The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes the development and enforcement of appropriate standards for the construction, design, and performance of manufactured homes to assure their quality, durability, affordability, and safety. All manufactured homes produced since the standards took effect in 1976 must comply with Federal construction and safety standards. A majority of States participate in the program under compliance plans approved by HUD. Program requirements mandated by the Manufactured Housing Improvement Act of 2000 include procurement of an Administering Organization, formation of a Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards, development and implementation of standards for installation of manufactured housing, and development and implementation of a dispute resolution program.

Fees are charged to the manufacturers for each transportable section produced to offset the expenses incurred by the Department in carrying out the responsibilities under the authorizing legislation. The 2016 Budget proposes to fund the costs of authorized activities with an estimated \$11 million in fees. In September of 2014, HUD increased the fee to \$100 per label to ensure that HUD can continue to fulfill its statutory responsibilities. The 2016 Budget also proposes a general provision that would allow HUD to implement future fee changes via notice.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

The Government National Mortgage Association (GNMA) was formed by the Congress in 1968. It is a wholly owned government corporation within the U.S. Department of Housing and Urban Development (HUD). It was established to support Federal housing initiatives by providing liquidity to the secondary mortgage market and to attract capital from the global capital markets for the nation's mortgage markets. Its primary function is to guarantee the timely payment of principal and interest on Mortgage-Backed Securities (MBS) that are backed by loans insured or guaranteed by the Federal Housing Administration (FHA), the Department of Veterans Affairs (VA), Rural Development in the U.S. Department of Agriculture, and HUD's Office of Public and Indian Housing.

In 2013, a Capital Reserve account was established for the Government National Mortgage Association (GNMA). Financial reserves of GNMA were transferred from the Reserve Receipt and Liquidating accounts to the Capital Reserve account. This mandatory account earns interest on Treasury investments and is the eventual depository for all budgetary resources collected by GNMA including negative subsidy receipts from new security guarantees and downward re-estimates. This account has no authority to obligate funds but transfers resources to the GNMA Program Account as necessary for mandatory spending authorized in that account.

The Budget requests loan commitment authority of \$500 billion in 2016. The Budget also requests \$28.3 million for the personnel costs of the Government National Mortgage Association (GNMA), to be offset by Commitment and Multiclass fees. Before 2012, personnel expenses were funded in the "Office of Government National Mortgage Association" appropriation under the Management and Administration section of the HUD budget. This funding level will enable GMNA to keep pace with growing demands and respond to the complexities of the current market, including a growing number of security issuers and the entry of new types of issuer firms, such as non-depository institutions.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to HUD's mission. These functions are carried out by HUD's Office of Policy Development and Research, and through contracts with industry, nonprofit research organizations, educational institutions, and through co-operative agreements with State and local governments, other Federal agencies, and philanthropic entities.

The Budget requests \$50 million for HUD's Research and Technology program. This request includes funding to restore and enhance various national housing surveys that are rich sources of data on the nation's housing stock, including the American Housing Survey, the Survey of New Home Sales and Completions, the Survey of Market Absorption of Multi-family Units, the Survey of New Manufactured Housing Placements, and the Rental Housing Finance Survey. Also included in the request is funding for research dissemination activities, for the Urban Data Systems, for housing finance studies, and for Research Partnerships. The data produced in the Research and Technology program also assists HUD in developing its Research Roadmap, and provides the basis for research and evaluation priorities in the Transformation Initiative program.

To improve the quality of Federal evaluations and to use resources efficiently, the Budget seeks expanded legislative flexibilities for HUD to spend funding recaptured from evaluations and surveys. This flexibility

will allow HUD to better target funds to reflect changing circumstances in the program.

The Budget requests \$71 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$23.3 million is for the Fair Housing Assistance Program (FHAP), \$45.6 million is for the Fair Housing Initiatives Program (FHIP), \$1.8 million is for the National Fair Housing Training Academy, and \$300 thousand is for the Limited English Proficiency Initiative (LEPI).

FHAP, authorized by Title VIII of the Civil Rights Act of 1968, as amended, provides funding to State and local agencies to assure prompt and effective processing of complaints under substantially equivalent State and local fair housing laws. To be eligible for assistance through FHAP, an agency must demonstrate that the fair housing law it administers is substantially equivalent to the Fair Housing Act. It is estimated that there will be a total of 90 FHAP jurisdictions in 2016. The funding requested for FHAP will support fair housing enforcement by funding State and local fair housing organizations to meet the needs of currently underserved populations. It will also address the national and ongoing problem of discrimination against minority homebuyers and renters, as identified in the 2012 Housing Discrimination Against Racial and Ethnic Minorities Study.

FHIP, authorized by the Housing and Community Development Act of 1987, as amended by the Housing and Community Development Act of 1992, provides funding to States and local governments, and to public and private non-profit organizations that administer programs to prevent or eliminate discriminatory housing practices through enforcement, education, and outreach.

The National Fair Housing Training Academy (NFTHA) provides comprehensive fair housing and civil rights training for investigators, local agencies, educators, attorneys, industry representatives and other housing industry professionals.

LEPI provides funds for oral interpretation and written translation services, which help make fair housing programs and activities accessible to people who are not proficient in English.

Title X of the Housing and Community Development Act of 1992 (Public Law 102-550), known as the Residential Lead-Based Paint Hazard Reduction Act, authorized the Secretary to establish the Lead-Based Paint Hazard Control Grant Program. The primary purpose of the program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program plays a critical role in addressing the number one environmental disease impacting children: lead poisoning. The Budget request of \$120 million includes \$93 million for HUD's Lead Hazard Control Program, \$25 million for the Healthy Homes Program, and \$2 million for technical studies. The Budget includes a provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed compet-

itive programs to other competitive programs experiencing oversubscription. The Budget also includes a general provision that would grant the Secretary authority to carry out investigations, administer oaths, and subpoena documents related to violations of the Lead Disclosure provision of Title X. In addition, HUD will submit a legislative package with updates to program standards and definitions.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$4 million to State and local governments and Indian tribes for control of lead-based paint hazards in private low-income rental and owner-occupied housing. The grants are also designed to facilitate the development of a housing maintenance and rehabilitation workforce trained in lead-safe work practices and a certified hazard evaluation and control industry. In awarding grants, HUD promotes the use of new, low-cost approaches to hazard control that can be replicated across the nation.

The Healthy Homes Program enables the Department to assess and control housing-related hazards that contribute to childhood diseases and injuries. With funding from this program, grantees implement and evaluate methods for controlling two or more housing-related diseases through a single intervention.

The Office of Lead Hazard Control and Healthy Homes will continue its Technical Support program, which includes public education; support for State and local agencies, private property owners, HUD programs and field offices and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards, technical guidance, regulations and improved testing and hazard control methods.

The Information Technology Fund funds the information technology (IT) systems that support Departmental programs and operations, including FHA Mortgage Insurance, housing assistance, grant and disaster relief programs, as well as core financial and general operations. The Budget provides \$334 million for the development, modernization, enhancement, operation and maintenance of HUD's IT infrastructure and systems, including \$286 million with a two-year period of availability and \$48 million with a three-year period of availability.

HUD is currently developing a Working Capital Fund implementation plan, the goal of which is to develop a roadmap that will allow the Department to stand up a robust Working Capital Fund to improve the stability, accountability, transparency, and efficiency of enterprise investments and services. The Department is evaluating various governance structures and funding mechanisms and expects to finalize an implementation strategy in the coming months.

The Transformation Initiative (TI), initiated in 2010, is a focused, systematic effort to increase the effectiveness of HUD's program and service delivery, improve program outcomes, and enable innovative approaches to address the nation's housing and urban development problems. A central concept of TI is to make the Department's investments increasingly coordinated, efficient, and effective by generating and communicating evidence and expertise in a cross-cutting way to those who need it. The 2016 Budget proposes transfers to TI of up to \$120 million. The Budget proposes three complementary purposes for these funds: (1) research and evaluation, (2) program demonstrations, and (3) technical assistance and capacity building for HUD's customers and partners, including forms of assistance described under Sections 4(b)(1) and 4(b)(2) of the HUD Demonstration Act of 1993, as amended. Of the transfer total, the Budget proposes that at least \$85 million shall be for technical assistance and capacity building.

The initiative's research, evaluation and demonstration priorities are informed by HUD's "Research Roadmap 2014-2018," developed by HUD's Office of Policy Development and Research (PD&R) through an extensive consultation and prioritization process. HUD is planning to refresh the Roadmap to ensure that the research agenda continues to address rapidly evolving housing and urban development challenges. The TI provides a predictable stream of funding for these research and evaluation projects and program demonstrations that will inform sound policymaking and effective program implementation. The TI supplements HUD's Research and Technology appropriations, which primarily fund housing data collection efforts such as the American Housing Survey. To improve the quality of Federal evaluations and to use resources efficiently, the Budget seeks expanded legislative flexibilities for HUD to spend funding recaptured from research, evaluation, and demonstrations.

Historically, HUD delivered program-oriented technical assistance. Through TI HUD has learned that it is more effective to provide comprehensive and coordinated assistance to help grantees, public housing authorities, and other customers implement affordable housing and community development programs. Technical assistance within TI enables HUD to deliver cross-program technical assistance that is responsive to the needs of HUD's customers. In 2016, HUD will continue its integrated approach to technical assistance piloted under Community Compass, and will dedicate a portion of funds under this program to develop, enhance, and strengthen the technical and administrative capabilities of community development corporations to carry out community development and affordable housing activities for low- and moderate-income persons that support and address local needs and priorities. Technical assistance will focus on integrated management and planning across programs and jurisdictions, improved use of data to drive decision-making and results, addressing staff turnover and capacity through the availability of online resources and training, and delivering comprehensive capacity building to help distressed communities position themselves for revitalization and economic growth.

based assistance, debt held or insured by the Secretary and statutorily required low-income and very low-income use restrictions if any, associated with one or more multifamily housing project or projects to another multifamily housing project or projects.

(b) Transfers of project-based assistance under this section may be done in phases to accommodate the financing and other requirements related to rehabilitating or constructing the project or projects to which the assistance is transferred, to ensure that such project or projects meet the standards under subsection (c).

(8) If the transferring project meets the requirements of subsection (d)(2), the owner or mortgagor of the receiving project or projects shall execute and record either a continuation of the existing use agreement or a new use agreement for the project where, in either case, any use restrictions in such agreement are of no lesser duration than the existing use restrictions.

(9) The transfer does not increase the cost (as defined in section 502 of the Congressional Budget Act of 1974, as amended) of any FHA-insured mortgage, except to the extent that appropriations are provided in advance for the amount of any such increased cost.

REVENUES FROM FEDERAL OIL AND GAS MANAGEMENT REFORMS

The 2016 Budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources and on improving transparency and oversight. Proposed statutory and administrative changes fall into three general categories: advancing royalty reforms, encouraging diligent development of oil and gas leases, and improving revenue collection processes. Royalty reforms include evaluating minimum royalty rates for oil, gas, and similar products, adjusting the onshore royalty rate, analyzing a price-based tiered royalty rate, and repealing legislatively mandated royalty relief. Diligent development requirements include shorter primary lease terms, stricter enforcement of lease terms, and monetary incentives to get leases into production through a new per-acre fee on nonproducing leases. Revenue collection improvements include simplification of the royalty valuation process, elimination of interest accruals on company overpayments of royalties, and a permanent repeal of Interior's authority to accept in-kind royalty payments. Collectively, these reforms will generate roughly \$2.5 billion in revenue to the Treasury over ten years, of which nearly \$1.7 billion will result from statutory changes. Many States also will benefit from higher Federal revenue sharing payments as a result of these reforms.

LAND AND MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on more than 247 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of onshore Federal mineral estate underlying BLM and other surface ownerships. In addition, BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations. The Budget proposes legislation to establish a Congressionally-chartered National BLM Foundation. This Foundation will provide the BLM with an opportunity to broaden its partnership capabilities, leverage private funding, and focus public support for the BLM mission of protecting and restoring the natural, cultural, historical, and recreation resources on the Nation's public lands.

Land resources.—Provides for management of rangeland and forest resources; riparian areas; soil, water, and air activities; wild horses and burros; and cultural resources. The Budget funds rangeland management activities through a combination of direct appropriations and offsetting collections generated from a proposed three-year pilot program to assess an administrative processing fee on grazing permits. The fee recovers some costs associated with issuing grazing permits/leases on BLM lands. The funds from the fee will be used to address pending applications for grazing permit renewals. The BLM proposes a \$2.50 per Animal Unit Month fee, collected along with current grazing fees. The BLM will promulgate regulations for the continuation of the grazing administrative fee for cost recovery after the pilot expires.

Wildlife and fisheries management.—Provides for maintenance, improvement, or enhancement of fish and wildlife habitats as part of the management of public lands and ecosystems.

Threatened and endangered species management.—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species.

Recreation management.—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees. The Administration proposes to permanently reauthorize the Departments of the Interior and

Agriculture recreation fee program under the Federal Lands Recreation Enhancement Act, which is set to expire on September 30, 2016.

Energy and minerals management.—Provides for management of onshore oil and gas; coal; geothermal and renewable energy resources such as wind and solar; other leasable minerals and mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The 2016 Budget funds oil and gas management activities through a combination of direct appropriations and offsetting collections generated from assessing fees for permitting and inspection activities. Permitting fees are authorized under current law; proposed new inspection fees are expected to generate \$48 million in 2016 that will be used to offset the costs of administering the BLM's oil and gas program and increase program capability.

Realty and ownership management.—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands. Provides for the processing of communication site use authorization requests.

Resource protection.—Provides for management of the land use planning and National Environmental Policy Act processes, including assessment and monitoring activities. Also ensures the health and safety of users of the public lands through remediation of abandoned mine lands and protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

Transportation and facilities management.—Provides for construction and maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment. BLM funds all construction and deferred maintenance projects from this activity, including those on the Oregon and California grant lands.

Challenge Cost Share (CCS).—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve the condition of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish, wildlife, threatened and endangered species, recreation, and cultural resources.

National Conservation Lands.—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations in the National Conservation Lands. The program provides for the recurring operational (base) budgets of these units.

Workforce and organizational support.—Provides for the management of specified bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, information technology, and fixed costs.

Mining law administration.—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2016.

Western Oregon resources management.—Provides for the management of approximately 2.2 million acres of lands that are primarily forested ecosystems in western Oregon. These lands support a number of resource activities including timber management, grazing management, and recreation management. In support of these activities, BLM is involved in improving critical watersheds, restoring wildlife and fish habitat, providing safe recreation opportunities, and preserving cultural resources.

Western Oregon information and resource data systems.—Provides for the acquisition, operation, and maintenance of the automated data support systems required for the management of the Oregon and California programs.

Western Oregon transportation and facilities maintenance.—Provides for the maintenance of office buildings, warehouse and storage structures, shops, greenhouses, recreation sites, and the transportation system necessary to assure public safety and effective management of the lands in western Oregon. BLM funds deferred maintenance projects on Oregon and California Grant Lands from the Management of Lands and Resources appropriation.

OREGON AND CALIFORNIA GRANT LANDS—Continued

This appropriation provides for the acquisition of lands or interests in lands, by purchase or exchange, when necessary for public access and recreation use, preservation of open space, resource protection, and/or other purposes related to the management of public lands. The 2016 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals. The Administration proposes \$900 million in discretionary and mandatory funding in FY 2016, and proposes to permanently authorize \$900 million in annual mandatory funding for the Departments of Agricul-

ture and the Interior Land and Water Conservation Fund programs beginning in fiscal year 2017.

This appropriation is derived from: 1) revenues received to offset administrative and other costs incurred to process applications for rights-of-way, and the monitoring of construction, operation, and termination of rights-of-ways; 2) recovery of costs associated with the adopt-a-horse program; 3) revenues received for rehabilitation of damages to lands, resources, and facilities; 4) fees for processing specified categories of realty actions under the Federal Land Policy Management Act; 5) deposits received from contractors in lieu of completing contract requirements such as slash burning and timber extension expenses; 6) fees for costs of reproduction and administrative services involved in providing requested copies of materials; 7) fixed fees for energy and minerals lease applications, assignments, and transfers; 8) costs of processing applications and administering permits, including environmental analysis and monitoring of special recreation permits; and 9) rents received for permits to do commercial filming and photography on public lands. The Budget assumes BLM will continue to identify new opportunities to recover costs of services provided to benefiting public land users and reduce the need for direct appropriations from the Treasury.

Permanent operating funds accounts include:

Operations and maintenance of quarters.—Funds in this account are used to maintain and repair Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect rental charges from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

Forest ecosystems health and recovery.—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to P.L. 102-381, as amended, this account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments. This account will expire on September 30, 2020 under current law.

Timber sale pipeline restoration fund.—This fund provides for the deposit and use of fees collected by BLM for sales of timber authorized by section 2001(k) of P.L. 104-19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be used to address recreation projects on BLM lands.

Stewardship contract product sales.—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. Stewardship contracting authority includes agreements with non-profits, best-value contracts, designation by description, end results, and goods for services.

Expenses, road maintenance deposits.—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

PERMANENT OPERATING FUNDS—Continued

Federal Lands Recreation Enhancement Act, BLM.—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. The FLREA replaced the Recreation Fee Demonstration Program, and most current BLM sites have transitioned to the new program. All receipts collected under this authority are deposited to this account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The Administration proposes legislation to permanently authorize the recreation fee programs of the Departments of the Interior and Agriculture under FLREA. The FLREA is currently set to expire on September 30, 2016.

Acquisitions in Deschutes, Oregon from land sale receipts.—Pursuant to P.L. 105–221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the proceeds from land sales in Deschutes County to purchase environmentally sensitive lands.

Operations and acquisitions in Nevada from land sale receipts.—Pursuant to P.L. 105–263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act.

Lincoln County Land Sales Act.—P.L. 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the County, and for other specified administrative purposes.

White Pine County Land Sales Act.—P.L. 109–432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

Leases from Naval Petroleum Reserve No 2.—The 2005 Energy Policy Act established this fund for environmental investigation and restoration on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account.

BLM Permit Processing Improvement Fund.—The 2005 Energy Policy Act, as amended by the National Defense Authorization Act, 2015, established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund and used to facilitate BLM oil and gas permit processing in these pilot offices. In addition, in 2016 through 2026, fees collected for processing applications for permits to drill will be deposited to this fund.

Geothermal Lease Revenue Fund.—The 2005 Energy Policy Act established this fund. Twenty-five percent of geothermal bonuses, rents, and royalties were authorized to be deposited to this account through 2010 and used to expedite geothermal leasing activities. Deposits to this fund were subsequently terminated beginning in fiscal year 2010.

