Huntington Cairns	Member.

#### WAGE BOARD

James H. Hard II	Chairman
Willard L. Johnson	Member.
	Member:

#### INTERDEPARTMENTAL SAVINGS BOND COMMITTEE

CHART 1.

#### ANNUAL REPORT ON THE FINANCES

TREASURY DEPARTMENT, Washington, D. C., January 12, 1948.

Sir: I have the honor to make the following report on the finances of the Federal Government for the fiscal year ended June 30, 1947.

#### FISCAL POLICY

The Government closed its operations for the fiscal year with a surplus. During this year, the first full fiscal year following the end of the war, substantial progress was made in the reconversion of the American economy to a peacetime basis. By the end of the year, all previous records of civilian production had been surpassed. Goods and services were being produced at an annual rate of about \$230 billion, and the accumulated backlog of demand for some types of goods was being satisfied at a growing pace.

Notwithstanding the high rate of industrial output, full employment, and generally good harvests, scarcities of various kinds continue to be much in evidence. This is true of housing, housing materials, automobiles, certain electrical equipment, fuels, industrial and agricultural machinery, and other products. Perhaps of greatest moment is the short supply of steel. Its ramifications extend throughout the transportation and manufacturing industries and are reflected in turn in inadequate supplies of finished goods.

The upward pressure on prices, to which I called attention in my last annual report, is more critical than a year ago, despite the progress made in converting industry to civilian production and in refilling commercial and industrial pipe lines. The situation assumed such compelling proportions that the President deemed it necessary to call a special session of the Congress to cope specifically with the inflationary trend as well as with the problems of European recovery.

Under present circumstances, the need for the Federal Government to pursue an anti-inflationary fiscal policy is at least as great as last year. It must maintain a strong financial position to assure the continued well-being of our economy. Revenues should be maintained at a high level—high enough not only to balance the budget and to finance the European Recovery Program, but also to provide a substantial surplus for retirement of debt. In his State of the Union Message on January 7, 1948, President Truman recommended certain changes

in the tax structure which are necessary in order to provide tax relief to those who need it most without cutting the total tax revenues of the Government. General tax reduction must wait until the present inflationary pressures have subsided. At that time it can become a part of a general revision of our tax structure. In making this revision, a tax system must be created which will help to maintain broad consumer markets, strengthen the incentives to work and invest, provide flexibility as economic conditions warrant, and treat all groups equitably. Such a tax system is an indispensable instrument in maintaining an economy of lasting full employment and abundance.

#### Public Debt

The total gross public debt and guaranteed obligations amounted to \$258.4 billion on June 30, 1947. This was a reduction of \$21.4 billion from the postwar peak which had been reached on February 28, 1946, and a reduction of \$11.5 billion during the fiscal year. The reduction in the debt during the year, like that which had occurred in the last four months of the previous year, was accomplished almost entirely by a reduction in the cash balance in the Treasury. By the end of the fiscal year, this source of debt reduction had been substantially exhausted.

Total holdings of Federal securities by commercial and Federal Reserve Banks amounted to \$91.9 billion on June 30, 1947. This was a reduction of \$24.8 billion from the postwar peak, and of \$16.3 billion during the fiscal year. The reduction in bank-held debt thus substantially exceeded the reduction in total debt, both during the fiscal year and during the entire period since the postwar peak. The amount of public debt (including noninterest-bearing debt) held by nonbank investors was about \$3½ billion larger on June 30, 1947, than it had been at the time of the peak in the total debt on February 28, 1946. This concentration of the entire debt reduction during the 16-month period ended on June 30, 1947, on bank-held debt, plus the transfer during this period of a net amount of \$3½ billion of additional Federal securities from bank to nonbank hands, contributed substantially to the reduction of inflationary pressures during the period. It was made possible by the large sums which were available for trust fund investment during the period, the remarkably good record on the redemption of savings bonds, the continued successful sale of new savings bonds, and the restrictive debt-management and monetary policies of the Treasury and the Federal Reserve System.

The anti-inflationary debt-management policy which characterized the fiscal year 1947 is still continuing. A substantial reduction in the total debt will be possible during the fiscal year 1948; and this reduction, unlike that which occurred in the fiscal year 1947, will be

764788-48--2

accomplished principally by an excess of budget receipts over budget expenditures. This excess of budget receipts over budget expenditures, which will occur principally in the first three months of the calendar year 1948, and the debt retirement which it will make possible, will, of course, be a far more powerful anti-inflationary force than the debt decreases which have occurred up to this time.

#### FOREIGN FINANCIAL POLICY

The United States Government has continued to pursue a broad program of financial aid and cooperation designed to assist in the reconstruction of war-torn countries and to facilitate the expansion of multilateral world trade and monetary stability. In addition to participating in the work of the International Monetary Fund and the International Bank for Reconstruction and Development, which were constituted with a membership of most of the countries of the world, the United States has carried on a program of direct assistance through its own agencies under various acts passed by the Congress.

In the course of the fiscal year, payments of the subscriptions to the International Monetary Fund and the International Bank were completed by the United States and most of the member countries, so that these institutions were in a position to begin active operations. The organizational stage of these institutions has now passed. By the end of the calendar year 1946, the International Monetary Fund had agreed upon par values for most of the member currencies; and March 1, 1947, was set as the date for the beginning of active exchange transactions. A number of purchases of dollars through the Fund took place in the course of the fiscal year. The International Bank also received loan applications from foreign countries totaling more than \$2 billion; and by the end of the fiscal year, a \$250 million loan was made to France.

The National Advisory Council on International Monetary and Financial Problems, established by the Bretton Woods Agreements Act to coordinate the foreign lending operations of United States Government agencies, and to consult and advise with the United States representatives on the International Bank and the International Monetary Fund, considered all important questions arising in these institutions and gave its advice to the representatives of this Government on the boards of these institutions. The Council approved for consideration loans proposed by the Export-Import Bank and formulated general policies for the guidance of the Office of the Foreign Liquidation Commissioner, Department of State, in financing the sales of surplus property abroad. It also considered credit-extended by the War Assets Administration and the United State

764788-48-2

Maritime Commission. It approved of the extension of the stabilization agreement concluded between the Secretary of the Treasury and the Mexican Government. The Council recommended an emergency loan to the Philippine Government, which was authorized by an act of Congress approved August 7, 1947.

The Council also coordinated studies of international financial problems undertaken by its constituent agencies. In this way, the Council was able to give its best judgment on the changing international picture, as it developed in the course of the fiscal year. It continually reviewed the broad questions of policy involved in the settlement of war obligations and in the financing of programs of world reconstruction. It has thus carried out the mandate of the Congress to coordinate the activities of United States agencies concerned with international financial problems and has been instrumental in the integration of our foreign financial program.

#### TREASURY OPERATIONS

There follows a detailed discussion of receipts and expenditures, public debt operations, taxation and monetary developments, and other Treasury operations during the fiscal year.

John W. Snyder, Secretary of the Treasury.

To the Speaker of the House of Representatives.

## REPORT ON OPERATIONS

ĸ

#### BUDGET RESULTS

Budget receipts in the fiscal year 1947 exceeded budget expenditures by \$754 million. This compares with a deficit of \$20.7 billion in 1946, and a deficit of \$53.9 billion in 1945. The public debt was reduced by \$11.1 billion during 1947 as a result of the budget surplus and a drawing down of the General Fund balance.

Net receipts of \$43.3 billion in 1947 were slightly larger than in 1946. Expenditures in 1947 totaled \$42.5 billion, a decline of \$21.2 billion from 1946, and a decline of \$57.9 billions from the peak wartime expenditures of \$100.4 billion in 1945. The improvement of \$21.4 billion in the Government's budget position in 1947 was accomplished despite sharp increases in outlays in the field of international finance and in expenditures for veterans, and a new expenditure authorized to compensate for leave accrued to the armed forces.

A comparative summary of the annual budget results of the Federal Government, beginning with the last prewar year, follows. The figures are on the basis of daily Treasury statements.

		Receipts			
Fiscal year	Total receipts	Net appro- priation to Federal old-age and survivors insurance trust fund	Net budget receipts	Budget expendi- tures	Budget surplus or deficit (—)
		Int	oillions of do	llars	· <del></del>

NOTE.—Figures are rounded and will not necessarily add to totals.

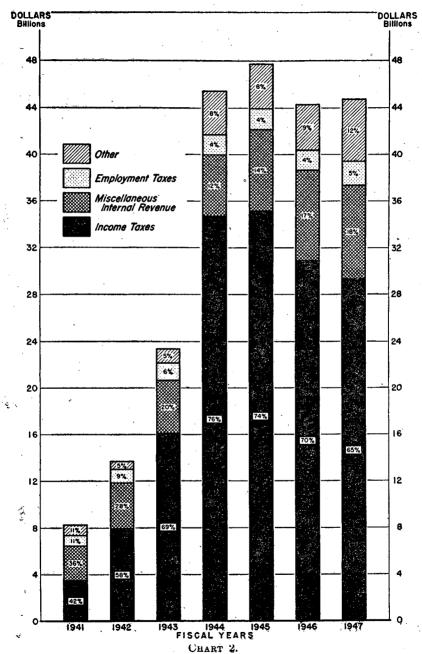

#### BUDGET RECEIPTS

Total budget receipts in the fiscal year 1947 amounted to \$44.7 billion. Such receipts exceeded slightly receipts in 1946 but were \$3.0 billion less than peak receipts of \$47.7 billion in the fiscal year 1945. Net receipts, which consist of total receipts less the net appropriation to the Federal old-age and survivors insurance trust fund, amounted to \$43.3 billion in the fiscal year 1947.

A comparison of total and net receipts for the 7-year period beginning July 1, 1940, is shown in the table which follows. Chart 2 on page 7 depicts receipts by sources.

r Revised to include net transactions of wholly owned corporations and certain other business-type activities.

## RECEIPTS, CLASSIFIED BY MAJOR SOURCES FISCAL YEARS 1941 THROUGH 1947

Note,-Total receipts. See table following.

#### Receipts, fiscal years 1941 through 1947

[Dollars in billions. On basis of daily Treasury statements, see p. 265]

Year	Income and excess profits taxes		All other receipts 1		Total re	eccipts	Net appro- priation to Federal old- age and survivors insurance trust fund <sup>2</sup>	Net budget receipts
	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Amount
1941	\$3. 5 8. 0 16. 1 34. 7 35. 2 30. 9 29. 3	42. 0 58. 2 68. 8 76. 3 73. 7 69. 8 65. 6	\$4.8 5.7 7.3 10.8 12.6 13.4 15.4	58. 0 41. 8 31. 2 23. 7 26. 3 30. 2 34. 4	\$8. 3 13. 7 23. 4 45. 4 47. 7 44. 2 44. 7	100. 0 100. 0 100. 0 100. 0 100. 0 100. 0 100. 0	\$0.7 .9 1.1 1.3 1.3 1.2	\$7. 6 12. 8 22. 3 44. 1 46. 5 43. 0 43. 3

Note.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Includes receipts from miscellaneous internal revenue, employment taxes, customs duties, and mis-

cellaneous receipts.

<sup>2</sup> Represents appropriations equal to "Social security taxes—Federal Insurance Contributions Act" collected and deposited as provided under sec. 201 (a) of the Social Security Act Amendments of 1939 less reimbursements to the General Fund for those administrative expenses, which are not paid directly from the trust fund.

#### RECEIPTS FROM INCOME AND EXCESS PROFITS TAXES

In 1947, receipts from income and excess profits taxes amounted to \$29,305.6 million, a decrease of \$1,579.2 million or 5.1 percent from 1946. A decrease of \$2,876.8 million in receipts from corporation income and excess profits taxes was partially offset by an increase of \$1,297.6 million in receipts from the individual income tax. As a proportion of total receipts, income and excess profits taxes accounted for 65.6 percent as compared with 42.0 percent in 1941.

As between the two sources, the individual income tax has for the past 4 years provided the larger amount of revenue receipts and in 1947 amounted to more than double the corporation receipts. The table following shows for each of the 7 years the amount of income and excess profits taxes received from individuals and corporations.

Income and excess profits tax receipts from individuals and corporations, fiscal years 1941 through 1947

[Dollars in millions. On basis of daily Treasury statements, see p. 265]

	Indiv	idual	Corpo		Total		
Year	Amount	Percent of total receipts	A <sub>mount</sub>	Percent of total receipts	Amount	Percent of total receipts

Note.—Figures are rounded and will not necessarily add to totals.

· ¹ For method of adjustment from basis of collections to basis of daily Treasury statements, see footnote 3, table 114.

#### INDIVIDUAL INCOME TAXES

Individual income tax receipts increased in the fiscal year 1947 as compared with the fiscal year 1946 as a result of the increased levels of taxable income, more than offsetting the full-year effect of the reduction in rates instituted by the Revenue Act of 1945. Individual income tax receipts during the fiscal years 1941 through 1947 accounted for \$88,022.5 million in receipts. The table which follows shows individual income taxes withheld, taxes not withheld, and back The figures for current taxes not withheld and back taxes are shown only on a collections basis as the corresponding detail is not available on the daily Treasury statement basis. Income taxes withheld and total individual income taxes not withheld are shown on the daily Treasury statement basis. The figures for income taxes not withheld are adjusted to a daily Treasury statement basis by making arbitrary adjustments of the individual income tax collections as reported by the Bureau of Internal Revenue.

Individual income taxes withheld and not withheld, fiscal years 1941 through 1947 [In millions of dollars. On basis of internal revenue collections, and adjusted to daily Treasury statement basis, see p. 265]

		Collection	onș basis	Daily Tre	asúry staten	ent basis		
Year	Wishbala	Not withheld			******	Not with-	Total	
	Withheld	Current Back taxes		Total	Withheld	held i		
1941 1942		1, 314. 3 3, 108. 0	103. 4 154. 8	1, 417. 7 3, 262. 8		1, 416. 2 3, 216. 4	1, 416. 2 3, 216. 4	
1943 1944 1945	686. 0 7, 823. 4 10, 263. 4	5, 771. 0 10, 253. 8 8, 258. 5	172.9 183.7 2 512.4	6, 629. 9 18, 261. 0 19, 034. 3	1 686. 0 1 9; 177. 8 10, 289. 2	5, 818. 9 10, 601. 4 8, 856. 6	6, 505. 0 19, 779. 2 19, 145. 8	
1946 1947	9, 857. 5 9, 842, 0	8, 430. 4 8, 950. 3	416.7 551.0	18, 704. 5 19, 343. 3	9, 391. 7 10, 013. 1	8, 939. 5 9, 615. 7	18, 331. 2 19, 628. 8	

Note.—Figures are rounded and will not necessarily add to totals.

Income taxes withheld increased in the fiscal year 1947 as a result of a rise in salaries and wages, offset in part by the lower rates of withholding effective for the whole of fiscal year 1947 instead of for a half year as in fiscal year 1946.

Receipts from income taxes other than withheld increased in the fiscal year 1947 as compared with 1946 as a result of the higher levels of taxable income reflected in these payments. This increase was offset in part by the reduction of liability under the Revenue Act of 1945 which was effective on payments made during the fiscal year 1947 in respect of calendar year 1946 liabilities. In the fiscal year 1946 only about one-quarter of the payments were so affected.

Receipts from back taxes in the fiscal year 1947 increased as compared with those of the fiscal year 1946 as a result of the cumulative effect of the high level of tax liabilities in the preceding years.

<sup>&</sup>lt;sup>2</sup> Consists principally of the final payment of the so-called unforgiven tax of the 1943 tax liability, which was due in March 1945.

#### CORPORATION INCOME AND EXCESS PROFITS TAXES

Total corporation income and excess profits tax receipts of \$9,676.8 million in the fiscal year 1947 were \$2,876.8 million lower than those of the fiscal year 1946. The decline of 22.9 percent between 1946 and 1947 followed a decline of 21.7 percent between the peak year 1945 and the year 1946.

Details of corporation income and excess profits taxes for the fiscal years 1941 through 1947 are shown in the table which follows:

Corporation income and excess profits taxes, fiscal years 1941 through 1947
[In millions of dollars. On basis of internal revenue collections, see p. 266]

Year	Income	Excess profits	Declared value ex- cess profits	Back taxes	Total	Total ad- justed to daily Treas- ury state- ment basis
1941	1, 649. 0	165. 9	18. 1	220. 4	2, 053. 5	2, 053. 5
1942	2, 764. 0	1, 595. 4	39. 1	345. 6	4, 744. 1	4, 744. 1
1943	4, 137. 0	4, 844. 0	61. 1	626. 9	9, 669. 0	9, 588. 7
1944	4, 762. 7	8, 479. 4	108. 6	1, 416. 1	14, 766. 8	14, 875. 7
1946	4, 421. 7	10, 111. 9	117. 9	1, 375. 7	16, 027. 2	16, 027. 2
1946	3, 901. 9	6, 732. 0	70. 7	1, 849. 0	12, 553. 6	12, 553. 6
1947	5, 441. 8	3, 076. 4	36. 7	1, 121. 9	9, 676. 8	9, 676. 8

NOTE.-Figures are rounded and will not necessarily add to totals.

The decline of \$2,876.8 million in total receipts from corporation income and excess profits taxes between the fiscal years 1946 and 1947 was the result of (1) a decrease of \$727.1 million in back tax receipts, which reflected the declining trend in profits during the years 1943, 1944, and 1945, and (2) a decrease of \$2,149.8 million in current tax receipts, which was ascribable in part to the lower profit levels of 1945 and 1946 as compared with the level of 1944, and in part to the reduction in the effective tax rate in 1946 occasioned by the repeal of the excess profits tax and the declared value excess profits tax under the Revenue Act of 1945.

The decrease of \$2,149.8 million, or 20.1 percent, in current tax receipts between the fiscal years 1946 and 1947 was the result of decreases of 54.3 percent and 48.1 percent in the current excess profits and declared value excess profits tax receipts, together with a partially offsetting increase of 39.5 percent in the current income tax receipts. With the repeal of the excess profits and declared value excess profits taxes under the Revenue Act of 1945, the declared value excess profits tax liability and the income subject to excess profits tax disappeared as deductions in arriving at the normal tax and surtax bases and these bases were augmented correspondingly. Hence, notwithstanding a slight reduction in surtax rates, income tax liabilities rose substantially in the calendar year 1946, thus providing the basis for a similar rise in current income tax receipts during the second half of the fiscal year 1947. Current declared value excess profits tax

receipts in the second half of the fiscal year 1947 were relatively small since they were based solely on the declared value excess profits tax liabilities of corporations with taxable years ending in the months January through June 1946. Current excess profits tax receipts in the second half of the fiscal year 1947 were relatively small also, for two reasons. During this period, excess profits taxes were paid only by corporations having taxable years ending between January 1 and November 30, 1946; and the payments consisted only of an amount determined by the percentage of the months in the corporations' fiscal years which fell in the calendar year 1945.

#### RECEIPTS FROM ALL OTHER SOURCES

Receipts from sources other than income and excess profits taxes were \$15,397.1 million in the fiscal year 1947, 34.4 percent of total receipts. Such receipts exceeded fiscal year 1946 receipts from similar sources both in absolute amount and as a percentage of total receipts. The fiscal year 1947 was the eighth consecutive year showing an increase. The increase of \$2,043.3 million, or 15.3 percent, over 1946 reflected increases in each of the major receipts classifications. The table following summarizes the four main sources of these receipts for the seven fiscal years beginning with 1941:

Receipts from sources other than income and excess profits taxes, fiscal years 1941

Note.—Figures are rounded and will not necessarily add to totals.

Includes so-called voluntary returns.

See footnote 3, table 114.
 Repealed with respect to years ending after June 30, 1945; small collections after the effective date of repeal included in "Miscellaneous taxes."
 Excludes collections for credit to trust funds.

#### MISCELLANEOUS INTERNAL REVENUE

Receipts from miscellaneous internal revenue for the fiscal year 1947 exceeded 1946 receipts by \$324.7 million or 4.2 percent. Large increases in collections of manufacturers' excise taxes and estate and gift taxes plus small increases in tobacco taxes, retailers' excise taxes, and miscellaneous taxes were partially offset by a large decrease in collections from the capital stock tax and minor decreases in collections from liquor and stamp taxes.

Capital stock tax.—The capital stock tax was repealed by the Revenue Act of 1945 with respect to years ending after June 30, 1945. The small collections in the fiscal year 1947 are included in miscellaneous taxes in the preceding table.

Estate and gift taxes.—Estate and gift tax collections amounted to \$779.3 million in the fiscal year 1947, representing an increase of \$102.5 million over the previous year. The increase resulted from the increased value of property transferred.

Liquor taxes.—Collections from liquor taxes amounted to \$2,474.6 million in the fiscal year 1947, a slight decrease from peak collections of \$2,525.5 million in the fiscal year 1946.

Tobacco and products taxes.—Tobacco tax collections amounted to \$1,237.8 million in the fiscal year 1947, an increase of \$72.2 million over collections in the preceding year and were a result of a larger civilian supply of taxable tobacco products.

Stamp taxes.—Collections from stamp taxes were \$80.0 million in the fiscal year 1947, a decrease of \$7.7 million from collections in 1946. Collections from stamp taxes on issues of securities and on silver bullion sales or transfers showed increases but they were more than offset by decreases in collections from taxes on stock transfers, etc., and on playing cards.

Manufacturers' excise taxes.—Manufacturers' excise tax collections of \$1,425.2 million were \$502.8 million or 54.5 percent greater than collections in 1946. Each tax source in this category except matches showed an increase with the largest increases resulting from production of consumers' goods which had been curtailed drastically during the war. The principal taxes in the category and the collections therefrom for the 7-year period are shown in the following table:

Manufacturers' excise taxes, fiscal years 1941 through 1947 [In millions of dollars. On basis of internal revenue collections, see p. 266]

Year	Gasoline	Automobiles, trucks, tires, tubes, parts, and accessorics	Lubricat- ing oils	Electrical energy	Other	Total
1941 1942	343. 0 369. 6 288. 8 271. 2 405. 6 405. 7 433. 7	156. 3 188. 4 44. 4 76. 3 1148. 1 250. 0 541. 6	38. 2 46. 4 43. 3 52. 5 92. 9 74. 6 82. 0	47. 0 50. 0 48. 7 51. 2 57. 0 59. 1 63. 0	32. 5 113. 8 79. 0 51. 4 78. 6 133. 0 304. 9	617. 0 768. 3 504. 2 502. 7 782. 1 922. 4 1, 425. 2

NOTE.—Figures are rounded and will not necessarily add to totals.

Retailers' excise taxes.—Collections from retailers' excise taxes were \$514.2 million in the fiscal year 1947, a slight increase over 1946. Collections from sales of jewelry, furs, and luggage showed small increases and collections from sales of toilet preparations remained about the same. Retailers' excise taxes have accounted for \$1,901.0 million in the 6 years in which they have been in effect. Collections from each of the taxes are shown in the following table:

Retailers' excise taxes, fiscal years 1942 through 1947 [In millions of dollars. On basis of internal revenue collections, see p. 266]

Year	Jewelry	Furs	Toilet preparations	Luggage	Total

Note.—Figures are rounded and will not necessarily add to totals.

Miscellaneous taxes.—Miscellaneous tax collections amounted to \$1,552.8 million in the fiscal year 1947 as compared with \$1,490.9 million in 1946. Increases, reflecting greater availability of taxable services and larger consumer incomes, occurred in each of the major tax sources with the exception of the tax on use of motor vehicles and boats which was repealed by the Revenue Act of 1945 with respect to the period after June 30, 1946. The principal sources of tax collections in this group are shown in the following table:

Miscellaneous taxes, fiscal years 1941 through 1947 [In millions of dollars. On basis of internal revenue collections, see p. 266]

#### EMPLOYMENT TAXES AND RAILROAD UNEMPLOYMENT INSURANCE CONTRIBUTIONS

Total receipts from employment taxes amounted to \$2,038.5 million in the fiscal year 1947 and were \$324.9 million or 19.0 percent

Repealed with respect to the period after June 30, 1946; back tax collections included in "All other, including repealed taxes."

2 Excludes collections for credit to trust funds.

Each employment tax contributed to the greater than in 1946. increase. Receipts from this source were larger in the fiscal year 1947 than in any previous fiscal year.

Receipts from employment taxes, 1941 through 1947, are shown in the following table:

Employment tax receipts and railroad unemployment insurance contributions, fiscal years 1941 through 1947

IIn millions of dollars	On basis of daily Treasury statements, see p. 2	965I
iin millions of dollars.	On basis of daily Treasury statements, see D.	2

	1, 459. 5	184, 8	380. 1	14. 2	2, 038. 5	594. 7

NOTE.-Figures are rounded and will not necessarily add to totals.

Receipts under the Federal Insurance Contributions Act amounted to \$1,459.5 million in the fiscal year 1947. This increase of \$221.3 million resulted from an increase in taxable wages. All receipts under this act, with the exception of a minor portion representing reimbursements to the General Fund for administrative purposes, are appropriated to the Federal old-age and survivors insurance trust fund.

Receipts under the Railroad Retirement Tax Act (Carriers Taxing Act prior to January 1, 1946) in the fiscal year 1947 were \$380.1 million, an increase of \$97.4 million, or 34.5 percent, over receipts in the fiscal year 1946. The increase resulted from larger taxable railroad payrolls and higher tax rates. Receipts for the first three quarters of 1947 were based on a tax rate of 3½ percent each on employers and employees and the last quarter's receipts were based on a tax rate of 5% percent each. For comparable periods in 1946, receipts were based on rates of 31/4 percent and 31/2 percent.

#### CUSTOMS

Customs receipts in the fiscal year 1947 increased to \$494.1 million from \$435.5 million, reflecting freer movement of dutiable commodities in international trade.

#### MISCELLANEOUS RECEIPTS

Miscellaneous receipts in the fiscal year 1947 were \$4,815.0 million, an increase of \$1,335.2 million over receipts in 1946. Receipts from

<sup>1</sup> Prior to Jan. 1, 1946, taxes were levied under the Carriers Taxing Act.

Not classified as an employment tax under the Internal Revenue Code.
 After deduction from total employment taxes of the net appropriation to Federal old-age and survivors insurance trust fund. (See table on p. 268 of this report.)

proceeds of sales of surplus property were \$2,885.8 million in the fiscal year 1947, an increase of \$2,384.9 million over receipts from the same source in 1946. This increase was offset partially by a decrease of \$783.9 million in receipts from the renegotiation of war contracts.

Renegotiation of war contracts.—The decrease in receipts from the renegotiation of war contracts resulted partly from the more conservative pricing policies which became possible with the accumulation of cost data relating to wartime production and with increasing experience by the Government in wartime procurement, but it resulted primarily from the termination of liability for renegotiation as of December 31, 1945. Contracts subject to renegotiation were contracts (or subcontracts thereof) made with departments of the Government such as the War and Navy Departments, the United States Maritime Commission, and the Treasury Department. Profits subject to recovery by renegotiation were the "excessive profits" attributable to performance of such contracts (or subcontracts) prior to December 31, 1945. Between the fiscal years 1945 and 1946 receipts from renegotiation declined from \$2,040.9 million to \$1,062.8 million. By the end of fiscal year 1946 the bulk of settlements had been completed and in the fiscal year 1947 receipts from renegotiation dropped to \$279.0 million. Total receipts from renegotiation through the end of the fiscal year 1947 amounted to \$6.176.3 million.

#### RECEIPTS IN TRUST ACCOUNTS, ETC.

In addition to budget receipts, receipts under certain accounts which are maintained with the Treasurer of the United States are reported in the Daily Statement of the United States Treasury under the title of "Trust accounts, etc." Transactions in these accounts are not included in the Federal budget, but certain receipts included in the Federal budget are carried under the classification "Trust accounts, etc." For example, appropriations made from the General Fund to various trust accounts, such as the Government's payments to the employees' retirement fund, the railroad retirement account, and the national service life insurance fund, appear as budget receipts under trust accounts. A summary of receipts in trust accounts, etc., for the fiscal years 1932 through 1947 will be found in table 1, and details by months for 1947 in table 3.

#### BUDGET EXPENDITURES

Total budget expenditures of the Government amounted to \$42.5 billion in the fiscal year 1947. This was a decline of one third (\$21.2 billion) from expenditures in 1946 and nearly 60 percent (\$57.9

billion) from the wartime peak of \$100.4 billion in 1945. As in the fiscal year 1946, the bulk of expenditures was determined by developments growing out of the war. Complete details of expenditures are contained in the section of tables, and a summary by purposes is given in table 6 on page 306. Expenditures in the past seven years, classified by the principal purposes, are shown in the chart on page 17 and in the table which follows.

Budget expenditures, fiscal years 1941 through 1947 [In billions of dollars. On basis of daily Treasury statements, see p. 265]

Year	National defense and re- lated ac- tivities 1	Inter- national finance <sup>2</sup>	Veterans	Interest on the public debt	Refunds of taxes and duties <sup>8</sup>	All other	Total
1941	6. 7	0.7	0.6	1. 1	0.1	5. 4	13. 8
1942	28. 3		.6	1. 3	.1	4. 2	34. 4
1943	75. 3		.6	1. 8	.1	1. 9	79. 7
1944	89. 7		.7	2. 6	.3	2. 2	95. 6
1945	90. 5		2.1	3. 6	1.7	2. 5	100. 4
1946	48. 9		4.3	4. 7	3.0	2. 1	63. 7
1947	17. 3		7.3	5. 0	3.0	5. 5	42. 5

Note.—Figures are rounded and will not necessarily add to totals.

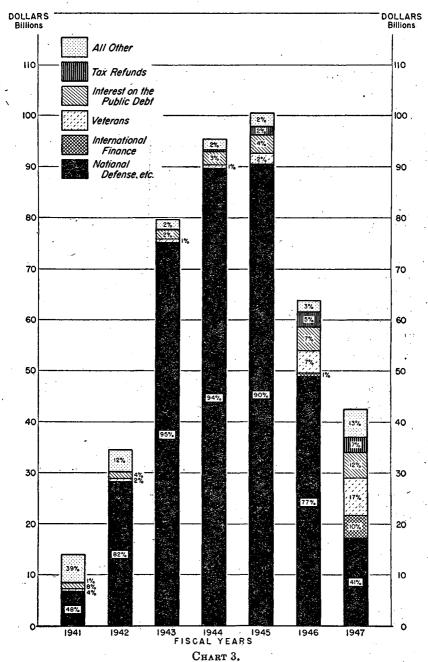

National defense expenditures in the fiscal year 1947 totaled \$17.3 billion, a decline of \$31.6 billion, or 65 percent, from those of 1946. The lessening of defense expenditures reflected sharp reductions in the requirements of the military and naval establishments. effect of these reductions was a 73 percent decrease in the expenditures of the War Department and a 67 percent decline in those of the Navy Department.

Partially offsetting these decreases were some increases, all concerned with the war's aftermath. The largest was a new item, consisting of the issuance of bonds and cash payments in the amount of \$2.0 billion under the Armed Forces Leave Act of 1946, approved August 9, 1946. Other major increases occurred in the payments for United Nations relief and rehabilitation which totaled \$1.5 billion. National Housing Agency expenditures of \$99 million, and expenditures of \$442 million by surplus disposal agencies.

The following table shows national defense expenditures by major categories.

Includes expenditures by Reconstruction Finance Corporation for national defense.
 Includes expenditures by Export-Import Bank.
 Includes social security refunds.
 Includes expenditures by Government corporations and agencies except Reconstruction Finance Corporation national defense outlays and Export-Import Bank expenditures.

## EXPENDITURES, CLASSIFIED BY MAJOR PURPOSES FISCAL YEARS 1941 THROUGH 1947

Expenditures for national defense and related activities, fiscal years 1941 through 1947

Note.-Figures are rounded and will not necessarily add to totals.

Outlays for maintaining our international commitments totaled \$4.4 billion during the fiscal year 1947, an increase of \$3.7 billion over 1946. The total consisted of subscriptions to the International Bank and the International Monetary Fund under the Bretton Woods Agreements Act, totaling \$1,426 million; credit to the United Kingdom of \$2,050 million; and a payment for capital stock for the Export-Import Bank of Washington of \$325 million and net expenditures of the Bank of \$613 million.

Expenditures for veterans again increased sharply, and at \$7.3 billion in the fiscal year 1947, were more than one-sixth of all expenditures. They were more than three times those in the fiscal year 1945, the first year in which the volume of expenditures for veterans broke away completely from the level of such expenditures between the two wars. The detail of these disbursements is shown in the tabulation following.

Expenditures for veterans, fiscal years 1945 through 1947 [In millions of dollars. On basis of daily Treasury statements, see p. 265]

Benefits and pensions	1945	1946	1947

Total	2, 059. 7	4, 252. 6	7, 258. 9

Note.-Figures are rounded and will not necessarily add to totals.

Benefits under the Servicemen's Readjustment Act, which accounted for the largest category of these expenditures in 1947, as well as in 1946, included the education program providing tuition expenses and maintenance allowances, on-the-job training, unemployment and

<sup>1</sup> Includes Reconstruction Finance Corporation defense outlays.

readjustment allowances, and loan guarantees for homes, farms, and business. Pensions and compensations for disabled veterans and pensions for survivors of those deceased constituted the next largest group of expenditures in the fiscal year 1947.

Interest paid on the public debt, totaling \$4,958 million in the fiscal year 1947, was the third largest single expenditure. The amount was \$236 million more than was paid in 1946.

Refunds of taxes and duties in the fiscal year 1947 were slightly in excess of \$3.0 billion. The refunds of income, profits, employment, and miscellaneous internal revenue taxes aggregated \$2.9 billion. Of this amount, approximately \$1.6 billion represented excessive prepayments of the individual income tax, resulting either from overwithholding or from over declarations of estimated tax. This compares with a revised total of \$2.2 billion for 1946. The prepayment refunds in the fiscal year 1946 included a considerable amount attributable to the tax year 1944, but, in contrast, only a small percentage in the fiscal year 1947 were related to the tax year 1945. The procedure designed to expedite refunds of excessive prepayment was in full operation in the fiscal year 1947, and the task of making refunds to individuals on 1946 taxes was virtually completed by June 30, 1947.

Of the remaining \$1.2 billion of internal revenue refunds, the most important were the carry-backs of net operating losses and unused excess profits credits and the respread of amortization. Other refunds were those for the postwar credit involved in excess profits tax payments received after July 1, 1945, the refunding of the 10 percent credit involved in excess profits tax payments for the tax year 1944, the relief provisions relating to excess profits taxes, the redemption of internal revenue stamps, and the refunding of miscellaneous internal revenue taxes wrongfully assessed and collected.

The remaining budget expenditures, totaling \$5.5 billion, included the outlays for special programs and for the running expenses of the Government departments. This total was about the same as in 1941.

Of the expenditures for special programs, those for aid to agriculture totaled \$2.3 billion, a net increase of \$1.3 billion in the fiscal year 1947. Public works expenditures, totaling \$1.1 billion, were \$676 million greater than in 1946. The largest increases were for veterans' housing (National Housing Agency), which totaled \$361 million as against \$24 million in 1946, and in expenditures by the Public Roads Administration, which amounted to \$187 million compared with \$46 million in 1946. Social security expenditures, including those for railroad retirement and railroad unemployment, totaled \$1,065 million, a net increase of \$221 million over those of 1946. The largest component of the gross increase consisted of grants to States by the Social Security Board of \$226 million.

764788—48——3

#### EXPENDITURES FROM TRUST ACCOUNTS, ETC.

In addition to budget expenditures, expenditures under certain accounts which are maintained with the Treasurer of the United States are reported in the Daily Statement of the United States Treasury under the title of "Trust accounts, etc.". Transactions in these accounts are not included in the Federal budget, but certain expenditures included in the Federal budget are in the nature of transfers to the classification "Trust accounts, etc.". For example, appropriations made from the General Fund to various trust accounts, such as the Government's payments to the employees' retirement fund, the railroad retirement account, and the national service life insurance fund, appear under budget expenditures as transfers to trust accounts.

A summary of transfers to trust accounts and of expenditures by trust accounts, etc., for the fiscal years 1932 through 1947 will be found in table 1, page 268, and details by months for 1947 in table 4, beginning on page 300.

Commencing with the fiscal year 1947, certain revisions were made with respect to "Transactions in checking accounts of Government agencies, etc. (net)" whereby net transactions of wholly owned corporations and certain agencies were incorporated into budget expenditures. Net transactions of mixed-ownership corporations and certain special deposit accounts heretofore reflected in this category were consolidated with "Special deposits (net)" under "Trust account expenditures, etc." in the Daily Statement of the United States Treasury.

Operations for the fiscal year 1947 of Government corporations and certain other business-type activities are summarized in table 85, page 472, "Sources and application of funds of corporations and certain other business-type activities of the United States Government". Such figures are not on the basis of the Daily Statement of the United States Treasury, and therefore do not agree with the figures shown in other tables in this report.

#### GENERAL FUND

The General Fund represents all moneys of the Government deposited with and held by the Treasurer of the United States.

The assets in the General Fund include gold, silver, currency, coin, and unclassified collection items, etc., and deposits to the credit of the Treasurer of the United States, in Federal Reserve Banks, special depositaries, national and other bank depositaries, foreign depositaries, and the treasury of the Philippine Islands.

The liabilities of the General Fund include outstanding Treasurer's checks, deposits of certain Government officers composed of balances to the credit of the Post Office Department, the Board of Trustees of

the Postal Savings System, and postmasters' disbursing accounts, etc., uncollected items, and exchanges.

The difference between total assets and total liabilities is the General Fund balance. The General Fund cash balance at the close of the fiscal year amounted to \$3,308 million, a reduction of \$10,930 million during the fiscal year. Deposits with special depositaries on account of sales of Government securities (i. e., war loan accounts) decreased from \$12,993 million on June 30, 1946, to \$962 million on June 30, 1947, a decline of \$12,031 million.

The net change in the balance of the General Fund during the fiscal year is accounted for as follows:

	Amount (in millions)
Balance June 30, 1946	\$14, 238
Budget receipts, net	43, 259
Trust accounts, etc., receipts	6, 228
	$\overline{63,725}$

Note.—On basis of daily Treasury statements. For a description of accounts through which	h Treasury

A comparative analysis of the assets and liabilities of the General Fund is shown as of June 30, 1946 and 1947, in table 53.

### APPLICATION OF THE BUDGET SURPLUS AND FINANCING OF CASH REQUIREMENTS

The means of financing net cash requirements for the fiscal year 1947, as represented by the net decrease in the public debt and net expenditures from trust accounts, are summarized in the following table.

Amount required to be financed:  Net decrease in public debt—  Public issues:  Marketable obligations.  Nonmarketable obligations (net increase)  Matured and bearing no interest (net increase)	-2,872	of dollars)
Subtotal public issues	16, 170	
Special issues to trust funds, etc. (net increase)	-5, 035	.*
Total net decrease in public debt		$11, 136 \\ 548$
Total amount required to be financed		11, 684
Means of financing: Budget surplus (excess of net receipts over expenditures). Net decrease in General Fund balance		754 10, 930
Total amount financed		11, 684

#### PUBLIC DEBT OPERATIONS

During the fiscal year 1947 the public debt was reduced by \$11.1 billion and the guaranteed obligations held outside the Treasury declined by \$0.4 billion. The combined total of the public debt and the guaranteed obligations outstanding on June 30, 1947, was \$258.4 billion. This compared with \$279.8 billion at the peak of the debt, which was reached on February 28, 1946. The major part of the reduction in the public debt was accomplished by reducing the Treasury cash balance from its post-Victory Loan peak of \$26.0 billion to its June 30, 1947, level of \$3.3 billion. Because of the relatively low level of the cash balance at the end of the year, further reductions in the debt must logically be the outgrowth of budget surpluses.

In its effect on the distribution of ownership, the entire decline in the debt since the peak has been more than accounted for by the decline in the holdings of the commercial banking system. Holdings of debt by nonbank investors as a whole increased during the year—notably holdings by individuals and Federal agencies and trust funds. This concentration of debt reduction in bank holdings has helped to alleviate inflationary pressures during the reconversion period. The debt retirement program was made possible by the Treasury's policy of maintaining a substantial portion of the debt in short-term securities.

This policy maintained the liquidity of the banking system and put a large portion of the debt in a form in which it could be easily retired. As a consequence of the liquidity of the banks' Government security portfolios, the large turnover of funds incident to the debt reduction program occurred without disturbance to the money market. The reduction in the debt has naturally resulted in a substantial decline in the proportion of short-term securities, as well as in the proportion held by banks. The twofold character of this decline consequently has resulted in keeping the maturity distribution and the form of the debt well adjusted to the character of its ownership.

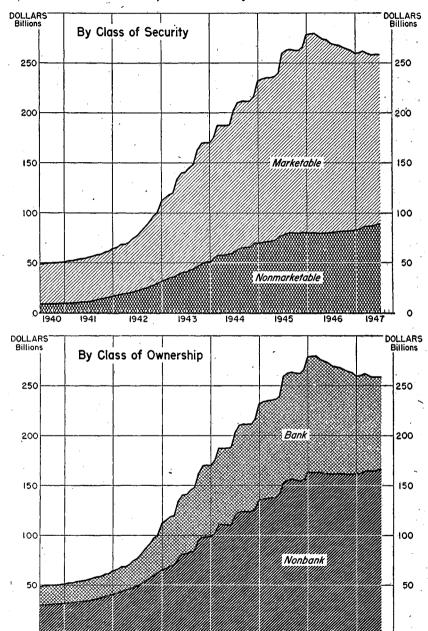

Chart 4 shows the public debt and guaranteed obligations outstanding at the end of each month since June 30, 1940.

In carrying out the-debt retirement program the 91-day Treasury bills were reduced by \$1.2 billion (\$1.3 billion during the entire year) and the 1-year certificates of indebtedness 1 were reduced by \$14.4 billion. In addition, all other marketable debt callable or maturing during the year was reduced \$5.2 billion.

This decrease was partially offset, however, by increases in special issues to Government trust funds and investment accounts by \$5.0 billion, and nonmarketable public issues by \$2.9 billion. In the case

<sup>1</sup> Includes the 0.90 percent 13-month notes which matured July 1, 1946.

1947

of the nonmarketable issues, increases in armed forces leave bonds and United States savings bonds were partially offset by a decrease in Treasury savings notes. There was also an increase in the public debt amounting to \$2.1 billion resulting from noninterest-bearing special notes issued to the International Bank and the International Monetary Fund.

Bank restricted issues, public marketable issues which banks may not acquire prior to a specified date, declined from \$53.5 billion to \$49.6 billion on September 15, 1946, when the 2½ percent Treasury bonds of September 15, 1956-59, outstanding in the amount of \$3.8 billion, became eligible for bank purchase. No other bank restricted issue will become eligible for such purchase until May 1952.

The following table shows the debt on June 30, 1946 and 1947, distributed by classes of securities.

Public debt and guaranteed obligations of the Government outstanding on June 30, 1946 and 1947, by classes of issues

Class of security	1946	1947	or de- crease (—)	June 30, 1946	June 30, 1947
Guaranteed obligations not owned by the Treasury: Commodity Credit Corporation demand obligations. Federal Housing Administration debentures. Other (matured)	\$424 43 10	\$45 38 6	-\$379 -4 -3	0. 2 (*) (*)	(*)
Total guaranteed obligations not owned by the Treasury  Total public debt and guaranteed obligations	269, 898	90 258, 376	$\frac{-387}{-11,523}$	100.0	(*)

Note.—Figures are rounded and will not necessarily add to totals.

<sup>(\*)</sup> Less than \$500,000.

<sup>1</sup> If the .90 percent 13-month Treasury notes outstanding June 30, 1946, which resembled certificates of indebtedness more closely than they do the other series of Treasury notes were reclassified as certificates of indebtedness, these two lines of the table would read as follows:]

Certificates of indebtedness 39, 7		<b>~14, 418</b>	-14.7	9.8
Treasury notes	51 8, 142	-5, 209	. 4.9	3. 2

Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date.
 Includes \$23 million adjusted service bonds in 1946 and \$15 million in 1947.
 Includes \$58 million excess profits tax refund bonds in 1946 and \$19 million in 1947.

Table 29 on page 362 shows the distribution of the interest-bearing debt (including securities guaranteed by the United States and not held by the Treasury) according to the number of years to the first call date and according to the numbers of years to maturity.

A summary of public debt receipts and expenditures (issues and retirements) by classes of securities is given in the table which follows:

Public debt receipts and expenditures, fiscal year 1947 On basis of daily Treasury statements, see n. 2651

### Bonds, Notes, and Certificates of Indebtedness

A total of \$44.9 billion marketable bonds, notes, and certificates of indebtedness matured during the fiscal year 1947, \$19.6 billion of which were paid in cash. The maturing securities redeemed for cash consisted of 10 issues of % percent 1-year certificates of indebtedness amounting to \$12.4 billion, 3 issues of Treasury notes amounting to \$7.2 billion, and one issue of 3 percent conversion bonds in the amount of \$13 million. In exchange for the \$25.3 billion of securities not paid in cash, there were offered 11 issues of % percent 1-year certificates of indebtedness.

Of the nonmarketable securities, sales of United States savings bonds totaled \$7,208 million, issue price, and sales of savings notes amounted to \$3,057 million. Redemptions of savings bonds Series A-G totaled \$5,545 million and of tax and savings notes, \$4,200 million. The offerings of securities and the disposition of matured or redeemable issues during the fiscal year are shown in the two tables which follow.

NOTE.—Figures are rounded and will not necessarily add to totals.

United States savings bond sales and redemptions. -Sales of United States savings bonds (including discount accruals) exceeded redemptions during the year by \$2,354 million. Sales amounted to \$7,208 million, issue price. As of June 30, 1947, the value of unmatured savings bonds outstanding at current redemption value amounted to \$51,367 million. This amount was 19.9 percent of the total Federal debt outstanding, as compared with 18.2 percent a year earlier. The amount of savings bonds issued, plus accruals, since inception was \$71,852 million. Redemptions have totaled \$20,446 million, and as of June 30, 1947, there were 71.5 percent still outstanding.

Detailed information on savings bonds from March 1935 when Series A bonds were first offered through June 30, 1947, is contained in the tables beginning on page 403. Sales of savings bonds of Series E, F, and G for the fiscal year 1947 are shown by series in the following

FExcludes depositary bonds, armed forces leave bonds, and guaranteed obligations.

Includes amounts transferred to matured debt on which interest has ceased.

Beginning with Mar. 1, 1946, some refunding operations provided for a stated portion of the maturity to be redeemed for cash, with the remainder covered by an offering of an exchange security.

Includes tax and savings notes surrendered in payment of taxes in the amount of \$2,015 million.

table. Chart 5 on page 29 shows sales, redemptions, and amounts outstanding of the various issues of savings bonds from January 1945 through June 1947.

Sales of Series E, F, and G savings bonds, by months, fiscal year 1947 [In millions of dollars, at issue price. On basis of daily Treasury statements, see p. 265]

Month	Series E	Series F	Series G	Total

une	1 301	24	157	48
Total	4, 287	360	2, 561	7, 20

Note.—Figures are rounded and will not necessarily add to totals.

Almost 60 percent of the sales of savings bonds in 1947 were accounted for by sales of Series E bonds. The dollar volume of sales and the number of units sold of Series E bonds of each denomination in the fiscal years 1941 through 1947 and by months for 1947 are shown in the table on page 408.

The payroll savings plan continues to be popular with several million persons. While the number of participants is down to about one-fifth of the wartime level, the rate of decline is no longer a sharp one. The average deduction has remained a \$25 bond a month which is about the same level as in the nondrive months during the war. Total savings bond sales by payroll savings are running at about \$100 million a month.

The redemptions reached their peak during the winter of 1945–46. Since that time redemptions have fallen and the amount of savings bonds outstanding is still rising. Redemptions of all savings bonds during the fiscal year amounted to \$5,545 million including accrued discount. The matured Series A, B, and C bonds have increased the redemption total but Series E bond redemptions have declined. The table which follows compares redemptions of all series of United States savings bonds by months for the fiscal year 1947.

<sup>1</sup> Includes small amounts of unclassified Series F and G sales.

# SALES, REDEMPTIONS AND AMOUNTS OUTSTANDING OF UNITED STATES SAVINGS BONDS

MONTHLY, JANUARY 1945 THROUGH JUNE 1947

Average, Series F and G issued from May 1, 1941	2	5	8	11	12	13			

Note.—The percentages shown in this table are the proportions of the value of the bonds sold in any calendar year which are redeemed before July 1 of the next calendar year, and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value. The average percentages shown above are simple averages of the percentages for the applicable annual series.

Maturity of Series C savings bonds.—All savings bonds issued in the calendar years 1937 and 1938 were designated Series C, and carried a 10-year maturity. This issue, accordingly, began to mature on January 1, 1947. Series A had matured from March through December 1945 and Series B had matured during the calendar year 1946.

Series C savings bonds were sold at 75 percent of maturity value with an annual limit of \$10,000 on purchases, maturity value. They were issued originally in the amount of \$470 million, issue price. When the Series C-1937 savings bonds began to mature, there were \$427 million still outstanding at current redemption value, or about 74 percent of the amount issued plus accruals. There was no change in the maturity provisions from Series B regulations. (See Annual Report of the Secretary of the Treasury for the fiscal year 1946, page 49).

<sup>&</sup>lt;sup>1</sup> Percentages by denominations may be found beginning on p. 412.

United States savings stamps.—Sales of United States savings stamps during the fiscal year 1947 totaled \$26 million, while redemptions amounted to \$52 million. Of the amount redeemed, \$28 million, or 53.6 percent, were exchanged for United States savings bonds. The amount outstanding at the end of the fiscal year was \$70 million. Data on sales and redemptions of savings stamps from May 1, 1941, through June 30, 1947, are shown in the tables on page 416.

Treasury notes, tax series and savings series.—Series C Treasury savings notes were sold during the fiscal year 1947 in the face amount of \$3,057 million. Redemptions of Series C notes amounted to \$4,194 million. Of the total amount redeemed, \$2,012 million were applied in payment of taxes and \$2,182 million were paid in cash. At the end of the fiscal year there were outstanding \$5,560 million of unmatured Series C savings notes and \$28 million of matured Series A, B, and C notes. (See the table on page 417.)

### TREASURY BILLS

Offerings of 3-month Treasury bills were made each week during the fiscal year 1947. As a continuation of the Treasury policy for retirement of the debt held by the banking system, there was an aggregate cash retirement of \$1,200 million in bills during the last three months of the fiscal year. Offerings of bills were made in weekly amounts of \$1,300 million until April 17, when \$200 million of the maturing bills were retired. Bill retirements during the fiscal year were effected as follows:

Date of bills maturing	Amount matured	Amount retired
	In millions	of dollars
Npr. 17.	1,300	200
pr. 24 day 1 day 8	1,300 1,300 1,300	20 20 20
fay 15	1,300 1,300 1,300	100 100 <b>2</b> 00
Total	9, 100	1, 20

The 13 issues outstanding at the beginning of the year totaled \$17,039 million; the 13 issues outstanding at the end of the year totaled \$15,775 million. The 52 issues offered during the year were sold at an average rate of discount varying around 0.375 percent. Bids on a fixed-price basis averaged about \$27 million a week during 1947 and amounted in the aggregate to about 2 percent of all bids accepted.

Announcement was made on April 25, 1947, of a change in procedure

for the issuance of Treasury bills. Beginning with the issue dated May 1, 1947, tenders for bills were invited in exchange for maturing bills as well as for cash, and exchange and cash tenders were accorded equal treatment. Cash adjustments were made for differences between the par value of maturing bills accepted in exchange and the issue price of the new bills.

Further information concerning Treasury bills will be found in the exhibits beginning on page 159 and in the table on page 386.

### DEPOSITARY BONDS

Issuance of the first series of depositary bonds, as authorized by Department Circular No. 660, dated May 23, 1941, was continued during the fiscal year 1947 to the various qualified depositaries and financial agents. The total issues during the year amounted to \$29 million and redemptions amounted to \$132 million. There were \$229 million outstanding on June 30, 1947.

Issuance of the second series of depositary bonds as authorized by Department Circular No. 714, dated June 25, 1943, was also continued during the year to the various qualified depositaries for withheld taxes. The total issues during the year amounted to \$9 million, and redemptions amounted to \$9 million. There were \$97 million outstanding on June 30, 1947.

### ARMED FORCES LEAVE BONDS

On November 12, 1946, the Treasury Department issued regulations for the issuance of armed forces leave bonds, provided under section 6 of the Armed Forces Leave Act of 1946, wherein living members and living former members of the armed forces are entitled to receive bonds of the United States in settlement and compensation of accumulated leave.

These bonds were issued in multiples of \$25, with a minimum denomination of \$50, and dated the first day of the quarter-year period next following the date of discharge of the former member of the armed forces provided he was discharged on or after January 1, 1943, and prior to September 1, 1946, or on active duty on September 1, 1946. Each bond will mature five years from its issue date. Interest will accrue at the rate of 2½ percent per annum. The bonds are nontransferable but may be assigned by the owner to the Administrator of Veterans' Affairs for redemption for the purpose of payments on a United States Government life insurance policy or a national service life insurance policy under such regulations as may be prescribed by the Administrator of Veterans' Affairs. The bonds are exempt from claims of creditors.

During the fiscal year there were \$1,847 million leave bonds issued and \$54 million retired, leaving a total of \$1,793 million outstanding. The regulations governing armed forces leave bonds appear in the exhibit on page 165.

### SPECIAL NOTES OF THE UNITED STATES

Pursuant to the provisions of section 7 of the Bretton Woods Agreements Act,¹ the Secretary of the lateral Treasury is authorized from time to time to make payment of specified amounts to the International Bank for Reconstruction and Development and the International Monetary Fund on account of the subscription of the United States, and to treat such payments and repayments thereof as public debt transactions of the United States. The Secretary is authorized and directed to issue special notes of the United States from time to time to the Bank and Fund in exchange for dollars.

These notes bear no interest, are nonnegotiable, and are payable on demand of the Fund or the Bank, as the case may be. The face amount of the notes issued shall not exceed in the aggregate the amount of the subscription of the United States actually paid to the Bank or Fund.

The International Bank for Reconstruction and Development series was issued bearing printed denominations of \$1 million, \$5 million, and \$10 million, and a comparatively small number of notes upon which the denomination was left blank when printed but upon which the amount was entered at time of issue. At the end of the fiscal year 1947, \$416 million were outstanding.

The International Monetary Fund series was issued in the denominations of \$1 million, \$5 million, \$10 million, \$50 million, and \$100 million. At the end of the fiscal year there were \$1,724 million of this series outstanding.

See also Monetary Developments on page 47.

### Special Issues

During the year the Treasury continued to issue special series of interest-bearing securities for the investment of trust or other funds deposited in the Treasury. The amount of such obligations outstanding increased by \$5,035 million during the year. The total outstanding as of June 30, 1947, amounted to \$27,366 million. Details will be found in the table on page 345 of this report.

### CUMULATIVE SINKING FUND

Credits accruing to the cumulative sinking fund during the year amounted to \$588 million which, added to the unexpended balance

Public Law 171; see Report of the Secretary of the Treasury for 1945, p. 384.

of \$5,525 million brought forward from the previous year, made available \$6,113 million for the year. None of the funds was used for the retirement of bonds and notes which matured or which were called during the fiscal year 1947. The unexpended balance of \$6,113 million was carried forward to the fiscal year 1948.

Tables showing the transactions on account of this fund since its inception on July 1, 1920, will be found on page 401 of this report.

SECURITIES ISSUED BY CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES OF THE UNITED STATES GOVERNMENT 1

During the fiscal year 1947, the Treasury continued the policy announced in October 1941 under which funds needed by Government corporations are provided by the Treasury instead of by the sale of guaranteed securities in the open market. Congress incorporated this policy into law with respect to the Reconstruction Finance Corporation (Public Law 132, approved June 30, 1947), which requires that Corporation to issue its obligations to the Secretary of the Treasury. In addition, Treasury facilities continued to be extended for servicing obligations of Government corporations.

Pursuant to the Government Corporation Control Act of 1945 (Public Law 248, sec. 303 (a)), approved December 6, 1945, all bonds, notes, debentures, and other similar obligations issued subsequent to enactment of this law by any wholly owned or mixed-ownership Government corporation, and offered to the public, are subject to such conditions as have been or may be approved by the Secretary of the Treasury.

During the year the Farmers' Home Administration Act of 1946 was enacted (Public Law 731, approved August 14, 1946), authorizing the Secretary of Agriculture to issue notes to the Secretary of the Treasury to obtain funds needed in excess of the appropriation provided to make payments to mortgagees as provided in that act with respect to title I of the Bankhead-Jones Farm Tenant Act, as amended.

### GUARANTEED OBLIGATIONS NOT HELD BY THE TREASURY

Matured and unmatured obligations fully guaranteed by the United States and publicly held totaled \$90 million as of June 30, 1947. The unmatured obligations of \$83 million compared with \$467 million a year earlier. The obligations outstanding on June 30, 1947, consisted of certain nonmarketable demand obligations of the Commodity Credit Corporation, issued principally to commercial banks in connection with commodity transactions, and of marketable debentures

<sup>&</sup>lt;sup>1</sup> For a summary of the limitations placed by law on the amount of securities guaranteed by the United States which may be issued, see Annual Report of the Secretary of the Treasury for 1946, pp. 76 and 77.

<sup>764788-48-4</sup> 

issued by the Federal Housing Administration in exchange for mortgages.

These obligations at the close of the past two fiscal years were as follows:

Issuing agency	June 30,	June 30,	Net	
	1946	1947	decrease	
	In millions of dollars			
Commodity Credit Corporation Federal Housing Administration: Mutual mortgage insurance fund Housing insurance fund. War housing insurance fund	* 424	45	379	
	8	7	1	
	7	6	1	
	27	25	2	
Total unmatured obligations	467	83	383	

NOTE.-Figures are rounded and will not necessarily add to totals.

In accordance with the act of May 22, 1946 (Public Law 388), the President, in a letter dated January 29, 1947, to the Federal Housing Commissioner, approved an increase in the amount of mortgages that may be insured under title VI of the act by \$1.0 billion to a total of \$3.8 billion. The aggregate amount of principal obligations of all mortgages insured by the Federal Housing Administration is now limited to \$7.8 billion, which may be increased by an amount not exceeding \$1.0 billion with the approval of the President. In addition, the Commissioner is authorized to incur total liabilities of \$165 million under title I of the National Housing Act, as amended, for insured renovation and modernization loans.

### OBLIGATIONS HELD BY THE TREASURY

Obligations (unmatured) issued by Government corporations and other agencies and held by the Treasury at the close of the fiscal years 1946 and 1947 were as follows:

Corporation or agency	June 30, 1946	June 30, 1947	Net in- crease or decrease (-)

Note.—Figures are rounded and will not necessarily add to totals.

<sup>·</sup> Revised to conform to amount shown in the first daily Treasury statement of the fiscal year.

<sup>\*</sup>Less than \$500,000.

As a result of transactions under previously enacted legislation, the borrowing power of the Reconstruction Finance Corporation was changed during 1947. The amount of obligations which the Corporation was authorized to issue as of June 30, 1947, amounted to \$17,128 million, a decrease of \$210 million since June 30, 1946. Public Law 132, effective July 1, 1947, amending the Reconstruction Finance Corporation Act, authorizes future borrowings from the Secretary of the Treasury in an amount outstanding at any one time sufficient to carry out its functions.

Table 86 on page 476 shows, by agencies, the amounts of obligations authorized to be outstanding as of June 30, 1947, and the amounts actually outstanding on that date.

# STATUTORY LIMITATION ON THE PUBLIC DEBT AND GUARANTEED OBLIGATIONS

Section 21 of the Second Liberty Bond Act, as amended by the Public Debt Act of June 26, 1946, limits the amount of obligations issued under authority of the act to \$275 billion outstanding at any one time. This limitation applies to the public debt and to those obligations of Government corporations and other business-type activities which are fully guaranteed by the United States (except such obligations held by the Treasury).

As of June 30, 1947, the unused borrowing authorization was \$17.5 billion. The balance issuable at the end of the fiscal year 1947 and an analysis of the public debt and guaranteed obligations outstanding as affected by the debt limitation are shown in the tables which follow.

#### INTEREST ON THE PUBLIC DEBT

Interest payments on the public debt during the fiscal year amounted to \$4,958 million, compared with \$4,722 million (daily Treasury statement basis) in 1946. Interest payments in 1947 do not reflect the full annual interest savings which ultimately will be effected from debt retirements made during the year. In the first place, there is a time lag between the retirement of debt and the time the interest savings become effective; for instance, only about a half-year's interest would be saved on debt retired in the first half of the year while the interest savings on debt retired in the latter half would not be noticeable until the year following. The second factor which tends to offset interest savings on the retirement of marketable debt is the somewhat higher average rate paid on new securities issued during the year, such as special issues to trust funds and Government investment accounts, than the rate paid on the securities retired.

Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).
 Consists of United States notes (less gold reserve); deposits for retirement of national bank and Federal Reserve Bank notes; and other obligations bearing no interest.
 Excludes guaranteed securities held by the Treasury.

The effect of Treasury financing operations during the year as they relate to the interest burden of the debt is shown in the following table.

Computed average interest rate and interest paid in the fiscal years 1946 and 1947. on outstanding public debt

[Dollars in millions.	On basis of	Public Debt	accounts, see p. 265]
-----------------------	-------------	-------------	-----------------------

	Average interest rate June 30, 1946	Interest paid in 1946	Average interest rate June 30, 1947	Interest paid in 1947	Change in interest paid
Marketable: Bills Certificates Notes Bonds	Percent 0. 381 . 875 1. 289 2. 307	\$65 314 264 2,627	Percent 0. 382 . 875 1. 448 2. 307	\$63 247 190 . 2, 763	-\$2 -67 -74 +136
Subtotal	1.773	3, 270	1.871	3, 264	-6
Nonmarketable: Armed forces leave bonds		831 111 10 21	2. 500 2. 765 1. 070 2. 000	1,000 81 7 2	+2 +169 -30 -3 -19
Subtotal	2. 567 2. 448	973 505	2. 593 2. 510	1,092 602	+119 +97
Total	1. 996	4, 747	2. 107	4, 958.	+211

-Figures are rounded and will not necessarily add to totals. The average rates shown for savings bonds and savings notes represent the annual yield if held to maturity. Only the discount currently accruing on savings bonds is included in interest payments. On the other hand, interest on armed forces leave bonds and savings notes is paid only at time of redemption.

The over-all computed average rate on the interest-bearing public debt outstanding on June 30, 1947, was 2.107 percent, compared with 1.996 percent a year earlier. This increase in the general average rate was due to the retirement of large amounts of short-term debt bearing relatively low rates of interest, and the continued issue of nonmarketable and special issues at higher-than-average rates. structure of interest rates on Government securities as of June 30, 1946, and June 30, 1947, is compared in chart 6 on page 40.

The following summary (on basis of Public Debt accounts) gives the amounts of the interest payments for both the public debt and guaranteed obligations, classified according to their Federal income tax status, for the fiscal years 1946 and 1947, with changes from 1946.

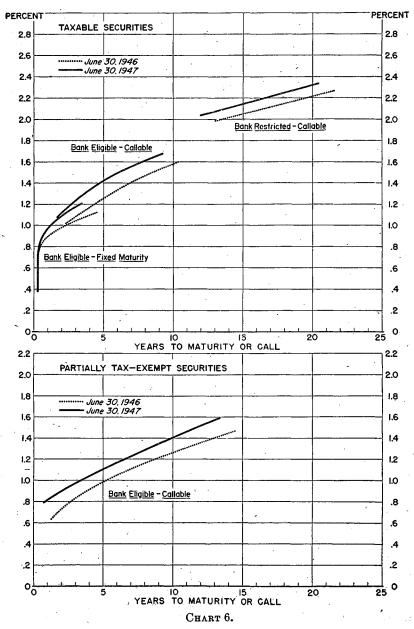

Tradicust in some temperature	1946	1947	Change

### YIELDS OF OBLIGATIONS OF THE UNITED STATES

BASED ON CLOSING PRICES

Note.—Partially tax-exempt securities with fixed maturities and wholly tax-exempt securities are omitted because they are too few in number and too small in outstanding amount to permit drawing a significant outstanding

'All bank-restricted issues are callable and all partially tax-exempt issues are bank-eligible.

The bank-eligible 2½'s of 1967-72 have been omitted from the chart in order to avoid undue complexity.

The 2½'s of 1956-59 (which were bank-restricted until September 15, 1946) have also been omitted for 1946.

#### OWNERSHIP OF INTEREST-BEARING FEDERAL SECURITIES •

The interest-bearing debt of the United States Government declined from \$269 billion to \$255 billion during the fiscal year 1947. Of this \$255 billion, 64 percent was held by nonbank investors as a group. Since these same investors held only 60 percent of the debt on June 30, 1941, one effect of the Treasury's financing program during the last six years has been to reduce slightly the proportion of debt held in the banking system. Individuals as a group account for an important share in this improvement in nonbank participation in debt ownership, as is shown in the following table.

Ownership of Federal securities 1 by investor classes as of June 30, 1941 through 1947

Comprises interest-bearing public debt and guaranteed obligations of the Federal Government.
 Includes partnerships and personal trust accounts.
 Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country.

<sup>·</sup> Federal securities comprise public debt and guaranteed obligations of the Federal Government.

## Changes in Ownership of Federal Securities During the Fiscal Year 1947

The decline in bank-held debt during the fiscal year 1947 was greater than the \$13.4 billion decline in the total debt, since the Treasury's debt pay-off program was concentrated on securities held for the most part by commercial banks and the Federal Reserve Banks.

Marketable debt declined by nearly \$21 billion during the year (all but a few million dollars of it in bills, certificates, and notes) and three-fourths of the drop was reflected in bank holdings. Meanwhile the increase in nonmarketable securities in nonbank hands was more than sufficient to offset the \$5 billion decline in nonbank holdings of marketable debt. There was some tendency for banks to pick up bank-eligible bonds from nonbank investors during the year, but this pick-up accounted for only about 10 percent of the bank decline in bills, notes, and certificates, as disclosed in the following table.

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>\*</sup>Less than \$50 million.

Although the Treasury did not issue any new marketable securities for cash during 1947, issuance of other securities amounted to almost \$18 billion—all (except for a negligible amount) to nonbank investors. Sales of savings bonds (including accruals) amounted to nearly \$8 billion and savings notes, \$3 billion. Nearly \$2 billion armed forces leave bonds were issued and \$5 billion was added to special issues held by Federal agencies and trust funds.

The Treasury paid out a little over \$31 billion on redemptions and cash maturities during the year, of which \$10 billion involved savings bonds and notes. Practically all of the remainder represented the \$21 billion of cash pay-offs by the Treasury in its program to retire marketable debt. Two-thirds of these pay-offs were made on securities held by commercial banks and Federal Reserve Banks. Bank holdings of Federal securities declined by more than the amount of Treasury pay-offs on bank-held securities, however, as commercial banks liquidated further in the market. On net balance the banking system sold approximately \$1.7 billion in the market during 1947. These securities, together with the \$1.2 billion of marketable issues sold by Federal agencies and trust funds during the year, were purchased principally by insurance companies, mutual savings banks, and State and local governmental funds.

The net effect, then, of changes in debt during the year was to increase nonbank holdings of Federal securities by \$3.0 billion while bank holdings declined by \$16.4 billion. The trends of investment among the various nonbank investors differed widely, however, as is shown in the table following. Individuals increased their holdings by over \$3 billion-roughly half of it in savings bonds and half in armed forces leave bonds. Federal agencies and trust funds continued to accumulate significant surpluses in social security and military insurance funds and invested \$3.8 billion in Federal securities. Mutual savings banks and State and local governments also increased their portfolios during the year, but holdings by insurance companies fell off slightly. The most significant decline for any nonbank investor group was the \$5.1 billion reduction in holdings by other corporations and associations, reflecting, as in 1946, the conversion of some corporate liquid assets into expanding inventories, receivables, plant, and equipment. The figures on transactions in Federal securities during the year are summarized on page 44.

NOTE.—Figures are rounded and will not necessarily add to totals. Special issues and Treasury bills are included in the figures on purchases and redemptions on the basis of net changes in amounts outstanding (rather than gross issuances and retirements).

During each of the war years, of course, Federal securities represented practically the only investment outlet for the principal financial investor groups in the country. Since the Federal debt retirement program got under way, however, private borrowing, notably in the form of consumer, industrial and real estate loans and corporate securities, began to expand significantly. Of the leading financial investor groups—life insurance companies, mutual savings banks, and commercial banks—only mutual savings banks continued to use Federal securities as their primary outlet for investment funds during the year. The changes in the various investments of these institutions during the year are outlined in the following table.

Estimated net changes in investments of leading financial investor groups, fiscal year 1947

#### (In billions of dollars)

	Mutual sav- ings banks	Commercial bauks	Life insur- ance com- panies
Federal securities All other loans and investments	+0.7	-14. 4	-0.5
	+.5	+7. 6	+4.0

<sup>\*</sup>Less than \$50 million.

Footnotes on p. 41.

Despite the impact of the Treasury's debt retirement program on the various investor groups, and the increasing importance of private financing, Federal securities still constitute the most important single asset in the balance sheets of the large financial institutional groups in the country. In June 1947, Federal securities accounted for over-60 percent of the earning assets of commercial banks. They accounted for 60 percent of the assets of mutual savings banks and close to 45 percent of the assets of insurance companies. Federal securities constitute a third of the total liquid assets held by individuals (assets in the form of currency, checking accounts, savings accounts of all types, and Federal securities). In spite of recent liquidations, over 10 percent of corporate current assets (including inventories and receivables) are in Federal securities, as compared with less than 5 percent before the war.

The following table shows the effect on each of the major investor groups of the shift in Federal financing from the intensive war finance program to the postwar program of debt retirement. Commercial banks and Federal Reserve Banks together showed a significant decline in Federal security holdings for the first year since before the war. Meanwhile, nonbank investors continued to absorb securities during 1947 but at a rate much below the peak of wartime investment.

C. Total increase in interest-bearing debt outstanding	6.9	21.8	63. 0	61.6	55. 7	11.8	-13.

NOTE.—Figures are rounded and will not necessarily add to totals. Footnotes on p. 41. This slowing-up of nonbank investment in Federal securities was characteristic of other liquid assets of nonbank investors as well. Nonbank checking accounts increased by about \$3½ billion in the fiscal year 1947, as compared with a \$12½ billion gain the preceding year, and increases in savings accounts in commercial banks in 1947 were less than half the 1946 rate. Currency held by nonbank investors was \$.2 billion lower on June 30, 1947, than a year before. The Federal deficit was, of course, eliminated as a contributing factor in new liquid asset creation in 1947 and the expansion of private bank credit accounted for practically all of the increase.<sup>a</sup>

# SECURITIES OWNED BY THE UNITED STATES AND PROPRIETARY INTEREST IN CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES OF THE UNITED STATES GOVERNMENT

### SECURITIES OWNED

On June 30, 1947, the United States owned securities consisting of capital stock, bonds, etc., of Government corporations and agencies and indebtedness to the Government by railroads, farmers, shipowners, and others in the net face amount of \$20,755 million; and obligations of foreign governments arising out of World War I in the principal amount of \$12,660 million. A statement of the securities owned, exclusive of these foreign obligations, at the end of the fiscal year 1947 is shown in the table on page 434. An explanation of the increase or decrease of such securities during the fiscal year 1947 is shown in the table on page 436. A summary of the holdings of securities at the end of the last two fiscal years is shown in the following table:

Summary of securities other than World War I obligations of foreign governments owned by the United States Government, June 30, 1946 and 1947

[In millions of dollars] Increase or June 30, 1946 June 30, 1947 Security decrease (-) Capital stock of Government corporations. \$2,445.1 \$2, 556. 7 \$111.6 37. 9 1 11, 672. 1 Paid-in surplus of Government corporations 1.0 11,945.8 273. 7 Bonds and notes of Government corporations Other securities 2\_\_\_ 7,068.4 1, 645, 7 5, 422, 7 Total all securities 15, 800, 8 21,571.8 5, 771. 0 Less interagency ownership: Capital stock Paid-in surplus . 2 264.8 264.9 396. 0 551. 2 155. 3 661.7 155.4 Total interagency ownership. 817.1 15, 139. 1 Net securities owned. 20, 754, 7 5,615,6

Note.—Figures are rounded and will not necessarily add to totals.

<sup>&</sup>lt;sup>1</sup> Exclusive of \$1.0 million in transit for redemption.
<sup>2</sup> Includes loans and advances by Farm Security Administration, Rural Electrification Administration, Federal Works Agency, etc.

Detail on the relationship between Federal fiscal operations and income flow and liquid asset formation during the fiscal years 1941-1947 is shown in table 110.

In accordance with the act approved February 24, 1938 (52 Stat. 79), the Secretary of the Treasury canceled during the year obligations of the Reconstruction Finance Corporation amounting to \$.2 million, representing certain expenditures previously made by the Corporation. This brought the total of the obligations of the Reconstruction Finance Corporation canceled to \$2,786 million, as shown in the following table:

Reconstruction Finance Corporation:

Obligations canceled through June 30, 1946

Obligations canceled during 1947 on account of expenditures for expenses of regional agricultural credit corporations (sec. 201 (e) of Emergency Relief and Construction Act of 1932; sec. 33 of Farm Credit Act of 1937)

214, 576. 40

<sup>1</sup> For detail of cancellations, see annual reports for fiscal years 1946, p. 81; 1945, p. 93; 1944, p. 94; 1943, p. 113; 1942, p. 41; 1941, p. 51; and 1940, pp. 114–115.

# PROPRIETARY INTEREST IN CORPORATIONS AND CERTAIN OTHER BUSINESS-Type Activities of the United States Government

In order to show the amount of the Government's interest in Government corporations and certain other business-type activities, the Treasury compiles balance sheets from reports received from such corporations and activities which are published in the daily Treasury statement (see p. 464). These statements show the amount and classification of the assets and liabilities of the various corporations and activities, the privately owned proprietary interest in corporations, and proprietary interest of the United States.

### MONETARY DEVELOPMENTS

### INTERNATIONAL FINANCE

In the course of the year ended June 30, 1947, active steps were taken by the United States Government to settle some of the outstanding financial and monetary problems arising from war and to assist in the process of reconstruction. The National Advisory Council on International and Financial Problems has acted as the coordinating agency of the United States in these activities. The Council advises and consults with the American representatives on the International Bank for Reconstruction and Development and the International Monetary Fund. It takes such actions as are required of the United States Government by the Articles of Agreement of these institutions, except in those matters which are reserved for congressional action by the Bretton Woods Agreements Act. The United States has participated in the work of international financial reconstruction through its membership in these international organizations and also through the lending activities of United States agencies.

The International Fund and Bank.—During the fiscal year 1947 the International Monetary Fund and the International Bank for Reconstruction and Development began active operations. The first annual meeting of the Boards of Governors of both organizations was held in Washington in September-October 1946. At these meetings additional rules and regulations were adopted, new members admitted, and adjustments made in quotas and subscriptions. The Secretary of the Treasury, John W. Snyder, as United States Governor of both the Fund and the Bank, presided at these meetings.

