For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and services as authorized by [section 15 of the Act of August 2, 1946 (15 U.S.C. [55a] §109; \$103,000,000] \$107,014,000, to remain available until expended: *Provided*, That repayment may be made to other Coast Guard appropriations for expenses incurred in support of activities carried out under this appropriation. (14 U.S.C.; 33 U.S.C. 511 et seq.; Treasury Department Appropriation Act, 1967; additional authorizing legislation to be proposed for \$103,214,000.)

This appropriation provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities, and aids to navigation.

Direct program—1. *Vessels*.—A program to replace overage, obsolete, and deteriorated vessels of the Coast Guard will be continued in 1968 with the construction of replacements for one high-endurance cutter and two small cutters to replace patrol vessels. Fixed or floating aids will be constructed to replace lightships at priority locations. Three augmentation vessels planned for construction are two tenders, with associated facilities, for servicing aids to navigation on the Arkansas and lower Mississippi Rivers and an oceanographic cutter. The program also provides for contract design services for a replacement icebreaker. Modernization and improvement of existing facilities includes improvements on icebreakers, rehabilitation of 6 high-endurance cutters, installation of balloon tracking radar on 4 high-endurance cutters, installation of 20 Loran-C receivers and 4 Navy navigation satellite systems on large cutters and icebreakers for the oceanography program.

2. *Aviation facilities*.—Under this activity the program provides for the acquisition of 10 replacement aircraft and 9 helicopters—6 for icebreaker operations and 3 for SAR support. Plans for reconfiguration of medium-range search aircraft will also be developed. In addition the program also calls for the establishment of an air station at Chicago, Ill., and replacement of hangar facilities at the air station in Barbers Point, Hawaii.

3. *Shore stations and navigational aids*.—The program under this activity provides for the establishment of and changes to aids to navigation marking river and harbor improvements effected by the U.S. Corps of Engineers, and other urgent needs. Other projects are included to (a) establish two new stations at Jonesport, Maine, and Sassafras River, Kennedyville, Md.; (b) replace and improve facilities at Fire Island and Alexandria Bay, N.Y., and Wrightsville Beach, N.C.; (c) continue consolidation of units at Governors Island, N.Y.; (d) construct mooring facilities at Panama City, Fla.; (e) make improvements at a Loran station located outside the continental United States; (f) provide housing for Coast Guard personnel and their dependents in areas where living accommodations are inadequate; and (g) facilitate the survey and design of future major construction projects. In

addition improvements will be made in the communications facilities, 12th Coast Guard District, and 10 manned light stations will be converted to automatic operation.

4. *Repair and supply facilities*.—The expansion of support facilities in 1968 includes the consolidation of units at Base, Milwaukee, Wis., and relocation of facilities at Base, Mobile, Ala. Construction of a pier at New London, Conn., is the first step of a project to consolidate two repair facilities, now separately located, at a new and larger base site. Existing facilities at the Coast Guard Yard will be improved with the rehabilitation of the barracks, rearrangement and extension of the fabricating shop. Improvements will be made in the sewage disposal systems at Base, Ketchikan, Alaska, and Coast Guard Yard to meet regulations for control of water pollution.

5. *Training and recruiting facilities*.—The program for improving facilities at the Coast Guard Academy will continue with the construction of an auditorium-recreation hall and renovation of the cadet barracks, Chase Hall. A 300,000-gallon water storage tank will be constructed at Training Center, Cape May, N.J. Other construction includes three barracks—one at Training Center, Alameda, Calif., and two at Reserve Training Center, Yorktown, Va.

6. *Alteration of bridges*.—In its new role as a part of the Department of Transportation the Coast Guard will be required to budget for the Federal Government's share of the cost of altering railroad and public highway bridges to permit free navigation of navigable waters of the United States. In 1968, four railroad bridges located near Morgan City, La. and Chicago, Ill. (Calumet River) will be altered.

91 Expenditures from military pay act supplemental		566	94

This appropriation provides for retired pay of military personnel of the Coast Guard and Coast Guard Reserve, members of the former Lighthouse and Lifesaving Services, and for annuities payable to beneficiaries of retired military personnel under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431-1446).

Members are added to and removed from the rolls each month. The average numbers on the rolls will rise in 1968 and will continue to rise in future years. The actual number on the rolls at the end of 1966 was 11,938 and the number estimated to be on the rolls at the end of 1967 and 1968 is 12,712 and 13,421, respectively. The following tabulation shows the average number of personnel on the rolls during 1966 compared with estimated numbers for 1967 and 1968.

Category	AVERAGE NUMBER		
	1966 actual	1967 estimate	1968 estimate
Enlisted men	6,948	7,586	8,199
Commissioned officers	2,566	2,601	2,619
Warrant officers	1,462	1,534	1,592
Former Lighthouse and Lifesaving Services personnel	546	516	502
Reserve personnel	153	184	217
Total	11,675	12,421	13,129

Under the provisions of the Retired Serviceman's Family Protection Plan, retired Coast Guard military personnel who elect to receive reduced amounts of retired pay may provide for monthly payments to their survivors. Appropriation requirements are reduced by the difference between the amount deducted from retired pay and the

amount paid as survivors' benefits. The liability for future payments is not funded. The analysis of the accumulated deductions is as follows (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
Accumulated deductions, net, start of year.	1,939	2,137	2,353
Current deductions during the year	351	369	369
Payment of survivors' benefits	-153	-153	-153
Accumulated deductions, net, end of year	2,137	2,353	2,569

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law, including repayment to other Coast Guard appropriations for indirect expenses, for regular personnel, or reserve personnel while on active duty, engaged primarily in administration and operation of the reserve program; maintenance and operation of facilities; supplies, equipment, and services; and the maintenance, operation, and repair of aircraft; \$24,031,000: *Provided*, That amounts equal to the obligated balances against the appropriations for "Reserve training" for the two preceding years shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation. (14 U.S.C.; 5 U.S.C. 8334; 10 U.S.C. 262, 1475; 28 U.S.C. 3111; 37 U.S.C. 206, 301(f), 309, 402(b), 415-418, 1002, 1004; Treasury Department Appropriation Act, 1967.)

Note.—Estimate of \$24,535 thousand for activities previously carried under this title has been transferred in the estimate to "Operating expenses." The amounts obligated in 1966 and 1967 are shown in the schedule as comparative transfers.

The Coast Guard supply fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing, commissary provisions, general stores, and technical materials. The fund is financed by reimbursements from sale of goods.

Costs of approximately \$24 million to be incurred under this fund in 1968 are divided 15% for uniform clothing, 56% for commissary provisions, and 29% for general stores and technical materials, including electronics.

Sales are expected to be \$1.9 million more in 1967 than 1966 actual and \$1.2 million more in 1968 than 1967. These increases result from supply support for Coast Guard operation in Vietnam, initial outfitting and future supply support for new ships, support of icebreakers acquired from the Navy, and an increase in aids to navigation material and other technical items stocked.

The cash balance will decrease by approximately \$1.5 million through 1968 due to the purchase of the additional inventory items required for the additional support responsibilities and an expected reduction in current liabilities.

FEDERAL AVIATION ADMINISTRATION

The functions of the Federal Aviation Administration include (a) encouraging and fostering the development of civil aeronautics and air commerce in the United States and abroad; (b) management of the use of navigable airspace and the regulation of both civil and military operations in such airspace; (c) installation and operation of aids to air navigation and traffic control for civil and military aircraft; (d) the conduct of research to develop facilities required to modernize the systems and devices used in assuring safety in aviation; (e) the conduct of medical research relating to the human factors affecting safety in civil aviation; (f) certification as to the competency of airmen and the airworthiness of aircraft; (g) development of standards and rules designed to promote safety; and (h) the administration of grants for airport construction.

General and special funds:

OPERATIONS

For necessary expenses of the Federal Aviation [Agency] Administration, not otherwise provided for, including administrative expenses for research and development and for establishment of air navigation facilities, and carrying out the provisions of the Federal Airport Act; not to exceed \$10,000 for representation allowances and for official entertainment; and purchase and repair of skis and snowshoes; **[\$559,000,000] \$598,400,000: Provided, [That total costs of aviation medicine, including equipment, for the Federal Aviation Agency, whether provided in the foregoing appropriation or elsewhere in this Act, shall not exceed \$6,908,000 or include in excess of 406 positions: Provided further,] That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities. (49 U.S.C. 1301 et seq.; 49 U.S.C. 1151-1160; 50 U.S.C. Appendix 1622(g); Convention on International Civil Aviation, 61 Stat. 1180; Convention on International Recognition of Rights in Aircraft, 4 U.S.C. 1830, 1953; Executive Order 11048 and related regulations (27 F.R. 8887, 8855), and 10 U.S.C. 4655; Independent Offices Appropriation Act, 1967.)**

1. *Operation of traffic control system.*—This activity covers the operation on a daily 24-hour basis of a national system of air traffic management in the United States and its possessions. With the aid of radar, communications, and other facilities, traffic management personnel at 28 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Control towers are operated at 307 major civil airports to guide traffic movements on and in the vicinity of the airports. Some 343 domestic and international flight service stations transmit weather and other information to pilots and relay traffic control data between ground controllers and pilots. Increases in 1968 for operating newly commissioned air traffic control facilities and for greater workload demands are partially offset by improved productivity and other cost reduction measures.

TRENDS IN VOLUME OF AIR TRAFFIC

	Landings and takeoffs at airports with FAA towers (in millions)	Instrument operations at airports with FAA traffic control service (in millions)	General aviation hours flown (in millions)	Revenue passenger miles (in billions)
1962.....	27.4	7.4	14.0	42.5
1963.....	29.2	7.8	14.8	45.9
1964.....	32.9	8.7	15.5	54.2
1965.....	35.6	9.6	16.2	62.6
1966.....	41.2	11.0	17.5	76.4
1967 estimate.....	49.1	12.0	19.0	87.5
1968 estimate.....	55.7	13.5	20.5	98.4

2. *Installation and materiel service.*—This activity covers the direction and engineering services related to the establishment and improvement of facilities and equipments in the traffic control system; procurement, contracting and materiel management programs; supply support and leased communications services for the traffic

control system; and supply support for agency aircraft except for aircraft related to research and development programs. Increases in 1968 are to provide supply support and leased communications services for air traffic control and air navigation facilities.

3. *Maintenance of traffic control system.*—This activity covers the technical operation and maintenance of a national network of air navigation and traffic control aids in the United States and its possessions. Increases in 1968 are for maintenance of newly commissioned air traffic control and navigation aids procured and installed with funds appropriated under "Facilities and equipment," and full-year cost of facilities and services operated on a part-year basis in 1967. These increases are offset substantially by savings resulting from the discontinuance of nonessential facilities, operational improvements, and staffing reductions to be achieved through continued efforts toward increased productivity and more efficient manpower utilization.

4. *Administration of flight standards program.*—This activity covers the establishment and enforcement of the civil air regulations which are designed to assure the high standards of safety in aviation. Inspections are made and certificates issued for aircraft, airmen, aircraft operators, and air agencies that meet safety or competency requirements. Facility flight inspection functions and management and maintenance of agency aircraft are also included in this activity. Fees will be established to recover an appropriate part of the costs incurred in issuing certificates and permits.

5. *Administration of medical programs.*—This activity covers the development of regulations governing the physical and mental fitness of airmen and other persons whose health affects safety in flight; the development and supervision of a health and medical program for agency personnel; the administration of an aviation medical research program, the project costs of which are financed under Research and development; and the operation of the Civil Aeromedical Research Institute building. Fees will be established to recover an appropriate part of the costs incurred in issuing certificates.

6. *Research direction.*—This activity covers (a) the planning, direction, and evaluation of the research and development program, the direct project costs of which are financed under the Research and development appropriation; and (b) related administrative support for the operation of the National Aviation Facilities Experimental Center at Atlantic City, N.J.

7. *Administration of airports program.*—This activity includes costs of preparing the annual National airport plan; development of airport planning, design, and construction standards; furnishing of planning and engineering advisory services; administration of the Federal-aid airport program; assuring compliance of public agencies with the provisions of agreements relating to airports; and promoting airport safety.

90 Expenditures.....	62,449	54,000	48,300

Under this appropriation, the Federal airways system is being improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs such as aircraft for facility flight inspection and experimental facilities for the research and development program. The 1968 estimate provides for continuation of major efforts, already underway, to automate the air traffic control system including the first of a new type automated traffic control facility for large multi-airport metropolitan areas. Operating costs of facilities procured under this appropriation are financed by the appropriation entitled "Operations."

1. *Air route traffic control centers.*—(a) *Long-range radar* provides FAA air traffic controllers with information on aircraft positions at distances up to 185 miles. (b) *Automation equipment* covers computers and other devices which aid controllers in handling en route air traffic. (c) *Other center facilities* covers the installation of equipment to provide communications and related services.

2. *Airport traffic control towers.*—(a) *Terminal area radar* aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 60 miles. (b) *Other tower facilities* cover the establishment, improvement, and relocation of airport traffic control tower facilities. (c) *Terminal area automation* covers computers and other devices which aid controllers in handling terminal air traffic.

3. *Flight service stations.*—(a) *Domestic flight service* stations and associated facilities provide flight assistance service to pilots. (b) *International flight service* stations provide long-distance communications for transoceanic flights.

4. *Air navigation facilities.*—(a) Very high frequency omnidirectional radio ranges equipped with tactical air

FEDERAL AVIATION ADMINISTRATION—Con.

General and special funds—Continued

FACILITIES AND EQUIPMENT—Continued

navigation capabilities (*VORTAC*) are standard short-range navigation aids used to define airways and air routes and to provide distance and direction information to pilots. (b) *Low and medium frequency facilities* include radio beacons and ranges which provide pilots with direction and weather information. (c) *Instrument landing systems* provide pilots with direction, distance, and glide slope information necessary for making safe approaches to runways under poor visibility conditions. (d) *Visual aids* consist primarily of lighting aids which also assist the pilot in making final approaches to airport runways particularly in areas where terrain or other environmental factors cause potential hazards to safe landings. (e) *Intermediate fields* are emergency landing areas provided on a few air routes where public airports are not available.

5. *Housing, utilities, and miscellaneous facilities.*—This section includes general support facilities and items not covered elsewhere.

6. *Aircraft and related equipment.*—(a) *Facility flight inspection* covers aircraft and avionics equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air. (b) *Training* covers aircraft used to provide flight training to agency personnel and to maintain the proficiency of operations inspectors. (c) *Multipurpose aircraft* are used to provide logistics support for remote facilities, for use by agency officials, and for other general-purpose missions.

7. *Research, test, and evaluation facilities.*—This activity provides for the construction and improvement of plant and facilities at the National Aviation Facilities Experimental Center in Atlantic City, N.J. It also covers the procurement of capital items of equipment for use in the research and development program.

The Federal Aviation Administration carries out a program to improve and modernize the national system of aviation facilities through the development of new systems, procedures, and devices. The agency also carries out a program of medical research to aid in the development of rules and regulations governing the certification of airmen and to assure aviation safety.

Research and development is conducted through contracts with qualified firms, universities, and individuals, or by agency staff or other Government agencies. The data, procedures, or equipment resulting from this program are tested and evaluated to determine their potential value in meeting a variety of needs of the overall national airspace system.

Supervision and administrative support costs for the research and development program financed by this appropriation are covered by the Operations appropriation. Costs of acquiring experimental facilities and general-purpose equipment for the research program are included in the Facilities and equipment appropriation.

1. *Air traffic control.*—This provides for improving the airways system by applying existing technology to air traffic control problems to effect inservice improvements as required, by system modernization where necessary, and by long-range research and development to meet future needs. Studies of present airways system operations and future requirements and work in the fields of data processing and display, data acquisition, and communications are included.

2. *Navigation.*—This provides for modernization, expansion, and improvements of the common system navigation facilities in the United States and in overseas areas where international agreements require U.S. participation. Work in the fields of landing systems, short and long distance navigation, and flight inspection is included.

3. *Aviation weather.*—This provides for a program, coordinated with the Departments of Defense and Commerce, to develop devices and improve techniques for the communication and display of weather information to aviation users. The effects of weather on air traffic management techniques and systems are also analyzed.

4. *Aircraft safety.*—This activity provides for a program, coordinated with the Department of Defense and the National Aeronautics and Space Administration, to study, develop, and evaluate devices to enhance the safety of civil aircraft by providing practical solutions to critical safety problems and a sound basis for airworthiness standards and safety regulations.

5. *Aviation medicine.*—This provides for conducting an aeromedical research effort directed toward the identification and elimination of those physical, physiological, and psychological factors which may jeopardize safety in flight.

FEDERAL AVIATION ADMINISTRATION—Con.

General and special funds—Continued

OPERATION AND MAINTENANCE, [WASHINGTON NATIONAL AIRPORT] NATIONAL CAPITAL AIRPORTS—Continued

This appropriation finances management, operations, maintenance, and capital outlay costs for equipment and maintenance projects at the federally owned Washington National and Dulles International Airports, which serve the National Capital area. The 1968 request reflects a slight reduction in the level of facility maintenance and servicing and staffing requirements. These decreases are largely at the Dulles International Airport.

The operation of the airports is conducted on a business basis with revenues derived from landing fees, concession activity, and lease arrangements deposited as receipts in the general fund of the Treasury. The direct operating costs and capital outlays are financed by direct appropriation.

The following statements reflect financial results of the total operations at the two airports. These statements include computation of unfunded depreciation and interest on a basis comparable to that used by other major commercial airports, and total actual revenues together with amounts representing the value of services furnished other Government agencies for which no collections are made. The unrealized revenue includes landing fees for Government aircraft, and rental charges for offices and hangar space used by Government agencies.

The Washington National Airport is operating at a profit while Dulles International Airport is operating at a deficit. This deficit at Dulles International Airport is expected because of the low volume of traffic anticipated during the early years of the airport's growth. While the combined operation of the two airports show a deficit, rate structures for landing fees, concession activity, etc., are established on a basis that will assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during each airport's useful life.

CONSTRUCTION, NATIONAL CAPITAL AIRPORTS

For necessary expenses for construction at the federally owned civil airports in the vicinity of the District of Columbia, \$160,000, to remain available until expended: Provided, That the unexpended balances of the appropriations for "Construction, Dulles International Airport" and "Construction, Washington National Airport" shall be merged with this appropriation. (54 Stat. 686; 61 Stat. 94; 64 Stat. 770; 72 Stat. 354; 72 Stat. 731; Independent Offices Appropriation Act, 1967.)

Note.—Estimate is for activities previously carried under the appropriations "Construction, Washington National Airport," and "Construction, Dulles International Airport." The amounts obligated in 1966 and 1967 are shown in the schedule as comparative transfers.

74 Obligated balance, end of year.....					-2,743				
90 Expenditures.....					4,000				

¹ Excludes \$86,483 capitalized through June 30, 1965.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$1,818 thousand; 1966, \$1,902 thousand; 1967, \$3,768 thousand; 1968, \$2,457 thousand.

This appropriation finances construction of major improvements and expansion of facilities at Washington National Airport and Dulles International Airport. Projects are undertaken whenever necessary to insure the capability of these airports to adequately, safely, and conveniently meet air traffic needs of the public.

The 1968 request provides for an expansion of the equipment and bulk storage building at the Dulles International Airport.

90 Expenditures	53,989	54,000	59,000

Under the Federal Airport Act, grants are made to public agencies to aid the development and improvement of public airports. These grants generally cover 50% of project costs and are limited to facilities deemed essential for safe operation of aircraft at airports. Contract authorizations were provided for this program through 1961. These authorizations together with the appropriations to liquidate obligations incurred under the authorizations are reflected in the schedules for Grants-in-aid for airports.

Public Law 89-647 amended the Federal Airport Act further to authorize additional appropriations of \$75 million for each of the years 1968, 1969, and 1970. An appropriation of \$75 million is being proposed in this budget for 1969 to assure local airport operators sufficient time for advance planning of future airport improvements.

This account covers appropriations authorized under that act as well as appropriations of prior years, beginning with 1962. The following table summarizes activity under both the contract authority and that part of the program which is funded by direct appropriations (dollars in millions):

	1947 through 1966 actual	1967 estimate	1968 estimate
Airports having projects in program	2,117	375	380
Total projects in program	6,664	375	380

74 Obligated balance, end of year	-18,979	-93,679	-92,048
90 Expenditures	99,244	170,000	90,000

This program is to assist the aviation industry in the development of a competitive commercial supersonic transport aircraft. The aim is to produce an aircraft that will fly nearly three times the speed of sound and will be safe and profitable in airline service.

The national supersonic transport program has progressed satisfactorily. An 18-month detail design competition was begun in July 1965, and is now complete.

A decision to proceed with prototype construction is under study. Recommendations for the program in 1968 will be transmitted to the Congress at a later date.

FEDERAL AVIATION ADMINISTRATION—Con.

Public enterprise funds—Continued

GENERAL PROVISIONS

During the current fiscal year applicable appropriations to the Federal Aviation [Agency] Administration shall be available for the Federal Aviation [Agency] Administration to conduct the activities specified in the Act of October 26, 1949, 63 Stat. 907, as amended [(5 U.S.C. 596a)], under determinations and regulations by the Administrator of the Federal Aviation [Agency] Administration; maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by [the Act of September 1, 1954, as amended] law (5 U.S.C. [2131] 5901; 80 Stat. 299).

Funds appropriated under this Act for expenditure by the Federal Aviation [Agency] Administration may be expended for reimbursement of other Federal agencies for expenses incurred, on behalf of the Federal Aviation [Agency] Administration, in the settlement of claims for damages resulting from sonic boom in connection with research conducted as part of the civil supersonic aircraft development. (5 U.S.C. 596a; 5 U.S.C. 2131; Independent Offices Appropriation Act, 1967.)

ALLOCATIONS RECEIVED FROM OTHER AGENCIES

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
Funds appropriated to the President, "Transitional grants to Alaska."
Department of the Interior, "Construction, National Park Service."
Department of Commerce:
"Development facilities grants, Economic Development Administration."
"Supplemental grants-in-aid, Office of Appalachian Assistance."

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$25,292 thousand; 1966, \$27,471 thousand; 1967, \$29,710 thousand; 1968, \$29,710 thousand.

² Reimbursement from non-Federal sources are derived from State agencies (23 U.S.C. 308 (a-b)).

Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of \$33 million are available for each of the years 1968 and 1969. Funds can be obligated in the year prior to the year for which authorized.

The 1968 estimate of \$33 million finances the balance of the 1966 authorization and \$26,050 thousand of the 1967 authorization provided by the Federal-Aid Highway Act of 1964.

Legislation will be proposed to finance this program from the Highway trust fund, as indicated on page 786.

Actual and estimated progress of the program is summarized in the following table (dollars in thousands):

Fiscal year	Annual authorization ¹	Miles completed	Unobligated balance, end of year	Obligations for projects	Expenditures
1959.....	\$33,000	429	\$38,490	\$32,250	\$27,798
1960.....	33,000	481	43,733	26,879	27,812
1961.....	33,000	469	43,478	31,949	30,900
1962.....	33,000	404	33,994	41,100	29,955
1963.....	33,000	478	36,602	28,926	38,794
1964.....	33,000	492	38,114	30,326	33,277
1965.....	33,000	419	41,623	28,057	32,500
1966.....	33,000	307	42,252	31,246	31,304
1967.....	33,000	340	39,950	33,925	33,062
1968.....	33,000	330	39,950	31,623	33,000

¹ Each fiscal year authorization becomes available for obligation not later than January 1 in the preceding year.

Highways are constructed and improved through Public Lands in those States with large areas of such lands. Funds for this program are available a year in advance of the year for which authorized. Contract authorizations were made available by the Federal-Aid Highway Act of 1966 for the years 1968 and 1969 in the amounts of \$14 million and \$16 million, respectively.

Legislation will be proposed to finance this program from the Highway trust fund.

The 1968 appropriation estimate finances the balance of the 1966 authorization and \$4.7 million of the 1967 authorization.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$7,890 thousand; 1966, \$7,002 thousand; 1967, \$7,002 thousand; 1968, \$7,002 thousand.

² Reimbursements from non-Federal sources are derived from foreign countries (23 U.S.C. 308(a-b)).

The Central American Section of the Inter-American Highway, comprising 1,555 miles, is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica and Panama. These Republics pay one-third of the cost of highways through their countries, and have assumed responsibility for future maintenance.

The Federal-Aid Highway Act of 1962 (76 Stat. 1146) authorized an additional appropriation of \$32 million, of which \$25 million has been appropriated, to complete the highway to acceptable standards. The remainder of \$7 million will be required in 1968 to complete the commitments of the United States to the Central American Republics.

The following table reflects the amount of work, by countries, provided by the \$32 million authorization (in thousands of dollars):

	Fiscal years

CHAMIZAL MEMORIAL HIGHWAY

For necessary expenses to carry out the provisions of the Act of November 8, 1966 (Public Law 89-795), \$3,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 21-25-0244-0-1-503	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Construction of a border highway in the city of El Paso, Tex. (program cost, funded—obligations) (object class 41.0)			8,000
Financing:			
40 New obligational authority (appropriation)			8,000
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures)			8,000
74 Obligated balance, end of year			-4,000
90 Expenditures			4,000

An act, approved November 8, 1966, authorizes the Secretary of Transportation to (1) construct a border highway in the city of El Paso, Tex., between the approximate point at the beginning of the rectified boundary channel, two blocks west of Santa Fe Street in El Paso, thence along the international boundary to the International Bridge at Zaragoza Road—about 12½ miles east and (2) acquire lands necessary for the border highway in accordance with the approved plans, through the U.S. Commissioner, International Boundary and Water Commission.

An authorization of \$8 million was approved for carrying out the provision of this act.

REPAIR AND RECONSTRUCTION OF HIGHWAYS

For repayment to the Highway trust fund, \$15,097,772, which sum is composed of \$1,089,111 for the increased expenditures made for the repair and reconstruction of highways in Alaska, as authorized by section 3 of the 1964 Amendments to the Alaska Omnibus Act (78 Stat. 505), and \$14,008,661 for the repair and reconstruction of highways, roads, and trails, as authorized by section 2 of the Pacific Northwest Disaster Relief Act of 1965 (79 Stat. 131).

Program and Financing (in thousands of dollars)

40 New obligational authority (appropriation)			15,098
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures)			15,098
90 Expenditures			15,098

The "1964 Amendments to the Alaska Omnibus Act" increased the Federal share payable from 50% to 94.9% for the repair and reconstruction of areas damaged by the earthquake of March 1964 and subsequent seismic waves.

The "Pacific Northwest Disaster Act of 1965" provided an additional \$50 million authorization for 1965 and an additional \$20 million authorization for 1966.

Costs are originally incurred for these programs under the "Federal-aid highways (trust fund)" appropriation. This appropriation will repay the Highway trust fund for actual costs incurred through June 30, 1966.

Proposed for separate transmittal:

The Highway Revenue Act of 1956, as amended, provides for the transfer from the general fund to the highway trust fund of revenue from the gasoline tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, annual appropriations are authorized from this trust fund to meet expenditures for Federal-aid highways. Legislation is being proposed to finance the forest and public lands highway programs from the trust fund.

The status of the fund is as follows (in thousands of dollars):

Under proposed legislation, 1968.—Proposals will be made to increase receipts to the Highway trust fund by providing heavy vehicle equalization taxes. The \$231 million produced by these revenues will be partially offset by a \$12 million decrease in Highway trust fund receipts due to proposed retention in the General fund of aviation gas taxes currently deposited in the Highway trust fund.

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

(Trust fund)

Necessary expenses of administration and research (not to exceed \$56,000,000) including maintenance of a National Register of Revoked Motor Vehicle Operators' Licenses, as authorized by law (74 Stat. 526), and purchase of one passenger motor vehicle for replacement only \$61,265,000, shall be paid, in accordance with law, from appropriations made available by this Act to the Bureau of Public Roads and from advances and reimbursements received by the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative and research expenses

pursuant to the provisions of title 23, United States Code, section 104(a), \$100,000 shall be available for carrying out the provisions of title 23, United States Code, section 309. (23 U.S.C. 303, 307; Department of Commerce Appropriation Act, 1967.)

Note.—Excludes funds for National Driver Register to be provided under "Traffic and highway safety programs." Department of Transportation.

Program and Financing (in thousands of dollars)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$2,915 thousand; 1966, \$4,418 thousand; 1967, \$4,418 thousand; 1968, \$4,418 thousand.

Expenses for administration of the Federal-aid highway program and for highway research by the Bureau of Public Roads are financed by deductions from Federal-aid authorizations. Administrative services for other programs of the Bureau and for road construction programs of other Federal agencies are initially financed from this activity, and reimbursements are collected from these programs. This limitation does not cover administrative expenses of highway beautification, which are handled by a separate appropriation. The major increase in 1968 provides for the continuation of contract research and planning programs and the establishment of a program to improve traffic operations. Nominal staff increases are provided with particular emphasis in the area of urban transportation.

1. Administration.—The limitation covers work directly relating to highway construction projects plus administrative support for all Bureau programs. The work includes route location and right-of-way operations; the developments of policies and procedures for highway engineering and design; engineering surveillance of construction and maintenance activities; administration of cooperative projects with foreign countries; the audit of State claims; reviews of highway department programs; and investigation of alleged fraud, land speculation, construction irregularities, and other violations of laws and regulations.

2. Traffic operation.—Activities designed to reduce highway hazards in both new and existing highways, and to intensify application of modern traffic engineering

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES—continued

(Trust fund)—Continued

knowledge and principles toward the aim of maximum utilization of existing highway facilities through increased capacity, but excluding traffic operations research, are financed under this activity.

3. *Research and planning.*—Direct and contract research and development relating mainly to traffic operations through improved highways and new construction and control systems; optimizing flow on city streets; improving operating conditions on rural highways; and social impact of highways are carried on. Current and long-range planning and programing is undertaken with special emphasis on problems in urbanized areas.

Unfunded balance, end of year.....	-8,800,577	-9,282,177	-10,359,177
Transfer from "Highway trust fund" to liquidate contract authorization.....	3,898,400	3,968,400	3,773,000

Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided in the Federal-Aid Highway Act of 1956 and subsequent highway legislation to cover 90% of the costs of completing the 41,000-mile National System of Interstate and Defense Highways and to match State funds on a 50-50 basis for the primary, secondary, and urban programs. The Federal share of project costs is increased in those States with large areas of public domain. Payments to the States for work done are made out of the Highway trust fund, into which are deposited certain

percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers, truck use, truck parts and accessories, and on lubricating oil used in highway vehicles.

The Federal-Aid Highway Act of 1961 authorized additional appropriations for the Interstate program, and also provided increased revenues to finance these increased authorizations. The Federal-Aid Highway Act of 1966 provided \$1 billion for each of the years 1968 and 1969 to continue the Federal-aid primary, secondary, and urban programs, and provided increased authorization for the Interstate System for 1968-72, inclusive. All authorizations are available for use in the year prior to the year for which authorized.

A revised estimate of the cost of completing the Interstate System was submitted to the first session of the 89th Congress. It is now estimated that the Federal share of the cost will be \$42 billion, which is \$5 billion more than previously estimated. Congress has approved a \$3.4 billion authorization for 1968 which is \$400 million above the authorization for that year as provided by the 1961 Act. Although estimated revenues accruing to the trust fund under present tax rates would be sufficient to cover costs under the previous estimate, additional revenue will be necessary to meet the cost increase with a minimum of slippage in the scheduled completion date.

