchanged at that time.

The process of reaching thousands of individual investors is necessarily a slow one. The bonds were originally sold in many cases by a house-to-house canvass. To-day the sole means of contact and communication are the banks, public press, and radio. It is probable that many holders of seconds even to-day do not know that their bonds have been called and will cease to bear interest on November 15 next, and that many more have no knowledge of the fact that their bonds are exchangeable for new 20 -year United States Government bonds.

The Treasury Department desires that they should know of this exchange offering. A long-time bond was offered with the needs of the individual investor particularly in mind. The Secretary believes that from the public standpoint it is desirable that United States Government securities should be widely held, as were the original Liberty loan issues, rather than concentrated in the hands of a comparatively few large banking, insurance, and industrial companies. This concentration almost inevitably takes place when current Treasury financing and refunding operations are effected by means of short-term certificates and notes.

It seems proper to point out to them that with the second Liberty loan bonds called for redemption in November, the early maturity of the thirds, the fact that fourths are callable in six years, and with debt retirement proceeding at the present rate, long-term United States bonds will no longer be available in such volume as we have been accustomed to since the war.

Many thousands of holders of second Liberty loan bonds have already availed themselves of the exchange offering. It is for the benefit of those who have not heard of it, or who have failed to act promptly, that the subscriptions will remain open for another 15 days.

## Exhibit 11

Exchange subscriptions and allotments, Treasury bonds of 1943-47
The privilege of exchanging second Liberty loan bonds for the new $33 / 8$ per cent Treasury bonds of 1943-47 expired on June 30 . Second Liberty loan bonds offered for exchange aggregated $\$ 245,256,450$. All exchange subscriptions were allotted in full.

Allotments were divided among the several Federal reserve districts as follows:

$$
\begin{array}{r}
\$ 11,764,100 \\
54,790,150 \\

## Offer to purchase second Liberty loan bonds (press release, June 16, 1927, with Department Circular No. 384)

Secretary Mellon made the following announcement:
Holders of second Liberty loan bonds, both second 4's and second $41 / 4$ 's, who may not desire to exchange them for the new $33 / 8$ per cent Treasury bonds of 1943-47, are now given the opportunity, until the close of business on June 22, to sell their bonds direct to the Government, with the understanding that the lowest offers may be accepted, if satisfactory to the Secretary of the Treasury.

This procedure will save commission charges to the seller and to the Treasury.

Accordingly, the Treasury invites all holders of second Liberty loan bonds to submit proposals for the sale of these bonds. From the lowest proposals received the Treasury expects to purchase a limited amount of such bonds. All proposals should be handled through a bank, trust company, or recognized dealer, who will deal with the Federal reserve banks, which are the official agencies for the Treasury in these transactions. Full information with respect to the tender of bonds may be obtained from such banks, trust companies, or recognized dealers. Proposals should reach a Federal reserve bank before the close of business on June 22, 1927. In the event of a proposal being accepted, bonds must be delivered to a Federal reserve bank on or before June 28. Payment, in the case of coupon bonds, will be made on June 28, 1927, and in the case of registered bonds on June 28, 1927, or as soon thereafter as registration may be cleared.

Second Liberty loan bonds have been called for redemption on November 15 next.

The Treasury reserves the right to reject any or all proposals.
A copy of the official circular is attached.

## [Department Circular No. 384$]$

## Treasury Department, Office of the Secretary, Washington, June 16, 1927.

To holders of second Liberty loan bonds and others concerned:

1. In pursuance of the authority contained in section 2 of the act approved March 3, 1881, public notice is hereby given that with a view to the purchase of a limited amount of the bonds of the second Liberty loan (second 4's and second 41/4's), proposals for the sale of such bonds to the Government will be received at the Federal reserve banks on and after this date and until the close of business June 22, 1927.
2. Purchases of such bonds will be made at the lowest prices offered, plus accrued interest from May 15, 1927, to date of payment, provided such prices are acceptable to the Secretary of the Treasury, and may be made from time to time on the basis of the proposals then in hand. The Secretary of the Treasury reserves the right to
reject or to accept in whole or in part any and all proposals, and his action in this respect shall be final.
3. All transactions in connection with the proposals for sale, the delivery of bonds, and payment therefor should be handled through banks, trust companies, or recognized dealers, which will act as agents of the owners of the bonds. The banks, trust companies, and dealers will deal with Federal reserve banks, which are the only official agencies of the United States in these transactions.
4. Proposals must be in writing, and should reach a Federal reserve bank before the close of business on June 22, 1927. Federal reserve banks will notify the presenting agency of the acceptance or rejection of proposals.
5. Upon notification of the acceptance of any proposal, the agency which forwarded such proposal will thereupon transmit the second Liberty loan bonds described in the proposal, at the seller's own expense and risk, to the Federal reserve bank. All bonds to be surrendered for purchase should reach the Federal reserve bank as soon as possible after receipt of such notification, but, in any event, not later than the close of business on June 28, 1927. For all bonds delivered in accordance with accepted proposals, payment will be made, in the case of coupon bonds, on June 28, 1927, and, in the case of registered bonds, on June 28, 1927, or as soon thereafter as registration may be cleared. Payment may also be made in advance of June 28, 1927, by mutual agreement.
6. Coupon bonds of the second Liberty loan presented hereunder should have attached coupons bearing date November 15, 1927, and all subsequent dates. Registered bonds presented hereunder must be duly assigned to "The Secretary of the Treasury for Purchase," in accordance with the general regulations of the Treasury Department governing assignments. Bonds registered in the names of minors or incompetents will not be accepted unless accompanied by a certificate of court of competent jurisdiction showing that the person assigning such bonds has authority so to assign. Bonds registered in the names of two or more persons must be assigned by all of the coowners.
7. The Secretary of the Treasury reserves the right to reject in whole or in part any and all bonds tendered, and his action in this respect shall be final.
8. Any further information which may be desired may be obtained from any Federal reserve bank.

A. W. Mellon; Secretary of the Treasury.

Note.-Second Liberty loan bonds have been called for redemption on November 15, 1927, on which date they will cease to bear interest. The right to tender such bonds for sale in accordance with the above circular may therefore be exercised in the discretion of the nwmers of such bonds.

## Exhibit 13

Purchase of second Liberty loan bonds (press release, June 23, 1927)
Secretary Mellon announced that the privilege of tendering second Liberty loan 4 per cent and $41 / 4$ per cent bonds for sale to the United States expired at the close of business on June 22. Under the terms
of the Secretary's earlier announcement, the purchases were to be made at the lowest prices offered, plus accrued interest.

According to reports received from the Federal reserve banks about $\$ 72,000,000$ face amount of bonds were tendered, including $\$ 324,000$ of 4 per cent bonds.
The Treasury has accepted proposals aggregating $\$ 62,966,250^{1}$ face amount at an average price for the $41 / 4$ per cent bonds of par and fifteen and one-half thirty-seconds. The balance of the proposals were rejected because the price demanded was considered excessive.

In the case of offers which have been accepted the bonds should be in the hands of the Federal reserve banks on or before June 28, 1927. Payment, in the case of coupon bonds, will be made on June 28, and in the case of registered bonds, on June 28, or as soon thereafter as registration may be cleared.

Offerings of certificates of indebtedness, Series TM2-1928 (3 per cent), and Treasury notes, Series B-1930-32 ( $31 / 2$ per cent) (Department Circulars Nos. 385 and 387, September 6, 1927)
[Department Circular No. 386]

## Certificates of Indebtedness

Treasury Department, Office of the Secretary, September 6, 1927.
The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal reserve banks, Treasury certificates of indebtedness of Series TM2-1928, dated and bearing interest from September 15, 1927, payable March 15, 1928, with interest at the rate of three per cent per annum, payable on a semiannual basis.

Applications will be received at the Federal reserve banks.
Bearer certificates will be issued in denominations of $\$ 500, \$ 1,000$, $\$ 5,000, \$ 10,000$, and $\$ 100,000$. The certificates will have one interest coupon attached, payable March 15, 1928.

The certificates of said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individals, partnerships, associations, or corporations. The inter-

[^26]est on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate $\$ 5,000$, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates. The certificates of this series will be acceptable to secure deposits of public moneys, but will not Bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. The Secretary of the Treasury :also reserves the right to make allotment in full upon applications for smaller amounts, and to make reduced allotments upon, or to reject, applications for larger amounts, and to make classified allotments and allotments upon a graduated scale; and his action in these respects will be final. Allotment notices will be sent out promptly upon allotment, and the basis of the allotment will be publicly announced.

Payment at par and accrued interest for certificates allotted must be made on or before September 15, 1927, or on later allotment. After allotment and upon payment, Federal reserve banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depositary will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess 'of existing deposits, when so notified by the Federal reserve bank of its district. Treasury certificates of indebtedness of Series TS-1927 and TS2-1927, both maturing September 15, 1927, will be accepted at par, in payment for any certificates of the series now offered which shall be subscribed for and allotted, with an adjustment of the interest accrued, if any, -on the certificates of the series so paid for.

As fiscal agents of the United States, Federal reserve banks are authorized and requested to receive subscriptions and to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal reserve banks of the respective districts.

## Ogden L. Mills, Acting Secretary of the Treasury.

## To the investor:

Almost any banking institution in the United States will handle your sub:scription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above. If you desire to purchase, at the market price, certificates of the above issue after the subscriptions close, or certificates of any outstanding issue, you should apply to your own bank, or, if it can not obtain them for you, to the Federal reserve bank of your district, "which will then endeavor to fill your order in the market.
[Department Circular No. 387]

## Treasury Notes

> Treasury Department, Office of the Secretary, September 6, 1927.

1. The Secretary of the Treasury invites subscriptions, through the Federal reserve banks, for three and one-half per cent Treasury notes of Series B-1930-32, of an issue of gold notes of the United States authorized by the act of Congress approved September 24, 1917, as amended.
2. Cash subscriptions are invited, at par and accrued interest. The amount of the issue for cash will be $\$ 250,000,000$, or thereabouts.
3. Exchange subscriptions, in payment of which only second Liberty loan converted 41/4 per cent bonds of 1927-1942 (hereinafter referred to as second $41 / 4$ 's) may be tendered, are invited at $1001 / 3$. Interest on any second $41 / 4$ 's so surrendered and accepted will be paid in full to November 15, 1927. The amount of the issue upon exchange subscriptions will be limited to the amount of the second $41 / 4$ 's tendered and accepted.

DESCRIPTION OF NOTES
4. The notes will be dated September 15, 1927, and will bear interest from that date at the rate of $31 / 2$ per cent per annum payable semiannually on March 15 and September 15 in each year until the principal amount becomes payable. The notes will mature September 1.5, 1932, but may be redeemed at the option of the United States on and after September 15, 1930, in whole or in part, on any interest day or days, on six months' notice of redemption given in such manner as the Secretary of the Treasury may prescribe. In case of partial redemption the notes to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the notes called for redemption shall cease. The principal and interest of the notes will be payable in United. States gold coin of the present standard of value.
5. Bearer notes with interest coupons attached will be issued in denominations of $\$ 50, \$ 100, \$ 500, \$ 1,000, \$ 5,000, \$ 10,000$, and $\$ 100,000$. The notes will not be issued in registered form. The notes will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege.
6. The notes of this series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.
7. The notes of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of
the Treasury, in payment of income and profits taxes payable at the maturity of the notes, and, with respect to any such notes that may be called for prior redemption, will be receivable in like manner and for the same purpose at the redemption date fixed.

## APPLICATION AND ALLOTMENT

8. Applications will be received at the Federal reserve banks, as fiscal agents of the United States. Banking institutions generally, will handle applications for subscribers, but only the Federal reserve banks are authorized to act as official agencies.
9. The right is reserved to reject any subscription, in whole or in part, to allot less than the amount of notes applied for, and to close either the cash or the exchange subscriptions at any time without notice, and the act of the Secretary of the Treasury in these respects will be final. Exchange subscriptions will probably remain open until September 29, 1927. The Secretary of the Treasury also reserves the right to make allotment in full upon applications for smaller amounts, and to make reduced allotments upon, or to reject, applications for larger amounts, and to make classified allotments and allotments upon a graduated scale; and his action in these respects will be final.

## PAYMENT

10. Cash subscriptions.-Payment at par and accrued interest for any notes allotted on cash subscriptions must be made on or before September 15, 1927, or on later allotment. Any qualified depositary will be permitted to make payment by credit for notes allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal reserve bank of its district. Treasury certificates of indebtedness of Series TS-1927 and TS2-1927, both maturing September 15, 1927, will be accepted at the Federal reserve banks at par, to be applied in payment for any Treasury notes of Series B-1930-32 now offered which shall be subscribed for and allotted.
11. Exchange subscriptions.-Payment for any notes allotted on exchange subscriptions may be made only through the surrender of a like principal amount of second $41 / 4$ 's which will be acepted at par, and, at the time of delivery of the notes, interest on any such second 41/4's so surrendered and accepted will be paid in full to November 15,1927 , less the amount of the premium on the notes. Second Liberty loan converted $41 / 4$ per cent bonds tendered in payment for notes subscribed for should be presented when the subscription is tendered. If any subscription is rejected in whole or in part, any bonds which may have been tendered and not accepted will be returned to the subscriber.

## SURRENDER OF BONDS ON EXCHANGE SUBSCRIPTIONS

12. Surrender of coupon bonds.-Second $41 / 4$ 's in coupon form tendered in exchange for Treasury notes issued hereunder should be presented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder. Facilities
for transportation of bonds by registered mail insured may be arranged between incorporated banks and trust companies and the Federal reserve banks, and holders may take advantage of such arrangements when available, utilizing such incorporated banks and trust companies as their agents. Incorporated banks and trust companies are not agents of the United States under this circular.
13. Coupons dated November 15, 1927, and all coupons bearing dates subsequent thereto, must be attached to such coupon bonds when presented. At the time of delivery of the Treasury notes of Series B-1930-32 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from May 15, 1927, to November 15, 1927, on the coupon second $41 / 4$ 's surrendered in exchange, less the amount of the premium on the notes issued.
14. Surrender of registered bonds.-Second $41 / 4$ 's in registered form, tendered in exchange for Treasury notes issued hereunder, should be assigned by the registered payee or assigns thereof to "The Secretary of the Treasury for redemption," in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange into coupon bonds, and thereafter should be presented and surrendered to a Federal reserve bank. The bonds must be delivered at the expense and risk of the holder. At the time of delivery of the Treasury notes of Series B-1930-32 (or interim certificates) upon allotted subscriptions, Federal reserve banks will pay to the subscriber or his authorized agent the interest from May 15, 1927, to November 15, 1927, on the registered second $41 / 4$ 's surrendered in exchange, less the amount of the premium on the notes issued.
15. The Federal reserve banks, as fiscal agents of the United States, are hereby authorized and requested to receive subscriptions for Treasury notes hereunder, to receive second 41/4's tendered in exchange, to malke allotments of subscriptions on the basis and up to the amounts indicated to them by the Secretary of the Treasury, and to make delivery of Treasury notes on full-paid subscriptions allotted, and, pending delivery of definitive notes, to issue interim certificates.

## FURTHER DETAILS

16. Any further information which may be desired as to subscriptions for Treasury notes under the provisions of this circular may be obtained upon application to a Federal reserve bank. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the exchange, and may terminate the offer at any time in his discretion.

Ogden L. Mills, Acting Secretary of the Treasury.

## To the investor:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above, and to the fact that second Liberty loan converted 41/4 per cent bonds may be exchanged for the Treasury notes offered.

Exhibit 15
Cash subscriptions and allotments, certificates of indebtedness, Series TM2-1928, and Treasury notes, Series B-1930-32 (from'press releases, September 9 and September 12, 1927)
Secretary Mellon today announced that the subscription books on the offering of 3 per cent Treasury certificates of indebtedness of Series TM2-1928 and the subscription books on the cash offering of $31 / 2$ per cent Treasury notes of Series B-1930-32, closed at the close of business Wednesday, September 7.

## THREE PER CENT TREASURY CERTIFICATES OF INDEBTEDNESS, SERIES <br> TM2-1928

Allotment of subscriptions for the certificates has been made on the following basis: Subscriptions in amounts not exceeding $\$ 1,000$ for any one subscription were allotted in full; subscriptions in amounts over $\$ 1,000$, but not exceeding $\$ 10,000$ were allotted 60 per cent, but not less than $\$ 1,000$ on any one subscription; subscriptions in amounts over $\$ 10,000$, but not exceeding $\$ 1,000,000$ were allotted 50 per cent, but not less than $\$ 6,000$ on any one subscription, and subscriptions in amounts over $\$ 1,000,000$ were allotted 35 per cent, but not less than $\$ 500,000$ on any one subscription. The subscriptions and allotments were divided among the several Federal reserve districts as follows:

| Federal reservegidistrict | Total subscriptions received | Total subscriptions allotted | Federal reserve district | Total subscriptions received | Total subscriptions allotted |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Boston | \$41, 847, 500 | \$20, 167, 000 | St. Louis | \$16, 639, 500 | \$0, 706, 500 |
| New York | 328, 868, 000 | 122, 188, 500 | Minneapolis | 1, 502, 500 | 889, 000 |
| Philadelphia | 40,559, 000 | 22, 460, 000 | Kansas City | 5,362,500 | 3,184, 500 |
| Cleveland | 21, 411, 000 | 8,958, 500 | Dallas | 12,531, 500 | 6, 635. 000 |
| Richmond | 25, 402, 000 | 11,859, 500 | San Francisco | 32, 239, 500 | 14, 053, 000 |
| Atlanta. | 21, 557, 000 | 12,556, 000 |  |  |  |
| Chicago | 33, 400, 000 | 17,920, 000 | Total | 581, 320, 000 | 250, 577, 500 |

CASH OFFERING OF 3112 PER CENT TREASURY NOTES OF SERIES B-1930-32
Allotment of the cash subscriptions for the $31 / 2$ per cent Treasury notes has been made on the following basis: Cash subscriptions in amounts not exceeding $\$ 1,000$ for any one subscription were allotted 40 per cent, but not less than $\$ 50$ on any one subscription; cash subscriptions in amounts over $\$ 1,000$ but not exceeding $\$ 500,000$ were allotted 25 per cent, but not less than $\$ 400$ on any one subscription; and cash subscriptions in amounts over $\$ 500,000$ were allotted 20 per cent, but not less than $\$ 125,000$ on any one subscription. The subscriptions and allotments were divided among the several Federal reserve districts as follows:

| Federal reserve district | Total suhscriptions received | Total subscriptions allotted | Federal reserve district | Total subscriptions received | Total subscriptions allotted |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Boston. | \$96, 507, 300 | \$22, 455, 750 | St. Louis. | \$28, 828, 700 | \$7, 269, 550 |
| New York | 429, 602, 600 | 89, 194, 950 | Minneapolis. | 11, 997,000 | 2, 945,300 |
| Philadelphia | 107, 195, 600 | 27, 580, 750 | Kansas City. | 11,778, 500 | 3, 143, 400 |
| Cleveland | 74, 743, 050 | 17, 314, 200 |  | 34, 883,350 | 8,711,100 |
| Rlchmond | $42,899,050$ $44,949,500$ | 10, 103, 500 $12,321,850$ | San F | 93,096, 200 | 19, 816,800 |
| Chicago | 117, 126, 900 | 29, 855, 250 | Total | 1, 093, 697, 750 | 250, 522,600 |

## Exhibit 16

Exchange subscriptions for Treasury notes, Series B-1930-32 (press release, October 4, 1927)

*     *         * The privilege of exchanging second Liberty loan 41/4 per cent bonds for the new. $31 / 2$ per cent Treasury notes of Series B-1930-32 terminated at the close of business on October 1.
According to reports received from the twelve Federal reserve banks and the Treasurer of the United States, total exchange subscriptions received aggregate over $\$ 368,000,000$.

With the closing of this exchange privilege the Treasury Department brought to a successful conclusion the major part of its second Liberty loan refunding operation. Of the second Liberty loan bonds still outstanding, some will be retired from the sinking funds. The balance can readily be redeemed from cash on hand and from the proceeds of the sale of short-term obligations, an operation which is equivalent to refunding seconds into this class of security.
With the second Liberty loan bonds callable on November 15, 1927, on six months' notice, two alternatives were open to the Treasury Department last winter. It could proceed to call the second Liberty loan bonds in blocks of about 600 million, an operation which would have had to be suspended almost immediately because of the maturity of the third Liberty loan-unless the Treasury was prepared in advance to forego liberty of action and to refund the major part of that issue into long-term securities-and which in all probability could not have been concluded by 1933 when the fourth Liberty loan, which amounts to over six billion dollars, is callable; or it could call all second Liberty loan bonds, aggregating over three billion dollars, on the first callable date, to wit, November 15, 1927. Fully realizing the difficulties in time of peace of an operation which involved the refunding or retirement of over three billion dollars of securities during the course of eight months, the Treasury Department elected to adopt the bolder course because of the advantage that would accrue from its successful completion.

The effect of this program is that a $\$ 3,000,000,000$ debt, bearing interest at $41 / 4$ per cent, only 600 million of which could probably have been retired prior to 1931 -and a large part of which would either have had to be refunded into long-term bonds in 1932 or 1933 or allowed to remain outstanding until maturity date-will have been refunded into $\$ 245,000,000$ of $33 / 8$. per cent sixteen-twenty year bonds callable during the year following the maturity date of the second Liberty loan bonds, $\$ 1,728,000,000$ of five-year notes callable at the end of three years, and the balance into short-term securities bearing a lower rate of interest and which will be retired periodically from surplus and foreign repayments. Thus by the full use of the call privilege, without sacrificing its ability to retire them at an early date, the Treasury has succeeded in refunding a great mass of securities bearing a high rate of interest into securities bearing a low rate of interest.
Exclusive of the second Liberty loan bonds to be retired from the proceeds of the sale of short-term securities, the interest saving on which can not be estimated until the operation is brought to a final conclusion on November 15 next, and exclusive of retirements from
sinking fund and surplus, the annual interest saving on the securities issued as contrasted with an equivalent amount of seconds amounts to over $\$ 15,000,000$.

If interest on second Liberty loan bonds retired from surplus and sinking fund since the operation was begun in March last also be taken into consideration, the interest reduction amounts to approximately $\$ 28,000,000$ per annum.

## October and November operations in connection with the retirement of second Liberty loan bonds

## Exhibit 17

Offer to purchase second Liberty loan $41 / 4$ per cent bonds (press release, October 17, 1987)
Secretary Mellon, in again calling attention to the fact that second Liberty loan bonds have been called for redemption on November 15, 1927, and will cease to bear interest after that date, announced that for the convenience of holders he has authorized the Federal reserve banks to purchase, at the option of holders, second Liberty loan $41 / 4$ per cent bonds at $1003 / 32$ and accrued interest to date of such optional purchase. Such purchases will be made for account of the sinking fund. This offer will remain open during the week beginning Monday, October 17, and ending Saturday, October 22 , and will terminate on the latter date without further notice. Second Liberty loan 4 per cent bonds are not included in this offer to purchase.

## Exhibit 18

Offer to purchase second Liberty loan $41 / 4$ per cent bonds (press release, October 24, 1927)
Secretary Mellon, in again calling attention to the fact that second Liberty loan bonds have been called for redemption on November 15, 1927, and will cease to bear interest after that date, announced that for the convenience of holders he has authorized the Federal reserve banks to purchase, at the option of holders, second Liberty loan $41 / 4$ per cent bonds at $100 \frac{2}{3^{2}}$ and accrued interest to date of such optional purchase. Such purchases will be made for account of the sinking fund. This offer will remain open during the week beginning Monday, October 24, and ending Saturday, October 29, and will terminate on the latter date without further notice. Second Liberty loan 4 per cent bonds are not included in this offer to purchase.

## Eximibit 19

Offer to purchase second Liberty loan bonds (press release, October 31, 1927)
Secretary Mellon, in again calling attention to the fact that second Liberty loan bonds have been called for redemption on November 15, 1927, and will cease to bear interest after that date, announced that

$$
64761-\text { FI } 1927-21
$$

for the convenience of holders he has authorized the Federal reserve banks to purchase, at the option of holders, second Liberty loan 41/4 per cent coupon bonds at $100 \frac{1}{32}$ and accrued interest to date of such optional purchase. Said purchases will be made for account of the sinking fund. This offer will remain open during the period beginning Monday, October 31, and ending Monday, November 7, and will terminate at the close of business on the latter date without further notice. It should be noted that coupon bonds only may be presented under this offer, registered bonds being excluded because of the impossibility of discharging registration after October 31 on any account except for redemption on November 15. Second Liberty loan 4 per cent bonds are not included in this offer to purchase.

Secretary Mellon further announced that be has authorized the Federal reserve banks, beginning Tuesday, November 8, to purchase at the option of holders second Liberty loan 4 per cent and $41 / 4$ per cent coupon bonds at par and accrued interest to the date of such optional purchase. Such purchases will be made for account of the sinking fund. This offer will remain open until the close of business Saturday, November 12, and will then terminate without further notice.

## Exhibit 20

Offering of certifcates of indebtedness, Series TJ-1928 ( $31 / 8$ per cent)
(press release, November '7, 1927, with Department Circular No. 389)

The Treasury announces an offering of seven-month $31 / 8$ per cent Treasury certificates of indebtedness, dated and bearing interest from November 15, 1927, and maturing on June 15, 1928. The certificates are tax certificates, and the amount of the offering is $\$ 400,000,000$, or thereabouts.
The Treasury will accept in payment for the new certificates the 4 per cent and $41 / \pm$ per cent bonds of the second Liberty loan. It will be remembered that the second Liberty loan bonds are called for redemption on November 15, 1927, and that interest thereon ceases on that date.

A copy of the official circular is attached.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal reserve banks, Treasury certificates of indebtedness of Series TJ-1928, dated and bearing interest from November 15, 1927, payable June 15, 1928, with interest at the rate of $31 / \mathrm{s}$ per cent per annum.

Applications will be received at the Federal reserve banks.
Bearer certificates will be issued in denominations of $\$ 100, \$ 500$, $\$ 1,000, \$ 5,000, \$ 10,000$, and $\$ 100,000$. The certificates will have one interest coupon attached, payable June 15, 1928.

The certificates of said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the

United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly lnnown as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate $\$ 5,000$, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury in payment of income and profits taxes payable at the maturity of the certificates. The certificates of this series will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. The Secretary of the Treasury also reserves the right to make allotment in full upon applications for smaller amounts, to make reduced allotments upon, or to reject, applications for larger amounts, to make preferred allotments upon applications for which second Liberty loan 4 per cent bonds of 19271942 (hereinafter referred to as second 4's) and second Liberty loan converted $41 / 4$ per cent bonds of 1927-1942 (hereinafter referred to as second $41 / 4$ 's 'tre tendered in payment, and to make classified allotments and allotments upon a graduated scale; and his action in these respects' will be final. Allotment notices will be sent out promptly upon allotment, and the basis: of the allotment will be publicly announced.

Payment at par and accrued interest for certificates allotted must be made on or before November 15, 1927, or on later allotment. After allotment and upon payment, Federal reserve banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depositary will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal reserve bank of its district, except upon subscriptions for which second Liberty loan bonds are tendered in payment. Bonds of the second 4 's and second $41 / 4$ 's, called for redemption on November 15, 1927, will be accepted at par, in payment for any certificates of the series now offered which shall be subscribed for and allotted, with an adjustment of the interest accrued, if any, on the certificates of the series so paid for.

Bonds of the second 4 's and second $41 / 4$ 's tendered in payment for any certificates of the series now offered should be presented when the subscription is tendered. The bonds must be delivered at the expense and risk of the holder. Coupons dated November 15, 1927, which will become payable on that date, should be detached from any bonds of the second 4's or second 41/4's in coupon form so tendered, and such coupons should be collected by the holders in regular course.

All coupons bearing dates subsequent to November 15, 1927, must be attached to such coupon bonds when presented. Second 4's and second 41/4's in registered form tendered in payment for certificates subscribed for must be assigned by the registered payee or assigns thereof, or by their duly constituted representatives, to "The Secretary of the Treasury for redemption," in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange into coupon bonds. Final interest due November 15, 1927, on registered bonds so tendered will not be paid by interest checks in regular course but will be covered by payments to be made simultaneously with the delivery of the certificates upon allotted subscriptions. Facilities for transportation 'of bonds by registered mail insured may be arranged between incorporated banks and trust companies and the Federal reserve banks, and holders may take advantage of such arrangements, when availble, utilizing such incorporated banks and trust companies as their agents. Incorporated banks and trust companies are not agents of the United States under this circular.

As fiscal agents of the United States, Federal reserve banks are authorized and requested to receive subscriptions and to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal reserve banks of the respective districts.

A. W. Mellon, Secretary of the Treasury.

Treasury Department, Office of the Secretary, November 7, 1927.

## To the investor:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal reserve bank of your district. Your special attention is invited to the terms of subscription and allotment as stated above, and to the fact that bonds of the second 4 's and second 41/'s will be accepted at par in payment for any certificates of the series now offered which shall be subscribed for and allotted.

## Miscellaneous

Exhibit 21
"Some Problems in Treasury Financing," an address by Undersecretary of the Treasury Mills, June 7, 1927, before the New. York State Bankers' Association, Washington, D. C.

It is a very great honor indeed to be invited to address this representative gathering of business men and, in addition, from a more personal standpoint, a great pleasure for me to be with you and to have the opportunity to say a word of greeting to my friends and neighbors of the Empire State.

I assume, however, that you have invited me not in my capacity as a fellow New Yorker but as the Undersecretary of the Treasury to talk to you about some of our financial and fiscal problems. The outstanding fact to be noted in considering them is the magnitude of the operations conducted by the Treasury Department. We become so
used in this country to doing things in a big way, and on the whole these operations have been so smoothly conducted, that in spite of their size they have been almost taken for granted. Yet in any other period or country they would arouse the most widespread interest. Consider what happened last March, for instance. As a result of the various operations of the Treasury Department the total volume of transactions at the New York Federal Reserve Bank on the single day of March 15 reached the stupendous total of two billion dollars. The adjective is hardly necessary, for the figures speak for themselves. The net result of these transactions was to reduce the public. debt by about 185 million and the annual interest charge by about 25 million.

This was but the first step in what is probably the largest financial transaction undertaken by this or any other Government in time of peace. It was the initial move in a program looking to the conversion or retirement of over three billion dollars of second Liberty loan 4 per cent and $41 / 4$ per cent bonds, callable on November 15, next, and which have since been called.

The second Liberty loan, which was issued in November, 1917, was the second large loan floated by the Government during the war. You will all remember-for doubtless many of you participatedhow a nation-wide campaign was conducted to sell these bonds, how Liberty loan committees were formed in every community throughout the land, and how, spurred on by a great national crisis, every patriotic impulse was appealed to in order to place these bonds in every home in the land. Let me give you a brief summary of the history of this issue. The second Liberty loan was offered for subscription on October 1, 1917. Subscriptions amounting to \$4,617,532,300 were received from $9,400,000$ subscribers. A total of $\$ 3,807$, 865,000 was allotted. The bonds issued were dated November 15, 1917, bore interest at 4 per cent, were payable in 25 years, but were subject to redemption on and after ten years from the date of issue. They carried a conversion privilege which might be exercised in the contingency of the first subsequent issue of bonds carrying a higher rate. This contingency arose when the third Liberty loan was issued on May 9,1918 , and thereafter $\$ 3,707,933,850$ of the 4 per cent bonds were converted into $41 / 4$ per cent bonds.

Stated in terms of pieces, $14,938,073$ bonds were originally delivered; $19,801,102$ bonds have since been delivered on conversion, exchange, etc, against the cancellation of a like amount of other bonds. Altogether $34,739,175$ bonds have been delivered to owners. These bonds would weigh 222 tons, and if spread out would cover almost exactly one square mile of the earth's surface. During this period $31,114,759$ bonds have been cancelled on all accounts, leaving now outstanding $3,624,416$ bonds. Since 1917 interest aggregating $\$ 1,327,600,885$ accrued and became payable on this loan to May 15, 1927, involving the issue and payment of some $7,750,000$ interest checks and the payment of more than $130,000,000$ interest coupons.

On March 8, 1927, the Secretary of the Treasury announced an offering of $31 / 2$ per cent Treasury notes, maturing in five years, but callable on six months' notice on and after March 15, 1930. These notes were offered only to holders of second Liberty loan $41 / 4$ per cent bonds, to be exchanged at par for their Libertys, interest on the bonds surrendered to be paid to May 15, 1927. The offering was
well received and exchanges fully came up to our expectations. No less than $\$ 1,360,456,450$ of second Liberty bonds were exchanged for the new $31 / 2$ per cent notes. Of the original issue of this loan, bonds amounting to $\$ 790,461,800$ have been redeemed from time to time on various accounts, and, as just stated, $\$ 1,360,456,450$ have been refunded into Treasury notes. There remains outstanding a balance of $\$ 1,656,946,750$.

On May 9 last Secretary Mellon called for payment on November 15,1927 , the tenth anniversary of the issue, all outstanding second Liberty loan bonds. This means that interest on these bonds will cease on November 15 next and that holders are definitely confronted with the decision of what they ought to do. They may, of course, hold their bonds until maturity and receive cash for them-which incidentally involves the problem of how to invest: the proceedsor, in view of the announcement made a week ago by the Treasury, they may, on or before June 15, exchange their second Libertys for new long-term United States bonds.

On May 31 the Secretary announced an offering of 20 -year bonds callable at the end of 16 years, bearing $33 / 8$ per cent interest, to be issued in exchange at par for second Liberty loan 4 per cent and $41 / 4$ per cent bonds at par, accrued interest on seconds up to June 15 to be paid in cash.

Two hundred million dollars of the new issue were offered for cash subscriptions at a premium of one-half of 1 per cent. This cash offering was largely oversubscribed, subscriptions aggregating over $\$ 610,000,000$, though only approximately $\$ 200,000,000$ of subscriptions were invited.

The yield of the new bond to the cash subscriber is approximately 3.33 per cent; to the holder of a second Liberty bond who makes the exchange at par about 3.37 per cent, though the latter, of course, sacrifices the premium which the second Liberty bonds now command, but which will grádually disappear during the course of the next five months. The closing market prices of second $41 / 4$ 's during the last two weeks in May was on an average of $100 \frac{1}{3}$, or $\$ 1,003.121 / 2$, per thousand dollar bond. On exchange a holder receives a bond which has been largely oversubscribed at a premium of $\$ 5$ per bond, showing an apparent gain of $\$ 1.871 / 2$ per thousand-dollar bond.

I am going into these details not with a view to advising holders as to what course they should pursue, but because I know that before you came here and after you return to your homes you are going to be asked by your many customers what to do, and it occurred to me that it would be of interest to analyze the proposal from the standpoint of the bondholder. I recognize, of course, that the decision must be largely governed by the circumstances in each particular case, by the character of the investment desired, and by your own judgment as to the long-time trend of interest rates.

Such a discussion is all the more valuable because I am satisfied that a great majority of the second Liberty loan bonds still outstanding are in the hands of investors, using that term in the narrowest sense, and that many of them are held by persons of moderate means having but limited knowledge of security values or investment possibilities. I base that conclusion upon the widespread distribution of the original issue and upon the facts disclosed by the
results of our March exchange offering. The Treasury Department feels itself to be under a real obligation to these holders to acquaint them with all the facts because of the conditions under which the original subscriptions were made, a feeling which I have no doubt you gentlemen share.

Of some $\$ 59,000,000$ of $\$ 50$ coupon bonds only $\$ 1,739,000$ were exchanged for $31 / 2$ per cent notes in March; of approximately $\$ 116$,000,000 of $\$ 100$ bonds only $\$ 4,167,000$; of apnroximately $\$ 141,000,000$ of $\$ 500$ bonds only about $\$ 11,000,000$; of $\$ 605,000,000$ of $\$ 1,000$ bonds only about $\$ 115,000,000$; while of $\$ 1,366,000,000$ of $\$ 10,000$ bonds no less than $\$ 1,026,000,000$ were exchanged. The figures relating to the registered bonds are if anything more conclusive.
It is not unreasonable to conclude from these figures that the banks, insurance companies, and other big holders of Government securities were the ones to whom the March exchange offering appealed and that the individual investor whose holdings of Governments are of moderate amount and who generally favors a long-term bond rather than a security of comparatively short maturity either took no particular notice of the Treasury offering or else decided to hold on to a bond that did not mature until 1942 and which might conceivably not be called prior to that date.
As to those who failed to learn of the Treasury program, we have made every effort to reach them, both on the occasion of the notice of the call of the seconds, and, more recently, when the announcement was made of the new issue of the 1943-47 bonds. And I trust that you gentlemen will cooperate in the future as you have in the past with a view to bringing this information to the attention of every holder of a second Liberty bond.

As to those investors who are loath to part with a security of possibly long maturity for one of comparatively short life, their seconds are now definitely called and are five months' paper. Moreover, the Treasury, in reaching the decision to offer a 20 -year bond in exchange, took into consideration their apparent preference for a long-time security. I do not say that this was the only consideration. I do say that it was an important one.

May I now, speaking from a limited experience, say a word or two about the rather simple principles which govern Treasury refunding and retirement operations? There is no reason why they should be shrouded in mystery, and yet in reading discussions and prophesies as to our financial transactions, present and future, I frequently notice a tendency to surround a necessarily technical problem with an excessive amount of-shall I say-professional atmosphere.

The general program is twofold in character. It contemplates, in the first place, a steady reduction of debt by retirement, and secondly, a reduction of the burden by refunding as rapidly as possible securities bearing high rates of interest with those bearing a lower rate. To date the Treasury has been singularly successful in both operations.

This program of steady debt retirement is in accordance with the historic policy of the National Government. It has been steadfastly adhered to by the administrations of Presidents Harding and Coolidge, and helped by the large surpluses which have come from
the prosperity of the country and the business-like administration of our National Government which has resulted in reducing our gross national debt from $\$ 25,484,000,000$ on June 30,1919 , to $\$ 18,873$,000,000 on May 31, 1927, or a reduction of $\$ 6,611,000,000$. Last year the Treasury Department retired $\$ 873,000,000$ of debt, and in the fiscal year which ends on June 30 debt retirement will aggregate over one billion dollars. This means, to be sure, fewer Government securities $\mathrm{f}_{\checkmark}:$ the investor, but it spulls an enormous saving in interest charges and consequent relief to the taxpayer. This is strikingly. ill-strated by the fact that interest payments next year will be less by $\$ 63,000,000$ than they are during the current fiscal year, due entirely to debt reduction and refunding operations. So, when you read the surplus figures for this present fiscal year, do not be regretful that Congress might have given you the benefit of greater tax reduction, but rather realize that this entire surplus having been applied to the reduction of the national debt the reduced interest charges will represent a permanent annual saving which will inure to your benefit in reduced taxes with just as much certainty as would the more direct method of tax reduction.

I trust I have not wearied you with this somewhat long and technical discussion, but the subject of what the investor is to do with his second Liberty loan bonds is a pertinent, and to him an important, question at this time, while the magnitute of the operations conducted by the Treasury Department merit the attention of the many thoughtful citizens who are ever interested in the sound and efficient administration of their Government and look with pride upon its accomplishments in the financial as well as in other fields.

## Exhibit 22

## "United States Treasury Financing," extracts from an address by Assistant Secretary of the Treasury Dewey, June 8, 1927, before the Pennsylvania Bankers' Convention, Pittsburgh, Pa.

It is with considerable trepidation that I attempt to discuss Treasury finance in the home city of Secretary Mellon, and doubly so as he himself has talked here within the past fortnight. The only reason that I have courage to proceed is due to the fact that I have had the honor for the past three years of serving under Mr. Mellon and of studying his methods.

When one thinks of the Treasury Department one usually thinks of taxes, bond issues, and our currency. As a matter of fact, this department is charged with many other and varied duties, but I shall endeavor to discuss but two-our financing and the new-sized currency which the Secretary has recently authorized.

Generally speaking, Treasury borrowings since the beginning of the war and up to the present time have been made in the first instance through the sale of short-time paper in the form of Treasury certificates of indebtedness, with maturities not exceeding one year.

These certificate issues offered to the public have been of two classes, (1) in anticipation of loans, and (2) in anticipation of tax receipts.

The needs of the Treasury to meet the expenditures occasioned by the war were so great that enormous borrowings were necessary. It was, of course, obvious that the maturities must be spread over a considerable period of time, and so four of the five great loans during the war and post-armistice periods were issued in the form of bonds. In order to float a loan of the size of one of the Libertys considerable preparation was necessary. In all probability the market could not have stood an initial issue of several billions of dollars. At the same time the Treasury needs were urgent, and so in anticipation of a long-term loan temporary borrowings were resorted to as required and Treasury certificates of indebtedness were issued. The first issue of certificates in anticipation of the first Liberty loan was made on April 25, 1917. Other issues followed at frequent intervals up to the time of the issue of the first loan. The same procedure was followed with respect to each of the other Liberty loans. Maturities, generally, were arranged to coincide with the dates of installment payments on the Liberty issues. It is apparent that an issue of certificates placed the Treasury in immediate funds and that the later Liberty issue, in effect, became a refunding operation. Loan certificates aggregating $\$ 17,018,187,000$ were issued in anticipation of Liberty issues aggregating $\$ 21,432,294,700$.

A similar procedure was followed in issuing certificates of indebtedness in anticipation of tax receipts. The heaviest tax collections were made toward the close of the Treasury fiscal year, as it was not until February, 1919, when the revenue act of 1918 became effective, that the principle of quarterly tax payments was established. By use of short-term borrowings of amounts expected to be received when taxes became due, the same result was brought about as in the case of certificates in anticipation of loans-the Treasury was placed in immediate funds and maturing certificates offset tax payments. The fixing of quarterly tax payment dates by the revenue act of 1918 brought about the fixing of certificate maturities for the same dates, and this practice has been followed consistently ever since.
As you are aware, the structure of our debt now consists of three classes of securities-bonds with a maturity of over five years, notes with a maturity of from one to five years, and certificates of indebtedness with a maturity of not more than one year. It is with these latter two classes we will deal as the bonds present a different problem.

The Government collects its principal taxes every three months on the fifteenth days of March, June, September, and December, respectively. It is the custom for the Treasury to calculate its operations for this period, and in order not to upset the money market has spread its short-term indebtedness so that it falls due in more or less even amounts upon these dates. In arranging its financing, the Treasury officials estimate the amount needed for expenditures of all kinds during the ensuing three-month period, add to this the amount of notes or certificates maturing, and compare the sum with the estimated receipts from taxes and all other sources. The difference will be the amount it will be necessary to borrow. This difference is generally less than the amount of debt maturing so that, as a result of this refunding for a lesser amount, the public debt is reduced out of surplus, which is the excess of receipts over expenditures.

The question then arises as to what form the borrowing shall take, the length of maturity, and the rate of interest. We examine our list of maturities and discover that, for example, we have a vacant maturity date 18 months hence. This maturity should be filled or we will have a large receipt of cash from taxes and no securities to pay off, thus temporarily upsetting the money market. Having reached this decision it is obvious that an 18 -month note is the proper form of security to offer.

The matter of rate of interest is a little more difficult. If the new note, for instance, is to mature on June 15, we will first consider the yield of our securities maturing three months before and three months after that date; the mean should be about right for the new offering. Consideration is given to a number of other factors which will affect the rate and must be taken into account, which are of too broad a nature to consider here. This, however, describes briefly our general method.

To return to the example we are considering, let us assume that we have decided to issue an 18 -month note with a given rate of interest, this to refund securities maturing December 15 . What are the administrative steps to be taken?

The Federal reserve banks act as the fiscal agents of the Government, although, of course, it is perfectly possible to purchase or exchange Government securities through the Treasurer of the United States, but such transactions represent a mere fraction of 1 per cent of the whole. Therefore it is necessary to notify our fiscal agents first that we contemplate offering new securities, and, secondly, what they are to be. This latter information, however, is not given until. the last moment.

Upon receipt of the final advice each Federal reserve bank simultaneously notifies the banks in its district, requesting them to forward their subscriptions. Upon the same date the Treasury releases a statement to the press describing all of the details of the issue. In this way the whole transaction is given the broadest publicity. As a matter of fact, so accustomed has the public become to the quarterly financing of the Treasury Department that the financial columns of many leading newspapers frequently hazard guesses as to what form it will take.

Immediately after the announcement subscriptions commence pouring into the Federal reserve banks from banks in their districts which have received them from their customers and are subscribing for their own account. These subscriptions are divided into two classes-first, exchange subscriptions, which are the offerings of the maturing security in exchange for the new, and, secondly, offers to purchase the new security for cash.

It might be well to mention here that in order not to encumber this description with too many details, I have purposely omitted mention of many items that we must carefully consider. Among these is the percentage of exchange subscriptions we will allot. Acceptance of exchange subscriptions reduce in like amount the cash required to pay maturing issues so that the larger the percentage of this class of subscriptions accepted the more funds received from taxes and other sources will be available for expenses in this period. In other words, the entire matter is largely governed by the cash position of the Treasury at the time.

Each day the Federal reserve banks notify the Treasury by wire of the total subscriptions received, classifying them into the two groups mentioned, and further classifying the cash subscriptions by principal amounts. That is to say, how many individual subscriptions are received of $\$ 1,000, \$ 10,000, \$ 50,000$, etc. This information is necessary in order that the Treasury may make fair allotments. So popular have the short-term Government securities become as an investment by banks and corporations that for the past several years every issue has been heavily oversubscribed. It is therefore the duty of the Treasury to see that what it is offering is equitably allotted to each class of subscriber.
The period for receiving subscriptions generally lasts for three to four days, depending somewhat upon the size of the offering and the condition of the money market. When the Treasury sees from the daily reports from the Federal reserve banks that its requirements have been fully met, it sends out a notice terminating the offering as of a certain hour and date. When all of the banks have made their final report, allotment is made. This is based, as I have said, upon as nearly an equitable division among all classes of subscribers as possible. It is entirely contrary to Treasury policy to permit any class or district to receive preference in the matter of allotment.

About three days prior to the date of the offering the Federal reserve banks are notified as to how to accept subscriptions. For the sake of an example, those subscribing for a thousand-dollar note will receive their allotment in full. Those subscribing an amount up to $\$ 10,000$ but over $\$ 1,000$ will receive 80 per cent of their subscriptions and so on. The total allotment represents the sum the Treasury requires. Payment must be made on the date of the issue.

Let us now consider this matter of payment. In the days prior to the Federal reserve system all Government receipts, either from taxes or otherwise, were paid into the subtreasuries and became impounded in a relatively few centers. This led to the constant upsetting of the money market, due to the withdrawal of funds from business, to meet which the Secretary of the Treasury had to redeposit the money in those sections in which he thought it would do the most good. This method was crude and unreliable and constantly led to embarrassment.
Under the present methods tax receipts are largely used to pay off maturing Government obligations, and hence the receipts are to a great extent paid back immediately into commercial channels, thus avoiding disturbance to the money and investment markets. The funds which the Treasury is to retain for Government expenses during the next three months, and which are derived from the sale of its securities, are largely paid for by credit in the following manner:
Any incorporated bank or trust company desiring to participate in deposits of public money arising from the sale of bonds, Treasury notes, or certificates of indebtedness may make application to the Federal reserve bank of its district to become a "special depositary" with a "war-loan". account, and qualify by depositing authorized securities.
Payments for subscriptions to public debt offerings are made in the form of exchanges of maturing issues or in cash, or in case the bank making the subscription is a special depositary having a "war. loan" account, by a credit to that account in favor of the Federal
reserve bank of its district as fiscal agent of the Uninted States, which account, as has already been mentioned, is secured by the pledging of authorized securities with the Federal reserve bank of the district.
Too great emphasis can not be placed on the importance of the special depositary system. . Since the new issues of securities are offered on tax payment dates, if the subscribing banks were required to make payment therefor in cash, such payment, together with the heavy withdrawals by depositors for the purpose of meeting quarterly installment of taxes, would create a serious financial disturbance unless prompt redeposit of the funds was made in the same localities from which drawn. Under the existing system, whereby the subscribing bank is permitted to make payment for the securities by credit in its "war-loan" account, the full amount of the subscription is for the time being retained by the bank. Withdrawals are subsequently made as the Government has need for funds, but such withdrawals are gradual, covering a period of several months following the deposit, with the result that there is complete avoidance of the shock which would be ineritable if these subscriptions, in the first instance, were required to be paid in cash on the date on which the securities were issued. ${ }^{\circ}$

## Exhibit 23

> "Treasury Financing," an address by Undersecretary of the Treasury Mills, August 10, 1927, at the Institute of Public Affiairs, University of Virginia

The Treasury Department is the central agency through which the Federal Government conducts its financial affairs. Generally speaking, it receives and has the custody of all funds paid to the Government and disburses all moneys in payment of obligations of the Government. One of the primary duties, therefore, of the Treasury Department is to see that the Government always has on hand sufficient funds to meet its obligations, including public debt maturities, and to do so in such a way as to effect a minimum disturbance to money and business conditions. If taxes and receipts flowed uniformly throughout the year and expenditures ran an even course month by month, there would be no real financing problem, but this is true neither of receipts nor of expenditures. Tax receipts rise to a sharp peak four times a year, while heavy debt maturities and interest payments are not spread out, but come due on single days, the former at irregular intervals. Speaking in general terms, then, in so far as current financing is concerned, our problem is to synchronize peak tax payments with the maturing of heavy obligations and in the intervals to have in bank no more funds than are needed to meet current expenditures.

Ever since the war, Treasury financing has centered around the public debt. Whether in the form of short-term obligations or longterm bonds it is the all-important factor. I shall deal later with the mechanism of operations affecting public debt, but before doing s $\dot{\sigma}$ I want to deal briefly with the policy which the Government has pursued in respect of our war debt.

The first thing to be noted is that the service of such a debt is enormously expensive. From April 6, 1917, to June 30, 1927, the Government expended for interest $\$ 8,322,000,000$. One of the most direct methods, therefore, of reducing the cost for the Federal Government is to reduce the sums paid annually in interest charges. There is this further advantage in this reduction-it is not one of a temporary character, but constitutes a permanent annual saving.

There are two methods of bringing about the desired result: First, by debt retirement; secondly, by refunding outstanding securities bearing a high rate of interest into securities bearing a lower rate. Since 1921 the Treasury Department has availed itself of both methods. On June 30, 1921, the interest-bearing debt was $\$ 23,738$,000,000 ; on June 30,1927 , it was $\$ 18,252,000,000$, or a decrease of $\$ 5,486,000,000$. For the most part, this debt retirement was effected by means of the sinking fund, foreign repayments, and such miscellaneous items as franchise tax receipts especially assigned to debt retirement, but approximately $\$ 2,000,000,000$ is to be assigned to surplus of receipts over expenditures, which has continued year after year in spite of three sweeping tax-reduction measures. Due to this decrease in the debt, the average annual interest payments have been cut by not less than $\$ 200,000,000$.
Turning, now, to the second method of reducing the burden of interest charges, we find that the average rate of interest paid on the United States Government debt was 4.29 per cent in 1921, whereas on June 30, 1927, the average rate of interest was 3.96 . The difference between 3.96 and 4.29 per cent, on approximately $\$ 18,250,000,000$ of debt amounts to about $\$ 60,000,000$ a year. Thus we see that during the course of the last six years by debt retirement oand by lowering of the interest rate interest charges have been reduced approximately $\$ 260,000,000$ a year. This, as $\bar{I}$ have already stated, constitutes a permanent annual saving which, over a 10 -year period, amounts to $\$ 2,600,000,000$, or almost the equivalent of one year's internal revenue receipts, including the income tax. The program, then, of the Government in relation to the war debt is twofold in character: It contemplates, in the first place, a steady reduction of debt by retirement; and, secondly, a reduction of the burden by refunding, as rapidly as possible, securities bearing high rates of interest into those bearing a lower rate. As we have seen, to date the Treasury has been singularly successful in both operations. Let me now say a word or two about the rather simple principles which govern Treasury refunding and retirement operations.

We have to start with a definite amount of outstanding obligations extending over a period of 20 years or more, with varying maturities, some of which the Treasury controls by means of call provisions. We know the fixed dates on which certain obligations have to be met, and there are, in addition, a number of open dates which may be filled either by making use of the call provision of a particular issue or by the issue of a new maturity through a refunding operation. It is these open dates that give the Treasury a very considerable measure of freedom as to the maturities of Government obligations.

But there are limitations. For instance, we must be careful, in preparing our schedule, to see that enough securities either mature
or are callable every year to enable us to effect the retirements from the sinking fund required by law.

Sinking fund retirements must be effected at an average cost not in excess of par, and the great majority of retirements from this source from now on must be made at par. This means that unless there are adequate maturities in each year the Treasury Department might find itself unable to make any retirements from the sinking fund, for United States Government securities have a tendency to mount to a premium. It is not unreasonable to suppose that history will repeat itself and that in the future as in the past United States Government bonds will command a premium. Therefore, even if Congress should change the sinking fund provisions-which I am not suggesting Congress either should or would do-so as to require the Treasury Department to retire bonds at above par, it would prove to be an expensive proposition. This was done in the case of our Civil War bonds, which the Government, in pursuance of a policy of debt retirement, purchased in the open market at a price as high as 129. As Noyes says in his "Forty Years of American Finance":

A very extraordinary chapter in American finance now opened. During 1888 the Government 4 per cents ranged on the open market from 123 to 129 ; yet at these high prices the Treasury bought, within seven months, upward of $\$ 50,000$,000 . * * During 1888 and the two ensuing years $\$ 45,000,000$ was actually paid out in premiums
We know, in the second place, though not quite as accurately, what funds will be available for debt retirement from the sinking fund and foreign repayments, and we must estimate as best we can what sums may be expected by way of surplus, for it is obvious that this last item is susceptible of very great variations.
With this information in hand we are enabled to prepare what may be called a time table of payments which, in so far as the aggregate amount to be retired over a given number of years is concerned, is probably fairly accurate. But should it prove otherwise, no difficulty need be experienced, since it would always be possible, if necessary in the later years, to extend the life of the debt by refunding maturing obligations.

Within the limits thus staked out the Treasury, as stated above, retains considerable liberty of action, having as it has the option of filling the earlier open dates with short-term maturities or the later one with securities of a longer life. In reaching a decision on this question from time to time and as occasion arises, the Treasury must be governed, both as to rates and maturities, by current conditions, and these conditions vary rapidly. They do not permit a detailed program to be mapped out in advance, but only a general one, embodying a number of alternative propositions, the most appropriate one of which is to be selected when the time for action has come.
The problem of refunding the second Liberty loan bonds illustrates as well as anything could the nature of the problem. It is obvious that, with its long-term Government bonds selling on a basis to yield less than $31 / 2$ per cent and its short-term maturities on a basis to yield $31 / 4$ per cent and less, the Treasury Department could not permit over $\$ 3,000,000,000$ of $41 / 4$ per cent bonds to remain outstanding once the time arrived when, under the law, they could be retired by call. Every consideration of sound financial management demanded that they should be refunded at as early a date as possible.

Such was the situation in the early part of this year. The question to be answered was what form or forms the refunding operation should take.

During the first week in March, Treasury short-term certificates and notes were selling on a basis to yield approximately 3.12 per cent, whereas long-term Treasury bonds were selling on about a 3.45 per cent basis. At that time it was not unreasonable to conclude that conditions favored a note issue of limited maturity rather than an offering of long-term bonds. Accordingly, the Treasury offered a $3-5$ year $31 / 2$ per cent note in exchange for second Libertys, with certain concessions as to interest, intended to compensate for the premium which the Libertys then commanded. The response was most gratifying. No less than 44 per cent of the amount outstanding was exchanged.
Two months later the situation was reversed. United States Government securities maturing within a year were selling on a basis to yield from 3.25 to 3.45 per cent, while, on the other hand, the three long-term Treasury issues were selling on a basis to yield approximately 3.30 per cent. It seemed probable that the conversion of about $\$ 1,360,000,000$ of seconds into five-year notes and the subsequent calling of $\$ 1,700,000,000$ of those remaining outstanding had resulted in an oversupply of short-term issues, accentuated by the early maturity of the third Liberty bonds. In addition, we believed that our appeal should be directed to the many thousands of small holders who had not been attracted by our note offering and who rather obviously seemed to prefer a long-term bond to one with an early maturity with the consequent necessity of early reinvestment. So in June as the second step in this major financial operation we offered in exchange for seconds still outstanding a $33 / 8$ per cent $16-20$ year bond and received $\$ 245,000,000$ of seconds in exchange.

So much, then, for the conditions which determine the character and maturity of a new issue. The question of interest rates is one requiring a greater degree of judgment, but here again current rates for different maturities offer a fairly reliable guide, always taking into consideration what the long-time trend is likely to be and never forgetting that the volume of United States Government securities is constantly and rapidly diminishing, and that not many more years will elapse before this most convenient and safe form of investment which we have become so thoroughly accustomed to during the last decade will be available only in limited amounts, and that their scarcity value is a consideration which can not be neglected.

We have been discussing the refunding process. Let us now see how the actual maturities of these obligations running into billions are met. It should be noted that, with the exception of the third Liberty loan, all of the war loan bond issues are subject to call, in whole or in part, at a date some years in advance of the final maturity date. By the use of the call and exchange privilege the Treasury Department is enabled to extend the period of payment over a number of years. You have seen that before we called $\$ 3,100,000,000$ of second Liberty loan bonds in May we had exchanged $\$ 1,360,000,000$ into $3-5$ year notes, which notes we will be able to pay off at the rate of approximately $\$ 450,000,000$ a year, beginning in 1930 , and that after
the call had been issued we exchanged $\$ 245,000,000$ seconds into $16-20$ year bonds. In addition to that, through purchases from surplus moneys, we further reduced the amount outstanding, so that, whereas, when the operation was begun in March there were $\$ 3,104,000,000$ of second Liberty loan bonds in the hands of the public, on June 30 the amount had been reduced to approximately $\$ 1,276,000,000$, and there will, of course, be further reductions prior to the maturity date on November 15 next. The funds necessary to meet those presented for cash payment on that date will be obtained by the sale of obligations maturing either on one or several of the future quarterly tax payment dates. At the same time these obligations will be offered in exchange for maturing second Liberty loan bonds, and unquestionably a number of the holders of seconds will avail themselves of the exchange privilege. When the entire transaction is completed many of the $\$ 3,104,000,000$ of seconds will have been retired for cash; others will have been exchanged into a long-term bond, bearing a materially lower rate of interest; others into $3-5$ year $31 / 2$ per cent notes; and others into short-term certificates carrying a low rate of interest.

This brings me to our short-term debt. In addition to our longterm Liberty loan and Treasury bonds, the United States Government has a short-term floating debt that is constantly retired and constantly renewed or replenished. This short-term paper is of war origin, though its use has been continued as a most convenient part of our current financing mechanism, and it furnishes the medium through which major disturbances in the money market, resulting from Government financing, may be avoided.

It is obvious that, with the annual surpluses which we have enjoyed in recent years, the excess of revenue receipts would rapidly have extinguished the floating debt were it not for the fact that it was undesirable to permit this process to take place and had not the maturity of the Victory notes and of the notes issued in exchange for Victory notes and more recently the calling of the second Liberty loan bonds, enabled us to keep an adequate supply of shortterm paper outstanding. As it was convenient during the war to anticipate receipts of Liberty loan bonds by the issuance of certificates, so it is convenient and economical to finance the maturities of these war-time issues, in part at least, by short-term paper that bears a low rate of interest and which can subsequently be gradually redeemed at convenient dates.

But, in addition, our short-term debt performs a very important function. It furnishes the machinery which enables the Treasury Department to keep Government cash balances at a minimum and to carry on its financial operations without major disturbances in the money market every quarter day.

The Federal reserve banks are the fiscal agents of the Treasury and its payments are generally made through them. Treasury balances in the Federal reserve banks represent money withdrawn from the market. In view of the very heavy income tax payments made on the 15th of March, June, September, and December, unless some offset is devised and maintained, cash balances with the Federal re-
serve banks would rise to a peak on the quarterly dates and would drop to a minimum just before the next quarterly date. So, once every three months, great sums of money running as high as $\$ 400,000,000$ would be taken from the commercial banks by the tax payer and paid into the Federal reserve banks to the 'Treasury's accounts, thereby taking that amount of money out of the money market with all of the consequences to interest rates that must follow. It would be possible, of course, to meet this situation by redistributing these deposits among the commercial banks upon some arbitrary basis, but this would inevitably subject the Treasury to all manner of pressure in favor of particular banks or particular districts. If, however, on each quarter day, the certificates mature in an amount approximately equal to tax payments, it is obvious that the two transactions wash. The tax checks drawn upon the commercial banks are deposited with the Federal reserve banks to the Treasury's account, but at the same time there is paid to the commercial banks a like amount in payment of interest and maturing securities.

This, however, is only part of the picture. We have not taken into consideration the Government's financial needs between quarter days and if the entire receipts from income taxes are absorbed by maturing certificates the Government might well find itself short of funds. Quarter-day financing, therefore, involves a careful estimate of the amount needed for expenditures of all kinds during the ensuing three-month period. This must be added to the amount necessary to meet maturing certificates, and this sum, less receipts, represents the amount of new certificates that will have to be issued on the quarter day. Stated a little differently, tax and other receipts, as a rule, are not sufficient to meet maturing certificates as well as to finance the governmental needs over the next three-month period. It is necessary, therefore, to issue new certificates, which in turn will mature on a future tax date, when the process will be repeated.
But, you will say, if tax payments and maturing certificates balance, so as to involve no withdrawal of funds from the money market, then the sale of additional certificates must result in the withdrawal of funds. This would be so, of course, if the new certificates were sold for cash. They are not, however. The banks pay for them by means of a deposit credit. Any responsible incorporated bank or trust company upon putting up security with the Federal reserve banks is permitted to pay for Government securities by the creation on its books of a credit in favor of the Treasury. Suppose, for instance, on September 15 next National Bank A subscribes for $\$ 1,000,000$ of certificates for itself and its customers. On that day the certificates are delivered to it and at the same time it credits the Treasury with $\$ 1,000,000$ on its books. No money changes hands. The bank acquires $\$ 1,000,000$ of additional deposits, which it can reasonably expect will remain with it for an average of 60 days and on which it pays 2 per cent interest. From time to time, as the Government needs cash, a call is made upon the various banks with which the Treasury has deposit credits. These banks pay the
money to the Federal reserve banks to the account of the Treasury, and as the money is immediately paid out in the form of Government expenditures the transaction occasions no withdrawal of funds from the market. This plan accomplishes three purposes: First, it makes Government deposits depend not upon the discretion of the Secretary of the Treasury but upon the amount of securities any bank sees fit to subscribe for. Second, it encourages the banks to buy Government bonds for the sake of the deposit, thus giving the Government a firstclass primary market, while at the same time the banks furnish the machinery through which a secondary distribution can be made to individual investors. This means that, without expense, the Treasury Department has at its command a nation-wide sales organization. and third, it permits large fiscal operations to be conducted without involving a large transfer or withdrawal of funds on a single date, with all of the consequent disturbance to money conditions and interest rates.

The point to remember is that the balance carried by the Treasury with the Federal reserve banks is equivalent to the withdrawal of a certain amount of funds from circulation. It is for this reason that the Treasury maintains two bank accounts-the deposit account with the regular banks, which it draws on from time to time as the funds are needed, and the checking balance with the Federal reserve banks, which is restricted to the normal day-to-day requirements of the Government. There is no difficulty whatsoever in maintaining a proper balance except on or about the 15th of tax-payment months. The difficulty then arises because of the lag of tax payments behind security payments, though both are due on the same day. Let me illustrate: Suppose a large corporation has invested in $\$ 10,000,000$ of Treasury certificates maturing on September 15 next to meet the income tax payments it will have to make on that date. Some days before the 15th it delivers the certificates to its bank, and on the morning of the 15 th that bank presents the certificates for payment to the Federal reserve bank and credits the corporation with $\$ 10,000,000$. That same day the corporation mails its check for taxes to the collector of internal revenue. The collector receives the check on the 16th, deposits it in the Federal reserve bank on the same day, and it goes through the clearing house on the 17 th. Where checks are on banks outside the Federal reserve cities the delay in collection is longer. The result is that on the night of the 15th the Treasury finds that it has paid out more than it has taken in and has to borrow this amount from the Federal reserve banks for a few days to take care of the overdraft. So for three or four days every quarter day the Treasury Department finds it necessary to borrow from the Federal reserve banks. This overdraft represents an additional amount of money poured into the market, but the period is very brief, and the Federal reserve banks are in a position largely to offset the effects of these additional funds. Except for this minor disturbance, the machinery of Treasury financing is so well devised and adjusted that it functions with such smoothness as to be almost imperceptible in its influence on the normal financial conditions of the country. This is all the more remarkable when you consider the magnitude of the
transactions. Thus, for instance, as a result of the various operations of the Treasury Department the total volume of transactions at the New York Federal Reserve Bank on the single day of March 15 reached the stupendous total of $\$ 2,000,000,000$.

I do not know how well I have succeeded in making the picture clear to you, but let me briefly summarize the high spots. The public debt is the governing factor in Treasury financing. It is the policy of the Treasury to reduce our war debt at a reasonably rapid rate, and further to relieve the burden by replacing high interest-bearing securities with others carrying a lower rate whenever opportunity offers. This twofold process of exchange and retirement is effected in the main by calling outstanding issues at convenient dates. The funds needed to meet obligations actually presented for payment are obtained through the sale of short-term paper, maturing on taxpayment dates, thus enabling the Treasury further to ease any possible strain resulting from a heavy maturity. This process keeps in existence a short-term debt, which is of great value in facilitating current financing and in avoiding the disturbance that might result from heavy tax payment on quarter days. It is not a complicated process, but it is by no means an automatic one. It implies a definite policy, sound judgment in carrying it out, and a highly competent organization to deal promptly and accurately with the many details involved in transactions which not only involve huge totals, but the handling of hundreds of thousands of separate individual accounts. Being a comparatively recent addition to the Treasury staff, I think I can say without trespassing on the boundaries of good taste that I have never seen two more competent business organizations than those of the Federal reserve banks and the United States Treasury Department.

Regulations concerming United States Treasury savings certificates (supplement to Department Circular No. 149, revised February 1, 1927)

Treasury Department, Office of the Secretart, Washington, February 1, 192'7. To holders of Treasury savings certificates and others concerned:

1. Treasury Department Circular No. 149, revised, dated August 1, 1922, prescribing rules and regulations with respect to Treasury savings certificates, is hereby amended by striking out Paragraph IX 2 and Paragraph X 1 and inserting in lieu new paragraphs reading as follows:

## IX

2. If a guardian of the estate has, to the knowledge of the Secretary of the Treasury, been appointed for an infant owner of a Treasury savings certificate, payment of the certificate will be made only to such guardian upon presentation of satisfactory proof of his appointment and qualification. In general, such proof should consist of a certificate from the proper court or a certified copy
of the order of the court appointing such guardian, showing the appointment and qualification of the guardian. In each case, the certificate or the certification should be under the seal of the court and dated not more than one year prior to the date of the presentation of the Treasury-savings certificate for paymeni.

## X

1. Payment of a Treasury savings certificate held by a person who has been legally declared to be incompentent to manage his aftairs and for whose estate a conservator or other legally constituted representative has been appointed by a court of competent juxisdiction, to the knowledge of the Secretary of the Treasury, will be made only to such conservator or other legal representative, upon the presentation of satisfactory proof of his appointment and qualification. In general, such proof should consist of a certificate from the proper court or a certified copy of the order of the court appointing such conservator or other legal representative showing the appointment and qualification of such conservator or other legal representative. In each case the certificate or the certification should be under the seal of the court and dated not more than one year prior to the date of the presentation of the Jreasury savings certificate for payment.
2. The Secretary of the Treasury may amend at any time or from time to time any of the provisions of this supplementary circular.
A. W. Mellon, Secretary of the Treasury.

Exhibit 25
Regulations concerning United States war-savings certificates (supplement to Department Circular No. 10S, revised February 1, 1927)

> Treasury Department, Office of mie Secretary,
> Washington, February 1, 1927.

To holders of war-savings certificates and others concerned:

1. Treasury Department Circular No. 108, revised, dated August 1, 1923, prescribing rules and regulations with respect to war-savings certificates, is hereby amended by striking out Paragraph IX 3 and Paragraph X 1 and inserting in lieu new paragraphs reading as follows:

## IX

3. If a guardian of the estate has, to the knowledge of the Secretary of the Treasury, or to the knowledge of the postmaster from whom payment is demanded, been appointed for an infant owner of a war-savings certificate, payment of the certificate, whether registered or unregistered, will be made only to such guardian upon presentation of satisfactory proof of his appointment and qualification. In general, such proof should consist of a certificate from the proper court or a certified copy of the order of the court appointing such guardian, showing the appointment and qualification of the guardiau. In each case, the certificate or the certification should be under the seal of the court and dated not more than one year prior to the date of the presentation of the war-savings certificate for payment.

## X

1. Payment of a war-savings certificate held by a person who has been legally declared to be incompetent to manage his affairs and for whose estate a conservator or other legally constituted representative has been appointed by a court of competent jurisdiction, to the knowledge of the Secretary of the Treasury or of the postmaster from whom payment is demanded, will be made only to such conservator or other legal representative, upon the presentation of satisfactory proof of his appointment and qualification. In general, such proof should consist of a certificate from the proper court or a certified copy of the order of the court appointing such conservator or other legal representative showing the appointment and qualification of such conservator or other legal representative. In each case, the certificate or the certification should be under the seal of the court and dated not more than one year prior to the date of the presentation of the war-savings certificate for payment.
2. The Secretary of the Treasury may amend at any time or from time to time any of the provisions of this supplementary circular.
A. W. Mellon, Secretary of the Treasury.

## OBLIGATIONS OF FOREIGN GOVERNMENTS

## Exhibit 26

Statement and letters conoerning the payment of $\$ 10,000,000$ to be made by France on June 15, 1927 (press releases, March 1 and March 3, 1927)

March 1, 1927.
The Secretary of the Treasury to-day made the following announcement:

Mr. Lacour-Gayet, the French financial attache, has told me the French Finance Minister is forwarding to me to-day a letter informing the Treasury Department that the French Government will pay to the Government of the United States on June 15 the sum of $\$ 10,000,000$ on account of the outstanding French debt, exclusive of the debt arising from the purchase of surplus war materials. If and when a debt-funding agreement has been ratified by the French Parliament and by the Congress, it is to be understood that this $\$ 10,000,000$ will be credited to the annuities provided for in such agreement.

The French Finance Minister further informs the Treasury Department that his Government will continue to make payments on account of the war material purchase debt in accordance with the terms of the obligations now held by the United States Government.

The payment of the $\$ 10,000,000$ and the understanding outlined are satisfactory to the Treasury Department.

March 3, 1927.
The Treasury Department yesterday made public the letters exchanged between M. Poincaré and Secretary Mellon covering the payment of $\$ 10,000,000$ by the French Government to the United States on June 15, 1927.

PARIS, March 1, 1927.
My Dear Mr. Secretary: I have the honor to inform you that the French Government has authorized me to delfver to you the inclosed declaration by which they pledge themselves to pay to the Government of the United States

#### Abstract

on June 15 next the sum of $\$ 10,000,000$ without prejudice to the ratification by the French Parliament of the definitive agreements.

I am personally pleased by this result of our conversations. Please accept, my dear Mr. Secretary, the assurances of my high consideration.

(Signed)
R. Poincaret.

Hon. Andrew W. Meilon, Secretary of the Treasury, Treasury Department, Washington, D. O.

The French Government will pay to the Government of the United States on June 15, 1927, the sum of $\$ 10,000,000$ on account of the existing debt of the French Government to the United States, exclusive of the debt arising from the purchase of surplus war materials.

After a debt-funding agreement has been ratified by the Congress of the United States and the French Parliament it is understood that the said sum of $\$ 10,000,000$ will be credited to the annuities provided for in such agreement.
The French Government will continue to make payments on account of said war material purchase debt in accordance with the terms of the existing obligations of France now held by the United States.

It is understood that the foregoing would in no way prejudice the ratification of the debt-funding agreement concluded on April 29, 1926.
(Signed) R. Poincart.
March 2, 1927.
My Dear Mr. President : I have received from the State Department your communication of March 1, 1927, addressed to me, informing me of the intention of the French Government to make a certain payment to the United States Government on June 15, 1927, and outlining the understanding that is to govern the said payment.
I. have examined your letter and would say in reply that the United States Government will be pleased to receive the sum specified in accordance with the understanding outlined in your letter.

Assuring you, sir, of my highest esteem, believe me,
Very sincerely yours,
(Signed) A. W. Mellon, Secretary of the Treasury.
M. Raymond Poincare,

The French Prime Minister and Minister of Finance,

Paris, France.

## Exhibit 27

Payment of Liberia's indebtedness to the United States (press release, July 6, 1927)

## Republic of Liberia, Office of the Consul General, Baltimore, Md.

Dr. Ernest Lyon, consul general and special financial representative of the Republic of Liberia in the United States, to-day presented to Hon. Ogden L. Mills, Acting Secretary of the Treasury, a draft for $\$ 35,610.46$, drawn by the National City Bank of New York on the

Riggs National Bank of Washington, D. C., in full payment of Liberia's indebtedness to the United States under the Liberty bond acts. Doctor Lyon, in making the payment, made a few remarks appropriate to the occasion and in returning the canceled obligations of the Republic of Liberia, Mr. Mills handed to Doctor Lyon a letter of felicitation from Secretary Mellon.

## remarks of the liberian consul general on the: occasion of the PAYMENT OF LLBERIA'S DEBT TO THE GOVERNMENT OF THE UNITED states

Distingutshed Sir: This monetary obligation which the Liberian Government settles to-day with the American Government carries our memories back to the great World War period. Liberia at the breaking out of the war had no grievances against the Central Powers then in war with the rest of Europe. She had elected, for various reasons, to remain neutral, notwithstanding political and other pressure to force her into taking sides with the allied forces. But when the American Government, after the tragic incident of the sinking of the Lusitonia severed diplomatic relations with the Imperial German Government, and war was declared against the Central Powers, Liberia followed the example of her good and great friend.

In the struggle she supplied mariners from her seaport population which made maritime communication possible up and down the West Coast of Africa, after the Europeans had withdrawn in response to the call of their respective nationalities.

