P.L. 109-432, as amended, authorizes mandatory Treasury payments to all States and Tribes equivalent to their share of the accumulated balance of the Abandoned Mine Reclamation Fund. The payments also return half of annual coal fee collections to States and Tribes that have certified completion of their abandoned coal mine reclamation programs.

P.L. 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the Fund are used to generate interest for this purpose.

WATER AND SCIENCE

BUREAU OF RECLAMATION

Appropriations to Reclamation are made from the general fund and from certain special funds. Projects funded from the General Fund include the

Colorado River Basin Project and the Colorado River Storage Project, among others. Special funds include the Reclamation Fund, the Central Valley Project Restoration Fund, the Colorado River Dam Fund, and the Recreation, Entrance, and User Fee account. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act.

Of the Bureau's special funds, the Reclamation Fund consists of repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. It can finance program activities authorized under "Reclamation Law" that directly benefit the 17 Western States. The Central Valley Project Restoration Fund consists of revenues from project beneficiaries. The Colorado River Dam Fund generates revenue from the sale of Boulder Canyon power.

The Water and Related Resources account supports the development, management, and restoration of water and related resources in the 17 Western States. The account includes funds to operate, maintain, and rehabilitate existing water and power facilities; protect public safety; conduct studies on ways to improve the reliability of water and related resources; and cover expenses associated with Indian water rights settlements.

Work is done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.

This fund was established to carry out the provisions of the Central Valley Project Improvement Act—to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley Project area of California. Resources are derived from donations, revenues from voluntary water transfers, and tiered water pricing. The account is also financed through additional mitigation and restoration payments collected on an annual basis from project beneficiaries.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council et. al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) to restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) to reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and natural resource issues, including the water, land, geologic, and biological resources of the

Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

Ecosystems.—The USGS Ecosystems mission area monitors and inventories biological resources and ecological systems; provides scientific information for the management of biological resources and their habitats; studies and predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats; and conducts high priority ecological and biological research needed by Interior for sound management decisions.

Land Resources.—The USGS Land Resources Mission Area delivers scientific data, techniques, analyses, and tools that advance the Nation's understanding of landscapes and the forces that shape them. The mission area operates through partnerships with governmental and non-governmental entities to provide for the research, monitoring, and remote sensing capabilities, including Landsat satellites and data systems, necessary to understand, monitor and detect changes that affect the Nation's natural and agricultural resources, economy, public safety and national security, and historical heritage. The resulting data and products provide an objective scientific foundation for the American public, natural resource managers, and policymakers to make informed decisions about the management of and investments in natural and built landscapes.

Energy and Mineral Resources.—The USGS Energy and Mineral Resources mission area conducts research on the location, quantity, and quality of the Nation's and the world's energy and mineral resources. The mission area provides valuable science to better understand the Nation's mineral and energy resource potential, supply, production, consumption and impacts of development. Accurate scientific information about America's energy and mineral resources is critical, as our Nation depends on energy to power our homes and businesses and minerals to manufacture products we rely on every day, from our cell phones and laptops to the cars we drive. The science provided by the mission area is also used to understand international trade issues, and on a more local scale, to understand the mineral and energy resources available in various parts of our Nation.

Natural Hazards.—The USGS plays a critical role in providing policymakers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

Water Resources.—The USGS is the primary Federal science agency providing information about water resources. To fulfill this responsibility, the USGS Water Resources mission area monitors and assesses the amount and characteristics of the Nation's water resources, assesses sources and behavior of contaminants in the water environment, and develops tools to improve management and understanding of water resources. This work supports Federal, State, tribal, and local government decisions in managing water resources for domestic, agricultural, commercial, industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

Core Science Systems.—The USGS Core Science Systems mission area leads the bureau's mission as the civilian mapping agency for the Nation—a 138-year legacy since its establishment in 1879. The USGS conducts detailed surveys and distributes the resulting high-quality and highly-accurate

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

topographic, geologic, hydrographic, and biogeographic maps and data to the public. Mapping accuracy enabled by cutting-edge technologies allows for precise planning for critical mineral assessments; energy development; transportation and pipeline infrastructure projects; urban planning and development; flood prediction at regional, local, and neighborhood scales; emergency response; and hazards mitigation. The USGS Core Science Systems Mission Area is the Federal steward of this high-quality geospatial data, and provides access to the public through The National Map, the National Geologic Map Database, and the National Biogeographic Map.

Science Support.—The USGS Science Support program funds essential science leadership as well as critical functions such as: scientific integrity processes; sharing and communicating science findings; purchasing science equipment and field supplies; executing science agreements with partners; contracting for support scientists and researchers; safety training; hazardous waste management; succession planning and execution; and information technology, which supports the scientific process and information management of scientific data. Science Support also provides Bureau-wide executive direction and coordination, business administration and financial management.

Facilities.—The USGS Facilities program provides safe, functional workspace, laboratories, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and deferred maintenance and capital improvement for owned assets.

Reimbursable program.—This program includes reimbursements from non-Federal sources (States, Tribes, and municipalities) for: cooperative efforts; proceeds from the sale of copies of photographs and records and the sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. The USGS also receives reimbursements from other Federal agencies for mission-related work performed at the request of the financing agency.

Ecological Services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize potential conflicts between development projects and imperiled species.

Habitat Conservation.—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accom-

plished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 566 refuges, waterfowl production areas in 210 counties managed by 38 wetland management districts, 50 wildlife coordination areas, and seven national monuments. The National Wildlife Refuge System administers this network of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

Conservation and Enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

Fish and Aquatic Conservation.—The Fish and Aquatic Conservation Program consists of a network of 72 National Fish Hatcheries, one historic National Fish Hatchery, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

Cooperative Landscape Conservation.—Through a national network of Landscape Conservation Cooperatives (LCCs), and in cooperation with both Federal and non-Federal partners, the Service enhances its core capacity to address adaptive management problems affecting fish, wildlife, and plants. The budget does not include funding for this activity in FY 2019.

Science Support.—Science Support provides funding for applied science directed at high impact questions of concern to management of fish and wildlife resources. This science provides needed information to inform resource management decisions to best manage species at healthy and sustainable levels. The budget does not include funding for this activity in FY 2019.

General Operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes can also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern. Funding for State and Tribal competitive grants is not included in the 2019 request.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. To focus resources on caring for current DOI lands, the FY 2019 Budget does not include funding for new land acquisition projects and proposes a partial cancellation of prior year balances.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113–264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account have been financed by both the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by Congress. Funding for this program is not proposed in the 2019 request.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located, from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. The 2019 budget does not propose to supplement revenues with discretionary funding.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The FY 2019 Budget proposes a two-year extension of FLREA as appropriations language and legislation

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Energy Policy Act (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed each year to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In FY 2011, administration of this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise

taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.).—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

Boating Safety Programs.—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

Boating Infrastructure Improvement.—4 percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the 4 percent shall be available for grants under either of the award processes referenced in this paragraph.

National Outreach and Communications Programs.—2 percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

Grants to States.—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The National Park Service administers 417 units and over 85 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are available for two years. The FY 2019 Budget proposes that cyclic maintenance funds also be made available for two years. In addition, this account contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

Resource stewardship.—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

Visitor services.—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

Park protection.—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

Facility operations and maintenance.—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

Park support.—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

Centennial Challenge funds are used to complete projects with partner donations. All Federal funds must be matched on a 50/50 basis, derived from non-Federal sources in the form of cash, assets, or a pledge of donation guaranteed by an irrevocable letter of credit. Projects are administered under existing NPS partnership authorities. No funding is requested for this program in FY 2019. The National Park Service Centennial Act (P.L. 114-289) established a National Park Centennial Challenge Fund for signature projects and programs related to visitor services facilities and trail maintenance, funded through offsetting collections exceeding \$10 million from America the Beautiful Senior Pass.

The National Recreation and Preservation appropriation covers a broad range of activities relating to outdoor recreation planning, preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and guidelines; and the administration of technical and financial assistance to international, Federal, State, and local governments and private organizations. This appropriation is comprised of the following seven budget activities:

Recreation Programs.—Provides technical assistance to State and local governments and transfers surplus Federal real property to local governments for recreation uses. The FY 2019 Budget proposes to transfer Recreation Programs from its own activity to the Natural Programs activity as a separate program component.

Natural Programs.—Increases river and trail opportunities through Rivers, Trails, and Conservation Assistance, State and local technical assistance and Chesapeake Bay Gateways and Water Trails grants; creates river conservation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; and manages the

National Natural Landmark program. The FY 2019 Budget does not request funding for Chesapeake Bay Gateways and Water Trails grants. The Federal Lands to Parks program is proposed for transfer to this activity from Recreation Programs in the FY 2019 Budget.

Cultural Programs.—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; and advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training. This program activity also supports the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, and the Native American Graves Protection and Repatriation Grants program. The FY 2019 Budget does not request funding for these grants. Grant administration is proposed for transfer to this activity in the FY 2019 Budget.

Environmental Compliance and Review.—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

Grants Administration.—Provides administrative expenses associated with the Historic Preservation Fund grant programs, the Native American Graves Protection and Repatriation Grants program, the Japanese American Confinement Sites Grants, and the American Battlefield Protection Program Assistance Grants. The FY 2019 Budget proposes to transfer Grants Administration from its own activity to the Cultural Programs activity as a separate program component.

International Park Affairs.—Coordinates international assistance programs and the exchange and support functions that complement the Service's domestic role.

Heritage Partnership Programs.—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources. The FY 2019 Budget does not request funding for financial assistance for this program.

URBAN PARK AND RECREATION FUND

The Urban Park Recreation Recovery Act of 1978 authorizes matching grants and technical assistance to eligible economically distressed urban communities to revitalize and improve recreation opportunities. Last funded in FY 2004, minimal balances remain.

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities:

Line item construction.—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

Special programs.—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

Construction planning.—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

Construction program management and operations.—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

Management planning.—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the following budget activities:

Acquisition Management.—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws and provides for the administration of American Battlefield Protection Program Acquisition Grants.

Federal land acquisition.—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Revolutionary War, the War of 1812, and Civil War Battlefield lands by non-Federal entities. To focus resources on current DOI lands, the FY 2019 Budget does not request funding for land acquisition projects and proposes a partial cancellation of prior year balances.

State conservation grants administration.—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities. Appropriated funding for this program is not requested for FY 2019 in anticipation of estimated increases in GOMESA lease revenue.

State conservation grants.—Provides matching grants to States and local units of government for the acquisition and development of land and facilities that provide the public access to new opportunities to engage in outdoor recreation. The program includes both traditional formula and competitive grant programs for States. Appropriated funding for this program is not requested for FY 2019 in anticipation of estimated increases in GOMESA lease revenue.

Outer Continental Shelf Oil Lease Revenues.—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue

collected from certain oil and gas leases in the Gulf of Mexico Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Consolidated Appropriations Act, 2016 (P.L. 114–113) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

Recreation Fee Program.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, which authorized this program through 2014. Section 131 of the Continuing Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017 (P.L. 115–56) extended FLREA through FY 2019. In the FY 2019 Budget, the Administration proposes appropriations language to extend the authorization for two years and a legislative proposal to permanently reauthorize the Department of the Interior's and the Department of Agriculture's recreation fee programs.

Net proceeds are used for high-priority visitor service and facility maintenance projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Service-wide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with P.L. 108–447. The National Park Service Centennial Act (P.L. 114–289) established in the National Park Foundation, a Second Century Endowment for NPS projects and activities, funded through offsetting collections from the first \$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with P.L. 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for

RECREATION FEE PERMANENT APPROPRIATIONS—Continued

costs associated with the transportation systems in accordance with section 501 of P.L. 105–391.

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d–3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, Indian Tribes, Historically Black Colleges and Universities, and the Save America's Treasures program. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently under-represented in the National Register and as National Historic Landmarks, and grants to preserve the sites and stories of the Civil Rights Movement. Funding for grants-in-aid to Historically Black Colleges and Universities, Competitive Grants, and Save America's Treasures is not requested in the FY 2019 Budget.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of P.L. 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The National Park Service

Centennial Act, P.L. 114-289, establishes a new concessions contracting authority within NPS, which is described under the Visitor Experience Improvements Fund account.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of P.L. 105-391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of P.L. 104-333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is authorized to retain fees collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

Contributions to US Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under P.L. 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

CONSTRUCTION (TRUST FUND)

Parkway construction project funds have been derived from the Highway Trust Fund through appropriations to liquidate contract authority, which has been provided under section 104(a)(8) of the Federal Aid Highway Act of 1978, title I of Public Law 95–599, as amended, and appropriations language, which has made the contract authority and the appropriations available until expended.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities. No funding is requested in 2019 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (P.L. 111-291, Title I) to address fractionation of Indian lands is in a separate account. In

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding Public Law 87-279 (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's oper-

ation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106–113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101–301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

This appropriation supports the functions of the Office of the Secretary of the Interior, including executive-level leadership, policy, guidance, and coordination of the responsibilities carried out by its bureaus and offices. In addition, the appropriation supports programmatic functions carried out by the Office of the Secretary including, mineral revenue modeling, the Take Pride in America program, the Department's quasi-judicial and appellate responsibilities, and the Appraisal and Valuation Services Office. The appropriation also provides for workers and unemployment compensation payments for former Bureau of Mines employees. The FY 2019 Budget proposes a separate account for the Office of Natural Resources Revenue programs within Department-Wide Programs to increase the transparency of this important function.

Public Lands Infrastructure Fund.—Interior manages an infrastructure asset portfolio with a replacement value exceeding \$300 billion, which includes buildings, housing, trails, roads, water systems, and Bureau of Indian Education (BIE) schools. Many of these assets are deteriorating, with older assets becoming more expensive to repair and maintain in good condition. The Budget proposes a new Public Lands Infrastructure Fund to help pay for repairs and improvements in national parks, wildlife refuges and at BIE schools, which have over \$12 billion in deferred maintenance. The fund would be derived from 50 percent of the incremental energy leasing receipts resulting from expanded energy development on Federal lands and waters; eligible receipts would be Federal onshore and offshore energy leasing revenues that exceed the 2018 Budget's receipt projections and are not otherwise allocated for other purposes (e.g., the Reclamation Fund, Land and Water Conservation Fund, Historic Preservation Fund,

and state and local revenue sharing payments). These receipts would be derived from energy mineral leasing (e.g., oil, gas and coal) under the Mineral Leasing Act and Outer Continental Shelf Lands Act, as well as solar, wind and geothermal development on public lands and offshore areas. Deposits to the fund would continue for 10 years and would be capped at a total of \$18 billion. Interior would use its capital asset management systems to prioritize projects, monitor implementation and measure results. The Budget estimates \$6.8 billion in expenditures from the fund over 10 years. This investment would significantly improve the Nation's most visible and visited public facilities.

Under the Mineral Leasing Act, States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State (exclusive of the National Petroleum Reserve-Alaska). To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act permanently amended the Mineral Leasing Act (MLA) to deduct two

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.) to provide that for the revenues collected from geothermal leasing, 50 percent of the revenues are to be paid to the State and 25 percent are to be paid to the county in which the leased lands or geothermal resources are located. These payments are administered by Interior's Office of Natural Resources Revenue. The Administration proposes legislation which would change the allocation to eliminate the 25 percent payments to counties.

Repeal geothermal payments to counties.—The Budget proposes legislation to repeal Section 224(b) of the Energy Policy Act of 2005, and permanently discontinue the 25 percent geothermal lease revenue sharing payments to counties. The legislation proposes to restore the traditional 50/50 Federal-State revenue sharing arrangement. This proposal is estimated to generate savings of \$40 million over ten years to the U.S. Treasury.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the Fund. At this time, no budget authority is requested.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began

COMPACT OF FREE ASSOCIATION—Continued

in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, P.L. 108–188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99–658, and was implemented on October 1, 1994. While the financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, subsequent appropriations in 2010 through 2018 have continued financial assistance to Palau at 2009 levels. The FY 2018 National Defense Authorization Act authorized the strategic agreement signed between the United States and Palau governments in 2010.

Under the 1994 U.S.-Palau Compact of Free Association and the related 2010 Compact Review Agreement (CRA), the United States agreed to provide economic assistance to the Government of Palau. The Compact provides significant strategic value to the United States in achieving national security objectives through the exclusive U.S. access to Palau's land, water and air space. The FY 2019 Budget request for the Department of Defense includes \$111.0 million to bring the 2010 CRA into force and satisfy the outstanding commitment to Palau. This funding would be transferred to the Department of the Interior.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office focuses on providing the Secretary and Congress timely and relevant information regarding the Department's most serious management and program challenges, with a special concentration on high-risk areas vulnerable to fraud, waste, and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results Americans care about most.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established this Fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this Fund for higher education scholarships for American Indians and Alaska Natives to be administered as described

in the settlement agreement. The FY 2019 Budget proposes to shift this account to the Office of the Special Trustee from the Office of the Secretary.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established a new trust land consolidation Fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The Fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the Fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement. The FY 2019 Budget proposes to shift this account to the Office of the Special Trustee from the Office of the Secretary.

The Indian Gaming Regulatory Act established the National Indian Gaming Commission as an independent federal regulatory agency within the Department of the Interior. The purpose of the IGRA and the NIGC is to support and promote tribal economic development, self-sufficiency and

strong tribal governments through the operation of gaming on Indian lands. The Commission collaborates with tribes to monitor and regulate gaming activities conducted on Indian Lands to ensure that gaming operations are conducted with integrity and that tribes are the primary beneficiaries of gaming revenues. IGRA authorizes the Commission to assess and collect fees on tribal gaming revenues to cover agency operating costs.

P.L. 94-565 (31 U.S.C. 6901-07), as amended, authorizes Payments in Lieu of Taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

Since the inception of the PILT program in 1977 through FY 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112-141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113-79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113-235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114-113) provided discretionary PILT funding within the Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The Consolidated Appropriations Act, 2017 (P.L. 115-31) provided discretionary PILT funding within Department-wide Programs. The FY 2019 Budget continues to propose discretionary funding for PILT payments within Department-wide Programs.

The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances. The Central Hazardous Materials Fund is used to fund remedial investigations and cleanup of hazardous waste sites for which the Department of the Interior is liable. The program also has authority to collect and retain amounts recovered from responsible parties within this account.

The FY 2019 Budget funds program management staff costs from annual discretionary appropriations and funds remedial investigations and cleanups using amounts recovered from responsible parties.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States and its State and Tribal co-trustee partners from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The FY 2019 Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and

criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

Preparedness.—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland

fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

Suppression Operations.—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Generally, emergency stabilization actions may be performed within one year of containment of a fire, however, exceptions to this time limit are allowed under certain circumstances. In FY 2010 through 2017, funding for the ten-year average of inflation-adjusted suppression obligations was split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The FY 2019 Budget request proposes to fund 100 percent of the ten-year average within the Wildland Fire Management account and discontinue funding requests in the FLAME Wildfire Suppression Reserve Fund. The FLAME account will be closed out as current balances in the account are drawn down. The Budget also proposes to amend the Balanced Budget and Emergency Deficit Control Act to establish a separate annual cap adjustment for wildfire suppression operations, similar to how unanticipated funding needs for other natural disasters are addressed. This cap adjustment will help ensure that adequate resources are available to the Departments of the Interior and Agriculture to fight wildland fires, protect communities, and safeguard human life during the most severe wildland fire seasons. (The Cap Adjustment Budget request is in a new account, the Wildfire Suppression Operations Fund, at the end of the Federal Funds section in the Other Independent Agencies chapter.) The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

Fuels Management.—The FY 2019 Budget proposes to establish the Fuels Management program as a budget activity, elevating it from its current position as a subactivity under Other Operations. The Fuels Management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. This activity may also conduct treatments that improve the integrity and resilience of our forests and rangelands. The Fuels Management activity will contribute community adaption to fire and improve the ability to safely and appropriately respond to wildfire. Funding for the Fuels Management activity covers the planning, operational aspects, and monitoring of fuels treatments. The program will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

Other Operations.—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and fuels management activities. The FY 2019 Budget proposes to discontinue funding for the Fire Facilities Construction and Maintenance program. In the future, funding for these facilities will appear in the Department's fire-related bureaus' construction and deferred maintenance budgets. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years, or up to five years under certain circumstances, following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds

WILDLAND FIRE MANAGEMENT—Continued

the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics. The Budget proposes to discontinue funding for the Joint Fire Science program.

