

APPENDIX

THE BUDGET

OF THE

UNITED STATES GOVERNMENT

FOR THE FISCAL YEAR ENDING JUNE 30

1966

U.S. GOVERNMENT PRINTING OFFICE, WASHINGTON 1965

For Sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402 Price \$6.25 (Paper Cover)

FOREWORD

This is one of a group of four documents which relate to the budget for 1966. *The Budget of the United States Government, 1966*, is a compact volume containing the Budget Message of the President, summary tables and statistical information, and various special analyses.

The Budget of the United States Government, 1966—Appendix contains the text of appropriation estimates proposed for the consideration of the Congress together with specific reference materials on the various appropriations

and funds. The contents of this volume are further explained at the beginning of each of its four parts.

The Budget of the United States Government, 1966—The District of Columbia is a volume which relates specifically to the estimates for the municipal government of the District of Columbia.

In addition, a pamphlet type of publication, *The Federal Budget in Brief, 1966*, is available for those who wish a much more brief presentation than any of the three official volumes.

NOTE.—Unless otherwise indicated, all references to years in this volume are to fiscal years ending June 30. Financial tables in parts I, II, and IV are nearly always stated in thousands of dollars; details may not add to the totals because of rounding.

EXPLANATION OF ESTIMATES FOR FEDERAL FUNDS

Part I contains supporting details for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for

enactment by Congress on each item of authorization. Material is also included on a few trust funds which require congressional action. This part is arranged in chapters reflecting the organization of the Government.

TYPES OF FEDERAL FUNDS

Federal (Government-owned) funds are of four types, as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (revolving) funds are those which

finance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government-owned corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

Other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained at the beginning of part II.

FORM OF DETAILED MATERIAL

For each appropriation, this appendix includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having separate schedules. Where the obligations fall in a single object class, the classification is identified in the program and financing schedule, rather than in a separate schedule.

For revolving funds, there are usually two additional schedules covering (5) revenue, expense, and retained earnings; and (6) financial condition.

The basic schedules usually exclude supplemental estimates which it is expected will be transmitted to Congress later, for 1965 and 1966; these usually are covered by a separate, brief schedule of program and financing, without appropriation language. However, the 1965 column of the basic schedules include (and identify) supplementals required to meet costs of military and civilian pay increases under recently enacted pay legislation.

The 1966 column includes, within the regular schedules,

appropriations for recommended extension or renewal of expiring laws; however, money for new legislation is shown separately. Appropriation language is included for the former, not the latter.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1966 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for separate transmittal. The language of the 1965 appropriation acts is used as a base. The text used in the 1965 appropriation acts is printed in roman type. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit, as in this example:

SALARIES AND EXPENSES

For necessary expenses of the Office of Business Economics, **[\$2,250,000]** \$2,755,000. (5 U.S.C. 591, 596-597; 15 U.S.C. 171, 175; Department of Commerce Appropriation Act, 1965.)

Following the language, and printed in italics within parentheses, are citations to relevant authorizing legislation and to the appropriation act from which the text is taken.

BASIS FOR SCHEDULES

Where the data are available in the accounting system, cost-type budgets are presented. Detailed figures for each activity or object are the value of goods and services consumed in carrying out the program, in the case of operating costs; they are the value of assets acquired, in the case of capital outlay programs.

Total obligations are always shown; activities and objects are reflected on an obligation basis where cost data are not available. Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment.

In the case of a few limitations which are on the basis of accrued expenditures, the detail and the totals are on that basis.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of three parts. In the section for program by activities, costs or obligations are classified by purpose, program, or project for 1964, 1965, and 1966. This classification is individually developed for each appropriation or fund, and is not uniform on a Government-wide basis.

The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year.

Program and Financing (in thousands of dollars)

Identification code 06-15-1500-0-1-506	1964 actual	1965 estimate	1966 estimate
Program by activities:			
1. Preparation of national income and product data.....	881	1,016	1,154
2. Analysis of business trends.....	526	556	543
3. Computation of the balance of payments.....	454	525	682
4. Executive direction.....	259	285	376
Total program costs, funded.....	2,120	2,382	2,755
Change in selected resources ¹	8		
10 Total obligations.....	2,128	2,382	2,755
Financing:			
16 Comparative transfers from other accounts.....	-134		
25 Unobligated balance lapsing.....	23		
New obligational authority.....	2,017	2,382	2,755
New obligational authority:			
40 Appropriation.....	2,000	2,250	2,755
42 Transferred from:			
"Salaries and expenses," Business and Defense Services Administration (64 Stat. 1263).....	17		
"Salaries and expenses," General Administration (64 Stat. 1263).....		31	
43 Appropriation (adjusted).....	2,017	2,281	2,755
44 Proposed supplemental due to civilian pay increases.....		101	

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$25 thousand; 1964, \$33 thousand; 1965, \$33 thousand; 1966, \$33 thousand.

Where cost-type budgets are presented, the relation of costs to obligations is summarized in an entry "Change in selected resources." For appropriation accounts, this entry is supported by a footnote identifying the amounts of the resources involved. For revolving funds, the items are identified on the statement of financial condition and the appended tabulation.

Where programs are financed at a "preobligation" stage (such as the "program plan" for certain Defense items, and "commitments" for some loan programs) an extra three columns provide details on that basis.

The third section of the schedule shows receipts and

other offsets to total obligations shown in the program section, obligated balances at the start and end of the year, and other items which affect the relation of obligations to expenditures.

Relation of obligations to expenditures:				
10	Total obligations.....	2,128	2,382	2,755
70	Receipts and other offsets (items 11-17).....	-134		
71	Obligations affecting expenditures.....	1,994	2,382	2,755
72	Obligated balance, start of year.....	145	188	269
74	Obligated balance, end of year.....	-188	-269	-364
77	Adjustments in expired accounts.....	5		
90	Expenditures excluding pay increase supplemental.....	1,956	2,204	2,656
91	Expenditures from civilian pay increase supplemental.....		97	4

For public enterprise revolving funds, there are two additional lines showing gross expenditures and applicable receipts of the fund.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and gives some measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to a uniform list of objects, as follows:

Object Classification (in thousands of dollars)

Identification code 06-15-1500-0-1-506	1964 actual	1965 estimate	1966 estimate
Personnel compensation:			
11.1 Permanent positions.....	1,693	1,892	2,094
11.3 Positions other than permanent.....	16	18	18
Total personnel compensation.....	1,709	1,910	2,112
12.0 Personnel benefits.....	124	142	157
21.0 Travel and transportation of persons.....	5	7	11
22.0 Transportation of things.....	2		
23.0 Rent, communications, and utilities.....	33	30	44
24.0 Printing and reproduction.....	90	95	100
25.1 Other services.....	34	20	56
25.2 Services of other agencies.....	109	165	251
26.0 Supplies and materials.....	9	10	13
31.0 Equipment.....	13	3	11
99.0 Total obligations.....	2,128	2,382	2,755

The object classes reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

The complete list of object classes is as follows:

10 PERSONAL SERVICES AND BENEFITS	30 ACQUISITION OF CAPITAL ASSETS
11 Personnel compensation	31 Equipment
12 Personnel benefits	32 Lands and structures
13 Benefits for former personnel	33 Investments and loans
20 CONTRACTUAL SERVICES AND SUPPLIES	40 GRANTS AND FIXED CHARGES
21 Travel and transportation of persons	41 Grants, subsidies, and contributions
22 Transportation of things	42 Insurance claims and indemnities
23 Rent, communications, and utilities	43 Interest and dividends
24 Printing and reproduction	44 Refunds
25 Other services	
26 Supplies and materials	

Several of the object classes are broken down into sub-classes—personnel compensation, for example, is shown

separately for permanent positions, for positions other than permanent, and for certain other payments. A third digit is therefore used in the object schedules to identify the subclasses; a zero is used for the third digit when there are no subclasses. Additional entries are shown for unvouchered obligations (those for which accountability is waived; coded 91.0) and those which cannot be distributed by object class (coded 92.0), and for certain other adjusting entries to reach a total which agrees with the total obligations shown in the program and financing schedule.

A personnel summary is appended to the object classification schedule, as illustrated:

Personnel Summary

Total number of permanent positions.....	215	215	234
Full-time equivalent of other positions.....	2	2	2
Average number of all employees.....	205	207	227
Average GS grade.....	8.9	8.9	8.9
Average GS salary.....	\$8,536	\$9,109	\$9,181

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. Other positions include those of a temporary nature (a year or less), part-time jobs (less than a full workweek), and intermittent employment (occasional employees).

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is a statement of revenue and expense, computed on an accrual basis, and the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provision for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each, as here illustrated:

Revenue, Expense, and Retained Earnings (in thousands of dollars)

	1964 actual	1965 estimate	1966 estimate
Chartering program:			
Revenue.....	16	15	15
Expense.....	62	81	84
Net operating loss, chartering program.....	-46	-66	-69
Examination program:			
Revenue.....	3,433	3,886	4,143
Expense.....	3,479	3,892	4,080
Net operating income or loss (-), examination program.....	-46	-6	63
Supervision program:			
Revenue.....	1,038	1,137	1,247
Expense.....	914	1,075	1,068
Net operating income, supervision program.....	124	62	179
Net income or loss (-) for the year.....	32	-10	173
Analysis of retained earnings:			
Retained earnings, start of year.....	1,362	1,394	1,384
Retained earnings, end of year.....	1,394	1,384	1,557

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether as cash, inventories, or other assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is also presented a balance sheet of assets, liabilities, and equity of the Government at the close of the year, as in this example:

Financial Condition (in thousands of dollars)

	1963 actual	1964 actual	1965 estimate	1966 estimate
Assets:				
Treasury balance.....	1,296	1,179	1,170	1,331
Accounts receivable, net.....	571	636	698	760
Selected assets: ¹				
Advances.....	17	18	18	18
Deferred charges.....		5	5	5
Fixed assets, net.....	132	123	129	134
Total assets.....	2,016	1,961	2,020	2,248
Liabilities:				
Current.....	653	566	635	690
Government equity:				
Non-interest-bearing capital:				
Start of year.....	2	1	1	1
Donated property declared surplus.....	-1			
End of year.....	1	1	1	1
Retained earnings.....	1,362	1,394	1,384	1,557
Total Government equity.....	1,363	1,395	1,385	1,558

The balance sheet excludes balances of appropriations and borrowing authorizations which have not yet been paid into the revolving fund. The section on equity of the Government is divided into three subsections as appropriate: (a) interest-bearing capital, (b) non-interest-bearing capital, and (c) retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is normally appended to the balance sheet an "Analysis of Government Equity" which shows obligations other than liabilities, the unobligated balance, unfilled customers' orders on hand (where relevant), and invested capital and earnings, as in the following example:

Analysis of Government Equity (in thousands of dollars)

	1963 actual	1964 actual	1965 estimate	1966 estimate
Unpaid undelivered orders ¹	5	10	5	5
Unobligated balance.....	1,209	1,239	1,228	1,396
Invested capital and earnings.....	149	146	152	157
Total Government equity.....	1,363	1,395	1,385	1,558

¹ The changes in these items are reflected on the program and financing schedule.

LEGISLATIVE BRANCH

SENATE

General and special funds:

COMPENSATION OF THE VICE PRESIDENT AND SENATORS, MILEAGE OF THE PRESIDENT OF THE SENATE AND SENATORS, AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT AND LEADERS OF THE SENATE

COMPENSATION OF THE VICE PRESIDENT AND SENATORS

For compensation of the Vice President and Senators of the United States, **[\$2,471,140]** \$3,285,985. (*Legislative Branch Appropriation Act, 1965.*)

MILEAGE OF PRESIDENT OF THE SENATE AND OF SENATORS

For mileage of the President of the Senate and of Senators, \$58,370. (*Legislative Branch Appropriation Act, 1965.*)

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, AND MAJORITY AND MINORITY LEADERS

For expense allowance of the Vice President, \$10,000; Majority Leader of the Senate, \$2,000; and Minority Leader of the Senate, \$2,000; in all, \$14,000. (*Legislative Branch Appropriation Act, 1965.*)

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For clerical assistance to the Vice President, at rates of compensation to be fixed by him in basic multiples of \$5 per month, **[\$136,710]** \$155,440. (*Legislative Branch Appropriation Act, 1965.*)

CHAPLAIN

Chaplain of the Senate, **[\$9,430]** \$15,000. (*Legislative Branch Appropriation Act, 1965.*)

OFFICE OF THE SECRETARY

For office of the Secretary, **[\$918,400]** \$1,042,005, including **[\$128,000]** \$145,000 required for the purposes specified and authorized by section 74b of title 2, United States Code [: *Provided*, That effective July 1, 1964, the Secretary may employ an assistant at \$2,460 basic per annum, an assistant messenger at \$1,980 basic per annum, an assistant messenger at \$1,740 basic per annum, and an assistant messenger at \$1,500 basic per annum, in lieu of the positions authorized by S. Res. 419, agreed to January 28, 1931, S. Res. 372, agreed to December 18, 1930, S. Res. 340, agreed to December 3, 1930, and S. Res. 204, agreed to June 16, 1938, which resolutions are hereby repealed; and the basic amount available for clerical assistance and readjustment of salaries in the disbursing office is increased by \$720]. (*Legislative Branch Appropriation Act, 1965.*)

COMMITTEE EMPLOYEES

For professional and clerical assistance to standing committees and the Select Committee on Small Business, **[\$2,731,965]** \$3,236,145. (*Legislative Branch Appropriation Act, 1965.*)

CONFERENCE COMMITTEES

For clerical assistance to the Conference of the Majority, at rates of compensation to be fixed by the chairman of said committee, **[\$82,740]** \$95,980. (*Legislative Branch Appropriation Act, 1965.*)

For clerical assistance to the Conference of the Minority, at rates of compensation to be fixed by the chairman of said committee, **[\$82,740]** \$95,980. (*Legislative Branch Appropriation Act, 1965.*)

ADMINISTRATIVE AND CLERICAL ASSISTANTS TO SENATORS

For administrative and clerical assistants and messenger service for Senators, **[\$13,731,170]** \$15,653,785. (*Legislative Branch Appropriation Act, 1965.*)

OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

For office of Sergeant at Arms and Doorkeeper, **[\$2,757,350: *Provided***, That effective July 1, 1964, the Sergeant at Arms may employ a messenger at \$1,800 basic per annum, two messengers at \$1,740 basic per annum each, two laborers at \$1,560 basic per annum each, and eight special employees at \$1,000 basic per annum each, in lieu of the positions authorized by S. Res. 428, agreed to February 17, 1931, S. Res. 62, agreed to December 15, 1931, S. Res. 83, agreed to December 17, 1931, S. Res. 453, agreed to February 26, 1931, S. Res. 44, agreed to April 11, 1933, and S. Res. 212, agreed to February 15, 1954, which resolutions are hereby repealed: *Provided further*, That effective July 1, 1964, the Sergeant at Arms may also employ one additional addressograph operator at \$2,160 basic per annum] **\$3,021,320.** (*Legislative Branch Appropriation Act, 1965.*)

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND THE MINORITY

For the offices of the Secretary for the Majority and the Secretary for the Minority, **[\$135,195]** \$157,520. (*Legislative Branch Appropriation Act, 1965.*)

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For four clerical assistants, two for the Majority Whip and two for the Minority Whip, at rates of compensation to be fixed in basic multiples of \$60 per annum by the respective Whips, **[\$15,165]** \$17,815 each; in all, **[\$30,330]** \$35,630. (*Legislative Branch Appropriation Act, 1965.*)

OFFICIAL REPORTERS OF DEBATES

For office of the Official Reporters of Debates, **[\$240,760]** \$285,005. (*Legislative Branch Appropriation Act, 1965.*)

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses of the Office of the Legislative Counsel of the Senate, **[\$252,530]** \$300,900. (*Legislative Branch Appropriation Act, 1965.*)

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, **[\$175,585]** \$197,525 for each such committee; in all, **[\$351,170]** \$395,050. (*Legislative Branch Appropriation Act, 1965.*)

SENATE—Continued

General and special funds—Continued

CONTINGENT EXPENSES OF THE SENATE—Continued

AUTOMOBILES AND MAINTENANCE

For purchase, exchange, driving, maintenance, and operation of four automobiles, one for the Vice President, one for the President Pro Tempore, one for the Majority Leader, and one for the Minority Leader, **[\$39,840]** \$42,540. (*Legislative Branch Appropriation Act, 1965.*)

FURNITURE

For service and materials in cleaning and repairing furniture, and for the purchase of furniture, \$31,190: *Provided*, That the furniture purchased is not available from other agencies of the Government. (*Legislative Branch Appropriation Act, 1965.*)

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, including **[\$380,000]** \$392,000 for the Committee on Appropriations, to be available also for the purposes mentioned in Senate Resolution Numbered 193, agreed to October 14, 1943, **[\$4,275,760]** \$4,777,390. (*Legislative Branch Appropriation Act, 1965.*)

FOLDING DOCUMENTS

For the employment of personnel for folding speeches and pamphlets at a gross rate of not exceeding **[\$2.03]** \$2.17 per hour per person, **[\$36,700]** \$39,300. (*Legislative Branch Appropriation Act, 1965.*)

MAIL TRANSPORTATION

For maintaining, exchanging, and equipping motor vehicles for carrying the mails and for official use of the offices of the Secretary and Sergeant at Arms, \$16,560. (*Legislative Branch Appropriation Act, 1965.*)

MISCELLANEOUS ITEMS

For miscellaneous items, exclusive of labor, **[\$2,660,790]** \$2,779,015, including **[\$85,000]** \$121,000 for payment to the Architect of the Capitol in accordance with section 4 of Public Law 87-82, approved July 6, 1961. (*Legislative Branch Appropriation Act, 1965.*)

POSTAGE STAMPS

For postage stamps for the Offices of the Secretaries for the Majority and Minority, \$140; and for airmail and special-delivery stamps for Office of the Secretary, \$160; Office of the Sergeant at Arms, \$125; Senators and the President of the Senate, as authorized by law, \$61,610; in all, \$62,035. (*Legislative Branch Appropriation Act, 1965.*)

STATIONERY (REVOLVING FUND)

For stationery for Senators and the President of the Senate, \$242,400; and for stationery for committees and officers of the Senate, \$13,200; in all, \$255,600, to remain available until expended. (*Legislative Branch Appropriation Act, 1965.*)

COMMUNICATIONS

For an amount for communications which may be expended interchangeably for payment, in accordance with such limitations and restrictions as may be prescribed by the Committee on Rules and Administration, of charges on official telegrams and long-distance telephone calls made by or on behalf of Senators or the President of the Senate, such telephone calls to be in addition to those authorized

by the provisions of the Legislative Branch Appropriation Act, 1947 (60 Stat. 392; 2 U.S.C. 46c, 46d, 46e), as amended, and the First Deficiency Appropriation Act, 1949 (63 Stat. 77; 2 U.S.C. 46d-1), \$15,150. (*Legislative Branch Appropriation Act, 1965.*)

[ADMINISTRATIVE PROVISION]

[The table contained in section 4(f) of the Federal Employees' Salary Increase Act of 1955 (Public Law 94, Eighty-fourth Congress, approved June 28, 1955), as amended, is amended to read as follows:]

【Contingent Expenses】

【For an additional amount for "Miscellaneous items", \$92,000, for payment to the Architect of the Capitol in accordance with section 208 of the Act approved October 9, 1940 (Public Law 812).】 (*Supplemental Appropriation Act, 1965.*)

【House of Representatives】

【For payment to Corinne C. Bennett, widow of John B. Bennett, late a Representative from the State of Michigan, \$22,500.】

For payment to Elizabeth B. Norblad, widow of Walter Norblad, late a Representative from the State of Oregon, \$22,500. (*Supplemental Appropriation Act, 1965.*)

For other joint items, as follows:

CAPITOL POLICE

GENERAL EXPENSES

For purchasing and supplying uniforms; the purchase, maintenance, and repair of police motor vehicles, including two-way police radio equipment; contingent expenses, including \$25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House, as may be designated by the Chairman of the Board; \$36,700 \$50,000. (*Legislative Branch Appropriation Act, 1965.*)

CAPITOL POLICE BOARD

To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, \$330,600 \$604,600. Such sum shall be expended only for payment of salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and are authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and shall be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioners of the District of Columbia are directed to pay the detective captain detailed under the authority of this paragraph his salary as a detective captain plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent and that the Commissioners of the District of Columbia are directed to pay the uniformed lieutenant detailed under the authority of this paragraph and serving as acting captain a salary of the rank of captain and such increases in basic compensation as may be subsequently provided by law and that the Commissioners of the District of Columbia are directed to pay the acting deputy chief of police detailed under the authority of this paragraph the salary of the rank of deputy chief of police plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent.

No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol buildings for police duty on the Capitol Grounds. (*Legislative Branch Appropriation Act, 1965.*)

EDUCATION OF PAGES

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, \$79,925 \$85,712, which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1965.*)

PENALTY MAIL COSTS

For expenses necessary under section 2 of Public Law 286, Eighty-third Congress, \$4,723,000 \$6,037,000, to be available immediately.

The foregoing amounts under "other joint items" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1965.*)

STATEMENTS OF APPROPRIATIONS

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives, of the statements for the second first session of the Eighty-eighth Eighty-ninth Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, \$13,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (*Legislative Branch Appropriation Act, 1965.*)

ARCHITECT OF THE CAPITOL

General and special funds:

OFFICE OF THE ARCHITECT OF THE CAPITOL

SALARIES

For the Architect of the Capitol, Assistant Architect of the Capitol, and Second Assistant Architect of the Capitol, at salary rates of \$20,700, \$19,000, and \$17,500 per annum, respectively, and other personal services at rates of pay provided by law, \$507,800: *Provided*, That wherever H.R. 11049, 88th Congress, as enacted into law establishes a specific rate of compensation for any position different from the rate specifically enumerated in this Act for such position, the rate in said H.R. 11049 shall prevail \$600,400. (31 U.S.C. 689; 40 U.S.C. 161, 162, 164a, 78 Stat. 415, 40 U.S.C. 166b-3; *Legislative Branch Appropriation Act, 1965.*)

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The Library's collections are developed in accordance with established acquisition policies: materials are procured by purchase, gift, exchange, copyright deposit, transfer and official deposit; and materials are selected for addition to the permanent collections. The objective for 1966 is: intensification of acquisitions activities and continued improvement in acquisitions procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 43,527 thousand items as of June 30, 1964, and consisted of 13,139 thousand books and pamphlets; 18,971 thousand manuscript pieces and 11,416 thousand maps, pieces of music, reels of microfilm, photographs and other miscellaneous items. Of the items received, about one million are added to the permanent collections annually. Those received from various sources in 1964 and estimated for 1965 and 1966 are as follows (in thousands):

Description	1964 actual	1965 estimate	1966 estimate
Purchase.....	787	832	925
Deposit by virtue of law:			
Copyright.....	449	455	460
Other.....	675	700	920
Transfer from Federal agencies.....	2,351	2,500	2,600
Official donation from State and local agencies.....	130	132	135
Exchange.....	597	620	680
Gift from individual and unofficial sources.....	1,161	1,200	1,200
Public Law 480 foreign currency activities.....	55	65	85
Total.....	6,205	6,504	6,805

2. *Organization of the collections.*—Library materials are cataloged, classified, marked and arranged; Library of Congress catalogs and the main National Union Catalog

(card catalogs) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1966 are the cataloging on a current basis of all important materials received during the year, the reduction of cataloging arrearages, and improved cataloging methods and procedures to assure the usefulness of the collections.

Selected performance data for 1964 and estimated for 1965 and 1966 (not including processing activities performed by the Reference Department and the Law Library) are as follows (in thousands):

Description	1964 actual	1965 estimate	1966 estimate
Volumes fully cataloged and added to the classified collections.....	178	200	225
Items otherwise organized for use (without full cataloging).....	22	20	20
Cards filed in catalogs.....	1,768	1,900	2,100
Volumes bound.....	88	112	112
Items repaired, cleaned, mounted, etc.....	199	215	250
Cards received by the National Union Catalog.....	1,765	1,900	2,000
Serial parts processed.....	1,866	1,900	2,000

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objective of this activity for 1966 is to organize more material for use and to improve reference and circulation services. The workload in all major activities is expected to increase in 1965 and 1966 as follows (in thousands):

Description	1964 actual	1965 estimate	1966 estimate
Reader and reference services:			
Materials served.....	1,938	2,000	2,100
Units issued on loan.....	219	225	230

4. *Maintenance and protective services.*—A staff of 199, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The Guard Force staff of 75 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counter-

balanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and costs for 1964 and estimates for 1965 and 1966 are as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Income:			
Fees applied.....	1,134	1,190	1,250
Estimated value of materials deposited and transferred to the Library of Congress.....	854	897	942
Total income.....	1,988	2,087	2,192
Costs:			
Salaries.....	1,585	1,712	1,812
Other costs.....	193	202	209
Total costs.....	1,778	1,914	2,021

The program and performance under each of the activities described are predicated on an estimated 308 thousand copyright registrations during 1966, an estimated 293 thousand during 1965, and an actual 279 thousand during 1964.

1. *Receiving and accounting for applications, etc.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1964 and estimates for 1965 and 1966 are as follows (in thousands):

	1964 actual	1965 estimate	1966 estimate
Registrations.....	279	293	308
Mail received and dispatched.....	604	634	666

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows (in thousands):

	1964 actual	1965 estimate	1966 estimate
Cases and documents examined.....	309	325	341
Registrations and recordation of documents.....	294	308	324
Letters written.....	40	42	44

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 279 thousand registrations cataloged in 1964 and estimates for 1965 and 1966 are 293 thousand and 308 thousand respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows (in thousands):

	1964 actual	1965 estimate	1966 estimate
Titles searched.....	86	91	95
Letters and search reports written.....	23	24	25

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

General and special funds—Continued

COPYRIGHT OFFICE—Continued

SALARIES AND EXPENSES—continued

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in foreign as well as domestic aspects. The Copyright Office has submitted a bill for the complete revision of the U.S. Copyright Law. The enactment of the new law will be a major goal of the Copyright Office for 1966.

1. *Research and analysis.*—The Legislative Reference Service assists Members and committees of Congress by preparing research reports, digests, translations, charts, and consultative services, and by supplying reference information and materials. The bulk of these services are furnished through seven subject-matter divisions: American Law, Economics, Education and Public Welfare, Foreign Affairs, Government and General Research, Natural Resources and Science Policy Research. Under specific authorization of the Legislative Reorganization Act of 1946, senior specialists are also available for high-level research and consultative services in the following fields: International economics, international relations, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, and science and technology. In 1964, 97,000 congressional inquiries were answered. The number of inquiries in 1965 is estimated at 100,000; and in 1966, 105,000.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covers all public bills and resolutions. It is expected that there will be about the same number of bills to be digested during the first session of the Eighty-ninth Congress as were digested for the first session of the Eighty-eighth Congress.

3. *Reference files, bibliographies and congressional reader services.*—Reference files, containing clippings, pamphlets and documents, are maintained as the basis for reply to a high percentage of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the Congressional Reading Room. During 1964, 115,000 reference file items were processed, 16,000 bibliographic citations prepared, 161,010 published items acquired and processed, and 4,000 readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 123,000 thousand catalog cards representing approxi-

mately 4,100 thousand titles, and fills orders from over 15 thousand regular subscribers—mostly libraries—in the United States and abroad. In 1964, 121% of this appropriation was recovered in the form of receipts from card and publication sales. Receipts of \$3,680 thousand were deposited in miscellaneous receipts of the Treasury in 1964. The objectives for 1966 are: meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; and the continued development of the *National Union Catalog* as the country's major bibliographic and locational tool.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in fiscal 1964 was 5,990 thousand; estimated for 1965, 6,100 thousand; and estimated for 1966, 6,700 thousand.

2. *Supplying cards for other libraries.*—The number of cards sold in 1964 was 52,506 thousand, estimated for 1965, 56,000 thousand and estimated for 1966, 60,000 thousand.

3. *Preparation, printing and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings; Rules for Descriptive Cataloging; Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a six-month basis and annual cumulation). There were 1,323 paid subscriptions for all issues in calendar year 1963 and it is estimated that there will be 1,400 subscriptions for 1964 and 1,500 for 1965. Included under this activity is the National Library of Medicine Catalog.

5. *Preparation, printing and distribution of the Subject Catalog.*—This catalog is issued in 3 quarterly volumes with an annual cumulation. There were 526 paid subscriptions for calendar year 1963. It is estimated that there will be 580 paid subscriptions in 1964 and about 620 in 1965.

This appropriation is used to acquire domestic and foreign trade publications, both current and non-current. The publications acquired by purchase constitute a very important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1966 are: to continue the program for procurement of important research materials to strengthen the Library's collections; to continue the acquisition of selected important foreign newspapers and periodicals; to continue the program for procurement of important materials from critical areas, particularly from Eastern Europe, Africa, and Asia; to continue to strengthen the Library's acquisitions in the fields of science and technology; to continue the purchase of selected current titles on microfilm as an economy measure in lieu of binding; to acquire a few important special collections long needed by the Library to fill gaps in the collections; to preserve important materials now on nitrate negative stills by converting them to a safety base film; and to continue the microfilming of deteriorating materials as a necessary preservative and space saving measure.

90 Expenditures	103	125	125

This appropriation constitutes the only means of acquiring law books published in the regular domestic trade (except for copyright deposits) and many foreign law books published in countries all over the world. The legal publications acquired by purchase constitute a most important part of the Law Library's acquisitions, although a substantial part of the annual receipts is received by means other than purchase. The special objectives for 1966 are: to continue the procurement of current foreign legal materials by placing purchase orders for certain necessary publications now received only irregularly through exchange or gift; to improve the procurement of more readily available important Hispanic, African, and Far Eastern materials; to continue the procurement of both current and noncurrent materials needed to strengthen the Law Library's already comprehensive coverage of critical areas in Eastern Europe, Asia, and Africa; to continue the acquisition of photoduplicates of important research items, especially those from critical areas, which are no longer obtainable in the original; and to continue a program for the microfilming or acquiring of microreproduction of deteriorating legal materials as a necessary preservative and space saving measure.

The Division for the Blind is responsible for administering a national program to provide reading material for the blind of the United States, U.S. Territories and Insular Possessions. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 32 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 54 State agencies. The maintenance and procurement of these books are shown in the following table:

Description	1964 actual	1965 estimate	1966 estimate

Talking-book machines:			
Purchased.....	11,500	10,000	10,000
Repaired.....	15,000	15,000	20,000
Salvaged-scrapped.....	10,000	5,000	5,000

Objectives for 1966 are: (1) the sustained procurement of braille books and talking books, (2) procurement of a sufficient number of machines to equip newly registered blind readers and to replace additional obsolete machines, (3) replacement of a quantity of two-speed motors with three-speed motors in talking-book machines, and (4) the procurement of a limited quantity of tape-cassette machines with books to play on them.

2. *Cataloging, reference, circulating and training services.*—Catalogs of talking and braille books are prepared and maintained, including a *Union Catalog of Hand Copied Books in Braille* which brings together a record of

holdings of all libraries for the blind. The Division also maintains a unique collection (more than 30,000 volumes) of books in braille not available elsewhere for loan in the United States. During the past 5-year period, 1960-64, the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 63,000 to 94,000 and circulation from 1,953,000 units (volumes, containers, and reels) to 3,446,000. The number of readers and circulation are expected to continue to increase in 1965 and 1966. Inquiries are received concerning library and related services available to the blind. Individuals throughout the Nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During fiscal 1964, 678 individuals were certified, and it is anticipated that this level will continue during 1965 and 1966.

ORGANIZING AND MICROFILMING THE PAPERS OF THE
PRESIDENTS—Continued

SALARIES AND EXPENSES—continued

Public Law 85-147 (71 Stat. 368), approved August 16, 1957, authorizes an appropriation of \$720 thousand to remain available until expended, to arrange, index, and microfilm the Papers of the Presidents of the United States in the collections of the Library of Congress. This Law was amended by Public Law 88-299 (78 Stat. 183), approved April 27, 1964, which removes the \$720 thousand limitation and authorizes to be appropriated such amounts as may be necessary to carry out the provisions of Public Law 85-147. The purpose of the program is to preserve the contents of the Papers of the Presidents and to make them more readily available for research. It was started in fiscal year 1959 with an appropriation of \$107 thousand. The objectives for 1966 will be to provide negative and positive service copy on microfilm of material arranged and indexed, and to continue publishing indexes by photo-offset in editions of 1,000 copies each.

PRESERVATION OF MOTION PICTURES

For expenses necessary for the [conversion] preservation of motion pictures now in the custody of the Library [from nitrate film to safety base film], \$50,000. (2 U.S.C. 131; Legislative Branch Appropriation Act, 1965.)

Program and Financing (in thousands of dollars)

90 Expenditures.....	54	77	50

The objective of this program is to preserve on a priority basis the dangerous and rapidly deteriorating nitrate portion of the Library's valuable collection of motion pictures important to film history. With the \$50 thousand appropriated in 1964, some 500,000 feet of 35-mm film were converted to safety base film.

The \$50 thousand appropriated for 1965 will allow for testing of deterioration rates of nitrate film by a new method, and preservation of an additional 500,000 feet of 35-mm film. The program can be continued at the same level with the \$50 thousand requested for 1966.

Section 104(n) of the Agricultural Trade Development and Assistance Act of 1954 (established by Public Law 85-931, approved September 6, 1958) authorizes the Librarian of Congress to use foreign currencies accruing under this act to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United States. The program is being continued on a full year's basis in six countries in 1965: Burma, India, Indonesia, Israel, Pakistan, and the United Arab Republic. It is proposed to continue the program in 1966 on a slightly expanded basis in these countries. Also the initiation of a similar program in Brazil and of 6-month pilot programs in Poland and Yugoslavia is proposed. Of the total amount requested, \$2,102 thousand will be used to purchase foreign currencies, while \$177 thousand will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Based upon the information received during the exploratory stage concerning materials available in the three additional countries and the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies from nine countries and distributed to selected libraries and research centers in the United States, including the Library of Congress.

2. *Bibliographic listing.*—Accessions lists currently published covering materials acquired in India, Pakistan, Israel, and the United Arab Republic will be continued and distributed to libraries and research centers in the United States to inform scholars of the range of books, serials, and other library materials available under this program. It is also proposed to publish an accessions list in Indonesia. Cataloging information will also be provided.

3. *Operation of centers.*—Centers staffed with foreign nationals and a limited number of U.S. personnel will handle acquisition, listing, and cataloging.

4. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries and personnel benefits of U.S. personnel abroad, salaries of the coordinating staff at the Library of Congress, travel in some instances, and equipment and supplies which cannot be procured abroad.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (*Legislative Branch Appropriation Act, 1965.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation as follows:
State, "Mutual Educational and Cultural Exchange Activities."
Health, Education, and Welfare, "Operations, National Library of Medicine, Public Health Service."
National Science Foundation, "Salaries and expenses."

The Oliver Wendell Holmes Devise Fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (2) to finance an annual lecture or series of lectures, and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court; annual lectures are also financed by this fund.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders 1963, \$25 thousand; 1964, \$49 thousand; 1965, \$29 thousand; 1966, \$29 thousand

The work programs of the office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sales price is set at cost of manufacture plus 50 percent. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For 1964, earnings from the sale of publications amounted to \$6,703 thousand. It is estimated that earnings for 1965 will be \$6,800 thousand and \$6,900 thousand for 1966. These earnings more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the last 10 years the sales volume has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of sales.

² This is the amount of the annual appropriation required to operate the sales program.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services for Farmers' Bulletins, Soil Surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, one copy of every Government publication is supplied to libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of the United States Government Publications and the Numerical List and Schedule of Volumes.

5. *Contingency fund.*—This fund to be used only with the approval of the Public Printer, and only to the extent necessary to provide for expenses (excluding permanent personal services) for workload increases not anticipated in the budget estimates and which cannot be provided for by normal budgetary adjustments.

¹ Balances of selected resources are identified on the statement of financial condition.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (78 Stat. 549).

All work for Government agencies is done on a reimbursable basis and financed through the Government Printing Office revolving fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid therefrom. All profits accruing from these transactions are transferred to the Treasury general fund (44 U.S.C. 63).

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in House Resolutions 393, 646, and 647 of the Eighty-eight Congress shall be the permanent law with respect thereto: *Provided further*, That the provisions of House Resolutions [291, 531, 532, and 533] of the Eighty-eight Congress shall be the permanent law with respect thereto.

SEC. 104. (a) The rate of basic compensation of sergeants of the Capitol Police shall be \$2,520 per annum, and the rate of basic compensation of lieutenants and special officers of the Capitol Police shall be \$2,820 per annum.

(b) The second sentence of section 106(d) of the Legislative Branch Appropriation Act, 1963, is repealed.

(c) Any member of the Capitol Police who by reason of the provision repealed by subsection (b) was receiving immediately prior to the effective date of this section, longevity compensation provided by section 105 of the Legislative Branch Appropriation Act, 1959, shall, on and after such effective date, receive in lieu thereof a longevity increase under section 106(b) of the Legislative Branch Appropriation Act, 1963, in addition to any other such increases (not to exceed three) to which he may otherwise be entitled under such section. In computing the length of service of such member for the purpose of such other increases, only service performed subsequent to the date on which he began receiving longevity compensation in accordance with such section 105 shall be counted.

(d) This section shall become effective on the first day of the month following the date of enactment of this Act.

【Sec. 105. (a) Commencing with the semiannual period beginning on July 1, 1964, and ending on December 31, 1964, and for each semiannual period thereafter, the Secretary of the Senate and the Clerk of the House of Representatives shall compile, and, not later than sixty days following the close of the semiannual period, submit to the Senate and House of Representatives, respectively, and make available to the public, in lieu of the reports and information required by sections 60 to 63, inclusive, of the Revised Statutes, as amended (2 U.S.C. 102, 103, 104), and S. Res. 139, Eighty-sixth Congress, a report containing a detailed statement, by items, of the manner in which appropriations and other funds available for disbursement by the Secretary of the Senate or the Clerk of the House of Representatives, as the case may be, have been expended during the semiannual period covered by the report, including (1) the name of every person to whom any part of such appropriation has been paid, (2) if for anything furnished, the quantity and price thereof, (3) if for services rendered, the nature of the services, the time employed, and the name, title, and specific amount paid to each person, and (4) a complete statement of all amounts appropriated, received, or expended, and any unexpended balances. Such reports shall include the information contained in statements of accountability and supporting vouchers submitted to the General Accounting Office pursuant to the provisions of section 117(a) of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 67(a)). Reports required to be submitted to the Senate and the House of Representatives under this section shall be printed as Senate and House documents, respectively.】

【Section 117 of the Accounting and Auditing Act of 1950 (64 Stat. 837, 31 U.S.C. 67) is amended as follows:】

【By adding after the words "executive agency" in both places where it is used in subsection (b) the words "or the Architect of the Capitol" and by adding after the word "legislative" in the proviso the words "(other than the Architect of the Capitol)".】

【By adding at the end thereof the following new subsection:】

【“(c) The Comptroller General in auditing the financial transactions of the Architect of the Capitol shall make such audits at such times as he may deem appropriate. For the purpose of conducting such audits, the provisions of section 313 of the Budget and Accounting Act (42 Stat. 26; 31 U.S.C. 54) shall be applicable to the Architect of the Capitol. The Comptroller General shall report to the President of the Senate and to the Speaker of the House of Representatives the results of each such audit. All such reports shall be printed as Senate documents.”】

【(b) Commencing with the semiannual period beginning January 1, 1965 and for each semiannual period thereafter, the Architect of the Capitol shall compile and, not later than sixty days following the close of the semiannual period, submit to the Senate and the House of Representatives a report of all expenditures made from monies appropriated to the Architect of the Capitol, based on payrolls and other vouchers transmitted during such period to the Treasury Department for disbursement, such report to include (1) the name, title, and gross salary payment to each employee; (2) a list of government contributions to retirement, health, insurance, and other similar funds; and (3) name of payee, brief description of service rendered or items furnished under contract, purchase order or other agreement. Such report shall be printed as a Senate document.】 (*Legislative Branch Appropriation Act, 1965.*)

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

This item is not subject to the approval of the Judicial Conference.

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The Court of Claims has jurisdiction over all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for

damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by the Congress.

The primary and appellate jurisdiction of the courts of the United States are vested in the 92 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts including the Federal Probation System, is under this heading.

The estimate for 1966 contemplates the appointment of 300 additional employees: 90 officers and 68 clerk-stenographers for the probation system; 25 deputy clerks for the district courts; and 15 deputy clerks, 33 law clerks, 33 stenographers, and 36 messengers for the courts of appeals. Provision also has been made for within-grade salary advancements.

FEES OF JURORS AND COMMISSIONERS

For fees, expenses, and costs of jurors; compensation of jury commissioners; fees of United States commissioners and other committing magistrates acting under title 18, United States Code, section 3041; and compensation of voting referees fixed by the court pursuant to the provisions of the Civil Rights Act of 1960 (74 Stat. 86); **[\$5,500,000]** \$6,500,000. (5 U.S.C. 2252(g); 11 U.S.C. 203(b); 28 U.S.C. 604, 631, 633, 636, 1864, 1865, 1871; 42 U.S.C. 1971(e); 73 Stat. 147; 78 Stat. 737; 11 D.C.C. 1401; Judiciary Appropriation Act, 1965.)

77 Adjustments in expired accounts.....	9		
90 Expenditures.....	5,473	5,500	6,445

This appropriation provides for the statutory fees and allowances of jurors, fees of jury commissioners, fees and related benefits of U.S. commissioners who serve primarily as committing magistrates, and compensation of voting referees appointed pursuant to the provision of the Civil Rights Act of 1960.

The earnings of commissioners are directly related to the volume of cases presented by law-enforcement officials. The amount of service and the compensation of jurors depends largely on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts. The estimate for 1966 contemplates a greater demand for jury trials by court-appointed counsel in criminal cases.

Funds appropriated under this heading are for expenses of travel and subsistence incurred by judges and supporting personnel in attending sessions of court or transacting other official business; and for equipment, lawbooks, supplies, and other incidental expenses of operating the 11 courts of appeals and 92 district courts of the United States.

The estimate for 1966 will provide for expenses relating to requests for additional personnel under the heading, Salaries of supporting personnel, conversion from commercial-private telephone lines to switchboards operated by the General Services Administration and the rental of additional photocopying machines for clerks' offices. Provision also has been made for increases in the volume and cost of printing of opinions and for additional continuation material required to maintain court libraries. Funds heretofore allotted for transcripts on appeal in forma pauperis in criminal cases are being transferred to the appropriation for Fees and expenses of court-appointed counsel.

The office, pursuant to section 604 of title 28, United States Code, under the supervision and direction of the Judicial Conference of the United States, is responsible for the administration of the U.S. courts, including the probation and bankruptcy systems. The principal functions consist of providing staffs and services for the courts; conducting a continuous study of the rules of practice and procedure in the Federal courts; examining the state of the dockets of the various courts; compiling and publishing statistical data concerning the business transacted by the courts; and administering the Judicial Survivors Annuity System under title 28, United States Code, section 376. The office also is responsible for the preparation and submission of the annual budget estimates as well as supplemental and deficiency estimates; the disbursement of and accounting for moneys appropriated for the operation of the courts; the audit and examination of accounts; the purchase and distribution of supplies and equipment; and for securing adequate space for occupancy by the courts and for such other matters as may be assigned by the Supreme Court and the Judicial Conference of the United States.

The estimate for 1966 includes the sum of \$460 thousand for administering the Criminal Justice Act of 1964. Provision also has been made for additional personnel required to administer the judiciary salary plan and for more extensive analytical statistical work in the civil field and in the field of sentencing and probation.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and benefits are paid from this appropriation, which is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. No appropriation from the general fund of the Treasury is required.

Office and other expenses of referees, including compensation and benefits of clerical employees, are payable upon authorization of the Director of the Administrative Office of the U.S. Courts. Caseload data appear under the account for salaries of referees. This appropriation is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. No appropriation from the general fund of the Treasury is required.

The estimate for 1966 includes funds for the employment of additional clerks, and for furniture, equipment, and other expenses relating to the appointment of additional referees and the conversion of part-time referees to a full-time status as requested under the heading Salaries of referees. Provisions also have been made for within-grade salary advancements, an increase in postage and fees and the rental of additional copying machines.

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of financial management.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appro-

priations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (a) commerce and finance, (b) international, (c) labor and welfare, (d) military, and (e) resources and civil works.

The National Council on the Arts was established by Public Law 88-579 approved Sept. 3, 1964. Its responsibilities are to: recommend ways to maintain and increase the cultural resources of the United States, and to encourage private initiative in the arts. It will advise and consult with local, State, and Federal departments and agencies and study and recommend methods to encourage and promote creativity, higher standards, and increased opportunities in the arts.

OFFICE OF EMERGENCY PLANNING

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the Office of Emergency Planning, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); reimbursement of the General Services Administration for security guard services; expenses of attendance of cooperating officials and individuals at meetings concerned with the work of the Office; **[\$4,600,000] \$4,989,000: Provided, That not to exceed [\$400,000] \$1,000,000** of the foregoing amount shall remain available until expended for studies and research to develop measures and plans for emergency preparedness [and telecommunications]. (*Independent Offices Appropriation Act, 1965.*)

Note.—Includes \$1,000 thousand for activities previously carried under "Research and development," Office of Emergency Planning. Estimate of \$1,531 thousand for activities previously carried under this title has been transferred in the estimates to "Salaries and expenses, Telecommunications," in 1966. The amounts obligated in 1964 and 1965 are shown in the schedules as comparative transfers.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$469 thousand (1964 adjustments, -\$90 thousand); 1964, \$178 thousand; 1965, \$178 thousand; 1966, \$178 thousand.

The Office of Emergency Planning serves as a staff office to advise and assist the President with respect to the nonmilitary defense programs of the United States.

This includes the coordination of emergency preparedness activities of Federal agencies, the development of emergency preparedness programs not covered by the responsibilities of the regular departments and agencies, and the performance of other duties in the areas of stockpiling, Federal disaster relief, and imports affecting the national security.

1. *Emergency preparedness.*—This activity finances the development of emergency preparedness plans and programs at all levels of government. Plans and programs are developed to assure the continued operation and control of governmental authority and to mobilize the country's economic resources under emergency conditions.

(a) *Economic readiness.*—Plans and programs are developed to improve the ability of the U.S. economy to perform under emergency conditions—from international crisis to nuclear war. These include supply-requirement studies, stockpiling policies, standby controls, dispersal policies, investigations of imports affecting the national security, and developing Governmentwide plans for the mobilization and management of resources in an emergency.

(b) *Government readiness.*—Plans and programs are developed to reduce the vulnerability of all levels of government to enemy attack and to insure the continued functioning of governmental leadership and control in an emergency. These include achieving a standby capability for emergency operations on the part of existing Government agencies; relocating essential governmental functions in an emergency; and the recruitment and training of qualified executive reservists who would be called to duty in an emergency.

(c) *Regional, State, and local readiness.*—Eight regional offices of the Office of Emergency Planning work with State and local governments on emergency preparedness planning. They also coordinate Federal assistance in natural disasters and assist the Federal offices in the field in developing a capability to perform their functions in an emergency.

(d) *Policy, research and review.*—Basic plans and policies for the overall emergency preparedness program are developed, including the National Plan for Emergency Preparedness. Research in the emergency preparedness field is coordinated and direction is provided to the National Resource Evaluation Center. Office of Emergency Planning research contracts are administered. National preparedness objectives are developed and progress measured against these objectives.

2. *Administration and executive direction.*—The necessary staff support is provided to the Director of the Office of Emergency Planning and other Office of Emergency Planning offices under this activity. Services include general administration, public information and liaison, and legal assistance. Funds are also included to finance the housekeeping expenses of the Office of Emergency Planning in Washington. This activity also includes the salaries of the Director of the Office of Emergency Planning, the deputy director, two assistant directors and their immediate staff. The Director is a principal adviser to the President on nonmilitary defense. He serves as a member of the National Security Council and participates in meetings of the Cabinet by invitation of the President.

3. *Research and development.*—This activity finances technical studies of emergency preparedness problems which cut across the functional responsibilities of other Federal agencies. Contracts are made with universities and private organizations when it is not feasible or economical to hire a permanent Office of Emergency Planning staff.

SALARIES AND EXPENSES, TELECOMMUNICATIONS

For expenses necessary for the conduct of telecommunications functions assigned to the Director of Telecommunications Management, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but at rates for individuals not to exceed \$100 per diem, \$1,531,000: Provided, That not to exceed \$360,000 of the foregoing amount shall remain available until expended for telecommunications studies and research.

Note.—These functions were previously carried under "Salaries and expenses, Office of Emergency Planning." The amounts obligated in 1964 and 1965 are shown in the schedules as comparative transfers.

90 Expenditures.....			1,350

The Director of Telecommunications Management, who is also Special Assistant to the President for telecommunications and an assistant director of the Office of Emergency Planning, is responsible for advising and assisting the President on all communications matters.

1. *Telecommunications management.*—This activity includes: (1) providing policy direction for the development and operation of the National Communication System; (2) developing overall policies for the mobilization of the Nation's telecommunications in a national emergency; (3) assigning frequencies to Federal Government radio stations and developing procedures and rules for their use; (4) reviewing the actual usage of Government frequencies; (5) developing data on Federal Government frequency requirements; (6) providing assistance and advice to the Department of State on international telecommunications matters; (7) assisting the President with respect to his coordinating and other functions under the Communications Satellite Act of 1962; and (8) promoting efficiency and economy in the procurement and management of communication services throughout the Federal Government.

2. *Research and development.*—This activity finances technical studies of telecommunications matters which are too broad in scope to be undertaken by any single department. Examples of such studies include methods of interconnecting the communications systems of individual agencies and means of increasing the survivability of telecommunications resources.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$0; 1964, \$730 thousand; 1965, \$730 thousand; 1966, \$0.

These funds assist State governments in developing programs for the management of their resources in time of emergency in the national interest as well as their own. Each State also contributes funds and personnel to the program, and Federal departments and agencies with emergency resource responsibilities actively participate. No new funds are requested in 1966 since it is expected that each State will have developed an adequate degree of readiness with funds previously appropriated.

CIVIL DEFENSE AND DEFENSE MOBILIZATION FUNCTIONS OF FEDERAL AGENCIES

For expenses necessary to assist other Federal agencies to perform civil defense and defense mobilization functions, including payments by the Department of Labor to State employment security agencies for the full cost of administration of defense manpower mobilization activities, **[\$4,190,000] \$5,200,000.** (*Independent Offices Appropriation Act, 1965.*)

Through a series of Executive orders the following agencies have been requested to prepare national emergency plans and develop preparedness programs under the general guidance and review of the Office of Emergency Planning, the President's principal staff agency for the nonmilitary defense program.

1. *Agriculture.*—The Department is responsible for mobilization and management of national food resources in an emergency. The 1966 program will concentrate on achieving readiness at the State and local level.

2. *Commerce.*—The Department develops long-range emergency preparedness programs for all forms of transportation. It is also responsible for mobilization of production facilities in the event of emergency. Census data is developed for the use of the National Resource Evaluation Center.

3. *Health, Education, and Welfare.*—Responsibilities have been assigned to this Department to improve the Nation's civil defense readiness in areas of emergency health and welfare. Food and Drug personnel are trained in radiological, biological and chemical warfare. Measures are developed to insure safety of drugs in an emergency. Emergency welfare programs are developed and disseminated to State and local welfare agencies.

4. *Interior.*—The Department is responsible for preparedness programs covering electric power, petroleum and gas, solid fuels and minerals. These programs are carried on with the cooperation of private industry.

5. *Labor.*—The Department is responsible for insuring the availability of an adequate labor force to meet mobilization and civil defense requirements. A capability is also maintained for emergency wage and salary stabilization.

6. *Treasury.*—The Department develops national emergency plans relating to economic stabilization and emergency monetary programs.

7. *Federal Aviation Agency.*—The Agency works, under national transportation plans and programs, with the air transport industry to maintain the emergency preparedness of civil aviation and airports.

8. *Housing and Home Finance Agency.*—This Agency develops plans and programs for provision of emergency housing and related community facilities.

9. *Federal Communications Commission.*—As part of the program to mobilize the Nation's communications re-

sources under emergency conditions, the Commission is responsible for development of plans and programs with respect to privately owned communications facilities and services.

10. *Interstate Commerce Commission.*—The Commission is assigned responsibility, as a part of the national emergency transportation program, for guidance to the domestic surface transportation industry on disaster preparedness. This covers railroads, motor carriers, and inland waterways.

GENERAL PROVISIONS**DEPARTMENTS, AGENCIES, AND CORPORATIONS**

SEC. 501. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (5 U.S.C. 78), for the pur-

chase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,500 except station wagons for which the maximum shall be \$1,950.

SEC. 502. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from Poland or the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 503. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with title II of the Act of September 6, 1960 (74 Stat. 793).

SEC. 504. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 505. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code, Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest, or in excess of \$6.50 per volume for the current or future volumes of the Modern Federal Practice Digest.

SEC. 506. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 507. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. 508. During the current fiscal year, any foreign currencies held by the United States which have been or may be reserved or set aside for specified programs or activities of any agency may be carried on the books of the Treasury in unfunded accounts.

SEC. 509. No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any corporation or agency, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress. (*Public Works Appropriation Act, 1964.*)

FUNDS APPROPRIATED TO THE PRESIDENT

ALASKA PROGRAMS

Proposed for separate transmittal:

ALASKA MORTGAGE INDEMNITY GRANTS

Program and Financing (in thousands of dollars)

Identification code 04-02-0167-1-1-551	1964 actual	1965 estimate	1966 estimate
Program by activities:			
10 Grants to the State of Alaska (costs—obligations).....		5,500

72 Obligated balance, start of year.....			5,500
74 Obligated balance, end of year.....		-5,500	
90 Expenditures.....			5,500

Under existing legislation, 1965.—Section 57 of the Alaska Omnibus Act (as amended by Public Law 88-451, approved August 19, 1964) authorizes the President to make additional grants to the State of Alaska not to exceed \$5.5 million to match, on a 50-50 basis, funds provided by the State to pay the costs of retiring or adjusting mortgage obligations or other real property liens secured by one- to four-family homes which were severely damaged or destroyed in the March 1964 earthquake and subsequent seismic waves.

TRANSITIONAL GRANTS TO ALASKA

For grants to the State of Alaska as authorized by section 44 of the Alaska Omnibus Act (75 Stat. 151), as amended, \$6,500,000.

Program and Financing (in thousands of dollars)

Identification code 04-60-0067-0-1-910	1964 actual	1965 estimate	1966 estimate
Program by activities:			
1. Grants to Alaska.....	18,862		6,500
2. Operation and maintenance of intermediate airports.....	638	500

74 Obligated balance, end of year.....	-90	-40	
90 Expenditures.....	19,430	550	6,540

Section 44 of the Alaska Omnibus Act (75 Stat. 151) authorized grants to the State of Alaska for a 5-year period ending June 30, 1964, to facilitate assumption by the State of responsibilities hitherto performed in Alaska by the Federal Government. The section was extended for an additional two years and an additional \$23.5 million in grants was authorized to assist the State and local governments in recovering from the earthquake of March 27, 1964. The Deficiency Appropriation Act of 1964 appropriated \$17 million under this additional authorization.

These funds are to enable the President (a) to make grants to the State to assist in financing normal and extraordinary State and local government functions during a period when revenues would be curtailed and (b) to finance continued Federal operation for an interim period of functions to be transferred to the State. In the past the State has requested the Federal Government to continue to operate certain intermediate airports and allocations have been made to the Federal Aviation Agency for this purpose. It is expected that the State will assume the operation of most of these facilities during 1965 and 1966.

1. *Administration.*—Funds are provided to administer and coordinate disaster relief assistance for the States. Simultaneously with the President's authorization of an allocation of funds to the Office of Emergency Planning for required disaster assistance, he authorizes an additional allocation to OEP for administrative purposes.

2. *Aid to disaster areas.*—Under Public Law 81-875, approved September 30, 1950, the Federal Government provides supplementary assistance to State and local governments in the event of a declared major disaster. Federal financial assistance is provided from the Disaster relief appropriation, under which allocations may be made directly to a State, or to Federal agencies as reimbursement for expenditures in disaster relief work performed under this authority. Responsibility for administration of this program is delegated to OEP by Executive Order 10427, approved January 16, 1953.

EMERGENCY FUND FOR THE PRESIDENT

General and special funds:

EMERGENCY FUND FOR THE PRESIDENT

For expenses necessary to enable the President, through such officers or agencies of the Government as he may designate, and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, to provide in his discretion for emergencies affecting the national interest, secu-

erty, or defense which may arise at home or abroad during the current fiscal year, \$1,000,000: *Provided*, That no part of this appropriation shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the [Eighty-eighth Congress or the first session of the] Eighty-ninth Congress, and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body. (*Executive Office Appropriation Act, 1965.*)

Under the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to secure expanded production of critical materials in furtherance of the defense effort. The program is conducted primarily through a revolving fund financed by borrowings from the Treasury. The amount borrowed may not exceed \$2.1 billion outstanding at any one time, but the act permits contingent liabilities to be considered as obligations only to the extent of the probable ultimate net costs to the United States, rather than in the full amount of the gross commitments outstanding. To the extent that money must be expended to fulfill commitments even though the expenditures are considered to be ultimately recoverable (through repayment of loans and sale of inventories, for example), portions of the borrowing

authority are used for working capital on a current basis. Due to the imminent exhaustion of this borrowing authority, a direct appropriation of \$108 million was enacted in 1959 to partially cover the losses incurred, providing cumulative financing authority of \$2,208 million.

Pursuant to the provisions of Public Law 88-343, three amendments to the Defense Production Act are effective June 30, 1964: (1) the priorities and allocations and expansion of productive capacity and supply sections of the act were extended to June 30, 1966, (2) the terminal date covering purchase or sale contracts was changed from June 30, 1965 to June 30, 1975, and (3) a limitation of \$100 million in new contracting authority, including contingent liabilities, was established.

Allocations of borrowing authority by the Office of Emergency Planning and net borrowing from the U.S. Treasury as of June 30, 1964, were as follows (in thousands of dollars):

Authorized agency	Borrowing authority allocated	Borrowings outstanding	Net avail- able for borrowing
General Services Administration ¹	1,944,000	1,920,700	23,300
Treasury Department.....	0	0	0
Department of Agriculture.....	82,610	66,338	16,272
Department of Interior.....	35,800	32,130	3,670
Export-Import Bank of Washington.....	0	0	0
Office of Emergency Planning—reserve.....	37,590	0	37,590
Total.....	2,100,000	2,019,168	80,832

¹ In addition, an appropriation of \$108 million was applied to General Services Administration borrowings, thus providing financing of \$2,052 million to that agency.

Expenditures are limited to programs certified as essential to the national defense by the Office of Emergency Planning.

As one of the inducements for expanding production most of the contracts provide a guaranteed market for the production from expanded facilities. Significant amounts of materials have been delivered to the Defense Production Act inventory under these contracts. Investment in inventory of \$1,464 million on June 30, 1964, is expected to decrease to \$1,346 million by June 30, 1966.

Progress has been made in disposing of Defense Production Act materials primarily by sales to other Government agencies and industry and steps are being taken to increase and accelerate the disposal program for these materials wherever this can be accomplished without undue effects on the market.