Her men served as links of communication on the battle field rendering such other service, which brought down upon her national pate the ire of a German submarine, because the President of the Republic refused at the bidding of the commander to authorize the destruction of the wireless stations and other useful institutions in the service of the Allies.
Liberia as an ally was to share in the loan measure, which authorized the President of the United States to make loans to members of the allied compact to enable them to carry on the war to a successful finish.
The armistice, however, was declared before Liberia secured her full quota allotted. She did, however, secure a portion of the five million dollar allotment.
I come to-day, under official instructions, to settle that obligation covered by the face of this draft, issued through one of the most powerful and reputable financial institutions in the world. I refer to the National City Bank of New York. By this act Liberia not only sets a good example to the nations of the earth, but she emphasizes the fact that the respect which one nation entertains for another nation is based upon the integrity and promptness in the settlement of obligations monetary and otherwise.
You will be pleased to know that the Republic is entering upon a prosperous career, that her economic conditions have been wonderfully improved since the close of the war, that the opening up of the country to American capitalists marks a new day for the Government and the people of the Republic.

It is with great pleasure, therefore, that I present to you this draft cancelling Liberia's war obligation, and in doing so I beg to convey to His Excellency the President of the United States, through your good offices, the distinguished consideration and high appreciation of His Excellency the President of the Republic of Liberia, and to express the hope that the relations of comity and good will will not only continue but will increase as the years of national life are prolonged.

I have the honor to be, sir,
Your obedient servant,
Ernest Lion,
Liberian Consul General in the United States of America.

June 28, 1927.
My Dear Mr. Consul General: In accepting from your hands as special financial representative of His Excellency C. D. B. King payment in full of Liberia's indebtedness to the United States, permit me to congratulate your Government on the loyal and prompt manner in which it has met its engagements.

There is but one other nation among those whose obligations have been held by this Government that has made payment of its indebtedness without recourse to funding agreements.

The blow dealt to the economic system of Liberia by the war was severe in the extreme. That Liberia has been able to reestablish and strengthen her economic system, to regain her financial position, and to meet her public and private obligations in full constitutes an achievement that bears glowing tribute to the ability of her statesmen and to the industry of her people as a whole.

I trust that you will convey to His Excellency, President King, and to your Government an expression of the admiration felt here for a nation that has been able to accomplish such things, together with the hope of this Government that a future of peace and prosperity lies before Liberia in which the traditional friendship between the two nations may find frequent and cordial reaffirmation.

I am, my dear Doctor Lyon,
Very sincerely yours,
(Signed) A. W. Mellon, Secretary of the Treasury.

Dr. Ernest Lyon,<br>Consul General and Special Financial Representative of the Republic of Liberia in the United States, Baltimore, Md.

## Exhibit 28

Senator Smoot's reply in the United States Senate, December 22, 1926, to the statement of certain professors at Columbia University concerning foreign debt settlements

[^27]Mr. Smoot. Mr. President, the publicity efforts of the professors of economics at Columbia in connection with the settlement of the war debts contain assumptions which should have correction.

First. It is assumed by the Columbia professors that capacity to pay, as employed by the debt commission, meant the highest amount which could be collected from the debtor nation by complete exhaustion of the debtor's resources. As a matter of fact, capacity to pay in the conception of the commission represented the ability of the debtor nation to pay, taking into consideration all its external and internal obligations and the continued full development of its national life. France's debt agreements with America and England represent only half of what it expects to receive from Germany. Italy has set up a fund into which are paid German reparations and out of which can be paid the British and American debts. The prearmistice Belgian payments are fixed at less than the receipts from Germany on this same account. The debt settlements, particularly in the earlier years, do not interfere with the economic life of the continental nations. It is claimed too heavy a burden was imposed upon England. The settlement of the American debt was a material factor in the stabilization of the British currency. It is significant that by bringing sterling exchange to parity England in paying its adverse international trade balance saves each year much more than the annuity on the American debt. It has also been stated that England has lost more through the coal strike than the entire American debt. These examples simply illustrate the relative financial importance of the settlements, but for some reason every attack on the debt commission finds it necessary to exaggerate the actual financial burden imposed on the debtors.

Second. It is assumed that the debt commission was bound by limitations set by Congress. The debt commission was given the power, without returning to Congress, to make settlements on a $41 / 4$ pei cent 25 -year basis. No settlements were made on that basis, but in each case the commission negotiated an agreement which it and the representatives of the debtor thought fair, and that particular agreement was approved by Congress. In no case were the limitations in the statute a restriction on negotiations. There was the utmost flexibility.

Third. It is assumed that generosity did not enter into the negotiations of the commission. It certainly was very lenient to Italy, and it can not be condemned as harsh to France when there is imposed no greater burden on that nation than the collection of the postarmistice indebtedness at 5 per cent interest. The figures show that in the treatment of our half dozen or so relief debtors England imposed a much heavier relative burden than did America in settling for loans made by England at the same time to the same debtors and for the same purposes. French papers admit the Franco-British settlement. all things considered, is much more burdensome than the Franco-American settlement. No test of generosity is set up by the Columbia professors, but it is just assumed America was ungenerous

Fourtl. The Columbia professors complain because all debtors are not treated on an equality. They speak of a settlement of 80 per cent present value with Great Britain and 26 per cent present value with Italy. Do they propose to correct this want of equality by raising the Italian settlement to that of the British, which, of course, would impose a burden impossible of performance by Italy, or do they propose that the British be reduced to 50 per cent and the Italian raised to 50 per cent, which would make an easy settlement for Great Britain and still an impossible settlement for Italy; or do they propose that the Britisll settlement shall be brought down to the Italian 26 per cent, thus imposing no real burden on England at all? If the last is their proposition, then why can not Italy say its 26 per cent slould be reduced to zero because we are collecting nothing from another debtor, as, for instance, Armenia? The whole proposition is an absurdity. If it means anything it means complete cancellation. It seems disingenuous to state the professors are against cancellation and still urge a method of settlement of the question which inevitably means cancellation.

Fifth. As their suggestion is understood, it is proposed that the United States go into a joint conference to fix the amount of these debts upon the standard of "equality" and "generosity." They do not state at whose expense generosity is to take place. Of course, not of Columbia University, which enjoys the privilege of exemption from taxation and therefore would feel not at all any cancellation of debts. The whole proposition of the columbia
professors amounts to a proposed conference between ourselves, a minority of one, and our debtors, all the rest of the proposed conferees. The debtors are to fix how much, if any, of their debts they wish to pay. The standards of "equality" and "generosity" will be applied by the debtors.

Sixth. Like so many good-intentioned people, the Columbia professors, instead of accomplishing the benefits which they seek to confer, are actually doing harm to those they say they would help. What Europe needs is certainty. The French can without question pay the earlier years of the debt settlement and, with a return of economic stability, the later years surely also can be met. What they need is some certainty in their fiscal affairs, which they can only obtain if they make definite the obligations which they have to meet. The pronouncement of the Columbia professors is, as was to be expected, now being used to strengthen the opposition in France to $a$ ratification of the MellonBerenger agreement and therefore has become an active factor in the maintenance of this very uncertainty from which all Europe is trying desperately to rid itself. The Columbia professors permit their idealism to seek publicity just at this time to the embarrassment of Poincare in the difficult work which lies before him.

Exhibit 29
Letter of Secretary of the Treasury Mellon to President Hibben, of
Princeton University, March 15, 1927
March 15, 1927.
My Dear President Hibben: Your statement and that signed by 116 members of the Princeton University faculty indorsing the statement issued by the faculty of political science at Columbia, and urging the reconsideration and revision of the debt settlements with our former associates in the war, have come to my attention. I recognize, of course, the propriety of a frank expression of opinion on important public questions on the part of those in responsible positions, but I am somewhat surprised that before giving the public the benefits of their conclusions neither the gentlemen of the faculty of Columbia University nor those of the faculty of Princeton University saw fit to make a thorough and first-hand investigation of data available at the Treasury or sought by personal interview to ascertain the views of the American officials who negotiated the settlements. The training of these gentlemen, their standing as economists, historians, and teachers of government, would have led me to believe that they would have conceived it to be their first duty to present a dispassionate analysis of the facts based on original study rather than to submit their conclusions unsupported by facts.

Moreover, it would not have been amiss for you and your associates to have taken into consideration that one of these agreements has not been ratified and that the inevitable effect of such a pronouncement would be to encourage and strengthen the opposition in foreign countries to such ratification, an encouragement entirely unwarranted by the circumstances in view of the fact that the American people, expressing themselves through their chosen representatives in the House of Representatives, have approved of this agreement and that the debate, when the measure was before the House for consideration, indicated that an overwhelming majority of the Representatives were opposed to more lenient terms. It is highly probable that such expressions of opinion, far from making the adjustment of these outstanding obligations easier, will simply
increase the difficulties of obtaining a better understanding and a ratification of the agreement.

In this connection I can not refrain from pointing out in answer to the plea urging the reopening of all debt settlements, that it is not so long since that all of our soundest economists claimed and lightly claimed that the one prerequisite to the restoration of economic prosperity in the world was an early settlement of these debts between governments. The adoption of the Dawes plan, the ratification of the various agreements between governments providing for payment of this vast unfunded obligation, have, in the course of the last few years, contributed mightily to the progress that has been accomplished. Reopening all of the settlements would, in my judgment, be a step backward and not forward and one calculated to produce discord and confusion rather than to contribute to the economic stability and orderly betterment of world prosperity.

In your statement you say that to divorce the financial provisions of the loans from the moral situation in which they were asked for and given is to invent an unreal economic abstraction. By this I take it you mean to indorse the argument advanced by the Columbia faculty that our war advances to our associates were not at the time they were made regarded as business transactions but rather as joint contributions to a common cause. Admitting, of course, that the congressional debates indicate clearly that the Congress was quite willing to loan this money, even on the assumption that there was a considerable element of risk in so far as ultimate recovery was concerned, nevertheless the record indicates beyond dispute that these were loans and not contributions and though not in form in actual effect loans from individual American citizens rather than contributions from the Treasury of the United States. The act providing for these loans authorized the United States Government to sell Liberty bonds to its own people and to invest the proceeds of the sale in the bonds of these foreign governments, the latter bonds to bear the same interest as the Liberty bonds sold and to have the same maturities. What we allowed our associates to do, in effect, was to borrow money in our investment market, but since their credit was not as good as ours, to borrow on the credit of the United States rather than on their own. Looking at the substance rather than the form of the transaction, the situation was no different than if they had actually sold their own bonds in the American market and our Government had indorsed them. Had this course been followed would anyone contend that the sums advanced were intended as contributions to a joint enterprise rather than loans expected to be repaid?

As a corollary to this first proposition it is urged that if these advances were not to be considered contributions as an original measure they ought now to be so considered because our associates were not fighting their own battle alone but ours as well, and that for some months we were unable to put many troops into line. I am not going to attempt a discussion of the military contribution made by the United States to the winning of the war other than to remark that when the crucial period was reached in the spring and summer of 1918 our troops were there. I recognize that there is merit in the contention that the associated governments might well have joined
in pooling their resources in a common cause and that even now an argument can be made in favor of writing off debts incurred after our entry into the war to the extent that they were incurred for contributions to a common cause, but, and this is an all-important reservation, there is merit to such an argument only if the proposed. adjustment is to be a mutual one and is to be applied to all on a strictly equal basis. This factor, however, is one that seems to have been completely overlooked by the faculties of Columbia and Princeton Universities and by other advocates of debt cancellation urging the common cause contribution argument.

Early in the war, in order to minimize the dislocation of exchanges. and for sound economic reasons, the general principle was established that goods and services purchased by one ally in the country of another ally should be financed by the latter. That is to say, that if France purchased supplies and services in England the British Government would furnish the pounds with which to buy them, and vice versa, when Great Britain bought goods and services in France the French Government would undertake to furnish the francs. As to whether in the latter case the francs were furnished on credit or for cash I do not know, but in the former case the pounds were furnished on credit. When we came into the war we readily agreed to apply this sound principle to our transactions with our associates. That is to say, we agreed to furnish them the dollars with which all their purchases in the United States should be consummated, and, what is more, we agreed to lend them those dollars. This was the origin of these debts. But here is the fact that is not mentioned and which you gentlemen have apparently overlooked. We purchased supplies and services from France and the British Empire by hundreds of millions. They had to be paid for in francs and in pounds. We did not get those francs and pounds on credit-we paid cash for them, except possibly in a few comparatively minor instances. In other words, we paid cash for the goods and services necessary to enable us to make our joint contribution to the common cause. Our associates got the goods and services purchased in this country necessary to enable them to make that part of their joint contribution on credit. Here is the fundamental reason which explains why we ended the war with every one owing us and our owing no one. We are now urged to cancel these debts because it is alleged that they were incurred in a common cause, but neither abroad nor in this country has it been suggested that if this is to be done we are to be reimbursed the dollars actually expended by us in France and Great Britain so that the goods and services they sold us might constitute their contribution to the common cause.

In this connection one other fact may well be called to your attention. Among the purposes for which we made dollar advances was that of maintaining the franc and the pound at somewhere near their normal values. In other words, we loaned our associates the dollars with which to purchase bills on London and Paris and so permit them to peg the exchanges. When we were obliged to purchase francs and sterling for our own uses in the Paris and London markets, we did so at the artificial prices maintained by the use of
the very funds we had loaned. I have no desire to emphasize this point. I mention it, together with the situation above described, as factors which had to be considered by those charged with the responsibility of negotiating the settlements on behalf of the American Government, and which, with other important ones, could have been readily ascertained by those undertaking to advise our people, had they availed themselves of the opportunity which would have been gladly afforded them to ascertain all of the facts.

Before leaving the question of the purposes for which the debts were incurred may I remind you that I have already had occasion to point out that the present value of these debt settlements at 5 per cent, a rate less than most of the debtor nations now have to pay for money, is, except in the case of Great Britain, either less than or approximately the same as the amounts borrowed after the armistice. France's after-war indebtedness with interest amounts to $\$ 1,655,000,000$; the Mellon-Berenger settlement has a present value of $\$ 1,680,000,000$. Belgium's post-armistice borrowings with interest were $\$ 258,000,000$, and the present value of the settlement is $\$ 192,000,000$. The post-armistice indebtedness of Italy with interest is $\$ 800,000,000$, and the present value of its debt settlement is $\$ 426,000,000$. The principal of Serbia's post-armistice indebtedness aggregates $\$ 16,175,000$, and the present value of its debt settlement is $\$ 15,919,000$. The loans to Finland, Estonia, Latvia, Lithuania, Poland, Czechoslovakia, Hungary, Austria, and Rumania were all made after the armistice.

The Columbia professors criticized capacity to pay as a formula difficult, if not impossible, of just application, a criticism I understand you indorse. But no other formula is suggested. It is obvious that in the settlement of these huge debts, the burden of which must be borne either by foreign taxpayers or by our own, it was essential that the negotiations must be based on some guiding principle if justice was to be done between all parties; that is to say, not only as between creditor and debtor, but as between debtors. Frankly, I know of no fairer formula than that of capacity to pay generously applied. To ask a debtor nation to pay substantially less than it is able to without undue burden on its people is to do an injustice to our own taxpayers; while to ask a foreign debtor to pay more than its capacity, is to be guilty of an act of injustice such as I can assure you can not be charged against us. Apparently you would have all debtors treated on an equality. Does this mean that the Italian settlement should be raised to a point where it will correspond to the British, which, of course, would impose a burden impossible of performance by Italy, or do you propose that the British be reduced to 50 per cent and the Italian raised to 50 per cent, which would make an easy settlement for Great Britain and a still impossible settlement for Italy? Or do you propose that the British settlement shall be brought down to the Italian 26 per cent, thus imposing no real burden on England at all?

You say that "We do not desire to impose tremendous burdens of taxation for the next two generations on friendly countries." Are you quite sure that this is an accurate statement of the facts? In
estimating the debtor's capacity to pay without inflicting such a sacrifice as would cause a lowering of its standard of living, only incidental consideration was given to the reparation payments to be received by the debtor countries from Germany. Now, the fact is that all of our principal debtors [except Great Britain] ${ }^{1}$ are already receiving from Germany more than enough to pay their debts to the United States; and France and Italy, with the exception of this year in the case of the latter, are receiving from the same source more than enough to pay their debts to Great Britain also.
France in the year 1926-27 will receive from Germany approximately $\$ 176,000,000$. Under the agreements with Great Britain and with the United States, France will pay $\$ 30,000,000$ to us and some $\$ 71,000,000$ to Great Britain, leaving to France a balance of $\$ 75,000,-$ 000. In 1927-28 that balance will grow to $\$ 108,000,000$. In $1928-29$, in spite of the fact that the payment to Great Britain rises to $\$ 85$,000,000 , the balance available to France will amount that year to $\$ 186,000,000$; and in 1930, after meeting her obligations to the United States and to Great Britain, there will be a balance from reparation payments of $\$ 237,000,000$. Italy is paying us this year $\$ 5,000,000$ and to Great Britain $\$ 19,000,000$. They will receive from Germany $\$ 22,000,000$, which is just $\$ 2,000,000$ less than is necessary to meet their obligations to Great Britain and the United States. But in 1929 German reparations will have risen to $\$ 45,000,000$, leaving to Italy a balance, after her payments as debtor, of $\$ 21,000,000$. And even in 1936, when her payments to us will amount to $\$ 16,000,000$, and to Great Britain approximately $\$ 20,000,000$, those two amounts will still fall short by $\$ 15,000,000$ of the sums received from Germany.

Belgium this year will receive from Germany $\$ 16,000,000$ more than she will pay to other countries; in 1927-28, $\$ 18,000,000$ more; in 1929-30, $\$ 27,000,000$ more. Yugoslavia will receive this year $\$ 11,-$ 000,000 more than they will have to pay, and next year $\$ 13,000,000$ more. All of the other powers that owe us money will, in the aggregate, receive this year $\$ 3,000,000$ less than they have to pay, but by 1929 will be receiving $\$ 3,000,000$ more than they have to pay.
Finally, we come to Great Britain. Under the agreements Great Britain will receive from France approximately $\$ 71,000,000$ this year; from Italy, approximately $\$ 19,000,000$; from Germany, approximately $\$ 72,000,000$; and will pay us $\$ 160,000,000$. Or, in other words, Great Britain will receive this year from her debtors $\$ 2,000,000$ more than she pays us. Next year Great Britain will receive from France $\$ 69,000 ; 000$; from Italy, $\$ 19,000,000$; from Germany; $\$ 87,000,000$; or a total of $\$ 175,000,000$. Great Britain will pay us $\$ 160,000,000$, leaving a balance of $\$ 15,000,000$. In $1928-29$ Great Britain will receive from France $\$ 85,000,000$; from Italy; $\$ 19,000,000$; from Germany $\$ 127,000,000$; or a total of $\$ 231,000,000$. Great Britain will pay us $\$ 161,000 ; 000$, making a credit balance of $\$ 70,000,000$. It is true that in the past two years Great Britain has received about $\$ 100,000,000$ from Germany, France, and Italy less than she has paid to the United States, but it is equally true that from this year on Great Britain every year will receive from her debtors a substantial

[^28]amount more than she will pay to us, so that her American payments will not constitute a drain upon her own economic resources.
It is true that Great Britain has agreed not to accept more from her debtors than the sums which when added to reparation payments will equal those which she pays the United States. But even taking this into consideration, it is obvious that your statement that the debt agreements which we have made impose a tremendous burden of taxation for the next two generations on friendly countries is not accurate, since the sums paid us will not come from taxation but will be more than met by the payments to be exacted from Germany.

It must also be obvious that if the amounts to be paid by all our debtors are to be reduced and a corresponding reduction is to be made in the amount of reparations to be paid by Germany the net effect of this change will be to transfer the burden of reparation payments from the shoulders of the German taxpayer to those of the American taxpayer.

Finally, the joint faculties of Columbia and Princeton urge the American people to reconsider the debt settlements with allied countries "because of the growing odium with which this country is coming to be regarded by our European associates." I doubt whether European nations dislike us as much as some people tell us they do. But I know this, that if they do, the cancellation of that part of their debts which has not already been canceled will not of itself change their dislike into affection. Neither in international relations any more than in private life is affection a purchasable commodity, while my observation and reading of history lead me to conclude that a nation is hardly likely to deserve and maintain the respect of other nations by sacrificing its own just claims.

No one can insure the future; but given normal conditions, it is believed a true balance has been held between the duty of the debt commission to the American taxpayer and fairness toward those nations to which was extended aid during and after the war. The debts have not been canceled, but excessive demands have not been made. Certainly the debt settlements can not become too heavy a load in the next few years. In the future, with peace and the development of trade internally and externally, it is not too much to expect that this will be equally true of the later years also. The outstanding fact is that these debts have been settled. A fair trial can now be had, not on theory, but in practice, and a reopening of the whole question at the present time would do more to interrupt the steady progress achieved since settlement than might be gained from any ultimate minor adjustments that can be effected.

Very sincerely yours,

A. W. Mellon, Secretary of the Treasury.

Dr. John Grier Hibeen, Presidenit Princeton University, Princeton, New Jersey.

## Exhibit 30

Note from the British Government, dated May 2, 1927, commenting on letter of the Secretary of the Treasury to President Hibben. and reply of the Secretary of State thereto

> British Embassy, Washington, D. C., May 2, 1927.

## Hon. Frank B. Kellogg, <br> Secretary of State of the United States, Washington, D. C.

Sir: The attention of His Majesty's Government has been drawn to the letter on allied war debts addressed to Prof. John Grier Hibben, president of Princeton University, by Mr. Mellon, Secretary of the United States Treasury, which was published on March 17. So far as this letter deals with matters of domestic controversy, His Majesty's Government have of course no desire to offer any comment upon it. But the letter also contains certain specific references to the position of Great Britain; and His Majesty's Government feel bound to point out that on points of cardinal importance these statements do not correspond with the facts as known to His Majesty's Government. His Majesty's Government feel that in justice to themselves and in order that public opinion in both countries should have a fair opportunity of judging the position, it is essential that they should frankly bring such points to the attention of the United States Government.
2. In the first place, Mr. Mellon states that the United Etates " agreed to furnish the Allies dollars with which all their purchases in the United States should be consummated, and what is more, we agreed to lend them these dollars"; but "when the United States purchased supplies and services from France and the British Empire," they "did not get these francs and pounds on credit; they paid cash." The United States " are now urged to cancel these debts because it is alleged that they were incurred in the common cause, but neither abroad nor in the United States has it been suggested that if this is to be done the United States are to be reimbursed the dollars actually expended by us in France and Great Britain."

This statement implies that the United States Government lent the British Government all the dollars required to purchase supplies in America and that, over and above these loans, they paid dollars to Great Britain for the services and supplies they required from the British Empire and that these dollars were retained by His Majesty's Government for their own purposes. Such, of course, is not the case. All the dollar payments made by the United States for their sterling requirements in Great Britain-which though considerable were of course smaller in amount than the war: loans to the United Kingdomwere taken into account in fixing the total amount of the war loans advanced to Great Britain and were applied directly to the purchase of supplies in America or to the repayment of debt. The arrangements made are clearly and concisely stated in an article published in "Foreign Affairs" (April, 1925) by Mr. Rathbone, who was during the war Assistant Secretary of the United States Treasury.

## Mr. Rathbone's explanation was as follows:

For its own war purposes in Great Britain, France, and Italy, the United States did not borrow pounds or francs or lire. Our Treasury was obliged to procure these currencies for the use of our Army abroad. We bought pounds, francs, and lire from the Governments of Great Britain, France, and Italy, and made payment therefor in dollars here. The dollars thus obtained by Great Britain, France, and Italy were applied by them toward the cost of their war purchases here, and thus the amount of the dollar loans required by these countries from our Treasury was diminished in a corresponding sum.

It will be seen that the United States,Government did not lend the whole of the money required for British purchases in America; but that the dollars received from the United States Treasury in payment of sterling provided by Great Britain were used to cover a corresponding part of Great Britain's dollar requirements, and only the net dollar requirements were covered by loans from the United States Govermiment.

This arrangement was obviously equitable and satisfactory to both parties, and was in fact originally suggested by the United States Government in a letter dated the 3rd of December, 1917, from Mr. Leffingwell, then Assistant Secretary of the United States Treasury, to the British Treasury representative in Washington, which includes the following paragraph:

I assume that your Government will use the dollar fund thus received for meeting its dollar requirements for purchases here and would therefore reduce correspondingly its requests for dollar advances from the United States Treasury.

The dollar payments to Great Britain were thus regularly applied to reduce the dollar advances to Great Britain, so long as the latter continued. When they ceased in 1919, the dollar payments by the United States Government were utilized to reduce the debt incurred by Great Britain. The statement made in Mr. Mellon's letter on this point appears to His Majesty's Government to be likely to give a very erroneous impression of the facts.
3. His Majesty's Government now pass to Mr. Mellon's contention that the payments made to the United States Government in respect of the British war debt impose no burden on the British taxpayer.
Mr. Mellon states that "all our principal debtors are already receiving from Germany more than enough to pay their debts to the United States." So far as Great Britain is concerned this statement is incorrect. The receipts of Great Britain during the financial year 1926-27 from Germany on account of reparations represent approximately one-quarter of the payments made by His Majesty's Government to the United States Government, and their prospective reparation receipts during the present financial year 1927-28 (assuming that they are transferred in full) will fall substantially below one-half of the payments due to be made to the United States. Even if the receipts from Germany on account of army costs (which represent a partial reimbursement of the expenditure incurred by His Majesty's Government on the maintenance of their forces) and on account of the Belgian war debt (which represents a payment on behalf of Belgium) are included, the total receipts of Great Britain from Germany in either of these years will not exceed onehalf of her payments to the United States. There can be no dispute as to the facts; the figures are published by the agent general for
reparation payments and are fully available to the United States Treasury.
4. When he comes later to deal with the position of Great Britain, Mr. Mellon does not in fact compare. British receipts from Germany alone with British payments to the United States Government; he compares the total receipts of Great Britain from reparations and interallied debts, together with the payments due by her to the United States Government. He gives figures purporting to show that Great Britain will receive $\$ 2,000,000$ ( $£ 412,000$ ) more this year than she pays to the United States; $\$ 15,000,000$ ( $£ 3,090,000$ ) more next year and $\$ 70,000,000$ ( $£ 14,403,000$ ) more in 1928-29. While he admits that "in the past two years Great Britain has received about 100 million dollars ( $£ 20,576,000$ ) from Germany, France, and Italy less than she has paid to the United States," he adds that "it is equally true that, from this year on, Great Britain will, every year, receive from her debtors a substantial amount more than she will pay to us, so that her American payments will not constitute a drain upon her own economic resources."
5. This statement is also inaccurate both as regards the past and as regards the future.

From the 1st of April, 1919, to the 31st of December, 1926, Great Britain has paid the sum of $\$ 8281 / 2$ millions or $£ 1701 / 2$ million in respect of the debt to the United States Government, whereas the sums received by Great Britain on account of reparation, Belgian war debt, and allied war debts up to the same date amount to $£ 41$ millions ( $\$ 200$ millions) leaving a deficit of $£ 1291 / 2$ millions ( $\$ 6281 / 2$ millions).

There seems no special reason to select the past two years only, as is done in Mr. Mellon's letter, but the position as regards this period is that during the first two years of the operation of the Dawes plan (1924-25 and 1925-26) the receipts of this country from reparation (including Belgian war debt) and allied war debts together fell short of British payments to the United States Government by approximately $£ 50,000,000(\$ 243,000,000)$.
6. As regards the financial year 1926-27, the share of the United Kingdom in the third Dawes plan annuity in respect of reparation and Belgian war debt amounts to $£ 12$ millions and the receipts from interallied war debts to $£ 81 / 2$ millions, or a total of $£ 201 / 2$ millions, as against the payment due to the United States Government of $£ 33$ millions. During the following year (1927-28) the share of the United Kingdom in the fourth Dawes annuity in respect of the Belgian war debt and reparation should amount to $£ 141 / 4$ millions and the receipts from interallied war debts to $£ 101 / 2$ millions, or a total of $£ 243 / 4$ millions, as against the payment of $£ 33$ millions to the United States. The share of the United Kingdom in the fifth and subsequent Dawes annuities (i. e., after the 1st of September, 1928) for Belgian war debt and reparation should amount to $£ 22$, ,400,000 , and this, together with the payments from interallied war debts (assuming the French war debt agreement to have been ratified and neglecting past deficits in British receipts as compared with payments) would be sufficient to cover the current payments due to the United States Government. Whether the payments from the Dawes annuities included in the above calculations will, in fact.
be received depends, of course, upon whether it is found possible to transfer the full amounts provided for by the Dawes plan.
7. But even-if the full Dawes payments continue to be received for 60 years from now onward, the present value of the receipts of Great Britain from reparation and allied war debts together would be less than that of the payments she is obligated to make to the United States Government on account of the British war debt, assuming interest at 5 per cent to be added to payments and receipts in the past, and future payments and receipts to be discounted at the same rate.
8. It is quite true that His Majesty's Government have frequently declared that their policy is to recover such a sum, in respect of their war loans to the Allies as, with the reparation receipts of Great Britain, will suffice to cover the annual payments which they have to make to the United States, but this situation has not yet been reached, and up to the present the British taxpayer has had to find the greater part of the payments to the United States from his own resources, even after applying all receipts from reparations and interallied debts to this purpose, and using none of these receipts as a set-off against the interest which has to be paid on the loans raised in Great Britain out of which advances were made to the Allies. In no circumstances will Great Britain receive from reparations and interallied war debts, taken together, more than she pays to America. The policy of His Majesty's Government on this subject has been repeatedly declared. It is not their desire to retain for their country anything out of receipts from reparations and interallied war debts. In the event of their receipts from interallied war debts and reparations exceeding the payments made by them to the United States Government, they have undertaken to reduce, proportionately, the payments due to be made to Great Britain in respect of interallied war indebtedness and a provision to this effect appears in the various war-debt funding agreements, which His Majesty's Government have signed.
9. It is not clear on what basis the calculations cited by Mr. Mellon have been made, but it appears probable that error has arisen on the following points:
(a) Receipts from Germany.-The figures mentioned by Mr . Mellon appear to relate to the total receipts of the British Empire from the Dawes annuities. But these include receipts in respect of the costs of occupation as well as in respect of Belgian war debt and reparation. The receipts in respect of costs of occupation represent a partial reimbursement of expenditure incurred by Greatt, Britain; they are thus not available to enable payments to be made: to the United States without imposing a burden on Great Britains and must be left out of account for the purpose of the present calculation. Further, the British Empire reparation receipts have to be: distributed between Great Britain and other parts of the empire; the share of Great Britain having been agreed at 86.85 per cent of: the total. The balance is not received by the British Treasury.
(b) Receipts from France--A more important error is containedi in the figures given by Mr. Mellon of the receipts of Great Britain from France. These appear to include the sums which were due by the Bank of France to the Bank of England in repayment of an.
advance made during the war. This loan was a private transaction and is not an intergovernmental debt. The payments are made to the Bank of England and not one penny thereof accrues to the British Treasury or the British Government. They are thus entirely irrelevant to the question of the extent to which the British taxpayer can meet payments to the United States Government out of receipts from reparation and allied war debts.
It should be added that while the British taxpayer receives nothing from this commercial debt of the Bank of France he has to meet very large market debts incurred by the British Treasury in the United States before the United States Government entered the war. Since April 1, 1919, the British taxpayer has paid $\$ 680$ millions or $£ 140$ millions, on this head, over and above the payments made to the United States Government.

1. 10. These facts and figures appear to His Majesty's Government sufficiently to controvert the statement put forward by Mr. Melion that the payments made to the United States Government in respect of the British war debt will not constitute a drain on British economic resources. But much more might be said. It must be remembered that, in addition to paying their own debts to the United States, the British people are sustaining the full charge for the advances made by His Majesty's Government to the allied governments to enable them to finance the purchase of necessary commodities during the war not only in Great Britain but also in neutral countries. The capital sums lent for this purpose amounted to a net total of about $£ 1,350$ millions ( $\$ 6,600$ millions), which, with interest accrued during the war period, amounted on July 1, 1919, to over £1,450 millions ( $\$ 7,000$ millions), or nearly double the debt which His Majesty's Government had themselves contracted at that date with the United States Government.
This amount was borrowed by the British Government from its own nationals, and in respect of this debt the British taxpayer has had to pay interest at over 5 per cent each year since, making a total. annual payment of $£ 721 / 2$ millions which will continue until the debt is paid off by further and additional contributions from British taxpayers. No relief from this burden can be looked for from receipts from reparation and allied war debts, for in no case will these receipts amount to a greater total than that of British debt payments to the United States Government.
1. Whereas the United States Government is receiving from Germany a share of the Dawes annuities estimated to cover its reparation claims in full, and at the same time obtain from Great Britain repayment, with interest at 3 per cent, of the full amount of war loans it advanced to Great Britain, Great Britain will retain for herself nothing of any payments she receives in respect either of reparations or of interallied war debts, but will apply all her receipts toward part payment of her liabilities to the United States. Any balance that remains she will pay out of her own resources, and in any case she will have to support the entire burden of her war losses and of the war loans she herself made to her Allies.
2. His Majesty's Government have set out these considerations in no contentious or controversial spirit. On the contrary, their desire is to maintain and to promote a friendly understanding between the two great English-speaking nations, on whose cooperation great
issues for the peace and progress of the world depend. They view with great misgiving the divergence of opinion and the estrangement of sentiment which is growing up in regard to these war obligations. It appears to them to be the task of British and of American statesmen to do what can be done to alleviate this difference of view by setting out frankly and fairly the facts of the case and the policy adopted on either side. But the controversy can only be intensified if public opinion in America is guided by statements of facts in regard to their European debtors which to those debtors appear inaccurate and misleading.

It is for this reason that His Majesty's Government regret that there should have been issued, under the authority of the Secretary of the United States Treasury, a series of statements in regard to Great Britain which for the reasons set out above appear to them not to represent accurately or completely the facts. They trust that the United States Government will take steps to remove the unfortunate impression that has been created by the issue of this statement. The position and policy of the British Government in regard to these international payments ${ }^{\circ}$ is well known and the records are easily available; but if at any time further information is desired by the United States Treasury, His Majesty's Government will be happy to furnish it.
I have the honor to be, with the highest consideration, sir, your most obedient, humble servant.
(For the Ambassador.)
(Signed)

H. G. Chilton.

## His Excellency the Right Honorable

Sir Esme Howard, G. C. M. G., K. C. B., C. V. O., Ambassador of Great Britain.
Excellency: I have the honor to acknowledge the receipt of Mr. Chilton's note of May 2, 1927, in which he communicates to the Government of the United States the comments of the British Government on certain statements contained in a letter dated March 15, 1927, from Mr. Mellon, the Secretary of the Treasury of the United States, to Mr. Hibben, the president of Princeton University.
The Government of the United States regards the correspondence between Mr. Mellon and Mr. Hibben as a purely domestic discussion, and does not desire to engage in any formal diplomatic exchanges upon the subject.
Accept, Excellency, the renewed assurances of my highest consideration.

Frani B. Kellogg.

## Ехнibit 31

Statement of Secretary of the Treasury Mellon commenting on the British note to the State Department (press release, May 5, 1927)

The Treasury Department has no desire to enter into a controversy with the British Government on the subject of allied war debts,
but inasmuch as the British Government, in an official note to the American State Department, has seen fit to challenge the facts and figures contained in a letter addressed by the American Secretary of the Treasury to the president of Princeton University, the Treasury deems it its duty to present the facts as it knows them, and to endeavor to explain existing differences.

It should be noted at the outset that the letter of the Secretary of the Treasury to President Hibben was in answer to a statement put out by members of the faculty of Princeton University urging a reconsideration of the debt settlements and was directed specifically to their arguments. It was not intended as a communication, direct or indirect, to the British Government, and that Government was referred to only as an incident to the general thesis therein set forth.

It should be noted in the second place that the figures in the British note are apparently used in a technical accounting sense, so that, for instance, the term "allied war debts" excludes debts for war stocks. Similarly, payments received from Germany are used in the most strictly limited sense, and do not include such items as receipts on account of army of occupation.

While not admitting it, the British Government's note does not deny that the sums specified in my letter were actually paid by the people of France, Germany, and Italy, but says in substance that some of the sums paid accrued to the benefit of the Bank of England, others to the dominions, and apparently from our reading of their figures such items as payment for war stocks are not considered by them as accruing to the benefit of the exchequer on account of war debts. This is the real cause of the apparent disagreement as to facts. There is no basis of comparison when, for instance, payments on account of war debts, as used by the American Treasury, include the payments on account of war stocks sold, but such an item is not included by the British under the head of war-debt payments. Again, there is bound to be disagreement when the American Treasury Department, in discussing payments received from Germany, includes all payments, while the British Government in answer confines itself to payments strictly on account of reparations and Belgian war debt. Under such circumstances there is not a disagreement as to facts; there is simply a failure to join issue.

But even these differences of interpretation are material only in respect of the period prior to September 1, 1928. The British Government admits that, beginning on that date, assuming that the French agreement is ratified, it will receive from its own debtors and from Germany sums "sufficient to cover the current payments due to the United States Government." This, it should be noted, is the principal point made in the letter of the Secretary of the Treasury to President Hibben, and the accuracy of this point is now officially confirmed by the British Government.

The first statement to which the British Government takes exception is one advanced by me in reply to the argument that the loans made by the American Government during the war should be considered as contributions to a common cause, in which I pointed out that there was merit in such contention only if the proposed adjustment was a mutual one and to be applied on a strictly equal basis
between us and our debtor nations. I pointed out that the dollars with which goods and services were purchased in this country were furnished to our associates on credit, whereas the pounds with which we purchased goods and services in Great Britain were paid for in cash. I then went on to say:
In other words, we paid cash for the goods and services necessary to enable us to make our joint contribution to the common cause. Our associates got the goods and services purchased in this country necessary to enable them to make that part of their joint contribution on credit. Here is the fundamental reason which explains why we ended the war with everyone owing us and our owing no one. We are now urged to cancel these debts because it is alleged that they were incurred in a common cause, but neither abroad nor in this country has it been suggested that if this is to be done we are to be reimbursed the dollars actually expended by us in France and Great Britain so that the goods and services they sold us might constitute their contribution to the common cause.

This the British Government does not deny; that we paid cash for goods and services obtained in Great Britain and that for the most part they received goods and services in this country on credit; but they say this is misleading because they used the dollars purchased by us in Great Britain for further purchases in this country: The point seems to me immaterial. The dollars they received from the American Government increased their available cash resources, while the promissory notes we received did not increase our available cash resources.

For the purchases made by Great Britain in the United States dollars were furnished by the American Government by borrowing from its own citizens, the British Government giving its obligations to the American Government for the equivalent. For purchases made by the American Government in Great Britain the United States Government did not borrow pounds from the British Government and give its obligation to the British Government, but borrowed dollars from its own citizens with which to purchase the pounds and actually paid cash to Great Britain. Had the transactions been identical in form the British Government would now hold obligations of the American Government to cover purchases made in Great Britain just as the American Government holds obligations of the British Government for purchases made in America, and obviously cancellation could not be urged on a one-sided basis. The fact that the cash employed in purchasing pounds was borrowed from American citizens and not from the British Government is the distinguishing difference, and any program of cancellation which does not allow for this difference gives the United States no credit on the amount of its war debt for purchases made in Great Britain and other countries.

The British note refers to the statement in my letter to President Hibben that "all our principal debtors are already receiving from Germany more than enough to pay their debts to the United States.: The Princeton and Columbia professors had stated that "we do not desire to impose tremendous burdens of taxation for the next two generations on friendly countries." My letter pointed out that in reaching the debt settlements based on the debtors' capacity to pay, only incidental consideration was given to the reparation payments to be received by the debtor countries from Germany. In other
words, I pointed out that we endeavored to make settlements which the debtors could meet from their own resources without too serious a burden on their economic life. We have always claimed and claim now that the debts due us are in no way connected with German reparations. I then went on to point out that it now appears that all of our principal debtors are already receiving from Germany more than enough to pay their debts to the United States. There was no intention to include Great Britain in the statement that enough was received from Germany alone. The British situation I covered separately later. That sentence as originally drafted contained the words "except Great Britain," but these words in the final copy were inadvertently omitted. The error was an obvious one and was corrected by the text immediately following. It is not believed that any injustice to Great Britain has resulted or that the British Government could have been misled in view of the fact that on the page next following Great Britain's position is segregated and treated separately from that of our other debtors, and in the case of Great Britain we enumerated specifically the payments to be received, stating that they will be received not only from Germany but from France and Italy as well. I said:

Finally, we come to Great Britain. Under the agreements Great Britain will receive from France approximately $\$ 71,000,000$ this year; from Italy approximately $\$ 19,000,000$; from Germany approximately $\$ 72,000,000$, and will pay us $\$ 160,000,000$.
In the light of this very clear and definite statement, it is rather surprising that the British Government should lay stress on what the context showed to be a typographical error, immediately corrected, and go to such length to disprove a statement which was already completely covered.

The British Government also questions certain figures given as to payments received by Great Britain from France, Germany, and Italy. These figures were taken from the attached table showing the estimated payments and receipts of Great Britain during a 12 -year period. The figures are inclusive figures and are derived from the best sources a vailable to the Treasury.

I do not understand that the British Government challenges the accuracy of these inclusive figures in so far as they represent amounts paid and to be paid by the peoples of Germany, Italy, and France to Great Britain, but that it contends that all of these sums will not inure to the benefit of the British Treasury and therefore can not be held to relieve the British taxpayer directly, though they unquestionably add materially to British economic resources. Even so, it is not understood why the British Government apparently fails to include in its figures the payments made by the French on the debt incurred in respect of war stocks sold. From our standpoint the amount paid this year by the French Government on account of the $\$ 400,000,000$ of supplies sold the French Government after the war constitutes a payment on account of war debts beneficial to the American Treasury.
In so far as the payments from the Bank of France to the Bank of Eingland were concerned they were included in the figures set out in the table, because in the report presented by M. Clementel, the French Finance Minister, in 1924, known as the "Inventaire de
la Situation Financiere de la France au Debut de la Treizieme Legislature," the statement is made that the Bank of France was simply acting as an intermediary and that the loan was made to the Bank of France for the benefit of the French Government. Moreover, the published report of the Finance Commission of the French Chamber of Deputies indicates that the 1927 budget of the French Government includes an item of $1,200,000,000$ francs to be paid to the Bank of England under the head of reimbursements of foreign commercial debts which the Treasury must meet in 1927. In this connection, carrying as it does the implication that no Government was involved, the statement of the British note"that this loan was a private transaction and is not an intergovernmenal debt" is not strictly accurate. It was in the light of these facts and in the absence of any official statement as to the responsibility of the British Government to the Bank of England that these payments were included in my statement of international payments on account of war debts. If the British Government was obligated to indemnify the Bank of England, the payments would serve to reduce a contingent liability which if not paid by France would become an added burden to the British taxpayer.

But irrespective of the application of the large payments which Great Britain has received and will receive this year from the Governments of Germany, France, and Italy, I desire to point out that the Columbia and Princeton professors had claimed that the payments to this country would impose a tremendous burden of taxation on friendly countries for the next two generations. This is the statement which I challenged. The note of the British Government makes it entirely clear that I was correct in challenging the accuracy of that statement, for whatever differences there may be as to the payments to be received and made by Great Britain in the years 1926 and 1927, the British Government admits that after the 1st of September, 1928, it will receive from its debtors enough to cover current payments due to the United States Government, assuming the agreement with France is ratified.

The two points most stressed by the advocates of debt cancellation are that capacity to pay is not a fair basis of settlement and that the agreements that have been negotiated will impose on those debtors with whom we were associated in the war a heavy burden over a very long period of time. What I desired to emphasize in the letter to President Hibben was that there could be no fairer measuring stick than capacity to pay liberally interpreted, and then to bring out the all-important fact, apparently overlooked, that some of our debtors have already reached the point, and others are about to reach it, where, taking into consideration all payments on account of war debts and war indemnities, our principal debtors are receiving or will receive more than they pay us. In other words, in the near future balances on international payments resulting directly from war debts or Dawes payments will be in favor of our principal debtors. The purpose of the Hibben letter was to make this clear to the American people.

I have in this statement confined myself to answering the criticisms of the Hibben letter contained in the British note. It seems
to me wholly undesirable to enlarge the field of possible differences by commenting on other phases of the British note, and the failure to do so should not be interpreted as an agreement with all of the views therein set forth. It seems to me, however, that the reference to the share of the Dawes annuities to be received by the United States, "estimated to cover its reparation claims in full," is rather unfortunate in view of the very limited claim presented by the United States on account of reparations as contrasted with those presented by our associates in the war. The payments on account of reparations which the British Government is receiving are based in part on claims, such as pensions and separation allowances, of a character not included by the United States in its reparation bill.
I have no desire to comment on the statement of the policy enunciated in the British note to the effect that Great Britain will retain for herself nothing of any payments she receives in respect of either reparations or interallied war debts, but will apply all of her receipts toward payment of her liabilities to the United States. By implication this means that should the United States further reduce British obligations to the United States the British Government would cancel a like amount of obligations due to it from its debtors. It is very obvious that the British Government would neither lose nor gain in such a transaction. The United States Government is, however, in a very different position. The British Government is both creditor and debtor. The United States Government is a creditor only, and every dollar of debt canceled by the United States represents an increase by just that amount of the war burden borne by the American taxpayer.

Receipts and payments of Great Britain during 12-year period, 1924-1936

## PROHIBITION AND CUSTOMS

Exhibit 32
Letter of the Secretary of the Treasury to the President of the Senate
concerning the denaturization of industrial alcohol, January $11_{\text {, }}$
192\%
The President of the Senate:
Sir: In response to Senate Resolution No. 311 of January 4, 1927, I have the honor to forward herewith copies of the laws pertaining to the denaturization of industrial alcohol for the purpose' of rendering it unfit for beverage purposes, copies of all existing regulations issued for the purpose of making these laws effective, and copies of all the formulæ now in effect, which have been issued for the same purpose. These are found in Treasury Department Regulations 61, Appendix to Regulations 61, and attached Treasury Decisions, marked "Exhibit A."

There is also enclosed a copy of the official report made by Doctor Doran, head of the technical division, on this subject, dated September 3, 1926, marked "Exhibit B."

Thorough search of the files and questioning of the entire staff has failed to find the existence of any correspondence on this subject between the department and Wayne B. Wheeler, or any other member of the Anti-Saloon League of America, with the exception of the attached copy of telegram purporting to come from an official of the Anti-Saloon League, marked' "Exhibit C."
On account of the recent publicity regarding deaths accredited to the use of industrial alcohol as a beverage, particularly in New York City, the department has asked for an official report from Commissioner Louis I. Harris, department of health, city of New York. His reply, dated January 6, 1927, was received to-day and is attached and marked "Exhibit D."

On the subject of denatured alcohol, I might set forth the situation as it has been presented to the Treasury. In aid of industry, Congress in 1906 first provided for denatured alcohol rendered unfit for beverage use by a denaturant consisting of "wood alcohol or other suitable ingredient." By section 10 of Title III of the national prohibition act it is required that the denaturing material shall be such "as to render the alcohol or any compound in which it is authorized to be used unfit for use as an intoxicating beverage." Under section 13 of the same title the Commissioner of Internal Revenue in the Treasury is required to issue regulations in respect to nonbeverage alcohol so as to put "industries using such alcohol as a chemical raw material or for other lawful purpose upon the highest possible plane of scientific and commercial efficiency consistent with the interests of the Government, and which shall insure an ample supply of such alcohol and promote its use in scientific research and the development of fuels, dyes, and other lawful products."

It will be seen from these two provisions of the law that the Treasury is charged with the duty of (1) making industrial alcohok unfit for use as an intoxicating beverage and (2) making such alcohol
available to the freest extent to industry. These two duties require a. denaturant having these characteristics: (1) That in its original mixture the denatured alcohol shall be unfit for beverage purposes; (2) that the denaturant shall be such that it can not be easily removed from the mixture and the treated product made fit for beverage purposes; (3) that the denaturant shall not interfere with the use of alcohol for industrial purposes.

The simplest denaturant meeting these requirements is wood alcohol as specified in the original law. The denaturing grade of wood alcohol has a definite and disagreeable taste and odor. It boils at a temperature only slightly lower than that at which ethyl alcohol boils and therefore the denaturant is difficult to remove and the taste and smell continue in the treated product. Wood alcohol is so closely allied chemically with ethyl alcohol that it can be used as a denaturant for alcohol for industrial purposes without interfering with chemical processes. It is for these reasons that wood alcohol continues to be the common denaturant for industrial alcohol not only in the United States but throughout the world and for many years.

Since denatured alcohol for industrial purposes was first authorized by Congress over twenty years ago, the Treasury has been continuously working towards an improvement in denaturing formulae. With the passage of the prohibition act and the possibility of illegal diversion of industrial alcohol into beverage channels, this research work for less dangerous formulae was increased, but the Treasury and scientific research in industry have not yet discovered an effective denaturant less harmful than wood alcohol which both meets the three requirements mentioned and is available for wide industrial use.

Wood alcohol of denaturing grade carries with it its characteristic taste and smell in the original mixture or in the treated product, and therefore serves as notice and a warning that the product is not a beverage. In effect, wood alcohol as a denaturant labels the treated product to anyone attempting to drink it as dangerous, and therefore constitutes the most effective means of accomplishing the requirements of section 10 of Title III of the national prohibition act that the denatured alcohol shall be unfit for use as an intoricating beverage.

The output of industrial alcohol in the United States last year was 105 million gallons. The dye, artificial silk, paint, etc., industries, as evidenced by their communications to the Treasury (copies of which are attached marked "Exhibit E"), feel that to remove wood alcohol as a denaturant in the present state of scientific knowledge would destroy them and would render impossible the duty imposed on the Treasury by section 13 of Title III of the national prohibition act requiring the Commissioner of Internal Revenue to promote such industry.

The Treasury does not wish to use dangerous substances as denaturants, but Congress has imposed upon the Treasury the duty of specifying an effective denaturant readily available to industry. An effective denaturant not harmful if used for beverage purposes has not yet been found, although research is continued. The Treasury
feels, then, that it has not the discretion, under existing law, to abandon an effective denaturant in favor of one not harmful but ineffective.

Very truly yours,

A. W. Mellon, Secretary of the Treasury.

## [Western Union telegram-Treasury Department telegraph office]

Dallas Texas, Jan. 3, 1927.

## A. W. Mellon, Secretary of the Treasury; Washington:

Your order removing poison from denatured alcohol can mean nothing less than to furnish alcohol tax free to bootleggers. It is not the function of the Treasury Department to supply bootleggers with liquors for trampling the Constitution under foot. Those who buy bootleg stuff drink liquor with the brand of treason on its brew. It is not the function of the Treasury to make it safe to heap contempt upon the Constitution.

Atricus Webb,
Superintendent Anti-Saloon League of Texas.

## Department of Health, City of New York, Office of the Commissioner, January 6, 1927.

Dr. J. M. Doran,

> Head Technical Division, Office of the Prohibition Administrator, 1 Park Avenue, New York City:

Dear Doctor Doran: Our figures of the deaths due to alcoholism in the year 1926 are subject to slight revision after a certain number of cases, probably not more than thirteen, have been more completely studied by the medical examiner of this city, who is engaged in making chemical investigations and checking up certain autopsy findings. As the figures stand at the present moment, there were 750 deaths reported to the department of health of the city of New York in the year 1926 as due to alcoholism. The information given in the death certificates is very meagre with respect to certain important points; for example, we do not know how many of these deaths were due to acute alcoholic poisoning and how many were the result of chronic indulgence in alcohol.

On the basis of clinical and official experience, it is my belief that some of these 750 deaths were possibly due to methanol or other substance employed to denature or medicate alcohol. If it were possible to conduct the study, I would be exceedingly anxious to find out the previous history of the 750 who were recorded as dying of alcoholism. I would also like to know the clinical manifestations upon which the diagnosis was based.
I have found that physicians who are not experienced in observing the effects of wood-alcohol poisoning can not readily diagnose the condition and may frequently overlook it entirely; but, frankly,
these are just questions which come to my mind and which I am not prepared to answer in a scientific, dispassionate spirit.

In addition to the 750 deaths reported as due to alcoholism, there were also recorded, during 1926, 7 deaths in which wood alcohol was specifically mentioned as the cause of death.

Two days ago I-made an inquiry of the chief hospitals in the city of New York as to the number of clinical cases of alcoholism which they had under their care in the period from December 24, 1926, to January 4, 1927. I was informed that there were 337 cases of alcoholism under care in these institutions. Only one was definitely attributed to wood-alcohol poisoning.

Aside from the study of mortality returns, which is urgently necessary in this instance, so that the exact measure of the harm which wood alcohol may be doing is scientifically determined, a study of the clinical reports of hospitals and private physicians of cases that do not eventuate in death would also be most desirable.

I have tried to give you as frank and candid a statement of facts as I can. If I can in any way further assist you, do not hesitate to call upon-me.

> Very sincerely yours,

Louss I. Harris, Commissioner.

## Exhibit 33

Organization of the Bureau of Prohibition (T. D. 1, April 1, 1927)
Order of the Secretary of the Treasury prescribing the duties and powers of the Commissioner and other officers and employees of the Bureau of Prohibition, including the field service of the Bureau of Prohibition, providing for the designation of the Acting Commissioner of Prohibition, and transferring certain personnel, records, and 'property of the office of the Commissioner of Internal Revenue to the Bureau of Prohibition

Treasury Department, April 1, $192 \%$.
To Commissioner of Prohibition, Commissioner of Internal Revenue, prohibition officials, and other offcials and employees of the Treasury Department concerned:
The act entitled "An act to create a Bureau of Customs and a Bureau of Prohibition in the Department of the Treasury," approved March 3, 1927 (Pub. No. 751-69th Congress), provides as follows:
[Public-No. 751-69TH Conaress]
[H. R. 10729]
An Act To create a Bureau of Customs and a Bureau of Prohibition in the Department or the Treasury

Be it enacted by the Senate and House of Representatives of the Onited States of America in Congress assembled, That there shall be in the Department of the Treasury a bureau to be known as the Bureau of Customs, a bureau to be known as the Bureau of Prohibition, a Commissioner of Customs, and a Commissioner of Prohibition. The Commissioner of Customs shall be at the head of the Bureau of Customs, and the Commissioner of Prohibition shall be at the head of the Bureau of Prohibition. The Commissioner of Customs and the Com.
missioner of Prohibition shall be appointed by the Secretary of the Treasury, without regard to the civil service laws, and each shall receive a salary at the rate of $\$ 8,000$ per annum.

Sec. 2. (a) The Secretary of the Treasury is authorized to appoint, in each of the bureaus established by section 1, one assistant commissioner, two deputy commissioners, one chief clerk, and such attorneys and other officers and employees as he may deem necessary. One of the deputy commissioners of the Bureau of Customs shall have charge of investigations. Appointments under this subdivision shall be subject to the provisions of the civil service laws, and the salaries shall be fixed in accordance with the classification act of 1923.
(b) The Secretary of the Treasury is authorized to designate an officer of the Bureau of Customs to act as Commissioner of Customs, during the absence or disability of the Commissioner of Customs, or in the event that there is no Commissioner of Customs; and to designate an officer of the Bureau of Prohibition to act as Commissioner of Prohibition during the absence or disability of the Commissioner of Prohibition, or in the event that there is no Commissioner of Prohibition.
(c) The personnel of the Bureau of Prohibition shall perform such duties as the Secretary of the Treasury or the Commissioner of Prohibition may prescribe, and the personnel of the Bureau of Customs shall perform such duties (other than duties in connection with the administration of the national prohibition act, as amended, or any other law relaitng to the enforcement of the eighteenth amendment), as the Secretary of the Treasury or the Commissioner of Customs may prescribe.

Scc. 3. (a) The Secretary of the Treasury, is authorized to confer or impose upon the Commissioner of Customs or any of the officers of the Bureau of Customs any of the rights, privileges, powers, or duties, in respect of the importation or entry of merchandise into or exportation of merchandise from, the United States, vested in or imposed upon the Secretary of the Treasury by the tariff act of 1922 or any other law.
(b) The records, property (including office equipment), and personnel of the Division of Customs are hereby transferred to the Bureau of Customs.
(c) The Division of Customs and the offices of director of customs, assistant directors of customs, and director and assistant directors, Special Agency Service of the Customs, are hereby abolished.

Sec. 4. (a) The rights, privileges, powers, and duties conferred or imposed apon the Commissioner of Internal Revenue and his assistants, agents, and inspectors, by any law in respect of the taxation, importation, exportation, transportation, manufacture, production, compounding, sale, exchange, dispensing, giving away, possession, or use of beverages, intoxicating liquors, or narcotic drugs, or by the national prohibition act, as amended, or any other law relating to the enforcement of the eighteenth amendment, are hereby transferred to, and conferred and imposed upon, the Secretary of the Treasury.
(b) The Secretary of the Treasury is authorized to confer or impose any of such rights, privileges, powers, and duties upon the Commissioner of Prohibition or any of the officers or employees of the Bureau of Prohibition, and to confer or impose upon the Commissioner of Internal Revenue, or any of the officers or employees of the Bureau of Internal Revenue, any of such rights, privileges, powers, and duties which, in the opinion of the Secretary, may be necessary in connection with internal-revenue taxes.

Sec. 5. (a) The Secretary of the Treasury is authorized to transfer to the Bureau of Prohibition such records, property (including office equipment), and personnel of the office of the Commissioner of Internal Revenue as may be necessary for the exercise by the Bureau of Prohibition of the functions vested in it.
(b) The Commissioner of Prohibition, with the approval of the Secretary of the Treasury, is authorized to appoint in the Bureau of Prohibition such employees in the field service as he may deem necessary, but all appointments of such employees shall be made subject to the provisions of the civil service laws, notwithstanding the provisions of section 38 of the nation 1 prohibition act, as amended. The term of office of any person who is transferred, under this section, to the Bhreau of Prohibition, and who was not appointed subject to the provisions of the civil service laws, shall expire upon the expiration of six months from the effective date of this act.

Sec. 6. Any action or decision of the Secretary of the Treasury under the national prohibition act, as amended, or of any officer upon whom the power to take such action or make such decision is conferred, shall be subject to the same review by a court of equity as the action or decision of the Commissioner of Internal Revenue under such act, as amended, prior to the effective date of this act.
Sec. 7. This act shall take effect on April 1, 1927.
Approved, March 3, 1927.
In pursuance of the authority conferred upon the Secretary of the Treasury by the above act, it is hereby ordered as follows:

## I. DESIGNATION OF ACIING OOMMISSIONER OF PROHIBITION

The Assistant Commissioner of the Bureau of Prohibition shall act as the Commissioner of Prohibition during the absence or disability of the Commissioner of Prohibition, or in the event there is no Commissioner of Prohibition. In case of the absence or disability of the assistant commissioner, or in the event there is no assistant commissioner, an officer of the Bureau of Prohibition will be designated by the Secretary at the time to act as Commissioner of Prohibition during the absence or disability of the Commissioner of Prohibition, or in the event that there is no Commissioner of Prohibition.

## II. TRANSFER OF PERSONNEL

There is hereby transferred to the Bureau of Prohibition at their present grades and salaries, and in their present status, the following personnel:

All officers, attorneys, assistants, agents, inspectors, deputy collectors, gaugers, storekeepers, storekeeper-gaugers, auditors, accountants, clerks, chemists, and other employees of the Internal Revenue Service, whether located in the Bureau of Internal Revenue at Washington, D. C., or in the offices of collectors of internal revenue, or elsewhere, now engaged in the performance of functions conferred or imposed by this order upon the officers and employees of the Bureau of Prohibition, including the field service of the Bureau of Prohibition.

## III. TRANSFER OF RECORDS AND PROPERTY

There are hereby transferred from the office of the Commissioner of Internal Revenue to the Bureau of Prohibition all documents, files, forms, blanks, and other records, and all property (including office equipment) and space, necessary for the performance of functions conferred or imposed by this order upon the Commissioner of Prohibition or upon the officers and employees of the Bureau of Prohibition, including the field service of the Bureau of Prohibition, as determined by the Commissioner of Internal Revenue and the Commissioner of Prohibition.

## IV. RIGHTS, PRIVILEGES, POWERS, AND DUTIES CONEERRED OR IMPOSED UPON THE COMMISSIONER OF PROHIBITION RELATING TO PROHIBITION

(1) There are hereby conferred and imposed upon the Commissioner of Prohibition, subject to the general supervision and direction.
of the Secretary of the Treasury, all the rights, privileges, powers, and duties conferred or imposed upon the Commissioner of Internal Revenue (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3, 1927), by the national prohibition act as amended, or by the act entitled "An act supplemental to the national prohibition act," approved November 23, 1921, and the power conferred upon the Commissioner of Internal Revenue to remove distilled spirits from any internal-revenue bonded warehouse to any other such warehouse, for the purpose of concentration, and to prescribe the form and penal sum of bonds covering distilled spirits in any such warehouse and in transit between such warehouses, except that all moneys shall be received and accounted for by the collectors of internal revenue, under the direction of the Commissioner of Internal Revenue;
(2) There are also hereby conferred and imposed upon the Commissioner of Prohibition, subject to the general supervision and direction of the Secretary of the Treasury, all the rights, privileges, powers, and duties conferred or imposed upon the Commissioner of Internal Revenue (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3, 1927) by any law, in so far as such rights, privileges, powers, and duties relate to-
(a). The production, custody, and supervision of distilled spirits, alcohol, wines, fermented liquors, cereal beverages, denatured alcohol, and other such liquors and liquids;
(b) The establishment, construction, operation, custody, and supervision of distilleries, industrial alcohol plants, bonded warehouses, denaturing plants, wineries, bonded wine storerooms, breweries, rectifying houses, dealcoholizing plants, cereal-beverage plants, and other places at which such spirits, liquors, or liquids are produced or stored;
(c) The determination, assertion, and compromise of liability for, and the institution and compromise of suits for the recovery of internal-revenue taxes and penalties, but only in case a violation of law relating to the enforcement of the eighteenth amendment is involved, except that all moneys shall be received and accounted for by the collectors of internal revenue, under the direction of the Commissioner of Internal Revenue;
(d) Inquiries and investigations relating to the filing of returns for occupational and commodity taxes and penalties in respect of intoxicating liquors, cereal beverages, and denatured alcohol;
(e) The seizure, for violation of the internal revenue laws relating to intoxicating liquors, cereal beverages, and denatured alcohol, of property, whether real or personal (except seizure under distraint warrant), and the custody, control, sale, and disposition of property so seized;
( $f$ ) The discharge of liens, under section 902 of the revenue act of 1926.
(3) All regulations shall be prescribed by the Commissioner of Prohibition, with the approval of the Secretary of the Treasury.
V. RIGHTS, PRIVILEGES, POWERS, AN゙D DUTIES CONFERRED AND IMPOSED UPON THE OFFICERS AND EMPLOYEES OF THE BUREAU OF PROHIBITION, including the field service of the buread of prohibition, relatING TO PROHIBITION

There are hereby conferred and imposed upon the officers and employees of the Bureau of Prohibition, including agents, inspectors and other employees in the field service of the Bureau of Prohibition, all the rights, privileges, powers, and duties conferred or imposed upon the assistants, agents, and inspectors of the Commissioner of Internal Revenue (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3,1927 ), (1) by any law in so far as such rights, privileges, powers, and duties relate to any of the matters referred to in paragraph (2) of Section IV of this order, or (2) by any law referred to in paragraph (1) of Section IV of this order.
VI. RIGHTS, PRIVILEGES, POWERS; AND DUTIES CONFERRED AND IMPOSED UPON THE COMMISSIONER OF PROHIBITION RELATING TO NARCOTIC DRUGS
(1) There are hereby conferred and imposed upon the Commissioner of Prohibition, subject to the general supervision and direction of the Secretary of the Treasury, all the rights, privileges, powers, and duties conferred or imposed upon the Commissioner of Internal Revenue (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3,1927 ) by the Harrison Narcotic Act, as amended, or by the act entitled "An act regulating the manufacture of smoking opium within the United States and for other purposes," approved January 17, 1914. in so far as such rights, privileges, powers, and duties relate to-
(a) The investigation and the detection and punishment of violations of either of the above laws, or any regulations issued thereunder;
(3) Exemptions from any of the provisions of the above laws;
(c) The books, records, and returns required to be kept or rendered, under any of the above laws;
(d) The prescribing of forms and order forms under any of the above acts;
(e) The manner in which the record of sales, exchanges, and gifts of tax-exempt preparations and remedies containing narcotic drugs shall be kept;
$(f)$ The manner in which application shall be made for confiscated narcotic drugs;
$(g)$ The appointment of a committee for the certification and disposition of confiscated narcotic drugs;
( $h$ ) The compromise of any civil or criminal case under either of the above laws in accordance with section 3229 of the Revised Statutes, except that all moneys shall be received and accounted for by the collectors of internal revenue, under the direction of the Commissioner of Internal Revenue;
(i) Seizures, for violation of either of the above laws, of property, whether real or personal (except under distraint warrant), and the custody, control, sale, and disposition of property so seized;
(j) The appointment of such officers and employees as may be necessary for the execution of the functions imposed upon the Bureau of Prohibition relating to narcotic drugs.
(2) Power is hereby conferred upon the Commissioner of Prohibition to prescribe such regulations as he may deem necessary for the execution of the functions imposed upon him or upon the officers or employees of the Bureau of Prohibition relating to narcotic drugs, but all regulations and changes in regulations shall be subject to the approval of the Secretary of the Treasury.
vit. rights, privileges, powers, and duties conferred and imposed opon the officers and employees of the bureat of prohibtition, including the field service of the bureau of prohibition, relating to narcotic drugs

There are hereby conferred and imposed upon the officers and employees of the Bureau of Prohibition, including the agents, inspectors, and other employees in the field service of the Bureau of Prohibition, all the rights, privileges, powers, and duties conferred or imposed upon the assistants, agents, and inspectors of the Commissioner of Internal Revenue (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3, 1927) by either of the laws referred to in Section VI of this order, in so far as such rights, privileges, powers, and duties relate to any of the matters referred to in paragraphs ( $a$ ) to ( $j$ ), inclusive, of such section. All such officers and employees of the Bureau of Prohibition, including the agents, inspectors, and other employees in the field service of the Bureau of Prohibition, shall have, in the performance of their functions under the narcotic drug laws, all the rights, privileges, and powers of internal-revenue officers.
viII. RIGHTS, PRIVILEGES, POWERS, AND DUTIES CONFERRED AND IMPOSED UPON THE COMMISSIONER OF internal REVENUE

There are hereby conferred and imposed upon the Commissioner of Internal Revenue all the rights, privileges, powers, and duties conferred or imposed upon such officer (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3, 1927) by any law, except the rights, privileges, powers, and duties conferred or imposed upon any other person by Sections IV, V, VI, or VII of this order, but not excepting rights, privileges, powers, and duties relating to internal-revenue taxes where no violation of a law relating to the enforcement of the eighteenth amendment is involved. All regulations and changes in regulations shall be subject to the approval of the Secretary of the Treasury.

## IX. RIGFTS, PRIVILEGES, POWERS, AND DUTIES CONFERRED AND 1MPOSED UPON THE OFFICERS AND EMPLOYEES OF TFE BUREAU OF INTERNAL REVENUE

There are hereby conferred and imposed upon the assistants, agents, and inspectors of the Commissioner of Internal Revenue all the rights, privileges, powers, and duties conferred or imposed upon. such assistants, agents, and inspectors (and which are transferred to and conferred and imposed upon the Secretary of the Treasury by subdivision (a) of section 4 of the above act of March 3, 1927) by any law, except the rights, privileges, powers, and duties conferred or imposed upon any other person by Sections IV, V, VI, or VII of this order, but not excepting rights, privileges, powers, and duties relating to internal-revenue taxes where no violation of a law relating to the enforcement of the eighteenth amendment is involved.
X. GENERAL PROVISIONS

Any proceeding pending on the effective date of this order may be maintained, prosecuted, or defended by the officer or employee on whom this order confers or imposes the function of maintaining, prosecuting, or defending a similar proceeding begun after the effective date of this order. Nothing in this order shall be construed to affect the validity of any act done, power exercised, or order, decision, or finding made, or to relieve any person from any liability incurred, before the effective date of this order.

Advances to be made by special disbursing agents heretofore authorized by the Commissioner of Internal Revenue, and approved by the Secretary of the Treasury, may be made after the effective date of this order upon such authority, and the Commissioner of Prohibition, with the approval of the Secretary of the Treasury, may, after the effective date of this order, authorize advances to be made by special disbursing agents in accordance with the law.

The order of March 18, 1927 (T. D. 3999), is hereby revoked.

## XI. EFFECTIVE DATE OF ORDER

This order shall take effect 12.01 a. m., April 1, 1927. The right to amend or supplement this order or any provision thereof, from time to time, or to revoke this order or any provision thereof at any time, is hereby reserved.

Ogden L. Mills, Acting Secretary of the Treasury.

(T. D. 2)

Prohibition
Adopting certain regulations, orders, and instructions

> Treasury Department, Office of thia Commissioner of Prohibition, Washington, $D . C$. To officers and employees of the Bureau of Prohibition, including the feld service:
(1) All regulations prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, in force on March 31, 1927 , in so far as such regulations relate to any of the rights, privileges, powers, or duties conferred or imposed upon the Commissioner of Prohibition or the officers or employees of the Bureau of Prohibition, including the officers or employees of the field service of the Bureau of Prohibition by the order of the Secretary of the Treasury (Bur. Pro. T. D. 1), effective April 1, 1927, or to any of the property or records transferred to the Bureau of Prohibition by such order, or to any of the functions of the Bureau of Internal Revenue vested in the Bureau of Prohibition, are hereby adopted, and shall have the same effect hereafter as though prescribed by the Commissioner of Prohibition, with the approval of the Secretary of the Treasury.

## Exhibit 34

Organization of the Bureau of Customs (T.D. 42102, April 12, 1.227)
Order of the Secretary of the Treasury conferring and imposing upon the Commissioner of Customs certain rights, privileges, powers, and duties, providing' for the designation of an Acting Commissioner of Customs, and prescribing the duties of the personnel of the Bureau of Customs

## Treasury Department, April 12, 1927.

To the Commissioner of Customs, customs officials, and other officials and: employees, of the Treasury Department concerned:
The act entitled "An Act to create a Bureau of Customs and a Bureau of Prohibition in the Department of the Treasury," approved March 3, 1927 (Public, No. 751, 69th Cong.), provides as follows:

> [Public-No. 751-69th Congress]
[H. R. 10729].
An Act to create a Bureau of Customs and a Bureau of Probibition in the Department of the Treasury

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be in the Department of the Treasury a bureau to be known as the Bureau of Customs, a bureau to be known as the Bureau of Prohibition, a Commissioner of Customs, and a Commissioner of Prohibition: The Commissioner of Customs shall be at the head of the Bureau of Customs, and the Commissioner of Probibition shall be at
the head of the Bureau of Prohibition. The Commissioner of Customs and theCommissioner of Prohibition shall be appointed by the Secretary of the Treasury, without regard to the civil service laws, and each shall receive a salary at the rate of $\$ 8,000$ per annum.

Sec. 2. (a) The Secretary of the Treasury is authorized to appoint, in each of the bureaus established by section 1, one assistant commissioner, two deputy commissioners, one chief clerk, and such attorneys and other officers and employees as he may deem necessary. One of the deputy commissioners of theBureau of Customs shall have charge of investigations. Appointments under this subdivision shall be subject to the provisions of the civil service laws, and the salaries shall be fixed in accordance with the classification act of 1923.
(b) The Secretary of the Treasury is authorized to designate an ofticer of the Bureau of Customs to act as Commissioner of Customs, during the absence or disability of the Commissioner of Customs, or in the event that there is no Commissioner of Customs; and to designate an officer of the Bureau of Prohibition to act as Commissioner of Prohibition during the absence or disability of the Commissioner of Prohibition, or in the event that there is no Commissioner of Prohibition.
(c) The personnel of the Bureau of Prohibition shall perform such duties as the Secretary of the Treasury or the Commissioner of Prohibition may prescribe, and the personnel of the Bureau of Customs shall perform such duties (other than duties in connection with the administration of the national prohibition act, as amended, or any other law relating to the enforcement of the eighteenth amendment), as the Secretary of the Treasury or the Commissioner of Customs may prescribe.

Sec. 3. (a) The Secretary of the Treasury is authorized to confer or impose upon the commissioner of customs or any of the officers of the Bureau of Customs any of the rights, privileges, powers, or duties, in respect of the importation or entry of merchandise into, or exportation of merchandise from, the United States, vested in or imposed upon the Secretary of the Treasury by the tariff act of 1922 or any other law.
(b) The records, property (including office equipment), and personnel of the Division of Customs are hereby transferred to the Bureau of Customs.
(c) The Division of Customs and the offices of director of customs, assistant directors of customs, and director and assistant directors, Special Agency Service of the Customs, are hereby abolished.

Sec. 4. (a) The rights, privileges, powers, and duties conferred or imposed upon the Commissioner of Internal Revenue and his assistants, agents, and inspectors, by any law in respect of the taxation, importation, exportation, transportation, manufacture, production, compounding, sale, exchange, dispensing, giving away, possession, or use of beverages, intoxicating liquors, or narcotic drugs, by the national prohibition act, as amended, or any other law relating to the enforcement of the eighteenth amendment, are hereby transferred to, and conferred and imposed upon, the Secretary of the Treasury.
(b) The Secretary of the Treasury is authorized to confer or impose any of such rights, privileges, powers, and duties upon the Commissioner of Prohibition, or any of the officers or employees of the Bureau of Prohibition, and to confer or impose upon the Commissioner of Internal Revenue, or any of the officers or employees of the Bureau of Internal Revenue, any of such rights, privileges, powers, and duties which, in the opinion of the Secretary, may be necessary in connection with internal revenue taxes.

Sec. 5. (a) The Secretary of the Treasury is authorized to transfer to the Bureau of Prohibition such records, property (including office equipment), and personnel of the office of the Commissioner of Internal Revenue as may be necessary for the exercise by the Bureau of Prohibition of the functions vested in it.
(b) The Commissioner of Prohibition, with the approval of the Secretary of the Treasury, is authorized to appoint in the Bureau of Prohibition such employees in the field service as he may deem necessary, but all appointments of such employees shall be mirle subject to the provisions of the civil service laws, notwithstanding the provisions of section 38 of the national prohibition act, as amended. The term of office of any person who is transferred, under this section, to the Bureau of Probibition, and who was not appointed subject to the provisions of the civil service laws, shall expire upon the expiration of six months from the effective date of this act.

Sec. 6. Any action or decision of the Secretary of the Treasury under the national prohibition act, as amended, or of any officer upon whom the power to take such action or make such decision is conferred, shall be subject to the same review by a court of equity as the action or decision of the Commissioner of Internal Revenue under such act, as amended, prior to the effective date of this act.