In 2010 through 2017, amounts in the FLAME Fund included the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary is authorized to permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event DOI has exhausted its suppression resources due to an active fire season. In FY 2019, the Budget proposes to discontinue funding requests in the FLAME Fund. The Budget proposes to fund the Department's full ten-year suppression average in the Wildland Fire Management account. The FLAME account will be closed out as current balances are drawn down. The Budget also proposes to amend the Balanced Budget and Emergency Deficit Control Act to establish a separate annual cap adjustment for wildfire suppression operations, similar to how unanticipated funding needs for other natural disasters are addressed. The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC). Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the Fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide shared service providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, and activities related to improving the Department's cybersecurity capabilities.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology (IT). Under the control of the Department of Justice (DOJ) Chief Information Officer (CIO), this centralized fund ensures that investments in information sharing technology are well-planned and aligned with the Department's overall IT strategy and enterprise architecture. The current major initiatives/projects are described below.

Cybersecurity.—Enhancing cybersecurity remains a top priority for the Department and its leadership as DOJ supports a wide range of missions that include national security, law enforcement, prosecution, and incarceration. For each of these critical missions, the systems that support them must be secured to protect the confidentiality of sensitive information, the availability of data and workflows crucial to mission execution, and the integrity of data guiding critical decision-making.

IT Transformation.—IT Transformation is a long-term, multiyear commitment that implements shared IT infrastructure for the Department and shifts investments to the most efficient computing platforms, including shared services and next generation storage, hosting, networking, and facilities. This directly supports the Federal CIO's 25 Point Plan to Reform Federal IT Management and the Portfolio Stat process, and aligns the Department's IT operations with the Federal Data Center Consolidation and Shared First initiatives. Work on these initiatives began in 2012, and con-

sists of the following projects: a) e-mail consolidation; b) data center consolidation; c) mobility and remote access; and d) desktops. In 2019, DOJ will continue to leverage Schedule A hiring authority with a goal of bringing on board private sector IT subject matter experts to progress IT transformation already underway within the Department's Office of the CIO (OCIO). These experts, with varied skill sets from data architects, application hosting, and business intelligence, will assist OCIO and component customers in moving forward on respective IT initiatives in support of the DOJ mission. Additionally, the OCIO will leverage U.S. Digital Service expertise in its effort to drive innovation in key IT management areas, such as with Digital Acquisition Innovation Labs. OCIO will also continue to leverage its authority under the Federal Information Technology Acquisition Reform Act (FITARA), through the Department's IT Investment Review Council (DIRC) and Investment Review Board (DIRB), and through the TechStat process, to ensure that all Department IT projects and initiatives are meeting expected milestones and remain within project scope and budget.

Policy, Planning and Oversight.—JIST funds the Office of the CIO and the Policy & Planning Staff (PPS), which supports CIO management in complying with the Clinger-Cohen Act, the FITARA, and other applicable laws, rules, and regulations for federal information resource management. Within OCIO, PPS develops, implements, and oversees an integrated approach for effectively and efficiently planning and managing DOJ's information technology resources, including the creation of operational plans for JIST and monitoring the execution of funds against those plans. PPS is responsible for IT investment management including portfolio, program, and project management. The investment management team manages the Department's IT investment and budget planning processes; develops and maintains the Department's general IT program policy and guidance documents; and coordinates the activities of the DIRB DIRC. In addition, PPS performs reviews to examine planned IT acquisitions and procurements to ensure alignment with the Department's IT strategies, policies, and its enterprise road map.

The Executive Office for Immigration Review (EOIR) was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 59 Immigration Courts nationwide, the BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decision makers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning function provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, information technology, computer network communications, telecommunications, records management, quality assurance, internal controls, and general support.

are on the State probation or parole, and are transferred to Federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers, and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105–33).

The following Department legal activities are financed from this appropriation:

Supreme Court proceedings and appellate matters.—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

General tax matters.—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

Criminal matters.—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

Claims, customs, and general civil matters.—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

Environment and natural resource matters.—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

Legal opinions.—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

Civil rights matters.—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members

of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

INTERPOL Washington.—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian, and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts; and coordinating and integrating information for investigations of an international nature.

Office of The Pardon Attorney.—The Office of the Pardon Attorney (OPA) receives and evaluates clemency petitions for federal crimes and prepares letters of advice for the President for each application with approval from the Deputy Attorney General. In addition, OPA responds to inquiries concerning executive clemency petitions and the clemency process from applicants, their legal representatives, members of the public, and Members of Congress; prepares all necessary documents to effect the President's decision to grant or deny clemency; and provides advisory services to White House Counsel concerning executive clemency procedures.

Reimbursable programs.—This reflects reimbursable funding for the following:

Civil Division.—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

Criminal Division.—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

Environment and Natural Resources Division.—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency for Superfund enforcement litigation; and,

Civil Rights Division.—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department of Justice Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino fees, are collected by the FTC and split evenly between the two agencies. In 2019, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners, and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the

Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for protected witnesses' security and relocation, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Department of Education and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

The Federal Prisoner Detention (FPD) account is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD account provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

For 2019, FPD requests funding for housing, medical, and transportation costs associated with the projected USMS detention population. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: 1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); 2) Intergovernmental Agreements with State and local jurisdic-

tions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and 3) Private performance-based contract facilities, where a daily rate is paid. Over three-quarters of the USMS's Federally detained population will likely be housed in State, local, and private facilities.

The USMS continues to look for efficiencies and cost reductions through process and infrastructure improvements. The costs associated with these efforts are funded from the FPD account. Improvements to date include implementation of eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. The USMS will continue to identify issues and develop solutions to drive further efficiencies.

A permanent appropriation is available to fund independent and special counsel activities (28 U.S.C. 591 note). In recent years, special counsels have been appointed to investigate allegations that senior Executive Branch officials violated Federal law. This permanent appropriation is used to fund such investigations. Additionally, the Budget proposes legislation to transfer primary jurisdiction over federal tobacco and alcohol anti-smuggling laws from the Department of Justice and the Bureau of Alcohol, Tobacco, Firearms and Explosives to the Department of the Treasury and the Alcohol and Tobacco Trade Bureau.

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) reopened the September 11th Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts.

The James Zadroga 9/11 Health and Compensation Act of 2010 reopened the VCF and made \$2.775 billion available for the settlement of claim determinations issued on or before December 17, 2015. After all claims in this group were resolved, roughly all remaining funds (\$813 million) became available in the new Victims Compensation Fund. The Victims Compensation Fund is available for the settlement of claim determinations issued after December 17, 2015.

United States Trustee System Fund.—The United States Trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts, and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a 21 region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded the United States Trustees' existing responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation. In October 2017, the Bankruptcy Judgeship Act of 2017 (Public Law 115-72) was enacted which adjusted quarterly fees for the largest chapter 11 debtors. As a result, the United States Trustee Program's FY 2019 appropriation is anticipated to be fully offset by bankruptcy fees collected and on deposit in the United States Trustee System Fund.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal prisoners and detainees in the custody of the United States Marshals Service or the Bureau of Prisons. JPATS transports both sentenced and pretrial prisoners and detainees via coordinated air and ground systems without sacrificing the safety of the public, Federal employees, or those in custody. JPATS also transports prisoners and detainees on a reimbursable space-available basis for the Department of Defense and other participating executive departments as well as State and local agencies. Customers are billed based on the number of flight hours and the number of seats used to move their prisoners.

The Interagency Crime and Drug Enforcement (ICDE) account primarily funds the Organized Crime Drug Enforcement Task Forces (OCDETF) Program. OCDETF combines the resources and expertise of its 11 Federal law enforcement agency members—in cooperation with the Department of Justice's Criminal Division, United States Attorneys' Offices, and State and local law enforcement—to identify, disrupt, and dismantle the major domestic and transnational criminal organizations (TCO) that engage in the drug trafficking, violence, and money laundering activities that threaten the public safety and economic and national security of the United States. The OCDETF Program performs the following activities:

Investigation.—This activity includes resources for the direct investigative, intelligence, and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major TCOs. This activity also includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center which analyzes fused law enforcement financial and human intelligence information, and produces actionable intelligence for use by OCDETF member agencies to disrupt and dismantle major criminal organizations and their supporting financial structures. In addition, the OFC creates strategic intelligence products to enhance TCO threat analyses and support the national strategic efforts against transnational organized crime. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, U.S. Secret Service, U.S. Postal Inspection Service, and Homeland

Security Investigations. OCDEF also maintains 12 co-located Strike Forces. The ICDE account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2). IOC-2 is a multi-agency intelligence center with a mission to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple Federal agencies participate in IOC-2 activities and related investigations. For 2019, ICDE seeks 28 positions, including 19 agents and \$4.6 million to enhance efforts to disrupt and dismantle TCOs.

Prosecution.—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest levels of drug trafficking, violence, and money laundering by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys and the Department of Justice's Criminal Division.

The mission of the Federal Bureau of Investigation (FBI) is to protect the American people and uphold the Constitution of the United States. The FBI's mission priorities are to:

- Protect the U.S. from terrorist attacks;
- Protect the U.S. against foreign intelligence operations and espionage;
- Protect the U.S. against cyber-based attacks and high-technology crimes;
- Combat public corruption at all levels;
- Protect civil rights;
- Combat domestic and transnational criminal organizations and enterprises;
- Combat major white-collar crime; and,
- Combat significant violent crime.

The foundation of the FBI's budget strategy is supported by the FBI's mission, vision, and strategic objectives. At the heart of the FBI's strategy is the vision statement: Ahead of the threat through leadership, agility, and integration. The FBI aims to be ahead of the threat in two different ways. First, the FBI's goal is to continuously evolve to anticipate and mitigate existing threats. Second, the FBI needs to be able to recognize and address threats that it has not yet seen.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, DC, provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and 385 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates over 60 Legal Attaché offices and over 20 sub-offices in 75 foreign countries around the world. Additionally, there are several specialized facilities and analytical centers within the FBI that are located across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Terrorist Explosive Device Analytical Center and Hazardous Devices School in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs, and by other Federal agencies for certain intelligence and investigative services such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2019, the FBI is requesting a total of \$8.872 billion. The request also includes a \$148 million cancellation of excess Criminal Justice Information Services surcharge balances.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply, including heroin. DEA also considers it a high priority to target the financial infrastructure of major drug trafficking organizations, and members of the financial community who facilitate the laundering of their proceeds. From the beginning of 2005 through 2016, DEA denied drug traffickers \$37.5 billion in revenue through the seizure of both assets and drugs, including \$4.1 billion in 2016. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 222 domestic offices organized in 22 divisions throughout the United States. Internationally, DEA has 91 offices in 70 countries and is responsible for coordinating and pursuing U.S. drug investigations abroad. Federal, State, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 43 years, DEA has led a task force program that today includes approximately 2,500 task force officers participating in over 200 task forces. DEA's Special Operations Division and the El Paso Intelligence Center are vital resources for Federal, State, and local law enforcement. Additionally, through the Office of National Security Intelligence, DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three decision units:

Domestic Enforcement.—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, State and local task forces, other Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. DEA's objectives for Domestic Enforcement include:

- Identifying and targeting the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;
- Systematically disrupting or dismantling targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,
- Working with international offices to dismantle domestic organizations directly affiliated with Transnational Criminal Organizations.

International Enforcement.—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. DEA's objectives for International Enforcement include:

- Identifying and targeting the most significant international drug and chemical trafficking organizations;
- Disrupting and dismantling the networks, financial infrastructures, operations, and resource bases of targeted international drug and chemical trafficking organizations; and
- Preventing drug trafficking organizations from funding terrorist organizations and activities.

State and Local Assistance.—DEA provides clandestine laboratory training, and meets the hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports State and local law enforcement with assistance and training so that State and local agencies can better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. As a result, DEA's nationwide contracts, container program, and established training programs allow DEA to provide State and local clandestine lab cleanup and training assistance in a cost-effective manner.

For 2019, the Budget proposes to transfer the High Intensity Drug Trafficking Areas program from the Office of National Drug Control Policy to DEA to improve coordination of drug enforcement efforts among Federal, State, and local law enforcement agencies in the U.S.

The High Intensity Drug Trafficking Areas (HIDTA) program was established by the Anti-Drug Abuse Act of 1988, as amended, to provide assistance to Federal, State, local, and tribal law enforcement entities operating in those areas most adversely affected by drug trafficking. The HIDTA program provides resources to Federal, State, local, and tribal agencies in each HIDTA region to carry out activities that address the specific drug threats of that region. A central feature of the HIDTA program is the discretion granted to HIDTA Executive Boards to design and carry out activities that reflect the specific drug trafficking threats found in each HIDTA region. This discretion ensures that each HIDTA Executive Board can tailor its strategy and initiatives closely to local conditions and can respond quickly to changes in those conditions. Among the types of activities funded by the HIDTA program are: drug enforcement task forces comprised of multiple Federal, State, local, and tribal agencies designed to dismantle and disrupt drug trafficking organizations; multi-agency intelligence centers that provide drug intelligence to HIDTA initiatives and participating agencies; initiatives to establish or improve interoperability of communications and information systems between and among law enforcement agencies; and investments in technology infrastructure.

For 2019, the Budget proposes to transfer the HIDTA program from the Office of National Drug Control Policy to the Drug Enforcement Administration to improve coordination with the Department of Justice's other drug enforcement efforts.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration (DEA) under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. The registrant community, physicians, prescribers, and pharmacists, can be seen as the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of abuse and illicit use. Investigations conducted by the Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. DEA's objectives for diversion control include:

- Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

- Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support, and assistance from the regulated industry;

- Educating the public on the dangers of prescription drug abuse and proactive enforcement measures to combat emerging drug trends; and,

- Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

Federal Prison Industries, Inc. (FPI), was created by the Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal Departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112-55), FPI received two new authorities to increase inmate employment. The first enables FPI to recapture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program, which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2019 Budget requests \$77 million for the Office of Justice Programs' (OJP) Research, Evaluation, and Statistics appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development, and evaluation; develop and disseminate quality statistical and scientific information; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of Government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's Federal, State, local, and tribal law enforcement and criminal justice agencies.

Research, Development, and Evaluation Program.—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 34 U.S.C. 10121-10123. The mission

RESEARCH, EVALUATION AND STATISTICS—Continued

of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the State and local levels. NIJ research, development, and evaluation efforts support practitioners and policy makers at all levels of Government.

Planned activities include but are not limited to: 1) Social science research addressing, among other topics: human trafficking; evaluation of anti-gang programs; policing; crime and justice; elder abuse; and demonstration field experiments in reentry and probation; 2) Provision of criminal justice-focused technology assistance to units of State, local and tribal government; 3) Criminal justice research infrastructure investments including funding for the National Criminal Justice Reference Service and the National Archive of Criminal Justice Data; 4) Development of equipment performance standards and conduct of compliance testing to help ensure the safety and effectiveness of the equipment used by criminal justice agencies, such as body armor, restraints, holsters, and video systems; and 5) Development of new tools and technologies for law enforcement, corrections, and forensic applications, including those aimed at improving officer safety, knowledge management, and community supervision. The 2019 Budget proposes \$36 million for the Research, Development, and Evaluation Program.

Criminal Justice Statistics Program.—The Bureau of Justice Statistics (BJS) serves as the principal statistical Agency within the Department of Justice, as authorized by 34 U.S.C. 10131–10135, and assists State, local, and tribal Governments in enhancing their statistical capabilities. It disseminates high quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program encompasses a wide range of criminal justice topics, including: 1) victimization; 2) law enforcement; 3) prosecution; 4) courts and sentencing; 5) corrections; 6) recidivism and reentry; 7) tribal justice statistics; 8) justice expenditures and employment; 9) international justice systems; and 10) drugs, alcohol, and crime. The 2019 Budget proposes \$41 million for the Criminal Justice Statistics Program.

3% Research, Evaluation and Statistics Set Aside.—The 2019 Budget requests a set-aside of up to three percent for research, evaluation, and statistics. The set-aside amount from OJP discretionary programs supports the base programs for NIJ and BJS.

Management and Administration.—The 2019 Budget proposes a total Management and Administration funding level of \$235.5 million for OJP. This funding level supports management and administration for OJP, including those activities formerly conducted by the Office of Community Oriented Policing Services.

The 2019 Budget requests \$983 million for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. Of this amount, \$233 million is derived by transfer from the Crime Victims Fund. The grant and payment programs supported by this account help American communities address high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, and law enforcement officer safety. These programs, coupled with training and technical assistance activities, assist State, local, and tribal law enforcement, courts, criminal justice agencies, and faith-based and community organizations in preventing and addressing violent crime, protecting the public, and ensuring that those convicted of crimes are held accountable for their actions. OJP State and Local Law Enforcement Assistance funding will be used to support programs such as:

Adam Walsh Act Implementation Grant Program.—This program helps State, local, and tribal jurisdictions to develop and enhance sex offender registration and notification systems that are in compliance with the Sex Offender Registration and Notification Act through discretionary grants and technical assistance. The 2019 Budget proposes \$20 million for this program.

Byrne Justice Assistance Grants (JAG).—The Byrne Justice Assistance Grants program awards grants to State, local, and tribal governments to support a broad range of activities that prevent and control crime, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2019 Budget proposes \$332.5 million for this program. Several well-known OJP programs, including the Bulletproof Vest Partnership Program; the VALOR Initiative, a program that promotes officer safety; and the Public Safety Partnership (formerly NCRA Network or VRN) program, are funded as carveouts under the Byrne JAG program. In FY 2019, jurisdictions will be required to dedicate a small percentage of their awards on National Incident Based Reporting System (NIBRS) compliance. NIBRS is an incident-based system used by law enforcement agencies for collecting and reporting data on crimes. DOJ plans to transition the FBI's Uniform Crime Reporting program to NIBRS only data collection by 2021.

Victims of Trafficking.—This program supports comprehensive and specialized services for human trafficking victims as well multidisciplinary taskforces to identify, investigate, and prosecute these types of cases. The 2019 Budget proposes \$45 million for this program.

Residential Substance Abuse Treatment.—This program helps States and units of local governments develop, implement, and improve residential substance abuse treatment programs in correctional facilities, and establish and maintain community-based aftercare services for probationers and parolees. Ultimately, the program's goal is to help offenders become drug-free and learn the skills needed to sustain themselves upon return to the community. The 2019 Budget proposes \$12 million for this program.

National Criminal History Improvement Program.—This program provides grants, training, and technical assistance that help States and Territories improve the quality, timeliness, and immediate accessibility of criminal history and related records. These records play a vital role in supporting the National Instant Criminal Background Check System (NICS) and helping Federal, State, local, and tribal law enforcement

investigate crime and promote public safety. The 2019 Budget proposes \$51 million for this program.

Prison Rape Prevention and Prosecution Program.—This program supports efforts to implement the National Prison Rape Elimination Act Standards and provides grants, training, and technical assistance to both grantees and the corrections field at large. This program also supports the development of a National set of measures by the Bureau of Justice Statistics describing the circumstances surrounding incidents of sexual assault in correctional institutions. The data collections provide facility-level estimates of sexual assault for a 12-month period. The 2019 Budget proposes \$15.5 million for this program.