The United States completed payment of its subscription to the Fund and the Bank on February 26, 1947. In conformity with the Articles of Agreement and the Bretton Woods Agreements Act, the subscription to the Fund was paid partly in gold (\$687,500,000.11), and partly in cash (\$280,499,999.89), and partly in nonnegotiable, noninterest-bearing notes (\$1,782,000,000). These notes are payable on demand in dollars when needed by the Fund in its operations. Of the total amount, \$1,800,000,000 was paid from the exchange stabilization fund established by the Gold Reserve Act of 1934, and the balance was treated as a public debt transaction. The United States also completed the payment of the required 20 percent of its subscription to the stock of the Bank. Cash payments amounted to \$69,215,000, and \$565,785,000 was paid in the form of noninterest-bearing, nonnegotiable notes. The remaining 80 percent of the subscription will not be called unless required to meet the Bank's obligations.

On September 18, 1946, the Secretary of the Treasury communicated the par value of the United States dollar for the purposes of the Fund as 15½1 grains of gold, nine-tenths fine. This is the weight of the gold dollar as fixed by the Presidential Proclamation of January 31, 1934. Other member countries similarly communicated the par values of their currencies in terms of gold or of dollars of this weight and fineness.

On December 18, 1946, the International Monetary Fund announced that it had accepted the par values communicated to it by the majority of the member countries. The Fund recognized that some of these par values, based on the existing rates of exchange, might require adjustment at some future date since they might be "found incompatible with the maintenance of a balanced international payments position and a high level of domestic economic activity . . ." and "that at the present exchange rates there are substantial disparities in price and wage levels in a number of countries." March 1,1947, was the date established by the Fund for the beginning of exchange transactions. At this date almost all of the member countries had completed payment of their subscriptions. Exchange transactions have begun with a few countries.

In the course of the fiscal year the International Bank began preparations for the issue of its obligations. Applications for loans totaling more than \$2 billion were received by the Bank. By the end of the fiscal year one loan of \$250 million was made to France.

National Advisory Council on International and Monetary Financial Problems.—The National Advisory Council, composed of the Secretary of the Treasury (Chairman), the Secretary of State, the Secretary of Commerce, the Chairman of the Board of Governors of the Federal Reserve System, and the Chairman of the Board of Directors of the Export-Import Bank, was established by the Bretton Woods Agreements Act to coordinate the policies and the operations of the United States representatives on the Fund and Bank and of all agencies of the Government making foreign loans or engaging in foreign financial, exchange or monetary transactions. The Council has submitted its report to the Congress through the President, and more complete data on its activities may be found in these reports. (See exhibits 28 and 29 beginning on page 180 of this report.)

In accordance with its statutory responsibility, the Council has coordinated a wide variety of foreign financial transactions by agencies of this Government, including foreign loans, financial settlement of war accounts, and credits to foreign governments or their nationals for purchase of United States Government surplus property. Its objective has been to achieve a consistent United States foreign financial policy. Problems which before the institution of the Council had been dealt with by individual agencies and, in many cases, with only incidental coordination, have been made the subject of joint discussion and joint decision. The Council considers various criteria for foreign loans, among which are the purpose of the loan, the need for the loan, the borrower's ability to repay, the allocation of available loan funds among applicant countries, the alternative sources of loan funds, and the possible effects of the use of loan proceeds on the United States domestic economy. On the basis of these criteria, the Council approves or disapproves consideration by the lending agency of a proposed loan or credit. Thus, through an over-all analysis, the Council offers its best judgment to a lending agency with regard to particular loan applications.

In the course of the year the Council approved for consideration loans by the Export-Import Bank aggregating \$325 million. The Council also has coordinated the policies of Government agencies responsible for the settlement of lend-lease and surplus property. Agreements for the mutual settlement of lend-lease and other wartime obligations have been made with the United Kingdom, France, Belgium, South Africa, India, Australia, the Netherlands, and New Zealand. Negotiations for the settlement of lend-lease and surplus property

matters have been undertaken with the Union of Soviet Socialist Republics, China, Greece, Czechoslovakia, and Norway. In the case of Italy, the Council, after consultation with congressional committees and the Comptroller General, recommended that the Treasury should make payment, upon certification by the War Department, to the Italian Government of dollars set aside in the Secretary of the Treasury's accounts to cover expenditures made by the United States Armed Forces in Italy for the procurement of supplies, services, and facilities. This recommendation was approved by the President.

The Council has formulated general policy for the guidance of the Office of the Foreign Liquidation Commissioner, Department of State, in financing surplus property sales abroad. These sales are made for dollars, wherever possible, and credits for the balance are extended under standard conditions. This policy was coordinated with the lending policy of the Export-Import Bank.

The Council also approved for consideration by the War Assets Administration credits of \$110 million to finance sales of domestic surplus property to foreign governments. The United States Maritime Commission approved of \$261 million for the purchase of ships available for disposal by the Commission after consideration by the National Advisory Council.

The Council recommended to Congress the authorization of an emergency loan to meet the budgetary needs of the Philippine Government for the current fiscal year, and initiated the establishment of a Joint Philippine-American Finance Commission to study the financial and budgetary problems of the Philippine Government. Congress, by an act approved August 7, 1946, authorized the Reconstruction Finance Corporation, after consultation with the Council, to extend credits up to \$75 million to the Philippine Republic during the fiscal year 1947, on appropriate terms and conditions. On the basis of the interim recommendations made by the Joint Finance Commission, the Reconstruction Finance Corporation, after consultation with the Council, extended credits of \$70 million to the Philippine Republic. By the end of the fiscal year 1947, \$10 million of this credit was repaid. The Joint Financial Commission submitted its final report on June 7, 1947. The report outlined a comprehensive financial, monetary, and trade program to achieve economic recovery and development in the Philippines. The Commission reported that if the substance of the program is put into effect, the Philippine Government will not require additional foreign loans to meet internal budgetary deficits, and that the Philippine economy should be able to finance the ambitious program of construction and expansion already formulated. (Cf. House Document 390, 80th Cong., 1st sess.) One of the important problems confronting the Council during this

year was the coordination of the policies of various agencies on interest rates and terms of repayment for credits extended to foreign countries under the legislation governing these agencies. The Council also considered a program of relief to go into effect on the termination of the United Nations Relief and Rehabilitation Administration and expressed its opinion that the proposed program would be consistent with the foreign financial policy of the United States Government.

The Council has been assisted in its work by the President's Committee for Financing Foreign Trade, composed of bankers and business men appointed by the President on June 26, 1946. This Committee has met with the Council and has given valuable advice and assistance to it.

### THE ANGLO-AMERICAN LOAN AGREEMENT

Congress, by joint resolution approved July 15, 1946, authorized the Secretary of the Treasury, in consultation with the National Advisory Council, to carry out an agreement dated December 6, 1945. between the United States and the United Kingdom, and authorized the Secretary to make \$3,750 million available as a line of credit to the United Kingdom, in accordance with this agreement. The purposes of the line of credit are to facilitate purchases of goods and services in the United States by the United Kingdom, to assist the United Kingdom to meet postwar deficits in its current balance of payments, to maintain adequate monetary reserves, and to assume the obligations of multilateral trade, as defined in the agreement. The United Kingdom was to make the sterling receipts from current transactions of all sterling area countries available for current transactions in any currency area without discrimination. The United States and the United Kingdom also agreed not to impose restrictions on payments for current transactions of sums accumulated after July 15, 1947. These obligations were to be assumed on July 15, 1947, unless in exceptional cases a later date was agreed upon by the two governments after appropriate consultation. The United Kingdom also agreed that after July 15, 1946, it would not apply exhange controls in such a manner as to restrict payments or transfers in respect of the products which it imported from the United States, or the use of sterling balances which United States residents had acquired as a result of current transactions. Each of the governments agreed not to discriminate against imports from the other country with certain specified exceptions. The United Kingdom also stated its intention to try to obtain agreement regarding the settlement of its accumulated sterling balances. The Government of the United

764788—48——5

Kingdom assumed the obligations agreed upon on July 15, 1947, except with respect to certain countries with which the United Kingdom Government had not yet negotiated agreements.

### POLICY ON GOLD AND SILVER

The Treasury continued its policy of selling and buying gold at \$35 per fine ounce (plus or minus one-fourth of 1 percent and other Mint charges) for the settlement of international balances. The Treasury also continued the policy of enforcing the Gold Declaration of February 22, 1944, in which it is stated that the United States Treasury does not recognize the transfer of title to looted gold and will not purchase gold located outside the United States from foreign countries which had not as of February 22, 1944, broken relations with the Axis or which continued to buy gold from countries maintaining relations with the Axis, unless the Treasury is satisfied that such gold was not acquired from the Axis or that the seller was not able to sell this gold as a result of the acquisition of Axis gold. As of the end of the fiscal year, settlements for the return of looted gold had been negotiated with Switzerland and Sweden by the United States Government acting jointly with the Governments of France and the United Kingdom. Similar negotiations were under way with other countries subject to the Gold Declaration.

On July 31, 1946, an act of Congress was approved by the President providing that domestic silver mined after July 1, 1946, and tendered to the Mints within a year after the ore from which it is derived was mined, would be received for coinage by the Mints with a seigniorage deduction of 30 percent. Consequently the Treasury's purchase price for newly mined domestic silver is 90.5 cents per fine ounce. The act also authorized the sale or lease by the Secretary of any silver held or owned by the United States, under such terms as he shall deem advisable, at not less than 90.5 cents per fine ounce. The Treasury sells such silver at 91 cents.

In the course of the year Belgium returned for the account of the Lend-Lease Administration practically all of the silver which had been lend-leased to her. This silver, however, was not transferred to the accounts of the Treasury during the fiscal year.

### STABILIZATION AGREEMENTS

On May 13, 1947, the Secretary of the Treasury and the Ambassador of Mexico executed a new stabilization agreement between the two countries. Under the terms of this agreement the United States Stabilization Fund agrees to purchase, on request of Mexico, Mexican pesos to an amount equivalent to \$50 million for the purpose of stabilizing the United States dollar-Mexican peso rate of exchange. This

agreement is to run for four years, beginning July 1, 1947. The agreement constitutes in effect an extension of the stabilization agreement of 1941 with Mexico, which had been extended by agreement until June 30, 1947. At the time of announcing this agreement, the Secretary and the Finance Minister emphasized that the stabilization agreement with Mexico is consistent with the aims and purposes of the International Monetary Fund, and that it would serve to supplement the efforts of the Fund to stabilize rates of exchange among the member countries.

### FOREIGN FUNDS CONTROL ACTIVITIES

During the fiscal year 1947 Foreign Funds Control made extensive progress in lifting its freezing controls and liquidating its operations. Only those controls remain in operation which will assist Foreign Funds Control in meeting the following three residual problems:

(a) The discovery of enemy property concealed in blocked accounts of persons in certain foreign countries, (b) the disposition of blocked assets of those countries and their nationals for which no unblocking procedure has yet been provided, and (c) the control of United States securities which disappeared from European countries during their occupation by the Germans.

### REMOVAL OF CONTROLS OVER CURRENT TRANSACTIONS

General License No. 94, which was initially issued by Foreign Funds Control in December 1945, and which removes all freezing controls over current transactions with the blocked countries covered, is now applicable to all countries and their nationals except Spain and Portugal. This General License was made applicable to Germany and Japan on March 4, 1947, when it was determined that the Allied Military Authorities were in a position through local controls to implement fully this Government's policy of regulating commercial and financial transactions with Germany and Japan. Concurrent with the completion of the respective negotiations establishing procedures for unblocking the assets of Sweden, Switzerland, and Liechtenstein, General License No. 94 was made applicable to these countries.

#### PROGRESS IN UNBLOCKING ASSETS

General License No. 95 provides a machinery for unblocking assets in the United States of certain European countries and their nationals. Under this General License a certification procedure was established which imposes on the foreign governments concerned the responsibility for investigating the real ownership of the blocked property involved. Such property in the United States is completely unblocked when, after appropriate investigation, the foreign government whose

nationals are involved certifies the absence of enemy interest to the banking institution holding such assets. The commitments of foreign governments to carry out their responsibilities in connection with the unfreezing machinery are incorporated in exchanges of letters between the Secretary of the Treasury and officials of the respective countries.

During the fiscal year 1947 the privileges of General License No. 95 were extended to the following additional countries: Austria, Sweden, Greece, Switzerland, Liechtenstein, and Poland. The assets of these countries together with the assets of the countries previously covered by General License No. 95 (France, Belgium, Norway, Finland, the Netherlands, Czechoslovakia, Luxembourg, and Denmark) account for over three-quarters of the assets originally blocked by Foreign Funds Control, exclusive of enemy property. Progress has been made towards the inclusion of Italy in General License No. 95 so that action in this connection should take place shortly.

It was found that there was little or no cloaking of enemy assets through some blocked countries. Accordingly, during the fiscal year 1947 action was taken, without reference to General License No. 95, to remove all the blocking controls from the assets of (a) all the Far East except Japan, and (b) certain other smaller and less important areas.

For the assets of the following countries no unblocking procedure has been established: Germany and Japan, Bulgaria, Hungary and Rumania, Spain and Portugal, and Estonia, Latvia, Lithuania, and Yugoslavia. German and Japanese assets, in general, will remain blocked until they are vested by the Office of Alien Property in the Department of Justice.

### FOREIGN FUNDS CONTROL IN THE PHILIPPINES

On August 31, 1946, Treasury controls in the Philippines were terminated and the Foreign Funds Control office in Manila was closed. This action was based on the specific request of the Philippine Government which indicated that it had instituted its own controls and that further action by the Treasury was no longer required.

### CONTROLS OVER IMPORTATION OF SECURITIES AND CURRENCY

Shortly after its inception Foreign Funds Control issued regulations controlling the importation of securities into the United States. During the fiscal year 1947 considerable progress was made toward limiting the scope of these regulations to make them applicable only to those securities reported by European countries to the Treasury as having disappeared during occupation by the Germans.

In April 1947, import controls over currency were removed since most of the important foreign countries, in cooperation with Foreign Funds Control, had taken measures to detect and segregate United States currency within their borders in which there was an enemy interest.

### TAXATION DEVELOPMENTS

The only major revenue act that became law during the fiscal year 1947 was the Excise Tax Act of 1947, which indefinitely extended certain wartime increases in excise tax rates. Section I which follows briefly summarizes this act.

A bill to reduce individual income tax rates for 1947 and later years was passed by the Congress but was disapproved by the President. Another bill providing the same rate reductions for 1948 and later years, but no reductions for 1947, was passed by the Congress shortly after the end of the fiscal year and also was disapproved by the President. Section II briefly summarizes these bills, the views of the Treasury concerning them, and the President's veto messages. In May 1947, the House Ways and Means Committee began hearings on general tax revision. Section III summarizes the Treasury's suggestions for study of the whole revenue system preparatory to the consideration of general tax revision. Section IV lists other revenue legislation taking effect during the fiscal year 1947.

### I. Excise Tax Act of 1947

With the issuance of a Presidential proclamation declaring the end of hostilities on December 31, 1947, certain war excise tax rates were scheduled to expire June 30, 1947. These war excise tax rates were provided by the Revenue Act of 1943 and were to expire six months after the termination of hostilities as proclaimed by the President or determined by a concurrent resolution of Congress. They included, among others, the increase in the taxes on furs, jewelry, and toilet preparations from 10 percent to 20 percent, the increase in the tax on admissions from roughly 10 percent to 20 percent, and the increase in the tax on distilled spirits from \$6 to \$9 a gallon.

On January 3, 1947, in his Budget Message for the fiscal year 1948, the President recommended that the war excise tax rates be continued. He said, "When the time comes for excise tax revision, the Congress should review the entire group of excise taxes rather than concentrate attention on those that were imposed or increased during the war."

The Congress acted on the President's recommendation and indefinitely continued the war excise tax rates in the Excise Tax Act of 1947 (Public Law 17, March 11, 1947). It was estimated that this legislation would increase receipts of the fiscal year 1948 by \$1.1 billion.

The Excise Tax Act of 1947 also amended section 2401 of the Internal Revenue Code to provide that the tax on furs should not apply to articles of which fur is the component material of chief value unless the value of the fur is more than three times the value of the next most valuable component material. Section 3469 (a) of the Internal Revenue Code was amended to provide that the tax on transportation of persons should not apply with respect to transportation which is outside the northern portion of the Western Hemisphere, except with respect to any part of such transportation which is from any port or station within the United States, Canada, or Mexico to any other port or station within those countries. The act repealed section 1806 of the Internal Revenue Code, which imposed a stamp tax on passage tickets costing over \$10 sold or issued in the United States to any port or place not in the United States, Canada, Mexico, Cuba, or Puerto Rico.

## II. Individual Income Tax Reduction Bills Passed by the Congress

### A. H. R. 1 (80TH CONGRESS, 1ST SESSION)

1. Provisions of the bill.—On March 13, 1947, the House Ways and Means Committee began hearings on H. R. 1, a bill that included a general reduction of individual income tax rates and a special additional tax exemption of \$500 for taxpayers over 65 years of age. Under the rate reductions in the bill, all taxpayers with taxable net incomes below about \$302,400 would have had their income tax for 1947 and later years reduced by a flat 20 percent. For higher incomes the reduction would have become gradually smaller until it reached 10.5 percent above \$5,000,000.

The bill was amended by the House Ways and Means Committee to reduce the tax by 30 percent for the first \$1,000 of taxable income and by an amount falling rapidly to 20 percent at a taxable income of approximately \$1,400. With these amendments it passed the House of Representatives. In the Senate, the bill was further amended to cut the reduction from 20 percent to 15 percent on taxable incomes between \$79,700 and \$302,400. The Senate bill allowed one-half of the rate reductions for the calendar year 1947 and the full reductions for later years.

As finally passed by the Congress, H. R. 1 provided a tax reduction of 30 percent for the first \$1,000 of taxable income and a reduction falling rapidly to 20 percent at a taxable income of about \$1,400. For taxable incomes between \$1,400 and \$136,700, the reduction was a flat 20 percent. For larger incomes, the reduction tapered off to about 10.5 percent. These reductions were applicable in full to 1948 and later years, and one-half of the full reduction was applicable to

the year 1947. Exemptions of persons over 65 years of age were increased by \$500 for 1947 and later years. It was estimated that for a full year of operation, at income payments of \$166 billion, H. R. 1 would have reduced individual income tax liabilities by \$3.8 billion.

- 2. Views of the Treasury.—In his statements before the House Ways and Means Committee on March 13, 1947, and before the Senate Finance Committee on April 22, 1947 (see exhibits 32 and 33). Secretary Snyder opposed any general tax reduction at that time. He expressed the view that favorable economic conditions, the size of the public debt, and uncertainties as to Government expenditures for the fiscal year 1948 all indicated the desirability of maintaining existing tax rates. He recommended that such surplus as was likely to be realized be applied to reduction of the public debt. The Secretary stated that a comprehensive tax revision would be desirable at a later time and recommended that the whole tax system be reviewed in anticipation of that later revision. He expressed the opinion that immediate enactment of H. R. 1 would make it more difficult to work out a desirable, comprehensive revision at the appropriate time. Secretary also opposed H. R. 1 on the grounds that it gave too little tax reduction to lower incomes relative to the reduction granted to higher incomes.
- 3. The President's veto message.—On June 16, 1947, the President returned H. R. 1 to the House of Representatives without his approval. He stated that the bill represented "the wrong kind of tax reduction, at the wrong time" (see exhibit 35). The President expressed the view that reductions in income tax rates were not required to provide additional purchasing power or to permit necessary investment and business expansion. Under existing economic conditions, the President recommended that any surplus of Government receipts over expenditures be applied to reduction of the public debt. The President also objected to H. R. 1 on the grounds that it gave disproportionate reductions in high income brackets as compared with low income brackets and thus did not give relief where it was needed most. The President recommended the immediate planning for a thoroughgoing revision of the tax system, including not only individual income tax rates but the entire field of tax revenues.

### B. H. R. 3950 (80TH CONGRESS, 1ST SESSION)

In July 1947, the Congress passed H. R. 3950, which differed from the earlier bill only in that no tax reduction was made for 1947.

On July 18, 1947, the President returned this bill without his approval. He stated that conditions still called for the maintenance of existing tax rates and reduction of the public debt and that the same objections applied to H. R. 3950 as to H. R. 1 (see exhibit 36).

## III. TREASURY SUGGESTIONS IN CONNECTION WITH A COMPREHENSIVE REVIEW OF THE FEDERAL TAX SYSTEM

On May 19, 1947, the House Ways and Means Committee began public hearings in connection with a comprehensive review of the Federal tax system, and Secretary Snyder appeared as the first witness. (Secretary Snyder's statement appears in this report as exhibit 34.) The Secretary indicated his approval of the Committee's course of action, and stated that only on the basis of such a comprehensive study would it be possible to lay a sound foundation for future tax legislation.

The Secretary made no recommendations for specific tax revision. However, he outlined the tests of a sound tax system and called attention to areas that he believed needed special study. He stated that the tax system should produce adequate revenue and should be equitable in its treatment of different groups. Taxes should interfere as little as possible with the incentives to work and invest and should help maintain broad consumer markets. Taxes should be as simple to administer and comply with as possible. The Secretary stressed the need for a flexible revenue system that would change with changing economic conditions but recommended that necessary flexibility be confined largely to changes in tax rates and exemptions and that insofar as possible a stable basic tax structure be maintained.

The Secretary commented briefly on 21 major tax items under study in the Treasury Department, which he believed merited special consideration. These included items in the fields of business taxes, individual income taxes, excises, estate and gift taxes, and social security taxes. In addition a number of technical tax problems needing attention were mentioned.

The Secretary offered the Committee the cooperation of the Treasury tax staff in the important task before it. He declared that the development of a modern tax system that would best serve the country called for the cooperation of the legislative and executive branches of the Federal Government and also for the cooperation of the States and localities.

### IV. OTHER REVENUE LEGISLATION

Public Law 558, July 27, 1946, in section 2 amended section 3508 of the Internal Revenue Code to provide that no tax should be imposed on the manufacture, use, or importation of sugar after June 30, 1948.

Public Law 572, July 31, 1946, amended sections 1500, 1501 (a), 1510, 1520, 1532 (b), 1532 (d), and 1532 (e) of the Internal Revenue Code. These amendments to the Railroad Retirement Acts increased

the tax rates, provided technical adjustments to coverage definitions, and put the basis of the tax on a "paid" rather than "earned" basis.

Public Law 575, July 31, 1946, provided in section 4 that certain claims by employees or former employees of the United States for additional overtime, leave, and holiday compensation should, if certified for payment, be paid without withholding any amount for taxes.

Public Law 578, July 31, 1946, amended sections 22 (b) (9) and (10) of the Internal Revenue Code to extend to taxable years beginning prior to January 1, 1948, the exclusion from gross income provided by these sections of income realized by a corporation through purchase of its own bonds, debentures, or other evidences of indebtedness, and also in the case of railroads, gain realized from the cancellation of indebtedness in bankruptcy proceedings. Section 2 of the act extended until December 31, 1947, the period of time within which claims could be filed for credit or refund based upon an overpayment of tax as a result of the failure to take a deduction for a war loss relating to any taxable year beginning in 1941 or 1942.

Public Law 669, August 8, 1946, provided in section 2 that for the purpose of Federal income, estate, and gift taxes, gifts and bequests accepted by the Postmaster General under the authority of the act for the benefit of the library of the Post Office Department shall be deemed gifts and bequests to or for the use of the United States.

Public Law 671, August 8, 1946, in amending the First War Powers Act of 1941 added, among other things, section 36 to the Trading With the Enemy Act of October 6, 1917. This provided for payment of Federal, State, and local taxes by the Alien Property Custodian, notwithstanding the fact that property vested in or transferred to him becomes the property of the United States. Express provision was made for the payment of retirement and survivorship benefits under title II of the Social Security Act. The time of payment was left flexible, even though the Custodian is required to pay taxes, so as not to interfere with the proper administration of vested property. Normal tax procedures were made applicable, and payment of Federal taxes was to be made in accordance with regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

Public Law 719, August 10, 1946, cited as the "Social Security Act Amendments of 1946," amended clauses (1) and (2) of sections 1400 and 1410 of the Internal Revenue Code to postpone until 1948 the increase in the rates of the taxes imposed therein. Section 1607 (c) of the Internal Revenue Code was amended to extend the definition of the term "employment" to include service on or in connection with American vessels. Section 1607 (c) (4) of the Internal Revenue

Code was amended to exclude from the term "employment" service performed on or in connection with a vessel not an American vessel by an employee, if the employee is employed on and in connection with such vessel when outside the United States. "American vessel" was defined in a new subsection (n) of section 1607 of the Internal Revenue Code. Paragraph (17) was added to section 1607 (c) of the Internal Revenue Code to exclude certain fishing services from the term "employment." Sections 1426 (a) (1) and 1607 (b) (1) of the Internal Revenue Code were amended to provide that the \$3,000 limitation therein set forth be computed without regard to the year in which the employment occurred for which remuneration was paid. Section 1401 (d) of the Internal Revenue Code was amended to conform its special refund provisions to the above amendments to sections 1426 (a) (1) and 1607 (b) (1) of the Internal Revenue Code. Sections 1603 (a) (4) and 1607 (f) of the Internal Revenue Code were amended to permit the withdrawal from the Federal unemployment trust fund, for the payment by a State of disability compensation, of any payments which that State may have collected from employees under its unemployment compensation law and deposited in the trust fund, or which it may in the future collect and deposit.

Public Law 724, August 13, 1946, the Foreign Service Act of 1946, provided in section 1021 (e) that for the purpose of Federal income, estate, and gift taxes, any gift, devise, or bequest accepted by the Secretary of State under authority of the act shall be deemed to be a gift, devise, or bequest to or for the use of the United States. A new subsection (k) was also added to section 116 of the Internal Revenue Code to provide for the exclusion from gross income, for income tax purposes, of amounts received by officers or employees of the Foreign Service as allowances or otherwise under the terms of title IX of the act.

Public Law 2, February 1, 1947, amended section 3126 (a) of the Internal Revenue Code to provide that industrial alcohol plants might produce sugars or sirups simultaneously with alcohol until May 1, 1948.

Public Law 7, February 26, 1947, was intended to facilitate the acquisition of a site in the city of New York for the headquarters of the United Nations. By amendments to sections 23 (0), 23 (q), 1004 (a) (2), 1004 (b), 812 (d), and 861 (a) (3) of the Internal Revenue Code, it provided that for the period of one year beginning December 2, 1946, and ending December 1, 1947, gifts made to the United Nations exclusively for such purpose shall be treated for Federal tax purposes as public and charitable gifts are now treated under the income, estate, and gift tax provisions of the Internal Revenue Code.

Public Law 31, April 14, 1947, provided in section 3 that the taxes

imposed by sections 3469 and 3475 of the Internal Revenue Code should not apply to amounts paid for ocean transportation for the Boy Scouts of America or their property in attending the World Jamboree of Boy Scouts in France in 1947.

Public Law 42, April 29, 1947. suspended until April 1, 1949, copper, copper-bearing ores and concentrates, and various articles containing copper (other than copper sulphate) from the import tax imposed by section 3425 of the Internal Revenue Code.

Public Law 112, June 25, 1947, amended sections 403 (d) (3) and 452 (c) of the Revenue Act of 1942 to extend through June 30, 1948. the time within which a power of appointment may be released without incurring estate or gift tax liability. Section 1000 (e) of the Internal Revenue Code was amended so as to extend the time for tax-free relinquishment by a grantor of certain powers to name new beneficiaries or to change the interests of existing beneficiaries of a trust through December 31, 1947, or a later date if it is shown to the satisfaction of the Commissioner of Internal Revenue that failure to release such powers prior to that date is for reasonable cause. 22 (b) (9) and (10) of the Internal Revenue Code were also amended to extend to taxable years beginning after December 31, 1947, and prior to January 1, 1950, the exclusion from gross income provided by those sections of income realized by a corporation through purchase of its own bonds, debentures, or other evidences of indebtedness, and also, in the case of railroads, gain realized from the cancellation of indebtedness in bankruptcy proceedings.

Public Law 113, June 25, 1947, amended section 115 (a) of the Internal Revenue Code, for taxable years beginning after December 31, 1943, to provide that the definition of dividends for purposes of personal holding companies be considered to be net income under subchapter A of Chapter 2 of the Internal Revenue Code less the net operating loss credit for the preceding taxable year provided in section 26 (c) (1), the dividend carry-over provided in section 27 (c), and the deduction for amounts for retirement of indebtedness provided in section 504 (b) of the Internal Revenue Code.

Public Law 116, June 25, 1947, amended section 4 of the Public Debt Act of 1941, as amended, to make clear that Federal securities were not subjected by that act to such taxes as Congress might enact for local areas under Federal jurisdiction. (See exhibit 22.)

Public Law 131, June 30, 1947, amended section 5 (f) of Public Law 45, April 29, 1943, as amended, and section 5 (f) of the Farm Labor Supply Appropriation Act of 1944, to extend until July 1, 1949, the period during which income from agricultural labor and nursing services may be disregarded by the States in making old-age assistance payments.

## SPECIAL PROCUREMENT ACTIVITIES

## LEND-LEASE

Under the lend-lease program, which was authorized by the "Act to Promote the Defense of the United States", approved March 11, 1941, the Bureau of Federal Supply (known as the Procurement Division prior to January 1, 1947) was one of the agencies designated and allotted funds to make purchases of specified products. (See also page 86.) After the surrender of Japan and the general termination of the lend-lease program, the several lend-lease recipients were offered the opportunity to acquire on reasonable credit payment terms the civilian type lend-lease goods on order on VJ-day. Exportation of these goods was continued during the first half of the fiscal year 1947, but was terminated thereafter in accordance with a provision of the Third Deficiency Appropriation Act of 1946, which prohibits expenditures in connection with shipments abroad of lend-lease materials after December 31, 1946.

On June 30, 1947, there remained in storage 27,500 tons of material, having an approximate value of \$14,000,000, awaiting congressional action as to whether shipments should be resumed or materials declared surplus. As of July 1, 1946, there were on hand 54,454 tons of material which had been declared surplus to the War Assets Administration, and during the year an additional 47,548 tons were so declared, making a total of 102,002 tons. Of this quantity the War Assets Administration took custody of 84,637 tons during the year leaving a balance of 17,365 tons on June 30, 1947, for disposition by the War Assets Administration.

# United Nations Relief and Rehabilitation Administration

Participation by the United States in this program was authorized by the act of March 28, 1944 (58 Stat. 122), and funds were allocated to the Bureau of Federal Supply for the procurement of materials and supplies necessary for agricultural and industrial relief and rehabilitation of countries devastated by the war. Purchases by the Bureau of Federal Supply under this program, including accessorial charges and other costs, have approximated \$486,000,000. (See also page 88.)

## RENEGOTIATION OF CONTRACTS

As provided for in the Renegotiation Act, as amended, the Price Adjustment Board of the Treasury Department, located in the Bureau of Federal Supply, renegotiated with 324 contractors holding contracts for materials used in the war and recovered from them gross excessive profits in the sum of \$11,399,683 during the fiscal year 1947. Between 1943, when this work was started in the Treasury Depart-

ment, and the end of the fiscal year 1947, there were 1,387 contractors assigned by the War Contracts Price Adjustment Board to the Treasury Price Adjustment Board for the renegotiation of their contracts. The contracts of 1,384 contractors were renegotiated with a gross recovery of \$49,339,692 to the Government. With the exception of one contract involving 3 contractors, the actual renegotiation of cases assigned to the Treasury Board was completed on June 30, 1947.

## CONTRACTS TERMINATED

At the request of the Department of State, lend-lease contract terminations were effected during fiscal year 1947 in accordance with the Contract Settlement Act of 1944, as follows:

Type of action	Number	Contract price of items canceled
Contracts terminated. Contracts settled without cost. Claims filed. Claims settled.	887 638 94 394	\$52, 874, 000 42, 635, 000 12, 858, 000 48, 987, 000

During the year gross payments to contractors amounted to \$8,587,000. As of June 30, 1947, 2 contract terminations with a value of \$214,000 were awaiting claims and 6 claims involving \$2,384,-000 awaited settlement.

## STRATEGIC AND CRITICAL MATERIALS

The Strategic and Critical Materials Stock Piling Act (Public Law 520, approved July 23, 1946) completely revised the act of June 7, 1939, as amended, and authorized the purchase by the Bureau of Federal Supply of strategic and critical materials essential to the needs of industry for the manufacture of supplies for the armed forces and industry in time of emergency, and to encourage further development of such materials within the United States. Materials to be purchased and stockpiled are selected by the Army and Navy Munitions Board.

Funds obligated for the purchase of strategic and critical materials prior to the beginning of the fiscal year 1947 amounted to \$54,983,152, and during the fiscal year additional obligations amounted to \$68.-888,533, making a total of \$123,871,685.

#### ESTIMATES OF RECEIPTS

The Secretary of the Treasury is required each year to prepare and submit in his annual report to the Congress estimates of the public revenue for the current fiscal year and for the fiscal year next ensuing (Public No. 129, February 26, 1907). The estimates of receipts from taxes and customs are now made by the Treasury Department in December of each year on the basis of legislation existing at the time of making the estimates. The estimates of miscellaneous receipts, including receipts from proposed legislation, are prepared in general by the agency depositing the receipts in the Treasury.

The details of estimated and actual receipts are shown in table 114 beginning on page 524. Throughout the tables shown in this exposition

the figures are rounded and will not necessarily add to totals.

# TOTAL AND NET RECEIPTS

Net budget receipts under existing legislation (daily Treasury statement basis) are estimated in the amounts of \$45,210.4 million in the fiscal year 1948 and \$44,476.9 million in the fiscal year 1949. The estimate for 1948 represents an increase of \$1,951.6 million over actual receipts for 1947. A decrease of \$733.5 million, occasioned by a large decrease in receipts from nontax sources, is estimated for 1949 as compared with 1948.

Total budget receipts are estimated to amount to \$46,837.4 million in 1948, an increase of \$2,119.1 million over actual receipts in 1947, and \$46,148.9 million in 1949, a decrease of \$688.5 million from 1948.

Percentage distributions, by sources, of estimated total receipts in 1948 and 1949 and actual receipts in 1946 and 1947 are shown in the following table.

Percentage distributions of total budget receipts, by sources

Source	Actual, 1946	Actual, 1947	Estimated, 1948	Estimated, 1949
Individual income tax Corporation income and excess profits taxes Miscellaneous internal revenue Employment taxes 1 Customs Miscellaneous receipts	41. 4 28. 4 17. 4 3. 9 1. 0 7. 9	43. 9 21. 6 18. 0 4. 6 1. 1 10. 8	47. 0 20. 4 17. 4 5. 1 . 8 9. 3	48. 8 22. 0 18. 0 5. 4 . 8 5. 0
Total budget receipts	100.0	100.0	100. 0	100.0

<sup>&</sup>lt;sup>1</sup> Includes railroad unemployment insurance contributions.

The individual income tax continues as the leading source of revenue and is estimated to account for about 50 percent of total receipts in the fiscal year 1949. Estimated receipts in 1948 and 1949 represent the largest absolute amounts ever collected from this source. Corporation income and excess profits taxes maintain their position as the second most important revenue source and increase slightly on both absolute and percentage bases in 1949, after having declined on both bases in 1947 and 1948. Miscellaneous internal revenue increases in absolute amount in both fiscal years and on a percentage basis in 1949, but declines slightly in 1948 on a percentage basis. Re-

ceipts from employment taxes increase on both absolute and percentage bases. Receipts from customs and miscellaneous receipts decline in absolute amount and percentagewise. The decline in miscellaneous receipts reflecting nonrecurring revenue in the earlier years represents the only significant decrease estimated for any major receipts source.

## FISCAL YEAR 1948

Actual receipts in the fiscal year 1947 and estimated receipts in 1948 are compared by major sources in the following table.

Total and net budget receipts, by sources

[In minions of donars]						
Source	Actual, 1947	Estimated, 1948	Increase or decrease (-), 1948 over 1947			
Individual income tax. Corporation income and excess profits taxes. Miscellaneous internal revenue. Employment taxes <sup>1</sup> Customs. Miscellaneous receipts.	19, 628. 8 9, 676. 8 8, 049. 5 2, 038. 5 494. 1 4, 830. 7	21, 951. 0 9, 548. 0 8, 162. 0 2, 409. 5 394. 0 4, 372. 9	2, 322. 2 -128. 8 112. 5 371. 0 -100. 1 -457. 8			
Total budget receipts  Deduct: Appropriation to Federal old-age and survivors insurance trust fund	44, 718. 3 1, 459. 5	46, 837. 4 1, 627. 0	2,119.1 167.5			
Net budget receipts	43, 258. 8	45, 210. 4	1, 951. 6			

<sup>&</sup>lt;sup>1</sup> Includes railroad unemployment insurance contributions.

Net budget receipts in the fiscal year 1948 are estimated to amount to \$45,210.4 million, an increase of \$1,951.6 million over actual receipts in the preceding year. Three revenue sources increased and three decreased, but the large increase in the most important revenue source, the individual income tax, accounts for the net over-all increase.

Individual income taxes.—The details of the yield of the individual income tax are shown in the following table.

Source	Actual, 1947	Estimated, 1948	Increase, 1948 over 1947
	In millions of dollars		
Withheld Not withheld Back taxes	10, 013. 1 9, 064. 7 551. 0	11, 327. 0 9, 997. 0 627. 0	1, 313. 9 932. 3 76. 0
Total individual income tax	19, 628. 8	21, 951. 0	2, 322. 2

The same individual income tax rates affect the fiscal years 1947 and 1948; therefore the changes in receipts are the result of changes in income levels. Individual income taxes withheld increase in 1948 as a result of higher salaries and wages subject to withholding. The increase in income taxes other than withheld in 1948 reflects the greater tax liabilities resulting from the larger incomes. Back tax

collections are a function of the liabilities of previous years and are estimated to increase, reflecting the increasingly large individual income tax liabilities of the past several years.

Corporation income and excess profits taxes.—The details of the taxes from this source appear in the table below.

Source	Actual,	Estimated,	Decrease, 1948
	1947	1948	over 1947
	In	lars	
Income tax and excess profits tax Declared value excess profits tax Back taxes	8, 518. 2	8, 442. 0	76. 2
	36. 7	2. 0	34. 7
	1, 121. 9	1, 104. 0	17. 9
Total corporation income and excess profits taxes	9, 676. 8	9, 548. 0	128.8

Corporation income and excess profits tax receipts in the fiscal year 1947 reflect incomes and tax provisions of the calendar years 1945 and 1946 while receipts in the fiscal year 1948 reflect incomes and tax provisions of the calendar years 1946 and 1947. The repeal of the excess profits tax and the reduction in surtax rates under the Revenue Act of 1945 were nearly offset by the rising trend of corporate income during the calendar years 1945, 1946, and 1947. The relatively small declared value excess profits tax was repealed by the Revenue Act of 1945 and receipts from this source virtually ceased after the end of the fiscal year 1947. It is estimated that receipts from back taxes will show only a small decline and that total receipts from direct taxes on corporations will be only slightly lower in the fiscal year 1948 than in the fiscal year 1947.

Miscellaneous internal revenue.—Receipts from this source by major groups are listed in the following table.

Source	Actual, 1947	Estimated, 1948	Increase or decrease (—), 1948 over 1947
	In millions of dollars		
Estate and gift taxes. Liquor taxes. Tobacco taxes. Stamp taxes. Manufacturers' excise taxes. Retailers' excise taxes. Miscellaneous taxes. Adjustment to daily Treasury statement basis.	779. 3 2, 474. 6 1, 237. 8 80. 0 1, 425. 2 514. 2 1, 552. 8 -14. 4	842. 0 2, 276. 0 1, 302. 0 69. 0 1, 621. 0 453. 0 1, 599. 0	62. 7 -198. 6 64. 2 11. 0 195. 8 61. 2 46. 2 14. 4
Total miscellaneous internal revenue	8, 049. 5	8, 162. 0	112. 5

The small increase estimated for miscellaneous internal revenue represents the net effect of offsetting changes in the several tax groups. Liquor tax receipts are expected to decline from the exceptionally high collections of the fiscal year 1947, which reflected substantial inventory accumulation. Declines are also estimated in collections of stamp taxes, principally because of an expected decrease in activity in new

securities, and in retailers' excise taxes as a result of the decreased coverage of the tax on furs effective April 1, 1947, and also because of a general falling off in sales of commodities taxable under the retailers' excise taxes as more durable goods become available to consumers. The total decrease estimated for these three groups is more than offset by the increases estimated in collections of estate and gift taxes, in manufacturers' excise taxes as consumers' durable goods increase in supply, and in tobacco taxes and miscellaneous taxes, reflecting better supply and increased income levels.

Employment taxes.—The yields of the various employment taxes are shown below.

	Source		Actual, 1947	Estimated, 1948	Increase, 1948 over 1947
			Ir	millions of do	llars
Federal Unemployn Railroad Retiremen	nent Tax Act it Tax Act	tributions 1	184. 8 380. 1	1,627.0 211.0 557.0 14.5	167. 5 26. 2 176. 9
Deduct: Appropria		age and survivors ins	2, 038. 5 1r- 1, 459. 5	2, 409. 5 1, 627. 0	371. 0 167. 5
Net employm	ent taxes	· 	579.1	782. 5	203. 4

<sup>&</sup>lt;sup>1</sup> Not classified as an employment tax under the Internal Revenue Code.

The estimated increase in receipts in the fiscal year 1948 over 1947 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 3½ percent to 5¾ percent each on the carriers and on their employees beginning on January 1, 1947, was reflected in receipts under this act beginning with the last quarter of the fiscal year 1947. By provision of Public Law 379, approved August 6, 1947, the rates of tax under the Federal Insurance Contributions Act remain at 1 percent each on the employer and employee during the period reflected in the receipts.

Customs.—Customs receipts are estimated to be \$394.0 million in the fiscal year 1948 or \$100.1 million less than in 1947. This decrease is primarily a consequence of rate changes.

Miscellaneous receipts.—The decrease in miscellaneous receipts is estimated for the fiscal year 1948 because certain of the fiscal year 1947 receipts from this source were nonrecurring.

## FISCAL YEAR 1949

Estimated receipts in the fiscal years 1948 and 1949 under existing legislation are compared by major sources in the following table.

764788—48——6

# Total and net budget receipts, by sources

[In millions of dollars]

0	Estimated	Increase or decrease (-),	
Source	1948	1949	1949 over 1948
Individual income tax Corporation income and excess profits taxes. Miscellaneous internal revenue. Employment taxes <sup>1</sup> Customs. Miscellaneous receipts.	21, 951, 0 9, 548, 0 8, 162, 0 2, 400, 5 394, 0 4, 372, 9	22, 506. 0 10, 158. 0 8, 292. 0 2, 403. 0 378. 0 2, 321. 9	555. 0 610. 0 130. 0 83. 5 -16. 0 -2, 051. 0
Total budget receipts.  Deduct: Appropriation to Federal old-age and survivors insurance trust fund	46, 837. 4 1, 627. 0	46, 148. 9 1, 672: 0	-688. 5 45. 0
Net budget receipts	45, 210. 4	44, 476. 9	<b>—733.</b> 5

<sup>&</sup>lt;sup>1</sup> Includes railroad unemployment insurance contributions.

Net budget receipts in the fiscal year 1949 are estimated to amount to \$44,476.9 million, a decrease of \$733.5 million from estimated receipts in 1948. All of the tax sources show increases with the exception of customs which is expected to show a slight decrease, but this increase in receipts from tax sources is offset by the substantial decline in miscellaneous receipts which, for the most part, comprise receipts from nontax sources.

Individual income tax.—The details of the yield of the individual income tax are shown in the following table.

	Estimated receipts		Increase,
Source	1948	1949	1949 over 1948
	In millions of dollars		
Withheld Not withheld Back taxes	11, 327. 0 9, 997. 0 627. 0	11, 757. 0 10, 071. 0 678. 0	430. 0 74. 0 51. 0
Total individual income tax	21, 951. 0	22, 506. 0	555. 0

Individual income tax receipts from withholding are estimated to increase slightly in the fiscal year 1949. This increase results from an estimated increase in salaries and wages subject to withholding. Beginning in the calendar year 1949 military pay will be fully taxable and will be subject to withholding. In addition, other salaries and wages are estimated to increase in the fiscal year 1949. Income tax receipts other than withheld increase slightly, reflecting increased liabilities other than those paid through withholding. Back tax collections are estimated to continue to increase as a result of the continuing high level of individual income tax liabilities.

Corporation income and excess profits taxes.—The details of the receipts from this source appear in the following table.

· _	Estimated receipts		Increase or		
	Source	1948	1949	decrease (-), 1949 over 1948	
		In millions of dollars			
Income tax and ex Declared value ex-		8, 442. 0 2. 0	8, 902. 0	460.0	
Back taxes	200 200 000 000 000 000 000 000 000 000	1, 104. Ŏ	1, 256. 0	152.0	
Total corpor	ation income and excess profits taxes	9, 548. 0	10, 158. 0	610.0	

The combined income level for the calendar years 1947 and 1948 is estimated to be greater than the combined income level for the calendar years 1946 and 1947 and the receipts from income and excess profits taxes are estimated accordingly to be greater in the fiscal year 1949 than in the fiscal year 1948. Receipts from the declared value excess profits tax, which was repealed by the Revenue Act of 1945, are negligible in both years. Receipts from back taxes, which are estimated to be slightly greater in the fiscal year 1949 than in the fiscal year 1948, reflect primarily the rising trend of incomes during the calendar years 1945, 1946, and 1947.

Miscellaneous internal revenue.—Receipts from the major groups of taxes included in this source are listed in the following table.

		Estimated	receipts		
Source	;	1948	1949	decrease (-), 1949 over 1948	
		In 1	ollars		
Estate and gift taxes Liquor taxes. Tobacco taxes. Stamp taxes Manufacturers' excise taxes Retailers' excise taxes Miscellaneous taxes.		842.0 2, 276.0 1, 302.0 69.0 1, 621.0 453.0 1, 599.0	816. 0 2, 394. 0 1, 322. 0 59. 0 1, 648. 0 436. 0 1, 617. 0	-26.0 118.0 20.0 -10.0 27.0 -17.0 18.0	
Total miscellaneous internal revenue	:l	8, 162. 0	8, 292. 0	130.0	

Total miscellaneous internal revenue in the fiscal year 1949 is not expected to differ appreciably from estimated collections in 1948 as income levels are estimated to be approximately the same in both years.

Employment taxes.—The yields of the various employment taxes under existing legislation are shown below.

	Estimated	receipts	Increase.	
Source	1948	1949	1949 over 1948	
	In n	illions of d	ollars	
Federal Insurance Contributions Act. Federal Unemployment Tax Act. Railroad Retirement Tax Act. Railroad unemployment insurance contributions 1.	1,627.0 211.0 557.0 14.5	1, 672. 0 224. 0 582. 0 15. 0	45. 0 13. 0 25. 0 . 5	
Total employment taxes.  Deduct: Appropriation to Federal old-age and survivors insurance trust fund	2, 409. 5 1, 627. 0	2, 493. 0 1, 672. 0	83. 5 . 45. 0	
Net employment taxes	782, 5	821.0	38. 5	

<sup>1</sup> Not classified as an employment tax under the Internal Revenue Code.

The estimated increase in receipts in the fiscal year 1949 over 1948 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 5¾ percent to 6 percent each on the carriers and on their employees beginning on January 1, 1949, will be reflected in receipts beginning with the last quarter of the fiscal year 1949. For the time interval reflected in these receipts there is no change in the rate of contributions under the Federal Insurance Contributions Act.

Customs.—Customs receipts are estimated to be \$378.0 million in the fiscal year 1949 or \$16.0 million less than in 1948. The rate concessions made by the United States under the Geneva Agreement signed on October 30, 1947, will be applicable during the last half of the fiscal year 1948 and during the entire fiscal year 1949. It is expected that the resulting decrease in receipts will more than offset the small increase in volume of imports anticipated for the fiscal year 1949.

Miscellaneous receipts.—The decreasing income from this source progressively continues to reflect the nonrecurrence of certain items of income collected in earlier years.

## ESTIMATES OF EXPENDITURES

Actual expenditures for the fiscal year 1947 and estimates for the fiscal years 1948 and 1949 are summarized in the following table. Further details will be found in table 114. The estimates are based upon figures submitted to the Congress in the Budget for 1949.

Actual budget expenditures for the fiscal year 1947 and estimated expenditures for 1948 and 1949

<sup>&</sup>lt;sup>1</sup> These figures are taken from the 1949 Budget Document. They are based upon the Treasury's Combined Statement of Receipts, Expenditures, and Balances, and therefore differ from figures published in the daily Treasury statement.

# ADMINISTRATIVE REPORTS

٠.

Digitized for FRASER

#### BUREAU OF THE COMPTROLLER OF THE CURRENCY 1

The Bureau of the Comptroller of the Currency is responsible for the execution of laws relating to the supervision of national banking associations. Duties of the office include those incident to the formation and chartering of new national banking associations, the establishment of branch banks, the consolidation of banks, the conversion of State banks into national banks, the issuance and retirement of preferred stock, and the issuance of Federal Reserve notes.

## CHANGES IN THE CONDITION OF ACTIVE NATIONAL BANKS

The total assets of the 5,018 active national banks in the United States and possessions on June 30, 1947, amounted to \$83,413 million, a decrease of \$2,580 million since June 29, 1946. The deposits of the banks in 1947 totaled \$77,397 million, which was \$3,098 million less than in 1946. The loans and securities totaled \$63,189 million, a decrease of \$3,327 million during the year. Capital funds of \$5,309 million were \$435 million more than in the preceding year.

The assets and liabilities of the active national banks are shown in the following statement.

Abstract of reports of condition of active national banks on the date of each report from June 29, 1946, to June 30, 1947

## SUMMARY OF CHANGES IN NUMBER AND CAPITAL STOCK OF NATIONAL BANKS

The authorized capital stock of the 5,021 national banks in existence on June 30, 1947 (including 3 banks chartered during the period but not open for business as of that date) consisted of common stock aggregating approximately \$1,743 million, an increase during the year of over \$112 million; and preferred stock aggregating \$29 million, a decrease during the year of over \$27 million. The total net increase of capital was more than \$85 million. During the year, charters were issued to 32 national banks having an aggregate capital of over \$9 million of common stock only. There was a net decrease of 6 in the number of national banks in the system during the year by reason of voluntary liquidations and statutory consolidations.

More detailed information regarding the changes in the number and capital stock of national banks during the year is given in the following table.

Organization, capital stock changes, and liquidations of national banks, fiscal year 1947

	Number of	Capital stock	
	banks	Common	Preferred
Increases: Charters issued. Capital stock: 132 cases by statutory sale. 153 cases by statutory stock dividend. 102 cases by stock dividend under articles of association. 10 cases by conversion of preferred stock. 13 cases by statutory consolidation.		\$9, 250, 000 2 13, 268, 600 19, 890, 647 7, 479, 690 7, 051, 435 60, 359, 710

<sup>1</sup> This figure differs from that shown in the preceding table. Banks that have discontinued business although not in formal liquidation do not submit reports of condition but are included in this table. Included also are 3 banks chartered during the period that had not opened for business as of June 30, 1947.

## CONTRACT SETTLEMENT

The functions of the Office of Contract Settlement were transferred to the Treasury Department during the fiscal year 1947. That Office was established to prescribe policies, principles, and procedures to govern the settlement of war contracts canceled for the convenience of the Government under the Contract Settlement Act of 1944 (58 Stat. 651; 41 U. S. C. 104), approved July 1, 1944. The Appeal Board and the Contract Settlement Advisory Board also were established by authority of this act. Shortly thereafter, by authority of the act of October 3, 1944 (58 Stat. 785; 50 U. S. C. 1651), the Office was placed within the Office of War Mobilization and Reconversion. On December 12, 1946, Executive Order 9809 (exhibit 38) transferred to the Treasury Department: (a) The functions of the Office of Contract Settlement, (b) the Appeal Board, and (c) the Contract Settlement Advisory Board; and transferred to the Secretary of the Treasury the functions of the Director of Contract Settlement and the functions of the Director of War Mobilization and Reconversion with respect to the Office of Contract Settlement. Subsequently, the functions of the Director of Contract Settlement and the Office of Contract Settlement were transferred to the Secretary of the Treasury and the Office of Contract Settlement was abolished by Reorganization Plan No. I of 1947, effective as of July 1, 1947 (exhibit 39).

The Office of Contract Settlement provided by general regulation uniform

The Office of Contract Settlement provided by general regulation uniform policies and procedures for the settlement of war contracts by the contracting agencies. As required by the act, quarterly reports on the program are prepared and submitted to the Congress. Of the 321,605 contracts canceled since the beginning of war production, 99.6 percent have been settled as of June 30, 1947. The settled terminations involved 97.4 percent of the \$66 billion of canceled commitments in all terminated contracts. The small number of terminations remaining unsettled include some of the largest and most complex. The status of the contract settlement program as of June 30, 1947, is set forth in table 109.—

#### APPEAL BOARD

The Appeal Board now represents the principal contract settlement activity. The Board hears appeals from findings of contracting agencies upon claims under terminated war contracts or under imperfect war contracts where no formal contract exists. The appeals filed are about equally divided between claims under

terminated contracts and claims under imperfect contracts.

The most significant development in connection with the Appeal Board has sen the sustained increase in the number of appeals filed. Even toward the been the sustained increase in the number of appeals filed. end of the year cases were coming in at the rate of approximately 3 a week. At the beginning of the fiscal year only 76 cases had been filed. Of these, 41 were then undisposed of. During the year 150 more cases were filed and 75 cases were disposed of, leaving 116 cases pending on June 30, 1947. Of the cases disposed of during the year, 51 were disposed of by decision on the merits.

In all, 80 hearings were held. Of these, 33 were held in Washington and 47 in Philadelphia, New York, Pittsburgh, Indianapolis, Louisville, Chicago, Phoenix, Lou Appeles and Sep. Preprises.

Los Angeles, and San Francisco.

The average amount claimed in the 150 appeals filed during the year was \$93,135.70. The average of the awards in the 51 cases which were disposed of Many of the appeals by decision on the merits during the year was \$10,372.93. upon which these 51 awards were made were filed in preceding fiscal years. average amount claimed in the 51 appeals so disposed of was \$60,935.97.

## BUREAU OF CUSTOMS

The principal functions of the Bureau of Customs are to enter and clear vessels; supervise the discharge of cargo; ascertain the quantities of imported merchandise, appraise and classify such merchandise, and assess and collect the duties thereon; control the customs warehousing of imports; patrol borders; inspect international traffic by vessel, highway, railway, and air; review protests against the payment of duties; determine and certify for payment the amount of drawback due upon the exportation of articles produced from duty-paid or taxpaid imports; prevent smuggling, undervaluations, and frauds on the customs revenue; apprehend violators of the customs laws; enforce the Antidumping Act; and perform certain duties under the Foreign Trade Zones Act.

## TOTAL REVENUE COLLECTIONS

The total revenue collected by Customs in the fiscal year 1947 was \$623,234,450, an increase of 6 percent, as compared with \$588,034,507 in 1946. These totals include items collected for the account of others, such as certain internal revenue taxes for the Bureau of Internal Revenue and head taxes for the Immigration Service. Therefore, the true measure of customs revenue must be confined to collections from duties, fines, penalties, forfeitures, etc., which totaled \$497,-

533,914.

On a comparable basis, the collections for 1947 showed an increase of 12.9 percent over the preceding year and were also greater than any other year since the passage of the Tariff Act of June 17, 1930. The upward trend in collections which prevailed throughout most of the fiscal year 1945 and all of 1946 continued during the first seven months of the fiscal year 1947, when, in January, a monthly peak of \$47,586,267 was reached. Thereafter, the monthly collections were in reduced amounts until the low point of \$35,181,207 was reached in June. The types of collections during the last two years are shown in table 15.

The bulk of customs collections is represented by duties voluntarily paid by Therefore, the increased collections which began in 1945 and conimporters. tinued through January 1947 indicate the arrival of goods which had long been absent from the market because of war conditions.

The significant changes in the types of imports which appreciably affected

revenues are as follows:

Sugar.—This basic food was imported during the war by the Commodity Credit Corporation, and, under the provisions of Executive Order 9177, no duties were paid. However, this procedure was discontinued as of January 1, 1947, and commercial importations were resumed and immediately provided substantial duties.

Unmanufactured wool.—Duties from this commodity totaled \$121,105,594 which was the highest amount ever collected except for the \$150,145,069 received in 1946.

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis Wood and lumber.—Duties from these products were adversely affected, as a result of Presidential Proclamation 2708, effective October 25, 1946, which permitted the free importation of wood and lumber as a means of aiding in the reconversion program.

Miscellaneous articles.—Substantial percentage increases in duties were attributable to such miscellaneous articles as glassware, cordage, musical instruments, and linen table damask. In addition thereto were vegetable oils, aluminum, and lead, which had been admitted duty free during the war for stock-pile purposes.

The significant changes noted in the origin of imports are as follows:

Europe.—Although the prewar levels were not reached in 1947, the revenue from European imports was larger than that from any other major geographical area. Revenue from Spanish and Portuguese goods, however, continued in 1947 the decline from the wartime peaks in 1946, when many other European countries were unable to reach the American market. Moreover, in 1947, Switzerland limited the export of watch movements, which affected customs receipts, and the large imports of hops from Germany in 1946 were substantially reduced in 1947.

Revenue on imports from all the other European countries was substantially greater than in 1946. United Kingdom displaced Switzerland as the leading European source of customs revenue; while France, Italy, Belgium, and Czechoslovakia followed Switzerland in the order named. Imports from the Scandinavian and Balkan countries, although greater than a year ago, remained of little importance as a source of revenue.

North America (Canada, Mexico, Cuba).—The importation of Cuban sugar by commercial sources, subsequent to January 1, 1947 (previously noted), more than offset the decrease in revenue from Canadian, Mexican, and other North

American countries.

South America.—Reduced revenues were occasioned principally by smaller

importations of wool from Argentina and Uruguay.

Australia and New Zealand.—Importations of wool provided the greatest single source of customs revenue from this area, and Australia and New Zealand wool was practically the same in quantity as in 1946.

Africa.—Duties on African imports were approximately the same as in 1946. The Orient (China, India).—Although customs receipts from goods originating in the Orient showed an increase in 1947, they were far below prewar levels.

Statistics on the value of commodities included in the tariff schedules, on estimated duties and import taxes, and on the value of and duties on merchandise

from foreign countries are shown in tables 92 through 96.

Within the United States, the largest amount of revenue continued to be collected in the New York District, which accounted for approximately 40 percent of the total. The Massachusetts District was second with approximately 20 percent of the total, with wool imports constituting the backbone of receipts. Next came the Philadelphia District, which accounted for nearly 5 percent of collections, with sugar importations contributing substantially to the total receipts. This commodity also accounted for increased revenue in other Atlantic and Gulf Coast districts. Collections along the Mexican and Canadian borders showed decreases compared with 1946, but the Pacific Coast more than made up these losses. Customs collections by districts are shown in table 91.

MOVEMENT OF PERSONS BY VESSELS, TRAINS, AIRPLANES, AND AUTOMOTIVE VEHICLES

For the sixth consecutive year, automotive vehicles crossing the Canadian and Mexican borders showed an increase. There was a decline in the number of passengers arriving by train. Slight declines were also noted in the number of incoming passengers on aircraft and seagoing vessels in 1947 compared with 1946. Although international travel by aircraft and vessel increased in 1947, the totals do not offset the large numbers of service personnel who cleared customs in 1946. Tables 98 and 99 show the volume of traffic into the United States in 1946 and 1947.

## DRAWBACK TRANSACTIONS

Drawback of 99 percent of customs duties previously paid is allowed on the export of merchandise manufactured from imported materials. Drawback allowed in 1947 amounted to \$10,715,495, an increase of 55 percent over 1946, and the most important items used in manufacturing the exported products

were sugar, wool, coal tar products, crude petroleum, unmanufactured tobacco, and copper. Tables 100 and 101 show the drawback transactions in 1946 and 1947 and the principal commodities on which drawback was paid.

#### PROTESTS AND APPEALS

Despite the increased tempo of imports during the better part of the fiscal year 1947 the number of protests filed by importers against the rate or amount of duty assessed or other action by the collector remained virtually the same as in 1946. However, there was a 53 percent increase noted in the appeals for reappraisement filed by importers who did not agree with the findings of the appraiser as to the valuation of merchandise. The following table shows the number of protests and appeals filed and acted on in 1946 and 1947.

## Number of protests and appeals, fiscal years 1946 and 1947

Status	1946	1947	Percentage increase or decrease
Protests:  Filed with collectors by importers.  Allowed by collectors.  Denied by collectors and forwarded to customs court.  Appeals for reappraisement filed with collectors.	7, 142	6, 960	-2. 5
	927	497	-46. 4
	5, 926	6, 663	12. 4
	3, 330	5, 091	52. 9

#### APPRAISEMENT OF MERCHANDISE

The large volume of merchandise imported during the first part of the fiscal year reached its peak in November and December 1946, as a prelude to the Christmas season. The normal procedure for sampling such merchandise is to take one package in ten to the appraiser's stores for examination by the appraiser. However, the usual complement of personnel assigned to the appraiser, particularly in New York, was unable to handle expeditiously such merchandise. Furthermore, the truck strike in New York, during a portion of that time, added to the congestion of merchandise on piers and other places. During this emergency, fewer packages were examined than usual and this administrative procedure enabled importers to secure their merchandise without unreasonable delay.

Importations of merchandise via mail resumed their prewar characteristics and consisted principally of commercial transactions in contrast to 1946 when military personnel overseas shipped packages which were generally free of duty under the \$50 exemption permitted by Public Law 790, approved December 5, 1942.

#### CUSTOMS INFORMATION EXCHANGE

The Customs Information Exchange, located in New York, N. Y., is a central clearing house for information with respect to the classification and valuation of merchandise by the Customs appraisers. The reports received and records maintained are designed to provide for uniformity of decision among the various appraisers throughout the Customs Service. The work of the Customs Information Exchange showed a substantial increase over that of 1946, as shown in the following table.

Activity	1946	1947	Percent increase
Appraisers' reports of value or classification received Differences in classification reported Differences in value reported. Requests for foreign investigations.	Number 23, 029 1, 660 2, 909 415	Number 29, 320 3, 153 3, 763 476	27. 3 89. 9 29. 4 14. 7

## LABORATORIES

Nine Customs laboratories are maintained in the United States, and their purpose is to test representative samples of sugar, wool, metals, and other merchandise to aid in determining the correct assessment of duties. During the fiscal year 1947 there were 60,601 samples of merchandise tested, which was a 24 percent increase over the preceding year.

In addition to the regular assignment, certain laboratory work was undertaken for the Bureau of Federal Supply to test materials purchased for the Government

stock pile.

#### LAW ENFORCEMENT ACTIVITIES

The law enforcement activities of Customs consist primarily of seizure of merchandise which has been fraudulently declared or illegally brought into this country. These seizures also include, in general, the vessel, automobile, trunk, suitcase, or other means of transporting the contraband. Although the number of seizures in 1947 was slightly lower than the preceding year, the value of the articles seized was approximately \$7,000,000 compared with \$4,000,000 in 1946. Such articles as cameras, furs, jewelry, and wearing apparel, which showed significant increases in the value of seizures, are but a further reflection of the increased travel in 1947. Tables 102 and 103 show the number and value of the principal types of seizures.

Collections from fines, penalties, and forfeitures in 1947 were approximately \$951,686, which was an increase of \$103,666 over the amount collected in 1946.

#### INVESTIGATIVE AND PATROL ACTIVITIES

The Customs Agency Service is the investigative arm of the Customs Service and its principal functions are to detect commercial smuggling, as well as the deliberate fraud of importers in such practices as false or erroneous invoicing, and undervaluation of merchandise. Although these violations were fewer than in 1946, there were, nevertheless, many important recoveries. As an example, a broker acting for a large manufacturer falsely valued certain essential oils, and, in another case, molasses, imported to use as cattle feed, was sold in the United States for human consumption.

Another enforcement feature of the Customs Service involved the assignment of inspection officers at piers, railroad terminals, airports, and highways to secure declarations and inspect the baggage and vehicles of travelers, and also to examine merchandise brought in by common carriers. Violations involving baggage

declarations continued to be the most numerous cause of investigation.

The third enforcement activity of Customs was the patrol activities at seaports and also along the Mexican and Canadian borders. The port patrol officers (at seaports) were engaged primarily in searching incoming ships and crew members for contraband, particularly narcotics. Increased trade with the Near East and the Orient resulted in a substantial increase in narcotic seizures at seaports during 1947. Along the Mexican border the principal duty of patrol officers is to seize smuggled merchandise. The majority of such seizures involve narcotics and, in fact, the largest narcotics seizure in 1947 was at Calexico, Calif., which involved 677 ounces of smoking opium. Attempts to smuggle narcotics along the Mexican border resulted in 508 seizures in 1947 compared with 398 in the previous year.

The Canadian border patrol had the same organization structure as the Mexican border patrol. However, the type of work was essentially different inasmuch as the smuggling of narcotics along the Canadian border is not extensive enough to present any serious threat to this country. Therefore, as an economy measure, the Canadian border patrol was abolished as of June 28, 1947, and all permanent personnel who desired to continue in the Customs Service were reassigned.

The Customs Service also enforces laws other than its own, such as the export control licenses for the Department of Commerce; and the Customs personnel in the course of their regular duties made 9,172 seizures for the Department of Agriculture and apprehended 666 persons for the Immigration and Naturalization Service. Table 104 summarizes the investigative and patrol activities during the

last two years.

#### Foreign Trade Zones

Foreign Trade Zone No. 1, in New York, discontinued operations at four North River Piers, used on a temporary basis during the war, and now occupies two piers (Stapleton, Staten Island). During 1947 Zone No. 1 enjoyed increased and diversified activity but the revenue collected on merchandise entering Customs territory from the zone, while substantially the same as a year ago, was much less than in the two preceding years when large amounts of distilled liquors were processed or stored in the zone prior to importation into Customs territory.

Foreign Trade Zone No. 2, in New Orleans, was authorized in July 1946 but

did not commence operations until May 1, 1947, because of scarcity of fencing

materials necessary to segregate the zone.

## LEGAL PROBLEMS AND PROCEEDINGS

Certain questions involving the payment of overtime, Sunday, and holiday services to Customs employees, under an act of 1911, were not resolved by the Supreme Court decision of *United States* v. *Howard C. Myers* (320 U. S. 561; 321 U. S. 750). Therefore, legislation was submitted to the Eightieth Congress (first session), to clarify the applicable law, but no action was taken by either House.

The Customs Service has had trouble in recent years in ascertaining the value

of foreign currencies of many lands where dual or multiple exchange rates are involved. This situation has resulted in the suspension of appraisements and liquidations of entries in the field with the result that in the Port of New York alone there is a backlog of some fifty thousand cases. Administrative action to clarify this matter a few years ago resulted in a test case, Barr v. United States (1945) (324 U. S. 83), which was decided against Customs. Therefore, legislation was submitted to the Eightieth Congress (first session) seeking an amendment to section 522 of the Tariff Act of 1930, which would grant authority to the Secretary of the Treasury to determine, for duty-assessment purposes, the value of foreign currency where dual or multiple exchange rates are involved. This legislation

passed the House but was not finally acted upon by the Senate.

This was the first year of operation of the Federal Tort Claims Act of 1946, which changed the concept that the Federal Government is not liable for the negligent or tortious acts of its officers and employees, while acting within the scope of their employment. In effect, this act makes the Government liable in the same manner as a private individual under the same circumstances. number of claims received was 12, involving \$2,643.90, and disposition was made

of 3, with payments totaling \$91.50.

#### MISCELLANEOUS

Division of Training.—The Division of Training, which had been at a low ebb

during the war years, was abolished in 1947.

Changes in ports and stations.—The station at Caswell, Maine, was discontinued.

There was a station established at Daaquan, Quebec. No changes were made in

any of the Customs ports of entry.

Cost of administration.—During the fiscal year 1947, Customs incurred expenses of \$33,328,255 for collecting the revenue and for printing. This figure does not include salaries paid to Customs personnel for overtime, and other services authorized by law, for which reimbursement is made to the appropriation by the parties in interest.

The expenses for 1947 exceeded those for 1946 by \$3,636,412, the bulk of which was attributable to salary increases authorized by the Pay Act of 1946. The cost of collecting \$100 of revenue was \$5.35 compared with \$5.05 in 1946.

A summary of the collections and expenditures during 1947 will be found in table 105.

## BUREAU OF ENGRAVING AND PRINTING

The Bureau of Engraving and Printing designs, engraves, and prints currency, bonds, certificates, stamps, and various other official documents and forms. Deliveries of finished work during the fiscal year 1947 amounted to 559,452,273 sheets, a decrease of 124,917,089 sheets, or 18.3 percent less than the quantity delivered during the previous fiscal year.

A comparative statement of deliveries of finished work in the fiscal years 1946 and 1047 follows:

and 1947 follows:

New dies and plates were prepared for various issues of Treasury bonds, United

New dies and plates were prepared for various issues of Treasury bonds, United States savings bonds, revenue stamps for tobacco, snuff, and cigars, military certificates, migratory-bird hunting stamps, and miscellaneous certificates and commissions for the War, Navy, and other departments.

Orders were received from the War Department for the production of military certificates for use by the armed forces within military establishments overseas. A contract was negotiated with a commercial firm for printing the stock by the offset method. Subsequently, the work was transferred to the Bureau for numbering and final processing. The certificates comprised three sizes; the small size for the 5th 10th 25th and 50th denominations; the intermediate size \$1.00th bering and final processing. The certificates comprised three sizes; the small size for the 5¢, 10¢, 25¢, and 50¢ denominations; the intermediate size \$1; and the large size \$5 and \$10.

In November 1946, a special committee appointed by the Secretary of the Treasury began the audit and destruction by incineration of the surplus stock of Allied Military Schilling currency remaining on hand from orders placed by the War Department. This project was completed in January 1947.

The production of United States savings bonds of Series E, F, and G amounted

to 43,634,000 bonds, with a face value of \$8,652,170,000, a decrease of 70.7 percent compared with the quantity delivered during the previous year.

The number of employees on the pay roll at the beginning of the fiscal year was

6,378, but by the end of the year this figure had dropped to 5,909.

Three employees of the Bureau were detailed to participate in the International Philatelic Exhibition held in New York City in May 1947, in connection with the centennial celebration of the issuance of the first United States postage A hand-operated printing press was transferred to the exhibition for the use of a plate printer and his assistant in demonstrating the plate printing of In addition, a member of the engraving staff gave demonstrations of stamps. his art.

Expenditures amounted to \$20,099,080.31, a decrease of \$604,415.14 or 2.9 percent as compared with the previous year. The following statement shows the appropriations, reimbursements, and expenditures for the fiscal years 1946 and

1947.

	1946	1947	Increase or de- crease (-)

Additional amounts of \$10,995.96 for 1946 and \$50,065.59 for 1947 were received from employees for lost locker keys, badges, etc., for refunds of terminal leave compensation, from reimbursements for jury service, and to correct discrepancies in paper accounts of Bureau; from firms for empty drums returned by Bureau; and from refunds by employees and firms and reimbursements for work done for various agencies. These amounts were deposited in the appropriate accounts.

2 Revised to take into account a refund of \$6,778.18, in April 1947, by the State Printer, Bureau of Printing, Sacrament, Colif. which correspond to the purpose of \$11.408.00 in competition with the processing of

Sacramento, Calif., which represented the unused portion of \$11,408.00 in connection with the processing of military yen currency, on contract with this Bureau, for the War Department. The amount of \$11,408 covered the estimated cost of restoration of Governor's Hall on the State Fair Grounds at Sacramento, used for the above-described project. Since this amount had been charged to the War Department, that Department was reimbursed with the refund of \$6,778.18.

#### BUREAU OF FEDERAL SUPPLY

The Bureau of Federal Supply, designated the Procurement Division prior to January 1, 1947, determines the policies and methods of procurement, warehousing, and distribution of supplies, materials, equipment, and services for Federal establishments; procures and distributes supplies, materials, equipment, and services for Federal establishments; stores and inspects supplies, materials, and equipment; and prepares purchasing standards, such as Federal Specifications, standard forms of contract, and a catalog system. The Bureau of Federal Supply, at the direction of the Army and Navy Munitions Board, purchases and inspects strategic and critical materials for inclusion in the national stockpile. During 1947, in addition to its purchases for the United Nations Relief and Rehabilitation Administration, the Bureau made special purchases of coal and other commodities for certain European countries, and accomplished partial liquidation of its programs in connection with lend-lease. United Nations Relief and Rehabilitation Administration, and foreign war relief of the American Red Cross.

764788---48-

#### PROCUREMENT

Purchasing and purchasing methods.—Specialists in procurement and marketing of the Bureau of Federal Supply's purchasing staff enter into contracts for the purchase of supplies, materials, and equipment for Federal agencies in both the departmental and field services, and also perform the same services for special Liaison is maintained with other Government agencies and, in the

case of special programs, with officials of foreign nations.

Contracting and purchasing by the Bureau of Federal Supply are generally effected in accordance with section 3709 of the Revised Statutes, as amended, requiring advertising for bids, public bid openings, and award of contracts to the lowest responsible bidders. During the fiscal year considerable purchasing was accomplished by negotiation as authorized by the First War Powers Act, title II.

Two types of contracts are used: (1) indefinite quantity (sometimes called openend or term) contracts and (2) contracts specifying definite quantities of commod-

ities.

Indefinite quantity contracts have been placed for approximately 40,000 items listed on the Federal Supply Schedule, and Federal agencies may secure what they require during the life of a contract simply by placing purchase orders direct with the scheduled contractors.

Definite quantity contracts are generally made for items not covered by the Federal Supply Schedule or not carried in the Bureau's warehouse stock. contracts are financed through the general supply fund, reimbursement being made by the requisitioning agency. For special program purchases all contracts are made on a definite quantity basis.

The following table shows the value of purchases made by the Bureau of Federal Supply during the fiscal years 1946 and 1947.

Object	1946	1947
Regular activities <sup>1</sup> Lend-lease United Nations Relief and Rehabilitation Administration American Red Cross (foreign war relief) Coal program for certain foreign countries	\$29, 971, 761 258, 183, 616 215, 260, 218 768, 480	\$46, 173, 933 <sup>2</sup> 42, 676, 468 <sup>3</sup> 162, 220, 315 <sup>4</sup> 2, 871 28, 504, 859

Purchase of supplies procured for other agencies or for stock issued to other agencies.
 Cancellation of contracts reduced obligations \$228,217,211.
 Cancellation of contracts reduced obligations \$25,000,848.
 Cancellation of contracts reduced obligations \$101,892.
 Does not include purchases of strategic and critical materials which are shown elsewhere in this report.

The preceding table reflects the sharp decline in the special programs in connection with lend-lease, United Nations Relief and Rehabilitation Administration, and American Red Cross foreign war relief. However, the increase of approximately 54 percent in regular activities shows the expanding program of the Bureau

of Federal Supply which, eventually, is to care for the Nation-wide requirements of all Federal agencies as to supplies, materials, and equipment.

Government requirements.—The Government Requirements Division coordinates the various functions of the Bureau of Federal Supply with other Federal agencies. Surveys and studies made by this Division are the bases upon which are established policies and methods for accomplishing the procurement of supplies, materials,

and equipment in a more economical and efficient manner.