Sec. 7. This act shall take effect on April 1, 1927.
Approved, March 3, 1927.
In pursuance of the authority conferred upon the Secretary of the Treasury by the above act, it is hereby ordered as follows:
I. RIGHTS, PRIVILEGES, POWERS, AND DUTIES CONFERRED OR IMPOSED UPON THE COMMISSIONER OF CUSTOMS

There are hereby conferred and imposed upon the commissioner of customs, subject to the general supervision and direction of the Secretary of the Treasury, all the rights, privileges, powers, and duties, in respect of the importation or entry of merchandise into, or the exportation of merchandise from, the United States, vested in or imposed upon the Secretary of the Treasury by the tariff act of 1922, subject to the following exceptions and conditions:
(1) All regulations shall be prescribed by the commissioner of customs, with the approval of the Secretary of the Treasury;
(2) Regulations may be waived by the commissioner of customs, but only with the approval of the Secretary of the Treasury;
(3) Whenever in the opinion of the commissioner of customs any question pending for decision is of exceptional importance, he shall submit the question to the Secretary of the Treasury, and thedecision thereon shall be made by the Secretary of the Treasury and not by the commissioner of customs;
(4) The ascertainment, determination, and declaration of bounties or grants under section 303 shall be made by the commissioner of customs, with the approval of the Secretary of the Treasury;
(5). Any order under section 510 or 511 prohibiting the importation of merchandise or instructing a collector to withhold delivery of merchandise shall be made by the commissioner of customs, with the approval of the Secretary of the Treasury;
(6) Any decision or instruction under paragraph (1), (2), or (4) of subdivision (a) of section 520 shall be made or given by the commissioner of customs, with the approval of the Secretary of the Treasury;
(7) No claim, fine, or penalty in excess of $\$ 10,000$ shall be compromised, remitted, or mitigated without the approval of the Secretary of the Treasury;
(8) The authority of the Secretary of the Treasury under section 622 , to extend during the continuance of an emergency the time prescribed for the performance of any act, shall be exercised only by the Secretary of the Treasury.
II. DUTIES OF THE COMMISSIONER AND ASSISTANT COMMISSIONER
(1) The commissioner of customs, in addition to the duties imposed upon him under Section I of this order, shall supervise the
personnel of the Bureau of Customs, iucluding the customs field service and the special agency service.
(2) The Assistant Commissioner of Customs shall assist the Commissioner of Customs in supervising the personnel of the Bureau of Customs, including the field services, and shall perform such other duties as the commissioner may prescribe.
(3) The Assistant Commissioner of Customs shall act as the Commissioner of Customs during the absence or disability of the Commissioner of Customs or in the event there is no Commissioner of Customs. In case of the absence or disability of both the assistant commissioner and the commissioner, or in case there is neither an assistant commissioner nor a commissioner, the Deputy Commissioner of Customs in charge of the legal division of the Bureau of Customs shall act as Commissioner of Customs.

## III. DUTIES OF DEPU்TY COMMISSIONERS

(1) One Deputy Commissioner of Customs, under the general supervision and direction of the Commissioner and the Assistant Commissioner of Customs, shall have charge of the legal divisions of the bureau, and shall perform such other duties as the commissioner may prescribe.
(2) The other Deputy Commissioner of Customs, under the general supervision and direction of the commissioner and assistant commissioner, shall have charge of the special agency service and the conduct of investigations by such service and shall perform such other duties as the commissioner may prescribe.

## IV. SPECIAL AGENCY SERVICE

(1) The special agency service is hereby placed in the Bureau of Customs. The records, property (including office equipment), and the personnel of the office of the director of the special agency service are hereby transferred to the Bureau of Customs, and the personnel now assigned to such office from the division of customs and the field service are hereby assigned to the Bureau of Customs.
(2) There is hereby created in the Bureau of Customs the office of assistant deputy commissioner in charge of the special agency service, who shall assist the deputy commissioner in charge of such service, shall perform such duties as such deputy commissioner may prescribe, and shall act as such deputy commissioner during the absence or disability of such deputy commissioner, or in the event there is no such deputy commissioner.

## 『 V. PERSONNEL OF THE BUREAU OF CUSTOMS

The chief clerk, chiefs of divisions, attorneys, and other personnel of the Bureau of Customs shall perform such duties as the Commissioner of Customs may prescribe.

## VI. EFFECTIVE DATE OF ORDER

(1) This order shall take effect April 12, 1927.
(2) The right to amend or supplement this order or any provision thereof, from time to time, or to revoke this order or any provision thereof, at any time, is hereby reserved.
(3) The order of March 18, 1927 (T. D. 42044), is hereby revoked. Ogden L. Mills, Acting Secretary of the Treasury.

Exhitit 35
Organization for preventing the smuggling of liquor and narcotics, May 18, 1927 (press release, May 22, 1927)

The Office of Foreign Control, the Commandant of the Coast Guard, the Commissioner of Customs, the Commissioner of Prohibition:
The department desires to take full advantage of the last two years' experience in stopping the smuggling of liquor, of the increased facilities of the Coast Guard now equipped with suitable ships for their peculiar functions, of the treaties and arrangements made with foreign countries, and of the information and increased ability developed in the personnel of all services out of their experiences-to consolidate all these elements into a plan to stop, once for all, the smuggling of liquor into the United States in commercial quantities. The department is determined to undertake this vigorously, and at the same time to add to the efficiency of its efforts to stop the smuggling of narcotics.

To make this determination effective, a continuing committee is established, to be known as the committee on the smuggling of liquor and narcotics, consisting of the Assistant Secretary of the Treasury supervising Coast Guard, Customs, and Prohibition; the chief, office of foreign control; the chief intelligence officer of the Coast Guard; the Assistant Commissioner of Customs; the Deputy Commissioner of Customs in charge of the special agency service; the Assistant Commissioner of Prohibition; the Deputy Commissioner of Prohibition (narcotics); and the chief prohibition investigator. This committee is charged with devising and operating a detailed plan for such cooperative work on the part of the office of foreign control, the Coast Guard, the Customs, and the Prohibition Services, as will assign to each its definite detailed function and responsibilities, the methods by which information will be collected, interchanged and disseminated for prompt use, the methods by which information and evidence will be used, and any other detailed instructions to the units concerned, all for the purpose of preventing the smuggling of liquor and narcotics into the United States and of apprehending and punishing those parties within our jurisdiction who are engaged in this business.

This general instruction is issued in order that each chief of bureau may understand the part each of the bureaus has to perform in this plan, and at the same time be prepared to give the necessary instructions to his subordinates to carry out their respective parts. The plan
contemplates the elimination of overlapping efforts, the fixing of clearly defined responsibilities and close teamwork in certain phases, a continuous and intimate interchange of information, and in a word, makes of the intelligence and investigating forces of all the services practically one machine for the accomplishment of a common purpose. The preparation of the detailed instructions to put this into effect demands collaboration in their preparation, and a clear understanding, on the part of each element, of the functions of the other elements in order that the machine may operate smoothly. This initial General Instruction, therefore, includes in general terms a description of the function of each of the five units concerned.

Office of foreign control.-This office has been created to take advantage of the opportunities made possible by the treaties and administrative arrangements made with foreign nations, and to take advantage of the splendid cooperation afforded by the State Department in dealing with these nations and our foreign consuls, for the purpose of putting out of business those ships engaged in smuggling, where evidence exists that they are violating existing laws. Its effective work results primarily in preventing the shipments of liquor leaving the foreign ports. A secondary function is to obtain information of value to the Coast Guard in intercepting the shipments before they reach our shores; and in obtaining evidence of law violations for use both in foreign ports and in making domestic conspiracy cases. This office gains information and secures evidence and uses both through diplomatic and other proper channels so that we may more and more embarrass, handicap, and render unprofitable the business of liquor smuggling from abroad. All its effective work is based upon the prompt use of accurate information about the activities of the smugglers. Therefore, every member of all services must appreciate the value of any detailed information regarding the personnel and material engaged in smuggling operations, and thus be interested in forwarding it promptly as directed, whenever and wherever obtained.

It is not advisable to describe just how the office of foreign control works. It is enough to know that it is prepared to use information of illegal practices to prevent the sailing of ships engaged in smuggling and the intercepting of cargoes intended to be smuggled. Like the Coast Guard, its primary function is preventative; yet both services supply vital information and evidence for use by Customs and Prohibition in malking those conspiracy cases against those engaged in the organized smuggling traffic designed to put them out of business and into jail.

Coast Guard.-The Coast Guard is charged with preventing the arrival in port of ships engaged in smuggling liquor or the landing of liquor outside the Customs lines. The control of the Coast Guard personnel and material for this purpose is in the hands of the commandant of the Coast Guard, who disposes of them to best meet the changing conditions as they arise. His present organization is as follows:

The Coast Guard consists of approximately 33 cruisers, 25 destroyers, $33125-\mathrm{ft}$. and $10100-\mathrm{ft}$. off-shore patrol vessels, $20075-\mathrm{ft}$. patrol vessels, 125 picket boats, 34 harbor vessels and miscellaneous craft, and 277 Coast Guard (life-saving) stations with life boats at each. This equipment is manned by approximately 11,000 officers and men.

The force is mobile and can be handled with rapidity through an elaborate communication system, the service having under its control many radio stations and several hundred miles of telephone and telegraph lines along the coast. For purposes of command the entire strength is divided as follows:

The eastern division, from New London, Conn., northward; New York division, from New London, Conn., to Delaware Bay; Norfolk division, from Delaware Bay to Savannah, Ga.; Florida east coast patrol force, from Savannah, Ga., to Key Largo, Fla.; Gulf division, from Key Largo, Fla., to Point Isabel, Tex. On the Pacific front, the southern division, from Cape Blanco, Oreg., southward; the northern division, from Cape Blanco, Oreg., northward, including Alaska. The Lakes division, all of the Great Lakes, excepting Ontario, which is under the New York division. Division commanders and their stations are located at Boston, Mass.; New York, N. Y.; Norfolk, Va.; Fort Lauderdale, Fla.; Mobile, Ala.; San Francisco, Calif.; Seattle, Wash.; and Sault Ste. Marie, Mich.

Divisions include section bases, located as follows:
Base 1. Atlantic City, N. J.
Base 2. Stapleton, Staten Island, N. Y.
Base 3. Nantucket, Mass.
Base 4. New London, Conn.
Base 5. East Boston, Mass.
Base 6. Fort Lauderdale, Fla.
Base 7. Gloucester, Mass.
Base 8. Norfolk, Va.
Base 9. Cape May, N. J.
Base 10. Port Townsend, Wash.
Base 11. San Francisco, Calif.
Base 12. Anacortes, Wash.
Base 13. Port Angeles, Wash.
Base 14. Block Island, R. I.
Base 15. Biloxi, Miss.
Base 16. Rockland, Me.
Base 17. San Pedro, Calif.
Base 18. Woods Hole, Mass.
Base 19. Key West, Fla.
To each division, in accordance with its needs, a force of ships, Boats, officers, and men is assigned, and this force operates from the various bases within the division, and under the direct orders of the division commander.

In addition to the above, the following forces are in being:
The destroyer force, with headquarters on the flagship Argus, now at New London, Conn.; the off-shore patrol force, whose vessels operate on the Atlantic and Gulf coasts; and the Bering Sea patrol force, with flag at Unalaska.

The 277 Coast Guard (life saving) stations are organized in districts with district commanders in charge, and cooperate with but are inedpendent of the forces afloat. The districts are described as follows:

First district includes the coasts of Maine, New Hampshire, and Massachusetts to Plum Island, with headquarters at Portsmouth, N. H.

Second district, the coast of Massachusetts from Plum Island to Woods Hole, with headquarters at Provincetown, Mass.

Third district, the coast of Massachusetts from Woods Hole west, the coast of Rhode Island, Fishers Island, and Nantucket and Marthas Vineyard Island, with headquarters at Wakefield, R. I.

Fourth district, the coast of Long Island, N. Y., with headquarters at Bay Shore, N. Y.

Fifth district, coast of New Jersey, with headquarters at Asbury Park, N. J.

Sixth district. the coast between Delaware and Chesapeake Bays, with headquarters at Lewes, Del.

Seventh district, Chesapeake Bay to Key West, with headquarters at Elizabeth City, N. C.
Eighth district, the coast of the Gulf of Mexico, with headquarters at Galveston, Tex.

Ninth district, the coasts of Lakes Erie, Ontario, and the eastern part of Lake Huron, with headquarters at Buffalo, N. Y.
Tenth district, western part of Lake Huron and the east side of Lake Michigan, with headquarters at Grand Haven, Mich.

Eleventh district, Lake Superior and the west side of Lake Michigan, with headquarters at Green Bay, Wis.

Twelfth district, the coast of California and the southern part of the coast of Oregon, with headquarters at San Francisco, Calif.

Thirteenth district, Alaska, Washington, and the northern part of the coast of Oregon, with headquarters at Portland, Oreg.

The Coast Guard is by law a part of the military forces of the United States, and its organization, administration, and methods of operation are in strict conformity with that status.

The Coast Guard intelligence office is charged with securing and disseminating military information for the Coast Guard, and also with maintaining liaison as regards this intelligence with all other departments of the Government concerned and with the other bureaus and offices of the Treasury Department. It collects, sifts, classifies, files, and keeps ready for immediate use, and uses as directed by the commandant, the latest obtainable intelligence concerning all movements of liquor ships and personnel engaged in smuggling at home and abroad. Many of these duties parallel but do not duplicate those performed by the office of foreign control. Here again detailed information is of great importance, and most important of all is the establishment of such lines of communication as will result in live information reaching its destination in time to be effective.
The Coast Guard reports to Washington by telegraph immediately an important seizure is made and turns each seizure over to the collector of customs, together with all possible evidence which it can develop, and reports thereafter to headquarters all pertinent information it, has obtained in the case.

By interchange of information with other services, the intelligence office will keep in touch with operations on our own coast, keep the Coast Guard informed on pertinent matters, keep the other services informed on captures and other pertinent matters, and be prepared to furnish any available information to other services concerning pertinent matters that may be in its file.

Bureau of Customs.-Every foot of land or water border of the United States belongs to the jurisidiction of some one collector of
customs, whose responsibility it is to prevent smuggling thereat. As regards the illegal entry of liquor and narcotics into the United States, the customs service is charged with the enforcement of the tariff, navigation, and other laws applicable to the situation.
As provided by section 605 of the tariff act of 1922, all vessels, vehicles, merchandise (liquors or narcotics), and baggage seized under the provisions of the customs laws, or laws relating to the navigation, registering, enrolling, licensing, entry or clearance of vessels, unless otherwise provided by law, shall forthwith be delivered to and remain in the custody of the collector for the district in which the seizure was made to await disposition according to law.

Within the Bureau of Customs the special agency service is charged with those particular intelligence and investigating duties in the prevention of smuggling which pertain to the operation of this plan. There are nine of these special agency districts in the United States and one in Canada, in each of which one or more special agents will be designated whose duty it will be to take charge of all important liquor smuggling cases within their district. All customs officers will be instructed to report through the collector to the designated agent in their respective districts all pertinent facts regarding important liquor seizures made by them, and all evidence or information coming into their possession regarding the operation of individuals, vessels, airplanes or vehicles which might be a part of major liquor smuggling operation.

These designated special agents are charged, each in his own district, with the duty of making all liquor-smuggling cases for presentation to the proper United States attorney. Due to the paucity of personnel and of facilities, and because many cases will ramify far into the interior, it will often be advisable that individual cases of liquor smuggling be made by the prohibition investigating service, rather than by the special agents of customs. It is vitally important, therefore, that these two services maintain intimate relations of cooperation and collaboration. In each individual case, however, the sole responsibility for the development and presentation of the par ticular case must rest in the one or the other. Because these custom cases are primarily the responsibility of the special agency service, it is directed that the special agent concerned be charged with the responsibility of determining, in each case, whether he will conduct it himself or turn it over to the prohibition service.

In each case of seizure, the Coast Guard having notified the collector or the special agent concerned with all possible expedition, the special agent will, if possible, secure a representative of the United States attorney and of the prohibition liaison agent to accompany him or to join him at the earliest practicable moment in the reception of the seizure from the Coast Guard, and in making the preliminary investigation and search for all possible evidence. As soon thereafter as circumstances and the developments of the case admit of a determination, the special agent will decide whether he or the liaison agent will conduct the case, and act accordingly. In either event each service will render the other every possible assistance in the prosecution of the case. It may occur that in the later developments of a case assumed by the special agency service, it will have reached
such territorial proportions that greater efficiency will result from turning it over to the prohibition liaison agent. In such cases, report with recommendations will be made to the respective intelligence chiefs in Washington, who will decide how the case will be continued.

All information collected by the designated special agents in the field will be promptly forwarded to the chief of the special agency service in Washington, who will maintain a file of all this information and evidence constantly available to those special agents who may thus obtain additional evidence when making conspiracy cases, and available to the intelligence chiefs of the other services concerned.

In the matter of narcotic smuggling, it is vitally important that all information of any narcotic-smuggling activities, either as to personnel or methods, or practices, be immediately transmitted to the narcotic agent in charge in the district concerned. Each and every customs officer will therefore immediately communicate to the designated special agent of his district any such information which he may obtain. The special agent will immediately communicate this information to the narcotic agent in charge in his district. The narcotic agent will act on this information if it be practicable, and will forward to his chief in Washington such of this information as the chief directs. Where the customs special agency service has a live lead, or information or evidence indicating an attempted smuggling operation, he must immediately notify the narcotic agent in charge so that the narcotic agents may collaborate with customs in making the case. As in liquor cases, so in narcotics, the special agent of customs is charged with the responsibility of making these narcotic smuggling conspiracy cases. In each case the special agent must decide whether he will himself conduct the investigations and make the conspiracy case, or will turn it over to the narcotic agent in charge. One or the other must take the sole responsibility and leadership in making the case, and the special agent of customs makes this decision. Whichever one makes the case, the other service must collaborate, giving every possible assistance, and supplying all possible evidence and information. There is no place for jealousy or rivalry between these two services. It is recognized in the very nature of the case that the narcotic agents are specialists in this difficult work, and have access to all manner of information which is not accessible to the customs special agency forces. It is hoped that they will recognize the vital necessity of whole-hearted collabora-tion-and there will be credit enough for both if they succeed in breaking up the organized smuggling rings.

Prohibition.-The Bureau of Prohibition is charged with the enforcement of both the prohibition and narcotic laws and, for this purpose, is separated into two distinct units. The main objective in the enforcement of the prohibition law is the elimination of the commercialized traffic in intoxicating beverages. As regards the particular subject of liquor smuggling, the Prohibition Unit's function lies behind the customs lines, and will be exercised primarily in obtaining evidence of those phases of smuggling operations concerned with the transportation and distribution of smuggled liquor, and the illegal activities of those engaged in this business. The officers of this service should all be alert to secure information and
evidence of these various activities; to use the information to effect the elimination of the traffic, and to use the evidence to prosecute and punish those conducting it and responsible for it.

Territorial United States is divided into 22 Federal prohibition districts, in each of which an administrator has his headquarters and is held responsible for the enforcement of the law within his district. Many law v:olations, however, are but part of a widely operating organization engaged in the liquor traffic, without regard to district lines. Primarily to handle these interdistrict cases most effectively, there is established a mobile force of investigators under the chief prohibition investgator, whose Washington office is known as the field division of the Bureau of Prohibition. The functions of the field division of the Bureau of Prohibition are to perform those duties of investigation and of compilation of information not specifically assigned to other divisions or sections of the bureau.
As indicated, its functions should broadly be segregated in two classes:
The first is the gathering, classifying, correlating, filing, and dis- $g$ seminating of information not strictly local in character, covering violations of the national prohibition act and the related statutes.

The second is to investigate fully all of those violations of the national prohibition act and related statutes not specifically entrusted to the several administrators and to the customs force, but to be prepared none the less to supplement the forces of the administrators and the Customs Service when called upon through suitable channels so to do.

In order that there may be no overlapping in the exercise of the functions outlined above, it has been deemed proper to establish in each administrative district a representative of the field division (chief investigator's office), to be designated liaison agent, whose duties shall be:
(a) To determine (with the cooperation of the respective administrators) what information developed through local enforcement is suitable and proper for the centralized files of the field division.
(b) To take over from the administrator such investigations as may be prima facie interdistrict violations or leading to interdistrict inquiry.
(c) To take over from the designated special agent of customs the investigation and prosecution of such cases as he may turn over.

Too much stress can not be laid upon the fact that the representatives of the chief investigator's office in the field-i. e., the liaison agents-will function only upon agreement with either the administrators or the properly designated customs officials, it being essential in the interest of both economy (as regards overlapping) and of harmony that a distinct line of demarcation be set up for the guidance of the chief investigator's force.

In order to maintain, at their maximum value, the information files referred to earlier in this statement, information received from the office of foreign control and from the intelligence service of the Coast Guard should be embodied therein to be used wherever pertinent in making cases or in supplying information and evidence to administrators. This gives the central file the maximum value to
both liaison agents and administrators in the field and again illustrates the urgent necessity that all field officers send to their respective headquarters detailed information as to law violators and violations which may later be of great value in making cases.

For the prevention of smuggling on the land borders, additional patrolmen paid from prohibition funds are selected, appointed, and directed in all their work by collectors of customs and are in effect customs employees and subject to their regulations. In addition, the special agency service of customs in special cases may be augmented by the temporary assignment to duty with them of designated members of the field division, Bureau of Prohibition, who, when so functioning, will be under the direction of customs officers who will be fully responsible for their activities while so assigned.

For the enforcement of the narcotic laws the United States is divided into 15 divisions, and the designated narcotic agent in charge directs the work of the field agents in each of these divisions. While their normal work is quite distinct from that of the prohibition enforcement agencies, their activities often bring them accurate information of prohibition law violations and liquor-smuggling activities. These narcotic agents can thus be of tremendous value to our general plan, and the Deputy Commissioner of Prohibition in charge of narcotics will instruct all his men to promptly transmit information or evidence of major violations, through their narcotic agent in charge, to the prohibition liaison agent; and likewise the Commissioner of Prohibition will transmit instructions to all prohibition enforcement officers to transmit, through their liaison agent, to the narcotic agent in charge, any valuable information or evidence bearing on narcotic law violations. Here again two services can be mutually helpful, and it should be the aim of the higher officers of both services to bring about such a spirit of cooperation and good fellowship in a common cause as will result in both services being benefited, each through the assistance of the other.

Summary.-I wish a copy of this general instruction given to each individual member of each organization in order that he may personally understand that the success of our purpose to stop smuggling rests largely in the hands of the individual members of each organiza-tion-thus each man may be led to play his part in the plan intelligently and energetically. The one big thing in which everyone should be keenly interested is getting accurate and detailed information promptly into the hands of those who are to use it, and ultimately into the central office in Washington, where it can be studied, classified, and made available to the agencies charged with making the conspiracy cases or conveying information essential to the operation of the different parts of the plan.

Foreign control will thus be better and better able to supply information and evidence of illegal practices, which will result in putting more and more ships and shipments out of business. The Coast Guard being better advised of the various movements and activities of the smugglers, and being better equipped with suitable ships, will make it more and more difficult for the ships which have cleared the forelgn ports to be able to deliver their cargoes, either in our ports or to coastwise and other similar shipping which may introduce it into our ports.

Customs officers, being better informed as to the personnel engaged in smuggling, as to their methods of procedure and what efforts they are making and where making them, will be better able to intercept these shipments either by water, rail, airplane, or motor trucks; and the special agents of customs receiving the results of all these seizures, and having available more and more detailed evidence of the activities of the smugglers, will be able, more promptly and accurately, to prepare well-made and hole-proof cases against the smugglers for presentation to the courts, resulting in the confiscation of the smugglers' illicitly used property and in the punishment of the persons involved in these conspiracies to violate our laws. Likewise, in the case of the liaison agents in the prohibition administrators' offices, who will undoubtedly handle a great many of these smuggling cases turned over by the special agents of customs, the constantly increasing fund of detailed information and evidence made available through the central office in Washington will more and more enable these cases to be made rapidly and accurately, and more comprehensively in bringing more nearly all of the persons involved into the net of the conspiracy case. Likewise, in narcotic control, with all this cooperative effort and added information, and particularly with the assistance which may thus-well be rendered through the office of foreign control, it should be possible to make very material progress in stopping the smuggling of narcotics, whieh is to-day practically the sole source for the illicit business conducted in narcotics. And with all this added information narcotic agents in charge should find it possible to make many successful conspiracy cases against the organized operators in narcotic smuggling.

With this picture before them, I believe the members of all our organizations will find themselves sufficiently interested to take time to report to their proper chiefs all those detailed facts bearing on smuggling activities which may prove of great value to our work, giving names and descriptions so accurately as to make their reports available for information and for evidence.
It is recognized that the Coast Guard and Customs Serviees have but limited funds for this intelligence work, and it is true that all this work has its direct bearing on the ultimate enforcement of the prohibition and narcotic laws; it is therefore directed that, where necessary, clerical assistance shall be furnished by detail or assignment from the Prohibition Service in order that these headquarters files may be maintained at the maximum of efficiency.

It is not deemed practicable to give detailed instructions for the different services in this general instruction. These detailed instructions, each to his own service, will be prepared in each bureau, but in collaboration with the other bureaus to assure avoiding any overlapping and to assure efficiency and accuracy in the working of the plan. And, in order that the members of each organization may understand not only their own duties but how their duties fit in to the general plan, and what the members of the other organizations are doing, copies of the detailed instructions in each bureau will be furnished to the other bureaus for dissemination throughout their organizations.

L. C. Andrews, Assistant Secretivn.

## MISCELLANEOUS

Exhibit 36

## "Growing Tax Burdens: Federal; State, and local," am address by Undersecretary of the Treasury Mills, August 10, 1927, at the Institute of Public Affairs, University of Virginio

The tax problem in the United States to-day is no longer one of Federal, but rather of State and municipal finance.

Ever since the war the attention of the taxpayers has been fixed on Washington, their insistent demands for relief have been aimed at the Federal Government, and the results have been eminently satisfactory. Expenditures have been reduced to bed rock, and taxes cut to a point where, either from the standpoint of rates or of total volume, they no longer constitute an excessive burden for a Nation as rich as ours.

That this satisfactory condition will in the main continue for the immediate future at least is subject to one important reservation. Federal expenditures will not be held down if the recently instituted practice of giving aid to the States is broadened to cover an everwidening field of activities, a practice which is being strenuously and persistently urged by special groups striving for immediate results by go-getter methods, and which is open to two very serious objections: First, it ${ }^{\circ}$ makes it difficult to measure the true cost of Federal functions; and, secondly, and most important, it undermines the most fundamental and the soundest principle of our whole governmental structure, that of home rule, with all that it spells in the way of responsibility and of local and individual self-reliance. Centralization in the United States is the enemy of good government.

But while our eyes have been turned to Washington and we have been voicing our satisfaction over the accomplishments there, we have failed to note what was happening at home. Gratified with the steady reduction in the cost of the Federal Government we have been neglectful of the fact that the costs of State and local governments were rising so steadily as to offset and wipe out practically all of our gains. Far from being lower, our total taxes were actually higher in 1926 than in any preceding year, except 1920 and 1921, and only $\$ 227,000,000$ lower than the peak year 1920.

While Federal taxes were reduced from $\$ 4,905,000,000$ in 1921 to $\$ 3,417,000,000$ in 1926 , or a reduction of $\$ 1,488,000,000$, State and local increased from $\$ 3,933,000,000$ to $\$ 5,348,000,000$, or an increase of $\$ 1,415,000,000$. One is almost tempted to say "What's the use?" Between 1921 and 1926 State taxes increased 61 per cent and local 30 per cent, while Federal taxes declined 30 per cent.

The difference between the rate of increase of State and local taxes is easily explained by the larger contributions made by the States to functions once almost exclusively financed locally, such as education and the construction and maintenance of highways.

Federal taxes amounted per capita to $\$ 27.17$ in 1926, as compared with $\$ 45.23$ in 1921, and per person gainfully employed to $\$ 76.61$ in 1926 and to $\$ 120.16$ in 1921. State and local taxes were $\$ 36.27$ per capita in 1921 and $\$ 45.66$ in $1926 ; \$ 96.35$ per person gainfully employed in 1921 , and $\$ 119.92$ per person gainfully employed in 1926.

There is one great evil to be noted in connection with the decrease of Federal taxes and the increase of State and local which I might as well mention at this time. If we had our choice as to which group were to be reduced, I would favor State and local.

Generally speaking, Federal taxes are fairly well divided between direct and indirect, and give recognition to the principle of ability to pay. But our State and local tax systems are inequitable, unscientific, and fall to a very large extent on one form of propertyover 80 per cent of the $\$ 4,084,000,000$ of local taxes rest on real property-and disregard to a very great extent the ability of different classes of taxpayers to contribute to the support of government. Thus, in New York City, it has been estimated that anywhere from two to three months' rent isn't rent at all, but taxes, $\mathbb{\$}$ condition which is particularly burdensome where the supply of cheap housing facilities is limited and where a tenement-house problem exists. In the rural districts, taxes constitute one of the principal contributing factors to the high cost of production and the consequent low profits. In New York, property taxes are consuming from 30 to 50 per cent of net income from property in the prosperous agricultural sections of the State. The Congress just at present is very much concerned with agricultural legislation looking to improved methods of marketing and better prices for the farmer. I do not want to minimize what can be accomplished along those lines, but I do want to suggest that the farmer can do something to help himself at once by demanding of his State and local officials economy and reduced taxes.
As a result of economy in Washington, the rates of a fairly well devised and reasonably scientific tax system are coming down; while, on the other hand, those of an unbalanced and unfair State and local system are rising, increasing existing inequalities and injustices.

Considering taxation in relation to national income, which, after all, is one of the most important factors in estimating the weight of the burden, we find that Federal taxes took 3.8 per cent of our total national income in 1926 as compared with 7.7 per cent in the peak year 1920. On the other hand, we find that State and local taxes combined took 6 per cent in 1926 as compared with but 4.4 per cent in 1920.

Turning now to public expenditures, the facts are even more startling. Tax receipts are frequently confused with governmental cost. As a matter of fact, they do not by any means correspond. Year in and year out governments, generally speaking, spend much more than their current revenues, the difference as a rule being made good from the proceeds of borrowing. Total expenditures by Federal, State, and local governments aggregated in $1925 \$ 11,242,000,000$. While there was a decrease of $\$ 350,000,000$, or 8.4 per cent of the cost, in running the Federal Government in 1926, as compared with 1924, there was an increase of $\$ 509,000,000$ in the disbursements of all State and local governments, making a net increase of $\$ 159,000,000$.
How were these expenditures financed? We find that in 1925, local governments were responsible for 51.9 per cent of total expenditures, but raised only 47.4 per cent of total taxes; State governments were responsible for 14.4 per cent of expenditures, but raised 13.7 per
cent of taxes; the Federal Government was responsible for 33.8 per cent, or slightly more than one-third of all public expenditures, and raised 38.9 per cent of all taxes. While, on the one hand, the Federal Government is paying off its indebtedness, the States and municipalities are not only exhausting their tax revenues, but are resorting to bond issues to finance additional expenditures, apparently neglectful of the fact that in the long run borrowing is the most expensive method of public financing.

From January, 1913, to June, 1927, the net indebtedness of State and local governments increased from $\$ 3,364,000,000$ to $\$ 11,703,000$,000. Meanwhile, the national debt has been diminished from $\$ 25,482,000,000$ on June 30,1919 , to $\$ 18,512,000,000$ on June $30,1927$.

New York State has been one of the worst offenders. For it the combined State and local debt has increased from $\$ 986,120,000$ in 1913 (the amounts in sinking funds being deducted, so as to give a net figure) to $\$ 1,734,193,000$ in 1925 , or from $\$ 103.43$ per capita to $\$ 155.36$ per capita.

We find, then, by studying all of these figures, that the Federal Government has been steadily reducing expenditures, taxes, and the national debt, but that, on the other hand, all that they have succeeded in accomplishing in these three directions has been about wiped out by the upward tendency of expenditures, taxes, and borrowings of State and local governments.

It is only fair to add that part of the reduction in expenditures effected to date has been due to the return to a peace-time basis, and that at the same time Government revenues have been materially increased by the sale of property acquired during the war. But in spite of these facts it remains true, nevertheless, that economies in the main are due to the establishment of the Budget system, the vigorous and intelligent use made of that machinery by Generals Dawes and Lord, and to the unremitting pressure exerted by both Presidents Harding and Coolidge in the interest of efficiency, businesslike methods, and the reduced cost of governmental service.

A contrary course of events in States and municipalities may call for explanation, but does not of necessity merit the criticism and condemnation of local authorities. High taxes and a high cost of government do not of necessity imply uneconomic expenditures by the community as a whole, in spite of the very natural resentment which the individual feels at the increased encroachment by government on his personal resources. Under complex modern conditions, governments must undertake responsibilities which in simpler days could in safety be left to private individuals; while, on the other hand, it is unquestionably true that the people want and, theoretically, at least, are willing to pay for more and better service from their governments.

As I see it, the problem resolves itself into the questions of what services government under existing conditions can perform better and more economically than private individuals; whether our governments are performing such functions as they have assumed with economy and efficiency; and, finally, whether the cost of these services is being financed in the soundest and most economic way, and so as to distribute the burden fairly.

Generalization is obviously impossible and these questions can only be answered by careful and thorough inquiry in each particular in-
stance. We would all admit that government can care for the insane and mentally deficient in institutions better than if these unfortunates were left to the care of their own families at home, and that it is fairer for the community to assume this burden than to permit it to rest on the shoulders of the individuals affected. But, on the other hand, whether the Government should, as is being urged by some, undertake to operate rapid transit and other railroads, and build and operate our hydroelectric power systems is a very different question, which can be solved only by an impartial and scientific investigation of all the factors involved.

So, in the case of the cost of functions already assumed by the Government, the mere fact that we are expending a greater amount of money for a particular service does not necessarily mean that there is waste or extravagance. Whether these exist can again only be ascertained by businesslike investigation.

This is likewise true of the problem of financing. Whether an improvement should be paid for from current revenue will depend upon the character of the improvement, the length of its life, whether the capital expenditure is a recurring one or not, the state of the public finances and credit, whether the people are overburdened with taxes, and whether existing tax rates bring in more revenue than is needed for current purposes. But, generally speaking, it is infinitely better to finance a nonproductive investment from current revenue rather than to mortgage the future.
If we study the gross expenditures of State and local governments, we find that in 1925, out of a total of $\$ 7,343,000,000,29$ per cent was spent for education, 20 per cent for highways, 12.5 per cent for social welfare, 11.6 per cent to debt service, 9.7 per cent to defray the cost of protection of persons and property, 6.8 per cent for public service enterprises, and 6.5 per cent for overhead.

While I have said that the mere size of these expenditures does not of itself constitute a reason for criticism, on the other hand, when there is reason to believe that extravagance and waste exist, to plead the worthiness of the objects, as is so frequently done, is utterly beside the point. No one will deny that we must have highways and an adequate educational system, but whether in both of these fields we are getting a full return on the money spent, is the question which remains unanswered to-day. The real problem, as I see it, is not so much whether we should decrease or increase our governmental activities, but whether we could not get what we are getting to-day from government for a good deal less than we are paying, and from my-to be sure, very limited-experience, that is a very live and real question. In any event, this is the first question which I want to raise.

In the second place, I want to call attention to the fact that debt service constitutes a considerable item in the total amount of State and local expenditures, and that the sum expended for interest and debt retirement in 1925 was about two-thirds the valne of the total bonds issued that year. In other words, States and localities have made such free use of the borrowing power that the billion and a third of bonds which they sold in 1925 left them no very great margin over the amount they were obliged to pay for debts already incurred.

When this point has been reached, it is obvious that no real benefit is being derived from the borrowing method, even in the way of re-
lief from present tax burdens, and that in the immediate future, if bonds continue to be issued at their present rate, this method of public financing, will prove infinitely more expensive than had we financed capital expenditures, more particularly those of a recurring kind, from current revenue. The ultimate cost of financing public expenditures by borrowing is one which politicians, generally speaking, refuse to take note of, and the subject is a little too complex for the average man to bother with. It constitutes, nevertheless, an enormously important problem. For purposes of illustration, let us consider the cost of financing $\$ 10,000,000$ of public improvements annually by the issue of 25 -year 4 per cent straight serial bonds. During the first year, $\$ 10,000,000$ will be received from the sale of the bonds. The interest amounts to $\$ 400,000$; the cost of redemption to $\$ 400,000$; or a total debt service of $\$ 800,000$; thus showing an apparent saving on the cash outlay basis of $\$ 9,200,000$ over the cost of financing from current revenues. By the end of the tenth year, the increasing cost of the debt service will have reduced this apparent saving to $\$ 2,720,000$ a year, and at the end of the fourteenth year it will have disappeared entirely. Thus, in the fifteenth year, debt service charges will amount to $\$ 10,320,000$, or $\$ 320,000$ in excess of the amount received from the sale of the bonds. In the twentyfifth year, the debt service will have grown to $\$ 15,200,000$ so that the State will actually be paying out $\$ 5,200,000$ more than the cost of financing from current revenues. At the end of the twenty-fifth year, the State will have received $\$ 250,000,000$; it will have paid out in debt service $\$ 218,400,000$; showing an apparent saving of $\$ 31,600$,000 , which is much more than offset by $\$ 120,000,000$ worth of bonds still outstanding, that will call for an additional expenditure of $\$ 161,600,000$ until finally retired. The total cost will amount to $\$ 380,000,000$, as against $\$ 250,000,000$ by current financing. To be sure, we will have succeeded in shifting a part of the burden to the next generation; but even in so far as this generation is concerned, after the tenth year, the saving becomes negligible, and after the fourteenth year the borrowing method actually will result in higher rather than lower taxes.

Contrast this picture with what has been actually accomplished in Washington by following the opposite policy.
The second point which I want to make, then, is whether our States and localities are not making too free use of their credit, and whether it would not be wiser if more strict regard were had for the pay-as-you-go principle. Let me again emphasize that, according to the figures which I have given, in spite of their huge annual borrowing, the money received by the States and localities from this source, even to-day, is largely absorbed by the cost of the service of the debt which they have already incurred. That fact alone seems to me to be significant enough to serve as a warning that the time has come to examine not only the cost of government but existing methods of financing the cost. In this connection, I suggest a study of the policy adopted by the State of Massachusetts, which in recent years has made a truly remarkable record of sound financing.

The conclusions which I draw from all this are that we are confronted with three very definite questions-first, whether the costs of our State and local governments are excessive, judged from the standpoint of whether we could not get the present service at lower cost;
secondly, whether existing methods of financing these costs are sound economically; and, finally, whether our State and local tax systems are not in need of a thorough overhauling in the interest of a fairer allocation of the burden. There is no one answer to these questions. They must be asked separately in every State, and in practically every community. Moreover, they are recurrent questions that have to be asked and answered every year, and their answer, therefore, presupposes the existence of permanent machinery, existing for that purpose. Under our two-party system, it is the duty of the minority party to propound the question and to compel those in control of the government to give an accurate answer, with proof of its accuracy. Based on six years' experience in. Washington, I should say that, in so far as the Federal Government is concerned, the system functions well. Aided by the methodical and searching inquiries conducted by the Bureau of the Budget, and by the experience acquired by the members who have served for a long time on the appropriations committees, the minority serves as a very effective check on any extravagant tendencies that might develop on the part of those in control.

What the situation is in other States and cities, I do not lnow, but I have a very distinct impression that in New York, with which I am most familiar as it is my home State, the restraining influence of the legislature on the spending proclivities of the executive departments and bureaus is nowhere near as strong as it should be, and, of course, in New York City, where one party is in complete control of every branch of the government, there is no check at all. The trouble in Albany is that the cost ascertaining machinery is inadequate. That can be cured by the establishment of a budget bureau similar to the Federal one, providing there is the same will in Albany to use such an instrumentality to the full for the purposes for which it is intended. If there isn't such a will and purpose, then the mere establishment of the machinery will accomplish nothing. In so far as New York City and other cities similarly situated are concerned, where one party is in complete control of the machinery of government, there is no remedy save in action by outside agencies.

Political parties, particularly when they are in the minority, could, if they had adequate funds, perform a most valuable public service along these lines if they would establish and maintain research bureaus in charge of competent experts, whose duty it would, be to subject government expenditures to constant scrutiny and investigation, and to keep the public informed, thus performing one of the fundamental functions of a minority party. It is amazing what can be accomplished along these lines. Some years ago, a research bureau was established in New York City. The force was so limited that it could only scratch the surface here and there, but wherever it scratched the surface-whether in New York City or in so far as the State government was concerned-I say without qualification that the bureau found waste and extravagance, and if this is true in New York State, it is probably true in other States and cities.

Let me conclude, as I began, the taxation problem in the United States to-day must be solved in our State capitols, city halls, and county seats. There is need of a solution. The cost of government is too high. The solution will be found if the people apply to their
local governments the same insistent pressure that they have applied to their Federal Government since the close of the war period; but pressure alone will not suffice. The pressure must be of a discriminating and intelligent character, and this implies, on the part of the Government, a budget system that will enable the people to get a correct picture of the financial transactions and status of their Government, and, on the part of the people, a willingness to devote to their Government that intelligent consideration and active interest without which, in the long run, no popular government will function adequately, or, for that matter, long endure.

## Exhibit 38

Announcement of reduction in size of the currency (press release, May 26, 1927)
Secretary Mellon to-day announced that he has approved the recommendations submitted to him by Assistant Secretary Dewey for a reduction in the size of paper currency. The present size of the currency is $7_{\frac{7}{16}}$ by $31 / 8$ inches. Assistant Secretary Dewey's recommendation calls for a reduction to $6_{\frac{5}{16}}$ by $2 \frac{11}{16}{ }^{1}$ inches, which is approximately the size of the Philippine currency.

The currency has been issued in its present size since 1861, and the Treasury's decision to reduce the size is, therefore, a very important step.
The Treasury's desire to reduce the size of the currency is the result of an exhaustive study and investigation covering a period of several years. Currency in the reduced size, as proposed, has been used in the Philippine Islands for a number of years; and money handlers, such as bank tellers, paymasters, and others, find that it is more convenient in every respect than the larger size. The size will not be reduced to such an extent, however, as to make obsolete either money-counting machinery or cash registers now in use throughout the country. In their smaller size the notes will generally fit into pocketbooks without being folded, which is not possible with currency in its present size. This frequent folding and creasing eventually breaks the fiber of the paper and hastens its deterioration and retirement from circulation. Furthermore, the protection afforded by the smaller notes against imitation and alteration will, it is believed, be greater than in the case of the present larger design of the currency.

In connection with the change in size it will be necessary to make some changes in the design of the notes. These changes will not, however, be material, the new notes retaining practically all the major characteristics of the present currency. Portraits now appearing on the notes will be reallocated in some instances, in order to avoid repetition, the plan being to restrict the use of a particular portrait to a given denomination of currency, so that the presence of Washington's portrait, for example, will immediately identify the note as being of a given denomination, irrespective of class.

From the standpoint of convenience to the public, the Treasury believes that the change in the size of the currency should be made. From the standpoint of the Government, the change is justified because the proposed reduction in size will create substantial savings in the expense of manufacturing, as well as in the cost of handling the currency.

From the time the paper is delivered by the mill until the notes are paid into circulation, an estimated gross saving amounting to almost 33 per cent will be derived from the change in size. Each note will require one-third less paper and ink, its shipping weight will be reduced by one-third, and 50 per cent more notes will be produced by the same operation. An additional saving, the amount of which can not be definitely estimated, will undoubtedly be accomplished as a result of increased life of the smaller size notes due to the fact, as above stated, that they will be less frequently creased and folded.

[^30]The normal increase in the population and wealth of this country has resulted in a constantly growing demand for currency which has now reached such proport.ons as to make the matter of replacement a very serious problem. The increase in this demand for currency is perhaps best illustrated by the delivery figures of the Bureau of Engraving and Printing. In 1917 the Bureau of Engraving and Printing delivered $128,672,045$, sheets of currency; in $1920,163,860,748$ sheets; in 1923, 171,955;335 sheets; in 1924, 195,931,340 sheets; in 1925, $206,059,563$ sheets; and in $1926,227,566,949$ sheets. The building now occupied by the Bureau of Engraving and Printing was completed in 1914, and at the time of its erection it was contemplated that this building would be adequate to meet the bureau's requirements for an extended period. The factors above mentioned, however, at the present time not only compel the bureau to run at its full capacity during the day but require that certain sections be operated on double shifts. The normal increase in the demand for currency would, within the very near future, force the bureau to obtain additional manufacturing equipment and build a large extension to the present plant.

The introduction of the new size currency will solve the production difficulties of the bureau, for the reason that the size being reduced by about one-third, or in other words, 12 subjects to the plate instead of 8 , each printing operation will produce 50 per cent more notes. For the same reason, storage facilities of the bureau and vault space in the Treasury and Federal reserve banks will then be adequate to accommodate the bureau's output.

For all these reasons the Director of the Bureau of Engraving and Printing has been ordered to proceed with the preliminary arrangements for the production of notes in the reduced size. In considering the program for the introduction of currency in the reduced size it has been decided that the initial production shall be confined to bills of the one-dollar denomination, and to accumulate a sufficient stock of the new bills so that upon some future given date, later to be announced, all of the one-dollar bills of the larger size, then in circulation, can be redeemed upon demand. For this reason the public should understand that no requests for specimens of the new currency can be considered until the smaller one-dollar bills make their initial appearance simultaneously in all parts of the country.

As soon as the work upon the preparation of designs and plates for the manufacture of the one-dollar notes is under way, work will be undertaken to produce the larger denominations in the new size. As the period required to complete the program for the one-dollar currency will require possibly 12 months, no estimate regarding the time required to produce the larger denominations can at the present time be made.

## Exhibit 39

Issue, exchange, and redemption of paper currency and coin (Department Circular No. 55, revised January 26, 1927) ${ }^{1}$

> Treasury Department, Washington, January 26, 1927.

The following regulations govern the issue, exchange, and redemption of the paper currency and the gold, silver, and minor coins of the

[^31]United States, and the redemption of national-bank notes, Federal reserve bank notes, and Federal reserve notes. Under authorization in the act approved May 29, 1920, the Secretary of the Treasury transferred to the Federal reserve banks and branches the duties and functions performed by the former Assistant Treasurers of the United States in connection with the issue, exchange, and redemption or replacement of United 'States paper currency and coin and the receipt for redemption of national-bank notes and Federal reserve bank notes. Except for the duties in this respect to be performed by the Treasurer of the United States as may be indicated from time to time by the Secretary of the Treasury, distribution of available supplies of United States paper currency and coin, exchanges and replacements thereof, and payments on account of redemptions of currency and coin will, so far as practicable, be effected through the Federal reserve banks and branches. Federal reserve banks and branches have been instructed by the Treasury to make an equitable and impartial distribution of available supplies of United States paper currency and coin in all cases, and applications therefor should be made to the Federal reserve bank or branch of such bank located in the same district with the applicant. Distribution of new gold, silver, and minor coins will not be made so long as there are available sufficient stocks of circulated coins in the Federal reserve banks and branches or in the Treasury offices.

## I. ISSUE OF UNitted states paper Currenct

1. All current issues of new United States paper currency are made by the Treasurer of the United States in the form of United States motes, gold certificates, and silver certificates.
2. United States notes are issued in value equal to the unfit motes destroyed in order not to reduce the amount outstanding below the figure fixed by law.
3. Gold certificates are issued against deposits of gold coin with the Treasurer of the United States, deposits of gold bullion or foreign gold coin with the mints and assay offices, or against transfers to trust funds of available gold in the general fund of the Treasury. Gold certificates may be obtained in payment of obligations of the United States payable in gold, in payment of checks issued by the mints and assay offices of the United States for deposits of gold bullion and foreign gold coin, in exchange for other forms of United States paper currency, or in the ordinary course of Government payments when paid out by the Treasurer of the United States or the Federal reserve banks.
4. Silver certificates are issued against deposits of standard silver dollars or against transfers to trust funds of available silver dollars in the general fund of the Treasury, and may be obtained in exchange for other forms of United States paper currency or in the ordinary course of Government payments, when available.

## II. ISSUE OF GOLD GOIN

5. Gold coins are issued for deposits of gold bullion, in redemption of gold certificates, United States notes, or Treasury notes of 1890 , and in payment of other obligations of the United States payable in gold.
III. ISSUE OF STANDARD SILVER DOLLARS, SUBSIDIARY SILVER COIN, AND MINOR COIN
6. Standard silver dollars are issued in redemption of silver certificates or Treasury notes of 1890. Subsidiary silver coins (halves, quarters, and dimes) and minor coins (1-cent bronze and 5-cent nickel) are issued against other forms of payments therefor in equal amounts.

## IV. REDEMPTION OF PAPER CURRENCY

7. United States notes and gold certificates are redeemable in gold coin, Treasury notes of 1890 in gold coin or standard silver dollars, and silver certificates in standard silver dollars.
8. National-bank notes and Federal reserve bank notes are redeemable in lawful money of the United States by the Treasurer of the United States, but payments therefor in lawful money may be effected through the Federal reserve banks and branches. Federal reserve banks and branches will also receive national-bank notes and Federal reserve bank notes unfit for further circulation, and will make payment therefor in other forms of money, or by credit.
9. Federal reserve notes are redeemable in gold by the Treasurer of the United States, and in gold or lawful money at any Federal reserve bank.
10. United States notes, Treasury notes of 1890 , fractional currency notes, gold certificates, silver certificates, national-bank notes, Federal reserve bank notes, and Federal reserve notes, when not so mutilated that'less than three-fifths of the original proportions remain, will be redeemed at their face value. When so mutilated that less than three-fifths, but clearly more than two-fifths of the original proportions remain, they are redeemable only by the Treasurer of the United States, at one-half the face value of the whole note or certificate, but they may be redeemed at face value upon compliance with the provisions of paragraph 11 hereof. Fragments not clearly more than two-fifths are not redeemable, unless accompanied by the evidence required in paragraph 11.
11. Fragments less than three-fifths are redeemable at the face value of the whole note, only by the Treasurer of the United States, when accompanied by satisfactory proof that the missing portions have been totally destroyed. This proof should be in the form of an affidavit from the owner setting forth that he is the owner and the cause and manner of destruction. If, however, the owner can not of his own knowledge state the facts as to destruction, an affidavit or affidavits from any other person or persons having knowledge of the facts will also be required. The affidavits must be subscribed and sworn to before a notary public or other officer authorized by law to administer oaths. Unless authenticated by the official impression seal of the officer, the affidavit should be accompanied by a certificate from the proper official, showing that the officer was in commission on the date of the acknowledgment: The date when the officer's commission expires should appear in any event. Should any affiant sign by marl (X), his signature must be witnessed by two persons besides the acknowledging officer, and the places of residence of the witnesses to the mark must be stated. In addition to the affidavits, there should be furnished a certificate, to be executed, if possible, by an officer of an incorporated bank or trust
company or by a public officer of the United States, setting forth that that officer has read the affidavits and that the affiants are reputable persons in the community and are, in the judgment of the officer, worthy of belief. Blank forms for affidavits or certificates are not furnished. No relief is granted on account of currency totally destroyed. The Treasurer of the United States will exercise such discretion under this regulation as may seem to him needful to protect the United States from fraud. The making or presenting of any false or fraudulent affidavit. to be used in the prosecution of any claim against the Government is a criminal offense under section 35 of the Penal Code of the United States.

## V. REDEMPTION, EXCHANGE, AND PURCHASE OF UNITED STATES COIN

12. Foreign coins.-No foreign coins will be received for redemption or exchange under these regulations, but foreign gold coins will be purchased by the mints and assay offices in quantities of $\$ 100$ and over.
13. Gold coins.-Gold coins of the United States, when not mutilated as hereinafter defined, are full legal tender at face value if not below the standard weight and limit of tolerance provided by law for the single piece. If not mutilated but reduced in weight by natural abrasion not more than one-half of 1 per cent below the standard weight prescribed by law, after a circulation of 20 years, as shown by the date of coinage, and at a ratable proportion for any period less than 20 years, they shall be received at their nominal or face value. Such coins may be exchanged at face value for gold certificates or other forms of money at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When not mutilated but reduced in weight by natural abrasion below the least current weight after 20 years' wear, or ratable proportion thereof (standard weight less the legal limit of abrasion), gold coins shall be a legal tender at valuation in proportion to their actual weight, and will be accepted by the Federal reserve banks and branches and by the Treasurer of the United States at bullion value, the abrasion loss being determined by deduction from the face value of each coin at the rate of 2 cents for each half grain below standard weight. No lightweight gold coin will be returned except upon request by the owner, in which event it will be stamped with the letter " $L$ " or other distinguishing mark. Mutilated gold coins of any denomination will be accepted at any of the mints or assay offices of the United States at bullion value; the value of the fine gold contained will be paid to the depositor at the rate of $\$ 20.67+$ per ounce, fine ( 1.000 ) ; or $\$ 18.60+$ per ounce, standard ( 0.900 ). Mutilated gold coins should be transmitted to the mints or assay offices by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
14. Staridard silver dollars.-Standard silver dollars, when not mutilated as hereinafter defined, are full legal tender. They may be exchanged at face value for other forms of money at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When rejected as mutilated, they will be stamped by the receiving officer with a distinguishing mark before being returned to the owner. Mutilated standard silver dollars will be purchased
at the mints in Philadelphia, San Francisco, and Denver, and the United States assay office in New York City, at the price fixed from time to time by the Director of the Mint, which is approximately the market price of silver bullion on the date purchased, and should be transmitted to the mints, or the assay office at New York, by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
15. Subsidiary silver coins.-Subsidiary silver coins (halves, quarters, and dimes), when not mutilated as hereinafter defined, will upon demand, be redeemed in lawful money or exchanged for other forms of money at face value, at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When rejected as mutilated, such coins will be stamped by the receiving officer with a distinguishing mark before they are returned to the depositor. Mutilated subsidiary silver coins will be purchased at the mints in Philadelphia, San Francisco, and Denver, and the United States assay office in New York City, at the price fixed from time to time by the Director of the Mint, which is approximately the market price of silver bullion on the date purchased, and should be transmitted to the mints, or the assay office at New York, by registered mail or by express (charges prepaid). Payment therefor will be made by checl drawn on the Treasuter of the United States.
16. Minor coinss-Minor coins (one-cent bronze and five-cent nickel), when not mutilated as hereinafter defined, will, upon demand, be redeemed in lawful money or exchanged for other forms of money at face value, at the Federal reserve banks and branches and at the office of the Treasurer of the United States. Mutilated minor coins will be purchased at the mints in Philadelphia, San Francisco, and Denver, in lots of not less than one pound of each kind, at a price (the approximate value as metal) fixed from time to time by the Director of the Mint, and should be transmitted to the mints by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
17. Mutilated coins.-Mutilated coins are not accepted at their face value but at their builion value. Gold coins are mutilated when so punched, clipped, chipped, or otherwise defaced as to result en any loss of metal. Silver coins are mutilated when so punched, clipped, chipped, or otherwise mutilated, as to be appreciably reduced in weight, or when so defaced as to be not readily and clearly identified as to genuiness and denomination. Minor coins are mutilated when so defaced as not to be readily identified, ör when so punched or clipped or otherwise mutilated asite show a material loss of metal. Silver or minor coins that are bent or twisted out of shape, but showing no appreciable or material loss of metal, iespectively, are not regarded as mutilated, and will be received at face value. The froudulent defacement or mutilation of United States coins is a criminal offense under section 165 of the Penal Code of the United States, and a fine of not more than:\$2,000 and imprisonment for not more ithan five years is presiribed, for such an offense. Mutilated coins should not be transmitted to the Federal reserve banks or branches or to the Treasurer of the United States, but should be forwarded to the mints, or as otherwise hereinabove provided, for sale as bullion.
18. Shipments of coins.-Coins forwarded for redemption or exchange or for sale as bullion must be shipped at the expense and risk of the owner. The Treasurer of the United States will not accept shipments of subsidiary silver or minor coins for redemption unless assorted by denomination into packages in sums or multiples of $\$ 20$. Not more than $\$ 1,000$ in any silver coin, $\$ 300$ in five-cent pieces, or $\$ 100$ in cents, should be shipped in one bag or package.

## VI. GENERAL INFORMATION

19. By taking advantage of the facilities provided at the Federal reserve banks and branches for the distribution, replacement, exchange, and redemption of paper currency and coin, applicants are enabled to have such transactions effected within a shorter time and at a lower cost for transportation charges, as a general rule, than would be possible through the Treasurer of the United States at Washington. So far as practicable, therefore, such transactions should be handled through the Federal reserve banks and branches.

The Federal reserve banks and branches are located in Boston, Mass.; New York, N. Y.; Buffalo, N. Y.; Philadelphia, Pa.; Cleveland, Ohio; Cincinnati, Ohio; Pittsburgh, Pa.; Richmond, Va.; Baltimore, M. ; Atlanta, Ga.; New Orleans, La.; Jacksonville, Fla.; Birmingham, Ala.; Nashville, Tenn.; Chicago, Ill.; Detroit, Mich.; St. Louis, Mo.; Louisville, Ky.; Memphis, Tenn.; Little Rock, Ark.; Minneapolis, Minn.; Helena, Mont.; Kansas City, Mo.; Omaha, Nebr.; Denver, Colo.; Oklahoma City, Okla.; Dallas, Tex.; El Paso, Tex.; Houston, Tex.; San Francisco, Calif.; Los Angeles, Calif.; Portland, Oreg.; Salt Lake City, Utah; Seattle, Wash.; and Spokane, Wash.

The coinage mints are located in Philadelphia, Pa.; San Francisco, Calif.; and Denver, Colo. The assay offices are located in New York, N. Y.; New Orleans, La.; Carson City, Nev.; Boise, Idaho; Helena, Mont.; Deadwood, S. Dak.; Seattle, Wash.; and Salt Lake City, Utah.
20. The act of June 30, 1876 (19 Stat. 64), requires that all United States officers charged with the receipt or disbursement of public moneys, and all officers of national banks shall stamp or write in plain letters the word "counterfeit," "alltered," or " worthless " upon all fraudulent notes issued in the form of and intended to circulate as money which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States or of the national banks, they shall, upon presentation, redeem such notes at their face value.
21. All counterfeit notes and coins found in remittances are canceled and delivered to the Secret Service Division of the Treasury Department or to the nearest local office of that division, a receipt for the same being forwarded to the sender. Communications with respect thereto should be addressed to the Chief, Secret Service Division, Treasury Department, Washington, D. C.

Frank White,
Treasurer of the United States.
Robert J. Grant, Director of the Mint.
Approved: A. W. Mellon, Secretary of the Treasury.

## Exhibit 43

Laws and regulations governing the recognition of attorneys and agents before the Treasury Department (Department Circular No. 230, revised ${ }^{1}$ July 1, 1927)

> Treasury Department, Office of the Secretary, Washington, July 1, 1927.

The statutes regulating the recognition of attorneys and agents and their practice before the Treasury Department appear at the end of these regulations.

Pursuant to statutory provisions, the following rules and regulations are prescribed:

[^34]1. Committiee on enrollment and disbarment.-A committee on enrollment and disbarment is hereby created consisting of six members who shall be appointed by the Secretary of the Treasury, of whom two shall be detailed from the office of the Secretary, two from the office of the Commissioner of Internal Revenue, one from the Bureau of Customs, and one from the Bureau of Prohibition. The Secretary of the Treasury shall designate a chairman and vice chairman of the committee. The chairman shall be designated from the members detailed from the Secretary's office. The committee shall make such rules for its own government as it considers advisable. The committee shall meet regularly on Tuesday and Friday of each week if a business day, and shall meet on other days at the call of the chairman. Three members shall constitute a quorum.

The committee shall receive and consider applications to be recognized as attorney, agent, or other representative before the Treasury Department or offices thereof; receive complaints against those enrolled; conduct hearings; make inquiries; perform other duties as prescribed herein, and do all things necessary in the matter of proceedings for enrollment, suspension, or disbarment of such attorneys, agents, or other representatives, pursuant to these regulations; and submit its recommendations thereon to the Secretary of the Treasury for approval.

The Secretary of the Treasury shall appoint a secretary of the committee who shall not be a member thereof. The secretary of the committee shall keep and maintain its records and shall have the custody of all of its papers, records, rolls, etc.

The Secretary of the Treasury shall also appoint an attorney for the committee who shall not be a member of the committee. Such attorney shall be the legal adviser of the committee, present all formal complaints against enrolled attorneys or agents, and represent the Government in all proceedings before the committee.
2. Practice.-(a) No attorney or agent shall be permitted to represent a.client in the matter of a claim, taxes, or permit relative to intoxicating liquors before the Treasury Department unless such attorney or agent is enrolled to represent clients before the Treasury Department in accordance with these and prior regulations. Any individual claimant, taxpayer, or applicant for a permit under the laws relative to intoxicating liquors, or member of a firm, or officer or authorized regular employee of an individual, firm, or corporation, may appear for himself or such individual, firm, or corporation solely upon adequate identification to the officials of the Treasury Department, except that a former employee of the Treasury Department shall not be permitted to appear as an officer or employee of an individual, firm, or corporation in connection with any matter to which he gave personal consideration or as to the facts of which he gained actual personal knowledge while in the service of the Treasury Department.
(b) Preparation and filing of necessary written documents, representing clients at hearings and doing all other things necessary to present properly matters to officials of the Treasury Department when representing clients shall be deemed practice before the Treasury Department.
(c) It shall be the duty of enrolled attorneys to advise clients to comply with the law, and in the event an attorney knows that a
client has not complied with the law or has made errors or omissions in any return or other report required by law to be made by such client, it shall be his duty to advise such client to correct such errors and omissions.
(d) The practice and duty of an enrolled agent before the Treasury Department shall be the same as that of an enrolled attorney, except that an enrolled agent shall not draft or prepare written instruments by which title to real or personal property may be conveyed or transferred for the purpose of affecting Federal taxes, nor shall such enrolled agent advise clients as to the sufficiency of, or legal effect of, any such instrument on the Federal taxes of such taxpayer under the Federal laws.
(e) An agent, who is enrolled to practice before the Bureau of Prohibition only, may do all things proper and necessary to handle the business of his client before the Prohibition Bureau.
( $f$ ) Every affidavit, argument, brief, or statement of facts prepared or filed by an attorney or agent as argument or evidence in the matter of a claim or tax matter pending before the Treasury Department shall have thereon a statement signed by such attorney or agent showing whether or not he prepared such document and whether or not the attorney or agent knows of his own knowledge that the facts contained therein are true.
( $g$ ) No attorney or agent as notary public shall take acknowledgments, administer oaths, certify papers, or perform any official act in connection with matters pending before the Treasury Department in which he is employed as counsel, attorney, or agent, or in which he may be in any way interested. (Act of June 29, 1906, 34 Stat. 622.)
3. Necessary qualifications for enrollment.-Applicants for enrollment must "show that they are of good character and in good repute, possessed of the necessary qualifications to enable them to render * * * claimants valuable service, and otherwise competent to advise and assist such claimants (or taxpayers) in the presentation of their cases." (Act of July 7, 1884, 23 Stat. 258.) In order better to protect the taxpayer's interests and to expedite practice before the Treasury Department, applicants should clearly establish their right to enrollment by showing that they possess (1) a good character and reputation, (2) a sound education, and (3) a familiarity with the laws and regulations covering taxes or other subjects which they will present to the department: Provided, however, That no former employee of the Bureau of Internal Revenue who violated his agreement to stay at least a year in the bureau shall be admitted to practice until after two years from his severance of connection with the bureau. Practice before the Treasury Department is not restricted to duly licensed attorneys at law and certified public accountants, but an agent who is not an attorney or accountant must show satisfactory educational qualifications and evidence of ability to understand tax questions or such other matters as will be presented to the Treasury Department by the applicant. An applicant's character and reputation can only be established by inquiry among those who have had the opportunity of knowing the applicant in the community in which he has lived or where such applicant has practiced his profession.

A bad reputation as to integrity or any previous conduct of the applicant which is unethical as viewed by the standards of the American Bar Association, or conduct which is cause for suspension or disbarment as set forth in paragraph 9 of these regulations, or conduct which would be unfair in commercial transactions, may be regarded as sufficient cause to justify the rejection of the applicant. References as to the applicant's character should be given, and in addition the applicant should furnish the names of those with whom he has come in contact in his business and of whom inquiry may be made. The committee on enrollment and disbarment will endeavor to ascertain all facts deemed necessary by it to pass on any application without expense or undue inconvenience to the applicant, but the committee may require, where it is not satisfied with the information received, that the applicant appear in person before the committee or its duly authorized representative. The committee will hear an applicant on his application at his request. A person who is not qualified to render service to clients generally in matters before the Treasury Department, but who is qualified to render a special service to a client in matters before the Bureau of Prohibition, may, on showing that he possesses such qualifications, be enrolled to practice before the Bureau of Prohibition only.
4. Applications for enrollment.-Applicants for enrollment shall submit to the Secretary of the Treasury an application in duplicate, properly executed on Form 23, forming a part of these regulations. Application in any other form will not be considered, and all statements contained in the application must be verified by the applicant. The applicant must also take the oath of allegiance, and to support the Constitution of the United States as required by section 3478 Revised Statutes. A person who can not take the oath of allegiance, and to support the Constitution of the United States, can not be enrolled. Members of the bar of a court of record will apply for enrollment as attorneys; all other applicants will apply for enrollment as agents. Applicants will be notified of the approval or disapproval of their applications. All applications for enrollment must be individual, and individuals who practice as partners should apply for enrollment as individuals and not in the partnership name. An individual who has been enrolled may, however, represent claimants and others before the Treasury Department in the name of a partnership of which he is a member or with which he is otherwise regularly connected. In case all of the members of a partnership are not enrolled, then the enrolled attorney or agent of any such partnership shall be responsible for the unprofessional conduct of his unenrolled partner or partners, as set forth in paragraph 9 of these regulations. Except as hereinafter provided in paragraph 5, a corporation can not be enrolled, and attorneys or agents will not be permitted to practice before the Treasury Department for account of a corporation which represents claimants and others in the prosecution of business before the Treasury Department. Persons applying for enrollment who propose to act for such a corporation in the prosecution of claims and other business before the Treasury Department will be subject to rejection, and enrolled attorneys or agents who act for a corporation in representing claimants and others in the prosecution of claims and other business before the Treasury Department will be subject to disbarment or suspension from practice.
5. Customhouse brokers.-The act of June 10, 1910 (36 Stat. 464, T. D. 30789), provides in part that persons, copartnerships, associations, joint-stock associations, and corporations may be licensed as customhouse brokers by the collector or chief officer of customs at any port of entry or delivery to transact business as such customhouse broker in the collection district in which such license is issued. Customhouse brokers so licensed require no further enrollment under these regulations for the transaction of business within their respective collection districts, but for the representation of a claimant before the Treasury Department in the city of Washington application for enrollment as attorney or agent must be made in conformity with the requirements of paragraph 4, and otherwise in accordance with these regulations, except that if a customhouse broker so licensed in a collection district is a copartnership, association, jointstock association, or corporation its claims or other business may be prosecuted in its name before the department in the city of Washington by an accredited member or representative, who must, however, be first duly enrolled in accordance herewith.
6. List of attorneys and agents, and enrollment cards.-(a) A list of all attorneys and agents who make application for enrollment or who are enrolled, or whose applications have been rejected, or who have been suspended or disbarred, will be kept in the office of the secretary of the committee, and a copy of such list will be furnished the bureaus, offices, and divisions of the Treasury Department. Information as to whether or not any person is enrolled as an attorney or agent may be had by application to the secretary of the committee. All bureaus, offices, and divisions of the Treasury Department are prohibited from recognizing or dealing with any attorney or agent unless enrolled: Provided, That the committee on enrollment and disbarment may in its discretion grant temporary recognition to an attorney or agent pending action upon his application for enrollment: Andi provided further, That on written or telegraphic request and recommendation of the internal revenue agent in charge the committee may grant permission to an attorney to appear before the internal revenue agent in charge in a particular estate tax case when it appears that the person desiring such recognition is the attorney for the estate as shown by the estate tax return, or as shown by the records of the local probate court. Such permission will not authorize the attorney to appear before the Treasury Department in Washington, D. C., without being regularly enrolled in accordance with these regulations.
(b) An enrollment card shall be issued to every attorney or agent upon his enrollment by the secretary of the committee on enrollment and disbarment, and such card shall be sufficient evidence to any officer of the Treasury Department that such attorney or agent has been enrolled.
7. Knowledge through connection with the Treasury Depart-ment.-(a) No attorney or agent shall be permitted to appear before the Treasury Department in connection with any matter to which such attorney or agent gave personal consideration or as to the facts of which he gained actual personal knowledge while in the service of the Treasury Department, and likewise no such attorney or agent shall aid or assist another in any such matter, and no attorney or
agent shall receive assistance from one formerly in the service of the Treasury Department and having such personal knowledge.
(b) No former officer, clerk, or employee of the Treasury Department shall act as attorney or agent in any matter or controversy pending in such department during his employment therein within two years after he has ceased to be such officer, clerk, or employee without first having obtained the consent thereto of the Secretary of the Treasury or his duly authorized representative; and no enrolled attorney or agent shall, without first having obtained the consent of the Secretary of the Treasury or his duly authorized representative, employ or retain any such former officer, clerk, or employee directly or indirectly in any such matter or controversy within such two-year period. Such consent may only be granted when it appears (1) that such employment is not prohibited by law or the regulations of the Treasury Department; (2) that the applicant was not, during the period of two years immediately preceding the date of application, employed in the particular section (departmental or field) in which was pending the matter or controversy, to handle which such consent is sought; or if the applicant formerly held an administrative position such as head of a unit, division, or section or was employed as a reviewer or conferee or in an advisory capacity, such applicant will be required to file an affidavit to the effect that he has no knowledge of the facts and issues involved which was gained by him while employed in the department. The statements made in said affidavit will be corroborated by an examination of the files and records pertaining to the case. Applications for consent should be directed to the secretary of the committee, stating the former connection of the employee and the matter or controversy in which the applicant desires to appear. The applicant shall thereupon be promptly advised as to his right to appear in the particular matter or controversy, and a copy of such advice shall be filedi in the record of the case.
8. Suspension and disbarment proceedings.-(a) If an officer or employee of the Treasury Department, either in the city of Washington or elsewhere, has reason to believe, or if a complaint is made to him, that an enrolled attorney or agent has violated any provision of the laws and regulations governing practice before the Treasury Department, or otherwise engaged in improper or disreputable practice, he shall promptly make written report thereof through the proper channels to the Committee on Enrollment and Disbarment. And if any other person has information of such violations or such improper or disreputable conduct, he may also make written report thereof to the Committee on Enrollment and Disbarment.
(b) The committee may, on the basis of such complaint, upon its own motion or otherwise upon reasonable cause, institute proceedings for suspension or disbarment against any enrolled attorney or agent. Notice thereof, signed by the Secretary or Undersecretary of the Treasury, shall be sent by mail to such attorney or agent at the address under which he is enrolled or at his last known address, and such notice shall state the charge or charges made and give the place and time within which the respondent shall file in duplicate his verified answer, which time shall not be less than 20 days from the date of mailing the notice: The respondent in his answer shall specifically aver which allegations in the complaint against him are
true and which allegations in such complaint are not true. Such answer shall further aver specifically every defense relied upon by the respondent to answer the charge or charges against him in the complaint. Answer in general denial shall not be sufficient answer to such complaint. The committee may, in its discretion, extend the time for filing such answer. The complainant may, in the discretion of the committee, be furnished with a duplicate copy of such answer. If the respondent fails to file such answer within such time, he shall be declared to be in default, and the charges against him may be deemed to be true without further proof by the complainant. When the answer has been filed, the committee shall pass upon the sufficiency of the same, and in case an issue of fact is raised by said answer then the committee shall set a time and place for the hearing of such case. Notice of the time and place of such hearing, signed by the chairman of the committee, shall be sent by mail to the respondent, which hearing shall not be less than 20 days from the date of mailing such notice. The committee may, in its discretion, postpone the date of hearing, or adjourn any hearing from time to time as may be necessary. An enrolled attorney or agent against whom proceedings for suspension or disbarment have been instituted as herein provided may, pending the conclusion of the proceedings, subject to the approval of the Secretary of the Treasury, be suspended for the time being from practice before the Treasury Department.
(c) The committee shall conduct hearings according to such rules of procedure as it shall determine and may receive evidence in such form as it may deem proper. The respondent may be represented by counsel. The testimony of witnesses may, in the discretion of the committee, be required to be under oath and may be stenographically reported and transcribed. Depositions for use at a hearing may, with the approval of the committee, be taken by either party upon oral or written interrogatories before any officer duly authorized to administer an oath for general purposes or an officer of the Internal Revenue Bureau authorized to administer an oath in internal revenue matters if the complaint is based upon violation of these regulations by the respondent in internal revenue matters upon not less than 10 days' written notice, if the deposition is to be taken within the District of Columbia, and upon not less than 20 days'. written notice if it is to be taken elsewhere. Such notice shall state the names of the witnesses, the officer before whom, and the time when and place where, such depositions are to be taken : Provided, That when depositions are taken as aforesaid, if both parties are present or represented at the time and place specified for the taking of the depositions, either party may, after the examination of the witnesses produced under the order of the committee, be entitled to produce and examine other witnesses; but in such case one day's notice must be given to the adverse party or his counsel there present, unless such notice is waived: And provided further, That the complainant and respondent, or by their attorneys, may agree in writing upon a time when, place at which, and an officer before whom such depositions are to be taken, without formal notice. When a deposition is taken upon written interrogatories, any cross-examination shall be upon written interrogatories. Copies of such written interrogatories shall be served with the notice, and copies of any written cross-interrogatories shall be mailed or
delivered to the opposing party or his counsel at least five days before the time of taking the deposition.
(d) The committee shall, promptly after the conclusion of any hearing, or, if the respondent does not appear in person for the hearing, promptly after the date set therefor, submit to the Secretary of the Treasury a copy of the notice of hearing, the complaint, answer (if any), the record of the hearing (if any), and any written findings of fact by a majority of the committee, together with a recommendation either that the charges be dismissed or that the respondent be reprimanded, suspended for a given period of time, or disbarred. The findings and recommendation shall be signed by all members of the committee agreeing thereto. Members of the committee dissenting therefrom shall submit statements of their reasons therefor. If any members of the committee were not present at the hearing, the fact shall be stated.
(e) Upon the approval of such finding and recommendation by the Secretary of the Treasury and his order of suspension or disbarment of an attorney or agent, notice therèof shall be given by the committee to the heads of all bureaus, offices, and divisions of the Treasury Department and to other branches of the Government. Unless duly reinstated, such person will not thereafter be recognized during the period of suspension or disbarment as an attorney or agent in any claim or other matter before the Treasury Department or any office thereof. Notice of such suspension shall be published in the Internal Revenue Bulletin during the period such attorney or agent is under suspension, and notice of disbarment of any such attorney or agent shall be published in the same publication for a period of one year. Notice of reprimand of any attorney or agent shall not be published, but notice of such reprimand shall be given to all officers and employees of the bureau before which such attorney or agent so reprimanded most frequently appears.
9. Causes for reprimand, suspension, or disbarment.-In general, any conduct which would preclude an applicant from enrollment will be sufficient to justify suspension or disbarment. Specifically, the following conduct, in addition to conduct held to be disreputable by the courts in disbarment proceedings against attorneys, shall be a violation of these regulations and will be considered cause for disbarment or suspension of attorneys or agents:
(a) Violation of the statutes or rules governing practice before the Treasury Department.
(b) Conduct contrary to the canons of ethics as adopted by the American Bar Association.
(c) Making false statements of facts to a claimant or taxpayer or false statements of facts to the officers of the Treasury Department in matters pending before said department in which such attorney or agent represents a claimant or taxpayer.
(d) The publication, in connection with his own Federal tax practice, of a so-called "tax service," containing all or part of the decisions or rules of the Treasury Department, United States Board of Tax Appeals, or the courts on Federal tax matters, and procedure rendered from time to time, with comment or discussion thereon, which tax service is subscribed for by Federal tax practitioners or Federal taxpayers.
(e) Direct or implied solicitation of employment in matters before the Treasury Department by circulars, letters, pamphlets, or interviews, or by an employed solicitor, not warranted by previous business or personal association. The mailing of circulars, letters, pamphlets, or other printed or written matter to a taxpayer who is not the client of such practitioner which contain no direct solicitation of such employment, but which contain a description of the practice, name, and address of such practitioner, is hereby defined as implied solicitation of such employment.
( $f$ ) Advertising in the following manner: (1) Printed matter appearing on letterheads, cards, or other advertising matter indicating previous connection with the Treasury Department. (2) Representation, orally, in printing or writing, of acquaintance with the officials or employees of the Treasury Department. (3) The use of any title or name of the practitioner or practice which might imply connection with the Treasury Department, such as "Federal tax expert," "Federal tax counsellor," "Federal tax counsel,""Federal tax bureau," "United States income tax expert," "United States income tax consultant," or " United States Income Tax Bureau." (4) For an enrolled practitioner who has not been regularly admitted to practice as an attorney by a court of record, or who is not the holder of an unrevoked certificate of certified public accountant issued by a legally constituted board authorized by law to issue such certificates, to hold himself out orally, by card, stationery, or otherwise advertise that he is an attorney at law or a certified public accountant, or by title that implies he is an attorney at law or a certified public accountant. (5) By mailing or delivering bulletins, circulars, or pamphlets containing decisions or rulings of the Treasury Department, United States Board of Tax Appeals, or courts on Federal tax matters, and comment thereon by the practitioner, and which contain an advertisement or card of the practice of such practitioner or the name of such practitioner as a distributor of such bulletins, circulars, pamphlets, or other printed matter to Federal taxpayers who are not the clients of such practitioner. (6) By mailing or delivering to Federal taxpayers who are not clients of such practitioner a circular or pamphlet advertising any business, educational or social institution, or organization, which circular or pamphlet contains a card of advertisement of the Federal tax practice of such practitioner.
(g) Representing or assisting a client in any matter pending before the Treasury Department to which such attorney or agent gave personal consideration, or as to the facts or issues involved in such matter such attorney or agent gained actual personal knowledge while in the service of the Treasury Department.
( $h$ ) (1) Assisting a person who has been employed by a client in a matter pending before the Treasury Department, to which matter such person gave personal consideration or gained actual personal knowledge of the facts or issues involved in such matter while in the service of the Treasury Department, or (2) knowingly being assisted in a matter pending before the Treasury Department by a person who gave personal consideration or gained actual personal knowledge of the facts or issues involved in such matter while in the service of the Treasury Department, or (3) sharing the fees in such matter with such person.
(i) Knowingly accepting employment as correspondent or subagent in any matter pending before the Treasury Department of or from any person who has been denied enrollment because of unprofessional or disreputable conduct, or who has been disbarred or is under suspension from practice, or of any person who has procured employment in such matters by unprofessional solicitation.
( $j$ ) Knowingly assisting in any way or being assisted in a matter pending before the Treasury Department by any person who has been denied enrollment because of unprofessional or disreputable conduct, or who has been disbarred or is under suspension from practice.
( $k$ ) Sharing fees in any matter pending before the Treasury Department with an unenrolled person who is neither an attorney nor accountant engaged in the practice of law or accountancy.
( $l$ ) Directly or indirectly representing a client of a corporation in any matter before the Treasury Department, as set forth in paragraph 4.
$(m)$ Incompetency or negligence in handling a matter pending before the Treasury Department, or conduct or use of any means whereby final settlement of the matter is unjustifiably delayed.
( $n$ ) Making false answers to questions in the application for enrollment, the falsity of which answers was not discovered until after the enrollment of such attorney or agent.
(o) Conviction of a crime involving moral turpitude.
(p) Disbarment of an attorney by a court of record.
(q) Disbarment or cancellation of certificate of an accountant by a legally constituted board.
( $r$ ) Making a false financial statement for any person, firm, or corporation and certifying that such statement is correct or true.
10. Kind of advertising permitted.-(a) Letterheads, professional cards, and the customary professional insertions in directories and newspapers, trade journals, or other publications should set forth only the name and address of the attorney or agent and a brief description of the nature of his practice-that is to say, whether he practices as an attorney, accountant, or agent; and, if desired, any special field of service or practice covered. An enrolled attorney or agent may use on his letterheads or cards, or professional cards carried in newspapers or directories, the words " enrolled to practice before the Treasury Department," or words of similar import.
(b) Employees of the Treasury Department, on severing their connection with the department, may send out announcement cards briefly stating their former official status and announcing their new association: Provided, The cards are addressed only to personal or business acquaintances: And provided further, That such cards are distributed only at the time of severance of official connection with the Government.
11. Employment as associate, correspondent, or subagent.-An enrolled attorney or agent may accept employment as associate, correspondent, or subagent in any matter pending before the Treasury Department from an attorney or accountant engaged in the practice of law or accountancy who maintains an office for such practice, whether enrolled or not to practice before the Treasury Department, provided he is not under suspension, has not been disbarred, or has not been rejected because of disreputable conduct, and from an enrolled agent who is neither an attorney nor accountant but is engaged
in the Federal tax practice as a tax expert and who maintains an office for such practice; and with such attorney, accountant, or tax expert an enrolled attorney or agent as associate, correspondent, or subagent in any such matters may share the fees received.
12. Contingent fees.-While contingent fees may be proper in some cases before the department, they are not generally looked upon with favor and may be made the ground of suspension or disbarment. Both their reasonableness in view of the services rendered and all the attendant circumstances are a proper subject of inquiry by the department. The Commissioner of Internal Revenue or the head of any other Treasury bureau or division of the Sectetary's office may, at any stage of a pending proceeding, require an attorney or agent to make full disclosure as to what inducements, if any, were held out by him to procure his employment, and whether the business is being handled on a contingent basis, and if so, the arrangement regarding compensation. The Treasury Department will also make such independent inquiry in regard to the circumstances connected with the employment of attorneys or agents on a contingent basis as it deems advisable.
13. Authority to prosecute claims.-A power of attorney from the principal in proper form may be required of attorneys or agents by heads of bureaus, offices, and divisions in any case. In the prosecution of claims involving payments to be made by the United States, proper powers of attorney shall always be filed before an attorney or agent is recognized.
14. Substitution of attorneys or agents and revocation of author-ity.- (a) Where the power of attorney under which an attorney or agent of record is acting expressly confers the power of substitution, such attorney or agent, if in good standing before the department, may, by a duly executed instrument, substitute another in his stead, such other, however, to be recognized as the attorney or agent only with the assent of the head of the bureau, office, or division concerned.
(b) If a firm dissolve, or those associated as attorneys or agents by virtue of a power of attorney contest the right of either to receive a draft, warrant, or check, the principal only shall thereafter be recognized, unless the members or survivors of such firm, or the associates in such power of attorney, file a proper agreement showing which of such members, survivors, or associates may continue to prosecute the matter and may receive a draft, warrant, or check, and in no case shall a final warrant or check to the principal be delayed more than 60 days by reason of the failure to file such agreement.
(c) The revocation by a principal or his legal representatives of authority to prosecute a matter will not be effective, so far as the Treasury Department is concerned, without the assent of the head of the bureau, office, or division before which the matter is pending. Where a matter has been suspended pending the furnishing of evidence for which a call has been made on an attorney or agent, failure to take action thereon within three months from the date of suspension may be deemed by the administrative officer before whom the case is pending cause for revocation of the authority of such attorney or agent without further notice to him.
15. Application and effective date of circular.--This circular supersedes the regulations promulgated by Treasury Department Circular No. 230 of August 15, 1923, as heretofore amented and sup-

$$
64761-\text { FI 1927-- } 27
$$

plemented, relating to the recognition of attorneys, agents, and others. The regulations contained in this circular shall apply to attorneys, agents, and others representing claimants and others before the Treasury Department in the city of Washington or elsewhere with the exception as to customhouse brokers as set forth in paragraph 5, and shall be effective from and after the 1st day of July, 1927. This circular shall apply to all unsettled matters then pending in this department or which may hereafter be presented or referred to the department or offices thereof for adjudication, and shall be applicable to all those now enrolled to practice before the Treasury Department as attorney or agent: Provided, That nothing herein contained'shall be construed to require those now enrolled to apply again to be enrolled: And provided further, That the violation of the regulations of Department Circular No. 230 promulgated August 15, 1923, and all amendments amendatory thereof and supplementary thereto, committed prior to July 1, 1927, shall be punished under the provisions of said Department Circular No. 230 promulgated August 15, 1923, and the amendments thereof and supplements thereto, and the disbarment proceedings pending on July I, 1927, before said committee shall not be affected by these regulations and such proceedings shall be concluded under the provisions of said Circular No. 230 of August 15, 1923, and amendments thereof and the supplements thereto. The persons now detailed or appointed members, secretary, and attorney of the committee under the provisions of Circular No. 230, dated August 15, 1923, shall continue to serve or hold their positions, respectively, under these regulations, subject to the terms of their detail or appointment.
16. Circular may be withdrawm or amended.-The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the foregoing rules and regulations, with or without previous notice, and may make such special orders as he may deem proper in any case.

