DEPARTMENT OF DEFENSE—MILITARY—Con.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY—Con.

	1965 actual	1966 estimate	1967 estimate
Positions other than permanent:			
Temporary employment	\$1,620,912	\$601,100	\$528,100
Part-time employment	54,555	62,500	63,000
Intermittent employment	168,594	165,600	165,600
Overtime and holiday pay	3,495,228	2,676,800	2,682,100
Nightwork differential	64,997	64,400	64,400
Post differentials and cost-of-living allowance	87,867	71,100	71,000
Total personnel compensation	136,870,539	142,405,000	146,543,000
Deduct amount included above for positions which relate to the proposed 1966 supplemental appropriation		-602,000	
Total personnel compensation adjusted	136,870,539	141,803,000	146,543,000
Salaries and wages in the foregoing schedule are distributed as follows:			
Direct obligations	130,246,539	134,713,000	146,543,000
Reimbursable obligations	6,624,000	7,090,000	7,007,000

PART IV

ANNEXED BUDGETS

EXPLANATION OF ANNEXED BUDGETS

Part IV presents detailed schedules and explanatory statements on seven self-supporting Government agencies and programs which are outside the normal budget process. Like the budgets for the legislative branch and the judiciary, the annexed budgets have not been reviewed by the President but are presented in the amounts submitted by the agencies.

Three agencies (Banks for Cooperatives, Federal Intermediate Credit Banks, and the Federal Deposit Insurance Corporation) have been included in the Government-sponsored enterprise group in the computation of consolidated cash totals for some years, and the net totals for each have been displayed. However, data were reported only for certain debt and investment transactions, rather than for all of their activities, and the information was

obtained informally. The presentation of more complete annexed budgets does not change their handling in the totals.

The other four agencies and programs (Milk Marketing Administration, Comptroller of the Currency, Exchange Stabilization Fund, and the Board of Governors of the Federal Reserve System) are also not included in the administrative budget, and are included only in part in the deposit fund group within the trust fund totals. In part they are outside all traditional figures on Federal finances.

The material in this part is presented in the general format of similar material for public enterprise funds in part I. No appropriation language appears in part IV because action by the Congress is not required.

94 Applicable receipts.....	-12,909	-12,820	-12,820

¹ Administrative fund totals are comprised of 75 separate independent order accounts. The Marketing service fund totals are comprised of 67 separate independent order accounts.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are responsible for carrying out locally the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers, and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks and disbursed directly by the market administrator.

Each milk order is administered locally by a market administrator who is appointed by the Secretary. His staff is employed directly by the market administrator.

The activities conducted in the local office are concerned primarily with monthly computations and public an-

nouncement of class and uniform blend prices, associated butterfat differentials and with examination of handlers records and facilities to verify their reports and payments to producers and in checking weights and tests of producers milk.

The expenses of each local office are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order provides for the expense of disseminating market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and approval of the Consumer and Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers, as the case may be.

Milk sold by regulated handlers supplied about 100 million persons—60% of the total nonfarm population—during calendar year 1964.

The following table gives an indication of the growing role of Federal orders on the marketing of milk over the past few calendar years.

	1960	1961	1962	1963	1964

¹ Balances of selected resources are identified on the statement of financial condition.

The Office of the Comptroller of the Currency, the administrator of national banks, was established by the National Bank Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665). That act provided for the chartering and supervision of a banking system by this Federal agency and thus created the unique American "dual banking system" of Federal- and State-chartered banks.

The administrator of national banks is empowered by law to issue charters to new banking institutions which choose to operate under Federal law. Each approval or disapproval issues only upon a comprehensive field investigation which is subsequently subjected to thorough analysis by an expert staff of attorneys and economists.

The operations of existing banks are subject to the supervision of the Comptroller. A staff of approximately 1,200 national bank examiners conducts a detailed examination of each of nearly 5,000 operating national banks on a regular basis. The end product of these examinations is a determination of the financial condition of national banks, the soundness of their operations, and their compliance with applicable laws and regulations. In addition, the Comptroller must approve all mergers involving national banks as well as applications for new branch offices.

In accordance with statute, the Comptroller of the Currency promulgates regulations and rulings for the guidance of national banks. All laws, regulations, and rulings relating to national banks are published in the "Comptrollers Manual for National Banks" and the "Comptrollers Manual for Representatives in Trusts." both available in the Comptroller's office.

TREASURY DEPARTMENT—Continued**EXCHANGE STABILIZATION FUND—Continued**

into this fund and are available for the purposes thereof, including expenses.

Additional resources for the fund were provided in 1964, when the U.S. Treasury borrowed \$250 million in foreign currencies from the International Monetary Fund and loaned this amount to the Exchange Stabilization Fund. The Fund undertook to sell such currencies for dollars to other International Monetary Fund members. The standby agreement with the International Monetary Fund permits such drawings up to \$500 million.

The principal sources of the Fund's income have been the handling charge imposed on purchases and sales of gold for the account of the Fund, profits on foreign exchange transactions, and interest on investments held by the Fund. The income of the Fund has consistently exceeded its expenses; the cumulative income of the Fund from the time it began operations has been \$217 million and its expenses \$41.4 million, resulting in a net income as of June 30, 1965, of \$175.5 million.