Federal land disposal.—The Federal Land Transaction Facilitation Act, P.L. 106–248 (114 Stat. 613), provided authority for BLM to sell public lands that were classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands

with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior. This authority expired on July 25, 2010, and was later reauthorized through July 25, 2011. All funds not obligated by both expiration dates were transferred to the Land and Water Conservation Fund. The Budget includes a proposal to reauthorize the Federal Land Transaction Facilitation Act. A separate legislative proposal to extend the LWCF authorization will also be submitted with the Budget.

Owyhee Land Acquisition Account.—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1039), provides that the Secretary may sell public land located within the Boise District of BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

Washington County, Utah Land Acquisition Account.—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

Silver Saddle Endowment Account.—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1114), requires Carson City to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account established by paragraph (1) shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

Carson City Special Account.—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse BLM for administrative expenses.

Ojito Land Acquisition.—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

Miscellaneous permanent payments include:

Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.—The Secure Rural Schools and Community Self-Determination Act of 2000 (P.L. 106-393), as amended by P.L. 110-343 and by P.L. 112-141, provides annual transition payments to the 18 O&C counties. These payments were derived from revenues from Federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The last payment authorized under P.L. 106-393 was in 2006. Section 601 of Division C of P.L. 110-343 amended and reauthorized the Secure Rural Schools Act (P.L. 106-393). Payments authorized for 2012 by P.L. 112-141 were made in 2013. Amendments to P.L. 106-393 retained most provisions of the original Act, but reduced payments each year. Section 10(a) of P.L. 113-40, 127 Stat. 545, provided authorization for 2013, for payments made in 2014. Authority for Secure Rural Schools payments has not been enacted to make payments in 2015. Payments to western Oregon counties will be made under authorities provided in the 1937 and 1939 statutes. The Budget reflects a five-year reauthorization of the Secure Rural Schools Act with funding through mandatory appropriations beginning in 2015. Counties not opting to receive a portion of the USDA Forest Service payments to communities will receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75 percent of all revenues from Coos Bay Wagon Road grant lands.

Payments to States (proceeds of sales).—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc, public lands outside grazing districts.—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc, public lands within districts.—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—(A) P.L. 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues

are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) P.L. 105-263, as amended by P.L. 107-282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) P.L. 106-298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

Cook Inlet Region, Incorporated Account.—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of P.L. 94-204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

State 5 Percent Share, Carson City Land Sales.—The 2009 Omnibus Public Land Management Act, Public Law 111-11 (123 STAT. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, P.L. 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), P.L. 104-273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of fiscal year 2014. The Helium Stewardship Act of 2013 (HSA), P.L. 113-40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year, until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium will be reserved for Federal users. Additionally, HSA provides for a hard deadline to sunset the program and sell off the program assets by 2021.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). The marine environment includes vast deposits of oil and natural gas, non-energy minerals, as well as renewable resources such as offshore wind, wave and ocean currents. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. In carrying out this mission, the Bureau manages a range of OCS activities. This includes preparing a five-year oil and gas leasing program, which identifies OCS areas (parcels of the seafloor) to be offered to industry for development, and subsequently conducting oil and gas lease sales under the program. In addition, BOEM supports leasing and permitting for OCS renewable energy development, manages OCS sand and gravel resources, conducts environmental reviews, and oversees national resource assessments of oil, gas and other mineral resource potential on the OCS. As the Nation's designated steward of mineral resources on the OCS, BOEM works diligently to build a successful offshore program with a legal and regulatory framework that will provide for safe and environmentally sound OCS mineral resource development.

The Ocean Energy Management account includes the following budget activities: Renewable Energy, Conventional Energy, Environmental Programs, General Support Services, and Executive Direction.

Renewable Energy.—Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; issuance of offshore renewable energy leases; review of site assessment, construction, and operation plans; and consultation with state and local governments, other Federal agencies, and other stakeholders.

Conventional Energy.—Supports OCS oil and gas leasing, including planning the Five-Year OCS Oil and Gas Leasing Program; surveying OCS boundaries; conducting lease sales; administering leases; reviewing exploration and development plans; conducting technical and economic resource evaluation; and engaging in coastal and marine planning activities involving minerals other than oil and gas.

Environmental Programs.—Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with the National Environmental Protection Act and related regulations. Also conducts specific studies that address information needs associated with both conventional and renewable energy leasing activities on the Outer Continental Shelf.

General Support Services.—Funds shared support services for the Bureau, such as space, worker and unemployment compensation, voice and data communications, and other central services. In FY 2016, BOEM proposes to eliminate this activity through internal transfers to the other activities. The proposed change would have a net zero budgetary impact.

Executive Direction.—Funds bureau-wide leadership, management, coordination, communications strategies, and outreach. It includes budget management, Congressional and public affairs, and program policy and analysis.

COASTAL IMPACT ASSISTANCE

The Energy Policy Act of 2005 (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The program was transferred from the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE), now the Bureau of Ocean Energy Management (BOEM), to the U.S. Fish and Wildlife Service. Remaining balances from this program were transferred on October 1, 2011.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to aggressively enforce safety and environmental protection requirements for energy operations on the 1.7 billion-acre U.S. Outer Continental Shelf (OCS). The BSEE's mission is to promote safety, protect the environment, and conserve resources offshore through vigorous regulatory oversight and enforcement. The Offshore Safety and Environmental Enforcement (OSEE) account is BSEE's primary operating account. Activities include: Operations, Safety, and Regulation; Administrative Operations; and Executive Direction. The FY 2016 President's Request consolidates the General Support Services Activity (GSS) into the remaining OSEE Activities. This realignment is calculated based on activity FTE levels.

Operations, Safety, and Regulation.—Manages safety and environmental compliance activities associated with OCS oil and gas development plans and permits, including drilling permit application reviews; conducts facility inspections, including overseeing critical high-risk activities and identifying incidences of noncompliance with safety requirements; monitors industry compliance with mitigation and other environmental requirements; ensures offshore operators comply with oil spill planning and preparedness requirements; conducts accident investigations; oversees operator training and audit programs; conducts annual operator performance reviews; conducts research on emerging energy development technologies; and performs inspection verification of oil and gas production levels to help ensure the public receives a fair return from the sale of these public resources.

Administrative Operations.—Provides general administration and ethics programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. This activity also provides a full range of administrative and information management services to the Bureau of Ocean Energy Management (BOEM), as well as select services to other Departmental entities.

Executive Direction.—Provides bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. Conducts functions such as budget, congressional and public affairs, and policy and program analysis.

Environmental protection.—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs on Federal and Indian lands, as well as Federal oversight of these regulatory programs.

Technology development and transfer.—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical tools, such as the Applicant Violator System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

Financial management.—This activity provides resources for managing, accounting, and processing collections and for pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability

to deny new mining permits to applicants with unabated State or Federal violations.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

Environmental restoration.—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects and for the evaluation of State and tribal reclamation programs that now receive mandatory funding for reclamation activities.

Technology development and transfer.—This activity provides funding to enhance the technical skills that the States and Indian Tribes need to operate their reclamation programs. The Office of Surface Mining Reclamation and Enforcement (OSM) provides technical assistance on mining and reclamation-related problems.

Financial management.—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the Surface Mining Control and Reclamation Act's reclamation fee provisions.

Executive direction and administration.— This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

In order to address the continuing legacy of abandoned mine lands (AML) on the health, safety, and environment of communities, the Budget proposes to make available to States and Tribes \$1 billion from the unappropriated balance of the AML Trust Fund. The AML funding would be used to target reclamation of AML sites and associated polluted waters in a manner that promotes sustainable revitalization in economically depressed coalfield communities. Additionally, the budget proposes to return coal reclamation fee rates to their historic (pre-FY 2008) level.

P.L. 109-432, as amended, authorizes mandatory Treasury payments to all States and Tribes equivalent to their share of the accumulated balance of the Abandoned Mine Reclamation Fund (i.e. prior balance funds). Prior balance fund payments were made over the past seven years and were exhausted in FY 2015. The payments also return half of annual coal fee collections to States and Tribes that have certified completion of their abandoned coal mine reclamation programs, with a limitation of funding levels available to each certified State and Tribe of not more than \$15 million in FY 2016 (P.L. 112-141, Sec 100125).

The Budget proposes to eliminate mandatory payments from the Treasury to States and Tribes that have been certified as completing reclamation of their abandoned coal mines, so that abandoned mine lands funds are only used to clean up the most hazardous abandoned coal mines. The Budget also proposes to return coal reclamation fee rates to their historic (pre-FY 2008) levels so that additional funding will be available to reduce some of the remaining dangerous coal AML sites nationwide.

P.L. 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the fund are used to generate interest for this purpose.

Under current law, total obligations derived from the general fund for Surface Mining, Control, and Reclamation Act (SMCRA) purposes cannot exceed \$490 million a year. The Budget includes legislative proposals that would: (1) revise the formula for general fund payments to the 1993 Health Benefit Plan by taking into account all beneficiaries enrolled in the Plan as of enactment, as well as those retirees whose health benefits were denied or reduced as the result of a bituminous coal industry bankruptcy proceeding commenced in 2012, and (2) transfer to the 1974 UMWA pension plan the difference between that cap and other OSM obligations to the states and other health care plans. Payments would be made by the Pension Benefit Guaranty Corporation within the Department of Labor. The 1974 plan, which covers more than 100,000 miners, is underfunded and approach-

ing insolvency. Payments would continue until the plan is fully funded on a current liability basis.

ADMINISTRATIVE PROVISION

■ In fiscal year 2015 and each fiscal year thereafter, with funds available for the Technical Innovation and Professional Services program in this or any other Act with respect to any fiscal year, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs. (Department of the Interior, Environment, and Related Agencies Appropriations Act, 2015.)

WATER AND SCIENCE

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the General Fund and special funds. The source of funds are a) the General Fund, which funds other projects or programs. Among the projects funded from the General Fund are the Colorado River Basin Project and the Colorado River Storage Project; b) the Reclamation Fund, derived from repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. Program activities that can be financed from the Reclamation Fund are those that directly benefit the 17 Western States and are for the purposes authorized under "Reclamation Law"; c) the Central Valley Project Restoration Fund, consisting of revenues from project beneficiaries; and d) other sources such as the Colorado River Dam Fund, which generates revenue from the sale of Boulder Canyon power, and the recreation, entrance, and user fee account, consisting of fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies. The American West faces serious water challenges. Adequate and safe water supplies are fundamental to the health, economy, security, and ecology of the country. With increased demands for water, amplified recognition of environmental water requirements, and the potential for decreased supplies due to drought and climate change, a water balance cannot be achieved without water conservation and water reuse. In 2016, Reclamation will help address these issues through a water conservation program, which includes cost-shared grants for conservation and water and energy management improvement projects; basin-wide planning studies that will evaluate and address the impacts of climate change; cooperative watershed management; and funding of water reuse and recycling projects. Reclamation will also partner with States, Tribes and local entities under the program to develop incentives and best practices for implementing water and energy conservation and water recycling projects.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council et. al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The requirement for contributions from the State, the Secretary, and the Conservancy District ended in 2001. The requirement for contributions from the Western Area Power Administration ended in 2013. Funds are deposited into the account as principal and may not be expended for any purpose. Interest earned annually on the account is available for expenditure without further appropriations by the Utah Reclamation Mitigation and Conservation Commission which has the option to use the funds for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources, or to reinvest the funds into the account as principal.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues, including the water, land, geologic, and biological resources of the Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

Ecosystems.—The USGS Ecosystems mission area monitors and inventories biological resources and ecological systems; provides scientific information for the management of biological resources and their habitats; studies and predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats; conducts high priority ecological and biological research needed by Interior for sound management decisions; and operates the Cooperative Research Unit program, a university-based fish and wildlife research program focusing on graduate education and training of future natural resource professionals.

Climate and Land Use Change.—The USGS Climate and Land Use Change mission area conducts scientific research, monitoring, remote sensing, modeling, and forecasting to address the effects of climate and land use change on the Nation's natural resources. The resulting research and products are provided as the scientific foundation upon which policy-

makers, natural resource managers, and the public make informed decisions about the management of natural resources. Landsat satellites and data systems are developed, operated, and maintained to ensure a continuous global record of moderate-resolution land images.

Energy, Minerals, and Environmental Health.—The USGS Energy, Minerals, and Environmental Health mission area includes scientific activities that support decision making related to natural resource security; environmental, wildlife, and human health; land and resource management; and economic development. The mission area provides scientific information for assessments and research on mineral and energy resource potential, production and consumption, and environmental impacts of permitting, extraction, and use in the United States and around the world. The mission area also provides information and tools to decision makers and the public regarding environmental contaminants, including impacts on susceptible ecosystems and implications for human, wildlife and fish health.

Natural Hazards.—The USGS plays a critical role in providing policy-makers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, solar storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

Water Resources.—The USGS is one of the primary Federal science agencies that provides information about water resources. To fulfill this responsibility, the USGS Water Resources mission area produces data, analyses, and assessments, and develops methodologies to support Federal, State, tribal, and local government decisions in managing water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

Core Science Systems.—The USGS Core Science Systems mission area conducts fundamental research and provides data about the Earth, its complex processes, and its natural resources. These activities provide the Nation with natural science information to support response planning for natural hazards and to manage natural resources. Core Science Systems produces geological, geographical, geophysical, and geochemical maps and three-dimensional geologic frameworks that provide critical data for sustaining and improving the quality of life and economic vitality of the Nation. As the Federal steward of elevation and hydrography information, Core Sciences Systems makes this information and other geospatial information available to the public through The National Map. This mission area creates the informatics framework and provides scientific content needed for understanding and stewardship of our Nation's ecological, geologic, and geospatial resources.

Science Support.—The USGS Science Support mission area provides Bureau-wide executive direction and coordination, business administration and financial management, and management of information technology infrastructure, processes and systems.

Facilities.—The USGS Facilities mission area provides safe, functional workspace, state of the art labs, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and maintenance and capital improvement for existing assets.

Reimbursable program.—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds

from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

Ecological Services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse

environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

Habitat Conservation.—Through technical and financial assistance, the Service promotes the protection, conservation and restoration of the nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 562 refuges, waterfowl production areas in 209 counties managed by 38 wetland management districts, and 50 wildlife coordination areas. The National Wildlife Refuge System administers this network of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

Conservation and Enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as the Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with private citizens, local communities, State and Federal agencies, foreign governments, and non-governmental organizations in the United States and internationally to promote a coordinated domestic and international strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

Fish and Aquatic Conservation.—The Fish and Aquatic Conservation Program consists of 72 interconnected National Fish Hatcheries, one historic National Fish Hatchery, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

Cooperative Landscape Conservation.—Through a national network of Landscape Conservation Cooperatives (LCCs), and in cooperation with both Federal and non-Federal partners, the Service enhances its core capacity in biological planning and conservation design to strategically address the problems fish, wildlife, and plants will face in the future. The information gathered helps to define clear conservation objectives, inform conservation management decisions, focus management actions where they will most affect the landscape, and supply scientific knowledge and expertise needed most by the Service and its partners.

Science Support.—Science Support provides funding for applied science directed at high impact questions surrounding threats to fish and wildlife resources. This science provides critically needed information to inform regulatory and policy decisions to best manage species at healthy and sustainable levels across broader landscapes.

General Operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund the best outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet.

2016 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

Mandatory Land and Water Conservation Fund.—The Administration proposes \$900 million in discretionary and mandatory funding in FY 2016, and proposes to permanently authorize \$900 million in annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs beginning in FY 2017.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of Postal Service expenses from the

sale of Migratory Bird Hunting and Conservation Stamps, i.e. Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The 2016 budget proposes legislation to enable future stamp fee increases with the approval of the Migratory Bird Conservation Commission.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed, or species that are candidates for listing, as threatened or endangered. These activities support

recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account are financed by the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by Congress.

Mandatory Land and Water Conservation Fund.—The Administration proposes \$900 million in discretionary and mandatory funding in FY 2016, and proposes to permanently authorize \$900 million annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs, including the Cooperative Endangered Species Conservation Fund program, beginning in FY 2017.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Service fee lands are located from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. While direct appropriations have previously been used to supplement revenues, the 2016 Budget eliminates discretionary funding as formulas contained in the Act do not account for the economic benefits which refuges provide.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 U.S. Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at U.S. Fish and Wildlife Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The FLREA authorizes this program through 2014 and the program was extended until 2015 in the Continuing Appropriations Act, 2014 (P.L. 113-46).

The Administration proposes legislation to permanently authorize the recreational fee programs of the Departments of the Interior and Agriculture under FLREA. The Consolidated and Further Continuing Appropriation Act of 2015 (P.L. 113-235) extended FLREA's authorization of the fee programs through September 30, 2016.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration

Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In FY 2011, this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the U.S. Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses, special commissions, the Boating Council, and Multistate Grants, be distributed to support the following:

The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.).—18.5 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the U.S. Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the U.S. Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

Boating Safety Programs.—18.5 percent of net deposits are to be made available to the Department of Homeland Security (United States Coast Guard) for state recreational boating safety programs.

The Clean Vessel Act.—2 percent of net deposits are to be made available to the Secretary of the Interior for grants to States, Commonwealths, the District of Columbia and Territories, as determined through a competitive

award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage.

National Outreach and Communications Programs.—2 percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

Boating Infrastructure Programs.—2 percent of net deposits are to be made available to the Secretary of Interior to make grants to States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer.

The remaining 57 percent is provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use.

The National Park Service administers 405 areas and over 84.5 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. In FY 2013, park visits totaled 277 million. This annual appropriation funds the operation of areas and facilities administered by the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are both available for two years.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

Resource stewardship.—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

Visitor services.—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of concession contracts, commercial use authorizations, and franchise fees for the benefit of visitors and the protection of resources.

Park protection.—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

Facility operations and maintenance.—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

Park support.—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the following budget activities:

Federal land acquisition administration.—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws.

Federal land acquisition.—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Civil War Battlefield lands by non-Federal entities. The 2016 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

State conservation grants administration.—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities.

State conservation grants.—This activity provides matching grants to States and local units of government for the acquisition and development of land and facilities that will provide the public access to new opportunities to engage in outdoor recreation. Beginning in 2014, in addition to the traditional grants described above, the account includes a competitive grant program for States.

Outer Continental Shelf Oil Lease Revenues.—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009 (P.L. 111-8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

Recreation Fee Program.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, and authorized this program through 2014. The Consolidated and Further Continuing Appropriations Act, 2015, extended FLREA through fiscal year 2016. The Administration proposes to permanently reauthorize the Department of the Interior's and the Department of Agriculture's recreation fee programs in fiscal year 2016. Net proceeds are used for high-priority visitor service and facility maintenance projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of

Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with P.L. 108–447.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with P.L. 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of P.L. 105–391.