A. W. Mellon, Secretary of the Treasury.

## sTATUTES

The following statutes relate to the recognition of attorneys, agents, and other persons representing claimants and others before the Treasury Department and offices thereof:

That the Secretary of the Treasury may prescribe rules and regulations governing the recognition of agents, attorneys, or other persons representing claimants before his department, and may require of such persons, agents, and attorneys, before being recognized as representatives of claimants, that they shall show that they are of good character and in good repute, possessed of the necessary qualifications to enable them to render such claimants valuable service, and otherwise competent to advise and assist such claimants in the presentation of their cases. And such Secretary may after due notice and opportunity for hearing suspend and disbar from further practice before his department any such person, agent, or attorney shown to be incompetent, disreputable, or who refuses to comply with the said rules and regulations, or who shall with intent to defraud, in any manner willfully and knowingly deceive, mislead, or threaten any claimant or prospective claimant, by word, circular, letter, or by advertisement. (Act of July 7, 1884, 23 Stat. 258.)

Whoever, being an officer of the United States, or a person holding any place of trust or profit, or discharging any official function under, or in connection with, any executive department of the Government of the United States, or under the Senate or House of Representatives of the United States, shall act as an agent or attorney for prosecuting any claim against the United States, or in any manner, or by any means, otherwise than in discharge of his proper official duties, shall aid or assist in the presecution or support of any such clain, or receive any gratuity, or any share of or interest in any claim from any claimant against the United States, with intent to aid or assist, or in consideration of having aided or assisted, in the prosecution of such claim, shall be fined not more than five thousand dollars, or imprisoned not more than one year, or both. (Act of March 4, 1909, sec. 109, 35 Stat. 1107.)

It shall not be lawful for any person appointed after the first day of June, one thousand eight hundred and seventy-two, as an officer, clerk, or employe in any of the departments, to act as counsel, attorney, or agent for prosecuting auy claim against the United States which was pending in either of said departments while he was such officer, clerk, or employe, nor in any manner, nor by any means, to aid in the prosecution of any such claim, within two years next after he shall have. ceased to be such officer, clerk, or employe. (Sec. 190, Revised Statutes.)
any person who willfully aids or assists in, or procures, counsels, or advises the preparation or presentation under, or in connection with any matter arising under, the internal-revenue laws, of a false or fraudulent return, affidavit, claim, or document, shall (whether or not such falsity or fraud is with the knowledge or consent of the person authorized or required to present such return, affldavit, claim, or document) be guilty of a felony, and, upon conviction thereof, be fined not more than $\$ 10,000$, or imprisoned for not more than five years, or both, together with the costs of prosecution. (Revenue act of 1926, 44 Stat. 116.)

That section five hundred and fifty-eight of the Code of Law for the District of Columbia, relating to notaries public, be amended by adding at the end of said section the following: "Provided, That the appointment of any person as such notary public, or the acceptance of his commission as such, or the performance of the duties thereunder, shall not disqualify or prevent such person from representing clients before any of the departments of the United States Government in the District of Columbia or elsewhere, provided such person so appointed as a notary public who appears to practice or represent clients before any such department is not otherwise engaged in Government employ, and shall be admitted by the heads of such departments to practice therein in accordance with the rules and regulations prescribed for other persons or attorneys who are admitted to practice therein: And provided further, That no notary public shall be authorized to take acknowledgments, administer oaths, certify papers, or perform any official acts in connection with matters in which he is employed as counsel, attorney, or agent, or in which he may be in any way interested before any of the departments aforesaid." (Act of June 29, 1906, 34 Stat. 622. Held by 26 Opinions of Attorney General, 236, to apply to all notaries who may practice before the departments.)

The head of each department is authorized to prescribe regulations, not inconsistent with law, for the government of his department, the conduct of its officers and clerks, the distribution and performance of its business, and the custody, use, and preservation of the records, papers, and property appertaining to it. (Sec. 161, Revised Statutes.)
(In duplicate)
TREASURY DEPARTMENT
COMmittee on Enrollmont and Disbarment
Form 23. (Revised July 1, 1927)
application for Admission to Practice Before the Treasury Department
The honorable the Secretary of the Treasury.
SIR:
I,
residing at
with my office at
hereby apply for admission to practice as
to represent others before the Treasury Department, (Attorney or agent submit the following information for the purpose of determining my eligibility and fitness for such practice, in compliance with Treasury regulations as set forth in Department Circular No. 230, revised July 1, 1927 :

1. (a) Are you a citizen of the United States? ------- (b) Natural born? -------- (c) Naturalized?
(d) Where and when naturalized?
(e) Date of birth
2. (a) Are you a member of the bar? (c) Are you now in good standing at said bar?

#### Abstract

3. (a) Do you hold a certificate as a certified public accountant? (b) From what State? (c) Are you now in good standing under said certificate? 4. What is the nature of your business or profession?  count? an individual, firm, or corporation? 6. If an employee, give name and address of your employer and the nature of your employment

7. If a member of a firm, give the firm name and the names of the members of the firm
8. If connected with a corporation: (a) State the nature of the business in which the corporation is engaged and your connection with it
(b) Is it your purpose to represent clients of the corporation?
(c) Will the corporation be benefited directly or indirectly as the result of your representing clients?
9. Are you familiar with the laws, rules, and regulations of the Treasury Department and particularly with Department Circular No. 230, revised July 1, 1927?
10. What classes of cases do you expect to handle before the Treasury Department?

If you are not a member of the bar or a certified public accountant, answer fully $11(a), 11(b)$, and $11(c)$.
11. (a) Where and when did you receive your education and of what did it consist?
(b) What personal or business experience have you had, in what lines and with whom?
(c) What are your particular qualifications rendering you competent to advise and assist claimants in presentation of their cases before the Treasury Department?
12. Submit the names and addresses of three business references
13. (a) Have you ever been rejected, suspended, or disbarred from appearing as attorney or agent, or in any other representative capacity before any branch of the Federal Government, or of any State government, or of any municipality, or any court, or have you ever been rejected, suspended, or disbarred from practicing as a certified public accountant?
(b) If so, state details of such rejection, suspension, or disbarment
14. (a) Have you ever been defendant in a criminal case in court?
(b) If so, state the circumstances and the result
15. (a) Have you ever been an officer or employee of the United States? (b) If so, state the office or employment, with dates of appointment to and separation from the service

[^35]16. (a) Have you made previous application to be recognized as attorney or agent before the Treasury Department?

(b) If so, state details of such previous application and why you are now making another application
 statements contained in the foregoing application are true and correct; that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that. I will bear true faith and allegiance to the same; that $I$ take this obligation freely without any mental reservation or purpose of evasion; that, if authorized to represent others before the Treasury Department, I will at all times conduct myself strictly in compliance with the laws and regulations governing practice before the department; that I will maintain the respect due to the Treasury Department and the officials thereof and will abstain from all offensives personalities; that I will not counsel or maintain any application or proceeding which shall appear to me to be unjust, nor will I take any action except such as I believe to be honestly debatable under the law; and that I will employ for the purpose of maintaining the causes confided to me such means only as are consistent with truth and honor ; so help me God.

Exhibit 44
Opinion of the Supreme Court of the United States in the case of Henkels v: Sutherland (2.1.U.S. 298), decided May 24, 1926

Supreme Court of the United States. No. 318. October term, 1925.
Max Henkels, appellant, $v$. Howard Sutherland, as Alien Property Custodian, and Frank White, as Treasurer of the United States of America. Appeal from the United States Circuit Court of Appeals for the Second Circuit. (May 24, 1926.)

Mr. Justice Sutherland delivered the opinion of the Court.
This is a suit in equity, under Sec. 9 (a) of the Trading with the Enemy Act, c. 106, 40 Stat. 411, 419, as amencled by c. 6, 41 Stat. 35,

[^36]and c. 241, 41 Stat. 977 , brought by Henkels, a citizen of the United States, in the federal district court for the Southern District of New York, to recover the proceeds of the sale of 2,298 shares of common stock of International Textile, Inc., a Connecticut corporation, theretofore seized by the Alien Property Custodian upon the claim that it was the property of an alien enemy. A decree was rendered in Henkels' favor, adjudging him to be the sole owner of the stock; and the Treasurer of the United States was directed to account for, and pay over to Henkels, the proceeds of the sale "together with the income or interest, if any; earned thereon." There was realized from the sale of the stock, made on March $2 \dot{6}, 1919$, after deducting expenses, a balance of $\$ 1,505,052.55$. This amount the Treasurer paid to Henkels. Subsequently, Henkels applied to the district court to name a master to take and state the account of interest or income earned upon the fund prior to its payment. The application was denied and a final decree of dismissal entered upon the ground that the principal sum had been paid to Henkels, who had executed a release and satisfaction in full which the court refused to set aside on the claim of duress. 298. Fed. 947. Upon appeal, the circuit court of appeals, without passing upon this ground, held that the United States was not liable for income resulting from an investment of the funds in its own securities. 4 Fed. (2d) 988.

The proceeds arising from the sale of the stock were deposited with the Treasurer in conformity with law; and by that officer they were commingled with the proceeds of other sales of alien property and invested in interest-bearing securities of the United States. The Government admits Henkels' right to recover income earned on the corporate shares prior to their sale, but denies his right to recover for interest actually paid on Government securities in which the proceeds had been invested. This presents the only question for our determination, the Government having expressly waived the point upon which the district court decided the case.

No question is made in respect of the right of the custodian to seize property supposed to belong to an enemy, although it may subsequently turn out to have been a mistake, adequate provision having been made for a return in that case. Central Trust Co. v. Garvan, 254 U. S. 554, 566 ; Stoehr v. Wallace, 255 U. S. 239, 245.

By Executive Order No. 2813 of February 26, 1918, made pursuant to law, moneys deposited with the Treasurer by the custodian are to be held by the Secretary of the Treasury "for account of the Alien Property Custodian", and may be invested and reinvested from time to time in bonds or United States certificates of indebtedness. All moneys so deposited, together with interest or income received from the investment thereof, are made subject to withdrawal by the Secretary of the Treasury for the purpose of making payments pursuant to the provisions of the trading with the enemy act, which would include, of course, payments under Sec. 9 (a).

Section 9 (a) authorizes a suit in equity by any person not an enemy, etc., to determine a claim to any interest, right or title in the property seized. If, in the meantime, the seized property has been sold, the same remedy, by Sec. 7 (c), as amended, c. 201, 40 Stat. 1020, becomes available "against the net proceeds received therefrom and held by the Alien Property Custodian or by the

Treasurer of the United States." No distinction in this respect is made between the property and its proceeds. It can not be doubted that, if the seized property had been securities of the United States and these, thereafter, had been held in their original form, maturing coupons for interest would have belonged to the American claimant equally with the body of the bonds. In principle, there can be no difference between such a case and the one here, where claimant's property had been converted into securities of the United States. Such securities constitute the statutory " net proceeds," and, by the clear import of the statute, claimant's rights in respect of such proceeds are not inferior to his rights in respect of the original property. And no distinction fairly can be made between the accumulated interest upon securities constituting the proceeds, in the one case, and like securities constituting the property, in the other.

The Government can not be sued without its consent; and, accordingly, it can not be sued for interest unless it consents to be liable therefor. But the claim here is not for interest to be paid by the United States in the sense of the rule. It is for income, derived from an investment of Henkels' money in obligations of the United States, which income has been actually received by the Treasury and is, in its possession to be held, as the proceeds themselves are to be held, for the account of the Alien Property Custodian.

With enemy-owned property seized by the Custodian, it has been held, the United States may deal as it sees fit, White v. Mechanics Securities Corporation, 269 U. S. - (decided December 14, 1925) ; but it has no such latitude in respect of the property of an American citizen. Whether the Government shall pay interest upon its obligations depends upon Congressional assent; but it can not confiscate the actual increment of property belonging to a citizen, or the increment of the proceeds into which such property has been converted, any more than it can confiscate the property or its proceeds, without coming into conflict with the Constitution.

The Government contends that Angarica v. Bayard, 127 U. S. 251, is to the contrary, and the court below so held. In that case, the suit was for interest or income realized upon the amount of an award in favor of Angarica paid by the Spanish Government to the United States. This court, in denying the right of recovery, applied the general rule of immunity from interest, saying (pp. 259260) that the claim "is'not different in character from what it would have been if, instead of being a claim for increment or income actually received by the United States, it were a claim for interest generally, or for increment or income which the United States would or might have received by the exercise of proper care in the investment of the money." Without challenging the correctness of this view as applied to the precise facts of that case, it can not be accepted as a rule of general application. Especially, it can not be accepted as applicable here, where the property of a citizen has been mistakenly seized and, by executive authority, after conversion into money, has been invested in Government securities. We can not bring ourselves to agriee that a direction to invest such money in securities of the United States, rather than in other securities, may be utilized to enable the Government unjustly to enrich itself at the expense of its citizens, by appropriating income actually earned and
received which morally and equitably belongs to them as plainly as though they had themselves made the investment.

Since the proceeds resulting from the sale of Henkels' property have been commingled with the proceeds of other sales and thus invested, an account must be taken to ascertain the average rate of interest received by the Treasury upon all the proceeds invested and, thereupon, after deducting proper charges and expenses and taking into consideration the average amount of such proceeds which remained uninvested in the Treasury, a proportionate allocation made in respect of the proceeds belonging to Henkels for the period of their investment. Compare The Distilled Spirits, 11 Wall. 356, 368-369; Intermingled Cotton Cases, 92 U. S. 651, 652-653; Duel v. Hollins, 241 U. S. 523.

Decree reversed.
A true copy. Test:

Clerk, Supreme Court, U. S.

## Exhibit 45

## Opinion of the Attorney General, dated August 25, 1926, relative to the decision in the case of Henkels v . Sutherland

The Honorable, the Secretary of the Treasury.
Sir: The Department acknowledges receipt of your letter of July 12,1926 , relative to the decision of the Supreme Court in the case of Max Henkels $v$. the Alien Property Custodian, et al.

You request the Department for its opinion upon five (5) distinct questions growing out of the decision of the Supreme Court. These questions will be answered categorically in the same order in which you ask them.

1. If the earnings to which Max Henkels is entitled upon the principal amount awarded him were reinvested by the Secretary of the Treasury, Max Henkels is entitled to the earnings on earnings from March 4, 1923. The fact that Section 23 of the Act of March 4, 1923, placed in the hands of the Alien Property Custodian the distribution of earnings from March 4, 1923, has no bearing upon the question you ask, since it is immaterial by whom the earnings are distributed.
2. The Department is of the opinion that the method of calculating the interest which you set forth in your letter is in accordance with the opinion of the Supreme Court.
3. You are authorized under the decision of the Supreme Court to deduct, in arriving at the amount due Max Henkels, such amount as the Alien Property Custodian may certify to you as proper charges and expenses in connection with the case.
4. The Treasury may pay the claims of other American citizens whose property was wrongfully seized in the same manner as in the Henkels case. Payment should be made upon a supplemental order issued by the Attorney General in all cases where the claim has already been allowed and paid or where a decree of a court has been
satisfied. Where the claim for the corpus has not already been allowed, the interest will be taken care of in the allowance of the claim as a whole.
5. Where the property of neutrals was wrongfully seized $a b$ initio the same principles should apply as apply to the case of an American citizen whose property has been wrongfully seized. Respectfully,

William D. Mitcinell, Acting Attorney General.

## Exhibit 46

## Opinion of the Attomey General, dated July '7, 1927, relative to the claim of Tannwalder Baumwollspinnerei Fabrik

The Honorable, the Secretary of the Treasury.
Sir: There has been presented to the Department the claim of the Tannwalder Baumwollspinnerei Fabrik, a Czechoslovak corporation, for earnings upon the investment of its principal by the Secretary of the Treasury. This claimant was found by the Attorney General to be a Czechoslovak corporation and an eligible claimant under Section 9 (b) 11 of the Trading with the Enemy Act, as amended on March 4, 1923 (42 Stat. 1511), to recover its sequestered property and its claim for its principal held by the Treasurer of the United States was allowed by the President on July 11, 1926.

The Department, in its opinion to you of August 25, 1926, advised that the Treasurer was authorized to pay to American citizens and neutrals whose property was wrongfully seized the earnings which have actually accrued upon the investment of their principal by the Treasury Department. That opinion was based upon the decision of the Supreme Court of the United States in the case of Henkels $v$. Sutherland, 271 U. S. 298 , decided on May 24 , 1926. The facts in that case were these: Henkels, an American citizen, owned certain shares of stock which were seized by the Alien Property Custodian during the war and thereafter sold by the Custodian and the proceeds realized from the sale were deposited in the Treasury of the United States. He brought suit in the United States District Court for the Southern District of New York to recover the proceeds realized from the sale thereof. A decree was rendered in his favor, and the Treasurer of the United States was directed to account for and pay over to Henkels the proceeds of the sale "together with the income or interest, if any, earned thereon." The Treasurer paid to Henkels the amount of the principal, but no income. Henkels thereupon applied to the District Court to name a Master to take and state the amount of interest or income earned upon the principal while in the Treasury. This application was denied. Upon appeal the Circuit Court of Appeals held that the United States was not liable for income resulting from an investment of Henkels' funds in its own securities. 4 Fed. (2d.) 988. An appeal was taken from this decision to the Supreme Court which reversed the decree of the lower court and Henkels was held to be entitled to the earnings upon his principal which had been invested by the Treasurer, less proper
charges and expenses. While it is true that the court found that Henkels was an American citizen and that his property had been wrongfully seized, the reason for the payment of earnings to him was that such earnings constituted a part of the statutory " net proceeds " of his property, and that he was as much entitled to the same as the principal which had been seized. The Court in this respect said:

By Executive Order No. 2813 of February $26, \%$ 1918, made pursuant to law, moneys deposited with the Treasurer by the Custodian are to be held by the Secretary of the Treasury "for account of the Alien Property Custodian," and may be invested and reinvested from time to time in bonds or United States certificates of indebtedness. All moneys so deposited, together with interest or income received from the investment thereof, are made subject to withdrawal by the Secretary of the Treasury for the purpose of making payments pursuant to the provisions of the Trading with the Enemy Act, which would include, of course, payments under Sec 9 (a).

Section 9 (a) authorizes a suit in equity by any person not an enemy, etc., to determine a claim to any interest, right or title in the property seized. If, in the meantime, the seized property has been sold, the same remedy, by Sec. 7 (c), as amended, c. 201, 40 stat. 1020, becomes available "against the net proceeds received therefrom and held by the Alien Property Gustodian or by the Treasurer of the United States." No distinction in this respect is made between the property and its proceeds. It can not be doubted that, if the seized property had been securities of the United States and these thereafter. bad been held in their original form, maturing coupons for interest would have belonged to the American claimant equally with the body of the bonds. In principle there can be no difference between such a case and the one here, where claimant's property had been converted into securities of the United States. Such securities constitute the statutory " net proceeds," and, by the clear import of the statute, claimant's rights in respect of such proceeds are not inferior to his rights in respect of the original property. And no distinction fairly can be made between the accumulated interest upon securities constituting the proceeds, in the one case, and like securities constituting the property, in the other.

Section 12 of the Trading with the Enemy Act provided that the money which should be deposited in the Treasury of the United States might be invested and reinvested by the Secretary of the Treasury, "in United States bonds or United States certificates of indebtedness", and such investments were made by the Secretary of the Treasury pursuant to the Executive order of February 26, 1918, of the cash paid over to the Treasury by the Alien Property Custodian. Section 12 further provided as follows:

After the end of the war any claim of any enemy or of an ally of enemy to any money or other property received and held by the Alien Property Custodian or deposited in the United States Treasury, shall be settled as Congress shall direct: * * * (40 Stat. 424).
After the end of the war Congress provided that citizens of nations. states or free cities other than Germany, Austria, or Hungary (including Czechoslovak citizens) might recover any property seized by the Alien Property Custodian during the war which they owned at the time of seizure. (41 Stat. 977). The Amendment to the Trading with the Enemy Act, of March 4, 1923 (42 Stat. 1511), further provided for the return of the property of a partnership, association or other unincorporated body of individuals, having its principal place of business within any country other thann Germany, Austria, Hungary or Austria-Hungary, provided that the control of, or more than 50 percentum of the interests or voting power in any such partnership, association, or other unincorporated body of individuals.
or corporation, was at the time of seizure and at the time of return vested in citizens or subjects of nations, states or free cities other than Germany, Austria, Hungary or Austria-Hungary: Provided further, that such organization or corporation owned the property concerned at the time of seizure.

The question then is whether or not the law authorizes the withholding of the accretion upon the principal of a person whose property was rightfully seized but who has been made eligible to recover the same by statute.
There has never been any question of the right of an eligible claimant under the Act, regardless of whether his property was rightfully or wrongfully seized, to recover income which accrued subsequent to seizure upon corporate stock, bonds or real estate. It would, therefore, seem that there can be no distinction in the right of one whose property was wrongfully seized and one whose property was rightfully seized, if they are both eligible to recover their principal, to recover the earnings which have actually accrued upon the principal, for in both cases they constitute a part of the net proceeds.

This conclusion is supported by the opinion of the Supreme Court of the District of Columbia in the case of Alport v . Sutherland et al. (rendered on April 16, 1927, but not reported.) The plaintiff, a Polish citizen, who was formerly a subject of Germany but who acquired Polish citizenship by virtue of the Peace Treaty of Versailles, brought suit against the Alien Property Custodian and the Treasurer of the United States to recover the income which accrued from the investment of her principal by the Secretary of the Treasury, the principal having been returned by order of the President of June 19, 1923. The Alien Property Custodian and the Treasurer filed a motion to clismiss the bill of complaint contending that the statute did not permit the return of income to persons other than citizens of the United States if such persons were at any time during the war enemies under the Trading with the Enemy Act. After a hearing upon the motion briefs were filed and thereafter Mr. Justice Bailey rendered the following opinion:

[^37]ury of the United States and commingled with other money deposited in the Treasury by the Custodian under the Trading with the Enemy Act, is entitled, after deducting proper charges and expenses and taking into consideration the average amount of money which remained uninvested in the Treasury, to the earnings upon its principal, calculated at the average rate of interest received by the Treasury upon all the money invested pursuant to Section 12 of the Trading with the Enemy Act.

Although you have not requested the opinion of this Department on this matter this letter is being transmitted to you for your benefit in the disposition of clains of this character.

Respectfully.
(Signed) William D. Mitchele, Acting Attorney General.

Digest of Appropriations.
Statistics of Income.

## II. OTHER PERIODICAL PUBLLCATIONS

## Receipts, expenditures, and public debt

Collections of internal revenue (monthly; Bureau of Internal Reve-nue).-This statement is compiled from reports to the Commissioner of Internal Revenue of collections actually made cluring the period specified by the various collecting offices in the field. The receipts reported on this collection basis furnish information as to detailed sources of internal revenue, but do not agree with the receipts from internal revenue as shown for corresponding months in the Treasury daily statement. Such information was prepared and made available to the public for many years previous to the first issue in its present form in 1910. Data for specific taxes during the World War period and until the latter part of 1922 are not comparable with other years because of the size of the unclassified items during the war.

The statement includes a large photostat sheet showing the revenue from sources in detail, and three mimeographed sheets giving other information. It is issued between the 20th and 25 th of the month, the date depending on the receipt of the last collectors' reports. On the large sheet is included, for each tax, the collections during the
month for which the report is filed, during the preceding month, during the period from July 1 through the month, and during the corresponding period of the preceding fiscal year, with the amount of increase or decrease in the current year over the preceding fiscal year. A quarterly summary of collections of income taxes and miscellaneous internal revenue for the current calendar year is also included.

The supplemental mimeographed sheets show:
(1) The quantity of tax-paid products for the month and the same month of the preceding year. These products include distilled spirits (nonbeverage), spirits or wines, rectified, cigars by classes, cigarettes by classes, snuff, tobacco, oleomargarine, and playing cards.
(2) The quantity of tax-paid cigars and cigarettes, by classes, from Porto Rico and from the Philippines.
(3) Certain data on collections from taxes on products, much of which duplicates the photostat sheet.

Daily statement of the United States Treasury (daily; office of the Secretary).-The daily statement gives an accurate presentation of the condition of the Treasury as far as it is ascertainable from day to day. The statement is compiled from the latest daily reports received by the Treasurer of the United States from Treasury offices and depositaries of Government funds all over the country. Each issue includes data compiled from (1) reports received by mail and express at the office of the Treasurer in Washington up to $9.30 \mathrm{a} . \mathrm{m}$. of the day for which the statement is dated, and (2) reports of all Treasury offices in Washington at the closing hour of $2 \mathrm{p} . \mathrm{m}$. on the same day. Whenever there are important public debt transactions each daily statement includes wire reports thereof for the previous day, and on the last day of the month the statement includes wire reports of such public debt transactions up to and including that day, so that the preliminary public debt statement included for the last day of each month very closely approximates the final and complete statement appearing later. During the quarterly income tax payment months of March, June, September, and December, each daily statement includes the income tax receipts of the previous day, which are reported by wire from the Federal reserve banks.
The figures shown in the Treasury daily statements are said to be on a "current cash basis" or on the "basis of daily Treasury statements unrevised." The statement is usually issued the second business day after the day for which it is dated. The Treasury daily statement has been issued in printed form since January 3, 1895. It was prepared in written form and is in the files of the Treasury as early as January $1,1877$.
The following information is included for each day:
Current assets and liabilities, classified: Gold.
Silver dollars.
General fund.
Receipts and expenditures of the day, classified.
Receipts and expenditures, classified, for the month and the fiscal year to date, compared with the same periods for the preceding fiscal year.
Public debt receipts and expenditures, classified, for the month to date and the fiscal year to date, compared with the same periods for the preceding fiscal year.
Outstanding Federal reserve notes, Federal reserve bank notes, and national-bank notes.
Transactions affecting the circulation of Federal Reserve notes, Federal reserve bank notes, and national-bank notes.

On certain days special information is available:

#### Abstract

First day of the month: Securities held in trust by the Treasurer of the United States for national banks, classified. Fifteenth day of the month: Statement showing classified expenditures of the Government, monthly, for the fiscal year to date. This classification is by departments which is not shown on each daily statement.

Last day of the month : Preliminary statement of the public debt outstanding for the end of that month.

Internal Revenue Bulletin (weelly, quarterly, semiannual, annual; Bureau of Internal Revenue). -The rulings to be made public and all Treasury Department decisions pertaining to internal revenue matters appear in this weekly bulletin. The quarterly issue contains digests of rulings published in weekly bulletins, the last issue of the year including digests of all rulings published during the year. The weekly bulletins are combined every six months in semiannual cumulative bulletins, and yearly in an annual digest of such rulings and decisions for the current and two preceding years. This weekly bulletin has been issued since January, 1922. During the period, April, 1919, to January, 1922, occasional issues were made, including income tax rulings only. Past issues are now available in the form of cumulative bulletins only.
Market prices and investment values of outstanding bonds and notes (monthly; Government actuary, office of the Secretary).-This publication issued monthly by the Government actuary, shows the market value (including accrued interest), the range of market quotations (accrued interest to be added) and the investment value or yield for each outstanding issue of Government bonds and notes for each day of the preceding month, together with monthly averages. Data on securities of shorter maturity are not included. Quotations are from the New York Stock Exchange and furnished by the Federal Reserve Bank of New York. An average of bid and asked quotations is used in calculating yields. Since October 1, 1927, all yields have been calculated to the last maturity date where securities have optional maturities; prior to that date, yields on these securities were calculated to the last maturity date, with the exception of Treasury bonds of 1944-1954. A list of these bonds and notes, with rates of interest, maturity, and interest payment dates, is also given. The bulletin comes off the press about the 10th or 12th of the month.
Public debt maturities (monthly; section of financial and economic research, office of the Secretary).-This mimeographed statement, issued during the first week of each month, includes, by maturity dates and by main classes of Government securities, the amount of debt maturing during a five-year period, beginning with the date for which the statement is issued. Debt on which interest has ceased and debt redeemable within the period but not called for redemption are not included. The figures are based on the preliminary statement of the public debt appearing in the Treasury daily statement for the last day of each month. This statement was not mimeographed for distribution until the issue of February 28, 1925, but was compiled for irregular dates since July 1, 1921, and for the end of the month regularly since September 30, 1922.

Statement of the public debt of the United States (monthly; Division of Bookkeeping and Warrants, office of the Secretary). --The statement of the public debt of the United States contains:
(1) A statement of the public debt as of the last day of each month showing in detail in respect to each issue of United States securities outstanding on the date of the statement, the face amount issued, retired, and outstanding.
(2) A table containing the following items with reference to each issue of Government securities: Date of authorizing act, rate of interest, date of issue, date redeemable or payable, date interest is payable.
(3) On the reverse side, a classified list of securities owned by the United States Government as of the same date, which includes obligations of foreign governments, capital stock of war emergency corporations, obligations of carriers (railroad companies), securities of Federal land and Fedéral intermediate credit banks, etc.

The earliest printed issue of the public debt statement of which this Department has any record appeared on June 14, 1864. The list of securities owned by the United States Government was not published on the reverse side of the public debt statement until the issue of June 30, 1920.

Statistics of Income (annual, Bureau of Internal Revenue.) Annual reports entitled "Statistics of Income" have been compiled since 1918, when statistics were published from the income tax returns filed for 1916. The data contained in succeeding volumes differ to some extent from year to year. The statistics published include data compiled from the income tax returns of corporations, individuals, partnerships, and personal service corporations; and from capital stock tax, estate tax, and gift tax returns. The complete volume is issued about 15 months after the income tax returns are filed, and is preceded (except for 1916) by a preliminary report which appears about six months earlier. The statistics contained in these reports, exclusive of those compiled from capital stock tax returns, are taken from the taxpayers' returns as received, unaudited, except for a preliminary examination, to insure proper execution of the return.

The information from income tax returns covers a single calendar year, with the addition of historical tables showing the progress of income taxation of corporations since 1909, individuals since 1913, and of estate taxation since 1916. Information from returns of aliens, resident and nonresident, and foreign corporations reporting income from the United States, and American citizens and domestic corporations reporting income from foreign sources, appears for each year except 1918, 1919, and 1925. Data from corporation income-tax returns include receipts and disbursements, taxes paid, and other items, classified by industrial groups, by size of net income, and by States and Territories. Data from individual income tax returns include sources of income and deductions, taxes paid, exemptions, credits, and other items. These are classified by size of net income, by sex and family relationship, by States and Territories; and for 1921 and subsequent years by counties and cities. The number of partnership income returns appears for each year except 1916, and the number of personal service corporation returns for 1918 to 1921 , inclusive.

Data from capital stock tax returns are contained in Statistics of Income for $1920,1922,1924$, and 1925, and include an analysis of the corporate balance sheets showing nature of assets and liabilities, form of capitalization, fair value of capital stock, and tax, by industrial groups, and by States and Territories.

The first information from estate tax returns is arailable in Statistics of Income for 1920, which shows for all returns filed from September 9, 1916, to January 15, 1922, the gross estate, net estate,
deductions, and tax, by size of net estate. In the Statistics of Income for 1921 and subsequent years, the form of property, nature of deductions, and tax are shown, classified by size of net estate; and the gross estate, deductions, net estate, and tax by States and Territories. Data from gift tax returns are published in Statistics of Income for 1923 and 1924 only. The gross and net amounts, and tax, are shown by size of net amount of taxable gifts and by resident and nonresident donors.
Treasury Decisions (weekly; Bureaus of Customs, Internal Revenue, and Prohibition).-Treasury decisions under the customs, internal revenue, and other laws are here compiled, including the decisions of the United States Customs Court and the Court of Customs Appeals. Weekly issues are later combined in annual and semiannual volumes. This publication was first authorized for customs decisions by the administration act of June 10, 1890. The first issue to include customs and internal revenue decisions was on January 3, 1899. In December, 1899, the issue was changed, decisions relating to customs and to internal revenue being segregated, with a new numbering of decisions. The first bound volume of Treasury Decisions was for 1900. Earlier volumes of similar nature were known as Synopses of Decisions (Customs) and Decisions of the Commissioner of Internal Revenue.

## Money

Circulation statement of United States money (monthly; Division of Loans and Currency of the Public Debt Service). -This statement shows, by kinds of money, the total stock, the amount in the Treasury, classified, and the amount outside the Treasury, classified, at the opening of business on the first day of each month. The currency held in the Treasury is segregated to show the gold coin and bullion held in trust against gold and silver certificates (and Treasury notes of 1890), the reserve against United States notes (and Treasury notes of 1890), that held for Federal reserve banks and agents, and all other. The currency outside the Treasury is segregated into that held by Federal reserve banks and agents, and in circulation, total and per capita. Comparative totals are also given, not only for the immediately preceding month and year, but for pre-war years, for November 1, 1920, when money in circulation reached the high point, and for January 1, 1879. The security against each type of paper money is briefly stated in a note. The statement is compiled from figures appearing in the Treasury daily statement and information furnished by the Bureau of the Mint and the Federal Reserve Board for the last day of the preceding month in all cases. The figures for "in circulation" are secured by deducting from the total stocks for each type of money the amount held in the Treasury and the amounts in the Federal reserve banks as reported by those banks. A. estimate of the gold coin was made in 1873, based on the known amounts in the vaults of the Treasury and the national banks. In 1907 the Director of the Mint revised this estimate, reducing it by $\$ 135,000,000$, and this last is the basis for the present estimate of the stock of gold. The basis for the present estimate of the stock of subsidiary coin dates from June 30, 1910. The figures for the stock of standard silver dollars and of paper currencies represent actual Treasury records: Doubtless some of
the money regarded as "in circulation" has been lost or destroyed, but the Treasury has no way of determining the amount and makes no deduction therefor.
The earliest copy of the circulation statement in existence is dated April 1, 1887. Figures for the stock of each type of money and for total money in the Treasury, in the Federal reserve banks (since their establishment), and in circulation, are available for July 1 of each year since 1860. The circulation statement was revised on January 1, 1900, and on May 1, 1915, to eliminate certain duplication of items resulting from the inclusion of paper money and the coin held in reserve against it. On July 1, 1922, an important revision was made. On the new form of statement only money outside of the Treasury and the Federal reserve banks is included in circulation. In previous, circulation statements, money held by the Federal reserve banks (other than money held by or for Federal reserve agents, and Federal reserve notes held by the issuing banks in their own vaults) was included in the amount in circulation. Under that method transfers of gold between a Federal reserve bank and a Federal reserve agent resulted in an apparent change in the amount of money in circulation. Another change inaugurated in the 1922 revision was the inclusion of gold bullion and foreign gold coin held by the Federal reserve banks in their holdings and hence in gold and total money stock. Revised figures for the end of each fiscal year since the inauguration of the Federal Reserve System in 1914 have been calculated; monthly figures on the new basis were carried back only to July 1, 1921. A revision of this statement is now being considered to talke account of earmarked gold.

Paper currency of each denomination outstanding (monthly; division of general accounts, office of the Treasurer of the United States).This statement is issued for the last day of each month. Outstanding denominations are shown by the different kinds of money, the total outstanding for each type corresponding to the "stock" of each type in the circulation statement. Unknown, destroyed, held in the Treasury, held by the Federal reserve banks and agents are deductions from the totals outstanding to secure the "net" outstanding figures which agree exactly with the total "in circulation" figures of the circulation statement. The differences between the "total outstanding" of this statement and the "stock" of the circulation statement are explained by a consideration of the deduction items. This statement has been issued monthly since January 31, 1899, and on June 30 of each year from 1891 to 1898. It is usually off the press by the 10th or 12th of the month.

Value of Foreign Coins, (quarterly, Mint Bureau).-On January 1, April 1, July 1, and October 1, a statement is prepared by the Mint Bureau giving for each of a large number of foreign countries the legal standard for money, the monetary unit, the value of the monetary unit in terms of United States money, and remarks concerning special information. Such a statement has been issued since 1874, annually, until 1890, and quarterly since that date.

## National banks and Federal farm loan system

Abstract of Reports of Condition of National Banks (not less than three times a year; Comptroller of the Currency).-This statement
shows a summary of condition of all national banks; and condition of national banks classified according to (1) States, Territories, and reserve cities; (2) geographical sections; (3) Federal reserve districts; and (4) class of bank. The first number of present series was issued January 26, 1927.

Bulletin-Comptroller of the Currency (weekly and sometimes daily).-This mimeographed statement summarizes, for national banks, the applications to organize, the charters issued, changes of title, voluntary liquidations, and consolidations. The issues of this bulletin began before 1900 .

Monthly statement of capital stock of national banks, nationalbank notes, and Federal reserve bankc notes outstanding, etc. (monthly; Office of the Comptroller of the Currency). -The statement shows for the capital stock of national banks and for nationalbank notes and Federal reserve bank notes outstanding secured by United States bonds and lawful money the amount on the first business day of the month, the first day of the same month of the preceding year, and the first day of the preceding month, with changes during the preceding year and month, and also the kinds and amounts of bonds on deposit to secure such notes. The monthly statement has been issued in its present form since March 26, 1917. Its issue prior to that date, which did not include data on the capital stock of national banks, began before 1885.

Reports of Federal Farm Loan Bureau (monthly, except when otherwise specified).-Mimeographed statements of the financial condition and operations of Federal land banks and joint-stock land banks, based upon reports submitted by them to the Farm Loan Bureau, were issued irregularly from the inauguration of the system in 1917 until 1922, from which time they have been issued monthly. Similar statements regarding the Federal intermediate credit banks, which always have been issued monthly, began in October, 1923.

[^38]
## Miscellaneous

Companies holding certificates of authority * * * as acceptable sureties (semiannually, section of surety bonds).-This list, published after the audit of financial reports submitted to the Treasury Department as of June 30 and December 31, includes names of companies holding certificates of authority from the Secretary of the Treasury under the acts of Congress of August 13, 1894, and

March 23, 1910, as acceptable sureties on Federal bonds; the limit for which they may be accepted on any one bond; States in which they are incorporated and licensed to do business; judicial districts in which they have appointed process agents; and also acceptable reinsuring companies under department circular of July 5, 1922. The list has been published in its present form since 1905, at first monthly, later quarterly, and semiannually since 1922.

Caveat list of United States registered bonds and notes (monthly; Division of Loans and Currency of the Public Debt Service).-A list of registered bonds and notes of the United States Government and of the insular governments, upon which the Government thereby gives notice that bonds and notes listed will be purchased at the buyer's risk. In other words, it is a list of securities reported to the Treasury as lost, stolen, or otherwise disappeared for any attempted transfer of which the owner gives notice he is not responsible. The list has been published since 1873. It is issued as of the first day of the month, and a supplemental list is issued the middle of each month.

Estimated amount of wholly tax-exempt securities (monthly; section of financial and economic research, office of the Secretary).A mimeographed table showing the outstanding amounts of wholly tax-exempt securities issued by (1) the United States Government, (2) the Federal Farm Loan System, (3) States, counties, cities, etc. (estimated), and (4) Territories and insular possessions of the United :States (estimated). In each case there is given the total amount outstanding, the amount owned by the United States Government or held in sinking funds, and the net amount outstanding.

The table carrying data as of the end of the month is ready for distribution about the end of the succeeding month. Comparable data are available beginning January, 1912.

Internal Revenue News (monthly; Bureau of Internal Revenue).A publication for the information of employees of the Bureau of Internal Revenue containing descriptions of the various activities and changes in the administrative operations of the constituent units and divisions of that burear. Publication began in July, 1927

Public Health Reports (weekly, Public Health Service).-Public Health Reports includes a summary of weelkly reports concerning the prevalence of diseases in the States and cities of the country, a general summary for foreign countries, and special reports on the results of investigations regarding the control and prevention of diseases. The earliest publication of this series was made in 1879 as Public Health bulletins, including bulletins issued in separate form from July, 1878, to May, 1879. In 1887 the publication became the Weekly Abstract of Sanitary Reports, and in 1896 Public Health Reports. Gratuitous distribution is made to State and municipal health officers.
$V$ enereal Disease Information (monthly, Public Health Service).This monthly publication is issued for use in the cooperative work of the United States Public Health Service with the State health departments. Information is included under three headings: (1) Special articles, (2) results of research, and (3) information on prevention. When first issued, beginning January, 1920, the publication was mimeographed and entitled "Abstracts from Recent Medical and Public Health Papers." The present title was first used in December, 1923. The publication has been printed since May, 1923.

## TABLES

Digitized for FRASER http://fraser.stlouisfed.org

## EXPLANATION OF BASES USED IN TABLES OF RECEIPTS AND EXPENDITURES

The receipts of the Government are published on four different bases, namely: (1) Daily Treasury statements, unrevised (current); (2) daily Treasury statements; revised (actual) ; (3) warrants issued; and (4) collections reported by collecting officers. The expenditures of the Government are published on the first three of these bases, and also on the basis of checks issued.

Daily Treasury statements (unrevised).-The figures shown in the daily statement of the United States Treasury are compiled from the latest daily reports received by the Treasurer of the United States, from Treasury offices, and public depositaries holding Government funds. The daily Treasury statement, therefore, is a current report compiled from latest available information, and, by reason of the promptness with which the information is obtained and made public, it has come into general use as reflecting the financial operations of the Government covering a given period, and gives an accurate idea of the actual condition of the Treasury as far as it is ascertainable from day to day. This is known as "current cash basis," according to daily Treasury statements (unrevised). Table 7 (p. 446) shows figures on this basis.

Daily Treasury statements (revised).-On account of the distance of some of the Treasury offices and depositaries from the Treasury, it is obvious that the reports from all offices covering a particular day's transactions can not be received and assembled in the Treasury at one time without delaying for several days the publication of the daily Treasury statement. It is necessary, therefore, in order to exhibit the actual receipts and expenditures for any given month or fiscal year, to take into consideration those reports covering the transactions for the last few days of the month or fiscal year concerned which have not been received in the Treasury until the succeeding month or fiscal year. After taking into consideration these reports the revised figures indicate the condition of the Treasury on the basis of actual transactions occurring during the period under review. This is known as "the basis of daily Treasury statements (revised)."

It is not practical to delay the publication of the daily Treasury statement in order to include the later reports, as the difference between the revised and the unrevised figures is immaterial. The unrevised figures as shown in current daily Treasury statements are the basis for the Budget estimates submitted to Congress by the President. The revised figures are of no practical use except to enable the use of a true general fund balance on the monthly statement of the public debt of the United States and to bring the daily Treasury statement figures into agreement with the figures based on warrants issued. A summary of receipts and expenditures on this basis is shown on page 141.

Warrants issued (receipts). -Section 305 of the Revised Statutes provides that inceipts for all moneys received by the Treasurer of the United States shall be redorsed upon warrants signed by the Secretary of the Treasury, without which warrants, so signed, no acknowledgment for money received into the Public Treasury shall be valid. The issuance of warrants by the Secretary of the Treasury, as provided by law, represents the formal covering of receipts into the Treasury.

Certificates of deposits covering actual deposits in Treasury offices and depositaries, upon which covering warrants are based, can not reach the Treasury simultaneously, and for that reason all receipts for a fiscal year can not be covered into the Treasury by warrants of the Secretary immediately upon the close of that fiscal year. It is necessary to have all certificates of deposits before a statement can be issued showing the total receipts for a particular fiscal year on a warrant basis. The figures thus compiled will agree with the figures compiled on the basis of daily Treasury statements (revised). Tables 4 and 8 (pp. 431 and 450 ) show receipts on this basis.

Warrants issued (expenditures).-The Constitution of the United States provides that no money shall be drawn from the Treasury but in consequence of appropriations made by law. Section 305 of the Revised Statutes requires that the Treasurer of the United States shall disburse the moneys of the United States
upon warrants drawn by the Secretary of the Treasury. As the warrants are issued by the Secretary they are charged against the appropriate appropriations provided by law. Some of these warrants do not represent actual payments to claimants, but are merely advances of funds to be placed to the credit of disbursing officers of the Government with the Treasurer of the United States for the payment of Government obligations. The disbursing officer then issues his .check on the Treasurer in payment of such obligations. As far as the appropriation accounts are concerned, the warrants issued and charged thereto constitute .expenditures, but it will be observed that such expenditures necessarily include unexpended balances to the credit of the disbursing officers. Under normal conditions these balances over a period of several years fluctuate very little in the aggregate, and the difference between the total expenditures on a warrant basis and a cash basis (revised) is immaterial. Statements of the expenditures on a warrant basis are shown on pages 436 and 454 of this report. On page 443 also will be found an adjustment of the expenditures on a warrant basis to the basis of daily Treasury statements (revised), from which it will be noted that in .order to reconcile the two bases there must be taken into consideration unexpended disbursing officers' balances, unpaid warrants at the beginning and end of the year, and receipts credited direct to appropriations, the last of which are explained in the footnotes on pages 435 and 443.

Collections reported by collecting officers.-Statements showing receipts on a :collection basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as collectors of internal revenue and collectors of customs. These reports cover the collections actually made by these officers during the period specified. The collections are then deposited in a designated Government depositary to the credit of the Treasurer of the United States, which depositary renders a report to the Treasurer. The reports of the collecting officers and the depositaries do not, of course, coincide, for the reason -that the collecting officers make collections during the last few days of the fiscal year which are not deposited until after the close of the fiscal year. On this account the two reports will not agree. The receipts are reported on a collection basis merely for statistical purposes and to furnish information as to detailed sources of revenue. Classification of such items on the basis of deposits has been found to be impracticable and uneconomical. Tables 11 and 17 (pp. 468 and 490) show receipts on a collection basis.

Checks issued.-This basis, more than any other, reflects the real expenditures of the Government. Expenditures for a given fiscal year on the basis of checks issued differ from the corresponding figures on the basis of warrants in that the former include expenditures made by disbursing officers from credits granted during the previous fiscal year, and exclude the amount of unexpended grants remaining to their credit at the end of the fiscal year. The basis of checks issued differs from the basis of the daily Treasury statement (revised) in that -the former includes checks outstanding at the end of the fiscal year, and excludes unpaid checks outstanding at the beginning of the fiscal year. A detailed explanation of the basis of checks issued will be found on page 89 of this report. Table 3 shows expenditures on this basis:

${ }^{1}$ Additional collections under national prohibition act, amounting to $\$ 4,298,198.21$, included under miscellaneous receipts, on p. 432.
${ }^{2}$ Additional collections under national prohibition act, amounting to $\$ 5,230,147.12$, included under miscellaneous receipts, on p. 432.
${ }^{3}$ On July 15,1926 , the unexpended balance to the credit of the checking account of the United States Sugar Equalization Board on the books of the Treasurer of the United States amounting to $\$ 11,370,621.30$ was transferred to the warrant account, $\$ 5,000,000$ of which was covered into the Treasury to the credit of the appropriation as a repayment of capital stock originally advanced therefrom; the remainder, $\$ 0,370,621.39$, was covered into the Treasury as "Miscellaneous Receipts-final dividends of United States Sugar Equalization Board." Since this transfer of funds from one account to another is merely an adjustment between accounts in this fiscal year of cash transactions occurring in prior fiscal years, the items have not been included in the receipts or expenditures as they did not affect the cash in the Treasury during the current fiscal year.

${ }^{22}$ Items of this character represent cash receipts which are credited against tbe expenditures shown on a warrant basis. It is necessary, therefore, to add back the amounts to expenditures by warrants in order to adjust to an actual cash basis.
${ }^{23}$ After deducting the sum of $\$ 6,370,621.39$ referred to in note 3 on page 431.
${ }^{24}$ Exclusive of public debt retirements chargeable against ordinary receipts during 1927 of $\$ 519,563,844.78$ and during 1926, of $\$ 487,376,050.69$, which amounts are included in this table under public debt expenditures. The total expenditures chargeable against ordinary receipts during the fiscal years 1027 and 1026 were, therefore, $\$ 3,493,507,876.75$ and $\$ 3,586,109,883.01$, respectively.

Table 7.-Ordinary receipts, expenditures"chargeable againstiordinary receipts, and isurplus or deficit for the fiscal years 1916 to 1927
[On basis of daily Treasury statements (unrevised), seerp. 421]
(Because of legislation establishing revolving funds and providing for the reimbursement of appropriations, commented upon in the Annual Report of the Secretary of the reasury for the fiscal year 1919, p. 126 ff., the gross expenditures in the case of some departments and agencies, notably the War Department, the Railroad Administration, and the Shipping Board, have been considerably larger than here stated. This statement does not include expenditures on account of the Postal Service other than salaries and expenses of the Post Office Department in Washington, postal deficiencies, and items appropriated by Congress payable from the general fund of the Treasury.)

${ }^{1}$ Figures for ordinary receipts and total ordinary expenditures from Apr. 6, 1917, to June 30, 1917, are available in Table 4, pp. 444 and 446; of 1926 annual report.
3 In the fiscal years 1921 , 1922 ions in special accounts are net figures and make allowance for receipts and deposits credited to the account concerned. and commissions, which account for most of the differences as compared with expenditures for other fiscal years.

- Owing to settlement between the Post Office Department and the Railroad Administration on account of transportation during Federal control, Post Office Department expenditures for June, 1921, include $\$ 65,575,832.03$ paid to the Railroad Administration. Deposit of this payment by Railroad Administration resulted in decrease in expenditures on account of "Federal control of transportation systems and transportation act, 1920 ," by a corresponding amount.
${ }^{5}$ Payments on account of veterans' relief made prior to Aug. 11, 1921 , by the War Risk Insurance Bureau are iucluded under Treasury Department, while similar payments made prior to that date by the Federal Board for Vocational Education are included under other independent offices and commissions. During the fiscal year 1922 allotments for in the amount of $\$ 529,237.84$, but expenditures under these allotments appear as expenditures of the respective departments and not of the Veterans' Bureau.

Add
${ }^{7}$ Includes $\$ 288,399,222.46$ payments on certificates of indebtedness of Director General of Railroads, due July 15, 1919
$B$ Owing to settlement between the Post Office Department and the Railroad Administration on account of transportation during Federal control, Post Office Department expenditures for June, 1921 , included $\$ 65,575,832.03$ paid to the Railroad Administration. Deposit of this payment by Railroad Administration resulted in decrease in expenditures on account of "Federal control of transportation systems and transportation aet, 1920," by a corresponding amount.
daily Deduct excess of credits resulting from deposits of War Finance Corporation representing proceeds of redemptions of its boldings of United States securities. (See note 2 , $\mathbf{p}$. 2, daily Treasury statement for June 30, 1920.)

11 Includes excess of credits.
daily Treasury sta,
${ }_{12}$ Net expenditures after taking into account credits and $\$ 100,000,000$ applied to reduction in capital stock of United States Grain Corporation.
${ }^{3}$ Allotments for veterans' relief have been made as follows: 1923 -Treasury Department, $\$ 3,164,425.11 ;$ War Department, $\$ 4,889,241.91$; Navy Department, $\$ 2,652,303$; 1924Treasury Department, \$457,150; War Department, $\$ 4,434,713.92$; Navy Department, $\$ 1,474,600$; Interior Department, $\$ 44,791$; 1925-Treasury Department, $\$ 394,840$; War Department, $\$ 4,075,300.07$; Navy Department, $\$ 1,536,800$; and Interior Department, $\$ 51,250$.

16 Included under Treasury Department prior to fiscal year 1922.
${ }_{16}$ Included under Post Office Department prior to fiscal year 1922
${ }^{16}$ The railroad expenditures during the fiscal year 1922 were reduced by $\$ 266,636,606.26$, on account of deposits by the Railroad Administration, representing proceeds of sale of equipment trust notes acquired under the Federal control act approved Mar. 21, 1918, as amended, and the act approved Nov. 19, 1919, and wero further reduced by $\$ 123,783,487.75$, accounts were included in the daily Treasury statement under miscellaneous receipts, proceeds of Government-owned securities, railroad securities. 1923 and 1924 receipts on the ${ }_{17}$ Included under Executive proper prior to fiscal year 1922
is $\$ 25,000,000$ of this amount represents reduction in capital stock of United States Grain Corporation effected Oct. 17, 1921, and is refiected in an increase of receipts in an equal amount. (See note, p. 2, daily Treasury statement for Oct. 18, 1921.)
${ }_{30}$ Established by act of May 22, 1920, and included under Interior Department prior to fiscal year 1922.
20 Included under District of Columbia prior to fiscal year 1922.

${ }^{1}$ Before July, 1921, tax figures include collections as classified and entered during the month in the respective tax accounts. While all collections during each fiscal year are thus entered by the end of the year, tbe income tax collections classified each montb do not represent actual collections because of the unclassified amounts. Beginning with July, i921, classified income tax collection
separately prior to July, 1924 .
Including special taxes relating to manufacture and sale.
${ }_{3}$ Collections include only those on passenger automohiles and motor cycles. Collections from taxes on autotrucks and autowagons and on tires, parts, and accessories, wbich were repealed in the revenue act of 1926, are not shown. Collections on passenger automobiles and motor cycles prior to March, 1919 , were not segregated from collections on autotrucks and autowagons.

Include sales of documentary stamps by postmasters.
8 Includes collections on taxes shown separately in tbis table and also on all other taxes. Under the revenue act of 1926 all otber taxes include fermented liquors, pistols and revolvers, cereal beverages, opium and narcotics, use of yachts and pleasure boats, etc., oleomargarine and adulterated and process butter, etc., collections under probibition laws, internal revenue collected through customs oflices, delinquent taxes under repealed laws, and miscellaneous receipts. These collections amounted to $\$ 15,865,870$

Total for fiscal year 1927
July, 1927

1 Before July, 1921, tax figures include collections as classified and entered during the month in the respective tax accounts. While all collections during each fiscal year are thus entered by the end of the year, the income tax collections classified each month do not represent actual collections because of the unciassined amounts. Beginning with July, 1921, classified income tax collections bave been adjusted for unclassified items and figures represent actual monthly collections. Corporation and individual income azes were not reported separately prior to July, 1924
${ }^{2}$ Including special taxes relating to manufacture and sale.
8 Collections include only those on passenger automobiles and motor cycles. Collections from tazes on autotrucks and autowagons and on tires, parts, and accessories, which were repealed in the revenue act of 1926, are not shown. Collections on passenger automobiles and motor cycles prior to March, 1919 , were not segregated from collections on autotrucks and autowagons.

- Include sales of documentary stamps by postmasters. and revolvers, cereal beverages, opium and narcotics, use of yachts and pleasure boats, etc., oleomargarine and adulterated and process butter, etc., collections under prohibition aws, internal revenue collected through customs offices, delinquent taxes under repealed laws, and miscellaneous receipts. These collections amounted to $\$ 15,865,870.25$ during the iscal year 1927. Prior to the operation of the revenue act of 1926 total internal revenue also includes collections on taxes repealed in the revenue act of 1921 , 1924 , or 1926 .
[On basis of reports of collections, see p. 42]]

${ }^{1}$ Figures for 1853 to 1885, inclusive, are taken from "Statement of receipts and expenditures of the Government from 1855 to 1885 and principal of public debt from 1791 to 1885 ," compiled from the official records of the register's office. Later figures are taken from the monthly debt statements and revised figures published in the annual reports of the Secretary of the Treasury. Do not include gold certificatcs, silver certificates, currency certificates, and Treasury notes of 1890.
${ }^{2}$ Exclusive of bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).
${ }^{\text {a }}$ Includes old demand notes; United States notes, less the amount of the gold reserve since 1900; postal currency and fractional currency less the amounts officially estimated to have been destroyed; and also the redemption fund beld by the Treasury to retire national-bank notes of national banks failed, in liquidstion, and reducing circulation, which prior to 1890 was not included in the published debt statements. Does not include gold, silver, or currency certificates or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

amounts of the series of 1918, 1919, 1920, and 1921 (except issue of Dec. 15, 1921) are on the basis of reports of sales or of cash receipts less amounts redeemed. Audother recelpts from the sale of thrift stamps and Treasury savings stamps to Dec. 31, 1925; subsequent to that date these securities have been carried as debt bearing no interest.

## MEMORANDUM

Amount due the United States from the Central Branch of the Union Pacific R. R. on account of bonds issued (Pacific R. R. aid bonds, acts approved July 1, 1862, July 2, 1864, and May 7, 1878): $\qquad$ Interest
\$1,600, 000. 00
Total
3, 455, 655.89
Note.-This statement is made up on the basis of the face value of the securities therein described as received by the United States, with due allowance for repayments. To the extent that the securities are not held in the custody of the Treasury, the statement is made up from reports received from other Government departments and establishments. The statement does not include securities which the United States holds as collateral or as the result of the investment of trust funds (as, for example, securitjes held for account of the Alien Property Custodian, the United States Government life insurance fund, and other similar trust funds).

OBLIGATIONS OF FOREIGN GOVERNMENTS
Table 66.-Principal amount of obligations of foreign governments originally acquired under the acts of Congress mentioned and payments on account of principal thereof; the funded indebtedness with payments on account of principal thereof and the net principal outstanding as of November 15, 1997; the accrued and unpaid interest on all such indebtedness as of the last interest period prior to or ending with November 15, 1927; and the total indebtedness as of November 15, 1927

[^62] tive debtor governments have been or will be delivered to the Treasury;
(Acrued and unpaid interest on funded debts due to exercise of options to pay specifed amounts over first five years in lieu of total amounts due for which bonds similar to those originally issued under funding agreement will be given upon expiration of the option for the full amount then due.

U Upon ratification of the funding agreement, $\$ 10,030,307.73$ of this sum will be applied to ards payment of the first annuities due thereunder.

- Increase over amount funded due to exercise of options to pay one-half of interest due on original issue of bonds in bonds of debtor government.

Table 67.--Payments made by foreign governments on account of interest on obligations held by the Treasury

1 The figures from 1860 to 1889 , inclusive, have been revised from the best data available in. annual reports of the Secretary of the Treasury. But the oider records, especially
aring the Civil War period and the early 70's, are not complete and the fgures for gold and sijver in those years are only estimates. The figures beginning. with 1890 have.been. during the Civil War period and the early 70's, are not complete and the fgures for gold and silver in those years are only estimates
mpiled on the basis of revised figures for June 30 of each year and therefore differ slightly from the monthly circulation stavements.
Doos not include gold bullion and foreign coin outside of the vaults of the Treasury, Federal reserve banks, and Federal reserve agents.
9 Although notes of all kinds have been outstanding in small amounts, they were not in actual circulation to any extent after 1878 .

${ }^{1}$ The form of circulation statement was revised beginning July 1, 1922, so as to include in the holdings of the Federal reserve banks and agents and, hence, in the stock of money, gold bullion and foreign gold coin beld by the Federal reserve banks and agents, and to include in the holdings of the Federal reserve banks and agents, and, hence, exclude from money in circulation, all forms of money held by the Federal reserve banks and agents whether as reserve against Federal reserve notes or otherwise. This change
did not affect the figures for money in circulation prior to the establishment of the Federal reserve system. For the sake of comparability the figures for 1915 to 1921 , inclusive, as did not affect the figures for money in circulation prior to the establish
shown on on this statement, have been compiled on the revised basis.
\% The amount of money held in trust against gold and silver certificstes and Treasury notes of 1890 should be deducted from these totals before combining them with total money outside of the Treasury to arrive at the stock of money in the United States.

Revised igures: See footnote ( 1 ) on p. $\mathbf{6 3 5}$.
Includes total stock of sil ver dollars andfsubsidiary silver 1860-1863; and of gold coin and bullion, 1862 and 1863 . It is not practical to present the amounts in circulation sepqrately for the years mentioned.

Table 75.-Money in circulation, by kinds June so, 1987, revised from reporls received afler July 1

[^65]and a first lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by the deposit with Federal reserve agents of a llke amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal reserve act. Federal reserve banks must maintain a gold reserve of at least 40 per cent, including the gold redemption fund which must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Lavful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal reserve bank notes. National bank notes are secured by United States bonds except where lawful money has been deposited with the Treasurer of the United States for their ret

1 The data in this table differ from the data for the same years in Table 74 in the following manner: In this table the data have been revised so as to exclude earmarked gold coin from the stock of money, and hence from money in circulation, and to include in the holdings of the Federal reserve banks, and hence in the stock of money, gold coin and bullion held abroad for the account of the Federal reserve banks. Only years affected by these revisions are shown in this table.
${ }^{3}$ The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from these totals hefore combining them with total money outside of the Treasury to arrive at the stock of money in the United States.

## Table 78.-Money cost of the World War to

[Net expenditures of the United States Government after

${ }^{1}$ Credit, deduct.
After deducting expenditures since 1921.
Assets of June 30, 1927.
${ }^{1}$ Covered into Treasury on July 15, 1926.
Of this sum $\$ 22,438,834.31$ was covered into the Treasury during the fiscal years 1922-1926.

- Assets of June 30, 1926 (less continuing costs 1921-1926; figures as of June 30, 1927, not available).

## MISCELLANEOUS

the United States Government to June 30, 1927
deducting the estimated value of certain assets acquired]

T Of this sum $\$ 499,000,000$ was covered into the Treasury during the fiscal year 1925. If the Treasury made an interest charge against the corporation of 4.28 per cent on net payments (advances) from the Treasury the apparent profit of $\$ 45,434,608.93$ would be entirely wiped out.
${ }^{8}$ The sum of $\$ 25,000,000$ was covered into the Treasury during the fiscal year 1922; on account of the remaining $\$ 25,000,000$ of its capital stock the Grain Corporation turned over to the Treasury certain foreign obligations received by it.

[^66]United States Government to June 30, 1927—Continued

- This includes $\$ 4,465,301.58$ representing cost of site and building now occupled by the Veterans' Bureau.

Table 78.-Money cost of the World War to the

## 1 Credit, deduct.

10 Exclusive of approximately $\$ 400,000,000$ expended under the act of Aug. 29, 1916, which provided for a 3 -year building program

1 Includes $\$ 717.834 .36$ advanced during the year 1922.
${ }_{11}$ Represents obligations acquired for cash advances under Liberty bond acts.
11 Payments to be received under the various funding agreements have been discounted so as to show their present value on a basis of 4 per cent per annum, payable semiannually. The debts of Austria and Oreece have been included on a similar basis. Obligations acquired in connection with the sale on credit of surplus war material and rejief supplies are included.

United States Government to June 30, 1927-Continued

Note.-The President, under proclamation dated Nov. 14, 1921, declared the end of the war with Germany to be July 2, 1921, the date on which the joint resolution of Congress terminating the state of war was approved. The figures contained herein are on the basis of warrants issued. They make allowance for estimated normal expenditures under the War and Navy Departments on a peace-time basis, receipts on account of the sale of war supplies and surplus Government property, and assets held on June 30, 1921, a large part of which has subsequently been converted into cash and covered into the Treasury, the remainder being estimated. Necessarily some of the figures represent approximations, since no cost records relating to the war were maintained.

## REPORTS OF HEADS OF BUREAUS

## REPORT OF THE TREASURER

> Treasury Department,
> Office of the Treasurer, Washington, October 12, 1927.

Sir: In compliance with the provisions of section 305, Revised Statutes of the United States, I have the honor to submit herewith a report covering the transactions of the Treasury of the United States for the fiscal year ended June 30, 1927.

During the fiscal year 1927 the total ordinary receipts from all sources, except postal revenues, on the basis of daily Treasury statements, revised, were $\$ 4,128,422,887.61$, an increase of $\$ 165,451,322.64$, as compared with those for the fiscal year 1926. The cash expenditures chargeable against ordinary receipts amounted to $\$ 3,493,507,876.75$.

The net result for the fiscal year was an excess of ordinary receipts over total expenditures chargeable against ordinary receipts of $\$ 634,-$ $915,010.86$. The postal revenues deposited in the Treasury and credited to the account of the Post Office Department during the fiscal year 1927 amounted to $\$ 683,754,924.75$.

