2/ The items, "2. IMF Reserve Position" and "3. Special Drawing Rights (SDRs)," are based on data provided by the IMF and are valued in dollar terms at the official SDR/dollar exchange rate for the reporting date. The entries for the latest week reflect any necessary adjustments, including revaluation, by the U.S. Treasury to IMF data for the prior month end.

3/ Gold stock is valued monthly at \$42.2222 per fine troy ounce.

4/ The short positions reflect foreign exchange acquired under reciprocal currency arrangements with certain foreign central banks. The foreign exchange acquired is not included in Section I, "official reserve assets and other foreign currency assets," of the template for reporting international reserves. However, it is included in the broader balance of payments presentation as "U.S. Government assets, other than official reserve assets/U.S. foreign currency holdings and U.S. short-term assets."