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, and Indian Tribes. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. Beginning in 2014, in addition to the traditional grants-in-aid described above, the account includes a competitive grant program for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks. Beginning in 2016, the budget proposes competitive grant programs, including grants-in-aid to Historically Black Colleges and Universities, to commemorate the sites and stories of the Civil Rights Movement.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of P.L. 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of P.L. 105-391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

Delaware Water Gap, Route 209 operations.—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by P.L. 98-63 (97 Stat. 329), section 117 of P.L. 98-151 (97 Stat. 977) as amended by P.L. 99-88 (99 Stat. 343), and section 702 of Division I of P.L. 104-333 (110 Stat. 4185). The appropriation was reauthorized in fiscal year 1997 by P.L. 104-333 and in fiscal year 2006 by P.L. 109-156.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of P.L. 104-333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

Contributions to US Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under P.L. 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

This account covers expenses associated with the following activities:

Tribal Government.—This activity promotes the sovereignty of Federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

Human services.—This activity provides funding for social services, housing improvement, welfare assistance, and Indian child welfare. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to protect children, the elderly, and disabled from abuse and neglect.

Trust: Natural resources management.—This activity provides for the management, development, protection, and resilience of Indian trust land

and natural resource assets. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks.

Trust: Real estate.—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

Education.—This activity supports Bureau of Indian Education (BIE) tribal elementary and secondary school operations, other education programs for elementary-aged Indian children, tribal post-secondary schools, education program management, and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

Public safety and justice.—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; and facilities maintenance.

Community and economic development.—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic and social benefit of the Tribes and individual Indian allottees.

Executive direction and administrative services.—This activity supports the management of BIA's and BIE's finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of GSA and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with Federally-recognized Tribes to run tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in central and regional offices.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), the American Indian Probate Reform Act of 2004 (P.L. 108–374), and other authorities. No funding is requested in 2016 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (P.L. 111–291, Title I) to address fractionation is in a separate account in the Office of the Secretary.

Donations and contributed funds.—The Secretary of the Interior may accept donations of funds or other property, and may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: *Provided*, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: *Provided further*, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects. (*Department of the Interior, Environment, and Related Agencies Appropriations Act, 2015.*)

This appropriation supports the functions of the Office of the Secretary of the Interior, including executive-level leadership, policy, guidance, and coordination of the responsibilities carried out by its bureaus and offices. In addition, the appropriation supports programmatic functions carried out by the Office of the Secretary including mineral revenue collections, the Take Pride in America program, the Department's quasi-judicial and appellate responsibilities, and the Office of Valuation Services. The appropriation also provides for workers and unemployment compensation payments for former Bureau of Mines employees.

Coastal Resilience Fund.—The Budget proposes to establish a new Coastal Resilience Fund for projects that increase community and ecosystem resilience through the restoration of natural systems that have a physical or ecological nexus to Federal lands. This new program will expand the footprint of healthy ecosystems to deliver valuable ecosystem services, including flood attenuation and storm risk reduction, to nearby communities.

Office of Natural Resources Revenue (ONRR).—The Office of Natural Resources Revenue's mission is to collect, disburse, and verify Federal and Indian energy and other natural resources revenues on behalf of all Americans. Revenues collected by ONRR represent a significant source of non-tax revenue to the Federal Government. The ONRR disburses mineral revenues to States, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury. Through ONRR, the Administration will continue to implement mineral revenue collection and reporting reforms, including the implementation of the Extractive Industries Transparency Initiative, and the implementation of recommendations from the Government Accountability Office, the Department's Inspector General, and others.

Under the Mineral Leasing Act, States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State (exclusive of the National Petroleum Reserve-Alaska). To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget

Act permanently amended the Mineral Leasing Act (MLA) to deduct two percent from the required payments to States under the Act.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by the Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

Terminate geothermal payments to counties.—The Budget proposes to repeal the 25 percent geothermal lease revenue sharing payments to counties established by the Energy Policy Act of 2005 (P.L. 109–58) and return to the traditional 50/50 Federal-State revenue sharing arrangement. States have the flexibility to allocate their share of revenue from Federal leases to counties, if appropriate.

The Gulf of Mexico Energy Security Act of 2006 (GOMESA, P.L. 109–432) opened some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) and their local governments based on a complex allocation formula.

STATES SHARE FROM CERTAIN GULF OF MEXICO LEASES

(Legislative proposal, subject to PAYGO)

Under the Administration's all-of-the-above energy strategy, domestic oil and gas production has grown each year. Offshore, the Department has made 60 million acres available for development in the past three lease sales alone. The Administration is committed to ensuring that American taxpayers receive a fair return from the sale of public resources and taxpayers throughout the country benefit from the development of offshore energy resources owned by all Americans. The Administration proposes to work with the Congress on legislation to redirect funds currently allocated to GOMESA revenue sharing payments to select states from Gulf of Mexico oil and gas leases. The Administration proposes to redirect these payments, which are set to expand substantially starting in FY 2018, to programs that provide broad natural resource, watershed and conservation benefits to the Nation, help the Federal Government fulfill its role of being a good neighbor to local communities, and support other national priorities. Such programs could include the Land and Water Conservation Fund, Payments In Lieu of Taxes, State and Tribal Wildlife Grants, Federal coastal restoration and resilience programs, or other national priorities.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established this fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established a new trust land consolidation fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account are being used to improve basic economic information and financial management capabilities in the insular areas; address compact impact related issues; and also for brown tree snake control.

COMPACT OF FREE ASSOCIATION

For grants and necessary expenses, \$3,318,000, to remain available until expended, as provided for in sections 221(a)(2) and 233 of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188. The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, P.L. 108-188, continues financial assistance to the Federated States

of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99-658, and was implemented on October 1, 1994. While the financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, subsequent appropriations in 2010 through 2015 have continued financial assistance to Palau at 2009 levels.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office focuses on providing the Secretary and Congress timely and relevant information regarding the Department's most serious management and program challenges, with a special concentration on high-risk areas vulnerable to fraud, waste, and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

P.L. 94-565 (31 U.S.C. 6901-07), as amended, authorizes payments in lieu of taxes ("PILT payments") to counties and other units of local government for lands within their boundaries that are administered by the Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal

land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

Since the inception of the PILT program in 1977 through FY 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113-79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113-235) extended PILT payment authority through 2015.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the United States and the State of Alaska issued a demand letter for \$92 million to the ExxonMobil Corporation, as well a comprehensive restoration project plan for the clean up of lingering oil. Negotiations with ExxonMobil await completion of additional scientific studies.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$200 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska (*Exxon Valdez* Investment Fund), with funds used for general restoration, habitat acquisition and protection, monitoring and research, public information, and science management and administration.

The 2016 Budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, to establish a new budget framework for the Wildland Fire Management program that is designed to provide stable funding for fire suppression, while minimizing the adverse impacts of fire transfers on the budgets of other fire and non-fire programs, as well as reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. In this proposed new budget framework, a portion of the funding needed for suppression response is funded within the discretionary spending limits and a portion is funded in an adjustment to those limits. In addition, it does not increase overall discretionary spending, as it would reduce the ceiling for the existing disaster relief cap adjustment by an equivalent amount as is provided for wildfire suppression operations. More details are provided in the *Budget Process* chapter in the Analytical Perspectives volume.

Preparedness.—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

Suppression Operations.—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. In FY 2010 through 2015, funding for the ten-year average of inflation-adjusted suppression obligations is split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The Budget request proposes an adjustment to the discretionary spending limits as a new approach for responsibly budgeting for wildland fire suppression to minimize the risk of fire transfers and provide more stability and certainty of funding to other programs to invest in critical forest and rangeland management needs. The Budget proposes base level funding of 70 percent of the 10-year average of suppression costs to be funded within the discretionary cap. The proposed cap adjustment would fund the remaining identified need for Suppression. The base level of funds ensures that the cap adjustment is only used for the most severe fire activity since it is one percent of the fires that results in 30 percent of the costs. In FY 2016, 70 percent of the 10-year average is \$269 million. The amount requested in the cap adjustment equals the difference between the total amount of suppression expenditures projected for the fiscal year, based on the Outyear Forecast developed by the U.S. Forest Service's Southern Research Station, and the 70 percent of the 10-year suppression average that is requested within the discretionary budget caps. For 2016, the request for the budget cap adjustment is \$200 million. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

Fire Risk Management.—Is a new program activity proposed in FY 2016. It funds two programs, Fuels Management and Resilient Landscapes, previously included within Other Operations. The Fuels Management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. The Resilient Landscapes program will conduct treatments that improve the integrity and resilience of our forests and rangelands. These treatments will be coordinated with and receive support, including bureau matching funds, from resource management programs of the Interior fire bureaus. The Fire Risk management activity will contribute community adaption to fire and improve the ability to safely and appropriately respond to wildfire. The budgets for the Fire Risk Management activity cover the planning, operational aspects, and monitoring of treatments. Both programs will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

Other Operations.—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance

of facilities to house firefighters and equipment used in wildland firefighting, fuels management, and resilient landscapes activities. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an inter-agency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

Amounts in the FLAME fund include the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary may permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event that DOI has exhausted its suppression resources due to an active fire season. In 2016, the Budget proposes to eliminate this account and will fund all suppression activities in the Wildland Fire Management account, with a portion of the suppression funds requested within the discretionary budget cap and a portion of the funds requested in a budget cap adjustment.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC), formerly the National Business Center. Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide payroll providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, Service First, the care and management of the Department's cultural collections, and DATA Act compliance activities.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology (IT). Under the control of the DOJ Chief Information Officer, this centralized fund ensures that investments in information sharing technology are well-planned and aligned with the Department's overall IT strategy and enterprise architecture. The current major initiatives/projects are described below.

IT Transformation and Cyber Security Program.—The JIST IT Transformation and Cyber Security Program is a multiyear commitment that directly supports the Federal CIO's 25 Point Plan to Reform Federal IT Management and Portfolio Stat (PSTAT) process. The focus of the program is to advance enterprise initiatives to transform IT infrastructure and cyber security. This program consists of the following projects: cyber security, email consolidation, data center consolidation, mobility and remote access, and desktops.

Law Enforcement Information Sharing Program (LEISP).—LEISP is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the IT tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

Public Key Infrastructure (PKI) Program.—The PKI program is tasked with ensuring DOJ compliance with Homeland Security Presidential Directive 12 (HSPD-12) which strengthens federal facility and IT system access security.

Unified Financial Management System.—The Unified Financial Management System will allow the Department of Justice to streamline and standardize business processes and procedures across components, providing secure, accurate, timely, and useful financial and procurement data to program managers, and to produce component and Department level financial statements.

Digital Service Team.—The 2016 Budget includes \$7.4 million for staffing to build a Digital Service team that will focus on transforming the Department's digital services with the greatest impact to citizens, communities and organizations so they are easier to use and more cost-effective to build and maintain. These digital service experts will bring private sector best practices in the disciplines of design, software engineering, and product management to bear on the Department's most important services. The positions will be term-limited, to encourage a continuous influx of up-to-date design and technology skills into the agency. The digital service experts will be recruited from among America's leading technology enterprises and startups, and will join with the Department's top technical and policy leaders to deliver meaningful and lasting improvements to services to citizens, communities and organizations.

This program includes the Office of the Pardon Attorney (OPA) and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives, reviews, and prepares recommendations to the President for all petitions for executive clemency, i.e., commutation of sentences and pardons, submitted by persons convicted of Federal crimes. EOIR was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. Besides establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 58 Immigration Courts nationwide, BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decision makers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and Congress and of vital importance to the Department.

The Executive Direction and Control function provides program direction for the OIG. Responsibilities include policy development, legal counsel, congressional affairs, planning, budget, finance, personnel, procurement, automated data processing, security, and general support services.

The United States Parole Commission is responsible for (1) making parole release and revocation decisions for all parole-eligible federal and District of Columbia Code offenders; (2) setting and enforcing the conditions of supervised release for District of Columbia Code offenders; (3) making release decisions for United States citizens convicted of a crime in another country who voluntarily return to the United States for service of sentence; (4) performing parole-related functions for certain military and state offenders; and (5) exercising decision-making authority over state offenders who are on the state probation or parole, and are transferred to federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105-33).

The following legal activities of the Department are financed from this appropriation:

Supreme Court proceedings and appellate matters.—The Office of Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower federal courts, and supervises the handling of litigation in the federal appellate courts.

General tax matters.—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws,

maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

Criminal matters.—The Criminal Division develops, enforces, and supervises the application of all federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

Claims, customs, and general civil matters.—The Civil Division represents the Federal Government in civil litigation to defend federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

Environment and natural resource matters.—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, and the acquisition of Federal property.

Legal opinions.—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

Civil rights matters.—This program enforces the Nation's federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

INTERPOL Washington.—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts, and coordinating and integrating information for investigations of an international nature.

Reimbursable programs.—This reflects reimbursable funding for the following:

Civil Division.—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

Criminal Division.—For activities related to healthcare fraud and drug prosecutions, international training programs and asset forfeiture related activities;

Environment and Natural Resources Division.—From numerous client agencies for automated litigation support and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency (EPA) for Superfund enforcement litigation; and,

Civil Rights Division.—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Federal Trade Commission (FTC) and the Department of Justice Antitrust Division are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino (HSR) fees, are collected by the FTC and split evenly between the two agencies. In 2016, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs. The Budget proposes to increase the HSR fees and index them for the percentage annual change in the gross national product. The fee proposal would also create a new merger fee category for mergers valued at over \$1 billion. Under the proposal, the fee increase would take effect in 2017.

The Federal Prisoner Detention (FPD) account is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD account provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

For 2016, FPD requests funding for housing, medical, and transportation costs associated with the projected USMS detention population. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); (2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and (3) Private performance-based contract facilities, where a daily rate is paid. Over three-quarters of the USMS's Federally

detained population will likely be housed in State, local, and private facilities.

The USMS continues to look for efficiencies and cost reductions and avoidance in detention through process and infrastructure improvements. The costs associated with these efforts will be funded from the FPD account. Proven successes in the detention infrastructure include implementation of eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. The USMS will continue to identify issues and develop solutions to drive further efficiencies.

The Community Relations Service (CRS) is an agency of the Department of Justice that provides assistance to state and local communities in the prevention and resolution of tension, violence, and civil disorders relating to actual or perceived discrimination on the basis of race, color, or national origin. The Service also works with communities to employ strategies to prevent and respond to alleged violent hate crimes committed on the basis of actual or perceived race, color, national origin, gender, gender identity, sexual orientation, religion or disability. CRS helps local leaders, including community members, law enforcement, government officials, and affected parties work together on a voluntary basis to develop locally defined and locally implemented solutions. As a result, CRS builds community capacity to manage conflicts and create permanent mechanisms so communities can independently resolve future conflicts. By empowering communities to prevent hate violence and address tension associated with alleged discrimination, CRS helps law enforcement, community leaders and city officials

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) reopens the September 11 Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical

harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts. The James Zadroga 9/11 Health and Compensation Act of 2010 makes available up to \$2.775 billion for settlement of new claims through the VCF.

United States Trustee System Fund.—The United States Trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99–554) expanded the pilot trustee program to a twenty-one region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109–8) expanded United States trustees' existing responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal prisoners and detainees, including sentenced and pretrial, in the custody of the United States Marshals Service or the Bureau of Prisons via coordinated air and ground systems. JPATS also transports prisoners and detainees on a reimbursable space-available basis, with the Department of Defense and other participating executive departments and State and local agencies without sacrificing the safety of the public, Federal employees, or those in custody. Customers are billed based on the number of flight hours and the number of seats utilized to move their prisoners.

The Interagency Crime and Drug Enforcement (ICDE) account primarily funds the Organized Crime Drug Enforcement Task Forces (OCDETF) Program. Along with the participation of its seven member federal law enforcement agencies, in cooperation with state and local investigators and with prosecutors from the U.S. Attorneys' Offices and the Criminal Division, OCDETF focuses on targeting and destroying major domestic and transnational criminal organizations who engage in high level drug trafficking, drug-related violence and money laundering, as well as national emerging drug threats such as heroin and other drug related criminal activities. The Program performs the following activities:

Investigation.—This activity includes resources for direct investigative, intelligence and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major criminal organizations engaged in the highest level of drug trafficking and money laundering, that supply illegal drugs to the U.S. and fuel the attendant violence. This includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center whose mission is to analyze fused law enforcement financial and human intelligence information and produce actionable intelligence for use by OCDETF member agencies to disrupt and dismantle those criminal organizations, and their supporting financial structures, posing the greatest illegal drug threat to the United States. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and Homeland Security Investigations. OCDETF also maintains 11 co-located Strike Forces. The Interagency Crime and Drug Enforcement account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2), which is a multi-agency intelligence center whose mission is to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple federal agencies participate in IOC-2 activities and related investigations. For 2016, ICDE requests an additional \$1.8 million for IOC-2 to fund operational expenses and personnel.

Prosecution.—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle drug trafficking and money laundering organizations in their entirety, most notably by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice's Criminal Division.

The mission of the FBI is to protect the United States from terrorist and foreign intelligence activities; to uphold the law through the investigation of violations of federal criminal law; to provide leadership and assistance to federal, state, local, and international law enforcement agencies; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's strategic priorities are, in order:

- Protect the United States from terrorist attack,
- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,
- Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices and over 360 smaller offices (resident agencies); the

FBI Academy, Laboratory, and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 60 Legal Attaché (Legat) offices and more than 20 sub-offices in 70 foreign countries worldwide; and FBI Headquarters divisions in the Washington, D.C metropolitan area.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other federal agencies for certain intelligence and investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2016, the FBI is requesting a total of \$8.415 billion, to include \$20 million in program enhancements for the Next Generation Cyber Initiative and the Intelligence Community Information Technology Enterprise (IC ITE). The request includes a reduction of \$50.4 million for non-recurring program expenses and a \$120 million cancellation of excess Criminal Justice Information Services (CJIS) surcharge balances.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. DEA also places a high priority on targeting the financial infrastructure of major drug trafficking organizations and members of the financial community who facilitate the laundering of their proceeds. From the beginning of 2005 to 2014, DEA denied drug traffickers a cumulative total of 29.6 billion in revenue through the seizure of both assets and drugs, with \$3.9 billion just in FY 2013. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 221 domestic offices organized in 21 divisions throughout the United States. Internationally, DEA has 86 offices in 67 countries and has responsibility for coordinating and pursuing U.S. drug investigations abroad. Federal, state, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 41 years, DEA has led a task force program that today includes over 2,200 task force officers participating in 269 task forces. The El Paso Intelligence Center (EPIC) and Special Operations Divisions (SOD) have become vital resources for federal, state and local law enforcement. Through its Office of National Security Intelligence, DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three main decision units:

Domestic Enforcement.—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established as follows:

- Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

International Enforcement.—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

- Identify, prioritize, and target the most significant international drug and chemical trafficking organizations;

- Disrupt and dismantle the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

- Prevent drug trafficking organizations from funding terrorist organizations and activities.

State and Local Assistance.—DEA responds to clandestine laboratory training requirements and hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports state and local law enforcement with methamphetamine-related assistance and training, which allows state and local agencies to better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. Because of DEA's nation-wide contracts, container program, and established training programs, DEA is able to provide state and local lab cleanup and training assistance in a cost-effective manner.