As of October 1, 1966, nearly 22,150 miles of the 41,000-mile Interstate System were open to traffic. Approximately 84% (18,474 miles) was built or improved under the Federal-aid Interstate program, most of it under the 90% Federal, 10% State matching program launched in 1956. Toll roads, bridges, and tunnels incorporated in the system totaled 2,305 miles. In addition to the sections open to traffic, 6,382 miles were under construction with Interstate funds, and engineering and right-of-way acquisition was in progress on another 10,544 miles. Thus, some form of work was underway or completed on 39,067 miles of the 41,000-mile system—about 95% of the total system mileage.

Construction projects involving 203,460 miles in the regular Federal-aid program (primary, secondary, and urban) have been completed since July 1, 1956, at a total cost of \$15.97 billion, and contracts involving 18,821 miles at a cost of \$3.13 billion were authorized or underway on October 1, 1966. In addition, \$1.11 billion of engineering and right-of-way acquisition work had been completed and \$796 million was underway.

Actual and estimated progress of Federal-aid programs are summarized in the following table:

PAYMENTS UNDER CONTRACT AUTHORIZATION

[In thousands of dollars]

Fiscal year	Contract authorization ¹	Unobligated contract authorization, end of year	Federal payments	Projects approved		
				Number	Total cost	Federal share
1956.....	2,000,000	1,939,236	740,343	6,650	1,695,808	885,000

FOREST AND PUBLIC LANDS HIGHWAYS (TRUST FUND)

Under proposed legislation, 1968.—Legislation will be proposed to transfer financing of the forest and public lands highway programs from the general fund to the Highway trust fund. The highways are similar in character and use to Federal-aid highways and should logically be financed in the same manner as the regular Federal-aid program.

Contract authorization			380,000
Unfunded balance, end of year			-319,125
Transfer from "Beauty-Safety trust fund" to liquidate contract authorization			60,875

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$27,059 thousand.

Under proposed legislation, 1968.—Legislation will be proposed to provide contract authorization in 1968 for the next 2 years; in addition, the traffic and highway safety programs will be financed from the Beauty-Safety trust fund. Revenue from the automobile excise tax will be transferred to the trust fund for this purpose. These programs benefit the highway user and should be financed with highway user charge revenues.

The legislation when enacted will provide for the continuation of the following programs in fiscal year 1968 that were conducted during 1966 and 1967 as authorized by the Highway Beautification Act of 1965:

1. *Landscaping and scenic enhancement.*—Grants-in-aid for landscape and roadside development.

2. *Control of outdoor advertising and junkyards.*—Control of outdoor advertising and junkyards along interstate and primary highways will be accomplished by (1) compensating sign and property owners for the removal

of billboards, (2) removing and relocating junkyards, and (3) screening other junkyards.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of parent appropriations as follows:

- Agriculture: Forest Service, "Forest roads and trails (liquidation of contract authorization)."
- Commerce:
 - Economic Development Administration:
 - "Grants for local development districts and for research and demonstration."
 - "Appalachian development highway system."
- Defense—Military:
 - Air Force: "Military construction."
 - Army: "Military construction."
 - Navy: "Military construction."
 - Naval Reserve Forces: "Military construction."
- Interior:
 - Bureau of Land Management:
 - "Construction and maintenance."
 - "Expenses, Public lands administration act."
 - "Oregon and California grant lands."
 - "Public lands development, roads and trails (liquidation of contract authorization)."
 - Bureau of Indian Affairs: "Road construction (liquidation of contract authorization)."
 - Bureau of Fisheries and Wildlife: "Construction."
 - National Park Service: "Construction (liquidation of contract authorization)."
 - Bureau of Reclamation: "Construction of recreational and fish and wildlife facilities."
- State: "Rama Road, Nicaragua."
- Transportation: National Highway Safety Bureau, "Traffic and highway safety programs."
- Federal Aviation Agency: "Construction, Washington national airport."
- General Services Administration: "Repair and improvement of public buildings."
- National Aeronautics and Space Administration:
 - "Construction and facilities."
 - "Research, development, and operations."

NATIONAL HIGHWAY SAFETY BUREAU

General and special funds:

TRAFFIC AND HIGHWAY SAFETY PROGRAMS

For expenses necessary to carry out the provisions of the National Traffic and Motor Vehicle Safety Act of 1966, and the Highway Safety Act of 1966, \$10,000,000 discharge the functions of the Secretary with respect to traffic, highway safety, and motor carrier safety, including services as authorized by 5 U.S.C. 3109, \$32,555,000. (Department of Transportation Act (80 Stat. 931) sections 4(b)(3); 4(c), (d), (e); 6(e), (C), (D); Independent Offices Appropriation Act, 1967; Department of Commerce Appropriation Act, 1967.)

Note.—Includes \$2,131 thousand for activities previously carried under "Limitation on general administrative expenses," Bureau of Public Roads and "Salaries and expenses," Interstate Commerce Commission.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1966, \$0; 1967, \$3,670 thousand; 1968, \$14,705 thousand.

1-2. *Motor vehicle and tire safety standards.*—These funds will be used to continue development of motor vehicle and tire safety standards and of the procedures for evaluating and assuring compliance. Such standards are to be issued on or before January 31, 1968, and periodically thereafter as results of Federal safety research and development programs become available.

3. *Research and test facility.*—These funds will be required to continue and complete the study, started in 1967, on the need for a facility or facilities to conduct research, development, and testing in traffic safety. The Secretary is required to submit a report to the Congress not later than December 31, 1967, covering such matters as: (1) an inventory of existing capabilities, equipment, and facilities which could be used by the Secretary in carrying out this research, development, and testing; (2) recommendations for sites; (3) preliminary plans, specifications, and drawings; and (4) estimated costs of the recommended sites, facilities, and equipment.

4. *Highway safety research and development.*—These funds are required to expand the highway safety research and development activities of the Federal Government. The funds will be used to conduct comprehensive traffic safety research, primarily for the development of technically sound performance standards for State and community traffic safety programs; to initiate training and education programs to relieve the critical shortage of traffic safety manpower; and to initiate demonstration projects that will speed the implementation of new safety techniques into practice.

5. *Administration of State and community programs.*—Funds are advanced to this account to administer the State and community highway safety programs authorized by 23 U.S.C. 402, as added by the Highway Safety Act of 1966.

FEDERAL HIGHWAY ADMINISTRATION—Con.

NATIONAL HIGHWAY SAFETY BUREAU—Continued

General and special funds—Continued

TRAFFIC AND HIGHWAY SAFETY PROGRAMS—continued

6. *National driver register.*—The Vehicle and Traffic Safety Act of 1966 expanded the scope of the National Driver Register, previously maintained by the Bureau of Public Roads, to include license withdrawals and denials for a wider variety of offenses than had previously been covered. These funds will be used to maintain the driver register in the National Highway Safety Bureau as authorized by the Act.

7. *Motor carrier safety.*—The Department of Transportation Act (80 Stat. 931) transfers to the Secretary from the Interstate Commerce Commission the function of enforcing statutes and regulations concerning safety of operation and standards of equipment and hours of service of employees of motor carriers, and of investigating safety compliance records of applicants seeking operating authority from the Interstate Commerce Commission.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders 1965, \$0; 1966, \$8,633 thousand; 1967, \$21,002 thousand; 1968, \$16,978 thousand.

Public Law 89-220, enacted on September 30, 1965, authorizes a program of research and development in high-speed ground transportation, and demonstrations in rail passenger transportation. The program includes research on materials, aerodynamics, vehicle power and control, and guideways. Travel needs and preferences are being analyzed and performance and costs compared.

1. *Research and development.*—This provides for research testing on new systems, components and techniques.

2. *Demonstrations.*—Demonstrations of improved rail service will be conducted in the Northeast Corridor to measure and evaluate public reaction and acceptance of such service.

3. *Administration.*—This activity covers costs of administering the program.

Estimates for the national transportation statistics program have been transferred to "Other transportation functions."

¹ Balances of selected resources are identified on the statement of financial condition.

The Alaska Railroad is authorized to perform generally all the usual duties of a common carrier by railroad so as to best aid in the development of agricultural, mineral, and other resources of Alaska, the settlement of public lands, and in the national defense effort (48 U.S.C. 301-308). The railroad's main line extends 470.3 miles from Seward to Fairbanks, and 12.4 miles from Whittier to Portage Junction. There are also 194.8 miles of branch lines, passing and spur tracks, and yards. Finances are obtained through the Alaska Railroad revolving fund from revenues of the transportation service and other receipts. Except for the appropriations for disaster recovery totaling \$25.4 million, it has not been necessary to seek direct appropriations since 1956.

Budget program.—There are no significant changes planned for 1968. The operation and maintenance rail line program is expected to remain at a level within estimated revenues. Proposed capital improvements for the year are purposely of modest proportions. The major activity of the railroad is the transportation service; the principal supporting services are maintenance of way and structures and maintenance of equipment. Lease of real properties, and riverboats and related facilities round out the budget program of the railroad.

Financing.—No appropriation is being requested for 1968. It is estimated that at the end of the budget year there will be a Treasury balance of \$6,101 thousand of which \$5,051 thousand will be unobligated.

Operating results.—Based upon the present revenue outlook and forecasts of operating expenses, a deficit of \$200 thousand is expected in 1967; 1968 should produce an operating profit of \$100 thousand.

¹ Balances of selected resources are identified on the statement of financial condition.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the St. Lawrence Seaway within the territorial limits of the United States (33 U.S.C. 981). The seaway has been constructed and is being operated and maintained jointly by the Saint Lawrence Seaway Development Corporation and The St. Lawrence Seaway Authority of Canada, in conjunction with the related power development works provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario.

Operating results.—The Corporation is self-supporting through tolls assessed shippers using the seaway facilities. All operating costs are paid from toll revenues and net operating income returned to the Treasury in payment of interest and principal. Any interest charges not earned will be deferred for later repayment in accordance with an agreement with the Treasury Department.

For 1968, the Corporation's total revenue is estimated at \$7.6 million to be applied in the following order and priority:

(1) To pay estimated operating expenses for 1968 of \$2 million, consisting of administrative expenses of \$0.5 million (subject to congressional limitation) and \$1.5 million for operation of locks and canals, control of traffic, and related maintenance of the facilities.

(2) To return \$5.5 million net operating income to the U.S. Treasury in payment of interest on borrowings. This payment is estimated to be \$0.4 million more than the interest charges on borrowings estimated at \$5.1 million for 1968. This amount will be applied to interest deferred in prior years.

Capital outlay.—The Corporation's seaway and related facilities consist of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the St. Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The total cost of the U.S. share of the seaway is estimated at \$131.6 million. Work in place at the end of 1967 is estimated at \$131.5 million. The 1968 program includes minor improvements and additions to the navigation and related facilities, and is estimated at \$0.1 million.

Financing.—The Corporation has authority to borrow \$140 million from the Treasury for financing the costs of the seaway and to provide for working capital and claims, of which \$125.2 million will have been used by the end of 1967. Interest accrued during the construction phase prior to the opening in the spring of 1959 amounting to

\$6.7 million is not charged against the borrowing authority limitation. This interest is included in the seaway toll rate base.

Tolls review.—The review of the Saint Lawrence Seaway tariff of tolls has been completed by the United States and Canadian seaway entities, and reports, including recommendations as to the sufficiency of authorized tolls to meet statutory requirements, have been submitted to their respective Governments. Negotiations between the United States and Canadian Governments are now scheduled to determine acceptable toll levels on the St. Lawrence Seaway.

The Department of Transportation Act (80 Stat. 931) provides for the transfer to the new Department of some functions currently performed by other agencies. Pending organization of the Department, estimates are provided here for the following functions: Office of the Under Secretary of Commerce for Transportation, including the Office of Emergency Transportation and transportation research and statistics; supporting staff from General Administration, Department of Commerce; the Great Lakes Pilotage Administration; the Bureau of Safety and supporting staff, Civil Aeronautics Board; railroad safety, explosives and other dangerous articles, and supporting staff, Interstate Commerce Commission; and functions of the Corps of Engineers, U.S. Army, pertaining to bridges over navigable waterways, establishment of anchorages and prevention of oil pollution.

Transferred amounts and support from other departmental components will be available in 1967 to finance the Office of the Secretary of Transportation and other new organizational units. Request will be made later for 1968 funds for these functions when organization and staffing plans are completed.

This corporation was abolished October 4, 1961, by Public Law 87-353 (75 Stat. 773), and its remaining assets were transferred to the Secretary of the Treasury.

The corporation has been in liquidation for several years, its only remaining activities being the collection of non-interest-bearing notes sold to the Federal land banks on June 30, 1955, paying the proceeds as dividends to the Treasury, and the payment of outstanding bonds payable upon presentation by rightful owners.

BUREAU OF ACCOUNTS—Continued**General and special funds—Continued****SALARIES AND EXPENSES—Continued**

The Bureau maintains the central revenue, appropriation, and expenditure accounts; disburses for virtually all civilian Federal agencies; prepares the central financial reports of the Government; and performs other fiscal functions.

1. *Central disbursing operations.*—Payments are made, through 11 regional offices, for civilian Federal agencies, except the Post Office Department, the U.S. marshals, and certain Government corporations. Savings bonds are also issued for Federal employees under the payroll savings plan.

The work volume and productivity relating to this activity carried out by the Division of Disbursement follow (in thousands):

	1966 actual		1967 estimate	1968 estimate
	Including nonrecurring items	Excluding nonrecurring items		
Work volume.....	391,865	374,565	390,167	413,297
Productivity per employee.....	350	335	347	372

The nonrecurring items represent the one-time checks issued during 1966 for the retroactive portion of increased benefit payments resulting from the Social Security Amendments Act of 1965.

2. *Depository receipt operations.*—Employers and certain business enterprises deposit monthly, with designated banks, excise, withheld income, railroad retirement, and withheld social security taxes, to the credit of the Treasurer of the United States. The Federal Reserve banks, acting as fiscal agents of the Treasury, issue depository receipts which the employers attach to their returns as evidence of payment of taxes. The work volume is estimated at 14,644,140 depository receipts in 1967 and 17,044,140 in 1968 as compared with 12,788,374 in 1966.

3. *Financial reporting and maintenance of the Government's central accounts.*—This activity includes the maintenance of central accounts of appropriations, receipts and expenditures which provide data for financial statements. It also includes the preparation and publication of financial reports on the Government's fiscal operations, such as the annual Combined Statement of Receipts, Expenditures, and Balances; the Monthly Treasury Statement; the Secretary's Annual Report; the Treasury Bulletin; and reports on foreign currencies acquired without payment of dollars.

4. *Accounting and reporting development and internal audit.*—This activity includes furnishing technical accounting advice and assistance to other agencies in relation to central accounting, reporting, disbursing and depository matters; participation in the Government-wide financial management improvement program; performing systems work within the Fiscal Service and the Bureau of Accounts; performing internal audit in the Bureau, and other audits of a departmental character.

5. *Banking insurance, investment, international claims, and other services.*—Banking facilities are provided for all agencies of the Government through the designation of selected institutions to act as official depositories of the Government's funds. Investments in interest-bearing

securities are processed for certain funds, such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans insurance trust fund, and various Government retirement funds. The work includes accounting for purchases, sales and redemptions of securities, processing of capital stock subscriptions of Government corporations, payment of international and other claims and examination of the financial condition of companies issuing surety bonds in favor of the United States.

6. *Executive direction.*—This provides for the overall management for the Bureau of Accounts.

Appropriations are made for payment of claims and interest for damages not chargeable to appropriations of individual agencies and for payment of private and public relief acts. Appropriations are made individually for judgments over \$100 thousand while 31 U.S.C. 724a authorizes a permanent indefinite appropriation to pay judgments of \$100 thousand or less from the general fund of the Treasury. Further appropriations made will cover claims processed pursuant to the Land Scrip Rights Claims Act (78 Stat. 751).

Statutory award in the amount of \$5,652 will be paid annually to Dr. Robert W. Rasor (78 Stat. 1139).

This revolving fund was created as self-insurance to cover losses in shipment of Government property such as coin, currency, securities, certain losses incurred by the Post Office Department, and losses in connection with the redemption of savings bonds (5 U.S.C. 134). Since these claims are only partially offset by recoveries, the net losses have gradually increased to \$2,074 thousand as of June 30, 1966, and are expected to increase to \$2,233 thousand by June 30, 1967, and to \$2,384 thousand by June 30, 1968. A supplemental appropriation for 1967 is anticipated for separate transmittal.

The Bureau of Customs collects the duties and taxes on imported merchandise, inspects all international traffic, regulates certain marine and aircraft activities, combats smuggling, undervaluation, and frauds on the customs revenue, and performs related functions in connection with the importation and exportation of merchandise.

Direct obligations are estimated to be \$90,400 thousand for 1968, an increase of \$4,607 thousand over the amount now appropriated for 1967, of which \$2,835 thousand is for the 1967 pay and fringe benefit increases.

The unobligated balance of \$300 thousand is a special fund available to this account when necessary to help pay the expenses of reimbursable customs work pending the collection of receivables from private interests.

1. *Processing of arriving persons and cargo.*—This activity processes all persons arriving in the United States and all merchandise imported into the United States. It assesses and collects duties, taxes, and fees on imported merchandise, inspects international traffic, combats smuggling, performs certain marine activities relating to ownership and documentation of vessels of the United States and the movement of vessels in the foreign trade, and enforces the laws of other Government agencies affecting imports and exports. It examines and ascertains the value of imported merchandise, and performs scientific analysis and identification of merchandise for tariff and enforcement purposes.

SELECTED WORKLOAD DATA

¹ Balances of selected resources are identified on the statement of financial condition.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of U.S. currency and Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage, internal revenue, customs, and savings stamps. In addition, the Bureau prints a wide variety of miscellaneous commissions, certificates, etc., and executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The Bureau finances its operations out of reimbursements received from other agencies for all direct and indirect costs, including administrative expenses (31 U.S.C. 181).

3. Other direct charges for miscellaneous services.....	\$91	\$40	\$40
Total	\$33,363	\$35,432	\$35,993

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency*.—Estimates for the current and budget years indicate a decrease in delivery requirements of 11.2% and 7.8%, respectively, as compared with the delivery of 2.3 billion notes in 1966. By 1968 approximately 97% of all currency requirements will be produced on the Bureau's modern high-speed presses, 32 notes to the sheet instead of 18.

(b) *Stamps*.—The overall requirements in 1967 and 1968 for this class of work show an increase as compared with 1966. An analysis of the work program discloses this increase is due primarily to an estimated greater demand by the Post Office Department for multicolor commemorative postage stamps and for stamps in book and coil form. Complete conversion to overprinting luminescent ink on postage stamps to facilitate the automation of mail handling by the Post Office Department will be effected during 1967. Requirements of the Department of Agriculture for food coupons in book form also show substantial increases in 1967 and 1968 as compared with 1966.

(c) *Securities*.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of the Public Debt and certain other agencies of the Government. The anticipated requirements of the agencies indicate an increase in the current and budget year of 10.6% and 14.2%, respectively, as compared with deliveries in 1966. The Bureau is currently engaged in a program to convert the printing of certain types of these securities to its modern high-speed intaglio printing presses.

(d) *Commissions, certificates, etc.*—An increase of 11% is noted in the number of units to be delivered for this class of work in 1967 and a decrease of 6.7% in 1968 as compared with 1966. Production costs associated with all of this miscellaneous classification of work represent a very small percentage of the overall engraving and printing program of the Bureau.

2. *Operation and maintenance of incinerator and space utilized by other agencies*.—Charges are made to other agencies on an actual cost basis for use of the incinerator

BUREAU OF ENGRAVING AND PRINTING—Con.**Intragovernmental funds—Continued****BUREAU OF ENGRAVING AND PRINTING FUND—Continued**

and maintenance services provided for the space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services.*—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

Bureau operations resulted in a profit of \$228 thousand during 1966. This profit will partially offset a deficit of \$303 thousand brought forward from prior years. In accordance with provisions of 31 U.S.C. 181 the balance of the deficit of \$75 thousand will be recovered from any profits accruing in subsequent years. Budget expenditures were \$2,159 thousand below receipts in 1966 due to accelerated payments being received from customer agencies and delay in payments for fixed assets pending satisfactory performance of equipment purchases. Budget expenditures are expected to be in excess of receipts in the amount of \$3,254 thousand in 1967 and below receipts in the amount of \$501 thousand in 1968.

The capital of the fund is expected to remain at \$25.3 million represented by an appropriation of \$3.3 million and donated assets of \$22 million.

² Reimbursements from non-Federal sources above are receipts from foreign coinage (31 U.S.C. 369) (Jan. 29, 1874, Stat. 6); and proceeds from sale of medals and proof coins, and uncirculated coins (31 U.S.C. 369) (as amended Sept. 5, 1962, 76 Stat. 440).

The Bureau of the Mint manufactures coins, receives deposits of gold and silver bullion, safeguards the Government's holdings of monetary metals, and refines gold and silver bullion (see miscellaneous permanent appropriations).

1. *Manufacture of coins (domestic).*—Production of coins is the major Mint activity. Funds requested for 1968 will permit production of approximately 6.645 billion coins.

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. During 1966, \$1,006,537 were deposited to miscellaneous receipts.

Under proposed legislation for the fiscal years 1967-68.—A Mint operating fund will be proposed to be available without fiscal year limitation, which will provide for the financing of the operations of the Bureau of the Mint. The fund will replace present appropriations to the Mint; in addition it will pay for the cost of the monetary metals, heretofore purchased by the Treasurer of the United States as an exchange of cash without charge to expenditures.

Initial operating capital will be provided from coinage receipts which will be credited to this fund as of June 30, 1967. Such coinage receipts as are needed will be placed in the fund. Receipts in excess of requirements will continue to be deposited into the general fund of the Treasury.

BUREAU OF NARCOTICS

COAST GUARD

Detailed estimates for the Coast Guard are included under the Department of Transportation.

INTERNAL REVENUE SERVICE

The purpose of the Internal Revenue Service is to administer and enforce the internal revenue laws. It seeks to assure maximum productiveness of the tax structure by taking effective, economically feasible actions to stimulate voluntary compliance and reduce noncompliance by taxpayers, including use of a master file automatic data processing system, taxpayer assistance and education, audit of tax returns, locating nonfilers, collecting unpaid taxes, prosecuting willful tax evaders, etc.

The number of taxpayers and the volume of revenue increases as the population, individual prosperity, and national economy increase. This growth is reflected in the following figures:

Year	Tax returns filed (in millions)	Gross revenue collections (in billions of dollars)
1965 actual.....	102.5	114.4
1966 actual.....	104.1	128.9
1967 estimate.....	106.6	148.2
1968 estimate.....	109.1	161.5

The additional funds requested for 1968 are to provide additional equipment required in conversion of tax returns processing and revenue accounting to the master file ADP system, to avail the Service of important technological advances in revenue accounting and processing through use of optical scanning and direct data entry equipment, to provide additional manpower (net of estimated employee productivity increases) to maintain taxpayer compliance levels on the additional 2.5 million tax returns expected, and to meet increased costs of maintaining the staff already authorized (including pay increases).

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Internal Revenue Service, not otherwise provided for, including executive direction, administrative support, and internal audit and security; hire of passenger motor vehicles; and services as authorized by [section 15 of the Act of August 2, 1946 (15 U.S.C. [55a] 3109, and of expert witnesses at such rates as may be determined by the Commissioner; [\$18,600,000] \$20,060,000. (Formerly 5 U.S.C. 1332-15; Title 26 U.S.C.; Treasury Department Appropriation Act, 1967.)

Note.—Includes \$63,000 transferred in the estimates from "Revenue accounting and processing appropriation, Internal Revenue Service." The amount obligated in 1966 is shown in the schedule as a comparative transfer. Treasury Department Order number 150-66, effective July 1, 1966.

This appropriation provides for overall planning and direction of the Internal Revenue Service and for internal audit and security functions. The appropriation requested for 1968 provides for additional personnel for strengthening administrative programs, for increasing internal audits of regional service centers, and for making background and integrity investigations on the enlarged Revenue Service staff.

1. *Executive direction.*—This activity sets policies and goals, provides the advance planning and research necessary for orderly and effective operations, provides leadership and direction in the execution of plans, provides for administrative support of all operations, provides for coordination and supervision of tax administration assistance to foreign countries, and provides for Federal-State cooperation in tax administration.

2. *Internal audit and security.*—This activity conducts internal audits. It helps operational managers establish controls to assure that appropriated funds are spent only for authorized purposes, that tax revenues are properly safeguarded, and that equipment and manpower are effectively employed. It conducts background investigations of new employees and prospective employees; and it investigates acts of bribery and other criminal actions or improper conduct by employees, tax practitioners, and taxpayers.

REVENUE ACCOUNTING AND PROCESSING

For necessary expenses of the Internal Revenue Service for processing tax returns, and revenue accounting; hire of passenger motor vehicles; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901, 80 Stat. 299); and services as authorized by [section 15 of the Act of August 2, 1946 (5 U.S.C. [55a.)] 3109, and of expert witnesses at such rates as may be determined by the Commissioner, including not to exceed \$28,200,000 for temporary

employment and not to exceed \$77,000 for salaries of personnel engaged in pre-employment training of card punch operator applicants; [\$169,529,000] \$177,024,000. (Formerly 5 U.S.C. 133z-15; Title 26 U.S.C.; Treasury Department Appropriation Act, 1967.)

Note.—Excludes \$63,000 transferred in the estimates to "Salaries and expenses appropriation, Internal Revenue Service." The amount obligated in 1966 is shown in the schedule as a comparative transfer. Treasury Department Order number 150-66, effective July 1, 1966.

This appropriation provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of the payments, and verification through a master file ADP system of the accuracy of information provided on the tax returns. It also provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible tax evaders (nonfilers) for investigation, and assistance in selection of tax returns which appear to warrant an audit. It provides for preparation of reports (statistics

of income) based on tax return data, for other statistical studies of the tax system, and for forecasting (for work planning purposes) the number of tax returns to be filed by type and size and geographical area (and related workload data) for many years ahead.

District manual operations and *Service center automated operations* are concerned with tax return processing and revenue accounting. *Statistical reporting* provides for the statistics of income and other statistical research and reports and for tax return and related workload forecasting.

The additional funds requested for 1968 are principally to provide additional equipment required in conversion to the master file ADP system and to avail the Service of important technological advances through use of optical scanning and direct data entry equipment at the regional service centers.

This appropriation provides (1) for assistance to taxpayers in understanding and complying with the tax laws and (2) for detecting and correcting instances of non-compliance.

The additional funds requested for 1968 are necessary because the increase in tax returns requires an increase in the number of returns to be audited to prevent a deterioration in the level of taxpayer compliance. Additional funds are also needed for acceleration of the organized crime drive, and to meet increases in taxpayer appeals and litigation resulting from the additional audits and other enforcement actions.

1. *Audit of tax returns.*—This activity provides for a selective examination of tax returns to see if taxpayers

have properly complied with the internal revenue laws. It corrects errors and explains corrections to the taxpayers. It also makes determinations as to whether certain organizations or funds are exempt from taxation.

2. *Collection of delinquent accounts and securing delinquent returns.*—This activity provides assistance to taxpayers in understanding their tax obligations and is responsible for securing tax returns due but unfiled and collecting taxes due but unpaid.

3. *Tax fraud and special investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of tax laws. It investigates cases of suspected intent to defraud; recommends prosecution as warranted; and assists in the preparation and trial of criminal tax cases. It is responsible for directing Service participation in the organized crime drive.

4. *Alcohol and tobacco tax regulatory work.*—This activity provides for administration and enforcement of internal revenue laws and regulations relating to alcohol and tobacco products. It is also responsible for administering and enforcing the Federal Alcohol Administration Act, the National Firearms Act, and the Federal Firearms Act.

5. *Taxpayer conferences and appeals.*—This activity provides for administrative consideration and settlement of taxpayer appeals of audit findings.

6. *Technical rulings and services.*—This activity develops tax return forms, instructions, and guides; issues rulings and opinions as to application of the tax laws, and meets with taxpayer groups to review and resolve special tax problems.

7. *Legal services.*—This activity provides for the legal counsel and legal assistance needed by the Service to administer and enforce the internal revenue laws.

FEDERAL TAX LIEN REVOLVING FUND

For capitalization of the revolving fund for redemption of real property, established by the Federal Tax Lien Act of 1966 (26 U.S.C. 7810(a)), \$800,000.

Program and Financing (in thousands of dollars)

Identification code 15-45-4413-0-3-904	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Redemption of real property (costs—obligations) (object class 33.0)			1,200
Financing:			
14 Receipts of reimbursements from: Non-Federal sources			-1,200
24.98 Unobligated balance available, end of year			800
40 New obligational authority (appropriation)			800
Relation of obligations to expenditures:			
10 Total obligations			1,200
70 Receipts and other offsets (items 11-17)			-1,200
71 Obligations affecting expenditures			
90 Expenditures			
Cash transactions:			
93 Gross expenditures			1,200
94 Applicable receipts			-1,200

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966 solely to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien

which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lien holder's equity, but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

This office: (a) receives, keeps, and disburses the moneys of the United States; (b) processes claims for the proceeds of Government checks; (c) receives, stores, issues, transfers, and retires currency; (d) issues and redeems Government securities; (e) maintains fiscal accounts; and (f) prepares financial statements and reports.

1. *Payment and reconciliation of checks.*—This activity maintains checking accounts of Government disbursing officers and Government-owned corporations; processes documents crediting Government disbursing accounts; performs centralized payment function of all checks drawn on the Treasurer of the United States; reconciles deposits claimed and checks issued as reported by disbursing officers with the deposits credited and checks paid by the Treasurer and determines the outstanding checks in each disbursing account.

CHECK VOLUME

[In thousands of checks]

Checks paid and reconciled from appropriated funds.....	1965 actual	1966 actual	1967 estimate	1968 estimate

The electronic installation used in paying and reconciling checks is also being used to process money orders for the Post Office Department, on a reimbursable basis. It is currently estimated approximately 200 million money orders will be processed in each of the years 1967 and 1968.

2. *Processing check claims.*—This activity processes all claims for proceeds of Government checks, including the allowance or disallowance of claims against the United States and the enforcing of claims of the United States against banks, endorsers, principals and sureties or other

Outstanding check.....	1,846	1,776	1,795	1,821

3. *General banking services.*—General banking services are provided for Government accountable officers and for banks in the District of Columbia.

WORKLOAD OF MEASURABLE OPERATIONS

[In thousands]

	1966 actual	1967 estimate	1968 estimate
Currency processed for local area banks.....	110,261	112,000	115,000
Coin processed for local area banks.....	297,571	303,000	308,570
Checks, drafts, and money orders processed locally.....	8,831	9,000	9,200

4. *Retirement of currency.*—Silver certificates and U.S. notes unfit for further circulation are verified and destroyed by the Federal Reserve banks on a reimbursable basis. Unfit currency received from local sources as well as all mutilated currency is processed for retirement in Washington.

5. *Maintenance of the Treasurer's accounts.*—Controlling accounts covering receipts and disbursements are maintained for all funds placed in the custody of the Treasurer, and reports are prepared, including the Daily Statement of the U.S. Treasury and a monthly statement of money held in the Treasury and paper currency in circulation.

6. *Payment and custody of securities.*—This activity pays the principal and interest on public debt obligations, including those of Government corporations, and provides safekeeping facilities for securities, trust funds, and savings bonds.

7. *Procurement and transportation of U.S. currency.*—U.S. notes are procured, stocked, and issued by the Treasurer. The Bureau of Engraving and Printing is reimbursed for the production of this currency and the Post Office Department is paid for the transportation of such currency to the Federal Reserve banks and depositories.

Current law requires that the amount of U.S. notes outstanding be kept constant; the amount of such notes withdrawn from circulation as unfit must be replaced by new notes. To meet this statutory requirement most economically, the office plans to substitute U.S. notes of the \$100 denomination for those of the \$2 and \$5 denominations now in circulation as the latter become unfit and are retired.