The ordinary receipts and expenditures, by warrants drawn, classified for the past two years and adjusted to the basis of the daily Treasury statements, revised, are compared in the following table:

| Account | 1926 | 1927 | Increase | Decrease |
| :---: | :---: | :---: | :---: | :---: |
| RECEIPTS |  |  |  |  |
| Customs | \$579, 716, 610.62 | \$605, 672, 465.18 | \$25, 955, 854. 56 |  |
| Internal revenue: |  |  |  |  |
| Income tax.: | 1, 974, 104, 141. 33 | 2, 219, 952, 443. 72 | 245, 848, 302.39 |  |
| Miscellaneous | 862, 667, 640.42 | 648, 732, 440.00 |  | \$213, 935, 200.42 |
| Sale of public lands | 754, 252.79 | 621, 186. 63 |  | 133, 066.16 |
|  | 440, 326, 570. 63 | 498, 917, 609.19 | 58,591, 038.56 |  |
| Receipts of the District of Columbia- | 26, 941, 815.85 | 30, 658, 055. 16 | 3, 716, 239.31 |  |
| Panama Canal tolls, etc.---.------- | . $23,941,917.87$ | 25, 544, 701. 45 | 1, 602, 783.58 |  |
| Total | 3,908, 452, 949. 51 | 4, 030, 098, 901.33 | 335, 714, 218. 40 | 214, 068, 266.58 |
| Deduct moneys covered by warrant in the year subsequent to the deposit thereof. $\qquad$ | 8,637. 17 | 13,262.97 | 4,625.80 |  |
|  | 3, 008, 444, 312, 34 | 4,030, 085, 638.36 | 335, 709, 592. 60 | 214, 068, 266.58 |
| Add moneys received in the iscal year but not covered by warrant. | 13, 262.97 | 6,658.85 |  | 6,604. 12 |
| Add receipts credited direct to appropristions (see note): |  |  |  |  |
| Proceeds of railroad securities owned by the Government... | 36, 737, 707. 02 | 89, 725, 932. 32 | 52, 988, 225.30 |  |
| Receipts from miscellaneous | 17, 776, 282.64 | 8,604,658. 08 |  | 9, 171, 024. 56 |
| Total ordinary receipts...- | 3,962,971, 564.97 | 4, 128, 422, 887.61 | 165,451, 322.64 |  |
| 64761--FI 1927-44 |  |  |  | 663 |

NOTE 1.-Proceeds of railroad securities during the flscal years 1926 and 1927 in tbe respective amounts of $\$ 36737707.02$ and $\$ 89,725.932 .32$ were credited to the revolving funds established by the transportation act, 1020, and operate to reduca expenditures of independent offices for those years, which accounts for the decrease shown for 1927. (See also note 2 in this connection.)

Note 2.-Items of this cnaracter represent cash receipts which are credited against the expenditures shown on a warrant basis. It is necessary, therefore, to add back the amounts to expenditures by warrants In order to adjust to an actual cash basis.

## Pay warrant transactions

Funds requisitioned and advanced to United States disbursing officers by accountable warrants during the fiscal year ended June 30, 1927, amounted to $\$ 2,387,473,404$, and Treasurer's checks issued on settlement warrants in payment of claims settled by the Comptroller General of the United States amounted to $\$ 93,577,522.85$.

Accountable warrants were also issued to reimburse the Treasurer for the payment of public debt principal, interest, and premium amounting to $\$ 7,113,254,392.21$, and on account of a transfer to the gold reserve amounting to $\$ 1,231,834.78$. Details of these transactions are given below:

| Class | Accountable warrants |  | Treasurer's checks is sued on settiement warrants |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number | Amount | Number | Amount |
| Wer | 2, 282 | \$390, 597, 714.30 | 10,440 | \$14, 506, 896. 19 |
| Navy | 2, 172 | 320, 151, 564. 72 | 5,997 | 17, 522, 937. 49 |
| Indians. | 1, 525 | - 38, 137. 115.06 | 3, 634 | 1,261, 587. 05 |

| Total. | 24, 179 | 9, 501, 959, 630.99 | 61,481 | 93, 577, 522. 85 |

${ }^{1}$ Includes 5,406 warrants for $\$ 2,724,946.85$ paid by Treasurer's checks.

## Foreign exchange purchased

Included in the total amount of Treasurer's checks issued on settlement warrants given in the previous table is $\$ 63,331.93$, representing the cost of foreign drafts purchased during the fiscal year 1927 to pay claims settled in foreign currencies by the General Accounting Office. In addition, foreign drafts were purchased by this office for other departments and bureaus of the Government amounting to
$\$ 40,733.92$. The several kinds and amounts of currencies, with the total cost in dollars, are given in the following statement:

| Kinds of currencies purchased | For payment of claims settled in foreign currencies by the General Accounting Office |  | For other departments and bureaus of the Government |  |
| :---: | :---: | :---: | :---: | :---: |

| Total |  | 63, 331. 93 | -....... | 40,733.92 |

## Collection items

In order to facilitate the transaction of Government business and to conform to commercial usage, personal checks and drafts and postal and express money orders are received by the Treasurer, Federal reserve banks and branches, and general national-bank depositaries for credit of the Treasurer.

All checks and drafts received by any Government officer are received subject to collection, and in the event that any check or draft can not be collected or is lost or destroyed before collection appropriate action will be taken by the depositor in the same manner as if the check or draft had not been received. Such payments are not effective unless and until the check or draft has been actually collected and paid.

The class, number, and amount of collection items deposited with the Treasurer in Washington for the fiscal years 1926 and 1927 are shown in the following statement:

| Class | 1926 |  | 1927 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number | Amount | Number | Amount |
| Checks and drafts ${ }^{1}$ - | 562, 063 | \$322, 085, 747. 93 | 564, 344 | \$355, 645, 602. 18 |

| Net. | 3,591, 587 | 366, 420, 608. 95 | 3, 425,003 | 405, 616, 956.29 |

[^68]
## Checking accounts

Checks drawn on this office by Government disbursing officers were paid during the fiscal year 1927. to the number of $32,741,718$, an increase over the previous fiscal year of $2,433,095$ checks. Balances to the credit of disbursing officers and Government agencies in 3,334 accounts on June 30, 1927, amounted to $\$ 396,903,153.36$, an increase of $\$ 15,778,259.26$ over the total of such balances in 3,382 accounts on June 30, 1926. Wider use of checks for paying salaries, particularly in the case of postal employens in large cities, is responsible for the increased number of checks.

Payments to correct irregularities in negotiation of checks were made during the fiscal year 1927 to the number of 878 , amounting to $\$ 176,512.30$, while in the previous fiscal year the number of cases was 1,165 for $\$ 89,052.31$. Duplicate checks to the number of 10,924 were requested by payees or indorsees during the fiscal year 1927 as compared with 11,786 during the previous fiscal year, the original check in each case having been lost, stolen, or destroyed.

## Panama Canal

During the fiscal year 1927 the receipts from tolls, etc., for movement of tonnage through the Panama Canal amounted to $\$ 25,544,-$ 701.45 .

During the previous fiscal year the receipts amounted to $\$ 23,941,-$ 917.87, a net increase of $\$ 1,602,783.58$ for the fiscal year 1927.

Disbursements made on account of the canal, not including fortifications, on the basis of warrants drawn, not cash expenditures, amounted to $\$ 7,613,376.03$ for the fiscal year 1927 as against $\$ 8,419,-$ 333.57 for the fiscal year 1926, a net decrease of $\$ 805,957.54$.

## Payment of interest on the registered securities of the United States

Checks in payment of interest on registered obligations of the United States are prepared and issued by the division of loans and currency, office of the Secretary of the Treasury, and are drawn on the Treasurer of the United States. Each check indicates the loan for which it is issued and the annual rate of interest. Paid checks are charged by the Federal reserve banks and branches and general national-bank depositaries in their transcripts of the Treasurer's account. The total of such charges is included in the Treasurer's monthly requisition for reimbursement. After payment, the checks are forwarded to the Comptroller General of the United States. There were $3,463,510$ interest checks issued during the fiscal year 1927, amounting to $\$ 172,924,824.07$. The paid checks numbered $3,251,864$ and amounted to $\$ 172,815,579.74$.

## Payment of coupons from United States securities

Coupons from United States bonds, notes, certificates, etc., paid during the fiscal year 1927 numbered $37,200,698$ and amounted to $\$ 561,274,983.85$.

Receipts and expenditures on account of the Post Office Department
The postal receipts deposited in the Treasury and credited to the account of the Post Office Department during the fiscal year 1927 amounted to $\$ 683,754,924.75$. Other receipts amounting to
$\$ 554,526,523.90$ were received and disbursed by postmasters without being deposited in the Treasury. Such disbursements are authorized by law and are accounted for under the provisions of section 406 of the Revised Statutes of the United States.

All receipts and disbursements of the Post Office Department are under the exclusive control of the Postmaster General. All warrants are issued by him on the Treasurer of the United States, but are cashed by any Federal reserve bank or branch or any general national bank depositary of the United States.

The transactions relating to the account with the Treasury during the fiscal year 1927 are recorded in the following statement:

|  | Balance <br> June 30, 1920 | Fiscal year 1927 |  | Balance June 30, 1927 |
| :---: | :---: | :---: | :---: | :---: |

## Transactions in the public debt

Undor date of March 8, 1927, the Secretary of the Treasury announced an offering of $31 / 2$ per cent five-year Treasury notes, Series A-1930-1932 to be dated March 15, in exchange for second Liberty loan converted 41/4 per cent bonds of 1927-1942. Another offering was made on May 31 of an issue of $33 / 8$ per cent Treasury bonds of 1943-1947 to be dated June 15, in exchange for second Liberty loan 4 per cent or converted 41/4 per cent bonds of 1927-1942, and under date of June 16 the Secretary offered to purchase on June 28 a limited amount of such bonds then outstanding. Under these refunding operations and other purchases made, the amount outstanding had been reduced from $\$ 3,104,520,050$ on February 28, 1927, to approximately $\$ 1,276,000,000$ after taking into consideration accepted exchanges not cleared through the accounts.

The receipts and expenditures on account of the principal of the public debt for the fiscal years 1926 and 1927 are compared in the following statement:

| Account | 1926 | 1027 | Increase | Decrease |
| :---: | :---: | :---: | :---: | :---: |

## The general fund

Every receipt from whatever source and every expenditure of whatever nature affect either the assets or liabilities or both of this fund, and the total amount of the assets over and above the total amount of the liabilities represents the net balance in the general fund available to meet Government expenditures.

In the first part of the general fund are shown the amounts of each kind of available cash actually held in the vaults of Treasury offices after setting out from the assets the appropriate kinds of money to meet the requirements of the reserve fund, trust funds, and gold fund. Following the Treasury office assets are shown the amounts in Federal reserve banks, foreign depositaries, national-bank depositaries, and the treasury of the Philippine Islands to the credit of the Treasurer of the United States and to the credit of United States disbursing officers.

The second part of the general fund shows the current liabilities against the same followed by the net balance.

| In Treasury offices: Gold | \$158, 704, 029.52 |  |
| :---: | :---: | :---: |
| Standard silver dollars | 5, 179, 333.00 |  |
| United States notes. | 3, 230, 183.00 |  |
| Federal reserve notes | 210, 525.00 |  |
| Federal reserve bank no | 192, 906. 00 |  |
| National-bank notes. | 84, 154. 50 |  |
| Subsidiary silver coins | 5, 246, 728.97 |  |
| Minor coins. | 2, 885, 629.11 |  |
| Silver bullion (at cost) | 6, 921, 150. 42 |  |
| Unclassified (collections, etc.) | 1, 894, 701. 35 |  |
| In Federal reserve banks: |  | 184, 549,349.87 |

| In national-bank depositaries: |  |  |
| To credit of Treasurer of United States. | 7,069, 715. 69 |  |
| To credit of other Government officers. | 19, 760, 536. 44 |  |
| In transit. | 2, 353, 242. 28 |  |
| In foreign depositaries: |  | 29, 183, 494. 41 |
| To credit of Treasurer of United States. | 93, 159. 45 |  |
| To credit of other Government officers. | 418, 447.98 |  |
| In transit. | 495.00 |  |
| In treasury of Pbilippine Islands: |  |  |
| To credit of Treasurer of United States. | 486, 387. 66 |  |
| In transit | 114.90 |  |
|  |  | 486, 502. 56 |
|  |  | 450, 325, 167.98 |
| Deduct current liabilities: |  |  |
| Federal reserve note 5 per cent fund (gold) ............. \$139, 873, 094.78 |  |  |
| National-bank note 5 per cent fund..................... $26.299,861.14$ | 8 |  |
|  |  |  |
|  | 7, 355,599. 14 |  |
| Treasurer's checks outstanding.-. | 4, 197,638.06 |  |
| Post Office Department balance | 8, 839, 903. 94 |  |
| Board of trustees, Postal Savings system, balance | 7, 152, 609.32 |  |
| Balance to credit of postmasters, etc. .-...-..................... | 48, 695, 998.55 |  |
| Retirement of additional circulating notes (act of May 30, 1908) Uncollected items, exchanges, etc | 2, ${ }^{2,858,408.00}$ |  |
|  | 2, $38,108.7$ | 217, 727, 047. 50 |
| Balance in Treasury June 30, 1927. |  | と32, 598, 120.48 |

The net excess of all receipts over all disbursements during the fiscal year 1927, including public debt transactions, was $\$ 21,470,042.05$. This amount added to $\$ 211,128,078.43$, the balance in the Treasury on June 30, 1926, gives $\$ 232,598,120.48$, the balance in the Treasury on June 30, 1927.

## Net available cash balance

The net available cash balance represents the difference between the assets and liabilities in the general fund and is the working balance in the Treasury to meet Government expenditures.
The balance at the end of each month from July, 1924, is given in Table No. 6, page 704, and for June 30 of each year since 1918 in the following statement:

Available cash balance (exclusive of the reserve fund) on the dates named

|  | Date | A vailable cash balance, gederal rund |
| :---: | :---: | :---: |
| June 30- |  |  |
| 1918. |  | \$1,684, 929,580. 21 |
| 1919. |  | 1, 226, 164, 935. 26 |
| 1920. |  | $359,947,020.33$ $532,898,329.77$ |
| 1922 |  | 264, 126, 935. 85 |
| 1923 |  | .369,886, 816.03 |
| 1924. |  | 238,029,514.74 |
| 1926 |  | 219,979,440.82 |
| 1927. |  | 232, 598, 120.48 |

## The gold reserve fund

The gold reserve represents a legal amount set aside out of the gold :assets of the Government to pay United States notes (greenbacks) and Treasury notes of 1890 when presented for redemption. United States notes presented are paid out of the reserve when gold is requested and the reserve is immediately replenished from the gold in the general fund, after which the notes are reissued in order to keep the full amount outstanding as required by law.

The act of March 14, 1900, fixed the amount of the gold reserve at $\$ 150,000,000$. The act of May 30, 1908, known as the AldrichVreeland Emergency Currency Act, provided that taxes received from national-bank circulation secured otherwise than by United States bonds should be credited to the reserve fund for the redemption of United States notes. Also the Federal reserve act, as amended, and the Federal intermediate credit bank act provide that the net earnings of such banks after the payment of necessary expenses, dividends, etc., shall be paid to the United States as a franchise tax and may be used, in the discretion of the Secretary of the Treasury, to supplement the gold reserve. Under provisions of these acts the gold reserve has been materially increased. The increase for the fiscal year 1927 amounted to $\$ 1,231,834.78$, making the gold reserve on June 30, 1927, \$155,420,720.98.

## Gold fund, Federal Reserve Board

The amount of this fund represents the gold held by the Treasurer of the United States in the name of the Federal Reserve Board for account of the Federal reserve banks and agents. The Federal reserve banks' holdings are used largely as a clearance fund for making daily settlements between them.

The balance to the credit of this fund on June 30, 1926, was $\$ 1,717,348,235.12$. During the fiscal year 1927 deposits made therein amounted to $\$ 1,267,151,059.74$ and withdrawals therefrom amounted to $\$ 1,272,496,358.94$, leaving a balance to the credit of the fund on June 30, 1927, of $\$ 1,712,002,935.92$.

## Gold in the Treasury

There was a slight decline in the gold holdings of the Treasury during the fiscal year 1927. The amount on June 30, 1926, as shown by daily Treasury statements revised, was $\$ 3,713,832,294.02$, and on June 30, 1927, $\$ 3,651,406,435.42$, a net decrease of $\$ 62,425,858.60$.

The imports of gold during the fiscal year were $\$ 251,756,004$ and the exports $\$ 103,843,669$.

The total amount of gold in the Treasury on June 30, in each vear from 1918, set apart for the respective uses, is given in the following statement:

Gold in the Treasury

| Date | Reserve | For certificates in circulation | Gold fund, Federal Reserve Board | General fund (including gold redemption fund for Federal reserve notes) | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| June 30- |  |  |  |  |  |

Securities held in trust
The Treasurer is custodian of United States bonds pledged as security for the circulating notes of national banks, of securities pledged for the safe-keeping and prompt payment of Government deposits in national-bank depositaries of public moneys, and of postal savings funds placed in depositaries designated to receive such funds.

The amounts and kinds of securities held for the above-mentioned purposes and the changes therein during the fiscal year 1927 are recorded in the following tables:

Securities held, for national banks June 30, 1926, and June 30, 1927, and changes during 1927

${ }^{2}$ Various.

## Withdrawal of bonds to secure circulation

National banks did not file with the Treasurer of the United States any applications to sell for their account United States bonds securing circulation during the fiscal year 1927 under the provisions of section 18 of the Federal reserve act.

## Postal savings bonds and investments therein

Under a general authority in the postal savings law (act of June 25, 1910, as amended) the trustees of the Postal Savings System have taken over postal savings bonds from bondholders that wished to turn them back. The Treasurer of the United States held $\$ 10,325,140$ of such bonds at the close of the fiscal year 1927.

## Special trust funds

The Treasurer of the United States is custodian, under provisions of law or by direction of the Secretary of the Treasury, of various trust funds comprised of bonds and other obligations and of securities placed in safe-keeping by various Government executive departments and bureaus.
The kinds and amounts of obligations held in each account and the transactions therein during the fiscal year 1927 are shown in the following statement:

| Account and kinds | $\underset{1926}{\text { Held June } 30,}$ | Fiscal year 1927 |  | $\text { Held June } 30 \text {, }$ |

## Depositaries of the United States

The Secretary of the Treasury determines the number of such depositaries and the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them and for the faithful performance of their duties as financial agents of the Government. All of the depositaries, except the Federal reserve banks, are required to pay interest at the rate of 2 per cent per annum on the average monthly amount of public deposits held.

The number of depositary banks holding balances at the close of the fiscal years 1926 and 1927 are here stated:

|  | $\begin{gathered} \text { June } 30, \\ 1926 \end{gathered}$ | $\begin{gathered} \text { June } 30, \\ 1927 \end{gathered}$ |
| :---: | :---: | :---: |
| Federal reserve banks. | 12 | 12 |
| General national-bank depositaries | 311 | 321 |

Interest on public moneys held by depositary banks
Interest is collected semiannually from depositaries of public moneys (except Federal reserve banks) at the rate of 2 per cent per annum on the basis of 181 days to the half year from January 1 to. June 30 (first half of leap year, 182 days) and 184 days from July 1 to December 31. Each depositary is required to render to the Treasurer semiannually (January 1 and July 1) an interest report showing daily balances held by such bank for the prior six months and the amount

$$
64761-\mathrm{FI} 1927-45
$$

of interest due and paid thereon. These reports are checked with the ledgers of this office.

Interest was first collected by the department under the provisions of the act of May 30, 1908, on all special and additional deposits in general depositaries and on all deposits in limited depositaries at the rate of 1 per cent per annum. In accordance with instructions contained in letter of the Secretary of the Treasury, dated April 22, 1912, the rate of interest was increased from 1 per cent to 2 per cent per annum, beginning July 1, 1912. Beginning June 1, 1913, interest at the rate of 2 per cent per annum has been collected on all Government deposits.

During the fiscal year 1927 the interest accrued on ordinary balances held was $\$ 520,421.69$, and on balances arising from sales of bonds, notes, and certificates of indebtedness was $\$ 4,212,265.07$, making a total of $\$ 4,732,686.76$. The total amount of interest accrued on depositary balances since May 30, 1908, may be studied from the revised statement following:

## Restoration of depositary balances

Whenever balances to the credit of the Treasurer of the United States in general national-bank and insular depositaries, including the treasury of the Philippine Islands, are reduced below the amounts fixed by the Secretary of the Treasury, by the cashing of Government checks and warrants, restorations are immediately made by telegraph directing the appropriate Federal reserve bank or branch to credit the depositary bank's reserve account or to make payment to its correspondent.
During the last three fiscal years such restorations have been as follows:

|  | Fiscal year | Number | Amount |
| :---: | :---: | :---: | :---: |
| 1925 |  | 3,734 | \$126, 139, 206 |
| 1926. |  | 3,727 | 122, 519, 401 |
| 1927. |  | 3,773 | 121, 539,768 |

## Coin shipments

During the fiscal year 1927 the Treasurer's office authorized and directed shipments or transfers of current gold, silver, and minor coins between the Treasury, Washington, United States mints, United States Assay Office, New York, and Federal reserve banks and branches, for use in public disbursements and exchanges and also for special purposes, aggregating $\$ 41,710,429.50$, and shipments of uncurrent gold, silver, and minor coins to United States mints from the Treasury, Washington, and Federal reserve banks and branches to the amount of $\$ 8,900,132.01$. Transfers of gold bars against payments in gold fund checks were also authorized from the Assay Office, New York, to the Federal Reserve Bank of New York amounting to $\$ 190,027,308.94$. Statements covering the coin shipments or transfers are as follows:

| Kind | Treasury, Washington |  | United States mints and Assay Office, New York |  | Miscellaneous |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Sbipped to Federal reserve banks and branches | Received from Federal reserve banks and branches | Shipped to Treasury, Washington, and to Federal reserve banks and branches | Received from Treasury, Washington, and from Federal reserve banks and branches | Shipments between Federal reserve banks and branches |

| Total |  |  |  | 8,900, 132.01 |  |

${ }^{1}$ Includes light-weight at bullion value.

## Recoinage of gold, silver, and minor coins

Quantities of worn gold, silver, and minor coins which are unfit for further circulation are returned to the mints each year by the Treasury and Federal reserve banks and branches for recoinage. Funds in limited amounts are appropriated annually to cover the loss on light-weight and uncurrent gold and uncurrent minor coins so recoined, the amounts for each of the fiscal years 1926 and 1927 being $\$ 3,000$ for gold and $\$ 15,000$ for minor. The appropriation covering the loss on remelting uncurrent subsidiary silver coins is unlimited, as provided by the act of March 14, 1900. Uncurrent silver dollars are not remelted except under special acts of Congress.

The face value of such coins remelted and the loss thereon during the fiscal years 1926 and 1927 are given in the following statement:

| Denominations |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |

Note--Gains on light-weight gold coins were covered into the Treasury as miscellaneous receipts during the fiscal years 1926 and 1927 amounting to $\$ 19.91$ and $\$ 86.37$, respectively.

## Shipments of paper currency from Washington

The shipments of United States paper currency from the Treasury in Washington to Treasury offices, Federal reserve banks, and other banks during the fiscal year 1927 amounted to $\$ 1,345,635,218$, a decrease of $\$ 177,143,639$ as compared with that of the fiscal year 1926.

The shipments for the past two fiscal years are compared in the following statement:

|  | Fiscal year 1926 |  | Fiscal year 1927 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number of packages | Total amount | Number of packages | Total amount. |
| Total by express.-.-.-2- Total by registered mail | $\begin{array}{r} 31 \\ 158,241 \end{array}$ | $\begin{array}{r} \$ 6,342 \\ 1,522,772,515 \end{array}$ | $\begin{array}{r} 65 \\ 154,632 \end{array}$ | $\begin{array}{r} \$ 13,200 \\ 1,345,622,018 \end{array}$ |
| Aggregate... | 158, 272 | 1,522, 778, 857 | 154,697 | 1,345, 635, 218 |

## Purchases of gold bullion at the mints and assay offices

The mints and assay offices are prepared at all times to purchase gold bullion and issue in payment therefor gold checks drawn on the Treasurer of the United States. These checks are payable on demand of the payees in gold coin or gold bars, but payment is usually made through the Treasurer's account with the Federal reserve banks and branches. Light-weight and uncurrent gold coins sent to the several
mints for recoinage are melted and included in the bullion given in the following statement:

| Office | 1925 | 1826 | 1827 |
| :---: | :---: | :---: | :---: |
| Pbiladelphia | \$10, 453, 302.36 | \$8, 882, 666; 89 | \$13, 116, 452.49 |
| San Francisco | 34, 357, 534. 18 | 34, 636, 103. 92 | 92, 619, 038. 53 |

| New York. | 137, 327, 679.27 | 126, 360, 398.44 | 98, 374, 393. 97 |
| New Orleans | 559, 014.04 | 456, 886. 72 | 1, 145, 541.25 |
| Carson. | 202, 545.72 | 284, 183. 54 | 153,096. 28 |
| Helena | 318,878. 59 | 295, 739.98 | 254, 796.01 |
| Boise. | 223, 411. 74 | 164, 821.75 | 138, 196.91 |
| Deadwood | -1,271. 03 | 547. 25 | 1, 101.46 |
| Seattle. | 5, 755, 478.90 | 7, 376, 912.10 | 6, 151, 292. 15 |
| Salt Lake City | 110, 127.95 | 57, 374. 47 | 26, 373. 04 |
| Total. | 199, 372, 228. 43 | 187, 157, 377. 44 | 226,951, 571. 45 |

## Redemption of Federal reserve and national currency

The proceeds of currency counted into its cash by the National Bank Redemption Agency during the fiscal year amounted to $\$ 522,596,266.57$. Of this sum $\$ 503,680,969.50$ was in national-bank notes, $\$ 917,073$ in Federal reserve bank notes, $\$ 17,828,962.50$ in Federal reserve notes, and $\$ 169,261.57$ in United States currency. Comparative figures as to total redemptions in this and previous years are contained in Table No. 26, page 720.
Payments for currency redeemed were made as follows: In Treasurer's checks, $\$ 391,135.65$; by bank credits for direct receipts in Treasurer's office, $\$ 22,780,939$; by credits to Federal reserve banks and branches in general account as transfers of funds, for direct remittances, $\$ 497,920,591$, and for remittances by member banks, $\$ 1,499,044.92$; by credits in other accounts, $\$ 4,556$.

The notes of all issues counted and assorted amounted to $\$ 1,891,-$ $880,562.50$, and were disposed of as follows:

|  | Amount | Per cent |
| :---: | :---: | :---: |
| National-bank notes: Unfit for use delivered to the Comptroller of the Currency for- |  |  |
| Destruction and reissicie. <br> Destruction and retirement | $\begin{array}{r} \$ 475,227,847.50 \\ 27,203,100.00 \end{array}$ | 94.69 5.41 |
| Federal reserve bank notes Unfit for use delivered to the | 502, 430,947. 50 | 100.00 |
| Currency for destruction and retirement | 858,910.00 |  |
| Federal reserve: notes: Unfit for use delivered to the Comptroller of the Currency for destructions | 17, 955, 005.00 |  |
| Federal reserve notes, canceled and uncanceled, forwarded by Federal reserve banks and branches: Delivered to the Comptroller of the Currency for destruction | 1,370, 635, 100.00 |  |

Canceled and uncanceled Federal reserve notes amounting to $\$ 1,370,635,100$ were received from Federal reserve banks and branch Federal reserve banks for credit of Federal reserve agents. Such notes are settled for between the Federal reserve banks and Federal reserve agents either direct or by adjustments in their redemption funds, and are, therefore, not taken into the cash of the National Bank Redemption Agency.

The number of notes counted, sorted, and delivered by the agency during the fiscal year was $211,056,618$, detail of which is shown in Table No. 37, page 726.
The cost of redemption for the fiscal year, including salaries, transportation, and contingent expenses, is set forth in Table No. 31, page 722.

## Trust fund certificates outstanding

In explanation of the amounts of gold certificates and silver certificates shown as outstanding in the several statements and tables of this report and also in connection with the manner of issuing and redeeming such certificates the following brief statement is given:

For certificates issued and credited in the general account an equal amount of the respective kinds of money held in the general account is transferred therefrom to, and retained in, the trust funds for their redemption. For certificates withdrawn from the general fund, canceled, and retired on account of being unfit for further circulation a like amount is released from the trust funds and brought into the general fund in their stead.

The gold and silver certificates appearing in the subsequent tables in this report include certificates issued and held in the Treasury offices, the greater part of which has been in circulation but is subject to release only on specific authorizations of the Treasurer. They are fit for further circulation and for that reason have not been actually redeemed so as to reduce the amount outstanding. The amounts so held on June 30, 1927, were: Gold certificates, $\$ 477,710,860$; and silver certificates, \$2,806,163.

## United States notes

These notes, commonly known as "greenbacks" or "legal tenders," are redeemable in gold on demand. They were first issued under authority of the act of February 25, 1862, and comprise a part of the noninterest-bearing debt of the United States. Later acts authorized additional issues, and the highest amount outstanding at any time was $\$ 449,338,902$ on January $30,1864$.

This amount was gradually being reduced by canceling and retiring the notes as they were received in the Treasury until the process was stopped by the act of May 31, 1878, which required that the notes be reissued when redeemed. At that time the amount outstanding was $\$ 346,681,016$ and it has not been changed since.

## Gold certificates

These certificates are receipts for gold held in the Treasury and are redeemable in gold coin. They were first issued under authority of the act of March 3, 1863, which authorized the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than $\$ 20$ and to issue certificates therefor in denominations not less than $\$ 20$. Subsequent acts have made material changes in this procedure. Such certificates are now issued in denominations as low as $\$ 10$ and there is no limit to the amount that may be issued, except as controlled by the amount of gold coin and gold bullion owned by the Government not otherwise obligated. Of the gold held against these certificates an amount equal to at least one-third of the certicates outstanding must be in the form of gold coins.

## Silver certificates

These certificates are receipts for deposits of standard silver dollars in the Treasury and are redeemable in such dollars only. They were first authorized by the act of February 28, 1878, which provided that any holder of silver dollars might deposit them in sums of not less than $\$ 10$ with the Treasurer or any assistant treasurer of the United States and receive certificates therefor in denominations of not less than $\$ 10$. Subsequent acts have made material changes in this procedure. These certificates are now limited principally to the smaller denominations.

## Onited States paper currency, by denominations, held in reserve

United States notes, gold certificates, and silver certificates are received from the Bureau of Engraving and Printing and held in the reserve vault of this office until needed for issue.

The number of pieces and amount of each denomination held in reserve at the close of the fiscal years 1926 and 1927 are shown in the following statement:

| Denomination | Held June 30, 1926 |  | Held June 30, 1927 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number of pieces | Total value | Number of pieces | Total value |
| One dollar | 56, 176, 000 | \$56, 176, 000 | 137, 936, 000 | \$137, 936,000 |
| Two dollars | 6, 660,000 | 13, 320, 000 | 20, 500, 000 | 41,000,000 |

## The stock of metallic money in the United States

Gold coin and bullion.-The estimated amount of gold coin and bullion included in the general stock of money in the United States on June 30, 1927, was $\$ 4,565,098,136$, of which there was held in the Treasury $\$ 3,651,406,436$, and the balance outside of the Treasury was $\$ 913,691,700$.

Standard silver dollars.-The stock of standard silver dollars at the close of the fiscal year 1927 was $\$ 537,944,446$, of which $\$ 476,106,037$ was held in the Treasury, and the balance outside of the Treasury was $\$ 61,838,409$.

Subsidiary silver coin.--The stock of subsidiary silver coin at the close of the fiscal year 1927 was $\$ 295,589,859$, of which $\$ 5,246,729$ was held in the Treasury, and the balance outside of the Treasury was $\$ 290,343,130$.

Minor coin.-The current minor coins are the bronze 1-cent pieces and the nickel 5 -cent pieces, and though not included in the stated stock of money in the country they are in great demand in all sections. The amount of each denomination of the current coins outstanding at the close of the fiscal year 1927 was as follows:

Legal tender qualities of Dnited States currency

## LEGAL TENDER

Definition of the term "legal tender."-"Money of a character which by law a debtor may require his creditor to receive in payment, in the absence of any agreement in the contract or obligation itself." Bouvier's Law Dictionary.

Gold coins.-The gold coins of the United States are a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided by law for the single piece, and, when reduced in weight below such standard and tolerance, are a legal tender at valuation in proportion to their actual weight.Act of Feb. 12, 1873, 17 Stat., p. 426 ; R. S. sec. 3585.

Standard silver dollars are a legal tender at their nominal value for all debts and dues, public and private, except where otherwise expressly stipulated in the contract.-Act of Feb. 28, 1878, 20 Stat., p. 25.

Subsidiary silver coin.-The silver coins of the United States of smaller denominations than $\$ 1$ are a legal tender in all sums not exceeding $\$ 10$, in full payment of all dues, public and private.Act of June 9, 1879, 21 Stat., p. 457.

Minor coin (coins of copper, bronze, or copper-nickel).-Minor coins are a legal tender at their nominal value for any amount not exceeding 25 cents in any one payment.-Act of Feb. 12, 1873, 17 Stat., p. 426.

Onited States notes (known as legal tender notes, or "green-backs").-They are a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt.-Act of Mar. 3, 1863, 12 Stat., p. 711; R. S. sec. 3588.

Legal tender cases: Against constitutionality, Hepburn $\nabla$. Griswold (8 Wall., 603).
For constitutionality, Knox v. Lee (12 Wall., 457); Parker v. Davis (12 Wall., 559).

Gold certificates are a legal tender in payment of all debts and dues, public and private.-Act of Dec. 24, 1919, 41 Stat., p. 370.

Demand Treasury notes authorized by the act of July 17, 1861 (12 Stat., p. 259), and the act of February 12, 1862 (12 Stat., p. 338), are lawful money and a legal tender in like manner as United States notes.-R. S. sec. 3589.

One and two year notes of 1863.-These notes, redeemable one year from date and two years from date, bearing interest at 5 per cent per annum, are a legal tender for their face value, exclusive of in-terest.-Act of Mar. 3, 1863, 12 Stat., p. 710.

Compound interest notes.-These notes were payable at any time after three years from date, and bearing interest not exceeding $7 \frac{3}{10}$ per cent, payable in lawful money at maturity, or, at the discretion of the Secretary of the Treasury, semiannually; and such of them as should be made payable, principal and interest, at maturity, to be a legal tender to the same extent as United States notes for their face value, excluding interest.-Act of June 30, 1864, 13 Stat., p. 218.

Treasury notes of 1890 are a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and are receivable for customs, taxes, and all public dues.-Act of July 14, 1890, 26 Stat., p. 289.

Columbian half dollars are a legal tender to the same extent as subsidiary silver coin, i. e., $\$ 10$ in any one payment.-Act of Aug. 5, 1892, 27 Stat., p. 389.

Columbian quarters are a legal tender to the same extent as subsidiary silver coin, i. e., $\$ 10$ in any one payment.-Act of Mar. 3, 1893, 27 Stat., p. 586.

## NOT LEGAL TENDER

Silver certificates are not a legal tender. They are receivable for customs, taxes, and all public dues.-Act of Feb. 28, 1878, 20 Stat., p. 25.

National-bank notes are not a legal tender. They are receivable at par in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except duties on imports; and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt, and in redemption of the national currency.-Act of June 3, 1864, 13 Stat., p. 106; R. S. sec. 5182.

Trade dollars are not a legal tender. By the act of February 12, 1873 ( 17 Stat., p. 424 ), they were a legal tender at their nominal value for any amount not exceeding $\$ 5$ in any one payment, but under date of July 22, 1876 (19 Stat., p. 215), it was enacted that the trade dollar should not thereafter be a legal tender.

Fractional currency is not a legal tender. Note: It was receivable for postage and revenue stamps, and also in payment of any dues to
the United States less than $\$ 5$, except duties on imports.-Act of Mar. 3, 1863, 12 Stat., p. 711.

Foreign gold coins are not a legal tender in payment of debts.-Act of Feb. 21, 1857, 11 Stat., p. 163; R. S. sec. 3584.

Foreign silver coins are not a legal tender in payment of debts.-Act of Feb. 21, 1857, 11 Stat., p. 163; R. S. sec. 3584.

Continental currency.-The question has been raised and disputed as to whether what was called the "continental currency," issued during the War of the Revolution by the old Government, was or was not legal tender. The facts appear to be that while the Continental Congress did not by any ordinance attempt to give it that character, they asked the States to do so, and all seemed to have complied except Rhode Island. The Continental Congress only enacted that the man who refused to take the money should be deemed an enemy of his country. ("The National Loans," by Rafael A. Bayley, Treasury Department; prepared for the Tenth Census.)

Federal reserve notes are not legal tender, but are receivable by the Government for all public dues and are receivable on all accounts by all Federal reserve banks, national banks, and other bank members of the Federal reserve system. They are redeemable in gold coin of the United States by the Treasurer and in gold or lawful money by any Federal reserve bank.-Act of Dec. 23, 1913, 38 Stat., p. 265.

Federal reserve bank notes are identical in all their attributes with national-bank notes.-Act of Dec. 23, 1913, 38 Stat., p. 267.

## Issue, exchange, and redemption of paper currency and coin

The following regulations govern the issue, exchange and redemption of the paper currency and the gold, silver, and minor coins of the United States, and the redemption of national-bank notes, Federal reserve bank notes, and Federal reserve notes. Under authorization in the act approved May 29, 1920, the Secretary of the Treasury transferred to the Federal reserve banks and branches the duties and functions performed by the former Assistant Treasurers of the United States in connection with the issue, exchange, and redemption or replacement of United States paper currency and coin and the receipt for redemption of national-bank notes and Federal reserve bank notes. Except for the duties in this respect to be performed by the Treasurer of the United States as may be indicated from time to time by the Secretary of the Treasury, distribution of available supplies of United States paper currency and coin, exchanges and replacement thereof, and payments on account of redemptions of currency and coin will, so far as practicable, be effected through the Federal reserve banks and branches. Federal reserve banks and branches have been instructed by the Treasury to make an equitable and impartial distribution of available supplies of United States paper currency and coin in all cases, and applications therefor should be made to the Federal reserve bank or branch of such bank located in the same district with the applicant. Distribution of new gold, silver, and minor coins will not be made so long as there are available sufficient stocks of circulated coins in the Federal reserve banks and branches or in the Treasury offices.

## I.-ISSUE OF UNITED STATES PAPER CURRENCY

1. All current issues of new United States paper currency are made by the Treasurer of the United States in the form of United States notes, gold certificates, and silver certificates.
2. United States notes are issued in value equal to the unfit notes destroyed in order not to reduce the amount outstanding below the figure fixed by law.
3. Gold certificates are issued against desposits of gold coin with the Treasurer of the United States, deposits of gold bullion or foreign gold coin with the mints and assay offices, or against transfers to trust funds of available gold in the general fund of the Treasury. Gold certificates may be obtained in payment of obligations of the United States payable in gold, in payment of checks issued by the mints and assay offices of the United States for deposits of gold bullion and foreign gold coin, in exchange for other forms of United States paper currency, or in the ordinary course of Government payments when paid out by the Treasurer of the United States or the Federal reserve banks.
4. Silver certificates are issued against deposits of standard silver dollars or against transfers to trust funds of available silver dollars in the general fund of the Treasury, and may be obtained in exchange for other forms of United States paper currency or in the ordinary course of Government payments, when available.
II.-ISSUE OF GOLD COIN
5. Gold coins are issued for deposits of gold bullion, in redemption, of gold certificates, United States notes, or Treasury notes of 1890, and in payment of other obligations of the United States payable in gold.

> III.-ISSUE OF STANDARD SILVER DOLLARS, SUBSIDIARY SILVER COIN, AND MINOR COIN
6. Standard silver dollars are issued in redemption of silver certificates or Treasury notes of 1890 . Subsidiary silver coins (halves, quarters, and dimes) and minor coins (1-cent bronze and 5 -cent nickel) are issued against other forms of payments therefor in equal amounts.

## IV.-REDEMPTION OF PAPER CURRENCY

7. United States notes and gold certificates are redeemable in gold coin; Treasury notes of 1890 in gold coin or standard silver dollars; and silver certificates in standard silver dollars.
8. National-bank notes and Federal reserve bank notes are redeemable in lawful money of the United States by the Treasurer of the United States, but payments therefor in lawful money may be effected through the Federal reserve banks and branches. Federal reserve banks and branches will also receiye national-bank notes and Federal reserve bank notes unfit for further circulation, and will make payment therefor in other forms of money, or by credit.
9. Federal reserve notes are redeemable in gold by the Treasurer of the United States, and in gold or lawful money at any Federal reserve bank.
10. United States notes, Treasury notes of 1890, fractional currency notes, gold certificates, silver certificates, national-bank notes, Federal reserve bank notes, and Federal reserve notes, when not so mutilated that less than three-fifths of the original proportions remain, will be redeemed at their face value. When so mutilated that less than three-fifths, but clearly more than two-fifths of the original proportions remain, they are redeemable only by the Trea urer of the United States, at one-half the face value of the whole note or certificate, but they may be redeemed at face value upon compliance with the provisions of paragraph 11 hereof. Fragments not clearly more than two-fifths are not redeemable, unless accompanied by the evidence required in paragraph 11.
11. Fragments less than three-fifths are redeemable at the face value of the whole note, only by the Treasurer of the United States, when accompanied by satisfactory proof that the missing portions have been totally destroyed. This proof should be in the form of an affidavit from the owner setting forth that he is the owner and the cause and manner of destruction. If, however, the owner can not of his own knowledge state the facts as to destruction; an affidavit or affidavits from any other person or persons having knowledge of the facts will also be required. The affidavits must be subscribed and sworn to before a notary public or other officer authorized by law to administer oaths. Unless authenticated by the official impression seal of the officer, the affidavit should be accompanied by a certificate from the proper official, showing that the officer was in commission on the date of the acknowledgment. The date when the officer's commission expires should appear in any event. Should any affiant sign by mark (X), his signature must be witnessed by two persons besides the acknowledging officer, and the places of residence of the witnesses to the mark must be stated. In addition to the affidavits, there should be furnished a certificate, to be executed, if possible, by an officer of an incorporated bank or trust company or by a public officer of the United States, setting forth that that officer has read the affidavits and that the affiants are reputable persons in the community and are, in the judgment of the officer, worthy of belief. Blank forms for affidavits or certificates are not furnished. No relief is granted on account of currency totally destroyed. The Treasurer of the United States will exercise such discretion under this regulation as may seem to him needful to protect the United States from fraud. The making or presenting of any jalse or fraudulent affidavit to be used in the prosecution of any claim against the Government is a criminal offense under section 35 of the Penal Code of the United States.
V.-REDEMPTION, EXCHANGE, AND PURCHASE OF UNITED STATES COIN
12. Foreign coins.-No foreign coins will be received for redemption or exchange under these regulations, but foreign gold coins will be purchased by the mints and assay offices in quantities of $\$ 100$ and over.
13. Gold coins.-Gold coins of the United States, when not mutilated as hereinafter defined, are full legal tender at face value if not
below the standard weight and limit of tolerance provided by law for the single piece. If not mutilated but reduced in weight by natural abrasion not more than one-half of 1 per cent below the standard weight prescribed by law, after a circulation of 20 years, as shown by the date of coinage, and at a ratable proportion for any period less than 20 years, they shall be received at their nominal or face value. Such coins may be exchanged at face value for gold certificates or other forms of money at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When not mutilated but reduced in weight by natural abrasion below the least current weight after 20 years' wear, or ratable proportion thereof (standard weight less the legal limit of abrasion), gold coins shall be a legal tender at valuation in proportion to their actual weight, and will be accepted by the Federal reserve banks and branches and by the Treasurer of the United States at bullion value; the abrasion loss being determined by deduction from the face value of each coin at the rate of 2 cents for each half grain below standard weight. No light-weight gold coin will be returned except upon request by the owner, in which event it will be stamped with the letter " $L$ " or other distinguishing mark. Mutilated gold coins of any denomination will be accepted at any of the mints or assay offices of the United States at bullion value; the value of the fine gold contained will be paid to the depositor at the rate of $\$ 20.67+$ per ounce, fine ( 1.000 ); or $\$ 18.60+$ per ounce, standard ( 0.900 ). Mutilated gold coins should be transmitted to the mints or assay offices by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
14. Standard silver dollars.-Standard silver dollars, when not mutilated as hereinafter defined, are full legal tender. They may be exchanged at face value for other forms of money at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When rejected as mutilated, they will be stamped by the receiving officer with a distinguishing mark before being returned to the owner. Mutilated standard silver dollars will be -purchased at the mints in Philadelphia, San Francisco, and Denver, and the United States Assay Office in New York City, at the price fixed from time to time by the Director of the Mint, which is approximately the market price of silver bullion on the date purchased, and should be transmitted to the mints, or the assay office at New York, by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
15. Subsidiary silver coins.-Subsidiary silver coins (halves, quarters, and dimes), when not mutilated as hereinafter defined, will, upon demand, be redeemed in lawful money or exchanged for other forms of money at face value, at the Federal reserve banks and branches and at the office of the Treasurer of the United States. When rejected as mutilated, such coins will be stamped by the receiving officer with a distinguishing mark before they are returned to the depositor. Mutilated subsidiary silver coins will be purchased at the mints in Philadelphia, San Francisco, and Denver, and the United States Assay Office in New York City, at the price fixed from time to time by the Director of the Mint, which is approximately the market price of silver bullion on the date purchased, and
should be transmitted to the mints, or the assay office at New York, by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
16. Minor coins.-Minor coins (one-cent bronze and five-cent nickel), when not mutilated as hereinafter defined, will, upon demand, be redeemed in lawful money or exchanged for other forms of money at face value, at the Federal reserve banks and branches and at the office of the Treasurer of the United States. Mutilated minor coins will be purchased at the mints in Philadelphia, San Francisco, and Denver, in lots of not less than one pound of each kind, at a price (the approximate value as metal) fixed from time to time by the Director of the Mint, and should be transmitted to the mints by registered mail or by express (charges prepaid). Payment therefor will be made by check drawn on the Treasurer of the United States.
17. Mutilated coins.-Mutilated coins are not accepted at their face value but at their bullion value. Gold coins are mutilated when so punched, clipped, chipped, or otherwise defaced as to result in any loss of metal. Silver coins are mutilated when so punched, clipped, chipped, or otherwise mutilated, as to be appreciably reduced in weight, or when so defaced as to be not readily and clearly identified as to genuineness and denomination. Minor coins are mutilated when so defaced as not to be readily identified, or when so punched or clipped or otherwise mutilated as to show a material loss of metal. Silver or minor coins that are bent or twisted out of shape, but showing no appreciable or material loss of metal, respectively, are not regarded as mutilated, and will be received at face value. The fraudulent defacement or mutilation of United States coins is a criminal offense under section 165 of the Penal Code of the United States, and a fine of not more than $\$ 2,000$ and imprisonment for not more than five years is prescribed for such an offense. Mutilated coins should not be transmitted to the Federal reserve banks or branches or to the Treasurer of the United States, but should be forwarded to the mints, or as otherwise hereinabove provided, for sale as bullion.
18. Shipments of coins.-Coins forwarded for redemption or exchange or for sale as bullion must be shipped at the expense and risk of the owner. The Treasurer of the United States will not accept shipments of subsidiary silver or minor coins for redemption unless assorted by denomination into packages in sums or multiples of $\$ 20$. Not more than $\$ 1,000$ in any silver coin, $\$ 300$ in five-cent pieces', or $\$ 100$ in cents, should be shipped in one bag or package.

## VI.—GENERAL INFORMATION

19. By taking advantage of the facilities provided at the Federal reserve banks and branches for the distribution, replacement, exchange, and redemption of paper currency and coin, applicants are enabled to have such transactions effected within a shorter time and at a lower cost for transportation charges, as a general rule, than would be possible through the Treasurer of the United States at Washington. So far as practicable, therefore, such transactions should be handled through the Federal reserve banks and branches.

The Federal reserve banks and branches are located in Boston, Mass.; New York, N. Y.; Buffalo, N. Y.; Philadelphia, Pa.; Cleve-
land, Ohio; Cincinnati, Ohio; Pittsburgh, Pa.; Richmond, Va.; Baltimore, Md.; Atlanta, Ga.; New Orleans, La.; Jacksonville, Fla.; Birmingham, Ala.; Nashville, Tenn.; Chicago, Ill.; Detroit, Mich.; St. Louis, Mo.; Louisville, Ky.; Memphis, Tenn.; Little Rock, Ark.; Minneapolis, Minn.; Helena, Mont.; Kansas City, Mo.; Omaha, Nebr.; Denver, Colo.; Oklahoma City, Okla.; Dallas, Tex.; El Paso, Tex.; Houston, Tex.; San Francisco, Calif.; Los Angeles, Calif.; Portland, Oreg.; Salt Lake City, Utah; Seattle, Wash.; and Spokane, Wash.

The coinage mints are located in Philadelphia, Pa.; San Francisco, Calif.; and Denver, Colo. The assay offices are located in New York, N. Y.; New Orleans, La.; Carson City, Nev.; Boise, Idaho; Helena, Mont.; Deadwood, S. Dak.; Seattle, Wash.; and Salt Lake City, Utah.
20. The act of Júne 30, 1876 (19 Stat. 64), requires that all United States officers charged with the receipt or disbursement of public moneys, and all officers of national banks shall stamp or write in plain letters the word "counterfeit," "altered," or "worthless"" upon all fraudulent notes issued in the form of and intended to circulate as money which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States or of the national banks, they shall, upon presentation, redeem such notes at their face value.
21. All counterfeit notes and coins found in remittances are canceled and delivered to the Secret Service Division of the Treasury Department or to the nearest local office of that division, a receipt. for the same being forwarded to the sender. Communications with respect thereto should be addressed to the Chief, Secret Service Division, Treasury Department, Washington, D. C.

## General account of the Treasurer of the United States

The Tressurer of the United States, as custodian of the public funds, receives and accounts for all moneys coming into the Treasury. Funds are paid out of the Treasury by the Treasurer upon authority of warrants drawn by the Secretary of the Treasury and countersigned by the Comptroller General of the United States. The Treasurer renders appropriate receipts for all moneys coming intohis possession, which receipts are indorsed upon warrants signed by the Secretary of the Treasury, without which warrants so signed, no acknowledgment for moneys received into the Public Treasury is valid. He renders his accounts quarterly or oftener when required and at all times submits to the Secretary of the Treasury and the Comptroller General or either of them, the inspection of the moneys in his custody.

All public moneys paid into any Treasury office, national-bank depositary, or other depositary are placed to the credit of the Treasurer of the United States and held subject to his order. The public moneys in the hands of any depositary may be transferred to the Treasury of the United States or may be transferred from one depositary to any other depositary as the safety of the public moneys and the convenience of the public service shall require.

The Treasurer is redemption agent for Federal reserve and na-tional-bank notes; is trustee for bonds held to secure bank circulation, public deposits in depositary banks, and bonds held to secure postal savings in banks; is custodian of miscellaneous trust funds; is fiscal agent for the issue and redemption of the United States paper currency, for the payment of the interest on the public debt and the redemption of matured obligations of the Government, for collecting the interest on public deposits held by banks, for the collection of semiannual duty on bank circulation and for paying principal and interest of bonds of the Philippine Islands and Porto Rico; and is treasurer of the board of trustees of the Postal Savings System.

The transactions of the Treasurer's office are of great volume, involving many and varied accounts and the handling of large amounts of money and securities. It is necessary that our work be kept current. Our books must balance each day. Promptness and accuracy are essential in all our operations.

I am pleased to report that, although the volume of work in the Treasurer's office during the fiscal year 1927 was heavy, requiring close application and a great deal of overtime work, the officials and employees met the situation cheerfully and the duties were discharged in a highly satisfactory manner.

Respectfully;
Frank White, Treasurer.

Hon. A. W. Mellon, Secretary of the Treasury.

## TABLES

No. 1.-General distribution of the assets and liabilities of the Treasury, June 30, 1927

|  | Treasury, Washington | Mints and assay offices | - Designated depositories of the <br> United States | In transit | Total |

## REPORT OF THE DIRECTOR OF THE MINT

> Treasury Department, Bureaj of the Mint, Washington, D. C., September 10, 1927.

Sir: In compliance with the provisions of section 345, Revised Statutes of the United States, I have the honor to submit herewith a report covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1927, being the fifty-fifth annual report of the Director of the Mint. There is also submitted for publication in connection therewith the annual report of this bureau upon the production and consumption of the precious metals in the United States for the calendar year 1926.

## Operation of the Mints and Assay Offices

## INSTITUTIONS OF THE MINT SERVICE

All of the 11 mint-service institutions were in operation during the fiscal year ended June 30, 1927; coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which makes large sales of fine gold bars; mints at New Orleans and Carson City conducted as assay offices; and assay offices at Boise, Helena, Deadwood, Seattle, and Salt Lake City. The seven last-named institutions are, in effect, bullion-purchasing agencies for the large institutions and also serve the public by making assays of ores and bullion. Electrolytic refineries are operated at the New York, Denver, and San Francisco institutions.

## DEADWOOD ASSAY OFFICE

The Deadwood (S. Dak.) assay office was closed June 30, 1927, the Congress having discontinued the appropriations for its support. This office was established 30 years ago, under the acts of June 11; 1896, and February 19, 1897, its natural and exclusive territory being the Black Hills region of South Dakota. Its receipts of bullion were never large, except during a period of about three years (1910-1913) when the Homestake Co., the only large producer in that territory, was induced to deposit its product at the Deadwood office; the yearly receipts were then from six million to eight million dollars in value. During five years the deposits amounted to about $\$ 1,000,000$ annually, but during most of the life of the office the values received varied from a few hundred thousand dollars to a very few thousand dollars in recent years. Only 14 bullion deposits, worth $\$ 2,936.52$ were received during its last two years of operation. The principal work of the office during recent years has been the making of assays of samples of ores for prospectors and others.

## COINAGE

The domestic coinage executed by the United States mints-during the fiscal year 1927 was greater in value than that of the prior fiscal year by about $\$ 14,000,000$, although the number of pieces was approximately $61,000,000$ fewer. The principal factors in this result were about $\$ 20,000,000$ more gold coin and $68,000,000$ fewer pieces of minor coin. The total domestic coinage was $310,960,019$ pieces, with value $\$ 102,653,129.50$, as compared with the prior year's $372,171,282$ pieces, valued at $\$ 88,614,418$. The 1927 total consisted of gold, $\$ 83,955,000$; silver dollars, $\$ 4,456,900$; subsidiary silver, $\$ 9,572,659.50$; nickel, $\$ 2,910,100$; and bronze, $\$ 1,758,470$. As is usual, the Philadelphia Mint made most of the minor and subsidiary silver coin, as well as some silver dollars and about $\$ 26,000,000$ in gold. The San Francisco Mint was principally engaged upon gold coin and silver dollars, while the Denver Mint made silver dollars and small coin.
Coinage for foreign governments was made during the past fiscal year only at the Philadelphia Mint. The total was $7,099,000$ pieces, which compares with $16,676,000$ pieces during the prior year. For Guatemala, 90,000 gold pieces were made; for Venezuela, $1,545,000$ silver pieces and $2,800,000$ nickel pieces; for Peru, 620,000 silver pieces and $1,194,000$ nickel pieces; and for Nicaragua, 500,000 silver pieces, 100,000 nickel pieces, and 250,000 bronze pieces.

The 1927 combined total of domestic and foreign pieces, $318,059,019$, compares with last year's $388,847,282$ pieces.

## GOLD OPERATIONS

Gold acquired by the Government at the several mint service institutions during the fiscal year 1927 totaled $\$ 224,246,630.64$. United States gold coin received by the mints for recoinage amounted to $\$ 2,704,940.81$; transfers of gold between mint offices totaled $\$ 11,821,953.15$; the aggregate amount of gold received by the several mint service institutions during the fiscal year 1927 was $\$ 238,773$,524.60 , which compares with $\$ 208,493,228$. 17 during the prior year.

SILVER OPERATIONS
Receipts of purchased silver during the fiscal year 1927 totaled $6,747,524.27$ fine ounces, the average cost of which was 59.9 cents per ounce, total cost being $\$ 4,041,552.81$. Silver received in exchange for bars bearing the Government stamp totaled $992,969.28$ fine ounces; United States silver coin received for recoinage totaled $2,630,930.19$ fine ounces, the recoinage value being $\$ 3,637,021.17$; silver deposited in trust by other governments totaled $285,961.04$ fine ounces; and transfers between mint-service offices totaled 969,555.07 fine ounces, making the aggregate quantity of silver received by the several mint-service offices during the fiscal year $11,626,939.85$ fine ounces, as compared with $13,016,507.07$ ounces during the prior year

Silver dollars remaining to be coined from bullion purchased under the Pittman Act amounted to about $\$ 2,000,000$.

The New York market price of silver during the fiscal year ended June 30,1927 , averaged $\$ 0.57672$; the lowest price was $\$ 0.518125$ on October 19, 1926; and the highest price $\$ 0.660625$ on July 2 and 3, 1926.

1. OREGON TRAIL HALF DOLLAR
2. VERMONT-BENNINGTON HALF DOLLAR

## REFINERIES

The New York and San Francisco refineries were in operation throughout the year, as usual. The Denver refinery operated only during the last half of the year, on silver bullion only. The quantity of gold and silver in unrefined bullion on hand was reduced during the year by about 45 tons, but there is still on hand about 437 tons, approximately 54 per cent of which is gold.

Production of electrolytically refined gold during the fiscal year ended June 30, 1927, totaled 2,752,093 fine ounces ( 94.35 tons) as compared with $3,272,689$ fine ounces ( 112.2 tons) during the prior fiscal year, and electrolytically refined silver totaled $3,690,118$ fine ounces (126.5 tons) as compared with $4,977,646$ fine ounces (170.7 tons) during prior year.

## COMMEMORATIVE COINS

Coins of special design, authorized by Congress, were issued during the fiscal year 1927, as follows:

The Vermont-Bennington half dollar was authorized by act of Congress approved February 24, 1925, in commemoration of the one hundred and fiftieth anniversary of the independence of Vermont and of the battle of Bennington. It was designed by Charles Keck. In addition to the legends and inscriptions required by basic law, the obverse of the coin bears a likeness of Ira Allen, with his name as founder of Vermont. The reverse carries the figure of a catamount, the name and date of the Battle of Bennington, which occurred August 16, 1777; also. the year of the coin's issue, 1927, and the words "Half Dollar."

The, Oregon Trail half dollar is a special-design coin authorized by act of Congress May 17, 1926, to commemorate the heroism of the pioneers who traveled to the Far West, and to aid in erection of suitable monuments to commemorate the tragic events associated with that emigration, which resulted in adding new States to the Union. The obverse of the coin bears a likeness of an old-time Conestoga wagon drawn by oxen over the brow of a hill and toward the setting sun. The phrase "Oregon Trail Memorial" appears, as well as other inscriptions required by law. On the reverse of the coin appears the full-length figure of an Indian with typical headdress, blanket, and bow. The left hand of the Indian is raised as if in warn:ing to those of the East. The Oregon Trail is traced across a map of the United States as a background on this side of the coin, which was designed by Mrs. Laura G. Frazer.

## STOCK OF COIN AND MONETARY BULLION IN THE UNITED STATES

On June 30, 1927, the estimated stock of domestic coin in the United States was $\$ 2,138,004,166$, of which $\$ 1,304,469,861$ was gold, $\$ 537,944,446$ standard silver dollars, and $\$ 295,589,859$ subsidiary silver coin.

The stock of gold bullion in the mints, assay offices, and Federal reserve banks on the same date was valued at $\$ 3,260,628,275$, a decrease during the year of $\$ 8,105,370$; the stock of silver bullion was $9,068,349.88$ fine ounces, a reduction of $1,005,387.72$ fine ounces.

## PRODUCTION OF•GOLD AND SILVER

Domestic gold production during the calendar year 1926 was $\$ 48,269,600$, as compared with $\$ 49 ; 860,200$ in 1925 . The output has declined to under 48 per cent of that for the record year 1915, when the total was $\$ 101,035,700$.

Silver of domestic production during 1926 totaled $62,718,746$ ounces, valued at $\$ 39,136,497$; this compares with $66,155,424$ ounces. valued at $\$ 45,911,864$, for 1925 , and with the record production of $1915,74,961,075$ fine ounces, valued at $\$ 37,397,300$.

## INDUSTRIAL CONSUMPTION OF GOLD AND SILVER

Gold consumption in the industrial arts during the calendar year 1926 is estimated at $\$ 74,333,684$, of which $\$ 43,268,236$ was new material.

Silver used in the arts is estimated at $39,408,393$ fine ounces, of which $29,407,601$ fine ounces was new material.

As compared with the prior year, silver consumption was about. the same and gold consumption increased about $\$ 8,400,000$.

## IMPORT AND EXPORT OF DOMESTIC GOLD COIN

The net export of domestic gold coin during the fiscal year ended June 30,1927 , was $\$ 5,500,953$; during the prior fiscal year there was net export of $\$ 46,614,511$. During the 13 fiscal years 19151927, since the opening of the World War, there has been a net export of $\$ 941,219,179$. Since 1870 the net export of domestic gold coin has been $\$ 1,818,868,243$, as per tabulation by fiscal years, which may be found in another section of this volume.

## APPROPRIATIONS, EXPENSES, AND INCOME

Appropriations available for mint service during the fiscal year 1927 totaled $\$ 1,684,750$, and reimbursements to appropriations for services rendered amounted to $\$ 58,023.03$, making a total of \$1,742,773.03.

Expenses amounted to $\$ 1,668,244.53$, of which $\$ 1,606,311.35$ was chargeable to appropriations and $\$ 61,933.18$ chargeable to income.

The income realized by the Treasury from the mint service aggregated $\$ 9,416,010.56$, of which $\$ 8,842,025.89$ was seigniorage. The seigniorage included $\$ 1,009,519.98$ on the coinage of silver dollars, which amount offsets an equal loss which was incurred when the silver dollars were melted and sold under terms of the Pittman Act. The seigniorage on subsidiary silver coin was $\$ 3,848,205.08$; on nickel coin, $\$ 2,443,230.81$; and on bronze coin, $\$ 1,541,070.02$.

Summary of appropriations, expenses, and balances, fiscal year 1927

| Items | Salaries and wages | Contingent expenses | Freight on bullion | Total |
| :---: | :---: | :---: | :---: | :---: |
| Appropriations ${ }_{\text {Earnings credited appropriations. }}$ - | $\begin{array}{r} \$ 1,358,250.00 \\ 45,380.73 \end{array}$ | $\begin{array}{r} \$ 319,000.00 \\ 12,642.30 \end{array}$ | \$7,500.00 | $\begin{array}{r} \$ 1,884,750.00 \\ 58,023.03 \end{array}$ |

${ }^{2}$ Gold valued at $\$ 20.67+$ per fine ounce, silver for standard dollars valued at $\$ 1.29+$ per fine ounce, and silver for subsidiary coin at $\$ 1.38+$ per fine ounce.

COINAGE
Details of the coinage executed during the fiscal year ended June 30, 1927, are given below:

${ }^{2}$ Bennington sesquicentennial.

Coinage for foreign governments (by the United States mint at Philadelphia only) during the fiscal year 1927 aggregated $7,099,000$ pieces, as follows:

| Country and denomination | Pieces | Country and denomination | Pieces |
| :---: | :---: | :---: | :---: |
| Guatemala: |  | Venezuela: |  |
| Gold, 20 quetzales. | 46, 000 | Nickel, 121/2 centimo | 800,000 |
| Gold, 10 quetzales. | 12,000 | Nickel, 5 centimo. | 2,000,000 |
| Gold, 5 quetzales. | 32, 000 | Nicaragua: |  |
| Venezuela: |  | Nickel, 5 centavo. | 100,000 |
| Silver, 2 bolivar. | 1,000,000 | Bronze, 1 centavo | 250, 000 |
| Silver, 1 bolivar | 545, 000 |  |  |
| Peru: Silver, unsol | 620,000 | Total pieces. | 7,099,000 |
| Nicaragua: Silver, 10 centavo | 500, 000 | Total pieces prior fiscal year | 16, 676,000 |
| Peru: Nickel, 10 centavo. | 1, 194, 000 |  |  |

## ISSUE OF FINE GOLD BARS FOR GOLD COIN AND GOLD BULLION

The value of the fine gold bars issued in exchange for gold coin and bullion monthly by the United States mints at Philadelphia, San Francisco, and Denver, and the assay office at New York, during the fiscal year 1927 was as follows:

EXOHANGED FOR GOLD COIN OR GOLD CERTIFICATES

| Month | Philadelphia | San Francisco | Denver | New York | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |

[^76]PURCHASE OF MINOR-COINAGE METAL FOR USE IN DOMESTIC COINAGE
During the fiscal year 1927 there were purchased at the mint at Philadelphia $24,051,869.76$ troy ounces of minor coinage metals at a cost of $\$ 363,665.14$, which includes $4,444,321.86$ troy ounces in nickel blanks prepared for stamping, costing $\$ 157,955.96$.

There were also purchased during the same period at the mint at San Francisco $29,429.15$ troy ounces of minor-coinage metals at a cost. of $\$ 168.95$. The Denver Mint purchased $4,944,318.75$ troy ounces of minor-coinage metals for use in coinage, costing $\$ 53,739.06$.

## MINOR-COIN DISTRIBUTION COSTS

The minor-coinage distribution costs paid during the fiscal year 1927 from the profits on minor coinage amounted to $\$ 60,956.76$, as follows:

| Insurance | \$81. 41 |
| :---: | :---: |
| Transportatio | 49, 583. 03 |
| Containers. | 11, 292.32 |
| Total | 60,956. 76 |

MINOR COINS OUTSTANDING
The following statement shows the coinage of minor coins, by denominations, the amount on hand, issued, melted, and outstanding June 30, 1927. Minor coins were first manufactured at the Philadelphia Mint in 1793; at the San Francisco Mint in 1908; at the Denver Mint in 1911.

1 There is no record of the melting of the old copper half cents, but it is bclieved that few, if any, are now in circulation.

OPERATIONS OF THE ASSAY DEPARTMENTS
The principal work of the assay departments of the coinage mints and the assay office at New York during the fiscal year 1927 is summarized as follows:

PROOF BULLION (1.000 FINE)
In order to establish uniformity in assay of bullion in the offices of the mint service all proof gold and proof silver is made at the mint at Philadelphia and furnished to other offices when required.

The amount made during the fiscal year 1927 was: Gold, 365 ounces. No proof silver was made during the year.

## OPERATIONS OF THE MELTING AND REFINING AND OF THE COINING DEPARTMENTS, FISCAL YEAR 1927

The aggregate quantity of metals operated upon in the abovementioned departments of the coinage mints and assay office at New York during the fiscal year ended June 30 , 1927, was 30.69 million fine ounces of gold and 45.4 million fine ounces of silver. There were also operated upon at the coinage mints 82.2 million ounces of minor coinage metal. The figures in the table following are based on the figures obtained at the settlements of the accounts.

Legal limits of wastage on the whole amount delivered by the superintendent to operative officers, as prescribed in section 3542, Revised Statutes, are as follows: Melter and refiner-gold, 0.001 ; silver, 0.0015 ; coiner-gold, 0.0005 ; silver, 0.001 .

## REFINING OPERATIONS

The net product of electrolytically refined gold and silver of the mint service during the fiscal year 1927 was $6,442,210.638$ fine ounces; other electrolytic output included the equivalent of the refined metals used for aiding the processes, 2,396,834.586 fine ounces; the product of melting operations (only) totaled $1,373,688.484$ fine ounces, making the total output of the refineries $10,212,733.708$ fine ounces. Details are shown in the following table:

[^77]
## INGOT MELTS MADE.

The following statement shows the number of melts made for domestic ingots and the weight of metal involved, during the fiscal year 1927:

| Mints | Number of melts |  |  | Weight of metal |  | Per cent passed |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## BULLION GAINS AND LOSSES

The net gains from operations on gold and silver bullion during the fiscal year 1927 amounted to $\$ 207,430.86$, as follows:

## WASTAGE AND LOSS ON SALE OF SWEEPS

The value of metals wasted in the operative departments during the fiscal year ended June 30,1927 , was $\$ 2,794.75$. A loss of $\$ 5,597.76$ occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same. Details are given in the table following:

## ENGRAVING DEPARTMENT

During the fiscal year ended June 30, 1927, the engraving department made 2,828 working dies for domestic coinage, including those for the Oregon Trail, and Battle of Bennington, memorial coinage. Master dies, hubs, and working dies were made for Philippine, Venezuelan, Guatemalan, Peruvian, and Nicaraguan coinage.

## LABORATORY, BUREAU OF THE MINT

From the domestic coinage of the calendar year 1926 the assayer of this bureau tested 234 gold coins and 562 silver coins, all of which were found within the legal requirements as to weight and fineness.

The greatest deviation in fineness of gold coins from standard (the limit of tolerance being 1 one-thousandth above or below) was 0.2 one-thousandth above and 0.4 one-thousandth below.

The greatest deviation in fineness of silver coins from standard (the limit of tolerance being 3 one-thousandths above or below) was 1.3 thousandths above and 1.7 thousandths below.

The following table summarizes results of fineness tests on domestic coin:

| Fineness (thousandths) | Number of gold coins |  |  |  | Number of silver coins |  |  |  |

## ASSAY COMMISSION'S ANNUAL TEST OF COIN

Section 3547 of the Revised Statutes provides for an annual test of the domestic coinage executed during the prior year, by a commission, of whom part are ex officio members, the others being appointed, without compensation, by the President. The purpose is "to secure a due conformity in the gold and silver coins to their respective standards of fineness and weight." The commission, which met at the Philadelphia Mint February 9 and 10, 1927, reported the following results of their examination:

Your committee on counting reports that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to us by the superintendent of the mint at Philadelphia, and upon comparison of the transcripts kept by the director of the mint were found to be correct.

Several packages were selected from the deliveries of each month of all denominations coined, and the coins contained therein were counted and found to agree with the number called for in each package.

The reserved coins were then delivered to the committees on assaying and weighing. In the reports of those committees will be found an account of the disposition of these coins.

The committee on weighing have to report that they have weighed the coins shown in the appended list and have found all of them to be within the legal tolerances. The coins were selected at random from those reserved by the mints at Philadelphia, San Francisco, and Denver.

The coins were directly weighed against a set of sealed coin weights, which were accompanied by a certificate signed by the Director of the Bureau of Standards, Department of Commerce, and which gave the value of the weights in terms of United States standard. The weighings were made on a Troemner balance supplied by the Philadelphia Mint, and was tested by your committee as to the equality of the arms and as to its sensibility, which were entirely satisfactory.

Making a comparison with the standard Troy pound weight as against 10 ounces +2 ounces, we found the agreement to be within 0.0005 ounce. The 10 -ounce weight was compared with the sum of the 5,3 , and 2 ounce weights and found to agree within 0.0005 ounce.

The committee appointed to conduct the assaying of coins selected from reserve samples representing deliveries of gold and silver coined during the calendar year 1926 by the mints at Philadelphia, San Francisco, and Denver has completed its duties.

Since the law provides for legal variations in fineness of one one-thousandth above or below standard (900) on gold coin and three one-thousandths on silver coin, we are pleased to report that all assays made by the committee have been within the legal limits provided and are shown in the schedules following.

Assays of individual gold coins selected

Assays of individual silver coins selected

| Mint | $\begin{gathered} \text { Highest } \\ \text { assay } \end{gathered}$ | Lowest assay |
| :---: | :---: | :---: |
| Philadelphia. | Fineness 900.4 | Fineness 808.6 |
| San Francisco. | 900.4 | 898.4 |
| Denver... | 900.0 | 898.4 |

Assays of coins melted in mass

|  | Mint | Gold coins | Silver coins |
| :---: | :---: | :---: | :---: |
|  |  | Fineness | Fineness |
| Philadelphia. |  | 900.0 | 89.1 |
| San Francisco. |  | 899.9 | 899.3 |
| Denver. |  | 900.0 | 898.5 |

The foregoing report, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1927, is respectfully submitted.

Hon. Andrew W. Mellon, Secretary of the Treasury.

${ }^{1}$ Includes United States paper currency in circulation in foreign countries and the amount held by the Cuban agency of the Federal Reserve Bank of Atlanta. Does not mpue siver bullion (a potential monetary asset) to the value of
mpression rather than intrinsic metallic value or a specific reserve.
${ }^{3}$ Population of continental United States (estimated) June 30, 1927 , 110 040 A
Does not include gold bullion or foreign coin outside of vaults of the Treasury, Federalreserve banks, and Federal reserve agents.
${ }^{6}$.These amounts are not included in the total since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.
6 The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.
ational bank notes $\$ 2 \$ 0$ dep, 297 of notes in process of redemption, $\$ 139,124,060$ of gold deposited for redemption of Federal reserve notes. $\$ 7,355,599$ deposited for redemption of
(art of May 30, 1908), and $\$ 6,426,700$ deposited as a reserve against postal savings deposits.
Note.-Gold certificates are secured dollar for dollar by gold beld in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of $\$ 155,420,721$ held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890 , which are also secured dollar for dollar by standard silver dollars held in the Treasury. Federal reserve notes are obligations of the United States and such discounted or purchased paper as is eligible under the terms of the Federal reserve act. Federal reserve banks must maintain a gold reserve of at least 40 per cent, including the gold redemption fund whici must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal reserve bank notes. National bank notes are secured by United States bonds except where lawful money has been deposited with the Treasurer of the United. States for their retirement. A 5 per cent fund is also maintained in lawful money with the Treasurer of the United States for the redemption of national bank notes secured by Government bonds.

Estimated monetary stock of gold and silver in the United Slates and the amount per capita at the close of each fiscal year since 1873

${ }^{1}$ Includes United States paper currency in circulation in foreign countries and the amount held by the Cuban agencies of tbe Federal reserve banks. Does not include silver bullion (a potential monetary asset) to the value of $\$ 7,815,680$, nor nickel and bronze coin, the value of which depends almost exclusively on the Government impression rather than intrinsic metallic value or a specific reserve.

Includes money held by the Cuban agencies of the Federal reserve banks of Boston and Atlanta.
${ }^{3}$ Population of continental United States (estimated) Dec. 31, $1926,116,232,000 ;$ Dec. $31,1925,114,813,000$; Nov. 1, 1920, 107,491,000; July 1, 1914, 99,027,000; Jan. 1, 1879, 48,231,000.

- Does not include gold bullion or foreign coin outside of vaults of the Treasury, Federal reserve banks, and Federal reserve agents.
${ }^{6}$ These amounts are not included in the total since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

6 The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted.from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.
national bank notes, $\$ 3,590$ deposited for retio process of redemption, $\$ 177,952,03$ of gold deposited for redemption of Federal reserve notes, $\$ 11,265,682$ deposited for redemption of號
Note.-Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of $\$ 154,188,886$ held in the Treasury. This reser ve fund may also be used for the redemp-
tion of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury. Federal reserve notes are obligations of the United States tion of Treasury notes of 1890 , which are also secured dollar 1or dollar by standard silver dollars held in the Treasury. Federal reserve notes are obligations of the united states and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act. Federal reserve banks must maintain a gold reserve of at least 40 per cent, includfog the gold redemption fund which must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal reserve bank notes. National bank notes are secured by United States bonds except where lawful money bas been deposited with the Treasurer of the United States for their retir
the redemption of national bank notes secured by Government bonds.