DEA also receives funding through reimbursable agreements. The primary reimbursements to DEA are for the Organized Crime Drug Enforcement Task Forces (OCDETF) Program and the Department of Justice's (DOJ) Assets Forfeiture Fund (AFF).

In FY 2016, DEA requests enhancements to its case management and de-confliction systems, the IT infrastructure at the El Paso Intelligence Center (EPIC), its national security program, and its international enforcement efforts within the Bilateral Investigations Unit (BIU) and Sensitive Investigative Units (SIUs).

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the

Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

- Identify and target those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;
- Support the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;
- Educate the public on the dangers of prescription drug abuse and take proactive enforcement measures to combat emerging drug trends; and,
- Ensure an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self sustaining manner as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other federal departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112-55), FPI received two new authorities to increase inmate employment. The first enables FPI to recapture work performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program (PIECP), which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2016 Budget requests \$151,900,000 for the Office of Justice Programs' (OJP) Research, Evaluation, and Statistics appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; develop and disseminate of quality statistical and scientific information; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's Federal, state, local, and tribal law enforcement and criminal justice agencies. Additionally, the Administration has developed a strategy to address recent domestic terror incidents and the emergence of groups attempting to recruit Americans to take part in ongoing conflicts in foreign countries. As part of this effort, DOJ's Countering Violent Extremism (CVE) initiative is an Administration priority and supports the United Nations efforts to address foreign terrorist fighters. Additional resources are provided to support community led-efforts, including \$4 million to conduct research targeted toward developing a better understanding of violent extremism and advancing evidence-based strategies for effective prevention and intervention.

Research, Development, and Evaluation Program.—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721–3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ

research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources on crime control and related justice issues to provide objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. Planned activities include but are not limited to: (1) Social science research addressing, among other topics: human trafficking; evaluation of anti-gang programs; policing; crime and justice; children exposed to violence; sentencing alternatives to incarceration; elder abuse; as well as demonstration field experiments in reentry and probation; (2) Provision of criminal justice-focused technology assistance to units of state, local and tribal government; (3) Criminal justice research infrastructure investments including funding for the National Criminal Justice Reference Service and the National Archive of Criminal Justice Data; (4) Development of equipment performance standards and conduct of compliance testing to help ensure the safety and effectiveness of the equipment used by criminal justice agencies, such as body armor, restraints, holsters, and video systems; and (5) Development of new tools and technologies for law enforcement, corrections, and forensic applications, including those aimed at improving officer safety, knowledge management, and community supervision.

In 2016, NIJ will continue to pursue research and evaluation projects to encourage the development and adoption of new crime-fighting tools, improve understanding of what works (and what does not) in criminal justice programs and policy, and expand understanding of complex criminal justice issues. The 2016 Budget proposes \$52,500,000 for the Research, Development, and Evaluation Program. Of this amount, \$3,000,000 is for Social Science Research on Indigent Defense, \$5,000,000 is for development of an improved means to conduct Digital Forensics of Large-Scale Computer Systems and Networks, and \$2,700,000 is for Civil Legal Aid Research.

Forensic Science Improvement.—Continuing improvement is needed in the forensic sciences, which are crucial to ensuring the accuracy of evidence presented in criminal justice trials. The 2016 Budget proposes \$6,000,000 for this program. Of this amount, \$3,000,000 will be transferred by NIJ to NIST for measurement science and standards in support of forensic science.

Criminal Justice Statistics Program.—The Bureau of Justice Statistics (BJS) serves as the principal statistical agency within the Department of Justice, as authorized by 42 U.S.C. 3721–3735, and assists state, local, and tribal governments in enhancing their statistical capabilities. It disseminates high quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program encompasses a wide range of criminal justice topics, including: (1) victimization; (2) law enforcement; (3) prosecution; (4) courts and sentencing; (5) corrections; (6) recidivism and reentry; (7) tribal justice statistics; (8) justice expenditures and employment; (9) international justice systems; and (10) drugs, alcohol, and crime. In addition to collecting and analyzing statistical data, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state SACs, BJS promotes efforts to coordinate statistical activities within the states and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent agencies within their states. Further, the Criminal Justice Statistics Program will expand on its base of work in 2016 by enhancing the quality and availability of statistics in a number of areas including: (1) criminal victimization via the redesign of the National Criminal Victimization Survey (NCVS), which is the sole continuous source of national information for many topics related to crime and victimization rates for the Administration and Congress, state and local law enforcement, and the research community; (2) law enforcement administration; (3) state & Federal adjudication and sentencing; (4) jail and prison statistics; (5) recidivism and reentry data; (6) white collar crime and (7) statistics on American Indians in the criminal justice system. The 2016 Budget proposes \$61,400,000 for the Criminal Justice Statistics pro-

gram. Of this amount, \$6,000,000 is for the National Crime Victimization Survey Sample Boost for Subnational Estimates program; \$1,000,000 is for the National Survey of Public Defenders for Indigent Defense; and \$1,500,000 is for the National Public Defenders Reporting Program for Indigent Defense.

Regional Information Sharing System (RISS).—RISS is a national criminal intelligence system operated by and for state and local law enforcement agencies. The RISS regional centers facilitate information sharing and communications to support member agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, secure information-sharing technology, and secure encrypted email and communications capabilities to over 6,000 municipal, county, state, and Federal law enforcement agencies nationwide. The 2016 Budget proposes \$25,000,000 for this program.

Evaluation Clearinghouse.—The 2016 Budget requests \$3,000,000 for the continued development and deployment of CrimeSolutions.gov, which uses rigorous research to inform practitioners and policymakers about what works in criminal justice, juvenile justice, and crime victim services.

Research on Domestic Radicalization.—The 2016 Budget requests \$4,000,000 for research targeted toward developing a better understanding of the domestic radicalization phenomenon, and advancing evidence-based strategies for effective intervention and prevention.

These programs provide Federal leadership on high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, information sharing, and related justice system issues. OJP's formula and discretionary grant programs, coupled with training and technical assistance activities, assist law enforcement agencies, courts, local community partners, and other components of the criminal justice system in preventing and addressing violent crime, protecting the public, and ensuring that offenders are held accountable for their actions. Additionally, the Administration has developed a strategy to address recent domestic terror incidents and the emergence of groups attempting to recruit Americans to take part in ongoing conflicts in foreign countries. As part of this effort, DOJ's Countering Violent Extremism (CVE) initiative is an Administration priority and supports the United Nations efforts to address foreign terrorist fighters. The Office of Community Oriented Policing Services (COPS) administers grant programs to assist law enforcement agencies in advancing public safety through the implementation of community policing strategies in jurisdictions of all sizes across the country. Community policing represents a shift from more traditional law enforcement and focuses on proactive collaborative efforts and the use of problem-solving techniques to prevent and respond to crime, social disorder, and fear of crime. COPS provides funding to state, local, and tribal law enforcement agencies and other public and private entities to hire and train community policing professionals, acquire and deploy cutting-edge crime-fighting technologies, and develop, test, and implement innovative policing strategies. COPS funding also provides training and technical assistance to community members, local government leaders, and all levels of state, local, and tribal law enforcement. Up to three percent of funds may be made available for research, evaluation and statistical purposes, in addition to any amounts that are otherwise available for such purposes. Additionally, the Administration has developed a strategy to address recent domestic terror incidents and the emergence of groups attempting to recruit Americans to take part in ongoing conflicts in foreign countries. As part of this effort, DOJ's Countering Violent Extremism (CVE) initiative is an Administration priority and supports the United Nations efforts to address foreign terrorist fighters. Additional resources are provided to support community led-efforts, including \$3 million for demonstration projects that enhance the ability of law enforcement agencies nationwide to partner with local residents, business

The Budget requests \$473,500,000 for programs administered by the Office on Violence Against Women (OVW) to prevent and respond to violence against women and related victims. OVW provides national leadership against domestic violence, dating violence, sexual assault, and stalking, and supports a multifaceted approach to responding to these crimes. Funding will support the Prevention and Prosecution of Violence Against Women and Related Victim Services Program. Up to three percent of funds may be made available for research and evaluation purposes, in addition to any amounts that are otherwise available for such purposes, except from funds provided for STOP Violence Against Women Formula Grant Program and the Sexual Assault Services Program. For 2016, funding requested for this account will support the following initiatives:

STOP Violence Against Women Formula Grant Program.—The STOP Program is designed to encourage the development and strengthening of effective law enforcement and prosecution strategies to combat violent crimes against women and the development and strengthening of victim services in cases involving violent crimes against women. The 2016 Budget proposes \$193,000,000 for this program.

Transitional Housing Assistance Program.—Transitional Housing grants support programs that provide assistance to victims of domestic violence, dating violence, sexual assault, and stalking who are in need of transitional housing, short-term housing assistance, and related support services. The 2016 Budget proposes \$25,000,000 for this program.

Research on Violence Against Women (National Institute of Justice).—This program supports research on violence against women. The 2016 Budget proposes \$3,000,000 for this program.

Grants to Encourage Arrest Policies.—This discretionary grant program is designed to encourage state, local, and tribal governments and state, local, and tribal courts to treat domestic violence, dating violence, sexual assault, and stalking as serious violations of criminal law requiring the coordinated involvement of the entire criminal justice system. The 2016 Budget proposes \$50,000,000 for this program.

Homicide Reduction Initiative.—This initiative is designed to address the urgent problem of homicide of the abused, especially those in escalating domestic violence situations. For 2016, \$4,000,000 will be made available from the Grants to Encourage Arrest Policies Program.

STATE AND LOCAL LAW ENFORCEMENT ACTIVITIES—Continued

Sexual Assault Services Program.—This program provides funding for states and territories, tribes, state sexual assault coalitions, tribal coalitions, and culturally specific organizations. Overall, the purpose of this program is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected by sexual assault. The 2016 Budget proposes \$27,000,000 for this program.

Rural Domestic Violence Program.—This program enhances the safety of child, youth and adult victims of domestic violence, dating violence, sexual assault, and stalking by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The 2016 Budget proposes \$33,000,000 for this program.

Grants to Reduce Violence Crimes Against Women on Campus.—The Campus Program develops and strengthens victim services in cases involving violent crimes against women on campuses, and aims to strengthen security and investigative strategies to prevent and prosecute violent crimes against women on campuses. The FY 2016 Budget proposes an increase of \$14 million in the Campus Program appropriation to improve the Campus Violence program to better meet the need on college campuses and in support of the implementation of the recommendations of the White House Task Force on Protecting Students from Sexual Assault. The 2016 Budget proposes \$26,000,000 for this program.

Legal Assistance for Victims Grant Program.—The Legal Assistance Program increases the availability of civil and criminal legal assistance in order to provide effective aid to victims who are seeking relief in legal matters arising as a consequence of abuse or violence. The 2016 Budget proposes \$52,500,000 for this program.

Enhanced Training and Services to End Violence Against and Abuse of Women Later in Life.—This program provides or enhances training and services to address elder abuse, neglect, and exploitation, including domestic violence, dating violence, sexual assault, or stalking, involving victims who are 50 years of age or older. The 2016 Budget proposes \$4,250,000 for this program.

Education and Training to End Violence Against and Abuse of Women with Disabilities Grant Program.—The Disabilities Grant Program builds the capacity of jurisdictions to address domestic violence, dating violence, stalking and sexual assault against individuals with disabilities through the creation of multi-disciplinary teams. The 2016 Budget proposes \$5,750,000 for this program.

Consolidation of Youth-Oriented Programming.—This consolidated grant program consolidates the purpose areas of four programs under one competitive program. The four programs included in the consolidation include: Services to Advocate for and Respond to Youth, Grants to Assist Children and Youth Exposed to Violence, Engaging Men and Youth in Preventing Domestic Violence, and Supporting Teens through Education. This consolidation will allow OVW to leverage resources for maximum impact in communities by funding comprehensive projects that include both youth service and prevention components. The 2016 Budget proposes \$10,000,000 for this program.

Indian Country-Sexual Assault Clearinghouse.—This funding will support the establishment and maintenance of a national clearinghouse on the sexual assault of American Indian and Alaska Native women. This project will offer a one-stop shop for tribes to request free on-site training and technical assistance. The 2016 Budget proposes \$500,000 for this program.

National Resource Center on Workplace Response.—The Violence Against Women Act of 2005 provided for an award to establish and operate a national resource center on workplace responses to assist victims of domestic and sexual violence. The center will provide information and assistance to employers and labor organizations to better equip them to respond to victims. The 2016 Budget proposes \$500,000 for this program.

Grants to Support Families in the Justice System.—This funding will provide comprehensive support to victims of domestic violence and child sexual abuse and their families in family law matters in the civil justice system, including safe visitation and exchange services, improved court responses, and legal assistance to victims, protective parents, and their children. This program represents a consolidation of the Safe Havens and Court Training and Improvements program. The 2016 Budget proposes \$16,000,000 for this program.

VAWA 20/20 Initiative.—This new program is for a comprehensive new initiative aimed at closing identified gaps in the fight against violence against women. This initiative will target \$15 million to improve law enforcement and prosecutorial response to sexual assault by bringing intensive resources to 11 jurisdictions and \$6 million to implement a domestic violence firearms lethality initiative in approximately 7 jurisdictions. The initiative will include a focus on using evidence-based interventions, where available, and documenting and evaluating results with the goal of identifying successful models that can be replicated across the nation. The 2016 Budget proposes \$21,000,000 for this program.

Tribal Special Domestic Violence Criminal Jurisdiction.—This new grant program for tribal governments was first authorized in the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). VAWA 2013 included an historic provision that recognizes the inherent power of "participating tribes" to exercise "special domestic violence criminal jurisdiction" over both Indians and non-Indians who assault Indian spouses, intimate partners, or dating partners, or who violate protection orders, in Indian country. To support tribes that chose to participate, the Act authorizes funding to strengthen tribal criminal justice systems, provide indigent defense counsel, develop appropriate jury pools, and assist victims. The 2016 Budget proposes \$5,000,000 for this program.

For 2016, funding requested for this account also will support Analysis and Research on Violence Against Indian Women, a program that is administered by the Office of Justice Programs and supports comprehensive research on violence against Native American women. The 2016 Budget proposes \$1,000,000 for this program.

JUVENILE JUSTICE PROGRAMS—Continued

The 2016 Budget requests \$339,400,000 for the Office of Justice Programs' (OJP) Juvenile Justice Programs. This appropriation account includes programs that support state, local and tribal community efforts to develop and implement effective and coordinated prevention and intervention juvenile programs. Such programs are designed to reduce juvenile delinquency and crime, and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

The Nation's youth face an ever changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the juvenile justice system. OJP remains committed to leading the nation in efforts addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percentage of serious, violent, and chronic juvenile offenders; helping states address the disproportionate confinement of minority youth; and helping children who have been victimized by crime and child abuse. This request includes the following programs:

Part B: Formula Grants.—This program supports state, local, and tribal efforts to develop and implement comprehensive state juvenile justice plans. Funds also may be used for research, evaluation, statistics, other informational activities, and training and technical assistance. Funding also is available to help small, nonprofit organizations, including faith-based organizations, with the federal grants process. The 2016 Budget proposes \$70,000,000 for this program.

Youth Mentoring.—The Youth Mentoring program supports faith and community-based, nonprofit, and for-profit agencies in the enhancement and expansion of existing mentoring strategies and programs, as well as assistance to develop, implement, and pilot test mentoring strategies and programs designed for youth in the juvenile justice, reentry, and foster care systems. In addition, OJP supports training and technical assistance to the sites to assist with adapting existing mentoring approaches to meet the needs of the target populations and to identify and maintain partnerships. The 2016 Budget proposes \$58,000,000 for this program.

Delinquency Prevention Program (formerly the Title V Local Incentive Grants Program).—This program provides resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The 2016 Budget proposes \$42,000,000 for this program. Of this total, \$10,000,000 will be used for Juvenile Justice and Education Collaboration Assistance, an initiative aimed at reducing the use of arrest and juvenile justice courts as a response to non-serious youth misbehaving in and around schools. This program will operate in concert with Department of Education School Climate Transformation Grants and other initiatives focused on improving school safety and climate.

Community-Based Violence Prevention Initiatives.—Based on the violence reduction work of several cities and public health research of recent years, OJP will provide funding for community-based strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, particularly shootings. The 2016 Budget proposes \$18,000,000 for this program.

National Forum on Youth Violence Prevention Initiative.—This forum was created for participating localities to share challenges and promising strategies with each other and to explore how federal agencies can better support local efforts to curb youth and gang violence. The 2016 Budget proposes \$4,000,000 for this program.

Juvenile Accountability Block Grant (JABG).—The JABG program funds block grants to states to support a variety of accountability-based juvenile justice programs. The 2016 Budget proposes \$30,000,000 for this program.

Smart on Juvenile Justice Initiative.—This new initiative will provide supplementary incentive grant awards to assist states to foster better outcomes for system-involved youth. The 2016 Budget proposes \$30,000,000 for this program.

Missing and Exploited Children Program.—This program supports efforts to prevent the abduction and exploitation of children, including funding for the Internet Crimes Against Children and AMBER Alert Programs. The 2016 Budget proposes \$67,000,000 for this program.

Competitive Grants Focusing on Girls in the Juvenile Justice System.—The 2016 Budget requests \$2,000,000 for this program, which provides competitive demonstration grants focusing on girls in the juvenile justice system through responses and strategies that consider gender and the special needs of girls.

Children of Incarcerated Parents (COIP) Web Portal.—The 2016 Budget proposes \$500,000 for the COIP web portal, which consolidates information regarding federal resources, grant opportunities, best and promising practices, and ongoing government initiatives that address and support children of incarcerated parents and their caregivers.

Victims of Crime Act (VOCA).—The Improving Investigation and Prosecution of Child Abuse Program supports training and technical assistance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and/or multi-disciplinary teams designed to prevent the inadvertent revictimization of an abused child by the justice and social service system in their efforts to protect the child. The 2016 Budget proposes \$11,000,000 for this program.

Child Abuse Training Programs for Judicial Personnel and Practitioners.—This program supports training and technical assistance to improve the judicial system's handling of child abuse, neglect, and related cases, as authorized under the Victims of Child Abuse Act, 42 U.S.C. Section 13022. The 2016 Budget proposes \$1,500,000 for this program.

Improving Juvenile Indigent Defense Program.—Provides funding and other resources to develop effective, well-resourced model juvenile indigent defender offices; and develop and implement standards of practice and policy for the effective management of such offices. The 2016 Budget proposes \$5,400,000 for this program.