The Check Forgery Insurance Fund was established in the amount of \$50 thousand by the Act approved November 21, 1941 (31 U.S.C. 561), for use by the Treasurer in making settlement with the payees or special endorsees in cases of checks drawn on the Treasurer which have been

paid on forged endorsements and in which it appears that recovery from those liable may be delayed or be unsuccessful. As a result of continuing increases in volume of claims paid each year, the capital was increased to \$100 thousand by an appropriation of an additional \$50 thousand to this fund by the Treasury Department Appropriation Act, 1964.

This Service is responsible for investigation of counterfeiting of currency, specie, and securities; forgery and conversion of Government checks and bonds; and non-criminal cases; and the protection of the President of the United States, his immediate family, the President-elect, the Vice President or other officer next in the order of succession to the office of the President, the Vice President-elect and the protection of a former President and his wife during his lifetime and the person of a widow and minor children of a former President for a period of four years after he leaves or dies in office, unless such protection is declined.

The White House police force protects the Executive Mansion and grounds in the District of Columbia; any

building in which White House offices are located and the President and members of his immediate family.

The Treasury guard force is responsible for safeguarding paper currency and other Government securities and obligations in the money-handling divisions of the Treasury Department. It also provides protection for the main Treasury building and its annex.

INTEREST ON THE PUBLIC DEBT

General and special funds:

INTEREST ON THE PUBLIC DEBT

(Permanent, indefinite)

Program and Financing (in thousands of dollars)

Identification code 15-60-0550-0-1-851	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Payment of interest (costs—obligations) (object class 43.0).....	12,013,863	13,400,000	14,050,000
Financing:			
60 New obligational authority (appropriation).....	12,013,863	13,400,000	14,050,000
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures).....	12,013,863	13,400,000	14,050,000
90 Expenditures.....	12,013,863	13,400,000	14,050,000

Such amounts are appropriated as may be necessary to pay the interest each year on the public debt (31 U.S.C. 711(2) and 732). With the exception of savings bonds and bonds of investment series A of 1965, interest is computed on an accrual basis. Interest on savings bonds and the 1965 investment series is computed on a due and payable basis.

Payment of interest during 1966 was distributed among the following categories (in thousands of dollars):

Marketable.....	8,304,700
Savings bonds.....	1,877,366
Special issues.....	1,655,192
Other nonmarketable issues.....	176,605

ATOMIC ENERGY COMMISSION

General and special funds:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; services authorized by [section 15 of the Act of August 2, 1946 (75 U.S.C. [55a])] 3109; hire, maintenance and operation of aircraft; publication and dissemination of atomic information; purchase, repair and cleaning of uniforms; official entertainment expenses (not to exceed \$30,000); reimbursement of the General Services Administration for security guard services; hire of passenger motor vehicles; [\$1,923,000,000] \$2,144,800,000 and any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955, as amended, (42 U.S.C. 2301)) received by the Commission, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended: *Provided*, That of such amount \$100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of \$90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of \$45,000 per annum. (42 U.S.C. 2011; 2017; 2291; 80 Stat. 162; Public Works Appropriation Act, 1967; additional authorizing legislation to be proposed.)

The Atomic Energy Commission conducts a variety of production, research and development and supporting activities directed toward its responsibilities for national defense and peaceful applications of atomic energy. Most of the activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Total program costs in 1968 are estimated at \$2,197.1 million or \$46.2 million greater than the estimated 1967 costs of \$2,150.9 million, and \$56.7 million greater than actual costs of \$2,140.4 million for 1966. The 1968 program decreases are in raw materials, special nuclear materials, and community. These decreases are more than offset by increases in the weapons program, in research in the physical and biomedical sciences, in reactor and isotopes development, in the development of civilian applications of nuclear explosives, and in training, education, and scientific information activities.

In 1968, total program obligations will be more than program costs, the difference being obligations to be incurred for future years' costs. Total program obligations for operating expenses in 1968 are estimated to be \$2,203.6 million compared to \$2,159.7 million in 1967 and \$2,180.1 million in 1966.

General and special funds—Continued

OPERATING EXPENSES—Continued

The schedule of costs by activity does not include nonbudgetary costs such as depreciation charges, accrued annual leave earned but not taken by AEC employees, and the cost of source and special nuclear material consumed; in total, these are as follows: 1966, \$373 million; 1967 estimate, \$375 million; 1968 estimate, \$382 million.

1. *Raw materials.*—The 1968 estimate of 8,000 tons of uranium concentrates to be procured is based on current contractual commitments and reflects the expiration of the contracts with Canada and South Africa on December 31, 1966, and the gradual decline in the level of domestic procurement. The 1968 estimate is 2,037 tons below the 1967 estimate of 10,037 tons. Procurement in 1966 was 12,426 tons. Funds are also included to support a program of resource investigations to help assure the long-range availability of nuclear fuels.

2. *Special nuclear materials.*—Special nuclear materials are produced primarily for use in nuclear weapons and as fuels for nuclear reactors. Major production plants are located at Richland, Wash.; Savannah River, S.C.; Oak Ridge, Tenn.; Paducah, Ky.; and Portsmouth, Ohio. Production of uranium enriched in the isotope U-235 will decline somewhat in 1968 as a result of reduced cascade power. Work will continue on process improvements to assure continuity and safety of operation, to develop more economical methods of production, and to permit timely development of new production processes as requirements for new products develop.

3. *Weapons.*—The weapons program encompasses the production of atomic weapons; the maintenance of stockpiled weapons in a state of constant readiness; the design, development, and underground testing of new weapons types including the development, starting in 1967, of supplemental test sites; maintenance of a readiness capability to resume atmospheric testing; and participation with the Department of Defense in the development of test detection methods.

4. *Reactor development.*—This program includes the development of nuclear power reactors for central station applications and the development of power and propulsion reactors for a variety of military, civilian, and space applications, together with research and development on advanced reactor systems, nuclear safety, and general reactor technology. The costs by major category are (in thousands of dollars):

Category	1966 actual	1967 estimate	1968 estimate
1. Civilian power reactors.....	89,857	106,480	134,020
2. Cooperative power reactor demonstration program.....	13,544	17,116	28,783
3. Cooperative program with Euratom..	3,421	2,000	2,500
4. Merchant ship reactors.....	—1	100	100
5. Army power reactors.....	2,335	700	900
6. Naval propulsion reactors.....	76,983	94,900	96,700
7. Space propulsion systems.....	84,365	77,575	60,400
8. Space electric power development....	65,020	61,497	60,740
9. Terrestrial electric power development	1,724	5,595	8,125
10. General reactor technology.....	46,955	50,100	51,000
11. Advanced systems research and development.....	18,121	14,850	11,035
12. Nuclear safety.....	21,648	32,015	35,000
13. Operational services.....	4,595	4,792	3,000
Total reactor development.....	428,567	467,720	492,303

The emphasis of the civilian power reactor category is now directed to the development of fast breeder and advanced converter reactors, which offer promise of con-

servation of energy resources and reductions in power cost. Research and development on the application of nuclear power to desalting will also be stressed.

Costs of \$28.8 million will be incurred for the cooperative power reactor demonstration category in which AEC provides financial aid for development and construction of full-scale power reactors and for participation in a dual-purpose nuclear power and desalting project in California. This aid helps to provide a basis for a privately financed nuclear power industry.

The Euratom category provides for research and development under a joint program with the European Atomic Energy Community.

The merchant ship reactors category will be confined to studies and technical and economic evaluation of the development of nuclear reactors for propulsion of merchant ships.

The Army power reactors category provides for the improvement of existing designs of portable, medium-powered, water-cooled nuclear powerplants and the development of advanced plants for military applications.

The naval propulsion reactors category provides for the design and development of improved nuclear propulsion plants for installation in ships ranging from small submarines to large combatant surface ships.

The space propulsion systems category (Project Rover) is carried out in cooperation with the National Aeronautics and Space Administration to develop nuclear rocket technology for potential space applications.

The space electric power development category is conducted in cooperation with the National Aeronautics and Space Administration and the Department of Defense to develop nuclear reactor and radioisotopic power systems for space applications.

The terrestrial electric power development category provides for the development of nuclear reactor and radioisotopic power systems for terrestrial and undersea applications.

General reactor technology includes development work in support of the overall reactor program in such areas as reactor fuels, materials, physics, heat transfer, components, and chemical separations.

The advanced reactor systems research and development category is devoted to the exploration of promising advanced reactor concepts.

The nuclear safety category provides for research and development and investigation of safety problems, conduct of field tests, and application of effective engineered safeguards in the construction and operation of nuclear reactors.

5. *Physical research.*—This program comprises basic and applied research in the physical sciences. By major category, the costs are as follows (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
High energy physics.....	97,433	108,073	116,500
Medium energy physics.....	9,164	11,000	11,100
Low energy physics.....	26,385	28,336	29,400
Mathematics and computer research....	5,278	6,107	6,200
Chemistry research.....	49,579	52,864	55,000
Metallurgy and materials research.....	24,848	26,284	27,600
Controlled thermonuclear research.....	21,768	22,626	26,200
Total physical research.....	234,455	255,290	272,000

The Commission serves as the executive agent for the Nation's high energy physics program and research costs are expected to increase in 1968 as existing accelerators are improved and the new linear accelerator at Stanford achieves its first full year of operation. The increase in

low energy physics is due primarily to the operation of new research tools authorized in prior years and more intensive operation of older facilities.

Chemistry and metallurgical research are aimed at advancing basic knowledge related to practical operations of the atomic energy program.

The objective of thermonuclear plasma research is to determine whether the energy released by thermonuclear reactions can be controlled and made useful. This research is expected to expand in 1968 to allow work to proceed on a new generation of devices designed to test new theories in plasma confinement.

Approximately three-fourths of this program is conducted at 10 sites owned by or operated for the Commission, and the remainder is supported and conducted in more than 150 universities, colleges, institutes, and independent laboratories.

6. *Biology and medicine.*—Research is conducted on the effects of radiation on living organisms and on the environment, protection against the injurious effects of radiation, and development of methods for utilizing radioactive materials in the diagnosis, treatment, and understanding of human diseases, such as cancer. The program includes the measurement and effects of radioactivity (including fallout) in the atmosphere, soils, and surface waters for the establishment of standards to insure that AEC activities are conducted with safety. The program recognizes the responsibilities of other Government agencies conducting programs in biomedical research.

Approximately two-thirds of the research is conducted by 20 laboratories which are owned by or operated for the Commission, and the remainder is supported in more than 235 universities, colleges, hospitals, and independent laboratories. In addition, research is conducted in Japan to determine the long-term effects of atomic bomb radiation on the affected population.

7. *Training, education, and information.*—This program includes specialized training courses; graduate and post-doctoral fellowships and traineeships; assistance to schools, faculty and students; operation of the Puerto Rico Nuclear Center; dissemination of scientific and technical information; and operation of nuclear science and technology demonstrations and exhibits.

In 1968, AEC will provide approximately 560 fellowships and traineeships beyond the undergraduate level. Assistance to schools includes grants for acquisition of nuclear training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer and academic year institutes in radiobiology and other subjects in the field of radiation science are made available to high school and university science teachers. The cooperative use of specialized atomic energy laboratory facilities and staff in assisting the educational programs of colleges and universities throughout the country will continue to increase.

In order to facilitate the transfer of certain regulatory functions from AEC to the States, training courses and on-the-job orientation are conducted in radiation safety, radiological health protection, waste disposal, and certain other subjects for State and local government employees.

To broaden the dissemination of information on atomic energy, technical information services are provided at both a technical and popular level. The results of scientific research and technical developments are systematically made available to other Government agencies and to the general public. Public understanding of atomic energy is aided by nuclear science demonstrations and exhibits.

8. *Isotopes development.*—This program supports the development of a variety of new uses of radioisotopes and high level radiation. Particular emphasis is given to development of isotopic power and heat sources for a variety of applications, to development of isotopic measuring and diagnostic systems, and to development of technology for radiation pasteurization of foods. The program is designed to promote and encourage industrial participation and cooperation.

9. *Civilian applications of nuclear explosives.*—This program provides for the research, development, and experimental testing necessary to develop and demonstrate peaceful uses for nuclear explosives. The 1968 program is based on a continuation of cratering experiments and testing of specially designed nuclear explosives and techniques for reducing the amount of radioactivity released by explosions for use in nuclear excavation projects; work on special nuclear explosives for scientific research in neutron physics and transuranium elements production; and development of technology to exploit the economic potential of nuclear explosives in the recovery of natural resources.

10. *Communities.*—The program estimate of \$6.2 million includes \$3.6 million for the Los Alamos community of which \$2.7 million is for assistance payments for schools, municipal services and hospital, and \$0.9 million is for costs related to those functions which have not been transferred or sold. The remaining \$2.6 million is for assistance payments to the former AEC communities of Oak Ridge, Tenn., and Richland, Wash. All assistance payments are in accordance with the Atomic Energy Community Act of 1955, as amended.

11. *Program direction and administration.*—This program includes the salaries and other costs for employees engaged in executive direction, general management, and technical supervision of the atomic energy program, and in the establishment and enforcement of regulations for civilian uses of atomic energy. Employees are located in the Washington headquarters and in field offices. The 1968 estimate provides for 5,853 employees, which is 225 employees over the estimated June 30, 1967, strength of 5,628.

12. *Security investigations.*—The Atomic Energy Act of 1954, as amended, requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be requested in 1968 is estimated at 15,900 compared with 15,200 for 1967 and 15,208 for 1966.

13. *Cost of work for others.*—In furthering the objective of widespread utilization of atomic energy for peaceful purposes, AEC, when requested, furnishes materials and services to industrial organizations and other private parties. Charges made for such products and services are reflected in the budget under receipts and reimbursements from non-Federal sources (revenues applied) and are applied as a source of funds, thereby reducing the amount of appropriations required. The items included are (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
Cost of products sold.....	9,321	13,975	9,844
Cost of services performed.....	3,034	3,225	3,380
Total costs (excluding depreciation).....	12,355	17,200	13,224
Related revenues.....	17,010	22,050	14,910
Excess of revenues over related funded costs.....	4,655	4,850	1,686

General and special funds—Continued

OPERATING EXPENSES—Continued

Receipts and reimbursements from non-Federal sources (revenues applied).—This item, shown as a source of financing on the program and financing schedule, reduces appropriation requirements and is obtained from the following sources (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
Income from products sold and services performed, the costs of which are included in program costs of current or prior years:

design funds provided in 1967 budget). This facility as part of the liquid metal fast breeder reactor program will provide an irradiation reactor for testing fuel and clad materials in a fast flux sodium cooled environment.

New capabilities and capacities are required for the production of new nuclear warheads at various plants comprising the weapons production complex. The facilities required to meet the new capabilities are not available within the weapons production complex. These additional facilities are estimated to cost \$32.3 million.

New projects in the physical research program include \$4 million for design of an omnitron accelerator at the Lawrence Radiation Laboratory, Berkeley, Calif., which is expected to cost about \$24 million, and \$10 million for design of the 200 Bev accelerator, to be located near Chicago, Ill., which is expected to cost about \$240 million.

A wide variety of capital equipment is procured to fill the various needs of all operating programs. Such needs range from routine replacement of worn out and obsolete equipment to procurement of new research devices. Additions are needed for expanding programs and to keep pace with rapidly changing technology in the production and research programs.

This appropriation provides for the construction of plants and facilities and for the acquisition of capital equipment required for the production, research and development, and supporting programs of the Atomic Energy Commission. Of the new obligational authority of \$348.2 million being requested for 1968, \$111.6 million applies to new construction projects, \$80 million is applicable to a construction project for which architect engineering services were previously authorized by the Congress, and \$156.6 million is required for the acquisition of capital equipment not related to construction.

The funds applicable to the previously authorized project are to provide \$80 million of construction funds for the fast flux test facility (in addition to \$7.5 million of

GENERAL PROVISIONS

Any appropriation available to the Atomic Energy Commission may initially be used subject to limitations in this Act during the current fiscal year to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of appropriations made available for the current fiscal year for “Operating expenses” and “Plant and capital equipment” may be transferred between such appropriations, but neither such appropriation, except as otherwise provided herein, shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony, and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (42 U.S.C. 2011; Public Works Appropriation Act, 1967.)

GENERAL SERVICES ADMINISTRATION

REAL PROPERTY ACTIVITIES

General and special funds:

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE

For necessary expenses, not otherwise provided for, of real property management and related activities as provided by law; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation, and transfer of building space; acquisition by purchase or otherwise of real estate and interests therein; and contractual services incident to cleaning or servicing buildings and moving; **[\$240,000,000]** \$262,152,000: *Provided*, That this appropriation shall be available to provide such fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control as may be appropriate to enable the United States Secret Service to perform its protective functions pursuant to Title 18, U.S.C. 3056. (*Independent Offices Appropriation Act, 1967.*)

---	--	-------

¹ Includes capital outlay as follows: 1966, \$998 thousand; 1967, \$334 thousand; 1968, \$340 thousand. Excludes adjustment of prior year cost of \$57 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$791 thousand (1966 adjustments, -\$248 thousand); 1966, \$658 thousand; 1967, \$562 thousand; 1968, \$562 thousand.

This appropriation provides for the basic real property operations of General Services Administration, including acquisition, operation, maintenance, protection, and utilization of general-purpose buildings and space; and for overall direction of buildings design, construction, repair, and modernization.

The appropriation request for 1968 of \$262,152 thousand is a net increase of \$3,078 thousand above the comparable amount for 1967. The 1967 amount includes proposed transfers of \$14,183 thousand for annual costs of expansion space acquired in 1966, not provided for in GSA's 1967 budget, and \$800 thousand for operation of the St. Louis Ordnance Plant. Also included is an estimate of \$4,091 thousand proposed for separate transmittal for wage board pay increases.

The net increase of \$3,078 thousand provides primarily for management and operation of new Federal buildings scheduled for occupancy in 1967 and 1968, offset by credits for space released resulting from new construction.

No funds are included in the 1968 estimate for agency expansion space to be leased after July 1, 1966. Such space will be reimbursable in 1967 and the full-year cost in 1968 will be financed by appropriation transfers.

Fair value of property received from other appropriations or funds without cost for use by GSA (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
Real property.....	10,671	2,129	105
Personal property.....	14	20	20

1. *Buildings management.*—This activity provides for rental, operation, protection, and utilization of Government-owned and leased space, as indicated in the following table (in thousands):

	Average net square feet		
	1966 actual	1967 estimate	1968 estimate
Government-owned space.....	87,458	92,341	97,851
Leased space.....	29,530	31,100	28,997

The net increase for 1968 of \$3,022 thousand over the comparable amount for 1967 is composed of increases in operation and protection of Government-owned space, \$9,228 thousand; and moving, alterations and related costs, \$175 thousand; offset by reductions in rental, operation, and protection of leased space, \$5,981 thousand; and in temporary space and moving costs incident to new buildings, \$400 thousand.

2. *Space management.*—This activity provides for (a) acquisition of real property by lease, purchase, exchange, or donation, including appraisal and management of building sites pending construction; (b) assignment and reassignment of Government-owned and leased space; and (c) review, analysis, and determination of Federal space requirements and the development of programs and projects. No increase in funding is requested over the 1967 level.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$39,493 thousand (1966 adjustments, -\$675 thousand); 1966, \$37,000 thousand; 1967, \$39,230 thousand; 1968, \$40,150 thousand.

This appropriation provides for day-to-day maintenance repair work of all types, repairs, remodeling, improvement of space and tenant alterations, conversions, and extensions of buildings estimated to cost up to \$200 thousand in federally-owned buildings under the jurisdiction of the General Services Administration for these purposes. The budget for 1968 provides for continuation of the long-range program initiated in 1957 to alleviate deterioration and obsolescence of buildings which adversely affect efficient operations of occupying agencies.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1966, \$1 thousand; 1967, \$1 thousand; 1968, \$1 thousand.

1. *Maintenance repairs.*—Normal needs for day-to-day repairs to buildings and equipment are programmed at a rate of \$0.21 per net square foot for general office-type space and \$0.08 per net square foot for warehouse-type space.

2. *Repairs and improvements.*—Major and minor repair and improvement projects are selected from an inventory

of urgently needed work to offset obsolescence and deterioration of buildings and to bring the properties up to modern standards of usefulness. A total of 85 major type projects are scheduled for accomplishment.

3. *Conversions.*—Space conversions estimated to cost in excess of \$25 thousand and extensions to buildings costing over \$25 thousand but less than \$200 thousand are performed under this heading to convert space to current requirements. Twenty-two of such projects are proposed in the program.

4. *Program direction.*—Overall direction and program development are provided under this activity.

CONSTRUCTION, PUBLIC BUILDINGS PROJECTS

For an additional amount for expenses, not otherwise provided for, necessary to construct and acquire public buildings projects and alter public buildings by extension [or conversion] where the estimated cost for a project is in excess of \$200,000, pursuant to the Public Buildings Act of 1959 (73 Stat. 479), including fallout shelters and equipment for such buildings, [\$113,998,000] \$62,545,700, [and not to exceed \$500,000 of this amount shall be available to the Administrator for construction or alteration of small public buildings outside the District of Columbia as the Administrator approves and deems necessary, all] to remain available until expended: *Provided*, That the foregoing amount shall be available for public buildings projects at locations and at maximum construction improvement costs (excluding funds for sites and expenses) as follows:

- [Border station, Alaska Highway, Alaska, \$1,477,000;]
- [Post office and Federal office building, Petersburg, Alaska, \$555,000;]
- [Post office and Federal office building, Conway, Arkansas, \$648,000;]
- [Post office and Federal office building, Star City, Arkansas, \$253,000;]
- [Federal office building, Los Angeles County, California, \$5,470,800;]
- [Post office and Federal office building, Fort Collins, Colorado, \$1,837,000;]
- [Post office and Federal office building, Augusta, Georgia, \$1,792,000;]
- [Federal office building, Indianapolis, Indiana, \$10,952,300;]

- [Post office and Federal office building, Houma, Louisiana, \$818,000;]
- [Post office and Federal office building, Fitchburg, Massachusetts, \$1,268,000;]
- [Federal office building, Fort Snelling, Minnesota, \$14,259,000;]
- [Courthouse and Federal office building, Cape Girardeau, Missouri, \$1,399,000;]
- [Post office, Lincoln, Nebraska, \$2,902,000;]
- [Post office and Federal office building, Keene, New Hampshire, \$753,000;]
- [Federal office building, Gallup, New Mexico, \$2,750,000;]
- [Federal office building, Albany, New York, \$6,755,500;]
- [Court of Appeals and Federal office building (substructure), New York, New York, \$5,820,000;]
- [Federal office building, Goldsboro, North Carolina, \$606,000;]
- [Post office and Federal office building, Oxford, North Carolina, \$409,000;]
- [Post office and courthouse, Wilkesboro, North Carolina, \$918,000;]
- [Post office and Federal office building, Fargo, North Dakota, \$4,274,000;]
- [Post office, Dayton, Ohio, \$5,105,100;]
- [Post office and Federal office building, Barrington, Rhode Island, \$208,000;]
- [Federal office building, Oak Ridge, Tennessee, \$3,707,000;]
- [Post office and Federal office building, Big Spring, Texas, \$951,000;]
- [Post office and Federal office building, Denton, Texas, \$916,000;]
- [Border patrol sector headquarters, Laredo, Texas, \$543,000;]
- [Courthouse and Federal office building, San Antonio, Texas, \$6,326,300;]
- [Federal office building, St. George, Utah, \$179,000;]
- [Post Office and Federal office building, Essex Junction, Vermont, \$295,000;]
- [Federal Bureau of Investigation Academy, Quantico, Virginia, \$13,059,000, in addition to the sum heretofore provided;]
- [Post office and Federal office building, Casper, Wyoming, \$3,859,000; and]
- [Labor Department building (substructure), District of Columbia, \$12,433,000;]
- Post office and Federal office building, Talladega, Alabama, \$385,000;*
- Courthouse and Federal office building, Bridgeport, Connecticut, in addition to the sum heretofore appropriated, \$333,000;*
- Post office and courthouse, Honolulu, Hawaii, \$22,000,000;*
- Courthouse and Federal office building, and Post office and Federal office building, Evansville, Indiana, in addition to the sums heretofore appropriated, \$710,000;*
- Courthouse and Federal office building, Frankfort, Kentucky, \$1,868,000;*
- Post office and Federal office building, Bronx, New York, \$16,319,000;*
- Franklin D. Roosevelt Library (extension), Hyde Park, New York, \$769,000;*
- Post office, Dayton, Ohio, in addition to the sum heretofore appropriated, \$1,475,000;*
- Post office and Federal office building, Baker, Oregon, in addition to the sum heretofore appropriated, \$274,000;*
- Courthouse and Federal office building, San Juan, Puerto Rico, \$12,940,000;*
- Federal motor vehicle facility, Houston, Texas, \$780,000;*
- Courthouse and Federal office building, Lubbock, Texas, \$4,508,000; and*
- Federal office building (substructure), South Portal, District of Columbia, \$1,000,000;*
- Provided further*, That the foregoing limits of costs may be exceeded to the extent that savings are effected in other projects, but by not to exceed 10 per centum: [Provided further, That the funds made available for the Labor Department building shall not be available for expenditure until the General Services Administration certifies to Congress that the relevant portion of the Inner Loop Freeway and the substructure of the Labor Department building are coordinated in design and will be constructed as a unit] *Provided further, That the amount of \$820,300 appropriated under this head in the Independent Offices Appropriation Acts, 1963 and 1965, for projects at Grand Rapids, Michigan, and Cle Elum, Washington, is hereby made available for the purposes of this appropriation.*
- [For an additional amount for "Construction, Public Buildings Projects", for construction of substructure of Federal Bureau of Investigation building in the District of Columbia, \$11,320,000, to remain available until expended.] (*Independent Offices Appropriation Act, 1967; Supplemental Appropriation Act, 1967.*)

This appropriation provides for the construction of new buildings pursuant to the Public Buildings Act of 1959. Expenses for related site acquisition, design and supervision are provided under Sites and expenses, public buildings projects.

MAGNITUDE OF THE FUNDED AND UNFUNDED APPROVED CONSTRUCTION PROGRAM

	Number of projects	Improvement cost (in millions)
Funded program:		
Projects fully funded, 1959 and 1961 through 1967..	444	¹ \$1,270.8
Projects proposed for 1968.....	9	² 62.5
Subtotal through 1968.....	453	1,333.3
Projects to be funded after 1968:		
Approved projects funded for sites and expenses, construction funding to be budgeted after 1968...	25	238.8
Balance of funding for 4 projects for which substructures were funded in 1967 or proposed in 1968..	---	129.9
Approved projects unfunded for sites and expenses...	31	232.8
Subtotal after 1968.....	56	601.5
Total approved construction program.....	509	1,934.8

¹ Includes \$12,433 thousand for substructure for Labor Department building (\$30,365 thousand for building remains to be funded later) and \$5,820 thousand

for substructure of Court of Appeals and Federal Office Building, New York, N.Y. (\$34,004 thousand for building remains to be funded later). Also includes \$11,320 thousand for substructure for FBI building (\$40,230 thousand for building remains to be funded later).

² Estimate for 1968 includes \$1,000 thousand for a portion of substructure of Federal office building South Portal, District of Columbia (\$25,272 thousand for the building remains to be funded later). Also includes \$2,797 thousand for increases at Bridgeport, Conn.; CT FOB; Evansville, Ind.; PO FOB and CT FOB; Dayton, Ohio, PO; and Baker, Oreg., PO FOB (\$13,068 thousand was previously appropriated).

The recommended appropriation of \$62,546 thousand for 1968 provides for the construction of 8 new high priority projects, totaling \$58,749 thousand, and substructure for 1 high priority project for \$1,000 thousand, and increases of \$2,797 thousand for 4 projects.

SITES AND EXPENSES, PUBLIC BUILDINGS PROJECTS

For an additional amount for expenses necessary in connection with the construction of public buildings projects not otherwise provided for, as specified under this head in the Independent Offices Appropriation Acts of 1959 and 1960, including preliminary planning of public buildings projects by contract or otherwise, **[\$14,132,000]** \$15,276,000, to remain available until expended. (*Independent Offices Appropriation Act, 1967.*)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$12,980 thousand; 1966, \$9,784 thousand; 1967, \$8,584 thousand; 1968, \$8,584 thousand.

This appropriation provides for preliminary planning of public buildings, acquisition of sites, preparation of drawings and specifications, supervision of construction, and related costs incident to projects approved under the Public Buildings Act of 1959. Costs for improvements are financed from Construction, public buildings projects.

The estimate of \$15,276 thousand for 1968 provides \$7,086 thousand for the acquisition of sites; \$6,490 thousand for design and supervision; \$1,700 thousand for program development and administrative operations support.

1. *Site acquisition.*—Acquisition of sites, including cost of appraisals for 15 of the 18 projects included in the estimate.

2. *Design and supervision.*—Preparation of drawings and specifications, by contract or otherwise; technical services; soil surveys and tests; reproduction of plans and specifications; and supervision of construction, by contract or otherwise for the 18 projects.

4. *Program development.*—Development of projects and program direction, not distributed to specific projects.

74 Obligated balance, end of year.....	-111	-4,111	-2,671
90 Expenditures.....	1,670	2,000	4,000

¹ Includes capital outlay as follows: 1966, \$575 thousand; 1967, \$3,455 thousand; 1968, \$2,195 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$368 thousand; 1966, \$68 thousand; 1967, \$850 thousand; 1968, \$553 thousand.

Public Law 89-372, approved March 18, 1966, authorized the appointment of 10 circuit and 35 district judges. An additional amount of \$6 million was appropriated to provide equipped facilities for the judges by performing alterations to existing facilities, rental of space, and alterations of temporary facilities pending the construction of new buildings under separate financing authority.

The Administrative Office of the U.S. Courts has requested GSA to provide the facilities required and has supplied a listing of known locations in which the judges will sit and data concerning additional court personnel who must be accommodated at the same locations. Unknown locations for court activities will be determined upon appointment of the judges. To date the President has appointed 9 circuit and 20 district judges.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders; 1965, \$10,163 thousand; 1966, \$5,195 thousand; 1967, \$3,295 thousand; 1968, \$162 thousand.

This appropriation provides for design and construction of a Federal Office Building on square 167 in the District of Columbia. The construction contract covering the first phase was awarded January 1964 and is scheduled for completion in March 1967. Design contract for the second phase was awarded in October 1964, and award of construction contract is scheduled for April 1967.

90 Expenditures.....	5,326	-2,326	-900

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances, on a reimbursable basis, building management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; modernization and recurring repairs to Government-owned space under jurisdiction of General Services Administration; protection and maintenance of buildings.

nance of excess and surplus properties; maintenance of sites acquired for future construction of Federal buildings; uniforms and uniform allowances; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1968 are estimated at \$408.4 million, a net increase of \$5.6 million over 1967, mainly due to additional Government-owned space to be serviced.

1. *Buildings management—(a) Operation and protection of Government-owned space.*—Provides for operation and protection of an average of 153.2 million square feet of space in 1968 compared to an average of 147.5 million square feet in 1967 and an average of 141.7 million square feet in 1966. The change from 1967 reflects net additional space to be serviced due to construction of new buildings, and certain buildings being transferred to GSA for operation and protection.

(b) *Rental, operation, and protection of leased space.*—Provides for an average of 42.9 million square feet in 1968 compared to an average of 45.1 million square feet in 1967 and an average of 43.8 million square feet in 1966, based on currently projected requirements of Federal agencies.