General Services Administration.—The program for expansion of production capacity has included the purchase and resale of metals, minerals and machine tools, and research and pilot plant operations to develop new materials and new techniques for utilizing low-grade domestic ores.

The expansion program has been completed, with the major problems now being custody, maintenance, and eventual disposition of the materials and facilities. The exercise of option rights by contractors has been examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever basic stockpiling objectives have been attained. Between July 1, 1957, and June 30, 1964, a reduction of \$449.1 million in gross commitments was attained through renegotiation of contracts.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows (in millions of dollars):

	1964 actual	1965 estimate	1966 estimate
Opening inventory.....	1,500	1,464	1,403
Deliveries during year.....	4	---	---
Total available.....	1,504	1,464	1,403
Less cost of goods sold:			
Sales receipts.....	32	50	48
Loss on sales.....	4	7	3
Cost of goods sold.....	36	57	51
Less transfer for upgrading.....	4	4	6
Closing inventory.....	1,464	1,403	1,346

As of June 30, 1964, a total of \$7,635.8 million in gross value of contracts has been entered into by the General Services Administration under Defense Production Act authority. Of this amount a total of \$7,548.3 million has been completed as measured by procurement, expiration of contractors' options on guaranteed production, completion of facilities, completed research, etc. The balance of \$87.5 million covers custodial, Treasury interest and administrative expenses.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, were carried out by the Commodity Credit Corporation, which was reimbursed from an allocation to the Secretary of Agriculture from this fund. The program was completed by 1961, but interest expense still accumulates on the loss incurred.

Department of the Interior.—Department of the Interior operations to expand defense production under section 303 of the Defense Production Act of 1950 were limited to the encouragement of exploration for strategic and critical mineral commodities. The operations were administered by the Defense Minerals Exploration Administration until September 11, 1958, when the Office of Minerals Exploration was established under authority of Public Law 85-701. As successor agency, the Office of Minerals Exploration uses appropriated funds to administer the Defense Minerals Exploration Administration contracts under which royalty obligations remain, as well as to conduct a similar exploration assistance program.

On June 30, 1964, borrowing authority certified by the Office of Emergency Planning to the Department of the Interior amounting to \$35.8 million and \$32.1 million had been borrowed. Available borrowing authority is sufficient to meet interest payments at note maturity during 1965 and 1966. The authorization of \$35.8 million will not, however, cover obligations accruing for interest due July 1, 1965. An increase of \$878 thousand will be required to meet this obligation.

Royalty obligations remaining on 222 contracts amount to \$9,432 thousand. The royalty payments to the Government are contingent upon production. Royalties on production from any of these projects within the specified period (usually 10 years—a few of 31 years) will be applied toward the Government funds spent. Royalties totaled \$4,875 thousand at the end of 1964 and are estimated at \$225 thousand for 1965 and \$200 thousand for 1966.

Treasury Department.—The function of making and administering loans to private business enterprises under authority of section 302 of the Defense Production Act of

1950, as amended, was assigned to the Secretary of the Treasury by Executive Order 10489, dated September 26, 1953. Applications for loans are considered only upon certification of essentiality by the Office of Emergency Planning (formerly the Office of Civil and Defense Mobilization).

No new loans were authorized during 1964. It is anticipated that there will be no additional loans authorized during 1965 and 1966.

Loans outstanding are estimated for 1965 and 1966 as follows (in thousands of dollars):

Outstanding June 30, 1964.....	5,319
Changes 1965: Repayments.....	716
Outstanding June 30, 1965.....	4,603
Changes 1966: Repayments.....	790
Outstanding June 30, 1966.....	3,813

Export-Import Bank of Washington.—The bank was responsible for making and administering loans, where the expansion, development, or production was in foreign countries. The program has been completely liquidated.

The Inter-American Development Bank (IDB) is an intergovernmental institution, corporate in form, whose capital stock is owned by its member governments. The Bank promotes economic development in member countries through loans, technical assistance, and guarantees of private investment in development projects. Twenty Western Hemisphere republics, including the United States, are members of the Bank, and all have completed required payments on their authorized subscriptions and quotas. Cuba is not a member of the Bank.

Ordinary Capital.—The Bank's authorized ordinary capital is the equivalent of \$2,150 million of which \$1,285 thousand had been subscribed as of October 31, 1964. Of the total subscribed, the equivalent of \$381,580 thousand has been paid in, and the remaining \$903,405 thousand is subject to call by the Bank if required to meet its obligations arising out of borrowings or guarantees. The Bank's original authorized capital of \$850 million was enlarged to \$2,150 million in 1964 through a \$1 billion increase in callable capital, to be subscribed by current members in two installments during calendar 1964 and 1965, and a \$300 million increase to provide for the possible admission of new members.

Public Law 86-147, approved August 7, 1959, authorized U.S. membership in the Bank, and authorized appropriation of \$350 million to cover the U.S. subscription to ordinary capital. This original subscription was appropriated in several installments; \$150 million was paid immediately and \$200 million held by the Treasury against Bank calls. Public Law 88-259, approved January 22, 1964, authorized appropriation of an additional \$411,760 thousand to cover an increase in the U.S. callable subscription. One-half of the increase was appropriated and subscribed in calendar 1964. The second half, amounting to \$205,880 thousand, is the subject of the present request and must be subscribed during calendar 1965. When this subscription is completed, the United States will have subscribed a total of \$611,760 thousand in callable capital.

The U.S. subscription to callable capital enables the Bank to raise funds for lending through bond sales in private capital markets in the United States and elsewhere. The Bank has pledged itself to limit borrowings to the amount of the U.S. callable capital subscription. Funds appropriated for the U.S. subscription will remain subject to call by the Bank only as required in the unlikely

INVESTMENT IN INTER-AMERICAN DEVELOPMENT BANK—CON.

event the Bank should be unable to meet its obligations arising out of borrowings or guarantees. As of November 30, 1964, the Bank had borrowed a total of \$272.6 million equivalent.

By the end of December 1964, Bank commitments from ordinary capital had reached \$557.8 million on 108 loans.

Fund for Special Operations.—In addition to its ordinary capital operations, the Bank lends from its Fund for Special Operations in circumstances where ordinary capital financing is not appropriate. The initial resources of this Fund totaled \$146.3 million, one-half payable in dollars and one-half in member currencies. The resources of the Fund were increased by 50% in early 1964, bringing total resources to \$219.5 million. Public Law 86-147, approved August 7, 1959, authorized payment of the initial U.S. quota of \$100 million; Public Law 88-259, approved January 22, 1964, authorized payment of \$50 million for the 50% increase in the U.S. quota.

The resources of the Fund for Special Operations will be fully committed by early 1965 for loans in support of Alliance for Progress objectives. In April 1964, the Board of Governors of the Bank recommended an increase in Fund resources of \$300 million per year for the years 1965, 1966, and 1967. The U.S. share of this increase would be \$250 million per year or a total of \$750 million. Authorizing legislation for the latter amount is now before the Congress. An appropriation for the first installment is being sought in 1965, with subsequent installments in 1966 and 1967. The first two appropriations necessary to fulfill this commitment are shown below as proposed for separate transmittal.

Since 1961, the IDB has administered the Social Progress Trust Fund (SPTF) on behalf of the United States. This Fund now amounts to \$525 million, provided entirely by the United States, and is devoted to loans for land settlement and improved land use, low-income housing, water supply and sanitation facilities, and education. With the proposed expansion of the Fund for Special Operations, no further U.S. contributions would be made to the SPTF, and the lending activities of the expanded FSO would be broadened to include those previously carried on by the SPTF.

As of December 1964, commitments from the FSO amounted to \$164 million on 50 loans.

The International Development Association is an affiliate of the International Bank for Reconstruction and Development, established to provide long-term, low-interest loans to its less developed member countries. U.S. membership was authorized by Public Law 86-565 (74 Stat. 293), approved June 30, 1960. The United States joined in August 1960, and the Association began operations in November 1960. The initial subscription of the United States totaled \$320,290 thousand, paid in five annual installments, the last of which was paid in November 1964.

Seventeen advanced countries agreed in June 1964 to add to IDA's original resources through supplementary contributions totaling \$750 million, payable in annual installments during 1966, 1967, and 1968. The U.S. share is \$312 million, or \$104 million per year. The 1966 appropriation request is for the first installment of \$104 million which must be paid on or before November 8, 1965. Legislation authorizing U.S. participation in the increase and appropriation of the necessary amounts was approved on May 26, 1964 (Public Law 88-310).

By the end of December 1964, the Association had made credit commitments for high priority economic development projects totaling \$1,002 million in 27 countries and territories. As of the same date, membership in the Association, which is open to all members of the International Bank, totaled 94 countries, with subscriptions aggregating \$996 million of which approximately \$776 million was in hard currencies.

Proposed for separate transmittal:

INCREASE IN QUOTA, INTERNATIONAL MONETARY FUND

Program and Financing (in thousands of dollars)

Identification code 04-35-1000-1-1-152	1964 actual	1965 estimate	1966 estimate

74 Obligated balance, end of year.....		-773,438	-773,438
90 Expenditures.....		257,812	

Under proposed legislation, 1965.—A proposed supplemental appropriation of \$1,031,250 thousand is anticipated to cover an increase in the United States quota in the International monetary fund. Legislation will be proposed to authorize this quota increase as part of a general increase in quotas by all members of the fund designed to improve the fund's ability to provide needed international credit facilities. One-quarter of the increase is payable in gold and will be promptly expended; the balance of \$773.4 million will be made available, but no expenditure is anticipated in 1965 and 1966.

LOANS TO THE INTERNATIONAL MONETARY FUND

Public Law 87-490, approved June 19, 1962, authorized an appropriation of \$2 billion for U.S. participation in a 10-nation, \$6 billion arrangement providing, under specified conditions, for loans by the participants to the International Monetary Fund when needed to forestall or cope with an impairment of the international monetary system.

Public Law 87-872 contained the necessary appropriation, and on October 24, 1962, the United States formally adhered to the arrangement, which was embodied in a decision of the Executive Directors of the International Monetary Fund of January 5, 1962. The United States now is in a position to lend up to \$2 billion to the Fund, but would not be expected to do so in the absence of a substantial further improvement in its balance-of-payments position.

Relation of obligations to expenditures:			
90 Expenditures.....			

The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development and the subscription of \$3,175 million to its capital stock. On June 17, 1959 (73 Stat. 80), the Bretton Woods Agreements Act was amended to increase the U.S. subscription to callable capital stock by \$3,175 million. The Bank's total authorized capital stock is \$22 billion, of which \$21.2 billion has been subscribed by its 102 member countries.

The United States paid \$635 million of the original subscription in cash and non-interest-bearing nonnegotiable notes. The remaining balance (\$5,715 million) has been made available, but will not be called unless required to meet the Bank's obligations. Calls on unpaid subscriptions, were they ever to occur, would be a uniform percentage of the amounts subscribed by each member country.

By the end of December 1964, the Bank had made net loans totalling \$8.2 billion in 74 member countries and territories.

MUTUAL DEFENSE AND DEVELOPMENT

The mutual defense and development programs contribute to the achievement of United States foreign policy objectives. They provide the means for helping other countries to achieve an adequate defense against attack and subversion and foster a rate of development which promotes the dynamic and independent growth of developing nations. The programs are grouped into two major categories—military assistance and economic assistance.

MUTUAL DEFENSE AND DEVELOPMENT—Con.

General and special funds:

MUTUAL DEFENSE AND DEVELOPMENT

For expenses necessary to enable the President to carry out the provisions of the Foreign Assistance Act of 1961, as amended, to remain available until June 30, [1965] 1966, unless otherwise specified herein, as follows:

MILITARY ASSISTANCE

Military assistance: For expenses authorized by section 504(a) of the Foreign Assistance Act of 1961, as amended, including administrative expenses authorized by section 636(g)(1) of such Act, which shall not exceed \$23,500,000 for the current fiscal year, and purchase of passenger motor vehicles for replacement only for use outside the United States: *Provided*, That none of the funds contained in this paragraph shall be available for the purchase of new automotive vehicles outside of the United States, [\$1,055,000,000] \$1,170,000,000. (*Foreign Assistance and Related Agencies Appropriation Act, 1965; authorizing legislation to be proposed.*)

¹ Reimbursements from non-Federal sources are derived from repayments of credit extended in connection with sale of defense articles and services to foreign countries (22 U.S.C. 2316).

The military assistance program will strengthen the security of the free world by contributing to the development, maintenance, and training of modern military forces.

Military assistance is now greatly reduced from the programs of earlier years. Major countries in Europe are not receiving new commitments for grant assistance; other countries are increasing their own expenditures on military forces as their economic capacities increase. Military assistance requirements have increased, however, in south-east Asia where serious problems require the providing of equipment and supplies to forces in actual combat with stubborn enemies. A significant part of the 1966 estimate is for these operational needs.

Some countries will receive grant aid under this program. Others will buy their military equipment on cash or credit terms. The combined military forces of these countries are numerically much greater than the U.S. Armed Forces, and provide free-world defensive capability, depth in reserves and flexibility. Many of these countries have joined in regional defense pacts, such as the North Atlantic Treaty Organization or in bilateral defense arrangements with the United States. Most of the U.S. contributions to regional organizations are derived from military assistance program funds.

Most of the military equipment and supplies which the United States provides under these programs are produced in the United States and are obtained by placing orders with the U.S. military services. Military assistance funds are reserved when the orders are placed and the military services are paid when the items are delivered.

The kind of materiel supplied by the United States varies with objectives in each area and the requirements and capabilities of the individual countries. The present emphasis is on the maintenance of existing forces and materiel although modernization is included where possible. Materiel already on hand but excess to the needs of U.S. forces is supplied, whenever possible, at no charge to the military assistance appropriation except for the cost of rehabilitation and transportation.

This appropriation will finance the following requirements:

Grant aid operations.—*Reservations for requirements ordered from U.S. military services—*

1. *Aircraft.*—Provision of more advanced aircraft to selected countries on a limited basis and the replacement of obsolete planes.

2. *Ships.*—New construction of patrol, minesweeping and other type vessels is included in the 1966 program, together with the reactivation, overhaul and modernization of some destroyer and destroyer escort type ships of the U.S. mothball fleet to meet naval requirements of our allies. The latter will require specific authority under ship loan legislation.

3. *Tanks, other vehicles and weapons.*—Included is combat and support equipment ranging from artillery, tanks, trucks and bulldozers to small arms and jeeps. The 1966 program includes continuing replacement of wornout or obsolete equipment in the forces of less-developed countries.

4. *Ammunition.*—Most of the ammunition to be supplied will be used for training allied troops; some is for actual combat purposes.

5. *Missiles.*—The 1966 program provides for maintenance of certain guided missile systems previously furnished.

6. *Electronic equipment.*—The 1966 program continues the modernization of military communications systems in less-developed countries.

7. *Military public works.*—Materiel and equipment directly supplied by the United States for construction of facilities for foreign forces are procured through the military service supply systems. Other U.S. costs for this construction are met directly by the military assistance program and are cited in paragraph 14 below.

8. *Other.*—Covers a variety of special purpose equipment, and other supplies, and repair and rehabilitation of used equipment.

Obligations for requirements other than through reservations—

9. *Offshore procurement.*—The procurement of equipment and supplies abroad for the military assistance program is subject to the provisions of section 604(a) of the Foreign Assistance Act of 1961, as amended.

10. *Supply operations.*—This includes cost of packing handling, storing, and transporting military assistance materiel.

11. *Training.*—Training programs in free-world countries will assist foreign forces to make effective use of the new weapons and equipment supplied through the military assistance program, teach basic skills, and create favorable attitudes toward the United States and its policies.

12. *Administration.*—The administrative expenses of the program incurred by U.S. military assistance advisory groups, the unified commands overseas, and the military departments are included.

13. *Contributions to international military headquarters and agencies.*—Included are the assessments levied against the United States in accordance with cost-sharing agreements for the administrative support of the military headquarters and agencies, including the standing group of the NATO, SEATO, and the CENTO.

14. *Contributions to construction of facilities in other countries.*—Included are construction of military facilities under the jointly financed NATO infrastructure program.

Sales operations.—Included are funds to provide credit assistance for the purchase of military equipment and supplies in the United States by countries other than those whose credit purchases are ordinarily financed by commercial sources or by the Export-Import Bank. Authority is also included, pursuant to section 509 of the Foreign Assistance Act, to guarantee exporters, financing institutions, or others doing business in the United States against risks of loss arising in connection with non-U.S. Government financed sales of defense articles and services to eligible foreign countries and international organizations. The basic purpose is to promote private financing of sales of U.S. defense articles and services and thus minimize the utilization of military assistance funds to finance credit sales. Other sales are made under authority of the Foreign Assistance Act but financed through the military assistance trust fund.

ECONOMIC ASSISTANCE

Technical cooperation and development grants: For expenses authorized by section 212, **[\$204,600,000]** \$210,000,000, to remain available until expended.

American schools and hospitals abroad: For expenses authorized by section 214(c), **[\$16,800,000]** \$7,000,000.

Surveys of investment opportunities: For expenses authorized by section 232, **[\$1,600,000.]**

International organizations and programs: For expenses authorized by section 302, **[\$134,272,400]** \$155,455,000.

Supporting assistance: For expenses authorized by section 402, **[\$401,000,000]** \$369,200,000.

Contingency fund: For expenses authorized by section 451(a), **[\$99,200,000]** \$50,000,000.

Alliance for Progress, technical cooperation and development grants: For expenses authorized by section 252, **[\$84,700,000]** \$85,000,000, to remain available until expended.

Administrative expenses: For expenses authorized by section 637(a), **[\$51,200,000]** \$55,240,000.

Administrative and other expenses: For expenses authorized by section 637(b) of the Foreign Assistance Act of 1961, as amended, and by section 305 of the Mutual Defense Assistance Control Act of 1951, as amended, **[\$2,900,000]** \$3,100,000.

Unobligated balances as of June 30, **[1964,]** 1965, of funds heretofore made available under the authority of the Foreign Assistance Act of 1961, as amended, except as otherwise provided by law, are hereby continued available for the fiscal year **[1965,]** 1966, for the same general purposes for which appropriated and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Mutual Security Act of 1954, as amended, and the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the subparagraphs under "Economic Assistance," are hereby continued available for the same period as the respective appropriations in such subparagraphs for the same general purpose: **Provided,** That such purpose relates to a project or program previously justified to Congress and the Committees on Appropriations of the House of Representatives and the Senate are notified prior to the reobligation of funds for such projects or programs.

Of the foregoing amounts for economic assistance, \$300,000,000 shall be available for obligation only through the apportionment review and approval procedure prescribed by law in such amounts and at such times as may be determined by the President in the national interest that funds otherwise available for the purposes of programs under this title are insufficient to meet the cost of additional authorized projects or programs. (*Foreign Assistance and Related Agencies Appropriation Act, 1965; authorizing legislation to be proposed.*)

Note.—Important program needs are estimated to require obligation of the \$300 million reserve established by the Congress against 1965 economic assistance appropriations. Any use of the reserve will be subject to a special review and approval procedure.

MUTUAL DEFENSE AND DEVELOPMENT—Con.**General and special funds—Continued**

GRANTS AND OTHER PROGRAMS—Continued

1. *Technical cooperation and development grants.*—These grants are used in less-developed countries to (1) provide the advisers, teachers, and equipment required for the improvement of human resources, especially in administrative, educational, technical, and professional skills; (2) assist in the control and eradication of major diseases and other menaces to health; (3) establish and improve institutions which further economic and social development; (4) assist in planning and surveys of development programs and projects; (5) establish or improve basic physical facilities such as communications and transport, in those relatively few countries where the economies are unable to carry the obligations entailed by development loans; (6) pay transportation charges on shipments of supplies by approved American nonprofit voluntary agencies; and (7) finance research concerning the problems of economic development.

2 and 3. *American schools and hospitals abroad.*—To further the well-rounded training of qualified leadership in developing countries, the United States provides funds to American-sponsored institutions abroad. The \$10.5 million reduction in 1966 largely reflects completion of financing in 1965 of the new medical center at the American University at Beirut.

4. *Surveys of investment opportunities.*—This program encourages private enterprise to undertake surveys of investment opportunities in the less-developed areas of the world. Up to 50% of the total cost of such surveys is paid by AID in the event that the concern sponsoring the survey does not proceed with an investment. If such payment is necessary, the survey becomes AID property for use in attracting other investors.

5. *International organizations and programs.*—Voluntary contributions are made by the United States to programs administered by the United Nations and its specialized agencies, and to the Indus Basin Development Fund associated with the World Bank. These programs advance U.S. objectives by promoting the economic and social development of the less-developed countries and by maintaining the peace in threatened areas.

Increased contributions will be required primarily for the Indus Basin Development Fund to meet the accelerated tempo of payments to contractors constructing dams and other works. The request includes funds for the establishment of two new international agencies—(1) a cancer research center under the aegis of the World Health Organization, and (2) an institute at UN headquarters to train personnel for service in international organizations and in the governments of newly established nations and to conduct research on problems involving the United Nations.

6. *Supporting assistance.*—To further U.S. national security and foreign policy objectives, support is provided countries which need help in maintaining defensive forces or in attaining economic and political stability. Grants for procurement of commodities and equipment are made and, to the extent feasible, are used for purposes which also contribute to development. In some cases country situations have stabilized sufficiently to permit reductions in supporting assistance and to increase concentration on development. Over two-thirds of present supporting

assistance requirements are in Korea and Vietnam on the immediate periphery of the Sino-Soviet bloc.

7. *Contingencies.*—These funds are used to meet urgent requirements which cannot be foreseen at the time the budget is prepared. They are available not only to provide emergency assistance in disasters, but also to meet important international situations which create a need for immediate response in the U.S. national interest.

8. *Alliance for Progress: Technical cooperation and development grants.*—Grants for technical services and equipment are made to Latin American countries as part of the joint Alliance for Progress program.

9. *Investment in Social Progress Trust Fund.*—The Inter-American Development Bank administers a Social Progress Trust Fund, financed by the United States, from which loans and technical assistance grants to Latin American countries are made to improve land use, housing for low-income groups, community water and sanitation facilities, and advanced education and training related to economic and social development. A total of \$525 million has been committed to the fund. No more commitments are planned. Beginning in 1965, it is anticipated that the Bank's fund for special operations will assume the type of activity heretofore carried on by the trust fund. (See international financial institutions below.)

10. *Administrative expenses (AID).*—These funds are used by the Agency for International Development in Washington and overseas missions to administer economic programs.

11. *Administrative expenses (State).*—Administrative expense funds are requested for the Department of State for support of personnel involved in the administration of the foreign assistance program and of the Battle Act.

Loans.—A major portion of U.S. resources provided through foreign economic programs in less-developed countries is in the form of loans. Data on loans made under the development loan activity, under the Alliance for Progress, and under the authority of the Agricultural Trade Development and Assistance Act are shown on separate schedules. A small portion of economic program funds available for grants are loaned each year rather than granted. These loans are made for economic development or essential support purposes, and may be repayable either in dollars or foreign currency. The tables below show the current status of these loans.

The following table gives summary data on loans made from current obligational authority, repayable in dollars and foreign currencies (in millions of dollars and dollar equivalents).

	1963 actual	1964 actual	1965 estimate	1966 estimate
Loan obligations incurred:				
Repayable in dollars	89	73	3	-----
Repayable in foreign currency	20	15	10	-----
Loan disbursements made:				
Repayable in dollars	108	33	33	33
Repayable in foreign currency	27	36	36	36
Loan principal repayments:				
Dollars	326	80	32	32
Foreign currency	6	6	5	5
Interest collections:				
Dollars	35	35	56	42
Foreign currency	28	29	46	35

The table below shows the status of loans in millions of dollars at the end of the respective years. Most of the loans outstanding were made to European countries during the early years of the European recovery program and are repayable in dollars.

	1963 actual	1964 actual	1965 estimate	1966 estimate
Loans outstanding	2,397	2,386	2,418	2,450
Undisbursed loan obligations	171	181	125	56

Sec. 505 (a), Mutual Security Act of 1954.....	137	145	150

Through 1961, a portion of the mutual security dollar appropriations was used to purchase surplus agricultural commodities which were then sold to friendly countries for their currencies. Sales of these commodities are now being made through the Food for Peace program. Local currencies accruing from the sales through 1961 under the mutual security program are deposited in a special account and are used for economic and military activities in furtherance of objectives of the U.S. foreign assistance program. These activities include the local costs of projects, budget support of the less-developed countries and procurement of supplies and equipment for third countries.

In 1961, the Alliance for Progress was formed to launch a hemispheric effort, in which the United States joined as a partner, to stimulate and accelerate the development of the Americas through programs of social and economic reform. In support of this effort, the United States makes loans to finance the development activities necessary to achieve self-sustained growth. Through 1965, the Congress has appropriated a total of \$1,416.8 million for these loans. The nations of Latin America have subscribed to the Charter of Punta del Este and are pledged to seek reforms and institute self-help measures contributing to the development effort. U.S. assistance is supplemented by assistance from other nations, international organizations, and our own private investors, foundations, and educational institutions.

Total Alliance for Progress appropriations of \$580.1 million are proposed for 1966. Of this amount, \$495.1 million shown in this schedule will be available for loans.

The remainder is for technical cooperation and appears under Grants and Other Programs.

MUTUAL DEFENSE AND DEVELOPMENT—Con.**Public enterprise funds—Continued**

Development Loans—Revolving Fund—Continued

The Foreign Assistance Act of 1961 authorized a 5-year, \$7.2 billion program of development loans to be administered by the new Agency for International Development. This program replaced the Development Loan Fund corporation, which was abolished November 3, 1961. \$773.7 million was appropriated for development loans in 1965 and \$780.3 million is proposed for 1966.

Development loans are repayable in U.S. dollars. Under the provisions of the Foreign Assistance Act of 1964, interest charged on all loans, with the exception of those covered by special provisions relative to the use of the facilities of the International Development Association and those funds already committed to be loaned, will be at an interest rate of not less than 2½% per annum. Loan repayments must begin not later than 10 years following the date on which the funds are lent. During the initial 10-year period the rate of interest shall not be lower than 1% per annum.

Development loans are made to promote the economic development of less-developed countries and areas, usually to assist in financing long-range development plans and programs. Before a loan is made, the Agency for International Development must take into account (1) whether financing could be obtained in whole or in part from other free world sources on reasonable terms, including private sources within the United States, (2) the economic and technical soundness of the activity to be financed, including the capacity of the recipient country to repay the loan at a reasonable rate of interest, (3) whether the activity gives reasonable promise of contributing to the development of economic resources or to the increase of productive capacities, (4) the consistency of the activity with, and its relationship to, other development activities being undertaken or planned, and its contribution to realistic long-range objectives, (5) the extent to which the recipient country is demonstrating its determination to take effective self-help measures, and (6) possible effects upon the economy of the United States. Development loans are not made unless there is a finding of a reasonable prospect of repayment. Additional loan criteria and standards are established by an interagency Development Loan Committee chaired by the Administrator of the Agency for International Development.

MUTUAL DEFENSE AND DEVELOPMENT—Con.**Public enterprise funds—Continued**

Development Loan Fund (Liquidation Account)—Continued

The Development Loan Fund was established as a corporation by the Mutual Security Act of 1958 to extend loans, credits, and guarantees to American or foreign individuals, businesses, financial institutions, or foreign governments in order to provide capital for projects and programs contributing to the economic growth of friendly less-developed countries.

Under the Foreign Assistance Act of 1961, the Development Loan Fund Corporation was abolished and its functions were transferred, effective November 3, 1961, to the Agency for International Development. As of that date, the Fund had approved 217 loans and allocations and 3 guarantees for development assistance in 50 countries amounting to \$2,008.5 million. Of this total, 203 loans and guarantee agreements had been signed totaling \$1,887.3 million of which \$632.9 million was actually disbursed, leaving \$1,254.8 million in undisbursed loan and guarantee agreements still outstanding. In addition, the Fund had \$120.8 million unobligated funds outstanding to provide for approved but unsigned loans. Approximately 24% of all loans were repayable in dollars and 76% in foreign currencies.

A total of \$2 billion was appropriated to the Fund, in addition to which receipts from operations totaling approximately \$15.5 million was available including \$5.8 million realized from foreign currency receipts sold to the U.S. Treasury for dollars. Subsequent to November 3, 1961, the Fund has remained open for the purpose of liquidating outstanding obligations and approved but unsigned loans. As of June 30, 1964, the undisbursed loan agreements amounted to \$391.6 million. It is estimated that this balance will decrease to \$236.1 million in 1965 and to \$57.8 million in 1966.

Loan repayments and interest earned totaled \$124.6 million in 1964, and are scheduled to total \$150.7 million in 1965 and \$178.9 million in 1966.

The investment guarantee program encourages and facilitates participation by U.S. businesses in developing the economies of the underdeveloped countries. There are three statutory types of investment guarantees. First, there are the specific risk guarantees which insure a U.S. investor against loss from inconvertibility of the local currency, from expropriation or confiscation, or from war, revolution, or insurrection. Second, there are the extended risk guarantees through which up to 75% of an investment may be insured against loss from any causes other than the investor's own misconduct or normally insurable risks, such as fire and theft. Third, there are

extended risk guarantees available for self-liquidating pilot or demonstration housing projects in Latin America to stimulate private home ownership for middle and lower-middle income families. These projects are of a type similar to those insured by the Federal Housing Administration and suitable for conditions in Latin America.

Guarantees are available for investment in those countries whose governments have agreed with the Government of the United States to institute the investment guarantee program, and where there are suitable arrangements to protect the interests of the U.S. Government in connection with assets or claims acquired as a result of having provided relief under a guarantee. Continued progress has been made in reaching these agreements with countries that had previously not participated, particularly in Africa. Guarantees are available in 61 of the developing countries.

All guarantees are backed by the full faith and credit of the United States. As of June 30, 1964, total reserves available for all authorized investment guarantees was \$273,263 thousand. That amount is expected to suffice to handle any claims that might reasonably be anticipated to mature before a supplemental appropriation could be obtained from the Congress to restore the liquidity of the program.

The current status and requested increase in statutory authorizations for specific risk, extended risk, and Latin American housing programs are indicated below.

(a) *Specific risk.*—In order to meet a rising demand for coverage, an increase in authority of \$2.5 billion is requested in 1966. The presently authorized level is \$2.5 billion.

(b) *Extended risk.*—No increase above the \$300 million ceiling presently available will be requested for 1966.

(c) *Extended risk.*—For Latin American housing projects, a 2-year increase in authority of \$100 million is requested in 1966 to allow a cumulative total of \$350 million in outstanding housing guarantees. (The present ceiling is \$250 million.)

Operating costs and administration.—The value of guarantees issued is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Specific risk guarantees issued.....	524,924	1,088,300	1,200,000
Extended risk guarantees issued.....	8,325	71,675	170,000
Housing, Latin America, guarantees issued.....	12,200	145,140	131,400
Total guarantees issued.....	545,449	1,305,115	1,501,400

As of June 30, 1964, claims totaling \$719 thousand have been paid out of that portion of the reserves representing accumulated fee income. Administrative expenses are paid from funds appropriated for the general administrative expenses of the Agency for International Development.

¹ Balances of selected resources are identified on the statement of financial condition.

The Agency for International Development has always used excess personal property in its programs. In 1962 a revolving fund was created to provide for more effective use of U.S. Government-owned domestic and foreign excess property by authorizing such property to be acquired and rehabilitated in advance of specifically known requirements for country programs. The need for many types of excess property such as tractors, construction and roadbuilding equipment, machinery, and machine tools can be anticipated with a high degree of certainty. Costs include accessorial charges only, i.e., transportation, rehabilitation, storage, and packing, crating, and handling, paid initially from the revolving fund and subsequently charged to the recipient program or government. Proceeds from these charges are deposited to the credit of the revolving fund. The law limits the value of domestic excess property which may be held at any one time to \$15 million in total original acquisition value. There is no legal limit with respect to the value of foreign excess property which may be held at any one time. No addition to the revolving fund is proposed.

Continued program expansion is forecast in 1966 as demands for excess property mount and arrangements for rehabilitation and storage of this property become fully operational. The 1966 program totals \$31 million. The net operating loss in the fund reflects expenditures for transportation, rehabilitation, and storage of property which at the end of the fiscal year have not yet been offset by reimbursement following disposition of the property. Program operations are summarized as follows (in thousands of dollars):

GENERAL PROVISIONS

SEC. 101. None of the funds herein appropriated (other than funds appropriated under the authorization for "International organizations and programs") shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation and other water and related land resource programs and projects proposed for construction within the United States of America as per memorandum of the President dated May 15, 1962.

SEC. 102. Obligations made from funds herein appropriated for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of \$25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.

SEC. 103. Except for the appropriations entitled "Contingency fund", "Alliance for Progress, development loans", and "Development loans", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.

SEC. 104. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.

SEC. 105. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.

SEC. 106. It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this title these principles shall be applied as the President may determine.

SEC. 107. (a) No assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry to Cuba, so long as it is governed by the Castro regime, in addition to those items contained on the list maintained by the Administrator pursuant to title I of the Mutual Defense Assistance Control Act of 1951, as amended, any arms, ammunition, implements of war, atomic energy materials, or any other articles, materials, or supplies of primary strategic significance used in the production of arms, ammunition, and implements of war or of strategic significance to the conduct of war, including petroleum products.

GENERAL PROVISIONS—Continued

(b) No economic assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry items of economic assistance to Cuba, so long as it is governed by the Castro regime, unless the President determines that the withholding of such assistance would be contrary to the national interest and reports such determination to the Foreign Relations and Appropriations Committees of the Senate and the Foreign Affairs and Appropriations Committees of the House of Representatives. Reports made pursuant to this subsection shall be published in the Federal Register within seven days of submission to the committees and shall contain a statement by the President of the reasons for such determination.

SEC. 108. Any expenditure made from funds provided in this title for procurement outside the United States of any commodity in bulk and in excess of \$100,000 shall be reported to the Committees on Appropriations of the Senate and the House of Representatives at least twice annually: *Provided*, That each such report shall state the reasons for which the President determined, pursuant to criteria set forth in section 604(a) of the Foreign Assistance Act of 1961, as amended, that foreign procurement will not result in adverse effects upon the economy of the United States or the industrial mobilization base which outweigh the economic or other advantages to United States of less costly procurement outside the United States.

SEC. 109. (a) No assistance shall be furnished to any nation, whose government is based upon that theory of government known as communism under the Foreign Assistance Act of 1961, as amended, for any arms, ammunition, implements of war, atomic energy materials, or any articles, materials, or supplies, such as petroleum, transportation materials of strategic value, and items of primary strategic significance used in the production of arms, ammunition, and implements of war, contained on the list maintained by the Administrator pursuant to title I of the Mutual Defense Assistance Control Act of 1951, as amended.

(b) No economic assistance shall be furnished to any nation whose government is based upon that theory of government known as communism under the Foreign Assistance Act of 1961, as amended (except section 214(b)), unless the President determines that the withholding of such assistance would be contrary to the national interest and reports such determination to the Foreign Affairs and Appropriations Committees of the House of Representatives and Foreign Relations and Appropriations Committees of the Senate. Reports made pursuant to this subsection shall be published in the Federal Register within seven days of submission to the committees and shall contain a statement by the President of the reasons for such determination.

SEC. 110. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used for making payments on any contract for procurement to which the United States is a party entered into after the date of enactment of this Act which does not contain a provision authorizing the termination of such contract for the convenience of the United States.

SEC. 111. None of the funds appropriated or made available under this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to make payments with respect to any contract for the performance of services outside the United States by United States citizens where such citizens have not been investigated for loyalty and security in the same manner and to the same extent as would apply if they were regularly employed by the United States.

SEC. 112. None of the funds appropriated or made available under this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to make payments with respect to any capital project financed by loans or grants from the United States where the United States has not directly approved the terms of the contracts and the firms to provide engineering, procurement, and construction services on such projects.

SEC. 113. Of the funds appropriated or made available pursuant to this Act not more than \$12,000,000 may be used during the fiscal year ending June 30, [1965] 1966, in carrying out section 241 of the Foreign Assistance Act of 1961, as amended.

SEC. 114. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to pay in whole or in part any assessments, arrearages or dues of any member of the United Nations.

SEC. 115. Foreign currencies not to exceed \$200,000, made available for loans pursuant to section 104(e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be available during the current fiscal year for expenses incurred incident to such loans.

SEC. 116. None of the administrative expense or other funds herein appropriated shall be available in connection with the use of receipts of United States dollars, derived from loan repayments

and interest collections in the Development Loan Fund and Alliance for Progress revolving funds.]

SEC. [117] 115. None of the funds made available by this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be obligated on or after April 30, 1964, for financing, in whole or in part, the direct costs of any contract for the construction of facilities and installations in any underdeveloped country, unless the President shall, on or before such date, have promulgated regulations designed to assure, to the maximum extent consistent with the national interest and the avoidance of excessive costs to the United States, that none of the funds made available by this Act and thereafter obligated shall be used to finance the direct costs under such contracts for construction work performed by persons other than qualified nationals of the recipient country or qualified citizens of the United States: *Provided, however*, That the President may waive the application of this amendment if it is important to the national interest. (*Foreign Assistance and Related Agencies Appropriation Act, 1965.*)

OFFICE OF ECONOMIC OPPORTUNITY

ECONOMIC OPPORTUNITY PROGRAM

For expenses necessary to carry out the provisions of the Economic Opportunity Act of 1964 (Public Law 88-452 approved August 20, 1964), [\$800,000,000], \$1,500,000,000 [of which not more than \$412,500,000], plus reimbursements, shall be available for youth programs under title I; not more than \$300,000,000 for community action programs under title II; not more than \$35,000,000 for special programs to combat poverty in rural areas under title III, part A (which shall be available for transfer to the economic opportunity fund and shall remain available until expended); not more than \$8,800,000 to carry out the purposes of part D of title III; not more than \$150,000,000 for work experience programs under title V; and not more than \$50,000,000 for (1) adult basic education programs under title II, (2) volunteer programs under section 603, (3) expenses of administration and coordination of antipoverty programs under title VI, and (4) migrant agricultural employees programs under title III, part B (including): *Provided, That this appropriation shall be available for transfers to the economic opportunity loan fund for loans under [section 311] title III, and amounts so transferred shall remain available until expended*: *Provided further*, That this appropriation shall be available for the purchase and hire of passenger motor vehicles, and for construction, alteration, and repair of buildings and other facilities, as authorized by section 602 of the Economic Opportunity Act of 1964, and for purchase of real property for training centers: *Provided further*, That this appropriation shall not be available for contracts under titles I, II, V, and VI extending for more than twenty-four months: *Provided further*, That this appropriation shall not be available for more than 4,000 permanent Federal positions: *Provided further*, That none of the funds contained in this Act shall be used to make indemnity payments, authorized by part D of title III, to any farmer whose milk was removed from commercial markets as a result of his failure to follow the procedures prescribed by the Federal Government for the use of the offending chemical: *Provided further*, That not to exceed \$2,000,000 of this appropriation may be transferred to "Grants to States for public assistance" to carry out existing projects authorized by section 1115 of the Social Security Act, as amended]. (78 Stat. 508-534; Supplemental Appropriation Act, 1965; authorizing legislation to be proposed.)

¹ Reimbursements from employees for quarters and meals furnished (Supplemental Appropriation Act, 1965).

The Economic Opportunity Act of 1964 inaugurated a determined effort to eliminate the causes of poverty in America. Many new programs were authorized by the act, most of which will be carried out by existing Federal agencies. The act also authorized the Director of the Office of Economic Opportunity to coordinate these new programs and all of the existing Federal programs aiding the poor into a comprehensive program designed to extend the opportunities for education and training, a decent job, and a life of self-respect and dignity to every American citizen.

The initial appropriation for the "war on poverty" was approved less than 4 months ago. While the public response to the programs has been even greater than anticipated, the assumptions on unit costs and proper balance among the several programs are still estimates with little support from operating experience. Therefore, the final allocation of funds in both 1965 and 1966 may vary from that shown above if experience indicates that a different distribution would utilize the available resources more effectively in the fight against poverty.

1. *Youth programs*—(a) *Job Corps*.—The Job Corps is a residential work and training program for young people, age 16 through 21, who are not now equipped for the transition to adult responsibility. Both rural and urban training centers will be operated.

The 100- and 200-man rural training centers, which will be managed by the Departments of Interior and Agriculture or through contracts with appropriate State agencies, will provide a combination work and education program aimed at raising the level of basic education and training of disadvantaged male youths. The work program will help develop work habits and basic skills, and in addition accomplish important conservation work that is needed throughout the Nation.

The larger urban training centers, to be operated through contracts with universities, industrial organiza-

tions, and private nonprofit agencies, will provide young men and women with more highly specialized vocational training as well as with general educational improvement. Job Corps program levels are estimated as follows:

	As of June 30, 1965	As of June 30, 1966
Enrollees in rural centers.....	11,700	16,000
Male enrollees in urban centers.....	7,000	12,000
Female enrollees.....	6,500	12,000

(b) *Work training*.—Under this activity, which is administered by the Neighborhood Youth Corps in the Department of Labor, youths age 16 through 21 will be enrolled in work and training projects which will provide productive full-time or part-time work experience in State and local public service and nonprofit organizations. The in-school and summer parts of the program will provide jobs for youths who would otherwise have to leave school because of financial reasons, while out-of-school youths will receive work experience, remedial education, counseling, and training in order to increase their employability. The funds estimated, which will be matched by a local contribution of 10% of the cost of the projects, will finance the following program levels:

	1965 enrollees	1966 enrollees
In-school.....	60,000	115,000
Out-of-school.....	65,000	122,000
Summer.....	50,000	53,000
	175,000	290,000

(c) *Work study*.—The work study program, administered by the Department of Health, Education, and Welfare, provides part-time jobs during the school year and full-time summer jobs for youths from low-income families who need such income in order to commence or continue an educational program beyond the high school level. Federal funds are allotted among the States for payment to institutions of higher education to cover the costs of employment on-campus or in public or nonprofit organizations. The payments must be matched at the rate of \$1 from institutional or local sources for each \$9 of Federal support.

It is estimated that approximately 800 colleges will participate in the 1965 program and about 1,000 in 1966, providing assistance to the following numbers of students:

	Academic year		
	1964-65	1965-66	1966-67
Fall semester.....	0	96,700	101,700
Spring semester.....	36,700	101,700	-----
Summer semester.....	64,400	101,700	-----

2. *Community action program*.—The Community Action program provides technical and financial assistance to urban and rural communities to support comprehensive action programs developed by local community action organizations. Community action grants serve to provide for new programs and to augment existing private and public resources by financing up to 90% of the costs of those new programs. Grants may be made to both public and private nonprofit agencies. The programs thus supported will be closely coordinated with other Office of Economic Opportunity programs and with related Federal programs. Remedial reading, literacy courses, job training, employment counseling, housing code improvement and enforcement, homemaker services, workshops, job development, and health services are some of the many activities that can be supported and coordinated within a local antipoverty program. The amounts re-

OFFICE OF ECONOMIC OPPORTUNITY—Con.

ECONOMIC OPPORTUNITY PROGRAM—Continued

requested will provide for action programs in approximately 300 communities in 1966 compared with 240 in 1965, and for planning grants to an additional 170 communities in 1965 and 300 in 1966. A substantial portion of these funds will be used for the development of preschool programs for culturally deprived children.

In addition to the operating and planning grants, funds are included to support research, training, and demonstration programs. Research programs are designed to identify the causes of poverty and variations in the patterns of poverty regionally and locally. The training programs include internships with local, State and Federal agencies, skills and leadership training for poor persons working with local agencies, and professional training for personnel at local, State, and Federal levels. It is estimated that 27,000 persons will be involved in such training in 1965 and 54,500 in 1966.

The demonstration programs include both experimental programs designed to test the value of proposed activities prior to initiating their use, and national priority programs providing assistance on a widespread basis in order to expedite community understanding of the values of new programs.

Technical assistance is provided to both State agencies and local communities. It will have a particular impact on rural communities and the smaller cities which may not have resources to organize their own proposals. Technical assistance grants are planned for about 30 States in 1965 and possibly 15 more in 1966.

3. *Migrant agricultural employees program.*—This activity provides a special program to meet the housing, sanitation, education, and day care needs of migratory agricultural workers and their families. Grants or contracts will be made to expedite the activities of public and nonprofit agencies now conducting programs of assistance to improve health and living conditions of migratory workers in the three major national streams of domestic migrants: (1) Texas, Arizona, and the west coast, (2) Gulf of Mexico to the Northern Plain States, and (3) Florida northward along the east coast. Loans for similar purposes are financed under the Economic opportunity loan fund.

4. *Rural areas program.*—This activity finances the administrative expenses incurred by the Farmers' Home Administration of the Department of Agriculture in operating the rural loan program authorized by title III of the Economic Opportunity Act. Program expenses are included in the schedules for the Economic opportunity loan fund.

5. *Work experience program.*—This activity provides work and training programs for unemployed parents of dependent children and for other needy persons in order to prepare them for regular employment and hence to enable them to become self-supporting. Utilizing the authority of section 1115 of the Social Security Act, the Welfare Administration of the Department of Health, Education, and Welfare will expand work and training programs for relief recipients in the States now conducting such programs and will inaugurate such programs on a project basis in communities in other parts of the country. One of the important criteria to be used in approving these grants is the potential for incorporating proj-

ects into ongoing State and local programs at the end of the experimental period. It is estimated that 88,000 persons will be assisted with the 1965 funds, while 112,000 will be enrolled on projects funded in 1966.

6. *Adult literacy program.*—This activity provides for programs of instruction for adults whose inability to read and write the English language constitutes a substantial impairment of their ability to secure gainful employment.

Matching grants will be made to assist in: (1) meeting the cost of local educational agency programs for instruction; (2) financing pilot projects to improve materials or methods; and (3) improving services provided by State educational agencies. The Office of Education in the Department of Health, Education, and Welfare will administer the program.

The funds available will train approximately 37,500 persons in 1965 and about 70,000 in 1966.

7. *Volunteer program.*—Volunteers in Service to America (VISTA) offers an opportunity on the domestic scene for volunteers with a spirit of service to work directly on the problems of poverty. Volunteers will participate in programs administered and supported by the Economic Opportunity Act, in existing Federal programs related to poverty problems, and in related State and local activities. During 1965, it is planned to recruit, select, train and support approximately 3,500 volunteers, the majority of whom will enter training in the spring of 1965. The normal period of service will be 1 year, including about 5 weeks of preassignment training. It is estimated that 5,000 volunteers will begin service during 1966.

8. *General direction and administration.*—The Office of Economic Opportunity directly administers the Community Action and the Volunteers in Service to America programs, and exercises primary responsibility for the Job Corps program, which will be operated under contract by other public and private agencies. The Office also exercises continuing coordination and review of all programs delegated to other agencies and assists in coordinating the programs of all Federal agencies into an integrated attack on poverty. This activity includes funds to support general research on poverty and to finance an information center on poverty programs.

¹ Balances of selected resources are identified in the statement of financial condition.

Rural areas program.—Loans will be made by the Farmers Home Administration of the Department of Agriculture (through their regular county office organizational structure) to low-income farm families for the purposes of acquiring or improving real estate or reducing encumbrances thereon; purchasing operating supplies and equipment; and participating in cooperative associations. Loans will also be made to low-income farm and rural families to finance small non-agricultural enterprises to supplement their income. The maximum loan is \$2,500. Approximately 7,000 rural families will be assisted in 1965. The balance of funds carried forward from 1965, together with the new obligational authority requested for 1966, will provide for approximately 15,500 loans in 1966.

Loans also will be made to help establish new cooperatives and finance existing cooperatives furnishing essential processing, purchasing or marketing services, supplies, or facilities predominantly to low-income rural families. In 1965 approximately 375 loans will be made to cooperatives that will assist 9,000 low-income rural families, and about 410 loans will be made in 1966 to assist approximately 10,000 such families.

Migrant workers program.—Loans will be made to institutions, organizations, farm associations, or individuals for improvement of housing and sanitation for migrant agricultural workers. The program is administered by the Community Action division of the Office of Economic Opportunity. Loans amounting to \$1 million in 1965 and \$2 million in 1966 are estimated.

Financing.—The capital for this fund is derived by transfer from the appropriation Economic opportunity program.

The purposes of the Peace Corps are to provide trained Americans to interested countries in need of middle-level manpower and to promote understanding between the people of the United States and the peoples served.

Volunteers engage in a variety of activities at the request of host countries. Most volunteers are working in community development, both urban and rural, and teaching at all school levels. Prior to overseas assignment, each volunteer is given intensive training designed to develop required skills, to provide a knowledge of the country to which he will be sent, to develop his language abilities and to assure physical fitness for service overseas. During training all prospective volunteers are carefully evaluated through continuous observation to ensure that those selected for overseas assignment are suited for service. Since most of the training facilities and prospective volunteers are available during the summer months, planning and budgeting are based on a "program year" which runs from the beginning of September through the end of August.

1. *Volunteer and project costs.*—This activity includes all costs directly associated with volunteers in carrying out approved programs. Provision is made under this head for the medical care of volunteers overseas, the research program and voluntary service programs, formerly included in administration and program support. The number of volunteers in training and overseas will

increase from 14,980 to 17,060. The planned assignment of the volunteers is as follows:

	Aug. 31, 1964	Aug. 31, 1965	Aug. 31, 1966
Latin America.....	4,249	5,900	6,280
Africa.....	3,280	4,900	5,780
Far East.....	1,247	1,480	1,590
North Africa, Near East, and South Asia.....	1,718	2,700	3,410
Total.....	10,494	14,980	17,060

Requests from countries for Peace Corps volunteers continue to exceed the supply. The proposed increase of 2,080 volunteers for a total of 17,060, represents an expansion consistent with the policies that have resulted in the successful execution of this program. Programing criteria limit projects to those which are consistent with the purposes of the Peace Corps Act, and which can be manned by anticipated available volunteers of the highest caliber.

The largest number of volunteers during 1966 will be serving or training for Latin American countries. Requests from Latin American countries continue for large numbers of middle-level workers in rural and urban community development, agriculture, and education.

Volunteers for African countries will increase by 880 during 1966 to a total of 5,780. The emphasis will continue to be largely in teaching though additional volunteers will work in community development and agriculture.

In the Far East and in North Africa, Near East and South Asia regions, additional volunteers will be engaged principally in education, as well as agriculture and community development.

2. *Administrative expenses (limitation).*—Includes all expenses related to programing, recruitment, selection, direction of training, and the management of the Peace Corps, both in Washington and overseas. An increase in the 1965 limitation for administrative expenses will be sought to provide for increased travel requirements, administrative support by other Government agencies, and other obligations.

Financing:			
21 Unobligated balance available, start of year.....			-24,000
22 Unobligated balance transferred from "Payment of Philippine War Damage Claims," Foreign Claims Settlement Commission (77 Stat. 123).....		-24,000	
24 Unobligated balance available, end of year.....		24,000	24,000
New obligational authority.....			

Public Law 88-94 amended the Philippine War Damage Act to provide for educational programs in the Philippines to be agreed upon by the presidents of the two countries. The program will be financed from certain balances of the 1963 Philippine War Damage Claims appropriation. Negotiation of the program will be carried out by the Department of State. Though funds will become available late in 1965, no activities are shown since the program plan is subject to future negotiations between the two countries.

PUBLIC WORKS ACCELERATION

General and special funds:

[PUBLIC WORKS ACCELERATION]

[For an additional amount for expenses necessary to enable the President to provide for carrying out the purposes of the Public Works Acceleration Act (76 Stat. 541), including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but at rates for individuals not to exceed \$75 per diem, \$4,000,000.] (*Public Works Appropriation Act, 1965.*)

Note.—Excludes \$500 thousand for activities transferred in the estimates to "Public works acceleration," Housing and Home Finance Agency. The amounts obligated in 1964 and 1965 are shown in the schedule as comparative transfers.

These funds enabled the President to relieve unemployment and spur economic expansion in eligible areas of high unemployment or low income. This was accomplished by accelerating both Federal assistance to local public works and Federal public works projects. The program was carried out by the Federal agencies responsible for the several portions of the program and coordinated by the Secretary of Commerce with the assistance of the Area Redevelopment Administration.

1. *State and local projects.*—Grants were made to eligible State and local governments for public works, primarily water and sewage systems, waste treatment works, hospital additions, and related health facilities. Grants were for 50% of the project costs, although areas of most severe unemployment were eligible for grants up to 75%. Local recipients were required to increase local expenditures for public works by at least the amount of the local contribution.

2. *Direct Federal projects.*—Public works projects which were the direct responsibility of Federal agencies were accelerated in eligible areas. Such projects covered a wide variety of activity including improvement of facilities, small flood control and erosion projects, forest and other conservation work, and recreation facilities, etc.

3. *Administration.*—Funds were provided for those administrative expenses which could not be absorbed by the agencies responsible for the larger programs and by the coordinating agency.

SPECIAL FOREIGN CURRENCY ACTIVITIES

SPECIAL FOREIGN CURRENCY AUTHORIZATION

In order to make maximum effective use of foreign currencies owned by and available for purposes of the United States, the President, whenever he deems that such action will be in the national interest and will contribute to the more effective, efficient, and economical conduct of United States programs, may use for any program otherwise authorized by law any foreign currencies which are determined by the Secretary of the Treasury to be in excess of the normal requirements of the United States for such currencies: Provided, That such currencies may be used under this authority in addition to funds otherwise available for such programs, but the amount of the currency of any one country used under this authority shall not exceed 5 percent of the aggregate of

the amounts thereof held by the Secretary of the Treasury on July 1, 1965, and received by him during the current fiscal year: Provided further, That this authority, and any appropriation necessary to administer such programs, shall be available without regard to any provision limiting the use of foreign currencies, or the administration of foreign currency programs, to programs for which specific appropriations have been made: Provided further, That the President shall make a report to the Congress on the use of foreign currencies under this authority.

In 1966, it is estimated that the United States will have over \$1.6 billion equivalent of foreign currencies in eight countries—Brazil, Burma, India, Israel, Pakistan, Poland, United Arab Republic (Egypt), and Yugoslavia—available for U.S. programs. Only about \$77 million of these currencies will be needed for regular and special foreign currency programs of U.S. Government agencies.

As an experimental procedure, it is proposed that the President be authorized to use up to 5% of the amount available in each country for 1966 for additions to authorized programs which may be developed for purposes which are in the national interest.

It is estimated that \$82 million would be available under which about \$50 million might be spent in 1966. Specific plans for these programs will be developed later.

GENERAL PROVISIONS

SEC. 401. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

SEC. 402. None of the funds herein appropriated shall be used for expenses of the Inspector General, Foreign Assistance, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering foreign assistance legislation, appropriations, or expenditures, has delivered to the Office of the Inspector General, Foreign Assistance, a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report, or other material in the custody or control of the Inspector General, Foreign Assistance, relating to any review, inspection, or audit arranged for, directed, or conducted by him, unless and until there has been furnished to the General Accounting Office or to such committee or subcommittee, as the case may be, (A) the document, paper, communication, audit, review, finding, recommendation, report, or other material so requested or (B) a certification by the President, personally, that he has forbidden the furnishing thereof pursuant to such request and his reason for so doing.

SEC. 403. No part of any appropriation contained in this Act shall be used to conduct or assist in conducting any program (including but not limited to the payment of salaries, administrative expenses, and the conduct of research activities) related directly or indirectly to the establishment of a national service corps or similar domestic peace corps type of program.

SEC. 404. The appropriations, funds, other authorizations, and authority with respect thereto in this Act shall be available from October 1, 1964, for the purposes provided in such appropriations, funds, other authorizations, and authority. All obligations incurred during the period between September 30, 1964, and the date of enactment of this Act in anticipation of such appropriations, funds, other authorizations, and authority are hereby ratified and confirmed if in accordance with the terms thereof.

(Foreign Assistance and Related Agencies Appropriation Act, 1965.)

DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, marketing, nutrition and consumer use, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided*, That appropriations hereunder shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), and not to exceed \$75,000 shall be available for employment under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed \$20,000, except for six buildings to be constructed or improved at a cost not to exceed \$45,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$7,500 or 7.5 per centum of the cost of the building, whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to a total of \$100,000 for facilities at Beltsville, Maryland:

Research: For research and demonstrations on the production and utilization of agricultural products; agricultural marketing and distribution, not otherwise provided for; home economics or nutrition and consumer use of agricultural and associated products; and related research and services; and for acquisition of land by donation, exchange, or purchase at a nominal cost not to exceed \$100, **[\$114,991,000, plus not to exceed the following amounts, to remain available until expended, for the planning, construction, alteration, and equipping of research facilities: \$1,000,000 for crops research facilities at Fort Collins, Colorado; \$850,000 for facilities at the Agricultural Research Center, Beltsville, Maryland; \$800,000 for a stored-product insects laboratory, Savannah, Georgia; \$260,000 for plans for a livestock insect and toxicology laboratory, College Station, Texas; \$338,000 for plans for a plant disease, nematode, and insect laboratory, Beltsville, Maryland; \$160,000 for plans for an insect attractants and stored-product insects laboratory, Gainesville, Florida; \$1,000,000 for a peanut quality research laboratory, at Dawson, Georgia, on a site acquired by donation; and \$240,000 for plans for a Western cotton insects and physiology laboratory, Tempe, Arizona; a cotton disease laboratory, College Station, Texas; a cotton physiology laboratory, Stoneville, Mississippi; pilot cotton ginning facilities at Stoneville, Mississippi, and Mesilla Park, New Mexico; and facilities in the High Plains region in Texas for cotton ginning and storage research; in all, \$119,639,000] \$116,892,000, of which not to exceed \$12,136,000 shall remain available until expended for construction, alteration, and improvement of facilities, without regard to limitations contained herein, and in addition not to exceed \$24,600,000 from funds available under section 32 of the Act of August 24, 1935, pursuant to Public Law 88-250 to be transferred to and merged with this appropriation: *Provided*, That the limitations contained herein shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113(a));**

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c), **[\$68,793,200] \$73,160,000**, of which \$1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases to the extent necessary to meet emergency conditions: *Provided*, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by any State of at least 40 per centum: *Provided further*, That **[no funds in excess of**

\$250,000 shall be available for carrying out the screwworm eradication program that does not require minimum matching by State or local sources of at least 50 per centum of the expenses of production, irradiation, and release of the screwworm flies] \$1,150,000 shall be available until expended, without regard to limitations contained herein, for the construction of facilities: *Provided further*, That, in addition, in emergencies which threaten the livestock or poultry industries of the country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, and for expenses in accordance with the Act of February 28, 1947, as amended, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts;

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat, and meat-food products, and the applicable provisions of the laws relating to process or renovated butter, **[\$30,837,000] \$35,705,000;**

Special fund: To provide for additional labor to be employed under contracts and cooperative agreements to strengthen the work at research installations in the field, not more than \$1,000,000 of the amount appropriated under this head for the previous fiscal year may be used by the Administrator of the Agricultural Research Service in departmental research programs in the current fiscal year, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research".