Drug Court Program.—This program provides grants, training, and technical assistance to State, local, and tribal governments to support the development, expansion, and enhancement of effective drug courts. The 2019 Budget proposes \$43 million for this program.

Justice and Mental Health Collaboration Program.—This program provides grants, training, and technical and strategic planning assistance to help State, local, and tribal governments develop multi-faceted strategies that bring together criminal justice, social services, and public health agencies, as well as community organizations, to develop system-wide responses to the needs of mentally ill individuals involved in the criminal justice system. The 2019 Budget proposes \$10 million for this program.

Veterans Treatment Court Program.—This program provides grants, training, and technical assistance to State, local, and tribal governments to support the creation and development of veterans treatment courts to serve veterans struggling with addiction, serious mental illness, and/or co-occurring disorders. The Community Oriented Policing Services (COPS) Office administers grants and provides expertise and other assistance in advancing public safety through the implementation of community policing strategies in jurisdictions of all sizes across the country. Community policing is a philosophy that promotes organizational strategies that support the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues such as crime, social disorder, and fear of crime. In FY 2019, these community policing activities will be merged into the Office of Justice Programs (OJP), which provides leadership to federal, state, local and tribal systems, by disseminating state-of-the-art knowledge and practices across America by providing grants for the implementation of crime fighting strategies. Because most of the responsibility for crime control and prevention falls to law enforcement in states, cities, and neighborhoods, OJP has developed partnerships with state and local law enforcement. The transfer of community policing activities to OJP will allow the Department to centralize and strengthen the partnerships it has with its colleagues in State and Local law enforcement and to promote community policing not only through its hiring programs but also through the advancement of strategies for policing innovations and other innovative crime-fighting techniques.

The FY 2019 Budget also proposes to move the Drug Enforcement Administration's (DEA) Methamphetamine Lab Cleanup Program to the DEA Salaries and Expenses account to centralize DEA's funding streams dedicated to assisting State and local law enforcement in their communities.

The Budget requests \$485,500,000 for programs administered by the Office on Violence Against Women (OVW) to prevent and respond to violence against women and related victims. These resources are derived by transfer from the Crime Victims Fund. OVW provides national leadership against domestic violence, dating violence, sexual assault, and stalking, and supports a multifaceted approach to responding to these crimes. Funding will support the Prevention and Prosecution of Violence Against Women and Related Victim Services Program. For FY 2019, funding requested for this account will support the following initiatives:

STOP Violence Against Women Formula Grant Program.—The STOP Program is designed to encourage the development and strengthening of effective law enforcement and prosecution strategies to combat violent crimes against women and the development and strengthening of victim services in cases involving violent crimes against women. The 2019 Budget proposes \$215,000,000 for this program.

Transitional Housing Assistance Program.—Transitional Housing grants support programs that provide assistance to victims of domestic violence, dating violence, sexual assault, and stalking who are in need of transitional housing, short-term housing assistance, and related support services. The 2019 Budget proposes \$33,000,000 for this program.

Research and Statistics on Violence Against Women (National Institute of Justice and the Bureau of Justice Statistics).—This program supports research and statistics on violence against women. The 2019 Budget proposes \$5,000,000 for this program.

Grants to Encourage Arrest Policies.—This discretionary grant program is designed to encourage state, local, and tribal governments and state, local, and tribal courts to treat domestic violence, dating violence, sexual assault, and stalking as serious violations of criminal law requiring the

coordinated involvement of the entire criminal justice system. The 2019 Budget proposes \$51,000,000 for this program.

Homicide Reduction Initiative.—This initiative is designed to use promising and evidence-based practices to address the urgent problem of domestic violence-related homicides by identifying high-risk offenders and providing an enhanced coordinated response to assist victims. For 2019, up to \$4,000,000 will be made available from the Grants to Encourage Arrest Policies Program.

Domestic Violence Firearms Lethality Reduction.—This initiative will identify and implement promising practices to improve the response of law enforcement, prosecutors, courts, and victim service providers in addressing the safety of victims in cases involving firearms. Demonstration projects will be funded in approximately 5 jurisdictions. For 2019, up to \$4,000,000 will be made available from the Grants to Encourage Arrest Program.

Sexual Assault Services Program.—This program provides funding for states and territories, tribes, state sexual assault coalitions, tribal coalitions, and culturally specific organizations. Overall, the purpose of this program is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected by sexual assault. The 2019 Budget proposes \$35,000,000 for this program.

Rural Domestic Violence Program.—This program enhances the safety of child, youth and adult victims of domestic violence, dating violence, sexual assault, and stalking by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The 2019 Budget proposes \$35,000,000 for this program.

Grants to Reduce Violence Crimes Against Women on Campus.—The Campus Program develops and strengthens victim services in cases involving violent crimes against women on campuses, and aims to strengthen security and investigative strategies to prevent and prosecute violent crimes against women on campuses. The 2019 Budget proposes \$20,000,000 for this program, of which \$8,000,000 is for a demonstration initiative to improve campus responses to sexual assault, dating violence, and stalking, which will include the use of campus climate surveys and will not be subject to the restrictions of section 304(a)(2).

Legal Assistance for Victims Grant Program.—The Legal Assistance Program increases the availability of civil and criminal legal assistance in order to provide effective aid to victims who are seeking relief in legal matters arising as a consequence of abuse or violence. The 2019 Budget proposes \$45,000,000 for this program.

Enhanced Training and Services to End Violence Against and Abuse of Women Later in Life.—This program provides or enhances training and services to address elder abuse, neglect, and exploitation, including domestic violence, dating violence, sexual assault, or stalking, involving victims who are 50 years of age or older. The 2019 Budget proposes \$5,000,000 for this program.

Education and Training to End Violence Against and Abuse of Women with Disabilities Grant Program.—The Disabilities Grant Program builds the capacity of jurisdictions to address domestic violence, dating violence, stalking and sexual assault against individuals with disabilities through the creation of multi-disciplinary teams. The 2019 Budget proposes \$6,000,000 for this program.

Consolidation of Youth-Oriented Programming.—This consolidated grant program consolidates the purpose areas of four programs under one competitive program. The four programs included in the consolidation include: Services to Advocate for and Respond to Youth, Grants to Assist Children and Youth Exposed to Violence, Engaging Men and Youth in Preventing Domestic Violence, and Supporting Teens through Education. This consolidation allows OVW to leverage resources for maximum impact in communities by funding comprehensive projects that include both youth service and prevention components. The 2019 Budget proposes \$11,000,000 for this program.

Indian Country-Sexual Assault Clearinghouse.—This funding will support the establishment and maintenance of a national clearinghouse on the sexual assault of American Indian and Alaska Native women. This project will offer a one-stop shop for tribes to request free on-site training and technical assistance. The 2019 Budget proposes \$500,000 for this program.

National Resource Center on Workplace Response.—The Violence Against Women Act of 2005 provided for an award to establish and operate a national resource center on workplace responses to assist victims of domestic and sexual violence. The center will provide information and assistance to employers and labor organizations to better equip them to respond to victims. The 2019 Budget proposes \$500,000 for this program.

Grants to Support Families in the Justice System.—This funding will provide comprehensive support to victims of domestic violence and child sexual abuse and their families in family law matters in the civil justice system, including safe visitation and exchange services, improved court responses, and legal assistance to victims, protective parents, and their children. This program represents a consolidation of the Safe Havens and Court Training and Improvements program. The 2019 Budget proposes \$16,000,000 for this program.

Tribal Special Domestic Violence Criminal Jurisdiction.—This grant program for tribal governments was first authorized in the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). VAWA 2013 included an historic provision that recognizes the inherent power of "participating tribes" to exercise "special domestic violence criminal jurisdiction" over both Indians and non-Indians who assault Indian spouses, intimate partners, or dating partners, or who violate protection orders, in Indian country. To support tribes that chose to participate, the Act authorizes funding to strengthen tribal criminal justice systems, provide indigent defense counsel, develop appropriate jury pools, and assist victims. The 2019 Budget proposes \$4,000,000 for this program.

Rape Survivor Child Custody Act Program.—Directs the Attorney General to make grants to states that have in place a law that allows the mother of any child that was conceived through rape to seek court-ordered termination of the parental rights of her rapist with regard to that child, which the court shall grant upon clear and convincing evidence of rape. The 2019 Budget proposes \$2,500,000 for this program.

For 2019, funding requested for this account also will support Analysis and Research on Violence Against Indian Women, a program that is administered by the Office of Justice Programs and supports comprehensive research on violence against Native American women. The 2019 Budget proposes \$1,000,000 for this program.

Management and Administration.—Within total grants funding, \$19.8 million will be provided for management and administration costs.

The 2019 Budget requests \$229.5 million for the Office of Justice Programs' (OJP) Juvenile Justice Programs. Of this amount, \$169 million is derived by transfer from the Crime Victims Fund. This appropriation account includes programs that support state, local, and tribal community efforts to prevent juvenile delinquency and crime and promote interventions that reduce recidivism among youth involved in the justice system. These programs also help states and communities improve their juvenile justice systems in ways that protect public safety, hold accountable youth involved in the justice system, and provide treatment and rehabilitative services that help youth become productive members of society.

The 2019 request includes support for programs such as:

Part B: Formula Grants.—This program supports state, local, and tribal efforts to develop and implement comprehensive juvenile justice plans; monitor and evaluate the effectiveness of their juvenile justice programs; and provide training and technical assistance to improve the performance of juvenile justice programs. The 2019 Budget proposes \$58 million for this program.

Youth Mentoring.—This program helps faith- and community-based, nonprofit, and for-profit organizations expand and enhance existing mentoring strategies and programs. It also helps these organizations develop and implement new mentoring strategies and programs designed for youth involved in the justice, reentry, and foster care systems. The 2019 Budget proposes \$58 million for this program.

Delinquency Prevention Program.—This program provides resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The 2019 Budget proposes \$17 million for this program.

Missing and Exploited Children Program.—This program supports efforts to prevent the abduction and exploitation of children, including funding for the National Center for Missing and Exploited Children, as well as for the Internet Crimes Against Children and AMBER Alert Programs. The 2019 Budget proposes \$72 million for this program.

Victims of Child Abuse Act.—The Improving Investigation and Prosecution of Child Abuse Program supports training and technical assistance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and other multi-disciplinary teams that prevent the inadvertent re-victimization of an abused child by justice and social service systems in their efforts to protect the child. The 2019 Budget proposes \$20 million for this program.

Child Abuse Training Programs for Judicial Personnel and Practitioners Program.—This program supports training and technical assistance to improve the judicial system's handling of child abuse, neglect, and related cases, as authorized under the Victims of Child Abuse Act, 34 U.S.C. Section 20332. The 2019 Budget proposes \$2 million for this program.

Improving Juvenile Indigent Defense Program.—This program provides funding and other resources to develop effective, well-resourced model juvenile indigent defender offices; and develop and implement standards of practice and policy for the effective management of such offices. The 2019 Budget proposes \$2.5 million for this program.

The 2019 Budget is requesting \$131.3 million for the Office of Justice Programs' Public Safety Officers' Benefits (PSOB) Program, of which \$115 million is a permanent indefinite (mandatory) appropriation for death benefits and \$16.3 million is a discretionary appropriation for disability and education benefits. This appropriation account supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a partnership between the Department of Justice, national public safety organizations, and public safety agencies at the state, local, and tribal levels. The PSOB program oversees three types of benefits:

Death Benefits.—This program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

Disability Benefits.—This program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

Education Benefits.—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

Programs supported by the Crime Victims Fund (CVF) provide compensation to victims of crime and survivors; support appropriate victims' services programs and victimization prevention strategies; and build capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist State, local, and tribal governments in providing appropriate services to their communities. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2019 Budget proposes to provide \$2.953 billion from collections and balances for crime victim compensation, services, and related needs. Of this amount, the Budget proposes to use \$25 million for Vision 21, which provides supplemental victims services and other victim-related programs and initiatives in areas like: research, legal services, capacity building, national and international victim assistance; \$10 million to support oversight of Crime Victims Fund awards by the Department's Office of the Inspector General; and a set-aside of up to five percent for grants and other assistance to Indian tribes to improve services

for victims of crime. Further, of the amounts available for obligation in 2019, \$485.5 million is for transfer to the Office on Violence Against Women and \$402 million is for transfer to the Office of Justice Programs. Up to three percent of funds available from the fund for obligation may be made available to the National Institute of Justice and the Bureau of Justice Statistics for research, evaluation, or statistical purposes related to crime victims and related programs. The budget includes a cancellation of CVF balances of \$2,503 million.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

Adult employment and training activities.—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

Youth activities.—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

Dislocated worker employment and training activities.—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment.

Reintegration of Ex-Offenders.—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. Using the authority of section 169 of the WIOA, the Department also provides competitive grants for a range of young ex-offenders and school dropouts, particularly those in high-poverty, high-crime areas with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for young ex-offenders. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out the Ex-Offender program.

Apprenticeship.—Activities that support and expand apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

YouthBuild.—Grants that impart education and occupational skills to program participants by providing them with academic training and occupational skills training, providing a clear path into a chosen career field.

Technical Assistance.—Technical assistance activities to support WIOA implementation, including maintenance of the Eligible Training Provider scorecard.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113–128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military. Job Corps participants must be economically disadvantaged youth, between the ages of 16–24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture.

In accordance with the Administration's vision of a smaller, more effective Job Corps program, the FY 2019 Budget proposes to refocus the resources of Job Corps on centers that have had more success in training and preparing youth for future careers. The FY 2019 Budget proposes to end USDA's involvement in the Job Corps program, given that workforce development is not a core part of the agency's mission. The Budget also signals the Administration's intent to close chronically low performing contractor-operated centers and centers with severely dilapidated facilities. The Budget prioritizes enrollment for students age 20 and older, for whom the program has been proven to be more effective.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109-365), is a federally-sponsored community service employment and training program for unemployed low-income individuals, ages 55 and older. The program is proposed for elimination because it fails to meet its major statutory goals of fostering economic self-sufficiency and moving low-income seniors into unsubsidized employment.

The Budget includes a legislative proposal to refocus the TAA program on apprenticeship and on-the-job training strategies to ensure that participants are training for relevant occupations. States will also be encouraged to place a greater emphasis on intensive reemployment services for workers who are not participating in work-based training, getting those workers into the workforce more quickly.

Unemployment compensation.—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claims workloads increase above levels specified in the appropriations language.

Employment service.—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well as for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Number of Participants Served	14,866,638	14,866,638	14,866,638	8,306,385

Years are program years running from July 1 of the year indicated through June 30 of the following year.

Foreign Labor Certification.—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

Federal Administration.—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

State grants.—Provides grants to State workforce agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes

State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

American Job Centers.—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under WIOA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services.

National Agricultural Workers Survey fee.—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews.

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating the foreign labor certification programs,

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE
OPERATIONS—Continued

which ensure that employers proposing to bring in immigrant workers have checked to ensure that American workers cannot meet their needs and that immigrant workers are being compensated appropriately and not disadvantaging American workers. The ability to charge fees for these programs would give the Department of Labor a more reliable, workload-based source of funding for this function (as the Department of Homeland Security has), and would ultimately eliminate the need for discretionary appropriations. The proposal includes the following: 1) charge employer fees for its prevailing wage determinations; 2) charge employer fees for its permanent labor certification program; 3) charge employer fees for H-2B non-agricultural workers; and 4) retain and adjust the H-2A agricultural worker application fees currently deposited into the General Fund. The fee levels, including possible expedited processing fees, would be set via regulation to ensure that the amounts are subject to review. Given DOL OIG's important role in investigating fraud and abuse, the proposal also includes a mechanism to provide funding for OIG's work to oversee foreign labor certification programs.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

The Middle Class Tax Relief and Job Creation Act of 2012 codified and expanded the definition of Short Time Compensation (STC), also known as work sharing. As an incentive for states to enact state STC programs and promote the use of STC, the Act provided for 100 percent reimbursement of STC benefit costs paid under state law for up to 156 weeks, or three years. Grant funding was also available to states whose permanent STC laws meet the new Federal definition.

This account provides mandatory general revenue funding for a temporary program established under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) and subsequently extended. This program paid a supplement of \$25 on every week of unemployment compensation. It was last extended in Public Law 111-157 and paid benefits through its December 7, 2010, with a phaseout period. As a result of adjudications, benefits continue to be paid but are minimal.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, 2020.

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110–343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA account if it runs short of funds, and the borrowing authority will enable ESAA to cover its obligations despite seasonal variations in the account's receipts.

Advances were needed for the FUA and EUCA accounts in fiscal year 2014, and the Department estimates that no advances will be necessary in 2018 and 2019. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF account.

To address the potential need for significant, and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2019 request continues this authority.

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, \$104,623,000, together with not to exceed \$49,642,000 which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of P.L. 115–56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

ADVANCES TO THE EMPLOYMENT SECURITY ADMINISTRATION ACCOUNT OF THE
UNEMPLOYMENT TRUST FUND

This account is a revolving fund that is available to make advances to the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund under the provisions of section 901(e) of the Social Security Act. These repayable, interest-bearing advances permit financing of the Federal and State administrative costs of employment security programs when the balance in ESAA is insufficient. The borrowing authority also enables ESAA to cover its obligations despite seasonal variations in the account's receipts.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has one account for the railroad unemployment insurance system but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 states, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands) and four federal accounts. The state and jurisdiction accounts receive funds from a state unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts - the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA) while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employee Compensation Account (FECA) are revolving accounts.

Except for FECA balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. FUTA is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to EUCA which pays for certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) to the States and jurisdictions from FUA when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's account in the UTF to meet expenses.

Minimum Solvency Standard.—Since the end of the most recent recession, many states continue to struggle to maintain adequate Unemployment Insurance (UI) Trust Fund balances. The Budget includes a proposal to add a minimum solvency standard in the UI program to help address the challenge states face in maintaining sufficient balances in their Unemployment Trust Fund accounts. This proposal would strengthen states' incentive to adequately fund their UI systems by making states that fail to maintain an Average High-Cost Multiple (AHCM) of 0.5 for two consecutive January

firsts subject to FUTA tax credit reductions under the same schedule that states which go below a zero trust fund balance face currently.

UI Program Integrity Package.—The Budget includes a package of program integrity proposals similar to those included in the proposed Unemployment Compensation Program Integrity Act, which the Department previously sent to Congress in response to the UI program's three consecutive years of high improper payment rates. Specifically, the package includes the following proposals:

Require states to use SIDES.—This proposal will require state UI agencies to use the State Information Data Exchange System (SIDES) to exchange information with employers concerning reasons for a claimant's separation from employment.

Require states to cross-match against the NDNH.—This proposal will require state UI agencies to use the National Directory for New Hires in their claims to better identify individuals continuing to claim unemployment compensation after returning to work, one of the leading root causes of UI improper payments.

Allow the Secretary of Labor to establish UI corrective actions.—This proposal will allow the Secretary of Labor to require states to implement corrective action measures for poor state performance in the UI program, helping to reduce improper payments in states with the highest improper payment rates. Currently, the Secretary has very limited options to require state UI agencies to take actions to respond to poor performance and high improper payment rates.

Require states to cross-match with SSA's prisoner database.—Under current law, state UI agencies' use of cross-matches is permissible and the Social Security Administration's (SSA) Prisoner Update Processing System (PUPS) is currently only used by some states for UI verification. Requiring states to cross-match claims against the PUPS or other repositories of prisoner information will help identify those individuals ineligible for benefits due to incarceration and reduce improper payments.