Stores operations.—The stores operations are conducted on a self-supporting, reimbursable basis, and therefore the principles of operation are substantially like those of a private enterprise, except that the objective is to recover costs as distinguished from the profit motive of commercial ventures. During the fiscal year 1947, the Bureau of Federal Supply operated nine supply centers, and two branch supply centers in the field, and a central warehouse in Washington, D. C. The field locations are at Boston, New York, Cleveland, Chicago, Atlanta, Fort Worth, Kansas City, Denver, San Francisco, Los Angeles, and Seattle. These field units together with the central facilities in Washington, D. C., constitute the Bureau's national system for the procurement, storage, and issue of supplies in common use by Federal agencies and the Government of the District of Columbia.

These operations are financed by the general supply fund (see page 86) from which all expenditures are made and to which all collections are credited. penses are recovered by service charges representing estimated handling costs. When expenses for handling are less than estimated, surpluses remaining in the general supply fund after a yearly audit by the General Accounting Office are credited to miscellaneous receipts of the Treasury.

During the fiscal year 1947, the total value of warehouse stock issues was approximately \$22,930,000, an increase of \$7,092,000 over the issues for 1946.

This increase was brought about by extension of services to Federal agencies not fully participating previously in the Bureau's program and also by higher prices. Of major importance were the arrangements made with the Veterans' Administration in December 1946 whereby all veterans' facilities were instructed to purchase administrative supplies and equipment from the Bureau of Federal Supply. Of the total issues for 1947, nearly 13 percent were supplies acquired from surplus property disposal agencies.

Continuing the policy of utilizing Government-owned space, buildings erected or utilized for wartime purposes were used for housing the Bureau's field warehouse facilities at New York, Cleveland, Chicago, Atlanta, Denver, Los Angeles,

and Seattle.

Inspection service.—The Bureau of Federal Supply maintains an inspection service in the District of Columbia for inspection and testing of incoming warehouse stock, investigation of complaints of receipt of apparently inferior materials delivered on Bureau of Federal Supply contracts, and the coordination of routine inspection and testing services in the Federal Government. As an additional service, a sample room is maintained where standard samples of articles on purchase under Federal Supply contracts are displayed for examination by repre-

sentatives of Government agencies.

Utility services.—The Public Utilities Division of the Bureau of Federal Supply makes technical surveys and investigations both in Washington and the field to secure for all Federal agencies efficient service and equitable rates for all public The surveys and analyses cover electric, gas, telephone, teletypewriter, telegraph, and cable services. When charges are found to be out of line, the Division negotiates with public utility companies and regulatory commissions and boards for appropriate price adjustments and, in some cases, for completely new contracts. Formal representation is made before appropriate regulatory commissions where necessary.

As a result of the work done during the year, and without consideration of savings resulting from operations of previous years, or those which, although achieved in 1947, will accrue in future years, the Government saved over \$740,000.

Interdepartmental Traffic Committee.—Constant liaison is maintained with all agencies, including the military establishments, through the Interdepartmental Traffic Committee which was initiated by the Bureau of Federal Supply for the purpose of conducting continuing studies of transportation rates and services as they affect the shipment of property on which charges are paid and borne by the One such study has resulted in eliminating the issue of approxi-United States. mately 100,000 Government bills of lading annually, with a saving of at least \$400,000 per year and without compensating loss in other respects.

Printing.—Through its Printing Section, the Bureau placed orders with Government and commercial printing sources totaling \$5,634,597.58 in the fiscal

year 1947.

Standardization.—During the fiscal year, the standards activities of the Bureau of Federal Supply were further centralized in one organization through the transfer of inspection and testing services from the Stores Branch to the Standards Branch, which now consists of four divisions: Specifications, Catalog, Inspection, and Research and Technical Services. The Standards Branch, responsible for the standardization of materials, equipment, and supplies used by Federal departments and establishments, is charged specifically with the preparation of Federal and Bureau of Federal Supply specifications; with the identification, classification, and cataloging of items of supply; and with the inspection and testing of supplies purchased by the Bureau of Federal Supply or by other agencies under the Federal Supply Schedule. Supply Schedule.

Through the Standards Branch the Bureau of Federal Supply has provided, during the year, the central staff of the U.S. Standard Commodity Catalog Board for the development of detailed operating plans for the proposed unified Federal Catalog System, designed to replace as many as 17 different systems now in use,

including the Federal Standard Stock Catalog, the responsibility for which rests

with the Bureau of Federal Supply.

Blind-made products.—The Bureau of Federal Supply is the coordinating agency which facilitates the placing of all Government orders with the 52 nonprofit workshops for the blind which operate under the Wagner-O'Day Act of 1938. Sales to the Government of goods produced by the blind during the fiscal year 1947 represented 751 transactions in the amount of \$460,802.72 as compared with \$3,143,672.32 during the fiscal year 1946. The sharp decline is attributed primarily to the use of war surplus property by consuming agencies.

Forfeited, seized, and abandoned property.—There was reported to the Bureau.

of Federal Supply, for transfer to other Government agencies or eleemosynary institutions, forfeited, seized, and abandoned property totaling \$1,356,528.52 in

appraised valuation.

#### FISCAL OPERATIONS

During the fiscal year 1947 the Fiscal Branch maintained the accounts, audited the vouchers for contract payments, and prepared appropriate financial and statistical reports on three large programs, namely, the general supply fund, lendlease, and United Nations Relief and Rehabilitation Administration, and several smaller programs. In addition, it liquidated the accounts payable and collected the accounts receivable on the working capital fund which was transferred to the Government Printing Office as of July 1, 1946. It also established 7,401 claims for a total of \$5,488,493, and made collections on them in the amount of \$4,011,932. Net cash discounts taken by the Bureau of Federal Supply during the fiscal year 1947 amounted to \$622,454 as follows: Lend-lease, \$70,699; United Nations

Relief and Rehabilitation Administration, \$328,126; general supply fund, \$223,616;

and strategic and critical materials, \$13.

General supply fund.—This is a revolving fund established pursuant to the act of February 27, 1929 (45 Stat. 1341), as amended, and it is available to finance purchases by the Bureau of Federal Supply of stock, consolidated supplies, and services.

A statement of the assets and liabilities of the general supply fund as of June 30, 1947, follows:

Assets	Amount	Liabilities and capital	Amount
Current assets: Cash	\$2, 598, 298. 04 5, 238, 967. 39 4, 467. 83 9, 358, 468. 38	Current liabilities: Accounts payable. Unearned income.	\$7, 950, 136. 45 964, 918. 10

Total assets	17, 473, 820. 89	Total liabilities and capital	17, 473, 820. 89

Lend-lease.—Funds were allocated to the Bureau of Federal Supply under the so-called Lend-Lease Act of March 11, 1941 (55 Stat. 31), for the purpose of procuring supplies and equipment for countries whose defense was deemed vital to the defense of the United States. (See also page 62.) The following table shows the status of funds under this program as of June 30, 1947.

Regu ar lend-kase accounts	Appropriation allocations	Obligations incurred	Expenditures (voucher audited basis)	Unliquidated obligations	Unobligated allocations	Unexpended balance

¹ Pursuant to authorization by the office of Lend-Lease Administration, administrative expenses incurred subsequent to Mar. 11, 1943, in amounts of \$996,023 and \$14,662,285.86 have been charged to appropriations for "Services and expenses" and "Agricultural, industrial, and other commodities", respectively. Prior to Mar. 11, 1943, administrative expenses were charged to the appropriation "Administrative expenses."

United Nations Relief and Rehabilitation Administration.—The act of March 28, 1944 (58 Stat. 122), authorized participation of the United States in the United Nations Relief and Rehabilitation Administration. Funds were allocated to the Bureau of Federal Supply for the acquisition of materials necessary for agricultural and industrial relief and rehabilitation of countries devastated by the war. Purchases of supplies and equipment amounting to approximately \$486,000,000, including accessorial and other costs, have been made by the Bureau of Federal Supply thus far in the implementation of this program.

Status of funds under the United Nations relief and rehabilitation program as of June 30, 1947

#### FISCAL SERVICE

The Fiscal Service of the Treasury Department is a statutory organization, created by the President's Reorganization Plan No. III, dated April 2, 1940, under the provisions of the Reorganization Act of 1939, and became effective June 30, 1940, by Joint Resolution of Congress approved June 4, 1940. At the head of the Fiscal Service is the Fiscal Assistant Secretary. The Fiscal Service is composed of four organizational units, as follows: (1) The Office of the Fiscal Assistant Secretary, (2) the Bureau of Accounts, (3) the Bureau of the Public Debt, and (4) the Office of the Treasurer of the United States. The work of the Fiscal Service is largely operational in character, being concerned with the transaction of the day-to-day business of the Treasury Department in the fiscal field. As the titles of the several offices and bureaus imply, this work has to do with the Treasury's financing, accounting, and disbursing; public debt operations; and the receipt, custody, and distribution of the public funds.

#### ORGANIZATION .

Office of the Fiscal Assistant Secretary.—The Fiscal Assistant Secretary exercises general supervision over the three bureaus constituting the Fiscal Service, and advises the Secretary in connection with Treasury financing operations and the financing of Government corporations. In addition, he has a small staff which performs these principal functions: (a) Forecasting the cash position of the Treasury, (b) maintaining the daily cash balances with the various Federal Reserve Banks, (c) coordinating surveys of the several constituent units in the interest of economy and efficiency, and (d) handling foreign exchange transactions.

interest of economy and efficiency, and (d) handling foreign exchange transactions.

Bureau of Accounts.—The Bureau of Accounts, under the Commissioner of Accounts, is responsible for a variety of fiscal functions and administrative matters. These include (a) maintaining the official receipt and appropriation accounts of the Government; (b) preparing annually the Combined Statement of Receipts, Expenditures, and Balances of the United States Government; (c) performing the disbursing function for all executive departments and agencies, except the military establishments, the postal service, and United States marshals; (d) performing general supervision, under the direction of the Fiscal Assistant Secretary, over the accounting functions and activities of all the bureaus, divisions, and offices of the Treasury; (e) developing improved financial reporting systems for the Government as a whole, under the provisions of Executive Order 8512, approved August 13, 1940, as amended; (f) supervising the administration of the Federal depositary system; (g) administering the Government's self-insurance fund under the Government Losses in Shipment Act; (h) performing the administrative work in connection with the investment of trust funds by the Secretary of the Treasury; and (i) performing, for the Secretary, the administrative work in the fixing of underwriting limitations of surety companies authorized to do business with the United States. Other functions of a miscellaneous character include the annual appraisal of the assets and liabilities of the Commodity Credit Corporation, the liquidation of the fiscal affairs of the Lend-Lease Administration and a number of other war agencies, and certain administrative duties such as relate to the granting of authority to disbursing officers to carry cash at personal risk and waiving delinquencies in the rendition of disbursing officers' accounts.

Bureau of the Public Debt.—The Bureau of the Public Debt, under the Commissioner of the Public Debt, exercises general supervision over public debt operations. It (a) prepares offering circulars and instructions relating to each offering of public debt securities; (b) directs the handling of subscriptions and making of allotments; (c) prepares regulations governing public debt securities; (d) issues public debt securities and conducts or directs all transactions in the security issues of the United States, and in those of the insular governments and of the Government-owned corporations for which the Treasury acts as agent; (e) supplies issuing agents with securities and maintains reserve stocks; (f) maintains

individual accounts with owners of registered securities and pays interest thereon by check; (g) supervises the activities relating to public debt matters of fiscal agents and agencies authorized to issue and pay savings bonds and armed forces leave bonds; (h) handles claims on account of lost, stolen, destroyed, mutilated, or defaced securities; (i) procures and supervises the manufacture of distinctive paper for printing securities and paper currency and maintains reserve stocks of such paper; (j) determines the requirements and orders the production of securities and paper currency; (k) audits securities and retired United States paper currency, and supervises the destruction of the currency and certain securities; (l) certifies to the Comptroller General the account of the Treasurer of the United States covering securities and coupons for which payment has been made; (m) maintains general accounts covering public debt issues; (n) maintains control accounts over currency and distinctive paper in process of printing at the Bureau of Engraving and Printing; (o) maintains administrative accounts of all debt transactions conducted by the Bureau of the Public Debt, Federal Reserve Banks, Treasurer of the United States, and other official agencies; (p) maintains records of securities issued; (q) maintains files of retired securities; (r) compiles the Circulation Statement of United States Money; and (s) examines and counts mutilated and imperfect work resulting from operations of the Bureau of Engrav-

ing and Printing and supervises its destruction.

Office of the Treasurer of the United States.—The Treasurer of the United States is the official custodian of the public funds. All public moneys are required to be deposited to the credit of his account in Federal Reserve Banks and other designated Government depositaries. He renders a monthly account of all receipts and disbursements to the Comptroller General for audit and settlement. The Office of the Treasurer (a) maintains the accounts of the sales and redemptions of public debt securities and the accounts relating to the assets and liabilities of the Treasurer's general account, a separate account being maintained for the various classifications of receipts and expenditures and with each Federal Reserve Bank and general depositary; (b) maintains approximately 11,000 checking accounts of Government disbursing officers, corporations, and agencies, and advances funds to the officers for credit in their disbursing accounts as authorized by accountable warrants; (c) maintains the accounts for the issue and redemption of United States paper currency, and for the redemption of Federal Reserve notes, Federal Reserve Bank notes, and national bank notes, and directs the shipment of currency and coin between the United States Mints, Federal Reserve Banks, etc.; (d) examines and redeems public debt securities presented for redemption either direct to the Treasurer or through the various Federal Reserve Banks; (e) acts as special agent for the payment of the principal of and interest on the obligations of Government corporations and agencies and maintains the accounts to show such payments; (f) examines and redeems paper currency; (g) maintains a Cash Division in the Treasury building which receives and pays out money locally; (h) issues checks in payment of claims settled by the General Accounting Office; (i) prepares the Daily Statement of the United States Treasury, showing the assets and liabilities of the General Fund, the receipts and expenditures classified under various categories, the monthly statement of the public debt, the monthly statement of the classified receipts and expenditures of the Government, and the monthly statement of paper currency outstanding by kinds and denominations. The Treasurer of the United States is Treasurer of the Board of Trustees of the Postal Savings System, custodian of other trust funds, and custodian of certain miscellaneous securities.

#### IMPROVEMENT IN METHODS AND REPORTS

Because of the many inter-relations of the three fiscal bureaus composing the Fiscal Service, an operations and methods staff is employed for the purpose of studying and developing improved procedures designed to eliminate duplication and overlapping of activities. This work is carried on in close cooperation with related operations and methods staffs in the bureaus. During the fiscal year 1947, several important improvements were made resulting in savings amounting to several hundred thousand dollars.

Daily Statement of the United States Treasury.—Effective July 1, 1946, three important changes were made in the daily Treasury statement. A rearrangement was made of the statements relating to Public Debt, Guaranteed Obligations, and Contingent Liabilities to facilitate the use of the information by the

public and others concerned. The bases of the figures are the same as in the

previous statements.

The second change related to the manner of reporting net operations of wholly owned Government corporations and other business-type agencies in order to conform to current budgetary practice. Commencing July 1, 1946, the net receipts or expenditures resulting from the agencies' operations (except sales or redemptions of their obligations in the market) are included in budget expenditures, and therefore are shown on page 2 instead of page 3 of the daily Treasury statement.

The third change concerned the manner of classifying and reporting expenditures representing disbursements of the Division of Disbursement of the Treasury Department. Formerly this was done by classifying the individual checks as expenditures after payment by the Treasurer of the United States. Under the Under the new procedure payments made by the Division of Disbursement are classified in summary and reported as expenditures on the basis of checks issued. account for outstanding checks was shown on page 3 to reflect the amount of such checks issued and classified in the daily Treasury statement which have not yet been cleared through the accounts of the Treasurer's Office as paid checks. This change provides a more realistic picture of current Government expenditures so far as these classes of checks are concerned and affords a more economical method of classification and reporting.

During the fiscal year, two other changes were made. The special statements on the War Activities Program appearing in the middle-of-the-month issue were discontinued. The last published statements for this program, cumulative through June 30, 1946, appeared in the daily Treasury statement of July 15, 1946. However, the segregation of expenditures for war and defense activities shown on page 2 was continued for the remainder of the fiscal year 1947, after which it was discontinued. A new statement entitled "Budget Summary" was included on page 2 of the daily Treasury statement commencing with the issue of April 21, 1947, so as to provide current and comparative data regarding the status of the budget with respect to the surplus or deficit and the related public debt and General Fund balance as of the end of the same periods.

#### DEPOSITARIES OF PUBLIC FUNDS

The Treasurer of the United States is the official custodian of moneys of the United States. These funds are held in the form of gold and silver bullion, currency, and deposits in Federal Reserve Banks, national banks, and other designated domestic or foreign banks.

Gold bullion.—On June 30, 1947, the Treasury Department held 607,610,088.3 ounces of gold bullion, which, at \$35 an ounce, was valued at \$21,266,353,091.88, an increase during the year of 28,478,907.8 ounces valued at \$996,761,775.65. This increase represents net acquisitions by mints and assay offices valued at \$996,565,635.53; noncurrent gold coin acquired at the price of \$20.67+ an ounce amounting to \$115,845.01 under regulations dated December 28, 1933, and the increment resulting from the revaluation of gold contained in these coins to \$35 an ounce, amounting to \$80,295.11.

Against this gold were liabilities of \$20,242,963,358.79, consisting of \$16,513,-733,546.94 in the gold certificate fund of the Board of Governors of the Federal Reserve System and \$3,729,229,811.85 in special currency reserves. A balance

of \$1,023,389,733.09 of gold remained in the General Fund.

Silver bullion.—The silver holdings of the Treasury were valued on June 30, 1947, at \$2,378,037,607.38, a decrease of \$186,659.10 during the fiscal year.

These holdings included \$1,923,912,883.91 in bullion at monetary value,

\$91,876,629.03 in bullion at cost, \$15,709.62 in bullion at recoinage value, \$341,-961,650 in silver dollars, and \$20,270,734.82 in subsidiary coin.

Against the \$2,265,874,533.91 representing bullion held at monetary value and silver dollars were liabilities of \$2,230,779,033 for outstanding silver certificates and \$1,135,278 for outstanding Treasury notes of 1890, leaving \$33,960,-222.91 in silver at monetary value in the General Fund in addition to the amounts

of bullion held at cost or recoinage value and the subsidiary coin as set forth above. Deposits.—Public moneys on deposit to the credit of the Treasurer of the United States on June 30, 1947, in designated Government depositaries amounted to \$2,412,520,081.93 including items in transit. During the fiscal year 1947, 1323 1,122 transfers aggregating \$685,445,520 were required to establish, increase, or restore the Treasurer's balances with depositaries.

Depositaries of the United States.—On June 30, 1947, there were in the United States and its possessions 13,230 depositaries holding funds on deposit to the credit of the Treasurer of the United States and other Government officers. This number included 1,715 general and limited depositaries, and 10,694 special depositaries which held the proceeds of sales of United States securities. There were 9,472 banks qualified as depositaries for withheld taxes, of which 635 held time deposits to the credit of the Treasurer of the United States.

## Classes of depositary facilities available June 30, 1947

Class	Number of facilities	Deposits to the credit of the Treasurer, U. S. <sup>1</sup>
Federal Reserve Banks Other banks in continental United States: General depositaries Limited depositaries. Special depositaries, proceeds of sale of United States securities Depositaries for withheld taxes, time deposits. Insular and territorial depositaries. Foreign depositaries.		\$1, 202, 306, 369. 19 175, 052, 333. 71 962, 279, 000. 00 7, 694, 000. 00 32, 295, 608. 10 32, 892, 770. 93
Total	13, 230	2, 412, 520, 081. 93

<sup>&</sup>lt;sup>1</sup> Excludes amounts held in the names of other Government officers: \$40,430,409.55 in insular and territorial depositaries, and \$43,359,795.14 in foreign depositaries.

In respect to the general and limited depositaries, 116 new designations were made during the year, and 248 depositaries were discontinued. The decrease in depositary facilities was due mainly to the decreased needs of the armed forces. In 377 cases, the amount for which the depositary had been qualified was increased and in 712 cases the amount was decreased. There were also 228 other changes in designation.

Depositary bonds.—Department Circular No. 660, dated May 23, 1941, as amended, prescribes the regulations of the Treasury governing the issuance of 2 percent depositary bonds. These bonds are allotted to banks designated as depositaries and financial agents of the Government. The interest on such bonds provides an income to the banks which offsets the cost incurred by them in handling Government business.

2% depositary bonds	Issued	Redeemed	Outstanding June 30, 1947
First Series—General depositary and fiscal agency operations Second Series—Operations incident to withheld taxes	\$593, 867, 750	\$365, 267, 750	\$228, 600, 000
	127, 449, 500	30, 623, 500	96, 826, 000
	721, 317, 250	395, 891, 250	325, 426, 000

Banking facilities at military and other Government installations.—Upon request of the respective governmental agencies, the Treasury Department has continued the designation of depositaries to provide banking facilities at certain Army posts, naval stations, veterans' hospitals, and other Government installations. As of VJ-day, in August 1945, there were 361 such banking facilities in operation, the largest number during the war period. By June 30, 1946, this number had been reduced to 98, and by June 30, 1947, to 68. The following statement shows the number and classes of facilities provided at the peak of operations and on June 30, 1947:

## Limited banking facilities at military, naval, and other Government installations

	Facility authorizations in force

Total Army facilities	289	20	
Navy yards and stations	51 5 7	27 3 5	
Total Navy facilities Veterans' hospitals Other Government installations	63 9	35 11 2	
Total facilities	361	. 68	

#### COLLECTION AND DEPOSIT OF FUNDS

Collections representing funds due the United States are required to be deposited promptly with the Treasurer of the United States. This may be done by delivering the funds (1) to a bonded accountable officer who will make the deposit, (2) to an authorized depositary for credit to the account of the Treasurer of the United States, or (3) to the cash room of the Treasurer of the United States in Washington.

The deposit of receipts is evidenced by a certificate of deposit issued by the depositary, which serves as the basis upon which the Treasury Department issues

a warrant formally covering the funds into the Treasury.

During 1947 nearly 9 million collection items were received, deposited, and recorded by the Division of Disbursement, and over 3 million commercial checks, drafts, postal and express money orders were deposited with the Treasurer of the United States for collection. This does not include collection items deposited direct with authorized depositaries by collectors of internal revenue and other collecting officers. During the fiscal year 1947, net budget receipts exceeded \$43.3 billion and receipts of trust accounts exceeded \$6.2 billion, a total of \$49.5 billion.

Federal savings and loan associations.—On June 30, 1947, the Federal Home Loan Bank System reported to the Treasury Department that 1,476 Federal savings and loan associations were eligible to qualify as fiscal agents under Department Circular No. 568, dated September 15, 1936, for the purpose of collecting delinquent accounts arising out of insurance and loan transactions of the Federal Housing Commissioner. Of this number, 72 have qualified for this purpose, either by the pledge of collateral security or the filing of an acceptable surety bond.

Withheld taxes.—The Current Tax Payment Act of 1943 provides for the collection at the source of income taxes on salaries and wages. Under regulations issued by the Treasury, the major proportion of the accumulated funds are deposited monthly by employers in certain designated depositary banks which issue their receipts to the employers. These receipts are transmitted with quarterly tax returns filed with collectors of internal revenue. Amounts deposited are promptly remitted to the Federal Reserve Banks for credit in the Treasurer's account. This procedure has made these funds available to the Treasury on a more current basis, as compared with the method of quarterly tax payments. During the fiscal year 1947, approximately \$10 billion was collected through this procedure.

#### PAYMENT OF PUBLIC CREDITORS

Under Executive Order dated June 10, 1933, the Treasury Department, through the Division of Disbursement, provides disbursing facilities for all executive departments and establishments of the Government with the exception of the Postal Service, United States marshals, the Panama Canal, the military establishments, and certain Government corporations. In addition to a central office in Washington, D. C., and 22 regional offices in the continental United

States, the Treasury Department maintains 24 other offices, of which 5 are in outlying Territories of the United States and 19 are in foreign countries. the fiscal year, offices in Germany, China, and Nicaragua were closed. A regional disbursing office was opened in Birmingham, Ala., to meet the needs of the Social Security Board, Veterans' Administration, and other agencies located in the area. Eleven subregional offices handling emergency crop and feed loan payments for the Farm Credit Administration were closed on October 31, 1946, the work being transferred to regional disbursing offices.

On July 1, 1946, the function of disbursement for the United States Coast Guard was transferred from the Navy Department to the Treasury, and 65 sub-regional offices were continued, with employees of the Coast Guard functioning as assistants to the Chief Disbursing Officer. On June 30, 1947, there were 63 employees of the State Department functioning as disbursing officers by delegation of authority made pursuant to Executive Order 6166, and rendering accounts in their own name for the State Department and other agencies for whom they

provide disbursing facilities abroad.

During the year 159,739,118 payments by check and 898,074 payments in cash were made through the Division of Disbursement. These payments were supported by nearly 11 million pay rolls and other vouchers. Of the checks issued, over 140 million were in the form of tabulating card-checks payable by Federal Reserve Banks as agents of the Treasurer of the United States.

During the year \$32,369,596,786 was advanced to all disbursing officers of the United States by accountable warrant. These funds were credited to checking accounts on the books of the Treasurer. Over 260 million checks were paid and charged to these checking accounts. Of this number nearly 182 million were paid for the Treasurer by Federal Reserve Banks acting as his agent. The total number of checks paid during 1947 decreased by 25.4 percent from 1946, and the number of payments by Federal Reserve Banks decreased by 19.2 percent.

Budget expenditures, on the basis of the Daily Statement of the United States Treasury, aggregated \$42.5 billion, a decrease of \$21.2 billion from 1946, and expenditures of trust accounts, etc., approximated \$6.8 billion, a decrease of \$1.4

billion from the preceding year.

Balances to the credit of disbursing officers and Government agencies declined by \$5.8 billion to \$8.9 billion as of June 30, 1947. The number of checking accounts decreased from 10,239 to 7,588 during the same period.

During the year 48,085 substitute checks were requested by payees or endorsees to replace original checks which had been lost, stolen, mutilated, defaced,

There were 165 cable transfers, totaling over \$12.6 million, to Government officers located in fifteen different foreign countries, and 1,948 drafts in the currencies of 48 foreign countries were purchased at a cost of \$392,690.

Bonding of certifying officers.—Public Law 389, approved December 29, 1941,

provided for the bonding of officers and employees authorized to certify vouchers for payment by disbursing officers in the executive branch of the Government except the military services. On June 30, 1947, there were approximately 7,800 bonded certifying officers certifying vouchers under the act.

Agent cashiers.—There are approximately 2,040 bonded employees of Government agencies who have been designated as agent cashiers of the Chief Disbursing Officer of the Treasury Department. Most of these agent cashiers are located in the United States, making emergency payments in cash in cases in which it is impractical to make payments through the regional disbursing offices of the Treasury. Others are on duty in various parts of the world in connection with

various governmental operations.

Payments in foreign countries.—Creditors abroad may be paid by any of the following methods: (a) Through State Department representatives in foreign countries who function as disbursing officers by delegation of authority from the Division of Disbursement, and who make payments in local currency acquired either by purchase with a check drawn on the Treasurer of the United States or by sale of a draft drawn on the Secretary of State; (b) in countries other than Germany or Japan by dollar checks issued in the United States and mailed to payees; (c) through the transmission of United States dollar checks to the War Department with the request that Army finance officers abroad make payment in local currency; and (d) in local currency drawn from balances held for the account of the Treasurer of the United States in foreign depositaries.

Withheld foreign checks.—Payment by means of dollar checks has been re-

sumed in all countries except Germany and Japan. Payments to persons in

these two countries are still restricted by Department Circular No. 655, dated

March 19, 1941, as amended.

A total of \$26,714,927.61 has been deposited in the special deposit account entitled "Secretary of the Treasury, Proceeds of Withheld Foreign Checks." Of this amount, \$6,548,767.93 has been paid to individual claimants; \$698,319.47 has been returned to the appropriation from which the payments were originally made; and \$10,272,475.61 has been covered into the Treasury as miscellaneous As of June 30, 1947, a balance of \$9,195,364.60 remained in the special

deposit account to the credit of approximately 13,200 payees.

Under Public Law 622, approved August 7, 1946, provision was made for paying claims on account of withheld checks involving payments to veterans or their beneficiaries out of the current appropriations of the Veterans' Adminis-The Veterans' Administration is reimbursed from the special deposit account for payments made to the extent such funds are held on deposit in the

special deposit account.

Settlement of the accounts of fiscal officers.—Public Law 72, approved May 19, 1947, establishes a limit of time of three years in which the General Accounting Office shall make final settlement of the accounts of any disbursing, accountable, or certifying officer of the Government from the date of receipt of the accounts. No further charges or debts shall be raised in the accounts thereafter, except as to moneys which have been or may be lost to the United States due to fraud or criminality on the part of the officer. The law will take effect three years after the date of its enactment.

## PUBLIC DEBT OPERATIONS

During the fiscal year ending June 30, 1947, the total gross public debt and guaranteed obligations was reduced from \$269,898,484,032.56 to \$258,375,903,-293.83, a net decrease of \$11,522,580,738.73. Issues of public debt securities during the year amounted to \$127,761,090,932.28 and redemptions totaled \$138,896,806,996.87, a net excess of redemptions of \$11,135,716,064.59; outstanding guaranteed obligations not owned by the Treasury Department decreased by \$386,864,674.14 to \$89,520,185.16.

Armed torces leave bonds—In corrying out the provisions of the Armed Eorces

Armed forces leave bonds.—In carrying out the provisions of the Armed Forces Leave Act of 1946, the Secretary of the Treasury, the Secretary of War, and the Secretary of the Navy reached an agreement under which finance officers of the Army, Navy, Marine Corps, and Coast Guard were designated issuing agents for a new type of security known as the armed forces leave bond. By June 30, 1947, bonds aggregating \$1,846,906,500 in face value had been issued through

these facilities.

Under the original provisions of the Armed Forces Leave Act of 1946, the bonds would not mature for five years, but became payable upon the death of the registered owner or upon assignment to the Veterans' Administration in payment of premiums on Government life insurance policies. Through June 30, 1947, armed forces leave bonds aggregating \$53,934,050 in face value had been redeemed

under these provisions of the act.

United States savings bonds.—During the year the number of United States savings bonds issued fell below the volume of the immediately preceding fiscal years; however, over 77 million stubs representing issued United States savings bonds of Series E were received for registration. The reduced volume of sales did not result in a proportionate reduction in staff, because, in addition to operations necessary to the servicing of the outstanding savings bonds, there had been 109.7 million stubs on hand for which the processing was incomplete on July 1, 1946. By June 30, 1947, the unprocessed stubs on hand had been reduced to approximately 45.7 million.

During the same period, 400 thousand Series F and 1,900 thousand Series G bonds were registered. With respect to Series G bonds, over 372 thousand new accounts were established during the year bringing the total number of accounts on June 30, 1947, to over 3.9 million. During the year, over 7.8 million interest checks were issued in favor of owners of Series G savings bonds.

There were 49,882 applications during the year for the issue of duplicates of lost, stolen, or destroyed United States savings bonds, in addition to 10,003 such cases on hand at the beginning of the year. In 10,387 cases the bonds were recovered, and in 29,898 cases the issuance of duplicate securities was authorized. On June 30, 1947, only 5,046 cases remained unsettled.

Over 138 million savings bonds were redeemed and audited during the year. The audit of savings bonds is conducted principally through five regional offices

of the Register of the Treasury.

In connection with the voluntary payroll allotment plan for the purchase of United States savings bonds by Federal employees, the Chief Disbursing Officer is the bond issuing officer for the departments and agencies served by the Division of Disbursement. During the year the Division of Disbursement collected \$83,883,015.73 through withholdings from salaries of Federal employees on account of bond allotments, and received \$280,781.25 on account of cash sales made for the Reconstruction Finance Corporation, which is not otherwise serviced by the Division of Disbursement. Under this program, there were 2,970,901 savings bonds issued, for which \$87,076,458.25 was covered into the Treasury as public debt receipts during the fiscal year. The excess of issues over withholdings is due to the purchase of certain of these bonds partially by payroll deductions made in the preceding fiscal year. Pursuant to Department Circular No. 687, dated May 29, 1942, the Treasury Department also prepared 138,455 bond issuance schedules for the Federal agencies participating in the voluntary payroll allotment plan.

Registered marketable issues.—The Treasury Department maintains individual accounts for owners of registered marketable securities of the United States and various Government corporations and credit agencies, and pays periodic interest on the interest-bearing debt. On June 30, 1947, there were 432,585 individual accounts covering registered securities aggregating nearly \$45 billion in principal amount. There were 431,456 accounts covering publicly held public debt issues, of which 418,164 accounts were for interest-bearing loans, and 13,292 were for matured loans no longer bearing interest. The remaining accounts included those for special issues and for the securities of various Government corporations

and credit agencies.

During the year, 18,382 new accounts were opened, 47,465 were closed, and 6,253 were reduced in amount. Over 857 thousand interest checks were issued to owners of record.

Interest on the public debt.—On the basis of the daily Treasury statement, \$4,957,922,483.85 was paid as interest on the public debt, as shown in the following table:

Class of interest payment	Amount
Interest coupons paid_ Registered interest checks paid_ Discount on Treasury bills sold_ Accrued interest paid in cash on obligations at redemption_ Discount accrued on United States savings bonds Interest paid on obligations, special series (transfer-counter warrant transactions)	l 690, 930, 721, 95
Total payments	4, 972, 367, 569. 55 14, 445, 085, 70
Net payments	4, 957, 922, 483. 85

Servicing of securities for other agencies.—In accordance with agreements between the Secretary of the Treasury and the several Government corporations and agencies and insular governments, the Treasurer of the United States acts as special agent for the payment of principal and interest on their securities. The amounts of such payments during the fiscal year 1947 were as follows:

Name	Principal	Interest paid in cash	Registeréd interest	Coupon interest
Commodity Credit Corporation Federal home loan banks Federal land banks. Receipts, issues, and stocks of distinctive paper for use in the manufacture of paper currency were as follows during the year:

	Sheets of 12 subjects each fo the manufacture of—	
	United States currency	Philippine currency
On hand July 1, 1946 Received Issued On hand June 30, 1947	 34, 146, 379 96, 999, 974 119, 451, 023 11, 695, 330	755, 832 39, 600 716, 232

United States paper currency shipped during the year from the Treasury in Washington to Federal Reserve Banks and branches and to others amounted to \$1,790,436,893, an increase of \$107,827,718 over the previous year.

The proceeds of currency received into the Treasurer's cash by the Currency Redemption Division of the Treasurer's Office during the year amounted to \$496,146,542, of which \$354,966,820 was in Federal Reserve notes, \$59,101,424 in Federal Reserve Bank notes, \$7,282,163 in national bank notes, and \$74,796,135 in United States Currency.

Canceled Federal Reserve notes amounting to \$4,776,479,700 were received from Federal Reserve Banks and branches for credit of Federal Reserve agents. The Destruction Committee supervised the incineration of redeemed canceled currency as follows:

Class of currency	Pieces	Value
Gold certificates Silver certificates United States notes Treasury notes of 1890 Federal Reserve notes Federal Reserve Bank notes National bank notes Fraetional currency	473, 003, 808	\$2, 202, 600 1, 578, 459, 357 173, 179, 451 1, 832 5, 161, 934, 350 59, 395, 364 7, 791, 560 498
Total dollar currency	1, 677, 994, 932	6, 982, 965, 012

In addition the Destruction Committee, at the request of the War Department, supervised the destruction of 51,704,000 excess Allied Military Schilling currency notes.

## DISTRIBUTION OF COINS

During the year shipments of current silver and minor coins between the United States Treasury, the United States mints, and the Federal Reserve Banks and branches were as follows:

Kind	Shipments from Treasury to Federal Reserve Banks and branches	Shipments from mints and assay offices to Treas- ury and Federal Reserve Banks and branches	Shipments between Federal Reserve Banks and branches
Silver: Standard dollars	\$80,000.00	\$8, 930, 000. 00 3, 751, 100. 00 12, 813, 000. 00 28, 081, 900. 00	\$1, 385, 000. 00 4, 975, 000. 00 2, 100, 000. 00 1, 965, 000. 00
Minor: 5-cent coins Cents.	280, 000. 00	8, 960, 500. 00 8, 639, 400. 00	685, 000. 00
Total	360, 000. 00	71, 175, 900. 00	11, 110, 000. 00

Shipments and transfers of gold coin and bullion and of uncurrent silver and minor coins to the mints from the Treasury and the Federal Reserve Banks and branches were authorized during the year in the amounts of \$177,719.12 and \$3,001,613.35, respectively.

## SECURITIES HELD IN SAFEKEEPING

The Treasurer is custodian of securities pledged for the safekeeping and prompt payment of Government deposits in bank depositaries, of postal savings funds in depositaries designated to receive such funds, and, under provisions of law or by direction of the Secretary of the Treasury, of various trust funds comprised of bonds and other obligations and of securities placed in safekeeping by various Government executive departments and bureaus. The face value of such securities held on June 30, 1946, and June 30, 1947, classified according to the purpose for which held, is shown in the following table:

Purpose for which held	June 30, 1946	June 30, 1947
To secure deposits of public moneys in depositary banks	\$375, 652, 850	\$275, 835, 150

Total	29, 311, 931, 163	30, 371, 329, 061

<sup>&</sup>lt;sup>1</sup> The securities held for the District of Columbia teachers' retirement fund were, in accordance with the act approved Aug. 7, 1946, transferred to and held subject to the instructions of the Secretary of the Treasury.

<sup>2</sup> Noninterest-bearing participating certificate for funds deposited in the German special deposit account (see p. 101).

Securities and funds, Philippine invasion.—As of June 30, 1947, there had been settled through the Bureau of Accounts more than 90 percent of all cases involving the custody of valuables delivered to the United States High Commissioner to the Philippine Islands for safekeeping during the emergency due to the Japanese invasion.

764788-48-8

Cases settled cover \$235,448.61 in United States Treasury checks, \$267,950 in United States Treasury bonds, \$2,559,201 in United States currency, 313 bars of gold valued in excess of \$2,265,000, and 42 containers of jewelry, securities, and other valuables.

Cases on hand on June 30, 1947, cover \$1,200 in United States Treasury checks, of which \$1,000 was in process of being settled at the close of the fiscal year; \$625 in United States Treasury bonds; \$4,780 in United States currency; 8 bars of gold; a galvanized box containing miscellaneous securities; and 2 legal documents.

Undelivered savings bonds and cash refunds.—In connection with the operation of the payroll savings system for the purchase of savings bonds by employees of private contractors performing work for the Government, arrangements have been made for the safekeeping by the Treasury Department of undelivered bonds and unclaimed payroll deductions. These bonds and funds, which belong to persons whose whereabouts are unknown, are received by the Treasury under arrangements with the various departments and establishments having jurisdiction over the contracts, and, in many cases, direct with the employers. The bonds and funds are held subject to reclaim by employees upon proper identification. Under present arrangements, undelivered bonds are forwarded by contractors to the Division of Loans and Currency in Chicago. Unclaimed bond deductions not sufficient to buy bonds are forwarded to the Division of Investments of the Bureau of Accounts at Washington, D. C. As of June 30, 1947, funds amounting to \$476,407.47 had been received, covering deductions in 101,797 cases, and \$20,115.77 in 1,945 cases had been returned, leaving a balance of \$456,291.70 unclaimed in 99,852 cases.

#### INVESTMENT OF FUNDS

Trust and special funds invested by the Treasury Department.—Under various provisions of law creating trust and special funds, the Secretary of the Treasury or the Treasurer of the United States is authorized to invest such portions of the funds as are not required to meet current withdrawals. The following statement shows the amount of Government and other securities held in these funds at the close of the fiscal year. Further details on each of these funds are shown in tables 60 through 81.

Securities held as investments in trust and special funds, June 30, 1947

District of Columbia teachers' retirement and annuity fund.—Pursuant to Public Law 624, approved August 7, 1946, the District of Columbia teachers' retirement and annuity fund has been established in the Treasury. Amounts deducted from salaries and voluntary contributions by teachers in the public school system of the District of Columbia are deposited into the fund. Under the act, the District of Columbia teachers' retirement fund was abolished and the amounts in that fund and in the related Government reserve fund were transferred to the new fund. The act provides that the new fund shall be held and invested by the Secretary of the Treasury. (See table 65.)

Unemployment compensation disability payments.—Section 416 of Public Law 719, approved August 10, 1946, amends the Federal Unemployment Tax Act by

Unemployment compensation disability payments.—Section 416 of Public Law 719, approved August 10, 1946, amends the Federal Unemployment Tax Act by providing that the States may withdraw amounts deposited in the unemployment trust fund on account of employee contributions for the purpose of paying unemployment compensation disability payments. The States of California and Rhode Island have passed legislation in connection with the Federal act and have made withdrawals from the unemployment trust fund for the purpose of paying disability benefits.

Alien property trust fund.—A statement of the alien property trust fund as of June 30, 1947, follows:

## LOANS, CREDITS, AND CAPITAL SUBSCRIPTIONS

\$350,000 on account of the administrative expense fund.

Credit to the United Kingdom.—Through June 30, 1947, the Treasury paid \$2,050,000,000 to the United Kingdom out of the credit of \$3,750,000,000 under the financial agreement of December 6, 1945. These payments were as follows.

Date	Amount	Date .	Amount
July 18, 1946		Apr. 21, 1947	
Sept. 5, 1946	100, 000, 000	Apr. 23, 1947	200, 000, 000
Oct. 24, 1946	200, 000, 000	May 12, 1947	200, 000, 000
Jan. 2, 1947	200, 000, 000	June 2, 1947	
Feb. 20, 1947		June 20, 1947	100, 000, 000
Mar. 10, 1947	200, 000, 000		<del></del>
Apr. 1, 1947	200, 000, 000	Total	2, 050, 000, 000

Federal Farm Mortgage Corporation.—The Federal Farm Mortgage Corporation retired capital stock in the amount of \$49,000,000 by repayment during the fiscal year 1947, which, together with the repayment of \$100,000,000 for capital stock made in 1941 and \$50,000,000 made in 1946, reduced the outstanding capital stock of the Corporation to \$1,000,000 on June 30, 1947.

During 1947, no appropriations were approved and no payments were made to the Federal Farm Mortgage Corporation on account of reduction in interest rate

on mortgages.

Federal land banks.—Since June 26, 1947, the United States has had no proprietary interest in any Federal land bank. The capital stock of \$39,957,850 outstanding at the beginning of the fiscal year 1947 was retired by repayment during the year, and the balance of paid-in surplus subscriptions of \$36,924,408.39 was repaid on June 26, 1947. No appropriations were approved and no payments were made to the Federal land banks during 1947 on account of reductions in interest on mortgages. Details of prior years' transactions are given on pages 155 to 157 of the Annual Report of the Secretary of the Treasury for 1946.

Federal Crop Insurance Corporation.—The first Deficiency Appropriations Act, 1947, approved May 1, 1947, appropriated \$20,000,000 for the subscription and payment by the Secretary of the Treasury of capital stock of the Federal Crop Insurance Corporation. Subscription and payment were effected during the fiscal year 1947, bringing the total outstanding capital stock of the Corporation to

\$90,000,000 on June 30, 1947.

Reconstruction Finance Corporation.—Public Law 132, approved June 30, 1947, provides a method for fixing the interest rate on the Corporation's obligations, which may only be issued to the Secretary of the Treasury, by providing that the rate of interest shall be determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligations of the Corporation. The act also authorizes and directs the Reconstruction Finance Corporation to transfer to the Secretary of the Treasury all the stock of the Federal home loan banks held by the Reconstruction Finance Corporation and provides further that the Secretary of the Treasury shall cancel notes of the Corporation, and sums due and unpaid upon or in connection with such notes at the time of their cancellation, in an amount equal to the par value of the stock so transferred.

Smaller War Plants Corporation.—By Executive Order 9665, approved December 27, 1945, and effective January 28, 1946, the assets and liabilities of the Corporation, with the exception of certain funds available for administrative expenses transferred to the Department of Commerce, were transferred for liquidation purposes to the Reconstruction Finance Corporation. During the fiscal year 1947, the Reconstruction Finance Corporation paid \$135,600,000 to the Treasury Department as partial repayment of the \$200,000,000 capital stock of the Smaller War Plants Corporation owned by the Treasury Department.

Export-Import Bank of Washington.—Public Law 173, approved July 31, 1945, provided that the Export-Import Bank of Washington shall have a capital stock of \$1,000,000,000 subscribed by the United States. During the fiscal year 1947, the Secretary of the Treasury made payment for \$325,000,000 in stock of the Bank, increasing the subscription of the United States to the maximum authorized by law. This law also authorized the Bank to issue from time to time for purchase by the Secretary of the Treasury, its notes, debentures, bonds, or other obligations in an aggregate amount outstanding at one time of not to exceed two and one-half times the authorized capital stock of the Bank. During 1947, the Secretary of the Treasury purchased \$516,200,000 of the Bank's notes under this authorization.

Treasury purchased \$516,200,000 of the Bank's notes under this authorization. Public Law 89, approved June 9, 1947, provides a change in method for determining the rate of interest on obligations of the Export-Import Bank of Washington by providing that the Secretary of the Treasury shall determine the rate, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the

issuance of the obligation of the bank.

Advances to Federal Reserve Banks for industrial loans.—Advances to Federal Reserve Banks for industrial loans were authorized by the act of June 19, 1934, which amended the Federal Reserve Act. See pages 184 and 185 of the Annual Report of the Secretary of the Treasury for 1940 for further details concerning this subject.

The last advance made by the Treasury was on October 14, 1937. During the fiscal year 1947, payments amounting to \$67,554.06 were received by the Treasury. The following statement summarizes transactions through June 30,

1947:

Advances to Federal Reserve Banks for industrial loans, and payments by such Banks to the Treasury, through June 30, 1947

¹ Includes (a) loss on account of the sale on the market of Kansas, Oklahoma & Gulf Ry. Co. stock, \$10,-669.46, and (b) principal of Minneapolis & St. Louis R. R. Co. written off on account of reorganization, \$1,250,000.
² Includes (a) losses on account of sales pursuant to the provisions of act of Aug. 13, 1940; notes of the Des Moines & Central Iowa (formerly the Interurban Railway Co.), Wichita Northwestern Ry. Co., Virginia Blue Ridge Ry., and the Wilmington, Brunswick & Southern R. R. Co., \$1,042,003.09, (b) principal written off on account of reorganizations; Fort Dodge, Des Moines & Southern R. R. Co., \$200,000; Minneapolis & St. Louis R. R. Co., \$1,382,000; Alabama, Tennessee & Northern R. R. Corp., \$124,965; total \$1,706,965; and (c) principal written off of carriers whose assets when completely liquidated were not sufficient to meet these claims; Gainesville Northwestern R. R. Co., \$75,000; Missouri & North Arkansas Ry. Co., \$3,500,000; Salt Lake & Utah R. R. Co., \$872,600; and Virginia Southern R. R. Co., \$38,000; total \$4,485,600. 600.

The following statement shows the amount of obligations acquired under section 207 of the Transportation Act of 1920, as amended, and held on June 30, 1947:

Obligations acquired under the provisions of sec. 207 of the Transportation Act, 1920, and held as of June 30, 1947

Carrier	Principal amount of promissory note or of directly held security	Collateral (face amount)	Class of collateral or of di- rectly held security	Principal in default	Interest in default
Chicago, Milwaukee, St. Paul & Pacific R. R. Co.	\$3, 207, 000	(1)	5% non- cumulative preferred stock of carrier.		
Waterloo, Cedar Falls & Northern Ry. Co.	500,000	\$625,000	Temporary general mortgage, 7% bonds of carrier.	\$500,000	\$604,931.50
Total	3, 707, 000			500, 000	604, 931. 50

<sup>1</sup> Securities directly held.

The following statement shows the amount of obligations acquired under section 210 and held on June 30, 1947:

Obligations held June 30, 1947, on account of loans to carriers under sec. 210 of the Transportation Act, 1920, as amended, and the amount of principal and interest in default

Carrier	Loans out- standing 1	Principal in default	Interest in default
Georgia & Florida Ry. (receiver) <sup>2</sup> Seaboard Air Line Ry. Co. <sup>2</sup> Seaboard-Bay Line Co. <sup>2</sup> Waterloo, Cedar Falls & Northern Ry. Co.	\$792,000.00 14,438,827.01 347,550.22 1,260,000.00	\$792,000.00 14,438,827.01 347,550.22 1,260,000.00	\$871, 600. 00 12, 026, 307. 49 1, 875, 255. 71
Total	16, 838, 377. 23	16, 838, 377. 23	14, 773, 163. 20

Does not include loans amounting to \$4,485,600, for which the assets of the carriers have been completely liquidated, and which were insufficient to meet the claims, or loans amounting to \$1,733,500 adjusted on account of reorganizations.

2 By Executive order, the Reconstruction Finance Corporation has been designated to act in connection with securities for these loans.

The following table shows the status of the securities received in reorganization of railroads and held by the Treasury Department as of June 30, 1947.

Securities received in reorganization of railroads and held by the Treasury Department as of June 30, 1947

Federal savings and loan associations.—Under the act of June 13, 1933 (48 Stat. 133), as amended April 27, 1934 (48 Stat. 645), the Secretary of the Treasury was authorized on behalf of the United States to subscribe for preferred shares and full-paid income shares in Federal savings and loan associations upon request of the Federal Home Loan Bank Board. An appropriation of \$50,000,000 to enable the Secretary of the Treasury to purchase such shares was reduced by an allocation of \$700,000 to the Federal Home Loan Bank Board. The details concerning the provisions of law under which these subscriptions were made and the appropriations are contained in the Annual Report for 1940, pages 176 and 177.

appropriations are contained in the Annual Report for 1940, pages 176 and 177.

The Home Owners' Loan Corporation also was authorized to purchase full-paid income shares of Federal savings and loan associations after the funds available to the Secretary of the Treasury for the purchase of such shares had been exhausted. The funds available to the Secretary of the Treasury were exhausted on October 25, 1935.

During the fiscal year 1947 the sum of \$472,100.00 was received on account of shares repaid, making the total shares repaid to June 30, 1947, \$48,361.500.

The following statement shows the transactions in connection with the subscriptions by the Secretary of the Treasury to preferred and full-paid income shares in these associations.

Preferred and full-paid income shares of Federal savings and loan associations subscribed by the Secretary of the Treasury through June 30, 1947, and dividends received

[Par value of shares]

Includes 4,027,611.95 reichsmarks deposited by the German Government in the Konversionskasse für Deutsche Auslandsschulden and not paid to the United States in dollars as required by the debt and moratorium agreements.

## Foreign Currencies

At various times since May 1943, accounts have been established in the name of the Treasurer of the United States with various foreign banks for the purpose of depositing therein foreign currencies representing the proceeds from the sale of lend-lease goods or disposal of surplus property and collections of United States departments and agencies. These accounts are maintained in terms of foreign currencies on the books of the Treasurer of the United States on a custodial basis without responsibility as to the ultimate amount of dollars realized upon disposition of the foreign currencies. The establishment of such accounts was to provide a central fiscal control over the custody of excess foreign currencies and the disposal of such currencies on the most favorable basis possible.

Up to June 30, 1947, the foreign currencies deposited were equivalent to approximately \$79,395,826. Disposals amounted to \$56,582,489. The remaining foreign currencies valued at approximately \$22,813,337 on the basis of exchange

rates as of June 30, 1947, comprise the following:

Currency	Approximate dollar value	Currency	Approximate dollar value
Indian rupees. Iranian rials. Palestine pounds. British West African pounds. Egyptian pounds Belgian francs.	\$14,766,313 2,832,337 1,346,855 1,100,389 1,306,416 488,441	Iraqi dinars German marks South African pounds All others	\$466, 166 255, 492 118, 513 132, 415 22, 813, 337

Foreign currency accounts have been opened with banks in 24 different countries. However, as a result of the provisions of Treasury Department Circular No. 799, December 27, 1946, "Regulations for the Administration of Foreign Currencies and Credits under Dispositions of Surplus Property Abroad and Lend-Lease Settlements," the number of Treasurer's foreign currency accounts is expected to increase.

## FISCAL RELATIONSHIPS WITH THE PHILIPPINE ISLANDS

Deposits of the Philippine Government.—The authority of the Secretary of the Treasury, contained in the act of June 11, 1934 (48 Stat. 929), to accept deposits of public moneys of the Philippine Government and to pay interest thereon at not in excess of 2 percent per annum, was continued to July 1, 1951, by Public Law 654, approved August 7, 1946.

The interest-bearing accounts are being carried currently under this authority: An account maintained at \$55,000,000 since December 10, 1934, bearing 2 percent interest; and an account of \$100,000,000 established March 8, 1946, bearing 1 percent interest. Two other accounts previously maintained have now been closed. One of these covered coconut oil excise tax collections prior to January 1, 1939, at 2 percent interest, and the other covered similar collections after

January 1, 1939, at 1 percent interest.

Bonds of the Philippines.—The Philippine Independence Act, as amended required the destruction of bonds of the Philippines, its provinces, cities, and municipalities issued prior to May 1, 1934, which were held as investments in sinking funds of pre-1934 bond issues. It also required that all other assets of such sinking funds, together with the proceeds of the supplementary sinking fund maintained in the United States Treasury for such bonds, should be deposited in a special trust account to be maintained by the Secretary of the Treasury for

the payment of such bonds.

Arrangements to carry out the physical delivery of securities were delayed as a result of the war with Japan and the necessity of reconciling Philippine records after reoccupation of Manila. As of July 6, 1946, the proceeds of the supplementary sinking fund previously maintained by the Secretary of the Treasury for the payment of such bonds were transferred to a new special trust account for the payment of pre-1934 Philippine securities. Also, the cash assets of various Philippine Government sinking funds for pre-1934 bonds amounting to \$13,141.85 were paid by the Philippine Government into the special trust account.

The Secretary of the Treasury has received from the Republic of the Philippines \$6,269,750 in United States Government securities for account of the special trust account and \$13,150,500 in pre-1934 Philippine bonds for destruction. securities represented investments of Philippine sinking funds for pre-1934 bond issues. As provided in the act, the pre-1934 Philippine bonds were destroyed. Until the balance in the special trust account is sufficient to enable the Secretary

of the Treasury to pay interest and principal on all outstanding Philippine Government bonds issued prior to May 1, 1934, the act provides that the Philippine Government will provide annually the funds necessary for the payment of interest and principal on such bonds.

The following statements show receipts and expenditures and fund assets as of June 30, 1947:

Special trust account for the payment of bonds of the Philippines, its provinces, cities, and municipalities, issued prior to May 1, 1934, under authority of acts of Congress

Settlement of prewar depositary account.—In connection with the reconstruction of the account of the Treasurer of the United States with the Philippine Treasury, additional information has been obtained which indicates a tentative balance of \$432,618.45 in favor of the Philippine Treasury, based on records of the Treasurer of the Philippine Islands, as audited by the General Auditing Office of the Philippine Government. This amount is \$93,086.64 less than the tentative amount of \$525,705.09 previously determined due from records available to the Treasury The matter is now before the Comptroller General for consideration. Department.

## INTERNATIONAL CLAIMS OF AMERICAN NATIONALS, ETC.

Expropriation of petroleum properties by Mexico.—In accordance with the agreement between the Government of Mexico and the Government of the United States, the Government of Mexico has agreed to pay a total of \$29,137,700.84 for distribution among 13 American oil companies whose properties and rights had been affected by expropriation by the Mexican Government. The Secretary of State has certified to the Secretary of the Treasury for payment the claims of twelve companies aggregating \$23,592,101. The claim of the remaining company in the amount of \$403,890 has not yet been certified for payment. The balance of \$5,141,709.84 represents interest at 3 percent from March 18, 1938. To date, \$24,630,702.83 in principal and interest has been distributed to claimants.

Settlement of Mexican Claims Act of 1942.—In accordance with the provisions of the Settlement of Mexican Claims Act of 1942, as amended, the Secretary of the Treasury authorized distributions to June 30, 1947, totaling 46.5 percent of the principal amount of awards and appraisals certified for payment by the Secretary of State or the American Mexican Claims Commission. The status of compensation for claims handled under the convention between the United States and Mexico dated November 19, 1941, is set forth in the following table:

Settlement of War Claims Act of 1928; World War I claims.—The Settlement of War Claims Act of 1928 (45 Stat. 254) authorized the Secretary of the Treasury to make payments on account of claims arising out of World War I: (1) awards of the Mixed Claims Commission, United States and Germany, for claims of American nationals against the Government of Germany, (2) awards of the War Claims Arbiter for claims of German, Austrian, and Hungarian nationals against the Government of the United States, and (3) awards of the Tripartite Claims Commission for claims of American nationals against the Governments of Austria and Hungary. For a more detailed discussion of these awards and payments see pages 123 to 128 of the annual report for 1941.

95, 616, 68

Public Law 375, approved August 6, 1947, amends the Settlement of War Claims Act of 1928 by changing the order of priority of payment to make possible a further distribution to the holders of Class III awards of the Mixed Claims Commission. Payment under the act is to be made from funds to be certified by the Office of Alien Property for deposit in the German special deposit account. Payment will be on account of interest accrued on awards in excess of \$100,000, but for the purpose of accumulating further interest, the principal amount of each award shall be reduced by the amount paid.

The following table sets forth the status of awards of the Mixed Claims Commission.

Status of awards of Mixed Claims Commission in favor of American nationals as of Sept. 30, 1947 1

<sup>1</sup> Includes payments on account of Private Law 509, approved July 19, 1940.

Under the Settlement of War Claims Act of 1928, it was the duty of the War Claims Arbiter, within certain limitations, to hear the claims of German, Austrian, and Hungarian nationals and to determine the fair compensation to be paid by

and frungarian nationals and to determine the fair compensation to be pair by the United States for ships seized, patents sold or used by the United States, and a radio station sold to the United States during World War I.

The Treasury has made payment up to June 30, 1935, of 50 percent of the amount of all awards made by the War Claims Arbiter in favor of German nationals as required by paragraph 7, of section 4 (c) of the Settlement of War Claims Act of 1928. No payments were made on these awards subsequent to that date.

that date.

The following summary shows the number and amount of awards in favor of German nationals certified to the Treasury for payment, the payments made on account, and the balance due thereon as of September 30, 1947:

Status of awards of War Claims Arbiter in favor of German nationals as of Sept. 30, 1947

<sup>1</sup> For details, see the 1945 annual report, p. 150.

The awards entered by the Tripartite Claims Commission against Hungary, in favor of American nationals, amounted to \$199,975.57. During the fiscal year 1947, no payments were made on account of such awards. As of June 30, 1947, awards aggregating \$7,257.35 had not been paid because claimants had not filed

applications as required by law.

Claims of American nationals against Turkey.—The Special Claims Commission, United States and Turkey, established under the agreement of December 24, 1923 (see page 196 of the annual report for 1940 for further details of this agreement), made awards in 33 cases aggregating \$899,338.09, which were reduced by \$70,891.06 on account of expenses incurred by the United States, leaving net awards amounting to \$828,447.03 payable from funds received from the Republic of Turkey. Under the provisions of the act of February 27, 1896 (29 Stat. 32), these awards were certified on August 19, 1937, by the Secretary of State to the Secretary of the Treasury for payment. During the fiscal year 1945 the final installment of payment was received from the Republic of Turkey, and made available for payment to the claimants.

As of June 30, 1947, \$822,503.56 had been paid to claimants, leaving a balance of \$5,943.47 against which applications for payment have not been received.

## APPRAISALS OF COMMODITY CREDIT CORPORATION

Appraisal of assets and liabilities of the Commodity Credit Corporation.—The act approved March 8, 1938 (52 Stat. 107), as amended by the act approved April 12, 1945 (59 Stat. 50), requires the Secretary of the Treasury to make an appraisal as of June 30 of each year of the assets and liabilities of the Commodity Credit Corporation to determine the net worth of the Corporation. In the event that any such appraisal shall establish that the net worth of the Corporation is less than \$100,000,000, the Secretary of the Treasury is to submit an estimate and recommend that the Congress appropriate the funds necessary to restore the capital impairment. In the event that any appraisal shall establish that the net worth of the Corporation is in excess of \$100,000,000, such excess shall be deposited by the Corporation in the Treasury, as miscellaneous receipts. The act approved February 28, 1944 (58 Stat. 105), requires the Comptroller General to make an annual audit of the financial transactions of the Corporation beginning with the fiscal year 1945 and to furnish a copy of each audit report to the Secretary of the Treasury for consideration in appraising the assets and liabilities for determining the net worth of the Corporation in accordance with the provisions of the act of March 8, 1938, as amended.

The appraisal for the fiscal year ended June 30, 1946, revealed a capital impairment of \$641,832,080.64. Appropriations made directly to the Treasury for the restoration of the Corporation's impaired capital through June 30, 1944, totaled \$472,287,649.33, and surpluses covered into the Treasury amounted to \$71,572,244.69. Subsequent to June 30, 1944, the Congress effected restorations of impaired capital by authorizing and directing the Secretary of the Treasury to discharge indebtedness of the Corporation to the Treasury by canceling the Corporation's notes for an amount equivalent to the capital impairment.

The payments and cancellations of corporate notes are as follows:

Appropriations:	
Act of June 25, 1938 (appraisal as of Mar. 31, 1938, H. Doc. 670, 75th Cong.)	\$94, 285, 404. 73
Act of Aug. 9, 1939 (appraisal as of Mar. 31, 1939, H. Doc. 317, 76th Cong.)	119, 599, 918. 05
Act of July 3, 1941 (appraisal as of Mar. 31, 1941, H.	
Doc. 248, 77th Cong.)  Act of Apr. 25, 1945 (appraisal as of Mar. 31, 1944, H.	1, 637, 445. 51
Doc. 48, 79th Cong.)	1 256, 764, 881. 04
Total appropriations	472, 287, 649. 33

Includes \$39,436,884.93 appropriated for capital impairment, applicable to Mar. 31, 1943, appraisal.

Cancellation of obligations of the Corporation held by the Treasury:

Act of July 20, 1946 (appraisal as of June 30, 1945, H. Doc. 54, 79th Cong.)

Act of May 26, 1947 (appraisal as of June 30, 1946, H. Doc. 186, 80th Cong.)

Cong.)

(41, 832, 080, 64, \$1, 563, 288, 641, 64)

Net payments to Corporation to restore impairment of capital

(1, 964, 004, 046, 28)

# LIQUIDATION OF FEDERAL AGENCIES

Lend-lease fiscal operations.—Pursuant to Executive Order No. 9726, dated May 17, 1946, the Treasury Department assumed control over fiscal records on lend-lease and reciprocal aid, effective at the close of business on May 31, 1946. Two major operations are involved in the work taken over: (1) Accounting and reporting on appropriations, allocations, and transfers to foreign governments, and (2) billing and collecting for reimbursable supplies and services furnished to foreign governments.

In most lend-lease transactions the United States Government furnished defense articles or services required for the successful prosecution of the war, with the understanding that all articles not destroyed, lost, or consumed are subject to recapture by the United States. In the language of the Lend-Lease Act, "the benefit to the United States may be payment or repayment in kind, or property or any other direct or indirect benefit which the President deems satisfactory."

In addition, there were agreements to furnish articles through lend-lease procurement facilities. Financial arrangements required (1) payment in advance of procurement, (2) immediate payment upon rendition of a bill, or (3) credit arrangements. In the first instance, lend-lease facilities were made available only where procurement through normal commercial channels was not feasible. In the second instance, foreign governments were permitted to submit lend-lease requisitions calling for cash payment with the understanding that immediate cash settlement would be made after delivery on the basis of actual billings.

In cases involving credit arrangements, agreements of several types were concluded with foreign governments. Treaty agreements made early in the war with 18 American republics provided that repayment for a certain percentage of the cost of defense articles and services supplied under the Lend-Lease Act would be made over a period of years according to the financial capacity of each country.

A second type of agreement was concluded with certain governments providing that articles and services contracted for prior to the cessation of hostilities would be delivered and the foreign governments would pay for such articles and services over a thirty-year period with interest.

over a thirty-year period with interest.

In some cases, final settlements were agreed to, providing, in most cases, for interest and principal payments over a period of years. Some of these final settlements provided offset of debts or claims in specified categories with or without transfer of funds. Such agreements may cover lend-lease transactions only or may include sales of surplus materials and other types of financial transactions.

Under the Lend-Lease Act, defense articles and services under all agreements were provided to the amount of \$50,377,618,339.74 between March 11, 1941, and March 31, 1947. Reverse lend-lease, consisting of articles and services furnished by foreign governments to the United States up to September 2, 1945, amounted to \$7,819,322,790.90. Between March 11, 1941, and June 30, 1947, funds received from foreign governments amounted to \$1,654,930,573.96. Of this amount a total of \$1,149,722,632.10 has been covered into the United States Treasury as miscellaneous receipts.

Other war agencies.—Under Executive Order 9471 of August 25, 1944, the Division of Central Administrative Services of the Office for Emergency Management was abolished and its functions were transferred to the various constituent agencies of that office. On December 1, 1944, the Bureau of Accounts took over the liquidation of the residual affairs of the Division. The work of liquidation relates mainly to winding up fiscal matters, including such action as examining and certifying outstanding obligations for payment, making administrative recommendations on claims under expired appropriations, answering exceptions taken by the General Accounting Office to prior payments, collecting moneys due the United States, closing out appropriation and fund accounts, and preparing permanent records for transfer to the National Archives. Aside from the fiscal work certain other incidental functions are performed, such as disposing of surplus property, placing or separating excess personnel, and handling general administrative matters arising out of prior transactions.

Similar arrangements were effected by the President for other war agencies

as follows:

Name of agency	Authority for liquidation	Liquidation commenced	
Office of Civilian Defense.  War Refugee Board Office of Censorship. Office of War Information. Committee on Fair Employment Practice. Price Decontrol Board.	Executive Order 9562. Executive Order 9614. Executive Order 9631. Executive Order 9608. President's letter of May 18, 1946. President's letter of June 30, 1947.	July 1, 1945 Sept. 16, 1945 Nov. 16, 1945 Jan. 1, 1946 May 18, 1946 June 30, 1947	

In anticipation of the ultimate liquidation of the Office of Defense Transportation created by Executive Order 8989 of December 18, 1941, arrangements were made whereby the Bureau of Accounts undertook to perform the fiscal functions required for that agency on a reimbursable basis commencing as of January 1, 1946. Such services include the maintenance of appropriation and fund accounts, the performance of incidental audit work, preparation of pay rolls, and the preparation of financial reports.

Federal control of railroads.—The Treasury continued during the fiscal year 1947

Federal control of railroads.—The Treasury continued during the fiscal year 1947 the liquidation of matters growing out of the control of the American transportation system which was exercised through the United States Railroad Adminis-

tration during the period from December 28, 1917, to February 29, 1920.

Total receipts on account of the Federal control of railroads for the fiscal year 1947 were \$4,111.06, and expenditures were \$3,220.06, resulting in net receipts of \$891.00, as compared with net receipts of \$1,060.84 for 1946. During 1947, there was transferred from the appropriation to the surplus fund of the Treasury the sum of \$78,000.

At the close of business on June 30, 1947, the cash and appropriation balance

aggregated \$26,615.43 as compared with \$103,724.43 at the close of 1946.

A statement of receipts and expenditures follows:

Receipts and expenditures in connection with Federal control of railroads, fiscal years 1946 and 1947

## SUPERVISION OF CORPORATE SURETIES

The Secretary of the Treasury, under the act of Congress approved August 13, 1894 (28 Stat. 279), as amended by the act approved March 23, 1910 (36 Stat. 241), issues through the Section of Surety Bonds, Bureau of Accounts, certificates of authority to corporate surety companies to qualify as acceptable sureties on bonds and other obligations in favor of the United States.

On June 30, 1947, there were 91 companies holding certificates of authority qualifying them as sole sureties on recognizances, stipulations, bonds, and undertakings permitted or required by the laws of the United States, to be given with one or more sureties. There were also 8 companies holding certificates of authority authorizing them to act only as reinsurers on bonds in favor of the United States. During the year one certificate of authority was issued to a company qualifying it as sole surety on bonds in favor of the United States, and one certificate of authority was issued to a company qualifying it to act as a reinsuring company only.

During the year 50,752 bonds and consent agreements were examined by the Section of Surety Bonds and approved as to corporate surety.

#### FINANCIAL REPORTING

In accordance with the requirements of title 5, section 264, United States Code, a Combined Statement of Receipts, Expenditures, and Balances of the United States Government is transmitted to the Congress each year, designating the amounts of receipts, whenever practicable, by ports, districts, and States, and the expenditures by each separate head of appropriation. This report, which is required to be submitted to the Congress on the first day of the regular session in each year, is also printed for public distribution.

Other financial statements pertaining to the receipts, appropriations, and expenditures of the Government and its various agencies are prepared periodically during the year for inclusion in the daily Treasury statement and the

monthly Treasury Bulletin.

A summary report is compiled monthly from financial data submitted by the departments and agencies under Budget-Treasury Regulation No. 1 (Executive Order 8512, as amended). This summary report consists of a series of tables showing the current status of the appropriations and contract authorizations available to each agency of the Government during the current fiscal year.

Quarterly statements of assets, liabilities, and capital of Government corporations and credit agencies, and other data relating to the financial condition of such corporations and credit agencies are compiled from financial data submitted by the corporations and credit agencies under Budget-Treasury Regulation No. 3 (Executive Order 8512, as amended) for inclusion in published reports. A statement of guaranteed and contingent liabilities of the United States is also published in the daily Treasury statement on the first day of each month. These statements, as of June 30, 1947, will be found as tables 21, 22, and 83.

## OTHER FUNCTIONS

Refunds under Renegotiation Act.—The Third Deficiency Appropriation Act, 1946, approved July 23, 1946, appropriated \$15,000,000 together with the unexpended balances of funds previously appropriated to enable the Secretary of the Treasury to make the refunds as provided by section 403 of the Renegotiation Act, and to refund any amount finally determined to have been collected erroneously by the United States. In accordance with the act, refunds are paid by the Secretary of the Treasury on the basis of certificates made by the War Contracts Price Adjustment Board. Through June 30, 1947, 77 claims have been paid, aggregating \$7,458,128.42.

Substitute check procedure.—Public Law 243, approved December 3, 1945, and effective December 1, 1945, authorized the Secretary of the Treasury to issue substitute checks from a substitute check account to replace lost, stolen, and mutilated checks drawn on the Treasurer of the United States. Regulations, procedure, and instructions pertaining to this law were placed into effect in January 1946. Under this legislation it has been possible to speed up and simplify the settlement of claims for lost checks. The following is a report of checks

issued during the fiscal years 1946 and 1947:

	Fiscal year	Number of duplicate checks issued (Prior law)	Number of substitute checks issued (P. L. 243)
1946		28, 856	31, 719
1947.			31, 719 48, 252

Outstanding liabilities.—Under section 21 of the Permanent Appropriation Repeal Act, approved June 26, 1934 (48 Stat. 1235), checks, with certain exceptions, which have remained outstanding one full fiscal year after the fiscal year in which issued were no longer payable by the Treasurer of the United States, but were required to be covered into "outstanding liabilities" trust funds with credit to the account of the individual payee or owner. Claims for the proceeds

of such checks have been settled by the General Accounting Office.

Under the established procedure, the General Accounting Office, after reconciling the accounts of the various Government disbursing officers, certifies to the Treasury a list of checks which have been outstanding and unpaid for one full fiscal year. On the basis of such certifications the aggregate amount of these over-age checks is transferred from the accounts of the disbursing officers concerned to an account for "outstanding liabilities." Due to the tremendous increase in the number of checks issued, reconciliation of some accounts, notably the major military and naval disbursing accounts, was necessarily delayed. Many claims could be handled only by a special report in each case. This increased the work and ultimately delayed payment of claims. An arrangement was worked out between the Treasury and the General Accounting Office under which preliminary

transfers were made to the "outstanding liabilities" trust fund from the major military and naval officers' disbursing accounts before these accounts had been reconciled. By making funds available, the number of special reports was reduced materially, making possible immediate payment of settlements upon their receipt from the General Accounting Office.

The increase in activities relative to over-age checks for the fiscal years indicated

is set forth below:

	1944	1945	1946	1947
Number of items covered	65, 971	81, 363	82, 627	687, 578
	4, 081	7, 653	52, 706	42, 180
	5, 841	8, 211	37, 429	72, 331

This activity hereafter will be greatly reduced because under the provisions of Public Law 171, approved July 11, 1947, checks, with certain exceptions, are payable for a period of ten years from the date of issue.

Colorado River Dam fund.—The Colorado River Dam fund was established under the act of December 21, 1928 (43 USC 617). The Annual Report of the Secretary of the Treasury for 1946 (p. 119) sets forth the background of the fund. Its present status is as follows:

Status of Colorado River Dam fund as of close of each operating year, 1933 through 1947

<sup>1</sup> Excludes \$25,000,000 of advances allocated to flood control, repayment of which is deferred to June 1, 1987.

Government Losses in Shipment Act.—Prior to July 1937, shipments of money securities, documents and the like, made by Government departments and agencies, were in most instances protected while in course of shipment by insurance provided under contracts with private companies. The Government Losses in Shipment Act (50 Stat. 479), which became effective July 1, 1937, provided for the establishment of an insurance plan within the Government under which the United States would assume the risks on its shipments of valuables, thereby obviating

Repayments deposited are applied first to net interest charge, second to advances.

Includes repayment of advances, \$6,267,609.35.

Includes repayment of advances, \$1,076,408.77.

Includes overpayment of interest in the amount of \$825,902.82, to be adjusted.

the necessity of purchasing insurance from private companies to cover such shipments. This self-insurance plan has resulted in a substantial monetary saving to the Government. The act is administered by the Treasury Department, and the Secretary of the Treasury has prescribed regulations governing the shipment of valuables by Government departments and agencies under coverage Also, the Secretary has declared, in accordance with the provisions

of the act, what articles, things, or representatives of value may be considered to be "valuables" within the meaning of that term as used in the act.

Under authority of the act a revolving fund was set up in the Treasury from which payments are made for valuables lost, destroyed, or damaged while in course of shipment. The act authorized an initial appropriation of \$500,000 to the fund, and it further authorized annual appropriations of \$200,000 to be made to the fund, beginning with the fiscal year 1939 and ending with the fiscal year 1948, inclusive, and from time to time such additional amounts as might be necessary to carry out the provisions of the act. However, to June 30, 1947, only \$602,000 had actually been appropriated to the fund. The balance of \$91,803.13 in the securities trust fund was transferred to this fund, as provided in the amendment to the act approved August 10, 1939 (53 Stat. 1358), making a total of \$693,803.13 available for payment of losses under the act. In addition, all recoveries and repayments effected in connection with the operation of the fund are deposited currently to the credit of the fund and may be used for payment of losses.

Originally the payments which could be made out of the fund were restricted to reimbursement for losses which resulted from the shipment of valuables; however, subsequent legislation has made the fund available for the payment

of other types of losses, as follows:

(a) Payments may be made out of the fund for losses arising from the agency functions performed by the Post Office Department for the Treasury, regardless of the manner in which the losses occur, in connection with the sale by post offices throughout the country of United States savings bonds, United States savings stamps, etc. Such losses may occur as a result of a fire, theft, embezzlement, flood, tornado, shipment of securities and funds, burglary or robbery of a post office, and similar contingencies.