[For an additional amount for "Salaries and expenses", for "Meat inspection", \$1,291,000.] (5 U.S.C. 511-512, 524, 541c-541e, 563-564, 565a, 576, 2131; 7 U.S.C. 135-135k, 145-148a, 148c-164a, 166-167, 231-233, 391, 394-396, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-431, 433-434, 436-437, 450, 851-855, 1292, 1441, 1621-1627, 1651-1656, 1704, 1901-1906; 10 U.S.C. 2306; 15 U.S.C. 69e; 16 U.S.C. 531-531a, 531f, 590a-590b, 590f, 590k; 18 U.S.C. 287, 1114; 19 U.S.C. 1201, 1306; 20 U.S.C. 191-194; 21 U.S.C. 71-91, 94-96, 98, 101-105, 111-114c, 114e-131, 134-134h, 151-153, 342a, 346-346a; 26 U.S.C. 4817, 7235c; 31 U.S.C. 725a; 42 U.S.C. 1476b-1476d, 1483, 1891-1893; 45 U.S.C. 71-74; 46 U.S.C. 466a-466b; 48 U.S.C. 1409m-1409o; 49 U.S.C. 1474(a), 1509; 46 Stat. 67; 77 Stat. 826; 78 Stat. 868; Department of Agriculture and Related Agencies Appropriation Act, 1965; Supplemental Appropriation Act, 1965.)

The service conducts basic and applied research relating to the production, utilization and marketing of agricultural products, research on nutrition and consumer use, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and pests of animals and plants, and related work.

1. *Research*—(a) *Farm research*.—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them.

Investigations are conducted to improve varieties of food, feed, fiber and other plants and to develop new crops; to improve crop-production practices, including methods to control plant diseases and nematodes; and to develop safe chemical, biological, and other methods for control of harmful pests affecting farm production.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soils to plants, animals, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

Continuous review is maintained to emphasize work which will meet the problems of agricultural surpluses. The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs. Increased attention has been given to the production of agricultural products having industrial uses. The proportion of farm research funds going into basic research has steadily increased, and is currently estimated at 43% of the total funds for research. This basic research undergirds the other research efforts.

The 1966 estimates include increases for staffing new and expanded laboratories and watershed research centers and for providing additional subprofessional workers and labor at other locations for more effective utilization of scientists and more effective research; establishment of a meat animal research center at Clay Center, Nebr.; and research on problems related to mold contamination of oilseeds, cereals, etc., health-related problems of tobacco, trichinosis of swine, and metabolism of fission products and related elements by farm animals. There is an offsetting decrease due to proposal to close or reduce farm research at a number of field locations and reduce lines of work at Beltsville, Md.

(b) *Utilization research and development*.—Chemical, physical, and biological research is conducted to develop increased industrial uses of farm products, and new and improved foods, feeds, and fabrics; and to develop improved methods for processing agricultural commodities.

As stated above, the 1966 estimates include amounts for additional research on mold problems and on tobacco, offset by elimination of research on rice, tung, sugar crops, including molasses, honey, and maple, and reduction of research on castor, fruits, vegetables, and new crops.

(c) *Nutrition and consumer use research*.—Studies are made of nutrition, consumer use and food economics, and clothing and housing. The 1966 estimates provide for expansion of the research by providing additional subprofessional help for more effective utilization of scientists, offset by elimination of clothing and housing research.

(d) *Marketing research.*—Practical answers to problems encountered in moving products from farm to consumer are sought through research. For farm products as they pass through marketing channels, efforts are made to develop safe methods to protect against insect attack, find objective methods to determine quality, reduce losses from waste and spoilage, and improve efficiency in physical handling. The 1966 estimates provide for special research on mold problems and tobacco, and for additional funds for more effective utilization of scientists, offset by elimination of research on wholesaling and retailing.

(e) *Interdepartmental pesticides coordination.*—The 1965 appropriation provided \$250,000 for use of the Secretary of Agriculture in collaborating with the Department of Health, Education, and Welfare, Department of the Interior, and other agencies of the Federal Government on problems related to use of pesticides. The project provides for interdepartmental coordination in development of measures to protect the public health, producers, and resources.

(f) *Construction of facilities.*—In 1965, \$822,000 was appropriated for plans for new facilities at five locations for which construction funds are proposed in 1966. The estimates also provide for plans for new facilities for meat animal research at Clay Center, Nebr., continuation of construction and improvements at Beltsville, Md.; new laboratories at Stoneville, Miss., Durant, Okla., and in Delaware, offset by nonrecurring amounts for construction at four laboratories.

(g) *Contingencies.*—Beginning in 1962, \$1 million is available to meet urgent research needs that develop unexpectedly during the year, when such needs cannot be met by redirection of resources from other projects.

2. *Plant and animal disease and pest control.*—(a) *Plant disease and pest control.*—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases, nematodes, and other pests that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. The 1966 estimates include funds for expansion of control of cereal leaf beetle and plant quarantine protection at ports-of-entry because of increased travel and shipping, offset by elimination of the fire ant control program.

The volume of workload is indicated in the following table (in thousands):

	1962 actual	1963 actual	1964 actual
Inspections at ports-of-entry:			
Airplanes.....	137	146	160
Vessels.....	60	60	64
Vehicles from Mexico.....	24,753	25,962	27,764
Baggage, pieces of.....	23,514	27,934	32,132
Interceptions of unauthorized plant material.....	385	395	401

(b) *Animal disease and pest control.*—Programs are conducted to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases; and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. The estimates for 1966 propose increases for hog cholera, scrapie, and southwest screw-

worm eradication; activities relating to veterinary biologics under the Virus Serum Toxin Act; and more adequate animal inspection and quarantine at ports to reduce hazard of introduction of foreign diseases. A 1965 supplemental is proposed for separate transmittal for the screwworm eradication program.

The volume of protective activities is indicated by selected examples in the following table (in thousands):

	1962 actual	1963 actual	1964 actual
Animal import inspection:			
All animals.....	1,306	1,357	677
Import animal byproduct:

Animals inspected at public stockyards....	59,033	56,874	55,148
Diseased animals received or found.....	477	520	537
Supervision of production of veterinary biologics:			
Hog-cholera virus and anti-hog-cholera serum (doses).....	38,388	39,428	27,606
Hog-cholera vaccine (doses).....	53,974	49,929	50,473
Other vaccines (doses).....	4,288,335	4,702,684	4,913,784
Total bacterins (doses).....	169,568	203,356	203,631
Diagnostic agents (doses).....	65,239	56,550	53,933
Other serums (doses).....	7,265	8,640	8,153

(c) *Pesticides regulation.*—This activity is concerned with administration of the Federal Insecticide, Fungicide, and Rodenticide Act, and related provisions of the Federal Food, Drug, and Cosmetic Act.

(d) *Construction of facilities.*—In 1965, \$100 thousand was appropriated for plans for construction of a new laboratory at Beltsville, Md., for expanded registration and enforcement activities under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. The 1966 estimates provide funds for its construction.

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption, free from adulteration, and truthfully labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling, and meats imported or exported are inspected. The estimates for 1966 include a proposed increase to meet increasing needs for Federal meat inspection.

Legislation will be proposed to place meat inspection on a self-supporting basis. A supplemental is therefore anticipated which would propose establishing a revolving fund of \$8,400 thousand and result in a reduction of \$27,305 thousand for this activity.

The volume of inspections and examinations is indicated by examples given in the following table:

	1962 actual	1963 actual	1964 actual
Number of establishments covered....	1,511	1,590	1,679
Cities in which plants are located.....	623	672	702

Under existing legislation, 1965.—A supplemental appropriation of \$550 thousand is anticipated in order to provide the Federal share needed to finance the cooperative screwworm eradication program in Texas, New Mexico, and States to the north and east. Funds are needed primarily to maintain an effective barrier zone of sterile screwworm flies in northern Mexico and along the international boundary through June 30, 1965. The artificial barrier zone of sterile screwworm flies requires the continuous production, irradiation and release of vast quantities of screwworm flies over a large area. Any cessation of program operations would immediately permit the migration of screwworms into screwworm-free areas of the United States where self-perpetuating native fly populations would be reestablished.

Under proposed legislation, 1966.—A reduction of \$35,705 thousand is anticipated for 1966 under legislation being proposed to place meat inspection on a self-supporting basis. In addition, the legislation would require an appropriation of \$8.4 million for establishing a revolving fund for reimbursement by meatpacking plants for inspection services rendered.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments, in foreign currencies [which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704),] *owed to or owned by the United States* for market development research authorized by section 104(a) and for agricultural and forestry research and other functions related thereto authorized by section 104(k) of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704(a)(k)), to remain available until expended, [\$2,000,000] \$4,000,000: *Provided*, That this appropriation shall be available in addition to other appropriations for these purposes, for payments in the foregoing currencies: *Provided further*, That funds appropriated herein shall be used for payments in such foreign currencies as the Department determines are needed and can be used most effectively to carry out the purposes of this [paragraph, and such foreign currencies shall, pursuant to the provisions of section 104(a), be set aside for sale to the Department before foreign currencies which accrue under said title I are made available for other United States uses] *paragraph: Provided further*, That not to exceed \$25,000 of this appropriation shall be available for payments in foreign currencies for expenses of employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a). (*Department of Agriculture and Related Agencies Appropriation Act, 1965.*)

¹ Includes capital outlay as follows: 1964, \$2 thousand; 1965, \$10 thousand; 1966, \$10 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$13,810 thousand; 1964, \$16,641 thousand; 1965, \$25,541 thousand; 1966, \$19,541 thousand.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are used by the Department for market development research under section 104(a) and for agricultural and forestry research under section 104(k) of the act. Work is carried on through agreements, in both basic and applied fields, by research institutions and organizations in foreign countries. This research serves to develop new foreign markets and to expand existing markets for agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. It also provides for supplementary research on farm, forest, marketing, utilization, agricultural economics, and human nutrition problems, and for translations of foreign language scientific publications. The appropriation proposed for 1966 will be used to purchase only those currencies determined to be excess to the normal requirements of the United States. Total estimated cost in U.S. dollars (charged to regular appropriations) for the initiation and supervision of projects in 1966 is \$325 thousand.

74 Obligated balance, end of year.....	-80		
90 Expenditures.....	56	93	

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$76 thousand; 1964, \$36 thousand; 1965, \$0 thousand.

In previous years, \$16.5 million had been provided for establishment of animal disease research and control laboratory facilities. Construction of the facilities at Ames, Iowa, was started in August 1958. The principal laboratory buildings were completed in fiscal year 1961. Minor construction through fiscal year 1965 will complete the installation under this appropriation.

¹ Includes capital outlay as follows: 1964, \$25 thousand; 1965, \$18 thousand; 1966, \$29 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$68 thousand (1964 adjustments, -\$23 thousand); 1964, \$19 thousand; 1965, \$19 thousand; 1966, \$19 thousand.

The Service administers funds for payments and grants to State agricultural experiment stations and other eligible institutions for the support of research in agriculture, the rural home, rural life, and forestry. This administration involves supervision of the funds, close advisory relations with the State experiment stations, and participation in the planning and coordination of research programs between the States and the U.S. Department of Agriculture.

1. *Payments to agricultural experiment stations—(a) Agricultural research under the Hatch Act.*—Grants under the Hatch Act are allocated to agricultural experiment stations of the land-grant colleges in the 50 States and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The States are contributing \$3.70 for each dollar paid by the Federal Government. A \$2 million increase is proposed to strengthen the cooperative program at the agricultural experiment stations.

(b) *Marketing research under the Agricultural Marketing Act.*—Payments to the States are authorized under sec. 204(b) of the Agricultural Marketing Act of 1946. The act requires that the Federal funds disbursed to States be matched project for project from non-Federal sources for marketing research. No funds are proposed for this purpose in 1966.

2. *Grants for cooperative forestry research.*—These grants are allocated to land-grant colleges or agricultural experiment stations in the 50 States and Puerto Rico and other State-supported colleges and universities offering graduate training in the sciences basic to forestry and having a forestry school. An increase of \$1 million is proposed to accelerate the forestry research program. The act requires that the Federal funds paid to each institution be matched by funds from non-Federal sources for forestry research.

3. *Grants for basic scientific research.*—An increase of \$600 thousand is also proposed for the program of grants for support of basic scientific research to nonprofit institutions of higher education, or nonprofit organizations whose primary purpose is the conduct of such research.

4. *Grants for facilities.*—These grants to provide additional facilities for research are allocated to State agricultural experiment stations in the 50 States and Puerto Rico. Assistance is available to the States for construction, acquisition, and remodeling of buildings, laboratories, and other capital facilities which are necessary to more effectively conduct research in agriculture and sciences related thereto. The Federal funds are provided on a matching basis.

**COOPERATIVE STATE RESEARCH SERVICE—
Continued**

General and special funds—Continued

PAYMENTS AND EXPENSES—continued

5. *Federal administration.*—A coordinating and review staff is maintained to examine research projects and assist State institutions and Federal agencies. An increase of \$12 thousand is proposed to partially defray the additional personnel costs in administering the recently acquired programs, (1) cooperative forestry research, (2) research facilities, and (3) grants for basic scientific research.

6. *Penalty mail.*—Funds to cover the cost of penalty mailings for State experiment station directors are provided under this appropriation.

The planned distribution of these payments to State agricultural experiment stations and other eligible institutions under the above-mentioned programs is as follows (in thousands of dollars):

Hatch Act (statutory formula).....	36,009
Hatch Act (regional research fund).....	9,914
Grants for cooperative forestry research.....	2,000
Grants for basic scientific research.....	1,000
Grants for facilities (statutory formula).....	2,000

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, and related subjects. This educational work takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges and experiment stations, and incorporates them into a national educational program for action. Its objective is to provide farm people and others with information and assistance upon which they may make social and economic adjustments necessary for an efficient agricultural industry and improved rural homes and rural life.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of State and county extension workers who work with rural families, marketing concerns, and others

by providing advice and assistance in the application of improved methods involved in production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is accomplished largely through 4-H clubs. Funds also provide for Federal program support. Extension agents are paid from Federal, State, and county sources.

The increase will be allocated to the States to employ area agents who will work with organized groups on resource development problems of communities.

2. *Retirement and employees' compensation costs for extension agents.*—The increase proposed is required to meet these costs for cooperative extension agents. The mandatory retirement contribution is authorized under Public Law 854, approved July 31, 1956. The employer's contribution to the Federal retirement fund, to match contributions of these agents, is provided by this Federal appropriation. An increase of \$29,825 provides an amount equal to the benefits received by the cooperative agents to be paid to the Employees' Compensation Fund, as required by Public Law 86-767 (approved Sept. 13, 1960.)

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership, counsel, and assistance to the States and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, inservice training for extension personnel, and administrative services. The Federal Extension Service also coordinates the educational activities of other U.S. Department of Agriculture agencies.

The Farmer Cooperative Service provides research, advisory, and educational assistance to farmers' marketing, purchasing, and service cooperatives. Attention is directed to problems of organization, membership, financing, efficiency, processing, distribution, pricing, selling,

and transportation of farm products by farmer cooperatives. Much of this work is carried on in cooperation with land-grant colleges, the Extension Service, and other Federal and State agencies.

The proposed 1966 increase will help the Farmer Cooperative Service to more adequately assist farmers in using their cooperatives as a means of improving farm income and preserving the family farm.

SOIL CONSERVATION SERVICE

The Soil Conservation Service is responsible for various soil and water conservation activities of the Department of Agriculture, including six action programs for which separate appropriations are made, reimbursements from other agencies for technical services performed, trust funds, and miscellaneous accounts involving cooperative agreements with local organizations. The primary purpose of these program operations is to help farmers, ranchers, and other landowners in making needed land use adjustments; to conserve soil, water, and plant resources; to reduce the hazards of floods, sedimentation and related damages; and to assist in establishing a permanent and economically sound agriculture. These activities are conducted in cooperation with Federal and State agencies, locally managed soil conservation districts, and other sponsoring organizations.

The Service provides professional leadership in soil, water, and plant conservation and works directly with locally managed soil conservation districts and sponsors of watershed projects on local programs and cooperative work plans which are of benefit to rural and urban people in their areas.

The Service also furnishes technical services for the Agricultural Conservation program; the soil and water conservation loans made by the Farmers Home Administration; the State and county Rural Areas Development committees; and other agencies or local groups having soil and water conservation problems. These interrelated program activities are primarily for the conservation, protection, and improvement of land and water resources for the beneficial uses of all the people.

SOIL CONSERVATION SERVICE—Continued

General and special funds:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soil; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft, **[\$100,511,000] \$104,103,000: Provided,** That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for one building to be constructed at a cost not to exceed \$25,000 and eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building: *Provided further,* That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further,* That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a-590f), in demonstration projects: *Provided further,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), and not to exceed \$5,000 shall be available for employment under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further,* That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. (5 U.S.C. 511-512, 565a; 7 U.S.C. 1387, 1807; 16 U.S.C. 590g-1; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

Assistance to soil conservation districts, communities and other cooperators, consists mainly of the following:

(a) Standard soil surveys and investigations, with interpretations and publications, which provide physical land facts needed for local program development, farm and ranch conservation planning, installation of planned practices and for use by other Federal, State and local agencies;

MAIN WORKLOAD FACTORS

	[In millions of acres]			
	1964 actual	Total as of June 30, 1964	1965 estimate	1966 estimate
Standard soil surveys:				
New mapping.....	40.6	-----	40.0	39.5
Conversion from conservation surveys.....	16.8	-----	16.5	16.0
Total	57.4	526.5	56.5	55.5
Conservation surveys.....	2.6	296.0	2.5	2.5
Total soil surveys	60.0	1,822.5	59.0	58.0

¹ Cumulative areas mapped in districts, all programs.

(b) Technical assistance to cooperating farmers and ranchers in the planning of individual conservation programs for orderly land use adjustments and installation of needed conservation treatments; (c) technical programming, installation services and consultation with those practices and measures provided for in farm and ranch conservation plans; (d) technical assistance to community groups with water facilities and control problems that can best be solved through coordinated local action; (e) the granting of special equipment acquired from Federal surplus to soil conservation districts for use in applying planned conservation practices; (f) water supply forecasts developed from snow surveys in Western States which are useful in making efficient seasonal use of water; (g) the selection and testing of plant materials to determine their suitability for erosion control and conservation purposes; (h) technical assistance to participants in the Agricultural Conservation Program in establishing specified practices; (i) technical services to participants in other programs involving land use adjustments along with resource improvements; (j) technical assistance in planning and applying the soil and water conservation practices for which loans are made by the Farmers Home Administration; (k) consultation and assistance to local rural areas development committees; and (l) program planning with consultation services in urban fringe areas.

MAIN WORKLOAD FACTORS

Total number	1964 actual	1965 estimate	1966 estimate
Soil conservation districts.....	2,971	3,000	3,025
District cooperators (cumulative).....	1,930,718	1,970,000	2,000,000
Basic conservation plans and revisions (annually):			
Number.....	132,036	130,000	135,000
Acres.....	56,591,204	56,000,000	58,000,000
Basic plans (cumulative).....	1,444,290	1,470,000	1,500,000
Landowners and operators assisted.....	1,039,365	1,040,000	1,050,000

Combinations of needed soil and water conservation practices are planned together and in relation to each other so as to have a well balanced conservation program in each district and for each farm or ranch. Both vegetative and structural measures are used in accordance with the needs of the land for conservation treatment and improvement. Each plan reflects the decisions of the cooperating farmer or rancher as to how he will use and treat his land.

Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments with each cooperator, help to evaluate the costs and returns of conservation farming, and furnish assistance in applying the needed treatment.

Under proposed legislation, 1966. A reduction of \$20,000 thousand is anticipated for 1966 under legislation being proposed to authorize the establishment of a public enterprise revolving fund to finance in part the cost of technical services provided to soil conservation districts and cooperating farmers, ranchers and other landowners in the design, layout, and installation of planned soil and water conservation practices. The proposed legislation would require that cooperating soil conservation districts or landowners and operators pay to the Service up to 50% of the cost of technical assistance furnished to help install planned practices on their lands. Receipts derived from this source and deposited in the fund would be available in their entirety for installation services.

WATERSHED PLANNING

For necessary expenses for small watershed investigations and planning, **[\$5,524,000]** in accordance with the Watershed Protection and Flood Prevention Act, as amended (16 U.S.C. 1001-1008), to remain available until expended, \$5,721,000, with which shall be merged the unexpended balances of funds heretofore appropriated under this head: Provided, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), and not to exceed \$50,000 shall be available for employment under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a). (5 U.S.C. 511-512, Department of Agriculture and Related Agencies Appropriation Act, 1965.)

Small watershed project investigations and planning.—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in co-operation with the local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost-sharing and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development.

The Department cooperates with the States and other agencies in installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the costs of certain works of improvement. The Department also cooperates with other agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated programs.

MAIN WORKLOAD FACTORS

Status of projects approved for operations	1964 actual	1965 estimate	1966 estimate
Approved, current fiscal year.....	96	100	100
Approved, cumulative at June 30.....	569	669	769

Completed, cumulative at June 30.....	66	101	136
Work in progress at June 30.....	503	568	633

1. *Watershed works of improvement.*—The Department provides technical and financial assistance to local organizations to install the watershed works of improvement for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife development features specified in the work plans.

(a) *Pilot demonstration watersheds.*—Sixty-two pilot watersheds were started in 1954 in cooperation with local sponsors under authority of the Act of April 27, 1935 (16 U.S.C. 590a-f) to demonstrate and evaluate the effectiveness of works of improvement installed in small watersheds for watershed protection and flood prevention. As of June 30, 1964, work had been discontinued in 8 projects and completed as planned in 48 except for project evaluation studies which will be underway until 1970 in some of these. The following table shows the current status of the pilot watershed projects. Obligations for project evaluation studies are not reflected in the table subsequent to 1959 as these costs were determined not properly chargeable to projects. Obligations for such studies amounted to \$113 thousand in 1964 and are estimated at \$105 thousand in 1965 and \$100 thousand in 1966.

SOIL CONSERVATION SERVICE—Continued

General and special funds—Continued

WATERSHED PROTECTION—Continued

(b) *Public Law 566 watersheds.*—After local sponsoring organizations have developed watershed work plans with the Department's assistance, or with State or local resources, and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution in excess of \$250 thousand for construction or any single structure having a capacity in excess of 2,500 acre-feet require Congressional approval), technical services and financial assistance are provided for specified works of improvement. On non-Federal lands local sponsoring organizations must contract for construction work, operate and maintain the projects, and in the case of multiple-purpose structures, bear a share of construction costs. In addition, local organizations must acquire water rights and furnish land, easements, and rights-of-way for all structural measures except that the Federal Government may pay up to one-half the cost of land, easements, and rights-of-way allocated to public fish and wildlife and recreational developments. Federal agencies do this work on Federal lands which they administer with appropriate contributions being made by the local people who receive benefits.

Pre-construction land treatment and engineering services are furnished to all approved projects before they are

advanced to the construction stage. During the pre-construction stage, surveys and investigations are made and detailed designs, specifications, and engineering cost estimates are prepared for construction of structural works; areas are delineated where easements are required and technical services are furnished for accelerating planning and application of land treatment measures if provided for in the watershed work plan.

The project construction stage begins with the execution of the first project agreement for construction of works of improvement. Under a project agreement the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an inter-related group of structures. The agreement obligates the Department to furnish its share of the construction cost. Payments are made to the local contracting organization in accordance with the project agreement as the work progresses. Engineering and other services are provided for the preparation of contracts and inspection of construction. Technical assistance in planning and installing land treatment measures is continued as called for in the watershed work plan.

The following tabulation shows the status of Public Law 566 projects and amounts obligated or estimated to be obligated. The table does not reflect minor obligations for project evaluation studies (\$101 thousand cumulatively as of June 30, 1964), or for balances remaining in the undistributed equipment account (\$443 thousand cumulatively as of June 30, 1964).

6. Total obligations (cumulative).....	---	217,565	---	269,831	---	323,854

¹ Includes \$64 thousand comparative transfers to other accounts.

The 1965 program contemplates initiation of construction in 69 watershed projects, involving 1965 estimated obligations of \$15.4 million and total Federal cost of \$65.6 million. The 1966 estimate provides for starting about 70 projects with 1966 obligations of \$15.9 million and total Federal cost of \$70 million.

2. *Loans and related expense.*—Loans are made to local organizations to finance the local share of the cost of installing planned works of improvement in approved watershed projects. Repayment with interest is required within 50 years after the principal benefits of improve-

ments first become available. Of the 1966 estimate for watershed protection, not to exceed \$7 million is to be available for such purpose together with the unobligated balance of loan funds carried over from prior years, if any. The estimate does not forecast any unobligated balance in loan funds at the end of the fiscal year 1965 or 1966.

The following tabulation shows the status of the watershed protection loan program and amounts obligated or estimated to be obligated for loans to local sponsoring organizations of watershed projects.

3. *River basin program development and coordination.*—Section 6 of Public Law 566, 83d Congress, as amended, authorizes the Department to cooperate with other Federal, State, and local agencies in making surveys and investigations of the watersheds of rivers and other waterways as a basis for the development of coordinated water and related land resources programs. The Department is currently participating in cooperative surveys and investigations in river basins with the Corps of Engineers and other interested Federal and State agencies. The Department is represented on the Interagency Committee on Water Resources which was established to coordinate water and related land resource activities of Federal departments and agencies. The Department also maintains representation on various river basin interagency committees, which serve as points of contact and coordination between representatives of this Department and of other Federal departments and agencies and the States in these basin areas, to keep all concerned mutually informed of the activities of the member agencies and to facilitate matters of interagency coordination. The Department in 1964 maintained such representation on committees in the Arkansas-White-Red, Columbia, Missouri, Northeast, Pacific Southwest, and Southeast areas.

This Department and the Departments of the Army, the Interior, and Health, Education, and Welfare have jointly considered river basin surveys and investigations currently needed to attain the goal proposed by the Senate Select Committee on National Water Resources and recommended by the President for surveying the river basins of the Nation. Based on this joint consideration, this estimate includes \$3.2 million for conducting these interagency comprehensive surveys during fiscal year 1966, \$1.7 million to continue other cooperative river basin surveys begun in prior years and to start additional surveys in cooperation with States, and \$0.7 million for interregional economic analyses and interagency coordination activities.

FLOOD PREVENTION

For necessary expenses, in accordance with the Flood Control Act, approved June 22, 1936 (33 U.S.C. 701-709, 16 U.S.C. 1006a), as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including funds for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), and not to exceed \$100,000 for employment under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), to remain available until expended; **[\$25,423,000]** \$25,417,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated: *Provided further*, That not to exceed **[\$1,000,000]** \$200,000, together with the unobligated balance of funds previously appropriated for loans and related expense, shall be available for such purposes.

For an additional amount for emergency measures for runoff retardation and soil-erosion prevention as provided by section 216 of the Flood Control Act of 1950, \$900,000. (5 U.S.C. 511-512; Department of Agriculture and Related Agencies Appropriation Act, 1965; Supplemental Appropriation Act, 1965.)

Advances.....	19			
Total selected resources.....	8,045	10,336	13,711	12,928

1. *Works of improvement.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention and for furthering the conservation, development, utilization, and disposal of water in the 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares in the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development facilities.

The Department furnishes additional technical and in certain instances financial assistance to landowners to accelerate planning and installation of land treatment measures for runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land, easements and rights-of-way, water rights, and the entire cost of works of improvement for non-agricultural water management measures, except those for fish and wildlife development and recreation, and operate and maintain all completed works of improvement.

2. *Loans and related expense.*—Loans are made to local organizations to help finance their share of the costs of planned works of improvement. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Of the 1966 estimate for flood prevention, not to exceed \$200 thousand is to be available for such purpose, together with any unobligated balances of loan funds carried over from prior years. About \$2.6 million is available for this purpose during 1965, a significant portion of which will not be required during that year.

GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16(b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956 (16 U.S.C. 590p), **[\$14,744,000]** \$14,864,000, to remain available until expended. (5 U.S.C. 511-512; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

¹ Includes capital outlay as follows: 1964, \$19 thousand; 1965, \$50 thousand; 1966, \$75 thousand.
² Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1963, \$19,564 thousand; 1964, \$21,380 thousand; 1965, \$23,500 thousand; 1966, \$24,000 thousand.

This program provides cost-sharing assistance and technical services to participating farmers and ranchers in the development and installation of long-term conservation plans for their land. It is a voluntary program which supplements other conservation programs of the Department in designated counties of 10 Great Plains States. Cost-sharing contracts with individual landowners extend over periods of 3 to 10 years and include a plan of conservation operations for each farm or ranch. A time schedule for installing the cost-share practices is included as a part of each contract. The primary purpose of this program is to achieve needed land use adjustments, conservation treatments, and economic stability for each farm or ranch unit where the work is installed.

The needs for technical help increase over a period of years as more participants enter the program. This increasing workload is in two parts, namely: (a) assistance to new participants in preparing long-term contracts; and (b) installation services in accordance with the terms and period of time specified in each contract. As of June 30, 1964, a total of 12,887 farmers and ranchers were cooperating in this cost-share program. Cooperating landowners finance the entire cost of installing recurring management type practices on their land and pay some specified part of the cost-shared practices.

Program regulations provide that the cost-share rate offered in any contract shall not exceed 80 percent of the average cost of installing each eligible practice within the

SOIL CONSERVATION SERVICE—Continued

General and special funds—Continued

GREAT PLAINS CONSERVATION PROGRAM—Continued

designated county. The rate of cost-share obligations vary among practices and between States due to differences in average costs for installation. Participants in this program often install practices in accordance with their plans that are in excess of the amounts on which cost-shares are obligated. This tends to increase the farmer costs without obligations for additional cost-share payments.

Federal cost-sharing is further limited to \$2,500 for the constructing, enlarging, or deepening of any dam, pit, or pond for irrigation water; and to not more than \$2,500 for irrigation practices in any one contract, or one-fourth of the total Federal obligation, which ever is larger. There is also a cost-sharing limitation of \$25 thousand for any one contract. Under present legislation the final date for entering into such contracts with private landowners will expire December 31, 1971. Interest in the program continues to increase.

Each participant who signs a Great Plains program contract is responsible for installing his plan of operations as scheduled; and the Department is committed to furnish the necessary technical help needed for design, layout, and other services with all practices included in each plan. Cooperating farmers and ranchers are encouraged to make use of other available assistance under local, State and Federal programs as a means of further improving their land and water resources.

¹ Includes estimated capital outlay as follows: 1964, \$5 thousand; 1965, \$150 thousand; 1966, \$200 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$0; 1964, \$18 thousand; 1965, \$1,000 thousand; 1966, \$1,700 thousand.

The Department cooperates with other Federal agencies, States, and local units of government in developing and carrying out programs and plans for resource development projects on private lands, and shares in the cost of installing planned works of improvement, when justified as a public need. Loans are provided to local sponsoring organizations and to individuals in pilot projects when needed to help them finance their share of the cost on certain improvements that are in the public interest.

Technical assistance is provided for each approved area to help cooperating individuals to plan and install land treatments, for which no cost-shares are paid from this appropriation; to assist local organizations and groups with design, construction, and installation of new facilities; and for the preparation of overall work plans as a basis for resource development and economic improvement within each project area.

Ten proposed projects are expected to be approved for operations in the 1965 fiscal year. The Department will furnish technical and financial assistance when each project is approved for operations. Another 10 projects would be undertaken in fiscal year 1966 making a total of 20 projects of which at least 15 would be in operations. The main workload factors will be developed and presented when the work plans are approved.

The field work under this program consists of planning, designing and installing practices and measures, the primary purpose of which is to develop or improve the economic use of natural resources. This includes recreational facilities, and income-producing enterprises where needed. Investigations, surveys, and planning are prerequisites to the operating phases of this program. Financial contributions and other Federal assistance will be used to help install planned measures, including loans to aid local public agencies and the project sponsors in financing works of improvement as specified in approved work plans.

SOIL CONSERVATION SERVICE—Continued

General and special funds—Continued

WATER CONSERVATION AND UTILIZATION PROJECTS—Continued

The Service has been developing irrigation farming units for sale on the Eden Valley project in Wyoming where the Bureau of Reclamation has constructed the water storage facility and the principal canals. Land development for irrigation and settlement has been completed in accordance with the project plan prepared cooperatively with the Bureau of Reclamation. The farms developed in the project have been sold with the exception of four. One of these was transferred to the State of Wyoming as a demonstration farm. The other three tracts were transferred to the Department of the Interior during the 1964 fiscal year. The Eden Valley project office has been closed. A soil conservation district has been organized and staffed to furnish technical assistance in soil and water conservation to the project settlers. Sufficient funds are available from prior-year appropriations to protect the interests of the Government and to provide a reserve in case of need for adjustments in remaining unpaid obligations. No new appropriations will be required.

ALLOTMENTS AND ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations. Funds appropriated to the President. "Economic assistance".

Intragovernmental funds:

¹ Includes capital outlay as follows: 1964, \$56 thousand; 1965, \$58 thousand; 1966, \$58 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$651 thousand (1964 adjustments, -\$171 thousand); 1964, \$350 thousand; 1965, \$350 thousand; 1966, \$350 thousand.

Agricultural economics research in the Department is administered by the Economic Research Service. The results of the research program are relied upon by (a) producers, dealers, importers and exporters as aids in planning the most profitable adjustments in their operations, (b) Government agencies in formulating and administering agricultural programs, and (c) Congress in considering agricultural legislation.

1. *Farm economics.*—Research is conducted to measure, appraise, and analyze on a continuing basis, economic changes that occur in farming and in the use of rural resources and to indicate needed adjustments.

Research on the economics of farm production includes the economics of organization and management of farms; adjustments in production to prospective demands, and changing technologies; appraisals of costs and returns on farms representative of important types, sizes and locations, and the appraisal of costs of producing important commodities; development of measures of farm output and productivity; problems of farm size and capital requirements; financing of farm enterprises; taxation, insurance of land values; and appraisal of alternative agricultural production policies and programs.

Resource development economics is concerned with the management of the Nation's land and water resources and particularly the changing rural economy and institutional structure. It includes economic development; improvement of income opportunities in depressed areas; rural renewal; analysis of river basin and watershed programs, land tenure, and resource organization and policy.

The increase requested for 1966 would permit intensified analysis of financial management on family farms and water management and use.

2. *Marketing economics.*—This activity covers economic aspects of marketing farm products, including the nature of farmers' bargaining power; potentials for new products and new uses; market structure, costs and margins; the economic effects of school lunch, special milk, food stamp, and direct food distribution programs.

The 1966 budget proposes a nonrecurring increase for economic research on the away-from-home market for food.

3. *Domestic and foreign economic analysis.*—Domestic economic analysis is concerned with identifying, measuring, and analyzing: (1) the factors affecting demand, supply, and price of agricultural commodities; (2) relationships between the agricultural sector and the national economy; (3) farm income and the income of the farm population; (4) demand and consumption of farm products; (5) long-term projections of economic growth and farm products demand; (6) farm population, manpower and levels of living; and (7) historical developments in the policies, programs, and organization of the Department.

Foreign economic analysis includes trade studies and investigation of supply-demand relations. The trade and market studies focus on the problems of developing foreign markets and the effect of these developments on U.S. agricultural production. Research is carried on for more than 100 countries around the world, focusing on the forces affecting supply, demand, and trade in farm products, and their impact on U.S. agricultural exports.

The increase requested for 1966 would provide export outlook projections, and would establish a compilation program for analysis of agricultural export and import statistics for the major trading nations of the world.

¹ Includes capital outlay as follows: 1964, \$143 thousand; 1965, \$250 thousand; 1966, \$2,050 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$355 thousand (1964 adjustments, -\$124 thousand); 1964, \$313 thousand; 1965, \$313 thousand; 1966, \$313 thousand.

The Service administers programs relating to crop and livestock estimates and statistical research and service. The statistical and economic data developed on food and agriculture are essential to farmers, processors, and han-

dlers in making production and marketing decisions, and to legislators, administrators and others concerned with developing and administering agricultural programs. The basic facts provided by this service are also essential to economic analyses and other agricultural research programs.

1. *Crop and livestock estimates.*—This service provides the official estimates on this Nation's agriculture, including acreage, yield, and production of crops, stocks, and value of farm commodities, numbers and inventory value of livestock items. Data collected and published on prices paid and received by farmers are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in some 700 reports issued each year. The activity is conducted through 43 State offices serving 50 States, most of which are operated as joint State and Federal services. Co-operative arrangements with State agencies provide a considerable volume of additional data which would not be collected or made available from Federal funds. During 1964 cooperating States expended an estimated \$1.8 million of their own funds on these associated State programs. A comparison of activity data for 1963 and 1964, including work performed under cooperative arrangements is as follows:

	1963 actual	1964 preliminary
Separate mailings of inquiry forms, average per field office.....	378	383
Total questionnaires handled:		
Number distributed.....	9,750,000	9,810,000
Number of returns tabulated.....	2,950,000	2,910,000
Number of objective survey contacts (measurements and interviews).....	99,000	129,000
Number of official reports issued, all offices.....	9,900	10,000
Copies of reports distributed.....	14,300,000	14,700,000
Publications distributed.....	3,477,000	3,480,000
Special requests for information answered by field offices.....	65,800	66,400

A redirection of \$226 thousand is proposed for 1966 to complete Project A of the long-range program by eliminating or curtailing three areas of crop and livestock estimates work. This would place this phase of the long-range program on a full operating basis in all 48 conterminous States by adding the 3 Pacific coast States and the 6 New England States. The corresponding decrease required would be accomplished by (1) a reduction in the frequency of cattle-on-feed reports in 6 States, (2) the elimination of the cut flower survey in 11 States, and (3) discontinuance of the estimating programs for certain seed crops, primarily various grass seeds.

2. *Statistical research and service.*—This work includes review of all statistical forms, survey plans, and reporting and recordkeeping requirements originating in the Department and requiring Bureau of the Budget approval; liaison for coordination of statistics within the Department and with other statistical agencies; development of new and improved methods and techniques, and providing technical consulting services to other agencies of the Department; research on and development of sampling, forecasting, and other basic statistical techniques and methods to improve the crop and livestock estimates of the Department; use of and consultation on automatic data processing to develop and adopt this medium for improving the accuracy and timeliness of crop and livestock estimates; and conduct of special surveys relating to the marketing of agricultural products. A comparison of activity data for 1963 and 1964 is as follows:

	1963 actual	1964 actual
Statistical forms-reports (Federal Reports Act): Departmental clearance and review for submission to Bureau of the Budget.....	645	531
Improvement of crop and livestock estimating methods:		
Number of research projects.....	13	13
Special surveys: Number of research projects.....	15	12

The increase (non-recurring) for 1966 would be used for the purchase of a large-scale computer and related costs.

AGRICULTURAL MARKETING SERVICE

General and special funds:

MARKETING SERVICES

For expenses necessary to carry on services related to agricultural marketing and distribution as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) and other laws, including the administration of marketing regulatory acts connected therewith and for administration and coordination of payments to States; and this appropriation shall be available for field employment pursuant to section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), and not to exceed \$25,000 shall be available for employment at rates not to exceed \$75 per diem under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in carrying out section 201(a) to 201(d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1291) and section 203(j) of the Agricultural Marketing Act of 1946; \$39,566,000; \$41,232,000. (5 U.S.C. 511-512, 541a, 556b, 563-564, 575; 7 U.S.C. 51-65, 71-87, 91-99, 181-229, 241-272, 414a, 415b, 415c, 423, 440, 471-476, 501-508, 511-511g, 518, 581-589, 591-599, 1551-1610; 15 U.S.C. 251-257i; 21 U.S.C. 94a, 451-469; 26 U.S.C. 4851-4854, 4861-4865, 4871-4877, 6001, 6804, 7233, 7263, 7492-7493, 7701; 31 U.S.C. 725d; 78 Stat. 697; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

¹ Includes capital outlay as follows: 1964, \$446 thousand; 1965, \$342 thousand; 1966, \$282 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$408 thousand (1964 adjustments, -\$33 thousand); 1964, \$502 thousand; 1965, \$502 thousand; 1966, \$502 thousand.

³ Includes capital outlay as follows: 1964, \$21 thousand; 1965, \$10 thousand; 1966, \$10 thousand.

Domestic agricultural marketing and distribution service functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job is increasing in complexity as the market structure is subjected to near revolutionary changes such as concentration in food retailing, trend toward direct buying, decentralization of processing, growth of interregional competition, and growing trend toward vertical integration and contract farming.

1. *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 130 cities and towns, often with local and other support and cooperation, generally from State Departments of Agriculture.

MARKET NEWS SERVICE

Names on mailing list.....	266,108	257,758	243,419

2. *Inspection, grading, classing and standardization.*—
(a) *Poultry inspection.*—Inspection of poultry for wholesomeness is provided pursuant to the Poultry Products Inspection Act of 1957. All poultry moving in interstate or foreign commerce is required to be inspected both before and after slaughter. Birds found to be unfit for human consumption are condemned and removed from channels of trade.

POULTRY INSPECTION ACTIVITIES

	1964 actual	1965 estimate	1966 estimate
Million pounds to be inspected.....	10,741	11,203	11,690
Plants under inspection June 30.....	972	1,052	1,052
Cities in which plants are located June 30.....	607	625	625
Evisceration lines under inspection June 30.....	1,284	1,390	1,445

The increase for 1966 provides for inspection of an increased volume of poultry and for laboratory work on harmful pesticides or other chemical residues in poultry meat. Legislation will be proposed to place the service on a self-supporting basis resulting in a reduction of \$17,567 thousand for 1966.

(b). *Other inspection, grading, classing, and standardization.*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 80% of the total cost of this work was offset by fees and other revenue in 1964, which are shown principally under Agricultural Marketing Service trust funds in part II of the Budget Appendix. The increase for 1966 provides for assistance to States in applying livestock standards and for mandatory reimbursement to Employees Compensation Fund. Legislation will be proposed to (1) amend the U.S. Grain Standards Act which would include placing on a voluntary basis the grain inspection in domestic trade and establishing fees to recover the cost of that portion of the service which is of special benefit to the users of the service; (2) amend the Tobacco Inspection Act and the Cotton Statistics and Estimates Act to recover in fees the full

cost of the special benefit portion of the service; and (3) to repeal the Naval Stores and Wool Standards Acts resulting in a reduction of \$7,620 thousand in appropriated funds.

Sets of buyers.....	236	236	236

3. *Regulatory activities.*—These include the administration of regulatory laws such as Packers and Stockyards, Standard Container, United States Warehouse, and Federal Seed Acts, to assure fair play in the marketplace; to protect producers and handlers of agricultural commodities from financial loss due to careless or fraudulent marketing practices; and to preserve free and open competition in the marketing of farm products. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The increase for 1966 would be used to provide for more effective administration of the Packers and Stockyards and U.S. Warehouse Acts. Legislation will be proposed to amend the U.S. Warehouse Act to recover the full cost of that portion of the service which is of special benefit to the users of the service and to repeal the Naval Stores Act, the Tobacco Seed and Plant Exportation Act, and the two Standard Container Acts resulting in a reduction of \$690 thousand for 1966.

74 Reimbursables in excess of obligations, end of year			1,290
90 Expenditures			-24,646

Under proposed legislation, 1966.—A reduction of \$25,936 thousand is anticipated for 1966 under legislation being proposed as follows: (1) amendment to the U.S. Grain Standards Act which would include placing on a voluntary basis the inspection of grain in domestic trade and establishing fees to recover the full cost of that portion of the service which is of special benefit to the users of the service; (2) to amend the Poultry Products Inspection Act, the Cotton Statistics and Estimates Act, the Tobacco Inspection Act and the U.S. Warehouse Act to recover the full cost of that portion of these services which is of special benefit to the users; and (3) to repeal the Naval Stores Act, Tobacco Seed and Plant Exportation Act, Wool Standards Act and two Standard Container Acts.

This reduction in the Marketing services appropriation will be partially offset by a need for an appropriation of \$5 million to provide operating capital until sufficient fees are collected to permit the poultry inspection and warehouse programs to function on a self-supporting basis.

PAYMENTS TO STATES AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), \$1,500,000. (*Department of Agriculture and Related Agencies Appropriation Act, 1965.*)

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in putting to use marketing research results.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; the collection and dissemination of special State and local market information and statistics; and

improving the organizational structure of the marketing system. Through this cooperative approach, the Federal Government's leadership and money are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

In 1965 43 States are conducting about 142 projects under this program.

SPECIAL MILK PROGRAM

For necessary expenses to carry out the Special Milk Program, as authorized by the Act of August 8, 1961 (7 U.S.C. 1446, note), \$103,000,000, of which \$51,500,000 shall be derived by transfer from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612): *Provided*, That hereafter appropriations under this head shall be made in accordance with the provisions of Public Law 87-128, \$100,000,000. (*Department of Agriculture and Related Agencies Appropriation Act, 1965.*)

¹ Includes capital outlay as follows: 1964, \$1 thousand; 1965, \$4 thousand; 1966 \$4 thousand; excludes downward adjustment of \$442 thousand in prior year costs.
² Selected resources as of June 30 are as follows: unpaid undelivered orders, 1963, \$3 thousand; 1964, \$8 thousand; 1965, \$8 thousand; 1966, \$8 thousand.

This program is designed to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, child-care centers, summer camps, and similar nonprofit institutions.

From its inception in 1955 through 1962, the program was financed through advances from Commodity Credit

Corporation funds. The Agricultural Act of 1961 changed the financing to a direct appropriation beginning July 1, 1962.

1. *Cash payments to States.*—Funds are provided under letters of credit to State agencies to reimburse eligible participants for a part of the cost of the fluid milk consumed. An initial reserve is established at the beginning of the fiscal year for each State based on the total amount of reimbursement payments made during the preceding fiscal year adjusted for average growth. In especially needy schools, reimbursement payments may be made for the full cost of this milk for children who are unable to pay.

In 1964 over 2.9 billion half-pints of fluid milk were consumed by children—over six times the quantity in 1955, the first year of operation of the program. This represents more than 2% of the total nonfarm consumption of fluid milk in the United States. Milk consumed under this program is expected to continue to increase at about 6% in both 1965 and 1966.

Program activities from 1963 through 1966 are as follows:

	1963 actual	1964 prelim- inary	1965 estimate	1966 estimate
Outlets participating.....	90,486	91,890	94,000	96,000

Average reimbursement rate per half-pint.....	3.38¢	3.40¢	3.31¢	3.03¢

2. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools, and child-care institutions. Policies, procedures, and standards are developed for administering the program and determining eligibility. The program is administered directly in 8,544 outlets where no State agency has assumed the responsibility for its administration or is prohibited by law from disbursing funds to such participants.

¹ Includes capital outlay as follows: 1964, \$3 thousand; 1965, \$24 thousand 1966, \$24 thousand; excludes downward adjustment of \$63 thousand in prior year costs.

² Selected resources as of June 30 are as follows: unpaid undelivered orders, 1963, \$25 thousand; 1964, \$91 thousand; 1965, \$91 thousand; 1966, \$91 thousand.

1. *Food assistance*, in the form of both funds and food, is provided to the States and possessions in serving lunches to school children. Each State's portion of the funds available was determined by a statutory formula through fiscal year 1962. The formula took into account the number of school-age children in the State and the relationship between the per capita income of the State

and the average United States per capita income. The amendment to the Act, effective July 1, 1962, changed the formula to include participation in place of school-age population. A new provision is also included in the amendment for providing special cash assistance to needy schools in serving free or reduced price lunches.

The increase for 1966 would provide for normal growth in the program, and for initiating a program of special assistance to needy schools.

The program is operated under an agreement entered into by the State educational agency and the Department of Agriculture. Funds are advanced under letters of credit to State agencies for use in reimbursing participating schools. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served. In 1964, the States contributed to this program \$1,011 million, most of which came from payments by children. This was far in excess of the statutory matching requirement of \$3 for each Federal dollar of cash payment.

This appropriation is also used to purchase food for distribution to the schools to help meet the nutritional requirements of the lunches. Transfers are made to this appropriation from the fund Removal of Surplus Agricultural Commodities for the purchase and distribution of agricultural commodities and other foods. Further, commodities acquired under price support and surplus removal programs are available to the schools. The volume of surplus commodities distributed to schools, however, depends upon market conditions.

The program during the peak month in 1964 provided lunches to over 34% of the approximately 46.9 million school children in the country. The number of lunches served increased approximately 5.63% over 1963. Participation in the program in December 1963 reached 16.0 million children in 68,534 schools and an appreciable increase is expected in 1965 and 1966.

During 1964 about \$883 million worth of agricultural commodities and other foods were used in the program. Over 22% of this amount represented commodities contributed under Section 6 of the School Lunch Act and the Federal surplus removal and price support program. About 78% of the food used in the program was purchased by the schools through local suppliers.

Participation in the program from 1963 through 1966 is as follows:

	1963 actual	1964 actual	1965 estimate	1966 estimate
Number of schools (month of peak participation—March).....	67,728	69,544	69,900	71,300
Number of school children (peak thousands—December).....	14,957	16,004	16,964	17,982
Number of meals served (millions)....	2,553	2,697	2,886	3,058

Financing of the program in the last 3 years was as follows: (in millions of dollars):

	1961	1962	1963	1964
State and local contributions (total, including payments by children).....	824.7	887.8	947.5	1,011.4
Federal appropriation (National School Lunch Act):				
(a) Cash payments.....	93.6	98.7	108.5	120.8
(b) Commodity distribution (Section 6).....	61.1	69.1	58.9	59.3
Surplus commodity distribution.....	71.6	113.0	121.0	135.7
Special milk program.....	81.4	85.9	90.4	95.9
Federal contributions.....	307.7	366.7	378.8	411.7
Total, all contributions.....	1,132.4	1,254.5	1,326.3	1,423.1

2. *Operating expenses* consist of overall administration of the program including policy formulation and administrative reviews; administrative and technical assistance to State agencies and participating schools; and administering the program directly in over 3,000 private schools where the State educational agency is prohibited by law from disbursing funds.

¹ Includes capital outlay as follows: 1964, \$1 thousand; 1965, \$15 thousand; 1966, \$17 thousand.

² Selected resources as of June 30 are as follows: 1963, \$0; 1964, \$219 thousand; 1965, \$219 thousand; 1966, \$219 thousand.

This program aims at making more effective use of our abundance of food and at providing additional nutrition to those in need. Food coupons which may be used in retail stores for the purchase of commercial brand foods are issued to needy households that qualify to participate.

The Department determines—based on income, food needs and other factors—the allotment of coupons for each household unit, including the portion to be purchased. The participant's normal food expenditure is maintained by requiring that, based on family size and income, recipients will purchase a specific value of coupons. The supplemental or bonus coupons, provided free-of-charge, permit the family or person to upgrade its diet.

Coupons are issued by a non-Federal issuing office. Cash paid for the coupons by participants is deposited periodically in a designated Federal Depository. Food stores receive cash or credit for the coupons from any commercial bank which must accept them at face value. The coupons then flow through regular banking channels to the Federal Reserve banks where they are redeemed and subsequently destroyed.

Operations were started on a pilot basis late in 1961. By June 30, 1964, pilot programs, with financing from section 32 funds, were reaching over 360,000 needy persons in 22 States. The Food Stamp Act (Public Law 88-525) was enacted on August 31, 1964, providing for financing from direct appropriations. The act provides for expansion of the program through appropriation authorizations of \$75 million, \$100 million and \$200 million for fiscal years 1965, 1966 and 1967 respectively. Designation of new areas to be affected is required to be based on recommendations from States desiring to participate.

The 1965 Supplemental Appropriation Act makes available \$25 million in addition to the \$35 million of section 32 funds authorized for the program in the regular 1965 Appropriation Act. This will provide for the areas in operation on July 1, 1964 and permit expansion during 1965 to reach an additional 640,000 persons in other areas. The increase for 1966 would provide for financing on a full-year basis the program level expected by June 30, 1965

AGRICULTURAL MARKETING SERVICE—Con.

¹ Includes capital outlay as follows: 1964, \$3 thousand; 1965, \$3 thousand 1966, \$3 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders 1963, \$0; 1964, \$2 thousand; 1965, \$2 thousand; 1966, \$2 thousand.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491-497, 499a-499s). Public Law 87-725, enacted October 1, 1962, authorizes an increase in fees from \$25 to a maximum of \$50. Effective January 1, 1963, the fee was increased to \$36.

These acts are intended to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payments of reparation awards, and (c) suspension or revocation of license and/or publication of the facts. Approximately 22,000 licenses were in effect on June 30, 1964, and a decrease of 500 is expected in 1965 due to the trend in the industry to fewer but larger dealers. The number of complaints received is expected to continue to average around 2,200.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30% of customs receipts collected during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of Interior to encourage the distribution of fishery products), plus unused balances up to \$300 million are available for expanding domestic and foreign market outlets for farm commodities. As provided in recent appropriation acts, transfers have been made from this fund primarily to the school lunch program for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. Section 32 funds are also authorized for the administration of marketing agreements and orders. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities.

1. Commodity program payments are of four types: (a) Direct purchases are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; (b) Diversion payments enable processors to purchase surplus commodities on the domestic market, divert them to by-products and new uses, and sell them at prices comparable

AGRICULTURAL MARKETING SERVICE—Con.

General and special funds—Continued

REMOVAL OF SURPLUS AGRICULTURAL COMMODITIES (SECTION 32)—Continued

(Permanent, indefinite)—Continued

to competing products, thus creating new markets for surplus commodities; (c) *Export payments* enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; (d) *Production payments*, none of which were made in 1964, help to reestablish farmers' purchasing power. During the past 2 years assistance under these programs was given to the following commodity groups (in millions of dollars):

Obligations	1963	1964
Dairy products.....	---	85.0
Eggs and poultry.....	24.4	27.0
Fruits.....	3.7	3.1
Grains.....	.1	4.7
Livestock products.....	58.9	123.0
Peanut butter.....	3.0	12.1
Tobacco.....	3.0	2.0
Vegetables.....	2.8	1.3
Miscellaneous.....	.2	1.0
Total.....	96.1	259.2

The use of section 32 program funds is contingent upon economic conditions. The estimates for both 1965 and 1966 reflect full use of available funds except for the \$300 million carryover. Within the total each year, provision will be made for the foreseeable needs for perishables and other activities regularly financed with section 32 funds. It is planned that any remaining amount may be used to buy from Commodity Credit Corporation commodities which would otherwise be donated under section 416.

Since it is not possible to determine what commodities will be in surplus in the future, it is not feasible to estimate the distribution of the commodity program purchases for 1966.

2. *Surplus removal operating expenses* occur mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1964, including those under section 6 of the National School Lunch Act, is summarized below (in millions):

Distribution	Number of recipients (peak month)	Value of commodities distributed	Pounds of commodities distributed
By recipients:			
School children.....	17.8	\$194.9	785.0
Needy persons.....	6.1	197.1	1,140.4
Persons in charitable institutions.....	1.3	37.5	181.9
Total.....		\$429.5	2,107.3
By program:			
Section 32.....		\$125.7	433.6
Donation by Commodity Credit Corporation, section 416.....		244.6	1,416.8
Section 6, National School Lunch Act.....		59.2	256.9
Total.....		\$429.5	2,107.3

In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1964 the monthly plentiful foods list contained an average of 7 foods, and 9 national and 29 area, State, and local drives were conducted.

3. *Marketing agreements and orders* are put into effect upon request of producers or handlers after hearings and investigations, and approval by producers (and handlers in case of marketing agreements). They help to stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1964, there were 82 orders in effect for milk, 45 covering tree fruits, tree nuts, and vegetables and one order for shade-grown tobacco. The expenses of advisory committees established to advise the Secretary, public hearings, referenda to determine producer sentiment and other developmental work as authorized by the Agricultural Act of 1961 is also financed under this project.

The primary function of the Foreign Agricultural Service is to help American agriculture maintain and expand foreign markets for its products.

The agency performs two principal kinds of service functions: (a) It helps to develop foreign markets for U.S. farm products through aggressive market promotion under special export programs and through helping to secure international trade conditions that are favorable toward our products; (b) it maintains a worldwide agricultural intelligence and reporting service to assist U.S. agricultural industry in its export operations. This is done through a continuous program of analyzing and reporting foreign agricultural production, markets, and policies.

1. *International trade.*—The Service directs and coordinates Department responsibilities in international trade agreement programs and negotiations, utilizing authority of the Trade Expansion Act. It identifies and seeks to reduce foreign barriers to U.S. agricultural exports. It continuously examines and reports on developments in foreign trade policies which affect U.S. trade policies and operations and recommends courses of action. (A current example is the European Economic Community whose Common Agricultural Policy threatens to reduce sales of certain U.S. agricultural products to the area.)

The Service recommends Department positions on trade agreements and international commodity agreements. It continuously reviews and reports trade regulations of countries signatory to the General Agreement on Tariffs and Trade as such regulations affect the movement of U.S. farm products in world trade.

It administers a program of import controls in accordance with Section 22 of the Agricultural Adjustment Act as amended, and is responsible for administering any import controls established under the new beef import control legislation of 1964.

2. *Agricultural attachés.*—The Service maintains agricultural attachés at 59 foreign posts who assist in the development of markets abroad for U.S. agricultural commodities, working closely with numerous U.S. agricultural trade groups. They maintain continuous contacts with foreign governments in the interest of obtaining more favorable import treatment for American farm products. They carry out a comprehensive schedule of reporting foreign agricultural production, marketing, and

trade policy developments as a means of keeping the U.S. agricultural industry currently informed.

3. *Export programs.*—The Service carries out export programs (a) to expand commercial sales of all U.S. farm products in world markets and (b) under the Public Law 480 program, to sell and ship U.S. surplus farm products to less developed countries under long-term dollar credit sales agreements authorized by title IV of Public Law 480 and under foreign currency sales agreements authorized by title I of Public Law 480. About three-fourths of U.S. agricultural exports are commercial sales for dollars. The Service works with 44 U.S. agricultural producer and trade groups in 67 countries in carrying out commercial sales promotion programs under cooperative agreements. Such programs are jointly financed. Contributions from the Service come from foreign currencies received in payment for surplus commodities sold under title I of Public Law 480.

About one-fourth of U.S. agricultural exports move under Public Law 480 programs, largely the title I sales of surplus commodities for foreign currencies and to a lesser but increasing extent the long-term dollar credit sales under title IV. The Service develops title I and title IV sales agreements with governments of friendly foreign countries and develops and negotiates title IV sales agreements with the U.S. or foreign private trade entities. The Service is responsible for export shipment of the commodities and for assurance that such commodities actually are received and utilized in the importing countries. Also the Service, under title III of Public Law 480, is responsible for initiating and programing contracts involving the donation of surplus food commodities made available to voluntary and intergovernmental agencies that operate in approximately 115 countries.

4. *Commodity programs.*—Information essential to foreign marketing of specific U.S. farm commodities is obtained, analyzed, and made available to U.S. farm and trade groups. Foreign agricultural competition similarly is analyzed and reported. Marketing programs, in which producers, exporters, and Government officials participate, are developed to maintain and expand the foreign market for U.S. farm products. Assistance is given to U.S. trade representatives in negotiations with foreign officials. Assistance is given to American exporters and foreign importers to bring them together under conditions favorable to trade.

5. *Barter and stockpiling.*—The Service, in cooperation with other government agencies, conducts a barter program designed to utilize surplus agriculture commodities, in lieu of dollars, in acquiring from other countries, goods, materials, and equipment required by other government agencies and for the national and supplemental stockpiles. This work is financed from other funds transferred from Administrative expenses, Commodity Credit Corporation.