2. *Moving and space alterations.*—Provides for moving and related alterations based on experience factors of buildings management operations.

3. *Temporary space and moving costs incident to new buildings.*—Provides for cost of moving and space adjustments incident to the new construction program.

4. *Protection and maintenance, surplus properties.*—Provides for protection and maintenance of excess and surplus properties.

5. *Maintenance repairs.*—Provides for day-to-day maintenance of GSA operated buildings, and other Government buildings under jurisdiction of GSA.

6. *Security and special guarding.*—Provides security and above normal guarding service required by other agencies.

7. *Operation and maintenance of sites held for future construction.*—Provides for maintenance of sites acquired for future construction of Federal buildings and repairs to improvements located thereon.

8. *Job order work.*—Provides for special services and repairs and improvements to buildings for GSA and other agencies.

9. *Other.*—Provides for program supervision of repair and improvement operations as distinguished from architectural and design activities initially financed from the Construction Services Fund, utility services furnished in the District of Columbia to buildings operated by other agencies and utilities to concessionaires.

Operating results and financial condition.—At the end of 1966, the net investment in the fund was \$5.4 million, composed of \$3.5 million appropriated, \$7.8 million capitalized assets, \$2.1 million retained earnings, less \$8 million provision for unfunded leave liability.

¹ Balances of selected resources are identified on the statement of financial condition.

Construction service activities consisting of preparation of drawings and specifications for the construction or alteration of public buildings; supervision of construction and alteration activities; and surveys and test borings performed in connection with the acquisition of Federal building sites; and other related services are financed by this fund on a reimbursable basis from funds appropriated, transferred, or advanced to General Services Administration (40 U.S.C. 296).

Operations.—Initial financing of this fund provides for salaries and related expenses of all personnel engaged in architectural and engineering services in connection with buildings design and construction, both departmental and field. Estimates for 1967 and 1968 cover the GSA public building construction program, the repair and improvement program, and additional workload in connection with projects assigned to GSA by other Federal agencies.

Operating results.—Retained earnings were increased in 1966 to approximately \$526 thousand and will be maintained at that level.

This appropriation provides for (1) establishment of efficient supply property management practices throughout the Federal Government and (2) expenses of operating the worldwide supply system through which commercial-type commodities are sold to Government agencies and cost-type contractors from depot stocks, or by direct delivery from suppliers, whichever is more economical and meets the needs of the Government. Except for customer orders placed directly with suppliers under Federal supply schedule contracts, most of the purchases of commodities are financed initially from the General supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from suppliers are paid directly from funds of the requisitioning agency without involving the General supply fund. This appropriation also provides for the necessary expenses of carrying out Government-wide automated data management activities within the jurisdiction of the General Services Administration.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1966, \$51 thousand; 1967, \$62 thousand; 1968, \$52 thousand.

1. *Supply distribution.*—Stocks of commercial-type commodities are received, warehoused, and issued on a worldwide basis to Federal agencies through a national supply distribution system consisting of both wholesale and retail distribution facilities. Stores stock sales reflect a continuous increase as follows: 1964, \$287.8 million; 1965, \$343.9 million; 1966, \$422.8 million; 1967, estimated at \$427 million; and 1968, estimated at \$539 million.

2. *Procurement.*—Commodities are procured to maintain inventories at stores depots to insure availability in

advance of sales orders and for direct delivery to agencies. Term contracts for commercial-type commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages. Total procurement in 1966 was \$1,808.6 million; total procurement for 1967 is estimated at \$1,894.5 million; and 1968 total procurement is estimated to reach \$2,101 million.

3. *Inspection.*—Timely delivery of commodities of specified quality is assured by inspection and surveillance at contractors' plants or supply depots, by laboratory tests and analyses of samples prior to acceptance, and by contract administration assistance. In 1968 Quality control will inspect \$582 million of stores items, \$224 million nonstores items, and \$54 million of items procured from Federal supply schedules.

4. *Supply standardization.*—Qualitative requirements of Federal agencies are reflected in Federal specifications, Federal standards, and Federal item identifications which are mandatory for use in procurement. This activity also includes the responsibility of the General Services Administration to prescribe safety standards for automotive vehicles purchased by the Federal Government, as contained in Public Law 88-515, approved August 30, 1964.

5. *Supply management.*—In 1968, supply management activities will continue to make studies and recommendations on the supply systems of Federal agencies. Continued emphasis will be placed on priority support requirements of the Agency for International Development's programs in Southeast Asia. Also agreements between GSA and the Department of Defense on the governing of supply management relationships.

6. *Automated data management services.*—During 1968, the resources for this program will be devoted to economic feasibility studies leading toward establishment of equipment pools and service centers for multiagency use, development of a Government-wide automatic data processing management information system, conducting feasibility studies to determine economical acquisition of Federal Government ADP equipment now being leased, and the identification and utilization of excess and surplus ADP equipment, thereby minimizing the purchase of such equipment.

A supplemental appropriation for 1967 is anticipated for separate transmittal.

This proposed appropriation will provide initial capital for the Automatic Data Processing Fund authorized by Public Law 89-306, approved October 30, 1965.

The capital is essential to implement the congressional direction set forth in the legislation "To provide for the efficient purchase, lease, maintenance, operation and utilization of automatic data processing equipment by Federal departments and agencies."

PERSONAL PROPERTY ACTIVITIES—Continued

Public enterprise funds—Continued

AUTOMATIC DATA PROCESSING FUND—Continued

This fund, when fully operative, will finance, on a reimbursable basis, a Government-wide automatic data processing operation for the Federal Government including, but not limited to: (1) the procurement by lease, purchase, transfer or otherwise of automatic data processing equipment; (2) maintenance of automatic data processing equipment; (3) establishment and operation of automatic data processing service centers and (4) establishment and operation of automatic data processing resource sharing pools, including programing and other services.

The proposed \$10 million for the Automatic Data Processing Fund is to provide funds for the initial effort in carrying out this objective. This will permit the purchase of only 14 of the approximately 1,400 computer systems presently being leased by the Government. Preliminary calculations show that savings generated in 3 to 4 years will exceed the entire amount of capital requested for this fund.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Related operating expenses are provided for under the appropriation Operating expenses, Federal Supply Service.

Also financed by the fund and reimbursed by using agencies are the operations of interagency motor vehicle pools established in areas of high vehicle density and the rehabilitation and repair of furniture and equipment.

Budget program.—The estimate provides for continued increases in sales to military and civilian agencies in accordance with the national supply system concept. The estimate also contemplates the activation of additional motor vehicle pools.

1. **Supply operations**—(a) *Stores, regular.*—Stocks of common-use commodities are purchased in volume and stored in supply depots for issue to Government agencies. From an all-time high of \$423.9 million in 1966, sales are estimated to increase to \$482 million and \$539 million in 1967 and 1968, respectively.

(b) *Stores, direct delivery.*—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply and delivered directly to the customer. Sales were \$49.2 million in 1966, and are estimated to increase to \$67.5 million in 1967 and \$75 million in 1968.

(c) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to using agencies. Sales through the fund are expected to increase from \$194.5 million in 1966 to \$249 million in 1967 and \$256.4 million in 1968.

2. **Export operations.**—Stores and nonstores items are shipped to oversea customers. Receipts to the fund covering packing, transportation costs, and other reimbursable services are expected to increase from \$25.2 million in 1966 to \$40.6 million in 1967 and \$44.4 million in 1968.

Equipment rental.—Operating, administrative, and ADP equipment is purchased and charged on an accrual basis to the using activities. Receipts are estimated to increase from \$2.2 million in 1966 to \$3.1 million in 1967, and \$3.9 million in 1968.

3. **Rehabilitation and repair of furniture and equipment.**—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are expected to decrease from \$2.8 million in 1966 to \$2 million and \$1.8 million in 1967 and 1968, respectively, due to greater emphasis on direct payments from agencies to contractors.

4. **Motor pools.**—Services are provided to agencies through a system of interagency motor pools. Sales are estimated to increase from \$39.3 million in 1966 to \$43.7 million in 1967 and \$44.8 million in 1968.

Other revenue and expense.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1968 is estimated at \$350.2 million consisting of \$245.9 million direct appropriations, \$98.7 million donated assets, \$0.6 million capitalized surplus, and retained earnings of \$5 million with \$0.1 million deducted for long-term leave liability.

Upon establishment of interagency motor pools, additional donated assets arising from transfers of motor vehicles from other agencies will be capitalized in the fund.

Any operating surplus, as determined by the General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payment to be so made in 1967 is \$8 million. A supplemental appropriation for 1967 is proposed for separate transmittal.

¹ Includes capital outlay as follows: June 30, 1966, \$105 thousand; 1967, \$112 thousand; 1968, \$125 thousand. Excludes prior year adjustments of \$9 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$129 thousand (1966 adjustments, -\$27 thousand); 1966, \$343 thousand; 1967, \$343 thousand; 1968, \$343 thousand.

This appropriation provides for basic operations dealing with management of the Government's archives and records and for operation of presidential libraries.

The estimate for 1968 is \$274 thousand more than 1967 financing. Of this amount, \$220 thousand is required to handle increased transfers of records from agencies and increased records reference service demands in the 14 Federal records centers; \$34 thousand is requested for Presidential libraries; and the remainder, \$20 thousand, is requested for increased support activities.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1966, \$65 thousand; 1967, \$55 thousand; 1968, \$55 thousand.

In 1968 records in custody of the National Archives and Federal records centers will total almost 10 million cubic feet which represents 40% of the total Federal records. Reference services will total 6.6 million, a dramatic increase from 5.3 million in 1965 and 6.1 million in 1966.

1. *Records management and centers.*—The workload requirements in the 13 regional records centers and in the National Personnel Records Center continue to increase,

RECORDS ACTIVITIES—Continued

General and special funds—Continued

OPERATING EXPENSES, NATIONAL ARCHIVES AND RECORDS SERVICE—Continued

reflecting agencies' demands for service. In 1968, agencies will transfer 800,000 feet of inactive records to the regional centers, where a total of 3.8 million reference services will be rendered from all holdings. The national center in St. Louis, holding some 80 million case files on separated military and civilian personnel, will furnish an estimated 2.2 million reference services, an increase of 32% over 1965, and 19% over 1966.

In 1966, the existence and operation of Federal records centers accounted for a governmentwide cost avoidance of \$11 million; the value of space and equipment released by the transfer of records to centers, less the low cost of storing records in Federal records centers.

The records management activity helps agencies control their paperwork load, which for all of the Federal Government consists of some 8 to 10 billion pages a year. In 1966, GSA's direct assistance to agencies produced a net first-year savings of \$10.8 million including 190,000 man-days saved or released for other duty. One major method by which assistance is rendered to agencies is records management surveys, the number of which is expected to increase from 57 in 1967 to 66 in 1968.

2. *Archives and related services.*—Continued increases are expected in reference service to Government agencies and to the public and in assistance to agencies in the appraisal of records. The level of other archival activities will remain relatively constant, making steady progress against backlogs of work in records arrangement, description, and microfilm publication.

The workload of the Federal Register will increase some 11,000 manuscript pages, largely regulatory material of the Federal agencies.

Initial staffs for the Kennedy and Johnson Libraries are included in the 1968 estimate.

OPERATING EXPENSES, TRANSPORTATION AND COMMUNICATIONS
SERVICE

For necessary expenses of transportation, communications, and other public utilities management and related activities, as provided by law, including services as authorized by [section 15 of the Act of August 2, 1946 (5 U.S.C. §55a), \$5,900,000] §109, \$8,000,000. (Independent Offices Appropriation Act, 1967.)

90 Expenditures.....	5,833	6,080	5,995

¹ Excludes adjustments of prior year costs of -\$1 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$177 thousand (1966 adjustment \$1 thousand); 1966, \$9 thousand; 1967, \$9 thousand; 1968, \$9 thousand.

This appropriation provides for improving management of transportation, communication, and public utility services in all civilian agencies, and for providing specialized services to civilian agencies in each of these fields.

Fair value of personal property received from other appropriations or funds without cost for use by the General Services Administration is as follows: 1966, \$2 thousand.

1. *Transportation services.*—Guides and procedures and educational programs for improving transportation practices and operations in civilian agencies are developed; reasonable rates are negotiated with carriers; and procurement assistance, rates, routing, and related services are supplied to executive agencies. The estimated workload in 1968 provides for increases in traffic services ranging from a 3% increase in shipments processed to one of 44% in the negotiations of rates.

2. *Communication services.*—Networks are designed and engineered for a Federal communications system for general and national defense use, compatible with the National Communications System. Studies of equipment utilization, service, rates and economic factors are made, contracts negotiated, and management and control of operations are provided. The projected program for 1968 provides for the management of the Federal Telecommunications System financed through the Federal telecommunications fund whose sales volume will increase from \$85.5 million in 1967 to an estimated \$95.6 million in 1968, and for increasing emphasis on the management of governmentwide communications.

3. *Motor vehicle management.*—Governmentwide policies and procedures are developed to improve the overall efficiency of the operation of the Government-owned motor vehicle fleet, and to assist the various Federal agencies with motor equipment management. The program for 1968 contemplates 20 additional motor equipment studies of agencies' managerial and operational policies. Implementation of the recommendations of such studies have to date reduced equipment investment by about \$2.9 million and operating costs by \$4.6 million.

4. *Public utilities services.*—Negotiations are conducted with public utilities companies on behalf of executive agencies and technical assistance is rendered in connection with regulatory proceedings. In 1968 continued emphasis will be placed on the above areas, where in 1966, savings to the Government of \$1,349,306 accrued.

Representation services are provided the Department of Defense in public utility cases generally and in proceedings relating to the semiautomatic ground environment system (SAGE).

¹ Balances of selected resources are identified on the statement of financial condition.

This fund, authorized by Public Law 87-847, approved October 23, 1962, finances, on a reimbursable basis, a telecommunications system for the Federal Government operationally compatible with military communications systems. The system provides local and long distance voice, teletype, data, facsimile, and other communications services.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from available appropriations and funds of any agency, organization, or persons for telecommunications services and facilities made available to them.

Initial capital of \$9 million was appropriated by Public Law 88-25, approved May 17, 1963. This sum may be increased by donations of supplies and equipment.

Budget program.—The estimate provides for a continued increase in volume and quality of communications services provided to executive agencies of the Government. Total sales are estimated at \$85.5 million in 1967 and \$95.6 million in 1968.

1. *Voice program.*—Provides for a telephonic system which will enable personnel in each Federal agency office to communicate directly on a machine-to-machine or station-to-station basis with any other agency office in the Nation. The system will provide day-to-day service as well as incorporate features which would be necessary in emergency situations. The program for 1968 contemplates a sales level of \$78.6 million, an increase of about 6% over 1967.

2. *Record program.*—A common unified system to satisfy record communications requirements of all Federal civil agencies provides machine-to-machine service for transmission of information by data, teletypewriter, facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. The continued development of the advanced record system is reflected in the projected sales increase of \$5.2 million or 75% in 1968 over 1967.

3. *Circuit procurement program.*—Provides for centralized procurement of circuits while at the same time permitting each agency to maintain operational control over its own circuits, thereby obtaining benefit of multiple tariff offerings of the commercial carriers. The sales program increases from \$3.9 million to \$4.4 million in 1968.

4. *Special programs.*—Provides for an effective communications security program for civil agencies in keeping with objectives of the U.S. communications security plan, and for a consolidated program of procurement and maintenance of equipment to implement such security plans. These programs insure that the Federal Telecommunications System will remain operational in the event any portion of the normal system is disabled or destroyed.

Operating results and financial condition.—At the end of 1967 the net investment in the fund is estimated to be \$7.1 million, and includes \$9 million appropriated, \$0.3 million donated assets capitalized, less \$0.5 million unfunded leave liability. Following the close of each fiscal year any surplus earnings, after making provision for prior year losses, if any, are to be deposited in miscellaneous receipts of the Treasury.

PROPERTY MANAGEMENT AND DISPOSAL ACTIVITIES

General and special funds:

OPERATING EXPENSES, PROPERTY MANAGEMENT AND DISPOSAL SERVICE

For expenses, not otherwise provided for, necessary for carrying out the functions of the Administrator with respect to the utilization of excess property; the disposal of surplus property; the rehabilitation of personal property; the national stockpile established by the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98-98h); the supplemental stockpile established pursuant to section 104(b) of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 456, as amended); the national industrial reserve established by the National Industrial Reserve Act of 1948 (50 U.S.C. 451-462); including services as authorized by 5 U.S.C. 3109, and reimbursement for security guard services, \$27,440,000, to be derived from proceeds from transfers of excess property, disposal of surplus property, and sales of stockpile materials: Provided, That during the current fiscal year the General Services Administration is authorized to acquire leasehold interests in property, for periods not in excess of twenty

years, for the storage, security, and maintenance of strategic, critical, and other materials in the national and supplemental stockpiles: Provided further, That during the current fiscal year there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with section 6 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e), may be transferred without reimbursement to the national stockpile: Provided further, That during the current fiscal year materials in the inventory maintained under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061-2166), and excess materials in the national stockpile and the supplemental stockpile, the disposition of which is authorized by law, shall be available, without reimbursement, for transfer at fair market value to contractors as payment for expenses (including transportation and other accessorial expenses) of refining, processing, or otherwise beneficiating materials, or of rotating materials, pursuant to section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b).

Note—Estimate is for activities previously carried under "Operating Expenses, Utilization and Disposal Service, and Strategic and Critical Materials". The amounts obligated in 1966 and 1967 are shown in the schedule as comparative transfers.

90 Expenditures.....			26,100

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$2,476 thousand (1966 adjustments, -\$715 thousand); 1966, \$1,609 thousand; 1967, \$1,977 thousand; 1968, \$2,144 thousand.

The Property Management and Disposal Service has the responsibility for: (a) acquisition and administration of national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act; (b) custody and disposal of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act; (c) administration of utilization and disposal functions of the General Services Administration with respect to excess and surplus real and personal property; (d) rehabilitation of personal property; and (e) administration of the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act.

The estimate for 1968 provides for storage, maintenance, inspection, and upgrading of stockpiled materials and disposal of those materials excess to objectives, the administration of the industrial equipment reserve activities, and continuing emphasis on reuse of existing real and personal property to obviate new capital and procurement outlays, with prompt disposal of those items no longer required.

The estimate for 1968 provides for conduct of these programs with a reduction of \$1,621 thousand under the 1967 level. It is estimated that approximately two-thirds of the appropriated amount would be derived from sales of stockpile materials and the remainder from transfers of excess and disposal of surplus property.

1. *Inventory management.*—Covers the cost of acquiring, upgrading, rotating, inspecting, and maintaining materials in the national and supplemental stockpiles, administration of the national industrial equipment reserve, providing protection and maintenance of excess, surplus, and national industrial reserve real properties, and payments in lieu of taxes on certain properties as required by law. No rotation of materials is planned for 1968. If unexpected circumstances should require rotation, however, any cash receipts from the sale of materials to be rotated would be available, pursuant to the Strategic and Critical Materials Stock Piling Act, for application against the cost of replacement materials.

a. *Strategic and critical materials.*—Strategic and critical materials amounting to approximately 42.7 million tons and valued at \$6.3 billion were stored at 152 locations as of June 30, 1966. Distribution of depot storage costs for these materials is as follows (in thousands of dollars):

	1966 actual	1967 estimate	1968 estimate
Recurring costs	7,515	7,472	7,307
Nonrecurring	1,312	1,790	1,198
Relocation, transportation, and handling ..	130	600	400
Total cost or estimate	8,957	9,862	8,905

In addition to depot storage, this activity provides for the acquisition of new materials, upgrading of present materials, as well as inspection and stockpile management services relative to maintaining the national and supplemental stockpiles.

b. *Real property.*—Physical care, handling, protection, maintenance, and repairs of certain excess and surplus real properties pending disposal and payments in lieu of taxes on certain properties as required by law are also provided.

c. *Industrial reserve.*—Administration is also provided by this activity on a national industrial equipment reserve inventory of 10,194 tools as of June 30, 1966.

2. *Property disposal.*—Covers the cost of disposal of strategic materials excess to objectives, utilization of excess and disposal of surplus real property, including national industrial reserve properties, utilization, donation, and sale of surplus and exchange/sale personal property.

a. *Strategic and critical materials.*—Provides for the disposal of excess strategic and critical materials. Sales commitments are estimated to be \$600.1 million and \$810.5 million in 1967 and 1968 respectively.

b. *Real property.*—This activity provides for utilization of excess and disposal of surplus real property, including national industrial reserve properties. The estimate for 1968 provides for utilization transfers of 130 properties,

sale of 300 surplus properties, and other surplus disposals (donations, etc.) totaling 250 properties, the same as in 1967. The selling price of real property and rental revenue in 1968 is estimated at \$81 million.

c. *Personal property.*—This activity provides for (a) utilization of excess personal property, thereby reducing new procurement; (b) donation of surplus personal property for public benefit purposes; (c) sale of surplus and exchange/sale personal property; and (d) rehabilitation of personal property owned by the Government to extend its useful life. The estimate for 1968 provides for utilization transfers and donations totaling \$1,140 million at acquisition cost and proceeds from sale of surplus and exchange/sale property totaling \$13 million, the same as 1967. Rehabilitation of personal property will amount to \$120 million at acquisition cost, an increase of \$20 million over 1967.

3. *Research and planning.*—Provides program planning and coordination of all activities of the Property Management and Disposal Service. Develops long-range disposal plans for materials no longer required for stockpile objectives and coordinates plans with affected sources in industry and Government. Responsible for data collection and economic analyses of all factors bearing on stockpile materials—supply, demand, consumption, prices, etc. This activity is also responsible for the appraisal of excess and surplus real property as well as the coordination of regulations, standards, and methods governing such appraisals.

4. *Service direction.*—General direction over all programs assigned to the Property Management and Disposal Service is provided by the Commissioner and an executive staff, and in the regions by 10 regional directors who are responsible for carrying out program operations in these areas.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts from disposals within each year in accordance with 40 U.S.C.A. 485(b). Also paid from such proceeds is the direct expense in connection with utilization of excess real and related personal property (68 Stat. 1051). Properties sold by auctioneers and brokers totaled 9 in 1966 and are estimated at 15 in 1967 and 1968.

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1968 the servicing of leases and conditional sales agreements covering two facilities, and three other miscellaneous assets. Financial and legal servicing will also be required on approximately 20 cases in the hands of the Department of Justice under the complex food subsidy program. In 1968, administrative expenses in connection with financial and legal services will be absorbed in funds available from regular GSA programs.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$315 thousand (1966 adjustment -\$164 thousand); 1966, \$93 thousand; 1967, \$100 thousand; 1968, \$100 thousand.

This management fund provides financing of administrative operations services on a centralized and integrated basis for all General Services Administration programs:

1. *Administration.*—(a) *Financial services* consisting of budget, accounting and reporting, credit, insurance and related financial services; (b) *Investigative services* consisting of compliance, investigations, security and a GSA-wide audit program; (c) *Manpower and management services* consisting of a comprehensive personnel program, office services, in-depth program evaluations, management improvement and cost reduction studies, and overall management of printing and centralized field duplicating services for which the financing is arranged from a working capital fund; (d) *Program and policy planning staff* which provides planning and coordination of all aspects of General Services Administration implementation of the governmentwide planning-programming-budgeting system; (e) *Federal procurement regulations staff* responsible for coordinating the development of Government-wide and agency-wide policies and procedures covering the procurement of personal property and nonpersonal services including construction and leasing; (f) overall management of internal automatic data processing is provided under this head; however, financing of all GSA automatic data processing operations is through Advances and reimbursements, general activities.

2. *Legal services* are performed for all programs of GSA in the fields of real property, personal property, archives and records, transportation and communications, strategic and critical materials stockpiling, and administration.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1966, \$2 thousand; 1967, \$1 thousand; 1968, \$1 thousand.

Estimated amounts available for 1968 from the various sources and comparable data for 1966 and 1967 are (in thousands of dollars):

¹ Balances of selected resources are identified on the statement of financial condition.

Central blueprinting, photostating, duplicating, and distribution services are financed by a working capital fund pending reimbursements (40 U.S.C. 293). The Joint Committee on Printing, U.S. Congress, authorized the establishment of 10 field printing plants in GSA regional offices, in addition to the plant in Washington, D.C., to meet the needs of GSA and other Federal agencies. In addition 15 duplicating plants are now in operation, and it is anticipated that GSA will establish approximately 5 new or consolidated centralized duplicating plants each year for the next several years.

Operating results.—Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1966, a total of \$336 thousand has been deposited.

GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may be so transferred, with the approval of the Bureau of the Budget.

Appropriations to the General Services Administration under the heading "Construction, Public Buildings Projects" made in this Act shall be available, subject to the provisions of the Public Buildings Act of 1959 for (1) acquisition of buildings and sites thereof by purchase, condemnation, or otherwise, including prepayment of purchase contracts, (2) extension or conversion of Government-owned buildings, and (3) construction of new buildings, in addition to those set forth under that appropriation: *Provided*, That nothing herein shall authorize an expenditure of funds for acquisition, extension or conversion, or construction without the approval of the Committees on Appropriations of the Senate and House of Representatives.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be increased thereby more than 2 per centum: *Provided*, That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of \$2,000,000.

Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for (a) reimbursement to the General Services Administration for those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 479) or other applicable law, and (b) transfer or reimbursement to applicable appropriations to said Administration for rents and related expenses, not otherwise provided for, of providing subject to Executive Order 11035, dated July 9, 1962, directly or indirectly, suitable general purpose space for any such department or agency, in the District of Columbia or elsewhere.

No part of any appropriation contained in this Act shall be used for the payment of rental on lease agreements for the accommodation of Federal agencies in buildings and improvements which are to be erected by the lessor for such agencies at an estimated cost of construction in excess of \$200,000 or for the payment of the salary of any person who executes such a lease agreement: *Provided*, That the foregoing proviso shall not be applicable to projects for which a prospectus for the lease construction of space has been submitted to and approved by the appropriate Committees of the Congress in the same manner as for the public buildings construction projects pursuant to the Public Buildings Act of 1959. (*Independent Offices Appropriation Act, 1967.*)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

General and special funds:

RESEARCH AND DEVELOPMENT

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, supplies, materials, equipment; maintenance, repair, and alteration of

real and personal property; and purchase, hire, maintenance, and operation of other than administrative aircraft necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration, **[\$4,245,000,000]** \$4,324,500,000, to remain available until expended. (*42 U.S.C. 2451, et seq., 50 U.S.C. 151-160, 511-515; Independent Offices Appropriation Act, 1967; additional authorizing legislation to be proposed.*)

² Reimbursements from non-Federal sources are receipts for services performed on Communications Satellite Corporation projects (42 U.S.C. 2473).

The National Aeronautics and Space Administration was established October 1, 1958, pursuant to Public Law 85-568 (72 Stat. 426; 42 U.S.C. 2451), approved July 29, 1958, for the conduct of the nonmilitary space programs of the United States, including the exploration of space and its utilization for peaceful purposes, and to conduct and support advanced research and development related to space and aeronautics in support of both civilian and military requirements. This appropriation provides for research and development activities of the National Aeronautics and Space Administration as follows:

1. *Manned space flight.*—These estimates include the Apollo, Apollo applications, and Advanced mission studies programs. Funding provides for all NASA manned space flight missions, the development of the required space vehicles, and the study of advanced manned missions. The basic objective of the manned space flight program is to develop and provide a national capability for manned operations in space. This capability will be demonstrated by landing men on the moon and returning them safely to earth before the end of this decade.

(a) *Gemini.*—The Gemini program, which was budgeted for under this activity, has been completed. Two unmanned and 10 manned missions were flown; the final flight was accomplished in November 1966. All major program objectives were successfully accomplished. The Gemini program has greatly enhanced the Nation's manned space flight capability. Gemini missions have developed the basic techniques of space rendezvous and docking, as well as orbital maneuvers. They have demon-

strated our ability to conduct long-duration manned missions and extravehicular activity.

(b) *Apollo.*—The Apollo program is developing the capability to carry out major manned operations in space, including the national goal of landing men on the moon and returning them safely to earth within this decade. The first flight phase covers unmanned missions to qualify the launch vehicles and spacecraft in the space environment. The second phase includes long-duration manned earth-orbital flights and rendezvous maneuvers to validate the system for lunar missions. The third phase consists of lunar mission simulations leading to a manned lunar landing and return. During 1966 and 1967, activity has been marked by increased production, continued ground testing, and three successful unmanned Uprated Saturn I flight tests. Among the major Apollo milestones planned for 1967 are the first flight of a manned Command and Service Module and the first flight test of an unmanned Lunar Module, both launched by Uprated Saturn I vehicles. The first manned earth orbital rendezvous of an Apollo Command Module with the Lunar Module will be conducted. The flight phase of the Apollo Saturn V series will begin in 1967. In 1968, the emphasis will be on manned orbital flight operations to prepare for the manned lunar mission. The first flight test of an Apollo spacecraft capable of conducting the manned lunar landing is planned for 1968.

(c) *Apollo applications.*—The objective of this program is to extend our manned space flight capabilities through

engineering, medical, scientific, and technological experiments in space, building upon the Apollo program. The planned experiments, together with the advances in operational techniques, will exploit our manned flight capability for scientific, technological, and other fields of space activity. During 1967 and 1968, emphasis will be placed on the development and integration of experiments and systems, procurement of launch vehicles and spacecraft and establishment of mission operations requirements. In 1968, flights of selected payloads as alternates to the Apollo flights may be possible. The payloads used in the early missions will be stored in orbit for later reuse to minimize the cost of the program.

(d) *Advanced mission studies.*—The objectives of the advanced mission effort are to study present space systems for growth potential, to identify future systems requirements, and to establish valid technical information upon which future program decisions can be based. Manned earth orbital, lunar, and planetary mission studies will be continued. Emphasis will be given to defining systems capable of supporting long-term manned space missions.

2. *Scientific investigations in space.*—The objectives of this activity are to increase our knowledge of the earth, interplanetary space, the moon, the sun, the solar system, other stars and galaxies, and the effects of the space environment on living organisms. The flight systems used are sounding rocket probes, earth and lunar orbiting and landing spacecraft, and spacecraft designed for interplanetary missions.

(a) *Physics and astronomy.*—This program is composed of projects which have been designed to explore space near the earth and the interplanetary medium, to investigate the sun and its relationship to the earth, and to make observations of the stars and nebulae. The scientific instrumentation is carried on sounding rockets; on small Explorer-type satellites; on larger, more complex observatory satellites; on interplanetary probes in heliocentric orbit; and on manned spacecraft.

(b) *Lunar and planetary exploration.*—Unmanned exploration of the moon's surface will be continued with the Surveyor spacecraft which landed television equipment and other instruments on the moon in June 1966 and the Lunar Orbiter which photographs and transmits to earth detailed closeup pictures of large areas of the moon. Initial objectives of the Orbiter were achieved by flights in August and November 1966. Mariner flights to Venus in 1967 and to Mars in 1969 are planned. In addition, a Mariner spacecraft flight to Mars in 1971 will permit direct measurement of the Mars atmosphere by means of a small capsule that will enter the atmosphere and penetrate to the surface. Full scale design and development of Voyager will begin, aimed toward an initial mission in 1973 which will orbit Mars and land a capsule to obtain surface data and search for extraterrestrial life.

(c) *Bioscience.*—This program will continue to investigate the effects of weightlessness, radiation, and other space phenomena on animals, plants, and other biological organisms. Life detection systems including the Automated Biological Laboratory are being studied and developed for Voyager planetary missions. Flight experiments are planned to be carried on Biosatellite spacecraft and on manned flights.

(d) *Launch vehicle development.*—This program consists of studies of future launch vehicle requirements and alternatives, and product improvements on existing launch vehicles.