The 2016 Budget is requesting \$116,300,000 for the Office of Justice Programs' Public Safety Officers Benefits (PSOB) appropriation, of which \$100,000,000 is a permanent indefinite (mandatory) appropriation for death benefits and \$16,300,000 is a discretionary appropriation for disability and education benefits. This appropriation account supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a forty-year partnership among the Department of Justice, national public safety organizations, and state, local, and tribal public safety agencies. Created in 1976, the PSOB program oversees three types of benefits:

Death Benefits.—The Death Benefits program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

Disability Benefits.—The Disability Benefits program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

Education Benefits.—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; supporting appropriate victims' services programs and victimization prevention strategies; and building capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist state, local, and tribal governments in providing appropriate services to their communities. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2016 Budget proposes to provide \$1,000,000,000 from collections and balances for crime victim compensation, services, and related needs. Of this amount, the Budget also proposes to use \$25,000,000 for Vision 21, which provides supplemental victims services and other victim-related programs and initiatives in areas like: research, legal services, capacity building, national and international victim assistance, and \$20,000,000 for tribal assistance. Also included is \$10,000,000 for domestic trafficking victims grants. Up to three percent of funds available from the fund for obligation may be made available to the National Institute of Justice and the Bureau of Justice Statistics for research, evaluation, or statistical purposes related to crime victims and related programs.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

Adult employment and training activities.—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

Youth activities.—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

Dislocated worker employment and training activities.—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. The Budget increases funding for the National Dislocated Worker Grants by \$20 million to support workers affected by the national transition from carbon-intensive to lower carbon energy sources. Along with funding already provided through the National Dislocated Worker Grants, this additional money will allow States and local areas to provide reemployment, training, and supportive services to transitioning coal workers to help them get back to work in good jobs and careers.

Native Americans.—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

Migrant and Seasonal Farmworkers.—Grants to public agencies and nonprofit groups to provide training and other employability development services to economically disadvantaged youth and families whose principal livelihood is gained in migratory and other forms of seasonal farmwork.

Reintegration of Ex-Offenders.—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. Using the authority of section 169 of the WIOA, the Department also provides competitive grants for a range of young ex-offenders and school dropouts, particularly those in high-poverty, high-crime areas with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for young ex-offenders. The 2016 Budget includes additional resources to pilot a program for at-risk youth to explore careers in law enforcement. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out the Ex-Offender program.

Apprenticeship Grants.—Activities that support Registered Apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

Workforce Data Quality Initiative.—Competitive grants to support the development of integrated and longitudinal data systems that integrate education and workforce data to provide timely and accessible information, including integrated performance information, to consumers, policymakers, and others.

YouthBuild.—Grants that impart education and occupational skills to program participants by providing them with academic training and occupational skills training, providing a clear path into a chosen career field.

Technical Assistance.—Technical assistance activities to support WIOA implementation.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113-128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. By 2016, Job Corps will be operating centers in all 50 states, Puerto Rico, and the District of Columbia. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military.

Job Corps serves and trains approximately 50,000 participants each year while emphasizing the attainment of academic credentials which include: a High School Diploma (HSD) or General Educational Development (GED) and career technical credentials, industry-recognized certifications, state

licensure, and pre-apprenticeship credentials. These portable credentials provide for long-term attachment to the workforce and economic mobility as Job Corps graduates advance through their careers. Furthermore, these credentials ensure that program graduates have gained the skills and knowledge necessary to effectively compete in today's workforce.

Large and small businesses, nonprofit organizations, and Native American tribes manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture. In 2015, Job Corps will open and fully enroll two new centers in New Hampshire and Wyoming, the last two States without Job Corps centers. Job Corps participants must be economically disadvantaged youth, ages 16-24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

The 2016 Budget continues the Administration's commitment to strengthening and reforming the Job Corps program to improve students' outcomes. These reforms include identifying and replicating the practices of high-performing centers; adopting cost saving reforms; and providing information to the public about each Job Corps center's performance in a transparent way. The Budget proposes funds to pilot a different model to serve younger students, a population for whom the program has not been as effective. In addition, the Budget builds on the resources provided in the 2015 Omnibus for financial and contractual oversight. We remain committed to strengthening the oversight of the program. These changes will allow the program to continue to provide high-quality services to disadvantaged youth while maintaining strong internal controls and ensuring that contracts are procured at the lowest risk and the best value to the Federal Government.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109-365), is a federally-sponsored community service employment and training program for unemployed low-income individuals, ages 55 and older. The program, known as the Senior Community Service Employment Program (SCSEP), offers participants work-based community service training at non-profit or governmental agencies, so that they can gain on-the-job experience and prepare to enter or re-enter the workforce. The 2016 CSEOA budget reforms SCSEP by awarding more competitive grants, adjusting income eligibility requirements to serve those most in need, and promoting on-the-job training (OJT) models, including OJT at for-profit entities, through demonstration grants and flexibility for existing grantees in spending training funds on OJT activities.

The Trade Adjustment Assistance (TAA) Community College and Career Training program, which received appropriations in the Health Care and Education Reconciliation Act of 2010 (Section 1501 of P.L. 111–152, 124 Stat.1070), provided \$500 million annually in fiscal years 2011–2014 for competitive grants to eligible institutions of higher education. The program aims to improve education and employment outcomes for community college and other students, helping more Americans prepare to succeed in growing occupations. Funding allows for expansion and improvement of education and training programs that can be completed in 2 years or less, result in skills and credentials necessary for high-wage, in-demand jobs, and are suited for workers who are eligible for training under the TAA for Workers program. Grants support institutions that use evidence to design program strategies, are committed to using data for continuous improvement, and facilitate evaluation that can build evidence about effective practices. The Department is implementing this program in cooperation with the Department of Education.

The Budget includes a legislative proposal to reauthorize the TAA program under legislation similar to the 2011 Program with features of the 2009 Program. It assumes that new reauthorization legislation will be effective in 2016. In addition to the legislative proposal, the Budget includes baseline funding for the Reversion 2014 version of the TAA program in 2016 in the event legislation reauthorizing the program is not enacted. \$986,000,000 is sufficient to fund the legislative proposal in 2016 under reauthorization.

Unemployment compensation.—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claims workloads increase above levels specified in the appropriations language.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE
OPERATIONS—Continued

Employment service.—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year.

Foreign Labor Certification.—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

Federal Administration.—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

State grants.—Provides grants to State workforce agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

American Job Centers.—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under WIOA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

National Agricultural Workers Survey fee.—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews.

The funding request for in-person reemployment services and eligibility assessments (REA/RES) for unemployment compensation claimants builds upon the success of a number of States in reducing improper payments and speeding reemployment using these assessments. This proposal is designed to reduce long-term unemployment by providing reemployment services and eligibility assessments to the top one-third of regular UI claimants identified as most likely to exhaust their unemployment insurance (UI) benefits. Because most unemployment claims are now filed by telephone or on the internet, in-person assessments conducted in American Job Centers can help determine a claimant's continued eligibility for benefits and the adequacy of his/her work search, verify the identity of beneficiaries where there is suspicion of possible identity theft, and provide in-person reemployment services designed to help claimants return to work more quickly. These reemployment services may include, but are not limited to: the provision of labor market and career information; the development of reemployment and work search plans; orientation to services available through American Job Centers; and the provision of staff-assisted reemployment services, including skills assessments, career counseling, job matching and referrals, job search assistance workshops and referrals to training as appropriate. The \$180.9 million requested for REA/RES is estimated to provide benefit savings of \$287 million.

The proposal would also provide REA/RES services to unemployed veterans recently separated from the military and receiving unemployment benefits under the Unemployment Compensation for Ex-servicemembers (UCX) program. An estimated \$7.5 million of the total requested will provide REA/RES services to 100 percent of UCX claimants and identify the factors impeding their reemployment; this UCX focus is estimated to provide benefit

savings of \$34 million. To ensure full funding of reemployment services and eligibility assessments, the Administration proposes to protect a portion of the funding requested for these activities in the appropriations process through a cap adjustment, a mechanism that has been used by past Administrations and Congresses. Under a cap adjustment appropriations for a specific program can exceed discretionary budget caps if savings can be demonstrated. A similar reemployment and eligibility assessment (REA) program was partially funded under an allocation adjustment in fiscal years 2009, 2010 and 2011 in recognition of its potential for savings. Given the demonstrated savings that an integrated approach to reemployment services and UI eligibility assessments can produce, the 2016 Budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985 to adjust the discretionary spending limits for administrative program integrity activities at DOL. These adjustments would be similar in nature to those enacted for the Social Security Administration and the Department of Health and Human Services Centers for Medicare and Medicaid Services. See additional discussion in the "Budget Process" chapter in the *Analytical Perspectives* volume.

The Job-Driven Training Proposals support initiatives that address the problem of long-term unemployment, provide new employment opportunities for low-income and unemployed workers, and build the skills of American workers. These proposals include:

High-Growth Sector Training & Credentialing Grants.—An infusion of \$16 billion over 10 years to fund the regional partnerships necessary to create strong training programs aligned to in-demand jobs and provide funding to give more people access to counseling and training. This proposal is paired with a \$400 million discretionary increase for the Employment Service, which will provide access to high-quality reemployment services to 2 million unemployed workers and ensure that training meets employers' skill needs. The grants also provide more resources for training, which due to resource limitations is currently provided to only a small share of people who come into American Job Centers.

Apprenticeship Training Fund.—Provides \$2 billion over 4 years to help more employers provide high-quality on-the-job training through apprenticeship; to equip states and regions with the expertise and resources to assist employers in creating or expanding apprenticeships; and to link apprenticeships with pathways to higher education. Through this one time investment, the President calls on Congress to expand quality apprenticeships with the goal of doubling Registered Apprenticeships across the country over the next five years.

Connecting for Opportunity.—A two-pronged, one-time \$3 billion investment over four years to invest in year-round job opportunities for youth and to help reengage disconnected youth. \$1.5 billion will be provided by formula to support summer and year-round jobs and an additional \$1.5 billion will be used to initiate a competitive grant program to municipalities to reengage disconnected youth and create educational and workforce pathways for them.

Short Time Compensation (STC), also known as work sharing, is a layoff aversion strategy that enables workers to remain employed and employers to retain their trained staff during times of reduced business activity. The Middle Class Tax Relief and Job Creation Act of 2012 codified and expanded the definition of STC. Under the STC program, workers receive a percentage of the unemployment benefits they would have received if totally unemployed based upon the percentage of reduction in their hours of work. States that had been operating an STC program before enactment of the Act had two and a half years to amend their laws to conform to the new definition (the deadline for conformity was August 2014). As an incentive for states to enact state STC programs and promote the use of STC, the Act provides for 100 percent reimbursement of STC benefit costs paid under state law for up to 156 weeks, or three years (reimbursement is subject to sequestration). Grant funding was also available to states whose permanent STC laws meet the new Federal definition (the application deadline was December 31, 2014).

This account provides mandatory general revenue funding for a temporary program established under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) and subsequently extended. This program paid a supplement of \$25 on every week of unemployment compensation. It was last extended in Public Law 111-157 and paid benefits through its December 7, 2010, phaseout period.

This account makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110-343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This account also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language for this included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA account if it runs short of funds, and the borrowing authority will enable ESAA to cover its obligations despite seasonal variations in the account's receipts.

Advances were needed for the FUA and EUCA accounts in fiscal year 2014, and the Department estimates that no advances will be necessary in 2015 and 2016. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF account.

To address the potential need for significant, and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2016 request continues this authority.

The 2016 Budget requests \$35 million for a State Paid Leave Fund to assist States in setting up paid leave programs by providing technical assistance and other support. This proposal is paired with a mandatory proposal that would provide as many as five States with funds for the initial set-up and benefit costs for three years.

ADVANCES TO THE EMPLOYMENT SECURITY ADMINISTRATION ACCOUNT OF THE UNEMPLOYMENT TRUST FUND

This account is a revolving fund that is available to make advances to the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund under the provisions of section 901(e) of the Social Security Act. These repayable, interest-bearing advances permit financing of the Federal and State administrative costs of employment security programs when the balance in ESAA is insufficient. The borrowing authority also enables ESAA to cover its obligations despite seasonal variations in the account's receipts.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). All State and Federal unemployment tax receipts are deposited into the UTF and invested in Government securities until needed for benefit payments or administrative expenses. State payroll taxes pay for all regular State unemployment benefits. The Federal unemployment tax (FUTA) pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, and about 97 percent of the costs of the Employment Service. In addition, the Federal tax pays for certain extended benefit payments. During periods of high State unemployment, there is a stand-by program of extended benefits (EB), financed one-half by State unemployment taxes and one-half by the FUTA payroll tax. The American Recovery and Reinvestment Act (Public Law 111-5), and subsequent legislation, temporarily made EB 100 percent federally financed. Temporary Federal EB programs, including the recently expired Emergency Unemployment Compensation program, are also funded from the Unemployment Trust Fund, either by the Federal tax or by reimbursement from Federal general revenues. The UTF also provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the Trust Fund provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

Legislative proposals to strengthen the unemployment insurance safety net.—The recent economic downturn continues to severely test the adequacy of States' unemployment insurance (UI) financial systems, forcing some States to borrow to continue paying benefits. Because States are struggling to improve the financial status of their UTF accounts, the 2016 Budget will include a solvency proposal that will increase the FUTA taxable wage base to \$40,000 in 2017 and index it to average wages thereafter. States with lower wage bases will need to adjust their UI tax structures. The effective FUTA tax rate will be returned to 0.8 percent in calendar year 2016, to strengthen the solvency of the Federal trust fund accounts, then lowered to 0.165 percent in 2017 when the wage base is increased. Beginning in 2017, States would be required to have a minimum tax equivalent to 0.175 percent of the FUTA wage base. This legislative package will help put State UI systems on a firmer financial footing for the future. The proposal would also replace the current EB program with a more responsive one and require EB claimants to receive Reemployment Services and Eligibility Assessments (REA/RES). For States paying up to 26 weeks of regular benefits, the EB program would be 100 percent federally funded. Other States would pay 50 percent of the EB benefit costs. A UI Modernization component of the proposal would incentivize States to improve claimant connections to work and expand eligibility provisions in a manner similar to UI Modernization that

UNEMPLOYMENT TRUST FUND—Continued

was part of the American Recovery and Reinvestment Act. Additional proposals designed to assist in the reemployment of laid-off workers, reduce program costs and improper payments, and avoid overlapping payments of UI and Social Security Disability Insurance (SSDI) will be submitted. To address and prevent long-term unemployment, a permanent REA/RES program for claimants of the regular UI program is being proposed. State participation in the REA/RES program funded in the 2015 Omnibus is voluntary. Another proposal would mandate States' use of the State Information Data Exchange System (SIDES), an electronic tool for requesting and receiving information from employers regarding a claimant's separation which is needed to determine eligibility. Use of SIDES will allow State agencies, employers, and third-party administrators to reduce costs, improve the timeliness and accuracy of UI claims processing, and reduce improper payments. Another proposal designed to reduce improper payments to incarcerated individuals would require States to cross-match UI claimants with the Prisoner Update Processing System database housed at the Social Security Administration. To avoid overlapping payments of UI and SSDI, it is proposed that an individual's SSDI benefits would be reduced dollar for dollar in any month in which that person also receives a State or Federal UI benefit. This proposal would eliminate duplicative payments covering the same period a beneficiary is out of the work, while still providing a base level of support. These proposals will impact several receipt accounts that feed into the UTF, including FUTA deposits and deposits of State unemployment taxes into the UTF.

The Pension Benefit Guaranty Corporation is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by more than 41 million of America's workers and retirees. PBGC administers two separate insurance programs. The single-employer program protects about 31 million workers and retirees in over 22,000 pension plans. The multiemployer program protects about 10 million workers and retirees in about 1,400 pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by companies that sponsor defined benefit pension plans, investment income, and assets from terminated plans.

PBGC is requesting \$431,799,000 in spending authority for administrative purposes in 2016. The change includes a restoration of the 2015 sequestration cuts, as well as increases to support the modernization of the Integrated Present Value of Future Benefits system, IT security improvements, a pilot program for a smaller manager's investment program and funds for the Office of Inspector General for additional Financial Statement Audit work.

The 2016 Budget also proposes to give the PBGC Board the authority to adjust premiums in both its single-employer and multiemployer programs and directs PBGC to take into account the risks that different sponsors pose. This proposal is estimated to save \$19 billion over the next decade, a decrease of \$1 billion from a similar proposal presented for 2015 to reflect the multiemployer premium revenue increases included in the Consolidated and Continuing Appropriations Act of 2015. Premium increases would be split between the single-employer and multiemployer programs proportionately based on the size of the deficit in each program after making adjustments for the expected long-term effects of the recent law.

Plan Preservation Efforts: PBGC tries, first, to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Similarly, when major layoffs or plant closures threaten a plan's viability, PBGC steps in to negotiate protection for the plan. In 2014, PBGC:

- Helped to protect 163,000 people by encouraging companies to keep their plans when they emerged from bankruptcy
- Negotiated \$464,000,000 in financial assurance to protect 126,000 people in plans at risk from corporate transactions
- Negotiated \$34,000,000 in financial assurance to protect almost 6,000 people whose companies downsized

—Worked with media, Congressional staff, retiree groups, unions, and pension advocacy groups to help thousands to understand the lifetime consequences of accepting one-time cash payments instead of their pensions.

Stepping in When Plans Fail: When plans do fail, PBGC steps in to ensure that guaranteed benefits continue to be paid. Over the years, PBGC has become responsible for more than 1,500,000 people in more than 4,600 failed plans. In 2014, PBGC:

—Paid \$5,500,000,000 to nearly 813,000 retirees in more than 4,600 failed single-employer plans (an additional 595,000 workers will receive timely and accurate benefits when they retire)

—Assumed responsibility for almost 53,000 more people in 97 trusted single-employer plans

PROGRAM ACTIVITIES:

Single-employer benefit payments.—The single-employer program protects about 31 million workers and retirees in about 22,000 pension plans. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits maybe ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum. After a standard termination, the PBGC guarantee ends.

Multiemployer financial assistance.—The multiemployer insurance program protects about 10 million workers and retirees in about 1,400 pension plans. Multiemployer pension plans are maintained under collective bargaining agreements involving unrelated employers, generally of the same industry. If a PBGC insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance (a loan to the plan) to continue paying guaranteed benefits.

Investment management fees.—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are determined by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments. PBGC expects to pay \$103,906,000 in investment management fees in 2016.

ADMINISTRATIVE ACTIVITIES:

PBGC's administrative activities comprise all expenditures and operations that support:

- Direct benefit payments to pension plan participants
- Direct financial assistance to distressed multiemployer pension plans
- Investment management fees

These operations include premium collections, purchase of U.S. Treasury securities using premium receipts, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering administrative and legal support, information technology infrastructure, and other shared program support for both PBGC's insurance and plan termination activities. These funds support the operations of the Inspector General and funding to support the required functions and efforts of the office, including training and participation in Council of the Inspector Generals on Integrity and Efficiency (CIGIE) activities.