Allow states to retain 5 percent of UI overpayments for program integrity use.—This proposal will allow States to retain 5 percent of overpayment recoveries to fund program integrity activities in each state's UI program. This provides an incentive to states to increase detection and recovery of improper payments and provides necessary resources to carry out staff-intensive work to validate crossmatch hits as required by law.

Require states to use penalty and interest collections solely for UI administration.—This proposal will require states to deposit all penalty and interest payments collected through the UI program into the state's Unemployment Trust Fund account and require the funds be used for improving state administration of the UI program and reemployment services for UI claimants. States with high improper payment rates would be required to use a portion of the funds for program integrity activities. Currently, states have discretion to use these funds for non-UI purposes.

Reemployment Services and Eligibility Assessments (RESEA).—The Budget includes a proposal to make the RESEA program a permanent program that states are required to operate in conjunction with their UI program. It will provide mandatory funding to states to provide RESEAs for the one-half of UI claimants profiled as most likely to exhaust benefits and for transitioning veterans receiving Unemployment Compensation for Ex-servicemembers (UCX) benefits. Funding for this proposal will begin in 2020; discretionary funding for these activities is provided in 2019.

Offset Overlapping UI and Disability Insurance Benefits.—The Budget includes a proposal to reduce an individual's entitlement to a Disability Insurance benefit in any month in which the individual also receives an unemployment compensation benefit.

Paid Parental Leave.—The Budget includes a proposal to establish a Federal-state paid parental leave benefit program within the unemployment insurance (UI) program that would begin in 2021. The program will provide six weeks of benefits for mothers, fathers, and adoptive parents. The benefit

is provided to help families recover from childbirth and to bond with their new children.

The Pension Benefit Guaranty Corporation (PBGC) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by about 40,000,000 American workers and retirees in two separate insurance programs. The Single-Employer Program protects about 30,000,000 workers and retirees in over 22,500 pension plans. The Multiemployer Program protects over 10,000,000 workers and retirees in about 1,400 pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by plans or the companies that sponsor them, investment income, and, in the Single-Employer Program, assets from terminated plans and recoveries of plan underfunding in sponsor bankruptcies. PBGC is requesting \$445,363,000 in spending authority for administrative purposes in fiscal year 2019.

Protecting Multiemployer Participants.—The Budget will include proposed changes to PBGC's Multiemployer Program premiums that would raise about \$16,000,000,000 over the budget window.

The Budget proposes that these revenues would be raised by creating a variable-rate premium (VRP) and an exit premium in the Multiemployer Program. A multiemployer VRP would require plans to pay additional premiums based on their level of underfunding, up to a cap, as is done in the Single-Employer Program. An exit premium, equal to ten times the variable-rate premium cap, would be assessed on employers that withdraw from a multiemployer plan to compensate the Multiemployer program for the additional risk imposed on it when employers exit. PBGC would have limited authority to design waivers for some or all of the variable rate premiums assessed to terminated plans or ongoing plans that are in critical status, if there is a substantial risk that the payment of premiums will accelerate plan insolvency resulting in earlier financial assistance to the plan. Aggregate waivers for a year would be limited to 20% of anticipated total multiemployer variable rate premiums for all plans. This level of premiums is expected to be sufficient to fund the Multiemployer Program for the next 20 years.

The Budget also calls for the repeal of provisions accelerating fiscal year 2026 premiums into fiscal year 2025 and repeals the requirement for certain multiemployer premium revenues to be held in non-interest bearing investments.

Plan Preservation Efforts.—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year, PBGC worked with dozens of companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In 2017, PBGC:

- Helped to protect more than 26,700 people by taking action in bankruptcy cases to encourage companies to keep their plans when they emerged from bankruptcy; and

- Paid \$141 million in financial assistance to 72 insolvent multiemployer plans.

Stepping in to Insure Pensions When Plans Fail.—When plans do fail, PBGC steps in to ensure that basic benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 people in over 4,800 failed plans. In 2017, PBGC:

- Paid \$5,700,000,000 to almost 840,000 retirees from 4,845 failed single-employer plans;
- Assumed responsibility for 23,000 people in 82 trustee single-employer plans; and
- Started paying benefits to nearly 14,000 retirees in single-employer plans.

Single-employer benefit payments.—The single-employer program protects about 30,000,000 workers and retirees in over 22,500 pension plans. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum.

Multiemployer financial assistance.—The multiemployer insurance program protects over 10,000,000 workers and retirees in about 1,400 pension plans. Multiemployer pension plans are maintained under collective bargaining agreements involving unrelated employers, generally in the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance (a loan to the plan) to continue paying guaranteed benefits.

Investment management fees—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are driven by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

Consolidated Administrative Budget.—PBGC's administrative budget comprises all expenditures and operations that support:

- Benefit payments to pension plan participants;
- Financial assistance to distressed multiemployer pension plans; and
- Stewardship and accountability.

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering procurement, financial management, human resources, facilities management, communications, legal support, and information technology infrastructure. These funds support the operations of the Participant and Plan Sponsor Advocate. They also support the required functions and efforts of the Office of the Inspector General, including training and participation in Council of the Inspector Generals on Integrity and Efficiency (CIGIE) activities.

The Budget proposes to create a new variable rate premium (VRP) and an exit premium in the Multiemployer Program, estimated to raise an additional \$16 billion in premium revenue over the budget window. This level of additional Multiemployer premium revenue is expected to be sufficient to fund the Multiemployer Program for the next 20 years.

Federal Employees' Compensation Act benefits.—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2019, the FECA Program projects to create 109,200 cases for Federal workers or their survivors; 17,000 Federal employees are projected to submit initial wage-loss claims; and 39,400 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

Longshore and Harbor Workers' Compensation Act benefits.—Under the Longshore and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the Special Workers' Compensation Fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The 2019 Budget incorporates longstanding Government Accountability Office, Congressional Budget Office, and Labor Inspector General recommendations to improve and update the Federal Employees' Compensation Act (FECA). The last major amendments to FECA were made in 1974. The Administration proposes changes that generate cost savings by simplifying FECA benefit rates, introducing controls to prevent fraud and limit improper payments, and modernizing benefit administration. The proposal would reform the FECA program prospectively to simplify benefits to provide a single compensation rate at 66 2/3 percent of the injured workers' pay; reduce benefit levels at full Social Security Administration retirement age; prevent retroactive election of FECA benefits after claimants have declined them in favor of federal retirement; apply a consistent waiting period for compensation for all covered employees; increase benefits for funeral expenses and severe disfigurement; suspend payments to indicted medical providers; and make other changes to improve program integrity.

SPECIAL BENEFITS—Continued

and reduce improper payments. These reforms would produce 10-year government-wide savings of more than \$885 million, and approximately \$117 million in net savings.

Energy Employees Compensation Act benefits.—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses. This program is EEOICPA Part B.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure,

and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E; the program described above is Part B) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107–275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These monies are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic

Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

Note.— Beginning on January 1, 2019, the coal excise tax rates on underground-mined coal will be \$.50 per ton or 2% of the sales price (whichever is lower) and \$.25 per ton or 2% of the sales price (whichever is lower) on surface-mined coal.

The trust fund consists of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

The trust fund is available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of

SPECIAL WORKERS' COMPENSATION EXPENSES—Continued

the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), and the Employee Polygraph Protection Act (EPPA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect over 135,000,000 workers in more than 7,300,000 establishments throughout the United States and its territories.

The Wage and Hour Division has traditionally had responsibility for enforcing certain worker protections provisions of the Immigration and Nationality Act, specifically the H-2A and H-1B temporary non-immigrant foreign worker programs. Pursuant to an Interagency Agreement (IAA) between the U.S. Department of Homeland Security (DHS) and the U.S. Department of Labor (DOL) and section 214(c)(14)(B) of the Immigration and Nationality Act (INA), 8 U.S.C. 1184(c)(14)(B), DOL and WHD have been delegated the enforcement authority located at section 214(c)(14)(A)(i) of the INA, 8 U.S.C. 1184(c)(14)(A)(i) for enforcing the H-2B temporary non-immigrant foreign worker program. Under section 524 of H.R. 3288, the Secretary of Labor may use one-third of the H-1B and L Fraud Protection and Detection fee account for enforcement of these temporary worker provisions and for related enforcement activities.

Safety and Health Standards.—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is cost effective when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the SBREFA process, that small business concerns are taken into account in the process of developing standards.

Federal Enforcement.—This activity provides for the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. OSHA's enforcement strategy ranges from a selective targeting

of inspections and related compliance activities to a focus on specific high-hazard industries and worksites. Enforcement programs are targeted to the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards.

Whistleblower Programs.—This activity provides for the enforcement of twenty-two whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of twenty-one other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities laws.

State Programs.—This activity supports states in assuming responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities.

Technical Support.—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or man-made disasters. This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

Federal Compliance Assistance.—This activity supports a range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employers and employees through cooperative programs such as the Voluntary Protection Programs that recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships that commit organizations to collaborative efforts with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

State Compliance Assistance: Consultation Grants.—This activity supports 90 percent federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small and medium-sized employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments in high-hazard industries. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

Safety and Health Statistics.—This activity supports information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These are provided through an in-

SALARIES AND EXPENSES—Continued

tegrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

Executive direction and administration.—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

Enforcement.—The enforcement strategy in 2019 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners.

Standards.—This activity develops standards and regulations for the mining industry that protect the safety and health of miners.

Office of Assessments.—This activity assesses and collects civil monetary penalties for violations of safety and health standards and manages MSHA's accountability, special enforcement, and investigation functions.

The Office of Inspector General (OIG) conducts audits, investigations, and evaluations that improve the effectiveness, efficiency, and economy of departmental programs and operations. It addresses DOL program fraud and labor racketeering in the American workplace, provides technical assistance to DOL program agencies, and advice to the Secretary and the Congress on how to attain the highest possible program performance. The Office of Audit performs audits of the Department's financial statements, programs, activities, and systems to determine whether information is reliable, controls are effective, and resources are safeguarded. It also ensures funds are expended in a manner consistent with laws and regulations, and with achieving the desired program results. The Office of Investigations-Labor Racketeering and Fraud conducts investigations to detect and deter fraud, waste, and abuse in departmental programs. It also identifies and reduces labor racketeering and corruption in employee benefit plans, labor management relations, and internal union affairs.

Jobs for Veterans State grants.—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, grants are allocated to States according to the statutory formula to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans' Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment, or other populations defined by the Secretary or through appropriations language.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

VETERANS EMPLOYMENT AND TRAINING—Continued

Transition Assistance Program (TAP).—This program provides employment workshops for separating service members and their spouses in the continental U.S. and at major overseas installations to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to expedite and facilitate the transition from military to civilian employment. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. TAP now includes an optional two-day Career Technical Training Track (CTTT) workshop, for transitioning service members interested in technical careers. This program is conducted consistent with the existing TAP Interagency Memorandum of Understanding.

Federal management.—VETS' Federal management budget activity supports the Federal administration of 38 U.S.C. §§ 41, 42, and 43. This allows VETS to carry out programs such as the Jobs for Veterans State Grants and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). It also enables VETS to discharge its responsibilities to administer, interpret, and help enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. §§ 4301–4335, in which it provides technical assistance and investigates complaints received from veterans and service members who believe their employment and reemployment rights were violated. In addition, this budget activity enables VETS to investigate complaints received from preference eligibles who believe their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment Opportunities Act of 1998 (VEOA), 5 U.S.C. § 3330a, were violated. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. § 4212. These responsibilities involve administering a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans in their employ.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, as amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001)). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported.

National Veterans' Employment and Training Services Institute.—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for VETS personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

Homeless Veterans' Reintegration Program.—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans assist in reintegrating homeless veterans into meaningful employment within the labor force and to stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the De-

partments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

Departmental Support Systems.—This activity represents a permanent, centralized IT investment fund for the Department of Labor managed by the Chief Information Officer. The fund supports enterprise-wide IT security enhancements that facilitate a centrally managed IT environment with increased risk mitigation parameters to protect the integrity of DOL data and network availability. These efforts are achieved through several new and ongoing projects mandated by executive and congressional directives.

IT Infrastructure Modernization.—This Chief Information Officer-managed activity funds the effort to transform nine major independently funded and managed IT infrastructure silos at the sub-agency level into a unified IT infrastructure. The unified infrastructure will be centrally managed and

provide all agencies with general purpose business productivity tools, a shared environment for common data sources, and the underlying IT services to support it.

The IT Modernization appropriation is eliminated in the 2019 Budget. Using resources from the reforms to the Working Capital Fund statute proposed in the General Provisions, all activities previously funded in the IT Modernization appropriation will be funded through the Working Capital Fund.

The FY 2019 Budget provides sufficient resources for the Department of State and other international programs to carry out their responsibilities under the National Security Strategy to protect the American people, preserve peace and security, promote American prosperity, and advance American influence. This Budget prioritizes diplomatic and development activities that provide maximum policy benefits, and upholds U.S. commitments to partners and allies, while emphasizing the critical role of other donors to advance shared priorities. In addition, the FY 2019 Budget supports agency reform and critical investments that improve accountability, effectiveness and efficiency in using taxpayer dollars to advance U.S. foreign affairs and national security goals. By pursuing a more balanced share of international spending and holding Departments and international organizations accountable for results, this Budget supports U.S. interests abroad which will lead to a more prosperous and secure America.

Diplomatic Programs (DP), previously called Diplomatic and Consular Programs (D&CP), is financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which are to remain available until expended. DP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2019 request includes base funding for the State Department operations in Iraq, Afghanistan, Pakistan, and other High Threat Posts (HTP). The balance of the funding requested for operations in Iraq, Afghanistan, Pakistan, and other HTP is included in the Overseas Contingency Operations (OCO) account request for the DP account.

Funds are requested in the following categories:

Human Resources.—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

Overseas Programs.—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2019 will support 275 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. These resources are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity. This category also supports reconstruction and stabilization activities of the Conflict Stabilization Operations (CSO) Bureau.

Diplomatic Policy and Support.—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in DP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

Security Programs.—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, and Affidavit of Support fees. In FY 2017 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The Consolidated Appropriations Act of FY 2017 enacted a new standalone account to display fee-funded consular programs independent

CONSULAR AND BORDER SECURITY PROGRAMS—Continued

of the larger Diplomatic Programs account beginning in FY 2019. This change will enable the Department to provide greater transparency and accountability in financial reporting on these fees and surcharges, facilitate budget estimates for these fees and surcharges, and more easily make the information available to users of budget information and other stakeholders.

Section 7024(i) of the general provisions provides a new permanent extension of the Western Hemisphere Travel Initiative Surcharge. Section 7050 provides legislative language expanding the authorities of the Border Crossing Card and Passport Security Surcharge. It also includes a transfer authority between the CBSP account and accounts under the heading Administration of Foreign Affairs. Finally, Section 7051 provides the ability to use the Fraud Prevention and Detection fees for the prevention and detection of all visa fraud.

These consular fees and surcharges support an array of activities that are vital to ensuring strong U.S. border security, including routine and emergency services for U.S. citizens overseas; the issuance of secure passports to U.S. citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides funding for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, and security policy objectives

and to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Programs under this appropriation include:

Academic Programs.—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

Professional/Cultural Exchanges.—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

Youth Leadership Initiatives.—Includes programs targeting young private, public, and civil sector leaders in Africa, Southeast Asia and the Americas.

Program and Performance.—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

Exchanges Support.—Includes all domestic staff, overseas Regional Language Officers and support costs managed by ECA; as well as government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2019, the Department will manage the fifteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM regular base, interagency contributions, and consular fee revenues.

The 2019 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. MCS and CSCS are funded within a combined \$2.2 billion program in FY 2019.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2019 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSN DCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, which is available without fiscal year limitations, is authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool, operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID). Global health programs seek to improve health outcomes by increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

Global Health Programs-State.—The Global Health Programs (GHP-State) account supports the goal of controlling the HIV/AIDS epidemic through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2019 Budget requests \$4.375 billion in the GHP-State account. PEPFAR is led by the Office of the Global AIDS Coordinator in DOS, which draws upon the expertise and experience of other USG partners such as USAID, the Department of Health and Human Services, the Department of Defense, and the Peace Corps to align resources and expertise in the fight against

GLOBAL HEALTH PROGRAMS—Continued

global AIDS. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to set benchmarks for outcomes and programmatic efficiencies through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$925 million to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in the GHP-State request.

Global Health Programs-USAID.—The 2019 Budget requests \$1.928 billion in the GHP-USAID account for a comprehensive and integrated approach to improve global health outcomes. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and other public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. Funding includes activities that support the goal of ending preventable child deaths in synergy with malaria, family planning and reproductive health, and nutrition activities, addressing such issues as micronutrient deficiencies and community management of acute malnutrition. Activities will also address the threat of other infectious diseases such as tuberculosis and multi-drug resistant tuberculosis, and neglected tropical diseases in developing countries.

The Budget also proposes to authorize the use of a portion of the remaining emergency funding appropriated in 2015 for the Ebola response in West Africa (Public Law 113–325) for global health security programs. In 2019, \$72.5 million in unobligated balances and recoveries from IDA, the Global Health Programs account, and/or the Economic Support Fund account would be made available for these purposes.

Humanitarian Migrants to Israel.—These funds assist humanitarian migrants resettling in Israel.

US Refugee Admissions.—MRA funds overseas processing, transportation, and initial placement for refugees and certain other categories of special immigrants resettling in the United States. These activities are carried out primarily by NGO partners and IOM.

Administrative Expenses.—These funds finance the salaries and operating expenses in Washington, D.C. and overseas for the Bureau of Population, Refugees, and Migration. (Note: Funds for the salaries and support costs of the positions dedicated to international population policy and coordination are requested under the Department of State's Diplomatic Programs appropriation.)

The MRA account will support ongoing as well as unexpected, urgent refugee and migration needs. In 2019, no funding is requested for the U.S. Emergency Refugee and Migration Assistance (ERMA) account.

International Narcotics Control and Law Enforcement (INCLE) supports bilateral, regional, and global programs that mitigate security threats posed by all forms of transnational crime including production and trafficking of narcotics, illicit trafficking in persons and wildlife, money-laundering, intellectual property crime, cyber security, and other pernicious forms of transnational crime. Programs strengthen partner countries' criminal justice systems, including their ability to cooperate effectively with U.S. law enforcement, strengthen law enforcement and judicial capabilities, counter drug flows, combat transnational crime, and address the underlying conditions, such as corruption and weak rule of law, that foster state fragility and spur irregular migration to the United States. The 2019 INCLE budget supports Presidential policy priorities, including efforts to protect the safety of the United States and its citizens by combating transnational crime and trafficking, in alignment with Executive Order 13773, Enforcing Federal Law with Respect to Transnational Criminal Organizations and Preventing International Trafficking.

Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) has the statutory goal of providing assistance to the poorest countries in the world to promote economic growth, eliminate extreme poverty, and strengthen good governance, economic freedom, and investments in people. Since its inception, MCC has signed 33 compacts and 26 threshold program agreements, totaling nearly \$12 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption and maintaining democratic rights. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC's evidence-based approach leads to compacts that specifically define the implementa-

tion responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

In order to streamline accounts and ensure the most effective use of foreign assistance funding, the 2019 Budget incorporates funding and programs previously requested under the Economic Support Fund (ESF) and Development Assistance (DA) accounts within the new Economic Support and Development Fund (ESDF). The request prioritizes and focuses foreign assistance in regions and on programs that advance our national security and protect the American people, promote U.S. prosperity and economic opportunities, and advance American interests and values around the world,

while also continuing to ensure efficiency, effectiveness, and accountability to the U.S. taxpayer. Programs will help countries of strategic importance meet near and long-term political, economic, development, and security needs.