(b) The Secretary of the Treasury is authorized by the amendment to the act approved August 10, 1939, to issue agreements of indemnity for the purpose of enabling Government departments and agencies to obtain the replacement of any instrument or document, such as a bank draft, cashier's check, certified check, warehouse receipt, and the like, received by the United States or by any of its agents in their official capacity, which, after having been so received, became

lost, destroyed, or mutilated to such an extent as to impair its value.

(c) Under the provisions of section 22 (i) of the Second Liberty Bond Act, as amended by the Public Debt Act of 1943 (Public Law 34) and further amended by the Public Debt Act of 1945 (Public Law 28), several types of financial institutions may qualify as paying agents of United States savings bonds, and the fund is available for the replacement of any losses resulting from payments made

in connection with the redemption of such bonds.

Section 3 of the Government Losses in Shipment Act, as amended provides that when the Secretary of the Treasury determines that replacement of a loss can be made by credit in the account of the Government department or agency presenting the claim, without actual or ultimate injury to the United States, settlement may be made in that manner; therefore, in such a settlement no payment is made out of the fund on account of the loss. The Comptroller Genpayment is made out of the fund on account of the loss. The Comptroller General of the United States is accordingly notified by the Treasury when a claim is settled in such manner, in order that he may allow credit for the amounts involved

in his settlement of accounts of the Government officer concerned.

The reported monetary value of shipments made by Government departments and agencies during the fiscal year 1947 under the provisions of the Government Losses in Shipment Act, as amended, of the classes of valuables which were covered by the Treasury's insurance contracts with private companies prior to the enactment of the act, amounts to \$169,117,737,794. It is estimated that the Government saved more than \$3,500,000 during the fiscal year 1947 in insurance premiums on such shipments and that it has saved more than \$21,200,000 in insurance premiums on its shipments of valuables from the inception of the act

through June 30, 1947, by using any one of the three bases on which the estimates are made, as shown in the following table:

Estimated insurance premium savings during the fiscal years 1946 and 1947 and the total estimated savings through June 30, 1947

On basis of premium rates for—	Fiscal year 1946	Fiscal year 1947	August 15, 1937, through June 30, 1947
Fiscal year 1938 <sup>1</sup>	\$3, 928, 000	\$3, 531, 000	\$21, 277, 000
Fiscal year 1937 <sup>2</sup> .	4, 901, 000	4, 406, 000	26, 748, 000
Fiscal years 1936–38 <sup>3</sup> .	4, 717, 000	4, 240, 000	25, 726, 000

Lowest rates under insurance contract system.

Rates in effect at time estimates of insurance premium savings were presented to Congress.
Average based on rates effective in last three years of Government insurance contract system.

Other classes of valuables with an aggregate value of \$273,018,671,977 were shipped by Government departments and agencies during the fiscal year 1947 under coverage of the Government Losses in Shipment Act, as amended; however, these shipments have not been included in the calculation of estimated insurance premium savings in the foregoing table for the reason that the Government did not, as a general practice, insure them prior to July 1, 1937, the effective date of the act. From the inception of the act through June 30, 1947, Government departments and agencies have reported shipments of valuables in an aggregate amount of \$2,299,880,162,140 as having been made under the provisions of the act.

The following tables contain information concerning the operations of the revolving fund established under authority of the Government Losses in Shipment Act and reflect the Government's experience in its operation of the self-insurance plan.

Agreements of indemnity issued by the Treasury from Aug. 10, 1939, through June 30, 1947

<sup>2</sup> Includes payment in the amount of \$64.44 representing an excess recovery previously paid into the fund from the securities trust fund.

#### FOREIGN FUNDS CONTROL<sup>1</sup>

Under section 5 (b) of the Trading with the Enemy Act, as amended, and Executive Orders 8389, as amended, and 9193, as amended, the Treasury Department, through Foreign Funds Control, formulates and administers controls over foreign-owned property and regulates certain international financial transactions.

Over 54,000 applications for licenses to effect transactions otherwise prohibited by the act and Executive orders were reviewed during the fiscal year 1947 by Foreign Funds Control, and the Federal Reserve Banks acting as field agents. This is to be compared with some 112,000 applications reviewed during the preceding year.

In accordance with the policy of liquidating Foreign Funds Control as rapidly as possible and at the same time protecting the basic interests of this Government, the Washington staff was reduced from a total of 300 as of June 30, 1946, to 53 as of June 30, 1947. At the start of the last fiscal year there were three Federal Reserve Banks operating as field agents, but at the present time only the Federal Reserve Bank of New York conducts field operations for Foreign Funds Control. In August 1946, Foreign Funds Control closed its Philippine office.

A further discussion of Foreign Funds Control activities during the fiscal year will be found on page 53 of this report.

From the securities trust rund.

3 Includes approximately \$15,000 in settlement of losses of stamps (includes unissued documentary internal revenue stamps and motor vehicle use tax stamps which were completely destroyed, and redeemed United States savings stamps) which do not represent an actual monetary loss to the Government. Approved claims in the amount of \$1,499.10 in process of settlement not included.

<sup>1</sup> Shortly after the close of the fiscal year transferred to the newly created Office of International Finance.

## BUREAU OF INTERNAL REVENUE

The Bureau of Internal Revenue is responsible for the assessment and collection of all taxes imposed by any law providing internal revenue. It also has responsibilities under statutes which, while not imposing taxes, relate to internal revenue. Among these are the Federal Alcohol Administration Act, the Liquor Enforcement Act of 1936, the Federal Firearms Act, and the Stabilization Act of

Certain of the major functions of the Bureau are described herein. detailed description will be found in the Annual Report of the Commissioner of

Internal Revenue for the fiscal year 1947.

#### Collections

Internal revenue collections for the fiscal year 1947 totaled \$39,108,273,000. This was 3.8 percent less than the preceding year. The decline was due to the repeal of (a) the excess profits tax, effective in general with respect to taxable years beginning after December 31, 1945, (b) the capital stock tax, effective with respect to taxable years ending after June 30, 1945, and (c) the declared value excess profits tax, effective with respect to income tax taxable years ending after June 30, 1946; and to the reduction of the individual income tax, effective January 1, 1946.

A comparison of collections from the principal sources of revenue for the fiscal

years 1946 and 1947 follows.

Source	Fiscal year	Fiscal year	Percent in-
	1946	1947	crease or
	In thousand	ls of dollars	decrease (-)
Income and profits taxes: Individual (including withheld) Corporation	18, 704, 536 12, 553, 602	19, 343, 297 9, 676, 757	3. 4 22. 9
Total income and profits taxes  Employment taxes Estate and gift taxes	31, 258, 138	29, 020, 054	-7. 2
	1, 700, 828	2, 024, 365	19. 0
	676, 832	779, 291	15. 1
Alcoholic beverage taxes Tobacco taxes Stamp taxes	2, 526, 162	2, 474, 756 1, 237, 768	-2.0 -6.2
Manufacturers' excise taxes	87, 676	79, 978	-8.8
	922, 671	1, 425, 395	54.5
	492, 046	514, 227	4.5
Other taxes Total collections	1, 842, 050	1, 552, 439	-15. 7
	40, 671, 922	39, 108, 273	-3. 8

Note, -Detailed internal revenue collections appear in table 7. Figures exclude collections for credit to trust accounts.

#### Enforcement Activities

The fiscal year 1947 marked the second year of the concerted campaign to rengthen the Bureau's enforcement program. The results are exemplified by a strengthen the Bureau's enforcement program. 50.6 percent increase in additional assessments.

The preponderance of additional tax cases involved unintentional errors, but quite frequently cases involving gross fraud were encountered. This latter group resulted for the most part from the efforts of individuals to conceal profits from black market and other illicit activities. Some resulted from efforts of both corporations and individuals to avoid payment of the high taxes brought about by the coincidence of high rates and high income during the war.

At the beginning of the year the campaign was stimulated by the entry into productive work of the several thousand new deputy collectors, auditors, revenue agents, and special agents who had been recruited and trained in the preceding Before the end of the year, however, the work was hampered by the loss of

several hundred of these men.

The effectiveness of the enforcement campaign is indicated by the following comparisons of additional assessments and distraint warrant collections in recent years:

	Fiscal year	Additional assessments	Distraint warrant collections 1
· ,		 In thousand	ls of dollars
1943		 438, 441 566, 058 730, 974	62, 572 73, 127 83, 339
946		 922, 428 1, 280, 218 1, 928, 610	166, 48 198, 73 209, 45

Distraint warrant collections represent primarily collections of undisputed amounts which taxpayers have failed to pay when due. Occasionally, it becomes necessary to collect additional assessments by distraint warrant, but these cases are estimated to amount to only 5 percent of the total distraint warrant collections.

Audits and investigations of income and profits tax cases accounted for slightly over 90 percent of the additional assessments; the balance is attributable to estate, gift, alcoholic beverage, tobacco, employment, and all other taxes.

To a large extent, these assessments were made as the result of errors and omissions discovered in the routine audit of returns. Not counting special fraud investigations, a total of 2,944,539 returns of all kinds—including 2,283,055 individual income tax returns and 230,096 corporation income and excess profits tax returns—were examined or investigated under procedures involving direct contact, either oral or by correspondence, with taxpayers. The number of returns subjected to these enforcement processes was 43.8 percent greater than in the preceding year. Additional tax was assessed in about half of these cases. However, this proportion would not necessarily hold true if all returns were investigated, since the examined returns were selected by special procedures designed to segregate the returns most likely to need correction.

In addition to the above examinations, 4,125 fraud investigations were made, resulting in prosecution recommendations against 1,332 individuals—more than double the previous year. Cash penalties of a civil nature were assessed in many of the cases which did not warrant criminal prosecution.

The growth of criminal prosecution cases as a result of the campaign is illustrated by the fact that the number of persons convicted on tax evasion charges grew as follows:

Fiscal year	Individuals convicted
1945.	. 65
1946. 1947.	149 182
ADTI	1

Besides cases of outright tax evasion, numerous investigations also were made under various regulatory statutes, especially the Federal Alcohol Administration Act.

#### Work-Load

Neither legislative changes nor the cessation of hostilities caused any material change in the year's work-load of the Bureau. It started the year with a backlog of 89,672,668 returns of all types awaiting action. It received or reopened 88,141,884 returns (an increase of 21.5 percent), and ended the year with a backlog of 78,892,062 returns (a decrease of 14.5 percent). All but 454,933 of the returns awaiting action at the end of the year were income or profits tax cases.

While these statistics give a broad view of the work-load of the Bureau, it must be understood that no two returns require the same amount of attention, and that in fact many returns are disposed of after only superficial examination. In many cases, the expenditure of investigative resources would be uneconomical.

However, a sizable number of cases, worthy of investigation, cannot be investigated at this time because of the lack of sufficient personnel.

of the 98,922,490 returns of all types disposed of during the year, 95,927,951 were disposed of without audit or investigation. This is the primary factor in the reduction of the backlog of cases during the year.

The balance of 2,994,539 returns disposed of during the year were subjected to audit and investigation, as described in the "Enforcement activities" section of

this report.

The foregoing refers to the enormous quantity of returns which must be processed, but the work-load also includes many thousands of complicated claims for adjustments based on section 722 and the various "carry-back" and "amortization of emergency facilities" provisions of the Internal Revenue Code. While these cases are not nearly so numerous, their complexity and importance necessitates the diversion of a large percentage of the best trained technicians in the Bureau. Section 722, which allows relief from excess profits tax for corporations under certain circumstances, had as of the close of the year resulted in the filing of 46,630 applications for excess profits tax reductions totaling \$5,037,538,106, of which 25,840 claims totaling \$4,233,897,775 were still pending at the end of the year. "Carry-back" allowances of \$1,004,752,676 and readjustments of amortization of emergency facilities amounting to \$53,443,148 also were made during the year

under the "quick refund" provisions of the Tax Adjustment Act of 1945.

#### PERSONNEL

The accounting, investigative, legal, and other technical work of the Bureau necessarily requires a high percentage of trained personnel. Therefore, in many cases, this was a limiting factor in the operations of the Bureau since it was not

possible to hire, and to retain, the desired number of persons.

For this reason, attention is drawn to the loss during the year of 6,863 employees, mostly through deaths, retirements, and resignations, although a small number of persons were dismissed for inefficiency or other causes. Most of the loss resulted from a policy adopted in the last four months of the fiscal year to suspend all hiring and promotions of personnel in order to assure maintenance of the Bureau's costs within the available appropriations. Such reduction in personnel is exclusive of the substantial dismissals which resulted from reduced appropriations for the following year.

Changes in the Bureau's personnel during the year are shown in the following

table:

Summary of personnel, Bureau of Internal Revenue, June 30, 1946, as compared with June 30, 1947

	Number on p	Number on payroll as of—		
Branch of service	June 30, 1946	June 30, 1947	Increase or decrease (—)

Salary Stabilization Unit	136 1, 914	15 278	-121 -1,636	
Total field service	54, 549	48, 059	-6,490	
Grand total	59, 693	52, 830	-6, 863	

# COST OF ADMINISTRATION

The entire cost of the Bureau during the year, including salaries, equipment, travel, supplies, etc., but exclusive of amounts refunded to taxpayers, was \$203,916,822. Due to the difficulty of estimating some costs incurred prior to the close of the year, there was an unexpended balance of \$500,578 in the \$204,-417,400 appropriation for the Bureau.

Since the Bureau collected \$39,108,273,000 during the year, the cost of collection was 52 cents per \$100 revenue. In the previous year, when collections were slightly higher and governmental salaries were lower, the average was 43 cents

per \$100.

## REFUNDS

Refunds of taxes and interest on refunds, required by law, are paid out of a separate appropriation. They amounted to \$2,882,735,904, or slightly less than in the preceding year.

Continued emphasis on speed in making refunds resulted not only in convenience to taxpayers but also in substantial interest savings. Interest payments on refunds declined from \$66,125,230 in the fiscal year 1946 to \$49,605,704 in 1947.

## SETTLEMENT OF DISPUTES

Efforts to settle tax disputes without expensive and time-consuming litigation yielded exceptionally good results during the year. Of 41,784 income, profits, estate, and gift tax returns in which taxpayers had protested the examiners' findings, 36,536 were settled by the Bureau and 5,248 were appealed to the Tax Court. As the result of hearings conducted in cases pending before the Tax Court, an additional 3,258 returns were settled by stipulation, thereby reducing substantially the number of cases to be tried.

## SALARY STABILIZATION

Under authority of Executive Order 9801, dated November 9, 1946, the Bureau suspended enforcement of the wartime salary stabilization regulations, and proceeded to substantially liquidate its work in this field. By the end of the year, there remained on hand only a small number of contravention cases, which arose prior to the Executive order.

## ADDITIONAL DATA IN COMMISSIONER'S REPORT

In order to conserve paper and printing costs, there have been omitted from this report considerable information and statistics which are set forth in detail in the annual report of the Commissioner of Internal Revenue.

## LEGAL DIVISION

The General Counsel is by statute the chief law officer of the Treasury Department, and is directly responsible to the Secretary for the work of the Legal Division, and such other duties as may be assigned to him by the Secretary from time to time. The Legal Division is composed of the legal staff in the Office of the General Counsel and the legal staffs in the Bureau of Internal Revenue, Bureau of Customs, Bureau of Narcotics, Bureau of the Public Debt, Bureau of Federal Supply, Bureau of the Comptroller of the Currency, Foreign Funds Control, and U. S. Coast Guard. The General Counsel, with the assistance of his legal staff, gives advice on legal problems to the Secretary, the Under Secretary, the Fiscal Assistant Secretary, Assistant Secretaries, and the administrative officers of the Department; exercises general supervision over the work of the legal staffs in the aforesaid bureaus; and serves as legal adviser to the branches of the Department not having legal staffs, such as the Division of Monetary Research (now included in the Office of International Finance), Bureau of Accounts, Bureau of Engraving and Printing, Bureau of the Mint, U. S. Secret Service, Treasurer's Office, and the U. S. Savings Bonds Division.

Office, and the U. S. Savings Bonds Division.

The activities of the Legal Division embrace all legal questions arising in connection with the administration of the duties and functions of the various bureaus, divisions, and other branches of the Department. These activities also include consideration of legal problems relating to broad financial, economic, and social programs and problems with respect to international cooperation in the monetary

and financial fields. A more complete description of the scope of the activities of the Legal Division is to be found in the various administrative reports of bureaus and divisions of the Department contained elsewhere in this report.

reaus and divisions of the Department contained elsewhere in this report.

In addition, the legal staff in the Office of the General Counsel handles legal matters relating to legislation, including the drafting of legislation and preparation of reports to committees of Congress and the Bureau of the Budget; appears before congressional committees; prepares and reviews Executive orders and proclamations and departmental rules and regulations; prepares formal and informal opinions and memoranda for the guidance of the administrative officers of the Department; drafts or approves contracts and amendments to contracts; handles legal problems pertaining to gold and silver transactions and the administration of the stabilization fund; conducts the legal work in connection with railroad securities held by the Secretary of the Treasury pursuant to loans under the Transportation Act of 1920; performs the necessary pretrial work in litigation involving Treasury activities and conducts litigation before the Tax Court of the United States; coordinates all aspects of the settlement of tort claims; passes upon legal questions arising in the payment of Mexican claims and payments to holders of awards of the Mixed Claims Commission; makes recommendations to the Secretary in matters relating to compromise settlement of general claims of the United States; performs the legal work in connection with licensing and disbarment of practitioners before the Treasury Department and of customhouse brokers; handles all legal work in connection with the removal of Treasury employees on grounds of disloyalty; and supervises legal matters relative to inventions and patent rights of Treasury employees, to claims of Treasury employees closure of official information.

closure of official information.

During the fiscal year 1947, among the many special problems handled by the Legal Division were those relating to the collection of the revenues and related problems; the issuance of public debt obligations; compliance with the provisions of the Administrative Procedure Act; the formulation of Department procedure for the handling of claims under the Federal Tort Claims Act, including the preparation of necessary regulations and instructions; representation on the working committee of the President's Temporary Commission on Employee Loyalty and coordination of Treasury activities on employee loyalty; the liquidation of the residual affairs of various war agencies; the renegotiation of war contracts; the settlement of terminated war contracts and claims arising therefrom; the settlement of claims for war contractors for relief against loss under the Lucas Act (Public No. 657, 79th Cong.), and claims under section 17 of the Contract Settlement Act, 1944 (defective, informal, and quasi contracts); termination and repeal of statutes granting emergency and wartime powers; the permanent integration of the functions of the former Bureau of Marine Inspection and Navigation, Department of Commerce, with the Coast Guard and the Bureau of Customs under Reorganization Plan No. 3 of 1946; hearings involving public utility rates and other proceedings resulting in considerable savings to the United States; legal work arising in connection with Treasury participation in the activities of the National Advisory Council on International Monetary and Financial Problems which coordinates the foreign financial and lending policies and operations of the United States Government, including the policies and operations of the United States representatives on the International Monetary Fund and International Bank; and financial and monetary problems arising in connection with the occupation of foreign areas by United States forces.

The General Counsel also has general supervision of the Office of the Tax Legislative Counsel.

#### TAX LEGISLATIVE COUNSEL

The Office of the Tax Legislative Counsel, reporting through the General Counsel, advises the Secretary of the Treasury in all technical and legal aspects of tax policy and legislation. In addition, the Office represents the Treasury before the committees of Congress with respect to the technical aspects of tax legislation and also assists the legislative counsels of the House of Representatives and the Senate in the drafting of measures affecting the revenue, and aids the congressional committees dealing with tax legislation in the preparation of the technical aspects of the reports issued in connection with legislation.

During the fiscal year 1947, this Office, in cooperation with the staff of the Joint Committee on Internal Revenue Taxation and the legislative counsels of the

House and Senate, rendered technical assistance to congressional committees on the individual income tax reduction bills passed by the Congress. Other legislation in connection with which the Office assisted the Congress and advised the Secretary included the Excise Tax Act of 1947, a number of miscellaneous revenue

bills, and an act to terminate certain wartime tax provisions.

The Office represents the Treasury Department in the work of an interdepartmental committee on international tax matters, and from time to time aids in the negotiation of treaties for the prevention of international double taxation and for administrative cooperation. During the fiscal year 1947, tax discussions were held with representatives of the Governments of France, Belgium, the Netherlands, Luxembourg, the Philippines, New Zealand, Italy, Sweden, and Mexico. In addition to the work on treaties, the Office advised the United States Delegate to the United Nations Fiscal Commission regarding international tax problems. Advice is also rendered on the legal aspects of Federal-State tax relations.

This Office is the division of the Treasury Department to which the general public members of Congress and interested members of the tax beauty process.

public, members of Congress, and interested members of the tax bar can present their views with respect to proposed amendments to the tax laws. Suggestions and proposals of this character are studied and reviewed by the Office, as are also suggestions from the Bureau of Internal Revenue for improvement of tax administration, in relation to the existing tax law and tax policies sought to be effected by the Department. Studies of technical problems of a more extensive nature are frequently conducted in cooperation with advisory committees composed of prominent tax authorities outside the Government.

In addition to the work on major revenue legislation and tax treaties, the Office rendered reports on 129 bills introduced in the Congress which pertained to revenue matters. Thirty-five Treasury decisions amending existing regulations of the Commissioner of Internal Revenue, where circumstances required a revision or the establishment of new regulations for the interpretation of new legislation, were reviewed in this Office for the Secretary of the Treasury. The Office is now reviewing for the Secretary proposed closing agreements with taxpayers at the rate of approximately 110 annually, and is taking part in the periodic revision of forms necessary to the administration of the revenue laws.

## BUREAU OF THE MINT 1

The principal functions of the Mint Service consist of the manufacture of domestic coins; the safeguarding of the Government's holdings of the monetary metals, including coins in processing stages until finished and issued; and the acquisition of gold and silver bullion, payments for which are made on the basis of mint assays. Other major activities include the refining of gold and silver, the manufacture of coins for foreign governments, the issuance of Treasury licenses for the acquisition, ownership, possession, and use of gold for industrial, professional, and artistic purposes, and the production of medals and other decorations.

Seven field institutions were in operation during the fiscal year 1947: Coinage mints at Philadelphia, San Francisco, and Denver; assay offices at New York and Seattle; gold bullion depository at Fort Knox; and silver bullion depository at West Point, which operates as an adjunct of the New York Assay Office. The Bureau of the Mint in Washington administers all Mint Service activities. At the close of the fiscal year 1947 there were 1,783 employees in the Mint Service, compared with 2,547 employees a year ago.

#### Coins

Coinage.—Coinage production by the three mints during the fiscal year 1947 totaled 2,350,571,022 pieces, of which 2,016,485,295 pieces were United States coins and 334,085,727 were foreign.

<sup>1</sup> Further information concerning the Bureau of the Mint is contained in the Annual Report of the Director of the Mint.

Production of United States coins during the fiscal year 1947 increased 22 percent over the 1946 production of 1,658,127,100 pieces. The following table contains the details:

	Denomination	Number of pieces produced	Face value
Quarter dollars Dimes	*	19, 294, 695 52, 568, 400 299, 467, 000 196, 970, 200 1, 448, 185, 000	\$9, 647, 347. 50 13, 142, 100. 00 29, 946, 700. 00 9, 848, 510. 00 14, 481, 850. 00
Total		2, 016, 485, 295	77, 066, 507. 50

<sup>&</sup>lt;sup>1</sup> Includes 100,057 Iowa Centennial commemorative half dollars, and 1,700,938 Booker T. Washington commemorative half dollars.

The mints manufactured 334,085,727 coins for the following governments during the fiscal year 1947:

Government	Number of pieces produced	Government	Number of pieces produced
Colombia	24,777,000 50,117,000 600,000 114,179,000 18,306,363 21,675,000	Panama. Saudi Arabia. Venezuela. Total.	2, 650, 000 1 50, 621, 364 51, 160, 000 334, 085, 727

<sup>1</sup> Includes 121,364 gold disks.

Issue of United States coins.—The mint institutions issued 1,399,314,937 United States coins with a value of \$72,923,621 during the fiscal year 1947. Issues were as follows:

Denomination	Number of pieces issued	Face value
Silver dollars. Half dollars. Quarter dollars. Dimescent pieces. 1-cent pieces.	8, 960, 206 10, 756, 978 51, 288, 938 281, 233, 015 179, 215, 800 867, 860, 000	\$8, 960, 206, 00 5, 378, 489, 00 12, 822, 234, 50 28, 123, 301, 50 8, 960, 790, 00 8, 678, 600, 00
Total	1, 399, 314, 937	72, 923, 621. 00

Stock of coins.—The total stock of domestic coins in the United States and possessions, as of June 30, 1947, is estimated at \$1,765,007,387, comprising \$493,462,387 in standard silver dollars, \$922,656,000 in subsidiary coin, and \$348,889,000 in minor coin. These figures do not include limited amounts of United States coin which circulate as legal tender in certain Latin American countries.

#### MEDALS

The Medal Department is located at the Philadelphia Mint. Medals and other decorations authorized by the armed services constituted the bulk of the work in 1947 as in the past several years. The medals and other distinguishing devices for the Army, Navy, Marine Corps, and Coast Guard totaled over 2,400,000 pieces during the year. In addition, there were 426 private medals made and 5,649 commemorative medals sold from regular stock.

<sup>&</sup>lt;sup>2</sup> Includes 1,066,780,000 pieces with a composition of 95 percent copper and 5 percent zinc coined July-December 1946, and 381,405,000 pieces with a composition of 95 percent copper and 5 percent zinc and tin coined January-June 1947.

## GOLD AND SILVER

Bullion deposit transactions.—Bullion deposit transactions at the mints and assay offices during the fiscal year 1947 totaled 11,123, including 53 intermint Assay determinations required by the deposit transactions totaled 19,850, including 807 determinations for the intermint transfers.

Gold and silver stocks.—Gold stocks of the Treasury on June 30, 1947, were valued at \$21,266,490,450. Of this total, 607,611,117 fine ounces with a value of \$21,266,389,119 were at the Fort Knox Depository and in custody of other

Mint Service institutions.

Treasury silver stocks, exclusive of finished silver coin, totaled 1,677,806,488 fine ounces on the same date. Of this amount, 812,471,764 fine ounces were held by the Office of Defense Plants of the Reconstruction Finance Corporation, etc., and 865,334,724 fine ounces were held by Mint Service institutions.

Refineries.—During fiscal 1947, electrolytic refineries maintained at San Francisco, New York, and Denver refined 3,446,442 fine ounces of gold and 3,684,856 fine ounces of silver. In addition, 2,051,809 fine ounces of gold and

7,782,836 fine ounces of silver were subject to fire process only.

Stocks of unrefined bullion.—The stocks of unrefined bullion, in terms of the assayed fine gold and silver content, as of June 30, 1947, totaled 1,357.06 tons. Gold acquisitions.—During the year gold acquisitions, entered as classified melted receipts, amounted to \$1,538,202,712; receipts of domestic coin melted amounted to \$176,670; and transfers between mint institutions amounted to \$15,129,752—a grand total of \$1,553,509,134. These transactions included \$2,774 in gold received at \$20.67+ per fine ounce, the increment on which was \$1,923.

Silver acquisitions.—Purchases and deposits of all classes of silver at the mints and assay offices aggregated 99,066,705 fine ounces during the fiscal year 1947.

Receipts, classified according to Mint accounts, were as follows:

Class of bullion	Number of fine ounces received
Newly mined domestic silver: Purchased at \$0.7111+ per ounce Purchased at \$0.905 per ounce Silver contained in gold deposits, etc Silver received in exchange for Government-stamped bars. Recoinage bullion from uncurrent subsidiary coin. Recoinage bullion from uncurrent silver dollars Intermint transfers of silver Deposits of silver in trust by foreign governments.  Redeposits 1  Grand total.	551, 518. 51 526, 071. 71 1, 214, 392. 15 49, 917. 06 7, 730. 415. 72

<sup>&</sup>lt;sup>1</sup> Consists of Treasury stock previously on loan to the Office of Defense Plants of the Reconstruction Finance Corporation, etc.

Silver from domestic ores mined prior to July 1, 1946, was purchased at  $0.7111 \pm$ per fine ounce, in accordance with the act of July 6, 1939. Silver from domestic ores mined subsequent to July 1, 1946, was purchased at \$0.905 per fine ounce, in accordance with the act of July 31, 1946. Other miscellaneous purchases of silver, including silver contained in gold deposits, etc., were made at prices slightly under the current open-market rates. The New York daily market quotations for bar silver .999 fine ranged from a high of 90% cents to a low of 59% cents per support of the fixed party. ounce during the fiscal year.

Issue bars manufactured.—Gold issue bars manufactured in 1947 numbered 113,005, and contained 30,833,735 fine ounces of gold with a value of \$1,079,180,740. Silver issue bars manufactured in 1947 numbered 2,964, and contained 1,154,005 fine ounces of silver. In addition, the New York Assay Office manufactured 603 gold ingots containing 58,640 fine ounces, and 210,883 silver coinage ingots con-

taining 7,442,881 fine ounces for use at the Philadelphia Mint.

Sales for industrial and artistic use.—During 1947, sales of gold bars for use in industry and the arts totaled \$66,113,173. Silver sold under the authority of the act of July 31, 1946, at 91 cents per fine ounce, amounted to 8,198 fine ounces during the year. In addition, small quantities of gold and silver from the stock of ordinary bullion were sold for medals, etc.

764788---48-

Monetized silver.—During the fiscal year 1947, silver certificates in the amount of \$14,814,384 were issued by the Treasury against 11,458,000 fine ounces of silver bullion valued at \$1.29+ per fine ounce, the statutory monetary value of silver. The difference between the cost and the monetary value of the silver was \$4,473,406 which constituted seigniorage. Silver consumed in domestic coinage during the year amounted to 38,148,011 fine ounces, producing coin valued at \$52,736,147.50.

Production and Consumption of Gold and Silver in the United States

Production of gold and silver refined from ores mined in the United States and its possessions during the calendar year 1946 was as follows: Gold, 1,462,354 fine ounces with a value of \$51,182,390; and silver, 21,103,269 fine ounces. Distribution of production by State of origin appears in the annual Mint report for the fiscal year 1947.

Gold issued for use in the industrial arts in the United States during the calendar year 1946 aggregated \$199,686,837, with a return from industrial use of old jewelry, plate, scrap, etc., amounting to \$45,999,837, giving a net consumption of new gold amounting to \$153,687,000. Silver issued for use in arts and industry during the calendar year 1946 aggregated 123,646,860 fine ounces, with a return of old plate, scrap, etc., yielding 36,646,860 fine ounces, giving a net consumption of new silver equivalent to 87,000,000 fine ounces.

## DIVISION OF MONETARY RESEARCH 1

The Division of Monetary Research in the Office of the Secretary provides information, economic analyses, and recommendations for the use of the Secretary of the Treasury and other Treasury officials to assist in the formulation and execution of the monetary policies of the Department and the international financial operations of the Treasury. The studies made by the Division relate to the exchange stabilization fund, gold and silver, the flow of capital funds into and out of the United States, the position of the dollar in relation to foreign currencies, international monetary cooperation, the monetary, banking, and fiscal policies of foreign countries, exchange and trade restrictions abroad, and similar problems.

The Division also provides economic analyses in connection with the Treasury's foreign funds control and the customs activities of the Department and the duties

of the Secretary of the Treasury under the Tariff Act.

The Division also is responsible for the economic and financial work in connection with the negotiation of exchange stabilization agreements made by the United States with foreign governments and central banks for the purpose of promoting international exchange stability. The Treasury's operations under these agreements are performed under the stabilization fund, which is administered by the The Division assists the Secretary of the Treasury in carrying out his responsibilities under the Anglo-American Financial Agreement of 1946, and other matters relating to international trade and finance, including the trade agreement It also is responsible for the Treasury's work on monetary and financial problems in liberated and occupied areas.

The Division continued to perform its function of advising other departments and agencies concerning exchange rates and other financial problems encountered in operations involving foreign currencies. In particular, a continuous series of such problems has been encountered by the State, War, and Navy Departments in carrying out their normal functions in foreign countries, and in the special tasks

of administering areas occupied by United States forces.

The Director of the Division is the Secretary of the National Advisory Council on International Monetary and Financial problems, and Chairman of the National Advisory Council Staff Committee. The personnel of the Division perform staff and secretariat functions of the Council and represent the Treasury in the Council's interdepartmental work.

## BUREAU OF NARCOTICS 2

The Bureau of Narcotics is charged with the investigation, detection, and prevention of violations of the Federal narcotic and marihuana laws and of the Opium Poppy Control Act of 1942, and related statutes. It issues permits for importation of the crude narcotic drugs and for exportation and in-transit move-

<sup>&</sup>lt;sup>1</sup> Shortly after the close of the fiscal year transferred to the newly created Office of International Finance.
<sup>2</sup> Further information concerning narcotic drugs is available in the separate report of the Commissioner of Narcotics.

ment of narcotic drugs and preparations, and has authority 'to issue licenses, under certain conditions, for the production of opium poppies and manufacture of opium products therefrom. It cooperates with the Department of State in the discharge of the international obligations of the United States concerning the traffic in narcotic drugs and with the several States in the suppression of the

abuse of narcotic drugs and marihuana in their respective jurisdictions.

During the fiscal year 1947 the Bureau of Narcotics directed its activities toward the suppression of the illicit traffic in narcotic drugs and marihuana and the control of the legitimate manufacture and distribution of narcotics through the customary channels of trade. The total quantity of narcotic drugs seized in the internal illicit traffic amounted to 1,200 ounces in comparison with 4,172 ounces seized in 1946. Seizures of marihuana amounted to 700 pounds bulk, 7 pounds seeds, 10,011 cigarettes, and 845 growing plants as compared with 326 pounds bulk, 2 pounds seeds, 13,967 cigarettes, and 15,363 growing plants in 1946. The table following shows for the fiscal year the number of violations of the

narcotic and marihuana laws by persons registered with collectors of internal revenue to engage in legitimate narcotic and marihuana activities and by persons who have not qualified by registration to engage in such activities, as reported by

Federal narcotic enforcement officers.

Federal cases are made by Federal officers working independently while joint cases are made by Federal and State officers working in cooperation.
 Represents 68 cases which were compromised in the sum of \$12,155.

The importation, manufacture, and distribution of opium and its derivatives, as heretofore, were subject to a system of quotas and allocations designed to secure their proper distribution for medical needs. Additional quantities of opium were imported during the year. Coca leaf imports were sufficient for medicinal purposes, and additional supplies were available for the manufacture of nonnarcotic flavoring extracts.

Exports of narcotic drugs increased as compared with 1946, and remained considerably above the prewar level. Manufacture of opium derivatives continued high to meet export requirements and the increased medical use of codeine

tinued high to meet export requirements and the increased medical use of codeine.

The shortage of addiction drugs in the illicit markets was reflected by a large increase in thefts from wholesalers, retailers, and practitioners entitled to them for medicinal needs.

Registrations under the narcotic and marihuana laws during the year are shown by classes in the following table.

Registrations under the Federal narcotic and marihuana laws, June 30, 1947

## DIVISION OF PERSONNEL

The Division of Personnel is charged with the over-all direction and supervision of the personnel program of the Department which is administered through delegation of authority to the heads of the bureaus, offices, and divisions to act in accordance with policies, practices, and procedures established for their guidance. Advice and assistance are rendered to the personnel officers of these components in matters relating to recruitment and appointments, reductions in force, reassignments of veterans and career employees, employee grievances and discipline, efficiency ratings and appeals, leave and retirement, wage surveys, development of standards for position-classification, and conduct of classification surveys.

The health program is administered under the supervision of the Division. The Division represents the Department in negotiations with the Civil Service Commission and other central agencies on questions concerning personnel administration.

#### COMMITTEE ON PRACTICE

The Committee on Practice is an administrative and judicial body in charge of the enrollment of attorneys and agents for practice before the Treasury Department. It conducts hearings in disbarment proceedings. An attorney, not a member of the Committee, represents the Government before the Committee. All complaints are filed with the attorney for the Government, who institutes proceedings in disbarment or suspension if the charges warrant such action. The Committee also issues licenses to customhouse brokers and makes findings of fact and recommendations to the Secretary of the Treasury in proceedings for the revocation or suspension of such licenses.

The following statement summarizes the work of the Committee for the fiscal

Attorneys and agents: Applications for enrollment approved	20	
Complaints against enrolled persons: Pending July 1, 1946. Disposed of:	17	
Resignations submitted, in order to evade proceedings in disbarment or suspension, and accepted by the Committee.	5	
Reprimands Reinstated to roll	$\frac{1}{2}$	
Stricken from roll by Committee	<u> </u>	
Pending June 30, 1947	8	
Customhouse brokers: Applications for licenses approved.	· 7 <u>2</u>	
Applications withdrawn Licenses canceled	5 9	
Licenses revoked	I	

Since the organization in 1921 of the Committee on Practice 76,761 applications r enrollment have been approved and 801 disapproved. Two hundred and for enrollment have been approved and 801 disapproved. fifty-six practitioners have been disbarred from further practice before the Treasury Department, 140 have been suspended from practice for various periods, and 184 have been reprimanded.

## DIVISION OF RESEARCH AND STATISTICS 1

The Division of Research and Statistics in the Office of the Secretary serves as a technical staff for policy-forming officials of the Department on matters relating to Treasury financing, public debt management, and various general

economic problems arising in connection with Treasury activities.

For the use of the Secretary in making his financing decisions and in formulating debt-management policies, the Division prepares a variety of analyses. It draws up alternative plans in detail for each financing operation. It then analyzes the results of the operation in order to gauge its effectiveness and secure guidance for future planning. It provides estimates of the income and savings position of different classes of investors, together with information on the amounts of the outstanding public debt already held by these investors. It analyzes the relative desirability of cash pay-offs to and additional borrowing from each class, and the type of security best suited to the requirements of each class. It reviews the outlook for financing requirements during an appropriate period ahead, and suggests various financing programs which would take care of these requirements. It recommends terms for the particular securities which might be offered, covering such characteristics as rate of interest, maturity, call period, negotiability, eligibility as collateral, redemption privileges accorded to holders, and restrictions as to the amount of purchases or holdings by different classes of investors. It analyzes the relation of these securities to the maturity schedule and interest costs of the public debt, the effect of their issuance upon the market prices and owner-

or the public debt, the elect of their issuance apon the market prices and ownership distribution of outstanding Government securities, the impact of the Treasury's public debt operations on the credit structure and general economy of the country, and the long-range effects on the economy of present financing decisions. In connection with its work in Treasury financing, the Division is charged with the duty of keeping policy-forming officials of the Department posted on the outlook for Federal receipts. In addition, the facilities of the Staff are utilized by the Secretary for the preparation of official estimates of Government receipts. by the Secretary for the preparation of official estimates of Government receipts for incorporation in the President's Annual Budget Message and in intervening Budget revisions. Similarly, estimates of the revenue effects of proposed and pending legislation are prepared; these are requested both by Treasury officials and by committees of Congress.

Technical mathematical analyses needed in connection with financing and public debt problems are also prepared. This work is under the supervision of the Government Actuary, who is an Assistant Director of the Division of Research He is responsible for reports on actuarial matters involved in and Statistics.

<sup>1</sup> Shortly after the close of the fiscal year transferred to the newly created Office of the Technical Staff.

Treasury operations, and prepares actuarial estimates required by statute with respect to the operations of several Government trust funds. The Secretary of the Treasury is charged with the duty of handling the investments and other operations for most of these funds.

## DIVISION OF TAX RESEARCH

The Division of Tax Research assembles the facts and prepares the economic, statistical, and technical analyses needed (1) to aid the Secretary in the formulation of Treasury tax policy, and (2) to provide information on various tax matters, as requested, for the President, members of Congress, various Government officials, and the public. The Division provides, on behalf of the Secretary, material to aid the Ways and Means Committee of the House of Representatives, the Finance Committee of the Senate, and the Joint Committee on Internal Revenue Taxation in their consideration of tax proposals and legislation. In its work, the Division consults with the Bureau of Internal Revenue on administrative matters and with the Office of the Tax Legislative Counsel on legal matters.

The Division's functions include the preparation of basic surveys of the tax problems of the Federal Government, the devising of alternative methods of meeting revenue requirements, and the development of methods of adjusting the tax system to changing economic conditions. The tax system is analyzed with a view to obtaining revenue yields large enough to meet prospective revenue requirements and to making adjustments which will be fair to taxpayers and will avoid undesirable economic effects. Individual taxes are studied (1) to determine their effects on particular groups of taxpayers, (2) to avoid inequity among taxpayers within a given group, (3) to ascertain and develop methods of meeting administrative and compliance problems, and (4) to devise ways of integrating particular taxes with the tax system as a whole. These studies require economic analyses of the effects of each tax; technical analyses of the more complicated problems inherent in various tax measures; and statistical analyses of the distribution of the burden of specific taxes, the total Federal tax load, and the combined Federal, State, and local burden.

The interrelationships of Federal, State, and local taxes are studied with a view to possible improvements in intergovernmental fiscal relations. Specific State and local taxes are also examined to determine the combined effect of such taxes and Federal taxes and to assure the Federal Government of the benefit of State and local tax experience. Likewise, to gain the benefit of foreign experience and to compare policies, tax studies are made of foreign countries.

and to compare policies, tax studies are made of foreign countries.

The Division is also charged with general responsibility respecting the assembling and publication of statistics pertaining to Federal taxation. Correspondence relating to matters of taxation not involving legal questions is handled by the Division. The Division also participates in conferences with taxpayers who call

special problems to the attention of the Treasury Department.

During the fiscal year 1947 the Division continued to work primarily on the problems of postwar Federal tax revision. The Division prepared factual material and analyzed various proposals for tax revision, including bills for reduction of individual income taxes which were considered by the Congress. Studies of a number of major tax items were carried on in the fields of business taxes, individual income taxes, excise taxes, estate and gift taxes, and social security taxes. (For a list of the major items under study, see the statement of the Secretary before the Ways and Means Committee, May 19, 1947, which is reproduced as exhibit 34.)

## UNITED STATES COAST GUARD

The functions of the Coast Guard, as the Federal maritime police, embrace in general terms maritime law enforcement, saving and protecting life and property, safeguarding navigation on the high seas and navigable waters of the United States, and readiness for military operations. As the final step in the return of the Coast Guard to the Treasury Department from wartime operation under the Navy Department, the Navy directional control of the following Coast Guard functions was terminated on July 1, 1946: Search and rescue functions, maintenance and operation of ocean weather stations, and air-sea navigational aids in the Atlantic, continental United States, Alaska, and Pacific east of Pearl Harbor.

Coast Guard operations during the fiscal year 1947 fell into four major categories: The saving of life and property and rendering assistance to maritime commerce;

the maintenance of ocean weather stations in the Atlantic and Pacific Oceans and the International Ice Patrol in the North Atlantic Ocean; the maintenance of aids to navigation for surface vessels and aircraft flying over water routes; and the administration of laws to promote the safety and efficiency of the merchant marine including the inspecting of vessels and equipment, the examining and licensing of merchant marine personnel, and the investigating of maritime casualties.

#### Assistance Operations

The assistance rendered by Coast Guard stations, vessels, and aircraft during the year is reflected in the following statistics:

Major assistance:
Value of vessels assisted
Value of courses of records assisted

.\_ \$174, 343, 680 Value of cargoes of vessels assisted \$11, 313, 017
Lives saved or persons rescued from peril 5, 755

Minor assistance instances..... 3, 556 Value of vessels including cargoes assisted in ice-breaking activities on the Great Lakes\_\_\_\_\_\_\$649, 341, 217

The term "major assistance" is used to characterize operations involving the rescue of persons from water or from drifting ice, the removal of persons from endangered vessels, the towing to safety of vessels on which personnel are endangered, and, during floods, the removal of persons to safety when danger of drowning threatens. When Coast Guard aircraft are employed, "major assistance" includes open sea landings and take-offs under abnormally hazardous conditions.

Outstanding among the aviation search and rescue missions during the year was the evacuation by Coast Guard helicopters and planes of 18 badly injured sur-

vivors of the crash of a Belgian transport aircraft in the wilds of Newfoundland. The assistance rendered by the Coast Guard icebreaker Mackinaw, aided by reconnaissance flights of Coast Guard aircraft, in the spring of 1947 aided in the early opening of the navigation season in the Great Lakes.

The 290-foot Coast Guard icebreaker Northwind was temporarily assigned to the Navy to participate in an expedition into the Antarctic. She was one of the two major icebreaking vessels in the task force.

## INTERNATIONAL ICE PATROL

The International Service of Ice Observation and Ice Patrol in the North Atlantic was commenced early in February 1947 with preliminary aerial survey flights by planes based at Argentia, Newfoundland. Extensive use of radar and loran made it possible for the planes to carry out this mission in an area of prevailing storms and fog. These ice observation flights were continued through June. An ice observation cruise was conducted by one cutter in the waters of the Labrador Current north of the patrol area. Just before the close of the fiscal year, the surface patrol was inaugurated and it was necessary to cut short the ice observation cruise to reinforce the patrol vessels.

#### AIDS TO NAVIGATION

On June 30, 1947, the Coast Guard maintained 36,465 aids to navigation in the navigable waters of the United States, its Territories and possessions. These aids include a great variety of devices ranging from simple, unlighted, wooden spar buoys to lightships and complex loran networks. During the year, 1,511 new aids were established and 1,925 aids were discontinued, resulting in a decrease of 414 in the total number maintained on June 30, 1946. This decrease was due to readjustments to meet peacetime needs and consisted primarily in the discontinuing of aids established during the war to mark channels leading to temporary Army and Navy installations, especially at wartime advance bases.

### MARINE INSPECTION AND SAFETY MEASURES

Continued progress was achieved during the year in returning to a peacetime basis the Coast Guard activities with respect to merchant vessel inspection and promotion of safety at sea. In carrying out the duties vested in the Coast Guard, annual inspections were completed on 7,636 vessels of the United States, aggregating 25,448,625 gross tons. There were 7,287 drydock examinations of vessels, aggregating 33,228,631 gross tons. Reinspections were conducted on 2,347 vessels, comprising a gross tonnage of 8,012,742, and special surveys were completed on 164 passenger vessels, not classed by a classification society. Special examinations were made on 479 passenger vessels and ferries, and one officer inspected the S. S. America during a round trip to Europe, for the purpose of observing compliance with safety regulations at sea.

The most serious casualty investigated was that occurring at Texas City, Tex., on April 16, 1947, when a fire and explosion on board the French S. S. Grandcamp spread to other vessels and shore installations and resulted in loss of life and destruction of property in disaster proportions. The vessel was engaged in loading a cargo of ammonium nitrate fertilizer at the time. As a result of the investigation, an interagency committee was appointed to determine the characteristics of ammonium nitrate and to recommend a national policy for assuring its safe handling.

## MERCHANT MARINE PERSONNEL

Merchant Marine Investigating Units in major domestic ports and Merchant Marine Details in certain foreign ports, where there was a large volume of American shipping, continued to operate in the administration of discipline of merchant marine personnel as required by Revised Statutes 4450, as amended (46 U.S.C. 239). In May all Merchant Marine Details with the exception of the London and Manila units were ordered decommissioned but were reactivated in eight ports in June upon request of the Department of State, which agreed to bear all expenses. The authority for commissioned officers of the Coast Guard to preside at hearings was terminated on June 10, 1947, as a result of the provision of the Administrative Procedure Act which requires that examiners shall be appointed pursuant to Civil Service laws and regulations. Because of the lack of funds to hire such civilian examiners, hearings under Revised Statutes 4450 have not been held since June During the year, 2,729 hearings were held involving cases of neglimpetence, and misconduct. These hearings resulted from investiga-11, 1947. gence, incompetence, and misconduct. tions of 14,403 cases.

The licensing and certificating of merchant marine personnel were continued, resulting in the issuance of 175,852 documents. In the process of regulating the orderly conversion of the merchant marine from wartime to peacetime operation, 24,786 waivers of manning requirements were issued, 4,684 crew shortage reports

were received, and 19,328 sets of shipping articles were executed.

## OTHER ENFORCEMENT ACTIVITIES:

Law enforcement activities for the fiscal year, in addition to the enforcement of Federal laws generally on the high seas and territorial waters of the United States, included, in particular, the enforcement of the anchorage regulations, the Oil Pollution and Refuse Acts, the customs laws, the Halibut Act, and Alaskan fisheries laws generally, and the navigation laws. Cooperation was extended to all Federal, as well as many State and municipal law enforcement agencies, but mainly with the Bureau of Customs, Alcohol Tax Unit, and Secret Service.

#### Construction and Development

Two new modern lightships were completed and commissioned during the fiscal year. Six 186-foot steam type mine planters, eight 132-foot diesel powered covered lighters, and four 65-foot diesel powered Army freight boats were acquired and converted primarily for servicing aids to navigation.

Work was continued on adapting existing types of helicopters to meet special quirements of the Coast Guard. The great value of the helicopter in ice operrequirements of the Coast Guard. ations and rescue work was thoroughly demonstrated in 1947. Some progress was made toward the solution of blind flight in helicopters, and better equipment

for water landings was developed.

In the support of 22,220 Coast Guard shore structures, 869 major projects for new construction or repair work and approximately 3,000 minor projects of this nature were undertaken.

At the Coast Guard Yard, Curtis Bay, Baltimore, Md., a new method of small boat construction, utilizing laminated structural members, was developed to save weight and increase strength and flexibility. Service tests of these boats are

being conducted.

In April and May 1947, at the International Meeting on Marine Radio Aids to Navigation, the Coast Guard demonstrated the operation, accuracy, and general applicability of radar, loran, and other electronic developments. This meeting was held in New York, N. Y., and New London, Conn., under the auspices of the Department of State.

Among the aids to navigation under development or test during the year were single unit range lights which by variation of color or characteristic will indicate the relative position off the range line; an unattended lightship; a new design of a one million candlepower beacon for lighthouses; and a special type of unlighted

third class buoy for use in strong currents.

A device known as a sound operated fog signal was installed at West Point Light Station on the Hudson River in March 1947. This aid to navigation requires no operator and can be set in operation by the sound from the whistle or fog horn of a vessel navigating the river.

During the year the Coast Guard tested a standard Army scout car and developed modifications decreasing its weight and increasing its mobility in sand and rough terrain. The resulting performance makes this vehicle a valuable piece of equipment for rescue and patrol work at lifeboat stations.

Similarly, the war-developed amphibious vehicle Dukw was modified to improve its seaworthiness in heavy surf. Exhaustive tests were conducted which proved

the capabilities of these modified vehicles for beach rescue operations.

Cognizant of the numerous hull failures in welded merchant vessels, and pursuant to the statutory responsibility of the Coast Guard for the certification of the worthiness of merchant vessels, the Secretary of the Treasury in July 1946 established the Ship Structure Committee to continue the work of a wartime board in the improvement of hull structures. This objective is being achieved through the coordination of the research efforts of the member agencies and private industry and by the establishment of specific research projects in Government and university laboratories throughout the country. The Engineer-in-Chief of the Coast Guard was again designated as chairman and membership includes representatives of the Transportation Corps, Army Department; Bureau of Ships, Navy Department; Maritime Commission; and the American Bureau of Shipping. Close liaison has been established with the National Research Council, American Iron and Steel Institute, Welding Research Council, and the British Admiralty Shipwelding Committee.

It is noteworthy that the Ship Structure Committee is a cooperative effort by the Federal maritime agencies and the Marine Classification Bureau to solve

structural problems which are common to all.

#### COAST GUARD AUXILIARY

During the fiscal year 1947, enrollment in the Coast Guard Auxiliary was reduced from 44,963 to 21,538. A concentrated effort was made to reestablish the organization in accordance with its original concept; namely, a nonmilitary organization of the owners of motorboats, yachts, private aircraft, and radio stations who are pledged to assist the Coast Guard on a voluntary basis in the promotion of maritime safety and during emergencies. Members of the Auxiliary rendered invaluable service to the Coast Guard by providing personnel to supplement regular personnel in manning stations and small craft during emergencies, in patrolling marine regattas, etc.

On June 30, 1947, there were 6,667 motorboats and yachts, 121 private air-

craft, and 88 amateur radio stations in the organization.

#### Personnel

On June 30, 1947, the military personnel strength of the Coast Guard on active duty consisted of 2,195 commissioned officers (848 regular, 775 temporary service, 572 reserve), 532 warrant officers (184 regular, 340 temporary service, 8 reserve), 227 cadets, and 15,730 enlisted men.

The authorized force of civilian employees at Coast Guard Headquarters on June 30, 1947, numbered 823. In the field service there were 1,477 salaried personnel, 2,243 wage board employees, and 756 lamplighters.

Training activities continued at a steady pace throughout the year, being marked mainly by the increase in recruit and petty officer training which was occasioned by the recruiting drive carried out in the late winter and spring of the

year

Officer candidate training, conducted primarily at the Coast Guard Academy, returned to a normal peacetime basis with all wartime activities terminated. There was no graduation at the Academy in 1947, because of the reestablishment of the regular 4-year course for cadets. During the year, 709 candidates took the entrance examination for the Academy and 147 were expected to enter in July as cadets. The summer training cruise aboard the cutters Campbell and Eagle left New London, Conn., in June, with stops scheduled at Bermuda, West Indian ports, and ports on the east coast of the United States.

During the year, 10 officers completed postgraduate training in various specialties and 34 were assigned to such training; 107 officers completed short courses and refresher courses at various training schools; 2,237 men received recruit training; and 1,949 men were graduated from the various Coast Guard and Navy petty

officer training schools.

Of the 17,401 men who applied for enlistment in the Coast Guard, 6,187 were enlisted, 4,984 were rejected physically, 4,821 were rejected for other causes, and 1,409 were accepted but failed to enlist.

## DISTRICTS, FACILITIES, AND EQUIPMENT

The Fourth Coast Guard District, which comprised parts of New Jersey, Pennsylvania, and Delaware, with the district office located in Philadelphia, Pa., was abolished on June 30, 1947. The functions, responsibilities, and facilities in this area were transferred to the Commander, Third Coast Guard District, whose office is maintained in New York, N. Y. At the same time, the Seventeenth Coast Guard District was abolished and the Territory of Alaska, which it comprised, was added to the Thirteenth Coast Guard District which includes Washington, Oregon, Idaho, Montana, and Wyoming. These amalgamations reduced the number of Coast Guard Districts from 14 to 12.

The North Atlantic Ocean Particle was also discontinued as a generate agencies.

The North Atlantic Ocean Patrol was also discontinued as a separate command on June 30, 1947. All functions of that command, including the operational control of units assigned to North Atlantic Weather Patrol, International Ice Patrol, and the Greenland Patrol, which had previously been exercised from Argentia, Newfoundland, were transferred to the Commander, First Coast Guard

District, in Boston, Mass.
On June 30, 1947, the floating units actively in commission consisted of 120 cutters of various types, 35 patrol boats, 37 lightships, 15 harbor tugs, and 25 buoy boats. In addition, there were 174 motor lifeboats, 1,441 motorboats, and 2,666 nonpowered small craft in operation.

Authorized shore units as of June 30, 1947, included 9 air stations, 10 operating

bases, 180 lifeboat stations, 499 light stations, and 66 radio stations.

In support of the maintenance of the vessels, aircraft, and shore establishments were 1 yard at Curtis Bay, Md., 13 repair bases, 69 depots, and 3 supply depots. During the year surplus vessels valued at \$9,955,039 and other surplus property valued at \$7,972,829 were disposed of.

## Funds Available, Obligations, and Balances

During the fiscal year 1947 the sum of \$6,205,100 was expended under the provisions of the Mustering Out Payment Act of 1944. The Coast Guard Terminal Leave Unit paid \$34,737,435 to 142,608 claimants for settlement of unused leave under the Armed Forces Leave Act of 1946.

The following table shows the amounts available for the Coast Guard during the fiscal year 1947 and the amounts of obligations and unobligated balances:

#### UNITED STATES SAVINGS BONDS DIVISION

The United States Savings Bonds Division is charged with the responsibility of promoting the sale of United States savings bonds. The purpose of the sale of savings bonds is twofold. On the part of the investor, the financial security of individuals is furthered by regular investment of funds periodically available. On the part of the Government, the funds so absorbed aid in the program designed to reduce bank holdings of Government securities as much as possible. In this way savings bonds will be substituted for a part of the bank-held debt. As a result, the ownership of the debt is widened, the structure of the debt is improved, and a contribution is made to the control of inflationary pressures.

and a contribution is made to the control of inflationary pressures.

During the fiscal year 1947, the Savings Bonds Division conducted two special promotional campaigns. The first extended from November 11, Armistice Day, to December 7, 1946, the anniversary of the attack on Pearl Harbor. The second campaign took place during June and July 1947, and inaugurated the bond-amonth plan. This plan provides for the systematic purchase of savings bonds through banks, by having depositors authorize their banks to make deductions periodically from their accounts, and to purchase savings bonds for them with the

funds deducted.

One of the major projects of the Savings Bonds Division is the payroll savings plan, which provides for automatic payroll deductions to be applied to the purchase of savings bonds. The Payroll Savings Division works closely with large companies and assists State field offices in payroll plan promotion. There were, as of June 30, 1947, some 5 million employees on payroll plans purchasing about \$100 million of savings bonds monthly. The Federal Payroll Savings Section, cooperating with the Interdepartmental Savings Bonds Committee, promotes savings bond sales to Federal employees.

The other activities of the United States Savings Bonds Division are carried on by the Field Liaison Section, the Labor Organizations Section, the Banking and Investment Division, the Special Field Activities Division, the Information Division, and the Administrative Division. In the Special Field Activities Division, the Education Section, the Women's Section, the Agricultural Section, and the Interracial Section promote the sale of savings bonds within their respective spheres of activity. These several sections prepare the basic promotional

material, and direct and coordinate the field activity of the 48 State offices.

The Information Division, through its Advertising, Press, and Radio Sections, is responsible for securing the cooperation of publicity sources; for stimulating national advertising by radio, newspapers, magazines, billboards, and other media; and for the designing of posters, pamphlets, leaflets, and descriptive literature used in the sale of savings bonds.

The Administrative Division directs the selection of personnel, equipment, space rental, contractual services, voucher audit, and efficiency surveys, and

develops office practices and procedures.

Detailed figures on savings bonds and stamps will be found on pages 27 to 32 and 403 to 416.

## UNITED STATES SECRET SERVICE

The United States Secret Service is responsible for the protection of the President of the United States and members of his family, of the President-elect, of certain buildings, and of obligations and securities of the United States in production, transit, and storage. It is charged with the suppression of counterfeiting, forging, and alteration of obligations and securities of the United States and foreign countries, and of counterfeiting of coins; and with investigations of forged endorsements on, or the fraudulent negotiation of, United States Treasury checks and bonds, of loss of valuables in shipments by Government agencies, and of applicants for positions in certain agencies of the Treasury Department.

#### PROTECTIVE AND SECURITY ACTIVITIES

The security work of the Secret Service was intensified with the opening of the White House to the public on November 14, 1946. From that date through June 30, 1947, 307,834 visitors were shown through the White House. case Secret Service agents arrested a man who called at the White House and was discovered to be a fugitive from a New Jersey hospital for the insane. He was returned to the institution.

In February 1947, Secret Service agents visited Mexico City, Mexico, to make plans for the visit of the President in March. Another trip outside the United States required considerable planning by the Secret Service when the President

and his family visited Ottawa, Canada, in June.

The Uniformed Force of the Secret Service protected nearly \$198 billion in currency and coin, stamps, bonds, and other Government securities in transit, and approximately \$20 million of uncanceled United States savings stamps at the Furniture Mart in Chicago. It safeguarded the production of Allied military certificates and Siamese currency (see page 198 of the 1946 annual report) at Boston, Mass., and the production of about 15 million armed forces leave bonds.

## Enforcement Activities

Thirteen counterfeit note plants were seized during the year. Note counterfeiting reached almost prewar proportions by an influx of counterfeit American money from Europe. Of a total of \$246,176.25 in bogus bills confiscated by Secret Service agents, \$59,580 represented counterfeits made abroad. Thirty new counterfeit note issues appeared during the fiscal year, of which 23 were of foreign origin. Practically all of the alien contraband was detected and removed from circulation before it reached United States storekeepers

Counterfeit coins seized during the year totaled \$9,214.79. Losses to victims of counterfeit notes and coins in the United States totaled \$62,136.34 as compared

with \$39,171.42 during 1946.

There were 92 arrests and 69 convictions for violation of the counterfeiting

ws. Arrests increased 84 percent over the previous year.

A group of counterfeiters was sentenced in New Jersey for the manufacture and sale of \$115,640 in bogus \$20 notes, the plates for which were recovered from the bottom of the Passaic River by a Navy diving crew cooperating with the Secret Service. The ringleader was sentenced to serve 5 years and his seven accomplices received sentences ranging from 2 years' probation to 5 years' imprisonment.

There were 1,920 persons arrested for check forgeries during the year, with 1,824 convictions. Secret Service investigated 28,460 forged Treasury checks representing over \$2 million, and located the violators in 60.9 percent of the

forgeries.

A university student was arrested for the theft and negotiation of 50 Government checks stolen from other students. He was sentenced to 2 years in a Federal penitentiary, and later sentenced to serve 2½ to 4 years in State prison after completing the Federal term.

With the assistance of British officials, Secret Service agents arrested, at Bermuda, a former U. S. Army captain. Before leaving for Bermuda with his bride, the young man altered a \$100 U. S. Treasurer's check to represent \$28,000, endorsed it, and turned it over to his father-in-law for deposit, stating that the check covered 4 years' accumulated Army pay. Returned to the United States, the offender was arraigned before the U. S. Commissioner at New York and held in default of \$5,000 bail. He is now awaiting trial.

Thefts and forgeries of savings bonds comprised much of the Secret Service enforcement work for the year. Agents completed investigations of 15,709 forged bonds with a maturity value of nearly \$2 million, and located the forgers of 72 percent of the bonds. There were 306 arrests for bond forgery and 273 con-There were 306 arrests for bond forgery and 273 con-

victions.

Fines in criminal cases aggregated \$59,084.71 and jail sentences totaled about 2,558 years. Additional sentences of 2,786 years were suspended or probated. The Secret Service completed 47,803 criminal cases. Noncriminal cases investigated totaled 2,399, making a total of 50,202 investigations completed for the year. The following tables present data relating to the activities of the Secret Service.

#### PUBLIC DEBT

ISSUES AND REDEMPTIONS OF TREASURY CERTIFICATES OF INDEBTEDNESS AND CALL FOR REDEMPTION OF TREASURY BOND ISSUE

#### Exhibit 1

Offering of \( \frac{7}{8} \) percent certificates of indebtedness of Series G-1947, and allotments

[Department Circular No. 791. Public Debt]

TREASURY DEPARTMENT, Washington, July 17, 1946.

#### I. OFFERING OF CERTIFICATES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for certificates of indebtedness of the United States, designated % percent Treasury certificates of indebtedness of Series G-1947, in exchange for Treasury certificates of indebtedness of Series F-1946, maturing August 1, 1946. Approximately \$1,250,000,000 of the maturing certificates will be retired on cash redemption.

#### II. DESCRIPTION OF CERTIFICATES

1. The certificates will be dated August 1, 1946, and will bear interest from that date at the rate of % percent per annum, payable semiannually on February 1 and August 1, 1947. They will mature August 1, 1947, and will not be subject to

call for redemption prior to maturity.

2. The income derived from the certificates shall be subject to all Federal taxes, now or hereafter imposed. The certificates shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.
3. The certificates will be acceptable to secure deposits of public moneys.

They will not be acceptable in payment of taxes.

4. Bearer certificates with interest coupons attached will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

## III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of certificates applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, subscriptions for amounts up to and including \$25,000 will be allotted in full, and subscriptions for amounts over \$25,000 will be allotted to all holders on an equal percentage basis, but not less than \$25,000 on any one subscription. The basis of the allotment will be publicly announced, and allotment notices will be sent out promptly upon allotment.

147

#### IV. PAYMENT

1. Payment at par for certificates allotted hereunder must be made on or before August 1, 1946, or on later allotment, and may be made only in Treasury certificates of indebtedness of Series F-1946, maturing August 1, 1946, which will be accepted at par, and should accompany the subscription.

## V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

JOHN W. SNYDER, Secretary of the Treasury.

## Call, June 13, 1947, for redemption on October 15, 1947, of 41/4 percent Treasury bonds of 1947-52 (press release June 13, 1947)

TREASURY DEPARTMENT, Washington, June 13, 1947.

Secretary of the Treasury Snyder announced today that all outstanding 41/4 percent Treasury bonds of 1947-52 are called for redemption on October 15, 1947, and will be redeemed in cash. There are now outstanding \$758,945,800 of these bonds.

The text of the formal notice of call is as follows:

To Holders of 41/4 percent Treasury Bonds of 1947-52, and Others Concerned:

1. Public notice is hereby given that all outstanding 41/4 percent Treasury bonds of 1947-52, dated October 16, 1922, are hereby called for redemption on October

15, 1947, on which date interest on such bonds will cease.

2. Full information regarding the presentation and surrender of the bonds for cash redemption under this call will be found in Department Circular No. 666, dated July 21, 1941.

JOHN W. SNYDER, Secretary of the Treasury.

#### TREASURY BILLS

#### Exhibit 13

## Statement, April 9, 1947, that the reduction in the offering of bills continues the Treasury's policy for the retirement of bank-held debt

Secretary of the Treasury Snyder announced today that the offering of Treasury bills to be dated April 17th will amount to \$1,100,000,000. The total of bills maturing on that date is \$1,300,000,000, so that the amount outstanding will be reduced by \$200,000,000.

The Secretary said that this reduction of \$200,000,000 in bills is a continuation of the Treasury's policy for the retirement of debt held by the banking system. There are no other securities maturing until June 1—the May 1 certificate was paid off in full last year—and since the Treasury has an ample cash balance, part of it is being applied to retire Treasury bills now.

The Secretary pointed out that the Treasury began its debt pay-off program on March 1, 1946, and that since that time the debt has been reduced by \$22,000,-

000,000.

In response to an inquiry, the Secretary stated that the retirement of bills has no relation to Treasury policy with respect to interest rates and that no change in policy is presently contemplated.

#### Exhibit 14

# Announcement, April 25, 1947, that maturing Treasury bills as well as cash will be accepted in payment of new Treasury bills

Secretary of the Treasury Snyder announced today that beginning with the issue of Treasury bills to be dated May 1, 1947, and until further notice, the Treasury will invite tenders for bills in exchange for maturing bills as well as for cash, with equal treatment accorded all tenders, whether the bidders offer to exchange maturing bills or to pay cash for the new bills bid for. Cash adjustments will be made for differences between the par value of maturing bills accepted in exchange and the issue price of the new bills.

The bills to be dated May 1 will be in the amount of \$1,100,000,000, about

\$200,000,000 less than the amount maturing on that date.

The procedure for accepting exchange as well as cash tenders is being adopted to facilitate weekly refunding operations in bills. The bill holdings of the Federal Reserve Banks recently were \$15,000,000,000 out of a total of \$17,000,000,000 outstanding. Under existing procedure, the Federal Reserve Banks replace their weekly maturing bill issues, in large part, by purchasing new issues from security dealers, who ordinarily bid for amounts greatly in excess of market needs. This is done solely to facilitate the bill operation, as the dealers charge no commission for this service, and obtain only the nominal profit from the transaction which is available to anyone. Under the new procedure the Federal Reserve Banks will be in a position to bid directly on an exchange basis for new issues in amounts not in excess of those required to replace maturing issues of bills originally acquired in the market.

Any addition to Federal Reserve holdings of bills would be purchased in the

open market as at present.

#### Exhibit 15

## Inviting tenders for Treasury bills dated May 1, 1947 (press release April 25, 1947)

The Secretary of the Treasury, by this public notice, invites tenders for \$1,100,000,000, or thereabouts, of 91-day Treasury bills, for cash and in exchange for Treasury bills maturing May 1, 1947, to be issued on a discount basis under competitive and fixed-price bidding as hereinafter provided. The bills of this series will be dated May 1, 1947, and will mature July 31, 1947, when the face amount will be payable without interest. They will be issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders will be received at Federal Reserve Banks and branches up to the closing hour, two o'clock p. m., eastern standard time, Monday, April 28, 1947. Tenders will not be received at the Treasury Department, Washington. Each tender must be for an even multiple of \$1,000, and the price offered must be expressed on the basis of 100, with not more than three decimals, e. g., 99.925. Fractions may not be used. It is urged that tenders be made on the printed forms and forwarded in the special envelopes which will be supplied by Federal Reserve

Banks or branches on application therefor.

Tenders will be received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour, tenders will be opened at the Federal Reserve Banks and branches, following which public announcement will be made by the Secretary of the Treasury of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, and his action in any such respect shall be final. Subject to these reservations, tenders for \$200,000 or less from any one bidder at 99.905 entered on a fixed-price basis will be accepted in full. Settlement for accepted tenders in accordance with the bids must be made or completed at the Federal Reserve Bank on May 1, 1947, in cash or other immediately available funds or in a like face amount of Treasury bills maturing May 1, 1947. Equal

treatment will be accorded all tenders, whether the bidders offer to exchange maturing bills or to pay cash for the new bills bid for. Cash adjustments will be made for differences between the par value of maturing bills accepted in exchange

and the issue price of the new bills.

The income derived from Treasury bills, whether interest or gain from the sale or other disposition of the bills, shall not have any exemption, as such, and loss from the sale or other disposition of Treasury bills shall not have any special treatment, as such, under Federal tax acts now or hereafter enacted. The bills shall be subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States shall be considered to be interest. Under sections 42 and 117 (a) (1) of the Internal Revenue Code, as amended by section 115 of the Revenue Act of 1941, the amount of discount at which bills issued hereunder are sold shall not be considered to accrue until such bills shall be sold, redeemed or otherwise disposed of, and such bills are excluded from consideration as capital assets. Accordingly, the owner of Treasury bills (other than life insurance companies) issued hereunder need include in his income tax return only the difference between the price paid for such bills, whether on original issue or on subsequent purchase, and the amount actually received either upon sale or redemption at maturity during the taxable year for which the return is made, as ordinary gain or loss.

year for which the return is made, as ordinary gain or loss.

Treasury Department Circular No. 418, as amended, and this notice, prescribe the terms of the Treasury bills and govern the conditions of their issue. Copies of the circular may be obtained from any Federal Reserve Bank or branch.

Amendments to Department Circular No. 418, as amended, relating to Treasury

THIRD AMENDMENT, MAY 7, 1947, TO DEPARTMENT CIRCULAR NO. 418

TREASURY DEPARTMENT Washington, May 7, 1947.

Paragraph 11 of Department Circular No. 418, as amended, dated February 28, 1941 (31 CFR 309.11), is hereby amended to read as follows:

"Sec. 309.11 Tenders; payment of accepted tenders. Settlement for accepted tenders in accordance with the bids must be made or completed at the appropriate Federal Reserve Bank in cash or other immediately available funds on or before the date specified, except that the Secretary of the Treasury, in his discretion, when inviting tenders for Treasury bills, may provide: (1) that any qualified depositary may make such settlement by credit, on behalf of itself and its customers, up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district or (2) that such settlement may be made in maturing Treasury bills accepted in Whenever the Secretary provides for settlement in maturing Treasury bills, cash adjustments will be made for differences between the par value of the maturing bills and the issue price of the new bills."

A. L. M. Wiggins, Acting Secretary of the Treasury.

FOURTH AMENDMENT, JULY 3, 1947, TO DEPARTMENT CIRCULAR No. 418

TREASURY DEPARTMENT, Washington, July 3, 1947.

Sections 309.4 and 309.7 of the Department Circular No. 418, as amended (31 CFR Cum. Supp. 309.4 and 309.7), are hereby revised to read as follows: "Sec. 309.4. The income derived from Treasury bills, whether interest or gain

from the sale or other disposition of the bills, shall not have any exemption, as such, and loss from the sale or other disposition of Treasury bills shall not have any special treatment, as such, under the Internal Revenue Code, or laws amendatory or supplementary thereto. The bills shall be subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States shall be considered to be interest." 1

"Sec. 309.7. Tenders in response to any such public notice will be received only at the Federal Reserve Banks, or branches thereof, and unless received before the time fixed for closing will be disregarded. Tenders will not be received at the Each tender must be for an amount in an even multiple of. In the case of competitive tenders the price or prices Treasury Department. \$1,000 (maturity value). In the case of competitive tenders the price or prices offered by the bidder for the amount or amounts (at maturity value) applied for must be stated, and must be expressed on the basis of 100, with not more than

three decimals, e. g., 99.925. Fractions may not be used."

John W. Snyder. Secretary of the Treasury.

<sup>&</sup>lt;sup>1</sup> This section is amended in order to conform to the language of Public Act No. 116 of the 80th Congress (see exhibit 22).

## Regulations governing armed forces leave bonds 1

[Department Circular No. 793. Public Debt]

TREASURY DEPARTMENT, Washington, November 12, 1946.

To Members and Former Members of the Armed Forces of the United States, and Others Concerned:

Under section 6 of the Armed Forces Leave Act of 1946 (hereinafter referred to as the act),2 living members and living former members of the armed forces of the United States are entitled to receive under the conditions set forth in the act, bonds of the United States in settlement and compensation of accumulated leave. Under the terms of the act these bonds are issued under authority and subject to the provisions of the Second Liberty Bond Act, as amended.

Pursuant to the authority contained in said acts the following regulations are

prescribed to govern such bonds:

#### 1. SUBSTANTIVE REGULATIONS

324.1 Designation.—The bonds issued for the above purpose are designated

"armed forces leave bonds."

324.2 Issue and inscription.—Armed forces leave bonds are issued by the Secretary of the Treasury (hereinafter referred to as the Secretary) acting through the Army, Navy, Marine Corps, and Coast Guard, which are designated as issuing agents. They are inscribed only in the names of living members or living former members of the armed forces. In each case a single bond in the highest appropriate multiple of \$25 is issued where the amount due is \$50 or more. name and serial or service number of the owner will be inscribed on the bond and at the option of the issuing agent the address may also be inscribed. No exchange will be permitted for bonds of lower denomination, for example, if a bond for \$275 is issued to a particular owner he may not exchange that bond for a bond in the amount of \$200 and a bond in the amount of \$75.

324.3 Date and maturity of bond, and interest.—The issue date of a bond will be the first day of the quarter-year period (January 1, April,1, July 1, or October 1) next following the date of discharge from the armed forces of the former member whose name is to be inscribed thereon, provided he was discharged on or after January 1, 1943, and prior to September 1, 1946, or in case a member of the armed forces was still on active duty on September 1, 1946, his bond will be dated October 1, 1946. Each bond will mature five years from its issue date. In case of the death of the owner of any such bond payment may be made prior to maturity upon proper application, at the option of such owner's survivors, as defined in the act (see 324.9 hereof). Interest will accrue at the rate of 2½ percent per annum from the issue date to the date of maturity or to the last day of the month in which payment is made, whichever may be earlier. Interest will be paid only with the principal sum.

324.4 Transfer and pledge.—The bonds are nontransferable by sale, exchange, assignment, pledge, hypothecation or otherwise, except that they may be assigned by the owner to the Administrator of Veterans' Affairs for redemption by such Administrator, for the purpose of paying premiums or the difference in reserve in case of conversion to insurance on another plan or a policy loan made prior to July 31, 1946, on a United States Government life insurance policy or a national service life insurance policy under such regulations as may be prescribed by the Administrator of Veterans' Affairs. Such assignment may not be used directly or indirectly as a means of securing in cash the proceeds of such bond or any portion thereof prior to the date of its maturity or the maturity of such policy by death, whichever is earlier (see 324.6 hereof). No claims by attempted transferees or by persons loaning money on the security of the bonds will be recognized.

