COMMODITY CREDIT CORPORATION

COMMODITY CREDIT CORPORATION FUND

FOOD FOR PROGRESS

(Supplemental language now requested, existing legislation)

Notwithstanding any other provision of law, no funds of the Commodity Credit Corporation in excess of \$50,000,000 for each of fiscal years 1995 and 1996, (exclusive of the cost of commodities in each fiscal year) may be used to carry out the Food for Progress Act of 1985 (7 U.S.C. 1736o) with respect to commodities made available under section 416(b) of the Agricultural Act of 1949. The additional costs resulting from this provision shall be financed from funds credited to the Corporation pursuant to section 426 of P.L. 103-465.

This request would raise from \$30 million to \$50 million the limit on transport and other non-commodity funds available from the Commodity Credit Corporation to facilitate donations of commodities under the Food for Progress program in 1995 and 1996. This would allow the transport of an additional \$40 million of export commodity donations under this program, for a total program level increase of \$60 million. This request is consistent with the Administration's commitment to increase funding for GATT-permissible export promotion activities in agriculture as part of the implementation of the Uruguay Round Agreement. The additional cost would be offset by the crop insurance reform savings earmarked for this purpose in the Uruguay Round Agreements Act, P.L. 103-465, section 426.

FOOD AND [NUTRITION] CONSUMER SERVICE

CHILD NUTRITION PROGRAMS

(Supplemental language now requested, existing legislation)

Of funds appropriated under this head in Public Law 103-330, \$27,782,000 shall be reported and accounted for under "Nutrition Initiatives", and \$11,259,000 shall be reported and accounted for under "Food Program Administration".

This supplemental language request would enable financial and accounting reports for 1995 to be prepared using the same account and activity structure proposed in the 1996 Budget. This language would not change the funding level for any activity.

FOOD STAMP PROGRAM

(Supplemental language now requested, existing legislation)

Of funds appropriated under this head in Public Law 103-330, \$12,509,000 shall be reported and accounted for under "Nutrition Initiatives", and \$16,882,000 shall be reported and accounted for under "Food Program Administration".

This supplemental language request would enable financial and accounting reports for 1995 to be prepared using the same account and activity structure proposed in the 1996 Budget. This language would not change the funding level for any activity.

GENERAL PROVISIONS

(Supplemental language now requested, existing legislation)

Section 715 of Public Law 103-330 is amended by deleting "\$85,500,000" and by inserting "\$110,000,000". The additional cost resulting from this provision shall be financed from funds credited to the Commodity Credit Corporation pursuant to section 426 of Public Law 103-465.

This supplemental language request would remove the current limitation on the Market Promotion Program and restore funding to the program's fully authorized level for 1995. This request is consistent with the Administration's commitment to increase funding for GATT-permissible export promotion activities in agriculture as part of the implementation of the Uruguay Round Agreement. The additional cost would be offset by the crop insurance reform savings earmarked for this purpose in the Uruguay Round Agreements Act, P.L. 103-465, section 426.

(Supplemental language now requested, existing legislation)

SEC. 1860. Notwithstanding sections 607 and 630 of the Foreign Assistance Act of 1961 (22 U.S.C. 2357 and 22 U.S.C. 2390), and sections 2608 and 2350j of Title 10, United States Code, all funds received as reimbursement for expenses included in this Act shall be deposited to miscellaneous receipts.

This supplemental language request would require reimbursements to the Department of Defense from the United Nations and other sources to be deposited with the Treasury. Current law requires that reimbursements be credited to the Department of Defense.

(Supplemental language now requested, existing legislation)

SEC. 1861. The appropriation made under the heading "Procurement of Ammunition, Army" in the Department of Defense Appropriations Act, 1993 (Public Law 102-396), is amended by striking out "of which \$200,000,000 shall be available only for the Armament Retooling and Manufacturing Support Initiative" and inserting "of which \$200,000,000 may be available for the Armament Retooling and Manufacturing Support Initiative".

This supplemental language request would eliminate a restrictive provision related to the use of funds only for the Armament Retooling and Manufacturing Support Initiative.

(Supplemental language now requested, existing legislation)

SEC. 1862. During the current fiscal year, appropriations available to the Department of Defense for the pay of civilian personnel may be used, without regard to the time limitations specified in section 5523(a) of title 5, United States Code, for payments under the provisions of section 5523 of title 5, United States Code, in the case of employees, or an employee's dependents or immediate family, evacuated from Guantanamo Bay, Cuba, pursuant to the August 26, 1994 order of the Secretary of Defense.

This provision would permit the continuation of certain pay, allowances, and differentials beyond 180 days to specific Department of Defense civilians and their dependents. These personnel were temporarily evacuated from Guantanamo Bay, Cuba due to the establishment of a safe haven for migrants at that installation. Military personnel and their dependents similarly evacuated have already received an extension of benefits—this provision provides equitable treatment of military and civilian personnel and dependents.