The Global Security Contingency Fund (GSCF) permits the Department of State and the Department of Defense to combine resources and expertise to address emergent challenges and opportunities. The GSCF can be used to provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security in-

terests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of Defense. The fund allows direct contributions from each Department to be transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, Defense, the U.S. Agency for International Development, or others. The National Defense Authorization Act for Fiscal Year 2018 extended the GSCF authority until September 30, 2019. No funding is requested in 2019.

As required by the Federal Credit Reform Act (FCRA) of 1990, the Foreign Military Financing (FMF) Direct Loan Financing Account is a non-budgetary account that records all cash flows to and from the Government resulting from FMF direct loans obligated in 1992 and beyond. Amounts in this account are a means of financing and are not included in budget totals. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the FMF Loan Program Account to make disbursements to borrowers for approved procurements.

The Foreign Military Loan Liquidating Account records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct

loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the Foreign Military Loan Liquidating Account, thus transferring the loans from the Liquidating Account to the MDRF Account.

The Global Agriculture and Food Security Program (GAFSP) is a multi-donor trust fund called for by G-20 leaders in 2009 to fund projects that support the agricultural investment plans of poor countries. GAFSP, which is administered by the World Bank, leverages the expertise and implementing structures of other multilateral institutions such as IFAD, the World Bank, and the regional development banks.

As of end-April 2017, GAFSP's public sector window has awarded \$1.18 billion in grant financing to 31 low-income countries in Africa, Asia, and Latin America to help smallholder farmers and their families increase their income and strengthen their nutritional outcomes. These grants were funded from contributions from Australia, the Bill and Melinda Gates Foundation, Canada, Ireland, South Korea, Spain, the United Kingdom, and the United States. The private sector window, which provides financing to small and medium-sized agribusinesses, has approved \$243.2 million of investments

as of end-December 2017, funded from contributions from Canada, Japan, the Netherlands, the United Kingdom, and the United States.

The United States is the largest of 10 donors to GAFSP, having contributed \$653 million since GAFSP's inception. The United States contributed \$475 million towards the initial GAFSP pledge in 2009. In 2012, the U.S. pledged to contribute \$1 for every \$2 dollars in new contributions from other donors over the period of the pledge, up to a maximum of \$475 million. No new funding is required in 2019.

The International Bank for Reconstruction and Development (IBRD) is the arm of the World Bank that provides financing to creditworthy middle-income countries to promote inclusive economic growth and reduce poverty. Middle-income countries—home to over 70 percent of the world's poor—rely on the IBRD for financial resources and strategic advice to meet their development needs. Working across a range of sectors, including

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND
DEVELOPMENT—Continued

agriculture, sustainable infrastructure, health and nutrition, and education, the IBRD supports long-term human and social development needs that private creditors do not finance. During its 2017 fiscal year, the IBRD approved \$22.6 billion in loans and technical assistance. Latin America and the Caribbean (24 percent) and the Middle East and North Africa (22 percent) received the largest portion of the IBRD's new lending, followed by Eastern Europe and Central Asia (20 percent), East Asia and Pacific (19 percent), and Sub-Saharan Africa (5 percent). The United States is the largest shareholder in the IBRD, with a 16.3 percent share of total voting power, followed by Japan and China. The United States is the only country with veto power over amendments to the Articles of Agreement.

Global Environment Facility

The 2019 Budget requests \$68.3 million for the Global Environment Facility (GEF) towards the first of four installments to the seventh replenishment (GEF-7).

The GEF is one of the largest dedicated funders of projects to improve the global environment, providing grants to address issues related to conservation, including wildlife trafficking, overfishing, land degradation, chemical pollution and other environmental concerns. The GEF benefits the U.S. economy and environment by addressing many external environmental problems that affect our domestic health, safety, and prosperity; in addition, since the GEF was established, 127 U.S. companies and consultants from 29 states have received contracts to participate in 119 GEF-backed projects. GEF-7 will begin on July 1, 2018 and will conclude on June 30, 2022.

International Finance Corporation

The International Finance Corporation (IFC) is the private sector focused part of the World Bank Group. Established in 1956, it promotes private sector development in developing countries by making loans and equity investments in private sector projects, mobilizing private capital alongside its own resources, and providing advisory and technical assistance services. In its 2017 fiscal year, the IFC approved \$11.9 billion from its own resources, and mobilized an additional \$7.5 billion from other sources, for 342 projects. More than 24 percent of IFC commitments in 2017 were for the poorest countries (those eligible for funding from the World Bank's IDA). IFC investments in 2017 were spread across the globe, with the largest recipient regions being Latin America and the Caribbean (23 percent), Sub-Saharan Africa (20 percent), and Europe and Central Asia (18 percent). The top sectors for IFC investment in 2017 were financial markets (49 percent), infrastructure (14 percent), and agribusiness and forestry (10 percent).

Treasury requests \$1,097 million for the International Development Association (IDA) in support of IDA programs over the eighteenth replenishment (IDA-18; FY 2018-FY 2020), including towards the second of three installments to IDA-18.

IDA is the part of the World Bank that supports the growth and development of the world's 75 poorest countries. IDA works across a wide range of sectors including education, basic health, clean water and sanitation, the environment, infrastructure, and agriculture. Because countries receiving IDA financing are too poor to attract sufficient capital to support their urgent development needs, they depend on low-cost loans and grants to create jobs, build critical infrastructure, increase agricultural productivity, provide energy, and invest in the health and education of future generations. IDA's goal is to help countries reduce poverty and achieve higher levels of growth and institutional capacity. Over time, IDA's support helps countries finance their development needs through domestic revenues and borrowing at non-concessional rates. Since its inception, IDA has provided half a trillion dollars for investments in over 100 countries. As of the beginning of IDA-18, 36 countries once eligible for IDA assistance have graduated and no longer receive concessional support from IDA. Of the \$19.5 billion approved in IDA's 2017 fiscal year, more than half—\$10.7 billion—went to countries in sub-Saharan Africa. Countries in the South Asia region received \$3.8 billion, and \$2.7 billion went to countries in the East Asia and Pacific region. Sixteen percent of IDA's resources were provided as grants to fragile states and other countries at risk of debt distress in IDA's 2017 fiscal year.

Multilateral Debt Relief Initiative

Launched in 2006 at the urging of the United States, the Multilateral Debt Relief Initiative (MDRI) provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries receive MDRI benefits after completing the reforms under the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. MDRI requires donors to compensate IDA for the cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. IDA calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Each donor's commitments to MDRI at IDA must be met within the three-year replenishment period to avoid a negative impact on IDA's financial capacity. With a 20.1

percent burden share, the U.S. share of the cost of MDRI under IDA-18 (FY 2018-FY 2020) is \$593 million.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against non-commercial risks and carrying out investment promotion activities. In 2017, MIGA issued a total of \$4.8 billion in guarantees for projects in developing countries. Negotiations on MIGA's first general capital increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years.

The Inter-American Development Bank (IDB) is the largest source of development financing for 26 countries in Latin America and the Caribbean, a strategically significant and economically important region for the United States where 73 million people live in poverty. In 2017, the IDB approved \$11.4 billion in financing for 90 sovereign-guaranteed projects. About 34 percent of commitments targeted small and vulnerable borrowing countries, such as El Salvador, Guyana, Honduras, and Jamaica. The IDB works in

a range of sectors and commits roughly half of its funding to support infrastructure through projects in water and sanitation, transportation and energy. The other half is split between capacity building, including reform of government operations and financial markets, and social sectors, including social investment, health, and education. Given the IDB's significant response to the global financial crisis, in 2010, shareholders approved the ninth general capital increase (GCI-9) to ensure that the IDB had the resources necessary to assist countries that suddenly found themselves shut off from global capital markets. As part of the GCI-9 resolution, the IDB established a special grant facility for Haiti that will receive income transfers totaling \$2 billion from the IDB through 2020. This facility provides Haiti with critical resources to support its long-term development agenda. The United States is the largest shareholder in the IDB, with 30 percent of total shareholding, enabling the United States to wield significant influence over major decisions about the direction of the IDB.

Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), a member of the Inter-American Development Bank Group established in 1984, promotes development of the private sector in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the IDB itself. In 2017, the IIC implemented organizational and operational reforms stemming from the 2016 consolidation of the IDB's private sector financing activities into the IIC. As a result of this consolidation, the IIC's mandate has expanded from a focus on small- and medium-sized enterprises to include financing for private infrastructure and corporate entities. Until IIC is fully capitalized through additional contributions from some shareholders and net income transfers from the IDB, a portion of IIC's approvals will be booked on the IDB's balance sheet. In 2017, the IIC approved 223 projects totaling \$3.1 billion, booking \$1.0 billion in new approvals to its own balance sheet and \$2.1 billion on the IDB's balance sheet. Since its inception, the IIC has approved a total of \$9.1 billion in financing.

The Asian Development Bank (AsDB) promotes broad-based sustainable economic growth and development, poverty alleviation, and regional co-operation and integration in the Asia-Pacific region. It has two main financing windows: 1) the Asian Development Bank's Ordinary Capital Resources (OCR), which provides "hard loans" at market rates and "soft loans" to eligible countries at concessional rates; and 2) the Asian Development Fund (AsDF), which provides grants to the region's poorest countries that are at moderate or high risk of debt distress. Prior to January 2017, when AsDF's equity and lending operations were merged with AsDB's OCR, the AsDF provided concessional loans.

Asian Development Bank

AsDB provides long-term loans at market rates to 22 middle-income Asian countries that lack the resources to finance their national economies and build critical infrastructure. AsDB also supports private sector development with technical assistance, loans, guarantees, and direct equity investments in viable private sector projects with strong development impacts. In 2017, AsDB approved \$18.5 billion for projects and leveraged another \$7.5 billion in co-financing from official and commercial sources. Through its lending, AsDB supports the construction of critical infrastructure, the expansion of private enterprise, and sustainable economic growth. The majority of AsDB assistance is for investments in transportation, energy, finance, industry and trade, with water supply, municipal infrastructure, agriculture and natural resources, and public sector management also receiving significant funding. AsDB is financed through capital contributions from donors, income earned on its loan and investment portfolios and bond issuances. In April 2009, donors approved AsDB's fifth general capital increase (GCI-V), which tripled AsDB's capital base to \$165 billion (including paid-in and callable capital).

Asian Development Fund

Treasury requests \$47.4 million in support of AsDF programs over the eleventh replenishment (AsDF-12; FY 2018-FY 2021), including towards the second of four installments to AsDF-12.

AsDF currently provides grants to 18 of the poorest countries in Asia and the Pacific that face moderate or high risk of debt distress, including Afghanistan and Burma. It focuses on supporting inclusive, sustainable economic growth, as well as regional cooperation and integration. Water, energy, and transportation infrastructure compose 48 percent of all AsDF projects, while financial sector deepening, agriculture, and health projects make up the remainder of AsDF grants. AsDF also invests in cross-cutting activities, such as connecting entrepreneurial training with financing for small and medium-sized enterprises. In 2017, the Board approved \$551 million in grants for AsDF-eligible countries. Cumulatively, AsDF has provided over \$50 billion for projects in developing member countries. As a result of the merger of AsDF's lending assets into AsDB's Ordinary Capital Resources on January 1, 2017, AsDF now provides only grants. AsDF will increase grant support to eligible countries by 70 percent over the period covered under the eleventh replenishment. In recent years, the United States has focused attention within AsDF on countries where support aligns with U.S. national security priorities.

The African Development Bank Group comprises 1) the African Development Bank (AfDB), which lends at market-linked rates to middle-income African countries and Africa's private-sector; and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries. The AfDF account includes a portion of the U.S. commitment to the Multilateral Debt Relief Initiative (MDRI).

African Development Bank

Treasury requests \$32.4 million towards the eighth of eight installments under the AfDB's Sixth General Capital Increase (GCI-6).

The AfDB provides public sector financing at market-linked rates to 20 middle-income African countries, and provides loans, equity investments, lines of credit, and guarantees to support private sector investments in all 54 African member countries. The AfDB had \$6.3 billion in lending approvals in 2017, 62 percent of which was for public sector projects and 38 percent for private sector projects. Approximately forty percent of AfDB approvals are for infrastructure, including energy, transportation, communication, and water and sanitation. Other key sectors include finance, agriculture, and governance. The United States is the largest non-regional shareholder at the AfDB, with 6.6 percent of total shareholding, and the second-largest shareholder after Nigeria.

African Development Fund

Treasury requests \$171.3 million in support of AfDF programs over the fourteenth replenishment (AfDF-14; FY 2018-FY 2020), including towards the second of three installments to AfDF-14.

The AfDF is the AfDB Group's concessional lending window, providing grants and highly concessional loans to the poorest countries in Africa, of which half are fragile or conflict-affected states. In 2017, the AfDF provided \$2 billion in financing, technical assistance, and capacity-building activities

to the 38 eligible countries. Many AfDF recipient countries are African economies that are becoming new, emerging markets and growing U.S. trading partners, while other AfDF recipient countries remain trapped in fragility, conflict, and poverty; are highly vulnerable to both internal and external shocks; and are in need of special assistance to achieve basic levels of service delivery. The AfDF is one of the largest official financiers of infrastructure in Sub-Saharan Africa, committing approximately half of its funding to national and regional infrastructure projects in sectors such as energy, transport, and water and sanitation. The remainder of its funding is devoted to governance, agriculture and food security, and human capital development (e.g., health and education). The AfDF also sets aside special funding for regional projects and fragile and transitioning states; in total, approximately half of its resources are directed to fragile states.

Multilateral Debt Relief Initiative

Launched in 2006 at the urging of the United States, MDRI provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the AfDB. Countries receive MDRI benefits after completing the reforms under the HIPC Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. MDRI requires donors to compensate AfDF for cancelled debt under MDRI on a dollar-for-dollar basis according to the payment schedules of the original loans. Similar to IDA, AfDF calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Donor commitments must be met within the three-year replenishment period to avoid a negative impact on the AfDF's commitment capacity. At 11.8 percent burden share, the U.S. share of the cost of MDRI under AfDF-14 (FYs 2018–2020) is \$74 million.

Created in 1990, the European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism, predominately through private-sector lending and investments. Its original field of operation in the countries of Central and Eastern Europe and the former Soviet Union was expanded in 2012 to aid in the transitions of key countries in the Middle East and North Africa. In 2017, the EBRD committed \$11.1 billion in financing to 411 projects, according to preliminary figures. In April 1996, shareholders approved a doubling of the EBRD's capital base to EUR 20 billion (approximately \$24 billion). In 2012, the United States provided \$1.25 billion in callable capital to increase the capital base to EUR 30 billion and support increased demands resulting from the 2008 financial crisis.

The North American Development Bank (NADB) finances environmental infrastructure projects that have been certified for their projected environmental and economic benefits. In the first 11 months of 2017, the NADB disbursed \$98.6 million in loans and grants for renewable energy, water and wastewater, public transportation, and urban infrastructure projects. As of November 30, 2017, NADB had approved \$2.4 billion in loans.

The FY 2019 Budget includes an authorization for the \$10 million appropriated in FY 2016. A U.S. contribution of this amount would match the 2016 contribution paid in by Mexico.

with a focus on creating opportunities for poor and vulnerable populations. Grants and loans are used for technical assistance to identify innovative markets, products and business processes, investments in human capital, and business infrastructure and development. In 2017, the MIF approved 66 projects totaling \$84 million. Since its inception in 1992, the MIF has approved over 1,800 projects, for which the MIF provided approximately \$2.1 billion.

The United States has contributed \$624 million to the MIF since 1992. Negotiations concluded on a new replenishment in March 2017. The United States will not contribute to this round of funding, but will retain influence over past and new contributions through the legacy resources remaining from past contributions. The United States achieved its key objectives in the most recent negotiations: significantly increasing contributions from Latin American and Caribbean donors, strengthening the focus on poor and vulnerable populations, and increasing the efficiency of MIF operations.

IFAD was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to help rural small-scale producers and subsistence farmers increase their productivity and incomes, improve food security, and integrate them into larger markets. No funding is requested for IFAD in 2019.

Pursuant to OTA's authorizing statute, OTA provides technical assistance to facilitate the implementation of policy, management, and administrative reforms in the areas of budget, revenue, government debt, financial institutions and financial enforcement to developing and transition countries. This assistance supports U.S. foreign policy and national security objectives.

The 2019 Budget includes \$30 million to fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs in Asia, the Middle East, Africa, Latin America, the Caribbean, and Europe. It will enable the provision of technical assistance to developing and transition countries to strengthen the capacity of finance ministries, central banks, and other government institutions to manage public finances and oversee the financial sector. Technical assistance projects support efficient revenue collection, well-planned and executed budgets, judicious debt management, sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. The appropriation will also support Treasury's work to strengthen the financial underpinnings for infrastructure development. OTA will continue to coordinate

its activities with the Department of State, USAID, and other relevant U.S. Government agencies as well as international financial institutions, and other bilateral donors when determining where its technical assistance program can have the greatest positive impact.

In addition to its assessed payments, the United States contributes to voluntary funds of many UN-affiliated and other international organizations and programs involved in a wide range of sustainable development, humanitarian, scientific, environmental and security activities. Although the FY 2019 request does not include IOP as a standalone account, this request includes funding for strategically selected international organizations including but not limited to the UN High Commissioner for Human Rights, the Internet Governance Forum, and the International Maritime Organization in the Economic Support and Development Fund account.

Funds for debt restructuring are periodically needed to help countries reduce the burden of unsustainable debts, thereby establishing a sounder footing for economic growth. Debt relief and restructuring can be fundamental to helping countries stabilize their economies, restart economic growth, and alleviate poverty and instability. Through the Paris Club and programs such as the Heavily Indebted Poor Countries (HIPC) Initiative, countries that have demonstrated a commitment to economic reforms can benefit from debt restructuring. These programs have provided authority and appropriations to reschedule and/or reduce debt repayments to the U.S. Government.

Development Assistance Programs.—The Development Assistance (DA) account has been used to invest in partnerships that support ending extreme poverty and promoting resilient, democratic societies around the world. In an effort to streamline accounts and ensure the most effective use of foreign assistance funding, the 2019 Budget eliminates the DA account and incorporates funding for selected programs previously requested under the Economic Support Fund (ESF) and DA accounts within the new Economic Support and Development Fund account. The 2019 Budget frees up funding for strengthening the U.S. military and pursuing critical domestic priorities by focusing foreign assistance in regions and on sectors that advance our national security and protect the American people, promote U.S. prosperity and economic opportunities, and advance American interests and values around the world, while continuing to support key strategic partners and allies and to ensure efficiency, effectiveness, and accountability to the U.S. taxpayer.

The purpose of the Assistance for Europe, Eurasia and Central Asia (AEECA) account was to support programs to foster the democratic and economic transitions of the countries of Southeastern Europe and the independent states that emerged from the dissolution of the Soviet Union, as well as related efforts to address social sector reform and combat transnational threats in these countries. From 2013 through 2015, funding for the programs formerly funded through AEECA were included in the Economic Support Fund (ESF), International Narcotics Control and Law Enforcement (INCLE), and Global Health Programs (GHP) accounts. In 2016, Congress reinstated the AEECA account for those programs funded with ESF and INCLE; however the 2018 and 2019 requests propose funding all of these programs through the Economic Support and Development Fund, INCLE, and GHP accounts.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, transition to development assistance programs, as well as emergency food interventions. Humanitarian relief interventions include, but are not limited to, shelter, emergency health and nutrition, the provision of safe drinking water. Emergency food responses include interventions such as local and regional purchase of food near crises, the provision of U.S. commodities, food vouchers, or cash transfers and complementary activities that support the relief, recovery and resilience of populations affected by food crises. IDA programs target the most vulnerable populations who are affected by the shock of a disaster, including those who are internally displaced.