6. *General sales management.*—The Service administers a general sales management program to develop export sales and related pricing policies and programs, including dollar sales on short and long-term credit. The program also includes price and quality review. Foreign data such as prices, stocks, and rail, truck, barge, and ocean freight rates and other market information is collected for use in program development. Information concerning prices and other sales terms, sales programs, and commodity availabilities is furnished to U.S. exporters, foreign importers, and foreign government officials. This work is financed with funds transferred from Administrative expenses, Commodity Credit Corporation.

Market development projects.—Foreign currencies generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and

Assistance Act of 1954, as amended, as well as foreign currencies acquired by the United States from other sources, are used by the Foreign Agricultural Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco.

The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In 1966 it is planned that the unobligated balance brought forward in this appropriation will be used to purchase those currencies necessary to carry on the program. Dollar funds for use in other countries are included in the appropriation Salaries and expenses.

INTERNATIONAL AGRICULTURAL DEVELOPMENT SERVICE

The Service administers the Department's responsibilities in the agricultural phases of the foreign economic assistance programs. This includes direction of the Department's activities under agreement with AID, particularly in agricultural assistance and training programs for foreign areas. It maintains relationships with international and U.S. organizations, including the land-grant institutions, farm organizations, foundations, and other agricultural groups to utilize the scientific and

institutional competence of American agriculture in carrying out such programs. The Service is financed entirely with funds allocated from the Agency for International Development.

ALLOTMENTS AND ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation, Funds appropriated to the President, "Economic assistance".

COMMODITY EXCHANGE AUTHORITY**General and special funds:****SALARIES AND EXPENSES**

¹ Includes capital outlay as follows: 1964, \$3 thousand; 1965, \$2 thousand; 1966, \$2 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$3 thousand; 1964, \$7 thousand; 1965, \$7 thousand; 1966, \$7 thousand.

The major objectives of the Commodity Exchange Authority are to maintain fair and competitive pricing in the commodity futures markets by preventing manipulation and other abusive trading practices. Enforcement of the Commodity Exchange Act requires supervision over 18 regulated commodities on 17 exchanges currently designated as contract markets. The amount of futures trading in fiscal year 1964 was greater than in any previous year of market regulation under the Commodity Exchange

Act. Transactions were estimated at 12.7 million with an estimated value of 60.4 billion dollars, a substantial increase over 1963 trading which involved 10.7 million transactions at an estimated value of 45.3 billion dollars.

1. *Licensing and auditing of brokerage houses.*—This consists of (a) prevention of the misuse of customers' funds by the analysis of financial statements of futures commission merchants and the periodic audits of their books and records; and (b) annual registration of futures commission merchants and floor brokers.

AUDITS AND REGISTRATIONS

³ Reimbursements from non-Federal sources above are in large part service charges from producers, and receipts from sales of aerial photographs (7 U.S.C. 1387).

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Agricultural Stabilization and Conservation Service. The funds consist of direct appropriation, transfers from the Commodity Credit Corporation, and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of National, commodity, State, and county offices.

The commodity offices and the data processing center in Kansas City play an important role in administering price support programs and the field operations stemming from producer loan and purchase agreements, inventory management, and merchandising activities.

The State committees are in general administrative charge of all programs carried out in their respective States. Within the framework of national policy, they determine the policies to be followed and direct the adaptation of national programs to the State.

The Agricultural Stabilization and Conservation county committees are responsible for the local administration of programs. They carry out all functions dealing directly with farmers. The elected county committee is in charge of the county office.

The programs and activities carried out by this Service include: agricultural conservation program, acreage allotment and marketing quota programs, Sugar Act program,

conservation reserve program, cropland conversion program, wheat diversion program, feed grain program, Wool Act program, granary storage program, and price support and related programs.

The activities carried out by the Agricultural Stabilization and Conservation Service fall within three major categories:

1. *Program formulation and appraisal.*—The supply adjustment, conservation, and the price support programs and the management and merchandising of commodities acquired under the price support program, have a tremendous impact on the national and, to a lesser extent, the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate even more effective programs.

2. *Operation of supply adjustment, conservation, and price support programs.*—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures, (b) holding meetings with employees and producers to discuss new programs or changes in existing programs, (c) collecting and compiling basic data for individual farms, (d) establishing individual farm allotments, (e) establishing proportionate shares for sugar farms, when necessary, (f) notifying producers of allotments, proportionate shares, productivity indexes, and payment rates, (g) determining farm marketing allocations, (h) handling appeals, (i) determining county normal yields, (j) conducting referendums and certifying results, (k) checking compliance with acreage allotments and use of diverted acres, (l) developing pooling agreements under which several farmers work jointly to solve a common conservation problem which cannot be solved by individual action, (m) issuing marketing cards so that production from the allotted acreage can be marketed without penalty, (n) processing producer requests for conservation cost-sharing, and (o) processing commodity loan documents and issuing sight drafts.

3. *Inventory management and merchandising.*—This activity includes (a) overall management of CCC-owned commodities including inspection of commercial storage facilities and stored commodities, (b) selling commodities, (c) donating commodities, and (d) accounting for loans and commodities. The value of the commodities under loan and in inventory is currently estimated at about \$5 billion.

The volume of work under some of the major programs financed from this account is set forth below:

ACREAGE ALLOTMENTS AND MARKETING QUOTAS (1963 PROGRAM)

	Number of allotments	Counties in program
Tobacco.....	580,978	935

Total U.S. requirements and quotas are determined to provide consumers with adequate supplies of sugar at reasonable prices, to protect the domestic sugar industry, and to promote the export trade of the United States. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

Payments, which supplement the income of domestic producers of cane and beets, require compliance with specified conditions of employment, production and price.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE—Continued

General and special funds—Continued

SUGAR ACT PROGRAM—Continued

Payments are also made for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

Production estimates for the 1965 crop year assume that restrictive proportionate shares will be established on the 1965 sugarcane crop in the Mainland cane area and on the 1965 sugarbeet crop. Production estimates for the 1964 continental beet and cane crops exceed production estimated in the 1965 Budget. Accordingly, a supplemental appropriation for 1965 is proposed for separate transmittal.

Tax collections from imports of sugar exceed total obligations by nearly \$542 million for fiscal years 1938 through 1964.

Estimated production by areas is shown in the following table:

THOUSANDS OF SHORT TONS, RAW VALUE

Area	1963 crop year	1964 crop year	1965 crop year
Continental beet area.....	3,100	3,250	3,150

Under existing legislation, 1965.—A supplemental appropriation for fiscal year 1965 in the amount of \$13 million is proposed for separate transmittal. Current forecasts indicate that production will be substantially more than anticipated under the 1965 appropriation. The proposed supplemental appropriation would provide the additional funds necessary for 1964 crop payments.

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16(a), and 17 of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U.S.C. 590g-590(o), 590p(a), and 590q), including not to exceed \$6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, **[\$225,000,000]** \$220,000,000, to remain available until December 31 of the next succeeding fiscal year for compliance with the programs of soil-building and soil- and water-conserving practices authorized under this head in the Department of Agriculture and Related Agencies Appropriation Acts, **[1963]** 1964 and **[1964]** 1965, carried out during the period July 1, **[1962]** 1963, to December 31, **[1964]** 1965, inclusive: *Provided*, That none of the funds herein appropriated shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That no portion of the funds for the current year's program may be utilized to provide financial or technical assistance for drainage on wetlands now designated as Wetland Types 3 (III), 4 (IV), and 5 (V) in United States Department of the Interior, Fish and Wildlife Service Circular 39, Wetlands of the United States, 1956: *Provided further*, That necessary amounts shall be available for administrative expenses in connection with the formulation and administration of the **[1965]** 1966 program of soil-building and soil- and water-conserving practices, including related wildlife conserving practices, under the Act of February 29, 1936, as amended (amounting to **[\$220,000,000]** \$120,000,000, excluding administration, except that no participant shall receive more than \$2,500, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community): *Provided further*, That not to exceed 5 per centum of the allocation for the current year's agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further*, That for the current year's program \$2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (7 U.S.C. 1010-1011, 1334 notes, 1379a note, 1427, 1923; 16 U.S.C. 590g-590h, 590p-1; 22 U.S.C. 287i-287l; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

Contract authorization	220,000	220,000	120,000
Unfunded balance, end of year	-225,000	-220,000	-120,000
Appropriation to liquidate contract authorization	215,000	225,000	220,000

This program is designed to encourage conservation by sharing with farmers, ranchers, and woodland owners the cost of carrying out approved soil-building and soil- and water-conserving practices, including related wildlife-conserving practices, which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing (which may be in the form of conservation materials and services or a payment after completion of the practice) averages approximately 50% of the cost.

Conservation measures for which cost-sharing is offered include those which are primarily for (1) establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, (5) temporary protection of soil from wind and water erosion, and (6) benefits to wildlife.

Under the 1963 program, new or additional practices were established on 1,127,980 farms and ranches, consisting of 169 million acres of cropland and 405 million acres of farmland. The following practices, along with others, were installed under the 1963 program:

[In thousands]	
Constructing water storage reservoirs.....	structures... 57
Constructing terraces.....	acres... 651
Establishing stripcropping systems.....	acres... 355
Establishing permanent sod waterways.....	acres... 42
Establishing or improving enduring vegetative cover.....	acres... 5,493
Controlling competitive shrubs on range or pasture.....	acres... 1,963
Water supply and management on existing cropland and pasture through:	
Better irrigated land practices.....	farms... 25
Better drainage practices.....	farms... 53
Planting trees and shrubs.....	acres... 224
Improving stands of forest trees.....	acres... 183

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments of conservation practice cost-sharing to eligible persons.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is (in thousands of dollars):

AMOUNTS REPAYED OR ESTIMATED TO BE REPAYED ON COMMODITY CREDIT CORPORATION LOANS

[In thousands of dollars]				
	1964 actual	1965 estimate	1966 estimate	Total

This program provides for long-range agreements with farm and ranch owners and operators to make changes in their cropping systems and land-uses. These actions (1) change permanently to better productive use cropland that is not well suited for crop use, and (2) temporarily shift to better productive use land that is suitable for crop use but not currently needed for crops.

The agreements provide for payments, the furnishing of materials and services, and other assistance to farmers in consideration of their obligations to change the land-use and to install and maintain conservation practices. Agreements are for 5 or 10 years. Adjustment payments are made either upon approval of the contracts or in installments within a period of not more than 5 years. Land treatment practice payments are made after the practice is installed.

Present legislation provides a limitation of \$10 million on payments which are required to be made in a calendar year under signed agreements.

CONSERVATION RESERVE PROGRAM

For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U.S.C. 1831-1837, 1802-1814, and 1816), and to carry out liquida-

tion activities for the acreage reserve program, to remain available until expended, ~~[\$194,000,000]~~ \$150,000,000, with which may be merged the unexpended balances of funds heretofore appropriated for soil bank programs: *Provided*, That no part of these funds shall be paid on any contract which is illegal under the law due to the division of lands for the purpose of evading limits on annual payments to participants. (16 U.S.C. 590p; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

² Selected resources as of June 30 are as follows:

	1963	1964	1965
Advances.....	6		
Unpaid undelivered orders.....	2		
Total selected resources.....	8		

This program, initiated in 1956, has as its objectives (1) the adjustment of total crop acreage more nearly in line with demand by withdrawing cropland from production, and (2) establishment and maintenance of sound conservation practices on the land withdrawn. The Secretary was authorized, through calendar year 1960, to enter into 3- to 15-year contracts with producers. In return for removing designated cropland from production and for establishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period, and cost-sharing assistance for the establishment of the required practices. The total annual rental payments to a producer are limited to \$5 thousand.

Participation in the program is summarized below:

Number of contracts, 1964 program.....	166,751
Number of acres, 1964 program.....	17,249,256
Payments made in program year 1963, estimated.....	\$289,933,265
Estimated payments to be made in program year 1964.....	\$196,994,627

EMERGENCY CONSERVATION MEASURES

For emergency conservation measures, to be used for the same purposes and subject to the same conditions as funds appropriated under this head in the Third Supplemental Appropriation Act, 1957, to remain available until expended, \$4,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated for emergency conservation measures. (71 Stat. 176; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

90 Expenditures-----	3,393	6,384	3,278

¹ Selected resources as of June 30 are as follows: Advances, 1963, \$0; 1964, \$196 thousand; 1965, \$196 thousand; 1966, \$196 thousand.

This appropriation provides special funds for sharing the cost of emergency conservation measures to deal with cases of severe damage to farm and rangelands resulting from natural disasters. The criteria under which assistance may be made available are set forth in the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590(h)).

Funds are allocated for use only in those counties designated by the Secretary of Agriculture as disaster counties. Assistance is made available to treat new conservation problems which (1) if not treated will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Under the 1964 program, cost-sharing assistance is being provided to treat farmlands damaged by drought, earthquake, flood, and windstorm. There are 534 counties in 22 States where assistance is being provided.

INDEMNITY PAYMENTS TO DAIRY FARMERS

Section 331 of the Economic Opportunity Act of 1964 authorizes the Secretary to make indemnity payments, at the fair market value, to farmers who have been directed since January 1, 1964, to remove their milk from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government at the time of such use.

The authority extends through January 31, 1965. Each eligible dairy farmer will receive from all sources no more than the amount he would have received if he had produced and marketed a quantity of milk equal to his normal marketings.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allotments and allocations from other accounts are included in the schedules of the parent appropriations as follows:
Funds appropriated to the President:
"Economic Assistance."
"Revolving fund Defense Production Act."
Soil Conservation Service, "Great Plains conservation program."

Intragovernmental funds:

¹ Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes, certificates, or other obligations evidencing loans held by banks and accrued interest on such obligations. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in either borrowings from Treasury or in notes, certificates, or other obligations evidencing loans held by banks and accrued interest on such obligations.

As stated in its charter (15 U.S.C. 714-714p), the Commodity Credit Corporation was created to stabilize, support, and protect farm income and prices, help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers, and help in their orderly distribution. It may also make available materials and facilities required in connection with the production and marketing of agricultural commodities.

The Corporation's capital stock of \$100 million is held by the United States. Up to \$14.5 billion may be borrowed to finance operations.

Programs.—The budget is based on (1) price support, export, supply, and related programs, and (2) special activities.

Program obligations, commitments, and expenditures include primarily loans, purchases, incentive, and other payments, and advances and costs incident to special activities authorized by specific legislation. Storage, handling, transportation, and other related costs are also charged to programs. Operating and interest expense are not charged to programs.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1965 and 1966 budget estimates: (a) employment, production, and national income will rise moderately both in 1965 and 1966 from the

present level; (b) on the average, the general level of prices will be the same as or increase slightly over the present level; (c) developments in international relations will not be such as to affect Federal civilian programs generally (except as affected by continued international tensions); (d) generally, exports of agricultural commodities in 1966 will be at about expected 1965 levels; (e) yields for the 1965 crops are based on recent averages adjusted for trend; (f) acreage allotments and marketing quotas will be in effect for the 1965 crops of peanuts, rice, cotton, and certain kinds of tobacco; the 1965 wheat allotment will be not less than 49.5 million acres as stated in the Agricultural Act of 1964; and (g) the special programs for cotton, feed grains, and wheat which expire in 1965 will be continued and legislation will be proposed to do this.

It should be recognized that it is difficult to forecast with any degree of accuracy requirements for the year ending June 30, 1966. Many complex and unpredictable factors are involved. Some of the major ones are weather and all other factors which affect the volume of production of crops not yet planted in this country and abroad. Economic conditions generally, feed and food needs here and overseas, and available dollar exchange are others which could materially affect the estimates.

PRICE SUPPORT, EXPORT, SUPPLY, AND RELATED PROGRAMS

Price support.—The Corporation through loans, purchases, payments, and other means supports the prices of agricultural commodities to producers. This is done mainly under the Commodity Credit Corporation Charter Act (15 U.S.C. 714) and the Agricultural Act of 1949, as amended (7 U.S.C. 1421).

The 1949 act makes price support mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. It also requires support of specific nonbasic commodities. These are: tung nuts, honey, milk, butterfat and the products of milk and butterfat, barley, oats, rye and grain sorghums. The National Wool Act of 1954, as amended (7 U.S.C. 1781-1787) requires price support for wool and mohair. Price support for other nonbasic commodities is discretionary. However, whenever the price of either cottonseed or soybeans is supported, the price of the other must be set at such level as the Secretary determines will cause them to compete on equal terms on the market. The price support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing price support are loans to and purchase agreements with producers. With limited exceptions, price-support loans are nonrecourse. The commodities serve as collateral for the loan and, upon maturity thereof, the producer may deliver such collateral to satisfy his obligation without further payment, unless there is a deficiency in quantity or quality on such collateral or the producer is guilty of fraudulent misrepresentation.

Direct purchases are also made from producers and processors, depending on the commodity involved. Also, special purchases for the removal of surpluses are made under certain laws, for example: Section 308 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1697), provides for such purchases of animal fats and edible oils and their products as will tend to maintain the support level for cottonseed and soybeans without the need to acquire those commodities under the usual price support loan or purchase programs. The act of August 19, 1958, as amended (7 U.S.C. 1431 note) provides for the purchase of wheat flour, cornmeal, and processed food grain products for domestic and foreign donation programs in lieu of processing wheat and corn which Commodity Credit Corporation could make available for donation under specified laws. Section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431), provides that price supported commodities in private stocks may be made available for donation in order to prevent their waste before they can be (1) disposed of in normal domestic channels without impairing the price support program, or (2) sold abroad at competitive world prices.

A portion of the price support on feed grains and cotton is made available through issuance of negotiable payment-in-kind certificates by Commodity Credit Corporation which are handled in the same manner as payment-in-kind certificates issued under the feed grain acreage diversion program and cotton equalization program as hereinafter described. In the case of wheat, in addition to loans and purchases, producers receive marketing certificates as hereinafter described.

Price support payments are made on wool and mohair as hereafter described under the National Wool Act.

In all the price support operations, normal trade facilities are used to the maximum extent practicable.

Local banks, cooperatives, and other financial institutions are used in lending activities. Commercial facilities are used to a great extent to store loan collateral and stocks of the Corporation.

Besides the Charter Act and laws mentioned above, many other laws are applicable to the disposition of commodities acquired under the price support program. The Agricultural Act of 1949, as amended, contains the most basic provisions in section 202 (7 U.S.C. 1446a), section 407 (7 U.S.C. 1427), and section 416. The Agricultural Trade Development and Assistance Act of 1954, as amended, provides for sales of surplus agricultural commodities for foreign currency and under long-term credit and supply contracts and the donation of such commodities in Commodity Credit Corporation stocks for foreign assistance. Title II of the Agricultural Act of 1956, as amended (7 U.S.C. 1856), covers disposal of strategic and other materials acquired by barter of agricultural commodities. Most of these laws also apply to the commodity export program and foreign assistance programs and special export programs discussed later.

Section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), the act of September 30, 1950, as amended (42 U.S.C. 1855 a, b), and the act of September 21, 1959, as amended (7 U.S.C. 1427 note) are principal laws which relate to disposition of food or feed for emergency or disaster relief. Donations may be made for training in home economics courses (7 U.S.C. 1431 note) and in cotton textile processes (7 U.S.C. 1431a), and to Federal penal and correctional institutions and State correctional institutions for minors (7 U.S.C. 1859).

For accounting purposes, the Corporation credits to the price support program sales proceeds of commodities in its stocks which are disposed of through redemption of domestic and export payment-in-kind certificates and through special activities such as sales for foreign currencies.

Commodity export.—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments, and other operations. Other than in barter for stockpiling purposes, such commodities and products may be those held in private trade channels as well as those acquired by the Corporation in its price support operations. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5(d) and 5(f), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, as amended, the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641), the Agricultural Trade Development and Assistance Act of 1954, as amended, title I of the Agricultural Act of 1954, title II of the Agricultural Act of 1956, as amended, and section 9 of the act of September 6, 1958. Transactions involving export sales for foreign currencies are made under the Agricultural Trade Develop-

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued****PRICE SUPPORT, EXPORT, SUPPLY, AND RELATED PROGRAMS—Continued**

ment and Assistance Act of 1954, as amended, although such sales of commodities owned by the Corporation may also be made under its charter authority when it is advantageous to the Corporation.

The activities described below are illustrative of those conducted under this program during 1965. With respect to barter, the emphasis has been shifted to exports in connection with various types of off-shore procurement of materials and services needed by the Department of Defense, the Agency for International Development, and other agencies, for which they repay the Corporation. Barter is also made for strategic and other materials for the supplemental stockpile but on a more limited scale. Commodities available for barter vary from time to time.

To the extent sufficient appropriations are not provided in advance, expenditures under titles I, II, and IV of the Agricultural Trade Development and Assistance Act of 1954, as amended, and the International Wheat Agreement, and investments in materials transferred to the supplemental stockpile, are made by the Corporation subject to repayment from subsequent appropriations authorized for such purpose. These programs are further described under foreign assistance programs and special export programs.

To encourage export movement from free-market supplies, as well as from its own stocks, the Corporation makes payments on wheat, wheat flour, cotton, corn, grain sorghums, barley, oats, rye, rice, flaxseed, linseed oil, butter, nonfat dry milk, milkfat, and cheese. The rate of payment generally is the difference between the prevailing world export sales price and the domestic market price. Payment is generally in the form of payment-in-kind certificates (PIK) which are redeemable by the Corporation in commodities from inventories owned by it or held as price support collateral. Persons acquire such commodities from the Corporation subject to an obligation to export the commodity. Payment-in-kind certificates are also issued in payments for wheat flour, cornmeal, and other processed food grains purchased by the Corporation for use in domestic and foreign donation programs. In certain cases, costs of processing commodities owned by the Corporation for such use are also paid with payment-in-kind certificates. If commodities obtained with payment-in-kind certificates are shipped under titles I and IV of the Agricultural Trade Development and Assistance Act of 1954, as amended, or the International Wheat Agreement, the value of the certificate is charged to the applicable operation.

To help develop or expand foreign markets the Corporation also furnishes farm commodities and products for samples or exhibits at international trade fairs and donates commodities for use abroad in testing consumer acceptance and commercial market potentials.

To maximize exports of commodities owned by Commodity Credit Corporation or held as collateral for price support loans, sales of such commodities or the Corporation's interest therein are made for dollars to U.S. exporters, with payment being deferred for periods of not to exceed 36 months when covered by acceptable financial guarantees furnished to the Corporation. These deferred payment sales are made under the Corporation's charter

authority and are to be distinguished from the long-term credit and supply contracts authorized by title IV of the Agricultural Trade Development and Assistance Act of 1954, as amended, described in foreign assistance programs.

Storage facilities.—The Corporation conducts a program to provide storage adequate to fulfill its program needs. This program is conducted pursuant to sections 4(h) and 4(m), and 5 (a) and (b).

The Corporation buys and maintains (in storage-short areas) bins and equipment for care and storage of grain owned by Commodity Credit Corporation or under its control. It makes loans for the purchase, building, or expanding of storage facilities on the farm and sells to producers and others bins needed for the storage of grain. Bins sold by the Corporation may be those acquired for resale for this purpose or those which are no longer required by the Corporation for the storage of its own grain. The Corporation may also provide storage use guarantees, to encourage building of commercial storage and undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

Supply and foreign purchase.—The Corporation procures from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies. It similarly procures or aids in the procurement of such foods, commodities, products, and material for sale to meet domestic requirements during periods of short supply or during such other times as will stabilize prices or facilitate distribution. Through purchases, loans, sales, or other means, the Corporation may also make available materials and facilities needed for the production and marketing of agricultural commodities. This program is conducted under sections 5 (b) and (c) of the Commodity Credit Corporation Charter Act.

Purchases for other Federal agencies of specialized commodities not in the Corporation's price support stocks has been the main activity under this program. Purchases of limited quantities of breeder, foundation, and registered seeds of improved varieties of grasses and legumes are made by the Corporation through production contracts in order to assure supplies thereof for farmers. Section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), requires that the Corporation be fully repaid from funds of such agencies for services performed, losses sustained, operating costs incurred, or commodities bought or delivered to or on behalf of any other Federal agency. Operations not subject to section 4 may involve losses if such are necessary to the accomplishment of the objectives of the particular operation. No foreign purchases have been made in recent past years.

Feed grain acreage diversion program.—An acreage diversion program is conducted on 1964 and 1965 crops of feed grains by the Agricultural Stabilization and Conservation Service utilizing the funds, facilities, and stocks of the Corporation. Under this program acreage diversion payments are made to farmers who divert acreage from the production of feed grains (generally corn, grain sorghum, and barley) to an approved conservation use. This program is carried out under the Soil Conservation and Domestic Allotment Act, as amended by the Feed Grain Act of 1963 (Public Law 88-26, approved May 20, 1963).

Payments are made by the issuance of negotiable payment-in-kind certificates by Commodity Credit Corporation. The farmer may elect either to have the certificate redeemed in feed grains from the Corporation's stocks

or if he requests the Corporation's assistance in the marketing of the certificate he may obtain cash by issuance by the Corporation of a negotiable sight draft. The Corporation markets rights, represented by certificates on which it has made cash advances, to buyers for redemption in feed grains from its stocks. The marketing of such rights is accomplished by the sale of grain represented by such certificates.

Wheat acreage diversion and certificate programs.—A wheat acreage diversion program and a wheat certificate program for 1964 and 1965 crops are conducted by the Agricultural Stabilization and Conservation Service utilizing the funds and facilities of the Corporation. These programs are authorized by the Agricultural Adjustment Act of 1938, as amended by the Food and Agriculture Act of 1962 and the Agricultural Act of 1964.

Acreage diversion payments in the form of negotiable sight drafts issued by the Corporation are made to farmers who divert certain acres from wheat production to an approved conservation use.

In addition, two types of marketing certificates are issued to a participating farmer based on a portion of the normal production of his eligible acres planted for harvest. One covers his share in the national marketing allocation for wheat used for food products for consumption in the United States. The other covers his share of the export marketing allocation. Certificates may be sold at face value to Commodity Credit Corporation. Processors of wheat into food products may not market or remove any such food product for sale or consumption without buying domestic certificates equivalent to the number of bushels of wheat used in the manufacture of the food product. Exporters may not ship abroad any wheat without buying export marketing certificates equivalent to the number of bushels exported. Certificates may be purchased from Commodity Credit Corporation or any holder.

On the exportation of wheat and flour, the Corporation makes a refund to the exporter or allows him a credit against the amount payable for marketing certificates in an amount which is determined necessary to make U.S. wheat and flour competitive in the world market, avoid disruption of world market prices and fulfill the international obligations of the United States.

Cotton.—The Corporation makes payments to cotton handlers (other than producers) to equalize the cost of raw cotton between domestic and foreign users. This program is carried out by the Agricultural Stabilization and Conservation Service pursuant to the Agricultural Act of 1964 which provides for special programs for the 1964 and 1965 crops of cotton using funds, facilities, and stocks of the Corporation.

Payments are in the form of negotiable certificates issued by the Corporation. The handler or user may elect either to have them redeemed for upland cotton from the Corporation's stocks, to repay cotton loans, or get cash by having the Corporation assist in marketing the certificates. In the latter case, the Corporation markets the rights represented by the certificates in the same manner as it does feed grain certificates on which it has made advances.

Loan operations.—The following table reflects the loan operations of the Corporation which apply to the preceding programs (in thousands of dollars):

Undistributed expenses.—There are a number of expenses which are not charged to a specific program. These include interest on (a) the capital stock of the Corporation (b) borrowings from the Treasury, and (c) other obligations evidencing loans held by financial institutions. Also included are administrative expenses and other miscellaneous costs such as expenses of the Agricultural Stabilization and Conservation County Committees and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff and the services of employees of the Agricultural Stabilization and Conservation Service engaged in the Corporation's

activities, services performed by the Foreign Agricultural Service and other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia and rent of field office space. Estimates for 1966 include a limitation of \$36.7 million for costs of administration including a reserve of not less than 7% for contingencies.

The requested authorization excludes administrative expenses in connection with the supply program, the wool and mohair program under the National Wool Act of 1954, the International Wheat Agreement, and the sale of long-staple cotton transferred from the national stockpile. It is contemplated that full reimbursement for these expenses will be obtained and used in 1966 in the same manner as in prior years.

Expenses of acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Such expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal or State licensed inspectors and work performed on a contract or fee basis by Agricultural Stabilization and Conservation County Committees. Capital funds of the Corporation are transferred to the appropriation, Expenses, Agricultural Stabilization and Conservation Service as indicated under that appropriation item for operating expenses relating to the Corporation's programs. Also, expenses of other Federal agencies whose services are used in the handling of Corporation property are treated as program expenses, such as the services of the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted. A summary of current activities will be found on pages 159 and 160.

The Corporation receives appropriations or reimbursement for costs of these activities as described under each.

Activities currently being carried out are as follows: (See Foreign assistance programs and special export programs for details of items (1)–(5).)

- (1) *Sale of surplus agricultural commodities for foreign currencies.*
- (2) *Commodities disposed of for emergency famine relief to friendly peoples.*
- (3) *Long-term credit and supply contracts.*
- (4) *International Wheat Agreement.*
- (5) *Bartered materials for supplemental stockpile.*
- (6) *Military housing (barter and exchange).*—During

1957 a contract was completed for the disposition of Corporation-owned commodities valued at \$50 million for the construction of military housing in France with foreign currencies obtained from this transaction. Section 2681(b) of title 10 U.S.C., as amended, provides for payment to the Corporation of not to exceed \$6 million annually until liquidation of the amounts due for such foreign currencies used in the housing construction and for additional foreign currencies obtained under Public Law 480 for military housing. It is estimated that \$2 million of this will be applied against the amounts due under the Commodity Credit Corporation French housing transaction in each of 1965 and 1966.

(7) *National Wool Act.*—Under the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of about 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers in order to bring the national average price received by all producers up to the announced incentive level. The incentive level cannot exceed 110% of parity. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year but not to exceed 70% of the gross receipts of duties on wool and certain wool products imported during the preceding calendar year.

In a referendum conducted in September 1962, wool and lamb producers voted to continue the deduction from their incentive payment of an amount not to exceed 1 cent per pound of wool and 5 cents per hundredweight of unshorn lambs marketed. These funds finance promotional advertising, and related market-development activities by the American Sheep Producers' Council, Inc., under an agreement with the Secretary of Agriculture. In order to simplify program and financing operations, the marketing year under this program was placed on a calendar year basis on January 1, 1964.

COST OF THE NATIONAL WOOL ACT

(Dollars in thousands)

	Fiscal year 1964		Fiscal year 1965	Fiscal year 1966
	1962 market- ing year (actual)	1963 market- ing year (actual)	1964 market- ing year (estimate)	1965 market- ing year (estimate)
Volume of marketings:				
Shorn wool, thousand pounds...	229,138	164,223	218,200	212,500
Unshorn lambs, thousand cwt...	11,278	9,444	10,000	9,700
Mohair, thousand pounds.....	30,662	-----	-----	-----
Payment rates:				
Per pound, shorn wool, cents...	14.3	13.5	11.0	14.0
Per hundredweight, unshorn lambs, cents.....	57.0	54.0	44.0	56.0
Per pound, mohair, cents.....	2.6	-----	-----	-----
Amount of payments:				
Shorn wool.....	\$32,767	\$22,170	\$24,002	\$29,750
Unshorn lambs.....	6,428	5,100	4,400	5,432
Mohair.....	797	-----	-----	-----
Promotional and advertising programs ¹	(2,833)	(2,100)	(2,682)	(2,610)
Total payments.....	39,992	27,270	28,402	35,182
Administrative expenses.....	3,954	-----	2,025	2,011
Interest expense.....	1,988	-----	1,072	1,318
Total.....	73,204	-----	31,499	38,511

¹ Deduction from producer payments.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual and estimated payments compared with this limitation are as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
70% of customs receipts on wool and wool manufactures, cumulative from January 1, 1953, to end of preceding calendar year (estimate).....	685,296	765,796	846,296
Cumulative incentive payments on preceding marketing year (fiscal years)...	448,264	476,666	511,848
Balance of limitation available for payments on succeeding marketing years.....	237,032	289,130	334,448

Funds of the Commodity Credit Corporation are used to carry on this program. A permanent appropriation is provided to reimburse the Corporation, but the fiscal year amount is limited to 70% of all duties collected on wool and wool manufactures during the preceding calendar year.

Estimated costs and reimbursements to Commodity Credit Corporation during 1964, 1965, and 1966 are indicated in the following table (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Due at beginning of year.....	104,745	87,770	31,499
Costs for year:			
Program.....	71,216	30,427	37,193
Interest.....	1,988	1,072	1,318

Total due.....	177,949	119,269	70,010
Reimbursement to Commodity Credit Corporation.....	90,179	87,770	31,499
Appropriation 1965, 1966, and 1967.....	87,770	31,499	38,511

(8) *Grain for migratory waterfowl feed.*—To prevent damage of crops by migratory waterfowl, the Corporation is directed to furnish to the Secretary of the Interior (7 U.S.C. 442-445) such grain acquired through price-support operations and certified by Commodity Credit Corporation as available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition. This appropriation item is included under that Department.

(9) *Surplus grain for migratory birds.*—Under Public Law 87-152, approved August 17, 1961 (17 U.S.C. 448), the Secretary of the Interior may requisition grain of the Corporation to feed starving migratory birds. This appropriation item is included under that Department.

(10) *Surplus grain for resident game birds.*—Any State, under Public Law 87-152, upon the finding of the Secretary of the Interior that resident game birds and other resident wildlife are threatened with starvation, may requisition grain from Corporation stocks (7 U.S.C. 447). Recovery of costs of grain furnished to the States is included in the appropriation Reimbursement for net realized losses.

(11) *Grading and classing activities.*—The Corporation may make advances to the Agricultural Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a, 440). Such advances used for classing cotton and grading tobacco not placed under price-support loan are repaid from an appropriation of the Agricultural Marketing Service.

(12) *Research to increase domestic consumption of farm commodities.*—The Department of Agriculture and Related Agencies Appropriation Act of 1964, Public Law 88-250, approved December 30, 1963, authorized the transfer of not more than \$16 million from the appropriation, Removal of surplus agricultural commodities (sec. 32) to the Corporation to be used to increase domestic consumption of surplus farm commodities, and provided for the transfer for such purposes of such sums, not in excess of \$25 million in any one year, as may be approved by Congress. The 1965 appropriation act authorized the transfer of \$12,175 thousand of section 32 funds for this purpose. The Corporation transfers such funds to the Agricultural Research Service and Cooperative State Research Service to conduct the required research. For comparability, all transactions under this item are shown in the budget schedules for these two agencies.

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued****SPECIAL ACTIVITIES—Continued**

(13) *Research to reduce surplus commodities.*—The Department of Agriculture and Related Agencies Appropriation Act of 1964 authorized Commodity Credit Corporation to transfer not to exceed \$15 million to the Agricultural Research Service for utilization research and development, cost of production research, and other related research designed to reduce surplus commodities held or to be held by the Corporation. The recovery of costs of this research is included in the appropriation Reimbursement for net realized losses.

(14) *Soil bank program.*—Under section 120 of the Agricultural Act of 1956 (7 U.S.C. 1808) the Secretary of Agriculture uses the facilities of the Corporation to make payments to farmers under this program.

(15) *Cropland conversion, agricultural conservation and emergency conservation measures programs.*—Under section 101 of the Food and Agriculture Act of 1962, Public Law 87-703, approved September 27, 1962 (16 U.S.C. 590h(f)), the Secretary uses the services, facilities, and authorities of the Corporation to make payments to producers under programs formulated pursuant to sections 8 and 16(e) of the Soil Conservation and Domestic Allotment Act, as amended.

(16) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—The act of July 10, 1957 (71 Stat. 290), authorized the transfer of 50,000 bales of domestically grown extra long-staple cotton from the national stockpile to the Corporation for sale. Also, about 219,000 bales of extra long-staple cotton, both American-Egyptian and foreign grown, remaining in the stockpile were made available to the Corporation for disposition under Public Law 87-548, approved July 25, 1962. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts.

(17) *Loans for agricultural conservation.*—Under section 391(c) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed \$50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made in the succeeding fiscal year from funds appropriated for the agricultural conservation program.

Financing.—The programs of the Corporation are financed by capital stock, borrowings, guarantees to purchase notes or other obligations evidencing loans held by financial institutions, issuance of certificates of interest in loans held by the Corporation, appropriations to reimburse the Corporation for net realized losses, appropriations to reimburse the Corporation for costs of the National Wool Act, advances and reimbursements from appropriations for foreign assistance programs and special export programs, and receipts from operations.

Borrowing Authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies. In connection with loan guarantees, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made or held by lending agencies or other financial institutions

or certificates of interest issued in connection with the financing of price-support operations. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on certificates of interest and lending agency obligations for the period the agencies have their funds invested.

It is proposed to add a proviso to section 4 of the act of March 8, 1938, which will have the effect of (1) terminating at the close of 1965 and each succeeding fiscal year, interest on borrowings from the Treasury in an amount equivalent to the realized losses sustained by the Corporation during 1965 and succeeding fiscal years, and (2) terminating at the close of 1964 interest on unreimbursed losses of 1964 and prior fiscal years, for which the Corporation has not been reimbursed by appropriation. Interest would continue to be charged on borrowings for losses sustained during a particular fiscal year but not after the end of that fiscal year. This would limit interest expenses to borrowings for current operations and would avoid increasing future appropriation requests by interest charges resulting solely from deferral of reimbursement to the Corporation for realized costs and losses applicable to past operations.

On the basis of the budgetary assumptions described, including proposed legislation, the consequent estimated program requirements currently indicate no need for an increase in borrowing authority. Since there are so many uncontrollable factors affecting the programs of the Corporation involving crops which have not even been planted, it must be recognized that estimates of the use of borrowing authority are highly tentative. Should program developments occur which would indicate a need for funds in excess of those contained in these estimates, or if proposals for farm legislation and interest relief are not enacted, additional appropriations may need to be requested.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

(In millions of dollars)

	1964 actual	1965 estimate	1966 estimate
Statutory borrowing authority.....	14,500	14,500	14,500
Deduct borrowings from Treasury.....	13,990	12,703	12,307
Obligations to purchase loans or certificates held by financial institutions (guaranteed by Commodity Credit Corporation).....	377	835	835
Accrued interest on above obligations and certificates held by financial institutions.....	8	15	15
Total statutory borrowing authority in use.....	14,375	13,553	13,157
Net statutory borrowing authority available.....	125	947	1,343

Note.—This table does not reflect the following charges: accounts payable, accrued liabilities, and obligations outstanding other than obligations to purchase notes and certificates held by banks and accrued interest on such certificates. These do not become charges against the statutory borrowing authority until they result in either borrowings from Treasury, or loans or certificates held by banks and accrued interest on such certificates.

Reimbursement for net realized losses.—Under Public Law 87-155 (15 U.S.C. 713a11, 12), annual appropriations are authorized for each fiscal year commencing with fiscal year ending June 30, 1961, to reimburse the Commodity Credit Corporation for net realized losses incurred during such fiscal year as reflected in its accounts and shown in its report of financial condition as of the close of each fiscal year.

The realized losses reflected in the accounts of the Corporation and in its report of financial condition as of June 30, 1964, was \$3,226.8 million. However, it is estimated that an appropriation of \$2,300 million would provide sufficient funds for the operations described and for prior year commitments and contract authorizations. It would also leave a desirable operating margin so necessary to assure flexibility of operations in view of the tremendous volume of transactions handled by the Corporation.

A change in appropriation language is also being proposed regarding the interest-free borrowings on unreimbursed realized losses as discussed under borrowing authority, above.

The net realized losses of the Corporation have previously been reimbursed as follows (in thousands of dollars):

PRICE SUPPORT, EXPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK

Realized losses, 1933 to 1964, inclusive.....	24,218,763
Reimbursements by the Treasury:	
Reimbursement of realized losses:	
Appropriations (15 times).....	13,845,178
Note cancellations (6 times).....	2,697,807

Note cancellations (4 times).....	536,518
Total reimbursements.....	10,014,944
Deficit as of June 30, 1964, special activities.....	758,362

Proposed for separate transmittal (under existing legislation).—Projections of the demands on the Corporation's \$14.5 billion borrowing power indicate that it will be exhausted during January 1965. A supplemental appropriation of \$1,180,853 thousand is proposed to enable the Corporation to finance its operations during the remainder of 1965. This amount is the unreimbursed realized loss incurred in 1962 and 1963.

Note.—In addition to obligations other than liabilities the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established.

¹ The changes in these items are reflected on the program and financing schedule.

² Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes, certificates, or other obligations evidencing loans held by banks and accrued interest on such obligations. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in either borrowings from Treasury or in notes, certificates or other obligations evidencing loans held by banks and accrued interest on such obligations.

Total commitments	271,077	272,451	289,900	282,600
Change in selected resources		1,374	17,449	-7,300

³ Amounts due from foreign governments—1964, \$125,577 thousand.

⁴ Reimbursement limited to actual expenditures of preceding fiscal year and prior fiscal year amounts not previously reimbursed.

⁵ Included in Reimbursement to Commodity Credit Corporation for net realized losses.

⁶ Amount in parentheses is contained in cropland conversion program under Agricultural Stabilization and Conservation Service.

LIMITATION ON ADMINISTRATIVE EXPENSES

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed **[\$37,351,000]** \$36,650,000 shall be available for administrative expenses of the Corporation: *Provided further*, That \$945,000 of this authorization shall be available only to expand and strengthen the sales

program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such times as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal

services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof **E**: *Provided further*, That no part of the administrative funds authorized under this head or of the capital funds of the Commodity Credit Corporation shall be available to formulate or administer a cotton loan program during fiscal year 1965 which requires that micronaire readings shall be mandatory as a part of the cotton classing in connection with cotton loans **J**. (15 U.S.C. 714-714p; 31 U.S.C. 841-871; Department of Agriculture and Related Agencies Appropriation Act, 1965.)

FOREIGN ASSISTANCE PROGRAMS AND SPECIAL EXPORT PROGRAMS

A number of laws provide for the facilities of the Commodity Credit Corporation to be used in carrying out programs for exporting agricultural commodities. These laws also authorize appropriations to be made to cover costs of such programs. Advances are made to the Corporation for estimated costs. If the amounts appropriated are not adequate, the Corporation finances authorized costs in excess of the appropriations pending repayment from later appropriations. On the other hand, any amounts paid to the Corporation which are not used in a particular year will reduce appropriations needed for these programs in a later year.

FOREIGN ASSISTANCE PROGRAMS

Included in this category are the following activities currently being carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, as amended: Sale of surplus agricultural commodities for foreign currencies (title I) (7 U.S.C.

1701-1709); disposition of commodities for famine relief and other foreign assistance (title II) (7 U.S.C. 1721-1724); long-term credit and supply contracts (title IV) (7 U.S.C. 1731-1736).

Public Law 88-638, approved October 8, 1964 amended Public Law 480 to provide, among other things, that expenditures under Public Law 480 should be classified in the budget as expenditures for international affairs and finance rather than for agriculture and agricultural resources.

A change in language is proposed for 1966 to provide a single amount for titles I, II and IV, Public Law 480 programs in lieu of separate amounts for each title. The volume of program operations under titles I and II is limited by the provisions of such law. The amounts appropriated do not constitute a limitation on these operations. This change to a single amount would provide flexibility in financing these programs. They are directly influenced by such unpredictable factors as international negotiations, economic conditions in foreign countries, and availability of transportation facilities. Funds will be allocated to the several titles on the basis of need rather than highly tentative estimates. The statutory limitations on the total amount of agreements which may be entered into under title I and on the volume of operations under title II would continue to be observed. Also, the details of estimated activity will be shown in the budget presentation so that full information on planned program operations will be available.

General and special funds:

PUBLIC LAW 480

For expenses during fiscal year [1965] 1966, not otherwise recoverable during such year, and unrecovered prior years' costs, including interest thereon, under titles I, II, and IV of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1701-1709, 1721-1724, 1731-1736) \$1,658,000,000, to remain available until expended **J**, as follows: (1) Sale of surplus agricultural commodities for foreign currencies pursuant to title I of said Act, \$1,612,000,000; (2) commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of said Act, \$220,453,000; and (3) long-term supply contracts pursuant to title IV of said Act, \$35,000,000 **J**. FOREIGN ASSISTANCE PROGRAMS AND SPECIAL EXPORT PROGRAMS—Continued

General and special funds—Continued

PUBLIC LAW 480—Continued

1. *Sale of surplus agricultural commodities for foreign currencies (title I).*—Under this title, the United States accepts foreign currency in payment for surplus agricultural commodities and their products. The main purpose is to increase sales to countries unable to expand commercial purchases because of a lack of dollar exchange. As the economies of countries improve, a gradual shift from title I purchases to dollar purchases occurs.

Sales are made only to "friendly nations"—as defined in section 107 of Public Law 480, 83d Congress.

Foreign currencies received are deposited to the account of the U.S. Treasury and can be used only as stated in section 104. The dollar value of such deposits through June 30, 1964, amounted to \$8.1 billion.

Public Law 88-638 established an advisory committee to review the status and use of foreign currencies and recommend to the President as to how to assure maximum benefits to the United States from the use of foreign currencies and returns from sales made under title I. The committee consists of the Secretary of Agriculture, the Director of the Bureau of the Budget, the Administrator of the Agency for International Development, the chairman and ranking minority member of the House Committee on Agriculture and of the Senate Committee on Agriculture and Forestry. Certain proposals for use of currencies or use of principal or interest repayments (except pursuant to appropriations) are to be submitted to those two committees.

Uses fall into two groups—those of benefit to the foreign country, mainly loans and grants to promote economic development, and to support common defense, and those of benefit to the United States. The latter includes, among others: Expenses of the U.S. Government abroad; agricultural market development; educational exchange; construction of military family housing; sales of foreign currency to U.S. citizens and American tourists.

Foreign currencies for U.S. uses are subject to the appropriation process. Sales agreements specify particular uses, and in those entered into after December 31, 1964, the amount subject to the appropriation process will increase, with certain possible exceptions, from the previous minimum of 10%. Such uses reduce dollar outflow and the deficit in the balance of payments of the United States. The Corporation is reimbursed for the dollar value of currencies so used. In 1964 and 1965, such receipts have been applied to reduce prior years' unrecovered costs due the Commodity Credit Corporation. Dollar repayments of foreign currency loans have also been applied to repay the Corporation. It is anticipated that prior years' costs will have been fully paid during 1965. Thereafter, such proceeds will be applied against current costs. The appropriation estimate reflects these as a reduction in the appropriation needed.

Section 509 of Public Law 86-500, approved June 8, 1960 (7 U.S.C. 1704b note) provides that at least 75% of the total cost of foreign military housing projects (unless

otherwise specified) shall be paid from foreign currencies acquired under title I. The Department of Defense reimburses the Corporation for the foreign currencies used. Pursuant to section 2681(b) of title 10 U.S.C. as amended, the estimates reflect payment to the Corporation of \$6 million each year for amounts due under Public Law 480 and the French housing barter transaction discussed under Commodity Credit Corporation. It is estimated that \$4 million will be applied against Public Law 480 amounts due with a balance of \$52.7 million remaining unpaid as of June 30, 1966.

Sales agreements have been signed with 49 countries. They cover sales of commodities at an export market value of over \$8.9 billion. Major items are wheat, cotton, and fats and oils—74% of the market value total.

Agreements signed under title I prior to January 1, 1965, provide that the United States will finance in dollars the total U.S.-flag ocean transportation costs, and that the United States will receive foreign currencies in an amount equivalent to the foreign-flag rates. For shipments required to be made in U.S.-flag vessels under agreements signed after December 31, 1964, the foreign countries must finance in dollars the freight costs equivalent to the foreign-flag rate.

Agreements may be entered into under title I through December 31, 1966, which will call for appropriations to reimburse Commodity Credit Corporation in a total amount not in excess of \$2.7 billion plus the unused portion of prior years' authorizations for title I and dollar reimbursements from foreign currency sales. Agreements may not be made during either of the last 2 calendar years of this period which would call for an appropriation in excess of \$2.5 billion.

The following table reflects the composition of appropriations for 1964, 1965 and 1966 (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Expenses of shipments:			
Commodity Credit Corporation stocks	453,632	209,657	195,164

Cumulative totals	14,744,244	253,848	14,998,092
Deduct sales of currencies, loan repayments, and receipts from Defense Department			1,394,288
Net costs			13,603,804
Appropriations through June 30, 1966			13,551,104
Unreimbursed costs, June 30, 1966, representing amounts due from Defense Department (financed by CCC borrowing authority)			52,700

2. *Commodities disposed of for emergency famine relief for friendly peoples (title II).*—Under this title, surplus stocks of the Commodity Credit Corporation are transferred, on a grant basis, to friendly nations or friendly peoples to meet famine or other urgent or emergency relief needs. Grants are also made under authority of this title to promote economic and community development in underdeveloped countries. The Agency for International Development is responsible for administering the title II programs.

Public Law 88-638 amends section 203 to provide that \$7.5 million each year may be spent under this title to buy foreign currencies accruing under title I to meet costs (other than personnel and administrative) of cooperating sponsors, distributing agencies, and recipient agencies, such as those for essential tools and equipment. This is to assure that commodities furnished under titles II and III are used to carry out more effectively the purposes for which these commodities are furnished and to promote community and other self-help activities which would alleviate the causes of the need for such aid.

In the past 10 years, transfer authorizations were issued for about \$1,446 million worth of food under this title including ocean freight costs. Of this total, \$989 million (69%) was for the relief of victims of floods, earthquakes, droughts and plagues, and for refugees, \$165 million (11%) for child feeding, and \$292 million (20%) for economic development. Also, about \$280 million was authorized for ocean freight costs on commodities donated under section 416 of the Agricultural Act of 1949, as amended, making total authorizations of \$1,725 million for the 10 years this program has been in effect.

Section 203 provides for appropriations to cover costs of these programs. These include commodity costs, ocean freight on shipments under this title and ocean freight on shipments under section 416. Also authorized for payment from such appropriations are charges for general average contributions arising out of ocean transport of commodities furnished under the above two laws as well as section 308 of Public Law 480 and section 9 of the act of September 6, 1958.

Through December 31, 1964, a total of \$2,300 million of appropriations were authorized. Since 1958, these were at the rate of \$300 million per calendar year. Title II, as amended by Public Law 88-638, provides that programs of assistance shall not be undertaken under title II during any calendar year beginning January 1, 1965, and ending December 31, 1966, which call for appropriations

for costs incurred of more than \$400 million, plus any unused prior authorization.

The following reflects the composition of the appropriations for 1964, 1965, and 1966 (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Expenses of shipments:			
Commodity Credit Corporation stocks	150,057	140,863	217,007

1966 (estimate)	305,623		305,623
Cumulative totals	2,001,004	19,699	2,020,703
Appropriations through June 30, 1966			2,020,703

3. *Long-term supply contracts (title IV).*—This title, which was added in 1959, and amended in 1962, provides for sales of U.S. surplus agricultural commodities under long-term credit and supply contracts. The major objective is to stimulate and increase sales for dollars through credit thereby helping the development of foreign markets and the economies of friendly nations.

Generally, agreements providing for the delivery of surplus agricultural commodities over periods of up to 10 years may be entered into with the governments of friendly nations, including financial institutions acting on behalf of such nations, or with United States and foreign private trade entities. Payments in U.S. dollars for commodities delivered in each calendar year, with interest, are made over periods of up to 20 years, except in certain cases in which payment must be made within 5 years. Interest is charged from the date of last delivery of commodities under the agreement in each calendar year. Rates of interest may not be set at less than the minimum rate required by the Foreign Assistance Act for dollar repayable development loans.

Total agreements made since the inception to June 30, 1964, amounted to \$355.7 million cost value including ocean freight. Major commodities were wheat, cotton, rice, oils and oilseeds. Repayments for the period

FOREIGN ASSISTANCE PROGRAMS AND SPECIAL EXPORT PROGRAMS—Continued

General and special funds—Continued

PUBLIC LAW 480—Continued

amounted to \$4.9 million of which \$3.1 million was applied to principal and the rest to interest.

Appropriations are provided to cover costs of this program but no definite limitation is stated. Previously, appropriations were requested to cover generally the difference between total Commodity Credit Corporation costs and the agreement or export value to be paid by the foreign governments less anticipated repayments during a particular fiscal year. However, as this program has progressively increased, \$125.6 million of costs were due from the foreign governments as of June 30, 1964. The Corporation bears this charge against its borrowing authority which will not be collected for many years. Therefore, it is proposed to include this amount in the 1965 supplemental appropriation estimate as well as 1965 costs not included in the enacted 1965 appropriation. Appropriation requests thereafter will cover total estimated costs less repayments to be received during the year. This will relieve the borrowing authority for use in its mandatory price support and related operations. The foreign governments or private entities would continue to make repayments as stated in the agreements. As repayments actually are received each year, they will be applied against current costs.

The following reflects the composition of the appropriations for 1964, 1965, and 1966 (in thousands of dollars):

90 Expenditures.....		506,400	

Under existing legislation, 1965.—A supplemental appropriation of \$506.4 million is proposed to repay the Commodity Credit Corporation for (1) additional estimated costs in 1965 under title I, Sale of surplus agricultural commodities for foreign currencies, \$273 million; and (2) additional current year costs and prior year unrecovered costs under title IV, long-term supply contracts, \$233.4 million. Projections of the demands on the Corporation's \$14.5 billion borrowing power indicate that it will be exhausted during January 1965. This appropriation would help the Corporation to finance its mandatory operations during the remainder of 1965.

SPECIAL EXPORT PROGRAMS

In addition to the Foreign assistance programs described, the Commodity Credit Corporation conducts other special export programs under specific legislative authority. These are: International Wheat Agreement (7 U.S.C. 1641-1642); and Bartered materials for supplemental stockpile (7 U.S.C. 1856).

INTERNATIONAL WHEAT AGREEMENT

For expenses during fiscal year [1965] 1966 and unrecovered prior years' costs, including interest thereon, under the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641-1642), [\$31,838,000] \$27,544,000, to remain available until expended. (Department of Agriculture and Related Agencies Appropriation Act, 1965.)

Program and Financing (in thousands of dollars)

Identification code 05-48-2270-0-1-351	1964 actual	1965 estimate	1966 estimate

90 Expenditures	86,218	31,838	27,544

The International Wheat Agreement Act of 1949, as amended, authorizes the President, acting through the Corporation, to make available or cause to be made available wheat and flour at such prices as are necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States under the International Wheat Agreement which terminates July 31, 1965. The maximum and minimum prices in the current agreement are \$2.02½ and \$1.62½ per bushel, respectively, for the basic grade of wheat, No. 1, Manitoba Northern, at Fort William/Port Arthur, Canada.

The Corporation causes wheat and flour to be made available under the agreement through payments in kind to exporters of wheat and cash payments to exporters of flour. Such payments cover the difference between the export price and the cost of wheat to exporters. If the domestic market price of wheat falls below the agreement price, exporters will make commensurate refunds of payments previously received.

Appropriations are authorized to cover costs of this program. The following reflects the composition of the appropriations for 1964, 1965, and 1966 (in thousands of dollars):

90 Expenditures		54,956	

Under existing legislation, 1965.—A supplemental appropriation of \$54,956 thousand is proposed to repay the Commodity Credit Corporation for unreimbursed prior years' costs. Projections of the demands on the Corporation's \$14.5 billion borrowing power indicate that it will be exhausted during January 1965. This appropriation would help the Corporation to finance its mandatory operations during the remainder of 1965.

BARTERED MATERIALS FOR SUPPLEMENTAL STOCKPILE

For expenses during fiscal year [1965] 1966 and unrecovered prior years' costs related to strategic and other materials acquired as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to Public Law 540, Eighty-fourth Congress (7 U.S.C. 1856), [\$92,860,000] \$52,500,000, to remain available until expended. (Department of Agriculture and Related Agencies Appropriation Act, 1965.)

Program and Financing (in thousands of dollars)

Under title II of the Agricultural Act of 1956 (7 U.S.C. 1856), the Commodity Credit Corporation transfers to the supplemental stockpile, strategic and other materials acquired from the barter and exchange of agricultural commodities. This does not cover those acquired for the national stockpile or for other purposes.

Appropriations are authorized for the value of materials transferred to the stockpile. This is based on the lower

Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly-owned Government Corporation, was created on February 16, 1938 (7 U.S.C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection to farmers against loss from unavoidable causes. Since 1948, the crop insurance program has been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the expansion of the program to a national basis. Based on past experience, the Corporation began with the 1962 crop year, to expand the crop insurance program at a more rapid rate to additional counties and commodities.

Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1964, the Secretary of the Treasury held receipts for \$40 million of the authorized stock, leaving \$60 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment in the production of insured crops. The principal payments from this fund are for indemnities to insured farmers who suffer crop losses arising from causes against which crop insurance provides protection, the direct cost of adjusting losses, and part of the administrative and operating expenses. The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

Budget program.—For the 1965 crop year it is planned that the crop insurance program will be extended to 25 new counties. The following table indicates the scope of the insurance program planned for 1964, 1965, and 1966. Amounts in the 1964 column are actual and pertain to the 1963 crop year. The 1965 column pertains to the

FEDERAL CROP INSURANCE CORPORATION— Continued

FEDERAL CROP INSURANCE CORPORATION FUND—Continued

1964 crop year and reflects the current favorable growing conditions for the 1964 insured crops. Indemnities shown in the 1966 column are estimated at 90% of the estimated premium.

	1964 fiscal year (1963 crop year) actual	1965 fiscal year (1964 crop year) estimate	1966 fiscal year (1965 crop year) estimate
Number of states.....	38	36	36
Number of counties.....	1,094	1,187	1,212

Insured acreage (thousands).....	13,085	14,808	15,937
Number of crops insured.....	418,076	447,539	472,000
Premiums (in thousands).....	\$30,413	\$34,192	\$36,800
Indemnities (in thousands).....	\$23,456	\$30,351	\$33,100
Loss ratio.....	.77	.89	.90

Financing.—Income from operations will provide adequate operating funds for 1966, unless unforeseen losses occur. Therefore, no additional Capital Funds are being requested for program operations.

However, inasmuch as the Corporation is expanding at a more rapid rate, and will have an annual premium income of approximately \$43 million by 1966, a heavy loss occurring early in the fiscal year prior to the time premiums are collected could deplete the available funds below the amount necessary to pay indemnity claims.

The Corporation is requesting authority to borrow the necessary funds if required to meet such emergencies from the Commodity Credit Corporation. The following table reflects the comparison of the working capital, and insured liability from 1961 through 1966:

COMPARISON OF INSURANCE LIABILITY TO CAPITAL, FISCAL YEARS 1961 THROUGH 1966

[Dollars in thousands]

Fiscal year	Working capital at end-of-year	Insured liability	Percent of capital to insured liability
1961 actual.....	\$48,016	\$271,709	17.7
1962 actual.....	47,591	356,553	13.3
1963 actual.....	41,438	496,999	8.3
1964 actual.....	43,689	546,842	8.0
1965 estimated.....	42,493	590,000	7.2
1966 estimated.....	40,990	693,000	5.9

Operating results and financial condition.—Preliminary estimates for crop year 1964, fiscal year 1965, indicate a favorable loss ratio for the seventh year, out of the past 8 years. Premiums of \$34.2 million are estimated to exceed indemnities by \$3.8 million. For the crop years 1948 through 1963, premium income of \$314.8 million exceeded indemnity costs of \$294 million by \$20.8 million. Premium income exceeded indemnity costs in 9 years of the 16 year period.