In 2010, the Department of Labor abolished the Employment Standards Administration (ESA) to streamline administration of the programs. As the Department was reinvigorating its enforcement of worker protection laws, this reorganization supported the Administration's Worker Protection efforts by eliminating redundant management efforts by elevating program issues directly to the Secretarial level. It also reflected the importance of these programs and increased enforcement supporting the Secretary's Worker Protection goals. The Consolidated Appropriations Act, 2012 (P.L. 112-74) accepted the Administration's proposal to replace the appropriation for the Employment and Standards Administration by four individual appropriations for the component agencies and offices previously under the heading "Employment Standards Administration Salaries and Expenses." In the 2014 Budget, funding was requested separately for the Office of Workers' Compensation Programs, Wage and Hour Division, Office of Federal Contract Compliance Programs, and Office of Labor-Management Standards.

Federal Employees' Compensation Act benefits.—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2016, 113,000 injured Federal workers or their survivors are projected to file claims; 47,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

Longshore and harbor workers' compensation benefits.—Under the Longshore and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The 2016 Budget incorporates longstanding Government Accountability Office, Congressional Budget Office, and Labor Inspector General recommendations, amending FECA to convert prospectively retirement-age beneficiaries to a retirement annuity-level benefit, establish an up-front waiting period for benefits for all beneficiaries, permit the Department of Labor to recapture compensation costs from responsible third parties, authorize the Department to cross-match FECA records with Social Security records to reduce improper payments, and make other changes to improve and update FECA. The 2016 reform legislation will also include a provision to allow the Department to add an administrative surcharge to the amount billed to Federal agencies for their FECA compensation costs, thereby shifting FECA administrative costs from the Department to Federal agencies in proportion to their usage. If enacted, the surcharge would not be applied until 2017 to give agencies an opportunity to plan for the change. The legislation would produce 10-year savings of more than \$336 million in the Special Benefits Fund, and more than \$368 million on a Government-wide basis over the same period.

Energy Employees' Compensation Act benefits.—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108-767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the Federal Employees' Compensation Act (FECA) program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The Patient Protection and Affordable Care Act (PPACA) of 2010 reinstated two provisions of the Black Lung Benefits Act that had been removed in 1981 for claims filed on or after January 1, 1982. These provisions include: automatic entitlement to benefits for survivors of miners who had been awarded benefits at the time of their death and a presumption that a miner who has at least 15 years of qualifying coal mine employment and has a totally disabling lung condition has pneumoconiosis even in the absence of a negative x-ray.

SPECIAL WORKERS' COMPENSATION EXPENSES—Continued

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), and the Employee Polygraph Protection Act (EPPA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect over 135,000,000 workers in more than 7,300,000 establishments throughout the United States and its territories.

The Wage and Hour Division has traditionally had responsibility for enforcing certain worker protections provisions of the Immigration and Nationality Act, specifically the H-2A and H-1B temporary non-immigrant foreign worker programs. Pursuant to an Interagency Agreement (IAA) between the U.S. Department of Homeland Security (DHS) and the U.S. Department of Labor (DOL) and section 214(c)(14)(B) of the Immigration and Nationality Act (INA), 8 U.S.C. 1184(c)(14)(B), DOL and WHD have been delegated the enforcement authority located at section 214(c)(14)(A)(i) of the INA, 8 U.S.C. 1184(c)(14)(A)(i) for enforcing the H-2B temporary non-immigrant foreign worker program. Under section 524 of H.R. 3288, the Secretary of Labor may use one-third of the H-1B and L Fraud Protection and Detection fee account for enforcement of these temporary worker program provisions and for related enforcement activities.

The Office of Federal Contract Compliance Programs (OFCCP) enforces equal employment opportunity and nondiscrimination requirements of Federal contractors and subcontractors. In particular, OFCCP enforces: Executive Order 11246, which prohibits employment discrimination on the basis of race, sex, religion, color, and national origin; Section 503 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (through a memorandum of understanding with the Equal Employment Opportunity Commission), which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against certain protected veterans. OFCCP programs cover close to 100,000 work-sites and a total workforce of 12 million persons. OFCCP monitors contractors' compliance through compliance evaluations and reporting requirements. Specifically, OFCCP will complete 4,290 compliance evaluations in 2016, with a focus on both supply and service construction reviews. OFCCP will continue to shift its outreach strategy from being contractor-centric to worker-focused, which will strengthen its enforcement capacity in the process. In addition, the agency will also ensure that contractors and subcontractors are provided linkages to recruitment sources for hiring and advancement of minorities, women, protected veterans, and individuals with disabilities.

feasible when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the SBREFA process, that small business concerns are taken into account in the process of developing standards.

Federal Enforcement.—This activity provides for ensuring the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. Enforcement programs are targeted to the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

Whistleblower Programs.—This activity provides for the enforcement of Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. This activity also includes the administration of twenty-one other whistleblower protection statutes, protecting employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities laws.

State Programs.—This activity supports states in assuming responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities.

Technical Support.—This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness. This activity also provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or man-made disasters.

Federal Compliance Assistance.—This activity supports a range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on small business, temporary, immigrant, and other high-risk and hard-to-reach workers. OSHA works with employers and employees through Voluntary Protection Programs that recognize and promote effective safety and health management partnerships that focus on the development of extended cooperative relationships and alliances that commit organizations to collaborative efforts with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

State Compliance Assistance: Consultation Grants.—This activity supports 90 percent federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small and medium-sized employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including

Safety and Health Standards.—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically

safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

Compliance Assistance: Training Grants.—This activity supports safety and health grants to organizations that provide face-to-face training, education, technical assistance, and develop educational materials for employers and employees. These grants address safety and health education needs related to hard-to-reach workers and specific high-risk topics and industries identified by the agency.

Safety and Health Statistics.—This activity supports information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

Executive direction and administration.—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

Enforcement.—The enforcement strategy in 2016 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners. In 2016, MSHA is proposing appropriations language that would provide the agency with additional flexibility to internally reallocate funding to ensure the enforcement programs have the necessary resources to effectively conduct mandated inspections or investigations.

Office of Assessments, Accountability, Special Enforcement and Investigations.— This activity assesses and collects civil monetary penalties for violations of safety and health standards and manages MSHA's accountability, special enforcement, and investigation functions.

Educational Policy and Development.—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry.

Technical Support.—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical Support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

Program Evaluation and Information Resources (PEIR).—This activity provides program evaluation and information technology resource management services for the agency.

Program Administration.—This activity performs general administrative functions and is responsible for meeting performance requirements and developing MSHA's performance plan and Annual Performance Report.

Executive Direction and Staff Services.—Provides agency-wide policy and management direction, including all centralized support services in the administrative, publications, information technology, field operations, and statistical methods research areas.

The President is again asking the Congress to revive an authority enabling him to submit fast-track proposals to reorganize or consolidate Federal programs and agencies in order to reduce the size of Government or cut costs. The Budget includes a variety of proposed reforms across government designed to drive efficiency and accountability, prevent duplication, and make government work better and smarter for the American people. One of these reorganizations the President would propose with this authority reiterates his previous proposal to consolidate Federal business and trade programs into one more efficient and effective department dedicated to promoting U.S. competitiveness, exports, and American businesses and jobs. The proposal would integrate the six Federal agencies that focus primarily on business and trade, along with other related programs. These include the Department of Commerce's core business and trade functions, the Small Business Administration, the Office of the U.S. Trade Representative, the Export-Import Bank, the Overseas Private Investment Corporation, and the U.S. Trade and Development Agency, as well as rural business programs at the Department of Agriculture, Treasury's Community Development Financial Institution Program, the Bureau of Labor Statistics, and the statistical agency at the National Science Foundation. To strengthen the new department's focus on business and economic growth, the National Oceanic and Atmospheric Administration would be consolidated into the Department of Interior, strengthening stewardship and conservation efforts and enhancing scientific resources. The Budget schedules for these agencies and programs, including those for the Bureau of Labor Statistics, continue to reflect them in their current alignment.

Jobs for Veterans State grants.—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, resources are allocated to States to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans' Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on helping economically or educationally disadvantaged veterans.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

Transition Assistance Program.—This program provides employment workshops for departing service members in the continental U.S. and at major overseas installations. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

Federal management.—VETS' Federal management budget activity carries out programs and develops policies to provide veterans the maximum employment and training opportunities (38 U.S.C. 4102-4103A) and to investigate complaints received under the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 USC 4322). Veterans' Preference

activities, which are intended to assist veterans in obtaining Federal employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A), the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for the Transition Assistance Program (10 U.S.C. 1144 and 38 U.S.C. 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported. The REALifeLines initiative facilitates timely and comprehensive employment services to our Nation's severely wounded and injured veterans.

National Veterans' Employment and Training Services Institute.—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for VETS personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

Homeless Veterans' Reintegration Program.—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

Amounts deposited or available in the Child Enrollment Contingency Fund from appropriations to the Fund under section 2104(n)(2)(A)(i) of the Social Security Act and the income derived from investment of those funds pursuant to 2104(n)(2)(C) of that Act, shall not be available for obligation in this fiscal year.

CANCELLATION

SEC. 522. Of any available amounts appropriated under section 108 of Public Law 111-3, as amended, \$3,330,000,000 are hereby permanently cancelled. (Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2015.)

DEPARTMENT OF STATE AND OTHER INTERNATIONAL PROGRAMS

The Department of State, the U.S. Agency for International Development (USAID), and other international programs support sustainable security and shared prosperity at home and abroad through critical investments in diplomacy and development, from life-saving humanitarian assistance to counterterrorism programs aimed at defeating terrorist organizations. The 2016 Budget will advance American leadership at a time when diplomacy is most needed to confront the many challenges facing the world today by providing strong support for our diplomatic personnel and facilities abroad, security partnerships, global engagement, and development programs that advance economic growth, health, education, and democratic governance. International programs also support economic development and job creation in the U.S. by increasing trade and expanding access for U.S. businesses to international markets. The 2016 Budget also advances our national security priorities by supporting efforts to degrade and ultimately defeat the Islamic State of Iraq and the Levant (ISIL) through support for regional partners and humanitarian assistance; continuing the transition in Afghanistan; countering Russia's aggressive actions; advancing security, prosperity and economic growth in the Central America Region to address the root causes of immigration; and strengthening our global health security by addressing global vulnerabilities.

Diplomatic and Consular Programs (D&CP) are financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP) and Conflict Stabilization Operations (CSO), which are to remain available until expended. D&CP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2016 request includes base funding for the State Department operations in Iraq, Afghanistan, and Pakistan. The balance of the funding requested for operations in Iraq, Afghanistan, and Pakistan is included in the Overseas Contingency Operations (OCO) account request for the D&CP account.

Funds are requested in the following categories:

Human Resources.—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

Overseas Programs.—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2016 will support 275 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. These resources are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity. This category also supports reconstruction and stabilization activities of the Conflict Stabilization Operations (CSO) Bureau, which applies technical expertise and innovative approaches to prevent conflict, break cycles of violence, harness beneficial drivers of change, and stabilize post-conflict countries and regions. CSO collaborates with U.S. embassies, U.S. inter-agency partners, local and international organizations, and host nations to develop local solutions to conflict. This appropriation provides funding for personnel and operating expenses to support conflict analysis and strategy, interagency planning, and expeditionary deployment teams.

Diplomatic Policy and Support.—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional

and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in D&CP includes resources that are used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 275 missions, and other Government agencies overseas. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification and declassification; information security; information technology capital planning; and provision of information management services. Administration and staff activities are also included in this area. These activities include domestic and overseas administration of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA. These funds also provide for the development, lease, or exchange to foreign governments or international organizations of property owned by the United States at the International Center located in Washington, D.C. Funds also provide for operation of the Federal facility located at the International Center, for maintenance and security of those public improvements that have not been conveyed to a government or international organization and for surveys and plans related to development of additional areas within the Nation's Capital for chancery and diplomatic purposes.

Security Programs.—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

CONSULAR AND BORDER SECURITY PROGRAMS—Continued

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharge, Immigrant Visa Security surcharge, the Diversity Visa Lottery fee, the Affidavit of Support fee, and the Expedited Passport fee. In FY 2015 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The FY 2016 President's Budget proposes a new standalone account to display fee-funded consular programs independent of the larger Diplomatic and Consular Programs account. This change will enable the Department to make financial reporting and budget estimates for these fees and surcharges more easily available to users of budget information and other stakeholders. Section 7050 of the general provisions provides the legislative language to establish the new account and transfer authority to accounts under the heading Administration of Foreign Affairs.

These consular fees and surcharges support an array of activities that play a vital role in ensuring U.S. border security remains strong, including routine and emergency services for American citizens overseas; the issuance of secure passports to American citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides funding for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, and security policy objectives and to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Programs under this appropriation include:

Academic Programs.—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities and supports the President's 100,000 Strong educational exchange initiatives in the Americas and China. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

Professional/Cultural Exchanges.—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

Youth Leadership Initiatives.—Includes three signature presidential priorities targeting young private, public, and civil sector leaders, including the Mandela Washington Fellowship for Young African Leaders, the Young Southeast Asian Leaders Initiative, and a new Young Leaders in the Americas Initiative.

Exchanges Rapid Response.—Supports rapidly deployed public diplomacy activities that respond to countries experiencing conflict or crisis, dramatic political transition, and significant societal transformation. Past examples where the ERR would have immediately helped diplomatic engagement include political shifts in Burma; major conflict in Mali, Iraq, and Ukraine; major epidemic in Western Africa; and socioeconomic crisis in Central America.

Program and Performance.—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

Exchanges Support.—Includes all domestic staff and support costs managed by ECA; as well as government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2016, the Department will manage the twelfth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM regular base and OCO appropriations, interagency contributions, and consular fee revenues.

The 2016 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. Including cost sharing from other sources, MCS will be funded at \$400 million to maintain overseas facilities in 2016.

EMBASSY SECURITY, CONSTRUCTION, AND MAINTENANCE—Continued

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Harry S Truman building where required.

The Taiwan Relations Act (Public Law 96-8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan (AIT). AIT supports U.S. interests by promoting U.S. exports, economic and commercial services, and cultural and information exchange; facilitating military sales; providing consular related services for Americans and the people on Taiwan; and on behalf of the Department of State and various U.S. Government agencies, carrying out liaison with Taiwan's counterpart organizations.

The Department contracts with AIT to conduct commercial, cultural, and other relations with the people of Taiwan. The 2016 request includes funding for the American Institute in Taiwan that sustains previous increases provided to offset revenue loss due to Taiwan's entry into the visa waiver program. Consular related expenses for AIT are funded with fee revenue from the Border Security Program.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2016 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSN DCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology desktop support, medical services, aviation services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding re-

gional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID), representing the majority of funds provided for the President's Global Health Initiative (GHI). GHI seeks to improve health outcomes by adopting a women, girls, and gender-equity approach to health; increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

Global Health Programs-State.—Within GHI, the Global Health Programs (GHP-State) account supports the goal of creating an AIDS-free generation through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2016 Budget requests \$5.4 billion in the GHP-State account, representing the bulk of PEPFAR funding. PEPFAR is led by the Office of the Global AIDS Coordinator in DOS, which draws upon the expertise and experience of other USG partners such as the U.S. Agency for International Development (USAID), the Department of Health and Human Services, the Department of Defense, and the Peace Corps to bring the full force of our government's capacity to the fight against global AIDS. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to set benchmarks for outcomes and programmatic efficiencies through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. As part of GHI, PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$1.1 billion to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in the GHP-State request.

Global Health Programs-USAID.—The 2016 Budget requests \$2.8 billion in the GHP-USAID account for a comprehensive and integrated approach to improve global health outcomes as outlined in GHI. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. Funding includes activities that support the goal of ending preventable child deaths, and—in synergy with the Feed the Future Initiative—support nutrition activities, addressing such issues as micronutrient deficiencies and community management of acute malnutrition. GHP-USAID funding will also promote voluntary family planning/reproductive health, pursue polio eradication, support activities directed at vulnerable children, reduce HIV transmission and the impact of the global HIV/AIDS epidemic in high-burden countries, and address the threat of other infectious diseases such as tuberculosis and multi-drug

resistant tuberculosis, malaria, influenza and other pandemic diseases, and neglected tropical diseases in developing countries.

Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) has the statutory goal of providing assistance to the poorest countries in the world to promote economic growth, eliminate extreme poverty, and strengthen good governance, economic freedom, and investments in people. Since its inception, MCC has signed 29 compacts and approved 25 threshold program agreements, totaling nearly \$11 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption and maintaining democratic rights. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC's evidence-based approach leads to compacts that specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace efforts, increasing stability in conflict/post-conflict environments, and financing economic growth and stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; to promote decentralization; and to strengthen local governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs.

The Pakistan Counterinsurgency Capability Fund (PCCF) was designed to build the counterinsurgency capabilities of Pakistan's security forces engaged in operations against militant extremists in the Federally Administered Tribal Areas (FATA) and Khyber-Pakhtunkhwa. While the counterinsurgency purpose underlying the PCCF account and the maintenance of close U.S. Pakistani military ties remain important Administration priorities, these needs will be met through other accounts, including Foreign Military

Financing (FMF) and International Military Education and Training (IMET) in FY 2016.

The Global Security Contingency Fund (GSCF) permits the Department of State and the Department of Defense to pool funding and expertise to address emergent challenges and opportunities. The GSCF can be used to provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security interests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of Defense. The fund allows direct contributions from each Department to be

transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, Defense, the U.S. Agency for International Development, or others.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992 and after. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLP) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLP is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The Clean Technology Fund (CTF) is a multibillion dollar effort to reduce the growth of greenhouse gas emissions in developing countries by catalyzing large-scale private and public investments through financing the additional costs of commercially available cleaner technologies over dirtier, conventional alternatives. By funding the extra cost of the cleaner technology, the CTF incentivizes cleaner projects that leverage development bank financing and attract new investor capital into low-carbon sectors. The CTF, one of the two multilateral Climate Investment Funds (CIFs), leverages the capital bases and country program expertise of the multilateral development banks (MDBs). To receive funding, eligible countries must first develop credible national investment plans that identify key high-emissions sectors where targeted projects could stimulate low-carbon growth and the scalable uptake of clean technologies. Since 2009, the CTF's governing committee has endorsed 16 such plans with a combined CTF funding envelope of \$5.6 billion and total planned investments of over \$43 billion. As of September 2014, the CTF has approved 70 individual projects using \$3.87 billion in funding. The 70 approved projects are expected to attract \$25.6 billion in co-financing from the private sector, governments, bilateral agencies, and other sources, with the MDBs providing a further \$9.1 billion to CTF projects. The 2016 Budget provides \$170.7 million to fulfill the remainder of the U.S. pledge to the CTF.

The Strategic Climate Fund (SCF) is a suite of three programs to pilot innovative approaches and scaled-up activities aimed at specific climate change-related challenges in developing countries. The SCF is one of the two multilateral Climate Investment Funds (CIFs). The 2016 Budget provides \$59.6 million to meet the remainder of the U.S. pledge to the SCF.