3. *Space applications.*—The objectives of this activity include development of meteorological, technological, and geodetic satellites, and studies of communication and natural resources satellite systems. Specific objectives are to improve satellite and instrumentation technology; to provide data for atmospheric and natural resources research; to participate in design and development of operational satellite systems as required; and to study advanced satellite systems capable of other applications. Flight experiments and activities related to these objectives will be carried out with the Tiros, Nimbus, and Applications Technology Satellites.

4. *Space technology.*—This activity comprises research and development work on space vehicle systems and related equipment and components for space missions. Emphasis is placed on space vehicle and propulsion systems technology. Studies of the space environment effects on man will be expanded. The improvement of electronic systems for control, data acquisition, and communication will be pursued in 1968. Research will be continued on problems concerned with launch, atmospheric reentry, and recovery of space vehicles. Most of this research is conducted at NASA laboratories and special ground based test facilities.

5. *Aircraft technology.*—The objective of this activity is to extend the national capability in aeronautics, and to support other Government agencies having aeronautical interests and responsibilities, such as the Departments of Defense and Transportation. In 1968, aeronautical research will continue in support of supersonic transport and military aircraft development. This effort will include use of the X-15 and XB-70 aircraft for flight research. The development of technology for short and vertical takeoff and landing aircraft will be continued. Research in aerodynamics, structures and loads, propulsion, and aircraft operations will be continued.

6. *Supporting activities.*—The three programs grouped in this activity provide general support for the attainment of NASA mission objectives.

(a) *Tracking and data acquisition.*—Operation and equipment of the stations of the NASA tracking and data acquisition networks are provided for here, as well as research and development to increase the capability of the specialized ground equipment.

(b) *Sustaining university program.*—This program includes training grants awarded to graduate science and engineering students, and research and facility grants to universities.

(c) *Technology utilization.*—The primary objective of this program is to facilitate and accelerate the transfer into the nongovernmental sectors of the economy of new advances in technology generated by NASA programs.

This appropriation provides for contractual services for the design, construction, and modification of facilities; the purchase of land and equipment related to construction and modification; and advance design of facilities planned for future authorization. The principal projects in the 1968 program are described below:

1. *Manned space flight*.—This activity includes funding requirements for operational and testing facilities, utility installations, and additions and modifications to existing facilities, to support the manned space flight programs; access roads; and installation of water pollution control and treatment systems pursuant to Executive Order No. 11258 of November 17, 1965. NASA field centers involved are the John F. Kennedy Space Center, NASA, Kennedy Space Center, Fla.; the George C. Marshall Space Flight Center, Huntsville, Ala.; the Manned Spacecraft Center, Houston, Tex.; and the Michoud Assembly Facility, New Orleans, La.

2. *Scientific investigations in space*.—The estimates for this activity provide for modifications to launch facilities at the John F. Kennedy Space Center; utility modifications and installations at the Goddard Space Flight Center, Greenbelt, Md.; the repair and alteration of the power and steam distribution systems at the Wallops Station, Wallops Island, Va.; a systems development laboratory at the Jet Propulsion Laboratory, Pasadena, Calif.; and a space sciences research facility at the Ames Research Center, Moffett Field, Calif.

3. *Space applications*.—No 1968 projects included.

4. *Space technology*.—Funds for this activity provide for a research laboratory and support facility at the Electronics Research Center, Cambridge, Mass.; and land acquisition at the Lewis Research Center, Cleveland, Ohio, and the Plum Brook Station, Sandusky, Ohio.

5. *Aircraft technology*.—Funds under this activity provide for alterations to a wind tunnel at the Ames Research Center.

6. *Supporting activities*.—This activity includes funds for facility planning and design; a special purpose antenna at the Goldstone Complex, Ft. Irwin, Calif.; and the addition of a standby powerplant at the Jet Propulsion Laboratory.

ADMINISTRATIVE OPERATIONS

For necessary expenses, not otherwise provided for, of the operation of the National Aeronautics and Space Administration, including uniforms or allowances therefor, as authorized by [the Act of September 1, 1954, as amended] law (5 U.S.C. [2131] 5901; 80 Stat. 299); minor construction; supplies, materials, services, and equipment; awards; purchase of not to exceed three and hire, maintenance and operation of administrative aircraft; purchase and hire of motor vehicles (including purchase of not to exceed [thirty-one] twenty-three passenger motor vehicles, [of which sixteen shall be] for replacement only); and maintenance, repair, and alteration of real and personal property; [\$640,000,000] \$671,300,000: Provided, That contracts may be entered into under this appropriation for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year. (42 U.S.C. 2451, et seq., 50 U.S.C. 151-160, 511-515; Independent Offices Appropriation Act, 1967; additional authorizing legislation to be proposed.)

² Reimbursements from non-Federal sources are receipts for services performed on Communications Satellite Corporation projects (42 U.S.C. 2473) and for personal property sold for replacement purposes (40 U.S.C. 481).

This appropriation provides for the expenses of personnel and travel, and for supporting costs of NASA installations.

Responsibility for the manned space flight activity is located at the John F. Kennedy Space Center, NASA, Kennedy Space Center, Fla.; Manned Spacecraft Center, Houston, Tex.; and Marshall Space Flight Center, Huntsville, Ala. The scientific investigations in space and space applications activities are concentrated principally at the Goddard Space Flight Center, Greenbelt, Md., and the Wallops Station, Wallops Island, Va. The space technology activity is conducted at all major NASA installations.

Other locations to which portions of the above activities are assigned include: Ames Research Center, Moffett Field, Calif.; Electronics Research Center, Cambridge, Mass.; Flight Research Center, Edwards, Calif.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; and the Space Nuclear Propulsion Office, Germantown, Md.

Aircraft technology work is carried out at the Ames, Flight, Lewis, and Langley research centers.

Program-wide support and management are provided by NASA Headquarters, Washington, D.C.; the Western

Support Office, Santa Monica, Calif.; and the NASA Pasadena Office, Pasadena, Calif. Support activities for tracking and data acquisition requirements are performed at the Manned Spacecraft Center, Goddard Space Flight Center, and Wallops Station.

The following table reflects the distribution of the direct obligations by installation:

GENERAL PROVISIONS

Not to exceed 5 per centum of any appropriation made available to the National Aeronautics and Space Administration by this Act may be transferred to any other such appropriation.

Not to exceed \$35,000 of the appropriation "Administrative Operations" in this Act for the National Aeronautics and Space Administration shall be available for scientific consultations or extraordinary expense, to be expended upon the approval or authority of the Administrator and his determination shall be final and conclusive.

【No part of any appropriation made available to the National Aeronautics and Space Administration by this Act shall be used for expenses of participating in a manned lunar landing to be carried out jointly by the United States and any other country without the consent of the Congress.】

【Any appropriation in this Act to the National Aeronautics and Space Administration may initially be used during the current fiscal year to finance procurement for which funds have been provided in any other appropriation available to the Administration and appropriate adjustments between such appropriations shall subsequently be made in accordance with generally accepted accounting principles.】

VETERANS ADMINISTRATION

General and special funds:

GENERAL OPERATING EXPENSES

For necessary operating expenses of the Veterans Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law; not to exceed \$1,000 for official reception and representation expenses; purchase of one passenger motor vehicle (medium sedan for replacement only) at not to exceed \$3,000; hire of passenger motor vehicles; and reimbursement of the General Services Administration for security guard services; **[\$159,330,000]** \$184,342,000: *Provided*, That no part of this appropriation shall be used to pay in excess of twenty-two persons engaged in public relations work.

For an additional amount for "General operating expenses," \$19,320,000. (5 U.S.C. chaps. 1-7, 21-89; 6 U.S.C. 14-15; 22 U.S.C. 1136 (4) and (5) and 1138; 24 U.S.C. 30; 28 U.S.C. 1823, 2672; 31 U.S.C. 530a, 686; 38 U.S.C. 111, 112; chaps. 3, 41, 55, 57, 59, 71; 41 U.S.C. 5; 72 Stat. 1262-1264; 74 Stat. 793-798; *Independent Offices Appropriation Act, 1967; Supplemental Appropriation Act, 1967.*)

Note.—Includes \$1,300 thousand for activities previously carried under "Medical Administration and Miscellaneous Operating Expenses". Amounts obligated in 1966 and 1967 are shown in the schedules as comparative transfers.

¹ Includes capital outlay as follows: 1966, \$1,350 thousand; 1967, \$826 thousand; 1968, \$2,636 thousand.

² Selected resources as of June 30 are as follows:

	1965	1966	1967	1968
Unpaid undelivered orders.....	847	1,056	1,056	1,056
Advances.....	2	18	18	18
Total selected resources.....	849	1,074	1,074	1,074

This appropriation provides for the administration of all nonmedical veterans benefits, operation of the Department of Data Management, and the executive direction of the agency.

The request for new obligational authority of \$184.3 million in 1968 is \$2.1 million above the amount required for 1967. This increase is associated primarily with the following items:

Costs of \$1.3 million formerly funded by Department of Medicine and Surgery appropriations resulting from a realignment of functions in Central Office.

An additional investment in data processing capability of \$1.6 million, primarily for purchasing computer equipment.

Activation of the special research project on validation of the rating schedule, \$1 million.

The above items coupled with normal salary increases (\$1.5 million) have been kept to the \$2.1 million increase through cost reduction actions, reduced workload, and increased employee productivity.

1. *General administration.*—In addition to the executive direction of the agency, this activity covers the Board of Veterans Appeals, which decides all cases (other than insurance cases) of appeals to the Administrator on claims involving benefits under veterans legislation.

2. *Data management.*—This activity is responsible for managing all automatic data processing operations. Further development of ADP applications and improve-

General and special funds—Continued

GENERAL OPERATING EXPENSES—Continued

ment of the systems capability will improve service to veterans, provide better information for management and research, and reduce operating costs.

3. *Veterans benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads (in thousands):

	1965 actual	1966 actual	1967 estimate	1968 estimate
New claims (disability and death).....	292	289	310	325
Reopened claims (disability and death).....	301	298	290	298
Dependency and income claims (disability and death).....	1,043	817	943	960
Cases involving guardianship or fiduciary relationship.....	567	583	609	620
Field examinations completed.....	187	189	187	187

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined and guidance is furnished to trainees. Approximately \$19 million of the total cost of the compensation, pension and education program is related to the administration of the education activity in 1968. Trainees (average number) are expected as follows:

	1965 actual	1966 actual	1967 estimate	1968 estimate
Readjustment training.....		797	240,000	286,000
Sons and daughters.....	15,722	16,290	16,400	15,700
Vocational rehabilitation.....	6,730	5,965	8,000	7,400

Loan guaranty operations include issuance of certificates of loan guaranty or insurance, servicing of loans reported in default, payment of claims from lenders on defaulted loans, acquisition, management and disposal of property when necessary to protect the Government's interest, making of direct loans to veterans in certain areas, and providing assistance to specified paraplegic veterans in acquiring specially adapted housing. Key workload forecasts are as follows (in thousands):

	1965 actual	1966 actual	1967 estimate	1968 estimate
Guaranteed or insured loans closed.....	171	151	209	195
Direct loans closed and fully disbursed.....	12	6	12	12
Defaults reported on GI loans.....	108	105	108	111
Claims vouchered for payment.....	24	22	22	22
Property acquisitions.....	30	28	28	29
Paraplegic grants disbursed.....	.5	.5	.7	.7

Approximately 6 million veterans are insured under the U.S. Government or National service life insurance programs as indicated by the following forecast (in thousands):

POLICIES IN FORCE AT END OF YEAR

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$238 thousand (1966 adjustments, -\$29 thousand); 1966, \$177 thousand; 1967, \$117 thousand; 1968, \$117 thousand.

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans, and broad objectives, and provides executive direction for all agency medical programs.

2. *Postgraduate and inservice training.*—This provides for tuition and registration payments, lecturer fees, travel expenses and training materials incidental to continuing education programs for professional medical and administrative staff. This also serves as a media for disseminating information on medical advances resulting from research efforts.

3. *Exchange of medical information.*—This provides for entering into agreements with medical schools, hospitals, research centers and individual institutions and members of the medical-scientific community under which physicians at hospitals not affiliated with medical schools will maintain closer contact with such schools and other primary sources of medical information.

1. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions on a contract basis, whichever is more advantageous or economical.

In addition to the amounts provided by direct appropriation for the medical research program in 1966, \$12,686,300 was available in 1966 from the National Institutes of Health and from other organizations sponsoring research. Of this amount, \$1,270,200 was granted directly to the Veterans Administration; the remaining \$11.4 thousand was granted to various medical schools

General and special funds—Continued

MEDICAL AND PROSTHETIC RESEARCH—Continued

with which VA hospitals are affiliated. It is anticipated that approximately the same level of funding from these outside sources will be available in fiscal years 1967 and 1968. This estimate does not include funding of research construction projects which are a part of the construction of hospital and domiciliary facilities appropriation.

2. *Prosthetic research.*—This is a research program to develop and test prosthetic, orthopedic, and sensory aids for the purpose of improving the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$20,063 thousand (1966 adjustments, -\$293 thousand); 1966, \$29,269 thousand; 1967, \$29,269 thousand; 1968, \$29,269 thousand.

This appropriation provides for the cost of care and treatment of eligible beneficiaries in Veterans Administration hospital, domiciliary and nursing care beds, outpatient clinics, contract care facilities, and State homes.

To be eligible for inpatient care and treatment, a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or, within the limits of Veterans Administration facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital, nursing home or domiciliary care. Outpatient medical and dental treatment is provided to veterans with service-connected disabilities by staffs of Veterans Administration outpatient clinics and by physicians and dentists participating in the hometown medical care program; to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training; pensioners of nations allied with the United States in World War I and in World War II; and veterans of the Spanish-American War, Indian Wars, Boxer Rebellion, and Philippine Insurrection. Veterans also are provided examinations in outpatient clinics for purposes of rating for compensation and pension, insurance, and determining their need for hospitalization or domiciliary care.

Medical services may be furnished on an outpatient basis for non-service-connected disabilities to veterans who have been determined to need hospital care and whose admission to a hospital has been scheduled, or who require post-hospital treatment to complete hospital care.

Increases in 1968 cover (a) salary adjustments for pay raise legislation, wage board and within-grade increases, (b) continued activation of new and replacement hospitals located at Charleston, S.C., and Gainesville, Fla., and the initial activation of Miami, Fla., and San Juan, P.R., (c) full operation of the 4,000 nursing home care beds authorized by Public Law 88-450, (d) the extension of new medical services approved in the prior fiscal year, (e) initial activation of new medical services in existing facilities, (f) increased staffing levels for correction of deficiencies and improved quality of care, (g) expansion in the number of medical residents and other trainees, (h) increased usage of drugs, utilities, communications, linens, and prosthetic appliances, (i) increased medical and dental fees and contract facility rates, (j) increased maintenance and repairs including minor improvements, and (k) increased reimbursements to the Department of Data Management for data processing services; and to the Civil Service Commission for the Department's pro rata share of costs for the operation of the Interagency Boards of Examiners.

1. *Maintenance and operation of VA facilities—(a) Neuropsychiatric hospitals.*—This covers the operation of neuropsychiatric hospitals. The estimated costs for 1968 exceed 1967 by \$6,631 thousand. Estimated operating levels are:

	1966 actual	1967 estimate	1968 estimate
Average number of operating beds.....	55,592	54,205	53,425
Average daily patient load.....	52,081	51,183	50,204
Average employment (net, including consultants).....	39,111	39,475	39,625

(b) *General hospitals.*—This covers the operation of general hospitals. The estimated costs for 1968 exceed 1967 by \$43,228 thousand. Estimated operating levels are:

	1966 actual	1967 estimate	1968 estimate
Average number of operating beds.....	61,419	61,647	62,504
Average daily patient load.....	55,308	55,109	56,112
Average employment (net, including consultants).....	72,684	73,322	76,553

(c) *Nursing home care.*—This covers the operation of nursing care beds in Veterans Administration facilities. The increase in the estimated cost over 1967 is \$5,889 thousand.

	1966 actual	1967 estimate	1968 estimate
Nursing home care:			
Average number of operating beds.....	1,475	3,000	4,000
Average daily nursing patient load.....	1,245	2,790	3,720
Average employment (net, including consultants).....	940	2,120	2,828

(d) *Domiciliary care.*—This covers the cost of domiciliary care of veterans in Veterans Administration facilities. The increase in the estimated cost over 1967 is \$395 thousand.

	1966 actual	1967 estimate	1968 estimate
Average number of operating beds.....	15,363	14,334	14,312
Average daily member load.....	13,366	13,500	13,444
Average employment (net, including consultants).....	3,068	3,014	2,994

(e) *Outpatient care.*—This covers the expense of outpatient medical and dental care provided by Veterans Administration staff and by physicians and dentists participating under a fee basis arrangement in the hometown care program. The increase in the estimated cost over 1967 is \$5,311 thousand.

(b) *Nursing home.*—This covers the cost of nursing care beds in private facilities where Veterans Administration facilities are not available. The increase in the estimated cost over 1967 is \$1,130 thousand to provide for an increase in the per diem rate.

Average daily nursing load.....	1966 actual	1967 estimate	1968 estimate
	1,637	3,000	3,000

3. *Grants for State home care*—(a) *Domiciliary.*—This covers the cost of domiciliary care of veterans in State homes. The decrease in estimated cost under 1967 is \$163 thousand.

Average daily member load.....	1966 actual	1967 estimate	1968 estimate
	8,228	7,810	7,610

(b) *Nursing home.*—This covers the cost of nursing care of veterans in State homes. The increase in estimated cost over 1967 is \$501 thousand due to the accelerated implementation of Public Law 88-450.

Average daily nursing load.....	1966 actual	1967 estimate	1968 estimate
	972	1,526	1,926

The requirements presented in this budget submission take into consideration the contemplated receipt in 1968 of an equivalent amount of property and supplies from other Federal agencies or from the general post fund, national homes, Veterans Administration, to that experienced in 1966 which had an acquisition value of \$2,146 thousand. This does not, however, represent the value of the items when transferred.

¹ Selected resources as of June 30 are as follows: Accounts receivable (benefit overpayments collectible from beneficiaries), 1965, \$13,894 thousand; 1966, \$17,335 thousand; 1967, \$17,335 thousand; 1968, \$17,335 thousand.

This appropriation provides for the payment of compensation, pensions and related benefits to veterans and their dependents. In June 1966 there were an estimated

25.0 million living veterans of which 3.2 million (14.9%) were receiving benefits under this appropriation. In addition, 2 million dependents of deceased veterans were receiving benefits. Recent legislative amendments will increase the amount of benefit payments to be made in 1967 and 1968. These include the full-year effect of Public Law 89-311, which increased most disability compensation rates on December 1, 1965, for an additional cost of \$70 million in 1967; the effect of military pay increases on rates of dependency and indemnity compensation payable to widow beneficiaries (Public Law 89-501, effective July 1, 1966) estimated to cost about \$2 million annually in 1967 and 1968; the increases in Philippine peso benefit payments affecting disability and death compensation payments, and burial payments, provided by Public Law 89-641, effective December 1, 1966, which is estimated to cost \$7 million in 1967 and \$11.3 million in 1968; the increases in dependency and indemnity compensation rates and other liberalizations affecting the \$5 thousand death gratuity payments provided by Public Law 89-730, effective January 1, 1967, is estimated to result in additional costs of \$33 million in 1967 which will decline to \$9 million in 1968 due to the number of lump sum payments concluded in 1967. Other increases during the current and budget years are primarily associated with normal net increases in average payments and caseloads.

A supplemental appropriation amounting to \$140 million is required in 1967 as shown under Proposed for separate transmittal.

1. *Compensation.*—Compensation is payable to living veterans who have suffered impairment of earning power from service-connected disabilities. Compensation or dependency and indemnity compensation is payable to the widow and dependents of veterans whose deaths are related to service-connected disabilities.

The increasing trend in veterans average caseload for 1967 and 1968 is due to the growth of the peacetime and Korean caseload which more than offsets the declining caseload trends of the earlier war period categories. The increase in average payment for 1967 is attributable to the full-year effect of the rate increases provided by Public Law 89-311, effective December 1, 1965, and to the increases in peso benefit payments provided by Public Law 89-641. The increase in 1968 is primarily attributable to the full-year effect of Public Law 89-641 as well as to changes in the composition of the caseload, and the effect of more peacetime veterans receiving wartime rates due to extra hazards of service.

The increases for 1967 and 1968 to the average survivors caseload is associated with the growth of the peacetime roll due to the extra hazards of military service created by the Southeast Asian crisis. Additional new parent cases will result due to enactment of Public Law 89-730. The average payment per case increase for 1967 is due to the full-year effect of the military pay increases in 1965 and 1966 on dependency and indemnity compensation rates payable to widows, and to the increase in like rates payable to parents and children provided by Public Law 89-730. The average increase for 1968 is caused by the full-year effect of Public Law 89-730, and an increasing proportion of cases receiving the higher dependency and indemnity compensation rates over those receiving the old death compensation rates.

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death.

A decrease in average veterans' caseload is projected for 1967 and 1968 because of the continuing caseload decline in the earlier war period categories where the veterans' age and mortality rates are a factor. These decreases more than offset the estimated rise in World War II and Korean conflict categories. Projected increases in annual average payments for 1967 and 1968 are mainly attributable to the change in the composition of the disability pension payment roll.

Based on trends experienced in recent years, a continuing increase in survivors' caseload is projected for 1967 and 1968. The average payment is also projected to increase during 1967 and 1968. This is attributable to the liberalizing effect of Public Law 89-311 which permits the children of deceased wartime veterans who are attending school to remain on the pension roll until attaining age 23.

Total cost (in thousands).....	\$688,866	\$727,787	\$757,407

3. *Other.*—These miscellaneous benefits cover payments which are not readily combined with any one of the preceding compensation or pension categories.

(a) *Retired officers.*—Emergency officers of World War I and certain officers of the Regular Establishment who have retired because of service-connected disability are entitled to special benefits. The caseload is declining steadily from an actual of 945 in 1966 to an estimated 820 in 1968. The minor increase in average payment estimated for 1967 (from \$2,573 in 1966 to \$2,580 in 1967), is attributable to the Uniformed Services Act of 1965. No change is projected for 1968.

(b) *Adjusted service and dependents pay.*—Claims made pursuant to the provisions of the World War Adjusted Compensation Act of 1924, as amended, are payable from this appropriation. If the amount of adjusted service credit was more than \$50, the veterans were entitled to receive adjusted service certificates. The payment of adjusted service certificates was heretofore made from an adjusted service certificate fund. Activities of this fund were transferred to this appropriation in 1966.

During 1966, costs of the combined activity were \$70 thousand. It is anticipated that costs will decrease to \$61 thousand in 1967 and \$56 thousand in 1968.

(c) *Subsistence allowance.*—Payments are made to disabled veterans enrolled in vocational rehabilitation and education programs. Estimated caseloads and increased costs for 1967 reflect the full-year effect of Public Law 89-137, effective October 1, 1965, and 89-138, effective August 26, 1965, which liberalized eligibility criteria and monthly allowances, respectively. The decrease in costs for 1968 is associated with a fewer number of disabled veterans participating in the vocational rehabilitation and education programs.

	1966 actual	1967 estimate	1968 estimate
Total costs.....	\$12,055,219	\$16,310,000	\$15,100,000
Annual average payment.....	\$2,021	\$2,039	\$2,041
Average caseload.....	5,965	8,000	7,400

(d) *Burial benefits.*—The Administrator is currently authorized to (1) pay an allowance of \$250 (plus transportation charges where death occurs under VA care) to cover the burial and funeral expenses of a deceased veteran, and (2) furnish a flag to drape the casket of each deceased veteran entitled thereto. The increase in costs is mainly related to the estimated increase in veterans deaths, although the provisions of Public Law 89-641, increasing the dollar cost of peso benefit awards has also contributed to the increase in 1967 and 1968.

	1966 actual	1967 estimate	1968 estimate
Total costs	\$59,547,313	\$60,440,713	\$63,421,000
Burial allowances:			
Cost	\$58,486,894	\$59,240,713	\$62,121,000
Average payment	\$267.76	\$268.06	\$268.23
Number	218,433	221,000	231,600
Burial flags:			
Cost	\$1,060,419	\$1,200,000	\$1,300,000
Average payment	\$5.04	\$5.60	\$6.00
Number	210,400	214,300	216,700

(e) *Special allowances, dependents.*—Under certain conditions, a special allowance (38 U.S.C. 412) is payable to dependents of certain veterans who died after December 31, 1956, but who were not fully and currently insured under the Social Security Act. Projected increases assume that the current strengths and death rates for the Armed Forces will be maintained through 1968.

Approximately 220 cases were paid \$248 thousand in 1966 and 250 cases costing \$270 thousand annually are estimated for both 1967 and 1968.

(f) *Invalid lifts and other devices.*—The Administrator may furnish an invalid lift to veterans in receipt of pension under 38 U.S.C. 617 based on the need of regular aid and attendance. A negligible change in lifts furnished has occurred, but a rise in costs to \$158 thousand in 1966 associated with certain benefits afforded by Public Law 88-450 is expected to continue. Amounts of \$250 thousand and \$260 thousand are estimated for 1967 and 1968, respectively.

(g) *Tort claim settlements.*—Payment of compromises or settlements under 38 U.S.C. 351 resulting from litigation under the Federal Tort Claims Act are made from this appropriation.

During 1966, 14 compromise payments were made at a cost of \$83 thousand. Compromise payments for 1967 and 1968 are estimated at \$300 thousand for each year.

(h) *Death gratuities.*—Public Law 89-214, approved September 29, 1965, authorized a death gratuity of not to exceed \$5 thousand for payment to the eligible beneficiary of a veteran whose death occurred during the period from January 1, 1957, through September 28, 1965, and was attributed to certain hazards of service. This law further provided that the amount of death gratuity be reduced by the amount of any death compensation or dependency and indemnity compensation the beneficiary may already have received and, in addition, the beneficiary must waive his right to any future death compensation or dependency and indemnity compensation payment on account of the serviceman's death. However, Public Law 89-730, effective January 1, 1967, repealed the offset and waiver provision of Public Law 89-214, which in effect makes the \$5 thousand death gratuity payment available to an eligible beneficiary without any limitation or restriction. It is estimated that \$44 million will be required to complete these payments in 1967.

Expenditures under the provisions of Public Law 89-214 amounted to \$10,972 thousand in 1966.

¹ Selected resources as of June 30, are as follows: Accounts receivable (benefit overpayments collectible from beneficiaries) 1965, \$414 thousand; 1966, \$361 thousand; 1967, \$361 thousand; 1968, \$361 thousand.

This appropriation provides educational assistance allowances for eligible children under the War Orphans' Educational Assistance Act of 1956, as amended; education and training assistance to veterans of post-Korean military service; and special assistance to disabled veterans in the form of vocational rehabilitation, housing grants, and automobiles or other conveyances.

1. *Education and training.*—Sons and daughters in training under the War Orphans' Educational Assistance Act of 1956, as amended, are provided an educational assistance allowance. Public Law 89-613, enacted September 30, 1966, extends this benefit to include the eligible children of the Philippine Commonwealth Army veterans and "new" Philippine Scouts. Veterans of post-Korean

military service are provided educational assistance from June 1, 1966, by Public Law 89-358 enacted March 3, 1966.

AVERAGE NUMBER OF TRAINEES AND COSTS

Average cost per trainee.....		\$1,363	\$1,350
Total cost (in thousands).....		\$327,000	\$386,000

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive assistance to cover costs of tuition, books, supplies, and equipment. Grants are provided for specially adapted housing to veterans having suffered the loss of both feet, to certain blind veterans, and to paraplegic veterans. Up to \$1,600 is allowed certain disabled veterans toward the purchase of automobiles or other conveyances.

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Payments are made also to the U.S. Government life insurance fund for claims (1) traceable to extra hazards of military service and (2) for claims while insured was under premium waiver provisions in active military service.

a. *Payment to U.S. Government life insurance fund.*—Transfers are made to reimburse the fund for the above purposes.

Death and permanent total disability awards.....	5	9	9
Total disability award.....	123	113	113
Average payment per death and permanent total disability award.....	\$3,565	\$3,333	\$3,333
Average payment per total disability award.....	\$526	\$531	\$531

b. *Direct payments to policyholders and beneficiaries.*
 (1) *Disability awards.*—Payments of \$5.75 per month per \$1 thousand of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue.

(2) *Death awards.*—Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

Description	1966 actual	1967 estimate	1968 estimate
Average number of disability awards.....	4,456	4,340	4,274
Average number of death awards.....	1	2	2
Annual average payment per disability award.....	\$491	\$491	\$491
Annual average payment per death award.....	\$628	\$625	\$625

2. *National service life insurance.*—This appropriation pays certain expenses of the National service life insurance fund and receives premiums and pays claims on nonparticipating insurance policies issued to certain disabled veterans of World War II. Premium receipts are appropriated under 38 U.S.C. 719(b).

a. *Payments to National service life insurance fund.*—
 (1) For death claims traceable to extra hazards of service, an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund.

(2) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for National service life insurance. Under a court ruling in 1964, gratuitous insurance payments are made to illegitimate children previously denied recognition.

(3) The fund is reimbursed when recovery of erroneous payments or overpayments is waived.

(4) The fund is reimbursed for death claims of policies under waiver of premiums while the insured is on active military duty.

Description	Average payment per case	Major caseload		
		1966 actual	1967 est.	1968 est.
(1) Claims for extra hazards of service:				
(a) Death awards.....	\$6,735	188	250	241

(3) Waiver of overpayments.....	2,500	135	120	100
(4) Death while under waiver of premiums.....	8,364	55	51	47

b. *Direct payments to policyholders and beneficiaries.*
 (1) Claims are paid on nonparticipating National service life insurance policies issued to World War II veterans with service-connected disabilities.

(2) Claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty.

(3) Claims are paid on death which occurred after application, but before effective date of a National service life insurance policy.

(4) Claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

(5) Payments are made to policyholders who terminate their insurance for the cash value of their policies and to policyholders who have matured endowments.

Description	Average payment per case	Major caseload		
		1966 actual	1967 est.	1968 est.

(4) Claims on discontinued insurance.....	490	188	173	153

3. *Service-disabled veterans insurance.*—Payments are made to the service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities, but who were otherwise insurable. The decrease in payments

General and special funds—Continued

VETERANS INSURANCE AND INDEMNITIES—Continued

in 1968 is due to a larger carryover in the fund from prior years than originally anticipated.

4. *Servicemen's indemnities.*—Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service, are entitled to receive an indemnity in the amount of \$10 thousand less any National service life insurance and/or U.S. Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments, plus interest at the rate of 2.25% per year. The program will be completed December 31, 1966.

This appropriation provides grants-in-aid to the Republic of the Philippines. Grants made during the current and budget years are significantly affected by enactment

of recent legislation. Previously, reimbursement at agreed upon patient per diem rates was made for the medical care and treatment of Philippine Commonwealth Army veterans with service-connected disabilities. Public Law 89-612, approved and effective on September 30, 1966, extends the above-mentioned benefit for an additional 5-year period, and expands payments for hospital care of: (1) Commonwealth Army veterans with non-service-connected disabilities, if financial need exists; (2) new Philippine Scouts with service-connected disabilities; and (3) new Philippine Scouts with non-service-connected disabilities, if financial need exists. In addition, grants of \$100 thousand a year, may be made during the next 6 years to the Veterans Memorial Hospital for medical research and training, and \$500 thousand was authorized for making grants to replace and upgrade equipment and to rehabilitate the physical plant and facilities.

A supplemental appropriation in 1967 of \$1 million is anticipated as shown under Proposed for separate transmittal.