This request includes \$776.8 million, including \$279.6 million for the U.S. Agency for International Development (USAID) Office of U.S. Foreign Disaster Assistance and \$497.2 million for the USAID Office of Food for Peace for emergency food responses. (See the IDA account in the Overseas Contingency Operations section for information about the IDA-OCO funding request in 2019.)

The FY 2019 budget request eliminates the P.L. 480 Title II account. Providing emergency food aid through IDA has been shown to allow more appropriate and on average more cost effective assistance than Title II food aid. The IDA request will ensure that all food assistance programs are appropriate to local needs and will increase overall effectiveness.

The Budget also proposes to authorize the use of a portion of the remaining emergency funding appropriated in 2015 for the Ebola response in West Africa (Public Law 113-325) for global health security programs. In 2019, \$72.5 million unobligated balances or recoveries from IDA, the Global Health Programs account, and/or the Economic Support Fund account would be made available for these purposes.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting the responsiveness of central governments to local needs, increasing civic participation, raising awareness of national issues through media, addressing the underlying causes of instability, and supporting conflict resolution measures. Recent country examples where TI funds were used include Nigeria, Somalia, Honduras, Syria, Burma, and Ukraine.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from

the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service-provider missions and technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account recorded, for the Development Credit Authority (DCA), the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2019, as part of the Administration's plan to reform and modernize US Development Finance, DCA will be consolidated with other development finance functions, such as the Overseas Private Investment Corporation, into a new Development Finance Institution. All future DCA activities are presented in the Development Finance Institution program and financing accounts.

The Overseas Private Investment Corporation (OPIC) encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its primary noncredit program is political risk insurance against losses due to expropriation, inconvertibility, and damage due to political violence. Balances in this account are reserves held for potential claims and are not expected to be obligated.

In 2019, as part of the Administration's plan to reform and modernize US Development Finance, OPIC will be consolidated with other development finance functions, such as USAID's Development Credit Authority, into a new Development Finance Institution. All future OPIC insurance and non-credit activities are presented in the Development Finance Institution program account.

The Overseas Private Investment Corporation (OPIC) encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its credit program is investment financing through loans and guaranteed loans. As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

In 2019, as part of the Administration's plan to reform and modernize US Development Finance, OPIC will be consolidated with other development finance functions, such as USAID's Development Credit Authority, into a new Development Finance Institution. All future OPIC credit activities are presented in the Development Finance Institution program and financing accounts.

The Budget proposes to eliminate funding for several independent agencies, including for the U.S. Trade and Development Agency (USTDA), as part of the Administration's plans to move the Nation towards fiscal responsibility, to redefine the proper role of the Federal Government, and to prioritize rebuilding the military and making critical investments in the Nation's security. Because USTDA is primarily focused on middle income countries and not on development finance, TDA is not being consolidated into the new Development Finance Institution (DFI). The Budget requests \$12.1 million to conduct an orderly closeout of the agency beginning in fiscal year 2019, which includes funding for personnel costs, including severance payments and salaries for essential personnel during the closeout; rental payments; and other costs related to termination.

The Administration proposes to consolidate, reform, and modernize US Development Finance functions, such as USAID's Development Credit Authority (DCA) and the Overseas Private Investment Corporation (OPIC). The Development Finance Institution (DFI) encourages the participation of United States private sector capital and skills in the economic and social development of emerging market economies. As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis. Additionally, the Program Account records the costs associated

with non-credit activity and holds balances for potential insurance claims that are not expected to be obligated.

The President's Budget requests \$38 million in spending authority from offsetting collections and transfer authority from USAID to support DFI activities such as loans, loan guarantees, insurance, feasibility studies, and other programming as authorized. For loans and loan guarantees, this request includes a limitation on budget authority up to \$80 million, and an annual limitation on the total committed amount up to \$8 billion. The President's Budget also requests \$94 million in administrative expenses that will fund the total cost of development, implementation, and financial management of the DFI programming, as well as the continued administration of USAID and OPIC legacy credit portfolios. Additionally, the President's Budget requests \$2 million for a robust oversight, inspection, and evaluation of DFI programming.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

In order to streamline the panoply of international affairs agencies operating today, the Budget proposes consolidating small grants functions and assistance aimed at reaching poor and remote communities that is currently carried out by the Inter-American Foundation (IAF) into the U.S. Agency for International Development (USAID) in FY 2019. To facilitate the consolidation, the Budget requests \$3 million to conduct an orderly closeout of IAF beginning in fiscal year 2019, which includes sufficient funding for severance payments for duplicative functions not merged into USAID and other miscellaneous requirements for an orderly shutdown. The Budget also requests new funding for small grantmaking and select personnel through USAID to continue these functions.

5113 IMF quota letter of credit	105,627	105,627	105,627

The United States participates in the International Monetary Fund (IMF) through a quota subscription, denominated in Special Drawing Rights (SDRs). Under reforms to IMF quotas decided in 2010 and implemented by the IMF in early 2016 after Congress passed the necessary legislation ratifying the reforms, the U.S. quota at the IMF increased by SDR 40,871,800,000 (approximately \$58 billion using the current exchange rate) to SDR 82,994,200,000 (approximately \$117 billion using the current exchange rate). Quotas are the main metric used by the Fund to assign voting shares and to determine countries' contributions to the IMF's general resources and access to IMF financing.

The use of the U.S. quota resources by the IMF constitutes an exchange of monetary assets and does not result in net budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) directs that the budgetary authority and outlays of the 2016 quota increase be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 quota increase is also now executed on a present value basis.

5116 New Arrangements to Borrow	39,858	39,858	39,858

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's quota resources to forestall or cope with an impairment of the international monetary system. GAB participants decided in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6 billion using the current exchange rate). In December 2017, GAB participants decided unanimously that the GAB should be allowed to lapse when its current term ends on December 25, 2018. Accordingly, the GAB decision was not renewed by the IMF's Executive Board by December 25, 2017, the deadline for its renewal. The non-renewal of the GAB will have no budget implications for the United States

as amounts authorized for the GAB are also authorized to be used for the New Arrangements to Borrow (NAB), hence the sum of U.S. resources made available to the IMF under the NAB and GAB could not exceed the total U.S. NAB participation.

In January 1997, the Executive Board of the IMF approved the creation of the NAB, which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated for the first time in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB participants in March 1999. From 1999 through March 2011 the NAB was not activated.

By the end of 2016, following reduction of the NAB as part of the 2010 IMF reforms (see the account entitled "United States Quota, International Monetary Fund"), 38 countries and institutions participated in the NAB for a total of SDR 181 billion (about \$255 billion), of which the U.S. share was approximately SDR 28 billion (about \$40 billion). The IMF began a six-month NAB activation period in October 2015, and deactivated the NAB in February 2016, before the end of the six-month period.

With respect to this account, resources provided by the United States under the GAB and NAB constitute an exchange of monetary assets and do not result in any net budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the GAB and NAB are readily available to meet a U.S. balance-of-payments financing need.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) rescinded SDR 40,871,800,000 from U.S. participation in the NAB. The Act also directs that the budget authority and outlays of the NAB rescission be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 NAB increase is also now executed on a present value basis.

The Special Defense Acquisition Fund (SDAF) helps to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations; and expedite the procurement of defense articles for provision to foreign nations and international organizations. The 2019 request reflects \$900 million in new SDAF obligation authority, to be funded by offsetting collections. In 2019, offsetting collections will be derived from SDAF sales of stock as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The 2019 request will support advance purchases of high-demand equipment that has long procurement lead times, which is often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

CONSULTING SERVICES

SEC. 7002. The expenditure of any appropriation under title I of this Act for any consulting service through procurement contract, pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

DIPLOMATIC FACILITIES

SEC. 7003. (a) NEW DIPLOMATIC FACILITIES.—For the purposes of calculating the fiscal year 2019 costs of providing new United States diplomatic facilities in accordance with section 604(e) of the Secure Embassy Construction and Counterterrorism Act of 1999 (22 U.S.C. 4865 note), the Secretary of State, in consultation with the Director of the Office of Management and Budget, shall determine the annual program level and agency shares in a manner that is proportional to the Department of State's contribution for this purpose.

(b) TRANSFER AUTHORITY.—Funds appropriated under the heading "Diplomatic Programs", including for Worldwide Security Protection, and under the heading "Embassy Security, Construction, and Maintenance" in titles I and VIII of this Act may be transferred to, and merged with, funds appropriated by such titles under such headings if the Secretary of State determines and reports to the Committees on Appropriations that to do so is necessary to implement the recommendations of the Benghazi Accountability Review Board, or to prevent or respond to security situations and requirements, following consultation with, and subject to the regular notification procedures of, such Committees: Provided, That such transfer authority is in addition to any transfer authority otherwise available under any other provision of law.

PERSONNEL ACTIONS

Any costs incurred by a department or agency funded under title I of this Act resulting from personnel actions taken in response to funding reductions included in this Act shall be absorbed within the total budgetary resources available under title I to such department or agency: Provided, That the authority to transfer funds between appropriations accounts as may be necessary to carry out this section is provided in addition to authorities included elsewhere in this Act.

PROHIBITION AGAINST DIRECT FUNDING FOR CERTAIN COUNTRIES

SEC. 7005. None of the funds appropriated or otherwise made available pursuant to titles III through VI of this Act shall be obligated or expended to finance directly any assistance or reparations for the governments of Cuba, North Korea, Iran, or Syria: Provided, That for purposes of this section, the prohibition on obligations or expenditures shall include direct loans, credits, insurance, and guarantees of the Export-Import Bank or its agents.

COUPS D'ETAT

may be resumed to such government if the Secretary of State certifies and reports to the appropriate congressional committees that subsequent to the termination of assistance a democratically elected government has taken office or that provision of assistance is in the national interest of the United States: Provided further, That the provisions of this section shall not apply to assistance to promote democratic elections or public participation in democratic processes.

TRANSFER AUTHORITY

SEC. 7007. (a) DEPARTMENT OF STATE AND BROADCASTING BOARD OF GOVERNORS.—

(1) Not to exceed the greater of 5 percent or \$2,000,000 of any appropriations for the Department of State under title I of this Act or under title I of prior Acts may be transferred between, and merged with, such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by any such transfers, except that none of the limitations on the transfer authority provided in this paragraph shall apply in the case of transfers under this authority into the Capital Investment Fund for the purposes of information technology modernization.

(2) Not to exceed the greater of 5 percent or \$2,000,000 of any appropriation for the Broadcasting Board of Governors under title I of this Act or under title I of prior Acts may be transferred between, and merged with, such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by any such transfers.

(3) Any transfer pursuant to this subsection shall be treated as a reprogramming of funds under section 7011 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

(b) TITLE VI TRANSFER AUTHORITIES.—Not to exceed 5 percent of any appropriation other than for administrative expenses made available for fiscal year 2019, for programs under title VI of this Act may be transferred between such appropriations for use for any of the purposes, programs, and activities for which the funds in such receiving account may be used, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 25 percent by any such transfer: Provided, That the exercise of such authority shall be subject to the regular notification procedures of the Committees on Appropriations.

(c) AUDIT OF INTER-AGENCY TRANSFERS.—Any agreement for the transfer or allocation of funds appropriated by this Act, or prior Acts, entered into between the Department of State or USAID and another agency of the United States Government under the authority of section 632(a) of the Foreign Assistance Act of 1961 or any comparable provision of law, shall expressly provide that the Inspector General (IG) for the agency receiving the transfer or allocation of such funds, or other entity with audit responsibility if the receiving agency does not have an IG, shall perform periodic program and financial audits of the use of such funds and report to the Department of State or USAID, as appropriate, upon completion of such audits: Provided, That funds transferred under such authority may be made available for the cost of such audits.

PROHIBITION ON FIRST-CLASS TRAVEL

SEC. 7008. None of the funds made available in this Act may be used for first-class travel by employees of agencies funded by this Act in contravention of sections 301–10.122 through 301–10.124 of title 41, Code of Federal Regulations.

No part of any appropriation contained in this Act shall remain available for obligation after the expiration of the current fiscal year unless expressly so provided in this Act: Provided, That funds appropriated for the purposes of chapters 1 and 8 of part I, sections 661 and 667, chapters 4, 5, 6, 8, and 9 of part II of the Foreign Assistance Act of 1961, and section 23 of the Arms Export Control Act shall remain available for an additional 4 years from the date on which the availability of such funds would otherwise have expired, if such funds are initially obligated before the expiration of their respective periods of availability contained in this Act: Provided further, That notwithstanding any other provision of this Act, any funds made available for the purposes of chapter 1 of part I and chapter 4 of part II of the Foreign Assistance Act of 1961 which are allocated or obligated for cash disbursements in order to address balance of payments or economic policy reform objectives, shall remain available for an additional 4 years from the date on which the availability of such funds would otherwise have expired, if such funds are initially allocated or obligated before the expiration of their respective periods of availability contained in this Act.

RESERVATIONS OF FUNDS

SEC. 7010. (a) REPROGRAMMING.—Funds appropriated under titles III through VI of this Act which are specifically designated may be reprogrammed for other programs within the same account notwithstanding the designation if compliance with the designation is made impossible by operation of any provision of this or any other Act or by a significant change in circumstance as determined by the Secretary of State: Provided, That any such reprogramming shall be subject to the regular

notification procedures of the Committees on Appropriations: Provided further, That assistance that is reprogrammed pursuant to this subsection shall be made available under the same terms and conditions as originally provided.

(b) EXTENSION OF AVAILABILITY.—In addition to the authority contained in subsection (a), the original period of availability of funds appropriated by this Act and administered by the Department of State or the United States Agency for International Development (USAID) that are specifically designated for particular programs or activities by this or any other Act may be extended for an additional fiscal year if the Secretary of State or the USAID Administrator, as appropriate, determines and reports promptly to the Committees on Appropriations that the termination of assistance to a country or a significant change in circumstances makes it unlikely that such designated funds can be obligated during the original period of availability: Provided, That such designated funds that continue to be available for an additional fiscal year shall be obligated only for the purpose of such designation.

(c) OTHER ACTS.—Ceilings and specifically designated funding levels contained in this Act shall not be applicable to funds or authorities appropriated or otherwise made available by any subsequent Act unless such Act specifically so directs: Provided, That specifically designated funding levels or minimum funding requirements contained in any other Act shall not be applicable to funds appropriated by this Act.

CONSULAR NOTIFICATION COMPLIANCE

SEC. 7053. (a) **PETITION FOR REVIEW.**

(1) **JURISDICTION.** Notwithstanding any other provision of law, a Federal court shall have jurisdiction to review the merits of a petition claiming violation of Article 36(1)(b) or (c) of the Vienna Convention on Consular Relations, done at Vienna April 24, 1963, or a comparable provision of a bilateral international agreement addressing consular notification and access, filed by an individual convicted and sentenced to death by any Federal or State court before the date of enactment of this Act.

(2) **STANDARD.** To obtain relief, an individual described in paragraph (1) must make a showing of actual prejudice to the criminal conviction or sentence as a result of the violation. The court may conduct an evidentiary hearing if necessary to supplement the record and, upon a finding of actual prejudice, shall order a new trial or sentencing proceeding.

(3) **LIMITATIONS.**

(A) **INITIAL SHOWING.** To qualify for review under this subsection, a petition must make an initial showing that—

(i) a violation of Article 36(1)(b) or (c) of the Vienna Convention on Consular Relations, done at Vienna April 24, 1963, or a comparable provision of a bilateral international agreement addressing consular notification and access, occurred with respect to the individual described in paragraph (1); and

(ii) if such violation had not occurred, the consulate would have provided assistance to the individual.

(B) **EFFECT OF PRIOR ADJUDICATION.** A petition for review under this subsection shall not be granted if the claimed violation described in paragraph (1) has previously been adjudicated on the merits by a Federal or State court of competent jurisdiction in a proceeding in which no Federal or State procedural bars were raised with respect to such violation and in which the court provided review equivalent to the review provided in this subsection, unless the adjudica-

tion of the claim resulted in a decision that was based on an unreasonable determination of the facts in light of the evidence presented in the prior Federal or State court proceeding.

(C) **FILING DEADLINE.** A petition for review under this subsection shall be filed within 1 year of the later of—

(i) the date of enactment of this Act;

(ii) the date on which the Federal or State court judgment against the individual described in paragraph (1) became final by the conclusion of direct review or the expiration of the time for seeking such review; or

(E) **TIME LIMIT FOR REVIEW.** A Federal court shall give priority to a petition for review filed under this subsection over all noncapital matters. With respect to a petition for review filed under this subsection and claiming only a violation described in paragraph (1), a Federal court shall render a final determination and enter a final judgment not later than one year after the date on which the petition is filed.

(4) **HABEAS PETITION.** A petition for review under this subsection shall be part of the first Federal habeas corpus application or motion for Federal collateral relief under chapter 153 of title 28, United States Code, filed by an individual, except that if an individual filed a Federal habeas corpus application or motion for Federal collateral relief before the date of enactment of this Act or if such application is required to be filed before the date that is 1 year after the date of enactment of this Act, such petition for review under this subsection shall be filed not later than 1 year after the enactment date or within the period prescribed by paragraph (3)(C)(iii), whichever is later. No petition filed in conformity with the requirements of the preceding sentence shall be considered a second or successive habeas corpus application or subjected to any bars to relief based on preenactment proceedings other than as specified in paragraph (2).

(5) **REFERRAL TO MAGISTRATE.** A Federal court acting under this subsection may refer the petition for review to a Federal magistrate for proposed findings and recommendations pursuant to 28 U.S.C. 636(b)(1)(B).

(B) **APPEAL BY PETITIONER.** An individual described in paragraph (1) may appeal a final order on a petition for review under paragraph (1) only if a district or circuit judge issues a certificate of appealability. A district or circuit court judge shall issue or deny a certificate of appealability not later than 30 days after an application for a certificate of appealability is filed. A district judge or circuit judge may issue a certificate of appealability under this subparagraph if the individual has made a substantial showing of actual prejudice to the criminal conviction or sentence of the individual as a result of a violation described in paragraph (1).

(b) **VIOLATION.**

(1) **IN GENERAL.** An individual not covered by subsection (a) who is arrested, detained, or held for trial on a charge that would expose the individual to a capital sentence if convicted may raise a claim of a violation of Article 36(1)(b) or (c) of the Vienna Convention on Consular Relations, done at Vienna April 24, 1963, or of a comparable provision of a bilateral international agreement addressing consular notification and access, at a reasonable time after the individual becomes aware of the violation, before the court with jurisdiction over the charge. Upon a finding of such a violation—

(A) the consulate of the foreign state of which the individual is a national shall be notified immediately by the detaining authority, and consular access to the individual shall be afforded in accordance with the provisions of the Vienna Convention on Consular Relations, done at Vienna April 24, 1963, or the comparable provisions of a bilateral international agreement addressing consular notification and access; and

The National Surface Transportation and Innovative Finance Bureau (the Bureau) fulfills a number of specific responsibilities, including the following: provide assistance and communicate best practices and financing and funding opportunities to entities eligible under DOT infrastructure finance programs; administer the application process for DOT infrastructure finance programs; administer the application process for the Infrastructure for Rebuilding America (INFRA) grant program; reduce uncertainty and delays related to environmental reviews and permitting, as well as project delivery and procurement risks, and costs for projects financed by the DOT infrastructure finance programs and INFRA; increase transparency and the public availability of information regarding projects financed by the DOT infrastructure finance programs and INFRA; and promote best practices in procurement for projects financed by the DOT infrastructure finance programs and the INFRA program by developing benchmarks related to procurement. To assist with establishing the Bureau, the Fixing America's Surface Transportation (FAST) Act provides the Secretary with certain authorities to redirect personnel and budgetary resources, if necessary, to support the establishment and effectiveness of the Bureau. These authorities were available for two years and expired in December 2017. The Administration is proposing extending these authorities for the term of the FAST Act, or any extension thereof to allow full implementation of the Bureau. In addition to the FAST Act-authorized consolidations, the Budget proposes to consolidate the Maritime Guaranteed Loan (Title XI) program under the Bureau as well, including open loans.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the Federal Aviation Administration (FAA) to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service (EAS) program and rural airport improvements. In addition, the FAA Modernization and Reauthorization Act (P.L. 112-95) requires that, in any fiscal year, overflight fees collected in excess of \$50 million will be available to carry out the EAS program. The 2019 Budget proposes to reform the EAS program.