As of June 30, 1964, the Corporation's surplus was \$3.7 million. The favorable loss experience which occurred the past six out of seven years is responsible for the current favorable financial condition of the Corporation.

The following table summarizes the insurance operations by commodities for 1964, 1965, and 1966.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation. Funds appropriated to the President, "Economic Assistance".

RURAL ELECTRIFICATION ADMINISTRATION

General and special funds:

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-924), as follows:

LOAN AUTHORIZATIONS

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3(a) of said Act, as follows: Rural electrification program, [\$365,000,000] \$350,000,000, of which [\$90,000,000] \$85,000,000 shall be placed in reserve to be borrowed under the same terms and conditions to the extent that such amount is required during the current fiscal year under the then existing conditions for the expeditious and orderly development of the rural electrification [program;] and rural telephone [program, \$70,000,000 of which \$7,000,000 shall be placed in reserve to be borrowed under the same terms and conditions to the extent that such amount is required during the current fiscal year under the then existing conditions for the expeditious and orderly development of the rural telephone program] programs; and rural telephone program, \$97,000,000. (Department of Agriculture and Related Agencies Appropriation Act, 1965.)

90 Expenditures.....	330,194	355,000	365,000

¹ Selected resources as of June 30 are as follows: Undisbursed loan obligations, 1963, \$1,012,832 thousand; (1964 adjustments - \$3,252 thousand); 1964, \$1,030,798 thousand; (1965 adjustments - \$32,270 thousand); 1965, \$1,040,528 thousand; 1966, \$1,072,528 thousand.

The Administration conducts two capital investment programs: (a) the rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making repayable loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This capital investment program is financed through loans which bear 2% interest

LOAN AUTHORIZATIONS—Continued

and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment, including machinery.

Number of borrowers.....	1,102	1,105	1,110

¹ The reserve authorization of \$65 million is proposed for use in either the electrification or telephone program.

2. *Rural telephone.*—This capital investment program is financed through loans which are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the Census of Agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. Approximately 79% of the farms now have telephone service. Cumulative Rural Electrification Administration loans through June 30, 1964, will eventually provide initial or improved service to an estimated 1,965 thousand rural subscribers.

Under proposed legislation for 1965.—To establish in 1965 a Rural Electrification Administration loan account which will reflect the net cost of the loan programs by showing it as the excess of the aggregate of the loans to be made over the current receipts on loans previously made. The account will be budgeted on a net expenditure basis. Net loan receipts are estimated to be \$168 million in 1965 and \$177 million in 1966, adjusting new obligational authority in 1966 as follows (in thousands of dollars):

Currently requested.....	447,000
Proposed revised estimate.....	102,000
Reduction in new obligational authority.....	345,000

SALARIES AND EXPENSES

¹ Includes capital outlay as follows: June 30, 1964, \$86 thousand; 1965, \$69 thousand; 1966, \$63 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$42 thousand (1963 adjustments, -\$5 thousand); 1964, \$36 thousand; 1965, \$36 thousand; 1966, \$36 thousand.

The Administration assists electrification borrowers and potential borrowers to negotiate for adequate supplies of power on reasonable terms, and makes loans for the extension and improvement of electric and telephone services in rural areas. Business management and technical help is furnished borrowers where needed to protect the Government's loan security and to assure that construction and operation of their systems conform to approved standards and will provide continuous and reliable service.

Rural housing direct loans are authorized by title V of the Housing Act of 1949, as amended, to be made to farm and non-farmowners of real estate in rural areas, to long-term farm leaseholders, and to senior citizens who are or will be owners of land in rural areas. Loans are made only to persons unable to obtain housing credit from other sources upon reasonable terms and conditions. Direct loans to individuals are repayable in not more than 33 years and bear interest at 4%. Grants are made for minor building repair. In addition to the direct loans and grants, insured loans are made to provide housing for

domestic farm labor, and to provide rental housing for senior citizens in rural areas.

1. *Rural housing grants and loans.*—Direct farm enlargement and development loans, along with building loans, are made to farmowners on potentially adequate farms who need to develop their farms so as to increase their income sufficiently to repay the loans. Grants are made to farmowners, to owners of other real estate and long-term farm leaseholders in rural areas for such items as repairing roofs, providing sanitary facilities, providing an adequate sanitary water supply, and supplying screens. In some cases, a combination building loan and grant is made. A building loan or grant or a combination loan and grant may not exceed \$1 thousand.

2. *Loans to the elderly.*—Direct building loans are made to senior citizens for the same purposes as building loans described below, provided they own land or can buy a small tract in a rural area with loan funds.

3. *Building loans.*—Direct building loans are made to farmowners, to owners of other real estate in rural areas, and to long-term farm leaseholders to construct, improve, alter, repair, or replace dwellings and essential farm-service buildings.

Insured housing loans.—Insured loans are made through the Agricultural Credit Insurance Fund utilizing funds

furnished by private investors. Annual payments of principal and interest to lenders are fully guaranteed. The Government retains at least one-half of 1% of the interest as an insurance premium.

A. *Farm labor housing loans.*—Insured farm labor housing loans are made to farmowners or to organizations to provide modest living and related facilities for domestic farm labor. These loans are repayable in not more than 33 years and bear interest not in excess of 5%. The law provides that lenders can receive up to 4½% of the 5% interest paid by the borrower. The maximum return to lenders is currently established at 4½%.

B. *Rental housing loans for senior citizens.*—Insured loans to provide moderate-cost rental housing and related facilities for senior citizens are made to individuals, corporations, associations, trusts or partnerships. These loans are repayable in the number of years best suited to the individual case with interest at 5¼% to the borrower. The Government retains at least one-half of 1% of the interest as an insurance premium. No loan may exceed \$300 thousand.

Authority for funding rural housing grants and loan activities will expire on September 30, 1965, but extension will be proposed.

Financial assistance will be provided to public or private nonprofit organizations for low-rent housing and related facilities for domestic farm labor as authorized by the Housing Act of 1964.

Assistance, not to exceed two-thirds of the total development cost, will be provided for new structures and for rehabilitation, alteration, conversion or improvement to existing structures for dwelling use by domestic farm labor, and for new structures or repairing and remodeling existing structures for use as dining halls, community rooms or buildings, infirmaries, or other essential service facilities.

Authority for this program will expire on September 30, 1965, but extension will be proposed.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders 1963, \$0; 1964, \$950 thousand; 1965, \$400 thousand; 1966, \$400 thousand.

This program was authorized by section 102 of the Food and Agriculture Act of 1962. Loans are made to local public agencies or groups for rural renewal development projects which are specifically related to conservation and land utilization. Each project will be an important component of the overall rural renewal plan previously developed to rebuild the economy of the designated area. To be eligible for designation as a rural renewal area, the locality must be one of chronic underemployment on farms and unemployment in the surrounding communities. The area must also be one in which agriculture or forestry contribute substantially to the economy. The 1966 request is to provide for continuation of program operation in five pilot project areas.

Program operations include selection and designation of rural renewal areas, technical assistance to local public bodies or officials, or organizations in the preparation of an economic development plan, and counsel to local agencies and groups for meeting legal requirements necessary for borrowing funds. The borrowing agency is designated by the State legislature or Governor to receive rural renewal loan funds and is vested with authority under State and local laws to borrow funds, buy and sell property, raise revenue, meet financial obligations and transact other necessary business functions.

Rural renewal loans are repayable in not more than 30 years with repayment of principal and interest deferred up to 5 years, if necessary. Loans bear interest at the average rate paid by the U.S. Treasury on obligations of similar maturity. The rate for 1965 is 3.137%. Loans in excess of \$250 thousand require approval of the Agriculture and Forestry Committees of the Congress.

Program administration.—The Farmers Home Administration has been assigned responsibility for the coordination, direction, and supervision of the rural renewal program. The principal administrative expenses are related to technical assistance, coordination of project plans and loan programs by the Farmers Home Administration. These expenses are estimated at \$223 thousand in 1965 and \$450 thousand in 1966. Administrative expenses allotted to the Economic Research Service will be \$27 thousand for 1965 and \$50 thousand for 1966.

This account was established pursuant to the Senior Citizens Housing Act of 1962. Loans are made under the authority of section 515(a) of title V of the Housing Act of 1949, as amended, to private nonprofit corporations and consumer cooperatives to provide modest cost rental housing and related facilities for elderly persons of low or moderate income in rural areas.

Direct loans, made from the revolving fund, are repayable in not more than 50 years and bear interest comparable to housing loans for the elderly in urban areas (currently 3 $\frac{1}{2}$ %). Administrative expenses for this program are included under the appropriation item, Salaries and expenses, Farmers Home Administration.

Legislation for extending this program beyond September 30, 1965, will be proposed.

Under proposed legislation, 1966.—Proposed legislation would amend title V of the Housing Act of 1949 to provide for a program of insured rural housing loans. The insured loan program would be supported by the special assistance and secondary market facilities of the Federal National Mortgage Association. A \$350 million level of insured housing loans is anticipated if the insured loan program becomes operative early in 1966. Families in the lower income levels would require an estimated \$300 million annually, and an estimated \$50 million annually would be needed for other applicants. In addition to the \$200 million in loans made from the proposed new fund for later sale, it is expected that approximately \$150 million in loans from private sources will be insured annually. The Rural housing insurance fund would be used for the farm labor housing and rental housing for the elderly loans presently insured through the Agricultural credit insurance fund. Authority to insure rental housing for the elderly loans through the Agricultural credit insurance fund will expire on September 30, 1965, but extension of this program is being proposed. All of these loans would be made and serviced by the Farmers Home Administration.

DIRECT LOAN ACCOUNT

Direct loans and advances under subtitles A and B, and advances under section 335(a) for which funds are not otherwise available, of the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1921), as amended, may be made from funds available in the Farmers Home Administration direct loan account as follows: real estate loans, **[\$60,000,000]** \$40,000,000; and operating loans, \$300,000,000, of which \$50,000,000 shall be placed in reserve to be used only to the extent required during current fiscal year under the then existing conditions for the expeditious and orderly conduct of the loan program. Direct loan account.—This account was established on October 16, 1961, pursuant to section 338(c) of the Consolidated Farmers Home Administration Act of 1961. Real estate and operating loans are made under the authorities of subtitle A and B of the act to farmers and ranchers and to associations unable to obtain credit from other sources at reasonable rates. Loans made under these and similar prior authorities are reported and accounted for in this account. In 1965, the total available for loans, including a \$50 million reserve for operating loans, is \$360 million. In 1966, it is proposed to carry out the estimated loan program of \$340 million through utilization of receipts to the Direct loan account representing collections on loans outstanding. No new borrowing authorization is estimated for 1966.

In addition to the direct loans, farm ownership and soil and water loans advanced by private lenders will be insured within the annual statutory insurance authority of \$200 million for these purposes. Legislation is being proposed to increase this insured loan authority to \$300 million. Contingent liabilities for these insured loans are reflected in the Agricultural credit insurance fund schedules.

*Real estate loans—*a. *Farm ownership loans.*—Direct and insured loans are made to farmers and ranchers for acquiring, enlarging, or improving farms, including farm buildings; for financing land and water development, use and conservation including recreational uses and facilities; for forestry development; for refinancing existing indebtedness; and for loan closing costs. Loans are confined to farms which are not larger than family farms. A loan cannot exceed \$60 thousand in any case. In addition, the indebtedness against a farm or other security, including the amount of the loan, cannot exceed \$60 thousand or the normal value of the farm and any additional security.

b. *Soil and water loans.*—Direct and insured loans are made to farmers and ranchers and to associations for the effective development and utilization of water supplies and for the improvement of farmland by soil and water conserving facilities and practices. Loans to associations also are made for shifts in land use including the development of recreational facilities. There is no limitation on the size of farms that may be improved with loans to individual farmers. For loans to individuals, a loan cannot exceed \$60 thousand in any case; in addition the indebtedness against a farm or other security, including the amount of the loan, cannot exceed \$60 thousand or the normal value of the farm and any additional security. For loans to associations, the unpaid principal indebtedness is limited to \$500 thousand in the case of a direct loan and \$1 million in the case of an insured loan.

Farm ownership and soil and water loans are repayable in not more than 40 years and bear interest not in excess of 5%. Insured loans are made through the Agricultural credit insurance fund with funds advanced by private lenders. Annual payments of principal and interest to lenders are fully guaranteed. The law provides that lenders can receive up to 4½% interest of the 5% paid by the borrower. The maximum return to lenders is currently established at 4½%. The Government retains at least one-half of 1% of the interest as an insurance premium. The Administration services these insured loans, makes collections, and pays the lender.

Operating loans.—Direct loans are made to farmers and ranchers for paying costs incident to reorganizing a farming system for more profitable operations; for a variety of essential farm operating expenses such as the purchase of livestock, farm equipment, feed, seed, fertilizer and farm supplies; for financing land and water development, use and conservation including recreational uses and facilities; for refinancing indebtedness; for other farm and home needs; and for loan closing costs. Loans are confined to operators of not-larger-than-family farms. The outstanding principal loan balance for operating loans is limited to \$35 thousand. Loans bear interest at 5% and may be made for periods up to 7 years, but may be re-

newed for not more than 5 additional years. Loans are secured by crop and chattel liens and, when necessary, by real estate mortgages.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund is authorized by subtitle C of the Consolidated Farmers Home Administration Act of 1961, to finance emergency loans in areas where agricultural credit is not readily available because of natural disasters. Loans are generally confined to areas designated as emergency areas.

Loans may be made outside of such areas to eligible applicants who have suffered severe production losses not general to the area. Loans also may be made to previously indebted borrowers to permit orderly repayment of such indebtedness.

Loans—(a) Emergency loans.—Emergency loans are made at 3% interest to eligible farmers, ranchers, or oyster planters and to domestic corporations or partnerships engaged primarily in farming, ranching, or oyster planting. Loans are made for any authorized purposes for which operating, farm ownership, or soil and water loans may be made by the Farmers Home Administration.

(b) Other loans.—Where necessary to protect the Government's investment, obligations are incurred in connection with outstanding loans to provide for payment of such costs as taxes and insurance. Such advances are charged to the borrowers' accounts.

Administrative expenses.—The principal administrative expenses are related to the loan programs of the Farmers Home Administration. These expenses are estimated at \$4.3 million in 1965 and 1966. Administrative expenses for the Office of the General Counsel are estimated at \$22 thousand in 1965 and 1966.

Financing the program.—No new budgetary authorization is required for 1966. A net loss of \$4.4 million is estimated on an accrual basis. Expenditures are estimated to exceed receipts by \$5.9 million on a cash basis due primarily to excess loans made over receipts during the year. During 1966, the program will be wholly financed by receipts from operations of the revolving fund.

Operating results and financial condition.—Revenue for 1966, consisting principally of interest on loans, is estimated at \$2.4 million, compared to expenses of \$6.8 million, resulting in an estimated loss of \$4.4 million. A net loss of \$4.8 million is estimated for 1965, and a net loss of \$3.9 million resulted in 1964.

Loans receivable, after allowance for losses, are expected to amount to \$75.6 million on June 30, 1966, as compared to \$74.3 million on June 30, 1965, and \$61.6 million on June 30, 1964.

The Government investment at June 30, 1966, is expected to be \$102.8 million consisting of \$205.8 million appropriated and donated, less a deficit of \$103 million.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund is used to insure farm ownership loans, soil and water loans, farm labor housing loans and loans for rental housing for the elderly, as authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961, and sections 514 and 515(b) of title V of the Housing Act of 1949. The insurance endorsement on each insured loan includes an agreement by the Government to purchase the loan after a specified initial period of not less than 3 years, at the holder's option. The initial fund of \$1 million is supplemented by loan insurance charges collected from insured loan borrowers and by borrowing from the Secretary of the Treasury. A portion of such loan insurance charges equal to at least one-half of 1% of the outstanding principal obligations must be deposited to the fund to cover losses. The remainder of such charges may be used for administrative expenses. Loans other than farm labor housing loans may be made directly from the fund from available receipts or borrowings from the Treasury for the purpose of acquiring blocks of loans if there is reasonable assurance that the loans can be sold to investors without undue delay. With respect to loans made from this fund, not more than \$25 million for farm ownership and soil and water loans and not more than \$10 million for loans for rental housing for the elderly may be held in the fund at any one time. Interest paid the Secretary of the Treasury on borrowings is based on the current average market yield of outstanding marketable obligations of the United States having maturities comparable to the notes issued for borrowings from the Treasury for operation of the fund.

Budget program.—Capital outlay is estimated at \$308.7 million in 1966, an increase of \$39 million over 1965 and an increase of \$92.7 million over 1964. Included in capital outlay is \$147.7 million in 1965 and \$153.2 million in 1966 for making loans from the fund which will later be sold on an insured basis. The increase in 1965 and 1966 in sale of loans from the fund is expected to result from the relatively favorable market for insured loans. Insured loans outstanding which are contingent liabilities against the insurance fund are expected to increase from \$578.3 million on June 30, 1964, to approximately \$788 million at June 30, 1965, and to \$968 million by June 30, 1966.

Financing.—Net repayments to the Treasury in 1966 are estimated at \$11.8 million and in 1965 at \$16 million.

Operating results and retained earnings.—Total revenue, consisting principally of loan insurance charges is estimated at \$8.8 million in 1966, an increase of about \$1.2 million from 1965.

Outstanding loans receivable of \$72.4 million are estimated at June 30, 1966. Retained earnings, available to cover future losses, are estimated to be \$20.7 million at the end of 1966. These earnings, when added to the \$1 million appropriation and estimated borrowings of \$52.8 million from the Treasury, represent a \$74.5 million Government investment.

Legislation will be proposed for establishing a Rural housing insurance fund which will be used to insure the farm labor housing and rental housing for the elderly loans presently insured through this fund.

The preceding schedule reflects expenditures out of the Consolidated working fund, Department of Agriculture. Advances are received from the Department of Commerce, Area Redevelopment Administration, to carry out continuing operations as well as special technical assistance projects. Funds are received into this account as an administrative convenience and are allotted to the individual agencies of the Department of Agriculture which carry out the program. Costs and obligations for these activities are shown in the Advances and reimbursement schedules for the individual agencies which actually received these funds.

The Area Redevelopment Act expires on June 30, 1965. Obligations and expenditures reflected for 1966 above are based upon proposed legislation to extend the act.

¹ Includes capital outlay as follows: 1964, \$7 thousand; 1965, \$7 thousand; 1966, \$7 thousand.

The Office serves as the audit and investigative arm of the Secretary of Agriculture and performs all audit and investigative activities of the Department. The Office of the Inspector General assures the Secretary of completely independent and objective selection of departmental activities to be audited; critical reviews and examination of the Department's programs and activities; and factual, unbiased reporting of the results of these audits and investigations. In so doing the Office assures that existing laws, policies and programs are effectively complied with; and insures corrective action where necessary. It also coordinates internal audit and investigative activities of the Department with the various investigative agencies of the executive and legislative branches of the Government. Increases are provided in the budget to strengthen the audit and

investigative services primarily due to the increased activities under the Food Stamp program.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department activities.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, agricultural, and closely related groups, and to the public the Department's research, action, regulatory, and other programs, using all information media. This work is carried on in close cooperation with the land-grant institutions and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

1. *Publications review and distribution.*—The Department's printed publications are reviewed, published, and distributed. Processed publications are reviewed. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's widespread activities require extensive preparation of information material for press, radio, and television use, as well as for specific agricultural outlets and the general public. Over 4,000 periodic crop, price, and market reports and press releases are issued annually. Digests, newsletters, special articles, and other editorial services are made available to press associations, farm and general publications, trade publications, daily newspapers, and encyclopedic annuals. Radio is used to reach farmers locally through single stations, and to broadcast nationally through the major networks. Films, television packages, and other services are prepared for the use of land-grant institutions, television farm broadcasters and TV networks. Information campaigns involving activities of cross-agency interest are developed using all media. The Yearbook of Agriculture is published by the Office and distributed by the Members of Congress.

3. *Review, preparation and distribution of visual agricultural information.*—Motion pictures for the Department and nonprofit organizations associated with agriculture, produced on a reimbursable basis under the Department's working capital fund, are distributed through nearly 70 cooperating State film libraries. Still photographs, illustrations, graphics, and exhibits are similarly produced for use in explaining and reporting on Department programs. News and general-type photographs of Department programs and activities are available to news media from a centralized library.

The National Agricultural Library, cooperating jointly with the two other national libraries—the Library of Congress and the National Library of Medicine—provides coverage and servicing of worldwide publications in the agricultural, chemical, and biological sciences. It serves the research, extension, regulatory, and other programs of the Department and State agricultural agencies. It contains approximately 1,229,000 volumes, probably the most extensive agricultural collection in existence. Since the Library's primary purpose is to provide for research needs, substantive publications in the animal sciences, plant sciences, agricultural chemistry, agricultural engineering, soils, forestry, agricultural products, home economics, world sociology, agricultural economics and agricultural statistics are acquired and preserved. Publications are regularly acquired from more than fifty countries on subjects ranging from apiculture to zootomy. In addition, printed information of agricultural societies, organizations, cooperatives, and general material in the field of agriculture are collected and made available for use.

NATIONAL AGRICULTURAL LIBRARY—Con.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Information contained in the agricultural literature is disseminated through bibliographies, loans, photocopies and reference services to agricultural colleges and universities, research institutions, Government agencies, agricultural associations, industry, individual scientists, farmers, and the general public in every part of the world.

During 1964, 17,236 volumes and 229,649 separate issues of periodicals were added to the collection by purchase, gift, and exchange. An additional 3,626 volumes of previously unbound material were also added during the year. During the same period 251,748 loans of books and periodicals were made and 111,789 reference questions answered.

The increase proposed for 1966 would be used to expand coverage and to continue mechanization of the Bibliography of Agriculture, and to acquire, catalog, and service essential scientific publications.

¹ Unpaid undelivered orders are as follows: 1963, \$0; 1964, \$279 thousand; 1965, \$24 thousand; 1966, \$4,661 thousand.

Present facilities are adequate to house less than half of the 1,229,000 volumes in the National Agricultural Library collection. New library facilities will enable the National Agricultural Library to properly preserve its collection and provide complete efficient services to the Nation's scientists.

Funds for the preparation of plans, specifications and drawings for new facilities were appropriated in fiscal year 1964. These plans are currently scheduled for completion in June, 1965.

The proposed increase would be used to construct a new and adequate library building at Beltsville, Md.

The Office of Management Services provides consolidated management support services to 17 agencies and offices of the Department. It was established by Secretary's Memorandum No. 1529, dated January 29, 1963, to provide greater economy and effectiveness in the rendering of management service through improved utilization of manpower and management techniques; increased specialization of professional skills; and more extensive use of time-saving equipment.

The consolidated management support functions include budget and finance, personnel and related programs, administrative services, and information work. The organization structure of OMS is based upon these functions with operating divisions providing the services for the following agencies and offices: Office of the Secretary, Office of Budget and Finance, Office of Hearing Examiners, Office of Management Appraisal and Systems Develop-

¹ Includes capital outlay as follows: 1964, \$74 thousand; 1965, \$20 thousand; 1966, \$20 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$38 thousand (1964 adjustments, \$8 thousand); 1964, \$12 thousand; 1965, \$12 thousand; 1966, \$12 thousand.

General administration covers the overall planning, coordination, and administration of the Department's programs. Also included are certain services on a departmentwide basis.

2. *Budgetary and financial administration.*—This covers departmental budgetary and financial management; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

3. *General operations.*—These embrace departmental policies and procedures for real and personal property,

and supply and records management activities. Departmentwide central services of post office, telephone, telegraph, reproduction, and supply are furnished.

4. *Management appraisal and systems development.*—This covers the coordination and direction of the development of new and improved management techniques, acquisition and utilization of data processing equipment, development of methods of measuring, the effectiveness of program operations, and the application of operations research techniques to the administrative, program, and scientific activities of the Department.

5. *Personnel administration.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. "Agriculture Decisions" is published monthly.

7. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

WORKING CAPITAL FUND, DEPARTMENT OF AGRICULTURE—CON.

This fund finances on a reimbursable basis certain central services in the Department of Agriculture, including duplicating, photographic, and other visual information services, art and graphics, motion picture, tabulating, supply, library photocopy and microfilming services, civil defense activities, interagency employee training programs and the centralized automatic data processing system for payroll, and other services. The capital consists of \$400 thousand appropriated (5 U.S.C. 542-1) and \$552 thousand donated assets, as of June 30, 1964. Earnings are retained to furnish adequate working capital.

FOREST SERVICE

The Service carries on three primary functions: (a) protection, development, and use of about 186 million acres of land in national forests and national grasslands in the United States and Puerto Rico; (b) forestry research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to improve methods for developing and managing recreation resources; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey; and (c) cooperation with States and private forest landowners to obtain better fire protection on approximately 450 million acres of forest land and nonforest watersheds, and better forest practices on about 358 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests. These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

General and special funds:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$149,944,000]** \$162,378,000, of which \$5,000,000 for fighting and preventing forest fires and \$1,910,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than \$680,000 of this appropriation may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U.S.C. 513-519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$31,685,000]** \$32,554,000.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **[\$16,955,000]** \$17,513,000.

For an additional amount for "Forest protection and utilization", for Forest research, \$1,900,000, of which \$50,000 for Forest research construction shall remain available until expended.]

For an additional amount for "Forest protection and utilization", for "Forest land management", \$800,000.] (5 U.S.C. 511-512, 524, 565a; 7 U.S.C. 428a, 1010-1012, 1621-1627; 16 U.S.C. 207c, 471-583i, 594-1-594-5, 594a, 1004-1005; 30 U.S.C. 601-604, 611-615; 31 U.S.C. 534; 42 U.S.C. 1891-1893; 43 U.S.C. 1181h-1181j; 36 Stat. 557-579; Department of the Interior and Related Agencies Appropriation Act, 1965; Department of Agriculture and Related Agencies Appropriation Act, 1965; Supplemental Appropriation Act, 1965.)

1. *Forest land management*—(a) *National forest protection and management*.—The 154 national forests and 19 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wild-life are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land. These management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (74 Stat. 215). Work programs and budget estimates are related to the Development Program for the National Forests, a plan to meet the increasing demands for specific National Forest resource needs through 1972 and for long-term objectives to the year 2000. Increases are provided in the budget to further attainment of these program objectives. Construction funds of \$16.1 million in 1965 and \$16.6 million in 1966 are budgeted, compared with \$15.7 million used in 1964, for construction or rehabilitation of campground and picnic facilities and other recreation improvements, the construction of dwellings or barracks for employee housing, fire lookouts, service and storage buildings, communication facilities, and other improvements. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

MAIN WORKLOAD FACTORS

Description	1964 actual	1965 estimate	1966 estimate
Area administered and protected:			
(a) National forest lands (acres) ..	182,337,584	182,400,000	182,500,000

Total receipts.....	137,515	140,200	142,950

(b) *Water resource development related activities*.—This activity provides for the development of recreational facilities and for other activities required by water resource projects of other agencies located within or adjacent to the national forests.

(c) *Fighting forest fires*.—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. Costs above the amounts estimated for the current and budget years are authorized to be met from advances from other Forest Service appropriations. In addition, a supplemental appropriation for 1965 is anticipated for separate transmittal.

Forest fires controlled (number).....	12,740	11,000	11,000
Area burned (acres).....	127,571	200,000	200,000

(d) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and evaluate infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust.

(e) *Acquisition of lands.*—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission.

2. *Forest research.*—Research is conducted at ten regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(a) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage for domestic livestock and improve habitat for wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation; and improve methods for developing and managing recreation resources.

(b) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. Forest fire research provides improved methods of predicting fire danger, and preparing for and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(c) *Forest products and engineering.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and less-desirable species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers. Research is also conducted to advance the mechanization and efficiency of forestry operations, and to develop and evaluate machines and similar equipment for such operations as logging, planting, timber-stand improvement, and protection of forests.

(d) *Forest resource economics.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Studies of the economics of forest crop production and of marketing of forest products are also included.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce about 85% of all timber cut.

(a) *Forest fire control.*—Assistance is furnished 49 States in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 95% of the 450 million acres of non-Federal ownership is now partially covered. During 1963 the acreage burned on protected areas was 0.72% as against an estimated 17.5% on unprotected lands. Of the total expenditures under this program, 80% is contributed by States and counties, 2% by private owners, and 18% by the Federal Government.

(b) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 70 million acres altogether—the States provide planting stock at reasonable prices. The Federal Government shares the cost of producing the stock with the State and private landowners.

(c) *Forest management and processing.*—In cooperation with State foresters, 612 projects in 2,459 counties are operated to aid small woodland owners in applying good management to their timber holdings. In 1964 these projects served some 97,063 owners and 6.1 million acres.

(d) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

Proposed supplemental due to civilian pay increases		1,172	

Roads and trails are essential to protection and management of national forests and utilization of their resources. The system consists of approximately 193,863 miles of earth- or gravel-surfaced roads and 104,656 miles of supplemental trails.

The Federal Highway Act of 1962 provides authorizations of \$70 million for 1964, and \$85 million for 1965. The Federal Highway Act of 1964 provides an additional authorization of \$85 million for 1966 and \$85 million for 1967. These authorizations are available for obligation a year in advance of the year for which authorized. The 1965 budget provided for utilization of \$72.5 million of the \$85 million 1965 authorization. This budget provides for utilization of \$81 million of the \$85 million 1966 authorization and \$3.2 million of the unused portion of the 1965 authorization. At this level, the 1966 program will involve the construction and reconstruction of about 934 miles of general purpose and recreation roads, and about 931 miles of timber access roads to harvest national forest timber, a total of approximately 1,865 miles. This compares with 1,524 miles built in 1964 and 1,900 miles being built in 1965.

Of the amounts received annually from national forest activities, 10% is available under the permanent appropriation Roads and trails for States, for construction and

maintenance within the State from which such proceeds are derived. Such amounts are merged with this appropriation for obligational purposes.

As of June 30, 1964 approximately 9,800 acres of land remain to be acquired to preserve the wilderness conditions of part of the Superior National Forest in Minnesota. The authorization for the purchase of land within this forest was increased to \$4.5 million by Public Law 87-351, approved October 4, 1961. The 1963 appropriation completed the authorization for acquisition of the remaining tracts.

FOREST SERVICE—Continued

General and special funds—Continued

[ACQUISITION OF LANDS FOR WASATCH NATIONAL FOREST]—Con.

Public Law 87-661, approved September 14, 1962, added some 24,000 acres to the Wasatch National Forest in Utah, of which only approximately 5,000 acres in scattered tracts are now in Federal ownership. The act authorizes the appropriation of \$400 thousand for purchase of privately owned lands within the area to aid in the control of floods and reduction of soil erosion as the primary value of these lands is for watershed purposes. The 1965 appropriation completed the authorization. As of June 30, 1964, approximately 8,000 acres of land have been acquired.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations [available] to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed one hundred and [twenty-nine] *twenty-six* passenger motor vehicles of which one hundred and [fourteen] *one* shall be for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed six for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), [as amended by] *and not to exceed \$50,000 for employment under section 15 of the Act of August 2, 1946 (5 U.S.C. 55a)*, in an amount not to exceed \$25,000; (c) uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); (d) purchase, erection, and alteration of buildings and other public improvements (5 U.S.C. 565a); (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514); and (f) acquisition of land and interests therein for sites for administrative purposes, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a).

Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513-519, 521), where such land is not within the boundaries of an established national forest or purchase unit nor shall these lands be acquired without approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1965.*)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriations, as follows:

- Funds appropriated to the President:
 - “Economic assistance.”
 - “Public works acceleration.”
- Agriculture:
 - Agricultural Stabilization and Conservation Service: “Expenses.”
 - Soil Conservation Service:
 - “Flood prevention.”
 - “Watershed planning.”
 - “Watershed protection.”
 - “Great Plains conservation program.”
 - “Resource conservation and development.”
- Interior:
 - Bureau of Land Management: “Oregon and California Grant Lands.”
 - Bureau of Outdoor Recreation: “Land and Water Conservation Fund.”

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$1 thousand; 1964, \$0; 1965, \$0.

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

2. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (16 U.S.C. 579c).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

4. *Payments to counties, national grasslands.*—Of the revenues received from the use of national grasslands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States, national forests fund.*—With minor exceptions, 25% of the money received from the national forests is paid to the States for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances on a reimbursable basis various services such as repairing and replacing equipment, including aircraft, stocking and issuing supplies, operation of subsistence camps, operation of sign shops, photographic and reproduction facilities, and tree nurseries in support of programs of the Forest Service (16 U.S.C. 579b, as amended). These service operations serve programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service,

FOREST SERVICE—Continued**Intragovernmental funds—Continued****WORKING CAPITAL FUND—Continued**

including cooperative assistance with other Federal agencies, States, counties, and individuals engaged in the same objectives.

Operating results and financial condition.—Government investment in the fund as of June 30, 1964, including donated assets and retained earnings for fiscal year 1964, is \$31,141 thousand. By the end of 1966 the investment is anticipated to be \$36,408 thousand, an increase of \$5,267 thousand which represents estimated earnings and donations during 1965 and 1966.

Receipts, nonoperating income, and retained earnings include an estimated \$3,558 thousand as of June 30, 1966, identified as Income provision for increased cost of equipment replacements to be used only for financing the increased cost of equipment replacement, i.e., the difference between the cost of the replacement unit and the cost at the time of acquisition of the unit being replaced. This increased cost is due to inflation and model improvement, and must be financed if the fleet strength is to be maintained and not depleted through the gradual attrition of price increases for replacements. The earnings for the provision for increased cost of replacements are derived from a factor which is included for this purpose in rental rates charged to program appropriations for equipment use and credited to the working capital fund.

Retained earnings as of June 30, 1966, will total an estimated \$7,300 thousand which will consist of \$2,657 thousand gain on sale of equipment, \$1,085 thousand profit from operations, and \$3,558 thousand for provision for increased cost of replacement of equipment. Retained earnings have been applied toward increased cost of equipment replacements, purchase of fleet additions, and to furnish adequate working capital.

GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed four hundred and [seventy-four] *seventy-two* passenger motor vehicles, of which four hundred and [fifty-two] *forty-eight* shall be for replacement only, and for the hire of such vehicles.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts. (*Department of Agriculture and Related Agencies Appropriation Act, 1965.*)

This appropriation was approved to finance Federal participation in the New York World's Fair during 1964-65. The Fair opened on April 22 and closed on October 18, 1964. It is scheduled to reopen for its second season April 21 and run through October 17, 1965.

In keeping with the theme "Challenge to Greatness", the exhibits of the U.S. Government deal with our cultural legacy and heritage, and portray some of the major challenges facing the American people in the fields of human rights, economic growth, scientific discovery, education, health, the arts, and our international responsibilities.

Attendance at the U.S. Pavilion has been estimated at 5.5 million during the first Fair season.

The fund provides premium aviation war risk insurance in the event of an outbreak of war. Binders are issued to cover aircraft, persons and property and will become war risk insurance in wartime and in situations short of war; policies covering aircraft, persons, and property which become active insurance upon issuance are available to certain civil air carriers in connection with Government contract operations. Administrative costs are out of fee receipts (49 U.S.C. 1531 as amended, 75 Stat. 210).

This fund finances on a reimbursable basis duplicating, communications, supply, and other administrative type services which can be performed more advantageously centrally (5 U.S.C. 607). Additional activities transferred to the fund in 1965 include the departmental library, and for selected organizations, mail, messenger, personnel services, and procurement. Capital consists of \$100 thousand appropriated, donated assets of \$258 thousand, and retained earnings of \$403 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders: 1963, \$3,023 thousand (1964 adjustments, -\$45 thousand); 1964, \$4,367 thousand; 1965, \$4,367 thousand; 1966, \$270 thousand.

1. *Operations.*—Leadership is provided for the stimulation of local initiative toward redevelopment activities. Locally prepared economic development programs are reviewed and project proposals for assistance to carry out such programs are evaluated and approved. Redevelopment guidance is provided in the form of surveys, technical data, procurement information and consultation on special community problems.

2. *Technical assistance.*—Communities are aided in preparing economic development plans by providing basic information on natural resources, manpower, and the uses to which these can be put to establish stable and diversified local economies. Investigations are also made of State and regional economic development opportunities and of new or improved uses of resources in specific areas.

Authorizing legislation expires June 30, 1965.

Grants are made to States and their political subdivisions, Indian tribes, and private or public nonprofit associations representing a development area, to assist in the construction or improvement of public facilities, in cases where the public facility project will improve opportunities for the location or expansion of industrial plants and facilities providing more than temporary alleviation of unemployment or underemployment. Grants are awarded only when the area has an approved overall economic development program, when the grant is necessary in order for the project to be undertaken, and the entity requesting the grant is contributing in proportion

90 Expenditures.....			40,000

Under proposed legislation, 1966.—Legislation will be submitted to extend and strengthen the area redevelopment program which would otherwise terminate on June 30, 1965. The program is designed to improve the opportunities for the creation of new employment in areas of substantial and persistent unemployment and underemployment. The new proposals will tighten area eligibility criteria, expand the present industrial and commercial loan program for eligible areas, add authority to guarantee private loans for working capital in connection with business loan projects, and restore and enlarge grants and loans for essential facilities which are required for economic development. Authority will also be sought to assist needy communities in meeting matching share requirements on other Federal grant-in-aid programs, and to increase technical assistance, adding authority to make planning grants for economic development purposes.

Public enterprise funds:**[AREA REDEVELOPMENT FUND]**

[For loans and participations as authorized by section 6 and public facility loans as authorized by section 7 of the Area Redevelopment Act (75 Stat. 53), \$59,500,000: *Provided*, That no part of the appropriations contained in this Act shall be used for administrative expenses in connection with loans and participations financed or to be financed with funds borrowed from the Secretary of the Treasury.] (*Department of Commerce Appropriation Act, 1965.*)

ECONOMIC DEVELOPMENT—Continued**AREA REDEVELOPMENT ADMINISTRATION—Continued****Public enterprise funds—Continued****[AREA REDEVELOPMENT FUND]—continued**

The Area Redevelopment Act provides for long-term loans at low interest rates to aid in the construction or expansion of commercial or industrial facilities and of related public facilities for the purpose of alleviating unemployment and underemployment within designated areas. Interest rates on commercial facilities are set by law and are at 4% for 1965 for industrial and commercial loans. Interest rates on public facility loans are at 3½% in 1965. Industrial and commercial loans may run for 25 years and public facility loans up to 40 years. Loans may be made to States, localities, and public or private nonprofit organizations representing redevelopment areas when (a) the area is designated as a redevelopment area; (b) the project is consistent with an approved overall economic development program; (c) the project will provide more than temporary alleviation of unemployment or underemployment; (d) assistance will not be given to establishments that in relocating would cause unemployment in the originating area; (e) financial assistance is not otherwise available from private lenders or Federal agencies on reasonable terms; and (f) applicants have been approved by a State and local agency directly concerned with problems of economic development in the area.

The act authorized outstanding loans of not to exceed \$100 million each for (a) industrial or commercial projects in urban areas of substantial and persistent unemployment designated within specific criteria; (b) industrial or commercial projects in nonurban areas which are among the highest in number and percentages of low income families and where substantial underemployment exists; and (c) public facilities necessary for improving the opportunities for employment. Authorizing legislation expires June 30, 1965.

Budget program.—Reservations for industrial and commercial loans for 1965 are estimated at \$72 million, and for public facilities loans at \$15 million.

Fund reservations are made on approval of applications filed to determine eligibility and feasibility of the project. Reservations are converted into loan approvals after filing a full loan application and review by the Small Business Administration for commercial loans or the Housing and Home Finance Agency for public facility loans.

Principal workload stages are as follows:

	1965 estimate		
	Urban	Non-urban	Public facilities
Preliminary applications:			
Received.....	130	145	47
Withdrawn or rejected.....	36	56	19
Reservations issued (preliminary).....	89	84	30
Reservations and approvals outstanding beginning of year.....	56	88	20

1965 program:			
Reservations.....	30.0	42.0	15.0
Reservations and approvals brought forward.....	37.3	55.3	17.4
Less reservations and approvals carried forward.....	-34.3	-83.0	-22.9
Loans (obligations).....	33.0	14.3	9.5

Financing.—The program was financed by a direct appropriation of \$132 million in 1964 and \$59.5 million in 1965.

Operating results.—During the initial stages of the program, revenues are expected to lag behind expenses. The deficit results primarily from the allowance for losses, which is established at the rate of 6% for commercial and industrial loans, and 3% for public facility loans.

This Service was established by title X of the Civil Rights Act of 1964, and operates in the conciliation of disputes, disagreements, or difficulties threatening peaceful relations within communities. The Service, under the act, offers conciliation services upon request of local citizens or officials, or upon its own motion, and is referred public accommodations cases for conciliation on the motion of the courts. In order to create a national climate of compliance with the laws pertaining to civil rights, the Service encourages local citizens' groups to work together on programs to promote better understanding of both the provisions and principles of the act. National organizations are also encouraged to mount educational programs with the assistance of the Service. A National Citizens Committee for Community Relations, appointed by the President, works with the professional staff of the Service. The Service is required, by the act, to provide conciliation assistance in confidence and without publicity, and to hold confidential information acquired with the understanding that it would be so held.

¹ Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1963, \$1,146 thousand (1964 adjustments, -\$5 thousand); 1964, \$1,086 thousand; 1965, \$1,186 thousand; 1966, \$1,286 thousand.

The United States Travel Service develops, plans, and carries out a program to stimulate and encourage travel to the United States by residents of foreign countries. The principal program activities are media relations, sales promotion, advertising, visitor services, and research. Nine overseas travel information offices serve as a center for answering public and trade inquiries on U.S. travel and as a headquarters for sales calls and other promotional activities. For 1966, funds are requested to intensify and further develop these existing programs.

An average annual gain of 8.8% in the flow of overseas visitors to the United States was made in the 9-year period prior to the establishment of the United States Travel Service. Since establishment, the gains have been 17% in 1962, 22% in 1963, and 32.2% in the 11-month period through November 1964.

Analyses of national economic trends.—Basic indicators of the condition of the national economy and analyses of business trends are prepared regularly and distributed to the public.

1. *Preparation of national income and product data.*—Calculations are made of the gross national product, national income, personal income, and their components, providing an overall view of the state of the economy.

2. *Analysis of business trends.*—The business situation is assessed monthly, and the results of continuing analyses of the major factors underlying cyclical developments and long-range business trends are published regularly.

3. *Computation of the balance of payments.*—The U.S. balance of international payments is determined and analyzed, and the official statistics of foreign expenditures by the U.S. Government are maintained.

The Census Bureau is the largest general-purpose statistical agency of the Federal government. The principal programs carried out under the appropriation "Salaries and Expenses" are:

1. *Retail, wholesale, and service.*—Estimates are prepared weekly for total retail trade and for a number of kind-of-business groups. Monthly estimates of retail sales are prepared for the United States by kind of business, by regions, for the larger States and Standard

Metropolitan Statistical Areas. In addition, estimates are prepared for retail inventory and accounts receivable, sales and inventories of merchant wholesalers, and receipts of selected service trades. An annual survey provides additional information on retail trade. A county business patterns report providing detailed and comprehensive data on employment and payrolls by kind of business and county, is prepared annually; this report covers most nonfarm employment included in the Social Security Program. In 1965 work begins on the systematic improvement of the current retail sample.

2. *Manufacturing and industrial.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important industries and products. Data on manufacturers' sales, orders, and inventories for total manufacturing and for about 35 industry breakdowns and totals for durable goods, nondurable goods, and 6 market categories are provided monthly. An annual survey of manufactures produces data on the number, size, industrial classification, and location of manufacturing establishments and on measures of factory operations such as employment, value added by manufactures, shipments, inventories, and investment. Data are also developed to provide measures of the forces changing the location, structure, and growth of industry.

3. *Transportation.*—Methods are developed and tested for undertaking periodic surveys in transportation areas as directed by statutory requirements, and a catalog of available transportation data is being developed.

4. *Foreign trade and shipping.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight, dollar value of imports and exports, and mode of shipping. In 1965 and 1966 work is being accelerated on the revision of the export commodity classifications to conform with the standard industrial classification, and the standard international trade classification and the information prepared regarding footwear imports (with coordinated production data) will be on a revised and more detailed basis.

5. *State and local governments.*—Reports are published annually which provide national and State-by-State statistics, by level of government, concerning governmental finances and public employment and payrolls, and comparative statistics on the finances and employment and payrolls of State governments and the individual cities of over 50 thousand inhabitants. National estimates of State and local tax revenue, by type of tax and level of government, are provided quarterly.

6. *Construction and housing.*—Monthly reports are published for housing starts, residential construction authorized by building permits, and the volume of construction activity. Reports are provided on expenditures for residential alterations and repairs. National and regional quarterly estimates are provided for housing vacancy rates, and technical assistance is available to local areas wishing to conduct vacancy surveys. In 1966, the monthly information regarding construction value-added-in-place will be improved.

7. *Agriculture.*—Information on cotton ginnings and production required by statute is compiled and published. Statistical services are provided on results from the census of agriculture and related operations.

8. *Population.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility, and other characteristics of the population, as well as consumer buying intentions. It also provides annual estimates of the population of the United States

and of each of the States, projections of future population, and annual estimates of the population for a limited number of Standard Metropolitan Statistical Areas (SMSA's). In 1965, population estimates will be provided for additional SMSA's, and work is being undertaken to improve and expand local area estimates through the use of administrative records. In 1966, estimates will be provided for additional SMSA's, and surveys will be initiated to provide intercensal information regarding movement and characteristics of the population.

9. *Statistical abstract and special reports.*—Seasonally adjusted business cycle indicators are published monthly. *The Statistical Abstract*, issued annually, summarizes government and private statistics on the industrial, social, political, and economic activities of the United States. Other current general reports are published periodically.

10. *Research and development.*—Research is conducted on statistical survey methods and techniques, on questionnaire design and response errors, and on administrative operations for the purpose of increasing accuracy, output, and usefulness of statistical data per unit of cost.

The requested funds for 1966 provide for more than four-fifths of the tabulations and for the publication of a major part of the data for the general census of agriculture taken in the fall of 1964. A sample survey of approximately 12 thousand farms will be taken during the fall of 1965. Also work will continue on the analysis of the census coverage and accuracy of reporting of specified items in the general census.

This request provides funds for beginning the establishment of a list of residential addresses to be used in taking a Population and Housing census in 1970. In the first year of this 3-year program, Census expects to list approximately 13 million addresses out of an expected total of 45 to 55 million. Funds are also requested to explore problems in connection with census taking in hard to enumerate areas, questionnaire design under self-enumeration conditions, statistical measures relating to condition of housing, and geographic mapping and identification coding.

The 1967 Economic Censuses will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's business and industrial enterprises. Preparatory work will begin in 1966 on report forms, mailing lists, computer programs, and processing specifications.

The results when published will present statistics covering an estimated two million establishments canvassed by mail, and an estimated one million zero employee establishments which will be covered through the utilization of the records of the Internal Revenue Service.

The Bureau of the Census undertakes work for governmental and other bodies to the extent that such work meets desirable public needs, can be performed without adversely affecting activities financed from appropriated funds, and can be more appropriately or efficiently performed by Census than by the sponsor agency. Within this framework, Census makes available skills, resources, equipment, and other specialized services on either an operating or consulting basis to carry out or advance the statistical programs of the Federal Government.

The Business and Defense Services Administration provides advisory and analytical services to the business community and Government. Industrial and commercial data are analyzed and appraised and basic, special, and periodic reports are published for use by industry, business, and Government. The results of commodity data analyses are used in foreign trade promotion, as well as domestic market expansion. Dissemination is made of market facts and analyses dealing with the structure, problems, and trends in marketing to Government, industry, and business. Industrial capabilities to meet the requirements for industrial production in a national emergency

and needs for national growth are measured and assistance is provided to industry in military procurement programs.

To stimulate and expand the foreign commerce of the United States in order to strengthen the U.S. economy and reduce the deficit in our balance of payments. Specialists in foreign trade provide information and service to U.S. firms engaged in international commerce. They analyze economic and business conditions of foreign countries, international marketing problems, commercial laws and government regulations affecting business and related fields vital to the expansion of foreign trade.

Trade centers, commercial trade fairs, business information centers, sample product services, and mobile trade fairs are used as techniques overseas to further the promotion of U.S. exports.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States for necessary expenses for the promotion of foreign commerce, as authorized herein under the appropriation for "Salaries and expenses," \$200,000, to remain available until expended. (5 U.S.C. 591, 596-597; 15 U.S.C. 171; 1950 Reorganization Plan No. 5, sec. 4, 64 Stat. 1263; 75 Stat. 527.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$0; 1966 \$10 thousand.

This appropriation will utilize excess foreign currencies to stimulate and expand the foreign commerce of the United States, strengthen the U.S. economy, and reduce the deficit in our balance of payments. Displays at trade and industrial exhibitions abroad bring to the attention of foreign buyers American products with good sales potential as well as presenting a favorable image of the United States and carrying out the foreign policy objectives of the United States.

EXPORT CONTROL

For expenses necessary for carrying out the provisions of the Export Control Act of 1949, as amended, relating to export controls, including awards of compensation to informers under said Act and as authorized by the Act of August 13, 1953 (22 U.S.C. 401), [\$4,575,000] \$4,675,000, of which not to exceed [\$1,665,000] \$1,658,000 may be advanced to the Bureau of Customs, Treasury Department, for enforcement of the export control program, and of which not to exceed \$65,000 may be advanced to the appropriation for "Salaries and expenses" under "General administration". (1950 Reorganization Plan No. 5, Sec. 4, 64 Stat. 1263 Department of Commerce Appropriation Act, 1965.) (Authorizing legislation to be proposed.)

ECONOMIC DEVELOPMENT—Continued**General and special funds—Continued****EXPORT CONTROL—continued**

Export controls are necessary to protect the domestic economy from excessive drain of scarce commodities, to safeguard the national security by regulating exports of strategic commodities, and to implement U.S. foreign policy. Since some countries continue to constitute a threat to the security and welfare of the United States, these controls must be continued and, as necessary, extended to other areas to guard against transshipment to unauthorized destinations. The Bureau of Customs is responsible for the policing of shipments at points of export.

The Office of Field Services serves as the local point of contact with the American business community for the Department of Commerce to carry out its statutory responsibilities to develop, foster, and promote foreign and domestic commerce in the continuing program to increase U.S. economic growth.

Program operations are conducted through 39 field offices which are located in important commercial and industrial centers throughout the United States and its possessions. The close liaison that the field offices provide between the Department and the business public assures a continuing direct contact point for disseminating information regarding the Department's accelerated programs to promote trade, to expand U.S. exports, to develop investment opportunities, to correlate and publish essential business and economic statistics, to administer the Export Control Act, to explain loan and credit facilities, and to publicize the results of Government generated research and development.

The field offices are manned by personnel skilled in both domestic and international trade. Continuing contact is maintained within and without the office to assure knowledge and utilization of the valuable services and facilities that the Department offers to American business.

The Coast and Geodetic Survey makes oceanographic, geodetic and magnetic surveys and investigations to obtain a better understanding of the static and dynamic properties of the ocean, and to provide cartographic data for the processing, compilation, production and distribution of aeronautical, nautical and special purpose charts, geodetic control data and other related publications;

collects, analyzes and disseminates seismological and astronomical data; conducts basic and applied research and development in fields within the competence of the Bureau. The scope of the operations is worldwide.

Increases in 1966 are to support the Bureau's role in (1) oceanography, including operation of the new oceanographic vessels, strengthening the capability of oceanographic field laboratories to keep pace with increased data collection and processing activities, outfitting shore based launch parties, investigating the Gulf Stream, and automating hydrographic plotting; (2) geodetic and seismological surveys and studies, primarily for Alaska rehabilitation; (3) improvement of aeronautical charts; and (4) research and development to support all Bureau activities, but primarily seismology.

Direct program—1. *Oceanography*.—The oceanographic program of the Coast and Geodetic Survey encompasses all of the Bureau's operations at sea which are directed toward several end-products such as nautical charting, tide and current tables, coast pilot and ocean studies. Activities include ship operations and maintenance and repair; equipment and instrument procurement; ship base operations; laboratory operations, data processing, analysis and research; publication or other distribution of results to users; and essential administrative support.

The demand by industry, the public, and municipal, State and Federal agencies for additional coastal and offshore information on tides, currents, and bottom topography is steadily rising. These demands are related to engineering projects, boat, and ship navigation, offshore waste disposal, beach erosion, and recreation. The program for 1966 is designed to secure the improvements in the present operations necessary to meet the increasing need for information of this sort.

	1964 actual	1965 estimate	1966 estimate
Square nautical miles surveyed.....	395,166	450,300	967,540
Lineal miles of hydrography.....	158,503	127,200	158,550

2. *Physical sciences*.—Geodetic, geophysical, photogrammetric, and cartographic data are provided for charting and scientific purposes and for defense needs. Surveys are made in the United States and its possessions to determine the horizontal and vertical positions of a network of control points which are permanently marked on the ground for topographic, geologic and other types of mapping, for planning large-scale engineering projects and for scientific and defense needs. The positions and descriptions of these points are published and distributed to Federal, State and local agencies and the general public.

SURVEYS ACCOMPLISHED AND PROPOSED

	1964 actual	1965 estimate	1966 estimate
Horizontal control:			
Area control (square miles).....	26,850	25,450	28,250
Marked stations established.....	873	800	855
Stations occupied.....	1,280	1,160	1,250
Vertical control:			
New leveling (linear miles).....	1,382	1,570	1,570
Basic leveling (linear miles).....	346	1,200	1,900
Releveling (linear miles).....	2,487	2,850	510
Total leveled.....	8,230	8,090	7,960

The Bureau operates 12 seismograph stations and collaborates with 15 others in universities, Government agencies, and other institutions; cooperates with 275 domestic and foreign seismograph stations to determine the location of distant earthquakes, field investigates an average of 15 severe earthquakes annually; operates 73 strong-motion stations in western United States and 7 in Latin America. The seismic seawave warning

program, a network of seismograph and tide stations, furnished data for three alerts and warnings of tsunamis, one of which was generated by the very destructive Prince William Sound earthquake of March 28, 1964. A special team of investigators was sent into the field immediately following this shock. A temporary network of seven stations was set up to record aftershocks for further study and a survey of the damage was carried out by engineering seismologists.

3. *Navigational chart production.*—Nautical and aeronautical charts and related information are compiled and reproduced from field survey data, and distributed to civil and military users for safe navigation of ships and aircraft. As a result of the Alaska earthquake of March 1964, chartlets of new or provisional additions of Alaska charts were provided to the public. As of April 21, 1964, 35,000 copies of 5 preliminary chartlets had been distributed and 155,000 copies of 6 additional chartlets were issued by July 27, 1964.

Miscellaneous receipts returned to the Treasury from the sale of charts and related publications were \$1,148 thousand in 1964 and are estimated to be \$1,200 thousand during 1965 and \$1,225 thousand in 1966.

CHARTS AND TABLES PRINTED AND DISTRIBUTED

[In thousands]

	1964 actual	1965 estimate	1966 estimate

4. *Research and development.*—This activity includes basic and applied research and development to oceanography, geomagnetism, seismology, geodesy/photogrammetry, cartography, and related supporting fields.

6. *Retired pay, commissioned officers.*—Provides for retirement pay in 1966 for an average of 120 commissioned officers, as authorized by 33 U.S.C. 853(o), and payments to 11 survivors of retired officers under the Retired Serviceman's Family Protection Plan. Appropriation requirements are reduced by the difference between amounts to be deducted from retired pay under the Contingency Option Act and amounts paid to survivor annuitants.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963 \$21,467 thousand; 1964, \$14,719 thousand; 1965, \$14,502 thousand; 1966, \$11,484 thousand.

Currently under construction are two Class I oceanographic ships and three Class II hydrographic replacements for the *Bowie*, *Hodgson* and *Hydrographer*. During 1965, construction contracts on the Class III replacements for the *Lester Jones* and *Patton*, and the wire drag replacements for the *Hilgard* and *Wainwright* will be awarded from NOA received in fiscal year 1964. A construction contract on the Class IA, funded in the current fiscal year, will be awarded early in 1966.

Oceanographic and other marine operations which the Coast and Geodetic Survey is authorized to undertake

SCIENCE AND TECHNOLOGY—Continued**COAST AND GEODETIC SURVEY—Continued****General and special funds—Continued****【CONSTRUCTION OF SURVEYING SHIPS】—continued**

require a modern, well-equipped fleet, with each vessel suitable for its work. The Bureau's ship construction program is directed toward that end.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$831 thousand (1964 adjustments, -\$118 thousand); 1964, \$750 thousand; 1965, \$750 thousand; 1966, \$750 thousand.

The Office administers laws governing the granting of patents for invention and the registration of trademarks.

On July 1, 1964, substantial revisions of procedure became effective designed to reduce both the processing time needed for each patent application and its total time pendency in the Patent Office. As a goal an increase of about 30% in the number of patent application disposals is estimated to result in 1965 and 1966, as compared with the level of patent application disposals in 1963 and 1964, with no increase in the size of the examining staff. The 1966 estimate provides for printing an increased number of patent issuances, for a small staff increase in program service areas to deal with greater workloads from the patent examining corps and the public, and for initial

costs of an automated system for supplying copies of patents.

Receipts from fees were \$8.2 million in 1964, and are estimated to be \$8.9 million in 1965 and \$9.6 million in 1966 under existing legislation. Legislation is proposed which would increase fees to eventually recover approximately 75% of the cost of Patent Office operations.

1. *Examination and adjudication of patent applications.*—Applications are examined to determine the patentability of claimed inventions; and quasi-judicial functions are performed in appeal and interference proceedings within the Office. Specifications and drawings of successful applications are printed and the issuance of patents is regularly published.

2. *Examination and adjudication of trademark applications.*—Applications are examined to determine the registrability of trademarks, and quasi-judicial functions are performed in appeal or adversary proceedings within the Office. Specifications and drawings of successful applications are printed and the issuance of registrations is regularly published.

3. *Administration and program services.*—In addition to program direction and internal management services, this activity includes conduct of litigation to which the Commissioner is a party, preparation and issuance of patent grants, furnishing copies of records, maintenance of public search room and scientific library facilities, recording instruments conveying ownership of patent and trademark rights, conduct of public information services, and other nonexamining functions relating to the prosecution of applications.

NATIONAL BUREAU OF STANDARDS

General and special funds:

RESEARCH AND TECHNICAL SERVICES

For expenses, *not otherwise provided for*, necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U.S.C. 271-278e), including general administration; operation,

maintenance, alteration, and protection of grounds and facilities; hire, operation, maintenance, and repair of aircraft; and improvement and construction of facilities as authorized by the Act of September 2, 1958 (15 U.S.C. 278d); [\$30,000,000] \$36,700,000, of which not to exceed [\$175,000] \$470,000 shall be available for payments to the "Working Capital Fund", National Bureau of Standards, for additional capital: *Provided*, That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of September 2, 1958 (15 U.S.C. 278e), shall be equivalent to the maximum scheduled rate for GS-12. (15 U.S.C. 175, 271-278e, 1151-1157; 40 U.S.C. 14a; 5 U.S.C. 591, 596, 596a; 64 Stat. 823, Department of Commerce Appropriation Act, 1965.)

Note.—Includes \$1,672,000 for activities previously carried under "Office of Technical Services, Salaries and expenses." The amounts obligated in 1964 and 1965 are shown in the schedule as comparative transfers.