Medical care and treatment is provided by the Philippine Veterans Memorial Hospital in Manila. This facility was constructed from U.S. grants-in-aid totaling approximately \$9.4 million.

Proposed for separate transmittal:

Under existing legislation, 1967.—A supplemental appropriation of \$1 million is required to cover costs of new legislation. Public Law 89-612, approved September 30, 1966, authorizes reimbursement for medical care and treatment of certain Commonwealth Army veterans and new Philippine Scouts not previously entitled to this benefit. Current year cost for this extension of benefits is estimated at \$400 thousand. In addition, \$100 thousand is authorized this year for medical research and training. Also, \$500 thousand is authorized for replacement and upgrading of equipment and for rehabilitation of the physical plant and facilities. This amount is authorized to remain available until expended.

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES

For hospital and domiciliary facilities, for planning and for major alterations, improvements, and repairs and extending any of the facilities under the jurisdiction of the Veterans Administration or for any of the purposes set forth in sections 5001, 5002, and 5004, title

38, United States Code, including necessary expenses of administration, **[\$52,125,000]** \$52,000,000, to remain available until expended. (5 U.S.C. chaps. 1-7, 21-89; 28 U.S.C. 1323; 31 U.S.C. 686; 38 U.S.C. 213, 230, 233, chaps. 73, 81, 83; 41 U.S.C. 5; Independent Offices Appropriation Act, 1967.)

	1965	1966	1967	1968
Unpaid undelivered orders	113,193	71,911	67,232	136,032
Advances	1,559	2,844	2,500	3,000
Total selected resources	114,752	74,755	69,732	139,032

These funds provide for the construction of new hospital and domiciliary facilities, replacement and relocation of existing hospitals and domiciliaries, acquisition of sites, modernization and other improvements, alterations, and additions for medical research facilities, nursing home beds, regional offices, supply depots, and data processing centers, including construction planning, administration and related staff activities. This estimate is for the eighth increment for financing a program to modernize the hospital system. While this program will be primarily for improvements to the older (pre-World War II) hospitals, it will also provide for replacement of 12 hospitals acquired from military surplus, for air conditioning where indicated and for the correction of deficiencies in post-World War II hospitals as necessary to bring them up to more modern medical standards.

A construction program of \$52,000 thousand is recommended for 1968 to be financed with new obligational authority. The amount for construction and of replacement and relocation hospitals includes \$2,672 thousand

to complete a 760-bed hospital at Chicago, Ill.; \$29 million to complete a 1040-bed hospital and outpatient clinic at San Diego, Calif.; \$1 million for planning bed expansion at Seattle, Wash.; and \$1,295 thousand to complete a 720-bed hospital at Tampa, Fla. The amount for other improvement projects includes \$3,502 thousand to continue projects in process and \$9,424 thousand for new projects which will ultimately cost \$10,624 thousand. The amount for research facilities includes \$2,150 thousand to continue projects for which planning is in process and \$980 thousand for new projects which will ultimately cost \$2,330 thousand. Also included is \$1,977 thousand for planning administration and related staff activities.

1. *Hospitals*—(a) *New*.—This activity covers the new hospitals and bed-addition projects authorized in 1947 and subsequent years. This program was completed with the opening of the Washington, D.C., 710-bed hospital in 1965.

(b) *Replacement and relocation*.—Beds which are housed in temporary, obsolete, or hazardous structures are to be replaced or relocated. The program initiated in 1955,

General and special funds—Continued

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES—CON.

currently includes 29 projects for approximately 21,379 beds. Status of beds to be provided under this title follows:

	1966 actual	1967 estimate	1968 estimate
Under construction beginning of year	7,753	6,622	3,580
Put under construction during year	1,220	480	4,040
Completed during year	2,351	3,522	720
Total completed at end of year since initiation of the program	5,227	8,749	9,469
Under construction at end of year	6,622	3,580	6,900
Not under construction at end of year	9,530	9,050	5,010

(c) *Modernization.*—Pre-World War II hospitals are to be brought up to the standards of the new hospitals insofar as practicable. The status of projects in this program, excluding those which were financially completed as of June 30, 1965, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1966	19	42,295
Under construction June 30, 1966	8	26,305
Scheduled to be placed under construction, 1967	3	8,883
Scheduled to be placed under construction, 1968	4	4,978
To be placed under construction, after 1968	9	59,476

(d) *Other improvements.*—This activity provides for needed improvements, other than modernization, at hospitals. The listing excludes projects of \$100,000 or less. The status of the projects in this program, excluding those which were financially completed as of June 30, 1965, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1966	29	36,961
Under construction June 30, 1966	22	18,941
Scheduled to be placed under construction, 1967	42	13,676
Scheduled to be placed under construction, 1968	16	14,281
To be placed under construction, after 1968	16	28,285

2. *Domiciliaries.*—This activity provides for construction at domiciliary facilities, including restoration centers. No new projects are proposed in 1968. The status of the projects in this program, excluding those which were financially completed as of June 30, 1965, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1966	1	1,789

3. *Nursing homes.*—This activity provides for alterations and new construction required to establish VA nursing home facilities. Funds appropriated for this program, which was initiated in 1965, will provide for 4,000 nursing home beds by altering space in existing hospitals.

4. *Research facilities.*—This activity provides for construction of medical research facilities. The status of the projects in this program, excluding those which were financially completed as of June 30, 1965, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1966	13	2,535
Under construction June 30, 1966	9	6,181
Scheduled to be placed under construction, 1967	13	2,336
Scheduled to be placed under construction, 1968	18	12,395
To be placed under construction, after 1968	3	1,493

5. *General administration.*—This activity provides for planning, administration, and related staff activities.

Financing:			
21 Unobligated balance available, start of year		-209	-277
24 Unobligated balance available, end of year	209	277	364
40 New obligational authority	2,500	4,000	4,000
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures) ..	2,291	3,932	3,913
72 Obligated balance, start of year		2,291	5,258
74 Obligated balance, end of year	-2,291	-5,258	-4,971
90 Expenditures		965	4,200

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$0; 1966, \$2,291 thousand; 1967, \$5,258 thousand; 1968, \$5,321 thousand.

Grants are made to assist the States to construct facilities for nursing home care to war veterans.

Grants may not exceed 50% of the estimated cost of construction of each project. The number of beds for which grant funds may be authorized for any State may not exceed a ratio of 1½ per 1,000 war veterans. Funds have been obligated which will help finance the construction of 824 beds in 7 States.

Proposed for separate transmittal:

VETERANS LEGISLATION

Program and Financing (in thousands of dollars)

Identification code 29-00-9999-1-1-800	1966 actual	1967 est.	1968 est.
Program by activities:			
1. Extension of veterans benefits to veterans of Vietnam era			86,000
2. Refinements in statutory veterans benefits			-89,000
10 Total obligations			-3,000
Financing:			
40 New obligational authority (proposed supplemental appropriation)			-3,000
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures) ..			-3,000
90 Expenditures			-3,000

Under proposed legislation, 1968.—A supplemental of \$86 million is proposed to augment and extend compensation, pensions, education, and medical benefits for veterans of the Vietnam era.

Additional legislation to refine various statutory benefits including termination of compensation for cases of arrested

TB, elimination of certain duplication in burial benefits, and removal of the present exclusion of railroad retirement income in computing pension benefits, will permit a reduction in new obligational authority of \$89 million.

CONSTRUCTION, CORREGIDOR-BATAAN MEMORIAL

Program and Financing (in thousands of dollars)

¹ Balances of selected resources are identified on the statement of financial condition.

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201-08).

Budget program.—Sales are expected to be \$58,234 thousand in fiscal year 1967 and it is estimated sales will be \$59,981 thousand during fiscal year 1968.

Financing.—No appropriation by the Congress will be required for the operation of the Veterans Canteen Service during fiscal year 1968. Operations will be financed from current revenues. The Congress originally appropriated a total of \$4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling \$11,916 thousand have been paid to the Treasury as of June 30, 1966.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expenses. Funds at the close of the fiscal year in excess of the needs of the Service for the ensuing fiscal year will be paid to the Treasury.

Note.—The above statement excludes the following exchanges of nonworking capital assets: The settlement of defaulted veterans loans by foreclosures and conveyances (1966, \$8,118 thousand; 1967, \$9,964 thousand; 1968, \$10,704 thousand); the settlement of vendee loans by foreclosures and conveyances (1966, \$855 thousand; 1967, \$870 thousand; 1968, \$1,080 thousand); the acquisition of vendee loans in exchange for real property (1966, \$8,129 thousand; 1967, \$10,592 thousand; 1968, \$11,917 thousand).

¹ Balances of selected resources are identified on the statement of financial condition.

Direct loans are made to purchase, construct, or improve a home; to purchase a farm on which there is a farm residence to be occupied by the veteran as his home; or to construct, alter, repair, or improve a farm dwelling to be occupied by the veteran as his home.

Such loans are made only in rural areas, small cities, and towns where private credit for the making of GI loans is and has been generally unavailable. The maximum loan amount is \$17.5 thousand and the maximum term is 30 years. The interest rate is the same as the rate allowable for GI loans (38 U.S.C. 1811, as amended).

Public enterprise funds—Continued

DIRECT LOAN REVOLVING FUND—Continued

Budget program—1. *Direct loans to veterans.*—Under existing legislation, the eligibility of World War II veterans and Korean conflict veterans has been phasing out since 1962, with terminal dates of July 25, 1967, for World War II veterans and January 31, 1975, for Korean conflict veterans. Effective March 3, 1966, Public Law 89-358 extended the authority to make or to enter into commitments to make direct loans to post-Korean veterans and some active duty servicemen. This authority terminates January 31, 1975.

	1966 actual	1967 estimate	1968 estimate
Loans made.....	6,041	12,300	12,300
Average per loan.....	\$10,847	\$11,800	\$12,700
Total cost (in thousands).....	\$65,529	\$145,140	\$156,210

2. *Cash advances—vendee loans.*—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary to subsequently advance cash on behalf of the borrower in order to protect the interest of the Government. These advances are added to the unpaid loan balances.

3. *Property improvements.*—Properties are acquired by foreclosure on, or the voluntary conveyance of, title to properties securing loans owned by the Veterans Administration. Capital expenditures are often necessary to put the property in salable condition. The following table summarizes these expenditures.

	1966 actual	1967 estimate	1968 estimate
Number of properties acquired.....	1,017	1,200	1,325
Average per property.....	\$330	\$350	\$350
Total cost (in thousands).....	\$336	\$420	\$465

4. *Interest on borrowings from Treasury.*—Interest expense is accrued monthly. These accruals are computed on the interest-bearing capital of the fund and adjusted for the unexpended balance of the fund.

5. *Operating expenses, general.*—Includes a variety of miscellaneous expenses borne by the Government incident to closing and liquidating loans.

6. *Property management expense.*—Includes local real estate taxes, services performed by management brokers, and maintenance of the property in a salable condition:

	1966 actual	1967 estimate	1968 estimate
Average number of properties owned.....	534	574	512
Average cost per property.....	\$599	\$625	\$625
Total cost (in thousands).....	\$320	\$360	\$320

7. *Sales expense.*—Includes brokers fees and advertising costs incident to the sale of properties owned by Veterans Administration and averages approximately 5% of the selling price.

	1966 actual	1967 estimate	1968 estimate
Number of sales.....	1,013	1,250	1,400
Average cost per sale.....	\$432	\$450	\$450
Total cost (in thousands).....	\$438	\$563	\$630

8. *Commission on sale of participation certificates, Participations sales fund.*—The Veterans Administration's portion of brokerage fees charged by the private underwriters who market participation certificates for the Federal National Mortgage Association.

9. *Participation sales insufficiencies.*—Represents the difference between the amount of interest collections

received from direct loans pledged to the trustee, and the amount of interest the trustee is required to pay holders of participation certificates in respect to which direct loans have been set aside pursuant to 38 U.S.C. 1820(e).

Financing.—Public Law 87-84, approved July 6, 1961, authorizes the Veterans Administration to draw \$1.2 billion from the U.S. Treasury at stated intervals through 1967 with the provision that after the first year (1962) the amount so authorized was to be reduced by the amount of loans sold in the preceding fiscal year. Through 1966, direct loan sales were \$403.4 million. The aggregate authorization to borrow from the Treasury was further reduced in the appropriation acts for 1966 and 1967 by \$100 million each year, leaving a net aggregate authorization of \$596.5 million for the 6-year period. During 1962, \$200 million was borrowed and an additional \$200 million in 1963. No borrowings were made in 1964, 1965, or 1966, and none are planned for 1967. The unused borrowing authority of \$196.5 million will lapse at the close of 1967.

This fund received \$685 million in 1966 from the sale of participation certificates in the Participations sales fund, authorized by the Housing Act of 1964, Public Law 88-560. These estimates include revenue of \$154 million in 1967 and \$250 million in 1968 from the sale of additional mortgage pool participation certificates.

Note.—The above statement excludes the following exchanges of nonworking capital assets: The settlement of VA-guaranteed or insured loans by the acquisition of real property (1966, \$266,110 thousand; 1967, \$238,713 thousand; 1968, \$258,808 thousand); the settlement of defaulted VA-owned loans by acquisition of real property (1966, \$47,391 thousand; 1967, \$54,065 thousand; 1968, \$62,317 thousand); the acquisition of vendee loans in exchange for real property (1966, \$336,141 thousand; 1967, \$324,300 thousand; 1968, \$327,700 thousand).

The Loan guaranty revolving fund was established by Public Law 89-665 (74 Stat. 533) effective July 1, 1961, in order that the revenues obtained from principal repayments and proceeds of sales of vendee accounts, principal payments on acquired loans, income from interest payments on such assets, and miscellaneous income such as rental of properties, could be used to defray part of the expenses for paying claims, acquiring properties, managing and selling properties.

Budget program.—The activities indicated in the tables below represent the number of each asset acquired on a check-issue basis.

1. *Real property acquisitions.*—Private lenders who have acquired property as a result of foreclosure on defaulted guaranteed or insured loans may elect to convey that property to the Veterans Administration. The table below reflects this activity and excludes the amount of indebtedness established against the veteran:

Number of property acquisitions pro-	1966 actual	1967 estimate	1968 estimate
cessed.....	21,692	21,235	21,674
Average cost per acquisition.....	\$11,763	\$12,100	\$12,152
Total cost (in thousands).....	\$255,165	\$256,950	\$263,385

2. *Property improvements.*—After conveyance of the property to the Veterans Administration, capital expenditures are often necessary to place the property in salable condition. The following table summarizes these expenditures:

	1966 actual	1967 estimate	1968 estimate
Number of properties acquired.....	27,312	26,828	27,474
Average cost per property.....	\$599	\$625	\$625
Total cost (in thousands).....	\$16,365	\$16,800	\$17,200

3. *Claims paid.*—These payments are made to lenders in accordance with the Veterans Administration guaranty contract and represents the difference between the amount owed by the veteran on a defaulted loan and the value of the foreclosed property (as established by Veterans Administration). These payments are in addition to property acquisition costs shown in 1, above. The table below reflects this activity:

	1966 actual	1967 estimate	1968 estimate
Number of claims.....	21,838	21,385	21,900
Average cost per payment.....	\$1,016	\$1,100	\$1,160
Total cost (in thousands).....	\$22,208	\$23,525	\$25,400

4. *Repurchase of loans sold, net.*—Pursuant to Veterans Administration Regulation 4600, dated March 22, 1962, the Administrator may sell mortgage loans which have been created incident to the sale of Veterans Administration acquired properties, with full recourse:

	1966 actual	1967 estimate	1968 estimate
Number of loans repurchased.....	3,854	3,415	3,355
Average cost per repurchase.....	\$11,567	\$11,600	\$11,600
Total cost (in thousands).....	\$44,578	\$39,625	\$38,940

5. *Cash advances—Vendee loans.*—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary to subsequently advance cash on behalf of the borrower in order to protect the interest of the Government.

6. *Loans acquired.*—Guaranteed or insured loans in a default status may be purchased by the Administrator to avoid foreclosure when it is felt that temporary forbearance will allow the veteran borrowers to cure the default.

	1966 actual	1967 estimate	1968 estimate
Number of loans acquired.....	411	300	300
Average cost per acquisition.....	\$13,590	\$13,600	\$13,600
Total cost (in thousands).....	\$5,586	\$4,100	\$4,100

7. *Commission on sale of participation certificates—Participations sales fund.*—Represents the Veterans' Administration portion of the cost of marketing serial participation certificates through a nationwide group of underwriters, by the Federal National Mortgage Association as trustee for the Participations sales fund. These costs are in direct proportion to the sale of participation certificates.

8. *Property management expense.*—Includes local real estate taxes, services performed by management brokers and maintenance of the property in a salable condition.

	1966 actual	1967 estimate	1968 estimate
Average number of properties.....	15,389	14,744	14,270
Average cost per property.....	\$949	\$975	\$1,000
Total cost (in thousands).....	\$14,597	\$14,400	\$14,300

9. *Sales expense.*—Includes brokers fees and advertising costs incident to the sale of acquired properties.

	1966 actual	1967 estimate	1968 estimate
Number of sales.....	28,933	27,500	27,750
Average cost per sale.....	\$619	\$640	\$651
Total cost (in thousands).....	\$17,913	\$17,600	\$18,075

10. *Participation sales insufficiencies.*—Represents the difference between the amount of interest collections received from vendee accounts pledged to the trust, and the amount of interest the trustee is required to pay holders of participation certificates in respect to which vendee accounts have been set aside pursuant to 38 U.S.C. 1820(e).

Financing.—Normal revenue and receipts consist principally of interest income and repayments on mortgage loans made incident to the sale of real property acquired as a result of foreclosure on guaranteed loans. It is estimated that \$67.8 million in 1967 and \$65.5 million in 1968 will be received from these sources. Also an estimated \$40 million vendee loans will be sold in 1968 while no sales are estimated in 1967.

The Independent Offices Appropriation Act, 1967 (80 Stat. 679), provided authority to transfer from the Direct loan revolving fund unobligated balances, including retained earnings, up to \$200 million as needed. The statute also provided that the Administrator of Veterans' Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer. Language is proposed for the transfer of unobligated balances including retained earnings that hereafter may be available to the Loan guaranty revolving fund.

The estimate includes \$106 million in proceeds from sale of mortgage participation certificates in 1967 and an additional \$600 million in mortgage participation certificates to be marketed in 1968.

This fund finances the payment of claims on nonparticipating insurance policies issued to veterans with service-connected disabilities but who are otherwise insurable (38 U.S.C. 722). Administrative expenses are paid from the appropriation, General operating expenses.

Budget program—1. *Death claims*.—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

2. *Cash surrenders and matured endowments*.—A policyholder may terminate his insurance by cashing in his policy for its cash value.

4. *Policy loans made*.—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	June 30, 1965	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies.....	60,595	63,412	67,000	69,000
Insurance in force.....	\$525,844	\$549,625	\$577,000	\$599,000

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the appropriation Veterans insurance and indemnities, instead of direct appropriations to this fund. It is estimated that the payment will be \$4 million in 1967 and \$2 million in 1968. The less amount in 1968 is due to larger carryover from prior years than originally anticipated.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue to increase with capital impairment reaching an estimated \$46.5 million by June 30, 1968.

The capital of the fund consists of \$4.5 million with \$1 million transferred from Readjustment benefits appropriation in 1954 and \$3.5 million appropriated directly in 1952, 1956, and 1958.

This fund finances claims arising from the guarantee of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Administrative expenses are paid from the appropriation General operating expenses.

Budget program—Insurance program.—Claims paid, on application for coverage submitted and approved prior to October 6, 1942, are not reimbursable to the fund. Loans receivable are established for any payments made on applications for coverage submitted after that date, since these payments are reimbursable to the fund.

The activity of the fund is indicated in the following table:

	1966 actual	1967 estimate	1968 estimate
Claims paid:			
Number of settlements.....	9	10	10
Average cost per settlement.....	\$1,565	\$1,700	\$1,200
Loans receivable established:			
Number of settlements.....	10	15	10
Average cost per settlement.....	\$211	\$600	\$300

Financing.—Payment of claims against this fund is financed from collections of loans receivable, revenue, and appropriations as needed. The latest appropriation

Public enterprise funds—Continued

SOLDIERS' AND SAILORS' CIVIL RELIEF—Continued

was authorized by the Independent Offices Appropriation Act of 1966 in the amount of \$25 thousand.

Operating results and financial condition.—The payment of claims has continually resulted in expenses in excess of the small revenue of the fund, thereby steadily increasing the deficit to an estimated \$2 million through 1968.

This fund finances payment of claims and administrative costs on nonparticipating insurance policies issued after April 30, 1965, and prior to May 3, 1966, under the three insurance programs—(1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) non-service-disabled insurance—established by provisions of the National Service Life Insurance Act of 1940, as amended (38 U.S.C. 725 (b), (c)), to extend a new opportunity for insurance coverage to disabled veterans who no longer are eligible for other Government insurance.

Each program is self-contained and premiums may be adjusted to insure that each is self-sustaining, as required by law. For this purpose, separate accounting and actuarial records are maintained for each program to determine the individual program cost.

1. *Service-disabled standard insurance program.*—Under this program claims are paid on nonparticipating insurance policies issued to veterans with service-connected disabilities, but who were otherwise insurable according to the standards of good health established by the Administrator.

	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies.....	120,011	170,000	168,000
Insurance in force (in thousands)...	\$859,902	\$1,218,000	\$1,197,000

2. *Service-disabled rated insurance program.*—Claims are paid on policies issued to veterans with service-connected disabilities who do not qualify for insurance at standard premium rates solely because of their service-incurred disability.

	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies.....	19,492	27,000	26,000
Insurance in force (in thousands)...	\$125,137	\$171,000	\$165,000

3. *Non-service-disabled insurance program.*—Claims are paid on policies issued to veterans with non-service-incurred disabilities who are unable to obtain commercial insurance at substandard rates. The mortality rate will be exceptionally high because of the reduced average life expectancy of the insureds.

	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies.....	232	200	170
Insurance in force (in thousands)...	\$1,094	\$943	\$800

4. *Service charge program.*—Amounts collected from policyholders which are applicable to the administration of the three insurance programs are credited to this program. Payments are made to the General operating expenses appropriation to cover the administrative cost of issuing insurance policies, processing claims, and maintaining the accounts. The \$1,650 thousand borrowed was repaid to the Treasury with interest in 1966.

Financing.—Operations are financed from premiums collected from policyholders and it is anticipated that these collections will eventually exceed administrative expenses sufficiently enough to overcome the deficit and allow the program to operate on a self-sustaining basis.

This fund finances the payment of claims on nonparticipating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U.S.C. 723). Policyholders were given the right (72 Stat. 1716) to convert to a permanent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the unlimited term insurance. Policyholders under all plans of the Veterans Special Term Insurance Fund may

purchase total disability income coverage with the payment of an additional premium. Administrative expenses are paid from the appropriation General operating expenses.

Budget program—1. *Death claims*.—Payments to surviving beneficiaries continue to increase as deaths occur among policyholders.

2. *Disability claims*.—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled began in 1960.

3. *Cash surrenders*.—A policyholder may terminate his insurance by cashing in his policy for its cash value.

5. *Policy loans made*.—The policyholders who converted their insurance from term to permanent plan were subsequently entitled to borrow up to 94% of the cash value of the new policy.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	June 30, 1965	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies.....	641,304	636,891	629,000	624,000
Insurance in force.....	\$5,636,283	\$5,595,952	\$5,540,000	\$5,486,000

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. The retained earnings have been reduced by payments of a special dividend and payments to the Veterans insurance and indemnities appropriation and the Veterans reopened insurance fund.

This fund is used to make loans up to \$100 to disabled veterans eligible for vocational rehabilitation who are

without sufficient funds to meet their expenses (38 U.S.C. 1507). Repayments are used to make new loans.

Public Law 89-138, approved August 26, 1965, which extended the time available to seriously disabled veterans for pursuing vocational rehabilitation has increased the number of veterans being rehabilitated. Increased loan activity in this fund is anticipated.

Administrative expenses are borne by the appropriation General operating expenses.

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemen's Group Life Insurance Act of 1965 (38 U.S.C. secs. 765-776) and any expenses incurred by the Veterans Administration in administration of this act.

Budget program—1. *Premium payments*.—The payment of premiums to private insurance companies in 1966 of \$77.7 million represents 9 months coverage of insured members. The estimated payment in 1967 and 1968 of \$119 million represents coverage of insured members for 12 months.

2. *Payment to General operating expenses appropriation*.—The 1966 administration costs to the Veterans Administration was \$91 thousand. These costs for 9 months in 1966 exceed the 1967 and 1968 estimated administrative costs of \$35 thousand each year due to the initial cost of instituting the new program.

Financing.—Premium costs are met by withholding from the salaries of insured members their share of the cost of the insurance and by contributions of amounts representing the extra hazard costs from appropriations of the departments involved.

Operating results.—Retained earnings are reserved for contingencies.

¹ Balances of selected resources are identified on the statement of financial condition.

The Supply fund finances, on a reimbursable basis, warehouse inventories and procurement of recurring need supplies and centrally acquired equipment throughout the Veterans Administration in accordance with the provisions of 38 U.S.C. 5011, and items and services to other Government agencies when agencies request such support.

Budget program.—The fund provides financial support for the procurement of supplies and equipment, the maintenance and operation of three supply depots, located at Hines, Ill., Somerville, N.J., and Wilmington, Calif., the operation of a service and reclamation program from each supply depot, a centralized periodical procurement activity, printing service to VA installations on a centralized basis, and a marketing center located at Hines, Ill.

The publications and reproduction program provides printing service to VA installations. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a VA-operated plant in Arlington, Va., and from commercial sources.

The marketing center is responsible for determining the level of inventories at the three supply depots and for acquiring stocks to maintain such levels as well as the central procurement of items not available from Government sources for VA installations and other Government agencies as may be determined economical.

Personal services and other costs incident to the operation and administration of supply activities in the Veterans Administration central office and field organizations are charged directly to applicable appropriations and are not an operating expense of the Supply fund.

Financing.—Consuming appropriations reimburse the fund for the cost of supplies and equipment provided and services rendered. Operating costs are recovered from the appropriations receiving supplies, equipment, and services at time of reimbursement.

Operating results and financial condition.—The deficit of \$213 thousand in 1965 was eliminated by a gain of \$322 thousand in 1966. It is anticipated that the fund will operate on a break-even basis in 1967.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

The appropriation available to the Veterans Administration for the current fiscal year for "Medical care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by [section 902 of title 38, United States Code] 38 U.S.C. 902), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1967.*)

Studies to improve administrative procedure.—The Conference was authorized on a permanent basis in 1964 to assist the President, the Congress, the administrative agencies, and executive departments in improving existing administrative procedure. It is responsible for conducting studies of the efficiency, adequacy, and fairness of present procedures by which Federal administrative agencies and executive departments determine the rights, privileges, and obligations of private persons.

The Chairman is required, on behalf of the Conference, to transmit to the President and the Congress an annual report and such interim reports as he deems desirable.

The American Battle Monuments Commission maintains the World War I and World War II American military cemeteries in foreign countries and the memorials in the war areas commemorating the participation of the American Armed Forces. There are 11 memorials and 8 cemeteries, each with a memorial chapel, at World War I sites, and 14 cemeteries and memorials at World War II sites. Interred in these cemeteries are the remains of 124,128 servicemen and servicewomen, and an additional

91,591 missing and unidentified are commemorated by the inscribing of their names upon the walls of these and other memorials erected by the Commission in the United States. In addition, the Commission maintains the U.S. National Cemetery, Mexico City, Mexico. Each year, large numbers of American tourists and local citizens visit the cemeteries and memorials to pay homage and to view these points of historic, as well as artistic, interest.

The Commission is responsible also for the planning and construction of all military memorials. Provision is made for design of a memorial to General of the Armies John J. Pershing, a memorial on Guam, and a prototype monument at those relatively inaccessible battle sites where our Armed Forces distinguished themselves during World War II.

The Board regulates the economic aspects of air carrier operations, both domestic and international, and participates in the development of international air transportation. The increase proposed for 1968 is for expansion in certain critical program areas, primarily in the research, planning, programming, routes, rates, field audits, statistics, and electronic data processing areas.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of unfair competition; approval of business relationships between air carriers; and adjudication of complaints alleging violations of civil air regulations.

2. *Board adjudication, executive and legal staff activities.*—In addition to adjudication of cases, program planning, and top policy and decisionmaking functions of the Board, legal advice and assistance is provided on all aspects of economic and regulatory matters; opinions of the Board are prepared; and litigation matters are handled.

The Civil Aeronautics Board fixes rates of subsidy compensation to promote the development of air transportation to the extent and of the quality required for the commerce of the United States, the Postal Service, and the national defense. The Board makes subsidy payments to subsidy-eligible certificated air carriers who have demonstrated a statutory need therefor. Subsidy is provided to cover the carrier's operating loss incurred under honest, economical, and efficient management and to provide it an opportunity to earn a fair return (after taxes) on investment used and useful in its air transportation services.

The following table reflects the estimated program amounts becoming due finally for each year, together with the adjustments between years (in thousands of dollars):

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS RELATED TO APPROPRIATIONS

Estimated subsidy earnings under final Board action:	1966 actual	1967 estimate	1968 estimate
Domestic trunklines.....	3,241	2,500	2,500
Local service operations.....	61,500	58,250	54,000
Helicopter operations.....	1,170	-----	-----

1. *Recruiting and examining.*—Most appointments in the competitive Civil Service are made under the open competitive merit system through examinations held by

the offices of the Commission, interagency boards, and agency boards of examiners operating under the supervision of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled.

At the President's direction, the Civil Service Commission is proceeding to establish interagency boards of examiners and to modernize the system of examinations. These interagency boards will be fully established by December 31, 1966. All examining work for other than post office positions will be performed by these boards and existing agency boards of examiners. The new system will provide more efficient, effective, and convenient service to the agencies and public. The transition to the new program is scheduled for completion during 1968 and is reflected in the following workload table.

PRODUCTION COUNT

Applications processed by—	1966 actual	1967 estimate	1968 estimate
Commission offices.....	390,798	107,485	65,075
Interagency boards.....	23,041	1,179,000	1,692,500
Agency boards.....	2,087,727	1,120,015	648,925
Total.....	2,501,566	2,406,500	2,406,500

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions, and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system. Included is investigations of U.S. citizens for employment by international organizations required by Executive Order 10422, as amended. This work has previously been financed under the appropriation "Investigation of United States Citizens for Employment by International Organizations."

PRODUCTION COUNT

	1966 actual	1967 estimate	1968 estimate
National agency check and inquiry cases...	348,008	550,000	652,000
Suitability cases.....	1,917	3,400	4,600
Other personnel investigations.....	3,588	4,323	4,602

3. *Inspections.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. The Commission also conducts classification reviews to insure compliance with classification standards.

4. *Federal executive manpower.*—The Commission will expand its efforts to recruit and develop executive talent throughout the Federal service. To this end, the Commission will obtain additional information on Federal employees who demonstrate the capacity to perform successfully in executive positions.

5. *Developing policies and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposes legislation to improve the Federal personnel system for both competitive and non-competitive positions. It will develop common job standards and wage policies to ensure that equitable and valid wages are paid to all wage board employees.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; reviewing and processing of discrimination complaints, under authority of Executive Order 11246; administering the political activity statutes;

and providing advice to agencies and individuals regarding rights of appeal.

7. *Career development and training.*—The Commission makes overall and individual agency appraisals of training operations, and coordinates interagency training programs to achieve full utilization and to avoid duplication and, where it is more economical to do so, conducts training programs for agency personnel on a reimbursable basis. Also, it promotes and coordinates the incentive awards program authorized by chapter 45 of title 5, United States Code.