Through 1997, the Essential Air Service (EAS) program was funded from the Airport and Airway Trust Fund. Starting in 1998, the Federal Aviation Administration reauthorization funded it as a mandatory program supported by overflight fees under the EAS and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the essential air service program. The 2019 Budget proposes to reform the EAS program by adjusting the EAS eligibility based on driving distance to nearby airports; increasing the subsidy cap from \$200 to \$250 per passenger for EAS communities located within 210 miles from a large or medium hub airport; and eliminating the waiver for this requirement; and placing limits on the waiver authority for the 10-enplanement requirement.

The 2019 Budget requests \$9,931 million for Federal Aviation Administration (FAA) operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space transportation industry, as well as FAA policy oversight and overall management functions.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). In December 2014, the Congress sunset part of the aviation insurance program. Specifically, the Congress returned U.S. air carriers to the commercial aviation market for all of their war risk insurance coverage by ending the FAA's authority to provide war risk insurance for a premium. Pursuant to 49 U.S.C. 44305, the FAA may provide insurance without premium at the request of the Secretary of Defense, or the head of a department, agency, or instrumentality designated by the President, when the Secretary of Defense, or the designated head, agrees to indemnify the Secretary of Transportation against all losses covered by the insurance. The "non-premium" aviation insurance program is authorized through December 31, 2018.

Enacted on February 17, 2009, the American Recovery and Reinvestment Act of 2009 (Recovery Act) provided \$27.5 billion from the General Fund to the Federal Highway Administration (FHWA), of which \$26.6 billion was apportioned to States based on formulas described in the Recovery

Act, and \$0.9 billion was allocated to programs identified in the Recovery Act, including the Indian Reservation Roads Program; Park Roads and Parkway Program; Forest Highway Program; Refuge Roads Program; Disadvantaged Business Enterprise Bonding Assistance; Territorial Highway Program; Puerto Rico Highway Program; and the Ferry Boat Discretionary Program. Administrative oversight funds were available through September 30, 2012 and all other funds were available through September 30, 2010. The FHWA Recovery Act funds have been used to invest in transportation, environmental protection, and other infrastructure that will provide longer term economic benefits to the Nation. The Recovery Act funds augmented existing investments, authorized by the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, and enabled States as well as regional and local governments to accelerate the completion of a number of highway infrastructure projects planned or underway. Since the Recovery Act was enacted in February 2009, more than 42,000 miles of pavement across the United States have been improved. As of September 30, 2015, States have expended 100% of Recovery Act obligations. As of September 30, 2015, Recovery Act funds are cancelled and are no longer available for expenditure. 2018 includes upward and downward re-estimates, and interest on the re-estimates for the Transportation Infrastructure Finance and Innovation (TIFIA) Act program. No new budget authority is requested for 2019.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. The purchase of right-of-way is an eligible expense of the Federal-Aid Highway program.

This program was terminated by the Transportation Equity Act for the 21st Century of 1998, but will continue to be shown for reporting purposes as loan balances remain outstanding. No new budgetary resources are requested in 2019.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax, and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law. To reflect the Highway Trust Fund's structural insolvency, the Budget presents an adjusted baseline that reflects the outlays that can be supported by available revenues, reducing outlays by \$122 billion over the 10-year window. Per the Cash Management Improvement Act of 1990, this account reflects the net of State interest liability and adjusted Federal interest liability payments to or from States.

The following Status of Funds table presents the status of Highway Trust Fund.

Cash balances.—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand (i.e., uninvested balance). Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

Revenues.—The Budget presentation includes estimated receipts from existing Highway Trust Fund excise taxes, which would continue to be deposited into the Highway and Mass Transit Accounts of the Highway Trust Fund in the same manner as current law.

General Fund Transfers.—The Fixing America's Surface Transportation (FAST) Act (Public Law 114-94) authorized the transfer into the Highway Trust Fund of \$70.0 billion from the General Fund of the Treasury in 2016. This transfer was not subject to sequestration. The FAST Act authorized the transfer of \$100 million into the Highway Trust Fund from the LUST Trust Fund in both 2017 and 2018. The 2017 and 2018 LUST Trust Fund transfers were subject to sequestration.

The Federal-aid Highways (FAH) program is designed to aid in the development, operations, and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely. All programs included within the FAH program are proposed to be financed from the Highway Account of the Highway Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority.

FEDERAL-AID HIGHWAYS—Continued

The Federal Highway Administration's (FHWA) 2019 budget consists of the following programs: Highway Safety Improvement Program; National Highway Freight Program; National Highway Performance Program; Surface Transportation Block Grant Program; Congestion Mitigation and Air Quality Improvement Program; Metropolitan Transportation Planning Program; Federal Lands and Tribal Transportation Programs; Nationally Significant Freight and Highway Projects; Transportation Infrastructure Finance and Innovation Act (TIFIA) Program; Research, Technology and Education Program; and Federal Allocation Programs.

Highway Safety Improvement Program.—The Highway Safety Improvement Program (\$2.6 billion) provides funding to significantly reduce traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on Tribal lands. FHWA, through national leadership and innovation, focuses on improving the safety of roadway infrastructure on all public roads. The program provides a data- and performance-driven strategic approach to improving traffic safety to reduce fatalities and serious injuries. It strengthens coordination among all highway safety modes, including the National Highway Traffic Safety Administration and Federal Motor Carrier Safety Administration, in conjunction with all Department safety initiatives. It continues the requirement that each State utilize a Strategic Highway Safety Plan. This statewide, coordinated safety plan provides a comprehensive framework for establishing statewide goals, objectives, and performance targets while ensuring the effective use of safety-focused funding. The Highway Safety Improvement Program includes a \$240 million targeted set-aside for the Railway-Highway Crossings Program to reduce the number of fatalities, injuries, and crashes at public grade crossings.

National Highway Freight Program.—The National Highway Freight Program (\$1.3 billion) is a formula program established by the FAST Act that provides States with necessary funds for vital projects that will improve the movement of freight on the National Highway Freight Network, which comprises the 41,500-mile Primary Highway Freight System (PHFS), all other Interstates not on the PHFS, and other State-identified critical rural and urban corridors. The FAST Act requires all States using formula dollars to complete a multimodal State Freight Plan.

National Highway Performance Program.—The National Highway Performance Program (\$23.7 billion) is a formula-based program that focuses significant Federal resources to support the condition and performance of the National Highway System (NHS), to support the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction support progress toward the achievement of performance targets for the NHS. The program includes performance management features, holds States accountable for achieving performance targets, and provides flexibility to States for making transportation investment decisions. The 220,000-mile NHS comprises rural and urban roads serving major population centers, international border crossings, intermodal transportation facilities, and major travel destinations. The NHS includes the Interstate System, all principal arterials, intermodal connectors, and other roads important to mobility, commerce, national defense, and intermodal connectivity. The NHS provides mobility to the vast majority of the Nation's population and almost all of its commerce, supports national defense, and promotes intermodal connectivity.

Surface Transportation Block Grant Program.—The Surface Transportation Block Grant Program (\$11.9 billion) provides flexible funding that may be used by States and localities for projects to preserve and improve the condition and performance on any Federal-aid highway, bridge and safety projects on any public road, and facilities for non-motorized transportation. The flexible nature of this program allows States to direct funding to areas of greatest need while also fostering innovation. This program gives State transportation agencies the ability to target funding to State and local priorities. States will identify projects for funding in consultation with local transportation officials in rural areas and in cooperation with the Metropolitan Planning Organization (MPO) in metropolitan areas.

Congestion Mitigation and Air Quality Improvement Program.—The Congestion Mitigation and Air Quality (CMAQ) Improvement Program (\$2.4 billion) will help States, local governments, and private-sector sponsors reduce highway congestion and harmful emissions, and assist many areas in reaching attainment of the National Ambient Air Quality Standards (NAAQS). The CMAQ program provides a flexible funding source for State and local governments to fund transportation projects and programs that are designed to help localities meet the requirements of the Clean Air Act and its amendments, and help reduce regional congestion on transportation networks. CMAQ investments support transportation projects that are designed to reduce the emissions from mobile sources in areas that have been designated as in nonattainment or in maintenance of the NAAQS by the Environmental Protection Agency.

Metropolitan Transportation Planning Program.—The Metropolitan Transportation Planning Program (\$350 million) provides funds for use by Metropolitan Planning Organizations for multimodal transportation planning and programming in metropolitan areas. Metropolitan planning activities include: the collection and analysis of data on demographics, trends, and system performance; travel demand and system performance forecasting; identification and prioritization of transportation system improvement needs; and coordination of the planning process and decision-making with the public, elected officials, and stakeholder groups. The planning process will provide consideration for projects that increase safety, support economic vitality, increase accessibility, mobility, and connectivity, protect and enhance the environment, emphasize the preservation of existing infrastructure, and increase security of the transportation system.

Federal Lands and Tribal Transportation Programs.—The Federal Lands and Tribal Transportation Programs (\$1.1 billion) provide funding for transportation construction and engineering projects on Federal and Tribal lands that will: provide multi-modal access to basic community services including safer all-weather access to schools and healthcare facilities for 567 federally-recognized sovereign Tribal governments; improve multi-modal access to recreational areas on federal lands; and expand economic development in and around federal and Tribal lands while preserving the environment and reducing congestion.

Nationally Significant Freight and Highway Projects.—The Nationally Significant Freight and Highway Projects (\$950 million) program is a discretionary grant program, established by the FAST Act, for major freight and highway projects that will improve the safety, efficiency, and reliability of the movement of freight and people. Through the advancement of construction-ready projects, this program will enhance the Nation's freight movement.

Transportation Infrastructure Finance and Innovation Act (TIFIA) Program.—The TIFIA Program (\$300 million) provides contract authority to cover the subsidy cost of providing credit assistance for nationally or regionally significant transportation projects. The TIFIA Program leverages Federal dollars in a time of scarce budgetary resources, facilitating private participation in transportation projects and encouraging innovative financing mechanisms that help advance projects sooner. This program offers flexible repayment terms and attracts private capital to facilitate transportation projects that would otherwise go unfunded.

Research, Technology, and Education Program.—The Research, Technology, and Education (RT&E) Program (\$420 million) provides for a comprehensive, nationally-coordinated research, technology, and education program that will advance the Department of Transportation's goals, while accelerating innovation delivery and technology implementation. FHWA research, development and technology activities include: a highway research and development program; a technology and innovation deployment program; an intelligent transportation systems program; and a training and education program. The RT&E Program supports activities in the areas of safety, infrastructure, and innovation. FHWA is in a unique leadership position to identify and address issues that require high-risk, long-term research, and research on emerging issues of national significance. FHWA's leadership role is necessary to build effective partnerships to maximize the

investment in the transportation system. The entire innovation lifecycle is covered under the RT&E Program umbrella from agenda setting to the deployment of technologies and innovations.

Federal Allocation Programs.—This categorization consists of funding (\$404 million) for several important programs: Emergency Relief; Territorial and Puerto Rico Highway Program; Construction of Ferry Boats and Ferry Terminal Facilities; On-the-Job Training; Disadvantaged Business Enterprise; and Highway Use Tax Evasion Projects. The Emergency Relief Program has been funded through a recurring annual authorization of \$100 million since 1972. Emergency Relief funding assists Federal, State, Tribal, and local governments with the expense of repairing serious damage to Federal-aid, Tribal, and Federal Lands highways resulting from natural disasters or catastrophic failures. The Territorial and Puerto Rico Highway Program provides funding for critical highway programs in Puerto Rico and the four territories of American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the United States Virgin Islands. The Construction of Ferry Boats and Ferry Terminal Facilities program provides funding for the construction of ferry boats and ferry terminal facilities which will improve connectivity between NHS segments, reduce congestion, and in many cases, provide the only reasonable form of transportation, particularly on coastal islands with year-round residents. The On-the-Job Training program provides funding for developing, conducting, and administering surface transportation and technology training, including skill improvement programs and job readiness. The Disadvantaged Business Enterprise program provides funding for developing, conducting, and administering training and assistance programs to increase the proficiency of minority businesses to compete, on an equal basis, for contracts and subcontracts. The Highway Use Tax Evasion Projects program provides funding to the Internal Revenue Service, other Federal agencies, and the States to carry out intergovernmental enforcement efforts along with training and research to reduce evasion of payment of motor fuel and other highway use taxes, which are the principal sources for Federal and State highway funding.

(B) title VI of the Fixing America's Surface Transportation Act.

(2) **EXCEPTION.**—Obligation authority made available under paragraph (1) shall—

(A) remain available for a period of 4 fiscal years; and

(e) **REDISTRIBUTION OF CERTAIN AUTHORIZED FUNDS.**—

(1) **IN GENERAL.**—Not later than 30 days after the date of distribution of obligation limitation under subsection (a), the Secretary shall distribute to the States any funds (excluding funds authorized for the program under section 202 of title 23, United States Code) that—

(A) are authorized to be appropriated for such fiscal year for Federal-aid highway programs; and

(B) the Secretary determines will not be allocated to the States (or will not be apportioned to the States under section 204 of title 23, United States Code), and will not be available for obligation, for such fiscal year because of the imposition of any obligation limitation for such fiscal year.

(2) **RATIO.**—Funds shall be distributed under paragraph (1) in the same proportion as the distribution of obligation authority under subsection (a)(5).

(3) **AVAILABILITY.**—Funds distributed to each State under paragraph (1) shall be available for any purpose described in section 133(b) of title 23, United States Code.

SEC. 121. Notwithstanding 31 U.S.C. 3302, funds received by the Bureau of Transportation Statistics from the sale of data products, for necessary expenses incurred pursuant to chapter 63 of title 49, United States Code, may be credited to the Federal-aid highways account for the purpose of reimbursing the Bureau for such expenses: Provided, That such funds shall be subject to the obligation limitation for Federal-aid highway and highway safety construction programs.

SEC. 122. Not less than 15 days prior to waiving, under his or her statutory authority, any Buy America requirement for Federal-aid highways projects, the Secretary of Transportation shall make an informal public notice and comment opportunity on the intent to issue such waiver and the reasons therefor: Provided, That the Secretary shall provide an annual report to the House and Senate Committees on Appropriations on any waivers granted under the Buy America requirements.

SEC. 123. None of the funds made available in this Act to the Department of Transportation may be used to provide credit assistance unless not less than 1 day before any application approval to provide credit assistance under sections 603 and 604 of title 23, United States Code, the Secretary of Transportation provides notification in writing to the following committees: the House and Senate Committees on Appropriations; the Committee on Environment and Public Works and the Committee on Banking, Housing and Urban Affairs of the Senate; and the Committee on Transportation and Infrastructure of the House of Representatives: Provided, That such notification shall include, but not be limited to, the name of the project sponsor; a description of the project; whether credit assistance will be provided as a direct loan, loan guarantee, or line of credit; and the amount of credit assistance.

SEC. 124. (a) A State or territory, as defined in section 165 of title 23, United States Code, may use for any project eligible under section 133(b) of title 23 or section 165 of title 23 and located within the boundary of the State or territory any earmarked amount, and any associated obligation limitation, provided that the Department of Transportation for the State or territory for which the earmarked amount was originally designated or directed notifies the Secretary of Transportation of its intent to use its authority under this section and submits a quarterly report to the Secretary identifying the projects to which the funding would be applied. Notwithstanding the

original period of availability of funds to be obligated under this section, such funds and associated obligation limitation shall remain available for obligation for a period of 3 fiscal years after the fiscal year in which the Secretary of Transportation is notified. The Federal share of the cost of a project carried out with funds made available under this section shall be the same as associated with the earmark.

(b) In this section, the term "earmarked amount" means—

(2) a congressional earmark, as defined in rule XXI of the Rules of the House of Representatives identified in a prior law, report, or joint explanatory statement and administered by the Federal Highway Administration.

(c) The authority under subsection (a) may be exercised only for those projects or activities that have obligated less than 10 percent of the amount made available for obligation as of October 1 of the current fiscal year, and shall be applied to projects within the same general geographic area within 100 miles for which the funding was designated, except that a State or territory may apply such authority to unexpended balances of funds from projects or activities the State or territory certifies have been closed and for which payments have been made under a final voucher.

(d) The Secretary shall submit consolidated reports of the information provided by the States and territories each quarter to the House and Senate Committees on Appropriations.

SEC. 125. Section 119(e)(5) of title 23, United States Code, is amended to read as follows—

"(5) Requirement for Plan.—Notwithstanding section 120, beginning on October 1, 2019, and each fiscal year thereafter, if the Secretary determines that a State has not developed and implemented a State asset management plan consistent with this section, the Federal share payable on account of any project or activity for which funds are obligated by the State in that fiscal year under this section shall be 65 percent. The Secretary shall make the determination no later than the day before the beginning of each fiscal year."

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act of 1999 (P.L. 106–159). Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation, and reduce truck and bus crashes. The Agency accomplishes this mission by reducing fatalities and property losses associated with commercial motor vehicles through education, regulation, enforcement, research, and innovative technology, thereby achieving a safer and more secure transportation environment. FMCSA is also responsible for enforcing Federal motor carrier safety and hazardous materials regulations for all commercial vehicles entering the United States along its southern and northern borders.

Motor Carrier Safety Grants provide funding to eligible States to conduct compliance reviews; identify and apprehend traffic violators; conduct roadside inspections; and support safety audits on new entrant carriers. The Federal Motor Carrier Safety Administration (FMCSA) also supports States by conducting training for State agency personnel to accomplish motor carrier safety objectives. In addition, FMCSA reviews State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and actively engages with industry and other stakeholders through Innovative Technology programs to improve the safety and productivity of commercial vehicles and drivers.

crashes by raising the bar to entry into the commercial motor vehicle industry, by requiring operators to maintain standards to remain in the industry, and by removing high-risk carriers, vehicles, drivers and service providers from operation. Funding supports Nation-wide motor carrier safety and consumer enforcement efforts, including the continuation of the Compliance, Safety and Accountability Program; regulation and enforcement of movers of household goods; and Federal safety enforcement activities at the borders to ensure that foreign-domiciled carriers entering the U.S. are in compliance with FMSCA regulations. Resources are also provided to fund regulatory development and implementation, investment in research and technology with a focus on research regarding highly automated vehicles and related technology, and information technology's information management, safety outreach and education. The 2019 funding request reflects FMCSA's requirements to fund critical safety and operational facility improvements at border and domestic posts, fund important safety and safety mission support training for FMCSA staff, and to State partners.