¹ Includes capital outlay as follows: 1964, \$9 thousand; 1965, \$0; 1966, \$0.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$1,009 thousand (1964 adjustments, -\$34 thousand); 1964, \$1,281 thousand; 1965, \$1,385 thousand; 1966, \$1,785 thousand.

The proposed increase will strengthen the Bureau's program principally in connection with the National Standard Reference Data System, engineering measure-

ments and standards, including standards related to automatic data processing, and the Federal clearinghouse. Increases are also programed for standard reference materials, radio propagation, and internal technical services. The Bureau's programs of basic and applied research, development of instruments and methods of measurement, general technical services and the Federal clearinghouse are classified under 4 major activities with 10 subactivities.

1. *Standards missions*—(a) *Basic measurements and standards*.—This includes research, development, analysis, or specifications relating to existing or new standards for physical measurement; precise standard methods of measurement of physical quantities; and precise values of fundamental physical constants suitable for tying measurement systems together.

(b) *Standard reference data*.—This includes programs arising as a result of the Bureau's responsibility for developing the National Standard Reference Data System and other programs concerned with standard reference data. Work is directed toward obtaining systematically evaluated numerical data in the physical sciences needed by scientists and engineers. These data are the numbers that describe the properties of nature, the strengths of high temperature materials, the masses of atoms, the rates of chemical reactions, the wavelengths of light in emission spectra, and many others. Programs involve analysis of needs, acquisition of data, conduct of research, processing, and compilation for dissemination of the data. The major expansion in this area will be for contracts for the compilation of data under the Standard Reference Data System.

(c) *Engineering measurements and standards*.—This includes research leading to technical information or measurement methodologies which will provide the basis for collaboration with recognized standardizing bodies in the development of codes, specifications, standards of practice and methods of testing technological devices, industrial products, and services. Expansion is planned for development of standards related to automatic data processing and for specific standards activity required by law. It is also planned to increase U.S. participation in the formulation of international standards.

(d) *Standard reference materials*.—This includes analysis, research, and development of methodology leading to the production of special materials for the calibration of measuring systems, or for coordinated research on properties of materials. Expansion will be directed to investigating new techniques for the development of homogeneous samples.

2. *Special central missions*—(a) *Radio propagation*.—This includes research on radio propagation characteristics, techniques, and systems; studies of the upper atmosphere; the collection and dissemination of physical and technical data on ionospheric and solar phenomena; the preparation of radio propagation predictions; and the issuance of warnings of solar and ionospheric disturbances. Expansion in this activity will be for work on space environment monitoring and forecasting, and electromagnetic propagation description.

(b) *Federal clearinghouse*.—The clearinghouse collects, organizes, publicizes and provides reference, referral, and sales services for the technical reports and translations received from domestic and foreign sources, and makes them available to industry and the general public. Expansion is planned to selectively package and distribute technical information to the specific industrial segments which can best utilize it and to provide information on

SCIENCE AND TECHNOLOGY—Continued

NATIONAL BUREAU OF STANDARDS—Continued

General and special funds—Continued

RESEARCH AND TECHNICAL SERVICES—continued

current research activities in order to reduce duplication of technical work.

(c) *Data processing*.—This includes the investigation of equipment, components, systems, and techniques suitable for the data processing and information handling activities of the Government and the rendering of assistance in their application to the operations of Government agencies.

(d) *Advisory services*.—This includes services connected with the various technical programs in the other sub-activities and covers dissemination of information to the general public, provision of consultative and advisory services and furnishing of specific technical information.

3. *General support missions*—(a) *General research*.—This includes research conducted in order to keep up with developments in various technical fields and to maintain general scientific competence needed for effective accomplishment of the overall mission.

(b) *Internal technical services*.—This includes programs of two general types: project-related capital equipment; and internal technical services, such as analytical, instrumentation, and mathematical services and operation of the linear accelerator (LINAC) and nuclear reactor. Expansion will be for the training of new scientists preparatory to operation of the nuclear research reactor and for the operation of the high energy accelerator. Increased costs are related to operation of the reactor and linear accelerator.

4. *Additional capital for Working capital fund*.—This comprises all transfers of funds to the Working capital fund for the purchase of scientific equipment.

RESEARCH AND TECHNICAL SERVICES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the National Bureau of Standards, as authorized by law, \$500,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to the Bureau, for payments in the foregoing currencies. (7 U.S.C. 1701, 1704; 15 U.S.C. 271-278e; 5 U.S.C. 596a; Department of Commerce Appropriation Act, 1965.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$744 thousand; 1964, \$856 thousand; 1965, \$759 thousand; 1966, \$679 thousand.

National Bureau of Standards responsibilities for basic and applied research, improvement of standards, and dissemination of information on properties of materials, measurement techniques, and radio propagation are of sufficient breadth to permit ready utilization of research capabilities in other countries. The foreign currency program supplements the Bureau's existing program, allows an acceleration of research effort in selected areas, and permits economies to the Bureau's regular appropriations over the long term.

The 1966 program, authorized by section 104(k) of the Agricultural Trade Development and Assistance Act of 1954, represents no increase in the size of the program. Foreign currencies determined by the Treasury Department to be excess to normal requirements of the United States will be used in non-Soviet bloc countries where scientific talent is available. A cost of 20 thousand U.S. dollars, charged to the appropriation for Research and technical services, will be required for the administration and technical supervision of the program.

PLANT AND FACILITIES

For expenses incurred, as authorized by section 1 of the Act of September 2, 1958 (15 U.S.C. 278c-278e), in the acquisition, construction, improvement, alteration, or emergency repair of buildings, grounds, and other facilities, including [an addition to a radiation physics laboratory, a standard frequency broadcasting station and an isotope separator facility] a radio meteorological research facility; [and] procurement and installation of special research equipment and facilities, therefor; and provision of standards of weight and measure to the States: [\$3,770,000], \$2,000,000 to remain available until expended. (15 U.S.C. 271-278e; 40 U.S.C. 14a; 5 U.S.C. 596a; Department of Commerce Appropriation Act, 1965.)

90 Expenditures.....	4,407	6,500	5,100			

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$6,435 thousand; 1964, \$3,425 thousand; 1965, \$3,520 thousand; 1966, \$1,112 thousand.

This will provide for construction and improvements to the plant and facilities of the National Bureau of Standards and procurement of major special facilities. The Bureau's laboratories and administrative offices occupy 86 buildings on a 68-acre tract in Washington, D.C. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and several small radio field stations, some of which are outside the continental limits. In addition, the Bureau has a new site near Gaithersburg, Md., on which facilities are being built to replace those in Washington, D.C.

Capital outlay—1. *Improvements and modifications*.—The budget includes \$200 thousand for minor capital improvements of a general nature required for the Bureau's laboratories and field stations. Other minor improvements, when of a special, project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. *General construction*.—The budget includes \$135 thousand for construction of a radio meteorological field station building and a meteorological tower. Anticipated costs

in 1966 include \$1,203 thousand for an addition to the radiation physics building and \$750 thousand for design and construction of laboratory buildings at Boulder, all financed in prior years as well as \$100 thousand for the budget year project.

3. *Special facilities*—(a) *National Bureau of Standards facilities*.—This subactivity includes the acquisition of large equipment items and any building construction and land acquisition associated with them. The budget includes \$255 thousand for the purchase of a 3 million-volt surge generator, \$630 thousand for installation of a large gear measurement facility, and \$280 thousand for equipment for the Bureau's radiochemical program. Anticipated costs in 1966 include \$2,267 thousand for miscellaneous special facilities, all financed in prior years, and \$95 thousand for the budget year projects. (b) *Weights and measures standards for the States*.—This will finance the acquisition of basic reference standards of weight and measure for distribution to the States. Such action will help to insure uniformity of weights and measures standards throughout the United States and provide the physical tools necessary for precision of meas-

urement in business, industry, science and education. The budget of \$500 thousand provides for one-fourth the total estimated costs for the 50 States. Anticipated costs in 1966 are \$335 thousand.

Operating costs—1. Improvements and modifications.—Noncapitalized maintenance and repair projects are charged to operating costs. No new programs are anticipated in 1966.

90 Expenditures.....			19,512	24,100	18,000				

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$17,463 thousand; 1964, \$36,907 thousand; 1965, \$22,792 thousand; 1966, \$5,863 thousand.

This appropriation finances the construction, equipping, and occupancy of new laboratory, administrative, and service buildings now being constructed on a site near Gaithersburg, Md., to house the activities of the National Bureau of Standards now conducted in Washington, D.C. The new facilities are replacements for present facilities and do not provide for new programs, although they will house certain equipment for radiation physics research and large force measurements not heretofore available.

The first increment of the construction program was provided in the 1961 budget. In the ensuing 4 years additional major increments of the program provided for the construction of seven general purpose laboratory buildings, several special purpose laboratories, administration, shops, and warehousing buildings, completion of site development, utilities, and equipment. No funds are being requested for this appropriation in 1966. However, a request for \$1,200 thousand will be made in 1967 for

the final increment of the program, which will include the balance of financing for construction and completion of moving and occupancy.

1. *Design and engineering.*—Detailed planning and preparation of architectural designs and engineering drawings are completed except for the special-purpose facilities. Estimated costs in 1966 are for review of drawings and continuing construction supervision.

2. *Site acquisition.*—Court action in the condemnation proceedings for the Gaithersburg site has been completed. No further costs are estimated under this activity.

3. *Construction.*—This activity includes the construction of laboratories and other buildings, including mechanical and electrical equipment, special laboratory services, site development, and utilities. Costs estimated for 1966 reflect continued activity on the items included in the third construction increment as well as activities under new contracts for special-purpose laboratory buildings.

4. *Equipment.*—Estimated costs for major scientific facilities for 1966 are primarily for long lead-time equipment financed in prior years. These facilities will be donated to the Bureau's Working capital fund and no depreciation charged against their use.

The 1964 budget completed the financing of equipment for the new facilities. The smaller items will be purchased through investment of the working capital and the cost will be recovered by depreciation charges made during the expected useful life of the respective items. Payment of \$9,250 thousand from the Construction of facilities appropriation to the Working capital fund to provide the necessary capital has been authorized.

5. *Moving and occupancy.*—This activity includes the costs of moving and installing scientific apparatus as well as certain furnishings for offices, library, cafeteria, and other areas. Estimated costs for 1966 are for moving and occupancy associated with the general purpose laboratories.

This program assists the textile and apparel industries in developing and making more deliberate and extensive use of scientific and technological resources for economic growth. Expanded market opportunities that are made possible by increasing the rate of adoption of technological innovations in processes, products, and services, broaden the base of our civilian economy as well as make it more competitive with foreign producers.

[OFFICE OF TECHNICAL SERVICES]

[SALARIES AND EXPENSES]

For necessary expenses of the Office of Technical Services, \$1,130,000. (5 U.S.C. 591, 596; 15 U.S.C. 175, 1151-1157; Reorganization Plan No. 5 of 1950, sec. 4, 64 Stat. 823; Department of Commerce Appropriation Act, 1965.)

Note.—Estimate of \$1,672,000 for activities previously carried under this title has been transferred in the estimates to "National Bureau of Standards, Research and technical services." The amounts obligated in 1964 and 1965 are shown in the schedule as comparative transfers.

¹ Balances of selected resources are identified on the statement of financial condition.

The fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects. The principal of the fund, as of June 30, 1964, consisted of \$5 million in appropriations, \$6 million in capital provided by appropriations of the Bureau, and \$104.3 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by National Bureau of Standards' appropriations to \$173.7 million by June 30, 1966.

Operating costs—1. Technical program.—Research and technical services are conducted by the National Bureau of Standards on the request of other Government agencies and the public, as well as in support of the Bureau's own research program. The research and development program conducted on contract with other agencies constitutes about one-third of the technical work of the Bureau and it is expected to continue at this level. The provision of mathematical computation services to other agencies and the provision of calibration services to the public and other agencies are expected to increase.

2. Plant improvement and special equipment.—This activity includes the costs of the Working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

Capital outlay.—Working capital of the fund is invested in equipment which is subject to depreciation charges. In 1966 the equipment requirements of the expanded Bureau research program will require an augmentation of working capital, which will be accomplished through payments to the fund for additional capital from the National Bureau of Standards' appropriation for Research and technical services. Some of the equipment for the new laboratories of the Bureau will be purchased as investments of the fund, the additional capital being provided by payments from the appropriation for Construction of facilities. All other equipment and facilities financed by Bureau appropriations are shown as donated assets of the fund.

Operating results.—Retained earnings at the end of each year are transferred to Treasury the year following.

The Weather Bureau measures, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of U.S. commerce, industry, agriculture, and the general public.

1. *Weather measurements and forecasts.*—Measurements of weather conditions at the earth's surface and aloft are made at thousands of locations throughout the United States, its territories, and over international waters, and in foreign lands in cooperation with other countries. These data are disseminated widely for use by the general public, industry, agriculture, commerce, and aviation; they are stored and analyzed to become the record of the "climate" of the United States; and they serve as the input data necessary to all forecasts of weather, river, and

storm tide conditions. Regularly scheduled weather forecasts are issued for the United States, its territories, and surrounding waters with special emphasis on severe storms. Special forecast and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and agricultural forecasts are prepared for areas where agriculture is a mainstay of the local economy.

SELECTED WORKLOAD DATA¹

	1964	1965	1966
Weather measurements and forecasts:			
Observations:			
Surface	2,705,449	2,719,000	2,730,000
Upper-air	215,345	215,000	218,250
Radar	316,403	316,500	338,000
Forecasts and warnings (separate issu- ances):			
Public	466,579	467,000	467,000
Agriculture	72,348	74,000	79,500
Fire-weather	39,429	41,000	43,500
Aviation	1,119,285	1,119,500	1,120,000
Hurricane, tornado, and severe storm	3,392	3,500	3,500
Local marine	104,025	104,500	105,000
Dissemination:			
Public (telephone) briefings	10,841,956	11,100,000	11,400,000
Public (personal) briefings	1,159,093	1,195,000	1,229,000
Aviation (telephone) briefings	4,160,834	4,280,000	4,400,000
Aviation (personal) briefings	1,678,952	1,725,000	1,775,000
International aviation briefings	71,533	74,100	75,800
Bulletins and summaries prepared	612,303	612,000	612,000
Direct radio broadcast originations	218,635	218,500	218,000

¹ Much of these data correlate rather closely with weather conditions occurring during the period in question. Thus, the number of hurricane warnings issued is largely a result of the number of hurricanes which occur and the amount of time during which they threaten the U.S. mainland and territories.

The 1966 estimate provides for the operation and maintenance of new instrumental equipment and improvements in the basic, public, and specialized weather services.

2. *River and flood forecasts and warnings.*—The Weather Bureau maintains a watch on river conditions throughout the Nation, furnishing flood warnings and public forecasts of river height and flow on the country's principal rivers and their tributaries.

SELECTED WORKLOAD DATA

	1964	1965	1966
Forecasts and warnings (separate issuances)	129,123	130,000	140,000
Briefings (personal and telephone)	112,088	113,000	117,000

The increase for 1966 will permit continuation of a going program at a level capable of adequate response to the increasing demand for these services.

3. *Climatology.*—The climatological service seeks to determine and record the various types of climate, to explain the causes of these climates, their variation, trends, geographical locations, and the effect climate has on the economy of the Nation, and to communicate this intelligence in such a manner as to insure the fullest realization of its potential benefits. The increase for 1966 provides for systematization of records recall, security and processing, and summarization of marine weather.

4. *Executive direction and administration.*—This activity provides executive direction and administrative support to the Salaries and expenses, Research and development, Special foreign currency, Establishment of meteorological facilities, and Meteorological satellite operations appropriations. The increase in 1966 is required to support increased workload resulting from expanded program and added responsibilities.

The Weather Bureau conducts research and development to improve our understanding of the atmosphere; to provide new and improved methods of exploring and observing the atmosphere; to increase the scope and accuracy of weather forecasts; to develop a capability of exercising some measure of control over the atmosphere; to improve hydrologic forecasts; to provide new and improved techniques for analysis and presentation of climatic information; and, in general, to remove those limitations on the provision of meteorological services which are the result of a lack of fundamental knowledge about the atmosphere.

1. *Meteorological*—(a) *Atmospheric processes, forecasting, and observing techniques*.—Basic and applied research and development is conducted on the physical and dynamical phenomena that contribute to weather and climate, on all scales of atmospheric motions, on short- and long-range weather forecasting methods, and on measurement, forecasting, and communication systems for meteorology. (b) *Hurricane, tornado, and other severe storms*.—Research on these destructive and hazardous storms is conducted to understand their physical nature; to determine how they form and move; to improve our ability to detect and predict them; and to develop a capability of controlling them. (c) *Satellite*.—Research is conducted for the purpose of improving the meteorological satellite as an observing device; of using satellite data to increase our understanding of atmospheric phenomena; of developing methods for using satellite data to improve weather forecasts; and the development of techniques and equipment for the collection and relay of weather data from remote land and ocean stations by means of balloons and satellites.

The increases in 1966 include meteorological systems design and development; studies of interactions between the sea and the air; a program of experimental meteorology; and augmentation of the weather radar laboratory.

2. *Hydrologic*.—Research is concerned with improving techniques for forecasting streamflow and river heights, and with the use of weather radar for precipitation measurements to facilitate issuance of flash flood warnings. The increase for 1966 will augment the hydrologic research and development program.

3. *Climatic*.—Research is conducted on the analysis and presentation of climatic information for application to business, industry, commerce, and agriculture. The increase for 1966 provides for the development of new techniques and procedures for incorporating climatological data collection into the routine operation of the national meteorological system, and for research on bioclimatology.

RESEARCH AND DEVELOPMENT (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Weather Bureau, as authorized by law, \$500,000, to remain available until expended: *Provided*, That this appropriation shall be available in addition to other appropriations to the Bureau for payments in the foregoing currencies. (7 U.S.C. 1701, 1704; U.S.C. 313; 72 Stat. 783; Department of Commerce Appropriation Act, 1965.)

The special foreign currency program will use foreign currencies which are excess to the normal requirements of the United States, in order to supplement present Bureau research and development and to encourage greater cooperation in international meteorology and allied sciences. The surplus currencies requested in 1966 will be used for (1) development of improved networks for measuring weather conditions in the upper air; (2) development of meteorological instruments; (3) research on requirements for obtaining additional and improved meteorological information in sparse data areas; and (4) analysis of climatological and hydrologic data from representative regions of the world.

The accuracy of weather measurements, forecasts, and warnings is being improved by the procurement and installation of new instrumental equipment and by the modernization of existing facilities. Funds requested for 1966 are to carry forward the modernization program that was started in 1956.

The cost of operating and maintaining equipment installed under this appropriation is covered by the appropriation for "Salaries and expenses, Weather Bureau."

1. *Upper-air observational facilities.*—Consists of ground installations to track, continuously, radio transmitters carried to altitudes of 100 000 feet by sounding balloons. It also includes miniaturized equipment for use on ship-board to obtain measurements of high altitude weather conditions over the oceans.

2. *Weather surveillance radar.*—Provides a continuous picture of changing weather conditions up to 200 miles from the stations to facilitate the preparation of forecasts and increase the advance-warning time.

3. *Surface observational facilities.*—Consists of instruments that measure, record, and transmit cloud height, visibility, temperature, humidity, wind direction and velocity, precipitation, and river stage data for use in weather and hydrologic forecasting and in controlling air traffic.

4. *Communications and data processing equipment.*—Consists of storage and retransmission equipment for use on circuits so that weather analyses, including satellite cloud data, may be relayed to Weather Bureau offices. ADP equipment is also used to compile weather data for optimum use in forecasting, and in processing and archiving these data for climatological use.

5. *Construction of facilities.*—Covers construction of office and housing units at places where these facilities are not available from any other source and construction of office space at airports where rent-free space is no longer available.

6. *Engineering and technical support.*—Provides staff for planning, site surveys, actual installation, and initial calibration of equipment.

SCIENCE AND TECHNOLOGY—Continued

WEATHER BUREAU—Continued

General and special funds—Continued

METEOROLOGICAL SATELLITE OPERATIONS—continued

The Weather Bureau is responsible for the establishment and operation of a National Operational Meteorological Satellite System (NOMSS) to observe continuously worldwide weather conditions and to process, analyze and archive the data obtained for use in weather services and research. NOMSS is administered by the National Weather Satellite Center (NWSC) at Suitland, Md.

Appropriations through 1965 have financed the establishment of the basic ground facilities and procurement of the initial spacecraft and launch vehicles to permit implementation of NOMSS in mid-1966 utilizing the TIROS Operational Satellite (TOS). The 1966 estimate provides for the manpower and material resources required to achieve operational effectiveness, to maintain observational continuity, and to improve the efficiency of the satellite system.

1. *Spacecraft and launching.*—This activity covers the procurement and launching of operational meteorological satellites. Flight units to inaugurate the operational system were funded in prior years. Three additional units are required in 1966 to maintain system continuity.

2. *Command and data acquisition.*—This activity covers the establishment and operation of ground facilities for command of the spacecraft, acquisition of observational data, and transmission of data to the NWSC. Command and Data Acquisition (CDA) stations have been established at Fairbanks, Alaska, and Wallops Island, Va. The 1966 estimate provides for around-the-clock operation of these facilities. Efforts to remote CDA operations and centralize meteorological functions to increase efficiency while reducing manpower will be completed during 1966. A saving of 32 positions at CDA stations is reflected in the estimates.

3. *Data processing, analysis, and archiving.*—ADP facilities are used to convert satellite observational data into forms suitable for immediate operational use in weather forecasting and service programs, and subsequent use for research and climatological purposes. The 1966 estimate provides for the implementation of 24-hour operation of central CDA analysis and processing functions; systems engineering and development efforts leading toward improvement of NOMSS; the increased automation of data handling systems; and, continuation of the Washington-Moscow communications link.

4. *Technical management.*—Technical management and support for NOMSS is provided by the National Weather Satellite Center, and by the National Aeronautics and Space Administration under reimbursable agreements.

Appropriation to liquidate contract authorization.....	216,500	187,500	190,000

This appropriation provides for the payments of subsidy to ship operators in order to maintain a U.S. merchant fleet in support of U.S. foreign commerce and capable as serving as a naval auxiliary in event of a national emergency. The program is designed to pay the difference between the fair and reasonable cost of certain expenses (wages and subsistence of crew; insurance; vessel maintenance and repair) and the estimated cost of the same items if the ships were operated under foreign registry. To be eligible for subsidy, an operator must provide regular berth services on an essential trade route, show that Government aid is necessary to place the operation on a parity with its foreign competition, and employ vessels constructed in the United States and manned by U.S. citizens.

During calendar year 1963, 15 operators had operating-differential subsidy contracts with the Maritime Administration and provided service on 34 essential foreign trade routes. These operators carried 10.7 million deadweight tons of cargo, an increase of 6% over calendar year 1962.

The total of vessel operating expenses was \$715.4 million of which \$293.3 million or 41% represented subsidizable items of expense. The operations for which subsidy support is projected are detailed in the following table.

	Subsidized operators	Maximum voyages under contract	Voyages under- taken	Vessels employed	Estimated obligation (thousands)
Past years:					
Calendar years 1947-61.....	---	-----	21,379	---	\$1,365,900
Calendar year 1962.....	15	2,082	1,732	---	180,552
Calendar year 1963 (6 months).....	15	2,081	874	---	97,398
Fiscal year 1964.....	15	2,076	1,804	318	186,626
Estimated:					
Fiscal year 1965.....	15	2,076	1,853	315	196,000
Fiscal year 1966.....	15	2,059	1,845	314	190,000

¹ Annual.

The budget estimate reflects contract authority for conduct of 1,845 voyages under approved contracts during 1966.

Passenger and freight services.—During 1966, it is anticipated that vessels operating under subsidy will provide approximately the same passenger and freight services as in 1965, except for the passenger vessel, *SS America* which was withdrawn from subsidy during 1965. In calendar year 1963 the number of subsidized voyages and routes served were as follows:

To:	From ports on—

General and special funds—Continued

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORIZATION)—continued

Recapture of excess profits.—All contracts for operating subsidy provide that 50% of the net profits earned from the contractors' subsidized operations and services which over a 10-year period exceed 10% of capital necessarily employed shall be withheld from payments made by the Government. This recapture is calculated annually based upon cumulative profits earned since the beginning of the recapture period. The estimate for the current and budget years, shown in the program and financing schedule, assumes that the first quarter of calendar year 1964 profit experience of each operator will be continued.

Status of unfunded contract authorization.—The computation and approval of final subsidy rates and audit of annual accountings will make it possible to make most payments of 100% of subsidy payable on account of

operations prior to December 31, 1961. The \$93 million unpaid subsidy, as of June 30, 1966, represents a backlog consisting largely of amounts withheld pending final rate and audit determinations for operations subsequent to calendar year 1961, plus estimated amounts earned in the final quarter of 1966 when bills will not be presented or paid during the year.

RESEARCH AND DEVELOPMENT

For expenses necessary for research, development, fabrication, and test operation of experimental facilities and equipment; collection and dissemination of maritime technical and engineering information; studies to improve water transportation systems; and supporting services related to nuclear ship operation; **[\$9,500,000]** \$10,500,000, to remain available until expended: *Provided*, That transfers may be made to the appropriation for the current fiscal year for "Salaries and expenses" for administrative expenses (not to exceed \$800,000) and any such transfers shall be without regard to the limitation under that appropriation on the amount available for such expenses: *Provided further*, That transfers may be made from this appropriation to the "Vessel operations revolving funds" for losses resulting from expenses of experimental ship operations. (*Department of Commerce Appropriation Act, 1965.*)

1. *Merchant marine directed research.*—This activity is directed toward specific improvements in shipyard construction, ship design and construction, ship operations, port and terminal operations and maritime transportation systems based on preestablished goals and time schedules.

2. *Advanced ships and systems.*—This activity provides for long-range research directed toward new merchant marine concepts and developments to meet future needs.

3. *NS "Savannah" operation.*—Servicing, maintaining, and operating the NS *Savannah* including all related supporting services, and with the operations of the ship funded through the Vessel operations revolving fund and reimbursed through this appropriation.

4. *Administrative expenses.*—Expenses for personnel services, travel, reporting, etc. of the Office of Research and Development and for the administrative expenses of other offices for work associated with research and development activities.

1. *Administrative expenses.*—Shown herein are the expenses of administering most of the functions of the Maritime Administration, including operating-differential subsidy contracts, continuing ship replacement activities, ship operations and chartering, auditing, property management, and State Marine Schools liaison. Administrative expenses in connection with the U.S. Merchant Marine Academy, general agency ship operation, research and development, and new ship construction are provided in other funds.

2. *Shipyard and warehouse expenses.*—One Government-owned reserve shipyard will be maintained in a partial state of readiness for defense purposes. Provision is made for four warehouses to store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

3. *Reserve fleet expenses.*—Provision is made for the preservation and security of 970 merchant vessels maintained for national defense purposes and limited preservation of 400 Liberty ships as a commercial shipping reserve and another 371 ships (Liberty and other) awaiting sale as a source of scrap.

Public Law 415, 84th Congress (70 Stat. 25) established the Merchant Marine Academy at Kings Point, N.Y., to provide a program for the training of officers for service in the merchant marine. A 4-year training course is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniform and textbooks allowance, and medical care for the cadets. A cadet training liaison staff in Washington, D.C., provides staff assistance to the Maritime Administrator on training matters and assists in the selection and appointment of cadets.

The States of Maine, Massachusetts, New York, Texas, and California maintain schools for the training of merchant marine officers, with Federal assistance given in the form of (a) direct grants of \$75 thousand, if matched by State appropriations and if out-of-State students are

enrolled; (b) allowance to cadets for uniforms, textbooks, and subsistence; and (c) repairs to Federal training vessels loaned to the schools.

The Maritime Academy Act (72 Stat. 622) provides contract authority for the Secretary of Commerce to enter into agreements with States to provide these grants and allowances over a 4-year period. This act provides contract authority without limit as to amount or fiscal year. The new obligational authority includes the estimated obligations to be incurred under this authority. Maintenance and repair of training vessels are accomplished through annual appropriations.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slop-chest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities,

¹ Balances of selected resources are identified on the statement of financial condition.

Under the Merchant Marine Act, 1936, the Maritime Administration received authority to insure construction loans and mortgages with aggregate outstanding balances of up to \$1 billion, on certain types of cargo- and passenger-carrying vessels.

Budget program.—The fund reflects the sale in 1965 of the SS *Titan* for \$8.3 million, involving a \$7.3 million, 15 year mortgage. A loss of \$3.4 million was incurred incident to default of the insured mortgage of this vessel, which is the difference between the acquisition cost of mortgage and the sale price. No additional mortgage defaults are reflected in the estimates for 1965 and 1966.

Financing.—The redemption of defaulted loans or mortgages is financed from insurance premiums and fees, together with such amounts as may be made available by borrowings from the Treasury Department, pursuant to Public Law 85-520 (72 Stat. 358). During 1964, Treasury loan totaling \$5.1 million was made to purchase defaulted mortgages guaranteed by the Maritime Administration on SS *Goldstream* and SS *New Yorker*.

Operating results and financial condition.—As of June 1964, balances outstanding plus commitments for additional ship mortgages total \$454.5 million. The outstanding balances for loans and mortgages at the end of 1965 and 1966 are projected at \$513 million and \$580 million, respectively. During 1964 an advance of \$266 thousand was made to a mortgagor with depleted working capital to meet a semi-annual mortgage installment. To avoid mortgage defaults two deferments in the amount of \$2.3 million were authorized during 1964. No additional funds are programmed for advances in 1965 and 1966. Earnings resulting from premium and interest receipts, are retained to meet possible additional requirements for advances to mortgagors. The fund in 1965 and 1966 reflects Treasury borrowing repayments of \$4.2 million and \$4.8 million, respectively. During 1964 repayments of \$4.4 million were made of which \$1.2 million was for Treasury borrowings and the remainder for liquidation of liability to the general fund.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances direct operation and charter of cargo vessels for transport of military and national interest cargo. It is also used for the operation of Government-owned experimental vessels (70 Stat. 531).

Budget program—1. *Vessel operations expense*.—Cargo vessels are operated by private operators as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service.

TRANSPORTATION—Continued

MARITIME ADMINISTRATION—Continued

Public enterprise funds—Continued

VESSEL OPERATIONS REVOLVING FUND—continued

2. *Charter operations.*—As of June 30, 1964, there were three Government-owned vessels under charter to private operators.

3. *Experimental ship operations.*—The 1966 estimate provides for the costs of operating the NS *Savannah* through June 30, 1966. Included are crew salaries and training expenses, subsistence, maintenance and repair of the vessel, maintaining and operating the nuclear propulsion plant, insurance, port expense, service and husbanding contracts, agent's compensation, procurement of spare parts, etc. In 1966 the ship will make domestic and foreign voyages, either by agent contract or commercial charter operation.

Financing.—Expenses are financed from revenue and reimbursements from Military Sea Transportation Service and other appropriations, in accordance with 65 Stat. 59.

Operating results and financial condition—1. *Vessel operations.*—Rates charged the Military Sea Transportation Service cover full costs arising under general agency agreement for ship operations.

2. *Charter operations.*—A net income of \$93 thousand will result from operation of charters to private operators in 1966. The \$334 thousand net income for 1964 is due largely to charter hire adjustment of prior year contracts. The fund may be reimbursed from research and development appropriation for losses incurred under commercial charter of NS *Savannah*.

3. *Experimental ship operation—NS Savannah.*—The full costs of operating the NS *Savannah* are charged to the fund. Operating costs are partially offset by revenue from passenger and commercial cargo estimated at \$500 thousand. The fund is also reimbursed for losses incurred in operation of the NS *Savannah* from the research and development appropriation.

¹ Balances of selected resources are identified on the statement of financial condition.

The Maritime Administration is authorized by 46 U.S.C. 1281-1294 to insure against loss or damage by marine war risks when it is found commercial insurance cannot be obtained on reasonable terms and conditions. Legislation will be proposed to continue this program which otherwise will expire in September 1965. The 1966 estimates assume this extension and project revenue expense and increases due to renewal of binders. Authority to underwrite insurance has been extended at five year intervals since September 1950.

Budget program.—As of June 30, 1964, the number of outstanding binders issued for the types of insurance covered by this fund were: 1,377 for hulls, 1,233 for protection and indemnity and 1,051 for insurance of crew life and personal effects. These binders which become effective on the outbreak of war cover approximately \$13 billion of insurance. Second seamen's war risk insurance has been provided at the request of the Navy—without premium but on a reimbursable basis as required by 46 U.S.C. 1285 on 20 tankers for the Military Sea Transportation Services as of June 30, 1964. It is estimated that this service has provided a savings of \$54 thousand.

Financing.—65 Stat. 746 provides authority for the Secretary of Commerce to transfer \$10 million from the Vessel Operations Revolving Fund, to the War Risk Insurance Revolving Fund if found necessary. No transfers have been made and none are anticipated in 1965 and 1966. Revenue in the fund is received from fees paid for the issuance of interim binders, premiums paid for builder's risk insurance, interest from investments and reimbursable charges from the Navy.

Operating results.—Retained earnings amounted to \$154 thousand in 1964 and are estimated at \$112 thousand for 1965 and \$251 thousand for 1966.

BUREAU OF PUBLIC ROADS

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

(Trust fund)

Necessary expenses of administration and research (not to exceed \$47,000,000) \$52,600,000, including maintenance of a National Register of Revoked Motor Vehicle Operators' Licenses, as authorized by law (74 Stat. 526), and purchase of [twenty-five] two passenger motor vehicles [of which sixteen shall be] for replacement only, shall be paid, in accordance with law, from appropriations made available by this Act to the Bureau of Public Roads and

from advances and reimbursements received by the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative and research expenses pursuant to the provisions of title 23, United States Code, section 104(a), \$100,000 shall be available for carrying out the provisions of title 23, United States Code, section 309. (23 U.S.C. 303, 307, 313; Department of Commerce Appropriation Act, 1965.)

Program and Financing (in thousands of dollars)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, \$1,007 thousand; 1964, \$1,565 thousand; 1965, \$1,565 thousand; 1966, \$1,565 thousand.

Expenses for administration of the Federal-aid highway programs and for carrying on highway research are met by deductions from Federal-aid authorizations. Administrative services for other programs of the Bureau of Public Roads and for road construction programs of other Federal agencies are initially financed from this activity, and reimbursements of their pro rata share of administrative costs are collected periodically from these programs. Increases provide additional staff to permit more adequate field review of State highway department construction and right-of-way operations and finance expanded research in the highway safety area.

1. *Engineering and administration.*—Provides for direction and management of field operations and development of policies and procedures to implement highway legislation. The field operations are organized in 10 regions with division offices in each of the States, the District of Columbia, and Puerto Rico. These offices are responsible for administering the Federal-aid highway programs within the States; assisting in developing adequate State programs for highway planning, research, engineering, construction, and maintenance; and carrying out direct Federal highway projects.

2. *Audits and investigations.*—Provides for the audit of State claims; comprehensive review and evaluation of all activities and programs of the Bureau and the States; and investigation of allegations of irregularity, fraud, land speculation, collusion, impropriety of action, or any other violation of or noncompliance with laws, rules, and regulations.

3. *Highway planning.*—Provides for systematic current and long-range planning, broad programming in highway development, and supervision of State planning accomplished with 1½% grant funds.

4. *Highway research and development.*—Provides for direct and contract research and development projects. Supervision is exercised in coordinating research carried out with 1½% grant funds provided the States.

5. *Highway safety.*—Provides leadership and support for highway safety activities designed to assist in reducing the large human and economic loss to the Nation through highway accidents. Support of the National Driver Register Service, the President's Committee on Traffic Safety, and the Interdepartmental Highway Safety Board is provided under this activity.

6. *Training programs.*—Provides for recruitment, assignment to training courses, and the placement within the organization of college graduates.

Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided in the Federal-Aid Highway Act of 1956 and subsequent highway legislation to cover 90 percent of the costs of completing the 41,000-mile National System of Interstate and Defense Highways and to match State funds on a 50-50 basis for the primary, secondary, and urban programs. The Federal share of the cost is increased in those States with large areas of public domain. Payments to the States are made out of the Highway trust fund, into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers, and truck use. A supplemental appropriation of \$250 million will be needed in 1965 to enable these payments to be made on a timely basis.

The Federal-Aid Highway Act of 1961 authorized additional appropriations for the Interstate program, and also provided increased revenues to finance these increased authorizations. The Federal-Aid Highway Act of 1964 provides \$1 billion for each of the years 1966 and 1967 to continue the Federal-aid primary, secondary, and urban programs. All authorizations are available for use in the year prior to the year for which authorized.

A revised estimate of the cost of completing the Interstate System has been prepared. It is now estimated that the Federal share of the cost will be \$42 billion, which is \$5 billion more than previously estimated. Although revenues accruing to the trust fund under present tax rates would be sufficient to cover costs under the previous

estimate, additional revenue will be necessary to meet the cost increase with a minimum of slippage in the scheduled completion date. It is proposed to provide this revenue by increasing taxes on highway users by approximately \$200 million and extending the October 1, 1972, tax cutoff date.

As of October 1, 1964, nearly 17,600 miles of the 41,000-mile Interstate System were open to traffic. Approximately 75 percent (13,259 miles) was built or improved under the Federal-aid Interstate program, most of it under the 90 percent Federal, 10 percent State matching program launched in 1956. Toll roads, bridges, and tunnels incorporated in the System totaled 2,353 miles. In addition to the sections open to traffic, 6,059 miles were under construction with Interstate funds, and engineering and right-of-way acquisition was in progress on another 12,057 miles. Thus, some form of work was under way or completed on 35,688 miles of the 41,000-mile system—about 87 percent of the total system mileage.

Construction projects involving 176,546 miles in the regular Federal-aid program (primary, secondary, and urban) have been completed since July 1, 1956, at a total cost of \$12.65 billion, and contracts involving 21,424 miles at a cost of \$3.13 billion were authorized or under way on October 1, 1964. In addition, \$883 million of engineering and right-of-way acquisition work had been completed and \$746 million was underway.

Actual and estimated progress of Federal-aid programs are summarized in the following table:

PAYMENTS UNDER CONTRACT AUTHORIZATION

[In thousands of dollars]

Fiscal year:	Contract authorization ¹	Unobligated contract authorization, end of year	Federal payments	Projects approved		
				Number	Total cost	Federal share
1956.....	2,000,000	1,939,236	740,343	6,650	1,695,808	885,000

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of \$33 million are available for each of the years 1966 and 1967. Funds can be obligated in the year prior to the year for which authorized.

The 1966 estimate of \$33 million finances the balance of the 1964 authorization and \$28,050 thousand of the 1965 authorization provided by the Federal-Aid Highway Act of 1962.

Actual and estimated progress of the program is summarized in the following table (dollars in thousands):

Fiscal year	Annual authorization ¹	Miles completed	Unobligated balance, end of year	Obligations for projects	Expenditures
1959.....	\$33,000	429	\$38,490	\$32,250	\$27,798
1960.....	33,000	481	43,733	26,879	27,812
1961.....	33,000	469	43,478	31,949	30,900
1962.....	33,000	404	33,994	41,100	29,955
1963.....	33,000	478	36,602	28,926	38,794
1964.....	33,000	492	38,114	30,326	33,277
1965.....	33,000	410	37,000	32,712	32,866
1966.....	33,000	425	36,950	31,643	33,000

¹ Each fiscal year authorization becomes available for obligation not later than January 1 in the preceding year.

2. *Administration.*—In addition to administration this covers the costs of engineering supervision of the program.

1. **Construction.**—Highways are constructed and improved through public lands in those States with large areas of such lands. Funds for this program are available a year in advance of the year for which authorized. Contract authorizations totaling \$16 million are available during 1964 and 1965 and \$7 million is available for 1966. The 1966 appropriation estimate finances the balance of the 1964 authorization and \$3.7 million of the 1965 authorization, both of which were provided by the Federal-Aid Highway Act of 1962.

Unfunded balance, end of year.....	-6,000	-6,000	
Appropriation to liquidate contract authorization.....	6,000		6,000

The 1,555-mile Central American section of the Inter-American Highway is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These republics pay one-third of the cost of highways through their countries and have assumed responsibility for future maintenance.

The Federal-Aid Highway Act of 1962 (76 Stat. 1146) authorized an additional appropriation of \$32 million, including \$12 million in contract authority, to complete the highway to acceptable standards. The 1964 and 1965 appropriations provided additional obligational authority of \$11 million. The available \$23 million, together with the \$4 million requested for 1966, will provide \$27 million of the total \$32 million authorization. The remaining \$5 million will be required in 1967.

The following table reflects the amount of work, by countries, that will be obligated in the 3 years (in thousands of dollars):

	Fiscal years			Total
	1965	1966	1967	
Guatemala.....	6,000	3,018	-----	9,018

The Highway Revenue Act of 1956 (70 Stat. 374) provides for the transfer from the general fund of sums equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, annual appropriations are authorized from this trust fund to meet expenditures for Federal-aid highways. Amounts in the fund not currently required are invested in U.S. securities, and interest thereon is added to the fund.

Improvement of the Pentagon road network (trust fund).....	558		
Balance of fund at end of year....	641,431	189,418	268,418

Under proposed legislation. A \$200 million annual increase in taxes, the receipts of which are paid into the highway trust fund, is proposed. The estimates assume that increased rates would become effective on July 1, 1965.

General and special funds:

REPAYABLE ADVANCES TO THE HIGHWAY TRUST FUND

For repayable advances to the "Highway trust fund" during the current fiscal year, as authorized by section 209(d) of the Highway Revenue Act of 1956 (70 Stat. 399), \$250,000,000.

A temporary advance to the Highway trust fund will be required during 1966 because expenditures during the first half of the year will exceed available revenues. The deficiency is expected to reach a maximum of \$250 million by December 31, 1965. Thereafter receipts will begin to exceed expenditures and will be adequate to repay the advances with interest prior to June 30, 1966.

TRANSPORTATION RESEARCH

SALARIES AND EXPENSES

For necessary expenses for conducting transportation research activities, [\$2,000,000] \$3,200,000, to remain available until ex-

ended. (5 U.S.C. 596; Department of Commerce Appropriation Act, 1965.)

The transportation research program is producing information upon which public policies can be formulated to encourage more efficient, coordinated, and dynamic transportation. This includes a major project to develop recommendations for transportation facilities and services in the Northeast Urban Corridor.

On July 19, 1963, Public Law 88-67 repealed the Inland Waterways Corporation Act, and directed the Secretary of Commerce to pay into the Treasury, as miscellaneous receipts, all future receipts and all remaining funds of the Corporation.

During 1964, all known liabilities were paid, and the contingent liability for one suit remaining in the courts will become payable, if plaintiff should be successful, out of funds appropriated as required to pay judgments.

The corporate fund balance has been returned to the Treasury, and current collections are being deposited as miscellaneous receipts. The purchaser repaid the outstanding principal balance of \$3,125 thousand, plus accrued interest, on October 21, 1964.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 302. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U.S.C. 596a), to the extent and in the manner prescribed by said Act.

SEC. 303. During the current fiscal year appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but, unless otherwise specified, at rates for individuals not to exceed **[\$75]** \$100 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). (*Department of Commerce Appropriation Act, 1965.*)

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

ACTIVE FORCES

The following narrative statement covers the active duty appropriations for the Army, Navy, Marine Corps and Air Force.

1. *Pay and allowances of officers.*—This provides for the pay and allowances of officers of the military service on active duty.

2. *Pay and allowances of enlisted personnel.*—This provides for the pay and allowances of enlisted persons of the military service on active duty, payments for initial issues and replacement clothing under the monetary clothing allowance system.

3. *Pay and allowances of cadets and midshipmen.*—This provides for the pay and allowances of cadets and midshipmen at the three service academies, and aviation cadets.

The numbers of active duty military personnel provided for are shown in the following table:

Supplemental appropriations for 1965 are anticipated for separate transmittal to provide funds for the additional costs resulting from the enactment of legislation effective September 1, 1964, increasing the pay and allowances of certain military personnel.

4. *Subsistence of enlisted personnel.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel, including emergency and operational rations. In addition, it provides for a cash allowance paid to enlisted personnel who are given permission to mess separately or who are stationed at places where rations in kind are not available.

5. *Permanent change of station travel.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household goods in commercial facilities, and transportation of personal property. Payment for services furnished by the Military Sea Transportation Service and Military Air Transport Service for transportation to and from overseas of military personnel, their dependents, household goods, and automobiles is also included.

6. *Other military personnel costs.*—This provides for expenses of apprehension of deserters and escaped military prisoners, payment of interest on money deposited by enlisted personnel, and payment of death gratuities to beneficiaries of military personnel.

General and special funds:

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except [those undergoing reserve training]); members of reserve components provided for elsewhere); [\$4,221,000,000] \$4,102,600,000, and, in addition [\$85,000,000] \$240,000,000 of which \$210,000,000 shall be derived by transfer from the Army stock fund and the Defense stock fund and \$30,000,000 shall be derived by transfer from the Army industrial fund: Provided, That not to exceed \$12,300,000 of the unobligated

RESERVE FORCES

The following narrative statement covers the appropriations for the National Guard and Reserve components of the Army, Navy, Marine Corps, and Air Force.

National Guard and Reserve personnel.—This program provides funds for training members of the Ready Reserve required for early mobilization needs of the Active Forces. Most of the paid National Guard and Reserve components personnel perform 48 or 24 drills and attend 2 weeks of active duty for training each year. Other personnel not requiring as intensive training receive only a period of active duty for training (usually 2 weeks) during the year. Active duty for basic training is provided for personnel enlisting in a National Guard or Reserve component who have not previously received military training. Service schools and special tours of active duty training provide additional training for limited numbers of the Ready Reserve.

The numbers of National Guard and Reserve component personnel estimated to participate in the paid training programs are summarized in the following table:

	YEAREND NUMBER

Total Air Force Reserve.....	67,269	56,320	53,335

¹ Number receiving training at any time during year.

Reserve officer candidates.—The Reserve Officers' Training Corps program provides training for reserve officer candidates who have enrolled in the course while attending a collegiate institution at which an ROTC unit has been established. The curriculum includes instruction in military and academic subjects together with one or more summer active duty training periods with the active forces. College graduates who satisfactorily complete the advanced course of the program are commissioned and are ordinarily ordered to active duty for a minimum period of 2 years.

The Reserve Officers' Training Corps Vitalization Act of 1964 authorizes a limited number of scholarships for 4-year ROTC students on a competitive basis. Successful candidates for the scholarships are required to serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. The Act also authorizes a 2-year ROTC program as well as the traditional 4-year program.

The Navy and Marine Corps also provide for an officer candidate program wherein students attending any accredited college or university may enroll, attend prescribed summer military training programs, and receive a commission after graduation. They are then required to serve at least 3 years on active duty.

In addition, the Army and Air Force provide 2 years of basic military training for college students who elect, or are required by the college, to enroll in the course for the first 2 years but who are not required to be candidates for officer commissions. The Army also provides training for students who elect to enroll at 294 high schools in a junior program.

90 Expenditures.....	1,209,447	1,380,000	1,510,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps and Air Force; (b) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve; and (c) survivors' benefits. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows

the average number of personnel on the rolls during 1964 compared with the estimated numbers for 1965 and 1966.

AVERAGE NUMBER

Type of retirement	1964 actual	1965 estimate	1966 estimate
1. Nondisability.....	241,190	281,357	320,652
2. Temporary disability.....	14,625	14,257	14,188
3. Permanent disability.....	82,840	87,172	91,021
4. Fleet reserve.....	68,266	77,327	84,713
5. Survivors' benefits.....	3,932	4,479	5,077
Total.....	410,853	464,592	515,651

Under the provisions of the retired serviceman's family protection plan, retired service personnel who elect to receive reduced amounts of retired pay are able to provide for monthly payments to be continued to their survivors. The reductions are determined on a basis designed to establish an actuarially sound system. Current appropriations provide only for the net payments to be made each year, and the liability for future payments of survivor benefits is unfunded. Administrative expenses of this family protection plan are provided as operation and maintenance costs of the military services. The accumulated difference between reductions in retired pay and actual payments of survivor benefits is indicated in the following table (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Accumulated deductions, net, start of year.....	51,408	61,719	74,129
Plus: Current deductions during the year.....	14,906	17,723	19,988
Less: Payment of survivors' benefits.....	4,595	5,313	6,132
Accumulated deductions, net, end of year.....	61,719	74,129	87,985

OPERATION AND MAINTENANCE

The Operation and Maintenance appropriations of the Department of Defense provide funds for the day-to-day costs of operating and maintaining the Armed Forces, including the Reserve Forces, and related support activities of the Department of Defense. Included are the combat forces under the control of the various unified and specified commands, as well as the logistical, training, and administrative activities provided by each military department and the defense agencies.

Financial requirements for these accounts are influenced by a variety of factors, the principal of which are military personnel, force levels, rates of operational activity, numbers of installations, and quantity and complexity of major equipment (missiles, aircraft, ships, tanks, etc.) in operation. Details of force and military personnel levels are in part 4 of the budget. Further discussion of the impact of force levels is included under the applicable appropriations.

A substantial part of these appropriations pays for the cost of operating and maintaining our military installations throughout the world. The numbers of major installations are as follows:

	1964	1965	1966
Army.....	185	178	171
Navy.....	247	241	237
Marine Corps.....	13	14	14
Air Force.....	207	200	198
Total.....	652	633	620

Support programs common to each military department, such as supply, materiel maintenance, training, communi-

OPERATION AND MAINTENANCE—Continued

cations, and medical, are financed by these appropriations. Supply activities of the various services and of the Defense Supply Agency procure, store, distribute, and compute requirements for military materiel. These various functions are conducted at supply depots and centers, shipyards, inventory control points, procurement offices, and other logistical installations throughout the world.

Training activities provide for individual training of officers and enlisted men including recruit training, career training, and training in special skills, including pilot training. The majority of individual training is conducted through resident courses of instruction at the various training bases, service schools and colleges, although some educational facilities of civilian institutions are used. This program also provides for the operation of the three service academies, including a larger cadet enrollment at the Army and Air Force Academies, as authorized by recently enacted legislation.

Communications support relates primarily to commercial leased line facilities. These include two defensewide automated communications switching networks for voice and record purposes, which are being expanded in 1966 to provide for a vastly improved capability.

Medical care is provided active and retired military personnel and their dependents in hospitals operated by the military departments, by other Federal agencies, and by civilian agencies. It cost the Department of Defense \$76 million in 1964 for the care of dependents of military personnel in civilian hospitals, and these costs are estimated at \$80 million in 1965 and \$83 million in 1966.

General and special funds:

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, including administration; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; care of the dead; chaplains' activities; awards and medals; welfare and recreation; recruiting expenses; transportation services; communications services; maps and similar data for military purposes; military surveys and engineering planning; repair of facilities; hire of passenger motor vehicles; tuition and fees incident to training of military personnel at civilian institutions; field exercises and maneuvers; [expenses for the Reserve Officers' Training Corps and other units at educational institutions, as authorized by law;] and not to exceed **[\$4,156,000] \$4,303,000** for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes, and his determination shall be final and conclusive upon the accounting officers of the Government; **[\$3,439,000,000] \$3,379,100,000**, of which not less than **[\$236,000,000] \$221,900,000** shall be available only for the maintenance of real property facilities. This appropriation provides for the operations and other activities of the Active Army, with a beginning strength of 963,273 and end strength of 953,094 for 1966, and for those unified and specified command headquarters assigned to the Army. This budget reflects the elimination of the 15,000-man increase in strength provided in 1964 and 1965 for testing and evaluation of experimental air assault concepts. A major change in 1966 will be the transfer of the operation of the U.S. Army Replacement Training Centers from operating forces to training activities to place most individual training in one budget activity.

1. *Operating forces.*—This program provides for the unit training, operation and support of Army combat and combat support forces comprising approximately 70% of the Active Army strength. Included are costs for the operation and maintenance of the installations where these units are stationed and the operation and maintenance of the weapons, aircraft, vehicles, and other equipment used by these units. Also financed in this program are the Army Air Defense Command, the operation of tactical aircraft, the field exercise program, and special tactical activities.

2. *Training activities.*—This program provides for the individual training of officers and enlisted men. Individual training includes recruit training in U.S. Army Replacement Training Centers and school training at 37 Army service schools and colleges. In addition, this program finances joint training activities of the Industrial College of the Armed Forces, the National War College, the Defense Language Institute, and the Defense Information School.

3. *Central supply activities.*—This program finances all of the logistics functions involving requirements computation, procurement, storage and distribution of supplies and equipment for the combat forces of the Army. It also finances the maintenance of 46 idle and partially idle industrial plants which are essential to mobilization requirements, particularly for ammunition. The self-supporting function of excess, salvage and scrap property disposal is also contained in this activity.

4. *Major overhaul and maintenance of materiel.*—This program provides depot-level maintenance and maintenance assistance services on a worldwide basis, both with in-house resources and under contract with commercial enterprises, in order to maintain the Army's equipment in combat-ready condition. These services are also provided on a reimbursable basis to other U.S. forces and other nations under the military assistance and cooperative logistics programs.

5. *Medical activities.*—This activity finances the Army cost of medical care for military personnel and their families.

6. *Armywide activities.*—This program provides for worldwide command and direction of Army programs, accomplished at major headquarters. It also provides for the support of certain joint headquarters for which the Army has executive agent responsibility, and for other activities such as personnel processing and support activities, administrative services, communications, intelligence activities, mapping and geodesy, finance and audit services, and joint activities.

Appropriation to liquidate contract authorization (75 Stat. 377 and annual appropriation act).....			54,044

An appropriation is requested to liquidate certain obligations incurred during 1962 under the authority of section 612(c) of the 1962 Department of Defense Appropriation Act because of a force buildup related to the Berlin crisis. Although contract authority was not shown under the practices then prevailing, the obligations were reported in the 1962 column of the 1964 budget.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, including aircraft and vessels; modification of aircraft, missiles, missile systems, and other ordnance; design and alteration of vessels; training and education of members of the Navy; administration; procurement of military personnel; hire of passenger motor vehicles; welfare and recreation; medals, awards, emblems, and other insignia; transportation of things (including transportation of household effects of civilian employees); industrial mobilization; medical and dental care; care of the dead; charter and hire of vessels; relief of vessels in distress; maritime salvage services; military communications facilities on merchant vessels; dissemination of scientific information; administration of patents, trademarks, and copyrights; annuity premiums and retirement benefits for civilian members of teaching services; tuition, allowances, and fees incident to training of military personnel at civilian institutions; repair of facilities; departmental salaries; conduct of schoolrooms, service clubs, chapels, and other instructional, entertainment, and welfare expenses for the enlisted men; procurement of services, special clothing, supplies, and equipment; installation of equipment in public or private plants; exploration, prospecting, conservation, development, use, and operation of the naval petroleum and oil shale reserves, as authorized by law; and not to exceed **[\$8,698,000]** \$9,825,000 for emergency and extraordinary expenses, as authorized by section 7202 of title 10, United States Code, to be expended on the approval and authority of the Secretary and his determination shall be final and conclusive upon the accounting officers of the Government; **[\$3,144,350,000]** \$3,332,100,000, of which not less than **[\$133,700,000]** \$141,000,000 shall be available only for the maintenance of real property facilities, and not to exceed \$1,169,000 may be transferred to the appropriation for "Salaries and expenses", Weather Bureau, Department of Commerce, fiscal year 1966 for the operation of ocean weather stations: Provided, That not to exceed \$8,600,000 of the unobligated balance of the appropriation made under this head for the fiscal year 1960, and subsequently withdrawn under the Act of July 25, 1956 (51 U.S.C. 701), may be restored and transferred to the appropriation account for "Medical care, Navy," for the fiscal year 1958.

[Not to exceed \$860,000 of this appropriation may be transferred to the appropriation "Salaries and expenses", Weather Bureau, Department of Commerce, fiscal year 1965 for the operation of ocean weather stations.] (5 U.S.C. 43, 55a, 73b-1, 78, 95a; 10 U.S.C. 265, 276, 351, 1037, 1071-85, 103a, 118 (a), (c), (f-h), 836, 1481-88, 2602, 2632, 2674, 2675, 5012-13, 5031, 5151, 5531, 6022, 6028-9, 6153, 6201-3, 6297, 6901, 6910, 6951-2, 6968, 7041, 7043-4, 7085, 7202, 7205, 7207-8, 7212, 7214-15, 7218, 7229, 7293, 7297, 7303, 7361-2, 7391-2, 7394-6, 7421, 7432, 7571, 7580; 24 U.S.C. 14a, 16a, 21a, 37; 31 U.S.C. 22a, 104, 725h; 33 U.S.C. 367; 37 U.S.C. 404; 39 U.S.C. 712; 40 U.S.C. 523; 44 U.S.C. 265; Department of Defense Appropriation Act, 1965; 78 Stat. 1024; Supplemental Appropriation Act, 1965.)

¹ Reimbursements from non-Federal sources are principally from sales of surplus U.S. Government property, sales of goods and services to individuals including laundry services, subsistence of hospital patients, surcharge on commissary sales and unofficial telephone service, and mutual security sales to foreign governments (5 U.S.C. 61(b), 616; 10 U.S.C. 1071-1085; 2481; 2667; 6011; 22 U.S.C. 1816; 40 U.S.C. 481(c); 70 Stat. 1105; 74 Stat. 377; 76 Stat. 329).

Maintaining the current combat readiness of naval forces is the primary objective of this appropriation.

These include carrier striking forces, submarine forces, antisubmarine forces, amphibious forces, and antiair warfare forces.

The number of active fleet ships is greater in 1966 than in 1965, and includes 73 nuclear powered ships of which 38 are Polaris submarines. Navy and Marine Corps tactical air capability will be enhanced by replacement of older aircraft with F-4 "Phantom" fighter and A-6A "Intruder" all weather attack aircraft. Complexity of ships and aircraft and their weapons continues to increase. Expanded and improved training programs are required in order to provide the additional trained personnel necessary to operate and maintain the more sophisticated weapons systems. Oceanography, communications, and intelligence are areas which are essential to the most effective use of naval weapons.

As executive agent for the Defense Department, the Navy will provide logistic support to the U.S. program for Antarctica. This support will include operation and maintenance of ships, aircraft, and facilities at a cost of \$19.9 million.¹

Because of procurement and production leadtime considerations, nuclear core replacement procurement has been transferred in the 1966 estimates to the Other procurement, Navy appropriation. The reprocessing cost, which represents an operating cost of nuclear ships, remains in this appropriation. 1965 and 1966 costs of the replacement core procurement program are \$64.6 million and \$90.7 million, respectively.

1. *General expenses, Navy personnel.*—This activity includes the costs of technical, scientific, and professional training and education for officers and enlisted men, including Navy reservists. Funds for welfare, morale, and recreation activities are also provided in this activity, as well as the costs of military personnel management functions.

2. *Weapons and facilities.*—Naval and Marine Corps flight operations supporting the military missions of the Navy include combat operating forces, such as carrier air groups, Marine air wings, land-based patrol squadrons, and supporting units. The increasing number of missile-firing ships in the fleet results in increased funds for missile system support, while the average cost of operating and maintaining aircraft continues to rise as higher performance aircraft are added each year.