The Pilot Program for Climate Resilience (PPCR) helps the most vulnerable populations in very poor countries better prepare for and respond to the effects of climate change through innovative development plans, strategies, and projects. The PPCR pilot programs are for Bangladesh, Bolivia, Cambodia, Mozambique, Nepal, Niger, Tajikistan, Yemen, Zambia, the Caribbean region (Dominica, Grenada, Haiti, Jamaica, Saint Lucia, Saint Vincent and the Grenadines), and the Pacific region (Papua New Guinea, Samoa, and Tonga). The value of planned PPCR investments is over \$1 billion.

The Forest Investment Program (FIP) helps protect our global forests by reducing deforestation in developing countries through improved governance and forest management, and by addressing the drivers of deforestation. The FIP pilot programs are for Brazil, Burkina Faso, Democratic Republic of Congo, Ghana, Indonesia, Lao PDR, Mexico, and Peru. The value of currently planned FIP investments is \$500 million.

The Program for Scaling-Up Renewable Energy in Low Income Countries (SREP) will demonstrate the economic, social, and environmental viability of low-carbon development pathways in very poor countries. The current SREP pilot programs are for Armenia, Ethiopia, Honduras, Kenya, Liberia, Maldives, Mali, Nepal, Solomon Islands, Tanzania, and Vanuatu. The value of currently planned SREP investments is \$500 million. Sixteen other countries have been invited to develop programs.

Treasury requests \$43 million for the Global Agriculture and Food Security Program (GAFSP), a multi-donor trust fund called for by G-20 leaders at the November 2009 Pittsburgh Summit. GAFSP is the multilateral component of the President's Feed the Future initiative.

The GAFSP is a multilateral mechanism that funds projects supporting the agricultural investment plans of poor countries. The GAFSP, which is administered by the World Bank, leverages the expertise and implementing structures of other multilateral institutions such as the International Fund for Agricultural Development, the World Bank, and the regional development banks. Since its inception in 2010, the GAFSP public sector window has awarded grants \$1 billion in grant financing to 30 low-income countries in Asia, Latin America, and Africa. These investments are expected to help smallholder farmers and their families increase their income and strengthen their nutritional outcomes. These grants were funded from contributions from the United States, Canada, Ireland, South Korea, Australia, Spain, the United Kingdom, and the Bill and Melinda Gates Foundation. The private sector window, which provides financing to small and medium-sized agribusinesses, has invested roughly \$76 million, funded from contributions from the United States, Canada, Japan, the United Kingdom, and the Netherlands.

In October 2012, the United States pledged to commit \$1 for every \$2 from other donors up to a total U.S. contribution of \$475 million. As of December 2014, other donors have committed \$242 million in additional funding, which was matched by the U.S. with \$121 million from FY 2014 appropriations. Fundraising efforts are ongoing, and Treasury expects at least an additional \$80 million in new commitments from other donors by the beginning of FY 2016, which would require at least \$40 million from the United States to meet our matching challenge.

The Green Climate Fund (GCF) is a new multilateral fund designed to foster resilient, low-emission development. The GCF will advance its mission by using a range of financial instruments to support projects and programs in developing countries that promise the greatest impact in reducing greenhouse gas (GHG) emissions and building resilience. It will also advance its mission by mobilizing private sector capital and fostering stronger policy environments that better address the challenges of a changing climate.

The GCF will fund activities across a variety of sectors, including transport; water and other infrastructure; energy generation and efficiency; and land use, including agriculture and forestry. Through these investments, the GCF will support development that is resilient and resource-efficient, and that minimizes the potential negative impact on citizens' health and well-being. The 2016 Budget includes \$150 million through Treasury toward the U.S. pledge to the GCF.

Treasury requests \$192.9 million for the International Bank for Reconstruction and Development (IBRD). This amount includes \$117.4 million for the fifth of five installments for the General Capital Increase (GCI); \$69.6 million for the fourth of four installments for the Selective Capital Increase (SCI); and \$6 million to address shortfalls from FY 2013 appropriations that, if not paid, will result in a loss of U.S. shareholding at the IBRD.

The IBRD is the arm of the World Bank that provides financing to creditworthy middle-income countries to promote inclusive economic growth and reduce poverty. Middle-income countries—home to over 70 percent of the world's poor—rely on the IBRD for financial resources and strategic advice to meet their development needs.

Working across a range of sectors, including agriculture, sustainable infrastructure, health and nutrition, and education, the IBRD supports long-term human and social development needs that private creditors do not finance. During its 2014 fiscal year, the IBRD committed \$18.6 billion to support 95 projects in 41 countries. The largest share of this lending went to countries in the Europe and Central Asia region (\$4.7 billion) and the Latin America and Caribbean region (\$4.6 billion), followed by countries in the Middle East and North Africa region (\$2.6 billion).

The United States is the largest shareholder in the IBRD, with a 15.8 percent share of total voting power, followed by Japan and China. The United States is the only country with veto power over amendments to the Articles of Agreement.

Global Environment Facility

The Global Environment Facility (GEF) is the largest funder of projects to improve the global environment, providing grants to address issues related to biodiversity, climate change, oceans, land degradation, and chem-

ical pollution. The GEF supports innovative, cost-effective investments that can be replicated and scaled up by the public and private sectors. In 2014, the GEF approved 361 new projects totaling \$889 million. Since its establishment in 1991, the GEF has allocated \$13.5 billion, supplemented by more than \$65 billion in co-financing, to fund more than 3,900 projects in 165 developing countries. The sixth replenishment to the GEF (GEF-6) began on July 1, 2014 and will conclude on June 30, 2018. The 2016 Budget provides \$168.3 million for the GEF, which includes \$136.6 million for the second of four annual installments to GEF-6 and \$31.7 million for unmet commitments to GEF-5.

Treasury requests \$1,290.6 million for the second of three annual installments to the seventeenth replenishment of the International Development Association (IDA).

IDA is the part of the World Bank that supports the growth and development of the world's 77 poorest countries, home to 2.8 billion people, in every region of the world. IDA works across a wide range of sectors including education, basic health, clean water and sanitation, the environment, infrastructure, and agriculture. Because countries receiving IDA financing are too poor to attract sufficient capital to support their urgent development needs, they depend on low-cost loans and grants to create jobs, build critical infrastructure, increase agricultural productivity, provide energy, and invest in the health and education of future generations.

IDA's goal is to help countries reduce poverty and achieve higher levels of growth and institutional capacity. Over time, IDA's support helps

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION—Continued countries finance their development needs through domestic revenues and borrowing at non-concessional rates. To date, 33 countries once eligible for IDA assistance have graduated and no longer receive support from IDA.

Of the \$22.2 billion in commitments approved in IDA's 2014 fiscal year, nearly half—\$10.2 billion—went to countries in sub-Saharan Africa. Countries in the South Asia region received \$8.5 billion, and \$2.1 billion went to countries in the East Asia and Pacific region. The Europe and Central Asia region received \$798 million, while the Latin America and the Caribbean region received \$460 million. Almost 15 percent of IDA's resources are provided as grants to fragile states and other countries at risk of debt distress.

Multilateral Debt Relief Initiative

Treasury requests \$111 million for the U.S. share of the cost of the Multilateral Debt Relief Initiative (MDRI) at IDA. This amount will be applied toward our unmet commitments to MDRI under the previous IDA-16 replenishment.

Launched in 2006 at the urging of the United States, MDRI provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries become eligible for MDRI after completing the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development.

MDRI requires donors to compensate IDA for the cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. IDA calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Each donor's commitments to MDRI at IDA must be met within the three-year replenishment period to avoid a negative impact on IDA's commitment capacity. With a 20.1 percent burden share, the U.S. share of the cost of MDRI under IDA-17 is \$565 million. In addition to these current commitments, the United States has \$246 million in unmet MDRI commitments from IDA-16. Altogether, the United States faces total commitments of \$811 million for MDRI at IDA over the FY 2015–FY 2017 period.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against non-commercial risks and carrying out investment promotion activities. In 2014, MIGA issued a total of \$3.2 billion in guarantees for projects in developing countries. Negotiations on MIGA's first general capital increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The GCI decision included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional

authorization for the United States' full participation in the MIGA GCI. No appropriations request is being made for MIGA for 2016.

Treasury is seeking \$102 million for the fifth of five installments for the Inter-American Development Bank's (IDB) Ninth General Capital Increase (GCI-9).

The IDB is the largest source of development financing for 26 countries in Latin America and the Caribbean, a strategically significant and economically important region for the United States and a region where 66 million people live in extreme poverty. In 2014, the IDB made \$13.8 billion in financing commitments to support 168 projects. About 37 percent of commitments targeted small and vulnerable borrowing countries, such as El Salvador, Guyana, Honduras, and Jamaica.

The IDB works in a range of sectors and commits roughly half of its funding to support infrastructure and the environment through projects in water and sanitation, transportation and energy. The other half is split between capacity building, including reform of government operations and financial markets, and the social sector, including social investment, health, and education.

Given the IDB's significant response to the global financial crisis, in 2010, shareholders approved GCI-9 to ensure that the IDB had the resources necessary to assist countries that suddenly found themselves shut off from global capital markets. As part of the GCI-9 resolution, the IDB established a special grant facility for Haiti that will receive income transfers of \$200 million annually from the IDB through 2020. This facility provides Haiti

with critical resources to support a long-term development agenda. Establishing this facility was a critical U.S. objective of GCI-9.

The United States is the largest shareholder in the IDB, with 30 percent of total shareholding, enabling the United States to wield significant influence over major decisions about the direction of the IDB.

Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), a member of the Inter-American Development Bank Group established in 1984, promotes development of private small- and medium-sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs, as well as through lending to private financial intermediaries, the IIC helps SMEs in the region access the medium- and long-term capital necessary to start up, expand, or modernize operations. In 2014, the IIC approved 63 projects totaling \$420.3 million. Since its inception, the IIC has approved a total of \$5.6 billion in commitments.

The Asian Development Bank (AsDB) Group promotes broad-based sustainable economic growth and development, poverty alleviation, and regional cooperation and integration in the Asia-Pacific region. It has two main financing windows: 1) the Asian Development Bank's "hard-loan" window (known as the Ordinary Capital Resources (OCR) window); and 2) the Asian Development Fund's (AsDF) "soft-loan" window, which lends at concessional rates to the region's poorest nations.

Asian Development Bank

Treasury requests \$5.6 million to pay down unmet U.S. commitments to the AsDB that resulted from shortfalls in FY 2011 and FY 2013.

The AsDB provides long-term loans at market rates to 23 middle-income Asian countries that lack the resources to finance their national economies and build critical infrastructure. The AsDB also supports private sector development with technical assistance, loans, guarantees, and direct equity investments in viable private sector projects with strong development impacts. In 2014, the AsDB approved \$10.3 billion worth of direct financing for projects and leveraged another \$6.6 billion in co-financing from official and commercial sources

Through its lending, both for projects and for policy reforms, the AsDB supports the construction of critical economic infrastructure, the expansion of private enterprise, and environmentally-sustainable economic growth. The majority of AsDB assistance is for investments in transportation, energy, finance, and industry and trade, with other sectors such as water supply, municipal infrastructure, agriculture and natural resources, and public sector management also receiving significant funding.

The AsDB is financed through capital contributions from donors, income earned on its loan and investment portfolios, public bond issues, and private placements. In April 2009, donors concluded the AsDB's fifth general capital increase (GCI-V), which tripled the AsDB's capital base to \$165 billion. GCI-V was necessary to enable the AsDB to maintain an adequate level of lending after it stepped in with a significant increase in lending to assist developing Asian countries to withstand the effects of the global financial crisis.

Asian Development Fund

Treasury requests \$166.1 million for the AsDF. This amount includes \$89.9 million for the second of four installments to the AsDF's Tenth Replenishment (AsDF-11) and \$76.2 million to pay down our unmet commitments to the AsDF.

The AsDF currently provides concessional loans and grants to the 29 poorest countries in Asia, including Afghanistan and Pakistan. It focuses on supporting inclusive, environmentally sustainable economic growth, and regional cooperation and integration. Specific sectors of focus include clean energy, sustainable transportation, and access to reliable water and sanitation. The AsDF also invests in cross-cutting activities, such as connecting entrepreneurial training with financing for SMEs. From 2009 to 2013, the AsDF has approved \$15.5 billion through 250 loans and grants for AsDF-eligible countries. Historically, the AsDF has provided over \$50 billion for projects in developing member countries of the AsDB.

Water, energy, and transportation infrastructure comprise 68 percent of all AsDF projects, while financial sector deepening, agriculture, and health projects make up the remainder of AsDF activities. In recent years, with U.S. encouragement, the AsDF has focused on countries where support strengthens U.S. national security priorities.

The African Development Bank Group is composed of 1) the African Development Bank (AfDB), which lends at prevailing rates to middle-income countries and private-sector borrowers in middle- and low-income countries; and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries. AfDF includes a portion of the U.S. commitment to the Multilateral Debt Relief Initiative (MDRI).

African Development Bank

Treasury requests \$34.1 million for the AfDB. This amount includes \$32.4 million for the fifth of eight installments for the AfDB's Sixth General Capital Increase (GCI-6) and \$1.7 million to repurchase shares that were forfeited due to our payment shortfall in FY 2013.

The AfDB provides public sector financing at market-linked rates to 16 middle-income African countries, and provides loans, equity investments, lines of credit, and guarantees to the private sector in all 54 African member countries.

The AfDB had close to \$2.75 billion in lending approvals in 2014, split almost evenly between the public and private sectors. Forty percent of AfDB projects are in infrastructure (including sector support in energy, transportation, communication, and water and sanitation), 20 percent in the financial sector, and almost 15 percent in the social sector, with the balance in agriculture, rural development, and governance.

The United States is the largest non-regional shareholder at the AfDB, with 6.5 percent of total shareholding, and the second-largest shareholder overall, after Nigeria.

African Development Fund

Treasury requests \$227.5 million for the AfDF. This amount includes \$195 million for the second of three installments to the thirteenth replenishment of the African Development Fund (AfDF-13) and \$32.5 million to pay down our unmet commitments to the AfDF.

The AfDF is the AfDB Group's concessional lending window, providing highly concessional loans and grants to the poorest countries in Africa, nearly half of which are fragile or conflict-affected states. The AfDF has cumulatively invested \$45 billion over its 40 years of operation, and in 2014 provided close to \$1.6 billion in financing, technical assistance, and capacity-building activities to the 39 countries that it serves. AfDF recipient countries increasingly include growing African economies that are becoming new, emerging markets and U.S. trading partners. Yet other AfDF recipient countries remain trapped in fragility, conflict, and poverty and are highly vulnerable to both internal and external shocks and in need of special assistance to achieve basic levels of service delivery.

The AfDF is the largest official financier of infrastructure in sub-Saharan Africa, committing over half of its funding to national and regional infrastructure projects, in sectors such as energy, transport, and water and sanitation. The remainder of its funding is devoted to governance, agriculture and food security, and human capital development. The AfDF also sets aside special funding for fragile and transitioning states and regional projects.

Multilateral Debt Relief Initiative

Treasury requests \$13.5 million for the U.S. share of the cost of MDRI at AfDF. This amount will be applied toward our unmet commitments to MDRI under the previous AfDF-12 replenishment.

Launched in 2006 at the urging of the United States, MDRI provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries become eligible for MDRI after completing the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development.

MDRI requires donors to compensate AfDF for cancelled debt under MDRI on a dollar-for-dollar basis according to the payment schedules of the original loans. Similar to IDA, AfDF calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Donor commitments must be met within the three-year replenishment period to avoid a negative impact on the AfDF's commitment capacity.

At 11.8 percent burden share, the U.S. share of the cost of MDRI under AfDF-13 is \$55 million. The United States also has over \$54 million in unmet MDRI commitments from AfDF-12. Altogether, the United States faces total commitments of \$109 million for MDRI at the AfDF over the FY 2015–FY 2017 period.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism predominantly through private-sector lending and investments. Its original field of operation in the countries of Central and Eastern Europe and the former Soviet Union was expanded in 2012 to aid in the transitions of key countries in the Middle East and North Africa. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion), which went into effect in April 1997. In 2012, the United States provided \$1.25 billion in temporary callable capital to support increased resource demands that resulted from the 2008 financial crisis. No appropriations request is being made for the EBRD in 2016.

Treasury is seeking \$45 million for the first of five installments of the first North American Development Bank (NADB) general capital increase. NADB finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Cooperation Commission (BECC). BECC is NADB's sister institution and is designed to assist border states and local communities in identifying projects on both sides of the U.S.-Mexico border.

Under its charter, the United States and Mexico contributed equally to NADB's capital—a total contribution of \$450 million in paid-in capital and \$2.55 billion in callable capital for a total capital base of \$3 billion. The proposed general capital increase would double NADB's capital base to \$6 billion.

As of December 2014, NADB had approved \$2.5 billion in loans and grants and leveraged an additional \$3 billion from the private sector.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development, as well as financial and labor sector reforms, in Latin America and the Caribbean. Special consideration is given to reforms that promote privatization and encourage private foreign direct investment. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development. In 2014, the MIF approved 81 projects totaling \$93.7 million. Since its inception in 1992, the MIF has approved over 1,750 projects, for which the MIF contribution totaled approximately \$2 billion.

CONTRIBUTION TO THE ENTERPRISE FOR THE AMERICAS MULTILATERAL INVESTMENT
FUND—Continued

The United States made a \$500 million commitment to the MIF in 1992. Negotiations were completed in early 2005 for the first replenishment of the MIF (MIF-II), with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: strengthening the commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, and reforming Inter-American Development Bank procurement.

Treasury requests \$31.9 million for the International Fund for Agricultural Development (IFAD). This amount includes \$30 million for the first of three installments for IFAD's tenth replenishment (IFAD-10) and \$1.9 million to clear a portion of the United States' \$5.8 million unmet commitment to IFAD.

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to help rural small-scale producers and subsistence farmers increase their productivity and incomes, improve food security, and integrate them into larger markets.

Pursuant to OTA's authorizing statute, OTA provides technical assistance to facilitate the implementation of policy, management, and administrative reforms in the areas of budget, revenue, government debt, financial institutions and financial enforcement to developing and transition countries. This assistance supports U.S. foreign policy and national security objectives.

The 2016 Budget includes \$28 million to fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs in Asia, the Middle East, Africa, Latin America, and the Caribbean. It will enable the provision of technical assistance to developing and transition countries to strengthen the capacity of finance ministries, central banks, and other government institutions to manage public finances and oversee the financial sector. Technical assistance projects support efficient revenue collection, well-planned and executed budgets, judicious debt management,

sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. The appropriation will also support Treasury's work to strengthen the financial underpinnings for infrastructure development. OTA will continue to coordinate its activities with the Department of State, USAID, and other relevant U.S. Government agencies as well as international financial institutions, and other bilateral donors when determining where its technical assistance program can have the greatest positive impact.