The Vehicle Safety programs support activities to reduce highway fatalities, prevent injuries, and reduce their associated economic toll by research into, and implementation of, Federal Motor Vehicle Safety Standards. NHTSA's research areas include biomechanics; crash avoidance and mitigation technologies; and vehicle safety issues related to fuel efficiency and alternative fuels. NHTSA's Operation and Research programs fund a broad range of initiatives, including promulgation of Federal Motor Vehicle Safety Standards for motor vehicles and safety related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program. NHTSA conducts compliance programs for motor vehicle safety and automotive fuel economy standards; invest-

igations of safety-related motor vehicle defects; enforcement of Federal odometer law; support of enforcement of State odometer law; and safety recalls when warranted. Motor vehicle safety research and development supports NHTSA programs through the collection and analysis of crash data to identify safety problems, development of alternative solutions, and assessments of costs, benefits, and effectiveness. Research continues on standards and technologies to improve vehicle crashworthiness and crash avoidance, with emphasis on reducing crashes through active safety and advanced testing of emerging technologies.

The 911 Grant Program was authorized by the Next Generation 911 Advancement Act of 2012, which allows eligible entities to utilize funds to implement and operate 911 services, and to train public safety personnel. The program is funded by the Public Safety Trust Fund. The authority to expend these funds expires on September 30, 2022.

The Highway Safety Research and Development programs support research, demonstrations, technical assistance, and national leadership activities for behavioral safety programs conducted by State and local governments, as well as various safety associations and organizations. These programs emphasize alcohol and drug countermeasures, driver and passenger occupant protection, driver distraction, traffic enforcement and justice services, emergency medical and trauma care systems, traffic records and licensing, State and community evaluation, motorcycle rider safety, pedestrian and bicycle safety, pupil transportation, young and older driver safety, and development of improved accident investigation procedures. NHTSA will continue to operate the National Driver Register's Problem Driver Pointer System, which helps to identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs. Finally, NHTSA will improve its vital data collection and analysis, which form the basis of its research, rulemaking, and performance measurement activities.

NHTSA provides grants to States for activities related to the promotion of highway traffic safety. The Fixing America's Surface Transportation (FAST) Act provided multi-year surface transportation authorization legislation. Under Section 402, the Agency supports State highway safety programs, approved by the Secretary, which are designed to reduce traffic accidents and the resulting deaths, injuries, and property damage. The Agency will continue to implement and promote the use of performance measures and targets as a condition of approval in these programs and to ensure efficient and effective use of funds. NHTSA also will use dedicated funds from the program to support high visibility enforcement campaigns in the States that promote the use of seat belts and the reduction of drunk driving. Under Section 405, the Agency will make grant awards to States that focus on specific national priority traffic safety areas aimed at reducing highway deaths and injuries. The Agency will make grants to States that develop qualifying plans and complying laws in accordance with the statutory criteria. The focus areas under the Section 405 grant programs include occupant protection, State traffic safety information system improvements, impaired driving countermeasures, distracted driving, motorcyclist safety, State graduated driving licensing, and non-motorized safety programs.

Funds requested in the Safety and Operations account support the Federal Railroad Administration's (FRA) personnel and administrative expenses, the cost of rail safety inspectors, and other program activities including contracts. Resources are also provided to fund information management, technology, safety education, and outreach. The Budget includes language in FRA's Administrative Provisions to implement a rail safety user fee to partially offset the cost of rail safety inspectors and activities.

In 2016, \$50 million was appropriated under the Railroad Safety Grants heading to be equally distributed to Railroad Safety Infrastructure Improvement Grants and Railroad Safety Technology Grants. The Fixing America's Surface Transportation (FAST) Act of 2015 (P.L. 114-94) repealed the Railroad Safety Infrastructure Improvement Grants program and did not authorize new funding for the Railroad Safety Technology Grants program. No new funds are requested for this account for 2019.

Funding requested in the Railroad Research and Development Program is focused on improving railroad safety. It provides scientific and engineering support for the Federal Railroad Administration's rail safety enforcement and rulemaking efforts. It also identifies and develops emerging technologies for the rail industry to adopt voluntarily. The outcomes of the research and development reduce accidents and incidents. In addition to improving safety, the program contributes significantly towards activities to achieve and maintain a state of good repair and promote job creation and economic growth.

The program focuses on the following areas of research:

Track Program.—Reducing derailments due to track related causes.

Rolling Stock Program.—Reducing derailments due to equipment failures, to minimize the consequences of derailments, and to minimize hazardous material releases.

Train Control and Communication.—Reducing train to train collisions and train collisions with objects on the line and at grade crossings.

Human Factors Program.—Reducing accidents caused by human error.

Railroad System Issues Program.—Prioritizing Research and Development projects on the basis of relevance to safety risk reduction and other DOT goals.

Restoration and Enhancement Grants provide operating assistance to initiate, restore, or enhance intercity passenger rail transportation. The program limits assistance to three years per route and no more than six grants may be simultaneously active. Eligible recipients include States; local governments; Amtrak or other rail carriers that provide intercity passenger rail service; and any rail carrier in partnership with another eligible public-sector applicant. The program was authorized in 2015 by the Fixing America's Surface Transportation Act. No new funds are requested for this account for 2019.

Funds are used to redevelop the Pennsylvania Station in New York City, which involves renovating the James A. Farley Post Office building as Moynihan Station. Funding for this project was included in the Grants to the National Railroad Passenger Corporation appropriation in 1995 through 1997, and the Northeast Corridor Improvement Program in 1998. In 2000, FRA received an advance appropriation of \$20 million for 2001, 2002, and 2003. In 2001, the Congress specified that the \$20 million advance appropriation for the Farley Building be used exclusively for fire and life safety initiatives. In 2016, \$40 million was transferred from the Federal Transit Administration's Hurricane Sandy funding into this account for risk reduction projects at Moynihan Station. No new funds are requested for this account in 2019.

The National Railroad Passenger Corporation (Amtrak) was established in 1970 through the Rail Passenger Service Act. Amtrak is operated and managed as a for-profit corporation. Amtrak is not an agency or instrument of the U.S. Government, although, since the railroad's creation FRA has provided annual grants for operating, capital, and debt service costs.

Prior to 2006, FRA received annual appropriations in this account for grants to Amtrak. Since then, several one-time appropriations or funding transfers have been directed to this account, including \$1.3 billion in funds under the American Recovery and Reinvestment Act of 2009; \$112 million from the Disaster Relief Appropriations Act of 2013 (P.L. 113-2) for recovery efforts from Super storm Sandy; \$185 million transfer from the Federal Transit Administration for the Hudson Yards disaster resiliency project in New York City; and a \$13 million transfer from the Federal Transit Administration for the Metropolitan Transportation Authority/Long Island Rail Road's River to River Rail Resiliency project in New York City. No new funds are requested for this account in 2019.

OPERATING GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

From 2006 to 2016, the Federal Railroad Administration received appropriations to this account to make quarterly grants to the National Railroad Passenger Corporation (Amtrak) for the operation of intercity passenger rail. The FAST Act authorized two new appropriations accounts for Amtrak—Northeast Corridor grants and National Network grants—which first received funding in 2017. The Administration proposes to continue funding Amtrak under the FAST Act account structure. No new funds are requested for this account in 2019.

The Fixing America's Surface Transportation Act authorized two new appropriations accounts for the National Railroad Passenger Corporation (Amtrak)—Northeast Corridor Grants and National Network Grants. Funding requested in the National Network Grants to the National Railroad Passenger Corporation account provide capital, operating, and debt service funding for Amtrak activities related to the National Network, which includes Amtrak's State-Supported services, Long Distance services, and other Amtrak costs not allocated to the Northeast Corridor. Amtrak began receiving its annual appropriations from the Congress under this account structure in 2017. The Budget proposes reforms to Amtrak to improve efficiencies and effectiveness of Long-Distance Routes.

This competitive grant program encourages State participation in passenger rail service. Under this program, a State or States may apply for grants for up to 50 percent of the cost of capital investments necessary to support improved intercity passenger rail service that either requires no operating subsidy or for which the State or States agree to provide any needed operating subsidy. To qualify for funding, States must include intercity passenger rail service as an integral part of statewide transportation planning as required under 23 U.S.C. 135. Additionally, the specific project must be on the Statewide Transportation Improvement Plan at the time of application.

The Railroad Safety Technology Program is a competitive grant program for the deployment of train control technologies to passenger and freight rail carriers, railroad suppliers, and State and local governments. Projects may include the deployment of train control technologies, train control component technologies, processor-based technologies, electronically controlled pneumatic brakes, rail integrity inspection systems, rail integrity warning systems, switch position indicators and monitors, remote control power switch technologies, track integrity circuit technologies, and other new technologies that improve the safety of railroad systems.

FRA has given priority to projects that make technologies interoperable between railroad systems; accelerate the deployment of train control technology on high risk corridors, such as those that have high volumes of hazardous materials shipments, or over which commuter or passenger trains operate; or benefit both passenger and freight safety and efficiency.

No new funds are requested for this account for 2019. The FAST Act did not authorize new funding for the Railroad Safety Technology Grants program.

The Transportation Equity Act of the 21st Century of 1998 established the Railroad Rehabilitation and Improvement Financing (RRIF) loan and loan guarantee program. The Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, changed the program to allow FRA to issue direct loan and loan guarantees up to \$35 billion, and it required that no less than \$7 billion be reserved for projects primarily benefiting freight railroads other than Class I carriers. The program was expanded by the Rail Safety Improvement Act of 2008 and again by the Fixing America's Surface Transportation Act in 2015. The funding may be used: 1) to acquire, improve, or rehabilitate intermodal or rail equipment or facilities, including track, components of track, bridges, yards, buildings, or shops; 2) to refinance debt; 3) to develop and establish new intermodal or railroad facilities; 4) to reimburse related planning and design expenses; 5) and to finance (by December 2019) certain economic development related to passenger rail stations. In 2016, \$1.96 million was made available to assist Class II and Class III railroads in covering RRIF loan application expenses. No new funds are requested for this account for 2019.

FEDERAL TRANSIT ADMINISTRATION

The Federal Transit Administration (FTA) provides grant funding to State and local governments, public and private transit operators, and other recipients to enhance public transportation across the United States. FTA programs fund the construction of new public transit systems, purchase and maintain transit vehicles and equipment, subsidize limited public transit operations, support regional transportation planning efforts, and improve technology and service methods critical to the delivery of public transportation. In 2015, a new five year surface transportation authorization law was enacted—Fixing America's Surface Transportation Act or the FAST Act. The FAST Act provides steady and predictable funding for five years and a renewed focus on reinvesting in and modernizing transit assets to help bring transit systems throughout the country into a state of good repair.

The Administration proposes \$11.2 billion for FTA in 2019. This proposal includes \$9.9 billion to support FTA's base formula programs that provide assistance to transit agencies in both urban and rural areas, with an additional investment in programs improving the state of good repair of rail transit and recapitalizing bus and bus facilities through a new discretionary grant program. The Administration proposes \$1 billion in new budget authority for Capital Investment Grants, to support new fixed guideway investments as well as projects aimed at improving or restoring the core capacity of existing fixed guideway systems.

The table below presents actual funding enacted for 2017, 2018 annualized CR, and the requested 2019 funding. Additional detail is provided in the program budget schedules that follow.

Priorities for the 2019 Administrative Expenses appropriation include enhancement of the Office of Safety and Oversight's workforce to strengthen and expand the framework of the robust State Safety Oversight Program and Safety for all modes of transit, including Accident Investigation Oversight; the

implementation of the FAST Act to include required rulemakings, policy updates, and strategic planning; the provision of technical assistance to grantees during project development and program implementation; Capital Project Management Oversight and grantee compliance; and support for Transit Asset Management activities, which includes developing objective standards to measure capital asset condition and collecting data on the asset condition of the FTA grantees.

The 2019 Budget request includes \$1.0 billion for the Capital Investment Grants account to increase the capacity of local transit networks and to meet ridership demands in communities across the Nation. These objectives of this program are accomplished by supporting the construction of new fixed guideway systems or extensions to fixed guideways, corridor-based bus rapid transit systems, and core capacity improvement projects. These projects include heavy rail, light rail, commuter rail, bus rapid transit, ferries, and streetcar systems. FTA allocates resources to grantees through a multi-year, multi-step competitive process. Prior to funding, each project is required to obtain an acceptable rating under a set of statutorily defined criteria that examine project merit and local financial commitment.

The Public Transportation Emergency Relief Program helps transit agencies restore needed transportation services immediately following disaster events. Both capital and operating costs are eligible for funding following an emergency; however, this program does not replace the Federal Emergency Management Agency's capital assistance program. FTA administers the \$10.9 billion supplemental appropriation (adjusted to \$10.2 billion after sequestration and the transfer of funds to the Office of the Inspector General and the Federal Railroad Administration) provided by the Disaster Relief Appropriations Act, 2013 (Public Law 113-2) following Hurricane Sandy through this account. The Hurricane Sandy funds are only available for emergency relief, recovery, and resiliency projects in the areas impacted by Hurricane Sandy. No funds are requested in this account for 2019.

Beginning in Fiscal Year 2016 activities under this account are carried out under the Transit Formula Grants account of the Highway Trust Fund. The Technical Assistance and Standard Development program enables FTA to provide technical assistance to the public transportation industry and to develop standards for transit service provision, with an emphasis on improving access for all individuals and transportation equity. Through this program, FTA is able to assist grantees to more effectively and efficiently provide public transportation and administer Federal funding in compliance with the law.

The American Recovery and Reinvestment Act of 2009 provided \$6.9 billion to fund transit capital assistance to create jobs to bolster the American economy. Transit capital assistance was provided through urbanized area formula grants, non-urbanized area formula grants, and discretionary Tribal Transit grants. Funds were used for eligible capital projects, preventive maintenance, and to purchase buses and rail rolling stock. Funds were also used for a new discretionary grant program, Transportation Investments in Greenhouse Gas and Energy Reduction, to increase the use of environmentally sustainable operations in the public transportation sector.

The 2019 Budget request builds upon the successes of the previous authorization, MAP-21, which provided two years of stable funding for transit programs. The account structure is generally comparable to FTA's funding under MAP-21. The Transit Formula Grants account is funded from the Mass Transit Account of the Highway Trust Fund.

Transit Formula Grants funds can be used for transit capital purposes, including bus and rail car purchases; facility repair and construction; maintenance; and, where eligible, planning and operating expenses. These funds help existing transit systems provide safe and reliable transportation options, and promote economically vibrant communities. The 2019 Budget request includes \$9.939 billion for Transit Formula Grants. The 2019 formula grant program structure includes:

Urbanized Area Formula.—\$4.827 billion. For formula grants to urbanized areas with populations of 50,000 or more. Funds may be used for any transit capital purpose. Operating costs continue to be eligible expenses for all urban areas under 200,000 in population; and, in certain circumstances, operating costs may be eligible expenses in urban areas with populations over 200,000. Additionally, Urbanized Area grants may be used to support Job Access and Reverse Commute activities.

State of Good Repair Grants.—\$2.638 billion. For a formula-based capital maintenance program to restore and replace aging transportation infrastructure through reinvestment in existing fixed guideway systems and buses on high occupancy vehicle (HOV) lanes.

Rural Area Formula.—\$659 million. For formula grants to provide funds for capital, planning and operating assistance grants for transit service implemented by States in rural areas with populations of less than 50,000. Funding may also be used to support intercity bus service. Additionally, Rural Area grants may be used to support Job Access and Reverse Commute activities. Within this amount, \$30 million in formula funds and \$5 million in discretionary grant funds will support the Public Transportation on Indian Reservations program and \$20 million will support the Appalachian Development Public Transportation Assistance Formula Program.

Growing States and High Density States.—\$561 million. For funds that are divided between the Urban and Rural Area programs based on the legislative funding formula for this program.

Enhanced Mobility of Seniors and Individuals with Disabilities.—\$280 million. Supports local governments and public and private transportation providers that serve special needs of these specific transit-dependent populations beyond traditional public transportation services, including complementary paratransit service.

Bus and Bus Facilities Grants.—\$777 million. For formula funding and discretionary funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities States may use these funds to supplement Urbanized Area and Rural Area formula grant programs. Funding also supports low and zero emission bus and bus facilities.

Bus Testing Facility.—\$3 million. Funding supports a facility where all new bus models purchased using FTA capital assistance will be tested for compliance with performance standards for safety, structural integrity, reliability, performance (including braking performance) maintainability, emissions, noise and fuel economy. FTA must develop a Pass/Fail rating system for buses. FTA grantees will not be able use Federal funds to purchase buses that do not receive a "pass" rating.

Planning Programs.—\$139 million. Funding supports cooperative, continuous, and comprehensive transportation infrastructure investment planning. The program requires that all Metropolitan Planning Organizations (MPOs), and States, develop performance-driven, outcome-based transportation plans.

Transit Oriented Development Pilot.—\$10 million. This pilot program funds planning for projects that support transit-oriented development associated with new fixed-guideway and core capacity improvement projects.

National Transit Institute.—\$5 million. To fund projects that enable FTA to partner with higher education to develop and provide training and educational programs to transit employees and others engaged in providing public transit services.

National Transit Data Base (NTD).—\$4 million. For operation and maintenance of the NTD, a database of nationwide statistics on the transit industry, which FTA is legally required to maintain under 49 U.S.C. 5335(a)(1)(2). NTD data serves as the basis for FTA formula grant apportionments and is used to track the condition and performance of our Nation's transit infrastructure.

Public Transportation Innovation.—\$28 million. This program provides assistance for projects and activities to advance innovative public transportation research, demonstration, deployment and development and testing, evaluating and analyzing low or no emission vehicle components intended for use in low or no emission vehicles.

Technical Assistance and Workforce Development.—\$9 million. This program enables FTA to provide technical assistance to the public transportation industry and to develop stands for transit serve provision, with an emphasis on improving access for all individuals and transportation equity. Through this program, FTA is able to assist grantees to more effectively and efficiently provide public transportation and administer federal funding in compliance with the law.

Pilot Program for Enhanced Mobility.—\$3.5 million. This pilot program assists in financing innovative projects for the transportation disadvantaged that improve the coordination of transportation services and non-emergency medical transportation services.

The Oil Pollution Act of 1990 requires the preparation of spill response plans by operators that store, handle, or transport oil to minimize the environmental impact of oil spills, and to improve public and private sector response. The Pipeline and Hazardous Materials Safety Administration (PHMSA) reviews response plans submitted by operators of onshore oil pipelines to ensure the plans comply with PHMSA regulations. These plans also must be regularly updated by the operator and submitted for review by PHMSA. PHMSA also seeks to improve oil spill preparedness and response through data analysis, spill monitoring, mapping pipelines in areas unusually sensitive to environmental damage, and advanced technologies to detect and prevent leaks from hazardous liquid pipelines. These and related activities are funded in part by the Oil Spill Liability Trust Fund.

The Ship Disposal program provides resources to properly dispose of obsolete Government-owned merchant ships maintained by the Maritime Administration in the National Defense Reserve Fleet. The Maritime Administration contracts with domestic shipbreaking firms to dismantle these vessels in accordance with guidelines set forth by the U.S. Environmental Protection Agency. In 2019, the Ship Disposal program requests \$30 million which includes funding for obsolete vessel disposal, for maintaining the

Nuclear Ship (N.S.) Savannah in protective storage, to continue the decommissioning process for the N.S. Savannah, and for administrative expenses.

The Maritime Security Program provides direct payments to U.S. flag ship operators engaged in foreign commerce to partially offset the higher operating costs of U.S. registry. The purpose of the program is to establish and sustain a fleet of active ships that are privately owned, commercially viable, and militarily useful to meet national defense and other emergency sealift requirements. Participating operators are required to make their ships and commercial transportation resources available upon request by the Secretary of Defense during times of war or national emergency. Commercial transportation resources include ships, logistics management services, port terminal facilities, and U.S. citizen merchant mariners to crew both commercial and Government-owned merchant ships. The Maritime Administration requests \$214 million for the Maritime Security Program.