9. *Administration of the Voting Rights Act of 1965.*—The Commission provides examiners to prepare and maintain lists of eligible voters and to observe election procedures in States or other political subdivisions designated by the Attorney General. The Commission receives complaints, hears and determines challenges, and assists in the defense of challenge cases filed in U.S. Circuit Courts of Appeals as prescribed by the Act.

10. *Administration of the retirement and insurance programs.*—The Commission administers retirement, group life insurance, and health benefits programs for Federal employees. It is required to adjudicate annuity, death benefit, refund and deposit claims; make payments to annuitants and other claimants; collect and account for moneys received; maintain control accounts and systems for the funds; negotiate with private carriers to provide the insurance and health benefits authorized; determine eligibility in certain cases; audit the records of insurance underwriters; and maintain the trust funds established for financing the programs.

90 Expenditures.....			111,748

This appropriation presents Payments to Trust Funds on a combined basis for the first time.

The appropriation covers (1) the Government's share of the cost of health insurance for certain annuitants (secs. 8901 and 8906 of title 5, United States Code); (2) the Government's share of the cost of health insurance for employees who were retired when the Federal Employees' Health Benefits Act of 1959 became effective as defined in the Retired Federal Employees Health Benefits Act of 1960 (Public Law 86-724); (3) the Government's contribution for payment of administrative expenses incurred by the Civil Service Commission in administration of the Retired Federal Employees Health Benefits Act of 1960; and (4) the estimated cost of new and increased annuity benefits provided by part III of Public Law 87-793 (76 Stat. 868).

The use of these funds is reflected in the schedules for the employees health benefits fund, the retired employees health benefits fund, and the civil service retirement and disability fund.

71	Obligations affecting expenditures.....	-8	38	25
72.98	Receivables in excess of obligations, start of year.....	-1,543	-1,506	-898
74.98	Receivables in excess of obligations, end of year.....	1,506	898	898
90	Expenditures.....	-46	-570	25

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (5 U.S.C. 1304(e)).

Budget program.—Because work on some investigations will be started in one fiscal year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1967 and 1968 as compared to 1966 experience, are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1966 actual	1967 estimate	1968 estimate
On hand, beginning of year.....	7,916	11,016	4,900
Received.....	40,655	32,000	32,000
Total workload.....	48,571	43,016	36,900
Processed and canceled.....	37,555	38,116	32,000
On hand, end of year.....	11,016	4,900	4,900
Average positions.....	1,161	1,155	1,077
Unit cost.....	\$395	\$415	\$415

The costs for 1967 and 1968 are predicated on past experience.

Operating results and financial condition.—The capital of the fund consists of \$4 million appropriated in 1952. Excess earnings are paid into miscellaneous receipts of the Treasury.

¹ Includes capital outlay as follows: 1966, \$17 thousand; 1967, \$30 thousand; 1968, \$18 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$52 thousand; 1966, \$396 thousand; 1967, \$71 thousand; 1968, \$66 thousand.

The Commission on Civil Rights, established by the Civil Rights Act of 1957, as amended by title V of the Civil Rights Act of 1964, is responsible for factfinding, disseminating information, and reporting denials of equal protection of the laws to the President and Congress.

1. *Public hearings and meetings.*—Hearings are conducted by the Commissioners to investigate and obtain information about civil rights denials. State advisory committees to the Commission hold public meetings to gather information about civil rights problems.

NUMBER OF HEARINGS AND MEETINGS

	1966 actual	1967 estimate	1968 estimate
Urban hearings.....	1	3	--
Southern hearings.....	--	--	1
Mexican-American hearings.....	--	--	1
State advisory committee public meetings.....	29	45	50

2. *Reports and studies.*—Studies are conducted and reports issued with recommendations to the President and the Congress. A major study of racial isolation in urban schools, begun in 1966 and completed in 1967, was requested by the President. A final report on Commission activities, findings, and recommendations is due by statute not later than January 31, 1968.

NUMBER OF REPORTS AND STUDIES

	1966 actual		1967 estimate		1968 estimate	
	Begun	Completed	Begun	Completed	Begun	Completed
Civil rights problems:						
In urban areas.....	2	-	3	2	5	5

The Equal Employment Opportunity Commission carries out the provisions of title VII of the Civil Rights Act of 1964, designed to eliminate discrimination in employment based upon race, color, religion, sex, or national origin, through the investigation and conciliation of complaints of discrimination and through programs to secure voluntary compliance from employers and others covered by the act.

1. *Enforcement.*—Provides for the investigation and attempted conciliation of complaints of discrimination filed under title VII.

WORKLOAD DATA

	1966 actual	1967 estimate	1968 estimate
Incoming complaints.....	8,854	10,400	10,400
Number of investigations required.....	1,203	2,400	2,400
Completed investigations.....	642	2,050	12,600
Reviewed for finding of cause.....	445	1,200	2,000
Recommended for conciliation following finding of cause.....	226	600	1,000
Completed conciliations.....	72	550	860
Successful conciliations.....	56	360	560

¹ Includes work carried over from previous year.

2. *Technical assistance.*—Develops and implements on a national, local, industry or other appropriate level affirmative action programs to obtain, through educational and promotional means, compliance with the spirit as well as the letter of the law in order to overcome past and present discriminatory practices, to provide real employment opportunities for minority groups.

3. *State and local projects.*—Carries out the provisions of title VII that authorize cooperative agreements between the Commission and State and local fair employment practice agencies to reduce discrimination in employment.

4. *Legal and research program support.*—Furnishes legal guidance to Commission staff and the public relative to all aspects of title VII; and develops and interprets

statistical analyses and other background data to support Commission programs.

5. *Administration.*—Provides executive direction, staff support in public and congressional relations, and administrative and housekeeping services for Commission programs.

¹ Balances of selected resources are identified on the statement of financial condition.

² Principal receipts are net of portion due holders of portfolio certificates: 1966, \$397,757 thousand; 1967, \$348,519 thousand; 1968, \$296,763 thousand.

³ Interest receipts are net of portion due holders of portfolio certificates: 1966, \$45,149 thousand; 1967, \$68,240 thousand; 1968, \$113,750 thousand.

The Export-Import Bank of Washington was organized in 1934 and its existing programs are authorized under the Export-Import Bank Act of 1945, as amended. The purpose of the Bank is to aid in financing U.S. exports. The major types of financing are loans to foreign borrowers, discount loans to commercial banks, and guarantees to commercial banks. Insurance is issued by the Foreign Credit Insurance Association.

The life of the Bank was extended by Public Law 88-101 to June 30, 1968, at which time the lending authority was increased to \$9 billion and the amount of guarantees and insurance outstanding at any time was established at \$2 billion (to be charged against program activity and lending authority at 25%). Legislation is being requested for another 5-year extension of the life of the Bank, for an increase from \$9 billion to \$13.5 billion in lending authority, and an increase from \$2 to \$3.5 billion in the gross amount of guarantees and insurance outstanding which is charged against lending authority on a fractional basis.

The Bank's receipts exceeded expenditures in 1966 by \$385 million, resulting primarily from sales of portfolio securities to commercial banks. The 1967 forecast provides for \$700 million in such sales, over and above the rollover of certificates put to the Bank, and provides for \$1,000 million in new certificate sales in 1968. On a gross cash basis, the actual and estimated activity of the Bank is as follows in millions of dollars:

	1966 actual	1967 estimate	1968 estimate

Operating results and financial condition.—The Bank is a wholly owned Government corporation. Capital stock of \$1 billion was purchased by the U.S. Treasury. In addition, the Bank is authorized to borrow from the Treasury up to \$6 billion; the Bank pays interest on such borrowings at the prevailing Treasury rate.

The Bank's net income is estimated to be \$121.7 million in 1968, compared to \$132.6 million in 1967 and \$114.2 million in 1966. From its net income, the Bank paid a \$50 million dividend to the Treasury in 1966, and added the remaining balance of \$64.2 million to its retained earnings reserve to provide for future contingencies. The Bank expects to follow a similar course in 1967 and 1968. Total investment of the Government in the corporation is estimated to be \$2,255 million on June 30, 1968.

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed **[\$4,134,000]** \$4,190,000 (to be computed on an accrual basis) shall be available during the current fiscal year for administrative expenses, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. [55a]) \$109, and not to exceed **[\$9,000]** \$12,000 for entertainment allowances for members of the Board of Directors: *Provided*, That (1) fees or dues to international organizations of credit institutions engaged in financing foreign trade, (2) necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, and (3) expenses (other than internal expenses of the Bank) incurred in connection with the issuance and servicing of guarantees, insurance, and reinsurance, shall be considered as nonadministrative expenses for the purposes hereof.

None of the funds made available because of the provisions of this title shall be used by the Export-Import Bank to either guarantee the payment of any obligation hereafter incurred by any Communist country (as defined in section 620(f) of the Foreign Assistance Act of 1961, as amended) or any agency or national thereof, or in any other way to participate in the extension of credit to any such country, agency, or national, in connection with the purchase of any product by such country, agency, or national, except when the President determines that such guarantees would be in the national interest and reports each such determination to the House of Representatives and the Senate within 30 days after such determination.

In addition to the amount heretofore made available for administrative expenses, not to exceed \$128,000 shall be available for such expenses from funds available to the Export-Import Bank. (Foreign Assistance and Related Agencies Appropriation Act, 1967; Supplemental Appropriation Act, 1967.)

¹ Balances of selected resources are identified on the statement of financial condition.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year limitations on administrative expenses.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of 12 Federal land banks (wholly farmer-owned), 13 banks for cooperatives (mixed ownership), 12 Federal intermediate credit banks (mixed ownership), 710 Federal land bank associations, and 471 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

This fund is available to the Governor of the Farm Credit Administration as a revolving fund for investment in capital stock of the Federal intermediate credit banks and the production credit associations. Originally there were separate investment funds for the Federal intermediate credit banks and the production credit associations; however, these funds were combined into a single revolving fund as provided in subsection (f) which was added to section 5 of the Farm Credit Act of 1933 (12 U.S.C., Supp. IV, 1131i) by section 2(1) of Public Law 87-343, approved October 3, 1961.

Budget program—Federal intermediate credit banks.—Legislation approved October 4, 1965, Public Law 89-237, changed the maximum debt-to-capital ratio to 12 to 1 (from 10 to 1). As a result, no investments are anticipated in 1967 or 1968.

Production credit associations.—An estimate for purchase of stock in production credit associations of \$1 million is made for 1967 and \$1 million for 1968. The need arises primarily because the volume of business of associations is increasing more rapidly than necessary net worth can be accumulated from local sources.

Financing.—At the end of 1967 it is estimated that \$1,530 thousand will be invested in the production credit associations and \$51,950 thousand in the Federal intermediate credit banks.

The provisions of section 105(d)(3) of the Farm Credit Act of 1956, which heretofore applied to the Federal Intermediate Credit Banks Investment Fund is applicable to the combined fund. This section provides that of the \$87,405 thousand class A stock of the credit banks outstanding on January 1, 1957, \$57,405 thousand must be retired by payments into the Treasury as miscellaneous receipts. When the balance is reduced to \$30 million, the

This fund is available to the Governor of the Farm Credit Administration for investments in class A capital stock of the banks for cooperatives (12 U.S.C. 1134).

The fund was created with \$500 million capital in 1929; however, it was reduced to \$150 million by legislation approved June 25, 1962 (76 Stat. 109).

Budget program.—No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with section 42(a)(1) of the Farm Credit Act of 1933, as amended.

Operating results and financial condition.—Investment in capital stock will continue to be reduced through 1968, thereby increasing the cash of the fund. The cash balance in the fund at June 30, 1967, is estimated at \$108.9 million.

Coal mine operators, affected by orders issued by Federal coal mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from, such

orders. When operators appeal, hearings are held, and the Board rules upon the applications. It is estimated that the number of orders subject to appeal to the Board will increase to at least 300 in 1968, due to the extension of coverage, and the expansion of categories of orders, provided in the Federal Coal Mine Safety Act Amendments of 1965, approved on March 26, 1966. The recommended appropriation includes an amount estimated to be sufficient to cover necessary administrative expenses, and to handle an expected threefold increase in the caseload, estimated on the basis of experience under the Federal Coal Mine Safety Act, prior to its amendment.

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to (1) attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and (2) regulate the rates and services of communications common carriers.

1. *Commissioners.*—This activity includes the top adjudicatory, policymaking, planning, and decisionmaking for the Commission's basic functions.

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. Pertinent data are shown in the following table:

	1965 actual	1966 actual	1967 estimate	1968 estimate
Stations regulated ¹	8,771	9,255	9,756	10,284

General and special funds—Continued

SALARIES AND EXPENSES—Continued

extensions and reductions in service, construction of facilities and applications to use radio in communication services.

4. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follows (in thousands):

	1965 actual	1966 actual	1967 estimate	1968 estimate
Stations regulated ¹	712	738	776	817
License applications received	404	425	437	456

¹ As of June 30 of each year.

5. *Field engineering.*—Field employees inspect radio stations; administer operator examinations; collect engineering data; monitor the spectrum; and determine the location of lost ships, lost aircraft, and illegal sources of radio emission.

6. *Engineering studies and frequency allocation.*—The Commission undertakes broad studies designed to improve the utilization of the radio spectrum, approves certain equipment for public use, and licenses experimental radio stations.

7. *Citizens radio service.*—Regulation of fixed, land, and mobile stations intended for short-distance personal or business radio communication, radio signaling, and control of remote objects or devices by radio. A pilot study will be undertaken to evaluate the effect of increased enforcement effort. A research study also will be conducted of additional measures to improve the citizen's service. Pertinent data follow (in thousands):

The Corporation insured accounts of depositors in insured banks to \$10 thousand for each depositor. Effective October 16, 1966, this amount was increased to \$15 thousand for each depositor. As of June 30, 1966, the deposit insurance fund, representing the accumulated net income of the Corporation, amounted to \$3.1 billion. The entire fund is available for the protection of depositors in insured banks and for the payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriations are allocated to or used by the Corporation in any of its operations. Its expenses and insurance losses are paid out of the fund which is accumulated principally from assessments paid by insured banks and from income from its investments in obligations of the U.S. Treasury. The Corporation is authorized to borrow from the U.S. Treasury and the Secretary of the Treasury is authorized and directed to loan to the Corporation, on such terms as may be fixed by the Corporation and the Secretary, not to exceed \$3 billion outstanding when in the judgment of the Board of Directors of the Corporation such funds are required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1967 and 1968.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commit-

ments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the current fiscal year for each such corporation or agency, except as hereinafter provided:

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 12 Federal home loan banks, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation; it is also responsible for the examination of all Federal savings and loan associations, and for the examination and supervision of all State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the Division of Examinations—Federal Home Loan Bank Board shall be considered non-administrative; all of its expenses are defrayed from fees charged against and collected from the institutions examined.

Public Law 87-141, approved August 17, 1961, provides that expenses of any functions of supervision (except of Federal home loan banks) vested in or exercisable by the Board shall be considered as nonadministrative expenses.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 12 Federal home loan banks, the Office of Examinations and Supervision, and the Federal Savings and Loan Insurance Corporation.

The expenses of the Home Office of the Office of Examinations and Supervision are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 12 Federal home loan banks, the Office of Examinations and Supervision, and the Federal Savings and Loan Insurance Corporation.

[Dollars in millions]

Federal home loan bank advances outstanding.....	\$6,783	\$7,600	\$7,200

Budget program.—The Board's budget is based on nine activities.

1. *Examination and supervision of Federal home loan banks.*—The Board examines and supervises the operations of the Federal home loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering Federal and insuring savings and loan associations.*—Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion into Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of the insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of approximately 20% of all insured institutions in conjunction with supervisory examinations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes a formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

6. *Analysis of operations.*—An analysis is made of the financial condition of member institutions, the flow of savings, the character and volume of mortgage lending, as well as selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance including volume of activity and interest rates of all major types of mortgage lenders.

7. *Administrative services.*—These consist of auditing, accounting, budgetary and financial reporting, internal budget control, and fiscal organization and management. These services also include general housekeeping and operating services, including printing and reproduction work.

8. *Special studies of the savings and loan industry.*—The Board is authorized by Public Law 89-426, 80 Stat. 141,

143, approved May 13, 1966, to conduct special studies of the savings and loan industry to be completed by December 31, 1968.

9. *Acquisition and construction of a building in the District of Columbia.*—The Board is authorized by Public Law 89-754, 80 Stat. 1255, 1293, approved November 3, 1966, to acquire property and construct a building in the District of Columbia to provide quarters and facilities for the Board. Beginning with the first fiscal year after the date of the enactment of the law the Board is required to annually prepare and submit a budget program for the building as provided in title I of the Government Corporation Control Act.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from \$4,155 thousand to \$4,540 thousand. Nonadministrative expenses covering the expenses of examining and supervising savings and loan associations are discussed separately below.

The Office of Examinations and Supervision under the general direction of the Director of the Office conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of insured State-chartered savings and loan associations, other institutions of the savings and loan type insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank System not subject to State supervision. The Office also examines and analyzes the financial condition of institutions which apply for membership in the System, for insurance of accounts, or for conversion from a State to a Federal charter. The institutions examined bear the costs of examinations, and the fees charged therefor are calculated to defray all of the operating expenses of the examination function.

The Office is also responsible for the supervision of institutions insured by the Federal Savings and Loan Insurance Corporation. The purpose of such supervision is to prevent the development and/or continuance of unsafe and unsound financial practices in these institutions and the correction of such practices where found. In carrying out the supervisory function, the Office reviews and analyzes the examination reports forwarded by the chief examiners of the respective district offices.

The following table reflects the work of the Office (dollars in millions):

The Federal home loan banks, together with the savings and loan associations and similar institutions which are members of the banks, constitute the Federal Home Loan Bank System and are designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 12 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of \$1 billion is provided in 12 U.S.C. 1431 (64 Stat. 257). No borrowings have been made to date and none are anticipated in 1968.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U.S.C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of \$15 thousand, may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver or co-receiver upon request of State authority in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation, the Federal home-loan banks, and the Office of Examinations and Supervision.

[Dollars in thousands]

	1966 actual	1967 estimate	1968 estimate
Number of insured member institutions.....	4,514	4,564	4,624

Reserves and undivided profits of insured member institutions.....	\$8,588,000	\$9,300,000	\$10,000,000
Corporation's reserve for insurance losses.....	\$1,754,000	\$1,949,000	\$2,224,000

1. *Administrative expenses—Insurable interest and insurance settlement operations.*—In carrying out its role of protecting savings in insured savings and loan associations the Corporation has settled 57 cases since its

creation 32 years ago. Total losses (including provision for losses) to June 30, 1966, have amounted to \$75.2 million representing approximately 7.5% of cumulative gross income. Detailed information with respect to all of the insurance cases is summarized in the following table (dollars in thousands):

Method of settlement	Number of associations	Number of investors protected	Net insurance losses (including provision for losses)
Contribution.....	33	74,289	\$10,939
Receivership.....	8	34,905	19,728
Acquisition of assets.....	15	107,719	144,507
Loan.....	1	25,099	(²)
Total.....	57	242,012	75,174

¹ Includes \$3 million loss on loan of \$45 million included under acquisition of assets since assets were acquired in settlement of loan.
² Represents loan in the amount of \$15 million on which no loss is anticipated.

2. *Payment to Federal Home Loan Bank Board for services and facilities.*—The Corporation will pay 25% of the administrative expenses of the Board as a direct charge and 42% of the remaining administrative expenses of the Federal Home Loan Bank Board in 1968 in return for services and facilities by the Board and staff offices, and 47% of the supervisory expenses of the Office of Examinations and Supervision.

6. *Other expenses.*—Provides for liquidation and other expenses of the Corporation in connection with the disposition of assets purchased from and loans to insured institutions to prevent default.

Financing.—The original capital of \$100 million has been completely repaid to the Treasury, together with an additional \$43 million for the use of the funds.

The Corporation has continuing authority to borrow from the Treasury for insurance purposes, with a limitation of \$750 million outstanding at any one time. No borrowings under this authorization have ever been made.

The Corporation is further authorized to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation; except that the total amount so assessed in any one year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members and its creditor obligations.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no one year has its operating expenses amounted to more than 5.3% of total income; in 1966 it amounted to 4.2%. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, return on capital stock, and to establish a reserve for contingencies of \$1,753.9 million as of June 30, 1966. Total revenues and other receipts since 1934, of \$1,908.2 million, have been applied as follows (dollars in millions):

	Amount	Percent
Expense.....	\$36.1	1.9
Net insurance losses and provision for losses.....	75.2	3.9
Return on capital stock to U.S. Treasury.....	43.0	2.3
Reserve for contingencies.....	1,753.9	91.9
Total.....	1,908.2	100.0

Operating expenses (funded) for 1968 are estimated at \$7,694 thousand consisting of administrative expenses of the Corporation of \$298 thousand, \$3,391 thousand for services rendered by the Federal Home Loan Bank Board, and \$4,005 thousand for other expenses.

Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable

able, estimates of these expenditures are omitted from the financial statements.

Net operating income for 1968, which is expected to be increased by \$42.5 million or 49.2% above the net operating income for 1966, will be retained by the Corporation to meet future contingencies.

Public Law 87-210, which became effective January 1, 1962, requires each insured savings and loan association to pay annually to the Corporation an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The law also provides for the crediting of a return on the accumulated prepayments of each insured association at a rate equal to the average realized by the Corporation on its own investment portfolio. It is estimated that prepayments will total \$108 million in 1968 compared to \$152 million in 1966.

Public Law 87-210 further provides for the establishment of a primary reserve which shall be the general reserve of the Corporation and a secondary reserve to which shall be credited additional premiums. When the sum of these two reserves equals 2% of total savings plus creditor obligations, the cash payment of the regular premiums and the prepayments will cease and the Corporation will commence transferring the secondary reserve to the primary reserve by crediting each insured association's accumulated prepayments to its regular premium liability. If the aggregate of the two reserves drops to below 1.75%, the prepayments and the cash payment of the regular premium will be resumed and continued until the 2% ratio is again reached. It is estimated that the aggregate of the primary and secondary reserves will reach \$2.2 billion by June 30, 1968, or 1.7% of estimated savings and creditor obligations totaling \$133 billion.

The Corporation is required by law to accumulate a primary reserve (as of the close of any December 31) equal to 2% of the total amount of all accounts of insured members and creditor obligations of all insured institutions before collection of regular premiums may be discontinued; provided, however, that each insured institution has paid regular premiums for at least 20 years. It is estimated that the primary reserve will reach \$1,019 million by June 30, 1968, or .77% of estimated savings and creditor obligations totaling \$133 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban homeowners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled \$345 thousand at the end of 1966 and are estimated to be reduced to \$319 thousand by the end of 1968.

The Federal Maritime Commission administers the shipping statutes which require the regulation of the domestic offshore and international waterborne commerce of the United States. The program for 1967 and 1968 will emphasize (a) regulation of carriers and conferences of carriers in the foreign commerce of the United States with particular effort given to study of the structure and practices of international steamship conferences to determine the public interest implications of conference rate-making processes and shipping practices; (b) the effect of freight rate levels and disparities on U.S. commodity exports to world markets; (c) removal of foreign discriminations against U.S. shipping; (d) regulation of carriers in the offshore trades with particular emphasis on the shipping service requirements of Alaska, Hawaii, and Puerto Rico; (e) regulation of independent freight forwarders and ocean freight terminals; (f) regulatory aspects of container cargo movements and implications of containerization on commodity freight rates; and (g) determination of passenger vessel financial responsibility for

The Federal Power Commission administers the Federal Power Act and Natural Gas Act, and has additional duties relating to Federal power developments, natural gas supplies, and related natural resources.

1. *Natural gas industry.*—The Commission regulates pipeline companies and independent producers involved in transmission or sale of natural gas for resale in interstate commerce.

On June 30, 1966, there were approximately 3,900 independent producers who, individually or with others, had over 15,000 rate schedules on file. The Permian Basin Opinion issued in 1965 established a permanent system for fixing uniform ceiling prices for gas on an area basis under a two price system. The scheduled issuance of the South Louisiana Opinion in 1967 and the Texas Gulf Coast and Hugoton-Anadarko Opinions in 1968 will continue the area pricing concept. New area rate proceedings, continuing the program of extending area pricing to remaining areas of the Nation, will be initiated in 1967 with hearings probably beginning in 1968 and concluding during 1969.

There were also 126 regulated natural gas pipeline companies. The pipeline activity trend has changed to consideration of competitive certificate cases, those in which two or more companies seek authority to serve a single market, and an increase in contested certificate actions requiring formal hearings. A charge placed on applications for certificates is expected to bring \$1.1 million into the Treasury to defray the cost of processing.

Work programs	1966 actual	1967 estimate	1968 estimate
Applications for certificates of public convenience and necessity:			
Pipeline companies.....	763	811	796
Independent producers.....	4,311	4,403	4,503
Rate filings:			
Pipeline companies.....	1,301	1,359	1,378
Independent producers.....	8,725	9,693	13,593
Cases:			
Pipeline companies.....	70	101	117
Independent producers.....	23	30	37

These workload items vary in complexity. A single area rate case may fix the rates for hundreds of producers; several applications by pipelines for service to a major

FEDERAL POWER COMMISSION—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

market are often heard in a single case. In addition to these programs, the Commission makes annual reviews of the level of earnings of particular pipeline companies, institutes rulemaking proceedings, and verifies flowthrough of pipeline and producer refunds and rate reductions ordered by the Commission. In 1966, the Commission's rate programs resulted in refunds totaling \$59.3 million and reductions in annual rates totaling \$27.7 million.

2. *Electric power industry.*—The Commission regulates electric power companies that are interstate public utilities, encourages coordinated power systems planning and interconnection of facilities for economy and reliability of service, licenses non-Federal hydroelectric projects affecting lands of the United States, or located on streams which flow into interstate commerce, participates in interagency planning for the development and conservation of the Nation's water resources, and collects, maintains, and publishes current information on the electric power industry.

The Commission regulates wholesale rates and services, accounts, depreciation practices, certain security issues, disposition of property, and mergers of interstate electric utilities.

Pertinent data on a calendar-year basis are:

Description	1965 actual	1966 estimate	1967 estimate
Number of public utilities regulated.....	227	227	227
Operating revenues of regulated utilities (in millions).....	\$13,323	\$14,000	\$14,700
Number of utilities reporting for statistical purposes.....	794	794	794
Operating revenues of all reporting utilities (in millions)—includes publicly owned.....	\$16,000	\$16,800	\$17,650

In 1966, the Commission's rate program resulted in annual rate reductions totaling \$6.6 million. Workloads are as follows:

	1966 actual	1967 estimate	1968 estimate
Electric rate filings.....	2,981	2,885	2,685
Electric rate cases.....	51	53	55

The Commission encourages voluntary interconnection and coordination of the Nation's power systems. This pooling of power has yielded tremendous benefits to the Nation through efficient distribution of low-cost electrical energy. The lessons learned in the Northeast power failure and subsequent interruptions of service have pinpointed the need for continued Commission-industry work in identifying technical problems to insure dependable energy to beneficiaries of power grids. The Commission, in cooperation with all segments of the electric power industry, is undertaking studies of measures for improving utility system planning and coordination, to insure system reliability and a dependable bulk power supply for the consumer.

The Commission is working with the industry to update the guidelines of the national power survey and in encouraging utilities to pursue courses of action consistent with them. The survey set guidelines for cost savings by utilities through major programs of coordination and interconnection and the use of large-scale generating facilities. A supplemental report will be issued in 1969. The Commission is undertaking a comprehensive survey of the State of Alaska to insure efficient and economical development and utilization of its power resources. A report will be issued in 1968.

The Commission's hydroelectric project licensing program provides for inspection of projects during construction and operation for sound engineering practices, safety and adequacy, and to insure that projects are being constructed and operated in accordance with license terms and in the interest of protection of life and property. Emphasis is also being placed on development of recreation facilities at projects and reservoirs, protection of fish and wildlife, and consideration of aesthetic values.

Pertinent data on the Commission's licensing program are:

Description	1966 actual	1967 estimate	1968 estimate
Licensed projects—more than 2,000 h.p. (end of year).....	273	311	356
Applications completed during year.....	133	152	170
Applications pending (end of year).....	362	382	418
Annual receipts from license fees (in thousands).....	\$2,875	\$3,639	\$2,826
Total claimed cost of major projects under license (end of year) (in millions).....	\$7,074	\$7,375	\$7,639

Of a potential 160 million kilowatts of hydroelectric power in the United States, approximately 43 million kilowatts had been developed as of January 1966. Of this total, 26 million kilowatts had been developed by non-Federal interests, of which 75% is under Commission license.

The licensing program is self-supporting except for statutory exemption of public bodies from payment of fees and for certain old licenses with fixed payments for which the Commission does not have authority to require additional fees.

The Commission must review each project prior to expiration of its license and submit to Congress an evaluation report including the views of other parties. In 1968, licenses for 2 projects will expire, 1 will expire in 1969, and 24 will expire in 1970.

The Federal Radiation Council advises the President with respect to radiation matters directly or indirectly affecting health, including the formulation of radiation standards and the establishment and execution of programs of cooperation with the States. The Council was established by Executive Order 10831, August 14, 1959, and made statutory by an amendment to the Atomic Energy Act of 1954—42 U.S.C. 20211 (h).

The Council membership consists of the Secretaries of Health, Education, and Welfare (Chairman); Agriculture; Commerce; Defense; Labor; and the Chairman of the Atomic Energy Commission.

The Council recommends basic guides for radiation protection. When approved by the President, these guides become the basis for the promulgation of operational procedures and regulations by Federal agencies. The Council is considering the need for guidance on such matters as the use of radionuclides in consumer products, and transportation of radioactive materials; radiation protection problems associated with the development of supersonic aircraft; guidance related to potentially new situations involving contamination of the environment by several important radionuclides; and radiation protection guidance for populations when peaceful nuclear explosives are used, for example, in the possible construction of another Atlantic-Pacific canal. Through arrangements with the National Academy of Sciences-National Research Council and the National Council on Radiation Protection and Measurements, the Council maintains a con-

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions, are corrected; economic data and criteria are brought to bear on monopoly and related problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. In 1968, investigation and trial of merger and other antimonopoly cases will be expedited.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences and advertising guides; business and the public are protected from misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1968, regulations will be issued to implement the Fair Packaging and Labeling Act ("Truth in Packaging"), Public Law 89-755, enacted November 3, 1966.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

Funds were appropriated in 1963 pursuant to Public Law 87-616 to cover the balance of payments to be made on awards previously determined by the Philippine War Damage Commission. Amending legislation (Public Law 88-94), enacted August 12, 1963, provided for a \$25 thousand limitation on payments of any individual claim. The balances of the amounts payable beyond the \$25 thousand limitation were transferred during 1966 and 1967 into a new appropriation account to be used for educational programs in the Philippines.

The Corregidor-Bataan Memorial Commission was created by an act of Congress in 1953 (Public Law 83-193) August 5, 1953. Its mission is to cooperate with the Philippine National Shrines Commission in planning a memorial on Corregidor Island to the American and Filipino servicemen who served in the Pacific area during World War II. This memorial for which \$1,500 thousand has been appropriated will be put under construction contract during 1967. Completion of the construction is scheduled for 1968. The Commissions' life expires May 6, 1967.

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States. Of the 588 claims filed, 218 have been completed. Payments of awards are dependent upon subsequent appropriations made through claims, judgments, and private relief acts appropriation to the Treasury Department. These appropriations total \$191.8 million. Present authority for the Commission expires April 10, 1967. Legislation to extend the life of the Commission will be proposed.