Monetary stock of gold in the United States since 1873

| End of year | Coin in Treasury | Bullion in Treasury 1 | Coin in national banks, comptroller's report 1 | Coin in circulation | Total stock of gold of gold |

Note.-From 1687 to 1832 the ratios are taken from Dr. A. Soetbeer, from 1833 to 1878 from Pixley and Abell's tables, from 1879 to 1896 from daily cabled prices from London to the Bureau of the Mint, and since from daily London quotations.

## RATIO OF, SJLVER TO GOLD, AS AFFECTED BY WORLD WAR

During the period December, 1916, to June, 1920, it is probable that the world's basic silver price was that of New York rather than that of London. The normal relationship between the two pricesNew York a fraction of a cent below the London quotation with exchange considered-did not prevail during this period, when the average monthly New York price varied between approximately 3 cents above and 6 cents below the London price. This period appears to have been initiated by enormous coinages to meet wartime needs, and large silver shipments from the United States to the Orient. Its close was coincident with the removal of the product of United States mines from the world market, purchases under the Pittman Act of April 23, 1918, having begun in June, 1920.

The ratio of silver to gold, based on the New York price, was for this period: Calendar year 1917, 24.85; 1918, 21; 1919, 18.44; 1920, 20.27.

With the partial release during the first half of 1919 of British governmental control of gold export, the London price of exportable gold advanced above its monetary par. The ratio of silver to this
gold, based on the average London price of both metals, follows: 1919, 17.53; 1920, 20.41; 1921, 32.34; 1922, 30.11; 1923, 31.35; 1924, 30.62 .

Final release of British governmental control of gold export became effective April 28, 1925, when the Chancellor of the Exchequer of Great Britain announced that the restrictions authorized by the gold and silver (export control) act of 1920 on export of gold would be discontinued from that date. This had the effect of restoring the gold standard to the United Kingdom. The example of Great Britain was followed by Australia, New Zealand, Netherlands, and the Dutch East Indies, and on June 1 by South Africa. On April 29,1925 , the London quotation on gold dropped more than 1 shilling to 84 s . 11 d . per fine ounce, as compared with 84 s . $11.45 \mathrm{~d} .$, mint par. Thereafter the quotation fluctuated between $84 \mathrm{~s} .101 / 2 \mathrm{~d}$. and 84 s . $111 / 2$ d. until January 29, 1926, when it touched $84 \mathrm{~s} .93 / 4 \mathrm{~d}$.; it has since varied between the latter figure and $84 \mathrm{~s} .111 / 2 \mathrm{~d}$.

Bullion value of the silver dollar [37114 grains of pure silver] at the annual average price af silver each calendar year since 1837

VALUES OF FOREIGN COINS, OCTOBER 1, 1927
In pursuance of the provisions of section 25, of the act of August 27, 1894, as amended by section 403 , Title IV, of the act of May 27, 1921, and reenacted by section 522, Title IV, act of September 21, 1922, I hereby proclaim the following estimate by the Director of the Mint of the values of pure metal contents of foreign coins to be the values of such coins in terms of the money of account of the United States, to be followed in estimating the value of all foreign merchandise exported to the United States during the quarter beginning October 1, 1927, expressed in any such metallic currencies: Provided, however, That if no such value has been proclaimed, or if the value so proclaimed varies by 5 per cent or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate, as determined by the Federal Reserve Bank of New York and published by me as certified by said bank pursuant to the provisions of said section 25 as amended.

The following compilations have been made from such data as are available-avowedly incomplete. The amount of gold and silver in circulation in many countries is not obtainable, and in some countries that held by private banks can not be given.

For the United States the figures given cover all domestic gold and silver coin, but only such bullion and foreign coins as owned by the Government and Federal reserve banks. All foreign coin which comes into possession of the Government is converted into bullion.

1 Includes gold and silver certificates (representing coin and bullion beld in trust in the Treasury) redeemable on demand.

Including some silver coin.
In Bank ol Mexico.

- Last year's figures.
${ }^{5}$ Silver coin in circulation in April, 1926.
${ }^{6}$ Fluctuates with the price of silver
7 Stated in United States dollars and including $\$ 800 ; 000$ in United States bills.
8 8overnment notes only.
${ }^{10}$ Stated in francs.
${ }^{11}$ On June 30, 1926.
${ }^{12}$ Estimated.
13 Gold certificates, Nov. 30, 1925,
Note.-Figures given represent each country's stock at the end of the year, except when otherwise indicated. Population figures are from the Statistical Abstract of the United States, 1925 . Blanks indicate no figures available, rather than no stock. Gold held abroad as follows, not included in the above figures (presumably reported by the country having actual possession): Canada, $\$ 18,772,373$; Mexico, $\$ 2.090,596 ;$ Chile, $\$ 18,739,343 ;$ Pera, $\$ 3,430,883$; Esthonia, $\$ 2,563,274 ;$ France; $\$ 359,813,935 ;$ Germany, $\$ 23,010 ; 358 ;$ Greece, $\$ 4,825,000$; Itaiy, $\$ 80,867,000$; Lithuania, $\$ 3,054,347$; Poland, $\$ 10,598,209 ;$ Rumania, $\$ 82,630,958 ;$ Spain, $\$ 5,692,921$; Switzerland, $\$ 8,639,960 ;$ Japan, $\$ 128,613,000 ;$ Straits' Settlements, $\$ 843,573$; Morocco, $\$ 15,247,000$ (gold and silver); Union of South Africa, $\$ 5,388,933$ (gold and silver).
${ }^{14}$ Stock in national bank
${ }_{10}^{16}$ Monetary standard not established.
${ }_{160}{ }^{16}$ New monetary unit established Dec. 21, 1925.
18 Ex Elusive of Spanish Bank notes
${ }_{17}$ New monetary unit established Nov. 21, 1925.
${ }_{10}^{18}$ On Jan. 1, 1926.
${ }^{20}$ On Dec. 23, 1925.
${ }_{31}$ Incomplete.
${ }_{25}$ Exclusive of $1,277,780$ pesos in United States Federal reserve bank notes.
${ }^{23}$ On June 30, 1925.
${ }^{34}$ There also circulate Portuguese pound notes to the amount of 858,252 pounds.
${ }_{2 s}$ Tuaisian notes of the Bank of Algiers.
[Siated in United States money ( 000 omitted), except paper stock, which is stated in monetary unit of issuing country ( 000 omitted)]

[^85]Production of gold and silver in the world since 1860
[The annual production of 1860 to 1872 is obtained from 5 -year-period estimates compiled by Dr. Adolpb Soetbeer. Since 1872 the estimates are those of the Bureau of the Mint]

1 At the average par price of a fine ounce of silver in London, excepting the years 1918 to 1922, incluşive, for which the mean of the New York bid and asked prices was used.

Production of gold and silver in the world since the discovery of America
[From 1493 to 1885 is from a table of averages for certain periods, compiled by Dr. Adolph Soetbeer; for the years since, the production is the annual estimate of the Bureau of the Mint]

| Period | Gold |  |  |  | Silver |  |  |  | Percentage of production |  |  |  |

# REPORT OF THE COMPTROLLER OF THE CURRENCY 

## Treasury Department, Office of the Comptroller of the Currency, Washington, December 12, 1927.

Sir: I have the honor to submit the following annual report, in accordance with the provisions of section 333, of the United States Revised Statutes, covering activities of the Currency Bureau, in the year ended October 31, 1927. This is the sixty-fifth report made to the Congress since the organization of the bureau.

## LEGISLATION

I make no recommendation to the Congress for the enactment of new legislation. But nine months have elapsed since the passage of the act of February 25, 1927, which amended the national banking laws. Too short a time has elapsed to allow banking to fully adjust itself. I feel, therefore, that no further banking legislation is necessary at this time.
nine months' operation of the act of febroary 25, 1927, Commonit known as the m'fadden nattonal bank act, amending the BANKING LAWS

This legislation had its origin in the specific recommendations made to Congress by my predecessor, Mr. Henry M. Dawes, who assumed office in the spring of 1923 and one of the first things to engage his attention was the competitive status of the national banks with commercial banks operating under State charters. In the late summer of 1923, the comptroller initiated a nation-wide investigation through the chief national bank examiners in each Federal reserve district, the aim of which was to gather and collate expert and technical recommendations for changes in the national banking laws. Each chief national bank examiner was instructed to confer with the leading bankers in his district and to make recommendations to the comptroller for new legislation based upon the practical needs of the national banks in the respective Federal reserve districts.
By the end of September, 1923, there was before the comptroller a considerable number of recommendations from the field. In the meantime he had called upon experts in the bureau at Washington to make recommendations relative to the need for specific legislation growing out of the administrative experience of the office for a decade or more past.

While these technical investigations and researches were in progress the comptroller conferred with a large number of bankers, both State and National, and with Federal reserve officials, with a view of developing a policy upon the basis of which he might make recommendations to Congress for new legislation.

With this mass of material before him, the comptroller induced several bankers of wide banking experience to sit with him and his counsel as a voluntary committee for the purpose of selecting from the numerous recommendations for new legislation the particular features which should form the basis of his recommendations to Congress. In the course of a month this committee had agreed upon what was thought to be the essential needs of the national banks for changes in their charter powers. The data thus selected was then cast into the form of a draft of a bill.

This draft was next referred to each of the chief national bank examiners in the 12 Federal reserve districts with instructions to consult again with leading bankers and to make recommendations for any changes. Members of the Banking and Currency Committees were kept in touch with these proceedings. After numerous conferences on the draft during which every phase of the commercial, industrial, and agricultural life of the country was taken under consideration in their relationship to the national banking system, the comptroller was able to lay before Congress his final recommendations. The bill was introduced by Chairman McFadden on: February 11, 1924 (H. R. 6855, 68th Cong., 1st sess.).

In the comptroller's report for 1924 there was laid before Congress convincing evidence of the urgent need for the broadening of the charter powers of the national banks, as provided by the bill, in order to save the national banking system from ultimate extinction. Thatreport showed that the national banks were gradually declining in relative strength, having during the preceding six years lost more than $\$ 2,230,000,000$ to the State systems.

Subsequent developments during the three years the bill was before Congress served only to emphasize the trend toward disintregration in the national banking system. In my report to Congress for the year 1926 I pointed out that during the three-year period ending with September, 1926, 253 national banks entered the State systems, taking with them aggregate resources of more than $\$ 1,000,000,000$. The aggregate resources of the national banks had dropped from 75 per cent of the total of commercial banking resources in the United States in 1884 to about 46 per cent in 1926.

In this connection it was freely predicted by the supporters of the so-called McFadden bank bill that its enactment by Congress would bring new life to the system of national banks because under the proposed act national banks would be able to perform every phase of banking carried on by State banks and trust companies. The McFadden Bank Act was approved by the President on February 25, 1927, and although it is too early to judge its full effect--the act having been in operation for less than nine months-it has fully justified itself, as the additions to the resources of the national banking system have more than offset the losses during the three-year period prior to the enactment of the act.

## branch banising

The establishment of new state-wide branches within the Federal reserve system was brought to an end by the act. Four of theleading State branch banking institutions have become national banks and are now operating under the restrictions upon branch banking which the act provides. There was no rush to acquire city branches following the authorization for their establishment by national banks, as only 127 new branches have been established with the approval of the Comptroller of the Currency under the actsince February 25, 1927. Prior to the passage of the act there were in the system 165 branches due to conversions and consolidations of State banks into national banks; 202 additional offices which had previously been approved by the Comptroller of the Currency under the authority of the opinion of the Attorney General of the United States were converted into branches under the terms of the act; and 5 branches granted in the District of Columbia under the authority of the Millspaugh Act. Since February $25,1927,400$ new branches were added to the system through consolidations and conversions of State banks. Since the State banks had these 400 branches before their conversions or consolidations, their addition to the national system did not add to the total of branch banks in the United States. The act, therefore, may be said to have added to the number of branch banks in the United States the number of new city branches established and approved by the Comptroller of the Currency under the provisions of the act, namely, 127 , one of which was subsequently abandoned.

## INVESTMENT SECURITIES

The act imposed upon the Comptroller of the Currency the duty of making regulations for the purpose of controlling the business of buying and selling investment securities by national banks. The act itself affirms the basic authority for national banks to enter this field, but limited the operations to the purchase and sale, without recourse, of marketable obligations in the form of bonds, notes, or debentures, commonly known as investment securities under such further definition of the term as may by regulation be made by the Comptroller of the Currency.

The regulations were ${ }^{\text {isssued }}$ on June 30, 1927, in the following. language:

## SERIES I

## Requlations Further Defining the Term "Investment Sectrities". as Used in the Act Approved February 25, 1927

By virtue of the authority vested in the Comptroller of the Currency by the terms of section 2 (b) of the act approved February 25, 1927, the following regulations further defining the term "investment securities" are prescribed:

1. The business of buying and selling investment securities by national banks is governed by section 5136 of the Revised Statutes of the United States as amended by an act to further amend the national banking laws and the Federal reserve act, and for other purposes, as approved February 25, 1927, as follows:
"(b) That section 5136 of the Revised Statutes of the United States, subsection 'seventh' thereof, be further amended by adding at the end of the first paragraph thereof the following:
"Provided, That the business of buying and selling investment securities shall hereafter be limited to buying and selling without recourse marketable obligations evidencing indebtedness of any person, copartnership, association, or corporation, in the form of bonds, notes and/or debentures, commonly known as investment securities, under such further definition of the term investment securities' as may by regulation be prescribed by the Comptroller of the Currency, and the total amount of such investment securities of any one obligor or maker held by such association shall at no time exceed 25 per centum of the amount of the capital stock of such association actually paid in and unimpaired and 25 per centum of its unimpaired surplus fund, but this limitation as to total amount shall not apply to obligations of the United States, or general obligations of any State or of any political subdivision thereof, or obligations issued under authority of the Federal farm loan act:"
2. An obligation of indebtedness which may be bought and sold by national banks, in order to come withjn the classification of "investment securities" within the meaning of the proviso of section 5136 above quoted, must be a marketable security as designated by the express language of said proviso. Under ordinary circumstances, the term "marketable" means that the security in question has such a market as to render sales at intrinsic values readily possible.
3. In classifying a given security as marketable the Comptroller of the Currency may in specific cases give consideration to various facts and circumstances, but he will require in all cases the following:
(a) That the issue be of a sufficiently large total to make marketability possible.
(b) Such a public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue.
(c) That the trust agreement under which the security is issued provides for a trustee independent of the obligor and, in the case of securities issued under a trust agreement executed and delivered after 60 days from the date of the promulgation of these regulations, such a trustee must be a bank or trust company.
4. This series of regulations may be modified, amended, or withdrawn at any time by the Comptroller of the Currency.

Signed and promulgated this 30th day of June, 1927.
Comptroller of the Currency.

The effect of these regulations has been to exclude from the investment securities business of national banks all securities which do not conform to the standard set up in the regulations. It is the design of these regulations to carry out the intention of the act to limit the investment, securities business of national banks to liquid and readily marketable obligations having a wider distribution than a purely local or restricted market.

## NATIONAE BANKS IN THE TRUST FIELD

The passage of the Federal reserve act empowered nationall baniks. to broaden their financial service by acting in a fiduciary capacity. The amendment to the act of 1918 extended the number of fiduciary capacities in which they could act, and from that time on national banks have entered the trust field in increasing numbers, approximately 30 per cent of their number now holding permits from the Federal Reserve Board to do a trust business.

The Federal reserve act was made to rest chiefly upon national banks and with a twofold purpose its authors determined to admit this class of banks to the field of the fiduciary. They recognized the justice of permitting national banks to engage in a work performed by other corporations which have entered every branch of the banking field. They saw, too, the advantages to the public of making available as trustees, executors; administrators, guardians of estates, and in other fiduciary capacities the one unified banking system in the United States highly standarized in its practice and regularly supervised by the Federal Government. ${ }^{\circ}$. They recognized in national banks an agency through which trust facilities could be offered in practically every community in the Nation.
How far the national banks have penetrated the trust field is indicated by the fact that the assets of the individual trusts being administered by these banks now amount to more than a billion dollars, while corporate trusts amounting to more than two and a half billion dollars are being handled. More than 26,000 individual trusts were being administered by national banks during the past year. The most impressive part of their progress is that the growth has been recorded largely during the past few years. The number of national banks obtaining the right to exercise trust powers is increasing at the rate of more than 200 banks a year.

The McFadden Act which became a law on February 25, 1927, gave national banks, among other things, indeterminate charters and assured the institutions that their charters would not expire before the trust functions undertaken were fulfilled. National banks now feel safe in assuming the duties of trustees as well as accepting other fiduciary obligations, no matter how long the period of service promises to be. This was a much needed change in the law and cleared the way for full trust service by thousands of national banks.

Two hundred and four national banks were granted authority to exercise trust powers between November 1, 1926, and October 31, 1927, 148 of these permits having been granted since the passage of the McFadden Act, while 235 national banks holding fiduciary permits started to administer trusts during the present year.

While nearly a third of all the national banks in the 48 States, Alaska and Hawaii now hold permits to exercise fiduciary powers,
several hundred have not yet become active in the work. On October 31, 1927, there were 865 national banks which had obtained permits to act in a fiduciary capacity, but had not actually started to exercise trust powers. However, during the year there were 643 national banks which adopted resolutions providing for the organization and operation of trust departments.

As the activities of trust departments have grown, so have the earnings that the national banks have reported from this source: Not only has the establishment of trust departments by national banks furnished a service to their communities which was greatly needed, but many banks have found that the trust departments have been the means of bringing new business to other departments of the bank, and enabled the bank to retain balances upon the death of their customers which would otherwise be diverted to a competing institution. For the year 1927 the earnings of trust departments aggregated $\$ 10,811,000$. This represented an increase of $\$ 2,556,000$ over the preceding year and a gain of $\$ 4,860,000$ over 1925.

While progress is being made in spreading intelligence as to what trust departments can do, the declaration that a national bank, and particularly one in the name of which the word "Trust" is not found, is authorized or in a position to administer an estate or other form of trust would be a revelation to perhaps a greater number of potential clients of trust departments than are now served by national banks. However, the number of national banks having authority to exercise fiduciary powers availing themselves of the privilege to include the words "trust company" in their titles is constantly increasing, more than 100 national banks having already obtained permission from this bureau to amend their titles in this respect, and the movement in this direction is universal.

## ORGANIZATION AND LIQUIDATION OF NATIONAL BANISS

There were 7,832 national banking associations in existence at the close of the current year, October 31, 1927. This number was less by 176 , or 2.2 per cent, than the number in existence at the close of the preceding year on October 31, 1926. In this connection it is of importance to note that while the number of associations has decreased, their capital and aggregate resources have increased as of the date of the last call, October 10, 1927, compared with aggregate resources on December 31, 1926, the nearest call to the date of my last report, $\$ 1,529,975,000$, or about 6 per cent, indicating a much healthier and stronger condition in the system as a whole.

This bureau is subject at all times to the demand for charters for new national banking associations. One of its most difficult problems is to avoid a conflict between the interests of the applicants and the needs of the community for additional banking facilities. There is a strong tendency on the part of many of those interested in securing charters for new banks to believe and to urge that because they or their associates are willing to risk their personal funds in capitalizing an institution a charter should be granted. The chances of success based on local banking and business conditions and the responsibility of investing the money of potential depositors which would be attracted to them is given but scant consideration. An analysis of the applications which this office has received for the establishment of
new banks shows that there is too often a desire to organize banks in localities where the communities are amply served and which would not support new institutions with a likelihood of any fair measure of success.

Extreme care should be exercised in granting charters, both for National and State banks. This has been my policy with respect to national bank charters. During the current year only 44 per cent of the number of applications received for the establishment of new national banks was approved, as compared with 52 per cent the previous like period and an average of 72.8 per cent over the eight prior years, with a high of 82.7 per cent just subsequent to the World War. In other words, despite the fact that the number of applications received remains about the same, the number approved by this office is constantly becoming fewer and in the current year a less number of applications was approved than has been approved any year during the past 10 -year period.

Up to and including October 31, 1927, there have been authorized to begin business 13,136 national banking associations, of which 4,199 were voluntarily closed to discontinue business or amalgamate with other banks, State or National, including those consolidated with other national banking associations under authority of the act of November 7, 1918. Exclusive of banks which failed but were subsequently restored to solvency, the loss to the system by banks liquidated through receiverships was 1,105 , the number of these receiverships being a fraction less than 8.8 per cent of the total number of banks organized.

In November, 1914, there were in existence 7,578 national banks with capital of $\$ 1,072,492,175$. Since that date the net increase in the number of banks was 254 and an increase in capital of $\$ 430,205,440$. The capital of the banks in existence on October 31, 1927, was $\$ 1,502,697,615$. In this 13 -year period 2,484 banks were chartered with capital of $\$ 290,275,300$. During this period, however, 2,100 associations were closed voluntarily or otherwise.

Applications to organize national banks and to convert State banks into national banking associations were received in the current year to the number of 290 , with proposed capital stock of $\$ 66,420,000$. Of the applications pending 129 were approved with proposed capital stock of $\$ 35,325,000,138$ rejected with proposed capital stock of $\$ 25,225,000$, and 59 abandoned with proposed capital stock of $\$ 5,485,000$. National banking associations to the number of 135 , with capital of $\$ 43,570,000$, were authorized to begin business, of which 3 were located in the New England States, 56 in the Eastern, 22 in the Southern, 23 in the Middle Western, 13 in the Western, and 18 in the Pacific States. The greatest activity as indicated by the number of banks organized was in the following States: New York, 25 banks; New Jersey, 13; Pennsylvania, 18; Texas 11; Minnesota 12; Iowa, 6; and California 14. In other States the number ranged from 1 to 3 banks. It further appears that of the total number of charters issued, 30 , with authorized capital of $\$ 28,310,000$ and resources aggregating approximately $\$ 849,381,890$, were the result of conversions of State banks-8, with capital of $\$ 735,000$, reorganizations of State or national banks, and 97 , with capital of $\$ 14,525,000$, primary organizations. The conversions of State banks into national associations brought into the system 298 branches.

In the year in question 50 national banking associations were consolidated into 25 under authority of the act of November 7, 1918, the capital of the consolidated banks being $\$ 33,759,000$. In some instances there were reductions in capital and in others increases, but the net result by reason of consolidations was a reduction in capital stock of $\$ 407,000$.

There have been 16 consolidations under the act of February $25_{p}$ 1927, authorizing the consolidation of State banks with national banks. The aggregate capital of the consolidating State banks being $\$ 14,560,000$. These banks also brought 105 branches into the national system, and assets aggregating approximately $\$ 271,849,456$.

The voluntary liquidation of 165 associations represented a capitad of $\$ 37,495,000$, while the capital of the 135 insolvent banks was $\$ 8,257,000$. The net result of the changes hereinbefore mentioned was a decrease for the year in the number of active banks by 176 and an increase in authorized capital stock of $\$ 80,565,210$. It appears that during the year 238 banks increased their capital in the aggregate sum of $\$ 86,184,210$. Of this number 73 banks effected the increase by stock dividends, the amount of the increase in this manner being $\$ 6,776,350$.

Of the 165 banks reported in voluntary liquidation 66 with capital of $\$ 9,325,000$ were acquired by other national banks and 99 with capital of $\$ 28,170,000$ either entered the State banking system or quit business.

## NATIONAL BANK FAILURES

One hundred and thirty-five national banks, with an aggregate capital of $\$ 8,257,000$, were plàced in charge of receivers during the year ending October 31, 1927. While the number of failures was larger by 44 than the number during the corresponding period covered by my previous report, 111 failed between November 1, 1926, and June 30, 1927, and but 24 failed from July 1, 1927, to November 1, 1927. The low number of fajlures in this last period of four months together with reports of condition made to this office indicate that the drift is toward a more normal condition in the number of failures. The date that each bank was authorized to begin business, the date of the appointment of its receiver, its capital stock, and its circulation outstanding at date of failure are shown in the appendix of this report.

I believe that failures of many banks could have and can be averted if the directors would give closer attention to the affairs of the bank. I am constantly urging that directors exercise the duty placed on them by law and which has been stated in many decisions. of the courts; a portion of one decision which I quote:

[^86]especially during the inflation period immediately following the war. As I have stated elsewhere in this report, an analysis of the applications which this office has received for the establishment of new banks shows that there is too often a desire to organize banks in localities where the community is amply served by present banking facilities and which would not support new institutions with a lilkelihood of any fair measure of success.
From the date of the first failure of a national bank in the year 1865 to October 31, 1927, 1,173 national banks were placed in charge of receivers. Of this number 68 were restored to solvency and permitted to resume business, leaving 1,105 to be administered by receivers. Of these so administered, 467 are now in process of liquidation, being open receiverships administered by receivers under the supervision of the office of the Comptroller of the Currency, and 638 have been entirely liquidated by receivers and the trusts closed.

The capital stock of the 1,173 insolvent national banks at the date of failure was $\$ 132,960,420$. The capital stock of the 68 national banks that were restored to solvency was $\$ 12,020,000$. The capital stock of the 1,105 banks that continued in receiverships was $\$ 120,940,420$.

The book or nominal value of the assets of the 1,105 administered receiverships, including assets acquired after suspension, aggregated $\$ 732,786,86.6$. Total collections by receivers to September 30, 1927, from these assets, including offsets, amounted to \$407,981,092. There was levied against shareholders of these banks stock assessments aggregating $\$ 81,764,440$, and in addition to the amount collected from assets, there was collected from these stock assessments the sum of $\$ 38,193,221$, giving a total collection of $\$ 446,174,313$ collected from all sources, or 54.8 per cent of total assets and stock assessments. This sum was disbursed as follows:

[^87]In addition to this record of distribution there was returned to shareholders through their duly elected agents, assets of a nominal value of $\$ 16,124,930$.

The 467 national banks that were as of October 31, 1927, still in charge of receivers and in process of liquidation, had assets, including assets acquired subsequent to their failure, aggregating $\$ 293,655,868$. Receivers had collected from these assets, as shown by their last quarterly reports under date of September 30, 1927, including offsets, the sum of $\$ 142,618,070$. The capital stock of these banks was $\$ 30,824,500$, and there had been levied by the Comptroller of the Currency to October 31, 1927, stock assessments against the shareholders in the amount of $\$ 26,799,200$. From such assessments there had been collected up to and including September 30, 1927, \$11,543,865 , making collections from all sources in the liquidation of these active receiverships a total of $\$ 154,161,935$, or 48.9 per cent of such assets and stock assessments, which amount has been distributed as follows:

During the year ending October 31, 1927, the liquidation of 46 receiverships was completed and the receiverships closed. These added to the 660 receiverships previously liquidated give a total of closed trusts of 706, in which is included the 68 banks that were restored to solvency, leaving 638 that were liquidated by receivers. The total assets of these 638 receiverships including assets acquired subsequent to suspension, aggregated $\$ 439,130,998$. The total assessment against shareholders levied by the comptroller aggregated $\$ 54,961,240$. From the assets the receivers collected, including offsets, $\$ 265,363,022$, and from stock assessments the receivers collected $\$ 26,649,356$, making of all collections a total of $\$ 292,012,378$, or 59.9 per cent of such assets and stock assessments, which sum was distributed as follows:

| Dividends paid to creditors on claims proved, aggregating $\$ 231,249,844$ | \$172, 833, 263 |
| :---: | :---: |
| Payments to secured and preferred creditors, including offsets allowed, and payments for the protection of assets_ |  |
| Payment of receivers' salaries, legal, and other expenses...-...... | 18, 802, 285 |
| Cash returned to shareholde | 3, 810, 105 |

The average percentage of dividends paid on claims proved against the 706 receiverships that have been finally closed was 74.74 per cent. Had offsets, loans paid, and other disbursements been included in this calculation the disbursements to creditors would show an average of 80.95 per cent.

Expenses incident to the administration of these closed trusts such as receivers' salaries, legal, and other expenses, amounted to $\$ 18,802,285$ or 4.28 per cent of the nominal value of the assets administered, or 6.43 per cent of collections from assets and stock assessments. The assessments against shareholders average 53.81 per cent of their holdings and the total collections from such assessments as were levied were 48.49 per cent of the amount assessed. The outstanding circulation of these closed receiverships was $\$ 33,670,103$ secured by United States bonds on deposit with the Treasury of the United States of the par value of $\$ 36,168,350$.
The financial operations of the division of insolvent national banks from September 30, 1926, to September 30, 1927, were as follows:
Receipts:

Disbursements:

Expenses paid 2, 829, 999
Rieturned to shareholders in cash
11, 074

| Items | $\begin{gathered} \text { Closed } \\ \text { receiverships, } \\ 706^{1} \end{gathered}$ | Active receiverships, 467 | 'Total, 1,173 |

BANK FAILURES OTHER THAN NATIONAL
Information received from the banking departments of the several States shows that during the fiscal year ended June 30, 1927, there were 689 failures of State and private banks, with total liabilities of $\$ 206,655,000$, as compared with 496 failures of this class of banks the year previous, with liabilities aggregating $\$ 147,823,000$.

Tables showing the number of failures and liabilities of banks other than national and national banks in each State, for the sixmonth periods ended December 31, 1926, and June 30, 1927, together with similar figures for the year ended June 30, 1927, are published in the appendix of the report of the Comptroller of the Currency. The appendix also includes a table showing the number and liabilities of State and national bank failures as of June 30, each year, 1914 to 1927, inclusive.

## NATIONAL BANK CIRCULATION

Notwithstanding a reduction in excess of $\$ 1,000,000,000$ was effected during the year in the interest-bearing debt of the United States, the amount of bonds eligible as security for national bank circulation on June 30, 1927, was the same as at the close of the prior fiscal year, namely, $\$ 674,625,630$, and is the limit of the volume of national bank circulation issuable. The eligible bonds consist of $\$ 599,724,050$ consols of 1930 ; $\$ 48,954,180$ Panama Canal 2's of 1916-1938, and $\$ 25,947,400$ Panama 2's of 1918-1938. Of these :bonds the Treasurer, on June 30 last, held as security for national bank circulation $\$ 666,991,130$; as security for public deposits, $\$ 390,500$, and for postal savings $\$ 186,200$. This leaves only $\$ 7,057,800$ bonds of these classes held otherwise than by the Treasurer as security for circulation and deposits.

The national bank circulation outstanding at the close of the fiscal year aggregated $\$ 704,146,267$, of which $\$ 661,288,545$ was secured by bonds, and the remainder, $\$ 42,857,722$, was secured by lawfúl money
held by the Treasurer of the United States to provide for the redemption of the notes of banks retiring their circulation and on account of associations in liquidation.

The stock of money in the country on July 1, 1927, aggregated $\$ 8,531,991,679$, and showed an increase of $\$ 158,331,450$ over the revised figures furnished as of July 1 the year previous. Of the current stock gold coin and bullion amounted to $\$ 4,565,070,147$, or 53 per cent; silver dollars and subsidiary silver $\$ 833,766,816$, or 10 per cent, and United States notes, Federal reserve issues and national bank circulation, $\$ 3,133,154,716$, or nearly 37 per cent. Of the latter amount $\$ 2,077,473,195$ represented Federal reserve notes and comprise more than 24 per cent of the total circulating medium, while 4 per cent were United States notes and 8 per cent national bank circulation.

The paid-in capital of the national banks in existence was $\$ 1,480$,202,199, and as the amount of bonds eligible as security for national bank circulation is $\$ 674,625,630$ it will be observed that the circulation issuable by national banks is but $451 / 2$ per cent of the maximum amount authorized by law, namely, the paid-in capital stock.
In the table following, disclosing the total of Government securities held by the Treasurer of the United States on June 30, 1927, is shown separately the amount of bonds held eligible for national bank circulation:

United States Government securities held in trust by Treasurer of the United States, Juñe 30, 1927

In the year ended October 31, 1927, the withdrawal of bonds held by the Treasurer of the United States in trust as security for nationalbank circulation amounted to $\$ 40,571,100$. The withdrawals by reason of liquidation of banks amounted to $\$ 28,140,550$, and on account of banks placed in charge of receivers $\$ 3,032,550$. Bonds held by the Treasurer in trust as security for circulation were augmented to the extent of $\$ 41,951,510$ on account of deposits made by newly organized banks and by those increasing their circulation. The transactions of the year by months in each account named are shown in the following statement:

United Slates bonds deposited as security for circulation by banks chartered and by those increasing their circulation, together with the amount withdrawn by banks reducing their circulation, and by those closed, during each month, year ended October 31, 1927

| Date | Bonds deposited by banks chartered and those increasing circulation during the year | Bonds withdrawn by banks reducing circulatión. | Bonds withdrawn by banks in liquidation | Bonds withdrawn by banks in insolvency |

## REDEMPTION OF NATIONAL AND FEDERAL RESERVE BANK CIRCULATION

During the year ended June 30, 1927, national-bank notes, Federal reserve notes, and Federal reserve bank notes aggregating $\$ 1,891,-$ $880,562.50$ were redeemed in the United States Treasury, at a total expense of $\$ 526,093.93$.

These redemptions included Federal reserve notes amounting to $\$ 1,388,590,705$; Federal reserve bank notes received from all sources, including Federal reserve banks and branches, $\$ 858,910$, and nationalbank notes in the sum of $\$ 502,430,947.50$, the latter amount including $\$ 27,203,100$ redeemed on retirement account.

The national-bank notes were redeemed at an average cost of $\$ 0.93$ per $\$ 1,000$; Federal reserve notes received from sources other than the Federal reserve banks, $\$ 0.76$ per 1,000 notes; canceled and other Federal reserve notes received direct from Federal reserve
banks and branches, $\$ 0.36$ per 1,000 notes redeemed and redemption on account of Federal reserve bank notes at the rate of $\$ 5.45$ per 1,000 notes.

Statements showing the amount of national-bank notes, Federal reserve notes, and Federal reserve bank notes received monthly for redemption in the year ended June 30, 1927, the source from which received, and the classification of redemptions, together with the rate per $\$ 1,000$ of national-bank notes redeemed and the rate per 1,000 notes of Federal reserve and Federal reserve bank notes redeemed are published in the appendix of this report.

## CONDITION OF NATIONAL BANKS AT DATE OF EACH REPORT CALLED FOR DURING THE YEAR

Under authority of section 5211, Revised Statutes, national banks were called upon to submit four reports of condition during the year ended October 31, 1927, as of various dates specified by the comptroller.
Summaries of resources and liabilities of reporting banks on the date of each report during the year, together with summary for June 30, 1926, are shown in the following statement:

Abstract of reports of condition of national banks on dates indicated
[In thousands of dollars]

## CONDITION OF NATIONAL BANKS OCTOBER 10,1927

The resources of 7,804 reporting national banks October 10, 1927: aggregated $\$ 27,213,824,000$, the largest amount ever reported in the history of the national banking system, exceeding by $\$ 1,529$,975,000 the resources reported by 7,912 banks on December 31, 1926.

Comparison of the principal items of resources and liabilities follows:

## RESOURCES

Loans and discounts, including rediscounts, amounted to $\$ 14,366,-$ 926,000 , and exceeded the amount in December, 1926, by $\$ 793,-$ 651,000 . The percentage of loans and discounts to total deposits was 64.46, compared with 65.06 on December 31, 1926.

Investments in United States Government securities owned were $\$ 2,675,542,000$, and showed an increase since December last of $\$ 392,971,000$. Other miscellaneous bonds, stocks, and securities owned, $\$ 3,941,438,000$, were $\$ 433,617,000$ more than reported in December.

Banking house, furniture, and fixtures, valued at $\$ 698,516,000$, exceeded the December figures in the sum of $\$ 53,636,000$, and other real estate owned of $\$ 122,161,000$ showed an increase of $\$ 8,053,000$ since December.

Amounts due from correspondent banks and bankers, including lawful reserve and items in process of collection with Federal reserve
banks, totaled $\$ 4,378,517,000$, and were $\$ 158,787,000$ less than in December last year. Cash in vault increased from $\$ 352,709,000$ on December 31, 1926, to $\$ 375,251,000$ on October 10, 1927.

## LIABILITIES

Capital stock paid in of $\$ 1,499,384,000$ exceeded the amount reported in December by $\$ 86,661,000$, and surplus and undivided profits aggregating $\$ 1,844,511,000$ exceeded the December figures by $\$ 150,315,000$.

Liabilities for circulating notes outstanding were $\$ 649,886,000$, and exceeded by $\$ 3,437,000$ the liability for the notes reported outstanding at the end of the year in 1926.

Déposit liabilities were $\$ 22,287,238,000$, and showed an increase of $\$ 1,423,247,000$ since December. Included in the classification of deposits are balances due to correspondent banks and bankers, which on October 10, 1927, totaled $\$ 3,516,359,000$, showing an increase since December of $\$ 92,718,000$; demand deposits, including United States deposits, $\$ 11,179,935,000$, which were $\$ 273,027,000$ more than in December, and time deposits, including postal savings, totaling $\$ 7,590,944,000$, which exceeded by $\$ 1,057,502,000$ the total of time deposits reported in December.

Liabilities for money borrowed, on account of bills payable of $\$ 235,759,000$ and rediscounts of $\$ 80,571,000$, aggregated $\$ 316$,330,000 and were $\$ 213,979,000$ less than on December 31, 1926.

Statement showing the principal items of resources and liabilities of these banks in each State, Alaska, and Hawaii, 'at the close of business October 10, follows:
[In thousands of dollars]

## NATIONAL BANK LİABILITIES ON ACCOUNT OF BILLS PAYABLE AND REDISCOUNTS

The total liabilities of national banks in the 12 Federal reserve districts for money borrowed on account of bills payable and rediscounts amounted to $\$ 316,330,000$ on October 10, 1927, and showed decreases since June 30 and Decembër 31, 1926, of $\$ 206,278,000$ and $\$ 309,328,000$, respectively. On October 10 of the current year bills payable were $\$ 235,759,000$ and rediscounts $\$ 80,571,000$.
Wiabilities of national banking associations in each Federal reserve district at the date of each call since June 30, 1926, are shown in the following statement:

Total borrowings of national banls on account of bills payable and rediscoints ine each Federal reserve district at date of each call since June 30,1920

## LOANS AṄD DISCOUNTS OF NATIONAL BANKS

Loans and discounts of the 7,796 national banks on June 30, 1927, amounted to $\$ 13,955,696,000$, in comparison with a total of $\$ 13,417$,674,000 on June 30, 1926.
Of the total loans and discounts in the current year 43.90 per cent was on unsecured time paper indorsed by one or more individual or firm names, 15.87 per cent on time loans secured by stocks and bonds, and 15.93 per cent on demand loans similarly secured.

The amount of paper eligible for rediscoun't with the Federal reserve bank on June 30, of the current year, was $\$ 3,361,795,000$, or 24.09 per cent of the total loans and discounts, and $\$ 109,712,000$, or 0.79 per cent was secured by United States Government obligations.

Statement showing the classification of loans iand discounts reported by national banks for the last three fiscal years ended June 30 follows:

## SAVINGS DEPOSITORS AND DEPOSITS IN NATIONAL BANKS

Savings deposits reported by national banking associations on June 30,1927 , aggregated $\$ 5,875,670,000$, an increase in savings of $\$ 912,806,000$ over June 30, 1926. Of the total number of banks reporting savings, 4,600 maintained separate savings departments, and according to the returns from all reporting national banks there were $14,340,687$ savings depositors. The average rate of interest paid on these deposits was 3.68 per cent, as compared with 3.63 per cent the year previous.

The number of banks in reserve cities and States reporting savings, the number maintaining separate savings departments, the number of depositors and amount of savings deposits, together with the rate of interest paid, is shown in the following table:

Savings depositors and deposits in national banks June S0, 1927

Savings depositors and deposits in national banks June 30, 1927—Continued

PER CAPITA INDIVIDUAL AND SAVINGS DEPOSITSS IN ALL REPORTING BANKS
The total individual deposits in all reporting banks in the continental United States, Alaska, and insular possessions on June 30, 1927, were $\$ 51,132,554,000$, of which amount $\$ 26,032,001,000$ were savings deposits.

The per capita individual deposits based on an approximate population of $129,804,000$ were $\$ 393: 92$, and the per capita savings deposits were $\$ 200.55$. The increase in the per capita savings deposits is due in part to the inclusion of time certificates of deposits with other savings, which have not heretofore been so included.

Statement showing the population, amount of individual deposits, per capita individual deposits, amount of savings deposits, and per capita savings deposits reported by all banks in each State, the District of Columbia, Alaska, and the insular possessions follows:

[^89]In the year ended June 30, 1927, the gross earnings of 7,796 reporting national banks aggregated $\$ 1,243,043,000$, and showed an increase of $\$ 50,825,000$ over the gross earnings in the year ended June 30, 1926. Interest and discount collected was $\$ 1,076,715,000$, or $\$ 29,723,000$ more than in the previous year. The total expenses of these banks in the current year amounted to $\$ 882,374,000$, showing an increase in the 12 -month period of $\$ 40,708,000$. The major items of expense were interest paid on deposits, $\$ 408,342,000$, and salaries and wages, $\$ 243,246,000$, exceeding by $\$ 20,394,000$ and $\$ 13,382,000$, respectively, the interest and salaries paid in the year ended June 30, 1926.

Deducting from the gross earnings above referred to the total expenses also mentioned, national banks during the year showed net earnings of $\$ 360,669,000$, which amount was $\$ 10,117,000$ more than in the previous year. In addition to net earnings recoveries of $\$ 33,339,000$ were made on assets previously charged off, making a total of $\$ 394,008,000$ in net earnings and recoveries during the year, compared with $\$ 394,557,000$ in the year previous.

From the total of net earnings and recoveries were deducted losses and depreciation charged off in the sum of $\$ 141,689,000$, resulting in a net addition to profits in the year of $\$ 252,319,000$, which amount was $\$ 3,152,000$ more than the net addition to profits reported in the previous 12 months.

Dividends in the sum of $\$ 180,753,000$ were declared in the year and exceeded by $\$ 7,000,000$ the total dividends declared by 7,978 reporting national banks in the year ended June 30, 1926.

A comparative statement of the earnings, expenses, and dividends of national banks for fiscal years ended June 30, 1926 and 1927, and statements showing the capital, surplus, and the earnings, expenses, etc., of these associations in reserve cities and States and Federal reserve districts June 30, 1927, follow. (Similar tables for the sixmonth periods ended December 31, 1926, and June 30, 1927, are published in the appendix of the report of the Comptroller of the Currency.

Earnings, expenses, and dividends of national banks for the fiscal years ended June 30, 1926 and 1927

federal reserve banik discount rates
The discount rates of each of the 12 Federal reserve banks in effect November 1, 1927, the date established and the previous rate with respect to all classes and maturities of eligible paper are shown in the following statement:

Rates on all classes and maturities of eligible paper

| Federal reserve bank | Rate in effect on Nov. 1 | Date estab- lished | Previous rate |
| :---: | :---: | :---: | :---: |
| Boston | 31/2 | Aug. 5,1927 |  |
| New York-1 |  |  |  |
| Philadelphia | $31 / 2$ | Sept. 8,1927 Aug. 6,1927 |  |
| Richmond. | $31 / 2$ | Aug. 16,1927 |  |
| Atlanta... | 31/2 | Aug. 13,1927 |  |
| Cbicago | $31 / 2$ | Scpt. 7,1927 |  |
| Mitinneapolis | $31 / 2$ | Aug. 4, 1927 |  |
| Kansas City. | $31 / 2$ | July 29,1927 |  |
| Dallas.... | $31 / 2$ | Aug. 12, 1927 |  |
| San Francisco. | $31 / 2$ | Sept. 10, 1927 |  |

## DISCOUNT RATES PREVAILING IN FEDERAL RESERVE BANK AND BRANCH CITIES

In the table following, prepared by the Federal Reserve Board and published in the Federal Reserve Bulletin for November, 1927, the rates shown are those at which the bulk of the loans of each class were made by representative banks during the week ending with the 15th of the month. Rates reported by about 200 banks with loans exceeding $\$ 7,500,000,000$ :

| Month | Boston | New York | Philadelphia | Cleveland | Richmond | Atlanta | Chicago | St. Louis | Minneapolis | $\begin{aligned} & \text { Kansas } \\ & \text { Civy } \end{aligned}$ | Dallas | San Francisco |

## NEW YORK CLEARING HOUSE

The figures compiled and furnished by Mr. Clarence E. Bacon, manager, New York Clearing House Association, for the year ended September 30, 1927, disclose there were 31 banks comprising the New York Clearing House Association, with capital of $\$ 391,400,000$.

Clearings amounted to $\$ 307,158,631,043$, which was an increase of $\$ 13,715,284,128$ in the year, and balances were reported aggregating $\$ 34,669,579,273$, as compared with $\$ 32,197,090,792$ on September 30, 1926. The average daily clearings were $\$ 1,013,724,855$, and the average daily balance $\$ 114,421,054$. The percentage of balances to clearings was 11.28 .

## CLEARING-HOUSE ASSOCIATIONS IN THE 12 FEDERAL RESERVE BANK CITIEB AND ELSEWHERE

Clearing-house transactions in the 12 Federal reserve cities in the year ended September 30, 1927, aggregated $\$ 439,716,841,000$, and exceeded by $\$ 12,573,422,000$ the amount reported in the previous year. The ratio of clearings by banks in the 12 Federal reserve bank cities was 80.84 per cent of the total clearings of all banks in 230 reporting cities in the United States, in comparison with a ratio of 79.61 per cent last year.

Clearings of banks in 24 other principal cities, each of which had clearings in excess of $\$ 1,000,000,000$, aggregated $\$ 70,527,825,000$, and showed a decrease of $\$ 715,182,000$ in clearings of the same cities since the year ended September 30, 1926. The total clearings of the 230 cities reporting to the New York Clearing House Association in the year amounted to $\$ 543,955,530,000$, as compared with $\$ 533,077,499,000$ reported by these cities a year ago.

Tables showing the following information are published in the appendix of the report of the Comptroller of the Currency: Comparative statement of the New York Clearing House, annually since 1854; comparative statement of the transactions of the New York Clearing House in years ended September 30, 1927 and 1926; exchanges, balances, and percentages of balances to exchanges, etc., by the New York Clearing House annually since 1893; comparative statement of the exchanges of clearing houses of the United States by cities, for years ended September 30, 1927 and 1926, and comparative statement of transactions of clearing-house associations in the 12 Federal reserve bank cities and elsewhere, in years ended September 30, 1927 and 1926.

## BANHS OTHER THAN NATIONAL

## BTOCK BAVINGB BANKS

Figures which were received from 843 stock savings banks as of June 30, 1927, showed total resources of $\$ 1,815,538,000$, the amount representing a decrease of 61 in the number of banks, and a decrease of $\$ 380,889,000$ in total resources from the returns received as of June 30, 1926.

Loans and discounts, $\$ 1,144,709,000$, were reduced in the sum of $\$ 265,159 ; 000$; investments, $\$ 419,803,000$, a reduction of $\$ 84,295,000$; and banking house, furniture and fixtures, $\$ 45,857,000$, showed a decrease in estimated value of $\$ 6,445,000$ since June, 1926. Amounts due from correspondent banks and bankers, and checks and other cash items were increased $\$ 12,167,000$ and $\$ 1,022,000$, respectively. Cash on hand, $\$ 23,692,000$, showed a decrease of $\$ 3,224,000$, and other resources a decrease of $\$ 7,212,000$.

Capital stock paid in, $\$ 69,144,000$, was reduced $\$ 16,009,000$ since June of 1926. Surplus and undivided profits also showed reductions of $\$ 1,279,000$ and $\$ 2,187,000$, respectively.

The total deposit liability of these associations aggregated \$1,674,150,000 , and were $\$ 356,925,000$ less than the year previous. The individual deposits, $\$ 1,661,803,000$, showed a decline of $\$ 359,811,000$, while amounts due to all banks were increased $\$ 2,375,000$.

Notes and bills rediscounted and bills payable were reduced $\$ 510,000$ and $\$ 1,105,000$, respectively.

A summary of the resources and liabilities of these associations on the date indicated follows:

## MUTUAL SAVINGS BANKS

The aggregate resources of 618 mutual savings banks, June 30 , 1927, amounted to $\$ 9,011,185,000$, in comparison with resources of 620 banks on June 30, 1926, amounting to $\$ 8,422,307,000$, the increase in resources for the year totaling $\$ 588,878,000$.

Loans and discounts of these banks for the current year, $\$ 5,064,595,000$, and investments, $\$ 3,523,350,000$, showed increases of $\$ 441,001,000$ and $\$ 117,246,000$, respectively, over these items for the year previous.

Banking house, furniture and fixtures were increased $\$ 10,894,000$, and other real estate owned showed an increase of $\$ 1,890,000$.

Balances due from correspondent banks and bankers aggregated $\$ 224,741,000$, showing an increase of $\$ 13,483,000$; checks and other cash items were less by $\$ 270,000$, and exchanges for clearing house were reduced $\$ 190,000$. Cash on hand, $\$ 31,212,000$, exceeded last year's figures by $\$ 1,612,000$. Other resources also showed an increase of $\$ 3,212,000$.

All liability items of these banks showed increases during the year, the largest increase, $\$ 499,595,000$ appearing in individual deposits; which amounted to $\$ 8,077,099,000$.
Surplus funds and undivided profits showed increases of $\$ 79,953,000$ and $\$ 8,457,000$, respectively. Bills payable were $\$ 568,000$, as compared with $\$ 345,000$ a year ago.

## DEPOSITORS AND DEPOSITS IN MUTUAL AND STOCK SAVINGS BANKS

The combined total individual deposits in 1,461 mutual and stock savings banks on June 30, 1927, were $\$ 9,738,902,000$, and exceeded by $\$ 139,784,000$ the amount reported by 1,524 associations on June 30, 1926. The number of depositors was $14,814,271$, or 347,528 fewer than the year previous. The average amount due each depositor in mutual savings banks was $\$ 712.43$, compared with $\$ 685.51$ in June of last year, and in stock savings banks $\$ 477.96$, as against $\$ 492.13$ last year.

Statements showing information relative to the number of mutual and stock savings banks in each State, the number of depositors, the amount of deposits; the average amount due each depositor, and the per cent rates of interest paid by banks in each State, June 30, 1926 and 1927, with similar information for each year 1914 to 1927, follow:

The total resources of 467 reporting private banks in the country on June 30, 1927, aggregated $\$ 164,148,000$, which was a decrease of $\$ 10,004,000$ in resources as reported by 495 such associations on June 30, 1926. In the States of Texas, Michigan and Iowa, however, private banks are not under State supervision, and returns concerning them for the current year were obtained direct from but 116 of approximately 360 banks in these three States.

Loans and discounts of all reporting private banks were $\$ 90,893,000$, a decrease of $\$ 1,666,000$ in the year. Overdrafts showed a reduction of $\$ 103,000$ and investments in bonds and securities a reduction of $\$ 6,841,000$.

Banking house, furniture and fixtures, $\$ 3,823,000$, were reduced $\$ 1,027,000$ over the figures received last year, but other real estate owned exceeded the previous returns by $\$ 126,000$.

Due from banks, $\$ 22,099,000$, was greater by $\$ 1,205,000$, and lawful reserve was $\$ 158,000$ greater than last year. Checks and other cash items, exchanges for clearing house, cash on hand, and other resources all showed reductions over the previous 12 -month period, the greatest decrease being $\$ 942,000$ reported in cash on hand:

The paid-in capital, $\$ 9,447,000$, showed a reduction of $\$ 448,000$, and surplus, $\$ 9,815,000$ and undivided profits, $\$ 1,710,000$, were $\$ 1,296,000$ and $\$ 60,000$ less, respectively, than on June 30, 1926.

Total deposits were reduced from $\$ 133,249,000$ to $\$ 124,353,000$, the greatest decrease, $\$ 8,539,000$, appearing in individual deposits. Notes and bills rediscounted, $\$ 391,000$, and bills payable, $\$ 12,098,000$, showed increases of $\$ 54,000$ and $\$ 1,150,000$, respectively.

## Summary of the resources and liabilities of these banks follows:

Summary of reports of condition of 467 private banks in the United States at the close of business June 30, 1927.[In thousands of dollars]
RESOURCES
Loans and discounts:
On demand (secured by collateral other than real estate) ..... 1, 211
On demand (not secured by collateral) ..... 1, 000
On time (secured by collateral other than real estate) ..... 5, 087
On time (not secured by collateral) ..... 3, 801
Secured by farm land ..... 7, 843
Not classified ..... 66, 631
Total ..... 90,893

ALL REPORTING BAN゙KS OTHER THAN NATIONAL
The combined resources of 19,265 reporting banks other than national, June 30,1927 , aggregated $\$ 41,550,615,000$, and excèeded by $\$ 1,972,877,000$ the resources of 20,168 banks other than national reporting as of June 30, 1926. The decrease in number of banks was 903.

Loans and discounts amounted to $\$ 23,314,682,000$, and were $\$ 731,326,000$ more than a year ago; overdrafts, $\$ 33,662,000$, showed a reduction of $\$ 6,089,000$, and investments in United States and other miscellaneous bonds and securities, $\$ 10,861,875,000$, showed an increase of $\$ 888,987,000$.

Banking house furniture and fixtures with estimated value of $\$ 899,887,000$ were greater in the current year by $\$ 39,679,000$, and other real estate owned, $\$ 283,656,000$, increased $\$ 40,608,000$.

Amounts due from correspondent banks and bankers, including lawful reserve with the Federal reserve banks or other reserve agents, increased in the year $\$ 121,358,000$, or from $\$ 3,405,042,000$ to $\$ 3,526$,400,000 .

Checks and other cash items showed an increase of $\$ 110,322,000$, while exchanges for clearing house were less by $\$ 39,320,000$. Cásh on hand, $\$ 643,692,000$, was greater by $\$ 7,123,000$ than on the same date the year previous. Other resources were increased $\$ 78,883,000$.

The combined paid-in capital stock of these banks was $\$ 1,902,325,-$ 000 , or $\$ 41,894,000$ more than in the preceding year. Surplus, $\$ 2,507,582,000$, and undivided profits, $\$ 622,785,000$, showed increases of $\$ 234,513,000$ and $\$ 37,201,000$, respectively.

The total deposit liabilities in the current year amounted to \$34,$960,735,000$, and were $\$ 1,546,522,000$ greater than in the preceding year. Individual deposits were increased $\$ 1,103,317,000$; cashiers' checks and certified checks outstanding were greater by $\$ 431,096,000$; due to banks was $\$ 1,251,000$ more, and United States deposits were incréased $\$ 10,858,000$.

Notes and bills rediscounted, $\$ 108,103,000$, and bills payable, $\$ 353,363,000$, showed reductions in the year of $\$ 6,730,000$ and $\$ 32$,990,000 , respectively. Other liabilities were increased $\$ 152,467,000$.

## CONDITION OF NATIONAL BANKS JUNE 30, 1927

The total resources of 7,796 reporting national banks in the continental United States, Alaska, and Hawaii, June 30, 1927, amounted to $\$ 26,581,943,000$, as compared with resources of 7,978 national banks, aggregating $\$ 25,315,624,000$, on June 30,1926 , an increase in the year of $\$ 1,266,319,000$.

Loans and discounts, including rediscounts, were $\$ 13,955,696,000$, and greater by $\$ 538,022,000$ than the figure reported a year ago. The percentage of loans and discounts to total deposits was 64.09 , in comparison with a ratio of 65 per cent the year previous.

United States Government securities owned amounted to $\$ 2,596$,178,000 , and other miscellaneous bonds and securities held were $\$ 3,797,040,000$. These items show increases in the year of $\$ 126,-$ 910,000 and $\$ 424,055,000$, respectively.

Amounts due from reporting banks and bankers, including lawful reserve with the Federal reserve banks were $\$ 3,374,002,000$, an excess of $\$ 9,983,000$ over June 30,1926 . Cash in the banks' vaults increased from $\$ 359,951,000$ to $\$ 364,204,000$, during the 12 -month period.

Banking houses, furniture and fixtures were $\$ 680,218,000$, possessing a reported value of $\$ 47,376,000$ more than on the same date in the year 1926. Other real estate owned decreased from $\$ 115,869,000$ to $\$ 115,817,000$.

The paid-in capital stock of the reporting banks was $\$ 1,474,173,000$ and exceeded by $\$ 61,301,000$ the amount reported a year ago. Surplus and undivided profits of $\$ 1,765,366,000$ were increased $\$ 88,880$,000 in the year.
Liability for circulating notes outstanding amounted to $\$ 650,946,000$, which was a decrease of $\$ 209,000$ since the corresponding date of the year preceding.

Total deposit liabilities were $\$ 21,775,123,000$, and showed an increase of $\$ 1,132,959,000$ in the year. In the classification of these liabilities were balances due to correspondent banks and bankers, including certified checks and cashiers' checks outstanding, $\$ 3,395$,927,000 , which was a decrease in the year of $\$ 9,321,000$. The total of individual deposits, including postal savings, however, was $\$ 18,239,353,000$, and showed an increase of $\$ 1,146,941,000$ over June 30 last year.

Bills payable amounted to $\$ 248,018,000$, and rediscounts, $\$ 120,-$ 024,000 , in comparison with $\$ 253,807,000$ and $\$ 168,149,000$, respectively, in June of 1926.

## Condensed statement of resources and liabilities of all reporting national banks at the close of business June 30, 1927, follows:

## RESOURCES AND LIABILITIES OF ALL REPORTING BANKS IN THE UNITED STATES, ALASK̇A, AṄD INSULAR POSSESSIONS

On June 30, 1927, there were 27,061 reporting banking associations in the continental United States, Alaska; and insular possessions, with combined resources aggregating $\$ 68,132,558,000$, and exceeded by $\$ 3,239,196,000$ the total resources of 28,146 reporting banks as of June 30, 1926.

Loans and discounts, including rediscounts, totaled $\$ 37,270,378,000$, as compared with $\$ 36,233,490,000$ the year previous, an increase of $\$ 1,036,888,000$. Overdrafts, $\$ 43,450,000$, were decreased $\$ 6,020,000$, and investments in United States and other miscellaneous bonds and sécurities, $\$ 17,255,093,000$, were $\$ 1,439,952,000$ more than reported last year.

Banking house, furniture and fixtures, $\$ 1,580,105,000$, and other real estate owned, $\$ 399,473,000$, a total of $\$ 1,979,578,000$, increased in the year $\$ 127,611,000$.

Amounts due from correspondent banks and bañkers, including lawful reserve, totaled $\$ 6,900,402,000$, and showed an increase in the year of $\$ 131,341,000$; checks and other cash items, including exchanges for clearing house, $\$ 2,181,167,000$, exceeded last year's figures by $\$ 143,606,000$, and cash on hand, $\$ 1,007,896,000$, was $\$ 11,376,000$ miore than the returns for June 30, 1926. Other resources were increased $\$ 354,442,000$.

The paid in capital stock, $\$ 3,376,498,000$, showed an increase of $\$ 103,195,000$, and surplus, $\$ 3 ; 764 ; 527,000$, and undivided profits, $\$ 1,131,206,000$, exceeded last year's figures by $\$ 292,559,000$ and $\$ 68,035,000$, rèspectively.

The deposit liability of all reporting banks was $\$ 56,735,858,000$, or $\$ 2,679,481,000$ more than in the previous year. In the total of this item are included individual deposits of $\$ 51,132,554,000$; certified checks and cashiers' checks, $\$ 1,119,943,000$; due to banks, $\$ 4,289,337,000$, and United States deposits, $\$ 194,024,000$. With the exception of amounts due to banks, which showed a decline in the year of $\$ 41,268,000$, each of the other deposit items increased materially, the largest increase being $\$ 2,250,258,000$ and appearing in individual deposits, which include dividends unpaid and postal savings.

Notes and bills rediscounted, $\$ 228,127,000$, and bills payable, $\$ 601,381,000$, a total of $\$ 829,508,000$, showed a reduction in the year
of $\$ 194,286,000$. Other liabilities, $\$ 1,573,689,000$, were increased \$284,713,000.

A summary of the resources and liabilities of these banks follows, together with a statement showing population of each State, number of reporting banks, resources and liabilities, and classifications of loans and discounts, investments, cash, and deposits, June 30, 1927, with a recapitulation by classes of banks:

summary of the combined returns from all reporting banes in the dnited states, alaska, and instlar possessions, june 30, 1927

Summary of reports of condition of 27,061 reporting banks in the United States, Alaska, and insular possessions, at the close of business June 30, 1927

i Includes money held by the Cuban agency of the Federal Reserve Bank of Atlanta.
i Does not include gold bullion or foreign coin outside of vaults of the Treasury, Federal reserve banks, and Federal reserve agents
: Does not include gold bullion or foreign coin outside of vaults of the Treasury, Federal reserve banks, and Federal reserve agents. - These amounts are not included in the to
lion and standard silver dollars, respectively.

The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States
nationalion i Revised figures.
Note.-Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of $\$ 155,420,721$ beld in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury. Federal reserve notes are obligations of the United States and a tirst lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by the deposit witb Federal reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal reserve act. Federal reserve banks mint maintain a gold reserve of at least 40 per cent, including the gold redemption fund which must be deposited with the United States Treasurer, against Fedsaral reserve notes in actual circulation. Lawful money has been deposited wul money has the United States for the redemption of national-bank notes secured by Government bonds.

On June 30, 1927, there were 65 banking associations in the District of Columbia, 13 of which were national, 7 loan and trust companies, 23 savings banks, and 22 building and loan associations. The aggregate assets in the current year were $\$ 369,013,000$, compared to $\$ 351,438,000$ on June 30, 1926.

The combined capital of these associations was $\$ 24,451,000$, an increase of $\$ 307,000$ over the preceding year, and individual deposits of $\$ 285,211,000$ were greater by $\$ 16,546,000$.

Classification of these institutions, with capital, individual deposits and aggregate resources, follows:

|  | Number | Capital | Individual deposits ${ }^{1}$ | Aggregate. assets. |
| :---: | :---: | :---: | :---: | :---: |
| National | 13 | \$10, 527, 000 | \$121, 384, 000 | \$166,663, 000 |
| Loan and trust companies | 7 | 11, 400, 000 | 79, 822, 000 | 106, 694,000 |
| Saivings banks. | 23 | 2, 524, 000 | 36, 118, 000 | 41, 827, 000 |
| Building and loan associati | 22 |  | ${ }^{2}$ 47, 887, 000 | 53, 829,000 |
| Total | 65 | 24, 451,000 | 285, 211, 000 | 369, 013, 000 |

${ }^{1}$ Amounts due to banks not included.
${ }^{2}$ Share payments mainly.
EARNINGS, EXPENSES, AND DIVIDENDS OF BANKS OTHER THAN NATIONAL IN THE DISTRICT OF COLUMBIA

On June 30, 1927, there were 7 trust companies and 23 savings banks in the District of Columbia, with combined capital of $\$ 13,924,-$ 000 and surplus of $\$ 9,956,000$, compared with capital and surplus reported by the same number of associations on June 30, 1926, of $\$ 13,867,000$ and $\$ 9,670,000$, respectively. Dividends declared by these banks in the current year were $\$ 1,443,000$, or $\$ 106,000$ more than in the previous 12 -month period.

The gross earnings totaled $\$ 8,841,000$, an increase of $\$ 43,000$, and expenses paid were $\$ 6,220,000$, or $\$ 266,000$ more than last year.

Deducting from the gross earnings the amount of expenses paid the associations showed net earnings in the period of $\$ 2,621,000$, excluding $\$ 140,000$ recovered on assets previously charged off. Losses. and depreciation charged off in the year were $\$ 552,000$, against a total of $\$ 548,000$ the year previous. The aggregate of net earnings and recoveries in the year, $\$ 2,761,000$, less the losses and depreciation charged off, resulted in a net addition to profits of $\$ 2,209,000$, and showed a decrease in this item of $\$ 216,000$ since the returns for the fiscal year endè June 30, 1926.

The principal earnings received by these associations in 1927 were from interest and discount on loans, $\$ 5,517,000$, and interest, including dividends, on investments, $\$ 1,463,000$. The major expense items. were salaries and wages, $\$ 2,162,000$, and interest paid on time deposits, $\$ 1,357,000$.

Comparative statement showing earnings, expenses, and dividends of these banks for the years ended June 30, 1926, and June 30, 1927, follows.

Earnings, expenses and dividends of trust companies and savings banks in the District of Columbia

${ }^{2}$ Included with other earnings.
${ }^{9}$ Included with interest on time deposits.

## BUILDING AND LOAN ASSOCIATIONS IN THE DISTRICT OF COLUMBIA

The total resources of the 22 building and loan associations operating in the District of Columbia, under the supervision of the Comptroller of the Currency, on June 30,1927 , were $\$ 53,829,000$, and exceeded by $\$ 5,256,000$ the resources of the same number of associations on June 30 of last year.

The loans showed an increase in the year of $\$ 4,159,000$, or from $\$ 46,781,000$ to $\$ 50,940,000$. Installment payments on shares also increased from $\$ 42,794,000$ to $\$ 47,887,000$.

There were 15 of the associations operating on the permanent plan, 6 on the serial plan, and 1 on the terminating plan. One of the associations requires installment dues on payments of $\$ 2.50,1$ payments of $\$ 2$, and the remaining 20 payments of $\$ 1$. On June 30; 1927, these associations had a total membership of 61,243 , as compared with 60,087 members the preceding year. Borrowing and nonborrowing members in the current year were 16,539 and 44,704, respectively.
The statement following discloses the number of associations, aggregate loans, installments paid on shares, and total resources on June 30 of each year 1909-1927. Summaries of the resources and liabilities of the individual associations for the six months ended June 30, 1927, together with consolidated statements of assets and liabilities, and receipts and disbursements for the six months ended December 31, 1926, and June 30, 1927, are published in the appendix of the report of the Comptroller of the Currency.

BUILDING AND LOAN ASSOCIATIONS IN THE UNITED STATES
Statistics obtained from Mr. H. F. Cellarius, secretary, United States League of Local Building and Loan Associations, with headquarters at Cincinnati, Ohio, disclose that for the fiscal year ended 1926, the latest date for which complete information is available, there were 12,626 building and loan associations in the United States, having a membership of $10,665,705$ and assets totaling $\$ 6,334,103,807$. These figures show a net increase in membership for the year of 778,708 , and an increase in assets of $\$ 824,927,653$, as compared with the increase in the previous year of $\$ 743,238,957$. In the 12 -month period $\$ 1,945,000,000$ was loaned on mortgage security, and it is noted the total investment of the building and loan associations in mortgage loans in the various States aggregated \$5,852,689,591 , or 92.4 per cent of the assets as compared with 92.3 per cent for the preceding year.

Pennsylvania again made the largest increase last year in aggregate assets, gaining $\$ 140,000,000$, with New Jersey second, $\$ 114,528,201$. Other States with increases over $\$ 10,000,000$ were: Ohio, $\$ 80,811,032$; Massachusetts, $\$ 56,238,224$; California, $\$ 49,449,097$; New York, $\$ 39,617,343$; Illinois, $\$ 38,105,554$; Wisconsin, $\$ 32,734,104$; Indiana, \$29,424,113; Maryland, $\$ 28,000,000$; Louisiana, $\$ 24,262,576$; Missouri, $\$ 22,454,167$; Texas, $\$ 18,832,713$; Michigan, $\$ 16,585,652$; Kansas, $\$ 14,047,462$; Washington, $\$ 12,855,563$; Nebraska, $\$ 11,692,571$; Kentucky, $\$ 10,511,475$; and Oklahoma, $\$ 10,281,418$.

The table following shows by States the number of associations, total membership; and total assets, etc., for the fiscal year ended in 1926:

## MORTGAGE LOAN INVESTMENTS OF BUILDING ASSOCIATIONS

In the comparative table following is shown, by States, the amount of mortgage loans held by building and loan associations in 1925 and 1926, together with the amount of increase of such mortgage loans in 1926 over the previous year, also the percentage of mortgage loans outstanding to total assets:

## 1 Decrease.

## FAILURES OF BUILDING AND LOAN ASSOCIATIONS, 1920-1926

During the year 1926, 12 building and loan associations were reported by the various State departments as having been placed in liquidation, 9 of which were in Pennsylvania, 1 in Maine, 1 in Michigan and 1 in North Carolina. Of the total number of these failures 7 were due to defalcations, 1 was a promoted company which was otherwise mismanaged, 3 were due to bad loans which had been made, and 1 small association was placed in liquidation because its assets had depreciated and its earning capacity impaired. The loss due to failures for the year 1926 amounted to $\$ 380,725$.
64761-FI 1927-60

The following is a summary of the building and loan association failures and losses for the years 1920 to 1926, inclusive, together with a statement of the total number and total resources of these associations for each year and annual per cent of loss to total resources:

MONETARY STOCKS IN THE PRINCLPAL COUNTRIES OF THE WORLD
Figures furnished by the Mint Bureau for the calendar year 1926, with respect to the monetary stock of the principal countries of the world, show the total of gold aggregated $\$ 9,621,645,000$, of which $\$ 9,581,301,000$ was in banks and public treasuries, and the balance, $\$ 40,344,000$, was in circulation. Silver stock amounted to $\$ 4,230$,662,000 . According to revised figures for the calendar year ended 1925 the gold stock was $\$ 9,277,662,000$, and silver, $\$ 4,249,345,000$. The figures herein contained for the total gold stock at the end of the calendar year 1926, therefore, showed an increase of $\$ 343,983,000$ over 1925 , while the silver stock was reduced $\$ 18,683,000$.

The statement following shows the monetary stock of the principal countries of the world at the end of the calendar year 1926:
[Statement omitted here, but to be found on page 780 of this volume.]

## FEDERAL LAND BANKS

The resources of the 12 Federal land banks September 30, 1927, aggregated $\$ 1,217,970,000$, which was an increase of $\$ 79,428,000$ over the resources reported on September 30, 1926.

Net mortgage loans, the principal asset of these associations, amounted to $\$ 1,143,130,000$, and showed an increase in the year of $\$ 85,913,000$. United States Government bonds and securities held, $\$ 19,553,000$, were reduced in the year $\$ 14,801,000$, while cash on hand and in banks increased from $\$ 10,372,000$ to $\$ 17,044,000$.

The capital stock of these associations, $\$ 61,238,000$, was greater by $\$ 4,724,000$ than this item for the previous year, and $\$ 59,834,000$ of the capital stock in the current year was subscribed by national farm loan associations. The legal reserve was reported amounting to $\$ 9,911,000$, surplus, reserves, etc., $\$ 331,000$ and undivided profits $\$ 4,169,000$. The combined capital, reserves, surplus, and profits aggregated $\$ 75,649,000$, compared with $\$ 69,381,000$ a year ago.

Statement of the assets and liabilities of these banks September 30, 1927, follows:

Consolidated statement of condition of the 12 Federal land banks at the close of Assets:

## JOINT-STOCK LAND BANKS

Resources of the 83 joint-stock land banks on September 30, 1927, aggregated $\$ 653,318,000$, in comparison with resources of $\$ 671,926$,000 on September 30, 1926.

Mortgage loans were decreased from $\$ 614,639,000$ to $\$ 609,535,000$, and interest accrued but not due on mortgage loans showed a reduction of $\$ 176,000$; United States Government bonds and securities were $\$ 11,994,000$ less, and cash on hand and in banks, $\$ 9,453,000$, showed a reduction of $\$ 4,824,000$.

The paid in capital stock was $\$ 40,856,000$, which shows a decrease in the year of $\$ 3,868,000$, while paid in and earned surplus, $\$ 3,681,000$, was greater by $\$ 135,000$. Legal reserve amounted to $\$ 4,561,000$, other net worth accounts $\$ 1,358,000$, and undivided profits $\$ 2,375,000$. The total net worth of these associations was $\$ 52,832,000$, compared to $\$ 56,668,000$ on September $30,1926$.

[^108]Statement of the assets and liabilities of these banks, follows:

Total liabilities and net worth
653, 317, 927. 59

On September 30, 1927, the aggregate resources of the 12 Federal intermediate credit banks were $\$ 110,293,000$, compared with resources the year previous of $\$ 123,634,000$.

Direct loans were reduced in the year from $\$ 35,951,000$ to $\$ 17,-$ 733,000 , while rediscounts increased from $\$ 42,539,000$ to $\$ 45,145,000$. Capital stock callable from United States Treasury, $\$ 35,000,000$, was reduced $\$ 1,000,000$ in the 12 -month period. Cash on hand and in banks, $\$ 4,383,000$, showed an increase of $\$ 775,000$.

The subscribed capital stock of these banks was $\$ 60,000,000$, the same as last year, while surplus, undivided profits, and other reserves showed reductions. Debentures outstanding were $\$ 45,050,000$ as against $\$ 55,240,000$ last year, and notes and bills payable, $\$ 250,000$,
showed a marked decrease. Notes and bills rediscounted also decreased in the year $\$ 110,000$.

The statement following is a consolidated return of the resources and liabilities of these banks:

Consolidated statement of condition of the 12 Federal intermediate credit banks as of the close of business September 30, 1927
Assets:

Total liabilities
$110,292,970.51$

## NATIONAL AGRICULTURAL CREDIT CORPORATIONS

The National Agricultural Credit Corporations of Fort Dodge, Iowa, and of Des Moines, Iowa, were voted into voluntary liquidation on October 25, 1926. As none has been organized since then, only one, the Pacific National Agricultural Credit Corporation of Fresno, Calif., remains in operation.

The two Iow a corporations were organized to answer the temporary needs of the sections in which they were located and they were discontinued when in the judgment of their shareholders the purpose for which they had been organized had been fulfilled.

The growth of the Pacific National Agricultural Credit Corporation, which is authorized to do business in the Pacific Coast States and a few contiguous ones, indicates the need for it as permanent rather than temporary. A comparison of the statement of this corporation for October 10, 1927, with the statement of the same corporation for

June 30, 1926, as it appeared in the report of the Comptroller of the Currency for the year 1926, will show that its resources have more than doubled during an interval of about 16 months. Further comparison will also show that on October 10, 1927, the resources of the one remaining corporation were over 50 per cent more than the combined resources of all corporations in operation on June 30, 1926.

In the statement following is shown a summary of the resources and liabilities of the Pacific National Agricultural Credit Corporation of Fresno, Calif., at the close of business October 10, 1927:

|  | resources |
| :---: | :---: |
| Cash on hand and in banks. | \$66, 489. 93 |
| United States securities...- | 262, 906. 01 |
| Loans | 3, 212, 294. 01 |
| Furniture and fixtures | 3, 069. 70 |
| Accounts receivable | 844. 74 |
| Customers funds held in trus | 42, 195. 91 |
| Other assets | 10, 281.51 |
| Total. | 3, 598, 081. 81 |
|  | liabilities |

| Total | 3, 598, 081. 81 |
| Note.-Trust securities not | luded. |

## UNITED STATES POSTAL SAVINGS SYSTEM

The resources of the United States Postal Savings System on June 30, 1927, according to information obtained through the courtesy of the Third Assistant Postmaster General, under whose supervision the system operates, aggregated $\$ 155,901,000$ and showed an increase of $\$ 14,089,000$ in the year.