3. *Ships and facilities.*—This activity provides for operating and maintaining the ships in the Navy's attack, amphibious assault, antisubmarine, antiair warfare and Polaris submarine forces. The increases in 1966 are primarily related to communications equipment and weapons system updating and support of increasing numbers of complex ships and equipment. A major program change is the elimination of the Fleet Rehabilitation and Modernization (FRAM II) program and the substitution thereof of overhauls in depth for the ships involved.

4. *Medical care.*—Medical care and hospitalization of Navy and Marine Corps personnel and their dependents is provided by operating naval hospitals, dispensaries, dental clinics, and other specialized medical facilities.

5. *Civil engineering.*—Civil engineering provides for the public works support of the shore establishment, including maintenance, utilities and transportation, and including the technical management, planning, engineering and

¹ Direct charges to this appropriation, \$12.6 million; \$5.7 million in military personnel, Navy, and \$1.6 million in Other Procurement, Navy.

OPERATION AND MAINTENANCE—Continued

General and special funds—Continued

OPERATION AND MAINTENANCE, NAVY—Continued

design services associated therewith. Most of this work is accomplished by the public works departments at major installations; in seven larger naval complexes, public works centers provide centralized services to component facilities. Twelve construction battalions (Seabees) plus two headquarters staffs are maintained in readiness to support the military missions of the Fleet Marine Forces in overseas locations; they also operate and maintain the Antarctica logistics support stations.

6. *Service-wide supply.*—This activity encompasses the logistical support of major active forces, both continental and overseas, at shipyards and at 15 major supply depots and centers. Transportation costs of intra-Navy movement of material directed by inventory control points, including shipment by Military Sea Transportation Service, are also funded by this activity.

7. *Service-wide operations.*—Facilities and programs under the management of the Chief of Naval Operations including his headquarters staff are the principal activities financed under this activity. Included herein are district and command headquarters, naval stations, naval support activities, submarine and amphibious bases, the naval communications system, the naval security group, the oceanographic office, the Naval Observatory, the Naval Weather Service, naval intelligence activities, data processing and computer programming activities in support of the Navy Command and Control System and the Navy tactical data system. Also under this activity are the operations of the Immediate Office of the Secretary, the Department of the Navy Staff Offices (including the Judge Advocate General of the Navy and the Chief of Naval Research) and their field activities and the Chief of Naval Materiel. Increases are provided for oceanographic requirements, support of naval and defense communication system requirements, improvements in finance and audit functions, and additional staffing in the Office of Navy Materiel.

8. *Naval petroleum reserves.*—This activity provides for operation, conservation, maintenance, testing, and protection of naval petroleum reserves. Gross income from sale of Navy's share of production deposited in the general fund of the Treasury in 1964 was \$13 million, in 1965 it is estimated to be \$13.2 million, and in 1966, \$12 million.

91 Expenditures from civilian pay increase supplemental		1,572	49

¹ Reimbursements from non-Federal sources are principally from sales of surplus U.S. Government property and sales of goods and services to individuals, including laundry services and unofficial telephone service (10 U.S.C. 2481 and 7581; 70 Stat. 1105).

The principal effort of the Marine Corps is to train and maintain the Fleet Marine Forces in a high state of combat readiness for service with the fleet in amphibious operations or for such duties as the President may direct. The Fleet Marine Forces, composed of three reinforced Marine division-air wing teams and related support units, are assigned to the Atlantic and Pacific Naval Fleets.

This appropriation principally supports the ground elements of the Fleet Marine Forces. The operations of the three Marine air wings are financed primarily by the Operation and Maintenance, Navy appropriation. Other units supported by this appropriation include Marine detachments aboard naval vessels, landing force training units, Marine Reserve ground forces, and the security forces that guard naval bases, U.S. embassies and certain classified facilities.

1. *Training and operations.*—Operational deployments of Fleet Marine Force units will continue in 1966 at the present tempo of activity. Fleet Marine Force training objectives stress the vertical envelopment doctrine in amphibious operations through major exercises by combined air and ground units. To support training objectives, the Marine Corps recruits and trains military personnel and operates four major combat-unit support bases, two recruit training depots and one base devoted to professional schools training.

Significant workload data for this activity are:

	1964 actual	1965 estimate	1966 estimate
Fleet Marine Forces (average number of military personnel)	107,796	110,223	113,068
Security forces (average number of military personnel)	11,665	11,347	11,042
Major field training exercises	9	10	11
Recruit training (average load)	8,819	8,360	8,893

2. *Depot supply system.*—This activity includes the overhaul and preservation of major equipment and materiel and the receipt, issue and storage of materiel to support combat forces. Major equipment repair is programmed on the basis of balancing items repaired with new procurements to meet a maximum materiel readiness requirement within fund resources available.

4. *Marine Corps Reserve training.*—The objective of this program is to provide a strong Reserve organization capable of rapid assimilation into the operating forces when needed.

6. *Departmental administration.*—The staff agencies of the headquarters, Marine Corps, which provide for the administration of the missions, functions, and worldwide operations of the Marine Corps are funded in this activity.

¹ Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property and sales to individuals and foreign governments of goods and services, including subsistence of hospital patients, surcharges on commissary sales, and unofficial telephone services (10 U.S.C. 9621, 9625, 9626, 9627; 22 U.S.C. 2315, 2316).

Financial requirements for this appropriation have been influenced by significant force structure adjustments. The principal changes in the strategic forces in 1966 include the increased numbers of Minuteman intercontinental ballistic missile squadrons which will become operational. The estimates also reflect the final phase-out of the B-47 medium bombers and the elimination of all Atlas and Titan I missile squadrons. It is planned to continue "low-level" and airborne alert indoctrination training in the strategic bomber force.

Despite some numerical reductions in the active air defense fighter-interceptor forces in the United States, overall requirements are satisfied by closer integration of Air National Guard squadrons. One-third of the units continue to be maintained on instant alert, requiring a 75-hour workweek for combat crews, and a dispersal program is being implemented. SAGE System capabilities will continue at the current level. Improvements in the air defense area are continuing, including further upgrading of the Back-up Interceptor Control System (BUIC) which started in 1965.

The capability of the tactical forces will continue to improve in 1966, principally as a result of nearly doubling the number of squadrons equipped with the all-purpose F-4C fighter aircraft.

In addition to force structure changes, other program considerations will influence the activities financed by this appropriation. Increased emphasis has been placed on the use of newly developed electronics equipment in such areas as command and control techniques and capabilities, communications, warning, weather, and intelligence. These and similar activities require contracting for many specialized services beyond the capability of Air Force personnel.

1. *Aircraft fuel and oil.*—This program provides for aviation fuel and oil to support the operation of all Air Force and Air Force Reserve aircraft except those assigned to research and development activities, the Air National Guard, and that portion of the airlift service of the Military Air Transport Service which is financed by the Air Force industrial fund. There are several significant changes in the composition of the aircraft inventory and activity rates which result in an overall decrease in flying hours and costs from 1965 to 1966. The F-105, F/RF-4C, C-130, and T-38 aircraft will have increased usage, but this is more than offset by the flying hour decreases for the B-47, KC-97, F-84, KB-50 and various noncombat aircraft.

2. *Logistical support.*—This activity finances the depot-level maintenance of materiel and operation of the Air Force supply system. 1966 estimates reflect initial

phase-out activities at three depots scheduled for closing in subsequent years.

3. *Training support.*—This provides for basic, technical, professional and flying training of individuals. Operating costs of the Air Force Reserve program are also included.

4. *Operational support.*—Facilities are operated and maintained to support the strategic, air defense, tactical, and transport/troop carrier missions of the Air Force. Costs cover on-the-line maintenance of aircraft and weapons, maintenance and operation of installations, missile sites, airfields and allied facilities, as well as other expenses necessary to assure and maintain operational readiness of the combat forces. This activity reflects adjustments in programs, forces, personnel, and weapon systems as well as changes in base and installation utilization. The lower funding level in 1966 is largely due to base closures and phase-out of Atlas and Titan I missiles squadrons.

This activity also finances the air defense surveillance, warning and control systems; and airlift for joint Army airborne training and mobility exercises. In addition, there are included separately identifiable funds for the Alaska Communications System which provides telegraph and long-distance telephone service in Alaska to civilians as well as to the Department of Defense and other Government activities.

5. *Medical support.*—This activity finances the Air Force cost of medical care for military personnel and their families.

6. *Service-wide support.*—This program provides for the operation of Air Force and major command headquarters, air attaché and mission offices, intelligence and security activities, and the leasing of commercial communication systems and networks.

7. *Contingencies.*—These are extraordinary expenses approved and certified by the Secretary of the Air Force.

OPERATION AND MAINTENANCE, DEFENSE AGENCIES

For expenses, not otherwise provided for, necessary for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments and the Office of Civil Defense), including administration; hire of passenger motor vehicles; welfare and recreation; awards and decorations; travel expenses, including expenses of temporary duty travel of military personnel; transportation of things (including transportation of household effects of civilian employees); industrial mobilization; care of the dead; dissemination of scientific information; administration of patents, trademarks, and copyrights; tuition and fees incident to the training of military personnel at civilian institutions; repair of facilities; departmental salaries; procurement of services, special clothing, supplies, and equipment; field printing plants; information and educational services for the Armed Forces; com-

munications services; and not to exceed **[\$1,573,000]** \$1,623,000 for emergency and extraordinary expenses, to be expended on the approval or authority of the Secretary of Defense for such purposes as he deems appropriate, and his determination thereon shall be final and conclusive upon the accounting officers of the Government; **[\$511,620,000]** \$533,762,000, of which not less than **[\$11,000,000]** \$11,400,000 shall be available only for the maintenance of real property facilities. (78 Stat. 468, 469; Department of Defense Appropriation Act, 1965.)

77 Adjustments in expired accounts.....	-1,524		
90 Expenditures.....	472,209	520,000	500,000

¹ Reimbursements from non-Federal sources are principally from sales of surplus U.S. Government property to finance expenses in connection therewith (annual appropriation act); sale of goods and services to individuals, including laundry services and surcharges on commissary sales (10 U.S.C. 2205, 10 U.S.C. 2210 and annual appropriation act); charges for unofficial telephone service (10 U.S.C. 2481) and revenues from private carriers for use of Department of Defense owned rail cars (10 U.S.C. 2667).

This appropriation finances the immediate Office of the Secretary of Defense, the Joint Chiefs of Staff, and agencies of the Department of Defense which operate directly under the control of the Secretary of Defense.

1. *Supply operations.*—This activity covers the Defense Supply Agency, which provides common supply and service support to military activities in the continental United States. The agency manages inventories of \$1.6 billion for eight material categories: fuel, food, clothing, medical, general, industrial, construction and electronics supplies. The Agency also manages the Department of Defense-owned idle industrial plant equipment inventory, valued at \$1 billion, to secure greater utilization of this equipment. The Agency performs central procurement of \$3.1 billion per year. The Agency operates a distribution system for items in the eight material categories, including eight supply depots, and operates the Defense Logistics Services Center, including the Surplus Bidders Control Office, the Surplus Sales Offices, and the Traffic Management Service.

The Agency is also responsible for the administration and supervision of the Department of Defense coordinated procurement programs, the Federal catalog program, the defense materiel utilization program and the defense surplus property disposal program.

Obligations increase in 1966 because provision has been made for management improvement programs, including (1) the engineering data retrieval system which will permit the rapid retrieval and interchange of engineering data between the Department of Defense and industrial activities engaged in research and production engineering; (2) revision of Federal item identification guides which will result in significant reductions in the number of new items entering the Federal catalog system, reduction in new procurement, and increased utilization of inventory; (3) further consolidation of the inactive industrial equipment storage facilities which will permit greater utilization of this equipment and (4) provision for the Defense Supply Agency's share of rapid voice and digital communications.

2. *Field operations.*—This program activity includes the funds required for the support of the Armed Forces Information and Education activities of the Department of Defense; the Defense Communications Agency; the Defense Atomic Support Agency; the Defense Intelligence Agency and classified activities.

3. *Interdepartmental activities.*—Provision is made for the Department of Defense participation in and support of various interdepartmental activities, including the President's Committee on Equal Employment Opportunity, the Missile Sites Labor Commission and several classified activities.

4. *Management.*—This covers the civilian salaries and other necessary expenses of the Office of the Secretary of Defense and the Joint Chiefs of Staff Organization.

¹ Reimbursements from non-Federal sources are derived from commercial carriers for property lost and/or damaged in transit (31 U.S.C. 489a).

This appropriation provides for the support of the units in the Army National Guard, the individual reservists in the Army Reserve, and the Reserve Officers' Training Corps. It provides for employment of 22,018 technicians employed by the States in the administration of the units, maintenance and repair of equipment and the operation of field training camps. Some of these technicians will be in the Army Reserve program as Federal employees at the beginning of 1966 and will convert to State employee status by the end of the year.

The appropriation also supports 13½ Nike-Hercules missile battalions in the air defense program. The operating expenses of these battalions include the costs of 5,202 technicians who maintain the missile sites in a state of operational readiness which will permit their immediate use in the event of an emergency.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

For operation and maintenance of the Air National Guard, including medical and hospital treatment and related expenses; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, including repair of facilities, maintenance, operation and modification of aircraft; transportation of things; hire of passenger motor vehicles; supplies, materials, and equipment, as authorized by law for the Air National Guard of the several States, Commonwealth of Puerto Rico, and the District of Columbia; and expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense: travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, of Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; [\$236,000,000] \$238,000,000, of which not less than [\$1,700,000] \$2,500,000 shall be available only for the maintenance of real property facilities: *Provided*, That the number of caretakers authorized to be employed under the provisions of law (32 U.S.C. 709) may be such as is deemed necessary by the Secretary of the Air Force and such caretakers may be employed without regard to their military rank as members of the Air National Guard: *Provided further*, That obligations may be incurred under this appropriation without regard to section 107 of title 32, United States Code. (5 U.S.C. 43, 78; 10 U.S.C. 2231-38, 2511; 32 U.S.C. 107, 320, 701-14; Department of Defense Appropriation Act, 1965.)

¹ Reimbursements from non-Federal sources derived from utilities and services furnished to private contractors.

This appropriation provides for all operation and maintenance costs of the Air National Guard as a Reserve component of the Air Force. This includes funds for the operation of Air National Guard installations, including unit equipment and the pay of 15,986 State civilian employees. Some significant elements of the program are summarized in the following table:

The National Board for the Promotion of Rifle Practice, in conjunction with the Office of Director of Civilian Marksmanship, continues to promote civilian interest in

small arms marksmanship. Assistance is provided to approximately 5,700 clubs and schools with a total membership of approximately 404,000 enrolled with the Director of Civilian Marksmanship, by the loan of rifles and the issue of targets, trophies, medals and badges for marksmanship.

The Board plans and supervises local, regional and State rifle and pistol matches in addition to the National Rifle and Pistol Matches held annually at Camp Perry, Ohio.

Funds are provided to partially defray the travel expenses of State civilian shooting teams to the National Matches. Funds are included for payment to the State of Ohio for the lease of Camp Perry as the permanent site of the National Matches.

The program is augmented by the issue of ammunition, from existing stocks or purchased with funds provided under other appropriations, to members of rifle clubs and to competitors at national, regional and State competitions as follows (in thousands of dollars):

The United States Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed in 1964 totaled 868. An increase to 1,000 is anticipated in 1965 and 1966. The court released 104 opinions in 1964 and expects to publish a similar number during 1965 and 1966.

In compliance with the Uniform Code of Military Justice, the court is maintaining a current docket with the review completed, as of November 1, 1964, in 18,326 cases out of 18,424 cases filed since the court's establishment in 1951—leaving a balance of 98 under review.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:

- Funds appropriated to the President:
 - “Supporting assistance, economic assistance.”
 - “Contingency fund, economic assistance.”
 - “Military assistance, executive.”
- Federal Aviation Agency: “Operations.”
- Atomic Energy Commission: “Plant and capital equipment.”
- United States Information Agency:
 - “Salaries and expenses.”
 - “Acquisition and construction of radio facilities.”

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, munitions, and communications; major items for support

of the capital equipment when it is in use; the industrial facilities necessary to produce that equipment; and major modification of equipment in inventory where modernization can be achieved without buying new equipment. The capital equipment financed by these appropriations is principally procured from private contractors or produced in Government arsenals, shipyards, and plants.

The equipment inventories necessary to support the strategic and conventional warfare missions of the armed services will continue to be augmented and modernized. The 1966 program continues production of modern equipment and weapons in support of basic military missions. The improving military capability to cope with war threats of any kind anywhere is supported by continuing programs to increase the mobility and firepower of ground forces, strengthen the support capabilities of the tactical air forces, modernize airlift forces, and augment the capabilities of antisubmarine warfare forces. Direct budget programs are estimated as follows (in millions of dollars):

	1964 actual	1965 estimate	1966 estimate
Aircraft.....	6,172	6,241	6,367
Missiles.....	3,567	2,518	1,806

¹ Reimbursements from non-Federal sources are principally the dollar value of Mutual Security Military sales to friendly foreign nations (5 U.S.C. 172d-1).

This appropriation provides major items of combat and support equipment for approved Army forces in performing their assigned mission to meet successfully both atomic and conventional war requirements. It also provides for the procurement of selected components of major items, as well as production engineering, tooling, and facilities in support of current procurement.

In 1966, the Army's direct budget plan totals \$2,036 million, as compared to \$1,875 million and \$2,635 million for 1965 and 1964 respectively. As in previous years, this plan will be financed from new appropriations, unpro-

gramed balances of previous appropriations and budget plans, and anticipated reimbursements.

The 1966 program is specifically directed toward filling combat essential equipment allowances for the ROAD active and high priority reserve Army force, and providing conventional munitions and equipment adequate for sustained combat operations. Modernization of older inventories is continued, thereby providing increased capabilities attainable through the introduction of improved weapons, equipment, and munitions.

1. *Aircraft*.—The 1966 program contains aircraft which are essential to the combat operation of field forces.

To meet the Army's need for battlefield observation, troop movement, medical evacuation, and rapid logistical and tactical support for combat engaged forces, the 1966 program provides additional quantities of Iroquois, Chinook, and light observation helicopters thus continuing to emphasize aerial mobility and surveillance.

2. *Aircraft spares and repair parts.*—Included are high cost components and support materiel critical to the operation of Army aircraft. The 1966 program continues to provide for initial provisioning, peacetime replacement and war reserve inventories which are not carried in the Army stock fund.

3. *Missiles.*—This activity includes both surface-to-air and surface-to-surface missiles. In the former category, continued procurement in 1966 of Redeye missiles will provide frontline combat units with an effective defense against low altitude enemy aircraft. Initial procurement of Chaparral missiles will provide a forward area air defense system against low and medium altitude high performance enemy aircraft. Modification improvements to the Nike Hercules and Hawk air-defense systems planned for 1966 will provide for a more effective air defense within CONUS and oversea theaters of operation.

The surface-to-surface missile program for 1966 continues procurement of Shillelagh missiles to further improve the armor defeating capability of Army combat elements. Procurement of SS-11 antitank missiles for employment on Army helicopters also is continued. Pershing missiles are planned for continued procurement and improvement modification.

4. *Missile spares and repair parts.*—This covers initial provisioning and replenishment repair parts, and support materiel.

5. *Weapons and combat vehicles.*—This activity covers all weapons fired by crews, individuals, and armored vehicles. The 1966 program will provide materiel to replace training consumption, wear out, and obsolescence, and permit a quantitative and qualitative improvement of the inventory. Enhanced capabilities will be achieved with the initial procurement in 1966 of the General Sheridan armored reconnaissance vehicle. Forward defense against high-performance aircraft will be improved with the initial procurement in 1966 of a mobile air defense system. Continued procurement of M-60 medium tanks, light recovery vehicles, full-tracked armored cargo carriers, self-propelled 81-mm. mortars, and the 155-mm. and 8-inch self-propelled artillery weapons, will provide increased firepower, range, and mobility for combat forces.

6. *Tactical and support vehicles.*—These are the unarmored wheeled vehicles which provide surface mobility to the field forces and the world-wide logistical system. The 1965 and 1966 programs provide for the procurement of 36,000 and 40,000, respectively of ¼-ton, 2½-ton, and 5-ton trucks, and additional quantities of trailers.

7. *Communications and electronics equipment.*—This activity provides reliable, rugged and mobile communication equipment to achieve command control over dispersed forces and weapons systems. The 1966 program continues procurement of modern FM series vehicular and man-packed communication sets, and introduces single sideband radio equipment which provides greater frequency coverage and range capability. Deployed air-defense coordination and direction systems will be kept modern through selective modification which enables air-defense units to operate effectively under adverse condi-

tions. Strategic electronic systems and cryptographic equipment and devices are provided to enable commanders to respond quickly over secure communication circuits.

8. *Other support equipment.*—This covers the logistical equipment essential to the mobility and maintenance of Army combat forces in the field. The 1966 program continues procurement of electrical generators, crane shovels, tractors, materials-handling equipment, and other items essential to the balanced support of the combat forces. In addition, the 1966 program provides for the modification of ships to augment the forward floating depot fleet.

9. *Ammunition.*—This activity provides for the procurement of conventional ammunition to improve the capability of combat engaged forces and to support the peacetime training program. In 1966, procurement will continue for 152-mm. ammunition for the General Sheridan, for the 7.62-mm. NATO standard round, ammunition for the M-60 medium tank and field artillery weapons, chemical and antipersonnel ammunition, fuzes and other explosives.

10. *Production-base support.*—This activity provides industrial facilities needed for production of end items and components and for production engineering in advance of procurement. It also provides for the layaway of Government-owned plants and equipment at the time production is completed and where it has been established that the facilities will be required in the event of mobilization.

¹ Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments of aircraft, components, and spares and repair parts (22 U.S.C. 2315).

This appropriation provides for the procurement of new aircraft, missiles, and supporting equipment for the Navy and Marine Corps. In addition, it provides for necessary safety-of-flight and operational modification to in-service aircraft as well as the procurement of drones and major flight and maintenance simulators. The funds requested in 1966 provide for a procurement program of 659 aircraft compared with 591 aircraft for the 1965 program.

1. *Combat aircraft.*—This activity includes funds for the continued modernization of the combat aircraft forces. The 1966 program provides for procurement of advanced tactical fighters, additional carrier-based attack aircraft, carrier and land-based antisubmarine aircraft, and carrier-based early warning and intercept control aircraft. Antisubmarine helicopters and helicopters to support the Marine vertical assault mission are also included.

2. *Airlift aircraft.*—The Navy does not plan to procure new airlift aircraft in 1966.

3. *Trainer aircraft.*—Provision is made in this activity for procurement of a basic jet trainer to provide future jet pilots with fundamentals of jet flying including formation tactics, navigation and instrument training, air-to-air gunnery and carrier qualification. Also included is an advanced jet trainer capable of providing the latest state-of-the-art training to future attack aircraft pilots.

4. *Other aircraft.*—Procurement of an aircraft for delivery of aeronautical material between shore bases and carriers at sea is included in the 1966 program for this activity.

5. *Modification of aircraft.*—This activity provides the costs of modifying in-service aircraft for increased capability or necessary flight safety changes.

6. *Aircraft spares and repair parts.*—This activity provides for the procurement of all naval aircraft spares and repair parts including both initial outfitting requirements and replenishment support.

7. *Aircraft support equipment and facilities.*—This activity provides for aircraft industrial facilities, component improvement, and miscellaneous production costs.

8. *Ballistic missiles.*—This activity provides for procurement of the Polaris fleet ballistic missile and related support equipment.

9. *Other missiles.*—This activity provides for the procurement of missiles other than the fleet ballistic missile. The 1966 missile program includes procurement of air-to-air Sidewinder and air-to-surface Shrike missiles. The family of ship-launched, surface-to-air missiles is expanded in 1966 to include pilot production of Standard missiles as well as continued procurement of Talos, Tartar and Terrier. For antisubmarine warfare, there will be continued production of a submarine-launched, anti-submarine missile. Also funded in this activity are aerial targets used for training and the testing of weapon systems, and a drone antisubmarine helicopter.

10. *Modification of missiles.*—This activity provides for the modification of missiles in inventory to include improvements determined to be necessary during the test and fleet training programs.

11. *Missile spares and repair parts.*—The amounts provided in this activity are for spares and repair parts for the missiles, aerial targets, and missile support equipment.

12. *Missile support equipment and facilities.*—This activity includes funds for missile industrial facilities, primarily the replacement of machine tools used for production, and for support of the navigational satellite program.

¹ Reimbursements from non-Federal sources are derived principally from deductions from carriers, on account of loss or damage to materials in transit (31 U.S.C. 489(a)) and proceeds from the sale of personal property being replaced (40 U.S.C. 481(c)).

This appropriation provides for the construction of ships and the conversion of existing ships, including all installed machinery, propulsion equipment, electronic and electrical equipment, guns, torpedo and missile launching systems and communications systems. It also provides for the procurement of long lead-time items for ships which are to be authorized in the 1967 program.

This increment of the Navy's long-range shipbuilding plan continues a modernization and replacement program designed to provide the fleets with modern balanced forces which can respond effectively to a wide variety of challenges in supporting our national policies.

In this budget, as in previous years, the program includes all costs necessary for ship construction during the building period.

Antisubmarine warfare ships.—Twenty antisubmarine warfare ships will be constructed or converted to provide long-range detection and weapon capability. New construction will include 4 nuclear-powered attack submarines, 10 destroyer escorts, and 1 submarine tender. In addition, five destroyers will be converted as a part of a modernization program to increase antisubmarine warfare capabilities of the fleet.

Attack aircraft carriers.—One Midway-class attack aircraft carrier will be converted and modernized to maintain adequate levels of mobile naval air strength.

Anti-air warfare ships.—Two frigates and one cruiser will be modernized to increase the anti-air warfare capabilities of the fleet.

Amphibious ships.—A 5-year program was initiated in 1965 to improve our amphibious assault capabilities and thereby to provide a more flexible limited war posture. The second increment of this program will include 15 ships to be constructed in 1966. Eight of these ships are tank-landing ships, while others are cargo and personnel docking ships of various sorts. One amphibious flagship will also be started.

Mine warfare.—Four ocean minesweepers and one special minesweeper (conversion) in 1966 will initiate a 5-year program to improve mine warfare capabilities. Smaller, slower, and less useful coastal minesweepers will be replaced.

Patrol ships.—Ten motor gun boats and two hydrofoil patrol boats are programed in 1966 to improve counter-insurgency warfare capability.

Logistics ships and craft.—The 1966 program continues a program begun in 1965 to provide larger, faster, and more efficient ships for providing food, fuel, and ammunition. Seven ships will be constructed including ammunition ships, tankers, a stores ship, and a destroyer tender. In addition, two oilers will be modernized for use with the Military Sea Transportation Service.

Sealift forces.—To improve further our ability to make speedy and effective response to limited aggression, four new fast deployment vessels will be constructed to enable repositioning of Army equipment in forward areas, rapid

loading and unloading, and fast resupply. These ships are not intended for normal cargo-carrying duties.

Research ships, auxiliaries and craft.—The 1966 program also provides for the construction of two oceanographic research ships, a surveying ship, a salvage tug, and a number of small landing and service craft.

¹ Reimbursements from non-Federal sources are principally the dollar value of Mutual Security Military Sales to friendly foreign nations (5 U.S.C. 172d-1).

This appropriation provides for the procurement of all major equipment and weapons except aircraft, missiles, and ships. Large portions of the program are devoted to procurement of equipment to modernize the fleet units assigned to general purpose forces and to provide high performance weapons for these forces. Emphasis will be placed this year on enhancing antisubmarine capability by additional purchase of improved weapons, detection devices, and other modern equipment. Programs to provide a substantial number of new type air launched attack weapons, support items such as communications equipment and training devices will be continued in 1966.

1. *Ships support equipment.*—This activity finances the procurement of hull, machinery and other shipboard components used for authorized alterations and maintenance replacement on ships of the Active Fleet. The procurement of nuclear cores for replacements in active fleet ships whose core life has expired will be financed by this appropriation beginning in 1966.

2. *Communications and electronics equipment.*—This activity finances the procurement of electronic, communication and cryptologic equipment for general purpose and support forces.

Primary effort continues to be procurement of electronic equipment for the increased effectiveness of ASW forces and afloat communications. This reflects the need for additional effort to combat the threat from enemy submarines and to insure the necessary capability for meeting expanded command and control requirements.

This activity also includes the financing of command and cryptologic equipment for Naval Command Centers and in support of the Defense Communication Systems. Additionally, efforts to improve electronic cryptologic devices will continue.

3. *Weapons support equipment.*—This activity finances the procurement of ammunition, ordnance equipment, ground electronics, aircraft support equipment and other support equipment for naval forces.

Approximately 45% of the 1966 program is associated with procurement of weapons and equipment for anti-submarine warfare forces. The procurement in support of ASW includes a significant increase in the program planned for the more effective MK 46 torpedo. Procurement of ASW mines, the ASROC weapon, submarine detection devices and equipment to modernize launching and fire control systems is also planned in 1966. In addition to procurement in support of ASW forces, the 1966 request includes funds for ammunition, bombs and ordnance equipment for use in limited and general war. Included in this category are aerial bombs fitted for launching from high speed aircraft and the first production buy of a new television guided bomb.

The ground electronics program, in addition to providing equipment to modernize air traffic control and communications facilities, provides funding for the second increment of the Atlantic Fleet Weapons Range and the Underwater Tactical Range, Pacific. A wide variety of equipment is also procured under this activity for the support of aircraft operations, including catapults,

arresting gear, landing aids, training aids, and general purpose shop, handling and test equipment.

4. *Civil engineering support equipment.*—Construction weight handling and transportation equipment, almost all of which is programed for use by Navy general purpose forces, is financed in this activity.

5. *Supply support equipment.*—Self-propelled materials handling equipment and automated materials handling systems required for rapid management of supplies within the Navy Supply System are financed by this activity.

6. *Personnel and command support equipment.*—Provided under this activity are equipment, devices and aids for training of naval and Naval Reserve personnel. Also provided herein are industrial, photographic, and oceanographic equipments.

¹ Reimbursements from non-Federal sources are principally the dollar value of mutual security military sales to friendly foreign nations (5 U.S.C. 172d-1).

This appropriation provides the Marine Corps with weapons, ammunition, and related equipment most of which are programed for use by Marine general purpose forces such as Marine divisions, Marine aircraft wings, and tank and amphibious tractor battalions. These equipments provide the military hardware for support for seizure and defense of advanced naval bases, limited war landing operations, and general land warfare using a variety of tactics such as amphibious and vertical envelopment movements. Sizeable programs in 1962 through 1964 put the Marine Corps in an excellent readiness

position in conventional weapons, equipment and ammunition.

The 1966 program continues to improve firepower and mobility with rapid communication for use by field commanders. Tank and artillery ammunition and Redeye missiles will provide increased fire and staying power against ground and low-level aircraft targets. The dispersal of forces and speed of weapons and weapon carriers is met in the 1966 program by procurement of a variety of modern electronic equipments for communications, intelligence, and control.

Also financed in this appropriation are equipments for general support of the Marine Corps including administrative and logistic vehicles, engineer and materials handling equipment including amphibious assault fuel systems.

¹ Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments of aircraft, components, and spares and repair parts (22 U.S.C. 2315.)

PROCUREMENT—Continued

General and special funds—Continued

AIRCRAFT PROCUREMENT, AIR FORCE—Continued

This appropriation provides for the procurement of aircraft, spares, components, industrial production facilities, supporting aerospace ground equipment and modification of inservice aircraft. Management of the overall aircraft programs is facilitated by bringing together in a single appropriation all funds for the prime aircraft weapon systems and related specialized ground handling and test equipment. The funds requested provide for a procurement program of 517 new aircraft in 1966 as compared with 857 in 1965.

1. *Combat aircraft.*—This activity provides for the procurement of aircraft to continue modernization of the combat forces through improved capability and flexibility. Procurement of the F-4 series of aircraft was initiated in this activity in 1962. An improved version was first procured in 1964 and procurement is continued in 1965 and 1966. Beginning in 1966 further technological advances in electronic equipments are being incorporated in the aircraft to be procured. The 1966 quantity will complete the approved program for the reconnaissance version. The procurement program for the F-111, two-place, variable sweep-wing tactical fighter-bomber in this budget continues the improvement of deployment and combat mission capability. The initial production quantity was provided for in 1965.

2. *Airlift aircraft.*—The procurement program for the all-jet transport—C-141—is continued in this activity in 1966 with resulting improvement in military mobility and capability because of increased range, payload and quicker reaction time. This is the fourth year of production quantities for this aircraft the initial quantity having been provided in 1963.

3. *Trainer aircraft.*—Provision is made in this activity for the procurement of jet training aircraft to satisfy the requirements of the training mission for high performance, supersonic aircraft. These requirements will be completed with the 1966 procurement.

4. *Other aircraft.*—For 1966 this activity includes the procurement quantity of the search and rescue aircraft—HC-130H—for completion of the approved program. Additionally, a quantity of the light helicopters for missile base support is provided.

5. *Modifications of inservice aircraft.*—This activity provides for modifications of inservice aircraft necessary for safety-of-flight and changes incorporating technical improvements keeping the force abreast of the latest state-of-the-art.

6. *Spares and repair parts.*—This activity provides for the procurement of all spares and repair parts required to support the aircraft being procured, the aircraft in the inventory, the modification and modernization program, and the related support equipment.

7. *Other support.*—This activity provides for industrial facilities, component improvements, common aerospace ground support equipment and other charges.

¹ Reimbursements from non-Federal sources include special contractor propellant requirements.

This appropriation provides for procurement of missiles, missile propellants, target drones, launching and ground support equipment, installation and checkout equipment preliminary to activation of operational squadrons, and expansion of industrial facilities.

1. *Ballistic missiles.*—This activity provides funds for intercontinental ballistic missile systems required for operational squadrons and crew training. The 1966 estimate continues the procurement of complete fly-away missiles, aerospace ground equipment, technical data, specialized training equipment, and installation and checkout of the Minuteman II intercontinental ballistic missile program. The estimate for Titan II provides for the procurement of a mixed quantity of subsystems to support the follow-on operational test program.

2. *Other missiles.*—This activity provides for continued procurement of the Shrike antiradiation missile (Radar Buster), Firebee Target Drone, and a quantity of non-explosive center sections for use with the operational Bullpup missile.

3. *Modification of inservice missiles.*—This activity provides for continued support of the Minuteman force modernization program, updating of the operational Titan II and Minuteman ballistic missiles to incorporate

changes identified in the testing program; modification of operational missiles involving a change in mission capability, safety of flight and inservice revealed deficiencies.

4. *Spares and repair parts.*—The 1966 estimate provides for initial, replenishment, and modification spares for ballistic and other missiles used by the Air Force.

5. *Other support.*—The 1966 estimate provides for missile propellants, modernization and maintenance of industrial production facilities under Air Force cognizance, and for other classified projects.

Total obligations.....	830,067	848,000	892,000

¹ Reimbursements from non-Federal sources are derived principally from sales to foreign governments, international organizations, individuals and commercial enterprises.

1. *Munitions and associated equipment.*—The 1966 program provides for a variety of military munitions to further increase the capability of the Air Force to meet air defense and tactical force requirements for both conventional and nuclear war. Procurements of the new series of conventional bombs, started in the 1961 program, continue in 1966, including the 250- and 500-lb. anti-personnel and materiel bomb and the 250- and 500-lb. low-drag bomb for high-speed aircraft, both initiated in the 1965 program. In 1966 it also provides for introduction into Air Force inventories of the TV-guided bomb. Other items planned for continued procurement in 1966 include: air-to-air rocket motors, atomic ordnance components (except fissionable materials), 20-mm. cartridges, targets, chemical warfare items, and miscellaneous munitions components including supplies and materials. The increase in the 1966 program is directly attributable to increases in programs for the support of Air Force tactical forces in worldwide locations.

2. *Vehicular equipment.*—The 1966 program provides for (1) orderly replacements in the vehicle fleet, (2) continued procurements of special purpose vehicles at levels approximating those of 1965, (3) continued procurements of "M" series (Tactical-Type) vehicles for the support of the worldwide tactical forces, initiated in 1965, (4) continued procurements of the new P-2 fire truck initiated in 1963, (5) continued procurements of materials handling equipment for the rapid movement of cargo on landing strips and in warehouses, and (6) the continued procurements of supplies and materials and modifications of equipment in support of year-round operation of the vehicular fleet.

3. *Electronics and telecommunications equipment.*—The 1966 program provides continued procurements of hardware and ancillary support items for: (1) the command and control systems, including a mobile Tactical Air Control System, (2) an improved semiautomated backup system for the Continental U.S. Aircraft Control and Warning System, (3) improved ballistic missile early warning capabilities, including an austere sea-launched ballistic missile detection system, and the first steps toward implementation of an over-the-horizon radar system, (4) the worldwide Defense Communications System, including communications satisfying strictly Air Force requirements, and (5) cryptographic equipment to extend the secure voice capability within the Air Force. The 1966 program also provides for continued support of other electronic systems, subsystems, and programs, including improvement of weather observation and forecasting capabilities, semiautomation of intelligence data handling, improvement of en route and terminal air traffic control and landing facilities, procurement and installation of communications for operational ballistic missile sites, procurement of equipment in support of the

Air Force intelligence mission, and modification of existing equipment necessary for correction of deficiencies revealed through test or usage. The declining trend in program requirements over the past 3 years reflects substantial completion of significant segments of various weapon support systems. Support of the newer and more sophisticated systems reflected in this estimate continues with a cautious approach until it is clearly demonstrated that the benefits are commensurate with the additional costs.

4. *Other base maintenance and support equipment.*—The 1966 program provides for procurement at minimum levels required to support the operational units and bases, worldwide. Items planned for continued procurement in 1966 include: (1) common test and calibration equipment, (2) specialized equipment in support of the Foreign Technology Division and the Air Force Technical Applications Center, (3) personal, safety, and rescue equipment, (4) photographic equipment, (5) maintenance and repair shop equipment, (6) aircraft arresting barriers, (7) auxiliary power units, (8) related supplies and materials and (9) equipment modifications.

¹ Reimbursements from non-Federal sources are principally the dollar value of Mutual Security Military Sales to friendly foreign nations (5 U.S.C. 172d-1).

This appropriation provides for procurement of capital equipment for the Defense Supply Agency and for other Defense-wide agencies. The 1966 program includes automated warehouse equipment, electronics and communications equipment, and general and special purpose vehicular equipment.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The purpose of the programs funded in this title is to provide the Department of Defense with scientific and technological capabilities for the development, test, and improvement of advanced weapons systems and related

equipment and techniques. In pursuit of this objective a spectrum of investigative and engineering activities is performed including scientific research, exploratory development, design and fabrication of experimental weapons and equipment, and testing of these items to determine their military utility. This work is performed in Government laboratories, in universities, by industrial contractors, and by nonprofit organizations.

Appropriations in this title support the research, development, test, and evaluation activities of Army, Navy, Air Force, and Defense Agencies, such as Advanced Research Projects Agency, Defense Atomic Support Agency, and Defense Communications Agency. Research and development related to civil defense responsibilities of the Department of Defense is carried in the separate title, Civil Defense, in this chapter.

In recent years, a significant portion of Defense funding for research and development has been devoted to the simultaneous development of many large strategic weapons systems, such as Titan, Minuteman, and Polaris. By 1966, however, the development, test, and evaluation

phases of most of these programs either will be essentially completed or will be in the final and less expensive stages, permitting a decrease in funding for this category of effort. However, the amount requested for 1966 for all Defense research and development appropriations is slightly higher than the 1965 congressional appropriation level since decreases are more than offset by increased funding required for penetration aids and other improvement programs for the large strategic systems, and the development of such new systems as the cargo transport C-5A, and the continuing development of systems such as the F-111 tactical aircraft and the Nike-X antimissile system. Other programs contributing to a higher level in 1966 are the manned orbiting laboratory, the tactical and limited warfare weapons developments, and increases for basic research. Military space programs will be supported in 1966 at a level similar to that provided in 1965.

The budget plans and estimated obligations under the appropriations in this title for Army, Navy, Air Force, Defense Agencies, and Emergency Fund are summarized below (in thousands of dollars):

	Budget plan			Obligations

1. *Military sciences.*—This activity includes basic research in the life, physical, mathematical, and social sciences to add to the store of fundamental scientific knowledge, and applied scientific research of importance for military purposes leading to the development of new materials, components, and techniques. Among the many and widely varied scientific fields to be investigated under this activity in 1966 are nuclear weapons effects, nuclear test detection techniques, physical properties of materials, performance of rocket fuels, thermoelectric materials, chemical and biological agents, meteorology, radio astronomy, oceanography, and advanced radar and sonar techniques.

The research and development programs of the Advanced Research Projects Agency and the other Defense Agencies, including the readiness program for nuclear weapons effects testing, are funded in this activity. The principal support for such organizations as the Naval Research Laboratory, the Rand Corporation, the Research Analysis Corporation, and the Institute for Defense Analyses is also provided here. In addition to the amounts directly provided for in this activity, basic and applied research is also performed by industrial contractors supported by certain allowable indirect costs which may be provided for under contracts funded by both the RDT&E and procurement appropriations.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes, engines, and other installed equipment. The 1966 program continues development of the new F-111 high-performance multipurpose fighter aircraft and experimental vertical and short takeoff and landing aircraft,

to meet the needs of all the military services. Navy will continue work on an improved light attack aircraft. In addition, the program includes work on other aircraft to improve the mobility and reconnaissance capabilities of the ground forces. Development testing will continue on the SR-71 strategic reconnaissance aircraft, the YF-12A long range interceptor, and the mach-3 XB-70 research aircraft. Development will be initiated on the advanced C-5A cargo transport and on advanced engines and avionics for a future strategic attack aircraft system. Research and test centers are funded under this activity and include, for example, the Air Force Aeronautical Systems Engineering Group at Wright-Patterson Air Force Base.

3. *Missiles and related equipment.*—This activity provides for research, development, test, and evaluation of missiles of all types. The development of the advanced design Nike-X system represents a major and high priority effort in the field of defense against ballistic missiles. In addition, an extensive research effort on other ballistic missile defense techniques continues to be funded by the Advanced Research Projects Agency within the activity "Military sciences," above. In the strategic field, development will continue on improved versions of the operational Minuteman and Polaris ballistic missiles. Development efforts will be initiated on a new air-to-surface attack missile system. Other significant missile development projects include the continuation of a new Navy surface-to-air missile system, as well as further work on the Lance division support missile for land combat. In addition to funding participation by industry in the missile research and development program, this activity

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

is the principal source of funds for the operation of Government facilities like the Eastern and Western Test Ranges, the White Sands Missile Range, the Naval Ordnance Test Station, and the research and development programs at the Army's Redstone Arsenal.

4. *Military astronautics and related equipment.*—This activity provides for programs directed toward the improvement of space technology for military purposes, and the investigation and development of specific military applications of space vehicles. During 1966, work will continue on military communications and navigation satellites, on improvements in satellite tracking, identification, and interception capability, and on experimental nuclear test detection satellites, the latter funded under the Military sciences activity. Funds for the manned orbiting laboratory program will be substantially increased in 1966. Development effort will continue on the Titan III, an improved multipurpose space booster system utilizing both solid and storable liquid propellants. Also, increased funds are provided for research on reentry vehicles and lifting bodies. Supporting research and development in such areas as bioastronautics, secondary power sources, guidance systems, materials research, improved propellants, and engine components will continue. The Air Force Arnold Engineering Development Center at Tullahoma, Tenn., is also supported under this activity.

5. *Ships, small craft, and related equipment.*—This activity provides for design of new type ships and development of shipboard equipment. Funds are included in the regular shipbuilding appropriation for the actual construction of these new ships and ships employed in the development of new components and techniques. Funds in this activity will provide in 1966 for the development of advanced propulsion systems, communications, radar, catapults and arresting gear. Increased effort related to antisubmarine warfare to counter modern nuclear submarines is provided, including continued development of advanced sonars. A significant part of the research and development effort of the Naval Electronics Laboratory and the David Taylor Model Basin is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—The Army's 1966 program includes improved artillery, combat vehicles, mortars, antitank weapons, tank armament, and small arms. Funds are included for the U.S. share of the joint development of a new main battle tank

in cooperation with the Federal Republic of Germany. The program continues development and evaluation of vehicles and weapons with emphasis on requirements for limited or unconventional warfare in remote areas. The 1966 Navy program continues to emphasize antisubmarine weapons and includes torpedoes, mines, depth charges, bombs, rockets, and other types of ammunition. Development of landing and amphibious vehicles for the Marine Corps is also provided in this activity. The principal support for the Naval Ordnance Laboratory at White Oak, Md., and for research and development activities at several Army arsenals is also funded here.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided under other activities. Examples of the types of equipment developed for the three services are as follows: a deep submergence vehicle development program for personnel rescue and underwater research; chemical and biological agent detection and protection; combat surveillance; tactical and strategic communications; mapping and geodetic systems; amphibious warfare support equipment; photographic equipment; aircraft control and warning; missile detection; and other electronic systems. Much of the support for the research and development effort at the Army Electronic Research and Development Laboratory, the Mitre Corporation and the Lincoln Laboratories is provided under this activity.

8. *Programwide management and support.*—For the Army and the Navy this activity provides for those costs of operation, management, and maintenance of research, development, and test facilities which are not distributed directly to other budget activities. For the Air Force it provides for certain costs of central administration such as the Air Force Systems Command Headquarters and Divisions as well as several large research, development, test, and evaluation installations.

9. *Emergency fund.*—The emergency fund enables the Secretary of Defense to support the exploitation of new scientific developments and technological breakthroughs and to provide for other unforeseen contingencies in the research, development, test, and evaluation programs.

General and special funds:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; **[\$1,340,045,000]** \$1,438,000,000, to remain available until expended. (10 U.S.C. 2353, 4503; Department of Defense Appropriation Act, 1965; authorizing legislation to be proposed.)

EMERGENCY FUND, DEFENSE

For transfer by the Secretary of Defense, with the approval of the Bureau of the Budget, to any appropriation for military functions under the Department of Defense available for research, development, test, and evaluation, or procurement or production related thereto, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation to which transferred; ~~【\$125,000,000】~~ \$150,000,000, and, in addition, not to exceed \$150,000,000, to be used upon determination by the Secretary of Defense that such funds can be wisely, profitably, and practically used in the interest of national defense and to be derived by transfer from such appropriations available to the Department of Defense for obligation during the current fiscal year as the Secretary of Defense may designate: *Provided*, That any appropriations trans-

ferred shall not exceed 7 per centum of the appropriation from which transferred. (78 Stat. 473, 474; Department of Defense Appropriation Act, 1965.)

MILITARY CONSTRUCTION

The direct military construction programs for the Armed Forces, both Regular and Reserve, shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

MILITARY CONSTRUCTION PROGRAM

	1964 actual	1965 estimate	1966 estimate
Regular Forces.....	897,396	862,361	1,225,900
Reserve Forces.....	43,200	30,300	42,500
Interservice activities.....	46,925	18,200	88,200
Total	987,521	910,861	1,356,600

Most of the appropriations required for the military construction accounts are dependent on the enactment of authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This category provides for acquisition of land for and construction of military projects in the United States and overseas as authorized in currently effective military construction acts and the new authorization referred to above. These authorizations include construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction generally exceeds \$25 thousand per project. Under this category the major program elements proposed for 1966 are as follows:

Strategic retaliatory forces.—Provision has been made for upgrading the previously authorized Minuteman sites and for improvement to the Titan II sites. Funds are also included for facilities to permit realignment and to insure safe and continued operation of the manned bomber force.

Continental air and missile defense forces.—Structures to provide site relocation, additions and improvements for the Nike-Hercules air defense missile system are proposed, including further work to provide this system with protection against radiation fallout. Funds are provided for the construction of operational, training, maintenance, personnel, and other facilities to maintain the capability of interceptor aircraft.

General purpose forces.—For the Army elements of these forces the program provides for construction of airfield runways, parking aprons and hangars, tactical equipment maintenance shops, hardstands, and troop housing complexes with associated structures at major unit training stations in the United States and in several overseas areas. For naval and marine air squadrons, naval fleet units, and marine ground forces, construction of operational and personnel support facilities at air stations and waterfront installations in the United States and overseas is provided. The Air Force portion of this program provides for construction of operational, training, maintenance, supply and personnel facilities, at bases in the United States and overseas, for the tactical forces. Some of these facilities will support F-4 aircraft entering the inventory, and others a capability for special air warfare operations.

Sealift and airlift forces.—Additional operational and maintenance facilities will be provided to increase the effectiveness of the transport aircraft assigned to the Tactical Air Command and the Military Air Transport Command.

Reserve forces.—The facilities required for the training of the Reserve Forces include: armories, training centers and summer camps, nonarmory facilities such as maintenance shops and warehouses; and aviation facilities such as airfield pavements, maintenance shops, and training buildings. Under the realignment plan of the Army Guard and Reserve, all facilities required to support these forces will be financed in the Military Construction, Army National Guard appropriation beginning 1966.

Research and development.—A major portion of the Army's research construction effort will be devoted to facilities supporting development of the Nike-X missile system. Another major Army project is the medical biological research laboratory at Fort Detrick, Md. The significant Navy projects include a chemistry laboratory at the Naval Research Laboratory, Washington, D.C., and an underwater weapons laboratory associated with the Naval Ordnance Test Station, Calif. Air Force construction includes a science material laboratory at

MILITARY CONSTRUCTION—Continued

Wright-Patterson Air Force Base, Ohio; an electronics laboratory at Griffiss Air Force Base, N.Y., and facilities for continued improvement of both the Atlantic and Pacific missile ranges. Funds are also included for a Titan III launch complex at Vandenberg Air Force Base, Calif.

General support.—This grouping includes operational and training facilities, communication facilities, maintenance and production facilities, supply facilities, hospital and medical facilities, administrative facilities, troop housing and community facilities, and utilities and ground improvements. Such projects, although important to the effective functioning of the armed services, are not related directly to any one particular force or weapon system and, in fact, provide common support for any number of forces or systems. This grouping also covers all construction needs of the following Defense agencies: Defense Atomic Support Agency, Defense Communications Agency, Defense Intelligence Agency, Defense Supply Agency, National Security Agency, and the Advanced Research Projects Agency.

The estimate for Military Construction, Defense Agencies, includes \$50 million to be used for the construction of facilities which may be required by the military services to meet emergency situations. When these requirements arise, funds in the needed amounts as determined by the Secretary of Defense will be transferred to the construction accounts of the military departments.

2. *Minor construction.*—Provision is made for construction of permanent and temporary projects that are not

otherwise authorized by law but which are determined to be urgently required and do not exceed \$200 thousand per project for the Regular Forces, and \$50 thousand per project for the Reserve Forces. Provision is made in the applicable operation and maintenance appropriations for construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction is \$25 thousand or less per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and minor land acquisitions.

Loran stations.—These funds are advanced to the Coast Guard for construction of Loran stations in areas essential to the defense of the United States. Loran transmitting stations permit safe and effective operation of ships, submarines, and aircraft of the military services in all kinds of weather by an electronic system of navigation which provides continuous navigational positions by means of intersecting lines of position.

General and special funds:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, and in sections 2673 and 2675 of title 10, United States Code, **[\$300,393,000]** \$441,400,000, to remain available until expended. (*Military Construction Appropriation Act, 1965; additional authorizing legislation to be proposed for \$388,998,000.*)

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, \$10,800,000, to remain available until expended. During the current fiscal year there may be merged with the appropriation under this head such amounts of unobligated balances of appropriations previously granted for "Military construction, Army Reserve" as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (Military Construction Appropriation Act, 1965; authorizing legislation to be proposed.)

FAMILY HOUSING

The Department of Defense Family Housing Management Account was authorized (76 Stat. 237) to be established to finance all expenses of the military family housing program. Funds provided in annual Military Construction Appropriation Acts under the title "Family Housing-Defense" are transferred to this account for obligation and expenditure. This appropriation is dependent on the enactment of authorizing legislation, the details of which have been completed and are being submitted to the Congress for early consideration. An appropriation of \$735.6 million is requested for 1966, of which \$245.9 million is for construction of new housing, improvement of existing housing and related projects, and \$489.7 million is for the operation and maintenance of family housing

and related facilities, for leasing of family housing, for payments required on the indebtedness assumed to acquire Capehart and Wherry housing and to build surplus commodity housing in foreign countries, and for authorized payments of servicemen's mortgage insurance premiums.

General and special funds:

FAMILY HOUSING, DEFENSE

For expenses of family housing for the Army, Navy, Marine Corps, Air Force, and Defense agencies, for construction, including acquisition, replacement, addition, expansion, extension and alteration, and for operation, maintenance, and debt payment, including leasing, minor construction, principal and interest charges and insurance premiums, as authorized by law, **[\$631,151,000]**

\$735,600,000, to be obligated and expended in the Family Housing Management Account established pursuant to section 501(a) of Public Law 87-554, in not to exceed the following amounts:

For the Army:

Construction, **[\$35,600,000]** \$54,064,000;
 Operation, maintenance, **[\$124,710,000]** \$132,984,000;
 Debt payment, **[\$48,618,000]** \$48,172,000.

For the Navy and Marine Corps:

Construction, **[\$64,544,000]** \$92,140,000;
 Operation, maintenance, **[\$65,331,000]** \$65,623,000;
 Debt payment, **[\$32,408,000]** \$31,325,000.

For the Air Force:

Construction, **[\$57,589,000]** \$99,290,000;
 Operation, maintenance, **[\$108,058,000]** \$119,920,000;
 Debt payment, **[\$90,801,000]** \$89,387,000.

For Defense agencies:

Construction, **[\$981,000]** \$406,000;
 Operation, maintenance, **[\$2,511,000]** \$2,289,000.

Provided, That the **unexpended balances of** amounts **heretofore** provided under this head for construction, **and the amounts appropriated herein for that purpose,** shall remain available until expended. (78 Stat. 888, 889; Military Construction Appropriation Act, 1965; additional authorizing legislation to be proposed.)

FAMILY HOUSING—Continued

General and special funds—Continued

FAMILY HOUSING, DEFENSE—Continued

1. *Construction*—(a) *Construction of new housing*.—The construction of 12,500 public quarters is proposed in furtherance of the continuing effort to provide adequate family housing for eligible personnel. These units are distributed by Service as follows: Army—2,470; Navy and Marine Corps—5,040; and Air Force—4,990.

(b) *Acquisition of Wherry housing*.—Completion of the program to acquire Wherry housing is planned with the acquisition of 1,615 units in 1965, estimated at \$2.7 million, for a total of 79,754 units; accordingly no funds for acquisition are required in 1966.

(c) *Construction improvements*.—As part of the program to provide adequate family housing for eligible personnel, \$19.4 million is requested to correct deficiencies in existing family housing facilities.

(d) *Planning*.—Costs incurred for planning of projects which may not go forward to completion because of changing requirements are estimated at \$1 million for 1966. Planning funds for projects which do go forward to completion are included in the new construction and construction improvements budget subactivities.

(e) *Rental guarantee payments*.—The last of the rental guarantee agreements entered into under the original authority (66 Stat. 622) expired in 1965; accordingly, no funds are required in 1966. It is not expected that rental guarantee agreements to be entered into under the new authority (77 Stat. 326) will produce housing for beneficial occupancy until 1967.

2. *Operation, maintenance, and debt payment*.—(a) *Operation*.—\$171.4 million is required in 1966 for the operation of an estimated 378,550 family housing units (including leased units); \$21.5 million is required in 1966 to lease 10,351 units in both the United States and in foreign countries as part of the program to provide adequate family housing for eligible personnel.

(b) *Maintenance of real property*.—The cost of maintenance and repair of the 1966 family housing inventory is estimated at \$134.4 million. Minor alterations, up to \$50 per unit, are funded in this subactivity.

(c) *Debt payment*.—A total of \$161.2 million is required in 1966 to reduce the indebtedness assumed to acquire Capehart, Wherry, and surplus commodity housing and for related expenses as follows (in millions of dollars):

	Principal	Interest	Other expenses	Total
Capehart housing.....	52.1	66.8	0.8	119.7
Wherry housing.....	15.9	19.6	---	35.5
Surplus commodity housing.....	6.0	---	---	6.0
Total.....	74.0	86.4	.8	161.2

(d) *Mortgage insurance premiums*.—Premium payments are required on mortgage insurance provided by the Federal Housing Administration: (1) through the Armed Services Housing Mortgage Insurance Fund on mortgages assumed by Defense to acquire Capehart and Wherry housing; and (2) on mortgages assumed by active military personnel for housing purchased under the provisions of section 124, Public Law 83-560. The premiums on Capehart housing in 1966 are estimated at \$2.7 million; on Wherry housing at \$0.8 million; and on service-

men-owned housing at \$4.9 million for a total of \$8.4 million.

SUPPLEMENTARY PERSONAL SERVICES DATA

Since the bulk of the personal services funded from the Family housing, Defense appropriation is on a reimbursable part-time basis, it is not reflected in the foregoing personnel summary. The following supplementary schedule is provided to indicate the man-year equivalent of all the personal services supported by this appropriation and the compensation paid therefor. The full-time positions paid directly from this appropriation are listed in the schedule of personnel compensation provided for this appropriation. The positions partially supported by reimbursement from this appropriation are listed in the schedules of personnel compensation provided for each of the sponsoring Defense appropriations.

SURPLUS COMMODITY FAMILY HOUSING PROGRAM

The following informational schedule shows the use of foreign currencies, accrued from the sale of surplus agricultural commodities to foreign countries (68 Stat. 545), allocated to Defense to build family housing and related facilities for use by Defense personnel serving

abroad. The last allocation of foreign currencies for this purpose was made in 1961.

RENTAL GUARANTEE FAMILY HOUSING PROGRAM

The following informational schedule shows the status of the rental guarantees outstanding under agreements entered into by Defense with private sponsors of family housing built in foreign countries for rental to Defense personnel. The authority (66 Stat. 622) under which these agreements were consummated expired on June 30, 1963. As shown in the schedule, the last of these agreements terminated during 1965 (actually on September 1, 1964). Of the \$3.2 million payment made in 1964 to honor guarantees which became due and payable, \$2.1 million was required to terminate the agreement (due to expire on April 1, 1967) with the sponsor of 700 units in Morocco which were no longer required when the U.S. Air Force installations in that country were vacated. The bulk of the remaining \$1.1 million payment in 1964 was required to meet the guaranteed rentals on the Moroccan units which became due and payable prior to the termination of the guarantee agreement. The balance of the 1964 payment and all of the 1965 payment is for guarantees on housing in France not fully occupied due to personnel redeployments.

The Military Construction Authorization Act, 1964, authorizes (77 Stat. 326) Defense to enter into new rental guarantee agreements in 1964 and 1965 for not more than 5,000 units. No such agreement may guarantee payment of more than 97% of the anticipated rentals, nor may any guarantee extend for a period exceeding 10 years, nor may the average rental on any project exceed \$150 per unit per month including the cost of operation and maintenance. The following schedule does not reflect any contingent liabilities arising from the new rental guarantee program since it is not expected that any

This appropriation provides for the day-to-day operation and activities of the Office of Civil Defense in carrying out the civil defense mission assigned to the Secretary of Defense by Executive Order No. 10952 in 1961 and re-assigned to the Secretary of the Army on April 1, 1964. The major program costs for development and execution of a nationwide fallout shelter program are included under the Shelter, construction and research and development account.