324.5 Claims of creditors.—By the terms of the act the bonds are exempt from claims of creditors, including any claim of the United States, and shall not be

Section 324.11 hereof relates to payment of armed forces leave checks to survivors.
 Pub. Law 704, 79th Cong.

subject to attachment, levy, or seizure by or under any legal or equitable process whatever. Accordingly, no claims of creditors, assignees for the benefit of creditors, trustees or receivers in bankruptcy or equity will be recognized, and no payment of the bonds to any such persons will be made, either during the lifetime

of the person whose name is inscribed on the bonds or after his death.

Assignment to the Administrator of Veterans' Affairs.—Any registered owner of an armed forces leave bond who desires to use his bond in payment of premiums or other payments in connection with United States Government life insurance or national service life insurance policies should mail or deliver his bond to the office of the Veterans' Administration to which he pays his premiums. The bond should be accompanied by a completed VA Form 9–1625, "Directions for use of proceeds of armed forces leave bonds," obtainable at any Veterans' Administration Office. Before submitting the bond to the Veterans' Administration the assignment form printed on the bottom of the back of the bond should be signed by the owner exactly as his name appears on the face of the bond. certification or witness to the signature of the owner on such assignment form will be required.

Payment to registered owner at maturity.—To secure payment at maturity the registered owner should appear before one of the officers authorized to certify requests for payment, establish his identity and sign his name to the request for payment printed on the back of the bond. The signature should be in exactly the form as his name is inscribed on the face. No power of attorney to request

payment will be recognized.

(a) Certification of request.—After the request for payment has been signed the certifying officer should complete and sign the certificate appearing at the end of the form for request for payment and the bond should then be presented in person or by mail to the Federal Reserve Bank of the district in which the owner resides or to the Treasurer of the United States, Washington 25, D. C., or to such other paying agent as may be designated by the Secretary of the Treasury. of registered mail is desirable for the protection of the owner.

(b) Certifying officers.—The following officers are authorized to certify requests

for payment of armed forces leave bonds:

(I) Certain designated officers in the Treasury Department at Washington;

(2) Officers of incorporated banks or trust companies;

(3) Commissioned officers of the Army, Navy, Marine Corps, and Coast Guard of the United States (only for members of such establishments);

(4) The officer in charge of any home, hospital or other facility of the Veterans' Administration (only for patients and members of such facilities);

(5) Such other officers as may from time to time be designated by the Secretary for that purpose.

(c) Instructions to certifying officers.—Certifying officers should require positive

identification of the person signing a request for payment. Right to payment on death of owner.—Upon the death of an owner of an

armed forces leave bond the bond becomes payable only to his survivors in the

following order:

(a) Surviving wife or husband and children, if any, in equal shares;

(b) If such owner leaves no surviving spouse or children, then in equal shares to such owner's surviving parents, if any. If there are no such survivors the bond will be retired and the amount covered into the General Fund of the Treas-Accordingly, payment will not be made to an executor or administrator of the estate of a deceased registered owner, and if a bond should come into the possession of such an executor or administrator, or other person not a survivor, following the death of the owner it should be immediately delivered to one of the survivors, if any; otherwise forwarded to the Division of Loans and Currency, Washington 25, D. C., with a signed statement that there are no known survivors.

Payment to survivors.—Survivors of a deceased registered owner in the order provided in the preceding section are entitled to receive payment of an armed forces leave bond at their option and upon application to the Secretary of the Treasury at any time following the death of such registered owner, whether before, upon or after maturity of the bond. Application for such payment should be made on Form PD2066, copies of which may be obtained from any Federal Reserve Bank. See section 324.13 for instructions as to filing the application.

(a) Definition of survivors.—Survivors are defined in the act as follows:

"Spouse" means a lawful wife or husband; "Children" include-

(a) a legitimate child;

(b) a child legally adopted;
(c) a stepchild, if, at the time of death of the member or former member of the armed forces, such stepchild is a member of the

deceased's household;

(d) an illegitimate child, but in the case of a male member or former male member of the armed forces only if he has been judicially ordered or decreed to contribute to such child's support; has been judicially decreed to be the putative father of such child; or has acknowledged under oath in writing that he is the father of such child; and

(e) a person to whom the member or former member of the armed forces at the time of death stands in loco parentis and so stood for not less than twelve months prior to the date of death;

"Parent" includes father and mother, grandfather and grandmother, stepfather and stepmother, father and mother through adoption, and persons who, for a period of not less than one year prior to the death of the member or former member of the armed forces, stood in loco parentis to such member or former member: Provided, That not more than two parents may receive the benefits provided under this act and preference shall be given to the parent or parents, not exceeding two, who actually exercised parental relationship at the time of or most nearly prior to the date of the death of such member or former member of the armed forces.

(b) Payment only.—Only payment of the entire amount of the bond will be litted. No partial payment and no reissue of the bond in part may be made. Payment in all cases will be made by separate checks drawn in the proper amounts to the individual survivors, except that in the case of a survivor under 17 years of age or under mental disability, the check will be drawn either to the guardian of such survivor, if the Secretary has received notice of the appointment of such guardian, or in the absence of such notice, to a proper person selected by the Secretary, for the use and benefit of such survivor, without the necessity of

resorting to judicial proceedings for the appointment of a legal representative.

(c) All survivors must join.—Since no partial payment or reissue may be made, all survivors of the class entitled to receive payment must unite in the application, except that in the case of survivors under 17 years of age or under mental disability, legally qualified guardians, if any, may sign in their behalf, and in the absence of such legal guardians, such proper persons as the Secretary may select to act on

behalf of such survivors.

(d) Time of vesting of survivors' rights.—A survivor's right to receive payment becomes fixed upon the date of the death of the owner. If a survivor dies before receiving payment the right to receive payment of his or her share of the bond passes to the estate of such survivor. For example, if the registered owner dies and leaves a widow and two children and the widow dies prior to receipt of payment, her share passes to her estate and payment of the bond will be made onethird to the widow's representative and one-third to each of the surviving children. If no executor or administrator is appointed for the estate of a deceased survivor, settlement may be made in the same manner as provided for the settlement without administration of estates of deceased owners of United States registered bonds

324.10 Loss, theft, destruction, mutilation or defacement of bonds.—If an armed forces leave bond is lost, stolen, destroyed, mutilated or defaced, relief may be granted before maturity by the issue of a substitute bond to be marked "duplicate", or at or after maturity by payment of the bond in accordance with the provisions of section 8 of the Government Losses in Shipment Act (U. S. C. 1940 Ed., title 31, sec. 738a). Relief in such cases will be governed by the regulations contained in Department Circular 300, as amended. In any such case immediate notice of the facts, together with a complete description of the bond (including name and address of owner, bond serial number, amount, and issue date), should be given to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., which will forward appropriate forms for requesting relief, together with full instructions. Usually such relief will be granted without requiring a bond of indemnity.

Checks.—

(a). Payment to survivors of checks issued to the registered owner (1) in full settlement of leave, (2) in payment of bonds, or (3) in payment of the odd amount due the member or former member of the armed forces over and above the bond issued in settlement of leave, will be made to the persons entitled as provided in the above regulations relating to bonds. Accordingly, such checks received by executors or administrators of deceased registered owners should not be deposited for collection but should be turned over to the survivors or returned to the issuing office with a statement of the facts.

(b) In the case of a survivor entitled to payment who dies before receiving and collecting the check issued in the name of the survivor, payment will be made

to his estate.

#### II. PROCEDURE

324.12 Surrender of bonds at maturity by registered owner.—Registered owners desiring payment of their bonds at maturity, after completing the request for payment in accordance with the provisions of 324.7 hereof, should forward the bonds to the appropriate Federal Reserve Bank or to the Treasurer of the United States, Washington 25, D. C. The use of registered mail is desirable for the protection of the owner. Federal Reserve Banks as fiscal agents of the United States are authorized to make payment of bonds so presented if in proper form. Bonds marked "duplicate" issued in lieu of lost, stolen, destroyed, mutilated or defaced bonds must be submitted to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., as Federal Reserve Banks are not authorized

to pay such bonds.

Payment to survivors.—Survivors applying for payment under section 324.13 Fayment to survivors.—Survivors applying for payment under second 324.9 hereof should forward the bonds, accompanied by the applications on Form PD 2066, to the appropriate Federal Reserve Bank or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C. Usually payment will be expedited by the use of the Federal Reserve Banks. The form must be accompanied in each case by (1) a death certificate for the registered owner, (2) an application of any discrepancy between the name as given on the face of (2) an explanation of any discrepancy between the name as given on the face of the bond and the name as given in the death certificate, and (3) in case of an application by parents other than the own father and mother still living together, a signed and sworn statement giving the basis for the claim of parental relationship as defined in the act (see 324.9 hereof). The right is reserved to require other and further evidence in cases where such action appears desirable. Federal Reserve Banks as fiscal agents of the United States are authorized to make payment to survivors upon applications in accordance with these regulations, but may submit any doubtful or unusual cases to the Treasury Department, Division of Loans and Currency, for final decision.

Designation of agents to make determination.—The various Federal 324.14Reserve Banks as fiscal agents of the United States, the Fiscal Assistant Secretary of the Treasury, the Assistant to the Fiscal Assistant Secretary, the Commissioner and Associate Commissioner of the Public Debt, and the Chief of the Division of Loans and Currency are designated to make determinations on behalf of the

Secretary as provided in the act.

### III. GENERAL

Taxation.—Under the act all amounts paid or payable under section 6 in cash, bonds or both (except interest in the case of bonds) shall be exempt from

taxation.

324.16 Address for communications.—All inquiries after issue in connection with the payment of or transactions in armed forces leave bonds should be addressed to the Federal Reserve Bank of the district in which the owner resides, or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., except that any inquiries regarding the use of such bonds in connection with Government life insurance or national service life insurance payments should be addressed to the Office of the Veterans' Administration to which the assured has been paying premiums, or to the Director of Insurance Accounts Service, Veterans' Administration, Washington 25, D. C.

324.17 Additional regulations.—The Secretary of the Treasury may at any time, or from time to time, prescribe additional, supplemental, amendatory or revised rules and regulations governing armed forces leave bonds.

Publication of notice and public procedure thereon with respect to these regulations are found to be contrary to the public interest for the reason that such notice and public procedure would expose interested parties to undue delay in

the exercise of rights provided by the act.

These regulations will become effective immediately, the requirements of section 4 (c) of the Administrative Procedure Act (Public Law 404, 79th Congress) being dispensed with in order that survivors entitled may take prompt advantage of their rights under the act.

JOHN W. SNYDER, Secretary of the Treasury.

## Exhibit 20

First amendment, November 15, 1946, to Department Circular No. 750, Revised, prescribing regulations governing payments by banks and other financial institutions in connection with the redemption of United States savings bonds

> TREASURY DEPARTMENT. Washington, November 15, 1946.

Sec. 321.5 of Treasury Department Circular No. 750, Revised, dated June 30,

Sec. 321.5 of Treasury Department Characteristics, 1945 (31 C. F. R., 1945 Supp., Part 321), is hereby amended to read:

Sec. 321.5. Reimbursement of agents' costs.—(a) Each paying agent shall be entitled to receive reimbursement for its service for all bonds paid hereunder and accounted for by it in each calendar quarter, according to the following scale:
15 cents each for the first 1,000 bonds

10 cents each for all over 1,000 bonds Each Federal Reserve Bank is authorized to establish a definite and regular closing time for determining those paid bonds to be considered as accounted for closing time for determining those paid bonds to be considered as accounted for in a calendar quarter. Such closing time may be based upon a time that the paid bonds are forwarded to, or received by, the Federal Reserve Bank and shall be uniformly applied throughout the district of such Bank. The scale of rates shall be applicable separately to the agent and to each of its branches utilized in making payments under this circular, if the bonds paid by each are separately scheduled and accounted for. The payment of such amount as the agent is entitled to receive shall be made by the Federal Reserve Bank on behalf of the Treasury Department.

(b) Paying agents shall not make any charge whatever to owners of savings bonds in connection with payments hereunder.

Joseph J. O'Connell, Jr., Acting Secretary of the Treasury.

## Exhibit 21

## Statement, March 7, 1947, on the maintenance of the interest rate policy of the Government

In response to inquiries received at the Treasury today, Secretary Snyder announced that no changes in the interest rate policy of the Government at this

time are under contemplation.

He cautioned against any interpretation of recent newspaper articles indicating that a rise in rates is imminent. He said that all phases of debt management are under constant study by the Treasury and Federal Reserve, and that there has been no change in the policy announced by the President in his Budget Message that "interest rates will be kept at present low levels through continued cooperation of the Treasury Department and the Federal Reserve System."

The technical methods by which the Government's interest rate policy will be carried out are also under constant study in collaboration with the Federal

Reserve Open Market Committee and others interested in the subject.

The Secretary stated that the Treasury is alert to the Government bond market and the effect of its financing on bank reserves and the needs of different classes of investors.

#### Exhibit 22

An act to amend further section 4 of the Public Debt Act of 1941, as amended, and clarify its application, and for other purposes

[Public Law 116, 80th Cong., H. R. 2872]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Public Debt Act of 1941 (Public, Numbered 7, Seventy-seventh Congress, first session), as amended by section 6 of the Public Debt Act of 1942 (Public, Numbered 510, Seventy-seventh

Congress, second session), hereby is amended further to read as follows:

"Sec. 4. (a) Interest upon obligations, and dividends, earnings, or other income from shares, certificates, stock, or other evidences of ownership, and gain from the sale or other disposition of such obligations and evidences of ownership issued on or after the effective date of the Public Debt Act of 1942 by the United States or any agency or instrumentality thereof shall not have any exemption, as such, and loss from the sale or other disposition of such obligations or evidences of ownership shall not have any special treatment, as such, under the Internal Revenue Code, or laws amendatory or supplementary thereto; except that any such obligations which the United States Maritime Commission or the Federal Housing Administration had, prior to March 1, 1941, contracted to issue at a future date, shall when issued bear such tax-exemption privileges as were, at the time of such contract, provided in the law authorizing their issuance. For the purposes of this subsection a Territory, a possession of the United States, and the District of Columbia, and any political subdivision thereof, and any agency or instrumentality of any one or more of the foregoing, shall not be considered as an agency or instrumentality of the United States.

"(b) The provisions of this section shall, with respect to such obligations and evidences of ownership, be considered as amendatory of and supplementary to the respective Acts or parts of Acts authorizing the issuance of such obligations

and evidences of ownership, as amended and supplemented.

"(c) Nothing contained herein shall be construed to amend or repeal sections 114 and 115 of the Revenue Act of 1941."

Approved June 25, 1947.

#### Exhibit 23

Second amendment, July 3, 1947, to Department Circular No. 696, First Revision, relating to Series C savings notes

TREASURY DEPARTMENT, Washington, July 3, 1947.

In order to conform to the language of Public Act No. 116 of the 80th Congress, Section II, Paragraph 6 of Department Circular No. 696, First Revision, as amended (filed with the Division of the Federal Register, November 23, 1943)

is hereby revised to read as follows:

"6. Taxation.—Income derived from the notes shall be subject to all taxes imposed under the Internal Revenue Code or laws amendatory or supplementary thereto. The notes shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority."

John W. Snyder, Secretary of the Treasury.

## SECURITIES GUARANTEED BY THE UNITED STATES

#### Exhibit 24

Partial redemption, before maturity, of  $2\frac{3}{4}$  percent housing insurance fund debentures, Series D (fourth call)

[Department Circular No. 795. Public Debt]

TREASURY DEPARTMENT, Washington, October 1, 1946.

To Holders of 23/4 Percent Housing Insurance Fund Debentures, Series D:

I. NOTICE OF FOURTH CALL FOR PARTIAL REDEMPTION, BEFORE MATURITY, OF 234
PERCENT HOUSING INSURANCE FUND DEBENTURES, SERIES D

The Federal Housing Commissioner, with the approval of the Secretary of the Treasury, has issued the following notice of call for partial redemption and offer to purchase with respect to 2¾ percent housing insurance fund debentures,

"Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., title 12, sec. 1701 et seq.) as amended, public notice is hereby given that 2% percent housing insurance fund debentures, Series D, of the denomination and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on January 1, 1947, on which date interest on such debentures shall cease:

234 percent housing insurance fund debentures, Series D

Denomination

Serial numbers (All numbers inclusive)

\$10,000 \_\_\_\_\_ 755 to 854

"The debentures first issued as determined by the serial numbers were selected for redemption by the Commissioner, Federal Housing Administration, with the approval of the Secretary of the Treasury.

"No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after October 1, 1946. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after October 1, 1946, and provision will be made for the payment of final interest due on January 1, 1947, with the principal thereof to the actual owner, as shown by the assignments thereon

thereof to the actual owner, as shown by the assignments thereon.

"The Commissioner of the Federal Housing Administration hereby offers to purchase any debentures included in this call at any time from October 1, 1946, to December 31, 1946, inclusive, at par and accrued interest, to date of purchase.

"Instructions for the presentation and surrender of debentures for redemption on or after January 1, 1947, or for purchase prior to that date will be given by the Secretary of the Treasury."

## II. TRANSACTIONS IN FOURTH-CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for partial redemption on January 1, 1947, are hereby designated fourth-called 2½ percent housing insurance fund debentures, Series D, and are hereinafter referred to as fourth-called debentures.

2. Transfers and denominational exchanges in fourth-called debentures will terminate at the close of business on September 30, 1946.

## III. REDEMPTION OR PURCHASE

1. Holders of fourth-called debentures will be entitled to have such debentures redeemed and paid at par on January 1, 1947, with interest in full to that date, at the rate of \$13.75 per \$1,000. Interest on fourth-called debentures will cease on January 1, 1947.

2. Holders of fourth-called debentures have the privilege of presenting such debentures at any time from October 1 to December 31, 1946, inclusive, for purchase at par and accrued interest, at the rate of \$0.074728 per \$1,000 per day from

July 1, 1946, to date of purchase.

## IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Commissioner for the redemption and purchase of fourth-called debentures. In accordance with regulations adopted by the Federal Housing Commissioner and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of fourth-called debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable, except as otherwise provided herein.

2. Fourth-called debentures presented for redemption on January 1, 1947, or for purchase from October 1 to December 31, 1946, inclusive, must be assigned by the registered payee or assignee thereof or by their duly constituted representatives in the form indicated in paragraph 3 of this section, and should thereafter be presented and surrendered to any Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., accompanied by appropriate written advice. (Use Form PD 2067.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) In all cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered.

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should be assigned by such payee or assignee or by a duly constituted representative to "The Federal Housing Commissioner for redemption" or to "The Federal Housing Commissioner for purchase," according to whether the debentures are to be presented for redemption on January 1, 1947, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment, the debentures should be assigned to "The Federal Housing Commissioner for redemption (or purchase) for the account of .....," inserting the name and address of the person to whom payment is to be made.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the

protection afforded by registration.

5. Final interest on any fourth-called debentures, whether purchased prior to or redeemed on or after January 1, 1947, will be paid with the principal in accordance

with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment

not made upon the debenture is considered a detached assignment.

7. A fourth-called debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after January 1, 1947, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corporation. Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to January 1, 1947, and in case of assignments for redemption on or after January 1, 1947, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail but debentures bearing unrestricted assignments should be forwarded by registered

mail insured or by express prepaid.

9. In order to facilitate the redemption of fourth-called debentures on January 1, 1947, any such debenture may be presented and surrendered in the manner herein prescribed in advance of that date but not before December 1, 1946. Such

early presentation by holders will insure prompt payment of principal and interest

#### V, GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of fourth-called debentures under this circular may be obtained from any Federal Reserve Bank or from the Division of Loans and Currency, Treasury Department, Washington 25, D. C., where copies of the Treasury Department's regulations governing assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental. and amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of fourthcalled debentures.

JOHN W. SNYDER, Secretary of the Treasury.

## Exhibit 25

Redemption, before maturity, of 2¾ percent mutual mortgage insurance fund debentures, Series B (thirteenth call) and Series E (fourth call)

[Department Circular No. 803. Public Debt]

TREASURY DEPARTMENT, Washington, April 11, 1947.

To Holders of 2¾ Percent Mutual Mortgage Insurance Fund Debentures, Series B and E:

I. NOTICE OF CALL FOR REDEMPTION, BEFORE MATURITY, OF 2% PERCENT MUTUAL MORTGAGE INSURANCE FUND DEBENTURES, SERIES B AND E

The Federal Housing Commissioner, with the approval of the Secretary of the Treasury, has issued the following notice of call for redemption and offer to purchase with respect to 234 percent mutual mortgage insurance fund debentures, Series B and E:

"Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., title 12, sec. 1701 et seq.) as amended, public notice is hereby given that 2% percent mutual mortgage insurance fund debentures, Series B and E, of the denominations and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on July 1, 1947, on which date interest on such debentures shall cease:

2¾ percent mutual mortgage insurance 2¾ percent mutual mortgage insurance fund debentures, Series B

fund debentures, Series E

Denomination	Serial numbers (all numbers inclusive)	Denomination	Serial numbers (all numbers inclusive)
\$50	5,787 to 5,798 1,832 to 1,833	100 500	91 to 107 24 to 27 116 to 149

"The debentures first issued, as determined by the serial numbers, were selected for redemption by the Commissioner, Federal Housing Administration, with the approval of the Secretary of the Treasury.

"No transfers or denominational exchanges in debentures covered by the fore-

going call will be made on the books maintained by the Treasury Department on or after April 1, 1947. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after April 1, 1947, and provision will be made for the payment of final interest due July 1, 1947, with the principal thereof to the actual owner, as shown by the assignments thereon.

"The Commissioner of the Federal Housing Administration hereby offers to purchase any debentures included in this call at any time from April 1, 1947, to June 30, 1947, inclusive, at par and accrued interest, to date of purchase.

"Instructions for the presentation and surrender of debentures for redemption on or after July 1, 1947, or for purchase prior to that date will be given by the

Secretary of the Treasury.'

## II. TRANSACTIONS IN CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for redemption on July 1, 1947, are hereby designated thirteenth-called 2½ percent mutual mortgage insurance fund debentures, Series B, and fourth-called 2½ percent mutual mortgage insurance fund debentures, Series E, and are hereinafter referred to as thirteenth-called and fourth-called debentures.

2. Transfers and denominational exchanges in thirteenth-called and fourth-

called debentures will terminate at the close of business on March 31, 1947.

## III. REDEMPTION OR PURCHASE

1. Holders of thirteenth-called and fourth-called debentures will be entitled to have such debentures redeemed and paid at par on July 1, 1947, with interest in full to that date, at the rate of \$13.75 per \$1,000. Interest on thirteenth-called

and fourth-called debentures will cease on July 1, 1947.

2. Holders of thirteenth-called and fourth-called debentures have the privilege of presenting such debentures at any time from April 1 to June 30, 1947, inclusive, for purchase at par and accrued interest, at the rate of \$0.075967 per \$1,000 per day from January 1, 1947, to date of purchase.

## IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Commissioner for the redemption and purchase of thirteenth-called and fourth-called debentures. In accordance with regulations adopted by the Federal Housing Commissioner and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of thirteenth-called and fourth-called debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable, except

as otherwise provided herein.

2. Thirteenth-called and fourth-called debentures presented for redemption on July 1, 1947, or for purchase from April 1 to June 30, 1947, inclusive, must be assigned by the registered payee or assignee thereof or by their duly constituted representatives in the form indicated in paragraph 3 of this section, and should thereafter be presented and surrendered to any Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., accompanied by appropriate written advice. (Use Form PD 2108.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) In all cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered.

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should be assigned by such payee or assignee or by a duly constituted representative to "The Federal Housing Commissioner for redemption" or to "The Federal Housing Commissioner for purchase," according to whether the debentures are to be presented for redemption on July 1, 1947, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment, the debentures should be assigned to "The Federal Housing Commissioner for redemption (or purchase) for the account of \_\_\_\_\_\_, incorting the name and address of the person to whom payment is to be made

inserting the name and address of the person to whom payment is to be made.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the protection offended by recipitation.

protection afforded by registration.

5. Final interest on any thirteenth-called and fourth-called debentures, whether purchased prior to or redeemed on or after July 1, 1947, will be paid with the principal in accordance with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment not made

upon the debenture is considered a detached assignment.

7. A thirteenth-called or a fourth-called debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after July 1, 1947, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corpora-Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to July 1, 1947, and in case of assignments for redemption on or after July 1, 1947, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail, but debentures bearing unrestricted assignments should be forwarded by registered

mail insured or by express prepaid.

9. In order to facilitate the redemption of thirteenth-called and fourth-called debentures on July 1, 1947, any such debenture may be presented and surrendered in the manner herein prescribed in advance of that date but not before June 1, 1947. Such early presentation by holders will insure prompt payment of principal and interest when due.

#### V. GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of thirteenth-called and fourth-called debentures under this circular may be obtained

Treasury Department, Washington 25, D. C., where copies of the Treasury Department's regulations governing assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental and regulations governing the matters covered by this circular. amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of thirteenthcalled and fourth-called debentures.

A. L. M. WIGGINS,
Acting Secretary of the Treasury.

## Exhibit 26

## Redemption, before maturity, of 23/4 percent war housing insurance fund debentures, Series G

[Department Circular No. 804, Public Debt]

TREASURY DEPARTMENT, Washington, April 11, 1947.

To Holders of 23/4 Percent War Housing Insurance Fund Debentures, Series G:

I. NOTICE OF CALL FOR REDEMPTION, BEFORE MATURITY, OF 234 PERCENT WAR HOUSING INSURANCE FUND DEBENTURES, SERIES G

The Federal Housing Commissioner, with the approval of the Secretary of the Treasury, has issued the following notice of call for redemption and offer to purchase with respect to 2% percent war housing insurance fund debentures, Series G:

"Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., title 12, sec. 1701 et seq.) as amended, public notice is hereby given that 2% percent war housing insurance fund debentures, Series G, of the denominations and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on July 1, 1947, on which date interest on such debentures shall cease:

## 2¾ percent war housing insurance fund debentures, Series G

Denomination	Serial numbers (all numbers inclusive)
\$50	501 to 558
100	2, 001 to 2, 242
500	1, 001 to 1, 058
1, 000	3, 001 to 3, 354
5, 000	251 to 284

"The debentures first issued as determined by the serial numbers were selected for redemption by the Commissioner, Federal Housing Administration, with the

approval of the Secretary of the Treasury.

"No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after April 1, 1947. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after April 1, 1947, and provision will be made for the payment of final interest due on July 1, 1947, with the principal thereof to the actual owner, as shown by the assignments thereon.

"The Commissioner of the Federal Housing Administration hereby offers to purchase any debentures included in this call at any time from April 1, 1947, to June 30, 1947, inclusive, at par and accrued interest, to date of purchase. "Instructions for the presentation and surrender of debentures for redemption on or after July 1, 1947, or for purchase prior to that date will be given by the Secretary of the Treasury."

## II. TRANSACTIONS IN CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for redemption on July 1, 1947, are hereby designated called 2¾ percent war housing insurance fund debentures, Series G, and are hereinafter referred to as called debentures.

2. Transfers and denominational exchanges in called debentures will terminate

at the close of business on March 31, 1947.

#### III. REDEMPTION OR PURCHASE

1. Holders of called debentures will be entitled to have such debentures redeemed and paid at par on July 1, 1947, with interest in full to that date, at the rate of \$13.75 per \$1,000. Interest on called debentures will cease on July 1, 1947.

2. Holders of called debentures have the privilege of presenting such debentures at any time from April 1 to June 30, 1947, inclusive, for purchase at par and accrued interest, at the rate of \$0.075967 per \$1,000 per day from January 1, 1947, to date of purchase.

#### IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Commissioner for the redemption and purchase of called debentures. In accordance with regulations adopted by the Federal Housing Commissioner and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of called debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable, except as otherwise provided herein.

2. Called debentures presented for redemption on July 1, 1947, or for purchase from April 1 to June 30, 1947, inclusive, must be assigned by the registered payee or assignee thereof or by their duly constituted representatives in the form indicated in paragraph 3 of this section, and should thereafter be presented and surrendered to any Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., accompanied by appropriate written advice. (Use Form PD 2106.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should the registered payer desires that payment be made to him, the debentures should be assigned by such payer or assignee or by a duly constituted representative to "The Federal Housing Commissioner for redemption" or to "The Federal Housing Commissioner for purchase," according to whether the debentures are to be presented for redemption on July 1, 1947, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment, the debentures should be assigned to "The Federal Housing Commissioner for redemption (or purchase) for the recent of Housing Commissioner for redemption (or purchase) for the account of inserting the name and address of the person to whom payment is to be madé.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the protection afforded by registration.

5. Final interest on any called debentures, whether purchased prior to or redeemed on or after July 1, 1947, will be paid with the principal in accordance

with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment not

made upon the debenture is considered a detached assignment.

7. A called debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after July 1, 1947, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corporation. Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to July 1, 1947, and in case of assignments for redemption on or after July 1, 1947, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail, but debentures bearing unrestricted assignments should be forwarded by registered

mail insured or by express prepaid.

9. In order to facilitate the redemption of called debentures on July 1, 1947, any such debenture may be presented and surrendered in the manner herein prescribed in advance of that date but not before June 1, 1947. Such early presentation by holders will insure prompt payment of principal and interest when due.

#### V. GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of called debentures under this circular may be obtained from any Federal Reserve Bank or from the Division of Loans and Currency, Treasury Department, Washington 25, D. C., where copies of the Treasury Department's regulations governing assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental and amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of called debentures.

> A. L. M. WIGGINS, Acting Secretary of the Treasury.

#### Exhibit 27

# Partial redemption, before maturity, of 21/2 percent war housing insurance fund debentures, Series H

[Department Circular No. 805. Public Debt]

TREASURY DEPARTMENT, Washington, April 11, 1947.

To Holders of 21/2 Percent War Housing Insurance Fund Debentures, Series H:

I. NOTICE OF CALL FOR PARTIAL REDEMPTION, BEFORE MATURITY, OF 21/2 PER-CENT WAR HOUSING INSURANCE FUND DEBENTURES, SERIES H

The Federal Housing Commissioner, with the approval of the Secretary of the Treasury, has issued the following notice of call for partial redemption and offer to purchase with respect to 2½ percent war housing insurance fund deben-

"Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., title 12, sec. 1701 et seq.) as amended, public notice is hereby given that 2½ percent war housing insurance fund debentures, Series H, of the denominations and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on July 1, 1947, on which date interest on such debentures shall cease:

# 2½ percent war housing insurance fund debentures. Series H

•	Serial numbers
Denomination	(All numbers inclusive)
\$50	40 to 507
100	319 to 1,849
500	105 to '608.
1,000	313 to 2,680
5,000	1 to 53
10,000	1 to 148

"The debentures first issued as determined by the serial numbers were selected for redemption by the Commissioner, Federal Housing Administration, with the

approval of the Secretary of the Treasury.

"No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after April 1, 1947. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after April 1, 1947, and provision will be made for the payment of final interest due on July 1, 1947, with the principal thereof to the actual owner, as shown by the assignments thereon.

"The Commissioner of the Federal Housing Administration hereby offers to

purchase any debentures included in this call at any time from April 1, 1947, to

June 30, 1947, inclusive, at par and accrued interest, to date of purchase.

"Instructions for the presentation and surrender of debentures for redemption on or after July 1, 1947, or for purchase prior to that date will be given by the Secretary of the Treasury."

#### II. TRANSACTIONS IN CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for partial redemption on July 1, 1947, are hereby designated called  $2\frac{1}{2}$  percent war housing insurance fund debentures, Series H, and are hereinafter referred to as called debentures.

2. Transfers and denominational exchanges in called debentures will terminate

at the close of business on March 31, 1947.

#### III. REDEMPTION OR PURCHASE

1. Holders of called debentures will be entitled to have such debentures redeemed and paid at par on July 1, 1947, with interest in full to that date, at the rate of \$12.50 per \$1,000. Interest on called debentures will cease on July 1, 1947.

2. Holders of called debentures have the privilege of presenting such debentures at any time from April 1 to June 30, 1947, inclusive, for purchase at par and accrued interest, at the rate of \$0.069061 per \$1,000 per day from January 1, 1947, to date of purchase.

#### IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Commissioner for the redemption and purchase of called debentures. In accordance with regulations adopted by the Federal Housing Commissioner and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of called debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable,

except as otherwise provided herein.

2. Called debentures presented for redemption on July 1, 1947, or for purchase from April 1 to June 30, 1947, inclusive, must be assigned by the registered payee or assignee thereof or by their duly constituted representatives in the form indicated in paragraph 3 of this section, and should thereafter be presented and surrendered to any Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., accompanied by appropriate written advice. (Use Form PD 2107.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) In all cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered.

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should be assigned by such payee or assignee or by a duly constituted representative to "The Federal Housing Commissioner for redemption" or to "The Federal Housing Commissioner for purchase," according to whether the debentures are to be presented for redemption on July 1, 1947, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment the debentures should be assigned to "The Federal Housing Commissioner for redemption (or purchase) for the account of \_\_\_\_\_\_\_, is inserting the name and address of the person to whom payment is to be made.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the

protection afforded by registration.

5. Final interest on any called debentures, whether purchased prior to or redeemed on or after July 1, 1947, will be paid with the principal in accordance

with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment not made upon the debenture is considered a detached assignment.

7. A called debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after July 1, 1947, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corporation. Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to July 1, 1947, and in case of assignments for redemption on or after July 1, 1947, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail, but debentures bearing unrestricted assignments should be forwarded

by registered mail insured or by express prepaid.

9. In order to facilitate the redemption of called debentures on July 1, 1947, any such debenture may be presented and surrendered in the manner herein prescribed in advance of that date but not before June 1, 1947. Such early presentation by holders will insure prompt payment of principal and interest when due.

764788-48-13

#### V. GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of called debentures under this circular may be obtained from any Federal Reserve Bank or from the Division of Loans and Currency, Treasury Department, Washington 25, D. C., where copies of the Treasury Department's regulations governing

assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental and amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of called debentures.

A. L. M. WIGGINS,
Acting Secretary of the Treasury.

# MONETARY DEVELOPMENTS

#### Exhibit 28

Report of the National Advisory Council with respect to United States participation in the International Bank for Reconstruction and Development and in the International Monetary Fund to October 31, 1946

THE PRESIDENT'S LETTER, JANUARY 13, 1947, TRANSMITTING THE REPORT TO THE CONGRESS

To the Congress of the United States:

In accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, there is transmitted herewith a report by the National Advisory Council on International Monetary and Financial Problems with respect to the participation of the United States in the International Bank for Reconstruction and Development and in the International Monetary Fund to October 31, 1946.

HARRY S. TRUMAN.

THE WHITE HOUSE, January 13, 1947.

REPORT OF ACTIVITIES OF THE NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL PROBLEMS TO OCTOBER 31, 1946

#### I. FUNCTIONS AND POWERS OF THE COUNCIL

The National Advisory Council on International Monetary and Financial Problems was established by the Congress in the Bretton Woods Agreements Act (59 Stat. 512; 22 U. S. C. 286b), approved by the President on July 31, 1945. The statute directs the Council to advise and consult with the representatives of the United States on the Bank and the Fund and to coordinate their policies and those of the Export-Import Bank of Washington and all other agencies of the Government "to the extent that they make or participate in the making of foreign loans, or engage in foreign financial, exchange, or monetary transactions."

#### II. ORGANIZATION OF THE COUNCIL

The organization and procedure followed in the Council's work were outlined in the report transmitted to the Congress on March 8, 1946 (H. Doc. No. 497, 79th Cong., 2d sess.). The Council had established a Technical Committee on the Bank and the Fund, which was charged with the responsibility for the planning and the consultation with representatives of foreign governments, preparatory to the inaugural meetings of the Bank and the Fund. This committee has now completed its tasks, and technical matters relating to these institutions are considered by the Council Staff Committee. In other respects the procedures of the Council remain substantially unchanged.

## A. Members of the Council

The present members of the Council, according to law, are the following:

The Secretary of the Treasury, John W. Snyder, Chairman.
The Secretary of State, James F. Byrnes.
The Secretary of Commerce, W. Averell Harriman.
The Chairman of the Board of Governors of the Federal Reserve System, Marriner S. Eccles

The Chairman of the Board of Directors of the Export-Import Bank, William

McChesney Martin, Jr.

Two changes in the membership of the Council have occurred since the previous port. On June 25, 1946, John W. Snyder succeeded Fred M. Vinson as Secretary of the Treasury, and on October 7, 1946, W. Averell Harriman succeeded Henry A. Wallace as Secretary of Commerce.

By agreement the following serve as alternates:

Andrew N. Overby, special assistant to the Secretary of the Treasury. William L. Clayton, Under Secretary of State for Economic Affairs.

Arthur Paul, assistant to the Secretary of Commerce.

J. Burke Knapp, Assistant Director of Research and Statistics, Board of Governors of the Federal Reserve System.

Herbert E. Gaston, Vice Chairman of the Board of Directors of the Export-Import Bank.

Harold Glasser, Director of Monetary Research in the Treasury Department is the Secretary of the Council.

## B. United States representatives on the Bank and the Fund

The Council, under the Bretton Woods Agreements Act, is assigned the responsibility of recommending to the President general policy directives for the guidance of the representatives of the United States on the Fund and the Bank, after consultation with these representatives. The Council has the further duty to advise and consult with the President and with the United States representatives on the Bank and Fund, regarding major problems arising in the administration of these organizations. The United States representatives have regularly met with the Council, and there has been a full exchange of views on matters concerning these institutions.

The President nominated Fred M. Vinson, then Secretary of the Treasury, as the first United States Governor of the Bank and Fund, and William L. Clayton, then Assistant Secretary of State, as Alternate Governor; Emilio G. Collado, then deputy on financial affairs, State Department, was nominated as the United States Executive Director of the Bank; and Harry D. White, then Assistant Secretary of the Treasury, was nominated as the Executive Director of the Fund for the United States. The Senate confirmed these nominations on February 6,

John W. Snyder was nominated to succeed Fred M. Vinson as Governor of the Bank and the Fund. This appointment was confirmed by the Senate on July 10, On the same date the Senate confirmed the appointments of John S. Hooker as United States Alternate Executive Director of the Bank and George F. Luthringer as United States Alternate Executive Director of the Fund.

#### III. PAYMENTS MADE BY THE UNITED STATES TO THE FUND AND THE BANK

In accordance with the articles of agreement of the Fund, each government signing the agreement paid one one-hundredth of 1 percent of its total subscription to the Fund in gold or United States dollars. These payments were held in a special deposit account in the Treasury until the inaugural meeting of the Board of Governors of the Fund, and on March 29, 1946, they were transferred to the Fund. The Fund has received a total of \$737,250 from these payments by members. The United States paid \$275,000 to the Kund under this clause.

The balance of the subscription of the United States to the Fund will be paid in accordance with article III, section 3, and article XX, section 4 (c), of the agreement, which provide for full payment on or before the date when the Fund begins exchange transactions. Funds for this purpose have already been provided by section 7 of the Bretton Woods Agreements Act. In accordance with section 7 (c) of the Bretton Woods Agreements Act, the United States intends to In accordance with exercise its option under article III, section 5, of the Fund agreement, to deliver special nonnegotiable, noninterest-bearing notes of the United States payable on demand in exchange for dollars not needed by the Fund for its operations.

The articles of agreement of the Bank (art. XI, sec. 2 (d)) require the payment of one one-hundredth of 1 percent of the capital subscription of each member country at the time of signature of the articles. These payments were treated in the same way as the initial payments to the Fund noted above. Accordingly, the United States paid the Bank \$317,500 under this clause. Total payments by all member countries aggregated \$767,000.

Under article II, sections 7 and 8, the balance of 2 percent of the capital subscription became payable within 60 days after the Bank began operations—i. e., scription became payable within ou days after the pain began operations—i. e., on or before August 24, 1946. The United States accordingly paid an additional \$63,182,500 to the Bank on June 28, 1946. The Bank, in accordance with article II, sections 5, 7, and 8, called for an additional 3 percent (\$95,250,000) as of June 25, 1946, payable on or before November 25, 1946. This call was likewise paid on June 28, 1946. The total paid to the Bank by the United States as of October 21, 1946, amounted therefore to \$182,750,000

31, 1946, amounted, therefore, to \$158,750,000.

As of September 25, 1946, the Bank called an additional 5 percent of the capital subscription of all members payable by November 25, 1946, and it has also given notice that it intends to make two additional calls of 5 percent each, also given have 25 1947, and May 26, 1947, respectively. The United payable by February 25, 1947, and May 26, 1947, respectively. The United States payment on each of these calls will be \$158,750,000, so that a total of \$635,000,000 will be paid in on capital subscription by the United States. The remainder of the United States subscription to the capital stock of the Bank will not be called unless funds are needed to make payments to investors to meet obligations of the Bank.

In accordance with the Bretton Woods Agreements Act, the United States will exercise its option to deliver nonnegotiable, noninterest-bearing demand notes in exchange for dollars not needed in the Bank's operations, as provided in article

V, section 12, of the Bank agreement.

## IV. ACTIONS BY THE COUNCIL RELATING TO THE BANK AND THE FUND

The Bretton Woods Agreements Act, section 4 (b) (4), provides that-

Whenever, under the Articles of Agreement of the Fund or the Articles of Agreement of the Bank, the approval, consent, or agreement of the United States is required before an act may be done by the respective institutions, the decision is not whether such approval, consent, or agreement shall be given or refused shall (to the extent such decision is not prohibited by sec. 5 of this act) be made by the Council, under the general direction of the President. No governor, executive director, or alternate representing the United States shall vote in favor of any waiver of conditions under article V, section 4, or in favor of any declaration of the United States dollar as a scarce currency under article VII, section 3, of the Articles of Agreement of the Fund, without prior approval of the Council.

In the present formative period in the life of the Bank and Fund, no occasions have as yet arisen for formal action under this authority. The Council has contributed to the formulation of the policies of these organizations through its consultation with and advice to the United States Executive Directors and through its participation in the meetings of the respective Boards of Governors.

The Bank and Fund have been informed that all communications between this Government and the international organizations are to be sent directly to and from the Chairman of the National Advisory Council.

On September 12, 1946, the Fund requested the Chairman of the Council to communicate the par value of the dollar for the purposes of the Fund under article XX, section 4, of the agreement. The Secretary of the Treasury, as article XX, section 4, of the agreement. Chairman, accordingly communicated the par value of the dollar as 15\%1 grains of gold, nine-tenths fine, as proclaimed by the President of the United States on

January 31, 1934.

Soon after the Bank opened for business on June 25, 1946, the United States Executive Director consulted the Council as to whether article IV, section 2 (a) and (b), of the articles of agreement required the Bank to obtain United States approval in order to lend or invest dollars derived from the 2 percent payable in The Council and gold or dollars by all members on their capital subscription. the United States Executive Director were in agreement that such approval is not required under these provisions. The Council also advised the United States Executive Director that it saw no objection to the investment of these funds in short-term obligations of the United States, if the Bank found that it had adequate authority under its articles of agreement to invest these funds in such securities. Subsequently the Bank invested \$127,500,000 in short-term United States Government securities.

Among the other subjects of discussion between the Council and the United States Executive Director of the Bank has been the scope of the lending operations of the International Bank. The Council has requested that certain applicants for Export-Import Bank loans be directed to the International Bank, and these applications are now being considered by it.

V. COUNCIL PARTICIPATION IN THE MEETINGS OF THE BOARDS OF GOVERNORS OF THE BANK AND FUND

The articles of agreement of the Bank and of the Fund entered into force on December 27, 1945, with their signature by the required number of countries. By December 31, 1945, 33 countries had joined both the Bank and the Fund,

while one additional country, Colombia, had joined the Fund but not the Bank. Soon thereafter the member countries appointed their respective Governors. Since the powers of the Bank and the Fund are vested in their respective Boards of Governors, the next essential step toward completing the initial organization was to call a meeting of these boards. A large amount of preliminary work was necessary before this step could be taken. While the Government of the United States was empowered to call the first meeting under the articles, other governments had to be consulted on procedure. The preliminary work and consultation were entrusted to the Technical Committee on the Bank and the Fund of the National Advisory Council, acting under the supervision of the Council.

In accordance with the articles of agreement of the Bank and the Fund, the President of the United States called the inaugural meeting of the Boards of Governors. The meetings were held at Savannah, Ga., from March 8 to March 18, 1946. The Governors or Alternate Governors of all nations which had become members of the Bank and Fund were present. The United States Governor was elected Chairman of the Board of both organizations. Secretary Vinson was assisted in the work of the inaugural meeting by the Alternate Governor, the Executive Directors, members of the Council and their staffs, and a representative of the Securities and Exchange Commission. Council agencies also provided the secretariat for the meeting.

The inaugural meetings were concerned largely with the problems of organizing the international bodies. The Boards of Governors adopted bylaws, established procedures, appointed committees, and delegated appropriate powers to the Executive Directors, whose sessions began shortly after the close of the inaugural meetings of the Governors. It was decided to hold the first annual meetings of the Governors in Washington in September 1946, at which time appropriate actions could be taken on the matters raised but not settled at Savannah. The Bank and the Fund have published reports of the proceedings of the inaugural

The first annual meetings of the Board of Governors of the Bank and the Board of Governors of the Bank and the Board of Governors of the Bank and the Board of Governors of the Fund were held in Washington from September 27 to October 3, 1946, inclusive. The United States Governor, John W. Snyder, as Chairman of both Boards of Governors, presided at the opening and closing joint sessions of the Bank and the Fund. He also presided at some of the separate meetings of the Boards of Governors of each institution. The Alternate Governor, William L. Clayton Under Secretary of State for Economic Affairs, as at Savan William L. Clayton, Under Secretary of State for Economic Affairs, as at Savannah, spoke for the United States at meetings of the Boards of Governors. Four temporary Alternate Governors were appointed to represent the United States at various committee meetings. They were:

Marriner S. Eccles, Chairman of the Board of Governors of the Federal

Reserve System.

William McChesney Martin, Jr., Chairman of the Board of Directors of the Export-Import Bank.

Alfred Schindler, Under Secretary of Commerce.

James J. Caffrey, Chairman of the Securities and Exchange Commission.

The Governors and Alternate Governors were assisted by the United States

Executive Directors and their alternates and by the technical staffs of the agencies represented in the National Advisory Council and of the Securities and Exchange Commission. The chairmen and ranking minority members of the Senate and House Committees on Banking and Currency were invited to attend both meetings as advisers and rendered valuable assistance and counsel.

The principal matters on which action was taken at these meetings were the admission of new members, changes in quotas and subscriptions, and the adoption

of rules and regulations governing the conduct of the Bank and the Fund.

#### VI. PRINCIPAL ACTIONS OF THE BANK AND FUND

The Executive Directors fixed June 25, 1946, as the date upon which the Bank would formally begin operations and called for the balance of the initial 2 percent of the capital subscription. Mr. Eugene Meyer (United States) was elected

President and took office on June 18, 1946.

The Executive Directors of the Fund at their first meeting on May 6, 1946, elected Mr. Camille Gutt (Belgium) as Managing Director. On September 12, 1946, the Fund announced that "it will shortly be in a position to begin exchange transactions" (art. XX, sec. 4) and requested the members to communicate the par values of their currencies. The Fund may begin exchange transactions after the exchange parities have been agreed with the Fund by members having an aggregate of at least 65 percent of the quotas established at Bretton Woods.

## A. Admission of members

The United States has favored the early admission to membership in the Bank and Fund of all peace-loving nations. The United States Government supported the extension until December 31, 1946, of the period of time during which countries represented at Bretton Woods might accept membership in these institutions on the same terms as the original signatories. During the Savannah meeting, or shortly thereafter, five members joined both the Fund and the Bank, viz, Cuba, Denmark, Nicaragua, Panama, and El Salvador. The extension still applies to Australia, Haiti, Liberia, New Zealand, the Union of Soviet Socialist Republics and Venezuela. Colombia joined the Fund but not the Bank and is also eligible under this extension to join the Bank.

The United States has also supported the admission of new members, and at the first annual meeting of the Boards of Governors in Washington applications were accepted from Italy, Lebanon, Syria, and Turkey. Quotas in the Fund for the new members were fixed at this time (Italy, 180 million dollars; Lebanon, 4.5 million dollars; Syria, 6.5 million dollars; and Turkey, 43 million dollars). Subscriptions to the capital stock of the Bank are in the same amount as the Fund

quota for each country.

## B. Revisions of quotas and subscriptions

The Board of Governors of the Fund, with the concurrence of the United States, voted during the Washington meeting to increase the quota of France in the Fund from 450 million dollars to 525 million dollars, and of Paraguay from 2 million dollars to 3.5 million dollars, conditional upon application for proportionate increases in their subscriptions to the Bank. The Board of Governors of the Bank approved increases in the Bank subscription of France to 525 million dollars and of Paraguay to 1.4 million dollars.

## C. Functions and remuneration of the executive directors

The United States has favored a broad delegation of powers to the Boards of Executive Directors of both the Bank and the Fund and has supported the principle that the offices of Executive Directors (and their alternates) should be full-time positions. It is provided in the bylaws of the Bank and of the Fund that—

It shall be the duty of an Executive Director and his alternate to devote all the time and attention to the business of the Bank [Fund] that its interests require, and, between them, to be continuously available at the principal office of the Bank [Fund].

The Boards of Governors of the Bank and of the Fund decided to fix the remuneration of Executive Directors (and their alternates) on the basis of full-time service, but where a director or alternate serves only on a part-time basis his remuneration is to be prorated according to the proportion of his time devoted to the institution.

The following resolution concerning national taxes on salaries and allowances was passed at the Savannah meeting by the Boards of Governors of the Bank and

the Fund:

Appropriate measures for the elimination or equalization of the burden of national taxes upon salaries and allowances paid by the International Bank for Reconstruction and Development [International Monetary Fund] are indispensable to the achievement of equity among its members and equality among its personnel—

#### Therefore—

The Board of Governors of the International Bank for Reconstruction and Development [International Monetary Fund] recommends to the members of the Bank [Fund] that necessary action be taken by them to exempt from national taxation salaries and allowances paid out of the budget of the Bank [Fund] to the President [Managing Director], the Executive Directors and their alternates and to the staff of the Bank [Fund].

When the Congress is again in session, the Council will give consideration to the problem raised by this resolution insofar as the United States is concerned, in the light of the similar problem which has arisen in the case of American citizens employed by the United Nations and other international bodies of which the United States is a member.

# D. Other actions of the Bank and Fund

The articles of agreement of the Bank and of the Fund provide that their principal offices are to be located in the country with the largest subscription and quota, respectively. Since these institutions are intergovernmental bodies, the United States delegation favored the location of their principal offices in Wash-This view prevailed at the Savannah Conference.

The United States representatives have shared a substantial identity of view with the representatives of the other members of the Bank and the Fund on many

other matters which have been considered.

At the first annual meeting the Governors of the Fund also adopted a resolution on silver introduced by the Governor for Mexico. The conclusion of this resolution is as follows:

The Fund shall gather whatever material is available and obtainable on the monetary uses of silver; the real function of silver coins; risks and uncertainties of its monetary uses; possibilities of cooperation in the use of silver for monetary purposes, etc. In general, the Fund shall gather material, statistical or otherwise, which could be useful in facilitating discussions on the subject in an international conference among interested member countries.

The Boards of Governors decided to hold their next annual meetings at London in September 1947. Officers were elected to hold office until the end of the second annual meeting. The Governor for the United Kingdom was elected Chairman, and the Governors for China, France, India, and the United States were elected Vice Chairmen for the ensuing year.

## VII. INTERPRETATIONS OF THE ARTICLES OF AGREEMENT OF THE BANK AND FUND

To carry out the requirement of section 12 of the Bretton Woods Agreements Act, the United States Governor of the Bank at Savannah requested an interpretation "as to the authority of the Bank to make or guarantee loans for programs of economic reconstruction and the reconstruction of monetary systems, including long-term stabilization loans." The Governors of the Bank, pursuant to article IX (a) of the agreement, invited the Executive Directors to interpret the articles in this respect.

The Executive Directors of the Bank approved a report by their Committee

on Interpretations, which concluded that-

Under the articles of agreement, the Bank has authority to make or guarantee loans for programs of economic reconstruction and the reconstruction of monetary systems, including long-term stabilization loans.

In accordance with the requirement of section 13 (a) of the Bretton Woods Agreements Act, the United States Governor presented a request at the inaugural meeting for an interpretation of the Fund articles of agreement-

as to whether the authority of the Fund to use its resources extends beyond current monetary stabilization operations to afford temporary assistance to members in connection with seasonal, cyclical, and emergency fluctuations in the balance of payments of any member for current transactions, and whether the Fund has authority to use its resources to provide facilities for relief, reconstruction, or armaments, or to meet a large or sustained outflow of capital on the part of any member.

Pursuant to article XVIII (a) of the agreement, the Board of Governors of the Fund referred the matter to the Executive Directors.

The Executive Directors of the Fund on September 26, 1946, in accordance with article XVIII of the Fund agreement, made the following interpretation:

The Executive Directors of the International Monetary Fund interpret the articles of agreement to mean that authority to use the resources of the Fund is limited to use in accordance with its purposes to give temporary assistance in financing balance of payments deficits on current account for monetary stabilization operations.

These interpretations appear to be fully responsive to the directives of Congress, so that, in the opinion of the National Advisory Council, action for amending the articles of agreement does not appear necessary.

The Governor of the Fund for the United Kingdom also made a request for an interpretation, in response to which the Executive Board made the following interpretation on September 26, 1946:

The Government of the United Kingdom has stated its intention to maintain full employment and has requested an interpretation of the articles of agreement as to whether steps necessary to protect a member from unemployment of a chronic or persistent character, arising from pressure on its balance of payments, shall be measures necessary to correct a fundamental disequilibrium.

The Executive Directors interpret the articles of agreement to mean that steps which are necessary to protect a member from unemployment of a chronic or persistent character, arising from pressure on its balance of payments, are among the measures necessary to correct a fundamental disequilibrium; and that meach instance in which a member proposes a change in the par value of its currency to correct a fundamental disequilibrium the Fund will be required to determine, in the light of all relevant circumstances, whether in its opinion the proposed change is necessary to correct the fundamental disequilibrium.

#### VIII. CONCLUSION

The Bank and the Fund have now concluded the preliminary phase of their work. The necessary machinery has been set up. The recruitment of staff on a broad international basis is progressing satisfactorily. The Executive Directors have chosen able men as President of the Bank and Managing Director of the Fund. The Bank has called for payment of the member subscriptions to its paid-in capital and should soon be ready to float securities and make loans. The Fund has announced that it will shortly be in a position to begin exchange operations and has asked the members to communicate the par values of their curren-It is expected that the Fund will reach agreement with most members on the initial par values of their currencies. In view of the difficult problems which the new organizations have had to face, they have made satisfactory progress in carrying out the plans formulated at Bretton Woods.

From the point of view of the United States, the actions taken and policies adopted by the Bank and Fund are, in the opinion of the National Advisory Council, satisfactory. On most issues there has been substantial unanimity on the part of the representatives of the member countries. Differences of view have been reconciled by agreement after full discussion in the Boards of Executive Directors. The United States representatives on the Bank and Fund Boards have kept the Council fully informed of all important matters and have ably represented the American point of view in the international institutions. The good working relations between these representatives and the Council have assured effective implementation of the replicing established by the Council have assured effective implementation of the policies established by the Congress in the Bretton Woods Agreements Act.

JOHN W. SNYDER, Secretary of the Treasury, Chairman of the National Advisory Council on International Monetary and Financial Problems.

JAMES F. BYRNES,

Secretary of State.

W. A. HARRIMAN,

Secretary of Commerce.

M. S. Eccles, Chairman of the Board of Governors of the Federal Reserve System.

WM. McC. Martin, Jr., Chairman of the Board of Directors of the Export-Import Bank of Washington.

## Exhibit 29

Report of the National Advisory Council with respect to United States participation in the International Bank for Reconstruction and Development and in the International Monetary Fund to March 31, 1947

THE PRESIDENT'S LETTER, JUNE 26, 1947, TRANSMITTING THE REPORT TO THE Congress

To the Congress of the United States:

On March 8, 1946, I sent to the Congress a report of the National Advisory Council on International Monetary and Financial Problems describing the operations of the Council during the preceding 6 months in coordinating the foreign financial activities of the Government. On January 13, 1947, I sent to the Congress a National Advisory Council Report on Participation of the United States in the International Monetary Fund and the International Bank for Reconstruc-

tion and Development to October 31, 1946.

I have now received from the National Advisory Council a report covering its operations from February 28, 1946, to March 31, 1947, and describing, in accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, the participation of the United States in the International Monetary Fund and the International Bank from October 31, 1946, to March 31, 1947.

The report is attached hereto.

HARRY S. TRUMAN.

THE WHITE HOUSE, June 26, 1947.

Report of Activities of the National Advisory Council on International Monetary and Financial Problems to March 31, 1947

#### I. ORGANIZATION OF THE COUNCIL

## Statutory basis

The National Advisory Council on International Monetary and Financial Problems was established by the Congress in the Bretton Woods Agreements Act (59 Stat. 512, 22 U. S. C. 286b), which was approved by the President on July 31, 1945. The statute directs the Council to coordinate the policies and operations of the representatives of the United States on the International Monetary Fund and the International Bank for Reconstruction and Development, the Export-Import Bank of Washington and all other agencies of the Government "to the extent that they make or participate in the making of foreign loans or engage in foreign financial, exchange, or monetary transactions." The Council is also directed to advise and consult with the President and the United States representatives on the Fund and the Bank on major problems arising in the administration of the Fund and the Bank; and to recommend to the President general policy directives for the guidance of the representatives of the United States on the Fund and Bank. Portions of the statute stating the duties and powers of the Council are presented in appendix A.

## Reports

Since its first meeting on August 21, 1945, the Council has submitted three

formal reports to the President and to the Congress as follows:

Statement of the Foreign Loan Policy of the United States Government by the National Advisory Council on International Monetary and Financial Problems, forwarded to the President, and transmitted by the President to the Congress on March 1, 1946 (H. Doc. No. 489, 79th Cong., 2d sess.; subsequently included as appendix B to H. Doc. No. 497, 79th Cong., 2d

Report of the National Advisory Council on International Monetary and Financial Problems for the Period of the Last Six Months, forwarded to the President, and transmitted by the President to the Congress on March 8,

1946 (H. Doc. No. 497, 79th Cong., 2d sess.).

Report by the National Advisory Council on International Monetary and Financial Problems with respect to the Participation of the United States in the International Bank for Reconstruction and Development and in the International Monetary Fund to October 31, 1946, forwarded to the President, and transmitted by the President to the Congress on January 13, 1947 (H. Doc. No. 53, 80th Cong., 1st sess.).

The present report covers the activities of the Council from February 28, 1946, to March 31, 1947, and includes a survey of foreign financial assistance extended by the United States Government since the end of the war. It also includes (see pt. III below) the second report by the Council on participation of the United States in the International Bank for Reconstruction and Development and in the International Monetary Fund, covering the period from October 31, 1946, to March 31, 1947.

# Membership

The present members of the Council, according to law, are the following:

The Secretary of the Treasury, John W. Snyder, Chairman.
The Secretary of State, George C. Marshall.
The Secretary of Commerce, W. Averell Harriman.
The Chairman of the Board of Governors of the Federal Reserve System, Marriner S. Eccles.

The Chairman of the Board of Directors of the Export-Import Bank, William McChesney Martin, Jr.

By agreement, the following serve as alternates:
Andrew N. Overby, Special Assistant to the Secretary of the Treasury.
William L. Clayton, Under Secretary of State for Economic Affairs.
Thomas C. Blaisdell, Jr., Assistant to the Secretary of Commerce.

J. Burke Knapp, Assistant Director of Research and Statistics, Board of Governors of the Federal Reserve System.

🏽 ൈ Herbert E. Gaston, Vice Chairman of the Board of Directors of the Export-

Import Bank. Harold Glasser, Director of Monetary Research in the Treasury Department, is

the Secretary of the Council.

The United States Executive Directors on the International Monetary Fund and the International Bank for Reconstruction and Development regularly attend the meetings of the Council.

Procedure

The Council ordinarily meets each week and holds such special meetings as are required. Since February 1946, the Council has held 53 meetings, including several joint meetings with the President's Committee for Financing Foreign Members of the Council also formed a special committee which was charged with carrying through the financial negotiations with representatives of the Provisional Government of France in the spring of 1946.

The Council has made use of the services of the existing personnel of its five member agencies. As described in previous reports, its Staff Committee, consisting of technical representatives of member agencies and a representative of the Securities and Exchange Commission, collects and analyzes information and prepares reports and recommendations for the Council. Secretariat functions are performed by personnel of the Treasury Department. Through this procedure, the Council has not only operated economically but has also maintained the close

interagency liaison essential for successful performance of its coordinating function. In accordance with its statutory responsibility, the Council has coordinated a wide variety of foreign financial transactions by agencies of this Government, including foreign loans, financial settlement of war accounts, and credits to foreign governments or their nationals for purchase of United States Government surplus Its objective has been to achieve a consistent United States foreign olicy. Problems which before the institution of the Council had property. financial policy. been dealt with by individual agencies and, in many cases, with only incidental coordination, have been made the subject of joint discussion and joint decision. The Council considers various criteria for foreign loans, among which are the purpose of the loan, the need for the loan, the borrower's ability to repay, the allocation of available loan funds among applicant countries, the alternative sources of loan funds, and the possible effects of the use of loan proceeds on the United States domestic economy. On the basis of these criteria the Council approves or disapproves consideration by the lending agency of a proposed loan or credit. Thus, through an over-all analysis, the Council offers its best judgment to a lending agency with regard to particular loan applications. Similarly, through continuous consultation with United States representatives

on the International Fund and Bank, and through exercise of the special powers granted to the United States in the Bank's Articles of Agreement over the Bank's operations involving United States dollars, the Council has assured coordination between the operations of these international institutions and the foreign financial

operations of the United States Government.

II. ACTIVITIES OF THE COUNCIL FROM FEBRUARY 28, 1946, TO MARCH 31, 1947 (OTHER THAN THOSE RELATING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK)

# The Anglo-American Financial Agreement

On July 15, 1946, President Truman signed the joint congressional resolution which implemented the Financial Agreement of December 6, 1945, with the United Kingdom, and the agreement became effective immediately. The resolution implementing the agreement authorized the Secretary of the Treasury, in consultation with the National Advisory Council, to carry out the agreement of The resolution

December 6, 1945.

The initial drawing under the line of credit provided for by the Financial Agreement was made by the British Government on July 18, 1946. Six subseq withdrawals brought the total drawings to \$1,300,000,000 as of April 1, 1947 Six subsequent

To implement the joint congressional resolution which provided that "the Secretary of the Treasury, in consultation with the National Advisory Council on International Monetary and Financial Problems, is hereby authorized to carry out the agreement dated December 6, 1945, between the United States and the United Kingdom," the Council directed its Staff Committee to coordinate the

study of problems arising under the agreement.
On September 17, 1946, the United Kingdom signed an agreement with Argentina, providing for the settlement of sterling balances accumulated by Argentina during the war. Since implementation of one clause of this agreement involved a potential violation of the principle, embodied in the Anglo-American Financial Agreement, that sterling balances should not be used as a device for discriminatory expansion of British exports, the National Advisory Council recommended that the Secretary of the Treasury write to the British Chancellor of the Exchequer, with respect to this clause of the Argentine agreement. There followed an exchange of letters between the Secretary and the Chancellor, which was made Chancellor Dalton gave assurances that the clause public on February 5, 1947. objected to would not be written into any subsequent agreement for the settlement of sterling balances held by other countries. Subsequently, Argentina and the United Kingdom have agreed to liquidate Argentina's total sterling balances through use of these balances to purchase British-owned railways in Argentina. Such liquidation is consistent with the financial agreement.

The United Kingdom has also negotiated a series of agreements with other countries to carry out the obligations under the Anglo-American Financial Agreement which become effective July 15, 1947. In December 1946, the United Kingdom signed an agreement with Canada, under which sterling was made freely transferable between Canadian, American, and Argentine accounts, and Canada agreed to accept sterling in payment of exports from a large number of countries. In February 1947, the United Kingdom signed three supplementary agreements amending the monetary agreements with Belgium, the Netherlands, and Portugal, making sterling balances held by these countries immediately

available for current payments in any currency area.

# Export-Import Bank Credits

From the beginning of its operations on August 21, 1945, through March 31, 1947, the Council approved (or referred) for consideration by the Export-Import Bank approximately \$2,000,000,000 of credits (excluding \$600,000,000 earmarked for China and Italy) which were subsequently authorized by the Board of Directors of the Export-Import Bank. Several credits, also available for postwar use, were authorized or negotiated by the Bank, some between July 1, 1945, and the beginning date of Council operations and some, which were associated with earlier Bank commitments, after the beginning of Council operations. The following table shows the distribution of credits by country and object of financing:

Net credits authorized by the Export-Import Bank, July 1, 1945, to Mar. 31, 1947 [In millions of dollars]

•	·		Object of cre	dit financing						
Area and country	Lend-lease requi- sitions	Recon- struction	Develop- ment	Cotton purchases <sup>2</sup>	Other	Total

<sup>&</sup>lt;sup>1</sup> Cancellations and expirations deducted. Numerous small exporter-importer loans extended by the Bank, July 1, 1945, through Mar. 31, 1947, are excluded.

<sup>2</sup> Credits extended by the Export-Import Bank under general approval of the Council.

In March 1946 the Council approved consideration by the Bank of the extension to Chinese Government agencies and private enterprises of credits aggregating \$500,000,000 for the purchase in the United States of materials, equipment, and services to assist in the rehabilitation and development of the Chinese economy. The Bank earmarked this amount for the extension of credits for specific projects submitted to the Bank and approved by it prior to June 30, 1947. As of March 31, 1947, no credits had been approved.

<sup>8</sup> Revolving credit.

For financing tobacco purchases.
For financing food purchases.
Excludes \$49,000,000 participation by private banks through Mar. 31, 1947.

In January 1947, the Council approved consideration by the Bank of credits to Italy totaling not more than \$100,000,000. The Bank has earmarked this amount for the extension during 1947 of credits for the purpose of financing imports from the United States and, thereby, assisting specific parts of Italian industry in the restoration and expansion of export markets. Stable conditions in Italy and that country's ability to provide for other essential imports are pre-requisites to the extension of credits under the agreement. As of March 31, 1947, no credits had been approved.

Several additional loan applications, which the Council approved for consideration, are under study by the Bank. As of March 31, 1947, the unutilized lending capacity of the Bank, after deduction of the earmarked amounts for

China and Italy, was approximately \$320,000,000.

# The Philippine loan

During May 1946 the President-elect of the new Philippine Republic conferred with President Truman, congressional leaders, and various Government officials concerning the financial situation of that country and the possibilities of obtaining sizable loans from the United States for budgetary and trade purposes.

On the basis of available information the Council during July reached the conclusion that a loan of not more than \$75,000,000 would suffice to carry the Philippine Government through its financial difficulties during the current fiscal The Council agreed that such a loan, because of its special nature, should be presented to the Congress for direct authorization; and that a Joint Philippine-American Finance Commission should make a thorough study of the entire financial and budgetary situation of the Philippine Government.

Congress, by Public Law 656 (79th Cong.), approved August 7, 1946, authorized

the Reconstruction Finance Corporation to extend credits during the fiscal year 1947 to the Philippine Government of up to \$75,000,000 upon such terms as that agency, after consultation with the National Advisory Council, should deem to be warranted by the financial position of the Philippine Government. request for an initial advance of \$25,000,000 under this authorization was subsequently received in Washington. On the basis of this request the Council approved consideration by the Reconstruction Finance Corporation of a loan of \$25,000,000 to the Philippine Government with interest at the rate of 2 percent per annum and maturing on January 1, 1952. This recommendation was accepted by the Reconstruction Finance Corporation and the Philippine Government.

The Joint Finance Commission recommended by the Council was established

by agreement between the two Governments and has been working in Manila since the end of January. The Commission is expected to report to the two

Governments during the spring of this year.

#### War settlements arrangements and credits

The Council has continued to coordinate policy governing the financial settlements with foreign countries arising from the war. This work includes lend-lease settlements, general financial terms for the disposal of surplus property located abroad, adjustment payments for the expenditures of United States armed forces in foreign countries, and settlement of other war claims. The Department of State has primary responsibility for agreements concerning lend-lease and surplus property located abroad, under general principles approved by the Council.

In many cases all pending war accounts with a particular country have been negotiated at one time, as a means of facilitating agreement between the parties. An over-all settlement was concluded with France on May 28, 1946, and similar types of settlement were concluded with Belgium on September 24, 1946, and

with the Union of South Africa on March 21, 1947.

The agreement with France was reviewed by the Council. This over-all war settlement resulted in a net French obligation to the United States of \$720,000,000. The amount of this obligation covers final settlement of lend-lease and reciprocal aid, transfer of certain surplus property to France and French North and West Africa on long-term credit, adjustment of the United States share of civilian supplies received by the French through combined military channels, and the settlement of other financial claims of each Government arising out of the conduct of the war.

The agreement reached with Belgium covers final settlement of lend-lease and reciprocal aid, transfer of surplus property in Belgium on long-term credit, the adjustment of the United States share of civilian supplies received by the Belgians from combined military channels, and the settlement of other financial claims of each Government arising out of the conduct of the war. An ancillary agreement signed with Luxemburg settled outstanding claims of the United States and Luxemburg Governments. The settlement with the Union of South Africa Luxemburg Governments. The settlement with the Union of South Africa covers lend-lease and reciprocal aid, mutual financial claims arising from the war, and certain surplus property items.

Lend-lease and surplus property agreements were also concluded with India on May 16, 1946, with Australia on June 7, 1946, and with New Zealand on July 10, 1946. An agreement covering transfer of certain surplus property was signed with China on August 30, 1946. There remain some unsettled war accounts on which the Chinese Government has been requested to negotiate. Most of the major aspects of lend-lease accounts with Latin-American countries have been settled. Negotiations on over-all settlements with Norway and the Netherlands are now well advanced: In the case of Greece and Czechoslovakia, discussions are in the initial stages. Formal negotiations with the Union of Soviet Socialist Republics did not begin until after March 31, 1947.

In accordance with a recommendation of the Council and after consultation with appropriate committees of the Congress and clearance with the Comptroller General, the Department of State, at the direction of the President, announced that payments would be made to the Italian Government of dollars already set aside in the Treasury to cover expenditures made by United States armed forces in allied military lira currency for the procurement of supplies, services, and facilities in Italy.

# Office of Foreign Liquidation Commissioner credits

The general policies established by the Council for the guidance of the Office of the Foreign Liquidation Commissioner, Department of State, with regard to the financing of surplus property sales abroad may be summarized as follows:

(a) Cash payment shall be obtained in United States dollars insofar as this

can be done without unduly reducing total proceeds.

(b) Where cash sales are not possible, credits repayable in dollars may be extended by the Foreign Liquidation Commissioner who will endeavor to make provision for this Government's right to obtain accelerated payments in the debtor country's currency to meet United States Government expenditures in such country.

(c) Where dollar credits are extended, the terms shall not be more favorable to recipient countries than 2% percent interest and 30-year final maturity, except in the case of surplus property sales made in connection with an over-all

settlement of war accounts.

(d) In exceptional circumstances local currency may be accepted by the Foreign Liquidation Commissioner in amounts and under conditions considered appropriate by the State Department in consultation with the Treasury Department.

(e) Insofar as practicable, Export-Import Bank funds should not be used for the purchase of goods in the United States of the same types as are anywhere available as United States surplus property.

When foreign countries make purchases of surplus property on credit terms consistent with the Council's general policies, the individual transactions are not usually referred to the Council for its consideration, but the Office of the Foreign Liquidation Commissioner informs the Council of the credits that have been extended. In the case of proposed surplus property sales to Japanese agencies involving different payment terms from those established by the Council's general policies, the Council passed upon specific credit terms.

Public Law 584, Seventy-ninth Congress, approved August 1, 1946, and known as the Fulbright amendment to the Surplus Property Act of 1944, established the Department of State as the sole disposal agency for surplus property located outside the continental United States, its Territories and possessions; and substantially broadened both the authorized types of consideration that might be accepted in the disposal of surplus property located abroad, and the authorized

use of the proceeds from the disposal of this property.

# United States Maritime Commission foreign credits

Under the Merchant Ship Sales Act of 1946, the United States Maritime Commission was authorized, with certain limitations, to sell war-built vessels to noncitizens at not less than the statutory sales price and upon terms and conditions not more favorable than those extended to United States citizens. Under its statutory authority the Maritime Commission, after consultation with the Council in each case, has extended the following credits for which contracts had been signed as of March 31, 1947:

ountry:		(in	n millions of	dollano)
Brazil		 		2. 1
France	· .	 		28. 8
Italy		 		20.4
Turkey		 		2. 8
Total		 		97. 0

Ships for which mortgage contracts were not yet signed as of March 31, 1947, have also been delivered to Norway under special custody agreements.

## War Assets Administration foreign credits

After discussions with representatives of the War Assets Administration, the Council approved in principle the extension of credits by that agency to finance sales of domestic surplus property to foreign governments. The details of coordinating such a program with the over-all foreign financial operations of this Government were worked out and confirmed by an exchange of correspondence between the Chairman of the Council and the War Assets Administrator in the early part of this year. Several foreign applications for credits for the purchase of United States domestic surplus property have been acted on by the Council. As of March 31, 1947, no contracts covering such purchases had been signed.

#### Credit terms

The establishment and coordination of credit terms to foreign countries obtaining loans or credits from various United States Government agencies has been a continuous concern of the Council. In view of this Government's interest in the work of reconstructing war-devastated countries and in promoting economic development in underdeveloped countries, the Council recognized the need for liberal credit terms which would facilitate and assist in this work and which borrowers could be expected to meet without undue burden on their balances of payments. At the same time, the Council took cognizance of the cost of loan funds to the United States and the need for the various foreign lending agencies of the Government to conduct their foreign credit operations on a self-sustaining basis.

At the beginning of its operations the Council was confronted with the problem of determining charges on Export-Import Bank long-term loans to countries disrupted by the war. An interest rate of 3 percent was established on 20- to 30-year loans. On Export-Import Bank loans to finance the purchase of goods requisitioned by foreign governments prior to VJ-day under lend-lease arrangements, it was considered appropriate to apply the terms contained in the lend-lease 3 (c) agreements and established pursuant to section 3 (c) of the Lend-Lease Act. Accordingly, the Bank's rate was set at 2% percent for 30-year loans of this type.