The total number of depositors on June 30, 1927 was 411,394 , an increase of 12,089 in the year, and the average amount of deposits per depositor was $\$ 358.19$, compared to $\$ 336.03$ a year ago.

Withdrawals of postal savings funds in the year were $\$ 93,960,000$, and the balance to the credit of depositors on June 30, in the current year, was $\$ 147,359,000$, an increase in the period of $\$ 13,181,000$. Surplus funds, consisting of interest and undistributed earnings subject to future allocation of maturing interest changes increased in the year from $\$ 203,000$ to $\$ 206,000$.

Comparative statements in relation to the operation of the Postal Savings System for the years ended June 30, 1926, and 1927, follow:

Comparative balance sheet for June S0, 1927, and June S0, 1926

Comparative statement of interest-earning resources and interest-bearing liabilities for June s0, 1927, and June 30, 1926

Comparative statement of interest and profts for the fiscal years ended June 30, 1927, and June 30, 1926

${ }^{1}$ These totals include the amount of $\$ 3,533,912$ transferred between depository offices.

- A minus sign denotes decrease.

## SCHOOL SAVINGS BANKING

According to information compiled by the savings bank division of the American Bankers Association the net savings of school children in 12,678 reporting school savings banks in the continental United States on June 30, 1927, aggregated $\$ 9,464,178.93$, and showed an increase of $\$ 693,447.88$, or 7.9 per cent since June 30,1926 . The number of pupils enrolled in schools having a school savings system was $4,658,156$, an increase of 7.8 per cent; the number of pupils participating in school savings, $3,815,785$, increased 12.1 per cent, and deposits aggregating $\$ 23,703,436.80$, were 15.7 per cent more than on June 30, 1926. Bank balances at the close of the current fiscal year were $\$ 39,137,073.91$, and exceeded by $\$ 7,153,021.28$ the amount reported a year ago.

Statistics relative to school savings banks in the 45 reporting States and the District of Columbia for the fiscal years ended June 30, 1926, and 1927, with comparative yearly totals beginning 1920, are shown in the following table:

School savings by States, 1925-26 and 1926-27

## RESODRCES OF LEADING FOREIGN BANKS OF ISSUE

The total resources of 33 foreign banks of issue converted at the existing rate of exchange on or about June 30, 1927, were $\$ 14,588$,485,000 , in comparison with resources of $\$ 12,419,965,000$ reported by 32 foreign banks on June 30, 1926.
The statement following, prepared by the Federal Reserve Board, shows total assets of the 33 banks of issue on the dates indicated, designation of their local currency, total amount of assets, rates of exchange, and total assets converted at rate of exchange on given dates:

Total assets of principal central banks about June 30, 1927
[In thousands of local currency and of dollars]

1 Pạr of exchange, as no quotation available on given date.

## EXPENSES OF THE CURRENCY BUREAU

By reference to the table following, showing in detail expenses relating to the maintenance of the Currency Bureau for the fiscal year ended June 30, 1927, it will be noted that the aggregate expenses were $\$ 5,493,325.07$, of which $\$ 1,054,349.42$ were paid from appropriations and $\$ 4,438,975.65$ reimbursements by the banks. The salary rolls aggregated $\$ 469,762.96$, of which $\$ 217,391.77$ were paid from appropriations and the remainder from funds reimbursed by the banks.

Taxes paid by national banks on circulating note issues amounted to $\$ 3,253,461.97$. Deducting from this amount the expenses of the bureau paid from congressional appropriations, $\$ 1,054,349.42$, leaves the net income to the Government on account of the tax on circulation at $\$ 2,199,112.55$.

Expenses incident to maintenance of Currency Bureau and net income derived by Government from taxes on national-bank notes, fiscal year ended June 30, 1927

# REPORT OF THE COMMISSIONER OF INTERNAL REVENUE 

> Treasury Department, Office of Commissioner of Internal Revenue; Washington, September 15, 1927.

Sir: I have the honor to submit the following report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1927:

## COLLECTIONS ${ }^{1}$

The operations of the Internal Revenue Bureau during the fiscal year 1927 under the revenue act of 1926 and other internal revenue tax legislation resulted in the collection of $\$ 2,865,683,129.91$, compared with $\$ 2,835,999,892.19$ collected during the fiscal year 1926 , an increase of $\$ 29,683,237.72$, or 1 per cent.

The income-tax collections during the fiscal year 1927 amounted to $\$ 2,219,952,443.72$, compared with $\$ 1,974,104,141.33$ collected from income during the fiscal year 1926, an increase of $\$ 245,848$,302.39 , or 12.5 per cent. During the first six months of the fiscal year 1927 the collections embraced payments of the third and fourth installments of the tax due on incomes in the calendar year 1925, together with additional collections on assessments made for prior years, which amounted to $\$ 1,042,672,913.57$, compared with $\$ 844,-$ 649,733.47, representing payments of income tax for the corresponding period of the fiscal year 1926, an increase of $\$ 198,023,180.10$, or 23.4 per cent. During the last six months of the fiscal year 1927 the collections embraced payments of the first and second installments of the tax due on incomes in the calendar year 1926, together with additional collections on assessments made for prior years, which amounted to $\$ 1,177,279,530.15$, compared with $\$ 1,129,454,407.86$, representing payments of income tax for the corresponding period of the fiscal year 1926, an increase of $\$ 47,825,122.29$, or 4.2 per cent. The tax collected during the fiscal year 1927 on the returns of net incomes of individuals and corporations filed for both years 1925 and 1926 was at the rates provided for in the revenue act of 1926. The tax collected on corporations, however, during the first half of the fiscal year 1927 was at the rate of 13 per cent, effective for the tax year 1925, and during the last half of the fiscal year 1927 was at the rate of $131 / 2$ per cent, effective on incomes earned in the year 1926 .

The miscellaneous collections arising from objects of taxation other than income taxes amounted to $\$ 645,730,686.19$ during the fiscal year 1927, compared with $\$ 861,895,750.86$ collected during the fiscal year 1926, a decrease of $\$ 216,165,064.67$, or 25.1 per cent. There was an increase of $\$ 5,503,766.17$, however, in the taxes col-

[^110]lected from tobacco manufactures which was due to the large increase in the manufacture and sale of cigarettes. The principal objects of taxation showing decreases for 1927 were as follows: Estates of decedents in the amount of $\$ 15,701,184.13$; automobiles and motor cycles, $\$ 46,695,364.59$; documentary stamps, $\$ 17,197,742.40$; and admissions to theaters and other places of amusement, $\$ 6,040,039.97$. The decrease in revenue from these miscellaneous taxes is accounted for by the reduction in tax rates and other provisions of the revenue act of 1926. Further loss in revenue in 1927 exceeding $\$ 130,000,000$ was caused by the repeal of various miscellaneous taxes; including the tax on corporation capital stock. The loss in revenue, however, from the repeal of the capital stock tax was in a great measure offset by the increased tax levied on incomes of corporations provided for by the revenue act of 1926 .

The collections of internal-revenue taxes for the fiscal year 1927 and the last seven preceding years are summarized in the following table:

| Sources | 1927 | 1926 | 1925 | 1924 |

Note.-The figures concerning internal-revenue receipts as given in the above statement differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue stamps and deposits of interna] revenue coilected through customs offices, while the latter represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited or are not reported to the Treasury as deposited until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury.

## COST OF ADMINISTRATION

The expenditures in administering the internal revenue tax laws for the fiscal year 1927 were $\$ 32,967,764.17$, not including expenditures for refunding internal-revenue collections and taxes illegally collected, which are in no sense administrative expenses. The aggregate receipts of internal revenue were $\$ 2,865,683,129.91$, which makes the cost of operation for the fiscal year $1927 \$ 1.15$ for each $\$ 100$ collected, compared with $\$ 1.23$ for each $\$ 100$ collected for the fiscal year 1926, or a reduction of 6.5 per cent.

## Income Tax Unit

The fiscal year 1927 was the most productive in the history of the Income Tax Unit. Progress toward a current state surpassed that of any similar period. The increased production, due to improvements in organization and procedure, was accomplished with a reduced personnel and at a less cost than in prior years.

## aUdit of returns

The total number of income and excess profits tax returns audited was $2,482,021$ ( $1,772,137$ individual and partnership and 709,894 corporation), compared with a production of $2,155,933$ for the previous fiscal year. This production exceeded that of the next highest year, 1924, by 152,830 returns.

While keeping current with new work received, particular attention was directed to the completion of the audit of returns for prior years. Notwithstanding a large number of such returns were reaudited, as a result of claims filed or under decisions by the Board of Tax Appeals or the United States courts, large reductions were made in the returns outstanding for the years 1917 to 1924, inclusive. This is illustrated in the following table, which discloses the total number of returns by tax years, remaining open, compared with the number on hand at the close of the three previous fiscal years and the percentage of the total returns filed uncompleted on June 30, 1927:

| Return years | On hand June $30, ~$ 1923 | On hand June 30, 1924 | On hand June 30, | $\begin{gathered} \text { On hand } \\ \text { June } 30, \\ 1926 \end{gathered}$ | On hand June 30, 1927 | Total audited to date | Percentage remaining open June 30, 1927 |

| 1924 |  |  | 975, 298 | 170, 786 | 107, 607 | 1, 024, 486 | 9.51 |
| 1925 |  |  |  | 253, 402 | 289, 275 | 573, 679 | 33.52 |
| 1926 |  |  |  | 11,949 | 30, 433 | 1, 413,147 | 2.11 |
| Total. | 3,032, 544 | 2, 430,055 | 2,011,084 | 742, 740 | 474, 535 | 13, 001, 372 | 3. 52 |

[^111]'The above tabulation shows that the audit of returns for the years 1917 to 1922, inclusive, is practically completed, since there are outstanding for each of these years less than 1 per cent of the total returns filed, the majority of which cases are open as a consequence of claims filed by taxpayers. The audit of returns for the years 1923 and 1924 is nearly current. There remain open only 3 and 10 per cent, respectively, of the total returns received for those tax years. That the unit is conducting, in effect, a current audit of returns filed for the later years is evidenced by the progress made in the audit of returns for the years 1925 and 1926. There have been closed to date for these years 573,679 and $1,413,147$ returns, respectively. The large closing of returns for the year 1926 chiefly is due to the change in procedure which directed reference to the unit in Washington of all 1040 returns filed for that year. During each of the years 1923, 1924, and 1925, approximately $1,250,000$ of these returns were not sent to Washington.

The net reduction effected by the unit in the number of returns outstanding for all years was 268,215 . On June 30, 1927, exclusive of the returns in the 60 -day file, 474,535 returns were under consideration, compared with 742,740 returns unaudited on June 30, 1926.

REVENUE AGENTS' SERVICE
The number of reports of field examinations submitted was 688,816 for 1927 , compared with 574,246 for 1926, an increase of 20 per cent. The number of returns sent to the field for examination was 685,715 , compared with 830,498 for the previous fiscal year.

The reports forwarded to Washington afforded the basis for closing returns for the years 1917 to 1925 , inclusive. Of the 688,816 investigations completed, 306,035 represented thorough field investigations, 237,335 were office audits and surveys, and 145,446 were examinations of specific questionable items without a general audit.

Recommendations were made by agents conducting the examinations for the closing of 155,227 returns by assessment of additional tax, of 51,253 returns through the issuance of certificates of overassessment, and of 432,336 returns without change in tax liability.

Of the 206,480 cases forwarded by internal revenue agents in which a recommendation was made for change in tax liability, 128,478 were forwarded with taxpayer's agreement for the immediate assessment of the deficiency or the issuance of certificate of overassessment.

In furtherance of the policy of decentralization, arrangements were completed in the field divisions to conduct an office audit of returns which were classified for this purpose and which do not require a complete examination of books and records. This procedure produced satisfactory results. As a result of these office audits, 45,886 returns were closed in the field. This result was accomplished by the permanent assignment to the field of technical personnel from the unit at Washington and by the occasional detail of revenue agents. This has proved an advantage to the taxpayer, whose previous contact with the bureau was only through correspondence. The contact has also been a benefit to the Government in that it has educated the taxpayer to file more accurate returns for subsequent years. It has effected also a notable economy of field officers' time.

In addition to the production enumerated above, the field force classified $2,358,673$ returns, filed for the year 1926, accepting 1,701,026 as filed, designating 322,564 for office audit (which will be conducted in the field), and indicating that 295,083 returns will require a thorough field investigation.

On June 30, 1926, there were 513,312 uncompleted returns in the field. On June 30, 1927, this balance had been reduced to 438,936 .

## ADJUSTMENT OF CLAIMS

The number of claims scheduled as adjusted during the year was 66,755 . In addition, 52,262 certificates of overassessment were scheduled in cases in which no claims were filed. Of the claims scheduled, 40,773 were allowed. The total amount involved, including overassessments in cases against which no claims were filed, was $\$ 304,264,847.42$, of which amount $\$ 82,614,787.25$ was refunded and $\$ 221,650,060.17$ abated or credited. The amount of interest paid on amounts refunded or credited was $\$ 21,243,900.53$. The number of claims rejected was 25,981 , involving $\$ 520,768,614.82$.

The number of claims received was 47,808 , involving $\$ 462,896$,449.48, compared with 72,195 , involving $\$ 1,008,290,704.43$ for the previous year. The number of claims on hand at the end of the fiscal year 1927 was 17,462 , compared with 29,234 at the close of the fiscal year 1926, or a decrease of 11,772 . This reduction in unadjusted claims is further evidence of the progress of the Income Tax Unit in bringing its work to a current basis. The balance of claims outstanding, 17,462 , is the lowest the unit has ever had on hand, and was obtained by adjustment of claims as quickly after their receipt as possible.

The scheduling of 52,262 certificates of overassessment, in cases where claims had not been filed, is noteworthy, since in these cases taxpayers were benefited by adjustments favorable to them without having made formal requests therefor.

While keeping current with the work of adjusting claims for all years as filed, special attention was given to the adjustment of claims filed against assessments made in 1922 and prior years. As a result a net reduction of 4,518 in such claims was accomplished, as indicated by the following tabulation:

| Amounts of claims | On hand June 30, 1926 | On hand June 30, 1927 | Net reduction |
| :---: | :---: | :---: | :---: |
| Less than $\$ 1,000$. | 3,317 | 290 | 3,027 |
| Between \$1,000 and \$50,000 | 2, 400 | 986 | 1,414 |
| In excess of $\$ 50,000 \ldots . .$. | . 449 | - 372 | ... . . 77 |
| Total. | -6,166 | 1,648 | 4,518 |

## ADDITIONAL REVENUE

During the year, $\$ 276,096,454.33$ was assessed in additional taxes. Included in this sum is an amount of $\$ 32 ; 704,156.33$ which was assessed without preliminary hearing before the bureau, it being felt that collection was in jeopardy. This, however, did-not affect the
taxpayers' right of appeal to the Board of Tax Appeals. During the previous year $\$ 148,867,165.26$ was entered under jeopardy assessments.

The great decrease in assessments of this nature during the current year was made possible by provisions contained in sections 274, 277, and 278 of the revenue act of 1926 , which allow the extension of the statute of limitations by the mailing of a 60-day letter to the taxpayer within the statutory period to (1) 120 days from the date of the $60-$ day letter if no appeal. is filed with the Board of Tax Appeals, or (2) within 60 days after the final decision of the board where an appeal has been filed.

Additional amounts assessed-Jeopardy taxes,; fiscal year ended June 30, 1927—Con.

Total additional taxes assessed, regular and jeopardy, fiscal year ended June 30, 1927

Further revenue in the amount of $\$ 34,703,663.24$ was made possible of immediate collection through the rejection of claims in abatement and claims for credit.

## ORGANIZATION CHANGES

The following organization changes were effected during the year. These changes, all in the direction of economy of operation and more efficient management, were the direct results of the policy of the decentralization of activities. The changes have largely reduced administrative overhead, have established a better coordination of effort, and enabled the unit to bring its work to a current condition:

1. On August 1, 1926, the service division was abolished and its work and personnel transferred to a service section, which was created.
2. On October 16, 1926, section No. 2 of personal audit division and section No. 23 of corporation audit division were abolished and the work and personnel transferred to the other sections of the respective divisions.
3. On January 1, 1927, the field service of the Income Tax Unit was reorganized. The eight supervisory districts were discontinued as such. Each division thereafter was constituted an independent one, each revenue agent in charge being made directly responsible to the head of the unit. This change was made because the duties and responsibilities of the supervising internal-revenue agents, incidental to the operation of their own division, had increased to such an extent, as a result of the decentralization of activities, that it was felt a continuation of the supervisory districts would be prejudicial to the welfare of all field divisions. The general supervision and inspection performed by the supervising internal-revenue agents thereafter attached directly to the office of the head of the unit at Washington.
4. On January 17, 1927, messengers, who theretofore had been attached to the service section, were transferred and placed under the jurisdiction of the divisions and sections to which they previously had been assigned.
5. On March 11, 1927, unit No. 3 of the stenographic subsection was abolished and its work and personnel transferred to the other stenographic units of the section.
6. On May 31, 1927, the enginieering division was abolished as a division and created as an engineering section, which was attached to the consolidated returns audit division. The engineering section is charged with all duties and responsibilities heretofore devolving on the engineering division. As a result of the change, all returns in which engineering features are involved hereafter will be audited in the consolidated returns audit division. This procedure will effect a considerable saving in time and money, as it is now unnecessary to transfer cases from one division to another. In addition, it will afford a better coordination of activities with a more economical management.

POLICY AND PROCEDURE CHANGES
Nine important changes in policy and procedure were placed in effect during the year. The changes were made in order to obtain increased speed in the audit of returns while at the same time maintaining the highest degree of accuracy, and to accomplish this with
the lowest possible expenditures for technical and clerical effort. The changes were as follows:

1. On November 12, 1926, instructions were issued directing that all revenue agents' reports, copies of audit correspondence, and memoranda thereafter be filed with the returns involved.
2. On November 18, 1926, procedure was revised relative to the adjustment of offers in compromise of ad valorem penalties, where the returns involved are pending in the field for examination. Under the new procedure, when an offer of this character is accepted, a letter is mailed to the revenue agent in charge advising him of the acceptance of the offer. A copy of this"letter bearing a "nonaudit" stamp is forwarded to the records division, where it will be retained until the return is received from the field, at which time it is forwarded, with the return, to the preliminary audit section, where the return is stamped to indicate the action taken on the offer in compromise. The return and revenue agent's report thereafter is disposed of in the usual manner.
3. Under date of February 12, 1927, instructions were issued, directing that notifications be mailed, when returns are closed, to all corporate taxpayers and to individuals who filed taxable returns, regardless of the result disclosed by the audit. Theretofore, notification was given only in the event of proposed changes in tax liability. Many communications commenting on this procedure received by the unit indicate a favorable reaction on the part of taxpayers.
4. Due to the fact that the Income Tax Unit receives all 1040 returns, of which approximately 70 per cent will have been accepted by the revenue agents prior to their transmittal to Washington, it was decided to file these accepted returns without preparing typed control cards for them. The elimination of the typing and consequent verification of the control cards will permit the unit to save approximately $\$ 37,500$ annually. This substantial saving is accomplished without impairing efficiency, inasmuch as the returns are filed alphabetically by collection districts and consequently are readily accessible.
5. On February 4, 1927, directions were issued prescribing the procedure to be followed and the charge to be made for copies of returns, revenue agent's reports, schedules, etc., when requests for the same are received from taxpayers.
6. In order that those decisions of the Board of Tax Appeals which may result in additional taxes for years subsequent to those involved in the appeals will be taken into consideration in the audit of returns for such years, instructions were issued directing the examination of all decisions of that tribunal with a view of auditing the subsequent years in accord therewith.
7. Rough-draft reports prepared in field divisions and forwarded to the Income Tax Unit in Washington are retained in Washington after review instead of being returned to the field.
8. In all cases where an audit of a taxpayer's return discloses that the provisions of section 220 of the revenue acts of 1921, 1924, and 1926 may be applicable, the correct statutory net income for the year or years involved is determined by the audit division handling the case before the file is transmitted to the rules and regulations section for consideration of the question of the application of section 220.
9. On June 10, 1927, instructions were issued directing that all transportation and public utilities cases be audited in the consolidated returns audit division. The centralization of all cases of this nature in one division eliminated divided responsibility with respect to that type of case and established a more uniform audit of such returns.

CLEARING DIVISION
The preliminary audit section of the clearing division is charged with the responsibility of reviewing returns designated as "accepted" by revenue agents in the field divisions. The purpose of the review is to insure uniformity of action with respect to the worl in the offices of the various revenue agents in charge and to insure that the preliminary audit has been aecurately performed in the offices of collectors of internal revenue.

This section also reviews returns and reports in cases with respect to which the field divisions have obtained agreements. All claims sent to $W$ ashington are reviewed by this section to determine whether they may be closed or should be referred to the field for investigation. Cases referred to the unit by the general counsel for recomputation in accordance with decisions by the Board of Tax Appeals also are referred to this section. Approximately 630,000 of these types of cases were closed in the preliminary audit section during the year.

The claims control section received and recorded 47,818 claims. Claims to the number of 66,753 , and 52,262 certificates of overassessment in cases in which no claims were filed, were scheduled.
The proving section received and proved 855,129 taxable and 468,182 nontaxable returns and entered assessments of deficiency taxes on 161,842 returns. This section also adjusted and closed, on the basis of offers in compromise, 13,144 special penalty cases and 69,492 specific penalty cases.

The statistical section of the clearing division rendered complete reports of "Statistics of Income" for the years 1924 and 1925. These reports were compiled from income-tax returns of individuals, partnerships, and corporations reporting income for 1924 and 1925, from capital-stock tax returns covering the fiscal years ended June 30, 1925 and 1926, and from estate and gift tax returns for the calendar years 1925 and 1926, respectively. A preliminary report was submitted on "Statistics of Income," compiled from the 1925 incometax returns of individuals and corporations filed during the period from January 1, 1926, to August 30, 1926. Work is now in progress on the "Statistics of Income" from the individual and corporation returns for 1926 , which returns are being filed in the current year.

Numerous confidential compilations for administrative and legislative use, as well as compilations of specialized data in response to requests from other departments of the Government, were prepared during the year.

## RECORDS DIVISION

The functions of this division are primarily to control and transfer income-tax returns, reports of revenue agents and related papers, to audit withholding returns and related claims, to assemble information returns, and to furnish copies of returns and related papers to taxpayers.

There were furnished during the year 12,634 copies of returns, reports, and schedules.
The files section controls, assembles, and routes income-tax returns and related papers to the several divisions of the unit, to the office of the general counsel, to the collection districts, and revenue agents' divisions. Returns, reports, and other necessary papers in the cases of bankrupt and dissolved corporations also are assembled in this section. During the year 275,191 cases were assembled and routed to their proper destinations.

The distribution section controlled the transfer of 542,537 returns and related papers.
The sorting section audited and closed 13,234 withholding returns and examined 343,772 information returns. As a result of the audit of withholding returns, there was assessed $\$ 13,758,029.04$, compared with $\$ 10,892,133.70$ the previous year. Of 103,229 individual returns compared with information returns, 4,950 indicated unreported income to the amount of $\$ 15,700,000$. The number of certificates sorted was $9,175,843$.

## SERVICE SECTION

The stenographic subsection of this section made 30,901 assignments of stenographers. The number of pages written by stenographers was $2,609,308$ and by typists $1,081,758$, a total of $3,691,066$ pages.

The photostat subsection made 416,866 photostatic copies and photostated 19,934 returns.

## RULES AND REGULATIONS SECTION

The primary function of the section is to answer inquiries of taxpayers on technical and administrative questions. In addition to information furnished in conference, the section answered 58,932 inquiries. The section also answered inquiries submitted by the audit divisions, collectors, and revenue agents covering different phases of income tax law and administration.

The preparation of all income-tax forms is delegated to this section. During the year many of the forms were revised to provide for greater simplicity and for certain data needed for administrative purposes.

A subject file is maintained, making immediately available thousands of rulings and court decisions on income-tax matters.

There were prepared and issued weekly, quarterly, and semiannually bulletins and digests of income-tax rulings. During the year Bulletin A, containing all of the income-tax forms under the revenue act of 1926, was prepared, as well as a revision of Bulletin . B, entitled "Withholding of Income Tax at the Source and Information at the Source."

This section obtained the necessary evidence and prepared rulings in all cases involving claims of tax exemption under section 231 of the various revenue acts, under which some 14 classes of organizations are granted exemption from filing returns and paying income tax.

Improvements in organization and procedure adopted during the year permitted the Income Tax Unit materially to reduce its force. A reduction to the number of 734 was made in the Washington office. On June 30, 1927, the technical personnel in Washington was 1,200 and the number of clerks 1,430 , a total of 2,630 , while on June 30, 1926, the technical employees numbered 1,489 and the clerical force 1,875 .

The field force was increased by 421 technical and clerical.employees. There were assigned to the field as of June 30, 1927, 2,767 revenue agents and 725 clerks, or a total of 3,492 , while at the close of the previous year there were 2,442 revenue agents and 629 clerks, or a total of 3,071 . Of the additional personnel assigned to the field, 146 auditors and 62 clerks were transferred from the Washington office.

The net reduction in personnel of 313 employees will result in a direct annual saving in salaries of approximately $\$ 450,000$.

## SURPLUS PROPERTY

The reduction in personnel effected in the Washington force permitted the Income Tax Unit to release office furniture and equipment valued at $\$ 32,450.71$. This material was transferred to the administrative division of the bureau for reissuance.

## IMPROVEMENTS PLANNED

Improvements planned for the fiscal year 1928 will be directed toward greater efficiency with decreased cost of operation. Many of the changes will be in the nature of refinements of the policies and reorganizations effected during the previous fiscal year. The projected improvements are as follows:

The personal and corporation audit divisions will be abolished and a field audit review division established, whose main function will be the reviewing of the findings of the field.

The special assessment section will be discontinued as an independent section and assigned to and made a part of the proposed new field audit review division.

The general conference room located at Treasury Annex No. 2 will be abolished, and necessary conferences will be conducted under the direction of the appropriate division heads.

The central point of contact with the taxpayers or their representatives will be continued from the information desk at Treasury Annex No. 2.

A committee to be known as the special advisory committee will be established in the office of the Commissioner of Internal Revenue. This committee will examine into the reasons underlying the accumulation of pending income-tax cases in the bureau. It will also consider and act upon, subject to the approval of the commissioner, the following cases:
(a) Cases pending in the bureau on which the advice of the commissioner is desired as to questions of bureau policy.
(b) Cases arising out of the mailing of the deficiency letters as prescribed by the revenue act of 1926 .
(c) Cases not falling in items (a) or (b) submitted to it by the office of the commissioner.

The committee also will be required to handle all functions formerly performed by the 60 -day conference units of the personal and corporation audit divisions, with such modification as may be deemed necessary.

To permit the taxpayers to close their cases promptly by payment of additional taxes, in cases with respect to which the taxpayers and the bureau, through its field agents, have reached agreements, procedure will be perfected directing the routing of such cases from the revenue agents in charge to the collectors for the appropriate districts.

The policy of changing the location of offices of revenue agents in charge better to meet the needs of the field service and the public will be continued.

During the ensuing year a committee will be appointed to study all forms and letters used in the Income Tax Unit and to make appropriate recommendations toward their standardization.
To obviate the necessity for purchasing copies of depositions taken for use before the Board of Tax Appeals where revenue agents appear on behalf of the Government in cross-examining witnesses, recommendation will be made to have the board modify rule 46 of its rules of practice so that copy of the deposition furnished by the taxpayer for service on the general counsel will be forwarded through the internal revenue agent in charge for verification. This will result in a considerable saving.

The production program adopted for the fiscal year 1928 contemplates the auditing of all returns reporting income earned in 1926 and prior years, and the conduct of the preliminary examination of the 1927 returns.

## ECONOMIES EFFECTED

The efficiency measures adopted, with their resulting economies, may be classified under the main headings "Decentralization," "Concentration of activities," and "Improved procedure." Reduction in force is the consequent major economy.

## DECENTRALIZATION

Decentralization program-transferance to the field of functions performed in Washington prior to August, 1923-was continued and amplified by a number of important changes in procedure and organization, with a view to obtaining finality of action wherever practicable. Notable among these changes was the establishment of an office audit procedure in the field divisions. This audit is not restricted to 1925 returns which were specifically classified therefor, but is applied to returns of all years within the statute of limitations. The change from conducting the office audit in Washington results in a vast saving in correspondence incident to the office audit of returns at long distances. Under the change the taxpayer usually comes into direct contact with the office auditor and is thereby enabled verbally to explain questionable items in his return which would be difficult to explain by correspondence. The Income Tax Unit at

Washington is relieved by this procedure of a great amount of conference work and of letters preparatory thereto, because the office audit in the field has demonstrated the capacity to properly close cases by agreement. This procedure also makès for good will on the part of taxpayers toward the unit, because they are thereby largely relieved of the necessity for lengthy explanations by correspondence and of what they consider an expensive and burdensome necessity, the employment of counsel.

Classification of returns by internal revenue agents which was inaugurated with the filing of returns for the taxable year 1925 and continued with returns for 1926 has demonstrated the wisdom of this policy. Reports from field divisions received in this office indicate that approximately $1,500,000$ returns for 1926 will be examined and accepted as correct by experienced revenue agents working in the offices of the collectors before the end of the present fiscal year.
By requiring all protests to be submitted to the field for examination and conference or comments, the bureau and a great majority of taxpayers have been saved immeasurable time and expense by coming together for settlement of cases where it is most convenient and economical for all concerned.

As a result of investigations by internal revenue agents, based on refund claims filed by taxpayers, it is interesting to note that the complete investigation possible only through field agents has resulted in a more expeditious and accurate adjustment, with considerable saving in money to the Government.

## CONCENTRATION OF ACTIVITIES

Greater concentration of activities has been attained during the current fiscal year. Several sections were abolished and the duties and responsibilities taken over by the sections retained. Such consolidations had for their purpose the following major aims:

1. Better standardization of operation and uniformity of decision.
2. Elimination of duplication.
3. Reduction in supervisory and administrative overhead.

Personal audit sections 1 and 2 were combined, and section 23 . of corporation audit division was abolished, its work and personnel being assigned to other sections of corporation audit division.
The service division was abolished and in its stead there was created a service section. This change eliminated the positions of head of division and two section chiefs. Within the service section there was a consolidation of two typing units, and one stenographic unit was abolished. As a consequence, two supervisors were eliminated and two clerical assistants made immediately available for other work.

Another step toward standardization of activities was taken in the consolidated returns audit division. A change of policy with respect to audit unit's organization was effected, and each unit as now constituted is composed of one section unit auditor and 12 resident auditors.

The proving and correspondence subsections of proving section were combined. This combination resulted in a direct saving of $\$ 3,800$ in supervisory salaries made possible by elimination of the chief and assistant chief oof the subsection.

The engineering division was abolished, and its functions combined in an engineering section, which was placed under consolidated returns audit division. As a consequence of this change, all work relative to cases in which engineering principles are major features is centralized under the jurisdiction of one administrative head, who will be held responsible for its expeditious accomplishment. The placing of this work under the consolidated returns audit division made possible the saving of the salary of one head of division and subsequently will result in releasing a number of clerical employees due to combining much clerical work which heretofore it was necessary to perform in each division.

## IMPRROVED PROCEDURE

Effective upon the 1926 returns, control cards are not prepared for accepted returns. This procedure is developed as the result of the realization that only in few instances are returns so marked called out of the files for further investigation. This saves for the Government approximately $\$ 37,500$ per annum.

A second change in procedure determined upon during the fiscal year directed the filing of revenue agents' reports, copies of audit correspondence, and memoranda with the returns involved. The total saving accomplished as a consequence of this change is not apparent. In time it will result in the complete elimination of the correspondence subsection, files section, whose personnel number 38 employees, and will materially lessen the cost in connection with the assembly of files necessary in connection with the reconsideration of a case.

Considerable saving was made possible by the assembling of information certificates with the returns involved prior to transferance of the returns to the field. In the past it was frequently found that after field investigation had been made, the dividends and other income reported by the taxpayers were not in accordance with that disclosed by their information certificates and in such cases a second field investigation was necessary. By completely assembling all data pertaining to the return of a single taxpayer, it is possible to make a thorough examination on the first attempt and thereby arrive at a satisfactory conclusion.

During the year the policy was adopted in the proving section of preparing a card in description of assessments to be made. The use of this card has materially improved the product per operator in the Elliott Fisher unit of the proving section. It has resulted in a saving of approximately $\$ 10,000$ per year in clerical effort and reduced to a large extent the possibility of error.

## REDUCTION IN FORCE

The changes indicated above, as the outcome of concentration of activities and improvement in procedure, resulted in the elimination of 28 supervisory employees, who were placed on productive work. and in the reassignment of 233 technical employees to other duties The personnel of the Income Tax Unit was decreased during the current fiscal year by 313 employees, which resulted in. a saving in annual salaries of approximately $\$ 450,000$. 。

## OTHER ECONOMIES

The introduction of 16 machines in the sorting section made possible the elimination of much hand sorting. Experience discloses that a machine accomplishes as much of this class of work in seven hours as three employees could perform in the same length of time. 'The saving accomplished through the installation of these machines, therefore, is equivalent to 39 clerical salaries, or approximately : $\$ 56,160$.

There were erected in the consolidated returns audit division, for filing purposes, 63 sets of three-compartment shelves. The installation of this shelving for filing purposes made possible the elimination of a purchase of 189 file cabinets costing $\$ 27.38$ apiece, making a direct saving accomplished in this one item alone of $\$ 5,174.82$.

A new form of schedule for the listing of certificates of overassessment was developed during the current fiscal year. The work upon these schedules in the Accounts and Collections Unit, Comptroller General's Office, and Income Tax Unit can, as a consequence, be much more economically conducted, and the possibility of error has been considerably lessened. While it is impossible to determine the exact amount of money saved as the result of the adoption of this new form of schedule, it is estimated that it will total approximately $\$ 50,000$ a year and will be a continuous saving.

The utilization of folding and sealing machines by the preliminary audit section has resulted in the economy of several thousand dollars a year in the performance of these two operations upon approximately $1,500,000$ letters to be issued taxpayers. Prior to the introduction of this machinery the work upon these letters was performed by hand.

The policy of decentralization which was so thoroughly placed in effect during the previous fiscal year has made possible the disposition of much surplus furniture in the Income Tax Unit. This furniture was turned over for distribution either to the several field offices or to other Government agencies through the General Supply Committee, and totals $\$ 22,910.96$, which is a direct.economy.

Permission was granted during the present fiscal year for the destruction of all 1040-A returns filed for the years 1917 to 1921, inclusive. The destruction of these returns made available for immediate use 187 steel filing cases valued at $\$ 23$ apiece, or a direct saving of $\$ 4,301$, as it was unnecessary to purchase new filing cases for the 1926 returns, which otherwise would have been necessary. Besides the economy in filing facilities, it was also possible to use the space in which these cases were erected for filing of other returns, maling it unnecessary for the unit to occupy an increased amount of space in Washington.

During the past year it was possible, as a further result of decentralization, to eliminate much correspondence which previously had been carried on with taxpayers in respect to questionable items on their returns. The necessary information is now obtained by allowing taxpayers to confer with the representatives of the bureau stationed in the field who are auditing the returns in question, and to furnish verbal explanations. The unit also directed its efforts toward the elimination of needless-interoffice letters and memoranda; with very satisfactory results. Committees were appointed in each audit division to make a study of the correspondence, and the recommendations to date have caused the discontinuance of the use of a number
of form letters and the reduction of two in the number of carbons typed with each 30 -day letter.

The direct economies as outlined above, based principally on lessened administrative overhead and reduction in force, total $\$ 581$,362.78. The indirect economies effected through reorganization and improved procedure, for which monetary value can not be given, will save the Government annually sums of money many times in excess of the direct economies and will be a continuous saving.

With the foregoing record of achievement, it is felt that the Income Tax Unit may properly claim a substantial share in the economies effected and efficiency measures instituted in Government service during the fiscal year.

## Miscellaneous Tax Unit

This unit is charged with the administration of all taxes other than income tax. The unit is composed of four divisions, namely, capital stock tax division (for completion of the work in connection with the capital stock tax, repealed effective July 1, 1926), estate tax division, miscellaneous division, tobacco division, and an appeals and review section, which is attached to the office of the deputy commissioner in charge.

A material reduction in personnel was effected during the year, principally in the capital stock tax division, due to the repeal of that tax July 1, 1926; to a lesser extent in the estate tax field force, and also in the other divisions of the unit. A reduction was made in the personnel of the miscellaneous division on account of the repeal of certain taxes. This was effected in spite of the fact that there was transferred to it, upon the organization of the Prohibition Bureau April 1, 1927, the personnel engaged upon internal revenue work connected with spirits-narcotic taxes, which remains in this bureau. The work of the divisions has been kept on practically a current basis by improvement in procedure. The following tables show the changes which occurred in personnel and pay rolls and in tax collections. The accomplishments are shown under the sections and divisions following.

## PERSONNEL AND PAY ROLL

The personnel and annual pay rolls of the unit as of June 30, 1926, and June 30, 1927, are shown in the following table:

| Division | Personnel |  |  | Pay roll |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1926 | 1927 | Decrease | 1926 | 1927 | Decrease |

[^112]
## TAXES COLLECTED

The following comparative statement shows the amounts of the different taxes collected for the years ended June 30, 1926 and 1927:

## APPEALS AND REVIEW SECTION

The appeals and review section holds hearings in cases arising under the various tax laws administered by this unit, renders opinions on request on law questions arising in connection with the administration of such tax laws, and reviews the action taken by the divisions on all claims for refund or abatement allowed for amounts in excess of $\$ 500$. The majority of the hearings are held in connection with estate taxes, but a large number involve the various excise taxes, such as documentary stamp, sales, and taxes on admissions and dues, etc. In the case of estate taxes, an opportunity is afforded the taxpayer for hearing before adverse action is taken against the taxpayer on protest under article 76, Regulations 70 (1926 edition), or on claims for refund if such hearing is requested by the taxpayer. In respect to the other miscellaneous taxes, this section reviews cases only on appeal by the taxpayer from the rulings theretofore made.

During the fiscal year, 475 hearings were held and 592 formal opinions prepared on cases in which hearings had been held or which had been formally submitted by heads of divisions for opinion. The number of elaims for refund and abatement reviewed for the year aggregated 2,743.

At the close of the year there were 50 cases awaiting hearings scheduled for future dates, 47 cases in the hands of members of this section either awaiting submission of additional evidence from the taxpayer or supplemental reports from the field, 11 cases ready for final action on which final decision had not been made, and 15 cases which had been disposed of by this section but were awaiting the attention of the valuation section of the estate tax division.

A reduction from five to four members was effected during the fiscal year.

## CAPITAL STOCK TAX DIVISION

The capital stock tax division was engaged during the year in completing the audit of capital-stock tax returns filed for the period ended June 30, 1926, and prior taxable years. This tax was repealed effective as of July 1, 1926. Consequently no returns were due to be filed for the fiscal year 1927 .

The personnel was reduced as rapidly as the condition of the work would permit. Notwithstanding the large reduction in personnel, the completion of the audit of all returns progressed in a satisfactory manner. The additional tax assessed and collected as the result of the audit has been unusually large.

The segregation of returns by industries for audit was carried on in the same manner as for prior years. The public utilities class presented a rather difficult problem, due to the activity in the stock of such corporations and the large number of reorganizations and consolidations of corporations in that class. The natural resource holding companies, especially those holding undeveloped timber or timberlands, for several years have been held to 'be engaged in business and subject to the tax under the regulations, and this position of the bureau has resulted in numerous suits being filed in theFederal district courts to test the legality of the regulations on this question.

It was disclosed in the audit of the returns of timber-holdingcompanies that a large number of such corporations were reportingthe value of their timber as of March 1, 1913, as determined for depletion purposes in computing income tax, whereas current values in most instances are greatly in excess of 1913 valuations.

Under the revenue act of 1924, insurance companies subject toincome tax under sections 243 or 246 of that act are specifically exempt from capital stock tax. As the 1926 returns were based on conditions existing during the year ended June 30, 1925, the audit of the returns of this class of corporations was delayed, awaiting a final determination of the status of the corporations by the Income Tax Unit. A number of taxpayers, who were denied classification as. insurance companies, filed suit in order to test the validity of the decisions excluding them from an exempt status for capital stock. tax purposes.

On May 2, 1927, the United States Supreme Court rendered a decision in the case of the International Salt Co., holding that company to have been engaged in business and subject to the tax. Thedecision was in line with a previous decision of that court in the case of the Chile Copper Co. and has been of great assistance in. clarifying the question of doing business, and has permitted the closing of numerous cases.

Statistics.-Data from capital stock tax returns rendered for thefiscal year 1926 were compiled by the statistical section, Income Tax Unit, and published in the bureau's report, "Statistics of Income, 1925."

Claims.-The adjustment of claims is shown in the table which follows:

|  | Refund |  | Abatement |  | Uncollectible |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number | Amount | Number | Amount | Number | Amount |
| On hand July 1, 1926. | 1,050 | \$2, 427,657. 57 | 232 | \$1, 050, 456. 89 | 84: | \$32, 187. 133 |
| Received............... | 1,777 | 4, 769, 314.34 | 641 | 827, 551. 53 | 735 | 131, 275.71 |
| Allowed | 1,233 | $1949,116.22$ | 400 | 820,739.97 | 745. | 143, 451, 45 |
| Rejected | 1,005 | 3,904, 645. 45 | 293 | $855,218.34$ | 27 | 4, 040.64: |
| On hand June 30, 1927 | 589 | 2, 487, 434.85 | 180 | 202, 050.11 | 47 | 15, 971.25 |

[^113]During the year additional tax was assessed, as the result of office audit and field investigation, in the amount of $\$ 11,219,357.58$, a net: increase over the previous year of $\$ 2,420,714.04$.

During the year the personnel was reduced from 86 employees, with a pay roll of $\$ 169,320$, to 29 employees, with a pay roll of $\$ 65,900$. The net reduction in the annual pay roll was $\$ 103,420$.

## ESTATE TAX DIVISION

The estate tax division is responsible for the administration of the estate tax imposed by Title III of the revenue act of 1926 and the disposition of cases involving estate and gift taxes under repealed statutes.
The present law, which became effective February 26, 1926, retroactively reduced the rates provided in the 1924 act to the same: percentages as existed under the 1921 act; provided a new and even. lower range of rates in cases arising after February 26, 1926; granted a: possible maximum credit of 80 per cent for State inheritance taxes: paid; increased the amount specifically exempted from taxation to$\$ 100,000$; abrogated the gift tax. It also contains other provisions not found in prior acts.

The field force operates under the direction of the deputy commissioner through the internal-revenue agents in charge. Notwithstanding delays incident to the recently adopted field protest program, together with a reduction in the corps of estate-tax officers, there is less work on hand in the field than last year. A reduction in the number of estate tax returns filed has contributed to this condition. The field submitted 12,899 estate tax and 396 gift tax major reports. during the year, compared with 13,694 estate tax and 1,085 gift tax major reports in 1926. There were 12,538 new estate tax and 2,523 . gift tax returns filed, compared with 15,982 estate and 2,461 gift tax returns for 1926.

Audit.-There were 895 cases awaiting audit at the close of thefiscal year. The number of returns audited was 16,087 , compared with 13,912 for the previous year, while the number of examiners. actually engaged was reduced by 5 .

Claims and protests.-The status of claims is shown in the following table:

[^114]${ }^{2}$ Inclides $\$ 2,271.21$ interest.

There were 107. protest letters pending at the beginning of the year and 2,054 were received. There were 1,794 such letters disposed of, involving $\$ 34,636,661.97$, leaving 367 on hand at the close of the year. Most of the recent claims and protests are concerned with transfers, life insurance, jointly owned property, and deductions for additional administration charges.

Included in the amounts of estate tax and of gift tax claims allowed are $\$ 4,439,189.56$ and $\$ 614,027.27$, respectively, which represent refunds; without interest, under the provisions of section 325 of the revenue act of 1926 of amounts paid under the revenue act of 1924 in excess of the tax imposed by such act as amended by the revenue act of 1926 .

Collections:-Estate tax collections amounted to $\$ 100,339,851.96$, compared with $\$ 116,041,036.09$ for the fiscal year 1926.

The particular problems of both office and field are those dealing with the legal phases of transfers made in contemplation of or to take effect in enjoyment and possession at or after death, powers of appointment, and charitable bequests and the more materialistic questions concerned with the valuation of close corporation stock. An adequate force of trained attorneys and accountants in the office and field.must be maintained for this purpose.

Files.-The files on June 30, 1927, contained 140,129 estate tax cases and 2,566 gift tax cases:

Statistics.-Statistical data from the 1926 returns, showing in comparative and classified form statements of total amounts of assets included in gross estates, total amounts of deductions, total net amounts taxed, and total of resulting tax have been compiled and published in the bureau's report, "Statistics of Income, 1925."

## MISCELLANEOUS DIVISION

The miscellaneous division is responsible for the administration of those taxes imposed by the revenue act of 1926 on admissions and dues; on the sale of automobiles by the manufacturer, producer, or importer, and on the sale of pistols and revolvers and nonintoxicating cereal beverages; on the use of foreign-built boats; those taxes payable by stamp on the issue, sale, and transfer of stock, on sales of products for future delivery, on bonds of indebtedness, passage tickets, playing cards, and insurance policies issued by foreign corporations on property in the United States. This division is also responsible for the administration of the stamp and special taxes imposed under old statutes on oleomargarine, adulterated butter, renovated butter, mixed four, filled cheese, white phosphorus matches, and cotton futures, and the disposition of cases involving taxes repealed by the revenue act of 1926 and prior revenue acts. Its work includes assessments and compromises of the taxes administered in this unit, which prior to July 1, 1926, was assigned to the respective administrative divisions and includes all of the work of internal-revenue character in connection with spirits, wines, fermented liquor, and narcotic taxes not allocated to the Bureau of Prohibition upon its organization April 1, 1927.

Receipts.-Receipts from admissions, dues, and excise taxes for the fiscal year 1927 amounted to $\$ 95,205,688.69$, compared with
$\$ 184,252,680.93$ for 1926. This decrease is due to changes in tax legislation provided for by the revenue act of 1926. Collections from miscellaneous stamp and special taxes were $\$ 40,538,815.28$, compared with $\$ 61,653,757.99$ for 1926 . Receipts under prohibition, narcotic, and related laws during the last three months of the fiscal year 1927 were $\$ 5,040,853.55$.

Adjustment of claims.-As a result of court decisions adverse to the Government the number of refund claims received and unadjusted is larger than for the fiscal year 1926. Substantial reductions were made, however, in other classes of claims, as shown by the following table:

|  | Refund |  | Redemption |  | Abatement |  | Uncollectible |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Rejected -.....---- | 69 | 63,597.90 |  |  | 134 | 956,392.31 | 61 | 215, 096, 43 |
| On hand June 30 , 1927....-------- | 51 | 38, 748. 40 | 8 | 109: 39 | 475 | 1, 015, 919. 54 | 16 | 7,792. 02 |

During the year there was allowed $\$ 578,184.22$ as interest accrued on taxes refunded, compared with $\$ 1,618,474.39$ allowed during 1926.

At the beginning of the fiscal year 1927 there were on hand 4,171 claims for credit taken on manufacturers' and dealers' excise tax returns for alleged prior overpayments. There were 1,206 credits received during the year, and 3,341 disposed of, leaving on hand 2,036 as of June 30, 1927.

Credit and refund claims aggregating $\$ 6,161,692.58$, requiring the audit of 45,415 inventory schedules, were received from automobile manufacturers and dealers pursuant to the provisions of section 1204 of the revenue act of 1926 . This amount, when added to the 7,500 inventory schedules totaling $\$ 1,722,522.59$ received last year, shows that as a result of section 1204 a total of $\$ 7,884,215.17$ has been claimed. Of this amount a considerable portion was adjusted during the fiscal year 1927 and the balance, having been examined, will be adjusted upon receipt of evidence requested.

Of the $\$ 23,604,555.51$ sales tax refund claims rejected, approximately $\$ 17,500,000$ represents taxes paid on automobile parts and accessories, which amount was rejected due to the limitation placed in the first deficiency act, fiscal year 1927, requiring manufacturers

64761-FI 1927-63
to give bond conditioned upon the return to the ultimate consumer of any amount of tax recovered from the Government.

As a result of the decision of the United States Court of Claims in the case of the Alliance Country Club v. United States, holding that amounts paid to clubs for shares of stock the purchase of which was prerequisite to membership in the club, which amounts were intended under certain contingencies to be returned to the club member, were not subject to tax, refund claims were allowed amounting to $\$ 376,532.14$.

Documentary stamp tax.-The stamp tax collections on bonds, capital stock issues, passage tickets, and foreign policies of insurance on property in the United States amounted to $\$ 13,044,445.65$, compared with $\$ 28,480,422.01$ for the preceding fiscal year. The tax on the transfer of stock during 1927 amounted to $\$ 16,674,102.83$, compared with $\$ 17,137,185.75$ for the previous fiscal year, and the tax on sales of produce (future deliveries) netted $\$ 2,884,534.45$, compared with $\$ 4,183,217.57$ for the preceding year.

Foreign-built boats.-The special tax collected upon the use of foreign-built boats amounted to $\$ 7,966.72$.

Oleomargarine.-There were produced during the year 14,501,929 pounds of colored and $242,654,698$ pounds of uncolored oleomargarine, compared with $13,180,497$ pounds of colored and $234,866,321$ pounds of uncolored in 1926, an increase of 10.03 and 3.32 per cent, respectively.

On July 1, 1926, there were 61 oleomargarine manufacturers in business. Two new factories commenced business during the year and 3 closed, leaving 60 in business on June 30, 1927. There were 21,940 manufacturers' and wholesale dealers' returns received and examined during the year, and a large number of prospective delinquent cases were referred to the field for investigation, which resulted in the collection of $\$ 12,931.79$ in additional tax, penalties, and compromise offers. The following comparative data shows the trend of the industry:

|  | Colored |  | Uncolored |  |
| :---: | :---: | :---: | :---: | :---: |
| , | 1926 | 1927 | 1926 | 1927 |
|  | Pounds 13, 180,497 | Pounds 14,501929 | $\underset{\substack{\text { Pounds } \\ 234,866,321}}{ }$ | ${ }_{\text {Pounds }}$ |
| Withdrawn tax paid for domestic use................ | 13, 180,497 | 14, 501, 929 | 234, 866, 321 | 242, 654, 698 |
| Withdrawn free of tax for export................. | 1, 543, 374 | - $2,122,911$ | 234, 18,920 | 242, 332, 11,327 |
| Withdrawn free of tax for use of United States.- | 876, 570 | 907, 984 |  | 1,30 |

The oleomargarine law yielded a total of $\$ 3,164,218.94$ in revenue during the year, compared with $\$ 3,070,218.26$ in 1926 , an increase of 3.06 per cent. The collections in detail for the years 1926 and 1927 were as follows:

|  | 1826 | 1927 | $\begin{gathered} \text { Increase ( }+ \text { or } \\ \text { decrease ( }- \text { ) } \end{gathered}$ | Per cent |
| :---: | :---: | :---: | :---: | :---: |
| Stamp tax, colored oleomargarine | \$1, 073, 936. 99 | \$1, 161, 976.87 | +\$88, 039.88 | 8.20 |
| Stamp tax, uncolored oleomargarine. | 588, 904. 36 | 619,680. 44 | +30, 776.08 | 5. 23 |
| Manufacturers' special tax | 45, 544. 80 | 42, 894. 61 | -2, 650. 19 | 5. 82 |
| Wholesale dealers' special tax | 373, 042. 99 | $353,694.63$ | -19,348.36 | 5.19 |
| Retail dealers' special tax. | 988, 789.12 | 985, 972. 39 | -2,816.73 | . 28 |
| Total | 3, 070, 218. 26 | 3, 164, 218. 04 | +94,000. 68 | 3.06 |

Adulterated butter.-The adulterated butter law yielded $\$ 2,069.22$ in revenue during the year. There are two registered manufacturers of adulterated butter, but as their entire output is removed free of tax for export, the only tax paid by them is the special tax of $\$ 600$ per annum imposed on persons engaged in the business of manufacturing adulterated butter. There were several cases discovered during the year of adulteration of creamery butter by the addition of foreign fats.

Process or renovated butter.- There were six manufacturers of process or renovated butter in business during the year. They produced a total of $4,272,033$ pounds of process or renovated butter during the year, compared with $2,482,660$ pounds in 1926. The revenue derived from this source totaled $\$ 11,044.11$, compared with $\$ 6,080.18$ in 1926.

Mixed four.-There were 17 makers, packers, or repackers of mixed flour engaged in business during the year, and they made, packed, or repacked a total of $11,035,002$ pounds, compared with $8,297,634$ pounds in 1926. The mixed-flour law yielded a total of $\$ 3,666.73$ in revenue during the year, compared with $\$ 12,817.89$ in 1926.

Filled cheese and white phosphorus matches.-There were no registered manufacturers of filled cheese or white phosphorus matches in business during the year. A total of $\$ 4,298.13$ was, however, collected during the year upon cheese found in the market and which upon analysis proved to be filled cheese under the law.

Playing cards.-There were 74 manufacturers, repackers, or importers of playing cards engaged in business during the year. They manufactured, repacked, or imported a total of $55,196,758$ packs. The tax on playing cards yielded $\$ 4,742,468.50$ in revenue, compared with $\$ 4,213,414.03$ in 1926 .

Conferences.-During the year 1,190 conferences were held with taxpayers and their representatives.

Assessments.-A total of $\$ 210,984,285.90$, representing 209,815 items, was entered on the miscellaneous assessment lists approved by the commissioner. These lists. on which are entered all assessments of taxes administered by the unit, carried additional assessments amounting to $\$ 25,429.294 .02$ as a result of field investigations and office audit. The amount of interest paid and assessed aggregated \$1,087,071.30.

Offers in compromise.-There were 15,305 offers in compromise, amounting to $\$ 527,487.69$, pending in the Miscellaneous Tax Unit or July 1, 1926. There were 30,456 received during the year and 40,022 disposed of, leaving 5,739 on hand June 30, 1927. Of the 40,022 offers handled, 38,896 were accepted for amounts aggregating $\$ 2,009,805.63$.

## TOBACCO DIVISION

The tobacco division is responsible for the administration and enforcement of the laws dealing with the manufacture, sale, tax payment, and exportation of tobacco, snuff, cigars, and cigarettes and the purchase and sale of leaf tobacco, embraced in sections 3355 to 3406 , Revised Statutes, and subsequent acts of Congress, including the act of February 26, 1926 (Title IV), the tax on cigarette papers and tubes under the last-mentioned act, and the withdrawal of tobacco products
free of tax for use of the United States under section 3464, Revised Statutes.

The total collections from taxes on tobacco, snuff, cigars, and cigarettes of domestic and imported manufacture, including taxes on domestic and imported cigarette papers and tubes in packages, books, or sets, during the fiscal year 1927 were $\$ 376,170,205.04$. No prior year's collections approached this figure. The increase compared with 1926 was $\$ 5,503,766.17$, despite the fact that the reduction in rates of taxes on cigars under the revenue act of 1926 accounted for a decrease of $\$ 14,774,661.58$ in collections from taxes on large cigars and a decrease of $\$ 180,084.19$ from taxes on small cigars and that the repeal of tobacco special taxes accounted for a decrease of $\$ 1,132,155.97$ and that the revenue from chewing and smoking tobacco declined $\$ 2,640,578.04$.

The increase in the total tobacco collections resulted from the unparalleled receipts from taxes on small cigarettes, which amounted to $\$ 278,928,561.81$, an increase of $\$ 24,103,753.62$ compared with the preceding year, and which represents 74.15 per cent of the total tobacco collections.
The total taxes collected on cigarette papers and tubes amounted to $\$ 1,170,025.22$, an increase of $\$ 108,880.80$. Of this amount, $\$ 14,374.42$ was collected on $1,506,300$ packages of cigarette papers of domestic manufacture, $\$ 1,148,990.32$ on $107,110,226$ packages imported, and $\$ 6,660.48$ on cigarette tubes. There were removed exempt from tax for consumption or use $219,323,959$ packages of cigarette papers, each containing not more than 25 papers, and there were released tax free for use of cigarette manufacturers 41,645,750 cigarette tubes.

A total of $\$ 343,338,781.73$, or 91.27 per cent of the total receipts, was collected in the following States: North Carolina, \$185,941,504.24; Virginia, $\$ 57,775,134.62$; New York, $\$ 26,919,774.26$; New Jersey, \$19;956,537.18; Pennsylvania, \$17,956,264.47; California, \$12,511,121.61; Ohio, $\$ 12,061,905.69$; Missouri, $\$ 10,216,539.66$.

The leading States in the manufacture of tobacco products are as follows, in the order named: In the manufacture of cigars weighing more than 3 pounds per 1,000 , Pennsylvania, New York, New Jersey, Florida, Ohio, Virginia, and Michigan (see Table No. 14); in the manufacture of cigars weighing not more than 3 pounds per 1,000, Maryland, Pennsylvania, Virginia, North Carolina, and New York (see Table No. 16); in the manufacture of cigarettes weighing not more than 3 pounds per 1,000, North Carolina, Virginia, New York, New Jersey, Pennsylvania, and California (see Table No. 17); in the manufacture of cigarettes weighing more than 3 pounds per 1,000 , New York produced 83.92 per cent of the total manufactured (see Table No. 18); in the manufacture of plug tobacco, Missouri and North Carolina; twist, Missouri, Kentucky, and Tennessee; fine-cut, Illinois, Miehigan, Ohio, New York, and New Jersey; smoking tobacco, North Carolina, Ohio, Kentucky, Illinois, and Virginia; :snuff, Tennessee, Illinois, and New Jersey (see Table No. 13).

Additional statistics concerning the manufacture and tax payment of tobacco products are shown in Tables 12 to 28, on pages 84 to 109, and relating to tax collections in Table 1, on pages 52 to 67; in 'Table No. 2, on pages 68 to 74; and in Table No. 3, on pages 75 and 76 of the report of the Commissioner of Internal Revenue.

Clains.-The following table indicates the status of tobacco claims:

|  | Refund |  | Redemption |  | Abatement |  | Uncollectible |  | Drawback |  |

Refund (rebate) claims.-Section 400 of the revenue act of 1926, approved February 26, 1926, reduced, effective March 29, 1926, the rates of taxes imposed on cigars by section 400 of the revenue act of 1924, and by section 1205 provided that-

In the case of all cigars and little cigars in original and unbroken statutory packages held and intended for sale by any person on the effective date of the repeal of section 400 of the revenue act of 1924, including those in customs custody or in transit from the insular possessions of the United States, which on such date have affixed thereto stamps purehased at the rates of tax imposed by section 400 of the revenue act of 1924, there shall be allowed a refund equal to the difference between the tax imposed by such section and the tax imposed by section 400 of this act.
(b) No refund shall be allowed under this section unless claim therefor is presented within 60 days after the effective date of the repeal of section 400 of the revenue act of 1924 . No refund shall be made to any person if the claim is for an amount less than $\$ 10$.

Under this law refund was allowed on cigars in original stamped packages held for sale March 29, 1926, where the claim was presented on or before May 28, 1926, in an amount not less than $\$ 10$.

There were presented under this act a total of 25,174 claims, in the amount of $\$ 3,725,816.41 ; 24,760$ claims were allowed, in the amount of $\$ 3,698,367.51$, the allowances in excess of amounts claimed aggregating $\$ 8,679.08$ and the decreases $\$ 18,855.30$. There were 414 claims, amounting to $\$ 17,272.68$, rejected in full. Claims rejected were classified as follows: 172 claims, amounting to $\$ 9,361.53$, were barred by the statute of limitation; 121, amounting to $\$ 1,147.66$, were barred, being in amounts less than $\$ 10 ; 83$, amounting to $\$ 4,518.93$, were barred on account of insufficient evidence; and 38 , amounting to $\$ 2,244.56$, being duplicate clains.

The number and amount of claims received, the number and amount allowed, the number of cigars of the various classes held and intended for sale upon which refund or rebate was allowed, and the number and amount of claims rejected in full, by districts and States, is shown in Table 29, on pages 110 and 111 of the report of Commissioner of Internal Revenue.

## Accounts and Collechions Unit

During the past fiscal year the titles of the three divisions of the Accounts and Collections Unit were changed with a view to describe better the activities of each.

## COLLECTION ACCOUNTING DIVISION

The collection accounting division is charged with the following duties:

The construction of accounting systems for use in collectors' offices, the preparation of the procedure for the audit of income-tax returns in collectors' offices, supervision over the force of supervisors of accounts and collections and internal revenue agents (sales and miscellaneous taxes), the answering of inquiries in regard to matters of procedure and accounting, the auditing of collectors' revenue and special deposit accounts, the preparation of statistics in regard to internal revenue collections, the preparation of orders for internal revenue stamps and the redemption of unused stamps, and the recording of refunds of taxes erroneously and illegally collected; also the direction of field investigations made by collectors' field forces and special squads of internal revenue agents under supervisors of accounts and collections, the planning of delinquent drives, and the organization of collectors' field forces.

During the year the supervisors of accounts and collections submitted 119 reports covering the examinations of the accounts of collectors of internal revenue. The accounts of every collector's office were examined at least once with the exception of the office at Honolulu, Hawaii. In addition to the examinations made by the supervisors of accounts and collections, these officers made one transfer of a collector's office under confirmation bond and superintended the transfer of three offices to new collectors. There was also one office transferred under renewal bond.

On July 1, 1926, there were on hand in the various collectors' offices 13,375 claims for abatement, credit, and refund. There were filed during the fiscal year 228,434 claims, making a total to be accounted for of 241,809 . The collectors transmitted to the bureau or otherwise disposed of 238,665 claims, leaving on hand at the close of the fiscal year 3,144 .

There were filed in the various collectors' offices during the fiscal year a total of $5,249,543$ tax returns, of which $4,895,071$ represented income-tax returns of various classes. During the fiscal year 1926 a total of $7,015,008$ tax returns of all kinds was filed in collectors' offices. Of this number, $5,185,593$ represented income-tax returns of all classes. The enactment of the revenue act of 1926 materially reduced the number of taxpayers required to file miscellaneous tax returns.

The Accounts and Collections Unit and the Income Tax Unit, working in cooperation, prepared instructions with reference to the preliminary examination of income-tax returns in collectors' offices. All individual returns filed on Form 1040 and all corporation returns filed during the 1927 filing period were examined in collectors' offices for mathematical errors. The returns were then reviewed by revenue agents, and a large number of cases were definitely closed within a few weeks after the returns were filed. As a result of this procedure, taxpayers were notified promptly of corrections in their returns and a substantial amount of revenue was produced.

The examining and audit work in connection with collectors' revenue accounts and collectors' special deposit accounts has been kept current and all accounts referred to the Comptroller General within the required time.

A total of $7,615,505,838$ revenue stamps, valued at $\$ 439,166,373.74$, was issued to collectors of internal revenue.

Stamps were returned by collectors and by the Postmaster General and credited in their accounts to the value of $\$ 25,184,569.63$. These stamps were of various kinds and denominations, including partly used books and stamps for which there was no use. There were five applications allowed for restamping packages from which the original stamps had been mutilated or destroyed.

All stamps are engraved and printed at the Bureau of Engraving and Printing, with the exception of tobacco stamps imprinted on tinfoil wrappers. The printing of the latter is done under contract and without cost to the Government, the contractor receiving his remuneration from the purchasers of the stamps and reimbursing the Government for the salary of the stamp agent who is assigned to the manufacturing plant of the contractor. All stamps, with the exception of tobacco stamps imprinted on tinfoil wrappers, are shipped by the Bureau of Engraving and Printing on shipping orders prepared by the stamp section of this division.

The country-wide drive initiated during the fiscal year 1926 with a view to collecting back taxes and clearing the old assessment list was continued throughout the past fiscal year, with gratifying results. The back tax collections far exceeded the official estimates, and the number of outstanding items on the old assessment lists was materially reduced.

The field work was reorganized. During the year 1 collector's office, 11 division offices, and 1 stamp office were discontinued, resulting in an annual saving of $\$ 60,278$ in personnel cost. At the close of the fiscal year there were 64 collectors' offices, 32 division offices, and 47 stamp offices, 18 of which were operated in conjunction with division offices.

The average revenue production of a zone deputy is approximately $\$ 40,000$ a year. Using this figure as a basis, it is expected that as a result of the discontinuance of the 11 division offices and assignment of the division chiefs to productive work there will be a substantial increase in the amount of revenue produced, without additional cost to the Government.

Special attention was given by collectors' field forces to the serving of warrants for distraint, the verification of information returns, the investigation of returns filed indicating additional tax due, and the conduct of delinquent drives. A total of 85,097 warrants for distraint was served, which resulted in the collection of $\$ 54,047,883$, compared with 127,571 warrants served and $\$ 50,249,181$ collected for the fiscal year 1926. An average of 1,836 deputy collectors made a total of 367,658 revenue-producing investigations, including the serving of warrants for distraint, compared with 492,367 revenueproducing investigations, including the serving of warrants for distraint, made by an average of 2,109 deputy collectors for the fiscal year 1926. The total amount collected and reported for assessment by deputy collectors during the fiscal year was $\$ 78,616,879$, whereas the total collections and assessments for the previous fiscal year aggregated $\$ 78,500,438$. The average number of investigations made per deputy and the average amount of tax collected and reported for assessment for the fiscal year was 200 and $\$ 42,820$, respectively, while the average number of investigations made per
deputy and the average amount of tax collected and reported for assessment for the fiscal year 1926 was 233 and $\$ 37,222$, respectively.

The special force of internal-revenue agents working under the direction of the Accounts and Collections Unit collected and reported for assessment $\$ 4,791,609$, an average of $\$ 116,869$ per agent.

The total collected and reported for assessment as a result of the activities of both the force of field deputy collectors working under the collectors and the special squads working under supervisors of accounts and collections amounted to $\$ 83,408,488$, compared with $\$ 89,204,603$ for the fiscal year 1926.

## COLLECTORS' PERSONNEL, EQUIPMENT, AND SPACE DIVISION

The division of collectors' personnel, equipmont, and space is charged with the consideration and granting of allowances to collection districts covering the employment of personnel and miscellaneous operating expenses, and the keeping of adequate records thereof. Collectors' requisitions for nonexpendable supplies, mechanical equipment, and office furniture are passed upon by this division. The procurement of space for collectors' offices and branch offices is also handled by this division.

At the close of the fiscal year 1926 there was in the internal revenue collection service a total authorized force, including collectors, of 6,015 employees, at an annual salary rate of $\$ 11,391,760$. At the close of the fiscal year 1927 there was a total authorized force, including collectors, of 5,294 employees, at an annual salary rate of $\$ 10,351,200$. During the year there was a net reduction of 721 in the total number of positions and $\$ 1,040,560$ in the annual salary rate, or, in other words, the reduction amounted to approximately 11.9 per cent of the total authorized force and 9.1 per cent of the total annual rate. This reduction in personnel has been brought about by more efficient coordination of the work in the various collection districts and has assisted materially in bringing the total authorized force within the reduced allotment granted for the payment of salaries of permanent employees for this fiscal year. The reductions have been made, in most instances, by not filling vacancies occurring in the regular force. No detrimental effects have been shown upon the service as a result of the reduction. A total of $\$ 88,520.17$ was expended for the employment of temporary help in collectors' offices, compared with $\$ 47,688.34$ expended for this purpose during the preceding fiscal year. The increase of $\$ 40,831.83$ in expenditures for temporary employees was due in large measure to a change in procedure requiring the preliminary examination of income tax returns in collectors' offices, and also to a special drive conducted in the district of Florida to collect delinquent taxes on real estate transfers.

On February 1, 1927, the fourth internal revenue collection district of Michigan, with headquarters at Grand Rapids, was consolidated with the first Michigan collection district, with headquarters at Detroit. Much overhead expense has been saved by this action. From reports received, there has been no complaint on the part of taxpayers residing in the former fourth distriçt of the service rendered under the new arrangement.

In administering the personnel of the several collection districts the provisions of the classification act of 1923 have been closely adhered to. New appointments have been made at the minimum salary rate of the grade, and this has had a tendency to lower the average salary of the various grades throughout the service.

All applications for positions in the field collection service have been carefully scrutinized with a view to maintaining the usual high standard of requirement for employment.
During the fiscal year 1927, $\$ 273,782.97$ was expended for the rental of quarters of collectors' offices and branch offices, compared with $\$ 295,345.82$ for the preceding fiscal year. The decrease of $\$ 21,562.85$ was brought about by the removal of certain offices from commercial to Federal space, the discontinuance of several division offices housed in commercial space, and, in certain instances, in the procurement of space at a lower rental rate to the Government.

No additional office appliances were purchased for collectors' offices during the year, but the usual number of replacements of unserviceable equipment were made.

## DISBURSEMENT ACCOUNTING DIVISION

The disbursement accounting division is charged with the duties of keeping the accounts in connection with expenditures from appropriations made available by the Congress for the use of the Internal Revenue Service. The division also is charged with the supervision of the administrative examination required by law of the disbursing accounts of collectors and revenue agents, as well as the administrative audit of miscellaneous vouchers for transportation, equipment, telephone service, rentals, etc., paid from internal revenue funds by the disbursing clerk of the Treasury Department, and direct settlements by the General Accounting Office. Prior to April 1, 1927, the disbursing accounts of prohibition administrators were also administratively examined in this division.

The disbursement accounting division administratively examined and recorded 1,443 monthly accounts of collectors of internal revenue, revenue agents in charge, and Federal prohibition administrators, together with 104,206 supporting vouchers, in addition to which 8,929 expense vouchers of employees and 10,782 vouchers covering passenger transportation and freight, miscellaneous expenses, special employees, informers, etc., were audited and passed to the disbursing clerk of the Treasury Department and General Accounting Office for payment. The monthly pay rolls of the bureau were examined and audited.
A total of 637 applications of field employees, leaving the service, for refunds of amounts deducted from their salaries on account of the retirement fund was approved and forwarded to the Commissioner of Pensions for settlement. Data for fixing the annuity pay of 30 persons retired from the service, as well as a report of the totals of the amounts deducted from the salaries on account of the retirement fund of 48 persons transferring out of the service, were furnished the appointment division of the bureau for administrative action. A total of 10 applications for service credit was prepared or verified for forwarding to the Commissioner of Pensions.

With the removal of the prohibition enforcement accounts from the Bureau of Internal Revenue to the Bureau of Prohibition, April 1, 1927, there has been a reduction in volume of work and in the personnel in the disbursement accounting division.

The mechanical system of accounting for the appropriation accounts continues to prove its effectiveness by showing daily balances existing in the various appropriation accounts and the several allotments made therefrom.

## Office of the General Counsel

The activities of the general counsel's office embrace the whole field of Federal taxation in connection with cases in suit (criminal and civil); income and profits tax cases specially referred by the commissioner on appeal or otherwise; cases of a similar character received directly from the Income Tax Unit; estate, capital stock, and sales tax questions; documentary, public utilities, insurance, occupational; beverage, luxury, tobacco, oleomargarine, and special taxes; accounts, supplies, and equipment, and the consideration, preparation, and revision of Treasury decisions and regulations, mimeographs, and other formal compilations. The office is divided into six divisions, viz, appeals, interpretative I, interpretative II, penal, civil, and administrative.

## APPEALS DIVISION

The work of the appeals division during the fiscal year ended June 30, 1927, consisted in defending proposed assessments of deficiencies from which taxpayers had appealed to the Board of Tax Appeals and, in cooperation with the Department of Justice, handling appeals in the circuit courts of appeals or the Court of Appeals of the District of Columbia from decisions of the board. Special attention was given to settlements of cases without trials, and in this regard the division was assisted materially by the 60-day conference section of the Income Tax Unit. The number of cases closed during the year upon stipulations without trials totaled 2,682 .

For the period beginning with the formal organization of the Board of Tax Appeals, July 16, 1924, to June 30, 1925, appeals docketed with the board totaled 5,220 ; for the succeeding year ended June 30, 1926, the corresponding figure is 12,867; for the period July 1, 1926, to June 30, 1927, appeals docketed totaled 11,338, making a total of 29,425 appeals taken to the board from proposed assessments for the period from the date of its organization, July 16, 1924, to the close of June 30,1927 . Of this number, 18,481 were pending on the latter date.

Thirty-one field trips were made by divisions of the board during the year. Hearings were held at Portland, Me.; St. Paul, Minn.; Denver Colo.; Des Moines, Iowa; Atlanta, Ga.; New Orleans, La.; New York, N. Y.; Fort Worth, Galveston, and Austin, Tex.; Oklahoma City and Tulsa, Okla.; Columbus and Cleveland, Ohio; Miami and Jacksonville, Fla.; Kansas City and St. Louis, Mo.; Boston, Mass.; Memphis, Tenn.; Portland, Oreg.; San Francisco and Los Angeles, Calif.; Detroit, Mich.; Indianapolis, Ind.; Seattle and Spokane, Wash.; and Salt Lake City, Utah. From one to five attorneys
from the appeals division accompanied each division of the board to represent the commissioner at the field hearings. The field hearings were carried on without interruption to the regularly scheduled hearings before the board and its divisions at Washington.

The personnel of the division on June 30, 1927, consisted of 45 lawyers, 40 assistants, and a clerical and stenographic force of 73 members. Forty-two of the attorneys were assigned to trial work before the board on June 30, 1927, with an average assignment for each attorney of about 440 cases. A plan was adopted toward the end of the year whereby assistants were assigned to the attorneys with a view of enabling the attorneys to give more time to the preparation of cases for trial and to the settlement of such of them without trial as might be possible.

A special advisory committee was established in the commissioner's office, effective July 1, 1927, to consider settlements of cases appealed to the board. It is anticipated that the work of the committee will be effective in bringing about a greater number of settlements of cases without trials within the next year.

The following comparative statistics show the volume of work handled and its status before the board during and at the close of the three fiscal periods ended June 30, 1925, June 30, 1926, and June 30, 1927.

| - | June 30- |  |  |
| :---: | :---: | :---: | :---: |
|  | 1925 | 1926 | 1927 |
| Appeals filed. | 5,220 | 12.867 | 11.338 |
| Cases disposed of by the board in formal decisions. | 616 | 947 | 1. 080 |
| Cases disposed of without rendering formal decisions | 1,110 | 3.022 | 4,176 |
| Total number of cases disposed of during each year | 1,726 | 3,969 | 5,256 |
| Total number still pending at close of each year (including cases reopened). | 3; 494 | 12. 392 | 18,481 |
| Petitions awaiting answer...--.-..... | 245 | 1, 720 | 2,357 |
| Petitions not served on commissioner | 469 | 418 | 516 |

The amount of the proposed deficiencies involved in the appeals pending before the board at the close of June 30,1927 was $\$ 541,706,059.98$.