Funds for debt restructuring are periodically needed to help countries remove the burden of unsustainable debts, thereby establishing a sounder footing for economic growth. Debt relief and restructuring can be fundamental to helping countries stabilize their economies, restart economic growth, and reduce poverty and instability. Through programs such as the Heavily Indebted Poor Countries (HIPC) Initiative, the Multilateral Debt Relief Initiative (MDRI), as well as through the Paris Club, countries that have demonstrated a commitment to economic reforms and poverty reduction can benefit from debt restructurings. These programs reschedule and/or reduce the debt repayments to multilateral institutions and/or the U.S. Government, allowing beneficiary countries to increase poverty reduction expenditures in areas such as health, education, and rural development. Debt relief can also be used to promote other USG priorities. No funding is requested for the Debt Restructuring account in 2016, though the Budget includes authorization to transfer up to \$275 million to cover the cost of HIPC debt relief for Sudan, should the Secretary of State determine that Sudan has made sufficient progress along the various fronts the U.S. has identified as pre-conditions for any U.S. support, including implementing

the agreement reached by the Governments of Sudan and South Sudan under the Comprehensive Peace Agreement, and other legislative requirements related to HIPC debt relief, including determinations on human rights and state sponsorship of terrorism.

Development Assistance Programs.—The U.S. Agency for International Development (USAID) uses Development Assistance (DA) funding as one of its primary tools in meeting its mission by investing in partnerships that support ending extreme poverty and promoting resilient, democratic societies around the world. Achieving these goals requires enabling inclusive, sustainable growth; promoting free, peaceful, and self-reliant societies with effective, legitimate governments; and building human capital and creating social safety nets that reach the poorest and most vulnerable populations. USAID uses DA funds to apply proven solutions to the world's greatest development challenges through a focus on evaluation and results and by leveraging innovation, science, technology, partnerships, and local leadership.

More than 40 percent of DA funding supports the Presidential Initiatives on Global Climate Change and Feed the Future. In Global Climate Change, DA programs support investments both in climate change adaptation as well as in clean and sustainable economic development and land use. These programs assist developing countries to adapt to climate change and to build the resilience of vulnerable populations to its negative impacts, and to speed their countries' transition to climate-resilient, low emission, sustainable economic growth. The Feed the Future (FTF) initiative strives to invest in inclusive agriculture-led growth through improving agricultural productivity, expanding markets and trade, and increasing the economic resilience of vulnerable rural communities. Funding supports efforts to unleash the potential of agricultural producers and the private sector to connect smallholders to markets, and to reduce poverty and stunting by 20 percent in targeted geographic regions by 2017. The FTF initiative also supports improving nutrient quality and food supply safety across the agricultural value chain.

DA funds furthermore support lines of effort under the U.S. Strategy for Engagement in Central America, an inclusive, whole-of-government approach to promoting prosperity, improved governance, and security in the region. In addition, funds support Power Africa activities to increase electricity access in sub-Saharan Africa, as well as the strategic rebalance to the Asia-Pacific to strengthen regional economic integration and trade that advance democratic and economic development.

DA also funds programs in the areas of governing justly and democratically, promoting economic growth, advancing basic and higher education, expanding efforts in the areas of innovation, science and technology, and empowering women and girls. Funding in these areas responds to longer-term challenges of human and economic security and helps protect U.S. national security in the long-run.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, and transition to development assistance programs. Humanitarian relief interventions include, but are not limited to, shelter, emergency health and nutrition, and the provision of safe drinking water.

IDA programs target the most vulnerable populations who are affected by the shock of a disaster, including those who are internally displaced.

Of this request, \$241 million is for flexible emergency food assistance, including interventions such as local and regional purchase of food near emergencies, food vouchers, or cash transfers. An additional \$485 million for emergency food assistance is requested in OCO for this account.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting responsiveness of central governments

to local needs, civic participation programs, media programs raising awareness of national issues, addressing underlying causes of instability, and conflict resolution measures. Recent country examples where TI funds were used include Afghanistan, Pakistan, Honduras, Lebanon, Libya, Syria, Yemen, Burma, Mali, and Cote d'Ivoire.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Office of Inspector General (OIG) provides oversight of foreign assistance programs implemented by USAID, the Millennium Challenge Corporation, U.S. African Development Foundation, the Inter-American Foundation, and, on a limited basis, the Overseas Private Investment Corporation. OIG aims to increase accountability and efficiency in these programs, and promote good stewardship of foreign assistance funds through

its audit and investigative work, and in its communications with decision and policy-makers.

Each year, OIG supports U.S. foreign assistance objectives by promoting the effective management and integrity of development and humanitarian assistance programs. OIG's activities help deter and detect fraud, waste, and abuse in agency programs, mitigate heightened risks posed by corruption and instability in settings where U.S. foreign assistance agencies operate, and recoup funds lost to error, waste, and fraud.

The FY 2016 request of \$63 million will enable OIG to carry out ongoing activities and address new requirements. Under the request, OIG will continue to execute mandatory oversight efforts, such as annual agency financial statement and Federal Information Security Management Act audits. It will also continue oversight of activities in frontline states and conflict-affected areas, food and agricultural programs; and global health programs, such as USAID's ongoing efforts to combat HIV/AIDS, tuberculosis, and malaria. The request provides funds for ongoing and anticipated investigative activity in FY 2016, including the conduct of fraud awareness briefings with agency and implementer staff around the world and efforts to work with law enforcement agencies abroad to help ensure integrity in the use of U.S. foreign assistance funds.

The FY 2016 budget request also includes funds for anticipated increases in oversight for USAID's Local Solutions Initiative and in the number of whistleblower complaints brought by federal contractors and grantees. It also funds the continued operation of OIG's Anti-Fraud Hotline in Pakistan and provides necessary support to the Council of the Inspectors General on Integrity and Efficiency.

The budget request for the Office of Inspector General of \$63 million for FY 2016 represents a 16 percent increase above FY 2015 enacted levels. This amount will allow OIG to expand its operations by increasing domestic and overseas staff in international offices above current and planned FY 2015 levels to conduct its oversight responsibilities.

In addition, \$5.6 million in no-year FY 2015 Ebola-related emergency funds represent a 10 percent increase above planned FY 2015 levels, allowing OIG to address oversight needs related to the Ebola crisis in West Africa.

The Inspector General has submitted comments setting forth the Inspector General's conclusion that this Budget's request for the Office of Inspector General "would substantially inhibit the Inspector General from performing the duties of the office" under Section 6(f)(3)(E) of the Inspector General Act of 1978, as amended. These comments are included in the congressional justification.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service- provider missions and technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2016, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2016, the request for \$40 million in DCA transfer authority will continue to support the flow of credit to microfinance institutions, small and medium enterprises, and agribusinesses. DCA will also take advantage of more developed municipal capacity and capital markets to expand successful sub-sovereign financing models developed in Asia and Eastern Europe. The request for \$9.2 million in credit program administrative expenses will fund the total cost of development, implementation, and financial management of the DCA program, as well as the continued administration of USAID's legacy credit portfolios.

The Overseas Private Investment Corporation encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its credit program is investment financing through loans and guaranteed loans.

As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The 2016 Budget includes \$20 million in transfer authority and up to \$20 million from OPIC's subsidy appropriation to implement OPIC's existing authority to execute a targeted equity financing program to fund limited partner interests in investment funds in regions of the Administration's highest foreign policy priorities, particularly Africa.

The Peace Corps will provide direct and indirect support to Americans serving as Volunteers in approximately 64 countries worldwide in 2016, including the necessary safety and security provisions for Volunteers, trainees, and staff. The 2016 budget supports recruitment, screening, and placement of Peace Corps trainees and sustains new and existing Volunteers to have approximately 7,390 Americans enrolled in the Peace Corps by the end of 2016. The Volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps also promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the benefits of community service. Peace Corps Volunteers work primarily in the areas of agriculture, business development, education, environment, health and HIV/AIDS, and youth.

The Peace Corps Office of Inspector General provides independent oversight in accordance with the Inspector General Act of 1978, as amended. Through audits, evaluations and investigations the office prevents and detects waste, fraud, abuse and mismanagement; provides advice and assistance to agency management; and promotes efficiency, effectiveness and economy in agency programs and operations.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation's (IAF) mission is to promote and invest in citizen-led grassroots development in Latin America and the Caribbean to help communities thrive. It funds self-help ideas and priorities articulated by poor communities in the region. Grantee partners invest their own resources and mobilize contributions from others. This approach is cost-efficient and results in effective, community-led development that is consistent with U.S. foreign policy goals in the region: to expand access to economic opportunities, enhance social inclusion, build citizen engagement in democratic processes at the grassroots level, and strengthen resilience to crime and violence. The IAF has specialized expertise in citizen-led development, an extensive network with Latin American civil society organizations, and a robust evaluation system that complement the assets of other U.S. government agencies. It uses these tools in collaborating and sharing lessons in development with public and private sector partners.

Development Grants: IAF works in 20 countries in Latin America and the Caribbean and has a portfolio of approximately 261 active projects. It funds a variety of activities, including agriculture and food production, enterprise development, education and training, corporate social investment, cultural expression, environmental stewardship, and health programs. Advancing the inclusion of women, children and youth, indigenous peoples and African descendants in economic and civic life is of high priority to the IAF. In 2015, the IAF plans to award approximately 100 new and supplemental grants.

Leveraging of Resources: Grantee partners invest their own resources and mobilize contributions from others in the local public and private sector; on average over the last five years, counterpart commitments have represented \$131,000 for every \$100,000 invested by the IAF. U.S. based hometown associations are also supporting the IAF-funded grassroots development projects in their communities of origin. In addition, members of ReDEAmerica, an IAF-initiated business sector alliance, have committed to match IAF grant funds for projects at a three-to-one ratio. The IAF also manages resources from other public or private sources to fund its development grant program.

Evaluations and Other Activities: The IAF tracks and independently verifies the progress of its investments at six month intervals using a distinctive evaluation system known as the Grassroots Development Framework (GDF). All grants are audited by an independent audit firm. The IAF convenes learning exchanges among grantee partners, conducts end-of-project assessments of all grants and a five-year ex-post assessment of a sample of projects. The IAF also supports field research on relevant development topics by Ph.D. candidates in U.S. universities. These investments contribute to the cadre of specialists in the field and add to the growing body of knowledge about grassroots development.

USADF is a Federally-funded public corporation promoting economic development among marginalized populations in Sub-Saharan Africa. USADF impacts 1,500,000 people each year in underserved communities across Africa. Its innovative small grants program (less than \$250,000 per grant) supports sustainable African-originated business solutions that improve food security, generate jobs, and increase family incomes. In addition to economic impacts to rural populations, USADF programs are at the forefront of creating a network of in-country technical service providers with expertise critical to advancing Africa's long term development needs.

USADF furthers U.S. priorities by directing small amounts of development resources to disenfranchised groups in hard to reach, sensitive regions across Africa. USADF ensures that critical U.S. development initiatives such as Ending Extreme Poverty, Feed the Future, Power Africa, and the Young African Leaders Initiative reach beyond urban areas to Africa's underserved rural populations. USADF operates in Africa using a cost-effective African led and managed development model that "right sizes" efforts, directing development resources to rural areas of greatest need and potential for impact. USADF programs also leverage funds from other donors. By matching U.S. Government funds with those from host African governments and/or other private sector foundations, USADF increases the development impact of each tax dollar appropriated. USADF's size and lower-cost operating model makes it a highly flexible, innovative, and effective foreign assistance provider to Africa.

The United States participates in the International Monetary Fund (IMF) through a quota subscription, denominated in Special Drawing Rights (SDRs). The U.S. quota in the IMF is presently SDR 42,122,400,000 (approximately \$61 billion as of December 31, 2014). Quotas are the main metric used by the Fund to assign voting shares and to determine countries' contributions to the IMF's general resources and access to IMF financing.

The use of the U.S. quota by the IMF under this account constitutes an exchange of monetary assets and does not result in net budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness.

For additional information, including about the 2016 Budget proposal to implement the 2010 IMF agreement, see the account entitled "United States Quota IMF Direct Loan Program Account".

The Supplemental Appropriations Act of 2009 (Public Law 111-32), enacted June 24, 2009, provided authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$7.2 billion as of December 31, 2014). This increase in the U.S. quota entered into effect on March 25, 2011.

For quota resources authorized by the Supplemental Appropriations Act of 2009, just as with the quota resources appropriated to the IMF prior to 2009, when the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves.

While the U.S. quota in the IMF is not a credit program, the Supplemental Appropriations Act of 2009 (Public Law 111-32) directed that the 2009 appropriation to increase the U.S. quota in the IMF be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, as amended (FCRA), with an additional adjustment to the discount rate for market risk.

The application of FCRA by operation of law to the 2009 quota appropriation was a significant change in the budgetary treatment of the U.S. quota to the IMF that only applies to the 2009 appropriations.

Accordingly, for the quota and the New Arrangements to Borrow (NAB) increases provided by the Supplemental Appropriations Act of 2009, the baseline reflects obligations and outlays under credit reform, plus an additional risk premium.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. The United States successfully achieved its negotiating priorities during this process: (1) a U.S. quota increase with a corresponding equivalent rollback in U.S. participation in the IMF's NAB for no change in overall U.S. financial participation in the IMF; and (2) preservation of U.S. veto power in the IMF.

To implement the terms of the 2010 agreement, the Administration is seeking authorization and appropriations to increase the U.S. quota by SDR 40,871,800,000 (approximately \$59 billion as of December 31, 2014) and simultaneously reduce U.S. participation in the NAB by an equal amount. The Administration also seeks authorization for the United States to accept an amendment to the IMF Articles of Agreement that will facilitate changes in the composition of the IMF Executive Board while preserving the U.S. seat on the Board.

Under the Administration proposal, the budgetary cost is directed to be estimated on a present value basis, using Treasury rates to discount the cash flows. The legislation also directs the restatement of the transactions from the 2009 Supplemental Appropriations Act on this basis. The methods for estimating present value are similar to the methods used under FCRA, but FCRA requirements for budget execution, including financing accounts, cohort-accounting and reestimates would not apply, and the proposal would eliminate the additional risk premium over the cost to Government required by the 2009 Supplemental Appropriations Act. Under this proposal, recorded budget authority and outlays equal the estimated present value cost to Government in the year that the U.S. quota increase is enacted. The transactions with the IMF are treated as a means of financing, and interest earnings and unrealized gains and losses due to currency fluctuations will continue to be recorded in the budget on a cash basis, as they are for quota increases authorized prior to 2009. Revisions to the U.S. position in the NAB would receive the same treatment.

For additional information, including about the Budget proposal, see the account entitled "United States Quota, International Monetary Fund". See also the discussions of the International Monetary Fund budgetary treatment in the Budget Concepts and Budget Process chapters of the Analytical Perspectives volume.

For purposes of the Budget proposal, this account shows the account changes necessary to move the 2009 appropriation from budgetary treatment under FCRA with a risk premium to present value. The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's quota resources to forestall or cope with an impairment of the international monetary system. GAB participants agreed in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6.2 billion as of December 31, 2014).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB), which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated for the first time in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB participants in March 1999. From 1999 through March 2011 the NAB was not activated.

In 2014, forty countries and institutions participated in the NAB for a total of SDR 370 billion (about \$536 billion as of December 31, 2014), of which the U.S. share is approximately SDR 69 billion (about \$100 billion as of December 31, 2014). In 2014, the NAB was activated for two six-month periods, commencing on April 1 and October 1. As of end 2014, the IMF had accessed SDR 8.3 billion (about \$12 billion) of the U.S. arrangement under the NAB.

The sum of U.S. resources made available to the IMF under the NAB and GAB cannot exceed the total U.S. NAB participation of SDR 69 billion.

With respect to this account, resources provided by the United States under the GAB and NAB constitute an exchange of monetary assets and do not result in any net budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the GAB and NAB are readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. For additional information about the Budget proposal, see the account entitled "United States Quota IMF Direct Loan Program Account". For additional information on the NAB, see also "Loans to the IMF Direct Loan Program".

At the G-20 Leaders' Summit in London in April 2009, the President secured agreement to expand participation and increase the size of the New Arrangements to Borrow (NAB) by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this agreement, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act of 2009 (Public Law 111-32) enacted on June 24, 2009, provided authorization and appropriations for an increase in the United States participation in the NAB by up to SDR 75 billion. This SDR amount was subject, as a practical matter, to the public commitment to an increase by up to \$100 billion. This increase in the U.S. participation in the NAB, equivalent to SDR 62.4 billion, entered into effect on March 11, 2011.

For all NAB resources, including those provided in the Supplemental Appropriations Act of 2009, the transaction constitutes an exchange of monetary assets resulting in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the General Arrangements to Borrow (GAB) and NAB are readily available to meet a U.S. balance-of-payments financing need.

While U.S. participation in the NAB is not a credit program, the Supplemental Appropriations Act of 2009 directed that the 2009 appropriation for the increase in the U.S. participation in the NAB be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, as amended (FCRA), with an adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation was a significant change in the budgetary treatment of appropriations for the NAB that applies only to the 2009 appropriations and does not apply to appropriations for the U.S. participation in the NAB prior to 2009.

LOANS TO THE IMF DIRECT LOAN PROGRAM ACCOUNT—Continued

As directed by the Supplemental Appropriations Act of 2009, this account records the subsidy costs associated with the 2009 increase in the U.S. participation in the NAB on a FCRA basis, including an adjustment to the discount rate for market risk.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. To implement the terms of the 2010 agreement, the Administration is seeking to increase the U.S. quota and reduce U.S. participation in the NAB by equal amounts, SDR 40,871,800,000 (approximately \$59 billion as of December 31, 2014). The Administration proposal directs that the cost of these transactions is to be estimated on a present value basis, using Treasury rates to discount the cash flows, and the increases to the NAB and quota provided in the 2009 Supplemental Appropriations Act are to be restated on a present value basis. For additional information about the Budget proposal and about the NAB, see the accounts entitled "United States Quota IMF Direct Loan Program Account" and "Loans to International Monetary Fund".

As authorized by the Supplemental Appropriations Act of 2009 (Public Law 111-32), this non-budgetary account records all cash flows to and from the Government resulting from the 2009 increase in U.S. participation in the New Arrangements to Borrow, consistent with FCRA rules. The amounts in this account are a means of financing and do not affect the deficit and are not included in the budget totals. For purposes of the Budget proposal, this account shows the account changes necessary to move the 2009 appropriation from budgetary treatment under FCRA with a risk premium to present value. This account is not a component of present value budget execution.

The Special Defense Acquisition Fund (SDAF) helps to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations; and expedite the procurement of defense articles for provision to foreign nations and international organizations. Advance purchases focus on high-demand equipment that has long procurement lead times. Long procurement lead times are often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.