In the summer of 1946, detailed consideration was given by the Council to the Export-Import Bank rate on loans other than those for reconstruction purposes. Among the factors affecting the Council's decision was the desirability of establishing a rate which would attract private capital participation in the Bank's loan program without unduly burdening foreign borrowers and which would be likely to conform with the future pattern of International Bank charges on development loans of comparable maturities. The Council also considered the cost to the United States Government of public funds used by the Export-Import Bank and the rate at which the Bank should accumulate reserves against possible losses. The Council finally determined that the average or effective rate on Export-

Import Bank development loans to foreign governments, Government agencies and private borrowers should be 3½ percent on 15-year maturities; and that this rate should be adjusted upward or downward by the Bank according to the structure of rates for different maturities in the private capital market and, in the case of loans to private borrowers without Government guarantee, according to

differences in risks

In the spring of 1946, the Council considered the problem of credit terms on the net obligation due this Government from the Provisional Government of France as a result of an over-all settlement of war accounts with that country and a bulk purchase by France of United States surplus property located abroad. The Council determined that the interest rate on credits extended in the over-all settlement of war accounts with the French Government should be 2 percent and that the period of repayment should be 35 years with an initial 5-year period of grace on repayment of principal. While the rate of interest is thus the same as under the financial agreement with the United Kingdom, the French agreement differs in that it does not provide for any waiver of interest. The Council, however, approved the inclusion of a provision whereby, if both countries agreed that because of extraordinary and adverse economic conditions arising during the course of payment any periodic payment would not be to the common advantage of both governments, such payment might be postponed upon such terms and conditions as might be agreed. The Council also made the above terms applicable to over-all settlements of war accounts with other foreign governments.

Since it appeared that credits would be required in order to maximize the ultimate proceeds from the disposal to foreign countries of United States surplus property located abroad, the Council at an early stage in its activities considered the subject of credit terms to be extended by the Office of the Foreign Liquidation Commissioner. After due consideration the Council determined that terms should not be more favorable to foreign countries than 2% percent interest and 30-year final maturity. An exception was later made for bulk purchases of surplus property in connection with over-all settlement of war accounts, as noted above in the French case. The Council also coordinated the payment terms on which surplus property might be made available to Japanese agencies with the War Department's arrangements for securing payments for imports into Japan for the prevention of disease and unrest and for the accomplishment of the objectives

of the mission.

In accordance with the provisions of the Merchant Ship Sales Act of 1946, the minimum rate of interest chargeable by the United States Maritime Commission on ship purchase credits to foreign purchasers is 3½ percent and the maximum amount of credit is limited to 75 percent of the sales price. It was administratively determined by the Maritime Commission that the credit period should not exceed the remaining economic life of the vessel. In the light of this background, the Council determined that the statutory minimum rate should be charged.

## Relief

The imminent termination of the UNRRA program led the United Nations General Assembly in its fall session of 1946 to consider means of providing for the post-UNRRA relief needs of countries devastated by the war and not yet sufficiently recovered to provide their own minimum requirements for basic essentials such as food, medical supplies, and working capital for agriculture. The United Nations Special Technical Committee on Relief Needs After Termination of UNRRA estimated a total 1947 need of \$583,000,000 for Austria, Greece, Hungary, Italy, Poland, and Yugoslavia.

The State Department in an independent analysis estimated a 1947 relief

The State Department in an independent analysis estimated a 1947 relief deficit of \$576,000,000 for Austria, Greece, Hungary, Italy, Poland, and Trieste. The State Department's estimate was arrived at in conformity with the United Nations General Assembly's resolution of December 11, 1946, which defined 1947 foreign relief needs as the value of a country's net minimum import needs to prevent suffering and economic retrogression. The State Department carefully considered what part of the total relief needs might properly be met by a United

States contribution.

In view of the studies prepared by the United Nations and by the State Department, the Council considered the share recommended by the State Department as an appropriate United States contribution to post-UNRRA relief during the calendar year 1947. In recognizing the responsibility of the State Department for the proposed amount and administration of the United States contribution,

the Council expressed its opinion that the program would be consistent with the foreign financial policy of the United States Government. In order to coordinate the administration of United States post-UNRRA relief with other phases of this Government's foreign financial policy the Council requested the State Department to report periodically on the allocation of relief funds and on the agreements reached with the recipient countries. The President subsequently submitted to the Congress an appropriation request of \$350,000,000.

## Other Council activities

Early in 1946 the Council determined that until further notice, foreign requests for short-term loans on gold from Federal Reserve Banks need not be submitted to the Council for consideration. The Chairman of the Board of Governors of the Federal Reserve System was requested, however, to inform the Council whenever a new loan of this type was granted. Loans on gold do not create a net addition to foreign countries' dollar resources; dollars obtained through the pledge of gold might alternatively have been obtained through sale of the gold to the United States. The volume of such loans outstanding as of March 31, 1947, amounted to \$131,800,000.

The Council formulated this Government's position with regard to the assumption by the Economic and Social Council of the United Nations of certain technical functions of the League of Nations in connection with a series of international loans made during the inter-war period. The Council agreed that these residual technical functions were no longer of sufficient importance to warrant their assumption by the Economic and Social Council. These views were transmitted by the State Department to the United States representative to the Economic and

Social Council for his guidance and instruction.

During March of this year, the Council studied the problem of export credit insurance and transfer guarantees for United States exporters and concluded that there did not appear at this time any convincing need for a Government system of such insurance and guarantees. The Council agreed, however, that if sufficient need could be demonstrated a properly administered system of Government export credit and transfer risk insurance would seem feasible.

The Council made available to the United States delegation to the UNRRA conference in August 1946, specialized studies of the capacities to pay of certain

UNRRA recipient countries.

The Council, through the Securities and Exchange Commission, has kept itself informed of registrations and public offerings of foreign government bonds in the United States market.

# President's Committee for Financing Foreign Trade

On June 26, 1946, the President appointed a committee of bankers and industrialists to work in conjunction with the National Advisory Council on the prob-lem of financing foreign trade. The President pointed out that United States lem of financing foreign trade. The President pointed out that United States foreign trade, export and import, must in the long run be privately handled and privately financed if it is to serve well this country and the world economy.

The committee is composed of the following members:

Mr. Winthrop W. Aldrich, chairman, The Chase National Bank of the City

of New York.

Mr. Champ Carry, president, Pullman-Standard Car Manufacturing Corp. Mr. Walter J. Cummings, chairman, Continental-Illinois National Bank and

Mr. L. M. Giannini, president, Bank of America. Mr. Paul G. Hoffman, president, Studebaker Corp. Mr. Edward Hopkinson, Jr., partner, Drexel & Co.

Mr. Fowler McCormick, chairman, International Harvester Co.

Mr. Irving S. Olds, chairman, United States Steel Corp.

Mr. Herbert H. Pease, president, New Britain Machine Co.
Mr. Gordon S. Rentschler, chairman, National City Bank of New York.
Mr. A. W. Robertson, chairman, Westinghouse Electric Corp.
Mr. Tom K. Smith, president, The Boatmen's National Bank of St. Louis.
At the first joint meeting of the President's Committee for Financing Foreign Trade and the National Advisory Council in September 1946, the Committee recommended to the National Advisory Council that they confer informally on designated topics concerning which the Council desired information and advice,

764788-48--14

so that the Committee might make available to the Council the points of view of its members in the varying fields represented by them. Accordingly, meetings have been held at approximately monthly intervals to consider subjects of mutual interest.

III. ACTIVITIES OF THE COUNCIL FROM OCTOBER 31, 1946, TO MARCH 31, 1947, RELAT-ING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Effective operation of the International Monetary Fund and the International Bank leading toward full achievement of the purposes stated in their articles of agreement is a major consideration of this Government, not only because of its interest as a member in the adoption of sound and constructive international economic policies but also because of the necessity of coordinating United States Government foreign financial operations with the currency transactions and loans of these organizations. The National Advisory Council under the statutory authority of the Bretton Woods Agreements Act has, therefore, engaged in regular discussions with the United States Executive Directors of the Fund and Bank for the purpose of giving them assistance in their joint efforts with the representatives of other member countries to carry forward the operations of the Fund and While the Fund and Bank can evolve many of their policies only in the Bank. light of specific developments, these institutions have already investigated in detail and resolved many of the policy and administrative problems which confronted them.

#### Par values

The first major problem facing the Fund during the recent period was the establishment of initial par values of members' currencies for purposes of the Fund. In discussing this matter with the United States Executive Director, the Council recognized the complexity of the problem involved and expressed views substantially in accord with those contained in the statement issued by the Fund in connection with the announcement on December 18, 1946, of the schedule of initial Certain excerpts from the Fund's statement follow:

This is the first time that a large number of nations have submitted their exchange rates to consideration

This is the first time that a large number of nations have submitted their exchange rates to consideration by an international organization and thus a new phase of international monetary cooperation has begun. The major significance of the present step is not in the particular rates of exchange which are announced, but in fact that the participating nations have now fully established a regime wherein they are pledged to promote exchange stability, to make no changes in the par values of their currencies except in accordance with the Fund Agreement, and to assist each other in attaining the general objectives of the Fund.

The initial par values are, in all cases, those which have been proposed by members, and they are based on existing rates of exchange. The acceptance of these rates is not, however, to be interpreted as a guarantee by the Fund that all the rates will remain unchanged. As the Executive Directors of the Fund stated in their First Annual Report, issued in September: "We recognize that in some cases the initial par values that are established may later be found incompatible with the maintenance of a balanced international payments position at a high level of domestic economic activity.

\* \* When this occurs, the Fund will be faced with new problems of adjustment and will have to recognize the unusual circumstances under which the initial par values were determined. It is just at such times that the Fund can be most useful in seeing that necessary exchange adjustments are made in an orderly manner and competitive exchange depreciation is avoided."

The Fund realizes that at the present exchange rates there are substantial disparities in price and ware

tion is avoided."

The Fund realizes that at the present exchange rates there are substantial disparities in price and wage levels among a number of countries. In present circumstances, however, such disparities do not have the same significance as in normal times. For practically all countries, exports are being limited mainly by difficulties of production or transport, and the wide gaps which exist in some countries between the cost of needed imports and the proceeds of exports would not be appreciably narrowed by changes in their currency parities. In addition, many countries have just begun to recover from the disruption of war, and efforts to restore the productivity of their economies may be expected gradually to bring their cost structures into line with those of other countries. Furthermore, for many countries now concerned with combating inflation there is a danger that a change in the exchange rate would aggravate the internal tendencies toward inflation.

In view of all these considerations, the Fund has reached the conclusion that the proper course of action is to accept as initial par values the existing rates of exchange.

The par values announced were the existing rates of exchange as certified by member countries. In the cases of Brazil, China, Dominican Republic, Greece, Poland, Yugoslavia, France in respect of Indochina, and the Netherlands in respect of the Netherlands Indies, an extension of time for the determination of their initial par values was granted by the Fund. The Fund stated that the initial par value of the currency of Uruguay would not be definitely established until the completion of certain legislative proceedings in Uruguay.

March 1, 1947, was the date established by the Fund for the beginning of

exchange transactions. As of March 31, 1947, no applications for the purchase of foreign exchange had been received by the Fund.

## Fund's service charge

During this period the United States Executive Director of the Fund requested the advice of the Council concerning the size of the service charge to be levied by the Fund on exchange transactions. The articles of agreement specify that "Any member buying the currency of another member from the Fund in exchange for its own currency shall pay a service charge uniform for all members of three-fourths percent in addition to the parity price. The Fund in its discretion may increase this service charge to not more than one percent or reduce it to not less than onehalf percent."

In considering this matter the Council recalled that this Government had taken the position at the time the Bretton Woods legislation was passed that the Fund should interfere as little as possible with the operations of private foreign exchange markets and should supplement rather than displace the use by member countries of their own exchange resources. The Council also considered the possible effects of different rates on the earnings of the Fund. After careful study, the Council advised the United States Executive Director that it saw no adequate reason at

this time to change the service charge of three-fourths percent.

## Other Council actions on Fund matters

In December 1946, the Council on behalf of the United States Government notified the Managing Director of the Fund that this Government was prepared to accept the obligations of article VIII, sections 2, 3, and 4 of the Fund agreement with respect to avoidance of restrictions on current international payments, avoidance of discriminatory currency practices, and convertibility of balances of its currency held by other members of the Fund.

At the request of the Managing Director of the Fund that this Government designate the depository at which it would prefer to pay its gold subscription, the Council notified the Fund of this Government's preference to pay its gold subscription at the Federal Reserve Bank of New York, the depository of the Fund

in the United States.

## Changes in rules and regulations of the Fund

Among several amendments and additions to the rules and regulations of the Fund in the recent period, the most important pertain to the procedure for handling by the Fund of requests from its members for the purchase of currencies. The relevant sections of the rules and regulations are as follows:

G-3. When a duly authenticated request for the purchase of foreign exchange in accordance with Article V, Section 3, is received, the Fund shall, on the third business day following the day of receipt of the request instruct the appropriate depository to make the transfer, except in cases which the Executive Board may indicate. The first business day after receipt of the request shall be regarded as the first of the three days. G-5. When the request of a member, if consummated, would increase to more than 5 percent of its quota the aggregate purchases by the member pursuant to Article V, Section 3, during the thirty-day period preceding the date of action specified in G-3, the Managing Director shall notify each Executive Director (or his Alternate if the Executive Director nor the Alternate is in Washington or its environs, the notification will be assumed to have been duly delivered if appropriate notice is delivered to his office.

At the request of any Executive Director or on the initiative of the Managing Director, a special meeting shall be called by the Managing Director to discuss the request as soon as feasible, but not later than the morning of the second business day.

## Organizational change in the Fund

On March 31, 1947, Mr. Harry D. White tendered his resignation as the United States Executive Director of the Fund to become effective after the return from Europe of the Managing Director of the Fund in May. In recognition of his outstanding services the Executive Board of the Fund named Mr. White as Honorary Adviser to the International Monetary Fund.

# International Bank loan applications

Loan applications totaling \$2,345,000,000 had been presented to the International Bank as of March 31, 1947. The countries and amounts involved are: Chile, \$40,000,000; Czechoslovakia, \$350,000,000; Denmark, \$50,000,000; France, \$500,000,000; Iran, \$250,000,000; Luxemburg, \$20,000,000; Netherlands, \$535,000,000; and Poland, \$600,000,000. The Government of Greece has also indicated its intention to submit an application to the Bank upon completion. indicated its intention to submit an application to the Bank upon completion of

its plans for reconstruction projects. Although negotiations with several of the applicants were well advanced, no loans had been approved by the Bank as of

March 31, 1947.

In discussions concerning these applications with the United States Executive Director, the Council recognized that in order to deal with such matters as relative priorities of usefulness and urgency among loan projects submitted by applicants, it was advisable for the Bank to give concurrent consideration to various loan applications.

## Terms and conditions of Bank loans

The Council has expressed to the United States Executive Director its views with regard to the Bank's charges on long-term loans. The Bank is required by its articles of agreement to impose on borrowers a commission of 1 to 1½ percent per annum for the creation of a special reserve, but the size of the interest charge to be made by the Bank is a matter for determination by the Bank in the light of such factors as the rate of interest paid on its borrowings and the amount of liquid

funds which the Bank would consider it prudent to keep on hand.

The Council requested the United States Executive Director to attempt to secure agreement by the International Bank to the incorporation in all its loan contracts of a provision requiring consultation with the Bank by any borrower who, in the judgment of the Bank, was pursuing policies which might interfere with the success of the projects financed by the Bank in any member country or jeopardize fulfillment of the borrower's, or other member countries', obligations to the Bank.

# Use of United States capital and flotation of securities

The Bank, under its articles of agreement, is required to obtain the approval of the United States Government if it wishes either to use this country's 18 percent capital contribution for making loans or to raise funds by selling securities in this country. Hence, before the Bank could undertake any substantial program of loan commitments involving the use of United States dollars, such approval was needed.

On March 26, 1947, following earlier discussions between the Council and the United States Executive Director, the Bank formally requested approval to use the full amount of this country's 18 percent capital contribution for making loans, and this approval was granted shortly thereafter by the Council on behalf of the

United States Government.

The Council also discussed with the United States Executive Director various problems connected with the flotation of the Bank's securities in the United States market, including the possible amount of the Bank's initial issues. The Council advised him that on formal request by the Bank this Government would assent to the Bank's selling initial issues of securities on this market within the amounts discussed.

Organizational changes in the Bank

Mr. John J. McCloy was elected President of the Bank by the Board of Executive Directors on February 28, 1947, to succeed Mr. Eugene Meyer whose resignation became effective December 18, 1946. On February 28, 1947, Mr. McCloy announced the election of Mr. Robert L. Garner as Vice President of the Bank. Following the resignation of Mr. Emilio G. Collado as United States Executive Director of the Bank, the President of the United States nominated Mr. Eugene R. Black for that position. Mr. I States Senate on March 14, 1947. Mr. Black's nomination was confirmed by the United

## Membership in the Fund and Bank

The admission of three countries into Fund membership and four countries into Bank membership between October 31, 1946, and March 31, 1947, raised the number of member countries in each institution to 42. As of March 31, 1947, the total quotas of members of the Fund amounted to \$7,710,500,000, while the total capital subscriptions of members of the Bank amounted to \$8,013,500,000. Members that have recently joined these organizations and the amounts of their subscriptions are indicated below.

Colombia, which was already a member of the Fund, signed the articles of agreement of the International Bank on December 26, 1946. Its subscription

to the capital of the Bank is \$35,000,000

Venezuela became a member of the International Monetary Fund and of the International Bank on December 30, 1946. Having participated in the Bretton Woods Monetary and Financial Conference, Venezuela was among the nations entitled to sign the articles of agreement of the Fund and the Bank before December 31, 1946. Venezuela's quota in the Fund is \$15,000,000 and its subscription to

the Bank is \$10,500,000.

Turkey and Italy signed the articles of agreement of the Fund and of the Bank on March 11 and March 27, 1947, respectively. Their applications for membership in the Fund and the Bank had been approved by the Boards of Governors of the Bank and the Fund at their first annual meeting in Washington, September 27 to October 3, 1946. Turkey's quota in the Fund and subscription to the Bank are each \$43,000,000; Italy's quota in the Fund and subscription to

the Bank are each \$180,000,000.

Syria and Lebanon, whose applications for membership were also approved at the first annual meeting of the Boards of Governors of the Fund and Bank, did

not sign the articles of agreement until after March 31, 1947.

## United States payments to the Fund

On February 26, 1947, the United States Government paid the remaining balance of its subscription to the International Monetary Fund in accordance with article III, section 3 and article XX, section 4 (c) of the Fund agreement, which provide for full payment on or before the date when the Fund begins

exchange transactions.

As of March 31, 1947, therefore, the United States had paid its entire subscription of \$2,750,000,000 to the Fund. Of this amount \$687,500,000.11, representing the 25 percent gold portion of the subscription stipulated by article III, section 3 (b) (i) of the Fund agreement, was paid in gold; \$280,499,999.89, representing approximately 10 percent of the United States subscription, was paid in United States dollar funds; and \$1,782,000,000 was represented by United States nonnegotiable, noninterest-bearing demand notes. By delivery of these special United States notes in accordance with section 7 (c) of the Bretton Woods Agreements Act, the United States exercised the option available under article III, section 5 of the Fund agreement. These notes are payable on demand in dollars These notes are payable on demand in dollars when needed by the Fund in its operations.

## United States payments to the Bank

On November 21, 1946, the United States made a payment of the second 5 percent on its subscription to the capital of the Bank pursuant to the Bank's notice of call for payment. On February 24, 1947, the United States made a further payment of 5 percent on its capital subscription. The amount of each of further payment of 5 percent on its capital subscription. The amount of each of these payments was \$158,750,000, totaling \$317,500,000.

As of March 31, 1947, the United States had paid 15 percent (\$476,250,000) of its subscription to the capital of the Bank. Of this amount, \$407,035,000 was

represented by nonnegotiable, noninterest-bearing demand notes in accordance with section 7 (c) of the Bretton Woods Agreements Act and article V, section 12 of the articles of agreement of the Bank, and \$69,215,000 was represented by

United States dollar funds.

The Bank has given notice that it intends to make an additional call of 5 percent of capital, payable as of May 26, 1947. When this payment of \$158,750,000 has been made, the total United States paid-in capital will amount to \$635,000,000, or 20 percent of the United States subscription. Under the Bank's articles of agreement there can be no further calls for payment upon the United States subscription unless the Bank should need to call on member countries for funds to meet its obligations.

IV. SURVEY OF POSTWAR FOREIGN FINANCIAL ASSISTANCE EXTENDED BY THE UNITED STATES GOVERNMENT

By VJ-day, this Government had already made preparations to meet many of the difficult foreign financial problems connected with the postwar period of adjustment and reconstruction. The terms of the Lend-Lease Act enabled the

President to make settlements without imposing upon the recipients of lend-lease aid a dead-weight burden of debt resulting from the Allied war effort. The Congress had approved this Government's participation in the United Nations Relief and Rehabilitation Administration. It had increased the lending authority of the Export-Import Bank from \$700,000,000 to \$3,500,000,000 for the primary purpose of enabling that agency to meet part of the foreign postwar reconstruction needs. It had authorized this Government's membership in the International Monetary Fund and the International Bank for Reconstruction and Development.

These measures were shortly thereafter supplemented by an important additional step—the approval of the Financial Agreement with the United Kingdom.

# Scope of operations through March 31, 1947

United States Government foreign financial assistance since the war has taken a variety of forms, including (1) cash loans and advances, (2) transfers of goods and services on deferred payment terms, and (3) contributions of money and supplies. Such assistance has been supplemented by the United States subscriptions to the International Monetary Fund and the International Bank.

The dollar magnitude of the foreign financial assistance extended by the United States Government is presented in the following summary table. A country breakdown of the data covering the period June 30, 1945, through December 31, 1946, and an explanation of the nature of the data are presented in appendix B.

The foreign financial assistance extended by the United States Government is characterized by a broad geographical distribution covering more than 50 countries. The preceding chart [omitted here] shows the shares received by various geographical areas. Of the \$14,300,000,000 total available between June 30, 1945, and December 31, 1946, almost one-half (\$7,100,000,000) is definitely assignable to the United Kingdom and other northern and western European countries. This share consists almost entirely of loans and credits for reconstruction purposes.

The bulk of other aid and grants was extended to central, southern, and eastern European countries and far eastern areas where provision of human necessities was urgently required before any appreciable reconstruction and development work could be undertaken. The aid for Germany and Japan, aside from the basic civilian supply program designed to prevent disease and unrest, is intended to restore economic activity, especially in export industries, and to relieve the occupying powers of the burden of supporting these countries.

## Present status

An appraisal of the financial assistance extended to foreign countries by the United States Government is particularly appropriate at this time. The International Monetary Fund and the International Bank for Reconstruction and Development, upon which the United States Government places reliance as the principal instruments to achieve the long-range international financial objectives of the member countries of these two organizations, have recently come into operation. The Export-Import Bank has committed or earmarked practically all of the \$2,800,000,000 increase in lending authority granted by the Congress in July 1945, mainly for the extension of reconstruction loans to war-devastated areas. Private United States capital has reentered the field of foreign financing but only on a very limited scale. UNRRA has virtually terminated its activities but urgent relief needs still remain in certain areas. Finally, the decision is being made by many countries as to whether the world will move towards a freer and higher level of international trade through such an instrumentality as the International Trade Organization or towards a system of closed trading areas.

Two immediate postwar financial objectives of this Government which have already been largely achieved are the settlement of war accounts and the disposal of surplus property located abroad.

All major war settlements have either been completed or are in process of negotiation. In accord with the Lend-Lease Act, terms have been designed to avoid imposition of a burden on trade between the United States and allied countries in the form of repayments which would unduly aggravate the postwar balance of payments difficulties faced by most of these countries.

Total	3, 347	3, 347	1, 998	1, 349	
Grand total		<del></del>	7,811	6, 454	

<sup>1</sup> Unutilized balances of previous authorizations as of June 30, 1945, plus net authorizations, July 1, 1945-Mar. 31, 1947, in the case of the first column and plus net authorizations, July 1, 1945–Dec. 31, 1946, in the case of the second column.

<sup>&</sup>lt;sup>2</sup> Excludes indebtedness arising out of World War I. <sup>3</sup> Includes \$7,000,000 participation by another agency.

<sup>4</sup> Extended for purchase of surplus property located abroad.

<sup>\*</sup> Includes 7,000,000 participation by another agency.

\* Extended for purchase of surplus property located abroad.

\* Amount does not reflect small repayments received through Dec. 31, 1946, for which detailed data are not yet available in Washington, D. C.

\* Extended for purchase of surplus property located in the United States.

\* Consists of outstanding indebtedness as of June 30, 1945 (\$573,000,000) plus amount utilized July 1, 1945-Dec. 31, 1946 (\$3,853,000,000), minus amount of repayments July 1, 1945-Dec. 31, 1946 (\$121,000,000) and a charge-off of approximately \$1,000,000. Calculation of outstanding indebtedness by this formula will differ slightly from indebtedness shown in the table due to rounding. The \$573,000,000 of outstanding indebtedness as of June 30, 1945, consisted of: Export-Import Bank, \$221,000,000: Lend-Lease, \$55,000,000; Reconstruction Finance Corporation, \$22,000,000.

\* The repayments between July 1, 1945, and Dec. 31, 1946, consisted of: Export-Import Bank, \$59,000,000; Lend-Lease, \$10,000,000; Reconstruction Finance Corporation, \$62,000,000.

\* Terms still subject to settlement as of Mar. 31, 1947.

\* Terms on entire \$500,000,000 still subject to settlement as of Mar. 31, 1947.

\* Reimbursement based on the requirement that approximately 60 percent (subject to adjustment) of textiles manufactured from Commodity Credit Corporation cotton during each 3 months' period will be delivered to United States Commercial Company for sale.

\* Amount utilized. Estimated for "Civilian supplies, principally to occupied areas" and "Postwar lend-lease supplies" for period June 30, 1945-Mar. 31, 1947.

Over 80 percent of all United States salable surplus located abroad (including estimated future declarations) has been disposed of, and largely delivered, during the period when such property was likely to contribute most to the restoration of war-devastated areas and under terms conducive to maximization of eventual proceeds for this Government. Substantial amounts of domestic surplus property and of surplus ships may also be disposed of by the War Assets Administration and the Maritime Commission through sales abroad on deferred payment terms.

Other postwar foreign financial objectives of the United States Government include alleviation of the suffering of the peoples of war-devastated areas, restoration of the productive capacities of these areas, and development of economically undeveloped countries. These objectives have only been partially attained to date. At the same time the purchasing power represented by unutilized lending authority, unutilized loan balances, unutilized relief grants and the gold and foreign exchange assets of foreign countries has been cut by the increase in prices here and abroad.

Relief and other forms of aid have carried a number of countries through the worst period of postwar readjustments. In central and southern Europe, and in parts of the Far East, however, the task of providing even a minimum of sub-

sistence goods largely remains.

It has proved necessary to propose to the Congress a special post-UNRRA appropriation of \$350,000,000 for the calendar year 1947 while, in the case of Greece, further direct assistance in economic rehabilitation is included in the \$400,000,000 appropriation request for Greece and Turkey. The purposes to be served by this latter program have been fully developed in hearings before congressional committees and in debates in the Congress. Assistance for military supplies, as well as the aid designed to restore political and economic stability in Greece, do not fall within the purposes of the Export-Import Bank or the International Bank for Reconstruction and Development.

In the case of the combined British and American zones of Germany, the net import requirements for minimum consumers' needs and basic working capital requirements are being shared between the two occupying powers. The outlay for this purpose on the part of the United States for the period 1947 through 1949 has been estimated by the occupation authorities at \$500,000,000. Additional United States financing may prove necessary to support the economies of Japan

and the occupied area of Korea.

Reconstruction of the productive facilities of some war-devastated countries and development of certain economically undeveloped areas have already been accelerated by the extension of United States Government loans. In northern and western Europe, for example, United States reconstruction loans have made available the financial means of achieving a considerable degree of recovery from the effects of the war. Even in countries in these areas, however, shortages of industrial working capital such as coal have kept the rate of reconstruction below

that previously anticipated.

The Export-Import Bank will continue not only to disburse substantial amounts on outstanding commitments but also to undertake new operations complementing those of other institutions. Coordination of the activities of the Export-Import Bank and the United States representatives on the International Bank will be undertaken by the National Advisory Council and will be guided by the particular circumstances in each case. In general, it may be expected that projects deemed appropriate for consideration by the Export-Import Bank would be those in which there is a special and important United States interest. Such interest may exist because the project is designed to open up an additional supply of essential imports into the United States, or because it requires United States equipment and services of kinds which this country especially desires to export. Such interest may also exist because the project is being sponsored and financed in part by private United States interests, or because it is in a field in which the Export-Import Bank already has participated financially, or because the applicant country is not yet a member of the International Bank. The Bank will also continue, of course, to receive applications from United States exporters and importers who do not have direct access to the International Bank. In general, too, it may be expected that the Export-Import Bank will limit itself to projects that can be amortized in a relatively short period of years.

The Export-Import Bank had unutilized funds at its disposal as of March 31, 1947, of approximately \$320,000,000, after deduction of earmarked amounts for China and Italy Applications were pending before the Bank at that time in an aggregate amount in excess of this remaining lending authority. On the other

hand, the Bank has the prospect of recouping lending authority from time to time as outstanding loans fall due and are repaid, as present commitments to make loans are canceled or expire, and as private capital may be induced to participate

at its own risk in the outstanding loans of the Bank.

In order to meet reconstruction and development requirements, the International Bank must also rely heavily upon dollar funds. For the present a large part of the needed goods can be obtained only in the United States, and there are few countries outside the United States whose balance of payments position permits them to engage in any substantial export of capital. Through the payment of 20 percent of its subscription to the capital of the Bank, the United States Government is providing \$635,000,000 for the Bank's use, and similar dollar capital contributions by other members raise the total of the Bank's available United States dollar funds to about \$725,000,000. For the rest of its dollar needs, the Bank must rely upon its ability to draw funds from the private capital market in the United States. The timing and extent of private capital investment abroad, either directly or through the International Bank, will determine to a considerable extent the ability of this Government to withdraw from the field of large-scale direct foreign lending without sacrificing the basic objectives of its foreign policy.

Temporary balance of payments deficits that develop in the current international transactions of member countries may require financing through the International Monetary Fund. As in the case of foreign loan requirements and the International Bank, however, monetary stabilization requirements of a type or in an amount that cannot be met by the International Monetary Fund may develop. Such cases, particularly when they involve special interests of this Government, may be handled by the United States Stabilization Fund in harmony with the achievement of the objectives of the International Monetary Fund.

The subject of repayment of United States foreign loans was treated in some detail in pages 5 to 7 of the "Statement of the Foreign Loan Policy of the United States Government by the National Advisory Council on International Monetary and Financial Problems" transmitted by the President to the Congress on March 1, 1946. At this time, the Council wishes to emphasize again that—

\* • the ability of foreign countries to transfer interest and amortization on foreign loans to the United States depends upon the extent to which we make dollars available to the world through imports of goods and services, including personal remittances and tourist expenditures, and through new investment abroad.

The extension of foreign financial assistance by this Government, in conjunction with its pursuit of a commercial policy designed to reduce restrictions on the free flow of international trade, will help the United States to maintain a volume of exports appropriate for a country with its tremendous productive capacity, and a volume of imports that will permit repayment of its loans to foreign countries, increase the standard of living, and provide needed basic resources. This Government's policies are therefore designed to make an important contribution not only to world stability but also to the welfare of the American people.

In 1946, total transfers of goods and services to foreign countries amounted to \$15,300,000,000, while United States imports of goods and services amounted to only \$7,100,000,000. Utilization by foreign countries of United States Government loans and other aid, including private donations and remittances, served to finance approximately \$6,000,000,000 of the net balance. About \$2,000,000,000 was financed through the use by foreign countries of their own dollar assets and

gold.

Foreign requirements of goods and services from the United States to continue relief and reconstruction programs, to meet deferred demands from the war period and to continue development projects remain large in 1947. The Department of Commerce reports that in the first quarter of 1947, total United States transfers of goods and services to foreign countries amounted to almost \$4,900,000,000 while United States imports of goods and services amounted to slightly more than \$1,900,000,000. The first quarter amounts are equivalent to an annual rate of \$19,500,000,000 of transfers of goods and services to foreign countries and only about \$7,700,000,000 of imports. During the first quarter of 1947, foreign countries financed the difference between United States transfers of goods and services and United States imports of goods and services by net utilization of about \$1,900,000,000 of United States Government loans and other aid, including private donations and remittances, and by a reduction of about \$1,100,000,000 in their own dollar assets and gold.

Unutilized amounts of United States foreign loans and aid declined from \$6,500,000,000 as of December 31, 1946, to about \$5,400,000,000 on March 31, 1947. Foreign gold and dollar assets in the form of short-term balances and marketable securities declined from approximately \$25,000,000,000 as of December 31, 1946, to about \$24,000,000,000 on March 31, 1947. A sizable portion of these gold and dollar assets and of new foreign gold production, currently at the rate of about \$700,000,000 per annum exclusive of production of the Union of Soviet Socialist Republics, must be maintained as working balances for trade

purposes and currency reserves.

As of March 31, 1947, almost all United States governmental resources authorized for foreign financial assistance, excluding United States participation in the International Monetary Fund and the International Bank, had been committed to foreign countries. It has during the period under review become increasingly clear that such resources as remain available will not, by reason either of their amount or of the nature of developing needs abroad, prove adequate for the accomplishment of the purposes for which foreign financial assistance has been provided. The question of the extent to which this country will need to provide additional assistance to foreign countries cannot be readily answered. The agencies represented on the National Advisory Council are giving continuing consideration to this matter.

JOHN W. SNYDER. Secretary of the Treasury, Chairman of the National Advisory Council on International Monetary and Financial Problems.

G. C. MARSHALL, Secretary of State.

W. A. HARRIMAN, Secretary of Commerce.

M. S. Eccles,

Chairman of the Board of Governors of the Federal Reserve System. WM. McC. MARTIN, Jr.,

Chairman of the Board of Directors of the Export-Import Bank of Washington.

### APPENDIX A

SECTIONS OF THE BRETTON WOODS AGREEMENTS ACT RELATING TO THE NATIONAL ADVISORY COUNCIL

(59 Stat. 512; 22 U. S. C. 286b)

National Advisory Council on International Monetary and Financial problems

[For sections 4 and 14 of the act, omitted here, see the full text of the act in the Annual Report of the Secretary of the Treasury for 1945, beginning on page 382.]

#### Appendix B

### STATISTICAL APPENDIX

# Explanatory Notes 1

Of the tables that follow, tables A through E relate in general to credit extensions in the postwar period by the United States Government to foreign countries, both to governmental and to private entities. Because the data are readily available only on a quarterly basis, and there were some credits of a postwar character between June 30, 1945, and VJ-day, June 30, 1945, was adopted as the beginning of the period covered by the tables. Some of the authorized amounts presented in table A for Office of Foreign Liquidation Commissioner and lend-lease

credits are estimates subject to later adjustment.

Data with respect to the following types of transactions are included in tables F through H: Civilian supply distributions, postwar lend-lease accounts, special programs of advances for Germany and Japan for procurement of raw materials, financial aid agreements, and the contributions to the United Nations Relief and

Rehabilitation Administration.

<sup>&</sup>lt;sup>1</sup> All figures are to the nearest \$100,000; therefore in certain adjustments there will be an apparent inaccuracy of 0.1, with corresponding discrepancies in the totals.

Certain other types of transactions through which foreign countries acquired dollars, such as the payments on net troop pay account and for supplies provided to the American forces, are excluded because they are considered as payments for services received. Advance payments on commodity procurement contracts and short-term credits (less than 6 months with respect to Office of Foreign Liquidation Commissioner; 90 days or less with respect to all other agencies), such as the revolving credits of the Export-Import Bank, are also excluded. Loans and credits to American organizations, even though for the ultimate benefit of foreign countries, were eliminated because the indebtedness is that of the American organization and the aid rendered foreign countries is private rather than gov-On the other hand, loans to finance exports by American companies are included since the foreign country is the recipient of the credit and the foreign importer is the debtor.

## DEFINITIONS

Because of the wide variety of transactions and differences in the accounting procedures of the lending agencies, it was impossible to prepare simple definitions applicable to all cases, but the classifications used are as consistent in principle

as possible.

Sales of surplus property against foreign currencies and other property when the currencies have been paid to the account of the United States, or title to the other property has been transferred are considered as cash, not credit transactions, even though there are quantitative limitations on the use of the foreign currencies which prevent their complete utilization for a year or more. On the other hand, sales against foreign currencies, services or property, which are to be paid, performed, or transferred upon demand, are considered as credit transactions to the extent that demand has not been made.

Net authorization covers all loans and credits approved by the responsible officials of the lending agencies from available funds even if they have not been signed or formalized by credit agreements. Because the lack of formal agreement may become important in some instances, the amounts in this category in table A

have been shown in detail in footnotes. Cancellations and expirations up to December 31, 1946, have been deducted from the amounts authorized.

\*Utilized\* is defined as follows:

(a) Loans such as those by the Export-Import Bank and the Reconstruction Finance Corporation; also, the loan to the United Kingdom—disbursed under the terms of the agreements.

(b) Credits by the Office of the Foreign Liquidation Commissioner amounts involved in sales contracts signed, including bulk sales, regardless

of the time of delivery of the property.

(c) Settlements for lend-lease transfers—billings presented to foreign gov-In the case of Australia, France, and the United Kingdom, ernments. however, the amounts stated in the agreements were considered as final, notwithstanding the fact that some of the formalities of billing might not have been completed as of December 31, 1946. Work completed, as reported to the Treasury Department, was the basis for determining utilization under

the Liberian Agreement.

(d) Ship sales by the Maritime Commission—principal amount of mortgages received by the Commission from foreign purchasers. The Ship Sales Act provides that vessels may be sold for 25 percent cash and the balance on credit terms. In all sales where credit is involved, mortgages are received when the ships are delivered to the purchaser. In at least one case vessels were delivered against funds put in escrow pending completion of credit In this case no credit was considered as utilized as of Decemarrangements. ber 31, 1946.

Unutilized balances represent the unutilized balances as of June 30, 1945, plus net authorization from July 1, 1945, to December 31, 1946, inclusive, less amounts

utilized from July 1, 1945, to December 31, 1946.

Repayments are confined to repayments on principal account. They are exclusive of repayments on debts arising out of World War I and of write-offs to profit and loss.

Outstanding indebtedness is usually the net of utilization less repayments of principal. The data in table E necessarily include the results of transactions taking place before July 1, 1945, but exclude indebtedness arising out of World War I

# United Nations Relief and Rehabilitation Administration data

Data relating to UNRRA, as presented in table H, come from two sources. The first three columns are based on material supplied by UNRRA. In this set of data, the country and program figures are based on the f. a. s. cost of the merchandise to be distributed. The cost of shipping and field and administrative expenses are shown in total only. The share of the United States in the total program is approximately 72 percent.

The other set of data relating to UNRRA aid, shown in the last column of the last

The other set of data relating to UNRRA aid, shown in the last column of table H, comes from the United States Government and represents the distribution of commodities and services purchased with funds supplied by the Government of the United States. To the f. a. s. value of commodities shipped to each country is added the estimated shipping cost. The contribution to administrative and other expenses and to free funds is shown separately.

initionality and other expenses and to thee rands is shown separately,

<sup>&</sup>lt;sup>1</sup> Cancellations and expirations through Dec. 31, 1946, are excluded. See Explanatory Notes for definition of terms. The column "Unutilized balance as of June 30, 1945" relates to Export-Import Bank balances unless indicated otherwise by a footnote.

<sup>2</sup> Estimated. 3 Lend-lease contract.

Sales under \$40,700,000 unexpended balance of credit suspended sept. 13, 1940.
 Of this amount approximately \$80,000,000 may be advanced by private participants.
 Treasury Department is the agency administering the loan.
 Lend-lease mutual-aid agreements have been signed with these countries. Data with respect to them are shown in Latin American and all areas totals only. The Latin American lend-lease was authorized before June 30, 1945, and the bulk of it was delivered prior to that date. For that reason it was treated as utilized before June 30, 1945, to the extent that bills had been presented to foreign governments as of Dec.

31, 1946.

13 Included in these data are loans authorized by the Board of the Export-Import Bank but which had not been formalized by credit agreements as of June 30, 1945, amounting in millions of dollars to: Total, 66.8; Brazil, 2.5: Ecuador, 8.0; Mexico, 30.8; Peru, 0.5; miscellaneous Latin America, 25.0.

14 Unutilized portions of Latin American lend-lease as of June 30, 1945, included only in the Latin 1 merica

Lend-lease contract.
 Included in these data are credits authorized in principle but not yet signed as of Dec. 31, 1946, amounting in millions of dollars to: Total, 73.7; Brazil, 4.0; Denmark, 10.0; Iran, 30.2; Japan, 6.0; Netherlands, 100; Siam, 10.0; Union of South Africa, 2.0; and Venezuela, 1.5.
 Included in these data are loans authorized by the Board but which had not been formalized by credit agreements, as of Dec. 31, 1946, amounting in millions of dollars to: Total, 181.4; Argentina, 0.2; Brazil, 6.1; Chile, 10.4; Ecuador, 1.0; Mexico, 3.8; China, 4.2; Netherlands Indies, 100.0; Canada, 5.7; and Norway, 50.0.
 Based on a sale of surplus property by the War Department. Amount estimated.
 Reconstruction Finance Corporation is the lending agency.
 Maritime Commission is the lending agency.
 Sales under \$40,700,000 unexpended balance of credit suspended Sept. 13, 1946.
 Of this amount approximately \$80,00000 may be advanced by private participants.

<sup>1</sup> See Explanatory Notes for definition of terms.
2 Based on a sale of surplus property by the War Department. Amount estimated.
3 A bulk sale which included goods delivered prior to Oct. 1, 1946, and the estimated amount expected to be realized by the United States from the sale of other surplus property (50 percent of net proceeds), less Belgian claims against the United States.
4 Maritime Commission is the lending agency.
5 Treasury Department is the agency administering the loan.
6 Reconstruction Finance Corporation is the lending agency.
7 Lend-lease mutual aid agreements have been signed with these countries. The aid rendered has been considered as utilized hefore June 30, 1945, to the extent that bills were rendered to foreign governments as of Dec. 31, 1946. Unbilled portions of the authorized amounts are treated as untilized.

# Announcement, May 13, 1947, of the execution of a stabilization agreement between the United States and Mexico

The Secretary of the Treasury of the United States of America, Mr. John W. Snyder, the Ambassador of Mexico, Senor Dr. Don Antonio Espinosa de los Monteros, and Mr. Rodrigo Gomez, representing the Banco de Mexico, today executed a new \$50 million stabilization agreement between the two countries.

Under the terms of this agreement, which was the subject of discussion during the recent visit to the United States of President Aleman and Minister of Finance Beteta, the United States Stabilization Fund undertakes for a period of four years commencing July 1, 1947, to purchase Mexican pesos to an amount equivalent to \$50 million for the purpose of stabilizing the United States dollar-Mexican peso rate of exchange.

<sup>&</sup>lt;sup>3</sup> Based on data supplied to the Clearing Office for Foreign Transactions and Reports. These country data include an estimate of the ocean transportation charges. (See also footnote 5.) A small part of this total had been utilized before July 1, 1945.
<sup>3</sup> Less than \$50,000.

<sup>&</sup>lt;sup>3</sup> Less than \$\$0,000.
<sup>4</sup> Includes Byelorussian Soviet Socialist Republic.
<sup>5</sup> Includes Countries in which the UNRRA special projects and displaced-persons camps operated; also, in the last column, countries of initial destination from which goods may have been transshipped, with or without processing, or to which goods may have been delivered as repayment for stocks previously received by UNRRA.
<sup>6</sup> Not available.
<sup>7</sup> United States contribution to administrative expenses and free funds.
<sup>8</sup> The total contribution of the U. S. Government amounted to \$2,700,000,000, of which \$816,000,000 was as yet unutilized as of Dec. 31, 1946, according to Government fiscal records.

This agreement extends and enlarges the Stabilization Agreement of 1941 which was twice extended for two-year periods and which expires on June 30, 1947.

Secretary Snyder and Minister Beteta during their discussions reviewed the satisfactory foreign exchange relations between Mexico and the United States and the stability which has characterized the peso-dollar exchange rate during the six years that the stabilization agreement has been in effect. They also viewed with satisfaction the complete freedom of exchange operations between the two countries—operations which have involved the financing of aggregate foreign trade exceeding \$700 million in 1946, as well as large travel expenditures and other international receipts and payments.

The Secretary and the Finance Minister pointed out that the stabilization

The Secretary and the Finance Minister pointed out that the stabilization agreement is consistent with the aims and purposes of the International Monetary Fund, of which both countries are members, and will in fact serve to supplement the efforts of the international organization to stabilize the rates of exchange

between all the member countries.

## Exhibit 31

Joint statement, July 18, 1947, by the Secretary of the Treasury and the Board of Governors of the Federal Reserve System relative to foreign speculative markets in gold

The Secretary of the Treasury, John W. Snyder, and the Board of Governors

of the Federal Reserve System today issued the following joint statement:

"It is well known that active speculative markets in gold exist in various foreign countries. For the most part, these markets are illegal, though in a few instances importation or sale of gold is legal or is tolerated. Under present circumstances gold is traded in many foreign centers, often against U. S. dollars, at prices above monetary parities. The premiums differ from one center to another, so that speculators can make large profits by purchasing gold in one

foreign market and selling it in another.

"The International Monetary Fund recently issued a statement deprecating international dealings in gold at premium prices, and requesting member countries to take such action as they can within their jurisdictions to prevent such dealings. The Fund emphasized that these transactions tend to undermine exchange stability and cause gold to flow into private hoards rather than into monetary reserves. Furthermore, in countries where the gold is sold, payment is often made with dollars illegally acquired or held. Moreover, foreign exchange which otherwise could be used for sorely needed imports is diverted to the purchase of gold for private hoards.

"In view of these circumstances, and on general grounds of the national policy, the Treasury Department and the Board of Governors of the Federal Reserve System request American individuals, banks, and business enterprises to refrain from encouraging and facilitating this traffic and in particular to refrain from extending the use of their facilities and funds for the carrying out of such transactions.

tions."

## TAXATION DEVELOPMENTS

#### Exhibit 32

Statement of Secretary Snyder before the House Ways and Means Committee, March 13, 1947, on H. R. 1, a bill to reduce individual income tax payments

I am glad to have this opportunity to appear before the Ways and Means Committee to discuss the important issues raised by proposals for tax reduction.

This is the second time the Congress has given consideration to proposals for major tax reduction since the end of the war. The first step to reduce wartime taxes was taken in the Revenue Act of 1945. That act made major reductions in both corporate taxes and individual income taxes and a minor reduction in excise taxes. As a matter of fact, gentlemen, at estimated 1947 levels of business conditions that reduction amounts to about \$9.0 billion of revenue. That first tax reduction had as its purpose the easing of the transition from a wartime to a peacetime economy. The transition was made with less decline in business

activity than was expected. The present proposals are being considered against a different and more favorable economic background than the first tax reduction.

Today the economic situation is good. We can look back on economic developments of 1946 with considerable satisfaction. In 1946 civilian employment was at an all-time high. By the end of 1946 more than 10 million demobilized veterans had found civilian jobs. Total production also reached new peacetime highs. For the year as a whole production was 50 percent above 1939 and only 15 percent below the wartime peak. Although there were still shortages in some lines, the American people were supplied with more goods and services than ever before.

I believe we can look forward in 1947 with confidence. It should be a year that will demonstrate once again the vitality of the American system of free enterprise. Great technical advances were achieved during the war. Many of these will be directly applicable to peacetime production. As we complete the transition from wartime production these improvements will to an increasing extent make their impact and contribute to raising still higher the American standard of living. We hold in our own hands the determination of how rapidly this advance will take place. It will depend to an important extent upon the pursuit of a sound Government financial policy.

Under the existing high national income, taxes at present levels can be paid with less hardship and less effect on business than would be possible under less favorable circumstances. High production was achieved in 1946 with present tax rates. I believe that we can go ahead in 1947 with the same general tax rates

without any decrease in production.

Under present economic conditions, it is sound policy to achieve a substantial budget surplus, and to apply that surplus to reduction of the public debt. In the budget, net receipts for the fiscal year ending June 30, 1948, were estimated at \$37.7 billion. The Congress has already approved an extension of the so-called war excise tax rates, which will increase net receipts by \$1.1 billion, to a total of \$38.8 billion for the fiscal year 1948. The President's budget estimates expenditures for the fiscal year 1948 at \$37.5 billion. A conference committee of the House and Senate is considering legislative budget estimates of expenditures ranging from \$31.5 billion to \$33.0 billion. It is too early to know whether or not expenditures during the fiscal year 1948 will actually fall below the original budget figure of \$37.5 billion. Once taxes are reduced it would not be easy to reverse the action taken and restore them.

It would appear sounder to await more definite evidence on budgetary developments for the fiscal year 1948 before proceeding with consideration of tax cuts. I feel reasonably certain that such surplus as is likely to be realized will not exceed what will generally be regarded as a proper installment of reduction in

the public debt.

The public debt now stands at about \$260 billion. This is approximately \$20 billion less than the peak reached about a year ago. The reduction thus far has been made by drawing down the Treasury cash balance from a high war level to a peacetime level, but further reductions can be achieved only out of a surplus of receipts over expenditures.

Interest charges on the debt have been kept at a minimum by a judicious policy of financing at low interest rates. Bond prices have been held stable. This policy keeps down the burden on the taxpayer and inspires business confi-

dence.

When national income is high, as it now is, the public debt should be reduced. We now have an opportunity to demonstrate our determination to pay off the debt. I believe that we should begin a program of debt retirement with the largest feasible reduction. We should take full advantage of our present opportunities. It may be that in the future there will be years when it will be unwise to try to retire any part of the debt. If, however, we reduce the debt as rapidly as we can in good years, there will be less cause for concern if we have to omit debt retirement in some future year.

Although I do not believe that tax reduction is appropriate at this time, I am sure that basic tax revisions, involving substantial reductions of present taxes, will be possible at a later time. The extent and nature of these tax revisions will depend on budgetary and economic developments. At the present time it is impossible to foresee what the requirements of peacetime public expenditures will be. Future defense expenditures, in particular, will depend on how safely

we establish the peace.

It is important, however, to keep in mind certain essential requirements of a sound tax system, so that any immediate action will not prejudice desirable long-run revisions. The tax system should produce adequate revenue. It should be equitable in its treatment of different groups. It should interfere as little as possible with incentives to work and to invest. It should help maintain the broad consumer markets that are essential for high-level production and Taxes should be as simple to administer and as easy to comply employment. with as possible.

These principles should govern the development of the postwar tax system in America. In line with these principles, the Treasury has been and is now studying basic tax problems, many of them in close collaboration with the staff of the Joint Committee on Internal Revenue Taxation, and will be ready to assist the

committee in every way possible.

I turn now to some specific comments on H. R. 1. In connection with our consideration of H. R. 1, and numerous inquiries for information relating to certain other suggestions for reduction of the individual income tax in 1947, the Treasury Department has compiled a large amount of data. I have appended to my statement some of the more significant materials for the use of the com-[See also tables to statement before Senate Finance Committee which follows.]

H. R. 1 includes a general reduction of individual income tax rates and a special additional exemption for taxpayers over 65 years of age. Under the rate reductions in H. R. 1, all taxpayers with net incomes below about \$303,000 would have their present income tax reduced by a flat 20 percent. For higher incomes the cut would become gradually smaller until it reached 10.5 percent above \$5,000,000. Only about 1,100 taxpayers would get less than a 20 percent reduction. tions of taxpayers over 65 years of age are raised by \$500.1

The bill would reduce revenues by about \$3,500 million in a full year. total, \$3,300 million would be attributable to rate reductions and \$179 million

to the increase in exemptions for taxpayers over 65.2

As I view the matter, if a 1947 tax bill has any place at all in the management of our financial affairs, it should be dedicated to bringing relief primarily to taxpayers who have borne extraordinarily heavy burdens during the war and postwar transition years. As the President stated in his budget message, when the time comes for taxes to be reduced, millions of taxpayers with small incomes will have a high

priority among the claimants for tax rener.

Even if tax reduction were now appropriate, the method of reduction adopted in H. R. 1 would not appear to be equitable. The bill would give too little reduction to lower incomes and relatively too much to higher incomes. This can be seen by looking at the effect of the proposed reduction on net incomes after tax and by comparing taxes under the bill with those in effect before the wartime in-Tables B and C and chart 1 [chart omitted] show that while the tax relief at the bottom of the income scale is not significant in relation to tax burdens at these levels, the incomes left after present law taxes, by comparison, are disproportionately increased at the top of the scale. Tables D and E show that H. R. 1 would wipe out most of the wartime increase in taxes on very large in-It would leave taxes on other incomes much higher than before the war. (See tables A-E following.)

To be sure in a comprehensive revision of the tax system we should not be bound by the prewar rates. Such a revision would aim at equitable adjustments, incentive effects, and sound administration under peacetime conditions. would necessarily entail consideration of excise taxes, corporate taxes, and death taxes as well as the individual income tax. Such a comprehensive revision cannot be accomplished in an interim bill. We should guard against action now with respect to any one type of tax which might make it impossible later to fit that tax

together with the other taxes into a well-balanced peacetime tax system.

One feature of H. R. 1 is addressed to a special situation. Provision is made for a \$500 special tax exemption for persons over 65 years of age. It is estimated that this special allowance would give relief to about 2,900,000 aged persons, of whom 900,000 would become nontaxable.

In the case of joint returns, exemptions are increased by \$1,000 where both husband and wife are over 65 and each has \$500 or more gross income.
 Estimates of tax liabilities are made for calendar year 1947.

We all realize that the recent price rises have imposed hardships on all persons with low fixed incomes. This group includes persons over 65 living on pensions or small amounts of other income. It also includes persons under 65 with fixed incomes. I do not believe that it would be fair to grant a special income tax exemption to persons over 65 and not to similarly situated persons under 65. There are many other special groups with characteristically low incomes pressing for special exemptions. To grant such an exemption to one group would make it less defensible to deny it to others.

I wish to repeat that in my opinion both the economic situation and the size of the public debt point definitely to the need for keeping present levels of taxation. I assure you that the administration is determined, as is the Congress, to hold the Government expenditures for the fiscal year 1948 to the lowest level consistent with our national obligations and public needs. I am convinced that the entire surplus which is likely to be realized in 1948 should be devoted to the reduction of the public debt. It will be time enough to enact tax reductions when and if there is definite evidence that the 1948 surplus is greater than prudence requires to be applied toward reduction of the public debt.

#### Exhibit 33

Statement of Secretary Snyder before the Senate Finance Committee, April 22, 1947, on H. R. 1, a bill to reduce individual income tax payments

I am glad to have this opportunity to appear before the Senate Finance Committee. You have before you H. R. 1, a bill which would make the second major postwar tax reduction. I have previously stated my views on tax reduction in my recent appearance before the House Ways and Means Committee. Today, I wish to repeat some of the reasons why I believe that no general tax reduction is advisable at this time and also to comment in more detail on certain specific aspects of H. R. 1.

I am convinced that a general tax reduction at this time is neither necessary nor appropriate. I believe that this conclusion is supported by a careful examination of both the current economic conditions and the budgetary situation. The desirability of maintaining present tax rates for this year is emphasized by the size of the public debt. Moreover, premature reduction of one tax, such as is proposed in H. R. 1, might make later achievement of a comprehensive revision of the tax system difficult or impossible. Finally, even if tax reduction were now appropriate, H. R. 1 does not make the right approach to a tax reduction program.

#### ECONOMIC CONDITIONS

Present economic conditions do not call for a tax reduction. The American economy has already made a remarkably rapid transition from record wartime production to record peacetime output. Employment is high, and national income continues to reach new peacetime levels. Under these favorable economic conditions present taxes do not impose an excessive hardship on the American

Under present conditions, I do not believe that a tax reduction would bring about any significant increase in production, nor do I believe that a tax reduction is necessary at this time to assure continued high-level production. and sustained growth of employment and output achieved in 1946 and the early months of 1947 was accomplished with present tax rates. During that period, millions of demobilized veterans found civilian jobs, and there was a rapid increase in the number of new small business firms. Business as a whole is now operating virtually at capacity. Production is now limited by shortages of materials and labor rather than by lack of venture capital or markets. All of these facts are evidence of the vigor and adaptability of our free-enterprise system. ment and output will undoubtedly rise still higher in the future with the normal growth of the economy.

Inflationary pressures have still not subsided. Prices and production have not yet fully adjusted to one another. So long as inflationary pressures exist, there is good economic reason for maintaining high taxes. If we should cut taxes prematurely, we could easily contribute to further price rises and to economic instability. If we cut taxes too soon we shall probably find it impossible to reverse our action. On the other hand, it will be time enough to cut taxes when

it becomes clear that conditions call for such action.

# BUDGETARY SITUATION

The current budgetary situation also calls for the maintenance of existing taxes. I am gratified that the latest estimates indicate a budgetary surplus for the fiscal year 1947. If the taxes are not reduced we shall also be able to achieve a budget-ary surplus in the fiscal year 1948. It is by no means clear, however, that the surplus in the fiscal year 1948 will exceed the amount foreseen in the President's budget, except for the effect of the subsequent adoption by the Congress of the President's recommendation for extension of the so-called war excise tax rates. Under existing law, revenues for the fiscal year 1948 are estimated at \$38.8 billion. The President's budget puts expenditures for the fiscal year 1948 at \$37.5 billion. A conference committee of the House and Senate is still considering various legislative budget estimates of expenditures. We still do not have any clear evidence that expenditures in the coming fiscal year can be reduced below the President's budget figures of \$37.5 billion. In my opinion, it would be unwise to reduce the revenues before we have a clear picture of what expenditures will be authorized.

#### PUBLIC DEBT

We have emerged from the war and immediate transition period with a public debt of approximately \$258 billion. The size of the debt is a strong argument Under present conditions, I believe it will against a tax reduction at this time. be sound financial policy to achieve as large a budget surplus as is possible and to apply that surplus against the public debt. When national income is high, as it is now, it is prudent to reduce the public debt as rapidly as possible. The present situation gives us an opportunity to make further reduction in the debt. I believe that we should now prove our determination to retire public debt by making as big a payment on it as we can. If we do so, there will be less cause for concern if in some future years we find it desirable to postpone temporarily further debt retirement.

#### COMPREHENSIVE TAX REVISIONS LATER

During recent years, when attention was necessarily devoted almost exclusively to urgent matters of war finance, a great number of technical tax problems have been accumulating. Moreover, much interest has developed in a series of funda-The problems to which I refer are not solely, or even rates. They relate rather to tax structure. These probmental tax problems. primarily, ones of tax rates. They relate rather to tax structure. These problems now need careful consideration, especially in view of the high level of current and prospective revenue requirements.

Although I do not believe that the time has yet come for revisions involving major tax reductions, it is not too early to begin studies of desirable tax changes to take effect at a later date. The Treasury Department has been studying a large number of important tax problems, working on many of them in close collaboration with the staff of the Joint Committee on Internal Revenue Taxation.

The Treasury stands ready to assist the Congress in any way possible.

In anticipation of later tax reductions, we should review the whole tax system. We should reexamine not only the individual income tax, but also the corporation income tax, excise taxes, and estate and gift taxes. Such a comprehensive review should aim at revisions that will fit all major taxes together into a system that will produce adequate revenue, will be fair and equitable, will interfere as little as possible with incentives to work and invest, and will help maintain mass markets for mass production.

There is danger that if we act prematurely by reducing the rates of one tax, without consideration of other problems, we shall make it difficult or impossible to adopt many needed changes at a later time. Many such fundamental tax revisions will involve substantial revenue reduction. If we now make a major reduction along the lines of H. R. 1, we may later find that we are not able to adopt many of the basic revisions in the individual income tax and the other taxes

that are necessary for a sound postwar tax system.

## SPECIFIC DISCUSSION OF H. R. 1

I turn now to a more specific examination of H. R. 1, as passed by the House. For the use of the committee, I have appended to my statement several tables. This material includes a variety of statistical data on the composition of the individual income tax base and other information that I believe will be helpful in

your consideration of H. R. 1 and other proposals for tax reduction. H. R. 1 includes a general reduction of individual income tax rates and a special additional exemption for taxpayers over 65 years of age. It would reduce the income tax by 30 percent for taxpayers whose net income in excess of exemptions is \$1,000 or less, and by an amount which under the notch provision would rapidly fall to 20 percent at a net income of \$1,396 after exemptions. For net income after exemptions between \$1,396 and about \$302,400, the reductions would be 20 For higher incomes the reduction would gradually taper off to 10.5 percent above \$5,000,000. The rate reductions in the amended bill are identical with those in the original bill for all taxable net incomes in excess of \$1,396. Only about 1,100 taxpayers would get less than a 20 percent rate reduction. About 14.4 million taxpayers would get a 20 percent rate reduction. About 8.5 million would get between 20 and 30 percent. The remaining 24.8 million taxpayers would get a 30-percent rate reduction.

H. R. I grants a special additional exemption of \$500 to persons over 65 years age. This additional exemption is subject to the limitation that persons qualifying for it must include in their gross income for tax purposes the first \$500 received from certain types of periodic pension or retirement annuity benefits that are now fully exempt from taxation. It is estimated that this additional exemption would reduce the income tax of 2.8 million persons over 65, of whom

825,000 would be made nontaxable.

It is estimated that the bill would reduce tax liabilities by \$3,769 million for This is \$280 million more than the original bill. Of the total reduction in liabilities \$3,624 million would be attributable to rate reductions and \$145 million to the increase in exemptions for taxpayers over 65. These are estimates

of tax liabilities for the calendar year 1947. Since H. R. 1 is retroactive to January 1, 1947, its enactment would reduce receipts in the fiscal year 1948 by more than the amount of one year's reduction in tax liabilities and would also necessitate a large amount of additional tax refunds. It is estimated that the House bill would reduce receipts in the fiscal year 1948 by \$3,994 million. It would increase refunds by \$751 million. In considering the effect of H. R. I on the budget for the fiscal year 1948, it is necessary to combine the decrease in receipts of \$3,994 million with the increase in expenditures of \$751 million for additional refunds. H. R. 1 would weaken the budget for

the fiscal year 1948 by \$4,745 million.

As I have already said, I do not believe that a tax reduction is now appropriate. I now wish to point to some inequities in H. R. 1 as a tax-reduction measure. Although the bill has been somewhat modified since it was originally introduced, it would still provide relatively too little tax reduction for low and middle incomes as compared with high incomes. As I said to the Ways and Means Committee, it seems to me that if a 1947 tax bill has any place at all in the management of our financial affairs, it should aim primarily at bringing relief to taxpayers who have borne extraordinarily heavy burdens during the war and postwar transition years and should give consideration to inequities. I do not believe that H. R. 1 accomplishes these objectives.

H. R. I would not reduce taxes in the same way that we increased them during e war. This can be clearly seen in table C, which compares taxes at different

net incomes under the 1939 law, present law, and H. R. 1.

To illustrate, H. R. 1 would eliminate 22 percent of the difference between present taxes and 1939 taxes for a married person with no dependents and a net income of \$5,000. But at a net income of \$1,000,000, this bill would wipe out 69 percent of the tax increase since 1939. Taxes at the \$5,000 level would still be eight times as high as in 1939, but at the level of \$1,000,000, taxes would be only a little higher than in 1939. H. R. I would reduce taxes on very high incomes to a level only a little higher than that before the war. It would leave taxes on lower and middle incomes much higher than before the war.

Despite modifications at both the lower and upper extremes, H. R. 1 still Of the \$3,769 million provides in the main a flat percentage cut in present taxes. reduction, \$2,262 million is attributable to the 20-percent reduction, \$724 million is attributable to the 30-percent reduction, \$520 million to the notch area of 20-30-percent reduction, \$118 million to the 10½- to 20-percent reduction, and \$145

million to the exemption for persons over 65.

So far as I know, a flat percentage cut in individual income taxes has been made only twice before in the history of the Federal income tax. The first time was in the Revenue Act of 1924, applicable to 1923 incomes. That act made a flat 25-percent reduction, but exemptions were greater and rates on lower incomes

were much less than under present law.

The second time a flat percentage cut in taxes was made was in the Revenue Act of 1945. But I want to emphasize the important differences between the 1945 act and the kind of reduction proposed in H. R. 1. The 5-percent cut under the Revenue Act of 1945 was only one of three important changes in the individual It accounted for less than one-fourth of the total reduction of the come tax. The remaining three-fourths of the 1945 reduction was individual income tax. made in the form of an increase in the normal-tax exemptions and a reduction of 3 percentage points in each surtax bracket.

There is a significant difference between a flat percentage cut in existing tax rates and a uniform reduction of a certain number of percentage points in each A 20-percent flat reduction would reduce rates 17 percentage points in an 85-percent rate bracket, but only 4 percentage points in a 20-percent rate bracket. In contrast, a 5-percentage-point reduction in each surtax rate, which would lose about the same amount of revenue, would give a 5.9-percent reduction in an 85-percent bracket rate, and a 25-percent reduction in a 20-percent bracket

An across-the-board percentage cut of the type in H. R. 1 decreases the

progressivity of the income tax.

The \$500 special tax exemption for persons over 65 years of age included in H. R. 1 is addressed to the special problem of one group. The bill as amended would partially offset the additional exemption by the requirement that taxpayers include in their gross income the first \$500 of certain types of pension and retirement income now fully tax-exempt, such as social security old-age benefits, railroad retirement benefits and retirement pay of armed forces personnel retired for disability.

This modification is a complication of the original provision, which does not meet the fundamental objections to such a special exemption. I do not believe that exclusions of particular kinds of income from the tax base are an appropriate means of bringing relief to special groups. As I told the Ways and Means Committee, I am opposed to extension of present exclusions from the individual income tax base. I do not believe that it would be fair to increase income tax exemptions for persons over 65 years of age and not for similarly situated persons under 65.

H. R. 1 is not only deficient from the standpoint of equity. It is not the wellbalanced approach to the important problem of maintaining incentives and markets, which will be essential when a tax reduction is appropriate. In a tax reduction program, the whole problem of incentives and markets merit broad and careful consideration. The problem is not merely one of individual income tax rates. It includes other phases of the tax system and many features of the individual income tax not treated in H. R. 1. Subjects that will need to be considered include the taxation of dividend income, tax treatment of different forms of business, loss carry-backs and carry-forwards, depreciation, treatment of family income, exemptions and other matters.

Enactment of H. R. 1 would complicate the individual income tax and increase It would cancel a part of the great progress that has been toward simplification of tax forms. The different rates of administrative costs. made in recent years toward simplification of tax forms. reduction from tentative tax, the "notch" rate, and the provisions for the aged involving the partial inclusion of income now excluded would be confusing to many taxpayers. There would be an increase in refunds, particularly for low-

income taxpayers.

## CONCLUSION

In my opinion, H. R. 1 should not be enacted. It would make a reduction in revenues of almost \$4 billion and necessitate an increase in expenditures of \$751 million for tax refunds at a time when a balanced budget and substantial debt reduction should be our first objective. By concentrating a large reduction in one tax, H. R. 1 would make later well-balanced tax revision more difficult, and perhaps impossible. H. R. 1 would not be an equitable tax reduction. unnecessarily complicate the individual income tax.

In conclusion, I wish to repeat that in my judgment economic conditions, budgetary uncertainties, and the size of the public debt, all call for maintaining present tax rates in 1947. Under present conditions, it is sound financial policy present tax rates in 1947. Under present conditions, it is sound financial policy to achieve as large a surplus as possible. The administration will continue to make every effort to hold Government expenditures for the fiscal year 1948 to the lowest level possible in view of our national obligations and public needs. sure, however, that any surplus that is likely to be realized in 1948 could best be applied to the reduction of the public debt.

Note.-Figures are rounded and will not necessarily add to totals.

Net income before exemptions.
 The number of persons paying normal tax is estimated to be less than 500 smaller than the number paying surtax.

Surtax net income.

<sup>6</sup> Net long-term capital gains subject to alternative tax.

<sup>1</sup> Internal Revenue Code, as amended by the Revenue Act of 1945.

<sup>3</sup> Normal tax and surtax were obtained separately by applying the appropriate rates to normal tax and surtax net income. Since normal tax net income is somewhat less than surtax net income, these amounts will differ slightly from the result obtained by applying the combined rates to surtax net income.
3 Less than .005 percent.

#### Exhibit 34

# Statement of Secretary Snyder before the House Ways and Means Committee, May 19, 1947, with reference to a comprehensive study of the tax system

I am glad to have this opportunity to appear before the Ways and Means Committee in connection with its proposed examination of the whole tax system. This approach to the tax problem is in accord with the recommendation for a comprehensive study which I made in my recent appearance before this committee and again before the Senate Finance Committee. Only by looking at the tax system as a whole is it possible to lay a sound foundation for future legislative The task confronting us is of the greatest importance, because a soundly conceived and well-balanced tax system can make a significant contribution to the maintenance of prosperity.

The first requisite of such a tax system is that it should produce adequate revenue to balance the budget and to provide a substantial payment on the public debt, in order to sustain the confidence of the public in the integrity of the Government's obligations and its financial strength. As Secretary of the Treasury, I am responsible for the management of the public debt and I am keenly aware that the Federal Government's securities are an important part of the assets of banks, insurance companies, and other financial institutions that serve the public as the repositories of its savings. Moreover, tens of millions of persons are direct owners of Federal securities. We have a great responsibility to build a tax system which will preserve the fundamental soundness of our financial system.

As a first step toward the development of a postwar tax system, facts and evidence should be assembled for the consideration of both the executive and legislative branches of the Government. This information will come from the hearings that are being initiated today and also from the continuing technical research work of the tax staffs of the Treasury Department and the Joint Committee on Internal Revenue Taxation. Later, when this necessary information is at hand, a sound tax program can be developed.

<sup>&</sup>lt;sup>1</sup> Not available. The total number of taxable and nontaxable returns filed were as follows: 1913, 357,598; 914, 357,515; and 1915, 336,652.

<sup>\*</sup>Tax base for taxable returns with net incomes of \$2,000 and over. There were 1,591,518 taxable returns with net incomes of \$2,000 and over. There were 1,591,518 taxable returns with net incomes of \$2,000 and over, for which the tax amounted to \$675,249,450.

Amount after the 25-percent reduction provided by section 1200 (a), Revenue Act of 1924.
Excludes additions to liability under the Current Tax Payment Act of 1943 amounting to \$2,555,894,000.

Obtained from Collectors' Monthly Report to Commissioner of Returns Filed.

By beginning early, as the committee has, we shall have time to make a thoroughgoing study of the present tax system, to consider carefully a large number of possible revisions, and to work out a well-balanced program. A program can be outlined first in broad terms and the final details worked out as the budgetary and economic situation grows clearer. When the time comes to draft legislation, measures already agreed upon can be taken up in the order of their priority. It is highly unlikely that the fiscal and economic situation will warrant enactment of all the ultimately desirable revisions at the same time. But advance planning and study will make it possible to proceed in an orderly fashion without prejudicing any necessary part of the program and without the danger of reducing the revenues too rapidly.

With your permission, I should like to restate the principles that I believe should guide our studies and to call attention to a number of tax problems that need careful consideration. It is not my intention today to make recommenda-

tions on any specific tax question.

I believe that a sound tax system should meet the following essential tests. The tax system should produce adequate revenue. It should be equitable in its treatment of different groups. It should interfere as little as possible with incentives to work and to invest. It should help maintain the broad consumer markets that are essential for high-level production and employment. Taxes should be as simple to administer and as easy to comply with as possible. While the tax system should be flexible and change with changing economic conditions, it should be possible to achieve this flexibility without frequent revisions of the basic tax structure. A stable tax structure, with necessary flexibility confined largely to changes in tax rates and exemptions, will make it easier for business

and Government to plan for the future.

Before going on to mention the areas that I believe need special study, I should like to repeat my firm conviction that at this time we have a unique opportunity to modernize the Federal tax system. We are nearing lower peacetime levels of Government expenditures and continuing high levels of national income and production. A period of tax reduction is approaching. But in order to take full advantage of our opportunity to modernize the tax system we must make careful use of the available margins of surplus. The surplus must be divided judiciously between debt retirement and tax reduction. The tax reductions should be allocated carefully among rate reductions and a large number of structural revisions. The development of a modern tax system that will serve America best will require the cooperation of the legislative and executive branches of the Government and of the taxpayers and the public generally. We need also to enlist, and I am sure we shall get, the wholehearted cooperation of the States and localities.

In my appearances before your committee and the Senate Finance Committee, I indicated that the technical staff of the Treasury Department has under way studies on some twenty major matters that will require attention in any comprehensive revision of the tax system. These include studies on business taxes, individual income taxes, excise taxes, estate and gift taxes, and social security taxes. If the committee should so desire, I will submit these studies to it as they are completed. I again offer your committee the cooperation of the entire tax staff of the Treasury Department in connection with the important task of developing a sound tax system that will make a major contribution to the future progress of

this country.

I wish now to comment briefly on each of the major tax items under study in the Treasury Department.

# BUSINESS TAXES

Revision in the business tax field should be designed to achieve the greatest feasible uniformity of treatment of different forms of business, to promote a sound competitive system, and to eliminate any barriers to a high level of investment.

Among the important business tax matters being studied are the following:

1. Corporate rates.—Both the level of corporation tax rates and the method and extent of graduation need to be carefully examined. Under present law the corporate income tax begins at a rate of 21 percent on net incomes of less than \$5,000 and is graduated to a rate of 38 percent on the entire income if in excess of

The level of corporate tax rates must be considered in the light of over-all revenue requirements and action taken on other major taxes, with due regard to any revisions in the structure of the corporation tax. The present method of graduation imposes a high rate of 53 percent on income in the so-called notch area between \$25,000 and \$50,000, to bring the effective rate on the whole income up to 38 percent at \$50,000. One question that merits consideration is whether this method of graduation should be continued or whether the so-called notch rate should be eliminated and a system of bracket graduation similar to that used

for the individual income tax substituted.

2. Taxation of dividends.—Under the present law a corporation pays an income tax on its entire net income and stockholders are taxed on their dividend income at the regular income tax rates. This system of taxing corporate profits has been widely criticized as involving double taxation. It is contended that this is both inequitable and damaging to investment incentives. This is a question about inequitable and damaging to investment incentives. This is a question about which there is no general agreement. An important issue in postwar tax policy relates to the extent of so-called double taxation of distributed corporate profits and the question of the desirability of reducing or eliminating any existing double

On the assumption that the corporation income tax rests at least in part on stockholders, a number of plans have been advanced for the reduction or elimination of double taxation. These plans are of three basic types. One approach would be to eliminate the corporate income tax and to tax stockholders, like partners, on their full portion of corporate profits. A second approach would be to continue the corporate income tax but to grant corporations a tax credit or deduction for dividends paid. A third approach would be to continue the corporate income tax on both distributed and undistributed profits but to grant stockholders an allowance or credit with respect to dividends received. The Treasury

Department has completed and released a technical study of a number of such plans for the taxation of corporate profits.

The taxation of corporate income raises important and exceedingly complex The existing arrangements and alternative approaches need to be carefully analyzed to determine their advantages and disadvantages with respect

to tax equity, economic effects, and administrative considerations.

3. Small business.—The vital importance to the economic system of a vigorous and healthy group of small business enterprises makes it essential to consider carefully the impact of present taxes on small business. Some spokesmen for small business believe that the present tax system discriminates against smaller enterprises and imposes unnecessary impediments to their establishment and growth. Others take the position that an attempt should be made to liberalize the tax system in order to provide special advantages for new and small enter-Among the proposals advanced for the tax relief of small business are suggestions for tax rate revisions, tax exemption for new enterprises, tax exemption or deduction for investment in small business, and more liberal treatment for operating losses and depreciation allowances. These and other proposals for the special benefit of both incorporated and unincorporated business firms raise difficult problems which merit extensive investigation.