## INTERPRETATIVE DIVISION I

The following table shows the volume of work done by this division during the year. For purposes of comparison the record for the preceding year is also included.

| Jacketed cases | 1926 | 1927 |
| :---: | :---: | :---: |
| On hand July 1. | 236 | 317 |
| Received during year | 894 | 1,623 |
| Disposed of during year | 813 317 | 1,624 |
| On hadd June 30... | 317 | 316 |

In addition, there was much miscellaneous and special work accomplished. It will be noted that the number of cases received and handled was practically double that of the previous year.

This division considers questions relating to the income and excessprofits tax provisions of the several revenue acts, as well as those questions of procedure (particularly in connection with liens and distraints) which arise in connection with the administration of the internal-revenue laws. It also passes finally upon all matter proposed for publication in the Internal Revenue Bulletin.

In practice, specific questions are submitted for opinion by other branches of the Bureau of Internal Revenue and by outside correspondents. These are answered in the form of memoranda or letters, as may be necessary. Often letters, proposed mimeographs, or memoranda prepared elsewhere in the bureau are submitted for review and comment, and these are treated as the facts may warrant.

The assignment of members of the division to several of the sections of the Income Tax Unit continues. This practice has proved to be of great benefit in the audit work of those sections of the Income Tax Unit to which members have been assigned, as there is at hand a representative of the general counsel's office promptly to advise in matters covered by positive precedent. Where there is doubt as to the law in a particular case, or where a new proposition of law is advanced, the question is submitted to this office for formal decision.

It is impossible to give in detail a summary of the many classes of questions considered during the past year. Among the most important have been with reference to amortization, bases for determining gains and losses in particular cases, depletion and depreciation, distinction between associations and trusts and associations and partnerships, credits and refunds and interest thereon, installment and deferred-payment sales, status of requisition charters under act of June 15, 1917, and Executive order of July 11, 1917, invested capital and capital net gains, compensation to State officers or employees, deductibility of various forms of State and local taxes, donations, development of practice under section 280 of the revenue act of 1926 and limitations thereunder as to assessment of transferees, execution of waivers by fiduciaries, placing and releasing of liens for internalrevenue taxes, waivers for assessment and collection, right of dower as exempt from Government's claim for tax against deceased spouse, liability to distraint of tenancies by the entireties, and limitations, particularly with reference to assessment and collection in the light of the decision of the Supreme Court of the United States in the case of New York \& Albany Lighterage Co. et al. v. Bowers (273 U. S. 346).

## INTERPRETATIVE DIVISION II

The work of this division embraces: (1) Interpretation of the provisions of law relating to the following taxes-admissions and dues, beverage, capital stock, gift, estate, excise, insurance, legacy, occupational, oleomargarine, special, stamp, telegraph and telephone, tobacco, transportation; (2) preparing and reviewing regulations, Treasury decisions, informal memoranda, and letters rolating to such taxes; (3) reviewing and approving claims for refund of all taxes, including income and excess profits taxes, involving a net refund of $\$ 50,000$ or more, and all cases involving a proposed allowance, including interest, for any year or years aggregating $\$ 75,000$, where there is a net refund in any amount; (4) preparing statements of fact to be submitted to the Joint Committee on Internal Revenue

Taxation as required by the first deficiency act, fiscal year 1927, approved February 28, 1927, where a claim has been allowed in excess of $\$ 75,000$; (5) assisting in the drafting of contemplated revenue legislation relating to the above taxes; (6) supervising the disposition of real estate acquired by the Government under the provisions of internal revenue laws, and, with the approval of the Secretary, authorizing the sale at public vendue of the interest of the United States in such realty; (7) disposing of deficiency protests in income and estate tax cases pending June 30, 1926. In March, 1927, the work of preparing statements of fact to be submitted to the Joint Committee on Internal Revenue Taxation, required by the first deficiency act, fiscal year 1927, was given to this division.

The cases in this division during the year may be grouped into five classes-interpretative cases, estate tax deficiency protests, miscellaneous claims, income tax claims, and income tax deficiency protests. A summary of the work is as follows:

## INCOME TAX CLAIMS

During the year the division conducted 134 hearings, and from March 1 to the end of the fiscal year prepared statements of fact to be submitted to the Joint Committee on Internal Revenue Taxation in 188 cases. The following regulations were considered and revised: Regulations 59 and Regulations 43, Part II. There were 24 real estate cases pending on July 1, 1926. During the year 7 were received and 17 disposed of, leaving 14 cases pending July 1, 1927. There were 13 quit-claim deeds executed and delivered. On July 1, 1926, 17 cases were pending wherein sales of real estate had been made by collectors to private purchasers at sales under distraint proceedings. Thirteen similar cases were received, making a total of 30 . The number of such cases closed was 8 , leaving 22 cases pending. July 1, 1927.

## PENAL DIVISION

The activities of the penal division during the fiscal year 1927 consisted of (1) preparation of opinions advising the commissioner and the heads of the various units of the bureau as to liability for fraud, negligence, or delinquency penalties in cases where protests have been filed by taxpayers against proposed assessment of penalties by one of the accounting units, or where an opinion as to assertion of penalties has been requested by any officer or unit of the bureau; (2) preparation for reference to United States attorneys for the purpose of prosecution of criminal cases arising under the internal revenue laws or applicable provisions of the criminal laws of the United States; (3) assisting in such criminal prosecutions by furnishing evidence for grand jury and court proceedings, preparing indictments and briefs, and participating in arguments, trials, and appeals at the request of the Department of Justice or the United States attorneys; (4) preparations of opinions, letters of instructions, and answers to inquiries from local and field officers of the bureau regarding conduct of tax examinations, special investigations, and general matters relating to violations by taxpayers of Federal penal statutes; (5) recommending acceptance or rejection by the commissioner of offers in compromise made by taxpayers charged with civil penalties or violations of Federal penal statutes; and (6) consideration of claims for reward under section 3463 of the Revised Statutes.

When taxpayers protest against the proposed assertion of penalties, of whatever nature, it is the practice of the division to grant the taxpayers and their qualified representatives hearings, at which they are entitled to present evidence and arguments, with briefs in support thereof. Written opinions are then prepared, in which are stated the pertinent facts, the law involved, and the conclusions reached, with the reasons therefor. These opinions, over the general counsel's signature, are sent to the appropriate bureau officer. If no hearing is requested or desired; cases are considered and decided upon the evidence in the respective files. In some cases, evidence submitted on behalf of taxpayers must be referred to field officers of the bureau for investigation and report before a decision can be rendered.

An additional attorney attached to the penal division was appointed and assigned to the branch of the general counsel's office in New York City, so that for the greater part of the year there have been two attorneys in the New York office. Also, a change in personnel was made in the branch office of the general counsel in Chicago, an attorney from the Washington office being sent to Chicago as the general counsel's representative in that city. An attorney from the Washington office also was assigned to represent the general counsel in the Rocky Mountain and Pacific Coast States, with headquarters at San Francisco. The attorney assigned to this post has a very large territory to cover. The establishment of a branch office on the Pacific coast has met with the approval of field officers located in that territory, and has proved of great advantage to the general counsel's office and the bureau as a whole. Prior to the close of the fiscal year the first attorney assigned to the San Francisco office resigned. and was succeeded by an attorney from the Washington office of the general counsel.

Attorneys from the penal division frequently are sent to various points throughout the United States to render assistance requested by United States attorneys in criminal cases, and under appointment as special assistants to the Attorney General to conduct grand jury proceedings, jury trials, and other court proceedings in collaboration with United States attorneys. While it is recognized that criminal offenders in tax cases should be punished for violation of law, sucessful prosecutions have the added and more far-reaching effect of impressing upon the taxpayer's community the results of infractions of the law in tax cases, and serve as a warning to other possible lawbreakers. The penal provisions of the law are, of course, incidental to the general purpose of raising revenue, but the successful prosecution of numerous violators of the tax laws is believed to have resulted indirectly in the voluntary payment of large amounts of taxes legally due.

Cases handled by the penal division are classified as (1) interpretative and (2) law cases. These are subdivided so that under each classification there ine income-tax cases and miscellaneous tax cases, the latter consisting of the large variety of cases other than those involving income taxes.

At the beginning of the fiscal year there were pending in the penal division 767 cases. During the year there were received 1,076 new cases, compared with a total of 639 cases received during the previous fiscal year. During the year ended June 30, 1927, there was a total of 1,843 cases under consideration, while 1,164 cases were disposed
of, leaving 679 cases pending June 30, 1927. There was, therefore, a net decrease in cases pending at the close of the year of 88 cases. Special effort was made finally to dispose of the older cases, not only those which had been in the division longest, but likewise those involving the earlier tax years. This effort has been quite successful and a considerable number of the older cases have now been closed. However, certain cases of this character, such as those in litigation, can not finally be disposed of until the litigation ends.
A tabulation of the number of cases received, disposed of, and pending follows:

## INTERPRETATIVE CASES

Pending July 1, 1926: 
Miscellaneous tax cases ..... 22
Received during fiscal year ended June 30, 1927 : ..... 376
Income-tax cases ..... 634
Miscellaneous tax cases ..... 73707
Total interpretative cases pending during fiscal year ..... 1, 083
Closed during fiscal year ended June 30, 1927:
Income-tax cases. ..... 631
Miscellaneous tax cases ..... 65
Cases pending at close of fiscal year ended June 30, 1927 :
Income-tax cases ..... 357
Miscellaneous tax cases ..... 30387LAW CASES696

Number of cases commenced during fiscal year ended June 30, 1927... 834
Number of cases terminated during same period.............................. 1,036
Number of cases pending at close of business on June 30, 1927........ 1, 188
The above figures include the large number of cases referred directly to United States attorneys by collectors of internal revenue throughout the United States.

Claims for reward for information relative to violations of the internal-revenue laws submitted under the terms of Circular 99, revised, promulgated in accordance with the provisions of section 3463, Revised Statutes, were filed and disposed of during the year ended June 30, 1927, as follows: Pending July 1, 1926, 13; presented during year, 31 ; disposed of during year, 15 ; pending July 1, 1927, 29.

Twenty informal claims for reward were disposed of during the last fiscal year, either by closing the cases after the lapse of six months without receipt of further information from correspondents or by letters advising informers of the reasons why favorable consideration could not be given by this office to formal claims, if presented.

Twelve claims for reward were allowed in a total sum of $\$ 10,948.26$.
The 29 claims pending are awaiting receipt of reports from the field officers of the bureau who are conducting investigations in the cases in question, or the closing of the law cases with which such claims are associated.

CIVIL DIVISION
The civil division, in cooperation with the Department of Justice and the United States attorneys' offices, handles all civil internalrevenue cases pending in the Federal courts. These cases include the prosecution of suits by the United States to recover unpaid taxes, and the defense of suits brought by taxpayers against collectors of internal revenue or the United States to recover taxes alleged to have been erroneously assessed and collected. While the United States attorneys are charged with the responsibility for the conduct of these cases, the attorneys of the civil division assemble the evidence, prepare and brief the cases for trial both as to the facts and the law, and an attorney of the civil division is usually present to assist at the trial. In most instances the trial of the case, at the suggestion of the United States attorney, is conducted by the attorney of the civil division. Where cases are appealed the attorneys of the civil division assist in preparing the record and a brief for the appellate court is forwarded to the United States attorney for printing and filing. Cases in appellate courts are frequently argued by the attorneys of the civil division.

Petitions for certiorari and briefs in tax cases in which petitions for certiorari have been granted by the Supreme Court are prepared in the civil division for the assistance of the Solicitor General.

The principal centers of litigation with reference to the number of cases pending and the amounts involved are New York, Philadelphia, Boston, Chicago, Pittsburgh, and San Francisco.

64761-FI 1927-64

The following civil internal-revenue tax cases were decided by the Federal courts during the fiscal year 1927:

The number of civil internal-revenue tax cases pending in the Federal courts at the end of the fiscal year 1927 compared with the number pending at the end of the previous fiscal year is as follows:

| $\cdots$ | Cases for suit by the United States | Cases pending in district courts | Cases pending in circuit courts of appeals | Cases pending in Court of Claims | Cases pending in the Supreme Court | Cases pending settlement | $\begin{aligned} & \text { Cases } \\ & \text { pend- } \\ & \text { ing } \\ & \text { pay- } \\ & \text { ment } \\ & \text { of } \\ & \text { judg- } \\ & \text { ment } \end{aligned}$ | State court and miscel. laneous cases | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Civil cases pending July 1, 1926. $\qquad$ <br> Civil cases pending July 1, 1927 $\qquad$ | 369 290 | 1,498 1,605 | 52 80 | 362 482 | 23 27 | 5 95 | 36 99 | 55 130 | 2,400 2,808 |

During the fiscal year, 1,530 new civil cases were received and 1,187 civil cases were closed, 20,898 letters were written, 10,064 memoranda prepared, 776 telegrams, 85 Treasury decisions, and 266 briefs. Civil compromise cases received during the fiscal year numbered 361. Of such cases, 474 (including a number already pending in division before fiscal year) were disposed of, 264 being rejected and 210 accepted. The total amount of tax liability involved in these compromises was $\$ 9,945,314.31$, and $\$ 2,087,345.29$ accepted in lieu thereof.

A section of the civil division is designated as the bankruptcy, receivership, and compromise section. This section handles all cases in which claims are filed by collectors in bankruptcy and receivership proceedings and claims against the estates of insolvent persons. Evidence in support of the Government's claim is assembled in this section and forwarded to the collector or the United States attorney for use before the referee or trustee and the courts. Briefs are also prepared upon law points involved for the use of the United States attorneys in court proceedings, and in important cases an attorney from the section is present at the trial. In addition to the above, this section handles all compromise cases involving interest and delinquency penalties, exclusive of civil compromises and compromises of specific penalties and fraud cases.

The work of the section for the fiscal year is summarized as follows:
Cases pending July 1, 1926 ..... 2, 478
Cases closed during year ..... 1, 846
Cases pending June 30, 1927 ..... 2, 074In the 1,846 cases closed, claims were filed in the amount of$\$ 5,399,778.13$, and the sum of $\$ 1,730,422.58$ was collected.
Insolvent compromises
Cases pending July 1, 1926 ..... 320
Cases closed during year ..... 1, 086
Cases pending June 30, 1927 ..... 470

Of the 1,086 cases closed, 401 were accepted in the sum of $\$ 1,710$,734.12 for taxes aggregating $\$ 6,429,106.37$, and 676 were rejected.
Interest and delinquency penalty compromises
Cases pending July 1, 1926 ..... 1, 330
Cases closed during year ..... 40

In addition, 65 bankruptcy and receivership cases which, because of the large amounts involved and their complicated nature, require special attention are pending as civil cases and are included in the preceding summary.
New York State leads in the number of bankruptcy and receivership cases, followed by Illinois, Pennsylvania, Massachusetts, New Jersey, Oklahoma, California, Texas, and Ohio.

## SUMMARY OF SUITS AND PROSECUTIONS

The following is a statement of internal-revenue cases handled by the district courts of the United States during the fiscal year ended June 30, 1927, as furnished this office by the Department of Justice:

## ADMINISTRATIVE DIVISION

The administrative division is charged with the supervision of the library, manuscripts, mail and records, supplies and equipment, personnel, and editorial matters arising in and affecting the work of the office. The support and cooperation rendered by this division have proved of benefit to attorneys assigned to the other divisions and have afforded them great assistance in the dispatch of matters handled by them.

## Bureat and Field Personnel

The following statement shows the number of employees in the Internal Revenue Service on June 30, 1926, and the number in the service on June 30, 1927:

1 Exclusive of 40 temporary employees.
${ }^{2}$ Exclusive of 10 temporary employees.
${ }^{3}$ The employees in the Prohibition Service were transferred to the Prohibition Bureau, Treasury Department, on Apr. 1, 1927, in accordance with Public Act No. 751.

Under the provisions of the retirement act, 21 classified employees were retained in the service after reaching the age of 70 . Fifty-four were retired on annuity, 14 of whom were retired on account of total disability.

Respectfully;

> D. H. BLair, Commissioner of Internal Revenue.

Hon. A. W. Mellon,
Secretary of the Treasury.
Note.-For statistical details of the Report of the Commissioner of Internal Revenue, see his annual report.

| Total |  | 2, 835, 999, 892. 10 | 2, 865, 683, 129. 91 | +1 |

${ }^{5}$ Includes $\$ 18,827.34$ income tax on Alaska railroads (act of July 18, 1914).

- In addition to this amount, collections on tobacco manufactures from the Philippine Islands are included as follows: First California, $\$ 945.62$; Hawaii, $\$ 2,028.15$; First Illinois, $\$ 523.77$; Indiana, $\$ 20.60$; Second New York, $\$ 2,377.06$; Twenty-first New York, 10 cents; and Washington, $\$ 21.90$.
${ }^{7}$ The figures concerning internal-revenue receipts as given in this statement differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collection by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue stamps and deposits of internal revenue collected through customs offices, while the latter represent the deposits of these collections in the I'reasury or depositaries during the fiscal year concerned, the difierences boing due to the fact that some of the collections in the latter part of the fiscal year can not be deposited or are not reported to the Treasury as deposited until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury.

Summary of Internal-Revenue Receipts, Year Ended June 30, 1927, by States

Note.-The taves on tobacco manufactures, such as cigars, cigarettes, etc., and antomobiles and certain other miscellaneous taxes, are paid by the manufacturers and in the above table are credited to the States in which the payments have been made. Nany of these articles are distributed for consumption or sale throughout the country. In consequence, these taxes are eventually borne by the consumers in the states wherever they inay reside. However, in view of the manner of accounting for internal revenue collections it has not been possible to make adjustments on account of this condition in computing the "Per capita tax" shown in the last column of the table.

Summary of Income-Tax Receipts from Corporations and Individuals, Year Ended June 30, 1927, by States

## SUMMARY

| Quarter ended- | Corporation | Individual | Total |
| :---: | :---: | :---: | :---: |
| Sept. 30, 1926. | \$310,582, 817.09 | \$213,001, 039. 29 | \$532, 583, 856. 38 |
| Dec. 31, 1926 | 305, 764, 107.32 | 204, $324,949.87$ | $510,089,057.19$ |
| Mar. 31, 1927 | 347, 896, 143.87 | 256, 687, 837.88 | 604, 583, 981. 75 |
| June 30, 1927. | 334, 769, 464.62 | 237, 926, 083.78 | 572, 695, 548.40 |
| Total, fiscal year 1927. | 1,308, 012, 532.90 | $911,939,910.82$ | 2,219,952, 443.72 |
| Total, fiscal year 1926. | 1, 094, 979, 734.17 | 879, 124, 407.16 | 1, 974, 104, 141.33 |
| Increase, 1927. | 213, 032, 798. 73 | $32,815,503.66$ | $245,848,302.30$ |

## Internal-Revenue Tax on Products from Phillippline Islands, Years Ended June 30, 1926 and 1927, by Articles Taxed

| Articles taxed | 1926 | 1927 | Increase ( + ) or decrease (-) |
| :---: | :---: | :---: | :---: |
| Cigars (large) | \$783, 215.89 | \$373, 505. 07 | -\$409, 710.82 |
| Cigars (small) .-. |  |  | -.90 -40.32 |
| Cigarettes (large) | $\begin{array}{r}59.76 \\ 4,507 \\ \hline 17\end{array}$ | 19.44 7 | + $\begin{array}{r}-40.32 \\ +2.6106\end{array}$ |
| Manufactured tobacco | 4, 198.09 | ${ }^{7} 180.09$ | -18.00 |
| Stamp sales (documentary) | 2, 905.75 | 2,358.50 | -547. 25 |
| Total. | 790, 887.56 | 383, 241. 33 | -407,648. 23 |

Note.-Under the tariff act of August 5,1909 , the above receipts with the exception of the internal revenue collected from sale of documentary stamps are covered into the Treasury of the United States to the credit of the treasurer of the Philippine Islands.

Internal-Revenue Tax on Products from Porto Rico, Years Ended June 30,
1.926 and 1927, by Articles Taxed

| Articles taxed | 1926 | 1927 | Increase ( + ) <br> or decrease (-) |
| :---: | :---: | :---: | :---: |
| Cigars (large) | \$950, 348. 04 | \$396, 333. 12 | -\$554, 014. 92 |
| Cigars (small) | 14, 617.80 | 7,648. 50 | -6,969. 30 |
| Cigarettes (large) | 26, 475. 84 | 35, 165.52 | +8,689.68 |
| Cigarettes (small) | 1,459.62 | 1,533. 57 | +73.95 |
| Stamp sales (documentary) | 103. 25 | 1.70 | -101.55 |
| Total | 983, 004. 55 | 440,682. 41 | -552, 322. 14 |

Note.-The above receipts for 1927 include $\$ 440,680.71$ deposited at San Juan, P. R., to the credit of the treasurer of Porto Rico, which amount is not included in internal-revenue collections shown in other statements herein. The receipts from sale of documentary stamps in Porto Rico arc included in the collections reported from the second district of New York.

## Important Decisions of the Federal Courts in Internal Revenue. Cases

## ADMIIVISTRATIVE AND PROCEDURE

Kentucky Jockey Club v. Lucas, collector.-District Court of the United States for the Western District of Kentucky (14 Fed. (2d) 539; T. D. 3915).

Section 250 (b) of the revenue act of 1921, providing for interest on deficiencies, applies to a deficiency for a fiscal year beginning in 1920 and ending in 1921, although payment of the tax was not postponed at the request of the taxpayer, and there was no understatement due to negligence or intent to defraud in the retirn filed.

Girard Trust Co. et al., trustees of Moore, v. United States.—United States Supreme Court (270 U. S. 163; T. D. 3919).

Under sections $250(\mathrm{~b}), 252$, and 1324 (a) of the revenue act of 1921, the date of allowance to which interest is payable on refunds is the date of final approval by the commissioner and neither the date when the commissioner first determines that an overassessment should be made and transmits the schedule to the collector nor the date of final payment.

Under section 1324 of the revenue act of 1921 interest is payable from the date of payment of the tax only where the taxpayer makes a specific protest setting forth in detail the basis and reasons for such protest. Otherwise interest is payable from six months after the date of filing the claim for refund.

Interest is not payable on the discount of 3 per cent allowed for early payment by section 1009 of the revenue act of 1917 .

Israelite House of David v. Holden, collector.-District Court of the United States for the Western District of Michigan (14 Fed. (2d) 701 ; T. D. 3920).

Under section 3226, Revised Statutes, no action for the recovery back of taxes paid can be maintained unless after the payment of the tax a claim for refund has been filed.

United States of America v. Northern Finance Corporation.-United States Circuit Court of Appeals for the Second Circuit (unreported to date; T. D. 3963).

In determining whether a suit by the United States is barred by section $250(\mathrm{~d})$ of the revenue act of 1921 , the suit is "begun," within the meaning of the statute, as soon as the writ, after issuance, has been lodged in the marshal's hands for service.
W. C. Tucker v. Acel C. Alexander, collector of internal revenue.United States Circuit Court of Appeals for the Eighth Circuit (15 Fed. (2d) 356; T. D. 3973).

A suit to recover internal-revenue taxes can only be maintained upon the same grounds and only such as are presented to the Commissioner of Internal Revenue in the claim for refund filed as a necessary prerequisite to suit.

Julia Barnett Rice v. Eisner, collector.-United States Circuit Court of Appeals for the Second Circuit (16 Fed. (2d) 358; T. D. 3974).

Where the principal amount under a claim for refund is accepted, suit can not be brought to recover interest, although a receipt is given in which there is a reservation of the "right, if any, to recover any additional sum for which suit might thereafter be brought."

Red Wing Malting Co. v. Willcuts, collector of internal revenue.United States Circuit Court of Appeals for the Eighth Circuit (15 Fed. (2d) 626; T. D. 3980).

The precise ground upon which the refund of taxes is demanded must be stated in the application to the commissioner, and a suit in court to recover the tax can not be based upon an entirely different and distinct ground from that presented to the commissioner.

Alexander $S$. Walker, formerly collector of internal revenue, v. Alamo Foods Co.-United States Circuit Court of Appeals for the Fifth Circuit (16 Fed. (2d) 694; T. D. 3984).

Where a taxpayer pursuant to section 3229 of the Revised Statutes offers a certain sum in compromise of taxes, penalties, civil and criminal liability, which offer is duly accepted by the authorized officers of the Government, an action at law can not thereaft?r be maintained to recover back a part of the taxes alleged to have been illegally assessed and collected.

Gray Motor Co. et al. v. United States.-United States Circuit Court of Appeals for the Fifth Circuit (16 Fed. (2d) 367; T. D. 3994).

In a suit by the United States against the principal and surety on a bond given in support of a claim for abatement which was rejected in part, the action is one for the breach of the condition of the bond, and the amount or validity of the tax can not be raised as a defense.

A suit instituted on May 29, 1925, is within the five-year limitation provided by sections 277 and 1009 of the revenue act of 1924, the return having been filed on May 29, 1920.

Daniel Ritter v. United States.-United States District Court for the Western District of Pennsylvania (19 Fed. (2d) 251; T. D. 4007).

Under sections 1112 and 1113 of the revenue act of 1926, amending sections 3228 and 3226 of the Revised Statutes, a formal written claim for refund is necessary as a prerequisite to suit, and a verbal claim for refund does not comply with the statutory requirement.

The Government is not estopped to plead the bar of the statute of limitations by reason of representations made by a revenue agent that it was not necessary to file a written claim for refund.

United States v. William H. Fairall et al.-United States District Court for the Southern District of New York (16 Fed. (2d) 328; T. D. 4008).

It is not necessary to obtain a judgment against a dissolved corporation for unpaid Federal taxes as a condition precedent to a suit in equity against stockholders to enforce their liability as transferees where it is either impossible to obtain a judgment against the corportation, or obtaining a judgment is manifestly useless and an idle formality.

Bowers, collector, v. Lloyd W. Seaman; and Bowers, collector, v. Thomas Staples Fuller.-United States Supreme Court (273 U. S. 346; T. D. 4009).
"Distraint" is a "proceeding"' within the meaning of section 250 (d) of the revenue act of 1921, and under that section collection by distraint is barred after five years from the date the return was filed.

United States v. Morris Drielinger et al.-United States District Court for the Southern District of New York (unreported to date; T. D. 4031).

A bond given in connection with a claim in abatement reading in part that "A . * * * as principal and B and C ${ }^{*}$. * * as sureties are ${ }^{*} *^{*}$ jointly and severally held and firmly bound unto the United States of America in the sum of $\$ 15,000$ for payment of which well and truly to be made unto Frank K. Bowers * * * the parties hereby bind themselves is a contract of suretyship by which the sureties incurred a joint and several obligation unaffected by the failure of the United States to give prompt notice to the sureties of the default of the principal, by its failure to commence action against him, or by his bankruptcy.

Delay in rejecting an offer in compromise and the retention meanwhile of the amount offered does not constitute an agreement to compromise nor do they estop the Government from recovery on the bond.

Talcott v. United States.-United States District Court for the Northern District of California (unreported to date; T. D. 4032).

There is no statutory limitation to the recovery by the Government of taxes refunded by mistake under an erroneous construction of the law.

Suhr v. United States.-United States Circuit Court of Appeals for the Third Circuit (18 Fed. (2d) 81; T. D. 4033).

A court is without jurisdiction to determine whether a taxpayer has made an overpayment of tax in respect of a taxable year in respect of which the commissioner has determined a deficiency where the taxpayer's appeal from the commissioner's determination is pending before the United States Board of Tax Appeals. In such a case jurisdiction is not acquired by reason of the fact that a part of the tax already paid, less than the deficiency, resulted from the inclusion in income of an amount that was not taxable.

The decision of the district court in the case of Suhr v. Onited States affirmed. ( 14 Fed. (2d) 227; T. D. 3894.)

Dreyfuss Dry Goods Co. v. Lines, former collector.-United States District Court for the Eastern District of Louisiana (18 Fed. (2d) 611; T. D. 4039).

Where a corporation dissolves and its assets are taken over and its business is continued by a partnership composed of the former stockholders, additional income and profits taxes, admittedly due from the corporation for the last year of its existence but assessed against and paid under protest by the partnership, can not be recovered in a suit brought by the partners where such irregularity resulted from the conduct of the partners in returning the income of the corporation in the name of the partnership, paying the tax shown on such return to be due, and formally acknowledging themselves to be the direct successors to the business and assets of the corporation.

The bar of the statute of limitations, not having been presented to the Commissioner of Internal Revenue in the claim for refund, can not be made the basis for recovery of taxes by suit.

James A. Haight, jr., trustee in bankruptcy; v. Onited States. United States District Court for the Western District of Washington, Northern Division (20 Fed. (2d) 245; T. D. 4073).

Where an individual stockholder paid the normal income tax under the revenue act of 1918 upon his distributive share of the income of a corporation, upon the theory that it was a personalservice corporation, but subsequently the corporation was denied personal-service classification, the stockholder is entitled to a refund under section 1210 of the revenue act of 1926 only if the corporation has paid the tax due from it.

## ADMISSIONS AND DUES

Lukens v. The United States.-United States Court of Claims (62 Ct. Cls. 598; T. D. 3954).

An amount paid for a certificate of proprietary interest in a club, required to be purchased as a prerequisite to membership, is not taxable under section 501 of the revenue act of 1924 as an initiation fee.

An initiation fee under section 501 is an amount paid to a club for the purpose of enjoying its privileges and which once paid will not be returned.

Alliance Country Club v. The United States.-United States Court of Claims ( 62 Ct. Cls. 579 ; T. D. 3955 ).

An amount paid for a share of the capital stock of a social club, required to be purchased as a prerequisite to membership, is not taxable under section 801 of the revenue acts of 1918 and 1921 as an initiation fee.

An initiation fee, under section 801 of the revenue acts of 1918 and 1921, is an amount paid for the purpose of becoming a member of a club, the amount so paid being parted with absolutely by the person paying it.

Under section 802 of the revenue acts of 1918 and 1921, a club may maintain an action for recovery of taxes imposed upon its members by section 801 of such acts.
John H. Page $\mathrm{\nabla}$. The United States.-United States Court of Claims ( $62 \mathrm{Ct} . \mathrm{Cls} .590 ;$ T. D. 3956 ).
An amount paid for a share of the capital stock of a club entitling the owner upon election by the board of directors to membership in the club is not taxable under section 801 of the revenue act of 1918 as an initiation fee.

An initiation fee, under section 801, is a payment, without the expectation of being refunded, made by a person who wishes to become a member of a social or fraternal club already established, and is not a payment by a person who, with others, founds and establishes a club.

Chimney Rock Co. v. United States.-Court of Claims of the United States (unreported to date; T. D. 4075).

Where a company maintains a park for the enjoyment of the general public accessible by a private road 3 miles long, on which at a point a half mile from the park each person entering the park is required to purchase a ticket which admits the purchaser to its attractions, such charges are admissions subject to the tax imposed by section 800 (a) of the revenue acts of 1918 and 1921 and section 500 (a) of the revenue act of 1924.

## BANKRUPTCY AND RECEIVERSHIP

Villere v. United States.-United States Circuit Court of Appeals for the Fifth Circuit (18 Fed. (2d) 409; T. D. 4070).
Section 57 (n) of the national bankruptcy act, providing that claims shall not be proved against a bankrupt estate subsequent to one year after the adjudication, is not a bar to the presentation and payment of a claim by the United States for taxes while the estate is open and there are undistributed assets.

## BEVERAGE TAX

J. Hungerford Smith Grape Juice Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4043).

Where beverages taxable under section 628(a) of the revenue act of 1918 are sold by the manufacturer with freight prepaid or are invoiced at a price less freight, the purchaser paying the freight at destination, deducting it from the amount of the invoice and remitting the remainder to the seller, such charges for freight are not a part of the price for which the beverages are sold.

Where such bèverages are sold with the understanding that if paid for within a certain period the purchaser may take a cash discount, and the purchaser elects to take advantage of this provision of the contract of sale, the amount of such discount is deductible in determining the price for which the beverages are sold.

The cost of bottles and containers and the expense of bottling and packing, included in the price charged to and paid by purchasers for such beverages, are a part of the selling price upon which the tax is based.

## ESTATE TAX

David H. Frazer and Susan A. Henning v. United States.-District Court of the United States for the Eastern District of Michigan, Southern Division (unreported to date; T. D. 3913).

The total value of community property consisting of real estate situated in California should be included in the gross estate of a decedent who was a resident of Illinois, as the wife has no vested interest in the community property prior to the death of the husband, but a mere expectancy, and the property passed to her as an heir by inheritance and constituted a "transfer" within the meaning of the estate tax imposed by the revenue act of 1916 as amended by the act of March 3, 1917, and the revenue act of 1917.

The rights of the wife in community property in California were not enlarged by the California inheritance tax act of 1917, as that statute only applies to the State inheritance tax and not to the Federal estate tax.

The decision of the Supreme Court in the case of United States v. Robbins (269 U. S. 315; T. D. 3817) followed.

Elise Whitlock-Rose, executrix of Henry C. Whitlock, deceased, v. McCaughn, collector.-United States District Court for the Eastern District of Pennsylvania (15 Fed. (2d) 591; T. D. 3960).

A power of appointment, although it can be exercised only by will, is a general power of appointment within the meaning of section 402 (e) of the revenue act of 1918, there being no limitation as to the persons or estates which may be appointed.

Irving Bank-Columbia Trust Co., as executor of Herman Sielcken, deceased, v. United States.-United States Court of Claims (62 Ct. Cls. 564; T. D. 3961).

The Federal estate tax can not be deducted from the gross estate of a decedent under section 203 (a) 1 of the revenue act of 1916 as a charge against the estate allowed by the laws of the jurisdiction under which the estate is being administered.

The decision in Edwards v. Slocum (264 U. S. 61; T. D. 3584) followed.

Old Colony Trust Co. et al., executors, v. Malley, collector.-United States District Court for the District of Massachusetts (15 Fed. (2d) 105; T. D. 3962).

The Federal estate tax can not be deducted from the gross estate of a decedent under section 203(a)1 of the revenue act of 1916 as a charge against the estate allowed by the laws of the jurisdiction under which the estate is being administered.

The estate tax is imposed upon each estate as a unit and the method of computing the tax provided by article 8 of Regulations 37 (revised) is correct.

Farmers' Loan \& Trust Co., as trustee under a deed of trust made by William Waldorf Astor (now deceased) dated May 25, 1916, v. Bowers, collector.-United States District Court for the Southern District of New York (15 Fed. (2d) 706; T. D. 3988).

A trust in which the founder reserves the right to revoke the trust with the consent of the trustee and the right to change the trustee, the corpus to be distributed at death, is intended to take effect in possession or enjoyment at or after death within the meaning of section 402 (c) of the revenue act of 1918, and the value of the corpus a.t the date of death should be included in the gross estate.

Section 402 (c) of the revenue act of 1918 is constitutional when construed to include a trust created prior to September 8, 1916, terminating at death, in which the founder reserves a right to revoke the trust with the consent of the trustee and the right to change the trustee:

Section 409 of the revenue act of 1918 has no application to a case in which the trust instrument provides that all taxes shall be paid out of the trust funds.

Talcott v. United States.-United States District Court for the Northern District of California (unreported to date; T. D. 4032).

In determining the gross estate of a deceased husband for the purposes of the Federal estate tax there should be included the entire value of the community property acquired under the laws of the State of California.

Lemuel Ray Carter, trustee under the will of Thomas W. Carter, v. United States.-District Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri (unreported to date; T. D. 4047).

The amount expended by a trustee under the will of the deceased person for the erection of a mausoleum after the final settlement of the decedent's estate and the discharge of the executor is not deductible from the value of the gross estate in determining the value of the net estate under section 403 of the revenue act of 1921 .

Carrie Steedman et al. v. United States.-United States Court of Claims (unreported to date; T. D. 4049).

The interest of a decedent at the time of death in real estate should be included in the gross estate under section 402 (a) of the revenue act of 1921, notwithstanding the fact that the State law does not specifically authorize the sale of such real estate for the payment of administration expenses. (Dnited States v. Field, 255 U. S. 257, distinguished.)

John J. Mitchell, Augustine L. Humes, and Illinois Merchants Trust Co., as executors of the last will and testament of Dellora $R$. Gates, deceased, v. United States.-Court of Claims of the United States (unreported to date; T. D. 4051).

The amount of a bequest for charitable purposes contingent upon an event that may never happen is not deductible from the value of the gross estate in determining the value of the net estate under section 403 of the revenue act of 1918.

Shukert et al., executrices of Shukert, v. Allen, collector.-United States Supreme Court (273 U. S. 545; T. D. 4071).

An immediate and absolute transfer by a decedent to another in trust vesting the interest of the beneficiaries as soon as the trust instrument is executed, the trust in its terms having no reference to his death, does not create a trust "intended to take effect in possession or enjoyment at or after his death" by reason of a provision for the accumulation of the income for the beneficiaries for 30 years and, the grantor not having acted in contemplation of death, the value of the property so transferred is not required to be included in determining the value of the decedent's gross estate under section 402 (c) of the revenue act of 1918.

Nichols, collector, v. Coolidge et.al.-United States Supreme Court (47 S. Ct. 710; T. D. 4072).

Where a decedent conveys immediately an absolute and indefeasible title to property and contemporaneously the grantee leases the property to the grantor for one year at nominal rental with provision for annual renewals until notice to the contrary, the conveyance is not a transfer "intended to take effect in possession or enjoyment at or after his death" within the meaning of section 402 (c) of the revenue act of 1918, though there is an understanding, without, however, a valid agreement, that the premises may be enjoyed by the grantor as long as he might desire to use them for residential purposes.

Section 402 (c) of the revenue act of 1918, in so far as it requires that there shall be included in the gross estate the value of the property transferred irrevocably in trust by a decedent in 1907 merely because the conveyance was intended to take effect in possession or enjoyment at or after death, is unconstitutional.

Lucy G. Briscoe et al. v. E. B. Craig, collector.-United States District Court at Knoxville, Tenn. (unreported to date; T. D. 4074).

An agreement between a widow and the executor of her husband by the terms of which she released all her rights as widow against the executor except her interest under his will is not such dissent from the will as is required by the law of Tennessee, and payments made to the widow as a result of such agreement are not deductible from the value of the gross estate under section 203(a)1 of the revenue act of 1916 as charges against the estate allowed by the laws of the jurisdiction under which the estate is being administered.

## FILLED CHEESE TAX

Chicago Cheese \& Farm Products Co., a corporation, v. United States.-United States Court of Claims (unreported to date; T. D. 4079).

A substance made of casein, commonly known as skimmed milk curd, with the admixture of cocoanut oil as a substitute for the butter fats which have previously been extracted from the whole milk, and made in imitation of soft or cream cheese, is "filled cheese" as defined by section 2 of the act of June 6, 1896 (29 Stat. 253, ch. 337).

## GIFT TAX

Anderson, collector, v. George McNeir.-United States Circuit Court of Appeals for the Second Circuit (16 Fed. (2d) 970; T. D. 3993).

The gift tax imposed by the revenue act of 1924 is constitutional as an excise, although it imposes a retroactive tax on gifts completed prior to the passage of the act.

## INCOME AND EXCESS PROFITS TAX

W. S. Barstow \& Co. (Inc.) v. Bowers, collector.-United States District Court for the Southern District of New York (15 Fed. (2d) 75; T. D. 3931).

A corporation which kept its books upon an accrual basis and filed returns upon a fiscal-year basis beginning June 1, 1917, can not under section 212 (b) of the revenue act of 1918 file a return for the period June 1, 1917, to December 31, 1917, on a cash basis and for the period January 1, 1918, to June 1, 1918, on an accrual basis, the statute requiring that the returns must be filed and the tax computed in accordance with the method regularly employed in keeping its books, which in the instant case is the accrual basis.

George Haviland v. Edwards, former collector.-United States District Court for the Southern District of New York (15 Fed. (2d) 445; T. D. 3932).

Under the revenue act of 1918, shrinkage in the value of a loan repayable in German marks caused by the falling value of such marks can not be deducted from gross income as a loss incurred in trade or business or as exhaustion, wear, tear, or obsolesence until the transaction is closed either by repayment or cancellation of the loan.
The fact that a partnership on its books for invested capital purposes and excess profits tax reduces to its present value an unpaid loan of German marks at the depreciated rate does not furnish any ground for a deduction by a partner in his individual tax return.

Ream v. Bowers, collector.-United States District Court for the Southern District of New York (14 Fed. (2d) 993; T. D. 3936).

Where a testator provides that his executor "shall receive in full payment for all commissions, percentages, and allowances by statute or otherwise for acting as executor of this my will, the sum of $\$ 50,000$," the amount received by the executor is taxable income under section 2 (a) of the revenue act of 1916, as amended by section 1200 of the revenue act of 1917, as compensation for services in the execution of his duties as executor, and is not exempt as a gift or bequest
within the provisions of section 4 of the revenue act of 1916 as amended by section 1200 of the revenue act of 1917.

The case of United States v. Merriam (263 U. S. 179; T. D. 3535) distinguished.

Charles V. Duffy, former collector of internal revenue, v. The Mutual Benefit Life Insurance Co.-United States Supreme Court (272 U. S. 613; T. D. 3959 ).

In computing the excess profits tax of a mutual life insurance company having no capital stock, the legal reserve should be included as "invested capital" of the company under the definition of section 207 of the revenue act of 1917.

Samuel J. Kornhauser v. United States.—United States Court of Claims (62 Ct. Cls. 647 ; T. D. 3964).

An amount paid for attorney's fees incurred in the defense of an action by a former partner for an accounting is not a business expense or loss within the meaning of section 214 of the revenue act of 1918, but is a personal expense within the meaning of section 215 , and is therefore not deductible.

James R. Tindle and the Union Trust Co. of. Pittsburgh, coexecutors of the last will and testament of Philander C. Knox, deceased,.v. Heiner, collector.-United States District Court for the Western District of Pennsylvania ( 17 Fed. (2d) 522; T. D. 3966).

A loss sustained upon the sale of a residence is not deductible under section 214(a)5 of the revenue act of 1918, because it is not a transaction entered into for profit within the meaning of the statute.

John D. Lindsay v. Bowers, collector.-United States District Court for the Southern District of New York (17 Fed. (2d) 264; T. D. 3969).

The New York Society for Prevention of Cruelty to Children is not a State agency but a private, philanthropic organization, and the salary of an officer is not exempt from taxation upon the ground that the society is a governmental agency of the State of New York or the salary is received by an officer or employee of the State.
J. HI. Wiener v. Weiss, collector, and J. H. Wiener v. Routzhan, collector.-United States District Court for the Northern District of. Ohio, Eastern Division (17 Fed. (2d) 650; T. D. 3970).

A lessee of real estate and buildings, under a 99 -year lease renewable forever, is not entitled to a deduction for depreciation under section 214 (a) 8 of the revenue act of 1918, on buildings erected by the lessor, the lessee having no capital investment therein.

Depreciation is an allowance made to a taxpayer to replace his capital investment and capital invested is the cost of the property if acquired since since March 1, 1913, and if acquired prior thereto, its value as of that date.

William C. Reid v. Rafferty, collector.-United States Circuit Court of Appeals for the Second Circuit (15 Fed. (2d) 264 ; T. D. 3971).

Under subsection 29 of section 1211, revenue act of 1917, a partner, in his individual income tax return for the year 1917, is entitled to a credit of his proportionate share of the excess profits taxes paid for the year 1917 by the partnerships to which he belonged.

Capps Manufacturing Co. v. United States.-United States Circuit Court of Appeals for the Fifth Circuit (15 Fed. (2d) 528; T. D. 3972).

A stockholder of a dissolved or expired corporation is liable for its debts to the extent of the value of the assets acquired by virtue of his relation as stockholder. The liability for an unpaid tax due from
the dissolved corporation may be enforced by the United States by a suit in equity against former stockholders.
. Julia Barnett Rice v. Eisner, collector.-United States Circuit Court of Appeals for the Second Circuit (16 Fed. (2d.) 358; T. D. 3974).

The gain derived from the sale of stock received as a gift, based upon the difference between the selling price and the value at the time of the gift, is taxable as income under the provisions of the act of 1913 .

The exemptions from taxation of the corpus of gifts does not exempt the profit derived from a sale of the property given.
In the absence of an established market the admission of evidence of actual sales on the curb market, although few in number, and of "bid" and "asked" quotations from accepted financial journals, was not error.

William $R$. Verner, sole executor under the will of Emily L. Moore, deceased; v. United States.--United States Court of Claims ${ }^{*}(62 \mathrm{Ct}$. Cls. 574; T. D. 3975).

The income received by a life beneficiary under a testamentary. trust is not exempt from Federal income tax under Section II, paragraph B, of the act of 1913, and section 4 of the revenue act of 1916 as property acquired by gift, bequest, devise, or descent, since those sections exempt only the corpus of the property and not the income.

Irwin v. Gavit (268 U. S. 161; T. D. 3710) and Drexel v. Dnited States $(61 \mathrm{Ct}$. Cls. 216 ) followed.

Grace N. Lederer, executrix of Ephraim Lederer, formerly internalrevenue collector, deceased, v. Morris L. Parrish, George R. McClellan, and Percival Parrish, copartners, trading as Parrish \& Co.-United States Circuit Court of Appeals for the Third Circuit (16 Fed. (2d) 928; T. D. 3977).

Where a partner guarantees to a partnership the payment of doubtful accounts and, upon a loss occurring, the amount is charged to the capital account of the partner, thereby reducing his distributive share of the partnership profits, the loss can not be deducted by the partnership but is the individual loss of the partner.
J. H. Lane \& Co. (Inc.) v. Dnited States.-United States Court of Claims ( 62 Ct . Cls. 721; T. D. 3979).

A corporation engaged in selling goods on commission is not entitled to be taxed under section 303 of the revenue act of 1918 unless the business can be segregated into distinctly separate units; one a personal service unit as defined in section 200 and the others employing capital.

The record must furnish convincing proof that the alleged personal service branch is capable of distinct separation from its other sources of income and meets exactly the requirements of section 200 .

The guaranteeing of customer's accounts whereby payment for purchases made are secured involves the employment of capital.

Article 1529 of Regulations 45, denying personal service classification unless at least 80 per cent of the stock of the company is held by those regularly engaged in the active conduct of its affairs, is approved.
Red Wing Malting Co. v. Willcuts, collector.-United States Circuit Court of Appeals for the Eighth Circuit (15 Fed. (2d) 626 ;T. D. 3980).

No deduction can be taken for obsolescence of good will, an intangible asset, under section 234 (a), subdivision (7), of the revenue act
of 1918 , which limits the allowance for obsolescence to such property as is susceptible to exhaustion, wear and tear by use in the business.

Ormsby McKnight Mitchel v. Bowers, collector.-United States Circuit Court of Appeals for the Second Circuit (15 Fed. (2d) 287; T. D. 3982).

Under section 1204(1) of the revenue act of 1917, amending section 8 (e) of the revenue act of 1916, and section 218 (a) of the revenue act of 1918 the total profits on the interest of a firm partner are taxable as income to him irrespective of an agreement with his wife under which she was entitled to one-half of the partner's share of the profits and was liable for one-half of the losses, such an agreement not making the wife a member of the partnership.

Mrs. Darlie Fowler and M. Fowler v. United States.-United States Circuit Court of Appeals for the Fifth Circuit (16 Fed. (2d) 925; T. D. 3983).

In computing the surtax under section 211 (a) and (b) of the revenue act of 1918, on the profit arising from the sale of mineral lands, the method prescribed by article 13 of Regulations 45 should be followed.

Decision of the district court (11 Fed. (2d) 895; T. D. 3879) affirmed.

Little Cahaba Coal Co. and Blockton Cahaba Coal Co. v. United States.-United States District Court for the Northern District of Alabama, Southern Division (15 Fed. (2d) 863; T. D. 3985).

In determining invested capital in the case of mines, development costs may be capitalized until the mine reaches a stage of production, namely, when the output is such as to allow the payment of a dividend or shows a profit on the capital invested, after which further capitalization should not be allowed.

In capitalizing the cost of buildings, actual cost as shown by the books and records of the taxpayer should be taken rather than a value determined by a retrospective appraisal, supported by oral testimony, fixing an estimated average cost of the structures.

Chattanooga Savings Bank, administrator of the estate of John D. Key,'v. Brewer, collector.-United States Circuit Court of Appeals for the Sixth Circuit (17 Fed. (2d) 79; T. D. 3986).

Unauthorized withdrawals in proportion to stock holdings from the funds of a corporation during the year 1920, which are ratified in 1921 by formal declaration of a dividend in the amount of the withdrawals, are taxable to stockholders as income for the year 1920 under section 201(a) of the revenue act of 1918.

Fred M. Kirby v. United States.—United States Court of Claims ( $62 \mathrm{Ct} . \mathrm{Cls} .706$; T. D. 3995 ).

Although a surplus from business done in 1916 existed at the date of declaration, dividends declared and paid during the year 1917 are taxable to stockholders at the rates prescribed by the revenue act of 1917, there being sufficient earnings during the year 1917 to pay the dividends.

The decision in Edwards v. Douglas (269 U. S. 204; T. D. 3797) followed.

Georgetown Grocery Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4003).

Under section 234 (a) 5 of the revenue act of 1918, it is necessary in order to be entitled to claim a deduction for a bad debt that the
debt be ascertained to be worthless and charged off within the taxable year.

The Seinsheimer Paper Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4004).

Under section 12(a) of the revenue act of 1916 and section 234(a) 1 of the revenue act of 1918, the Commissioner of Internal Revenue is charged with the duty to consider and determine the reasonableness of a deduction claimed for salaries.

Consolidated Tea Co. (Inc.) v. Bowers, collector.-United States District Court for the Southern District of New York (19 Fed. (2d) 382 ; T. D. 4020).

The amount of a judgment for commissions entered against a taxpayer in 1919 was not a proper deduction from gross income for that year where the taxpayer's accounts were kept on the accrual basis and where an appeal was prosecuted and the judgment was affirmed by the appellate court in a later year

Becker Bros. v. United States (7 Fed. (2d) 3) distinguished.
Heiner, collector, v. Beatty, executrix.-United States Circuit Court of Appeals for the Third Circuit (17 Fed. (2d) 743; T. D. 4021).

Annual payments made to a taxpayer by a trustee under a will and arising from the interest on a capital sum which had been set apart and invested by the trustee in accordance with the provisions of the will, are not annual gifts or bequests to the taxpay.er exempt from income tax under section 213 (b)3 of the revenue act of 1918, but income upon which a tax is imposed by that act.

Irwin v . Gavit ( $268 \mathrm{U} . \mathrm{S} .161$; T. D. 3710) followed.
John D. Chapman v. United States.-United States Court of Claims (unreported to date; T. D. 4027).
Income resulting from the sale of stock received as a stock dividend is not the receipt of a dividend but gain or profit derived from the sale of stock. In determining the gain from a sale of original common stock in respect of which dividend stock of the same character, except that it had no voting rights, was issued, and also the gain from a sale of the dividend stock, the cost of each share of each kind of stock sold is computed by dividing the total cost of the old shares by the total number of the old and the new shares.

Dnited States v. Manly S. Sullivan.-United States Supreme Court (47 S. Ct. 607; T. D. 4028).
Gains realized from illicit traffic in liquor are subject to the income tax. An unlawful or prohibited business is not exempt from the payment of taxes that if lawful it would have to pay.
The protection against self-incrimination afforded by the fifth amendment to the Constitution is not infringed by the statutory requirement for a return of income derived from crime. The return is required by law and must be filed. A claim of privilege from answering any question on the return can not be determined finally by the taxpayer, but should be claimed in the return so that it may be passed upon.

Henry M. Landsberger v. McLaughlin, collector.-United States District Court for the Northern District of California (unreported to date; T. D. 4034).

No deduction can be taken for obsolescence of good will under section 214(a), subsection (8), of the revenue act of 1918 which limits
the allowance for obsolescence to such property as is susceptible to exhaustion, wear, and tear.

The decision of the Circuit Court of Appeals for the Eighth Circuit in the case of Red Wing Malting Co. v. Willcuts (15 Fed. (2d) 626; T. D. 3980) followed.

National Life Insurance Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4035).

Under the provisions of the revenue act of 1921 a life insurance company is not taxed on its interest realized from tax-exempt securities when such interest is included in gross ineome under the provisions of section 244, but is deducted therefrom in computing net income under the provisions of section $245(\mathrm{a}) 1$.

Under the provisions of section 245(a)2 of the revenue act of 1921, a life insurance company is entitled to deduct only an amount equal to the excess, if any, of 4 per cent of the mean of its reserves over the interest received from tax-exempt securities (sec. 245(a)1); and the use of said interest as a measure of the deduction allowed does not impair the exemption from the taxation of such interest.

The constitutional requirement of uniformity in the application of Federal statutes refers only to geographical uniformity and in construing the provisions of section 245 (a) 1 and 2 of the revenue act of 1921 the circumstance that one company may have more taxexempt securities than another, or none at all, does not result in discrimination nor destroy geographical uniformity of operation.

Acme, Palmers \& De Mooy Foundry Co. v. Weiss, former collector.United States District Court for the Northern Distriet of Ohio (unreported to date; T. D. 4036).
Where two companies possessing separate plants merge into a new corporation which retains the combined names of the old companies, no deductible loss of good will results from the subsequent sale of one of the plants where it appears that the business formerly conducted at such establishment is continued at its remaining plant. In such a case the good will, if any, attaching to the location was reflected in the sales price of the premises and the good will, if any, attaching to the name and established business was retained by the vendor.

The Feilbach Co. v. Niles, collector.-United States District Court for the Northern District of Ohio, Western Division (unreported to date; T. D. 4038).

Where the Commissioner of Internal Revenue finds that invested capital can be satisfactorily determined under section 207, a court is without jursidiction to compute the excess profits tax under the provisions of section 210 of the revenue act of 1917 in the absence of proof that the commissioner's determination was arbitrary or capricious.

Isidor Hellman v. United States.-United States Court of Claims (unreported to date; T. D. 4042).
In determining the distributive share of partnership income to which one of the partners was entitled, the partnership return, made in conformity with section 224 of the revenue act of 1918 and showing such share to be the same in amount as that entered in the partnership books of account, is conclusive evidence as to such partner's distributive share, in the absence of satisfactory proof of fraud, accident, or mistake.

Roanoke Water Works Co. v. Anderson, collector.-United States District Court for the Southern District of New York (18 Fed. (2d) 331; T. D. 4044).
A provision in a bond that "The principal and interest are payable * * * without deductions for taxes which the company may be required to pay or retain therefrom by any governmental authority of the United States * ***," held to be an agreement by the obligor "to pay the interest without deduction for any tax which the obligor may be required or permitted to pay thereon or to retain therefrom under any law of the United States" within the meaning of section 221 (b) of the revenue act of 1918, under which the obligor is required to deduct and withhold a tax equal to 2 per cent of the interest paid upon such bonds.
Haight v. Railroad Co. (6 Wall. 15) and Orquhart v. Marion Hotel Co. (128 Ark. 283) differentiated.

The New York Trust Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4045).

A New York corporation authorized by the laws of that State to act as administrator and executor of decedents' estates, guardian of minors and incompetents, testamentary trustee, and trustee under trusts created inter vivos, whose compensation is not paid by the State but indirectly by the private person or persons interested in the estate in each case, is not an officer or employee of the State nor engaged in the exercise of a governmental function, and the fees and compensation received by it in those capacities are not exempt from taxation under section 213(b) of the revenue act of 1918.

The plaintiff claiming the benefit of an exemption from taxation has the burden of showing clearly that it is within the exemption.

United States, petitioner, v. Charles A. Ludey.-United States Supreme Court ( 47 S. Ct. 608; T. D. 4046).

In determining the gain or loss from the sale of oil or mining properties, the basis is required to be diminished by the aggregate depreciation or depletion to which the taxpayer was entitled since the date of acquisition of the property or March 1, 1913, as the case may be.

Williamsport Wire Rope Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4048)

The provisions of the revenue act of 1918 authorizing the Commissioner of Internal Revenue, in the cases specified in section 327, to determine the tax as provided in section 328, confer a discretionary power and his determination that section 328 is inapplicable is final in the absence of bad faith or an abuse of discretion.

Where the Commissioner of Internal Revenue in good faith determines that section 328 is inapplicable, a court is without jurisdiction to award a judgment for the recovery of an excess-profits tax assessed under section 301 on the ground that it should have been computed under section 328.

Shelby County Mutual Relief Association v.G. W. Schwaner, collector, etc.--United States District Court for the Southern District of Illinois, Southern Division (unreported to date; T. D. 4050).

A local mutual life insurance company is not exempt from taxation under section 231(10) of the revenue act of 1918.

Chandler Motors of New England (Inc.), bankrupt.-United States District Court for the District of Massachusetts (17 Fed. (2d) 998; T. D. 4054).

The filing of a proof of claim for taxes in a bankruptcy proceeding is a "proceeding" within the meaning of section 250(d) of the revenue act of 1921, but payment of the claim is not barred because of its being filed more than five years after the taxpayer's return is filed, inasmuch as it is the duty of the trustee, under section 64(a) of the bankruptcy act, to pay all taxes legally due when they are called to his attention, and it is not necessary for the Government to file a proof of claim therefor.

Central Union Trust Co. of New York, Guaranty Trust Co. of New. York, Frederic A. Juilliard, Chester A. Braman, and Robert Westaway, as executors of the last will and testament of Augustus D. Juilliard, deceased, v. United States.-United States Court of Claims (unreported to date; T. D. 4056).

The income of a decedent from the beginning of the taxable year to the date of his death is subject to tax. A return of such income is required to be made by the executor or administrator as provided in section 225 of the revenue act of 1918.

No part of the State inheritance tax is deductible from the gross income of the decedent.

The decisions in Keith v. Johnson (271 U. S. 1; T. D. 3864) and Catherwood v. U. S. (291 Fed. 560; T. D. 3516) followed.

Bowers, collector, v. Max Kaufmann \& Co. (Inc.).-United States Circuit Court of Appeals for the Second Circuit (18 Fed. (2d) 69 ; T. D. 4057).

Promissory notes bona fide paid in for stock of a New York corporation constitute tangible property under section 325 of the revenue act of 1918 and as such are property actually received for stock under section 69 of the New York stock corporation law and may be included in invested capital under section 326 (a) of said revenue act to the extent of the actual cash value thereof at the time paid in.

Where accounts are kept on the accrual basis, the amounts of income and excess profits taxes for the year 1917 payable in 1918 may be included in the computation of invested capital only until the taxes become due.

Kate W. Rosenberger v. Blakely D. McCaughn, collector.-United States District Court for the Eastern District of Pennsylvania (20 Fed. (2d) 139; T. D. 4058).
Amounts received by a beneficiary from the trustee under a will as a distribution of royalties paid to the trustee under a lease of coal lands executed by the testator are income within the meaning of the income tax acts.

United States, petitioner, v. S. S. White Dental Manufacturing Co. of Pennsylvania.—United States Supreme Court ( 47 S . Ct. 598; T. D. 4059).

The amount of an investment, represented in part by capital stock in a subsidiary German corporation and in part by an account due from it, which was no more than the fair value of the net assets of the subsidiary, was deductible from gross income in 1918, in which year the entire property of the German corporation was seized by the German Government as enemy property and the investment was charged off as a loss on the books of account of the taxpayer.

Bowers, collector, v. Elizabeth C. Taft and Gilbert C. Greenway, jr.United States Circuit Court of Appeals for the Second Circuit (unreported to date; T. D. 4063).

The provision of section 202 (a) 2 of the revenue act of 1921 that the basis for ascertaining the gain derived from a sale of property acquired by gift after December 31, 1920, shall be the same as that which it would have in the hands of the donor is not in violation of the Constitution.

Haberle Crystal Spring Brewing Co. v. Jesse W. Clark, collector.United States District Court, Northern District of New York (unreported to date; T. D. 4067).

No allowance for obsolescence of good will is deductible from gross income under section 234 (a) 7 of the revenue act of 1918, which allows a deduction for obsolescence in respect of such property only as is subject to exhaustion, wear and tear.

The decisions in Red Wing Malting Co. v. Willcuts (15 Fed.(2d) 626, T. D. 3980) and Landsberger v. McLaughlin. (T. D. 4034), decided April 26, 1927, by the United States District Court for the Northern District of California, followed.

Charles S. Child and William J. Fullerton, formerly partners doing business as Wilson \& Bradbury, v. United States.-United States Court of Claims (unreported to date; T. D. 4068).

Where during the year 1917 the members of a partnership, keeping its books and filing its returns on the accrual basis, withdrew amounts in excess of the earnings for that portion of the year, the invested eapital of the partnership must be reduced by the excess of the withdrawals over the earnings, and in determining such earnings deductions should be made for the excess-profits tax estimated to have accrued at the date of the withdrawals.

D'Olier et al. v. United States ( 61 Ct. Cls. 895; T. D. 3855) followed.

Robert H. Montgomery v. United States.-Court of Claims of the United States (unreported to date; T. D. 4069).

A contribution to the American Institute of Accountants by a person engaged in the business of accounting is not deductible from gross income as a necessary expense in carrying on business or as a gift to an organization operated exclusively for scientific or educational purposes.

Edward T. Esty, as executor of the will of George I. Alden, deceased, v. United States.-United States Court of Claims (unreported to date; T. D. 4076).

Where under the terms of a trust instrument the trustee is required to pay to a beneficiary the entire amount of the net income of the trust at such times as he might request, the entire amount is income which is to be distributed to the beneficiary periodically, and it is therefore taxable directly to the beneficiary under section 219 (d) of the revenue act of 1918.

Matilda R. Dodge and Howard B. Bloomer, as administrators with the will annexed of the estate of John F. Dodge, deceased, v. United States.-United States Court of Claims (unreported to date; T. D. 4077).

Where a corporation had a cash surplus at the close of its fiscal year 1916 which was in part distributed by a dividend declared and paid in 1919, pursuant to a court decree entered in 1919 affirming a lower court decree entered in 1917, the dividend was income to the recipient in 1919 and taxable as such.

- E. W. Porter, commissioner of finance of the State of Idaho, as liquidating agent of the Citizens State Bank of Buhl, Idaho, an insolvent banking corporation, plaintiff, v. United States.-United States Distriet Court for the District of Idaho, Southern Division (unreported to date; T. D. 4078).

Loans made by a bank evidenced by promissory notes which are not repaid by the borrowers are debts within the meaning of section 234 (a) 5 of the revenue act of 1918, and no deduction on account thereof may be taken until same are ascertained to be worthless and are charged off.

State and county taxes imposed upon the stockholders of a bank on account of their ownership of such stock are not deductible by the bank, notwithstanding the bank is required by the State law to pay such taxes on behalf of its stockholders.

Alice G. Kales v. Woodworth, collector.-United States District Court for the Eastern District of Michigan, Southern Division (unreported to date; T. D. 4080).

Where a corporation had a cash surplus at the close of its fiscal year 1916 which was in part distributed by a dividend declared and paid in 1919, pursuant to a court decree entered in 1919 affirming a lower court decree entered in 1917, the dividend was income to the recipient in 1919 and taxable as such.

Where profits were made by a corporation in 1917 sufficient to pay a dividend paid in January of that year, such dividend is income of the distributee for the taxable year in which it was received and therefore taxable at the rates prescribed for the year 1917.

Dodge et al. v. United States, decided April 4, 1927, by the Court of Claims, and Routzahn v. Mason (13-Fed. (2d) 702; T. D. 3902) followed.
P. Garvan (Inc.) v. Eaton, collector.-United States District Court, District of Connecticut (20 Fed. (2d) 422; T. D. 4081).

Where two persons owning equally the capital stock of a corporation:withdrew for their personal use, in addition to the sums to which each was entitled as salary, expenses, and dividends, a portion of the surplus, for which each gave the corporation his noninterest-bearing demand notes, no part of which has ever been paid, such notes can not be included in invested capital under the revenue acts of 1917 and 1918.
The decision in English \& Mersick Co. v. Eaton (7 Fed. (2d) 54) distinguished.

IN.IUNCTION
Israelite House of David v. Holden, collector.-United States District Court, Western District of Michigan (14 Fed. (2d) 701; T. D. 3920).

Under section 3224, Revised Statutes, injunction will not issue to restrain the assessment and collection of taxes from a voluntary religious association, although it is exempt from taxes under section 231 of the revenue act of 1924.

Mabel G. Reinecke v. O. D. Jennings \& Co., appellee.-United States Circuit Court of Appeals, Seventh Circuit (16 Fed. (2d) 927; T. D. 3989).

Under the provisions of section 3224, Revised Statutes, injunction will not lie to restrain the collection by distraint of a Federal tax.

The case of Peacock v. Reinecke (3 Fed.' (2d) 583; T. D. 3672) followed.

## INSURANCE TAX

Skielby County Mutual Relief Association v. Schwaner, collector.United States District Court, Southern District of Illinois, Southern Division (unreported to date; T. D. 4050).

A local mutual life insurance company is not exempt from taxation under section 231(10) of the revenue act of 1918.

## OLEOMARGARINE TAX

John F. Jelke Co. v. United States.-United States Court of Claims (unreported to date; T. D. 4037).
The determination of the commissioner under section 14 of the act of August 2, 1886 (24 Stat. 209), that a compound of vegetable oil, beef fat, and skim milk manufactured and sold by the plaintiff was made "in imitation or semblance of butter" and therefore subject to tax under section 8 of that act as amended by section 3 of the act of May 9, 1902 (32 Stat. 193), was amply justified by the facts and in the absence of proof that his action was arbitrary or capricious such ruling is final.

## SALES TAX

Elmer Candy Có. (Inc.) v. John Y. Fauntleroy.-United States District Court, Eastern District of Louisiana, New Orleans Division (19 Fed. (2d) 664; T. D. 4060).

Where candy is sold at the price fixed by trade catalogues or price lists, the basis of the tax is the amount paid to the vendor by the purchaser without deduction of the 5 per cent tax paid by the manufacturer pursuant to section 900 (9) of the revenue act of 1918.

## STAMP TAXES

The Goodyear Tire \& Rubber Co. v. United States.-United States Supreme Court (273 U. S. 100; T. D. 3992).

Where, pursuant to a plan of reorganization, the par value of $\$ 100$ of capital stock is reduced to $\$ 1$ a share, without the issuance of new certificates, which remained outstanding with the old face value of $\$ 100$, the stamp tax should be computed on the actual par value of $\$ 1$ a share, as shown by the amended charter.

## TAX ON TRANSPORTATION AND OTHER FACILITIES

H. H. Motter, collector; v. Derby Oil Co.—United States Circuit Court of Appeals, Eighth Circuit (16 Fed. (2d) 717; T. D. 3965).

The transportation tax imposed by section 500(e) of the revenue act of 1918 is not a direct tax upon property; but is an excise tax upon the privilege of using property, and is therefore constitutional.

Under section 501 (d) the tax applies to all transportation of oil by pipe line, whether by common or private carrier, and is not confined to oil transported for hire.

Section 501 (d) imposes an administrative duty upon the Commissioner of Internal Revenue in cases where no charge for transportation is made and where there are no actual bona fide rates or tariffs. This duty was properly exercised by computing the tax from the published tariff of a pipe-line company operating in the same general territory.

Arnold J. Hellmich, collector, v. Missouri Pacific Railroad Co.-United States Supreme Court (273 U. S. 242; T. D. 4040 ).

Telegraph messages transmitted under a contract between a telegraph company and a railroad company for a mutual exchange of services are charged for within the meaning of subdivision (f) of section 500 of the revenue acts of 1918 and 1921 and are, therefore, taxable thereunder.

[^117]
[^0]:    1 Office established act June 16, 1921.

[^1]:    ${ }^{8}$ Act July 11, 1800, provides for an additional Assistant Secretary.

    - Act Oct. 6, 1917, prorided for two additional Assistant Secretaries for duration of war and. six montbs after.

[^2]:    ${ }^{1}$ Office established Sept. 2, 1789; abolished act May 8, 1792; reestablished act Mar. 3, 1917. Appointed by the Secretary.

[^3]:    1 Receipts on account of securities other than foreign-owned not shown separately for 1920 and 1921.
    ${ }^{2}$ Includes in $1920 \$ 350,000,000$ and in $1921 \$ 100,000,000$ from/liquidation of the United States Grain Corporation.
    ${ }_{8}{ }^{\text {Receipts on }}$ account of reilroad securities not segregated.

[^4]:    t Less than one-twentieth of 1 per cent.

[^5]:    ${ }^{1}$ E. g., Emergency Fleet Corporation and United States Railroad Administration,
    ${ }^{1}$ From data compiled by the United States Bureau of Eficiency.
    ${ }^{3}$ From data compiled by the United States Bureau of Efficiency from Budget estimates sent to Congress, but actual figures for debt retirement have been substituted for Budgot figures.

[^6]:    T Public debt expenditures and public debt receipts, as shown in this statement, are exclusive of Treasury certificates issued and retired within the same fiscal year ; Surplus, $\$ 635,809,821,70$. Diference of $\$ 24,055,383$.14 carried over as an increase in general fund balance and used for debt retirement in fiscal year 1928 . Includes $\$ 24,055,383$ referred to in note 2.

[^7]:    ${ }^{1}$ Excluslvie of $\$ 148,867,165.26$ deficiency assessments subject to provisions of sec. 274 (d) of revenue act of 1924 , and secs. 279 and 280 of revenue act of 1926 (Jeopardy assessments).
    ${ }^{2}$ Exclusive of $\$ 32,704,156.33$ deficiency assessments subject to provisions of secs. 279 and 280 (jeopardy assessments) of revenue act of 1926.

[^8]:    Sec. 274 (f) * * If the taxpayer is notified that, on account of a mathematical error appearing upon the face of the return, an amount of tax in excess of that shown upon the return is due, and that an assessment of the tax has lieen or will be made on the basis of what would have been the correct amount of tax but for the mathematical error, such notice shall not be considered, for

[^9]:    ${ }^{1}$ After adding $\$ 29,253.06$ for decrease in uncovered moneys and $\$ 20$ for. rellef of John Burke, former Treasurer United States, under act of June 3, 1922.

[^10]:    64761—FI 1927——12

[^11]:    Includes 8 increases aggregating $\$ 2,675,000$, which were effected as a result of consolidations under the act of Nov. 7, 1918, and 7 increases aggregating $\$ 2,910,000$, incident to the consolidation of State banks with national banks under the act of Feb. 25, 1927, and 69 increases by stock dividends aggregating $\$ 7,176,350$
    ${ }^{2}$ Includes 4 banks with aggregate capital of $\$ 600,000$, which had been previously reported in voluntary liquidation.

[^12]:    1 Includes acceptances reported by national banks.
    Includes lawful reserve with Federal reserve banks.
    Includes real estate owned other than banking house
    Includes exchanges for clearing house.

[^13]:    Number of appraisers' reports of value received__................................ 15, 695
    Number of appraisement appeal reports received_................................ 11, 854
    
    
    
    

[^14]:    ${ }^{1}$ An additional amount of $\$ 48,520.58$, received. from sale of by-products and useless property, was deposited to tbe credit of the Treasurer of the United States as miscellaneous receipts.
    ${ }^{2}$ Includes. $\$ 281,632.42$ and $\$ 201,861.05$ transferred to retirement fund in the fiscal years 1927 and 1926, respectively.

[^15]:    I Includes income tax on Alaska railroads (act of July 18, 1914) amounting to $\$ 18,827,34$ for 1927 and $\$ 15,784.13$ for 1926
    , Tax due prior to July 1, 1926.
    ${ }^{3}$ Tax on foreign-built yachts and hoats only, purchased after July 1, 1926.
    Includes $\$ 1,915,745.36$ for 1927 and $\$ 803,551.69$ for 1926 , delinquent taxes collected under repealed laws.

    - The figures concerning internal revenue recejpts as given in this statement differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected througb customs offices, while the latter represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, the differences being due to the lact that some of the collections in the latter part of the fiscal year can not be deposited, or are not reported to the Treasury as deposited until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury.

[^16]:    Note.-Fractional sheets disregarded in obtaining aggregate totals. Sheets counted in each audit were

[^17]:    ${ }^{1}$ Includes $\$ 267,966.31$ reimbursement for care and treatment of U. S. Veterans' Bureau patients and miscellaneous.

    2 Includes $\$ 13,595.40$ obligations not yet reimbursed.

[^18]:    ${ }^{1}$ Includes $\$ 5,000$ reserve 1027.
    1 Includes $\$ 20,000$ reserve 1926; $\$ 5,000$ reserve 1927.

[^33]:    ${ }^{1}$ This circular supersedes Treasury Department Circular No. 244, dated June 7. 1827.

[^34]:    ${ }^{1}$ Effective July 1, 1927. This circular supersedes Treasury Department Circular No. 230. dated Feb. 15, 1921, and its several revisions and supplements.

[^35]:    ${ }^{1}$ Members of the bar of a court of record will apply as attorneys; all others as agents.

[^36]:    ${ }^{2}$ Nore.-This oath may be taken before any justice of the peace, notary public, or other person who is legally autherized to administer an oath in the State, Territoty: or District where the application is executed. The seal of the officer administering the oath must be affixed, or. if he bas no seal, his official character must be duly certified under seal.

[^37]:    The decision of this case turns upon the meaning of the words " net proceeds" in Section 7 (c) of the Trading with the Enemy Act, as amended. These words have been construed by the Supreme Court in Hencels v. Sutherland, 271 U. S. 298, to include the income derived from interest-bearing securities (in that case securities of the United States) in which the proceeds of the sale by the Alien Property Custodian of property seized by him had been invested. It is true that by an amendment to the Act, passed March 4, 1923, there is a direct provision for the payment to certain enemies (including the class to which the plaintiff belongs) of the "net income", etc., accruing and collected after that date, but not to exceed $\$ 10,000$ per annum, and it would seem that by implication this might exclude the payment of any income collected before that date. In Henkels v. Sutherland, the property of an American citizen was seized and the decision was based in part upon that ground, but the Court interpreted the words "net proceeds" as used in the Act to have the meaning above set forth.

    I feel that this Court is bound by that intepretation, and as a consequence the motion to dismiss the bill will be overruled.

    No appeal was taken by the Government from the decree of the Supreme Court of the District of Columbia in the above case and said decree has been satisfied. This claimant, being a Czechoslovak corporation, is in the same position as a Polish citizen.

    It is, therefore, my opinion; that this claimant, whose money was seized by the Alien Property Custodian and deposited in the Treas-

[^38]:    Federal intermediate credit banks.-Consolidated statement of condition: Shows assets and liabilities of all banks and of each bank, net earnings, number -of employees, expenses, and amount of loans closed during current and preceding month.