1. *Warning and detection.*—This program provides for an outdoor warning system for the Washington, D.C., metropolitan area; fallout protection for warning points under National Warning System; studies and surveys on a nationwide indoor warning system to alert the population of attack or impending natural disaster emergencies; the procurement of instruments for detection, evaluation, and dissemination of radiological fallout hazard data during an emergency; and the warehousing and maintenance of radiological instruments and engineering equipment. In 1966, the existing outdoor warning system for the Washington, D.C., metropolitan area will continue to be maintained. The program initiated in 1964 of providing fallout protection to warning points to assure their capability for emergency operations will be continued, adding protection to 228 points for a total of 483 protected points at end 1966. Additional radiological defense equipment to measure cumulative radiation doses

will be procured for issuance to emergency civil defense workers at the local level. A Federal warehouse system for the receipt, storage, maintenance, and issue of radiological instruments and engineering equipment will be continued. Use of the unique competence of the Army National Guard to provide an onsite inspection, maintenance, and calibration system for radiological instruments issued to States and localities will be expanded to a total of 25 States.

2. *Emergency operations.*—This provides for the development of a high degree of readiness for civil defense emergency operations. This includes (a) protection of radio facilities disseminating emergency instructions and public information; (b) a damage assessment capability for preattack planning and postattack operations; (c) an education and training program stressing community and individual protective measures, shelter analysis, and protective construction; (d) development of civil defense doctrine, systems and techniques for the orderly and rapid increase of civil defense readiness of State and local governments in periods of emergencies; and (e) development of general and technical materials for use by public information media, principally at the local level. Continued emphasis will be placed in 1966 on training for shelter management and radiological monitoring to increase the effectiveness of community shelter areas located in prior years. Prototype studies of specific systems and areas were initiated in 1964 for the development of civil defense doctrine, systems, and techniques drawing together all operational concepts and requirements for supporting systems needed to realize the maximum life-saving potential of fallout shelters. During 1965 the results of these studies will be available and it is planned in 1966 to expand the scope and geographic applicability of this program in the furtherance of the civil defense readiness position throughout the nation.

3. *Financial assistance to States.*—This activity provides financial assistance to States for procurement of survival supplies, equipment, and training; construction of protected emergency operating centers for State and local governments; and personnel and administrative expenses necessary to maintain civil defense capability at all governmental levels. Expansion of this assistance is essential to enable the States and local governments to perform the necessary planning and operations to utilize the shelter space available and to provide for additional political subdivisions entering the program.

4. *Management.*—Provides for the administrative expenses of the Office of Civil Defense staff; i.e., salaries, travel, and supporting costs for management and administration of the national civil defense program.

¹ Advances and reimbursements from non-Federal sources are derived from an award made on a claim against a carrier for damages to shelter supplies in transit (76 Stat. 522).

1. *Shelters.*—The 1966 program proposes several activities oriented to increasing the national inventory of fallout shelter space. In lieu of requesting authorization and funds for obtaining fallout shelter through building modifications or new construction, emphasis is being given to reducing the long term gross requirements for such high cost shelter by several new approaches designed to exploit all the protection available in existing structures. The National Survey started in 1962 will be continued to pick up the inherent shelter space in new construction projects as they are completed and will be expanded to locate and use the available shelter in homes and other small structures not previously covered in the National Survey due to their size. Procurement of low cost,

portable ventilating kits is proposed for placement in existing shelter areas to permit their emergency use up to the full rated capacity. Architect-engineer advisory services will be expanded to exploit recent technological developments in protective design criteria which indicates that shelter can be obtained at little or no additional cost in many cases by minor adaptations of designs to enhance the inherent shelter capacity before construction is initiated. These new techniques will be widely disseminated to the architecture and engineering profession to promote incorporation of shelter in everyday design work. Technical assistance will be given so that shelter concepts can be included as an integral part of the structure during the design process on new buildings. The 1966 program

also includes procurement of austere supplies and equipment needed to continue the provisioning of public fallout shelters and funds for construction of protected regional centers for Federal emergency operations in the field.

2. *Research and development.*—Research studies are made to improve the civil defense program. These include studies stressing increased protection capability of shelters, improved shelter management procedures, economy of hardware, improved effectiveness of shelter support systems, and defining requirements for recuperative action in the immediate postattack environment. In 1966 increased emphasis will be placed on all aspects of the research and development program with major effort directed as follows: (a) study of alternative civil defense postures, (b) cost analysis and cost reduction in fallout shelter programs, and (c) continued development of a technical basis for extensive fire control measures.

Regional operating centers.—In 1960, funds were appropriated for construction of a regional operating center at Denton, Tex. In 1962, funds were provided to complete the Denton center and to initiate construction of a second center. In 1966, funds are provided under the Shelter, construction, and research and development account for construction of additional protected centers for Federal field emergency operations.

DEFENSE PRODUCTION GUARANTEES

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, Air Force, and Defense Supply Agency to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are financed from guarantee fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Net earnings are retained to purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. app. 2091).

This fund finances the central procurement of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from Office of Civil Defense appropriations and from funds provided by the States (65 Stat. 61).

It is anticipated that requests for central procurement from States and local governments will remain at approximately the 1963-64 level through 1966.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances inventories of consumable supplies, repair parts and minor items of equipment at Army depots in the United States and overseas and at stations in the Continental United States (10 U.S.C. 2208). Material is purchased and held at these locations for resale and for mobilization reserve.

All centrally controlled secondary items of material, repair parts and minor equipment are financed through the stock fund except for items coded for repair at depot level only, insurance type items and those closely related to safety of personnel.

Supply and financial operations of the fund are centrally directed and controlled by the Department of the Army. The approximately 396,000 line items carried in the Army stock fund are managed in the continental United States through the Army Materiel Command and the Continental Army Command and through the major Army overseas commands in Europe, Alaska, Pacific and Southern areas. During 1964 the management of the fund was reorganized to realign supply and financial management on a command basis. Major changes in 1964 under this concept were: (a) the establishment of a division under the Continental Army Command and its extension to include inventories of applicable items at all stations under that command, and (b) the establishment of a division under the U.S. Army Pacific Command to include stock fund owned inventories in Hawaii and Japan.

In 1965 new command divisions have been established

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY STOCK FUND—Continued

in U.S. Army Europe, U.S. Army Alaska, and U.S. Army Southern Command. Also a new division has been established under the Army Materiel Command to include those inventories at installations under the Army Materiel Command and The Surgeon General. In addition, the U.S. Army Pacific Division has been extended to include inventories in Korea and Okinawa. During 1965 selected secondary items coded for repair at depot level, insurance type items and items essential to the safety of personnel have been removed from the fund and are financed thereafter by the appropriation Procurement of equipment and missiles, Army. In 1966 selected aeronautical secondary items will be transferred from that appropriation and financed under this fund. The effect of these changes is summarized by category as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate

Increase or decrease in undelivered purchases to be paid from other accounts.....	-3,655	-16,611	-----
Net change in capitalized inventory.....	-58,240	72,603	120,900

The increase of \$73 million for 1965 results primarily from capitalization of inventories in Okinawa and Korea. The increase of \$121 million for 1966 reflects the transfer of selected air items to the stock fund, discussed above, and capitalization of medical mobilization reserve stocks from the Defense Supply Agency.

Budget program.—The increase in obligations for 1965 and 1966 results primarily from the extension of the command stock fund divisions. Continued emphasis is being placed on maximum utilization of long-supply stocks and on conservative procurement of material in relation to sales requirements. Obligations for peacetime operating stocks were 92% of sales in 1964 and are projected at 89% of sales in 1965 and 1966, respectively. The program reflects procurement for augmentation of mobilization reserve stocks of \$33 million in 1964, \$35 million in 1965, and \$34 million in 1966. The program provides for year-end inventories as follows (in millions of dollars):

	1963 actual	1964 actual	1965 estimate	1966 estimate

Summary:				
Operating and other stocks.....	852.6	840.9	869.0	799.4
Mobilization reserve stocks.....	610.1	583.5	669.3	776.0
Long supply.....	701.7	580.3	383.6	269.3
Total inventories.....	2,164.3	2,004.7	1,921.9	1,844.7

Total inventory is estimated to decline by \$320 million for the 3-year period from the beginning of 1964 to the end of 1966. Of this, \$145 million is due to sales of stock without replacement and \$340 million from disposals, donations and adjustments. These decreases are partially offset by a net increase in capitalization of \$165 million.

Costs exceed obligations by a total of \$562 million for the 3 years presented here, because inventory is being sold or disposed of at a faster rate than it is being ordered.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Sales are forecast to increase by \$408 million from 1964 to 1966. The relationship of cash expenditures and collections is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Gross expenditures.....	1,834,504	2,126,600	2,146,700
Applicable receipts.....	1,877,086	2,220,400	2,279,700
Net expenditures.....	-42,582	-93,800	-133,000

A transfer of \$35 million to Military personnel, Army, is reflected for 1965 and \$155 million in 1966 in keeping with the practice of transferring unneeded balances from this fund to offset the need for new obligational authority.

Operating results and financial condition.—The net loss was \$74 million in 1964 and is forecast at \$111 million in 1965 and \$39 million in 1966 due to losses on disposal or donation of stocks in long supply.

Government equity at the end of 1966 is estimated at \$2,138.2 million, consisting of \$9,887.8 million in inventory and other assets capitalized, less \$3,407.2 million in net cash withdrawals or transfers from the fund and \$4,342.4 million cumulative operating loss, the latter due primarily to disposal of stocks which were excess at the time of capitalization or determined to be excess as a result of purification of stocks.

Appropriation to liquidate contract authorization.....			

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and mobilization reserve (10 U.S.C. 2208). It includes items in all levels of shore-based inventories, and in fleet issue ships and service force vessels afloat.

Reductions in inventories capitalized under the fund are due principally to transfers of material from this fund to Navy procurement appropriations for financing. These include insurance items, items essential to the safety of personnel, and certain high cost reparable items. Other reductions resulted from transfers to the Defense Supply Agency. The net effect of these changes by category is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Schedule of capitalized inventories:			
Retail special and resale clothing.....	-9,021		
Ships, submarine and base repair parts.....	-112,560	-80,193	-19,762
Retail provisions.....	-3,577

Net change in capitalized inven- tory.....	-277,222	-168,912	-23,553

Budget program.—The decreases in obligations reflect sales of material bought in past years for which replacement

funding is not required. The budget program provides for year-end inventories as follows (in millions of dollars):

	1963 actual	1964 actual	1965 estimate	1966 estimate
Retail special and resale clothing:				
Operating and other stocks	28.1	19.6	19.5	18.9
Mobilization reserve stocks	6.9	6.9	7.4	8.5
Long supply	5.8	3.5	2.8	2.0
Photographic material:				
Operating and other stocks	3.2	3.1	4.9	4.3
Mobilization reserve stocks	.6	.7	.7	1.3
Long supply	3.9	2.3	1.3	.3
Ships, submarine and base repair parts:

Long supply	7.0			
Ordnance repair parts:				
Operating and other stocks	61.8	25.4	15.2	14.6
Mobilization reserve stocks	10.0	4.4	3.1	7.6
Long supply	88.6	66.0	22.9	16.3
Fleet material support office—retail commodities:				
Operating and other stocks	87.5	93.8	99.8	84.9
Mobilization reserve stocks	19.1	23.4	28.8	46.7
Long supply	73.0	62.4	38.6	21.3
Summary:				
Operating and other stocks	675.5	496.1	430.4	371.0
Mobilization reserve stocks	245.9	173.5	180.3	256.4
Long supply	532.7	385.6	192.4	117.6
Total inventories	1,454.1	1,055.2	803.1	745.0

Total inventory is estimated to decrease by \$709.1 million from the beginning of 1964 to the end of 1966. This involves \$50 million in sale of stocks without replacement, \$243 million through donation or disposal as surplus, and \$470 million in decapitalization, partially offset by increases of \$54 million through returns to the supply system and price changes. For the 3 years presented here, costs exceed obligations by \$237 million because inventory is being sold and disposed of at a faster rate than it is being ordered.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. The relationship of expenditures and collections is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Gross expenditures	1,209,012	1,180,767	1,151,813
Applicable receipts	1,242,645	1,200,767	1,204,813
Net expenditures	-33,633	-20,000	-53,000

A transfer of \$10 million to Military personnel, Navy is reflected for 1965, in accordance with the 1965 appropriation act, and a transfer of \$55 million is proposed for 1966.

Department of Defense stock funds are authorized to incur obligations in anticipation of future year business (10 U.S.C. 2210(b)). Pursuant to this authority, contract

authorization in the amount of \$148.8 million was available at the start of 1964. This is necessary because the leadtime on material to be procured is greater than the time required to fill and collect for customer orders. As indicated in the statements, the current assets available and reflected for 1965 and 1966 will provide adequate resources for fund operations. The contract authorization of \$148 million available at the start of 1964 is reduced to \$44 million at the end of 1966, because customer orders are forecast to exceed obligations through the 3 years shown.

Operating results and financial condition.—An operating loss of \$63 million is estimated for 1965, to result primarily from losses on disposal of material in long supply. A gain of \$18 million is estimated for 1966.

Government equity at June 30, 1966, is estimated at \$885.8 million consisting of \$238.8 million in appropriations and cash transfers, \$1,539.4 million from capitalization of inventory and other assets, less \$892 million deficit.

Status of Unfunded Contract Authorization (in thousands of dollars)

	1964 actual	1965 estimate	1966 estimate
Unfunded balance brought forward.....	9,207	3,387	
Administrative cancellation of unfunded balance.....	-5,820	-3,387	
Unfunded balance carried forward.....	-3,387		
Appropriation to liquidate contract authorization.....			

This fund finances the procurement and maintenance of inventory for resale and mobilization reserve (10 U.S.C. 2208). All inventories except for maintenance items on Okinawa, and some stocks of individual clothing, are in the United States.

Budget program.—In 1964 and 1965, selected items are transferred to the Defense Supply Agency for management. The changes in capitalized inventory are summarized as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Ordnance-tank-automotive.....	-8,681	-2,910	
Engineer supplies & construction material.....	4,515	-2,075

Subsistence—Commissary: Operating stocks.....	4.9	4.9	4.3	4.3
Summary:				
Operating stocks.....	96.1	100.7	79.8	66.5
Mobilization reserve stocks.....	34.6	38.6	41.0	44.6
Long supply.....	105.3	71.2	23.2	16.4
Total inventories.....	236.0	210.5	144.0	127.5

Inventories are forecast to decrease by \$109 million from the beginning of 1964 to the end of 1966, consisting of \$12.0 million in decapitalizations and \$97 million in other reductions, including sale without replacement and disposal losses. Because inventory is being sold or disposed of at a faster rate than it is being ordered, costs exceed obligations for the 3 years by \$102 million.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1966 are estimated to increase by \$5.8 million over 1964, principally in subsistence—commissary. The relationship of expenditures and collections is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Gross expenditures.....	136,849	125,800	121,200
Applicable receipts.....	128,059	130,200	133,400
Net expenditures.....	8,790	-4,400	-12,200

A transfer of \$3 million to Military personnel, Marine Corps is reflected for 1965, pursuant to the 1965 appropriation act, and a transfer of \$10 million is proposed for 1966.

Department of Defense stock funds are authorized to incur obligations in anticipation of future year business (10 U.S.C. 2210(b)). Pursuant to this authority, contract authorization of \$3.4 million was available at the start of 1965. This is necessary because the production leadtime on material required to be procured is greater than the time required to fill and collect for customer orders. This authorization is eliminated in 1965 and 1966, because amounts available through customer orders exceed obligations incurred.

Operating results and financial condition.—An operating loss of \$18.3 million was realized for 1964, and losses of \$52 million and \$4.3 million are forecast for 1965 and 1966, respectively, largely due to large forecast disposals of surplus property in those years. Government equity at June 30, 1966, is estimated at \$145.4 million, consisting of \$522.0 million in net capitalized inventory since the inception of the fund, less \$127 million in net cash withdrawals from the fund and \$249.6 million deficit.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund, established July 1, 1950, finances for 1966 the procurement of approximately 9,000 items for resale and maintenance of operating and war readiness stocks (10 U.S.C. 2208). These items are stocked and sold at approximately 900 outlets worldwide.

Budget program.—Obligations increase \$54 million in 1965, reflecting continuing higher commissary store sales and related inventory increases. In 1966, however, obligational requirements will drop \$6 million due to inventory drawdown of aviation fuels war readiness material, and the impact of the inventory build-up in 1965.

Changes in inventory capitalized under the fund are as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Clothing.....	-12		
General supplies.....	-380	-9	
Net change in capitalized inventory.....	-391	-9	

The budget program provides for year-end inventories as follows (in millions of dollars):

	1963 actual	1964 actual	1965 estimate	1966 estimate
Clothing:				
Operating and other stocks.....	13.0	12.7	12.8	13.0
Long supply.....	.5	.5	.4	.4

Operating and other stocks.....	101.6	97.6	82.1	81.3
Mobilization reserve stocks.....	91.5	80.4	93.8	84.3
Subsistence-commissary:				
Operating and other stocks.....	51.2	53.8	55.9	55.2
Mobilization reserve stocks.....	2.5	2.8	3.0	3.0
Air Force Academy cadet store:				
Operating and other stocks.....	.5	.7	.8	.8
General supplies:				
Operating and other stocks.....	.1			
Summary:				
Operating and other stocks.....	166.4	164.7	151.6	150.4
Mobilization reserve stocks.....	94.0	83.2	96.8	87.4
Long supply.....	.5	.5	.4	.4
Total inventories.....	260.8	248.4	248.8	238.2

The decrease in inventories of \$22.6 million from the beginning of 1964 to the end of 1966 results primarily from drawdown of stocks of aviation fuels. Costs exceed obligations for the 3 years presented here by \$35 million, largely because inventory is being sold at a faster rate than it is being ordered.

Financing.—Funds for financing the budget program are derived from sales to authorized customers. Sales increase \$26 million in 1965 and \$17 million in 1966, largely due to the commissary trend noted above. The

relationship of collections and payments is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Gross expenditures.....	1,343,796	1,346,610	1,369,300
Applicable receipts.....	1,372,716	1,340,410	1,382,100
Net expenditures.....	-28,920	6,200	-12,800

A transfer of \$25 million to Military personnel, Air Force, was made in 1964, \$41 million has been authorized for 1965, and \$25 million proposed for 1966.

Operating results.—Operations are basically on a break-even basis for all 3 years; the cumulative deficit of \$184 million at June 30, 1966, is largely attributable to downward revision of standard prices for items initially capitalized and losses sustained in the disposal of excess and surplus stocks.

This fund finances the procurement of wholesale inventories of common use material and supplies for resale to the military services and for mobilization reserve (10 U.S.C. 2208). Wholesale inventories are maintained at selected storage points in the continental United States. Changes in capitalized inventory are as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Clothing and textiles.....	8,982		
Medical and dental material.....	611	500	-89,500
Subsistence.....	3,505		
General supplies.....	-19,178	11,000	
Industrial supplies.....	53,134	5,200	
Fuel supplies.....	19,268	300	
Construction supplies.....	49,599	-1,400	
Automotive supplies.....	-34,815		
Electronics.....	149,822		
Net change in capitalized inventory.....	230,928	15,600	-89,500

The 1964 increase of \$231 million is the net of \$375 million in inventory capitalized (including electronics items, electric wire and cable, and certain mechanical and construction items), partly offset by \$144 million in decapitalizations. The decapitalizations included paint, hand tools, and automotive items. The 1966 decapitalization of \$89.5 million reflects the transfer of prepositioned war reserve stocks of medical material from the Defense Supply Agency to the military services for management.

Budget program.—The increase in obligations in 1965 and 1966 above the 1964 level reflects the increased sales and an increase in procurement for augmentation of mobilization reserves. These procurements amounted to \$3.5 million in 1964 and are estimated at \$33 million in 1965 and \$23 million in 1966.

This program reflects a drawdown of peacetime on hand and on order stocks in 1965 of \$143.6 million, the difference between \$1,664.4 million in obligations and \$1,808 million in sales. The 1966 program proposes a drawdown of peacetime on hand and on order stocks of \$154 million by estimating \$1,651 million in obligations to support sales of \$1,805 million.

The budget program provides for year-end inventories as follows (in millions of dollars):

Mobilization reserve stocks.....	517.1	414.7	454.9	384.9
Long supply.....	927.7	903.5	675.8	502.8
Total inventories.....	2,412.2	2,231.9	1,913.9	1,552.8

Inventory is forecast to decrease by \$859 million from the beginning of 1964 to the end of 1966, the net of \$157 million in capitalizations, reflected above, and \$1,016 million in decreases. The decreases include \$402 million in sale of stock without replacement, \$498 million to be transferred for donation or sale as surplus, \$62 million in donations to other agencies and the military assistance program, \$47 million in price reductions, and \$7 million in losses and adjustments.

Costs exceed obligations by \$883 million for the three years, because inventory is being sold or disposed of at a faster rate than it is being ordered.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. The relationship of cash collections and payments is as follows (in thousands of dollars):

	1964 actual	1965 estimate	1966 estimate
Gross expenditures.....	1,530,975	1,641,000	1,650,000
Applicable receipts.....	1,715,078	1,821,000	1,805,000
Net expenditures.....	-184,103	-180,000	-155,000

Transfers to the military personnel and reserve personnel appropriations were \$100 million in 1964 and are estimated at \$151 million in 1965 and \$195 million for 1966. In addition, \$30 million is proposed for transfer to the Defense industrial fund in 1966.

Operating results and financial condition.—The statements indicate net losses of \$197 million in 1964, \$167 million in 1965, and \$117 million in 1966, resulting largely from disposal and donation of excess and surplus inventories. These losses are expected to be reduced in future years as the amount of surplus material in the supply system is reduced, and as the pricing of items in the system is adjusted. Although generation of excess stocks is inevitable in supply operations, every effort is being made to minimize disposal losses and to provide for the recovery of such losses as do occur through appropriate charges to customer accounts, in order to protect the integrity of the capital of the fund.

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

DEFENSE STOCK FUND—Continued

Government equity at June 30, 1966, is estimated at \$1,718 million, consisting of net capitalized inventory of \$2,787 million, less net working capital of \$518 million transferred out and a net operating deficit of \$551 million.

¹ Balances of selected resources are identified on the statement of financial condition.

² Adjustments in selected resources consist of inventory adjustments charged to prior year income, \$48 thousand, and assets capitalized, \$5 thousand, offset by accrued leave canceled, \$139 thousand, in 1964; accrued leave assumed, \$364 thousand, and materials and supplies transferred to the Army Stock Fund, \$6,916 thousand, in 1965; and accrued leave canceled, \$136 thousand, in 1966.

The Army Industrial Fund, under authority in 10 U.S.C. 2208 is currently used at 23 industrial and commercial type activities for initially financing research and limited quantity production of goods and services needed by the three military departments and other government agencies on a reimbursable basis.

Munitions command.—This command manages nuclear and nonnuclear ammunition, rocket and missile warhead sections, chemical, biological and radiological materiel and propellant actuated devices. The six industrial facilities under this command perform research and development, production engineering, pilot manufacturing, testing and evaluating, cataloging, standardization, and inventory management and control of munitions items. The program in this command for 1965 and 1966 will be almost identical to the 1964 program which amounted to \$265.9 million.

Missile command.—This activity includes the Watertown Arsenal and the Missile Command at Redstone Arsenal, which manages materiel development programs for free rockets, guided and ballistic missiles, rocket motors and components, target missiles (except Zeus evaluation targets), and special purpose and missile test equipment. The decrease in the program for this activity is due to the scheduled closing of Watertown Arsenal in September 1967.

Weapons command.—This command manages combat vehicles, artillery, mortars, recoilless rifles, gun carriages, recoil mechanisms, rocket launchers, and a variety of small arms, and accessories. Its mission for the assigned items encompasses the span from research through pilot production including support, management, training devices, and technical assistance. The planned programs for 1965 and 1966 reflect the phasedown of industrial operations at Springfield Armory which is scheduled to be closed in April 1968.

Transportation terminal activities.—These activities are responsible for planning, regulating, and controlling the export and import movement of cargo and personnel through Army and commercial ports on the Atlantic, Pacific, and Gulf coasts and the Great Lakes area. In addition, this program includes the cost of auxiliary port services and support of tenants and satellites. The increase in costs forecast in 1965 is due mainly to a substantial increase in cargo workload. The decrease in the program in 1966 is attributable to the closing of New Orleans and Hampton Roads Army terminals in July 1965. Cargo which moved over these facilities will move over commercial or other facilities in these areas. Estimated workload and costs are as follows (in thousands):

	1964 actual	1965 estimate	1966 estimate
Cargo in measurement tons.....	8,510	9,380	9,301
Passengers transhipped.....	684	658	598
Cost of services rendered.....	\$95,388	\$96,715	\$86,949

Operations of the Army's CONUS ports will be taken over in 1965 by the newly established Military Traffic Management and Terminal Service Agency.

Depot manufacturing and maintenance activities.—Activities under this program are units of multiple mission installations. Included in this program are a quartermaster shop, an engineer shop, a signal shop, and a rail equipment repair shop. These shops rebuild and restore un-serviceable equipment. The program decreases in 1965 and 1966 because of discontinuance of activities of the Quartermaster and Engineer shops at Ogden, Utah. This is offset in part by an increase in work at the engineer shop at Atlanta Army Depot and the signal shop at Lexington-Blue Grass Army Depot.

Proving grounds and laboratories.—This activity includes two proving grounds which engage primarily in research, test and evaluation of ordnance weapons, materials and equipment, and chemical agents, and a laboratory which specializes in fuses. The planned program will increase about 5% in 1965 over 1964 and then decrease slightly in 1966.

Army pictorial center.—This installation produces, procures, processes, distributes and evaluates motion pictures, foreign language rescorings, filmstrips, recordings, and television programs for use in military training, research, orientation, and education. Slight program decreases are planned for 1965 and 1966.

Financing the budget program.—This program is financed by reimbursement from customers for goods produced or services performed. The estimates of orders to be received in 1965 and 1966 are derived from the current unworked orders on hand and program guidance from major customers. New orders in 1965 and 1966 will decline from the 1964 figure due to planned base closures and reduction in Army procurement programs. The balance of unworked and unbilled customers orders is expected to be reduced from \$414 million at the end of 1964 to \$300 million by end of 1966.

Operating results and financial condition.—The following table indicates 1964 net revenue and expense by activity (in thousands of dollars):

	Revenue	Expense	Gain or loss
Munitions command.....	267,267	267,095	172
Missile command.....	138,807	138,823	-16

Total.....	768,968	768,503	465

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY INDUSTRIAL FUND—Continued

The net gain of \$465 thousand primarily in the munitions and weapons commands, and depot maintenance activities reflects an operating variance resulting from the use of standard costs and the pricing of customer billings at predetermined rates. Revenue and expense are projected to break even in 1965 and 1966.

Collections exceeded expenditures by \$46 million in 1964 but expenditures will exceed collections by \$43.5 million in 1965 and \$24.2 million in 1966. The Government equity at the end of 1966 is estimated at \$35.6 million, composed of \$26.3 million in reappropriations and \$7.4 million in capitalized assets, plus an accumulated operating gain of \$1.9 million. This investment is required for the financing of activities currently under the fund. In 1966, \$30 million of appropriated capital is proposed for transfer to Military personnel, Army. The reduction in Government equity from \$72.7 million in 1964 is due to decapitalization and transfer of \$6.9 million in material inventory to the Army Stock Fund in 1965 and the proposed transfer of \$30 million in 1966.

¹ Balances of selected resources are identified on the statement of financial condition.

² Adjustments in selected resources consist of: Accrued leave liquidated, -\$1,348 thousand in 1964; and materials and supplies capitalized, net, -\$337 thousand, and accrued leave liquidated, -\$454 thousand in 1965.

This fund finances 65 industrial and commercial type activities on a reimbursable basis (10 U.S.C. 2208).

Budget program.—The cost of goods and services produced by activities operated under the Navy Industrial Fund is expected to decrease in 1965 as compared with 1964 by \$67.7 million or 3.1%. This decrease reflects reduced activity at the naval shipyards partially offset by minor increases in other programs. The decrease in 1966 of \$68.2 million results primarily from further decreases in the shipyard program, and the anticipated sale of the ordnance plant at Macon, Ga., to private enterprise.

Printing.—This program includes the operations of 30 printing plants. These plants provide printing services in the Washington area and throughout the defense field establishment. The printing workload for 1965 and 1966 indicates a relatively stable condition for this program.

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

Ordnance.—With the anticipated sale of the Naval Ordnance Plant at Macon, Ga., to a private concern, this program will include six major activities. These activities are engaged in the production and overhaul and repair of naval ordnance, ammunition, and propellants. The decrease in costs during 1966 relates primarily to the sale of the ordnance plant at Macon.

Shipyards.—The shipyard program for 1966 includes 10 activities engaged in the construction, overhaul, repair, and alteration of active and reserve fleet vessels. The shipyard workload and employment have been decreasing since 1962. The dollar value of customer orders on the books of the shipyards decreased \$141.7 million and \$9.6 million, respectively, during 1963 and 1964, and is expected to further decrease by \$75.3 million during 1965. In 1966 a decrease of \$12.5 million is planned. This represents a decrease in workload carryover of \$239.1 million for the period 1963–66. Additional cost reductions result from the closing of the San Diego ship repair facility in 1964 and the consolidation of the San Francisco and Mare Island shipyard management in 1965, as announced by the Secretary of Defense on November 19, 1964. The future closing of the New York and Portsmouth, N.H., naval shipyards were also announced at that time.

Military Sea Transportation Service.—This organization provides ocean transportation of dry cargo, passenger, and petroleum products, and provides the ocean platforms for scientific and other special projects. The estimates include the costs of operating Government-owned ships and the procurement of commercial augmentation. Principal changes in MSTS operating programs are the marked increase in the number of project ships performing special programs for sponsoring agencies and the reduction in passenger sealift resulting from the placing of 8 of the 16 MSTS nucleus fleet troop transports in ready reserve, rather than full operating status, and greater use of air transportation. A summary of workload and costs (dollars in thousands) is provided in the following table:

	1964 actual	1965 estimate	1966 estimate
Cargo ships:			
Measurement tons (cargo).....	13,136,582	13,637,819	12,777,823
Per diem ship-days.....	6,263	5,391	3,741
Cost.....	\$270,189	\$278,919	\$266,660
Passenger ships:			
Cabin passengers.....	119,121	129,902	70,659

Cost.....	\$54,217	\$53,292	\$42,118
Petroleum ships:			
Long tons (petroleum).....	16,895,988	14,261,200	15,439,800
Per diem ship-days.....	1,293	1,022	888
Cost.....	\$100,720	\$75,537	\$82,428
Project ships and miscellaneous:			
Ship operating days.....	9,344	14,076	14,564
Cost.....	\$29,725	\$39,871	\$75,954
Total costs.....	\$454,852	\$447,619	\$467,160

Research.—This program includes the Naval Research Laboratory and the David Taylor Model Basin, both in

the Washington, D.C., area, and the Naval Ordnance Laboratory, Corona, Calif. These activities provide Navy in-house research capability into the physical sciences, the shapes and forms of naval vessels, and other ship design problems, and into guided missile fuzes. Workload and employment at these activities have been relatively stable for the last several years. The fluctuations in costs stem primarily from fluctuations in contractual services procured from commercial sources.

Base services.—This program includes seven activities engaged in providing utility, maintenance, custodial and transportation services for customers in their geographic areas. The workload, costs, and employment reflect a relatively stable condition at these activities.

Aircraft maintenance.—This program includes seven activities involved in the overhaul and repair of aircraft and missiles, and the manufacture and repair of aircraft parts and assemblies. The increase in workload and costs in 1966 over 1965 reflects the increase in the aircraft and engine overhaul program.

Financing the budget program.—This program is financed by orders citing the customers' appropriations. Costs are financed by the working capital of the fund, which is augmented by the customers' prepayment of large orders, and billed to the customers' appropriations upon receipt of the prepayment or upon completion of the work.

The following table shows 1964 net revenue and expense by activity (in thousands of dollars):

	Revenue	Expense	Gain or loss
Printing.....	18,062	17,823	239
Ordnance.....	208,831	208,605	225

Aircraft maintenance.....	275,700	271,612	4,088
Total.....	2,146,245	2,141,312	4,932

Operating results and financial condition.—In 1964 retained earnings increased \$5.7 million, the result of a \$4.9 million gain from operations and \$0.8 million prior year adjustments. Government investment at June 30, 1966 is estimated at \$173.9 million representing \$190.4 million in reappropriations and \$28.3 million in retained earnings offset, in part, by \$44.8 million representing the excess of liabilities assumed over assets capitalized.

¹ Balances of selected resources are identified on the statement of financial condition.

² Adjustment in selected resources for 1964 consists of liabilities assumed for accrued annual leave in the amount of \$34 thousand offset by materials and supplies capitalized in the amount of \$83 thousand.

This fund finances industrial and commercial type activities on a reimbursable basis (10 U.S.C. 2208).

Budget program—Printing and duplicating service.—There are 10 plants financed under this program. These plants provide area support to the Air Force and other

military services on a reimbursable basis. Production in 1964 was 2.4 billion printing units and is estimated at 2.2 billion in 1965 and 1966. The decrease in production is due to a reduction in operations to one shift.

Laundry and dry cleaning service.—There were 43 plants operating under this fund during 1964 and no further changes are projected for 1965 or 1966. Total production in 1966 is estimated at 104 million pieces of laundry and dry cleaning as compared with 104.9 million for 1964 and 104.2 million in 1965.

Military Air Transport Service.—The Airlift Service portion of the Military Air Transport Service was included operating under this fund on July 1, 1958. The size of MATS and the extent and nature of its operations are keyed to Joint Chiefs of Staff approved military wartime airlift requirements. These requirements are either hard core or civil eligible. Because of their nature or the nature of the missions to be supported, the critical or hard core requirements must move in military operated aircraft. The civil eligible requirements can move in either military or civil operated aircraft.

To have the capability to surge to meet wartime airlift requirements, the military airlift aircraft must be exercised appropriately during peacetime. The peacetime airlift capability so produced is used in the interest of economy in meeting peacetime airlift needs of the Department of Defense. Military aircraft are used to provide air evacuation of patients; special air missions; training of airborne troops; and, as augmented by commercial aircraft, common-user airlift of passengers, cargo, and mail. Airlift service resources and workload are as follows:

Financing the budget program.—This program is financed by customer orders for services. These orders constitute valid obligations of the ordering appropriations and authorize activities financed through the fund to provide services requested. Costs are charged initially to the working capital of the fund and are billed to customers on the basis of established tariff rates for services provided.

Operating results and financial condition.—For 1964 revenue exceeded expenses by \$1.9 million, mainly as a result of the operation of the MATS airlift service. Retained earnings increased an additional \$4.5 million in 1964 as a result of adjustments of prior year revenues and expenses. Revenue is expected to increase over the 1964 level in both 1965 and 1966 due to anticipated increases in requirements for airlift service.

Expenditures exceeded collections by \$29.5 million in 1964 due to acceleration in payment of accounts payable. It is estimated that collections will exceed expenditures by \$29.5 million in 1965 and \$10 million in 1966.

Employee annual leave accruals, included in the statement as a current liability, were \$2.1 million at June 30, 1964. Government investment is estimated at \$81 million at June 30, 1966, consisting of \$71 million in re-appropriations and transfers and \$10.8 million in retained earnings less \$0.8 million representing the excess of liabilities assumed over assets capitalized.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund currently finances the Defense Clothing and Textile Supply Center, and starting July 1, 1965, will finance the communications services activity, on a reimbursable basis (10 U.S.C. 2208).

Manufacturing operations of the Defense Clothing and Textile Supply Center, Defense Supply Agency have been

financed under this fund since May 1962. The activity produces clothing and textile items required on short notice, in small lots, to special measurement, or under other conditions which make procurement from commercial sources impractical. The factory also serves as a pilot production plant to test design specifications and production methods, and provides a part of the production base for industrial mobilization.

To provide for closer supervision, more effective utilization and greater economies in the Defense communications system, the Secretary of Defense, on August 28, 1964, approved, effective July 1, 1965, the establishment of the communications services activity to be financed under this fund, under the management of the Defense Communications Agency. Initially this activity will finance, on a reimbursable basis, leased communications services provided in the continental United States through AUTOVON (Automatic Voice Network—switch system as a single worldwide network in which all analog traffic will be handled regardless of the functional nature), AUTODIN (Automatic Digital Network—which will handle as a single worldwide network all digital traffic of an operational, logistical, or other functional nature), and other leased communications services, for Defense and certain other Government agencies. As other communications elements or subsystems relating to the Defense communications system or National communications system operations are identified and costed, it is planned they will also be financed through this fund.

Budget program.—Costs increase for 1966 because the communications services activity is added in that year. Costs decrease for clothing manufacturing from 1964 through 1965 and 1966. This reflects the plan to reach, by the end of 1966, an employment level representing the minimum economical level for maintaining the required balance of skills at a desired ratio of overhead and production employees. These employment decreases are being accomplished through attrition. By the end of 1966, the employment at this factory will be about 1,000 less than the employment in the two separate factories previously operated, and annual operating costs will be about \$4 million below levels previously planned.

Financing the budget program.—This program is financed by customer orders. For 1966, a transfer of \$30 million is proposed from the Defense stock fund to provide initial working capital for the communications services activity.

Operating results and financial condition.—Clothing operations in 1964 resulted in a gain of \$85 thousand which, partially offset by a previous deficit of \$17,000, produced a cumulative operating gain of \$68 thousand since the inception of the fund. Break-even operations are forecast for 1965 and 1966. Government equity at June 30, 1966, is estimated at \$32,977 thousand, consisting of Treasury balances transferred to the fund of \$31,571 thousand, inventories and other assets capitalized net of liabilities assumed of \$1,338 thousand, and a cumulative operating gain of \$68 thousand.

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY MANAGEMENT FUND—Continued

This fund was created to simplify the financing and accounting for operations supported by two or more appropriations (5 U.S.C. 172e). The corpus of the fund consists of \$1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*—Finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services.*—Provides for the payment centrally of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs incurred by the Army.

3. *Construction activity, Europe*—Finances certain administrative and overhead expenses in the Department of Defense construction programs in Western Europe.

¹ Reimbursements from non-Federal sources represent payments for inspection work accomplished for foreign governments (22 U.S.C. 1816).

This fund was created to facilitate the financing of operations supported by two or more appropriations (10 U.S.C. 2209). The principal activity financed through the fund is the Polaris ballistic missile program. Reimbursable orders for the Polaris program are issued to the fund from Navy appropriations for Procurement, Operation and maintenance, and Research, development, test, and evaluation. Other operations financed are transportation of supplies, materials, and equipment of the Navy; the material inspection service; incentive award payments; departmental telephone and maintenance services and the Armed Services Board of Contract Appeals.

90 Expenditures.....	437		

This fund represents advances received for goods or services furnished foreign governments and others (31 U.S.C. 643). Authorized individuals and organizations requesting goods or services are required to advance amounts to cover the estimated value to this fund. These advances are then used to reimburse the Operation and maintenance, Navy, and other appropriations for the value of goods provided or services rendered. Examples include (a) utilities, repairs, and maintenance furnished to morale, welfare, and recreation activities; (b) utilities furnished to tenants of Navy housing projects; and (c) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in overseas locations. Advances received from foreign governments are principally for sales of material and miscellaneous services.

GENERAL PROVISIONS

SEC. 501. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 502. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 503. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS-5 under the Classification Act of 1949, as amended.

SEC. 504. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 505. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section 2672 of title 10, United States Code.

SEC. 506. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of ~~[\$285]~~ \$455 per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents: *Provided*, That the foregoing amount may be exceeded to the extent necessary to provide for any increase in tuition payments (including payments required by law to be made to the Canal Zone Government) during the current fiscal year; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for leasing of buildings and facilities including payment of rentals for special purpose space at the seat of government and, in the conduct of field exercises and maneuvers or, in administering the provisions of 43 U.S.C. 315g, rentals may be paid in advance; (f) payments under contracts for maintenance of tools and facilities for twelve months beginning at any time during the fiscal year; (g) maintenance of Defense access roads certified as important to national defense in accordance with section 210 of title 23, United States Code.

SEC. 507. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison and to each person discharged for fraud-

ulent enlistment; (b) authorized issues of articles to prisoners, applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment, prisoners, civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; (e) expenses of prisoners confined in non-military facilities; (f) military courts, boards, and commissions; (g) utility services for buildings erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; (i) expenses of Latin-American cooperation as authorized for the Navy by law (10 U.S.C. 7208); and (j) expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case: *Provided*, That section 212 of the Act of June 30, 1932 (5 U.S.C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home.

SEC. 508. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 509. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.50 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees: *Provided further*, That members of organized nonprofit youth groups sponsored at either the national or local level, when extended the privilege of visiting a military installation and permitted to eat in the general mess by the commanding officer of the installation, shall pay the commuted ration cost of such meal or meals.

SEC. 510. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. 511. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 512. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interests of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

SEC. 513. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 514. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 301 of title 37, United States Code, to certain members of the Armed Forces otherwise entitled to receive flight pay during the current fiscal year (1) who have held aeronautical ratings or designations for not less than fifteen years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights.

SEC. 515. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in [excess of eleven thousand pounds net in any one shipment] *any one shipment having a net weight in excess of thirteen thousand five hundred pounds for officers in pay grades O-7 through O-10; of twelve thousand pounds for officers in pay grade O-6; and eleven thousand pounds for all others.*

SEC. 516. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 517. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 521 of this Act.

SEC. 518. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

SEC. 519. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with

mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. 520. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. 521. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. 522. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 523. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided further*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. 524. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 525. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. 526. Appropriations contained in this Act shall be available for the purchase of household furnishings and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. 527. During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 528. During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the

GENERAL PROVISIONS—Continued

Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national, or international rifle matches.

SEC. 529. Funds provided in this Act for congressional liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed \$950,000: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

SEC. 530. Of the funds made available by this Act for the services of the Military Air Transport Service, \$80,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil air fleet.

SEC. 531. Not to exceed **[\$11,800,000]** \$11,746,000 of the funds made available in this Act for the purpose shall be available for the hire of motor vehicles: *Provided*, That the Secretary of Defense, under circumstances where the immediate movement of persons is imperative, may, if he deems it to be in the national interest, hire motor vehicles for such purpose without regard to this limitation.

SEC. 532. Not less than \$7,500,000 of the funds made available in this Act for travel expenses in connection with temporary duty and permanent change of station of civilian and military personnel of the Department of Defense shall be available only for the procurement of commercial passenger sea transportation service on American-flag vessels.]

SEC. **[533]** 532. During the current fiscal year, appropriations available to the Department of Defense for operation may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, unfitness, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

SEC. **[534]** 533. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by that contractor of personnel required for the performance by the contractor of obligations arising under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

SEC. **[535]** 534. Funds appropriated in this Act for maintenance and repair of facilities and installations shall not be available for acquisition of new facilities, or alteration, expansion, extension, or addition of existing facilities, as defined in Department of Defense Directive 7040.2, dated January 18, 1961, in excess of \$25,000: *Provided*, That the Secretary of Defense may amend or change the said directive during the current fiscal year, consistent with the purpose of this section.

SEC. **[536]** 535. During the current fiscal year, the Secretary of Defense may, if he deems it vital to the security of the United States and in the national interest to further improve the readiness of the Armed Forces, including the reserve components, transfer under the authority and terms of the Emergency Fund an additional \$200,000,000: *Provided*, That the transfer authority made available under the terms of the Emergency Fund appropriation contained in this Act is hereby broadened to meet the requirements of this section: *Provided further*, That the Secretary of Defense shall notify the Appropriations Committees of the Congress promptly of all transfers made pursuant to this authority.

SEC. **[537]** 536. None of the funds appropriated in this Act may be used to make payments under contracts for any program, project, or activity in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the

Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 538. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 20 per centum of the direct costs.]

SEC. 539. Of the funds made available in this Act for repair, alteration, and conversion of naval vessels, at least 35 per centum shall be available for such repair, alteration, and conversion in privately owned shipyards: *Provided*, That if determined by the Secretary of Defense to be inconsistent with the public interest based on urgency of requirement to have such vessels repaired, altered, or converted as required above, such work may be done in Navy or private shipyards as he may direct.]

SEC. 540. None of the funds appropriated in this Act shall be used to conduct or assist in conducting any program (including but not limited to the payment of salaries, administrative expenses, and the conduct of research activities) related directly or indirectly to the establishment of a national service corps or similar domestic peace corps type of program.]

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. Funds appropriated to the [military departments] *Department of Defense* for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the [second] first session of the [Eighty-eighth] *Eighty-ninth* Congress.

SEC. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed \$25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.

SEC. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories, or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 105. Funds appropriated to the [military departments] *Department of Defense* for construction are hereby made available for hire of passenger motor vehicles.

SEC. 106. Funds appropriated to the [military departments] *Department of Defense* for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the [purposes of] *construction of access roads as authorized by section 210 of title 23, United States Code*, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 107. None of the funds appropriated in this Act may be used to begin construction of new bases for which specific appropriations have not been made.

SEC. 108. No part of the funds contained in this Act shall be used for the construction of hospitals or composite medical facilities which do not provide facilities for obstetrical services.]

SEC. **[109]** 108. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Bureau of Yards and Docks, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than \$25,000.

SEC. **[110]** 109. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

GENERAL PROVISIONS—CIVIL DEFENSE

Appropriations contained in this Act for carrying out civil defense activities shall not be available in excess of the limitations on appropriations contained in section 408 of the Federal Civil Defense Act, as amended (50 U.S.C. App. 2260).

No part of any appropriation in this Act shall be available for the construction of warehouses or for the lease of warehouse space in any

building which is to be constructed specifically for civil defense activities.

【No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for construction of fallout shelters except in construction of new buildings under the heading, "Construction, Public Buildings Projects", for the fiscal year 1965.】

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CEMETERIAL EXPENSES

General and special funds:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of **two** five passenger motor vehicles, of which three shall be for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; **[\$13,295,000]** **\$13,739,000**: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of \$17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation. (24 U.S.C. 271, 273-276, 278-279, 279a-b, 282, 288, 290; Public Works Appropriation Act, 1965.)

¹ Reimbursements from non-Federal sources are derived from payments by commercial carriers for headstones damaged in shipment (31 U.S.C. 489a).

This appropriation provides funds for the operation and maintenance of the national cemetery system and

for the procurement and supply of headstones and markers for graves of eligible persons buried in national and private cemeteries. The workload and program requirements increase substantially each year.

1. *Operation and maintenance.*—The national cemetery system consists of 118 activities located in 33 States, Puerto Rico, and the District of Columbia. Included are 85 national cemeteries and 33 miscellaneous burial plots and monument sites. A total of 43,076 interments were made in 1964; 46,200 are estimated for 1965 and 49,500 projected for 1966. There will be 2,482 developed acres to be maintained in 1966. Funds are required for 876 man-years of cemetery labor, for contractual services for maintenance of cemetery installations and for necessary operating supplies and equipment.

2. *Construction.*—Provision is made for 19 projects, including 2 gravesite development projects necessary to preclude closing of cemeteries to new interments. An amount is also included for engineering investigations and preparation of plans for future requirements.

3. *Headstone procurement.*—The basis of the 1966 program is a 5.2% increase in normal applications.

CORPS OF ENGINEERS—CIVIL

The civil works program of the Corps of Engineers consists of a number of related activities for the control and development for beneficial use of water resources in the United States, Puerto Rico, and the Virgin Islands.

The total appropriation requested is \$1,281 million, an increase of \$54 million over the 1965 estimate and an increase of \$184 million over 1964.

General and special funds:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, surveys and studies of projects prior to authorization for construction, **[\$22,194,000]** \$23,988,000, to remain available until expended:

Provided, That **[\$210,000]** \$310,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. (33 U.S.C. 426-426c, 540, 541, 701; Public Works Appropriation Act, 1965.)

1. *Surveys.*—Navigation and flood control studies are made to determine the need and economic justification for proposed water and related land resource developments. Beach erosion control studies are undertaken to determine the need for shore protection and remedial measures at specific localities. Funds are provided in 1966 for 73 navigation, 133 flood control, and 10 beach erosion studies, of which 10 navigation, 21 flood control, and 4 beach erosion surveys will be initiated.

Comprehensive river basin studies provide for broad consideration of water and related land resources needs of river basins. They are coordinated with the related river basin planning efforts of the Departments of the Interior, Agriculture, and Health, Education, and Welfare. Nineteen studies will be carried forward in the following basins:

- | | |
|---|---|
| 1. Big Black River, Miss. | 11. Puget Sound Area, Wash. |
| 2. Big Muddy River, Ill. | 12. Red River below Denison Dam, La., Ark., Okla., and Tex. |

| 10. Pearl River, Miss. | |

Funds are requested to initiate one additional study, the Columbia-North Pacific region.

Special studies are made to resolve unique or especially complex water resources problems. Funds are requested to initiate a study on the Great Lakes water levels in response to an International Joint Commission reference.

Surveys are made in coordination with Federal, State, and local agencies and interests. They give appropriate consideration to present and future requirements for all beneficial uses of water and related land resources, including navigation, flood control, water supply, irrigation, water quality control, power, recreation, and fish and wildlife conservation.

2. *Collection and study of basic data.*—Funds are transferred to the Geological Survey for installation, operation, and maintenance of stream gaging stations; to the Weather Bureau for hydrometeorological studies and precipitation stations; and to the Fish and Wildlife Service for preauthorization studies of the effects of proposed projects upon fish and wildlife. The Corps of Engineers participates on a number of engineering and control boards that study and control international streams mutually affecting the United States and Canada. Information for guidance in the use of flood plain areas is made available to States and local governmental agencies upon their request.

3. *Research and development.*—Coastal engineering research and development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to interested Federal, State, and local agencies and individuals.

Hydrologic studies include investigations of storms, rainfall, streamflow, sedimentation, and other phenomena to provide basic data used in the design, construction, and operation of water control structures.

Civil works investigations are made to improve procedures for analysis of hydrologic and engineering data, refine design methods, develop better materials and practices for the construction and maintenance of hydraulic structures, and improve procedures used in formulating plans for water resources development.

Studies will be carried out on completed portions of the

Mississippi River basin model to improve operation of the reservoir system in the basin and to study potential flood levels on the lower river.

Nuclear explosives studies for civil construction are carried out as part of a joint research program with the Atomic Energy Commission. The ultimate objective is to develop an engineering capability to use nuclear explosives in construction of public works projects. The Corps of Engineers has primary responsibility for chemical explosive experiments and development of engineering, construction, and cost data.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by

States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction); **[\$939,943,200]** \$988,215,000, to remain available until expended, of which \$64,000 shall be available for the readjustment and alteration of the facilities of the Broughton Mutual Telephone Co. to permit continued service to the present users not affected by the Milford Dam and Reservoir project; and of which not to exceed \$131,500 shall be available for construction of a road from the new townsite of Lower Brule to Counsellor Cove, and such work is hereby authorized: **Provided**, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: **Provided further**, That \$500,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. **For an additional amount for "Construction, general", \$2,860,000, of which not to exceed \$860,000 shall be available for emergency flood control construction of debris basins and channel clearing in the Santa Barbara, California, area affected by recent fires, and such work is hereby authorized.** (16 U.S.C. 661-666, 756; 33 U.S.C. 511-523, 540, 701; 55 Stat. 638; 66 Stat. 635, 732; Public Works Appropriation Act, 1965; Supplemental Appropriation Act, 1965.)

DEPARTMENT OF THE ARMY—Continued

CORPS OF ENGINEERS—CIVIL—Continued

General and special funds—Continued

CONSTRUCTION, GENERAL—continued

The requested appropriation of \$988 million represents an increase of \$45 million compared with the amount appropriated for 1965, and an increase of \$161 million compared with 1964. About 74% of the requested appropriation will be applied to 59 major projects in amounts of \$5 million or more each.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects.

2. *Navigation projects.*—This activity includes construction of locks, dams, and canals, and improvement of channels and harbors by dredging and by construction of breakwaters, jetties, and dikes. Provision is made also for the construction of small navigation projects not specifically authorized by Congress.

With the funds requested, work will be continued in 1966 on 45 channel and harbor projects, of which 11 will be completed; and on 17 lock, dam, and canal projects, of which 1 will be completed. Construction will be initiated on 13 channel and harbor and lock and dam projects or project modifications of which 1 will be completed:

CHANNEL AND HARBOR PROJECTS

- | | |
|--------------------------------------|--------------------------------------|
| 1. Oakland Harbor, Calif. | 7. Rollinson Channel, N.C. |
| 2. Chicago Harbor, Ill. ¹ | 8. Wilmington Harbor, N.C. |
| 3. Plymouth Harbor, Mass. | 9. Erie Harbor, Pa. |
| 4. Leland Harbor, Mich. | 10. Texas City—40-ft. channel, Texas |
| 5. Saginaw River, Mich. | 11. Green Bay Harbor, Wis. |
| 6. Little Neck Bay, N.Y. | |

LOCK AND DAM PROJECTS

1. Horse Island and Crescent Bridge, Illinois and Iowa
2. Hannibal locks and dam, Ohio and West Virginia

¹ To be completed with funds recommended for 1966.

3. *Alteration of bridges over navigable waters.*—Obstructive bridges over navigable waterways are altered under arrangements that provide for apportionment of the costs of alteration between the United States and the bridge owners. The funds requested will finance the Federal share of the cost of two continuing projects, one of which will be completed, and for beginning one new project—Berwick Bay Bridge, La.

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States and possessions. Existing law provides for Federal payment of 50% of the cost of beach erosion control works for the protection of non-Federal publicly owned or publicly used shores, and up to 70% of the cost of protection of State and other publicly owned shore parks and conservation areas that meet certain criteria. Provision is also made for small beach erosion control projects not requiring specific congressional authorization.

Reimbursement will be made to compensate local interests on six projects, of which two will be for initial reimbursement in 1966. These two projects are:

BEACH EROSION CONTROL PROJECTS

1. Doheny Beach State Park, Calif.
2. Surfside-Sunset and Newport Beach, Calif.

5. *Flood control projects.*—This activity includes local protection projects and reservoirs for flood control and other purposes such as water supply but without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; for emergency bank protection; and for the construction of small flood control projects not specifically authorized by Congress.

With the funds requested, work will be continued on 75 local protection projects of which 14 will be completed; and on 56 reservoir projects, of which 12 will be completed in 1966. Fourteen new local protection projects and four new reservoir projects will be initiated as follows:

LOCAL PROTECTION PROJECTS

- | | |
|---|--|
| 1. Redwood Creek, Calif. | 8. Alamogordo diversion channel, N. Mex. |
| 2. Portneuf River and Marsh Creek, Idaho. | 9. Rosendale, N.Y. |
| 3. Atchison, Kans. | 10. Youngstown, Ohio |
| 4. Merriam, Kans. | 11. Scranton, Pa. |
| 5. Osawatomie, Kans. | 12. Narragansett Pier, Rhode Island |
| 6. Frankfort (North Frankfort area), Ky. | 13. Port Arthur and vicinity, Texas |
| 7. Sturgis, Ky. | 14. Vince and Little Vince Bayous, Tex. |

RESERVOIR PROJECTS

- | | |
|----------------------------------|------------------------------|
| 1. Black Rock Reservoir, Conn. | 3. Beltzville Reservoir, Pa. |
| 2. Sucker Brook Reservoir, Conn. | 4. Union City Reservoir, Pa. |

6. *Multiple-purpose projects, including power.*—With the funds requested, work will be continued on 24 multiple-purpose projects with power installations, 3 of which will be completed in 1966. Construction will be initiated on three projects as follows:

- | | |
|---------------------------------------|--|
| 1. West Point Reservoir, Ga. and Ala. | 3. Lower Granite lock and dam, Washington. |
| 2. Libby Reservoir, Mont. | |

A supplemental appropriation under existing legislation will be requested to initiate construction on the Lower Granite project, Washington.

7. *Recreation on completed projects.*—Additional public use facilities will be provided at completed projects to accommodate a rapidly increasing number of visitors.

8. *Small authorized projects.*—The Federal Government constructs or assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of \$400 thousand or less.

9. *Coordination act studies (Fish and Wildlife Service).*—This program provides for detailed studies and reports by the Fish and Wildlife Service to determine the effects on fish and wildlife resources of water-control projects of the Corps of Engineers.

10. *Rehabilitation.*—Rehabilitation work is undertaken on existing projects or parts of projects that have deteriorated to the extent that their usefulness has been impaired. Repair of breakwaters, revetments, and piers will be carried out on 16 navigation projects and stilling basin repairs on 1 multiple purpose project will be made in 1966 under major rehabilitation. Minor rehabilitation, where the total cost of each item is \$400 thousand or less, will be accomplished on two projects.

Under existing legislation, 1965.—Unless appropriate action is taken, the Pacific-Northwest region will be faced with a prime energy deficit by 1971. To help avoid such a situation, and to assist in steady economic expansion, an additional appropriation will be requested to initiate construction of the multipurpose Lower Granite, Wash., project. An immediate start on project construction is necessary if the desired June 1971 completion date is to be realized.

OPERATION AND MAINTENANCE, GENERAL

For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality or other public agency, outside of harbor lines, and serving essential needs of general commerce and navigation; financing the United States share of the cost of operation and maintenance of the remedial works in the Niagara River; activities of the California Debris Commission; administration of laws pertaining to preservation of navigable waters; surveys and charting of northern and north-

western lakes and connecting waters; clearing and straightening channels; and removal of obstructions to navigation; [\$158,676,000] \$172,862,000, to remain available until expended. (16 U.S.C. 661-666, 756; 83 U.S.C. 1, 414, 415, 441-451, 540, 603a, 661, 701, 705; 66 Stat. 596; 72 Stat. 301, 302; Public Works Appropriation Act, 1965.)

¹ Selected resources as of June 30 are as follows:

	1963	1964	1965	1966
Stores.....	180	306	200	200
Unpaid undelivered orders.....	12,837	12,185	10,614	8,711
Advances.....	2			
Total selected resources.....	13,019	12,491	10,814	8,911

This appropriation finances operation and maintenance of existing projects and other related activities.

1. *Navigation projects.*—In 1966 operation and maintenance will be carried out on 229 channel and harbor projects and 31 locks, dams, and canals.

2. *Flood control projects.*—In 1966, 144 flood control reservoirs and 18 local flood protection projects will be operated and maintained. Other completed flood control projects will be inspected to determine the adequacy of maintenance by local interests.

3. *Multiple-purpose projects including power.*—By the end of 1966, 47 multiple-purpose projects with an installed capacity of 9,489,400 kilowatts will be operated and maintained.

4. *Protection of navigation*—Under laws for the protection and preservation of navigable waters, regulations are established and permits are granted for activities and structures affecting navigable waters.

5. *Niagara remedial works.*—Costs of operating and maintaining works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

1. *Executive direction and management.*—The Office, Chief of Engineers, and 10 division offices supervise work decentralized in 37 district offices. One division office and the district offices are financed from other appropriations.

2. *River and Harbor Board.*—The Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers.

3. *Coastal Engineering Research Center.*—The Center plans and conducts research in the field of coastal engineering, develops standards, and reviews technical reports as directed by the Chief of Engineers.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for information on the civil works program.

The Corps of Engineers—Civil is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou Lafourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement by bank stabilization and by dredging a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

1. *General investigations.*—Two flood control studies will be completed, and four will be continued. Basic data subsequently used in planning and designing projects are collected.