4. Tax-exempt organizations.—Because of the continued growth of the scope and volume of activities of tax-exempt organizations, there is need for reexamination of the tax status of these organizations. It has been charged that in some instances the present treatment discriminates unfairly against taxable enterprises.

5. Elimination of discrimination among various forms of doing business.—In a free competitive economy business is conducted in a variety of forms. Sole proprietorships, partnerships, and corporations can all make a significant contribution to economic progress. It is important that taxes create no unnecessary obstacles to the carrying on of business in the forms best adapted to different At the present time, there are significant differences in taxes on incorporated and unincorporated businesses, depending on the size of the business income, the other income of the business owners, and the portion of the profits retained in the business. While complete uniformity of tax treatment of proprietorships, partnerships, and corporations is impracticable, the present tax system needs careful examination to determine whether existing differences in treatment are justified.

6. Business loss offsets.—Opportunities for offsetting business losses against taxable income are a significant factor in determining the attractiveness of risky investment and in arriving at an equitable basis of taxing fluctuating incomes. Under present law, net operating losses sustained in any one year may be carried back and applied against the income of the two preceding years and any balance not absorbed may be carried forward as a deduction from income of the 2 years immediately following the year of loss. In connection with postwar tax revisions, it is important to consider whether the present loss offset period is long enough. Another important problem is to determine whether the present system of carrybacks and carry-forwards is preferable to a system which relies solely on carry-

forwards.

7. Depreciation.—The speed and certainty of recovery of capital invested in depreciable assets have an important bearing on the risks of investment. Consequently, it is necessary to give attention to present depreciation and practices and to various proposals for their modification. Some taxpayers complain that the present system of depreciation allowances is too rigid and urge that they should be given more leeway in estimating the useful lives of their depreciable assets and more freedom of choice in selecting the method of taking depreciation. They contend that the individual taxpayer is in a better position than the tax administrator to estimate the life span of a particular asset.

Some advocate a change in the law that would arbitrarily shorten the write-off period so that the capital invested in depreciable assets will be recovered over a period which is less than their probable useful life. They assert that accelerated depreciation would reduce the risks of large capital expenditures in fixed assets. To the extent, however, that it understates income during periods when a tax-payer is increasing his capital investment, it would result in postponement of tax.

8. American business abroad.—American corporations and individuals doing business in foreign countries are normally subject not only to American taxes but also to those of the foreign countries. Such individuals and enterprises, therefore, may become subject to excessive tax burdens unless some allowance is made in the American tax law for taxes paid abroad. In the past, American corporations have been allowed to credit against their American tax liabilities on income derived from business abroad the taxes which they have paid to foreign countries.

In addition, a number of special relief provisions have been enacted from time to time designed to meet particular problems arising in various foreign countries and areas. For example, domestic corporations qualifying as Western Hemisphere corporations have since 1942 been exempt from corporation surtax. Also, taxpayers doing business in the possessions of the United States have been exempted from Federal income taxes and a special type of exemption is provided for China Trade Act Corporations. Individuals resident abroad are allowed a complete exemption on their wages and salaries earned abroad and a partial exemption where their income is derived from operating a business.

American corporations and individuals doing business abroad should not be placed at a disadvantage in their competition with foreign firms. At the same time, so long as they are American citizens and businesses, they should bear their fair share of domestic tax burdens. It is, therefore, highly important that we analyze the combined effect of United States and foreign taxes with a view both to minimizing any existing discrimination and inequities and to ascertaining whether

such taxpayers are bearing their fair share of taxes.

9. Intercorporate problems.—Attention should be given to the desirability of the present 2-percent additional tax on consolidated corporate returns and the 85-percent credit for intercorporate dividends received. The special tax on consolidated returns was intended as an offset to the tax advantages accruing from the offsetting of losses of one corporation against the gains of another and the avoidance of the tax on intercorporate dividends which would otherwise have been paid on dividends received by one member of an affiliated group from another. The tax on intercorporate dividends was intended to prevent the evasion of the graduated corporate income tax by setting up a series of small corporations in order to obtain the lower rates applicable to small corporations. It is necessary to determine whether these taxes have achieved the purposes they were intended to serve and whether they should be retained in the postwar tax structure.

# INDIVIDUAL INCOME TAXES

The individual income tax is, and should remain, the mainstay of the Federal revenue system. Hence, it is most important to achieve a fair and equitable distribution of the taxes while maintaining broad consumer markets and incentives to work and invest. Among the major tax problems in this field now under study in the Treasury Department are the following:

10. Individual rates.—The financial demands of the war forced us to raise individual income tax rates in all brackets to very high levels. The entire rate schedule should be reconstructed with a view to achieving an equitable distribu-

tion of taxes and maximum production under peacetime conditions. must be reexamined to determine their effects on incentives to work and invest and their effects on living standards and purchasing power. Revision of the individual income tax rates should be coordinated with other changes in the income tax such as personal exemptions and the treatment of family incomes and with

changes in other taxes.

11. Personal exemptions.—As a part of the war finance program, personal exemptions under the individual income tax were sharply reduced. At the present time a taxpayer is allowed an exemption of \$500 for himself, for his wife, and for each of his dependents. Thus, a single person now has an exemption of \$500; in-1939 his exemption was \$1,000. A married couple without children now has an exemption of \$1,000 as compared with \$2,500 in 1939. While exemptions for single persons and married couples have been reduced, the allowance for dependents has been increased from \$400 in 1939 to the present level of \$500. War and postwar increases in the cost of living have further sharply reduced the real purchasing power represented by the personal exemptions.

The level of personal exemptions determines the coverage of the individual income tax and affects in an important way the role of the tax in the revenue system as a whole. Consideration needs to be given to the question whether an adjustment should be made to take account of higher living costs. It is also necessary to reexamine the alinement of exemptions as between single persons, married

couples, and dependents

12. Family income.—Under present law there are inequalities in taxation of families arising out of the fact that couples in community property States are permitted to divide their community earned and investment income for Federal income tax purposes, thereby reducing their taxes under the progressive rate schedule. There are also inequalities arising out of the fact that in all States recipients of investment income have opportunities for splitting that income among members of the family whereas in noncommunity property States earned income is taxed to the earner. The tax value of income splitting varies with size of income. Couples with not more than \$2,000 of net income after exemptions are the proof from income political value of the proof of tions can realize no tax benefit from income splitting, whereas under the graduated rates couples with large incomes may realize substantial benefits. These tax savings have created difficult administrative problems and endless litigation in the field of family trusts, family partnerships and various other types of property

Over a period of years the Congress and the Treasury have both considered means of eliminating or reducing the resulting tax inequalities among similarly situated families, but no adequate solution of the problem has been adopted. limited approach that has been considered in the past would be to eliminate the tax advantages of the community property system by taxing earned income to the earner and other community property income to the spouse who exercises management and control. A more comprehensive approach to the problem, which has also received congressional attention in the past, would be to require joint tax returns by husbands and wives. Still another approach, which has only recently been given widespread attention, would be to eliminate tax differences resulting from income splitting between husbands and wives by granting couples in all States the option to divide their combined incomes for tax purposes.

The existing inequalities in taxes on family incomes are significant and call for careful consideration of this problem. It must be recognized that the various solutions that have been suggested would have different but important effects on the revenue yield of the income tax and on the distribution of taxes among different income groups and between married and single persons. It is, therefore, desirable to consider the family income problem in connection with any comprehensive revision of the individual tax.

There are now several million persons who receive annuities. With the wartime reduction in personal 13. Pensions and annuities,various forms of pensions and annuities. With the wartime reduction in personal exemptions and the recent increases in the cost of living, the tax treatment of pensions and annuities has become an increasingly important problem. Under existing law, social security and railroad retirement benefits and certain other kinds of pensions and annuities are excluded from taxable income. These exclusions raise important problems of tax equity. With respect to taxable annuities, there should be a reexamination of the present method of allowing the tax-free recovery of the annuitant's capital contribution. The taxation of pensions and annuities is closely related to proposals for special treatment for aged persons under the individual income tax.

14. Averaging.—Under graduated tax rates, taxpayers with widely fluctuating incomes are required to pay substantially larger amounts of tax than those with stable incomes totaling the same amount over a period of years. Moreover, many taxpayers lose the full benefit of their individual income tax exemptions because in some years they do not have income equal to the allowable exemptions. Such taxpayers are also taxed more heavily over a period of years than those with stable incomes. These inequalities in taxation raise the question whether it is desirable to adopt some method of averaging income over a period of years for purposes of the individual income tax. Averaging may have a significant bearing both on tax equity and on the effects of taxation on incentives to invest in risky business ventures. The adoption of averaging would result in a substantial loss of revenue, and the effects of such a loss in revenue must be compared with the effects of other tax revisions.

15. Credit for earned income.—The Federal income tax has provided a credit for earned income during the years 1924–31 inclusive and again in the years 1934–1943 inclusive. The earned income credit, however, was comparatively small in amount, and in the Revenue Act of 1943 it was eliminated, mainly on the grounds that the credit was not large enough to justify the complications that it introduced into the tax system. There have, however, been a number of proposals for reinstituting a credit for earned income under the individual income tax. Some proponents of an earned income credit view it primarily as a means of reducing taxes on wage earners, whereas other advocates of an earned income credit are concerned

primarily with its effects on the incentives of business executives.

16. Allowances for life insurance premiums and other savings.—There have been proposals to allow a limited deduction under the individual income tax for life insurance premiums. Proposals have also been made to allow a deduction for a limited amount of earned income invested in Federal securities. If such allowances were granted it would probably be necessary to consider a corresponding general allowance for other forms of savings, in order to prevent unfair discrimination between individuals investing their savings in different ways. These proposals for special allowances for saving raise basic equity questions and economic issues as to their effect on savings, investment and consumption.

issues as to their effect on savings, investment and consumption.

17. Capital gains and losses.—Under present law gains on capital assets held by individuals and corporations over 6 months are taxed at rates which do not exceed a maximum of 25 percent. Losses on such assets are allowed only to the extent of capital gains, except in the case of individuals such losses may be offset against ordinary income to the extent of \$1,000 each year. A 5-year carry-over

of unabsorbed capital losses is allowed.

The tax treatment of capital gains and losses, it has been contended, has a considerable effect on the securities market and the supply of capital. A great many problems have arisen as the result of taxpayers' efforts to convert ordinary income into capital gains entitled to the lower tax rates. The basis for taxing capital gains at lower rates than other income and the limitation on the deductibility of capital losses should be reexamined.

#### EXCISES

18. Revision of excise taxes.—The Federal Government now imposes excise taxes on more than 50 commodities or services, most of which were substantially increased or newly imposed to help in the financing of the war. The revision of the excise taxes raises the important policy issue of how large a portion of the total revenue should be raised from excise taxes. This question is closely related to such matters as the level of income tax exemptions. It is now appropriate to reexamine these excises with a view to fitting them together into a coherent system adaptable to our peacetime requirements. Each of the excises imposed should be carefully considered with a view to reducing or eliminating those which are extremely regressive, which enter into business costs, which are unduly burdensome on profits of particular industries, or which are unusually difficult to administer. Revisions of particular taxes will have to be studied in detail so that any changes made will be appropriate in light of the competitive conditions in the various industries.

19. Discrimination between domestic and imported goods.—Last year your committee gave consideration to the problem of making certain imported merchandise subject to the same internal revenue taxes as similar merchandise of domestic origin and referred it for study to a group consisting of the Joint Committee on Internal Revenue Taxation, the State Department, the Tariff Commission, and

the Treasury. Consideration of this problem has involved an analysis of the treatment of such imported products as beer, lubricating oil, and numerous products containing alcohol including medicinal preparations, toilet preparations, flavoring extracts, fruits, and food colorings. Determining what constitutes discrimination is complicated by the nature of the tariff schedules which in some cases provide specific rates that may have been intended to compensate for the absence of excise taxes on imported products. The interrelationship between excises and tariffs thus tends to raise questions involving this country's policies with respect to international trade agreements.

# ESTATE AND GIFT TAXES

20. Revision of structure.—In the estate and gift tax field there has long been a need for an intensive study and legislative revision of the basic structure, particularly with respect to the relationship between the two taxes and their mutual relationship to the income tax. For the past 3 years the Treasury Department, with the assistance of an advisory committee of prominent tax attorneys, has been exploring the problems in this field, with a view to preparing a comprehensive report for consideration by the Congress. This important task is nearing completion and the report is in the final stages of preparation. It will contain a detailed analysis of the problems involved and recommendations for a revision of the estate and gift taxes, the adoption of which, it is believed, would greatly increase the uniformity, simplicity, and equity of these taxes.

#### SOCIAL SECURITY TAXES

21. Extension of coverage.—The financing of social security and its coverage raise certain important problems which will need consideration in connection with the development of the postwar tax system. As a result of a request of July 27, 1946, from Mr. Doughton, then chairman of this committee, the Treasury Department has been carrying on a study of the problems that would be associated with the extension of coverage for old-age and survivors insurance. Attention has been directed primarily to the difficult technical and administrative problems involved in developing feasible methods for covering self-employed persons and agricultural and domestic workers.

The problems raised in connection with the coverage of both of these groups differ substantially from those involved in the coverage of workers in industry and commerce. At present social security taxes are imposed on wages, the employer withholding the employee tax and remitting it together with the employer tax. In the case of the self-employed, this system is not applicable because there is no employer-employee relationship giving rise to wages, and it is necessary to establish the base on which the self-employed should be taxed and how the tax should be reported to the Bureau of Internal Revenue. Both of these problems raise numerous questions, particularly with respect to the self-employed having very low incomes who are not subject to income tax. While the employer-employee relationship generally exists in the case of agricultural and domestic workers, the majority of the employers either are not accustomed to filing tax returns or are not engaged in business. Moreover, employment generally is highly irregular, prevailing wages are frequently lower than in industry and may be paid partly in kind. As a result, provision may need to be made for different techniques in order to achieve adequate coverage of these groups. Substantial progress has been made toward recommendations for the solution of these problems

#### TECHNICAL MATTERS

In addition to the tax matters of broad and general importance to which I have briefly referred, there are a substantial number of needed technical adjustments of considerable significance that have accumulated during the war years. The Revenue Act of 1942 was the last piece of major legislation in which the Congress undertook to go into such problems to any great extent. Many of these matters pose policy questions of some magnitude and their proper solution will frequently involve technical problems of considerable difficulty and complexity. Among the more important of these items are such matters as the treatment of (a) war losses, which involves primarily the treatment of recoveries of properties lost during the war; (b) cancellation of indebtedness, which is a matter requiring general reconsideration and overhauling; (c) certain types of recapitalizations and reorganizations, to which there appears to be increasing resort as a method of attempting

764788-48--17

to avoid tax on corporate distributions in situations where there are accumulated corporate earnings; (d) provisions of the tax law, the operation of which is affected by the termination of hostilities and of the war; (e) occupational expenses, a problem which involves primarily the difficulty of drawing satisfactory lines between the nondeductible personal expenses of individuals and their deductible business outlays; (f) research and development expenses, involving the question of permitting greater flexibility in the determination of whether such costs should be capitalized or deducted as current expenses; (g) capital gains and losses, in which the problem relates primarily to use of the present provisions, such as section 117 (j), in certain instances for tax avoidance purposes; and (h) a number of administrative provisions which require amendment in order to facilitate the administrative operations of the Bureau of Internal Revenue and assist taxpayers, such as elimination of oath requirements on certain return forms, correction of certain statute of limitation provisions, elimination of burdensome and unnecessary reports of small refunds, elimination of irrevocability of the election of the taxpayer with respect to the standard deduction, improvement of the enforcement of reporting and paying by employers of tax collected from their employees under the withholding system, and similar matters.

These items are illustrative of a number of pressing technical and administrative problems which the Treasury and the taxpayers have encountered in the opera-

tion of the code.

In conclusion I believe that we should approach the important task of postwar tax revision with an open mind. We need to study and analyze all the major matters that I have mentioned and many more that will arise upon further exploration. We should scrutinize carefully all the present sources of revenue to ascertain whether they are in proper balance. We should also explore all possible sources of new taxes which upon investigation may prove meritorious, and which

may relieve pressure in other areas.

The development of a sound postwar tax system constitutes one of the most important steps towards the assurance of continuing prosperity in this country. If production is to continue to increase, if the American standard of living is to improve in the future as it has in the past, the tax system must yield the needed revenue without impeding business and work incentives, without restricting investment and without weakening consumer markets. I wish again to express my pleasure in appearing before this committee as the work is being initiated on a fundamental revision of the American tax system.

#### Exhibit 35

Message from the President, June 16, 1947, returning without approval the bill (H. R. 1) to reduce individual income tax payments

To the House of Representatives:

I return herewith, without my approval, H. R. 1, entitled "An act to reduce individual income tax payments."

The right kind of tax reduction, at the right time, is an objective to which I am deeply committed. But I have reached the conclusion that this bill represents the wrong kind of tax reduction, at the wrong time. It offers dubious, ill-apportioned, and risky benefits at the expense of a sound tax policy and is, from the standpoint of Government finances, unsafe. Proposals for tax reduction must be examined in the light of sound and carefully related fiscal and economic policies. Unless they are consistent with the demands of such policies, they should not be approved.

In my Budget Message of January 10, 1947, I said:

As long as business, employment, and national income continue high, we should maintain tax revenues at levels that will not only meet current expenditures but also leave a surplus for retirement of the public debt. There is no justification now for tax reduction.

Developments since January do not warrant a change in that conclusion. Total employment in May increased by a million and a half over that in April, and the total number now employed is over 58,000,000. The number of unemployed is now less than 2,000,000, practically a peacetime minimum. Income payments to individuals are estimated to be at the record annual rate of \$176,000,000,000. Department store sales in May were up 6 percent over April and equaled the all-time high in dollar volume. The number of houses begun by private enterprise in May was the largest in any month since VJ-day. Despite many gloomy predictions, there is no convincing evidence that a recession is imminent.

Ample evidence points to the continuation of inflationary pressures. Tax reduction now would increase them. If these pressures are long continued, and if essential readjustments within the price structure are long deferred, we are

likely to induce the very recession we seek to avoid.

Reductions in income tax rates are not required now to permit necessary investment and business expansion. There is no shortage of funds for this purpose in any wide sector of our economy. As a matter of fact, the amount of liquid funds in the hands of corporations and individuals at the present time is nearly \$200,000,-Under these circumstances, tax reduction is not now needed to provide additional funds for business expansion.

The argument is made that the funds added to consumer purchasing power through this tax reduction are needed to maintain employment and production

at maximum levels.

It is true, as I have pointed out many times, that the purchasing power of large groups of our people has been seriously reduced. We must take every step possible to remedy the disparity between prices and the incomes of the rank and file of our people, so as not to put brakes on our continued prosperity and lead us toward a recession. Tax reduction as proposed in H. R. 1 is not the proper way to remedy the current price situation and its effect upon consumers and upon prospective employment. Necessary adjustments in incomes, production, and prices should be made by wise policies and improved practices of business and labor, not by hastily invoking the fiscal powers of Government on a broad scale.

The time for tax reduction will come when general inflationary pressures have ceased and the structure of prices is on a more stable basis than now prevails. How long it will take for this point to be reached is impossible to predict. Clearly it has not been reached as yet. Tax reduction now would add to, rather than

correct, maladjustments in the economic structure.

Sound fiscal policy also requires that existing tax rates be maintained for the I have always been keenly aware of the necessity for the utmost econpresent. I have always been keenly aware of the necessity for the utmost economy in Government and of the need for a progressive reduction in Government expenditures to the greatest extent possible consistent with our national interests. However, necessary expenditures for essential Government operations are still high. We are still meeting heavy obligations growing out of the war. We continue to be confronted with great responsibilities for international relief and rehabilitation that have an important bearing on our efforts to secure lasting peace. We are still in a transition period in which many uncertainties continue. In the face of these facts, common prudence demands a realistic and conservative In the face of these facts, common prudence demands a realistic and conservative management of the fiscal affairs of the Government.

A time of high employment and high prices, wages, and profits, such as the present, calls for a surplus in Government revenue over expenditures and the application of all or much of this surplus to the reduction of the public debt. Continuing public confidence in Government finances depends upon such a policy If the Government does not reduce the public debt during the most active and inflationary periods, there is little prospect of material reduction at any time, and the country would, as a result, be in a poorer position to extend supports to

the economy should a subsequent deflationary period develop.

With the present huge public debt, it is of first importance that every effort now be made to reduce the debt as much as possible. If H. R. 1 were to become law, the amount available for debt retirement would be entirely too low for this

period of unparalleled high levels of peacetime income and employment.

The integrity of the public debt is the financial bedrock on which our national More than half of the American people are direct owners of economy rests. Government securities. A major portion of the assets of banks, insurance companies, and trust funds is invested in Government bonds. To maintain the integrity of the public debt, we must now reduce it by substantial amounts.

In addition to the fact that this is not the time for tax reduction, there is a fundamental objection to this particular bill. An adjustment of the tax system should provide fair and equitable relief for individuals from the present tax burden, but the reductions proposed in H. R. 1 are neither fair nor equitable. H. R. 1 reduces taxes in the high income brackets to a grossly disproportionate extent as compared to the reduction in the low income brackets. A good tax

reduction bill would give a greater proportion of relief to the low income group. H. R. 1 fails to give relief where it is needed most. Under H. R. 1, tax savings to the average family with an income of \$2,500 would be less than \$30, while taxes

on an income of \$50,000 would be reduced by nearly \$5,000, and on an income of

\$500,000 by nearly \$60,000.

Insofar as "take home" pay is concerned, under H. R. 1, the family earning \$2,500 would receive an increase of only 1.2 percent; the family with an income of \$50,000 would receive an increase of 18.6 percent; and the family with an income of \$500,000 would receive an increase of 62.3 percent.

If H. R. 1 were to become law, the inequity of its provisions would be frozen into the tax structure. The reduction in Government receipts resulting from this

bill would be such that the Government could ill afford to make fair tax reductions at the proper time in the form of a carefully considered revision of our entire tax

structure.

Now is the time to plan for a thoroughgoing revision of the tax system. should consider not only individual income tax rates but also the level of personal exemptions and many other adjustments in the personal income tax structure. We should also consider changes in excise tax laws, gift and estate taxes, corporation taxes, and, in fact, the entire field of tax revenues. Such a program of tax adjustment and tax reduction should be geared to the financial and economic needs of this country. It will be an important contribution to economic progress. The timing of such a program is highly important to achieve economic stability, to promote the investment of capital, and to maintain employment, purchasing power, and high levels of production.

For the compelling reasons I have set forth, I return H. R. 1 without my

approval.

THE WHITE HOUSE, June 16, 1947.

HARRY S. TRUMAN.

#### Exhibit 36

Message from the President, July 18, 1947, returning without approval the bill (H. R. 3950) to reduce individual income tax payments

To the House of Representatives:

I return herewith, without my approval, H. R. 3950, entitled "An Act to

reduce individual income tax payments.

The provisions of this bill are identical with those of H. R. 1 except that this bill would not become effective until January 1, 1948, whereas H. R. 1 would have become effective on July 1, 1947.

I returned H. R. 1 to the House of Representatives on June 16, 1947, without my approval, stating that it represented the wrong kind of tax reduction at the wrong time.

This is still the wrong kind of tax reduction and this is still the wrong time to

provide for tax reduction.

The present bill is not consistent with sound fiscal policy. As I have stated to the Congress on previous occasions, while business, employment, and national income continue high, we should maintain tax revenues at levels that will meet current expenditures and also leave a surplus for retirement of the public debt. No other course is consistent with realistic and conservative management of the fiscal affairs of the Government.

Since H. R. 1 was disapproved, there has been no lessening of the need to make substantial payments on the public debt. Maintaining the integrity of this debt is one of the primary obligations of the Government. I repeat that if we do not

as the present, there is little prospect of material reduction at any time.

I also pointed out in my message on H. R. 1 that necessary Government expenditures are still high. We are meeting tremendous obligations growing out The national defense establishment still requires large sums. responsibilities for international rehabilitation have an important bearing on our efforts to secure lasting peace. The recent refusal of certain nations to join in common endeavors to establish conditions of world stability increases the difficulty of our task and exposes us to greater risk. Until we are better able to estimate the cost of our investment in world peace and collective security, it is unwise to make so large a cut in our Government's future income that our ability to meet our needs would be impaired.

As far as can be determined at present, it is not likely that expenditures in the fiscal year 1948 will be substantially less than I estimated in the January budget A careful appraisal of the outlook for both receipts and expenditures indicates that it is not possible, under present conditions, to make a major tax reduction and an adequate payment on the public debt at the same time.

Not only does this bill represent an unsound fiscal policy, but it would also contribute to inflationary pressures which we have made progress in combatting but have by no means overcome. As I stated in the message on H. R. 1, there is no justification for tax reduction so long as price stability at sound levels has not been secured and business, employment, and national income continue at peak

levels.

Since the veto of H. R. 1, income payments to individuals have continued to rise, and the general level of business activity is establishing new high records. The total number of civilians gainfully employed has also continued to rise. Total employment in June increased by 1,725,000 over May, and the total number now employed is over 60,000,000—the highest in our history. There is still no convincing evidence that a recession is imminent.

Tax reduction now would delay the readjustments of prices and wages necessary to maintain this high prosperity. It would lead to an even higher level of prices for consumer goods. It would increase the danger of a recession.

For all these reasons, which are more compelling now than they were 1 month ago, I regard the present bill as unsound and unsafe.

I also regard it as unfair.

In my message of disapproval of June 16, I pointed out that H. R. 1 was inequitable in that it would reduce taxes in the high-income brackets to a grossly disproportionate extent as compared with the reduction in the low-income brackets. I stated that a good tax-reduction bill should give a greater proportion of relief to low-income groups.

Since the present bill is identical except as to its effective date, it is, of course,

subject to the same criticism.

It is important to remember that, during the war, Federal income taxes were extended to millions of low-income families who had never before paid them, and taxes on moderate incomes were increased by a far greater proportion than those on higher incomes. The amount by which present income taxes exceed those payable under the Revenue Act of 1940 represents a special wartime tax burden. When the time comes to lessen this wartime tax burden, it is only fair that we

should follow a pattern which is the reverse of that under which the burden was That is to say, this wartime tax burden should be reduced on a basis

that is fair to low income groups as well as to high income groups.

The failure of H. R. 3950 to follow this equitable principle is strikingly demonstrated by the following examples:

The bill would remove 21 percent of this wartime tax burden for a married couple with an income of \$2,500. The bill would remove 64 percent of this wartime tax burden for a couple with

an income of \$100,000.

The bill would remove 85 percent of this wartime tax burden for a couple with an income of \$1,000,000.

I am unequivocally committed to the right kind of tax reduction at the right The right kind of tax reduction must be based upon a careful consideration of all elements of our tax structure.

A premature and faulty tax reduction bill such as H. R. 3950 would inject into our tax system inequities which would greatly increase the difficulty of making

desirable revisions.

A fair and proper revision of our tax structure should result in an equitable distribution of tax reductions. It should be designed, also, to assure a balanced budget, adequate debt retirement, and an adequate reserve for meeting our international commitments and carrying out our foreign policy. It should be designed to provide stability rather than instability in our economy, and should be properly timed for that purpose.

Because H. R. 3950 is at complete variance with the fundamental requirements

of a good tax bill, I am compelled to return it without my approval.

HARRY S. TRUMAN.

THE WHITE HOUSE, July 18, 1947.

# ORGANIZATION AND PROCEDURE

#### Exhibit 37

Executive Order 9801, November 9, 1946, removing wage and salary controls adopted pursuant to the Stabilization Act of 1942

By virtue of the authority vested in me by the Constitution and statutes of the United States, and particularly by the Stabilization Act of 1942, as amended, and for the purpose of further effecting an orderly transition from war to a peace-

and for the purpose of further effecting an orderly transition from war to a peace-time economy, it is hereby ordered as follows:

All controls heretofore in effect stabilizing wages and salaries pursuant to the provisions of the Stabilization Act of 1942, as amended, including any Executive order or regulation issued thereunder, are hereby terminated; except that as to offenses committed, or rights or liabilities incurred, prior to the date hereof, the provisions of such Executive orders and regulations shall be treated as still remaining in force for the purpose of sustaining any proper suit, action, or prosecution with respect to any such right, liability, or offense.

HARRY S. TRUMAN.

THE WHITE HOUSE, November 9, 1946.

#### Exhibit 38

Portions of Executive Order 9809, December 12, 1946, transferring to the Treasury Department certain functions relating to contract settlements and wage stabilization

By virtue of the authority vested in me by the Constitution and statutes, including Title I of the First War Powers Act, 1941, Title III of the Second War Powers Act, 1942, section 201 (b) of the Emergency Price Control Act of 1942, as amended, and section 2 of the Stabilization Act of 1942, and as President of the United States, it is hereby ordered, for the purpose of further effectuating the transition from war to peace and in the interest of the internal management of the Covernment as follows: Government as follows:

8. There are transferred to the Department of the Treasury (a) the functions of the Office of Contract Settlement, (b) the Appeal Board established under section 13 (d) of the Contract Settlement Act of 1944, (c) the Contract Settlement Advisory Board created by section 5 of the said act, and (d) the functions of such boards, which shall remain vested therein, respectively. The functions of the Director of Contract Settlement, and the functions of the Director of War Mobilization and Reconversion under section 101 (b) of the War Mobilization and Reconversion Act of 1944 with respect to the Office of Contract Settlement, are transferred to the Secretary of the Treasury.

10. (a) The National Wage Stabilization Board is terminated.(b) The functions heretofore vested in the National Wage Stabilization Board pursuant to the provisions of section 5 (a), of the Stabilization Act of 1942, as

amended, are transferred to the Department of the Treasury.

(c) The functions under section 5 of the War Labor Disputes Act now vested in the National Wage Stabilization Board shall be administered by a special board

or boards to be constituted as may be necessary by the Secretary of Labor from among the members of a panel to be appointed by the President for that purpose.

(d) The Tripartite Steel Commission (created by the National War Labor Board on March 30, 1945) shall continue to carry out its functions within the Department of Labor until such date as the Secretary of Labor may fix for its

(e) All other functions of the National Wage Stabilization Board are trans-

ferred to the Secretary of Labor.

11. The authority, records, property, and personnel which relate primarily to the functions redistributed by this order are transferred to the respective agen-

<sup>1</sup> See section 201 of Reorganization Plan No. 1 of 1947, exhibit 39 and Order No. 78, exhibit 41.

cies in which functions are vested pursuant to the provisions of this order and the funds which relate primarily to such functions are transferred or otherwise made available to such respective agencies: *Provided*, That the Director of the Bureau of the Budget may in any case limit the records, property, personnel, and funds to be so transferred or made available to so much thereof as he deems to be required for the administration of the transferred functions. Such further measures and dispositions as may be determined by the Director of the Bureau of the Budget to be necessary to effectuate the purposes and provisions of this paragraph shall be carried out in such manner as the Director of the Bureau of the Budget may direct and by such agencies as he may designate. All personnel transferred under the provisions of this order which the transferree agencies shall respectively find to be in excess of the personnel necessary for the administration of the functions transferred to such agencies by this order shall, if not retransferred under existing law to other positions in the Government, be separated from the service.

12. All prior Executive orders or parts thereof in conflict with this order are

amended accordingly. All other prior orders, regulations, rulings, directives, and other actions relating to any function or agency transferred by this order or issued by any such agency shall remain in effect except as they are inconsistent herewith

or are hereafter amended or revoked under proper authority.

13. The provisions of this order shall become effective immediately except that the provisions of paragraph 10 hereof, and those of paragraph 11 to the extent that they relate to the functions referred to in paragraph 10, shall become effective on February 24, 1947. HARRY S. TRUMAN.

THE WHITE HOUSE, December 12, 1946.

# Exhibit 39

Portion of the President's Reorganization Plan No. 1 of 1947, effective July 1947, relating to contract settlement functions and National Prohibition Act

# PART II. DEPARTMENT OF THE TREASURY

SEC. 201. Contract settlement functions.—The functions of the Director of Contract Settlement and of the Office of Contract Settlement are transferred to the Secretary of the Treasury and shall be performed by him or, subject to his direction and control, by such officers and agencies of the Department of the Treasury as he may designate. The Contract Settlement Advisory Board created by section 5 of the Contract Settlement Act of 1944 (58 Stat. 649) and the Appeal Board established under section 13 (d) of that act are transferred to the Department of the Treasury: Provided, That the functions of the boards shall be performed by them respectively, under such conditions and limitations as be performed by them, respectively, under such conditions and limitations as may now or hereafter be prescribed by law. The Office of Contract Settlement

Sec. 202. National Prohibition Act functions.—The functions of the Attorney General and of the Department of Justice with respect to (a) the determination of internal revenue taxes and penalties (exclusive of the determination of liability guaranteed by permit bonds) arising out of violations of the National Prohibition Act occurring prior to the repeal of the eighteenth amendment to the Constitution, and (b) the compromise, prior to reference to the Attorney General for suit, of liability for such taxes and penalties, are transferred to the Commissioner of Internal Revenue, Department of the Treasury: Provided, That any compromise of such liability shall be effected in accordance with the provisions of section 3761 of the Internal Revenue Code. All files and records of the Department of Justice the Internal Revenue Code. All files and records of the Department of Justice used primarily in the administration of the functions transferred by the provisions of this section are hereby made available to the Commissioner of Internal Revenue for use in the administration of such functions.

# Establishment of the Treasury Department Committee on Employee Awards

TREASURY DEPARTMENT, Washington, January 14, 1947.

To Heads of Bureaus, Offices and Divisions, Treasury Department:

Pursuant to the authority contained in Treasury Department Order No. 79,1 there is hereby established the Treasury Department Committee on Employee

The duties of the Committee will be (1) to formulate the Treasury Department's program for recognition of meritorious suggestions and service in accordance with section 14 of Public Law 600, 79th Congress, and Executive Order 9817; (2) to revise the Treasury Department's award program in accordance with any subsequent regulations that may be issued and in the light of changing needs and experience gained as the program progresses; (3) to recommend the disposition of all previously constituted committees, regulations and procedures concerned with recognition of meritorious suggestions and service so that the Department will maintain one clearly defined program on this subject; and (4) to serve as the senior reviewing authority on employee awards.

The initial membership of the Committee, to serve until June 30, 1947, will be the Director of Personnel, Chairman (Theodore F. Wilson); the Budget Officer, Vice Chairman (Willard L. Johnson); Head, Fiscal Service Operation and Methods Staff (Walter F. Frese); Executive Assistant to Assistant Secretary (B. E. Lane Timmons); and Assistant to the Under Secretary (John S. Graham).

The first meeting of the Committee will be called by the Chairman during the month of January 1947.

month of January 1947.

WILLIAM W. PARSONS, Administrative Assistant to the Secretary.

#### Exhibit 41

# Treasury Department orders relating to organization and procedure

TREASURY DEPARTMENT ORDER No. 67, JULY 12, 1946—BUDGET DIVISION

Pursuant to authority vested in me by section 161 of the Revised Statutes (U. S. C., title 5, sec. 22), and to other authority vested in me as Secretary of the Treasury, that part of the Budget Section of the Bureau of Accounts, engaged in the performance of departmental budgetary functions, including the necessary personnel, records, and property, is hereby transferred, effective July 1, 1946, to and made a part of the Office of the Secretary.

Control over and supervision of the Budget Section, hereafter designated as the

Budget Division, shall be in the Budget Officer of the Department.3

John W. Snyder, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 68, JULY 30, 1946—Administrative Assistant to the Secretary

Mr. William W. Parsons, Technical Assistant in the Office of the Secretary, is hereby appointed as Administrative Assistant to the Secretary of the Treasury.

Mr. Parsons will perform all the functions and duties previously assigned to the Administrative Assistant to the Secretary, as set forth in Treasury Department Order No. 59, dated March 3, 1945 (see 1945 annual report, p. 433). In addition, Mr. Parsons will be responsible for the Department's budgetary program. In this connection Treasury Department Order No. 67, dated July 12, 1946, is hereby

<sup>1</sup> See exhibit 41 <sup>2</sup> Effective July 1, 1947 (release June 23, 1947), James H. Hard, II, Director of Personnel, became chairman, and other members did not change.

<sup>3</sup> Amended by Order No. 68.

amended to provide that the Budget Officer shall report directly to the Administrative Assistant to the Secretary.

Mr. Parsons succeeds to the position formerly held by Mr. Paul L. Kelley.

JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 69,4 AUGUST 7, 1946-COMMITTEE ON PRACTICE

Effective from and after this date, the Committee on Practice will report to the General Counsel for the Department of the Treasury.

Treasury Department Order No. 26, dated October 17, 1939, and unnumbered orders, dated June 21, 1943, and August 18, 1943, regarding the supervision of the Committee on Practice are superseded and revoked by this order.

JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 70, August 20, 1946—Monetary Functions

The following duties are hereby assigned to Mr. Andrew N. Overby, who is serving as Special Assistant to the Secretary:

- 1. Supervision of the Division of Monetary Research and Foreign Funds Control.
- 2. Responsibility for all foreign relations affairs of the Treasury Department and to act as liaison between the Treasury and State Department on all such matters.
- 3. Supervision of the operating policies of the exchange stabilization fund.

In performing all of his assignments, Mr. Overby will report directly to the Secretary of the Treasury.

This order supersedes Treasury Department Orders No. 43, dated December

15, 1941, and No. 58, dated January 26, 1945.

JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 71, SEPTEMBER 18, 1946—HEALTH SERVICE PROGRAMS

Public Law 658, approved August 8, 1946, authorizes heads of departments "within the limits of appropriations made available therefor, to establish by contract or otherwise, health service programs which will provide health services for employees under their respective jurisdictions."

I hereby delegate to the Director of Personnel the authority vested in me by Public Law 658.

JOHN W. SNYDER, Secretary of the Treasury.

Treasury Department Order No. 72, October 10, 1946—Delegation of Powers and Authority Relating to Personnel, Advertising, Travel,

By virtue of the authority vested in me as Secretary of the Treasury, and pursuant to the provisions of Public Law 600, 79th Congress, it is hereby ordered

(1) All authority vested in me to take final action on matters pertaining to the employment, direction, and general administration of personnel under the Treasury Department is delegated to the Director of Personnel who reports to me through the Administrative Assistant to the Secretary. Subject to the approval of the Administrative Assistant to the Secretary, the Director of Per-

<sup>4</sup> Revoked by Order No. 76.

sonnel may redelegate this authority to those officials and employees selected by him as being qualified to perform such duties.

2) The authority vested in me by section 3828, Revised Statutes (44 U.S.C. 324), to authorize the publication of advertisements, notices or proposals is hereby

delegated to the Director of Procurement.

(3) All authority vested in me to direct travel and all powers which I am authorized to delegate to a subordinate relating to the performance of travel by officials and employees on official business of the Department are hereby dele-

gated to the Administrative Assistant to the Secretary.

(4) All other authority contained in Public Law 600, 79th Congress, which I am authorized to delegate to a subordinate official, and not covered in subparagraphs (1), (2) and (3), above, is hereby delegated to the Administrative Assistant to the Secretary.

The powers and authority delegated by subparagraphs (3) and (4), above, to the Administrative Assistant to the Secretary may be redelegated by him to

officials and employees of the Department in such manner as he determines best for the efficient operation of the Treasury Department.

The Treasury officials and employees designated by the Administrative Assistant to the Secretary, and by the Director of Personnel with the approval of the Administrative Assistant to the Secretary, are hereby authorized to exercise the

authority redelegated to them under the provisions of this order

JOHN W. SNYDER, Secretary of the Treasury.

Treasury Department Order No. 73, November 19, 1946–Bureau of FEDERAL SUPPLY:

To Heads of Bureaus, Offices and Divisions, Treasury Department:

Effective January 1, 1947, the name of the "Procurement Division" of the Treasury Department will be changed to that of the "Bureau of Federal Supply" and the title of the "Director of Procurement" will be changed to that of the "Director, Bureau of Federal Supply."

Reproduced on the reverse hereof [omitted here] is a copy of the official document filed with the Federal Register making this change of name effective on the

above date.

John W. Snyder, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 74, NOVEMBER 19, 1946-COMMISSIONER OF CUSTOMS

Pursuant to the authority contained in section 12 of Public Law 600, 79th Congress, I hereby delegate to the Commissioner of Customs the authority to authorize the publication of advertisements, notices, or proposals relating to administration of the activities of the Bureau of Customs.

John W. Snyder, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 75, NOVEMBER 27, 1946-TRAVEL EXPENSES

By virtue of the authority vested in me as Secretary of the Treasury, and pursuant to the provisions of section 1 of Public Law 600, 79th Congress, it is

hereby ordered that:
(1) When civilian officials or employees of the Treasury Department in the interest of the Government are transferred from one official station to another, including transfers from another Department, for permanent duty, the following officials of the Treasury Department may authorize, in the order directing the travel, the allowance and payment from Government funds of the expenses of travel of the official or employee, the expenses of transportation of his immediate

family, and the expenses of transportation, packing, crating, temporary storage, drayage, and unpacking of his household goods and personal effects:

Fiscal Assistant Secretary

Administrative Assistant to the Secretary

Director of Personnel

Commissioner of Accounts Commissioner of Customs

Assistant Commissioner of Customs Chief, Office of Personnel, U. S. Coast Guard

Chief, Civilian Personnel Division, U. S. Coast Guard Director, Bureau of Engraving and Printing

Associate Director, Bureau of Engraving and Printing Assistant Director, Bureau of Engraving and Printing Commissioner of Internal Revenue

Director of Procurement
Deputy Director, Administrative Branch, Procurement Division
Commissioner of the Public Debt

Treasurer of the United States

Administrative Assistant to the Treasurer

Comptroller of the Currency <sup>5</sup> Director of the Mint <sup>5</sup>

Commissioner of Narcotics <sup>5</sup> Director, U. S. Savings Bonds Division <sup>5</sup> Chief, U. S. Secret Service Division <sup>5</sup>

(2) The exercise of the authority delegated by subparagraph (1), above, shall be subject to such administrative instructions and procedures as may be prescribed by the Administrative Assistant to the Secretary.

> JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 76, DECEMBER 10, 1946-COMMITTEE ON PRACTICE

Effective immediately, the Committee on Practice is assigned to the supervision of Mr. Edward H. Foley, Jr., Assistant Secretary.

Treasury Department Order No. 69, dated August 7, 1946, is revoked.

Joseph J. O'Connell, Jr., Acting Secretary of the Treasury.

# TREASURY DEPARTMENT ORDER No. 77, DECEMBER 17, 1946-U. S. COAST GUARD

By virtue of the authority vested in me as Secretary of the Treasury and pursuant to the provisions of section 12, of Public Law 600, 79th Congress, I hereby delegate to the Commandant, United States Coast Guard, authority to authorize the publication of advertisements, pertaining to the recruitment of enlisted personnel to serve in the United States Coast Guard, in newspapers, periodicals, through radio stations and other media of commercial publicity. This authority may be exercised during the period January 1, 1947, through June 30, 1947.º

The procedure prescribed by the Procurement Division relative to the placement of orders and audit of vouchers for advertisements should be followed in administering the authority delegated by this order.

JOHN W. SNYDER, Secretary of the Treasury.

Authorization contained in Supplement 1, June 10, 1947, to Order No. 75.
 Extended to January 1, 1948, by Supplement 1, June 30, 1947, to Order No. 77.

TREASURY DEPARTMENT ORDER No. 78, DECEMBER 17, 1946—CONTRACT SETTLE-MENTS, ETC.

Supervision over the following, which were transferred to the Treasury Department under the provisions of Executive Order 9809, is hereby assigned to the General Counsel for the Department of the Treasury: <sup>7</sup>

(1) The functions of the Office of Contract Settlement;

(2) The Appeal Board established under section 13 (d) of the Contract Settlement Act of 1944; and

(3) The Contract Settlement Advisory Board created by section 5 of the Contract Settlement Act of 1944.

JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 79, JANUARY 14, 1947, 8—AWARDS FOR MERITORIOUS SERVICE

By virtue of the authority vested in me as Secretary of the Treasury by section 161 of the Revised Statutes, Executive Order 9817 of December 31, 1946, and all other provisions of law, I hereby delegate to the Administrative Assistant to the Secretary the authority set forth in section 14 of Public Law 600, 79th Congress.

The purpose of this delegation is to facilitate the prompt and equitable recognition of meritorious suggestions and exceptional or meritorious service by civilian officers and employees of the Treasury Department. Therefore, the Administrative Assistant to the Secretary is expressly directed to enlist all necessary facilities of the Department in the accomplishment of this objective and to the end that the Government and the Department shall receive the maximum in improved economy and efficiency as the result of the award program.

JOHN W. SNYDER, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 80, JANUARY 21, 1947—BUREAU OF FEDERAL SUPPLY

By virtue of the authority contained in section 1 of Public Law 657, 79th Congress, Second Session, an act "To authorize relief in certain cases where work, supplies or services have been furnished for the Government under contracts during the war," approved August 7, 1946, I hereby designate, effective immediately, the Director, Bureau of Federal Supply, as the central authority of the Treasury Department to make and approve settlement of claims in each case as authorized in said act. Furthermore, I hereby delegate to said Director, Bureau of Federal Supply, the performance of all functions, powers, and duties of the Treasury Department incident to the administration of said act.

E. H. Foley, Jr., Acting Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 81, FEBRUARY 14, 1947—COMMITTEE ON PRINTING AND PUBLICATION

By virtue of the authority vested in me as Secretary of the Treasury by section 161 of the Revised Statutes, Executive Order 397 of January 20, 1906, and all other provisions of law, I hereby establish in the Treasury Department a Committee on Printing and Publication.

In the interest of further economy and efficiency, the Committee shall exercise general supervision over all printing and binding originating in and procured for use by the Treasury Department. The Committee shall approve all regulations governing or affecting the general printing policies of the Department.

The Committee shall consist of the Administrative Assistant to the Secretary,

The Committee shall consist of the Administrative Assistant to the Secretary, or his alternate, as Chairman; the Director, Bureau of Federal Supply, or his alternate; and one other member to be appointed by the Chairman.

John W. Snyder, Secretary of the Treasury.

<sup>&</sup>lt;sup>7</sup> See Order No. 84. <sup>8</sup> See also exhibit 40.

TREASURY DEPARTMENT ORDER No. 82, APRIL 17, 1947—RULES TO GOVERN LOYALTY PROCEDURES

Rule 1. Scope of rules.—These rules shall govern the removal on loyalty grounds of every civilian officer or employee (hereinafter referred to as "employee"). of the Treasury Department, irrespective of tenure, or of manner, method, or

nature of appointment.

RULE 2. Establishment of Board.—A Loyalty Board is hereby established in the Treasury Department, pursuant to the provisions of Executive Order 9835. It shall be the duty of the Board to assist the Secretary, in accordance with these rules, in fulfilling his responsibilities with respect to employee loyalty under provisions of section 9A of the Hatch Act, 53 Stat. 1148, as amended (18 U. S. C. 61i); the several appropriation acts relating to the Treasury Department; Executive Order 19835. tive Order 9835; and the Civil Service laws and regulations.

RULE 3. Composition of Board.9—(a) Unless otherwise specified for a particular case, the Loyalty Board shall be composed of the Administrative Assistant to the Secretary, an Assistant General Counsel, and one other member, each to be designated by the Secretary. The Secretary will also designate an alternate for each member who may serve in his principal's place when necessary. The Administrative Assistant to the Secretary or his alternate shall serve as Chairman.

(b) Whenever he deems it necessary or expedient, the Secretary will designate the membership of the Board and alternates from among any other employees of the Treasury Department, and he will designate one of the members to act as

Chairman.

(c) Unless otherwise directed by the Secretary, the Board will meet in Washington, D. C. Whenever he deems it necessary or expedient, the Secretary will direct the Board to meet at such other place or places as he may select.

Rule 4. Standards for loyalty.—(a) The standard for removal from employ-

ment in the Treasury Department on grounds relating to loyalty shall be the standard prescribed by Executive Order 9835, which is that, on all the evidence, reasonable grounds exist for belief that the employee involved is disloyal to the Government of the United States.

(b) As specified in Executive Order 9835, activities and associations of an employee which may be considered in connection with the determination of dis-

loyalty may include one or more of the following:

1. Sabotage, espionage or attempts or preparations therefor, or knowingly associating with spies or saboteurs;

Treason or sedition or advocacy thereof;
 Advocacy of revolution or force or violence to alter the constitutional

form of government of the United States;

4. Intentional, unauthorized disclosure to any person, under circumstances which may indicate disloyalty to the United States, of documents or information of a confidential or nonpublic character obtained by the person making the disclosure as a result of his employment by the Government of the United States;

5. Performing or attempting to perform his duties, or otherwise acting, so as to serve the interests of another government in preference to the interests of the

United States;

6. Membership in, affiliation with or sympathetic association with any foreign or domestic organization, association, movement, group or combination of persons, designated by the Attorney General as totalitarian, Fascist, Communist, or subversive, or as having adopted a policy of advocating or approving the commission of acts of force or violence to deny other persons their rights under the Constitution of the United States, or as seeking to after the form of government of the United

States by unconstitutional means.

Rule 5. Initiation of action.—(a) Whenever the head of a bureau or office receives derogatory information with respect to the loyalty of any employee, he shall advise the Administrative Assistant to the Secretary of that fact and shall transmit to him the derogatory information. The Administrative Assistant to the Secretary in turn shall transmit such information to the General Counsel. The Administrative Assistant to the Secretary may if he deems it desirable confer with the General Counsel in any case prior to disposition of such case by the General Counsel under paragraph (b) of this rule.

(b) In any case in which the General Counsel is of the opinion that information before him supports charges which, if sustained, would warrant removal on the 47 10 11 11 11 11 11

<sup>9</sup> See Order No. 83.

grounds that there is reasonable cause to believe the employee is disloyal, he shall prepare a statement of charges and deliver it to the employee by registered mail.

(c) The statement of charges shall be in writing, shall be in sufficient detail to enable the employee to prepare a defense, and shall be as complete as security considerations permit.

(d) The statement of charges preferred against an employee shall have attached

thereto a copy of these rules and shall specifically cite Rules 6, 7, 8 (c), and 8 (d).

Rule 6. Right of employee to reply.—(a) The employee shall have the right to reply to the charges in writing within the time specified in the statement of charges by the General Counsel, which shall give the employee reasonable opportunity to prepare a reply and which in no event shall be less than 15 days from the date the statement of charges is received by him as evidenced by the postal return receipt.

(b) Any charge to which an employee does not reply within the time allowed by

these rules shall be deemed to be admitted.

RULE 7. Right of employee to a hearing.—(a) An employee against whom charges have been preferred shall have the right to a hearing before the Loyalty Board, provided he notifies the General Counsel of his desire for a hearing within

the time allowed by these rules for a reply.

(b) In any case in which an employee requests a hearing within the time allowed by these rules, the Chairman of the Board, upon notification thereof by the General Counsel, shall fix a time for the hearing, which shall give the employee reasonable opportunity to prepare for the hearing and in any event shall be not less than 15 days from the day on which the employee is notified, as evidenced by the postal return receipt, of the time of the hearing.

(c) In any case in which an employee against whom charges have been preferred does not request a hearing within the time allowed by these rules, the Board in its

discretion, may or may not hold a hearing to consider the charges.

RULE 8. Conduct of hearings.—(a) Hearings shall be held at the time and place specified by the Board in accordance with these rules, and shall not be open to the public.

(b) The General Counsel shall designate for each case an attorney, who shall

be known as the Hearing Advocate, to present the case against the employee.

(c) An employee who requests a hearing in accordance with these rules may personally appear with or without counsel or a representative of his choice, or his case may be presented by his counsel or representative. In any case in which an employee requests it, the General Counsel, if he deems it appropriate, may appoint an attorney to act as counsel for the employee. In any case in which a hearing is held and the employee does not appear, either in person or through counsel or a representative of his choice, the General Counsel shall appoint an attorney to act as counsel for the employee.

(d) An employee who requests a hearing shall have the right to appear at the hearing with witnesses and present evidence and to cross-examine witnesses

called by the Board or by the Hearing Advocate.

(e) The Board may receive and consider any type of informational matter that in its sound discretion it believes may be helpful to the correct determination of the issues before it.

(f) Testimony of witnesses personally appearing before the Board shall be

under oath.

(g) The Board shall keep a written record of its proceedings, including a

transcript of the testimony of witnesses.

RULE 9. Employees required to testify.—(a) It shall be the duty of every employee, including an employee against whom charges are being considered, whether or not he requested a hearing, to appear before the Board when requested by the Board and to answer any questions which the Board deems relevant.

(b) Refusal or failure by any employee to comply with a request made under Rule 9 (a) shall be deemed to be contumacy and as such shall constitute grounds

for removal under existing procedures.

Rule 10. Action by Board.—(a) Upon completion of a hearing, or after the time allowed by these rules to request a hearing has elapsed and the Board has decided not to hold a hearing, the Board shall deliberate in closed session with only members or their alternates present, shall consider all information available to it, whether or not received at the hearing, and shall prepare a written recommendation for disposition of the case, indicating the basis for such recommendation.

(b) In its recommendation the Board shall state whether, upon all the information before it and in accordance with these rules, reasonable grounds exist for believing that the employee is disloyal to the Government of the United States. RULE 11. Review by General Counsel.—(a) The record in each case, including the recommendation of the Board, shall be transmitted by the Board to the

General Counsel for review.

(b) In any case in which the recommendation of the Board is that the employee be removed, the General Counsel shall notify the employee of that recommendation and its basis and allow him seven days from the receipt of notification in which to file an appeal and written argument.

(c) After the time for filing an appeal has elapsed, or if an appeal has been filed after he has considered it, or if the recommendation of the Board is that the employee not be removed, the General Counsel shall transmit the record to the Secretary with his approval or disapproval and such other comments or recommendations as he may care to make.

RULE 12. Action by Secretary and Loyalty Review Board.—(a) After receiving the entire record in the case, the Secretary will decide whether removal is appropriate, and will notify the employee by registered mail of his decision in the

matter.

(b) If the decision of the Secretary is that the charges are not sustained, the

employee shall be so informed and the case shall be closed.

(c) If the decision of the Secretary is that the employee shall be removed, he shall be immediately suspended without pay pending an appeal to the Loyalty Review Board, Civil Service Commission. An employee shall be allowed 15 days from the receipt of notification of the Secretary's decision, or such time as the Civil Service Commission may provide by regulation, in which to request the Loyalty Review Board to review his case and make advisory recommendations to the Secretary. If within the time allowed by these rules the employee requests a review by the Loyalty Review Board, he shall continue to be suspended but no further action looking toward removal shall be taken until the advisory recommendations of the Loyalty Review Board have been considered by the Secretary. If within the time allowed by these rules the employee does not request a review by the Loyalty Review Board, he shall be removed in accordance with the Secretary's decision.

(d) After consideration of the advisory recommendations of the Lovalty Review Board the Secretary will either direct that the employee be removed or that he be reinstated, and in either case the employee shall be promptly notified

of the Secretary's decision.

JOHN W. SNYDER, Secretary of the Treasury.

# TREASURY DEPARTMENT ORDER No. 83, APRIL 17, 1947—TREASURY DEPARTMENT LOYALTY BOARD

In accordance with Executive Order 9835 and Treasury Order No. 82,1 Mr. William W. Parsons, with Mr. Joseph A. Jordan as his alternate, Mr. Stephen J. Spingarn, with Mr. Norman O. Tietjens as his alternate, and Mr. William T. Heffelfinger, with Mr. B. E. L. Timmon as his alternate, are designated as members of the Treasury Department Loyalty Board. Mr. Malachi L. Harney is designated as Chief Investigator for the Board, and Miss Jane Cullen is designated as Secretary. An attorney designated for each case by the General Counsel shall act as Hearing Advocate.

All officers and employees of the Department are directed to comply with requests of the Board for information and to cooperate with the Board to the

fullest possible extent.

John W. Snyder, Secretary of the Treasury.

TREASURY DEPARTMENT ORDER No. 84, APRIL 25, 1947—DEPUTY DIRECTOR OF CONTRACT SETTLEMENT

Pursuant to Executive Order 9809 of December 12, 1946 and section 4 (d) of the Contract Settlement Act of 1944 (58 Stat. 651; 41 U. S. C. 104), I hereby appoint Thomas J. Lynch as Deputy Director of Contract Settlement, effective May 16, 1947.<sup>11</sup>

JOHN W. SNYDER, Secretary of the Treasury.

<sup>10</sup> See preceding order. 11 See Order No. 78.

TREASURY DEPARTMENT ORDER No. 85, May 5, 1947—Tort Claims

Pursuant to the authority vested in me by section 403 of the Federal Tort Claims Act (Public Law 601, 79th Congress), it is hereby ordered as follows:

(a) The heads of the bureaus, offices, and divisions, out of whose activities the claim arose, are authorized to settle all claims under \$500, except those claims which involve novel or unusual questions of law.

(b) The General Counsel is authorized to settle all claims of \$500, or more, and

those claims under \$500 which involve unusual or novel questions of law.

E. H. Foley, Jr., Acting Secretary of the Treasury.

#### MISCELLANEOUS

### Exhibit 42

Proclamation by the President, April 7, 1947, amending the proclamations of March 6 and March 9, 1933, and the Executive Order of March 10, 1933, to exclude from their scope member banks of the Federal Reserve System

Whereas on March 10, 1933, the President of the United States, in pursuance of the program to permit resumption of banking operations following the Bank Holiday Proclamations No. 2039 of March 6, and No. 2040 of March 9, 1933, respectively, issued Executive Order No. 6073 which, among other things, authorized the Secretary of the Treasury to permit any member bank of the Federal Reserve System and any other banking institution organized under the laws of the United States to perform any or all of their usual banking functions except as otherwise prohibited; and as otherwise prohibited; and

Whereas on December 30, 1933, the President of the United States issued Proclamation No. 2070 which excluded from the scope of the said proclamations of March 6 and March 9, 1933, and the Executive order of March 10, 1933, all banking institutions which were not members of the Federal Reserve System; and Whereas by December 30, 1933, the Secretary of the Treasury had acted upon

all requests for licensing of member banks of the Federal Reserve System; and

Whereas on December 31, 1945, the Secretary of the Treasury issued a General License to transact normal banking business to all banks thereafter authorized to begin business by the Comptroller of the Currency and to all State banks thereafter admitted to membership in the Federal Reserve System, and thereby dispensed with the requirement of an individual license for each new member bank of the Federal Reserve System; and

Whereas it is no longer necessary, or in the interest of Government internal management, for the Secretary of the Treasury to license the transaction of

normal banking business:

Now, therefore, I, Harry S. Truman, President of the United States of America, acting under and by virtue of the authority vested in me by section 5 (b) of the Trading with the Enemy Act of October 6, 1917, 40 Stat. 415, as amended, and section 4 of the act of March 9, 1933, 48 Stat. 2, and by virtue of all other authority vested in me, do hereby, in the interest of the internal management of the Government, proclaim, order, direct, and declare that the said proclamations of March 6 and March 9, 1933, and Executive order of March 10, 1933, as amended, are further amended to exclude from their scope banking institutions which are members of the Federal Reserve System: *Provided, however*, that no banking institution shall pay out any gold coin, gold bullion, or gold certificates, except as authorized by the Secretary of the Treasury, or allow the withdrawal of any currency for hoarding.

This proclamation shall become effective as of March 15, 1947.

In witness whereof, I have hereunto set my hand and caused the seal of the

United States of America to be affixed.

. Done at the City of Washington this seventh day of April in the year of our Lord nineteen hundred and forty-seven, and of the Independence of the United States of America the one hundred and seventy-first. HARRY S. TRUMAN.

By the President: DEAN ACHESON, Acting Secretary of State

### Exhibit 43

# Transfer to the Treasury of excess earnings of the Federal Reserve Banks

The Board of Governors of the Federal Reserve System, under date of April 24,

1947, made the following announcement:
"As a result of operations essential to Government financing during and since the war, and operations required by the needs of business and the public for credit and currency, earnings of the twelve Federal Reserve Banks have been at relatively high levels. On the basis of present estimates, it is expected that net earnings of the Federal Reserve Banks for 1947, after payment of the statutory dividends to member banks, will aggregate more than \$60 million. In view of these facts, and of the fact that at the end of 1946 the surplus of each Federal Reserve Bank was equal to its subscribed capital, the Board has decided to invoke the authority, granted to it under section 16 of the Federal Reserve Act, to levy an interest charge on Federal Reserve notes issued by the Federal Reserve Banks. The purpose of this interest charge is to pay into the Treasury approximately 90 percent of the net earnings of the Federal Reserve Banks for 1947.

"This action will add about \$60 million to the receipts of the Government for this calendar year. The initial payment covering the first quarter of 1947 will

be made on April 24, and will amount to approximately \$15,269,000.

"Section 16, paragraph 4, of the Federal Reserve Act provides that each Pederal Reserve Act provides that each Pederal Reserve Act provides that each Pederal Reserve Act provides the Pederal Re eral Reserve Bank shall pay such rate of interest as may be established by the Board of Governors of the Federal Reserve System on the amount of its outstanding notes less the amount of gold certificates held by the Federal Reserve agent as collateral security. The Board has now decided to establish such rates of interest as will make it possible to transmit to the Treasury approximately 90 percent of the net earnings after dividends of each of the Federal Reserve

Banks for 1947.

"The authority to levy an interest charge on Federal Reserve notes not covered by gold certificates has not been used previously, chiefly because of the existence, prior to 1933, of so-called franchise tax provisions of the law which had a similar effect; that is, of transferring excess earnings of the Reserve Banks to the Treasury. Under these provisions, which were repealed in 1933, each Federal Reserve Bank was required to pay a franchise tax to the Government equal to 90 percent of its net earnings after it had accumulated a surplus equal to its to 90 percent of its net earnings after it had accumulated a surplus equal to its subscribed capital. To the end of 1932, the Federal Reserve Banks had paid franchise taxes to the United States Treasury amounting to \$149 million, and at that time the Federal Reserve Banks had accumulated surplus accounts of \$278 million, as compared with subscribed capital aggregating \$302 million. In the amendment of the Federal Reserve Act, contained in the Banking Act of 1933, providing for the establishment of the Federal Deposit Insurance Corporation, Congress required each Federal Reserve Bank to pay an amount equal to one-balf of its surplus on Inputery 1 1933, as a subscription to the capital stock of half of its surplus on January 1, 1933, as a subscription to the capital stock of the Federal Deposit Insurance Corporation on which no dividends would be paid. These stock subscriptions amounted to \$139 million and reduced the surplus of the Federal Reserve Banks to an equivalent figure, or considerably less than one-half of their subscribed capital. Congress, therefore, eliminated the franchise tax in order to permit the Federal Reserve Banks to restore their surplus accounts from future earnings.

"Net earnings for the next ten years were relatively small, and at the end of 1944 the combined surplus accounts of the Federal Reserve Banks were less than 75 percent of their subscribed capital. During the next two years, however, net earnings increased substantially, due primarily to large holdings of Government securities accumulated through open-market operations. This made possible transfers to surplus accounts which increased the combined surplus of the Federal Reserve Banks to \$439,823,000 at the end of 1946, as compared with substituted of \$1272,650,000

subcribed capital of \$373,660,000

"Under the circumstances, the Board concluded that it would be appropriate for the Federal Reserve Banks to pay to the Treasury the bulk of their net earnings after providing for necessary expenses and the statutory dividend. In effect, this will involve paying currently to the Treasury funds which, under existing law, would otherwise come to it only in the event of liquidation of the Federal Reserve Banks. The Federal Reserve Act still provides that, in case of liquidation of a Federal Reserve Bank, any surplus remaining after the payment of all claims shall be paid to the Treasury. It is expected that the present payments

764788---48--

will be made at quarterly intervals. By invoking its authority under section 16 of the Federal Reserve Act, the Board is able to accomplish the same results as were accomplished by the payment of a franchise tax, i. e., the transfer of excess earnings to the Government. The payments can thus be reflected in current revenues and taken into account in the Government's budget without further

legislation.

"In the event of restoration of a franchise tax by the Congress, the Board would, of course, withdraw the requirement that Federal Reserve Banks pay interest on Federal Reserve notes, as there would be no justification for unitaring both means of accomplishing the same purpose—namely, payment of excess earnings of the Federal Reserve Banks to the Treasury.

"In his Budget Message for 1948 the President recommended that Congress authorize the Federal Deposit Insurance Corporation to repay the \$139 million of capital furnished by the Federal Reserve Banks, and accepted the proposal of the Board of Governors that Congress at the same time authorize the payment of this sum to the Treasury instead of to the Reserve Banks. Similarly, the President in his Budget Message concurred in the Board's further recommendation that Congress release to the Treasury General Fund approximately \$139 million earmarked for payments to the Reserve Banks to enable them to make loans to industry under section 13b of the Federal Reserve Act. Legislation has been introduced in Congress to repeal section 13b and to substitute therefor authority for the Reserve Banks, upon request of any commercial bank, to guarantee in part loans made by such bank to business enterprises. If this legislation be enacted, the Federal Reserve Banks would rely upon their own surplus funds for this purpose, without resort to Government funds."

### Exhibit 44

# An act to amend the Federal Reserve Act, and for other purposes

[Public Law 41, 80th Cong., H. R. 2413]

Be it enacted by the Senate and House of Representatives of the United States of Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 1501 of the Second War Powers Act, 1942, as amended, section 14 (b) of the Federal Reserve Act, as amended (U. S. C., 1940 edition, Supp. V, title 12, sec. 355), is hereby amended by striking out the proviso in such section 14 (b) and inserting in lieu thereof the following: "Provided, That, notwithstanding any other provision of this Act, (1) until July 1, 1950, any bonds, notes, or other obligations which are direct obligations of the United States or which are fully guaranteed by the United States as to principal and interest may be hought and sold without by the United States as to principal and interest may be bought and sold without regard to maturities either in the open market or directly from or to the United States; but all such purchases and sales shall be made in accordance with the provisions of section 12A of this Act and the aggregate amount of such obligations acquired directly from the United States which is held at any one time by the twelve Federal Reserve banks shall not exceed \$5,000,000,000; and (2) after June 30, 1950, any bonds, notes, or other obligations which are direct obligations of the United States or which are fully guaranteed by the United States as to principal and interest may be bought and sold without regard to maturities but only in the open market. The Board of Governors of the Federal Reserve System shall include in their annual report to Congress detailed information with respect to direct purchases and sales from or to the United States under the provisions of the preceding proviso." Approved April 28, 1947.

#### Exhibit 45

Letter of the Postmaster General to the Secretary of the Treasury certifying extraordinary expenditures contributing to the deficiencies of postal revenues for the fiscal year 1947

WASHINGTON, D. C., December 12, 1947.

THE HONORABLE THE SECRETARY OF THE TREASURY.

Dear Mr. Secretary: Pursuant to the provisions of the act of June 9, 1930 (39 U. S. C. 793), embodied in section 260, Postal Laws and Regulations, the amounts set forth below with respect to certain mailings during the fiscal year ended June 30, 1947, as determined under our present system of estimating, are certified to you in order that they may be separately classified on the books of the Treasury Department:

(a) The estimated amount which would have been collected at regular rates of postage on mat ter mailed during the year by officers of the Government (other than those of the Post Office Department) under the penalty privilege, including registry fees:  Postage	
(b) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by:  1. Members of Congress under the franking privilege	
<ul> <li>(c) The estimated amount which would have been collected during the year at regular rates of postage on publications going free in the county.</li> <li>(d) The estimated amount which would have been collected at regular rates of postage on matter mailed free to the blind during the year.</li> <li>(e) The estimated difference between the postage revenue collected during the year on malings of newspapers and periodicals published by and in the interests of religious, educational scientific, philanthropic, agricultural, labor, and fraternal organizations, and that which would have been collected at zone rates of postage.</li> <li>(f) The estimated excess during the year of the cost of aircraft service over the postage revenues derived from air mail.</li> </ul>	731, 787 96, 040 444, 941

It has not been the practice to include in item (f) the total cost of handling and transporting air mail. Under the system of estimating used in prior years the cost of the items considered amounted to \$68,050,000 for the fiscal year 1947. This estimate includes only payments to air carriers, personnel costs at air mail fields, and the extra transportation cost involved in getting mail to and from air mail fields. Preliminary figures for the fiscal year 1947 indicate that the total cost of handling and transporting air mail, as determined by Cost Ascertainment procedure, amounted to \$106,860,000. The combined revenue from foreign and domestic air mail is estimated at \$75,760,000.

Sincerely yours,

J. M. Donaldson, Acting Postmaster General.

# TABLES

263

## EXPLANATION OF BASES USED IN TABLES

Figures in the following tables are shown on various bases, namely: (1) daily Treasury statements, (2) Public Debt accounts, (3) warrants issued, (4) checks

issued, and (5) collections reported by collecting officers.

Daily Treasury statements.—The figures shown in the Daily Statement of the United States Treasury are compiled from the latest daily reports received by the Treasurer of the United States from Government depositaries and Treasury offices holding Government funds. The daily Treasury statement, therefore, is a current report compiled from latest available information, and, by reason of the promptness with which the information is obtained and made public, it has come into general use as reflecting the financial operations of the Government covering a given period and the condition of the Treasury as it is ascertainable from day to day. This is known as "current cash basis" according to daily Treasury statements. The current assets and liabilities of the Treasurer's accounts are also available on this basis. The figures as shown in current daily Treasury statements are the basis for the Budget estimates of receipts and expenditures, public debt, and condition of the Treasury submitted to Congress by the President.

Public Debt accounts.—On account of the distance of some of the Treasury

offices and depositaries from the Treasury, it is obvious that the reports from all offices covering a particular day's transactions cannot be received and assembled in the Treasury at one time without delaying for several days the publication of the daily Treasury statement. It is not practicable to delay the publication of the daily Treasury statement in order to include the latest reports. It is necessary, therefore, in order to exhibit the actual public debt receipts and expenditures for any given fiscal year, to take into consideration those reports covering the transactions toward the end of the fiscal year concerned which have not been received in the Treasury until the succeeding fiscal year, and to eliminate receipts and expenditures relating to the preceding fiscal year. After taking into consideration these reports the revised figures indicate the status of the public debt on the basis

these reports the revised lightes indicate the status of the public debt on the basis of actual transactions during the period under review as reflected by the Public Debt accounts. This is known as "the basis of Public Debt accounts."

Warrants issued (receipts).—Section 305 of the Revised Statutes provides that receipts for all moneys received by the Treasurer of the United States shall be endorsed upon warrants signed by the Secretary of the Treasury, without which warrants, so signed, no acknowledgment for money received into the Public Treasury shall be valid. The issuance of warrants by the Secretary of the Treasury, as provided by law, represents the formal covering of receipts into

the Treasury.

Certificates of deposit covering actual deposits in Treasury offices and depositaries, upon which covering warrants are based, cannot reach the Treasury simultaneously, and for that reason all receipts for a fiscal year cannot be covered into the Treasury by warrants of the Secretary immediately upon the close of that fiscal year. It is necessary to have all certificates of deposit before a statement can be issued showing the total receipts for a particular fiscal year on a

warrant basis. The figures thus compiled and contained in this report are on a warrants issued basis. Table 2 for years prior to 1916 shows receipts on this basis. Warrants issued (expenditures).—The Constitution of the United States provides that no money shall be drawn from the Treasury but in consequence of appropriations made by law. Section 305 of the Revised Statutes requires that the Treasurer of the United States shall disburse the moneys of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States of the Treasurer of the United States o States upon warrants drawn by the Secretary of the Treasury. As the warrants are issued by the Secretary they are charged against the appropriate appropriations provided by law. Some of these warrants do not represent actual payments to claimants, but are merely advances of funds to be placed to the credit of disbursing officers of the Government with the Treasurer of the United States for the payment of Government obligations. The disbursing officer then issues

his check on the Treasurer in payment of such obligations. As far as the appropriation accounts are concerned, the warrants issued and charged thereto constitute expenditures, but it will be observed that such expenditures necessarily

include unexpended balances to the credit of the disbursing officers.

Checks issued (expenditures).—This basis, more than any other, reflects the real expenditures of the Government. Expenditures for a given fiscal year on the basis of checks issued differ from the corresponding figures on the basis of warrants in that the former include expenditures made by disbursing officers from credits granted during the previous fiscal year, and exclude the amount of unexpended balances remaining to their credit at the end of the fiscal year. The basis of checks issued differs from the basis of the daily Treasury statement in that the former includes checks outstanding at the end of the fiscal year, and excludes unpaid checks outstanding at the beginning of the fiscal year. A detailed explanation of the basis of checks issued will be found on page 89 of the Secretary's report for 1927. Table 14 shows expenditures on this basis.

Collections reported by collecting officers (receipts).—Statements showing receipts on a collection basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as collectors of internal revenue and collectors of customs. These reports cover the collections actually made by these officers during the period specified. The collections are then deposited in a designated Government depositary to the credit of the Treasurer of the United States, which depositary renders a report to the Treasurer. The reports of the collecting officers and the depositaries do not, of course, coincide, for the reason that the collecting officers make collections during the last few days of the fiscal year which are not deposited until after the close of the fiscal year. On this account the two reports do not agree. The receipts are reported on a collection basis merely for statistical purposes and to furnish infor-

mation as to detailed sources of revenue. Classification of such items on the basis of deposits has been found to be impracticable and uneconomical. Table 8 shows receipts on a collection basis.

# DESCRIPTION OF ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury from which all expenditures are made. Receipts and expenditures, however, are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. This classification was first shown for the warrants and checks-issued bases and on the daily Treasury statements beginning with the July 1, 1933, issue, in order to conform to the practice of the Bureau of the Budget. In some tables in this report, however, transactions in the three types of accounts are combined for purposes of historical comparison. A brief general explanation of the three classes of accounts is presented below.

General accounts.—The principal sources of general account receipts are income taxes, miscellaneous internal revenue, social security taxes, taxes upon carriers and their employees, and customs duties. In addition, a large number of miscellaneous receipts come under this head, including such items as proceeds of Government-owned securities (except those which are applicable to public debt retirement), sale of surplus and condemned property, Panama Canal tolls, fees (including consular and passport fees), fines, penalties, forfeitures, rentals, royalties, reimbursements, immigration head tax, sale of public land, seigniorage on coinage of subsidiary silver and minor coins, etc. Moneys represented in the general accounts may be withdrawn from the Treasury only in pursuance of appropriations made by Congress. There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) Annual, being those which are available for incurring obligations only during a specified fiscal year; (b) multiple-year, being those which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year), being available for incurring obligations until exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific, being fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite, being indefinite amounts (so much as may be necessary) provided by permanent legislation without annual

action of Congress, such as the indefinite appropriation to cover interest on the

public debt.

A statement of general account receipts and expenditures is, therefore, in the nature of a general operating statement, and gives a picture of the relationship between the general revenues of the Government and the operating expenditures

(including capital outlays and fixed charges) chargeable against them.

Special accounts.—Special account receipts may be generally defined as funds received under special authorizations of law which may be expended only for the particular purposes specified therein. Special account receipts may not be used for the general expenditures of the Government. The more important items of receipts included under this heading, from the standpoint of amounts other than those applicable to the retirement of the public debt are the reclamation fund and receipts under the Mineral Leasing Act under the Department of the Interior, the national forest funds under the Department of Agriculture, war contributions, and deposits for defense aid under lend-lease legislation. There

are many other special account receipts of lesser importance.