It is not practicable to forecast the transactions of the Fund in gold, foreign currencies, foreign investments, and the like. The budget schedules, therefore, are incomplete for all items other than operating expenses for 1966 and 1967. Administrative expenses will be more than covered by interest on investments in U.S. securities.

Basic legislation.—The Federal Reserve System operates under the provisions of the act of December 23, 1913, known as the Federal Reserve Act (38 Stat. 251), as amended.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from the assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

¹ Balances of selected resources are identified in the statement of financial condition.

The banks for cooperatives, of which there are 13, are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. During 1965, the banks extended credit totaling \$1.3 billion. The funds to finance these loans are obtained from (1) sales of debentures to the public, (2) notes payable, and (3) their own capital. The debentures which the banks issue are not guaranteed by the U.S. Government either as to principal or interest. The banks' capital funds consist of capital stock owned by the U.S. Government, equities of borrowing cooperatives and retained earnings.

The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. At the time the 1955 act was passed the U.S. Government had an investment in the banks of \$150 million. By June 30, 1965, this investment had been reduced to \$52 million while the equities of borrowing cooperatives had reached nearly \$129 million. It is expected that additional repayments of Government capital of \$13,500 thousand and \$7,600 thousand will be made in 1966 and 1967, respectively. On June 30, 1965, the first two banks, Houston and Berkeley, completed the retirement of all Government capital.

All expenses, including administrative costs, are paid from the banks' own resources and thus in no way do they affect the budget of the United States.

The Federal intermediate credit banks, of which there are 12, are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for local financing institutions, such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services. During 1965, the banks extended credit totaling \$4.9 billion.

The banks' lending funds are obtained primarily from the sale of debentures to the public and from their own capital funds. The debentures are not guaranteed by the U.S. Government either as to principal or interest.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks became mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. However, because of the increased credit demands placed upon the Federal intermediate credit banks, it has been necessary for the Government to invest additional capital in the banks in order to keep the debt-to-capital ratios within the 10-to-1 maximum permitted by law. At June 30, 1965, the U.S. Government's investment in the capital stock of the banks was \$123 million and that of private interests was \$69 million.

Public Law No. 89-237 enacted on October 4, 1965, increased the maximum debt to capital ratios of the credit banks to 12 to 1. As a result of this change, it is

expected that the Government will not make any additional investments in the banks' system.

All expenses, including administrative costs, are paid from the banks' own resources and thus in no way affect the budget of the United States.

¹ No provision is made in this report for expenses which might be incurred by reason of additional bank closings after Sept. 30, 1965, because there is no sound basis for predicting which, if any, insured banks will close in the future.

² Balances of selected resources are identified in the statement of financial condition.

In order to protect depositors in insured banks, the Federal Deposit Insurance Corporation is authorized to insure such depositors in the maximum amount of \$10 thousand to examine all insured banks not members of the Federal Reserve System and, in certain situations for insurance purposes, to examine National and State chartered banks which are members of the Federal Reserve System; to participate in the regulation of mergers involving insured banks; and to promulgate and enforce rules and regulations relating to the supervision of insured banks, the withdrawal of deposit insurance, and other regulatory and supervisory matters consistent with its responsibility as insurer.

The income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investments in U.S. Government securities. No funds derived from taxes or Federal appropriations are allocated to or used by the Corporation. There is no

OTHER INDEPENDENT AGENCIES—Continued**FEDERAL DEPOSIT INSURANCE CORPORATION—Con.**

capital stock outstanding. The Corporation is authorized to borrow from the U.S. Treasury and the Secretary of the Treasury is authorized and directed to loan to the Corporation, on such terms as may be fixed by the Corporation and the Secretary, not to exceed \$3 billion outstanding when, in the judgment of the Board of Directors of the Corporation, such funds are required for insurance purposes (see schedule in pt. I of the appendix). No borrowings under this authorization have been made to date and none are anticipated in 1966 or 1967.

The deposit insurance fund, representing the accumulated net income of the Corporation, is reserved for the payment of insured deposits and for the payment of its operating and insurance expenses. The estimates shown for 1966 and 1967 in these statements make no provision for losses or expenses which might be incurred by reason of the closing of any bank after September 30, 1965 (the date on which these reports were prepared) because there is no basis for predicting which, if any, insured banks will close in the future.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

	1965 actual	1966 estimate	1967 estimate
Revenue:			
Interest on U.S. securities.....	105,585	112,133	115,365
Insurance assessments.....	100,987	105,751	111,500
Other.....	15		
Total revenue.....	206,587	217,884	226,865
Expenses:			
Administrative and operating expenses.....	16,723	19,000	21,500
Expenses incurred in protecting depositors in insured banks.....	9,948	1,261	(¹)
Total expenses.....	26,671	19,261	21,500
Analysis of retained earnings (reserved):			
Net income for the year.....	179,916	198,623	205,365
Retained earnings, start of year.....	2,756,494	2,936,410	3,135,033
Retained earnings, end of year.....	2,936,410	3,135,033	3,340,398

¹ No provision is made in this report for expenses which might be incurred by reason of additional bank closings after Sept. 30, 1965 (the date on which this report was prepared), because there is no sound basis for predicting which, if any, insured banks will close in the future.

Financial Condition (in thousands of dollars)