(Supplemental language now requested, existing legislation)

SEC. 1863. During the last two quarters of the current fiscal year, upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, incur necessary obligations to preserve the readiness of the Armed Forces in excess of contract authority and amounts available in appropriations of the Department of Defense during the current fiscal year: Provided, That obligations incurred shall be limited to those which are required for essential readiness functions and activities of the Armed Forces, including activities associated with mission critical proficiency training, scheduled unit exercises, the acquisition of spare parts that are critical to the missions of the Armed Forces and such other activities that the Secretary of Defense determines cannot be postponed without a major impact on the readiness of the Armed Forces: Provided further, That obligations incurred under the foregoing authority shall not be more than 50 percent of the total amount appropriated to the Department of Defense for Operation and Maintenance, Budget Activity 1: Provided further, That any proposal transmitted by the President to the Congress to liquidate costs incurred under the provisions of this section shall be accompanied by offsetting rescission proposals, unless the President determines that emergency conditions exist which preclude such rescissions: Provided further, That the Congress shall be notified when funds are made available for obligations under this authority.

This provision would allow the Department of Defense, with OMB approval and Congressional notification, to make obligations in excess of its total budget authority during the last two quarters of 1995 to fund essential readiness activities and functions. Excess obligations incurred under this provision are limited to 50 percent of Budget Activity 1 under the Operation and Maintenance title. Any proposal to liquidate excess obligations incurred under this provision must be accompanied by offsetting rescission proposals unless the President determines that emergency conditions exist which preclude rescissions.

This supplemental language request would correct a technical error in the FY 1995 appropriations language. The amount for Pell Grants within the account total was \$6,243,680,000 in the comparative statement of budget authority, but was \$6,247,180,000 in the appropriations language. This amendment would not change the account total, which is the same as the total provided in the comparative statement.

This supplemental request would replenish funds transferred pursuant to authorities of the Secretary of the Interior to use any funds available for emergency reconstruction, rehabilitation, replacement or repair of Department of the Interior buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm or other unavoidable causes. In the winter of 1993/94, severe storms and flooding damaged numerous units of the National Park Service, necessitating emergency repairs financed in part by a transfer from the Service's construction program. The 1994 Interior Appropriations Act requires replenishment of such transfers for emergency purposes.

This supplemental request would replenish funds transferred pursuant to authorities of the Secretary of the Interior to use any funds available for emergency reconstruction, rehabilitation, replacement or repair of Department of the Interior buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm or other unavoidable causes. In the winter of 1993/94, severe storms and flooding damaged numerous units of the National Park Service, necessitating emergency repairs financed in part by a transfer from the Service's land acquisition program. The 1994 Interior Appropriations Act requires replenishment of such transfers for emergency purposes.

OUNCE OF PREVENTION COUNCIL

(Supplemental language now requested, existing legislation)

Under this heading in Public Law 103-317, insert the following after the word "grant": "and administrative expenses". After the last sentence, insert the following: "Provided, That the Council is authorized to accept, hold, administer, and use gifts, both real and personal, for the purpose of aiding or facilitating the work of the Council".

The Ounce of Prevention Council was created by the Violent Crime Control and Law Enforcement Act of 1994. This proposal would merely clarify that funds made available for 1995 are available for administrative purposes. In addition, the language would allow for the acceptance or use of gifts and donations. This language increases the Ounce of Prevention Council's flexibility to manage its grant programs.

(Supplemental language now requested, existing legislation)

From funds made available for demonstration projects of the Federal Highway Administration in an authorization or appropriations Act, and which have not been obligated, the Secretary of Transportation shall cancel \$400,000,000 in budget authority.

Such projects have been earmarked in Congressional authorization and appropriations laws. These projects limit the ability of the states to make choices on how to best use limited dollars to respond to their highest transportation priorities.

Under this proposal, the amounts of the following Federal Highway Administration accounts will be reduced: Federal-Aid Highways (\$356 million), Miscellaneous Highway Trust Funds (\$7 million), and Miscellaneous Appropriations (\$37 million). The actual distribution of the \$400 million reduction will be determined by the Secretary of Transportation and may differ from the amounts shown in the budget schedules.

The Disaster Relief Fund is available for disaster relief and assistance authorized when the President makes a declaration of a major disaster or emergency, such as the January 1994 earthquake in Southern California. The extent of damages that result from earthquakes such as the Northridge Earthquake is often not assessable until after detailed structural engineering reviews are completed. At this time, it is clear that initial appropriations provided to respond to the Northridge earthquake were far below the amounts needed to complete Federal recovery efforts. As a result, it is now necessary for the Federal Emergency Management Agency (FEMA) to seek additional resources to complete the Northridge recovery effort as well as to provide funding for other declared disasters. Over forty states and territories currently have open disasters and are potentially eligible for these funds.

Given the increasing severity of disasters over the past several years, the Administration has established an internal task force to consider critical reforms needed to Federal disaster relief activities. These reforms are aimed at improving disaster mitigation and reducing overall Federal costs of providing post-disaster assistance. The Administration intends to work with the Congress to secure enactment of any legislative reforms identified.

Recent Presidentially-declared disasters, coupled with the extraordinary costs associated with the recovery from the Northridge Earthquake, make it necessary to support new initiatives in the response and recovery area, specifically the National Processing Service Centers, the National Teleregistration Center, and the Mobile Home Strategic Storage Centers. These initiatives support improved efficiency in the administration of disaster assistance and improved customer satisfaction. A total of \$15 million of the requested appropriations amount is proposed to be used for these initiatives.

The entire amount requested is designated by the President as an emergency requirement pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.