Trust accounts.—Trust account receipts represent moneys received by the Government for the benefit of individuals or classes of individuals and are used for purposes specified in the trust. Moneys held in trust, being payable to or for the use of beneficiaries only, are not available for general expenditures of the Government. There are several classes of trust account receipts, the beneficiaries under which may be either individuals or groups of individuals. The accounts may represent (a) moneys received directly from or for account of individuals, as in the case of moneys received from foreign governments or other sources in trust for citizens of the United States or others under the act of February 27, 1896; (b) moneys collected as revenues and held in trust, such as the proceeds of sales of Indian lands which are held as interest-bearing funds for the benefit of. Indian tribes; (c) proceeds of grants from the general accounts of the Treasury in pursuance of treaty or other obligations such as the perpetual trust fund created for the Ute Indians under section 5 of the act of June 15, 1880; (d) deposits, donations, or contributions for specified purposes, such as funds received for the purchase of lands in the national parks; and (e) deposits to be held until appropriate disposition thereof can be made, such as proceeds from the redemption of bonds found and whose owners are unknown.

Checking accounts of Government corporations.—The manner in which certain checking accounts of Government corporations are handled in the daily statement of the Treasury was explained in the announcement appearing on page 347

of the annual report for 1938.

Excess of credits (deduct).

<sup>\*</sup> Excess of credits (deduct).

1. Figures beginning with the fiscal year 1937 through Dec. 31, 1939, include amounts formerly classified as expenditures under transfers to trust accounts, etc., for the old-age reserve account which was thereafter designated as the "Federal old-age and survivors insurance trust fund." Figures for 1940 through 1947 are exclusive of reimbursements from the trust fund to the General Fund for those administrative expenses which are not

roll the trust than to the General rand for those administrative expenses which are not paid directly from the trust fund.

Includes deposits resulting from the renegotiation of war contracts. Information regarding the amount of such deposits is not available on the basis of daily Treasury statements. On the basis of covering warrants such deposits totaled \$558,223,780.23 for 1943; \$2,235,383,011.57 for 1944; \$2,040,925,653.37 for 1945; \$1,062,830,029.06 for 1946; and \$778,954,680.55 for 1947. The foregoing coverings include so-called voluntary returns.

Figures through 1945 have been revised to include "Revolving funds (net)."
 Excludes expenditures by Reconstruction Finance Corporation and its affiliates

which are included under "Government corporations (wholly owned), etc. (net)."

Includes Federal contributions to District of Columbia (United States share) beginning with 1941.

<sup>&</sup>lt;sup>6</sup> Figures in this column were shown in prior reports under Part B, Trust Accounts, etc. Beginning with the issue of the daily Treasury statement for July 1, 1946, such expenditures were included in the total budget expenditures of the Government, and consequently, reflected in the current budget surplus or deficit, as the case may be Revisions have been made in this table to conform to current budgetary practice.

Net war expenditures of the Reconstruction Finance Corporation and affiliates were not classified separately in daily Treasury statements prior to October 1042. The net figure shown for 1943 includes \$2,442,248,130.97 of such war expenditures during the period from October 17, 1942, through June 30, 1943. The figure shown for 1944 includes

from October 17, 1942, through June 30, 1943. The figure shown for 1944 includes \$2,681,633,923.52 of such expenditures; for 1945, \$472,033,180.28; for 1946, \$328.048.675.33; and for 1947, \$137,774,212.02.

Note.—For postal receipts and expenditures, see table 12. Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> From 1789 to 1842 the fiscal year ended Dec. 31; from 1844 to date, on June 30. Figures for 1843 are for a half year, Jan. 1 to June 30.

2 Comprises railroad unemployment insurance contributions, proceeds of Government-owned securities, Panama Canal tolis, etc., proceeds from sales of surplus property (act Oct. 3, 1944), seigniorage, and other miscellaneous. For details of Panama Canal receipts, see table 11.

3 Total receipts are exclusive of net receipts under title VIII of the Social Security Act. Amounts representing appropriations equal to "Social Security taxes-Federal Insurance Contributions Act" collected and desposited under sec. 201 (a) of the Social Security Act Amendments of 1939, less reimbursements to the General Fund for those administrative expenses which are not paid directly from the trust fund, are deducted in the daily Treasury statement from total receipts. Such amounts are reflected under trust account receipts as net appropriations to the Federal old-age and survivors insurance trust fund.

<sup>&</sup>lt;sup>4</sup> Excludes civil expenditures under War and Navy Departments in Washington through 1915. For details of Panama Canal expenditures, see table 11. Complete expenditures for "National defense and related activities" for 1946 and 1947 are shown in table 4.

<sup>5</sup> Includes civil expenditures under War and Navy Departments in Washington, through 1915, and unavailable funds charged off under act of June 3, 1922 (42 Stat. 1592). Figures for 1932 through 1946 have been revised to include expenditures for "Government corporations (wholly owned), etc. (net)." See

<sup>6</sup> Receipts and public debt retirements for 1921 exclude \$4,842,066.45 written off the public debt Dec. 31, 1920. See footnote 2, table 34.
7 Beginning with 1932, tonnage tax has been covered into the Treasury as miscellaneous receipts included in "Other receipts."

<sup>8</sup> Includes deposits resulting from the renegotiation of war contracts. See footnote 2, table 1.

### Detailed tables on receipts and expenditures

Table 3.—Classification of monthly and total receipts, fiscal year 1947 and comparative totals for 1946

[On basis of daily Treasury statements, see p. 265.]

### PART A. BUDGET RECEIPTS

0			Fi	scal year 1947			
Source	July 1946	August 1946	September 1946	October 1946	November 1946	December 1946	January 1947

<sup>•</sup> Counter-entry receipts (deduct).

Represents appropriations equal to "Social security—Employment taxes" collected and deposited as provided under sec. 201 (a) of the Social Security Act Amendments of 1939 less reimbursements to the General Fund for those administrative expenses which are not paid directly from the trust fund. Such net amount is reflected as net appropriations to the Federal old-age and survivors insurance trust fund.

<sup>&</sup>lt;sup>2</sup> See footnote 2, p. 281. <sup>3</sup> Includes deposits resulting from the renegotiation of war contracts. Information regarding the amount of such deposits is not available on the basis of daily Treasury statements. On the basis of covering warrants such deposits totaled \$1,062,830,029.06 for 1946 and \$278,954,680.55 for 1947.

Counter-entry receipts (deduct).
 This item of seigniorage represents the difference between the cost value and the monetary value of silver bullion revalued and held to secure the silver certificates issued on account of silver acquired under the Silver Purchase Act of 1934.

<sup>&</sup>lt;sup>4</sup> Counter entry (deduct) caused by transfer of trust receipts to the classification "Receipts: Surplus property (act Oct. 3, 1944)" as proceeds from sale of vessels by United States Maritime Commission pursuant to provisions of act March 8, 1946.

Table 4.—Classification of monthly and total expenditures, fiscal year 1947 and comparative totals for 1946

[On basis of daily Treasury statements (see p. 265), adjusted to provide uniform classification of expenditures on a basis comparable to that in effect during the fiscal year ended June 30, 1947, including changes as a result of Executive orders involving reorganizations]

a Excess of credits (deduct).

functions were transferred for the purposes of liquidation by December 31, 1946, pursuant to sec. 202, Public Law 492, approved July 8, 1946.

§ Expenditures for "Selective Service (administrative expenses)," separately classified

Expenditures for "Selective Service (administrative expenses)," separately classified in this table are included under the classification "War Department" on page 2 of the Daily Statement of the United States Treasury

Daily Statement of the United States Treasury.

10 Payments of \$17,875,601.67 have been made during the fiscal year 1947 through June 30 by the Agriculture Department (charged as national defense and related activities) to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures of the Commodity Credit Corporation. Similar payments during the fiscal year 1946 amounted to \$956,509,389.28. \$230,388,000 of these payments were repaid by the Commodity Credit Corporation during the fiscal year 1947 through June to lend-lease funds of the Agriculture Department.

Additional expenditures attributable to national defense and related activities, payable from funds which have supplemented regular appropriations of the civil establishment, are included under "I. General" above. Also, with the transition from war to peace, certain war-related expenditures formerly classified as war and defense activities in Daily Statements of the United States Treasury, principally Coast Guard, which was a part of the Navy, and U. S. Employment Service, whose functions were exercised by the War Manpower Commission during the war years, are shown as general expenditures commencing July 1, 1946.

Additional expenditures included in corresponding captions under "I. General" above.
 Administrative expenses in carrying out provisions of act are included under "Other."

<sup>7</sup> Includes expenditures made by Foreign Economic Administration prior to January 1, 1946.
8 Effective September 1, 1946, expenditures of the War Shipping Administration are included with the expenditures of the United States Maritime Commission to which all

b Excess of redemptions (deduct).

1 Under the Labor-Federal Security Appropriation Act, 1947, salaries for the Bureau of Old-Age and Survivors Insurance are payable directly from the Federal old-age and survivors insurance trust fund. Prior to July 1, 1946, such payments were included in general expenditures, under the caption "Federal Security Agency: Social Security Administration: administrative expenses," a corresponding amount being included as a deduction from appropriations to the Federal old-age and survivors insurance trust fund, under the caption "Less reimbursements to General Fund."

Note.—Figures are rounded and will not necessarily add to totals. The figures in this table under the caption "Government corporations (wholly owned), etc. (net)", were formerly classified under "Trust accounts". Commencing with 1947, the net operations of wholly owned Government corporations and other business-type agencies (except sales or redemptions of their obligations in the market) were reclassified in the daily Treasury statement in order to conform to current budgetary practice, and such net operations were included in the total budget expenditures of the Government.

\*Less than \$500,000.

1 Excludes statutory debt retirements.
2 For details see table 4.
3 Includes expenditures under Armed Forces Leave Act of 1946.
4 Effective Sept. 1, 1946, expenditures of the War Shipping Administration are included with the expenditures of the U. S. Maritime Commission.
5 Includes for 1946 and 1947, expenditures of surplus property disposal agencies. For prior years such expenditures are included in "All other" below. Also includes expenditures for United Nations relict and rehabilitation and expenditures under Armed Forces Leave Act of 1946 for Treasury, Coast Guard. See

table 4.

6 Excludes grants to States by War Manpower Commission (U. S. Employment Service) which are stated in "National defense and related activities; Other" above, in the years 1943 through 1946 in the total amount of \$22,144,482.22. Beginning with 1947, these grants are included in "All other".

7 Comprises expenditures of Public Roads Administration, forest roads and trails, Public Buildings Administration, Tennessee Valley Authority, reclamation projects, river and harbor work (including flood control), Public Works Administration, community facilities, and certain expenditures of the Federal Public Housing Authority.

6 Comprises expenditures of Farm Credit Administration, Farmers' Home Administration, Production and Marketing Administration, Rural Electrification Administration, and departmental expenditures of the Department of Agriculture.

9 Comprises expenditures of the Civil Works Administration, Work Projects Administration, National Youth Administration (see footnote 10), and Civilian Conservation Corps.

10 Excludes certain expenditures of the National Youth Administration for 1941 and 1942 shown under "National defense and related activities."

11 Includes departmental expenditures and transfers to trust accounts not otherwise classified. See also

11 Includes departmental expenditures and transfers to trust accounts not otherwise classified. See also

Note.—Figures for 1935 and subsequent years exclude trust fund receipts with the exception noted in footnote 3. Figures are rounded to nearest dollar and will not necessarily add to totals.

1 For figures for 1863 to 1915, see annual report for 1929, p. 419.
2 Separate figures on corporation and individual income and excess profits tax collections not available for the years 1918 to 1924.
3 Includes income tax on Alaska Railroad except in fiscal years 1935, 1936, and 1937, during which time

Includes income tax on Alaska Railroad except in fiscal years 1935, 1936, and 1937, during which time these receipts were considered trust fund receipts.
 Includes munitions manufacturers' tax, 1917, \$27,663,940; and 1918, \$13,296,927.
 Originally schedule A, act of Oct. 22, 1914; now covers issues and transfers of bonds, issues of capital stock, passage tickets, foreign insurance policies, and deeds of conveyance.
 Included under "Stamp taxes—Bonds, etc."
 Includes taxes on sales under act of Oct. 22, 1914, manufacturers', consumers', and dealers' excise taxes under the war revenue and subsequent acts, except soft drink taxes; all taxes paid by manufacturers of and dealers in adulterated and process or renovated butter, mixed flour, and filled cheese; and for 1932 and subsequent years, manufacturers' excise taxes (act of 1932, as amended) except soft drinks.
 Includes tax on transportation of persons beginning in 1942, and tax on transportation of property beginning in 1943 (levied Dec. 1, 1942).

Includes tax on transportation of persons beginning in 1942, and tax on transportation of property beginning in 1943 (levied Dec. 1, 1942).

Includes the occupational taxes imposed under the act of Oct. 22, 1914, on various classes of entertainment proprietors, brokers, and bankers, with subsequent repeals and amendments to include hackney automobiles and boats. Collections for 1933 and 1934 were entirely from pleasure boats.

Includes receipts, in addition to those classed as miscellaneous, as follows: (a) for 1916–33, delinquent taxes collected under repealed laws, except delinquent collections on automobiles for 1929 and 1930, included under "Manufacturers' excise taxes," and on "Capital stock," under which the collections for 1927–30 represent delinquencies; (b) for 1919, 1920, and 1921 receipts which remained unclassified at the time the statistical tables were compiled; (c) internal revenue collected through customs offices for 1921–33; subsequently such receipts are included with "Distilled spirits"; (d) penalties for 1916, \$458,773; 1917, \$871,606; and 1918, \$985,220; after 1918 all penalties are included under the respective taxes to which they relate; (e) for 1933 and subsequent years taxes on jewelry and candy formerly classified as manufacturers' excise taxes, and tax on dividends.

Table 9.—Internal revenue collections, by States, fiscal year 1947 1

Excess of credits (deduct).

1 Relates to old-age insurance benefits. <sup>2</sup> Second Deficiency Appropriation Act, fiscal year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43 pursuant to authorization of Aug. 24, 1937, for making refund to certain States of portions of Federal employees' tax for 1936 collected under the Social Security Act. Also the Railroad Unemployment Insurance Act, approved June 25, 1938, appropriated to the Railroad Unemployment Insurance Administration fund amounts collected or to be collectible with respect to the calendar years 1936, 1937, 1938, and 1939, from carriers subject to the act, under sec. 901 of the Social Security Act.

3 Relates to unemployment insurance benefits.

4 These contributions represent 10 percent of amounts collected under sec. 8 of the Railroad Unemployment Insurance Act, which, in addition to other collections referred to in footnote 2, are appropriated to the Railroad Unemployment Insurance Administration fund for the administrative expenses of the Railroad Retirement Board in administering the act.

3 Includes amounts for administrative expenses raimburged to the Canaral Fund of the Transport and Transport and Tran

Includes amounts for administrative expenses reimbursed to the General Fund of the Treasury under sec. 201 (f) of the Social Security Act, as amended, and, beginning July 1, 1940, also includes expenses for administration of the Wagner-Peyser Act.

administration of the Wagner-Peyser Act.

Includes expenditures from appropriations made specifically for administrative expenses, relating to the Social Security and Railroad Retirement Acts. Does not include administrative expenses payable from other appropriations. The principal agencies in the latter group are the Bureau of Internal Revenue of the Treasury Department and the Public Health Service and the Office of Education of the Federal Security Agency (see also footnote 9).

Under the Labor-Federal Security Appropriation Act, 1947; salaries for the Bureau of Old-Age and Survivors Insurance are payable directly from the Federal old-age and survivors insurance trust fund. Prior to July 1, 1946, such payments were included under this caption with reimbursement therefor from the trust fund to the General Fund of the Treasury.

Includes expenditures under Social Security Act by the Department of Labor through July 31, 1946.

Amounts are net of reimbursement for administrative expenses under sec. 201 (f) of the Social Security.

Amounts are net of reimbursement for administrative expenses under sec. 201 (f) of the Social Security Act, as amended

- Act, as amended.

  10 See explanation in footnotes 2 and 4.

  11 Includes expenditures made directly by the Federal Government beginning Jan. 1, 1942, for the maintenance of public employment offices.

  12 Beginning July 1, 1945, payments previously made under the Social Security Act were discontinued and thereafter made under provisions of the Public Health Service Act of 1944.

  12 Classified as "Executive Office: Office for Emergency Management, War Manpower Commission" through July 31, 1946.

  14 These classifications were effective with the month of January 1940; figures are shown on the basis of checks issued as reported by the Bureau of Internal Revenue.

  15 Includes interest refunded as follows: Employment taxes, \$1,004,099,05; taxes on employers of 8 or more (refunds to others), \$950,091.02; refunds of taxes upon carriers and their employees, \$237,117.11.

<sup>·</sup> Excess of credits (deduct).

Includes expenditures made from specific appropriations for fortifications of the Canal but no expenditures from general appropriations that may have been for this purpose.

1 For details for the fiscal years 1903 through 1920 see anual report for 1944, p. 585.

Excess of credits (deduct).

Beginning with the fiscal year 1924, the amounts in this column include the sums received as dividends on capital stock of the Panama Railroad owned by the United States.

The amounts shown in this column include the payments to the Government of Panama under the treaty of Nov. 18, 1903, of \$250,000 per annum, the first payment being made during the fiscal year 1913, and similar payments continuing each year since that date until 1940, when the amount was increased to \$430,000 per annum, and also includes for 1940 the amount of \$2,580,000 for payments from 1934 to 1939, inclusive, at the rate of \$430,000 per annum pursuant to the treaty of Mar. 2, 1936; but do not include the payment to the Government of Colombia growing out of the construction of the Panama Canal of \$5,000,000 per annum during the fiscal years 1923 to 1927, inclusive, an aggregate sum of \$25,000,000 as provided for under the treaty of Apr. 6, 1914. Includes expenses of civil government, Panama Canal and Canal Zone.

NOTE.—Figures are rounded to nearest dollar and will not necessarily add to totals.

8 Repayment of unexpended portion of prior years' advances.

I For figures from 1789 through 1910, see Secretary's annual report for 1946, p. 419.

Postal expenditures include adjusted losses, etc.—postal funds and expenditures from postal balances, but are exclusive of departmental expenditures in Washington, D. C., to the close of fiscal year 1922, and amounts transferred to the civil service retirement and disability fund, fiscal years 1921 to 1926, inclusive. For 1927 and subsequent years salary deductions are included in "Postal expenditures," the deductions having been paid to and deposited by disbursing clerks for credit of the retirement fund.

See explanation in exhibit 45.

On beet of warrant issend for 1914 and 1915 and as a backet of the retirement.

<sup>&</sup>lt;sup>3</sup> See explanation in exhibit 45.
<sup>4</sup> On basis of warrants issued for 1914 and 1915, and on basis of daily Treasury statements from 1916 to date.
<sup>5</sup> On basis of warrants issued prior to 1922 and on basis of daily Treasury statements for 1922 and thereafter. Represents advances from the General Fund of the Treasury to the Postmaster General to meet deficiencies in the postal revenues. These figures do not include any allowances for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the act of Congress approved June 9, 1930. Excludes amounts transferred to the civil service retirement and disability fund under act of May 22, 1920 (41 Stat. 614), and amendments thereto on account of salary deductions of 2½ percent, as follows: 1921, \$6,519,683.59; 1922, \$7,899,006.28; 1923, \$8,234,081.00; 1924, \$8,679,658.60; 1925, \$10,266,977.00; and 1926, \$10,472,-289.59. See note 2.
Actual advances from General Fund were reduced by repayment of \$5,800,000 from prior year advances.

<sup>6</sup> Actual advances from General Fund were reduced by repayment of \$5,800,000 from prior year advances

which was carried to surplus.

7 Exclusive of General Fund payments from the appropriation "Additional compensation, Postal Service" under authority of the act approved Nov. 8, 1919. in the amounts of \$35,698,400, \$1,374,015, and \$6,700 for 1920, 1921, and 1922, respectively.

Table 13.—Selected receipts and expenditures, fiscal years 1789 through 1947 [On basis of warrants issued from 1789 to 1930, and on basis of checks issued for 1931 and subsequent years, see p. 265]

<sup>&</sup>lt;sup>1</sup> Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

<sup>2</sup> Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this surpose.

Includes amounts received such as war contributions under authority of the Second War Powers Act, deposits of advance payments made by foreign governments to the defense aid special fund for the procurement of defense articles, and transfers from other-than-national-defense-and-related activities appropriations. reduced by transfers to other-than-national-defense-and-related-activities appropriations.

NOTE.—Figures are rounded and will not necessarily add to totals.

Excess of credit (deduct).

Does not include commitments, receipts, and disbursements of the Reconstruction

Finance Corporation and its affiliates.

<sup>2</sup> In many instances funds appropriated during any fiscal year are also available for the succeeding fiscal year. Immediately available funds are shown in the fiscal year for which the appropriation was made. This statement excludes unexpended balances of appropriations on June 30, 1940 (except immediately available funds in fiscal year 1941 appropriations), which were available for expenditure in the fiscal year 1941. Allocations from appropriations made to the President (lend-lease and emergency funds for the President) are shown under the departments or agencies to which allocated.

<sup>3</sup> Contract authorizations have been reduced by later appropriations which were ear-

marked in authorizing acts for this purpose.

4 Excludes \$44,593,500 transferred in the fiscal year 1941 to the Office of the Administrator, National Housing Agency, authorized in act of Oct. 14, 1940. See footnote 9.

\* Excludes expenditures for Selective Service (administrative expenses) reflected separately below.

6 Reflects reductions of lend-lease allocations made in previous years.

7 Reflects reductions of allocations made in previous years.

8 Includes expenditures for Public Roads Administration and public works (commu-

nity facilities) from allocations of the President's emergency funds.

9 Includes an allotment of \$44,593,500 made from the President's emergency fund in the fiscal year 1941 to the War Department, and subsequently transferred and merged

with regular funds of the Office of Administrator, National Housing Agency.

10 In accordance with Public Law 492, approved July 8, 1946, all functions of this agency were transferred, effective Sept. 1, 1946, to the U.S. Maritime Commission, for liqui-

dation by Dec. 31, 1946.

11 Allotments have been made to the following agencies: Agriculture Department, \$1,041,300,000; Federal Loan Agency \$8,464,920,07; Federal Security Agency, \$1,939,-

428.10; Foreign Economic Administration, \$91,763,500; Interior Department, \$6,324,-840.24; Navy Department, \$33,446,497; State Department, \$334,051,080.11; Treasury Department, \$489,399,721.00; U. S. Maritime Commission, \$232,725,748.35; War Assets Administration, \$1,485,054,88; War Department, \$183,238,076; and War Shipping Administration, \$172,482,251,65,

12 Classification changed to reflect expenditures under "National defense and related activities." Prior year expenditures are included under "General" in the daily Treasury

statement.

13 The Office for Emergency Management includes adjustments for the fiscal years 1942 and 1943 to cover expenditures for the Office of Government Reports formerly classified under the caption "Departmental" in the daily Treasury statement, and classified herein as national defense and related activities. Also includes expenditures for the National Youth Administration, Training Within Industry, Apprentice Training Service, and the United States Employment Service, which were transferred by Executive Order 9247, dated Sept. 17, 1942, from the Federal Security Agency to the War Manpower Commission in the Office for Emergency Management. In addition, adjustment is made for the fiscal year 1943 to cover expenditures of the Council of National Defense formerly classified under the caption, "War activities: Other: Other," in the daily Treasury statement.

14 Expenditures relating to "Emergency funds for the President" and "Lend-lease funds" for the fiscal years 1941 and 1942 are reflected under "Other: Executive Office: Other."

18 Reflects allocations to various agencies of amounts appropriated in previous years.

18 Includes unallocated balances of the President's emergency funds amounting to

187,996,585.73 and lend-lease balances amounting to

187,996,585.73 and lend-lease balances amounting to

17 Includes expenditures of the Office for Emergency Management from "Emergency funds for the President" and "Lend-lease funds" for the fiscal years 1941 and 1942.

18 Includes expenditures of the defense aid special fund through the fiscal year 1943; beginning with the fiscal year 1944, expenditures are reflected within the respective

19 For details by fiscal years, see the Secretary's annual report for 1944, p. 600.

Table 18.—Expenditures for national defense and related activities, by departments and agencies, fiscal years 1941 through 1947 and monthly during 1947.

Note.—Figures are rounded and will not necessarily add to totals.

\*Less than \$500,000.

Excess of credits (deduct).

<sup>2</sup> Includes emergency ship construction, beginning March 1941.

<sup>3</sup> Effective September 1, 1946, expenditures of the War Shipping Administration are zeed for FR included with the expenditures of the United States Maritime Commission to which all functions were transferred for the purposes of liquidation by December 31, 1946, pursuant fraser.stloue.sec. 202, Public Law 492, approved July 8, 1946.

4 Includes such war expenditures as those of Commerce, Justice, Interior, Lahor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid special fund through the fiscal year 1943; thereafter such expenditures are reflected within the respective departments.

<sup>3</sup> Payments of \$17,875,601.67 have been made during the fiscal year 1947 through June 30 by the Agriculture Department (charged as national defense and related activities) to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures of the Commodity Credit Corporation. Similar payments during the fiscal year 1946 amounted to \$956,509,389.28. \$230,388,000 of these payments were repaid by the Commodity Credit Corporation during the fiscal year 1947 through June to lend-lease funds of the Agriculture Department.

6 Prior year expenditures are classified as nonwar.

<sup>&</sup>lt;sup>1</sup> Additional expenditures attributable to national defense and related activities payable from funds which have supplemented regular appropriations of the civil establishment; are classified as general expenditures. Also, with the transition from war to peace, certain war-related expenditures formerly classified as war and defense activities in Daily Statements of the United States Treasury, principally Coast Guard, which was a part of the Navy, and U. S. Employment Service, whose functions were exercised by the War Manpower Commission during the war years, are shown as general expenditures commencing July 1, 1946. This table does not include expenditures made from corporate funds for national defense and related activities.

<sup>&#</sup>x27;Includes expenditures under Armed Forces Leave Act of 1946. See table 4.

## PUBLIC DEBT, GUARANTEED OBLIGATIONS, AND CONTINGENT LIABILITIES

### Public debt, guaranteed obligations, and contingent liabilities outstanding

Table 19.—Summary of public debt and guaranteed obligations outstanding June 30, 1947

<sup>1</sup> Sept. 24, 1917, as amended.

<sup>3</sup> June 25, 1910.

Various.

<sup>5</sup> Treasury bills are sold on a discount basis on competitive bidding. The average sale price of these series gives an approximate yield on a bank discount basis

6 Redeemable, at par and accrued interest, to date of payment, at any time upon the death of the owner at the option of the duly constituted representative of the deceased owner's estate, provided entire proceeds of redemption are applied to payments of the Federal estate taxes due from deceased owner's estate.

<sup>7</sup> Amounts issued and retired for Series C to F, inclusive, include accrued discount; amounts outstanding are stated at current redemption values. Amounts issued, retired,

and outstanding for Series G are stated at par value.

8 Deduct. 9 For detailed information and amounts outstanding June 30, 1929, see table 24 in annual report for 1929, p. 456.

10 Includes amounts authorized to be outstanding at present time and amounts issued on deposits including reissues.

11 After deducting amounts officially estimated to have been lost or irrevocably destroved.

12 For summary on basis of daily Treasury statement, see table 19.

### TAX EXEMPTIONS:

Any income derived from Treasury bills, whether interest or gain from their sale or other disposition, does not have any exemption, as such, and loss from the sale or other disposition of any such bills does not have any special treatment, as such, under Federal tax acts now or hereafter enacted. The bills are subject to estate, inheritance, gift, or other excise taxes whether Federal or State, but are exempt from all taxation, now or hereafter imposed on the principal or interest thoreof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which the bills are originally sold by the United States is to be considered to be interest.

b Income derived from these securities is subject to all Federal taxes now or hereafter imposed. The securities are subject to estate, inheritance, gift, or other excise taxes. whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The following is applicable to savings bonds only: For the purposes of taxation any increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at

or before maturity) shall be considered as interest.

 Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorthe aggregate \$5,000 owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. The following is applicable to savings bonds only: For the purposes of determining taxes and tax exemptions the increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

d Exempt from the payment of all taxes or duties of the United States, as well as from all taxation in any form by or under State, municipal, or local authority. (The Supreme Court has held that this exemption does not extend to estate or inheritance taxes imposed by Federal or State authority.)

 Interest on these bonds is subject to all Federal taxes now or hereafter imposed. Principal is exempt from taxation.

These issues being investments of various Government funds and payable only for the account of such funds have no present tax liability.

In hands of foreign holders—Applicable only to securities issued prior to Mar. 1, 1941. -Bonds, notes, and certificates of indebtedness of the United States, shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt, both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

Income derived from these securities is subject to all Federal taxes, now or hereafter imposed. The securities are subject to surtaxes, estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, municipality, or local taxing authority.

4 Represents drafts and invoices as of May 31, 1947, paid by commercial banks for the account of Commodity Credit Corporation. All wool programs have now been converted from 146% to 1% obligations.

verted from 14% to 1%, obligations.

\* The National Housing Act as amended by the National Housing Act Amendments of 1938, approved Feb. 3, 1938, reads in part as follows: "Such debentures as are issued in exchange for property covered by mortgages insured under sec. 203 or sec. 207 prior to the date of enactment of the National Housing Act Amendments of 1938 shall be subject only to such Federal, State, and local taxes as the mortgages in exchange for which they are issued would be subject to in the hands of the bolder of the debentures.

\* \* Such debentures as are issued in exchange for property covered by mortgages insured after the date of enactment of the National Housing Act Amendments of 1938 shall be exempt, both as to principal and interest from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter im posed by the United States, by any Territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority." Under the Public Debt Act of 1941 interest upon and gain from the sale of debentures shall have no exemption under Federal tax acts now or hereafter enacted, except such debentures as may be issued on contracts entered into prior to Mar. 1, 1941.

With reference to the debentures issued prior to Mar. 1, 1941, in the name of the bousing Insurance fund, the National Housing Act Amendments of 1938, approved Feb. 3,
1938, states that 'Such debentures as are issued in exchange for mortgages insured after
the date of enactment of the National Housing Act Amendments of 1938 shall be exempt,
both as to principal and interest, from all taxation (except surtaxes, estate, inheritance,
and gift taxes) now or hereafter imposed by the United States, by any Territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority." Under the Public Debt Act of 1941 interest upon and gain from the sale of debenturesshall have no exemption under Federal tax acts now or hereafter enacted, except such
debentures as may be issued on contracts entered into prior to Mar. 1, 1941.

Redeemable on any interest day or days, on 3 months' notice.
 Funds have been deposited with the Treasurer of the United States for payment of

outstanding matured principal and interest.

4 The amount outstanding on basis of Public Debt accounts is shown in table 19.

## Table 22.—Description of contingent liabilities outstanding June 30, 1947

[On basis of daily Treasury statements, see p. 265]

<sup>1</sup> The faith of the United States is solemnly pledged to the payment of the deposits made in the postal savings depositary offices with accrued interest thereon.

2 Under the Public Debt Act of 1941, income derived from deposits made subsequent to Mar. 1, 1941, is subject to all Federal taxes.

3 Interest payable quarterly from first day of month next following the date of deposit.

4 Figures are as of Mar. 31, 1947. Offset by eash in designated depositary banks amounting to \$5,419,896.46, which is secured by the pledge of collateral as provided in the Regulations of the Postal Savings System, having a face value of \$5,833,450; eash in possession of System amounting to \$175,269,775.99; Government securities with a face

value of \$3,284,256,790 and other net assets of \$12,672,136.37.

\* Figures are as of May 31, 1947. Offset by cash on hand and in depositary banks amounting to \$638,170.87; Government securities with a face value of \$9,850,000; and other assets.

<sup>6</sup> Federal Reserve notes are obligations of the United States and shall be receivable by all national and member banks and Federal Reserve Banks and for all taxes, customs, and other public dues. They are redeemable in lawful money on demand at the Treasury Department, in the city of Washington, District of Columbia, or at any Federal Reserve Bank.

<sup>&</sup>lt;sup>7</sup> In actual circulation, exclusive of \$714,054,126.92 redemption fund deposited in the Treasury and \$584,331,320 of their own Federal Reserve notes held by the issuing banks. The collateral security for Federal Reserve notes issued consists of \$12,133,000,000 in gold certificates and in credits with the Treasurer of the United States payable in gold certificates, \$13,583,097,000 face amount of United States Government securities and \$128,226,000 face amount of commercial paper. Figures are as of May 31, 1947.

r Revised in accordance with Bureau of the Census estimated population for continental United States

<sup>.\*</sup> Revised in accordance with Bureau of the Census estimated population for continental United States as of July 1.

1 Figures for 1853 through 1885, are taken from "Statement of receipts and expenditures of the Government from 1855 to 1855 and principal of public debt from 1791 to 1885," compiled from the official records of the Register's office. From 1886 through 1919 figures are taken from the monthly debt statements and revised figures published in the annual reports of the Secretary of the Treasury. (See table 24, p. 507, in 1942 report). From 1920 to date, figures are taken from the Preliminary Statement of the Public Debt published in the daily Treasury statements.

2 Exclusive of the bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

3 Includes old demand notes; United States notes (gold reserve deducted since 1900); postal currency and fractional currency less the amounts officially estimated to have been destroyed; and also the deposits held by the Treasury for the retirement of Federal Reserve Bank notes, and for national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 were not included in the published debt statements. Does not include gold, silver, or currency certificates, or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

Note.—Gross public debt on basis of daily Treasury statements. Guaranteed obligations from 1934 through 1939 on basis of Public Debt accounts, and for 1940 and subsequent years on basis of daily Treasury statements. Figures, except per capita, are rounded to nearest dollar and will not necessarily add to

year.

<sup>. &</sup>lt;sup>1</sup>.Consists of obligations issued by certain Government corporations and credit agencies, obligations which are guaranteed by the United States as to both principal and interest. They were first authorized in 1932, but no such obligations were outstanding at the end of the fiscal years 1932 and 1933. Excludes guaranteed obligations held by the Treasury.

<sup>2</sup> Based on Bureau of the Census estimated population for continental United States as of July 1 of each

<sup>&</sup>lt;sup>1</sup> Amounts issued and redeemed for Series A to F bonds include issue price plus accrued discount; amounts outstanding are stated at current redemption value. Amounts issued, retired, and outstanding for Series G bonds are stated at par value.

<sup>2</sup> Deduct.

<sup>&</sup>lt;sup>3</sup> Interest compounded.
<sup>4</sup> Represents issues in which there were no transactions during the fiscal years 1930 to 1947; for amount of each issue outstanding (unchanged since June 30, 1929), see annual report for 1929, p. 478.

<sup>1</sup> On basis of daily Treasury statements, supplemented by special statements on public debt issues, redemptions, and exchanges by the Bureau of the Public Debt.

2 For Treasury bills, average rates on a bank discount basis are shown; for United States savings bonds, the approximate yield to maturity is shown.

3 For United States savings bonds of Series B to F not currently on sale amounts represent accrued discount plus issue price of bonds in adjustment cases; for Series E and F currently on sale amounts represent issue price plus accrued discount; and for Series G amounts represent issue price at par.

4 For United States savings bonds of Series B to F amounts represent current redemption value (issue price plus accrued discount); and for Series G amounts represent redemption value at par.

5 Includes securities of certain issue months which have matured.

6 Deduct. Represents excess of amounts transferred from unclassified sales and redemptions to sales and redemptions of a designated series over amounts received as unclassified sales and redemptions.

7 Deduct.

Deduct.

NOTE.—Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>&</sup>lt;sup>1</sup> Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the daily Treasury statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information, such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the daily Treasury statement.

<sup>&</sup>lt;sup>2</sup> Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and also small amounts of unclassified Series F and G redemptions in June 1947.

<sup>3</sup> Not issued after Apr. 30, 1941. Figures after that date represent accrued discount on outstanding bonds and adjustments.

<sup>4</sup> Series G is stated at par.

<sup>5</sup> Series A bonds began to mature in March 1945, Series B bonds in January 1946, and Series C-1937 bonds in January 1947.

TABLE 39.—Summary of sales and redemptions of United States savings bonds, by series, fiscal years 1935 through 1947 and monthly during 1947 [Dollars in millions. On basis of daily Treasury statements, see p. 265]

Note.—Figures are rounded and will not necessarily add to totals. Details by months beginning May 1935 will be found in the annual report for 1943, p. 604; and in corresponding tables in subsequent reports.

investors. It is estimated that such purchases aggregated about \$300,000,000 from March 1935 through March 1940. During the calendar year 1941 commercial banks were permitted to purchase limited amounts of Series F and G bonds for investment of savings deposits (for details as to limitations, see pp. 44 and 47 of the 1944 annual report); and they were again permitted to make such purchases from June 18 through June 30, 1945 (see pp. 50 and 51 of the 1945 report) and from Dec. 3 through Dec. 8, 1945 (see p. 38 of the 1946

report).
Estimated, except for Series G.

<sup>\*</sup> Less than \$50,000. <sup>1</sup> Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified Series F and G re-

demptions in June 1947. 2 Series A bonds began to mature in March 1935, Series B bonds in January 1946, and Series C-1937 bonds in January 1947. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when the balance outstanding is transferred to matured debt on which interest has ceased. Amounts outstanding are at current redemption values, except Series G bonds, which are stated at par. Unclassified bonds shown in the daily Treasury statement have been classified by series.

3 Includes sales to commercial banks. From Mar. 1, 1935, through Mar. 31, 1940, commercial banks were permitted to nuclease sayings bonds on the same terms as other

commercial banks were permitted to purchase savings bonds on the same terms as other

Estimated. Figures represent increment in value.
 Estimated. Figures represent increment in value.
 Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and O. These amounts are substantially less than the sales reported as unclassified in the daily Treasury statement. The greator part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947 it was possible to distribute by series all sales reported as unclassified in the daily Treasury statement.

Table 40.—Sales of United States savings bonds of Series E, Series F, and Series G, by denominations, fiscal years 1941 through 1947 and monthly during 1947

NOTE.—Figures are rounded and will not necessarily add to totals. Details of amounts of sales by months beginning May 1941 will be found in the 1943 annual report, p. 611, and in corresponding tables in subsequent reports.

Sale of \$10 denomination Series E bonds was authorized beginning June 1944 for sale to the armed forces

only.

<sup>2</sup> Sale of \$200 denomination Series E bonds began in October 1945.

<sup>3</sup> Sale of \$25 denomination Series F bonds was authorized in December 1941.

Table 41.—Number of Series E, F, and G savings bonds redeemed, by denominations, fiscal years 1941 through 1947

Note.—Figures are rounded and will not necessarily add to totals. Sales by months from May 1941 through June 1946, by fiscal years and by calendar years, will be found in the 1943 annual report, pp. 614 and 618, and in corresponding tables in subsequent reports. Redemptions, by months, during 1946, the calendar year 1945, and the fiscal year 1946 will be found in the 1946 annual report, p. 532. Data on redemptions by States are not available prior to October 1944. Sales and redemptions, by months, for subsequent periods may be found at intervals in the *Treasury Bulletin*.

Table 43.—Percent of savings bonds sold in each year redeemed through each yearly period thereafter, by denominations

 $<sup>^{</sup>ullet}$ Less than \$500.

<sup>\*</sup>Less than \$500.

1 State redemption figures are not necessarily comparable with State sales data, inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the redemptions in this table are based on current redemption values, whereas sales are shown at issue price.

2 Includes sales through March 1947.

3 State figures exclude sales of Series F and G bonds to commercial banks. Commercial banks were permitted to purchase these bonds under certain conditions (see footnote 3, table 39).

Note.—The percentages shown in this table are the proportions of the value of the bonds sold in any calendar year which are redeemed before July 1 of the next calendar year and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value. The average percentages shown above are simple averages of the percentages for the applicable annual series.

June 1, 1944, is the earliest issue date for bonds of the \$10 denomination.
 Oct. 1, 1945, is the earliest issue date for bonds of the \$200 denomination.
 Series G savings bonds are not available in denominations of \$25.

### United States saving stamps

Table 44.—Summary of sales and redemptions of United States savings stamps, fiscal years 1941 through 1947 1

[In thousands of dollars. On basis of daily Treasury statements and reports of Post Office Department]

,				Redemptions					
Fiscal year	Amount out- standing end of fiscal year or month	Net change during fiscal year or month	Sales	Total	Exchanged for United States sav- ings bonds (estimated)	Cash (estimated)			
1941	5, 294 166, 341 213, 350 196, 518 177, 598 95, 976 69, 930	+5, 143 +161, 048 4 5 +45, 620 -16, 832 -18, 920 -81, 622 -26, 046	6, 087 308, 621 590, 268 408, 930 268, 411 109, 852 26, 386	943 147, 574 544, 647 425, 762 287, 331 191, 474 52, 432	(2) (2) 127, 948 474, 168 352, 632 231, 593 130, 422 28, 130	(2) (2) 3 18, 468 3 70, 480 73, 130 55, 738 61, 052 24, 303			

Note.—Figures are rounded and will not necessarily add to totals. Details by months from May 1941 through June 1946 will be found in the 1943 annual report, p. 631, and in corresponding tables in subsequent reports.

Table 45.—Sales of United States savings stamps, by denominations, fiscal years 1941 through 1947 1

[On basis of daily Treasury statements and data from Post Office Department]

	Sales in thousands of dollars

-Figures are rounded and will not necessarily add to totals. Details by months from May 1941 through June 1946 will be found in the 1943 annual report, p. 632, and in corresponding tables in subsequent reports.

<sup>&</sup>lt;sup>1</sup> Sales and redemptions of stamps commenced May 1, 1941, when the special defense series of postal savings stamps went on sale; the amount of old series outstanding on Apr. 30, 1941, was \$150 thousand. Both series were obligations of the Postal Savings System. Beginning Oct. 1, 1942, the special series of postal savings stamps was replaced by a Treasury issue of United States war savings stamps, and all outstanding stamps became public debt obligations. The change to the daily Treasury statement basis was made in November 1002.

became public deut conganication.

ber 1942.

2 Details not available for May, June, and July 1941.

3 Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousand for the period Aug. 1, 1941, through June 30, 1942, and \$55 thousand for the period July 1, 1942, through Oct. 31, 1942.

4 Net of sales less redemptions. See footnote 1.

5 Excludes amounts transferred from the Postal Savings System to the Treasury to cover outstanding terms.

<sup>1</sup> See footnote 1, table 44.

All series originally issued as "Treasury notes—tax series". However, designation of Series E was changed to "Treasury savings notes, Series C" on June 23, 1943. For a description of all series, see p. 533 of the 1943 annual report and p. 340 of this report. Details by months of sales and redemptions beginning August 1941 will be found in the 1943 annual report, pp. 638 and 640, and in corresponding tables in subsequent reports.

# Interest on the public debt and guaranteed obligations

Table 47.—Interest on the public debt, payable, paid, and outstanding unpaid fiscal year 1947

For monthly data back to June 30, 1916, see annual reports for 1929, p. 509; for 1936, p. 442; and correspond-

1 For monthly data back to June 30, 1916, see annual reports for 1929, p. 509; for 1930, p. 442; and corresponding tables in subsequent reports.

2 The interest-bearing debt includes discount on Treasury bills from June 30, 1930, the amount being deducted from the interest-bearing debt before calculation of the average interest rate. Savings bonds of Series A-F are included in interest-bearing debt at their current redemption value from March 1935. Treasury tax and savings notes, beginning August 1941, are included at face amount. The face value of savings bonds and tax and savings notes of any yearly series maturing from month to month which are not currently presented for retirement are shown as interest-bearing debt until all the bonds or notes of the series have matured. Thereafter, the total amount outstanding is shown as matured debt upon which interest has ceased. In computing the average rate of interest the rates used for both savings bonds and tax and savings and tax and savings are rate of interest the rates used for both savings bonds and tax and savings ceased. In computing the average rate of interest, the rates used for both savings bonds and tax and savings notes are based upon the annual yield on such obligations if held to maturity.

Note.—The amount of interest paid includes the increase in the redemption value of United States savings bonds during the year and the discount on unmatured issues of Treasury bills. Interest paid on guaranteed issues does not include amounts paid on Tennessee Valley Authority bonds "issued on the credit of the United States" and amounts paid on demand obligations of the Commodity Credit Corporation.

<sup>&</sup>lt;sup>1</sup> Interest paid began with the fiscal year 1934.

¹ For bonds selling above par and callable at par before maturity, the yields are computed on the basis of redemption at first call date; while for bonds selling below par, yields are computed to maturity. Monthly averages are averages of daily figures. Each daily figure is an unweighted average of the yields of the individual issues. Prior to Sept. 1, 1941, yields were computed on the basis of the day's closing price on the New York Stock Exchange except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Stock Exchange. Commencing Sept. 1, 1941, yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market. For average yields by months from January 1919 through December 1929, see p. 662 of the annual report for 1943. ¹ From July 17, 1928, through Nov. 29, 1935, yields are based on all outstanding partially tax-exempt Treasury bonds neither due nor callable for 15 years. This index was discontinued as of Dec. 15, 1945, because there were no longer any bonds of this classification due or callable in 15 or more years.

due or callable in 15 or more years.

3 Average of all taxable Treasury bonds neither due nor callable for 15 years. Taxable bonds are those on which the interest is subject to both the normal and surtax rates of the Federal income tax. This average

commenced Oct. 20, 1941.

¹ Prices on June 28, 1946, and June 30, 1947, are closing bid and ask quotations in the over-the-counter market as compiled by the Federal Reserve Bank of New York. Prices in the range columns are mean of closing bid and ask quotations in the over-the-counter market except that Treasury bond prices prior to Oct. 1, 1939, are closes on the New York Stock Exchange. "When issued" prices are included in price range beginning Oct. 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates. Yields are percent per annum. For a description of each issue outstanding on June 30, 1947, and the amount outstanding, see table 20. For a description of each issue outstanding on June 28,

1946, and the amount outstanding, see table 22, p. 438, in the annual report of the Secretary for 1946. Treasury bills are excluded.

2 Called on June 13, 1947, for redemption on Oct. 15, 1947.

3 No market quotations for postal savings bonds.

4 Quoted on a yield basis from June 16 through June 30, 1947; price history ends June 13,

- 1947.
- 5 Quoted on a yield basis.
  6 Not quoted.

<sup>1</sup> Payments of governments which have funded were made prior to the date of the

<sup>2</sup> Increase over amount funded due to exercise of options with respect to the payment of interest due on original issue of bonds of debtor governments.

<sup>3</sup> The German Government has been notified that the Government of the United States will look to the German Government for the discharge of this indebtedness of the Government of Austria to the Government of the United States.

Includes additional bonds aggregating \$3,489,482.75 received July 23, 1937, in exchange for bonds aggregating \$1,207,742 and annuities aggregating \$49,5446, payable on Jan. 1, 1933, 1934, and 1935, but postponed as provided by agreements of May 8, 1930, and Sept.

<sup>5</sup> The United States held obligations in the principal amount of \$289,898.78, which, together with accrued interest thereon, were canceled on Oct. 6, 1939, pursuant to agreement of Apr. 14, 1938, between the United States and the Republic of Nicaragua, ratified by the United States Senate on June 13, 1938.

6 Does not include payment of \$100,000 by Rumanian Government on June 15, 1940, which was made as "a token of its good faith and of its real desire to reach a new agreement covering" Rumania's indebtedness to the United States.

7 Represents proceeds of liquidation of financial affairs of the Russian Government in this country. (Copies of letter dated May 23, 1922, from the Secretary of State and of reply of the Secretary of the Treasury dated June 2, 1922, in regard to loans to the Russian Government and liquidation of affairs of the latter in this country appear in the Annual Report of the Secretary of the Treasury for 1922, as exhibit 79, p. 283, and in the combined annual reports of the World War Foreign Debt Commission as exhibit 2, p. 84.)

§ Includes balances of amounts postponed under provisions of joint resolution of Dec. 23, 1931. (For amounts postponed see the annual report of the Secretary of the Treasury for 1932, p. 35.)

for 1932, p. 35.)

<sup>3</sup> 6, 876, , 225, 854,		

<sup>1</sup> Under Public Law 411, approved Jan. 24, 1942, it was provided that after June 30, 1942, there would be deducted and withheld from the basic salary, pay, or compensation of any officer or employee to whom the Civil Service Retirement Act applies a sum equal to 5 per centum of such officer's or employee's basic salary, pay, or compensation in lieu of the 3½ per centum deduction previously in effect.

2 Comprises \$220,100,000.00 appropriated from the General Fund to cover the liability of the United States and \$1,193,000.00 appropriated from the revenues of the District of Columbia to cover its liability in connection with the financing of the fund.

3 Excludes \$4,623,924.50 representing July prior deposits appropriated as of June 30, 1946, and also excludes June 1946 transfer-counter warrants (net) of \$2,503,061.39.

4 Excludes \$3,217.157.62 representing July prior deposits appropriated as of June 30, 1947, and includes July prior transfer-counter warrants (net) of \$440,020.68. Also excludes adjustment of \$6,999.44 to be made by Treasurer's Office in fiscal year 1948.

Table 65.—District of Columbia teachers' retirement and annuity fund—Assets held by the Treasury Department, June 30, 1947

[Public Law 624, approved Aug. 7, 1946 (60 Stat. 875), created this fund as successor to the District of Columbia teachers' retirement fund established under the act of Jan. 15, 1920, as amended, effecting the consolidation of the deductions fund and the Government reserve fund as of July 1, 1946]

Revised.

Does not include 50 shares of Bowden Wire, Ltd., par value £1 per share, and 30 shares of Syndicat Francois des Brevets E. M. Bowden, Ltd., par value £1 per share, held for Pennell donation. Also does not include securities held as investments for Huntington donation under deed of trust dated Nov. 17, 1936, administered by designated trustees, including Bank of New York.

Upon sale of premises, one-half of proceeds to go to Library of Congress Trust Fund Board and one-half to the Smithsonian Institution. This property was sold during the fiscal year.

Includes income under deed of trust dated Nov. 17, 1936, administered by designated trustees, including Bank of New York.

Table 73.—Relief and rehabilitation, Longshoremen's and Harbor Workers' Compensation Act, as amended—Assets held by the Treasury Department, June 30, 1947 <sup>1</sup>

[This trust fund was established in accordance with the provisions of the act of Mar. 4, 1927 (44 Stat. 1444).

NOTE.—Prior to fiscal year 1945, valuation reserves were reported as "other liabilities" rather than suspended credits to the respective asset accounts.

<sup>&</sup>lt;sup>1</sup> Includes \$1,250,000,000 temporary borrowings by Commodity Credit Corporation from Secretary of the Treasury.

<sup>2</sup> Revised to include losns made by Secretary of the Treasury.

<sup>3</sup> Included in "land, structures, and equipment" classification.

<sup>4</sup> Revised to include stock of banks for cooperatives owned by Farm Credit Adminis-

tration.

<sup>&</sup>lt;sup>5</sup> Contra interagency assets and liabilities included for those agencies not reporting in the statement prior to fiscal year 1945.

<sup>5</sup> Decrease from fiscal year 1945 caused in part by elimination of interagency assets and liabilities of merged R. F. C. affiliates effective July 1, 1945, and establishment of valuation and depreciation reserves.

<sup>7</sup> Represents only accrued interest; other accrued liabilities included in "other liabilities."

<sup>8</sup> Included in "other liabilities."

NOTE.—Figures are rounded and will not necessarily add to totals. Negative figures are shown in italics.

Less than \$50 thousand.

<sup>1</sup> Figures represent activities under U. S. Housing Act, as amended. War housing and other operations of the Authority are reflected in the classification "Other" in "Certain business-type activities."

business-type activities."

2 Excludes unexpended balances of appropriated funds.

3 The reserve for losses on loans receivable includes other loss reserves for report purposes only as distribution cannot be effected to other similar assets to which they apply.

4 Loan commitments amount to \$315.1 million against which advances of \$276.7 million have been made, leaving commitments to purchase loans of \$38.4 million.

5 Includes \$244.0 million advanced on 1947 sugar crop under the Cuban Raw Sugar

Agreements.

6 Includes notes for short-term borrowings.

<sup>7</sup> Represents guaranteed obligations arising from drafts and invoices paid by commercial banks. This amount does not agree with that published in the Aug. 1, 1947, daily Treasury statement because of amended report.

\*Public Law 363, approved Aug. 5, 1947, provides for cancellation of capital stock and repayment for all stock to be made to the U. S. Treasury in units of \$10 million without reducing net worth below \$1,000 million. Repayment for all stock subscribed by Federal Reserve Banks, \$139.3 million and part repayment of \$7.4 million for stock subscribed by Secretary of the Treasury was made on Sept. 8, 1947.

\*Pursuant to Public Law 519, approved July 20, 1946, and Public Law 76, approved May 26, 1947, the Secretary of the Treasury canceled notes in the amount of \$921.5 million and \$641.8 million respectively for restoration of capital impairment.

10 The surplus is not available by law for dividend distribution and is considered by the corporation as a reserve for future deposit insurance losses and related expenses with

the corporation as a reserve for future deposit insurance losses and related expenses with respect to insured banks.

11 The surplus is considered by the corporation as available for future insurance losses and related expenses with respect to insured institutions.

12 Includes \$0.1 million deposits to "Guaranty Fund."

13 Represents Reconstruction Finance Corp., Home Owners' Loan Corp., Inland Waterways Corp., and Agricultural Marketing Act revolving fund proprietary interests in Government corporations.

Footnotes through 13 on p. 465. 14 Consists of Defense Homes Corp., Department of State Inter-American corporations, Federal Crop Insurance Corp., Federal National Mortgage Association, Federal Prison Industries, Inc., Inland Waterways Corp., Panama Railroad Company, RFC Mortgage Company, Regional Agricultural Credit. Corp. of Washington, D. C., Smaller War Plants Corp., U. S. Commercial Co., U. S. Spruce Production Corp., Virgin Islands Company, Warrior River Terminal Company, Inc., and Tennessee

Valley Associated Cooperatives, Inc.

18 Created pursuant to Public Law 731, approved Aug. 14, 1946, and as of Nov. 1, 1946, acquired the assets and liabilities of Emergency Crop and Feed Loan Section and Farm

Security Administration. 16 Consists of Bureau of Community Facilities and Public Works Administration.
 17 Figures are as of Mar. 31, 1947, for U. S. Maritime Commission functions and lend-lease and UNRRA activities of the War Shipping Administration functions. The balance of War Shipping Administration functions is as of Feb. 28, 1947. Figures as of June 30, 1947, will not be available until the calendar year 1948.

18 Consists of Agricultural Marketing Act revolving fund; Federal Public Housing Authority-homes conversion program, Farm Security Administration program, public war housing program, and veterans' re-use housing program; Federal Security Agency, loans to students; Indian loans; Navy Department, guaranteed loans (World War II).

and sale of surplus supplies (World War I); Puerto Rico Reconstruction Administration; Treasury Department, miscellaneous loans and certain other assets; War Department, guaranteed loans (World War II); and Veterans' Canteen Service created pursuant to

Public Law 636, approved Aug. 7, 1946.

19 For details, see footnote 2, table 21. 20 Includes \$1,382.3 million contributions by sponsors under canceled reimbursement

agreements, and donated assets.

21 Excludes the value of vessels and other expenses transferred to the War Shipping Administration for which no transfer of funds was required, under the authority of Executive Order 9054, dated Feb. 7, 1942, and War Shipping Administrator's order No. 7, dated Apr. 21, 1942.

22 Includes the value of vessels and other expenses transferred from the U. S. Maritime

Commission functions.

23 Includes unreserved surplus of Reconstruction Finance Corporation, \$550.8 million,

and deficit of merged war affiliates, \$9,854.7 million.

24 Consists of net income from power operations of \$92.6 million and net expense of non-income-producing programs of \$92.5 million. 25 Includes \$85.4 million representing equity of mortgagors in earnings of group accounts

of the mutual mortgage insurance fund.

Footnotes 5, 6, and 7 on p. 469,

8 Figures are for the 9 months ended Mar. 31, 1947, for the U. S. Maritime Commission functions and the lend-lease and UNRRA activities of the War Shipping Administration functions. The balance of the War Shipping Administration functions is for the 8 months ended Feb. 28, 1947. Figures for the entire year 1947 will not be available until the calendar year 1948.

until the calendar year 1948.

§ Consists of Agricultural Marketing Act revolving fund; Federal Public Housing Authority—homes conversion program, Farm Security Administration program, public war housing program, and veterans' re-use housing program; Federal Security Agency—loans to students; Indian loans; Navy Department—guaranteed loans (World War II), and sale of surplus supplies (World War I); Puerto Rico Reconstruction Administration; Treasury Department—miscellaneous loans and certain other assets; War Department—guaranteed loans (World War II); Veterans' Canteen Service created pursuant to Public Law 636, approved Aug. 7, 1946; and data for the first 4 months ended Oct. 31, 1946, Farm Security Administration and emergency crop and feed loans activities which were transferred to Farmers' Home Administration Nov. 1, 1946.

<sup>10</sup> Represents charge of interest expense allocated by Reconstruction Finance Corp. to U. S. Commercial Company and War Damage Corp. for costs of borrowing from the Secretary of the Treasury.

11 The net income from power operations has been reduced by the net outlay of \$14.3 million for nonincome-producing programs such as flood control, navigation, and experimental projects.

12 Represents excess of expenses and includes surplus reserves as well as unreserved surplus or deficit.

surplus or denote.

13 This figure differs from that shown in the balance sheet because deficits of \$176.3 million and \$578.4 million for emergency crop and feed loans activities and Farm Security Administration, respectively, are included in this statement.

14 Includes \$754.7 million deficit of emergency crop and feed loans activities and Farm

<sup>14</sup> Includes \$754.7 million deficit of emergency crop and feed loans activities and Farm Security Administration, which deficit was not assumed by Farmers' Home Administration.

Note.-Figures are rounded and will not necessarily add to totals.

\*Less than \$500,000

<sup>1</sup> Excludes matured interest, all agencies, in amount of \$1 million.

<sup>2</sup> Funds have been deposited with the Treasurer of the United States for payment of all obligations guaranteed by the United States, representing outstanding matured principal of \$6 million and interest of

3 Authorized to issue obligations to Secretary of Treasury only, which are not guaranteed by the United

\*Authorized to issue obligations to Secretary of Treasury only, which are also states.

4 The Secretary of Agriculture is authorized to issue obligations to Secretary of Treasury only, pursuant to Farmers' Home Administration Act of 1946. Such obligations will not be guaranteed by United States.

4 Net of repayments by borrowers to Federal Public Housing Authority and net of retired bond issues of Home Owners' Loan Corporation, exclusive of refunding. This is a limitation on issues, and the amount may be increased only by the amount of issues for refunding purposes.

5 Represents \$7,800 million limit of authority to insure mortgages and \$165 million limit of liability on insured loans, which liability may be increased by amount of collections of insurance premiums and decreased by amount of claims paid. The authority to insure mortgages under title II may be increased by \$1,000 million upon approval of the President. Unused mortgage insurance authorizations on June 30, 1947, amounted to \$2,098 million. Debentures may be tendered and issued only in exchange for insured property acquired through foreclosure.

7 Limit which may be outstanding at any one time with respect to the insuring of ship mortgages.

Digitized for FRASER

<sup>\*</sup> Revised.

<sup>1</sup> The money in circulation includes any paper currency held outside the continental

<sup>1</sup> The money in circulation includes any paper currency neid outside the continental limits of the United States.
2 Based on Bureau of the Census estimated population for continental United States as of July 1 of each year.
3 Does not include gold other than that held by the Treasury.
4 These amounts are not included in the total stock, since the gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and silver bullion, respectively.

<sup>&</sup>lt;sup>6</sup> This total includes credits with the Treasurer of the United States payable in gold certificates in (1) the gold certificate fund-Board of Governors, Federal Reserve System, in the amount of \$16,513,733,547, and (2) the redemption fund for Federal Reserve notes in the amount of \$709,924,022.
<sup>6</sup> Includes \$170,000,000 lawful money deposited as a reserve for Postal Savings deposits.
<sup>7</sup> The amount of gold and silver certificates and Treasury notes of 1890 should be deducted from this amount before combining with total money held in the Treasury to arrive at the stock of money in the United States.

Note.-Figures are rounded and will not necessarily add to totals

r Revised.

1 The figures from 1860 through 1889 are the best data available in annual reports of the Secretary of the Treasury. The records are not complete and the figures for gold and silver in those years are only estimates. The figures beginning with 1890 were compiled on the basis of revised figures for June 30 of each year and therefore differ slightly from the monthly circulation statements for the following reasons: (a) Beginning June 30, 1922, the form of circulation statement was revised so as to include in the holdings of the Federal Reserve Banks and agents, and hence in the stock of money, gold bullion and foreign gold coin held by the Federal Reserve Banks and agents, and to include in the holdings of the Federal Reserve Banks and agents, and hence exclude from money in circulation, all forms of money held by the Federal Reserve Banks and agents, whether as reserve against Federal Reserve notes or otherwise. For the sake of comparableness the figures in this table for earlier years include these changes. For full explanation of this revision, see annual report for 1922, p. 433. (b) The form of the circulation statement was revised again beginning Dec. 31, 1927, so as to exclude earmarked gold coin from the stock of money, and hence from money in circulation; to include in the holdings of the Federal Reserve Banks and agents, and hence in the stock of money, gold held abroad for the account of the Federal Reserve Banks; and to include in all categories, minor coin (the 1-cent piece and the 5-cent piece). Beginning Dec. 31, 1927, the circulation statement is dated for the end of the month instead of the beginning of the succeeding month, as was the practice theretofore, and figures on a revised basis for "Money held in the Treasury" are used. For the sake of comparableness the figures in this table for earlier years include these changes. For full explanation of this revision, see annual report for 1928, pp. 70-71. Changes, minor in amount, are made in some figures in the June 30 circulation statements for use in these annual report tables.

<sup>2</sup> From 1866 to date excludes gold and silver certificates and Treasury notes of 1890 outside the Treasury. Beginning with 1934, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since the gold and silver held as security against them are included. The composition of the stock of money is shown in table 89.

<sup>3</sup> From 1934 to date the amount (gold certificates) held for Federal Reserve Banks and agents is excluded from the total money in the Treasury, see footnote 2.

4 The composition of the money in circulation is shown in table 90.

<sup>a</sup> Based on Bureau of the Census estimated population for continental United States as of July 1 of each year. Per capita figures from 1860 through 1912 have been revised accordingly.

6 Includes total stock of subsidiary silver, 1860-1863, and of gold coin and bullion, 1862 and 1863. It is not practicable to present the amounts in circulation separately for the years mentioned.

Ton February 26, 1947, gold in the amount of \$1,809,000,000 held for account of the exchange stabilization fund was used as follows: (1) \$687,500,000.11 was paid to the International Monetary Fund; (2) \$275,224,999.89 was transferred to the gold certificate fund, Board of Governors, Federal Reserve System; and (3) \$837,275,000 was transferred to the General Fund of the Treasury (and remains in this column).

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

the Treasurer of the United States, against Federal Reserve notes in actual circulation ("Gold certificates" as herein used for 1934 and subsequent years include credits with the Treasurer of the United States payable in gold certificates). Federal Reserve notes are reserve Bank. Federal Reserve Bank notes at time of issuance were secured by direct obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank notes at time of issuance were secured by direct obligations of the United States or commercial paper; however, lawful money has been deposited with the Treasurer of the United States for their redemption and they are in the process of retirement. National bank notes at issuance were secured by direct obligations of the United States: lawful money has been deposited with the Treasurer for their redemption and they are being retired.

3 Although small amounts are outstanding, they have not been in actual circulation to any extent since 1878.

The totals involve a duplication to the extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

5 Minor coin has been included only from 1900 to date, since satisfactory data were not

available for earlier years and the stock was small.

See footnote 1, table 88.

A part of the gold and silver included in the stock of money is held as a reserve against other kinds of money, as follows: (1) As a reserve for United States notes and Treasury notes of 1890-gold bullion (gold coin and bullion prior to the gold conservation actions of 1933 and 1934) varying in amount from \$64,977,000 to \$156,039,431 during the years 1879 to date; (2) also as security for Treasury notes of 1890 (these notes are being canceled and retired on receipt)—an equal dollar amount in standard silver dollars; (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (4) as security for gold certificates-gold bullion (gold coin and bullion before the gold actions of 1933 and 1934) of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are secured by the deposit by the Federal Reserve Banks with Federal Reserve agents of a like amount of gold certificates (gold prior to the actions of 1933 and 1934) or of gold certificates and such discounted or purchased paper as are eligible under the terms of the Federal Reserve Act, as amended, or (from Feb. 27, 1932) of direct obligations of the United States. Federal Reserve Banks must maintain reserves in gold certificates (gold for 1933 and prior years) of at least 25 percent (40 percent prior to the passage of the act of June 12, 1945) including the redemption fund which must be deposited with

Note.-Figures are rounded and will not necessarily add to totals.

<sup>\*</sup> Revised.

See footnote 1, table 88.

For description of reserves held against various kinds of money, see footnote 2, table 89.

Total stock; circulation figures are not available.

<sup>&</sup>lt;sup>4</sup> The Gold Reserve Act of 1934, which was the culmination of the gold actions of 1933, vested in the United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on the Treasury records as being then outstanding was dropped from the monthly circulation statement as of Jan. 31, 1934.

<sup>&</sup>lt;sup>1</sup> Customs receipts, on the basis of reports of collecting officers, are credited to the districts in which the collections are made. Receipts in the various districts do not indicate the tax burden of the respective districts, since the taxes may be eventually borne by persons in other districts. Customs duties and sale of insular government property for Puerto Rico (\$3,236,155) are deposited to the credit of the Government of Puerto Rico.

Note.—Figures are rounded and will not necessarily add to totals.

\*Revised.

The amount of customs duties is calculated on the basis of reports of the Bureau of the Census showing the quantity and value of merchandise imported. Figures back to 1867 can be found in the annual reports for 1930, p. 523, 1932, p. 382; and corresponding tables in subsequent reports.

Table 95.—Estimated customs duties, value of dutiable imports, and ratio of estimated duties to value of dutiable imports, by tariff schedules, for the calendar years 1937 to 1946 and by months from January 1946 to June 1947 <sup>1</sup>

Note.—Dollar figures are rounded and will not necessarily add to totals.

¹ The amount of customs duties is calculated on the basis of reports of the Bureau of the Census, showing the quantity and value of merchandise imported. Total estimated duties and total value of dutiable imports will be found in table 94. For figures back to 1890 see annual reports for 1930, p. 525; 1932, p. 383; and corresponding tables in subsequent reports.

Taxes collected on dutiable commodities under the revenue acts and the Sugar Act of 1937 are included in appropriate schedules.

Table 96.—Value of dutiable imports for consumption and estimated duties collected, by countries, fiscal years 1946 and 1947

Note.—Figures are rounded to nearest dollar and will not necessarily add to totals. This tabulation omits Federal expenditure of \$357,167,000 for veterans' re-use housing by National Housing Agency. Federal revenues shared with States exclude Federal payments to State and local governments in lieu of State and local taxes on Federal properties, as follows: (a) Payments in connection with resettlement and rehabilitation projects authorized by act of June 29, 1936 (40 U. S. C., Supp. V, 432); (b) payments in connection with federally operated housing projects, authorized by United States Housing Act of 1937 (42 U. S. C., Supp. V, 1413-c); and (c) payments to Alabama and Tennessee in connection with sale of power authorized by Tennessee Valley Authority Act of 1933 (16 U. S. C. 831-e).

Digitized for FRASER

<sup>&</sup>lt;sup>1</sup> Comprises \$8,339,581 under forest fire cooperation and \$114,560 under cooperative farm forestry.

<sup>2</sup> Payments to States and Territories from the national forest fund. Also includes \$39,335 payments to school funds, Arizona and New Mexico.

Table 107.—Expenditures made by the Government as direct payments to States under cooperative arrangements and expenditures within States which provided relief and other aid, fiscal year 1947—Continued

<sup>&</sup>lt;sup>1</sup> Includes payments on account of interest to Jan. 1, 1928, on Class III awards and Private Law 509. Payments on this class of awards are first applied on account of the total amount payable as of Jan. 1, 1928, as directed by the Settlement of War Claims Act of 1928 until total of all payments on the 3 classes equals 80 percent of the amount payable Jan. 1, 1928. Payment of accrued interest since Jan. 1, 1928, on this class of claims deterred in accordance with act.

http://fraser.stlouis See footnote 1.

<sup>1922,</sup> and Private Law 509, has been covered into the Treasury as miscellaneous receipts.

4 Of this amount, \$24,150.09 has been paid to the Government of Germany. A further sum of \$14,466.95 is payable in connection with the adjudication of late claims under the agreement of Dec. 31, 1928.

5 Interest accrued from Jan. 1, 1928, to Mar. 11, 1940, on \$26,612.06 representing awards plus interest to Jan. 1, 1928. No applications filed by claimants. Time for filing applications expired Mar. 11, 1940.

<sup>·</sup> Revised.

Revised.

1 Figures represent par values with the following exceptions: (1) The holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by the United States and of State and local governments, Territories, and possessions are book values, (2) the holdings of these securities by individuals are residuals, and so deviate from par values in those cases where the figures for commercial and mutual savings banks are book values, (3) in the case of data which include United States savings bonds Series A-D, E, and F, the figures for these bonds represent current redemption values.

2 Includes partnerships and personal trust accounts.

3 Includes savings and loan associations, dealers and brokers, and investments of foreign balances in this country.

country. Comprises trust, sinking, and investment funds of State and local governments, Territories, and posses-

sions.

Data on daily Treasury statement basis; current monthly data are published in the Treasury Bulletin.
Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by the Treasury, and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year

<sup>6</sup> Excludes obligations of the Philippine Islands.

Note.—Figures are rounded and will not necessarily add to totals. For data for 1913 through 1936, see 1946 annual report, p. 664.

In the case of data which include United States savings bonds, Series A-D, E, and F, the figures for these

In the case of data which include United States savings counds, series A-D, E, and F, the ngures for these bonds represent current redemption values.

3 On basis of daily Treasury statements. Excludes transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year. Guaranteed securities consist of Commodity Credit Corporation notes, Home Owners' Loan Corporation bonds (including those guaranteed as to interest only), Reconstruction Finance Corporation notes, Tennessee Valley Authority bonds, Federal Public Housing Authority (formerly United States Housing Authority) notes, Federal Farm Mortgage Corporation bonds, and Federal Housing Administrative debentures. Excludes stocks, interagency loans, and securities held by the Treasury.

and Federal Housing Administrative decentures. Excludes stocks, interagency loans, and securities held by the Treasury.

4 Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Federal land bank bonds (both those issued by the individual banks and the consolidated series), Federal National Mortgage Association notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Excludes stocks and interagency loans.

4 Securities the income from which is exempt from both the normal rates and surtax rates of the Federal

income tax.

6 Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt (1) Treasury bonds and (2) United States savings bonds, interest derived from \$5,000 aggregate principal amount owned by any one holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.
7 Securities the income from which is subject to both the normal rates and the surtax rates of the Federal

Special issues to Federal agencies and trust funds.

Less than \$50 million

n. a. Not available.

1 The "total amount outstanding" of securities of the several issuers differs from the gross indebtedness of these issuers in that the former excludes noninterest-bearing debt. The "total privately held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Not indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.

Excludes obligations of the Philippine Islands after June 30, 1946.
 Excludes Federal Reserve Banks. Includes individual Indian trust funds.

Note.—Figures are rounded and will not necessarily add to totals.

\*Less than \$500,000.

The banks and insurance companies covered in the Treasury survey of the ownership of securities issued or guaranteed by the U. S. Government account for approximately 95 percent of the amount of such securities owned by all banks and insurance companies in the United States. Details as to each issue of security are available in the Treasury Bulletin (a) monthly for the above investors and (b) quarterly through the September 1947 Bulletin and semiannually thereafter for commercial banks classified by membership in the Federal Reserve System.

Includes trust companies.

Securities held in trust departments are excluded.
Includes banks and insurance companies which are not covered in the Treasury survey (see footnote 1).

5 Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).

6 Consists solely of Federal Housing Administration debentures; guaranteed securities

held by the Treasury are not included. 7 United States savings bonds other than Series G are included at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury survey and have been adjusted to current redemption value for this table.

Consists solely of Commodity Credit Corporation demand obligations; guaranteed securities held by the Treasury are not included.
 Commodity Credit Corporation demand obligations in the amounts of \$424 million on June 30, 1946, and \$45 million on June 30, 1947, are all held by commercial banks and are shown only in total amount outstanding.

Excess of credits (deduct)

• Excess of credits (deduct).

¹ Details of income taxes other than withheld and miscellaneous internal revenue on a collections basis with adjustments to daily Treasury statement basis. Details of employment taxes and railroad unemployment insurance contributions and customs on basis of daily Treasury statement: Miscellaneous receipts on basis of warrants issued with total adjusted to daily Treasury statement basis.

² Prior to July 1, 1947, included in "Income tax: Other" in the daily Treasury statement. Beginning July 1, 1947, classified in "Miscellaneous internal revenue" and included in "Miscellaneous taxes: All other including repealed."

³ Because of the time required for payments reported as tax collections toward the end of each month to clear through the banks and become available for expenditures on the daily Treasury statement basis, an adjustment from the collections basis to the daily Treasury statement basis is necessary. A positive adjustment indicates that during the given period more tax receipts on the daily Treasury statement basis have been received than are reported as collections, and a negative adjustment indicates the reverse situation. The adjustment for total income and excess profits taxes other than withheld is arbitrarily assigned to the individual income tax.

individual income tax.

\* Collections for credit to trust funds are not included.

<sup>4</sup> Collections for credit to trust funds are not included.

§ Includes collections from: Taxes on narcotics, taxes imposed under the National Firearms Act, and the tax on hydraulic mining, all of which are effective currently. In addition, includes collections from excise taxes repealed or suspended prior to and including the Revenue Act of 1945 (consisting primarily of rubber articles, electric signs, optical equipment, washing machines, vacuum cleaners, and manufacturers' tax on luggage); collections from the liquor, tobacco, matches, tires and tubes floor stocks taxes imposed by the Revenue Acts of 1941, 1942, and 1943; collections from the tax under the Bituminous Coal Act of 1937 which expired Aug. 24, 1943; collections from the unjust enrichment tax in the fiscal years 1948 and 1949; collections from the capital stock tax repealed with respect to years ending after June 30, 1945; and collections from the use tax on motor vehicles and boats repealed by the Revenue Act of 1945 with respect to the period after June 30, 1946.

§ For further defail, see 1949 Budget Document, table 7.

For further detail, see 1949 Budget Document, table 7.
 Classified by organization unit as published in the 1949 Budget Document. The figures are based upon the Treasury's Combined Statement of Receipts, Expenditures, and Balances, and therefore differ from figures published in the daily Treasury statement. For further detail, see 1949 Budget Document,

table 8.

8 Expenditures from allocations made prior to Nov. 1, 1947, are shown under the various agencies to which

<sup>9</sup> Represents advance from Reconstruction Finance Corporation and repaid in 1948.
<sup>19</sup> Includes only expenditures from appropriations to be made direct to the Department of the Air Force in 1949, primarily for procurement and operation of aircraft and research and development. A total of \$605,000,000 is included in the 1949 expenditures for the Department of the Army for liquidation of prior year obligations for such purposes. Other expenses for 1949, including military pay and maintenance, are still shown under the Department of the Army.

funds are allocated.