INTERGOVERNMENTAL COMMISSIONS—Con.**ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS—
Continued****General and special funds—Continued****SALARIES AND EXPENSES—continued**

This appropriation provides for continuing attention by the Commission to interrelations of Federal, State, and local governments. The 1968 estimate takes into account the recommendations of the Senate and House Committees on Government Operations after reviewing the first 5 years of Commission operations.

The Commission brings together representatives of Federal, State, and local governments for consideration of common problems and easing of friction points in the Federal system. The administration and coordination of Federal grant and other programs requiring intergovernmental cooperation are examined and emerging problems of Federal-State-local relations are identified and explored.

Proposed Federal and State legislative and administrative programs are developed to coordinate taxes at all levels in order to reduce tax overlapping and simplify the tax structure, and to reduce taxpayer compliance costs and costs of tax administration.

Technical assistance is provided in the review of proposed legislation to determine its overall effect in the Federal system, and the most desirable allocations of governmental functions, responsibilities, and revenues among the several levels of Government are recommended.

Recommendations growing out of the Commission's work are submitted, as appropriate, to the executive or legislative branches of Federal, State, and local governments.

The Appalachian Regional Commission was established March 9, 1965, by the Appalachian Regional Development Act of 1965.

The Commission is comprised of the Governors or their representatives from each of the 12 Appalachian States and a Federal cochairman, appointed by the President.

During 1968, the Commission will carry out the following programs:

(1) Develop regional plans and programs for economic development of Appalachia and conduct research needed to promote economic growth of the region.

(2) Evaluate projects to be financed under the act.

(3) Coordinate the implementation of the Appalachian Regional Development Act with other plans and programs at Federal, State, and local level.

(4) Provide technical assistance to the States in the region, in establishing economic development programs under the act.

(5) Supervise the local development district program and serve as Commission liaison with universities, civic organizations, private enterprise, labor, and other organized groups in the region.

The Federal Government pays administrative expenses of the Commission through 1967. Beginning with 1968, the Commission administrative expenses are to be paid equally by the Federal Government and the 12 States in the region as detailed in the trust fund section.

This appropriation provides for the Federal share of the annual expenses of the Commission. The compact provides that the amount required to balance the Commission's current expense budget shall be apportioned equitably among the signatory parties by unanimous vote of the Commission. The amount recommended for the Federal contribution of the Commission's annual expense budget for 1968 is approximately 24%, exclusive of the Federal grant for the water quality program to be made by the Federal Water Pollution Control Administration in the Department of the Interior.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

General and special funds:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), \$5,000. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1967.*)

The Commission regulates carriers engaged in transportation in interstate commerce and foreign commerce to the extent that it takes place within the United States. These carriers are common carriers—railroads, express companies, sleeping car companies, motor carriers, water carriers, pipelines (except for water and gas), and freight forwarders—and motor and water contract carriers.

The increase of \$374 thousand is requested in order to handle the continually increasing number of applications for motor carrier permanent and temporary operating authorities and applications for mergers and consolidations of motor carriers and railroads, to improve the economic and cost data necessary to regulatory activities, and to provide a more adequate level of compliance with the provisions of the Interstate Commerce Act and related acts.

1. *Regulation of carrier rates, practices, operating authorities, and finance.*—This activity of the Commission consists of preparing studies and analyses of operating costs for use in rate proceedings; regulating rates; granting operating authorities; approving applications for abandonments and extensions of railroad lines, financial reorganizations, and rate agreements between carriers; reviewing proposed discontinuances of or change in the operation or service of trains and ferries and formally issuing orders, rules, and regulations.

SELECTED WORKLOAD DATA

Application for permanent operating authorities:	1966 actual	1967 estimate	1968 estimate

The title I housing program consists of 72 low-rent housing units which were constructed under the District of Columbia Alley Dwelling Act. This budget reflects that after June 30, 1967, the rental receipts from these properties shall remain available for operating and maintenance expenses as provided by section 507 of the Housing Act of 1950. Implementation of this provision will place the full financing of the Authority on a businesslike basis similar to local public housing authorities throughout the country. (See National Capital Housing Authority revolving trust fund.)

¹ Includes capital outlay as follows: 1966, \$6 thousand; 1967, \$7 thousand; 1968, \$8 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$118 thousand (1966 adjustments, -\$6 thousand); 1966, \$107 thousand; 1967, \$75 thousand; 1968, \$75 thousand.

1. *Planning development of the National Capital.*—The National Capital Planning Commission is the official planning agency for the District of Columbia as well as for the Federal Government in the District and the National Capital region. In planning for the orderly development of the Nation's Capital, the Commission develops and maintains long-range comprehensive plans and makes recommendations on specific land use and development projects. During the current year the Commission expects to adopt a comprehensive physical development plan for the National Capital. In 1968 the Commission will make a major effort to begin implementation of the plan.

2. *Coordinating metropolitan area planning.*—The National Capital Regional Planning Council was abolished by Presidential Reorganization Plan No. 5 of 1966. Its regional planning functions have been assumed by the Metropolitan Washington Council of Governments. The Commission will continue to represent the Federal interest in the development of the National Capital region.

3. *Pennsylvania Avenue redevelopment planning.*—The Temporary Commission on Pennsylvania Avenue was established by Executive Order No. 11210 of March 25, 1965. The 13-member Commission includes cabinet officers and the heads of agencies with specific interests in the Avenue. The immediate objective of the Temporary Commission is to continue the preparation of plans for the redevelopment of Pennsylvania Avenue.

² Includes \$3,000 thousand for loan (advances) to Maryland.
³ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$670 thousand; 1966, \$417 thousand; 1967, \$0.

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along both shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon. One-half the cost is borne by the local jurisdictions.

2. *Stream valley parks.*—Land is acquired by public bodies with the aid of a one-third contribution from the National Capital Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is acquired in the District of Columbia, with all expenditures being repaid over a period of years to the United States by the District of Columbia. Acquisitions are part of the comprehensive plan for the park, parkway, and playground system of the National Capital. Funds were also provided in 1965 for the acquisition of land to provide a parklike setting for the John F. Kennedy Center for the Performing Arts.

4. *Relocation payments.*—Funds were provided in 1965 for relocation payments to businesses to be displaced by land acquisition related to the John F. Kennedy Center for the Performing Arts.

Legislation enacted in the 89th Congress granted consent to the interstate compact among Maryland, Virginia, and the District of Columbia to create the Washington Metropolitan Area Transit Authority. The new Authority has responsibility to plan, construct, and provide for the operation of an areawide rail rapid transit system to serve the National Capital region. The consent legislation also provides that the functions and duties of the Agency shall be transferred to the new interstate Authority on September 30, 1967. During the interim period the Agency will continue with the engineering and design of the downtown portion of the system and provide professional assistance to the compact Authority.

In 1967 the Agency will continue to develop initial engineering and architectural work and will award final design contracts for sections of the system within the District of Columbia. In 1968 the functions and duties of the Agency will be transferred to the newly created Washington Metropolitan Area Transit Authority which is responsible for planning and constructing a full regional rail rapid transit system. The legislation granting consent to the interstate transit compact (Public Law 89-774) provides that after September 30, 1967, appropriations from the balance of the authorized \$100 million Federal contribution shall be made to the Department of Housing and Urban Development for payment to the Authority.

The National Foundation on the Arts and the Humanities, through operating endowments, promotes the arts and humanities in the United States through grants, consultative services with public and private agencies and stimulation of private philanthropy. Donations received without restriction are matched by Federal appropriations and are used in furtherance of the activities of the Foundation.

1. *Promotion of the arts.*—Grants are made to individual artists, institutions, organizations, and States for projects and productions of cultural significance that will encourage high standards in the arts, further planning and research, and develop appreciation by the general public. The National Council on the Arts was transferred to the Endowment for the Arts by Public Law 89-209 and the new obligational authority and expenditures for the Council are included in the schedules above.

2. *Promotion of the humanities.*—Grants are made for the development of individual scholars, for individuals and institutions to carry out research and publication, for strengthening teaching, and to bring about a better understanding and appreciation of humanistic studies.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$111 thousand; 1966, \$255 thousand; 1967, \$326 thousand; 1968, \$116 thousand.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Additional funds are requested to enable the agency to effectively cope with a steadily rising caseload in both unfair labor practice and representation cases. Estimates for 1968 reflect an intake increase over 1967 of 2.9% for unfair labor practice cases and 5.1% for representation cases.

1. *Field investigations and determinations.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. About 87% of the unfair labor practice cases and about 83% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives for the voluntary settlement of disputes, and the high incidence of informal settlements achieved thus far is expected to continue in 1968.

2. *Trial examiner hearings.*—Trial examiners conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in trial examiner decisions. In 1966 there were 1,035 hearings held, 137 proceedings adjusted, and 884 decisions issued. The estimate for 1967 is for 1,085 hearings, 171 adjusted proceedings, and 998 decisions. The 1968 estimate is for 1,113 hearings, 173 adjusted proceedings, and 1,000 decisions.

3. *Board adjudication.*—In an unfair labor practice case a trial examiner's decision becomes a Board order if no exceptions are filed. About 25% of these trial examiner decisions become automatic Board orders or are complied with voluntarily. The remainder are referred to the Board for decision, of which the Board issued 760 in 1966. The estimate for 1967 is 826 and the estimate for 1968 is 870. The Board issued 205 decisions in contested representation proceedings in 1965 and 198 in 1966; it is estimated that issuances will be 235 and 236 in 1967 and 1968, respectively. These decisions are inclusive of those cases in which a request for review of regional director's decisions has been granted. Regional directors issued 1,761 such decisions in 1965, and 1,828 in 1966. The estimate is 1,931 for 1967 and 2,029 in 1968.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the courts to enforce its decisions. In 1966 a total of 247 Board decisions of all kinds required litigation; the estimate for 1967 is 363; the estimate for 1968 is 395.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$22 thousand (1966 adjustments, \$35 thousand); 1966, \$57 thousand; 1967, \$24 thousand; 1968, \$24 thousand.

1. *Mediation.*—The board mediates labor disputes and determines collective-bargaining representatives for the 700 carriers and 1.25 million employees in the railroad and airline industries.

MEDIATION CASES

	1965 actual	1966 actual	1967 estimate	1968 estimate
Pending, start of year.....	333	372	542	502
Received during year.....	342	516	360	360
Closed during year.....	303	346	400	400
Pending, end of year.....	372	542	502	462

2. *Voluntary arbitration and emergency disputes.*—When mediation fails, the parties are urged to submit their differences to arbitration or special adjustment boards, including neutral members paid from this account. If neither mediation nor voluntary arbitration are successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint an emergency board to investigate and report on the disputes as a basis for agreement.

Public Law 89-456, enacted on June 20, 1966, amends the Railway Labor Act and provides that either the carrier

or the organization can request establishment of a special adjustment board to dispose of disputes otherwise referable to the National Railroad Adjustment Board. It is therefore expected that the number of cases handled by the special adjustment boards of this activity will increase in 1968, while the number of cases submitted to the Railroad Adjustment Board will decrease. The anticipated changes in workload are reflected in the table below and in the table under activity 3.

	NUMBER OF BOARDS			
	1965 actual	1966 actual	1967 estimate	1968 estimate
Arbitration boards.....	2	5	10	10
Special adjustment boards...	105	121	155	195
Emergency boards.....	4	1	7	7

3. *Adjustment of railroad grievances.*—Railroad employee grievances resulting from application of collective bargaining contracts may be brought for settlement to the 36-man board composed of 4 divisions. Each division has an equal number of carriers and union representatives paid by the parties and handles the grievances of a particular type of employee. The appropriation provides clerical assistance to the board and neutral referees to sit with divisions of the board when they are deadlocked.

The Foundation supports basic scientific research and science education; principally at colleges and universities. Grants and contracts are made for the conduct of basic research and for the construction of research facilities; the development and improvement of the science programs of academic institutions; scientific information services and various national research programs.

Funds are included in basic research project support to give added emphasis to high priority scientific disciplines such as chemistry, oceanography, atmospheric sciences, and the social sciences. These disciplines have a high potential for basic contributions to the solution of perplexing problems in areas such as air and water pollution, weather control, development and use of resources, particularly marine resources.

The 1968 budget also provides increased support for the development and improvement of science and engineering at undergraduate and graduate educational institutions, for improving the quality of science instruction in secondary schools, and for the further development of discipline-based science information systems. Funds are also included to expand substantially the national sea grant program planned for initiation during 1967.

1. *Support for scientific research.*—The budget provides for the award of grants and contracts in the various activities as follows:

(a) *Basic research project support.*—The Foundation supports basic research in the sciences through grants awarded on the basis of merit to investigators at more than 450 institutions, principally colleges and universities.

GRANTS FOR SUPPORT OF BASIC RESEARCH PROJECTS

	1965 actual	1966 actual	1967 estimate	1968 estimate
Number of grants awarded.....	3,159	3,647	3,600	3,870

(b) *Specialized research facilities and equipment.*—The Foundation provides support for major items of specialized scientific facilities and equipment, primarily at colleges and universities.

(c) *National research programs.*—The Foundation supports broad national programs of scientific research

including the Antarctic research program, the Weather Modification program and an Ocean Sediment Coring program.

2. *Science education support.*—The budget provides for a wide variety of programs to strengthen and expand the training and development of scientific manpower including the following programs:

(a) Traineeships and fellowships to graduate students in the various fields of science, mathematics, and engineering; and fellowships to college and university faculty, and foreign senior scientists.

FELLOWSHIPS AND TRAINEESHIPS FOR ADVANCED STUDY IN SCIENCE, MATHEMATICS, AND ENGINEERING

	1966 actual	1967 estimate	1968 estimate
Number of fellowships.....	3,215	2,700	2,776
Number of traineeships.....	5,063	5,910	6,262
Total.....	8,278	8,610	9,038

(b) Institutes for the training of secondary school and college teachers of science and mathematics.

(c) Projects directed toward the improvement of secondary school and college science and mathematics curricula; and supplementary programs to stimulate interest in and secure improvement of teaching and training in the sciences at secondary school and college levels.

3. *Institutional support of science.*—Support is provided to assist in the development and improvement of the science programs of colleges and universities. Included are matching grants for the construction, renovation, and equipping of research laboratories. A relatively small number of large comprehensive grants are made to assist developing institutions which have the potential for achieving a higher level of excellence in the sciences and engineering.

Increased emphasis will be placed on two programs in this activity in 1968 as follows:

(a) *College science improvement.*—This program to improve the scientific capabilities of an individual undergraduate college or an interinstitutional association of such colleges is being enlarged to include a greater number of institutions.

(b) *Academic computational facilities and operations.*—Increased funds will support a pilot and demonstration program to develop and test several alternative methods of providing and using computational facilities in colleges and universities primarily for student use in academic courses through individual or regional centers. Support of computational requirements for scientific purposes related to research and graduate education will be at about the same level as in 1967.

4. *National sea grant program.*—This program of grants and contracts will provide for training, research, and advisory services concerned with the exploitation of marine resources, as authorized by Public Law 89-688, primarily at institutions of higher learning. Revised appropriation language is proposed for separate transmittal to implement this program in 1967.

5. *Planning and policy studies.*—This activity supports surveys and analytical studies of research and development within the various sectors of the economy and the current and projected status of scientific manpower and other resources required for the conduct of scientific activities. These studies are related to the formulation of national policies concerning science.

6. *Science information activities.*—The Foundation supports the collection, translation and dissemination of

information on the results of research and the development of improved methods for the exchange of scientific information. The funding and management of the Science Information Exchange is also the responsibility of the Foundation.

The increase proposed for this activity in 1968 will support the continuing development of discipline-based science information systems, and studies for the design of national science information systems.

7. *International information exchanges.*—A new activity in 1968 provides for a cohesive program including all types of international research and education activities formerly funded under other activities of the Foundation.

RAILROAD RETIREMENT BOARD

General and special funds:

PAYMENT FOR MILITARY SERVICE CREDITS

For payment to the railroad retirement account for military service credits under the Railroad Retirement Act, as amended (45 U.S.C. 228c-1), **[\$17,201,000]** \$17,839,000.

Program and Financing (in thousands of dollars)

Identification code 32-20-0109-0-1-659	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Payment to Railroad retirement account (costs—obligations) (object class 41.0).....	16,558	17,201	17,839
Financing:			
40 New obligational authority (appropriation).....	16,558	17,201	17,839

71 Total obligations (affecting expenditures).....	16,558	17,201	17,839
90 Expenditures.....	16,558	17,201	17,839

Railroad workers entering military service may have such service credited toward benefits under the railroad retirement system under certain conditions. This appropriation of \$17,839 thousand largely covers the cost of an annual installment on the amount due the railroad retirement account for creditable military service for the period through June 30, 1963.

LIMITATION ON SALARIES AND EXPENSES

(Trust fund)

For expenses necessary for the Railroad Retirement Board, **[\$11,175,000]** \$12,850,000, **[to]** of which \$12,000,000 shall be derived from the railroad retirement account, and \$250,000 shall be derived from the railroad retirement supplemental account, as authorized by Public Law 89-699, approved October 30, 1966. (45 U.S.C. 228a-r; Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1967.)

¹ Includes capital outlay as follows: 1966, \$18 thousand; 1967, \$27 thousand; 1968, \$502 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$10 thousand; 1966, \$17 thousand; 1967, \$17 thousand; 1968, \$17 thousand.

The Board administers the Railroad Retirement Act which provides for the payment of annuities for age and disability and benefits for survivors. The Board also participates in the administration of the hospital and medical insurance programs for persons covered by the Railroad Retirement Act for which it is largely reimbursed by the Social Security Administration, the activity of which is reflected in the following "Advances and reimbursements" account. The administrative expenses of the Board in the operation of these programs are financed from a portion of the taxes paid jointly by railroad employers and employees under the provisions of the Railroad Retirement Tax Act.

In addition, the 1966 amendments provided a system of supplemental annuities payable to persons who have attained age 65, have at least 25 years of creditable service, and are entitled to regular annuities under the Railroad Retirement Act. The law provides a supplemental annuity of \$45 for exactly 25 years of service plus \$5 for each additional year of service up to a maximum of \$70 for annuitants with 30 or more years of service. The costs of these supplemental annuities are financed by an excise tax on railroad employers of 2 cents for each man-hour of employment for which the employer paid compensation beginning November 1966. The 1966 amendments also provided for a 7% increase in ordinary benefits payable under the Railroad Retirement Act, except for those annuities which are payable under the so-called social security guaranty provisions in section 3(e) of the Railroad Retirement Act, and spouses' annuities which are payable in the maximum amount, and except for those persons eligible for supplemental annuities. Annuities payable under the special guaranty provision were increased as a result of the raises in social security benefits, generally, by 7% effected by the enactment of the social security amendments of 1965. The 1966 amendments to the Railroad Retirement Act made a number of additional changes in the regular railroad retirement system such as extended children's survivor benefits to full-time students between the ages 18 and 22.

To handle the additional work created by the 1966 amendments to the Railroad Retirement Act the Board will require a supplemental appropriation of \$1,505 thousand for 1967, consisting of \$1,175 thousand additional needed for administering the regular railroad retirement program and \$330 thousand for the supplemental annuity program.

1. *Maintenance of earnings accounts.*—Eligibility for retirement and the amount of benefits paid are based on individual records of earnings and the workload fluctuates according to such factors as level of employment, and rate of turnover in the railroad industry. Accounts posted

were 930,000 in 1966 and are estimated at 920,000 in 1967, and 910,000 in 1968. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing regular claims.*—This activity includes the work of processing annuity claims, establishing eligibility of persons for health and medical insurance benefits, and processing changes in benefit rates. Annuity claims processed were 201,300 in 1966, and are estimated to be 190,800 in 1967 and 1968. Eligibility for hospital and medical insurance was established in 1966 for 557,000 persons who began to receive provided services in 1967. The number of benefit rate changes were 373,000 in 1966, and will be 581,000 in 1967 and 85,000 in 1968.

3. *Processing supplemental claims.*—It is estimated 21,000 persons will qualify for supplemental annuities during 1967 and 16,000 during 1968.

4. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments will increase from 10,840,000 in 1966 to an estimated 11,000,000 and 11,150,000 in 1967 and 1968. The number of persons on the rolls receiving monthly benefit payments will increase from 923,000 at the end of 1966 to an estimated 931,000 and 938,000 at the end of 1967 and 1968.

5. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions were 176 in 1966 and are estimated to be the same in 1967 and 1968.

6. *Actuarial services.*—Actuarial studies and estimates of the assets and liabilities of the Railroad retirement account are required by law.

7. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$5 thousand; 1966, \$6 thousand; 1967, \$6 thousand; 1968, \$6 thousand.

The Board conducts renegotiation with contractors and subcontractors to determine and eliminate excessive profits in connection with procurement under defense and space programs. The act provides that a report must be filed with the Board by every contractor or subcontractor having receipts or accruals in a fiscal year which exceed \$1 million (\$25,000 in the case of brokers and manufacturers' agents) from contracts or subcontracts subject to the act. Determinations of excessive profits were made by the Board in the amount of \$936.4 million, before adjustment for Federal income and excess profits tax credits, from the date of its establishment through June 30, 1966. Of this total, \$24.5 million was determined during fiscal 1966.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes the screening of

contractors' filings and the handling of requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations (field).*—The two regional boards conduct renegotiation proceedings and make determinations and recommendations. They are authorized to conclude cases involving \$800 thousand or less of renegotiable profits; however, their determinations in such cases may be appealed to the statutory Board. All determinations in cases involving more than \$800 thousand renegotiable profits are subject to approval by the statutory Board.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—Issuers of securities for public sale are required to file a registration statement and related prospectus containing significant information about the issuer and the offering with the Commission. This is to insure that investors will be provided with the material facts concerning security offerings. Certain provisions of the Securities Acts Amendments enacted August 20, 1964, extend to investors in certain over-the-counter securities, the same protections now afforded to those in listed securities: namely, registration of classes of securities; annual and periodic company reporting; regulation of proxy solicitation; and restriction upon "insider" trading.

Administrative actions closed.....	59	29	36	36
Regulation A filings examined.....	428	399	423	430

2. *Prevention and suppression of fraud.*—Suspected fraud, deceit, and manipulation in the sale and trading of securities is prevented or minimized by prompt investigation. For 1968, the broker-dealer inspection cycle is estimated at 3 years. These inspections include the inspection of non-NASD members. Inspection of investment advisers is estimated on a 6½-year cycle.

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment. It will be required to supply an estimated 285,000 men for this purpose in 1968 as compared with approximately 311,000 in 1967 and 342,000 in 1966.

1. *National administration, planning, training, and records management.*—The overall administration of the act, including planning, training, and records management, is accomplished by the national headquarters and six regional field offices.

2. *State administration, planning, training, and records servicing.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting over 33 million registrants are accomplished by the over 48,000 uncompensated citizens

SELECTIVE SERVICE SYSTEM—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

assisted by about 8,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long, in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *Special boards.*—(a) *National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.*—This committee acts in an advisory capacity to the Selective Service System. It is separately administered, but funds are furnished by the Selective Service System from its appropriations.

(b) *National Selective Service Appeal Board.*—This board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

A supplemental estimate for 1967 is proposed for separate transmittal.

² Includes reserves for savings in 1967 in addition to 10% contingency reserve authorized by the appropriation act.

The Small Business Administration counsels, assists, and protects the interest of small business, and provides aid to business firms and homeowners who have suffered losses through disasters. These efforts are conducted through the following activities:

1. *Procurement and management assistance.*—The objectives of this activity are (a) to insure that a fair proportion of Government contracts for purchases of supplies and services, including research and development and for the sale and disposal of property, be placed with small business enterprises, and (b) to provide technical and management assistance through management courses, and counseling on new and improved products and processes. In 1968, assistance to loan applicants and borrowers is to be increased through a stepped-up management counseling and training effort. Funds for this activity are provided by direct appropriations.

2. *Research contracts.*—Research studies designed to reveal matters materially affecting the competitive strength of small business and the effect on small business of Federal laws, programs, and regulations are financed under this activity. Funds for this activity are provided by direct appropriations.

3. *Financial assistance.*—This activity comprises: (a) *Business loans.*—This includes loans and financial counseling to small business concerns, businesses displaced because of federally aided construction, businesses affected by changing economic conditions resulting from increased competition from imported articles, and businesses eligible under title IV of the Economic Opportunity Act of 1964. Funds for salaries and expenses to support this subactivity are transferred from the Business loan and investment fund.

(b) *Development company loans.*—This covers efforts to encourage private institutions to expand their role in the economic development of their respective States and loans to State and local development companies to enable them to provide the long term capital—equity and loans—to small businesses. Funds for salaries and expenses to support this subactivity are transferred from the Business loan and investment fund.

(c) *Disaster loans.*—This subactivity provides financial assistance on favorable terms to victims of natural disasters for rehabilitation of property damaged or destroyed. Funds for salaries and expenses to support this subactivity are transferred from the Disaster loan fund.

4. *Investment company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns, Small Business Administration is authorized to (a) license, regulate, and examine small business investment companies, (b) provide initial capital to these companies, and (c) lend growth funds to such companies for financing small business firms. Funds for administrative expenses to support this activity are transferred from the Business loan and investment fund.

¹ Balances of selected resources are identified on the statement of financial condition.

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance all loan programs other than natural disaster loans, and including trade adjustment assistance loans and prime contracting activity performed pursuant to sections 7(a), 7(b)(3), 7(e), and 8(a) of the Small Business Act, as amended, titles III and V of the Small Business Investment Act of 1958, as amended, and title IV of the Economic Opportunity Act of 1964. Administrative and other related expenses are also financed from this fund.

There was also transferred the unexpended balance of appropriations previously made for Trade adjustment assistance loans. In the tables and narrative which follow, 1966 data are shown for comparative purposes although the transactions were financed from the predecessor fund.

While no ceiling on authorized appropriations is specified for this fund, a limitation of \$2 billion has been placed on the amount of loans and commitments (reservations) which may be outstanding at any one time. This ceiling is composed of separate limitations on outstanding amounts as follows (in millions of dollars):

Business loans (including a limitation of \$100 million on economic opportunity loans).....	1,400
Development company loans.....	200
Investment company loans.....	400

It is estimated that by June 30, 1968, the outstanding amounts will substantially equal the respective limitations. The \$100 million limitation on Economic Opportunity loans will be reached before that date. Thus, legislation will be proposed to increase each limitation.

SMALL BUSINESS ADMINISTRATION—Continued**Public enterprise funds—Continued****BUSINESS LOAN AND INVESTMENT FUND—continued**

Outstanding loans and reservations at the end of each year for the programs financed by this fund are as follows (in millions of dollars):

Capital outlay.—1. *Financial assistance program—Business loans (Sec. 7(a), Small Business Act).*—Funds may be loaned to business concerns which are independently owned and operated and which are not dominant in their fields. To such small businesses, loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a bank participation loan is not available and no loan on an immediate participation basis may be made unless it is shown that a guaranteed loan is not available. Under the guarantee plan, the Small Business Administration agrees to purchase the guaranteed portion of the loan only upon default.

The agency's share of an immediate participation or guaranteed loan is limited to 90%. Its maximum out-

standing loan and/or commitment to any one borrower is limited by statute to \$350 thousand, except for a loan to a corporation formed and capitalized by a group of small business concerns for purposes authorized in the Small Business Act. With respect to such corporations, the limitation is \$250 thousand multiplied by the number of separate small businesses participating in the corporation. Business loans, except for the purpose of constructing facilities, are limited to a maturity of 10 years and with one exception bear interest at a maximum rate of 5½% per annum on the agency's share thereof. For loans to a corporation formed by a group of small firms as referred to above, the rate of interest on the Small Business Administration's share is no less than 4%, nor more than 5%, per annum.

The Small Business Administration counsels businessmen operating small firms and assists them to secure credit for constructive purposes.

From the inception of the lending program (Sept. 29, 1953) through June 30, 1966, 67,739 loans have been approved in a total amount of \$2,965.4 million. Participating banks' share of this amount has been \$526.5 million. Fifty-eight percent of the total loans approved have been on a participation or guarantee basis. In 1968, it is estimated that 12,828 loans will be approved, compared with an estimate of 9,744 in 1967.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks or other private lending institutions on participation and guaranteed loans. Accordingly, the Small Business Administration's share of disbursements and repayments will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

¹ Including pooled loans pledged as security for outstanding participation certificates.

Business loans (Economic Opportunity Act of 1964).—The Small Business Administration administers a program of financial assistance to very small business concerns and to qualified persons seeking to establish such concerns pursuant to authority contained in title IV of the Economic Opportunity Act of 1964 (78 Stat. 526). Loans may be on a direct, immediate participation, or guaranteed basis for up to \$25 thousand, for a maximum term of 15 years. The credit and collateral requirements are more flexible than those applicable to the 7(a) business loans and provision for management training is made an integral part of the program. It is estimated that 5,217 loans will be approved in 1968, in comparison with 4,347 loans in 1967.

Displaced business loans.—Pursuant to authority provided by the Housing Act of 1961, loans are made to small firms that suffer substantial economic injury as a result of being forced to move by federally aided urban renewal, highway, and other construction programs. The interest rate on the Small Business Administration's share of these loans is determined pursuant to a formula prescribed by legislation. For 1966, the rate was 3% per annum, while in 1967 the rate is 4%.

Through June 30, 1966, a total of 753 displaced business loans for \$48.4 million had been approved. Approvals during 1966 were 276. It is estimated that 370 loans for \$35 million will be approved in 1968 compared to 320 loans for \$30 million in 1967.

Trade adjustment loans.—Section 7(e) of the Small Business Act, as amended, authorizes the Small Business Administration to make loans to eligible firms under the provisions of the Trade Expansion Act of 1962, which act provides for certification by the Secretary of Commerce of proposals for economic adjustment submitted by eligible firms. The Secretary refers such proposals to an appropriate Federal agency having lending authority. The agency then determines whether and to what extent it may provide financial assistance. The Small Business Administration is permitted to make loans to firms of any size and in any dollar amount for a period not to exceed 25 years. It is estimated that \$1.2 million will be loaned in both 1967 and 1968.

State and local development company loans.—The Small Business Administration lends funds to State and local development companies pursuant to sections 501 and 502 of the Small Business Investment Act, as amended. Funds are made available to State development companies for general-use purposes under section 501 and to State and local development companies for plant construction, conversion, or expansion, including the acquisition of land, under section 502. The latter type loans must be so secured as reasonably to assure repayment, may be made directly or in participation with banks or other lending institutions, may be made only when the proceeds are to assist an identifiable small business concern and for a sound business purpose approved by the agency, and are limited to a maximum of \$350 thousand for each such identifiable small business concern.

2. *Investment company assistance—Purchase of debentures of small business investment companies.*—A primary function of these companies is to provide a source of needed equity capital for small business concerns. To facilitate the formation and growth of such companies, the Small Business Investment Act, as amended, authorizes the Small Business Administration to purchase subordinated debentures of any such company in good standing in an amount not to exceed the lesser of \$700 thousand or the amount of the paid-in capital and surplus of the company from other sources.

Loans to small business investment companies.—The Small Business Administration is authorized to lend funds to those companies in good standing in amounts which may not exceed 50% of the paid-in capital and surplus or \$4 million, whichever is less.

Operating costs.—(a) *Interest expense.*—Interest is payable into miscellaneous receipts of the Treasury based on the outstanding interest-bearing disbursements from the fund. Interest rates are determined by the Secretary of the Treasury after taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. Rates for disbursements in 1967 have been

set at 4% for debenture purchases, 4% for development company loans, and 4% for business and investment company loans. These rates have also been used in computing interest expense for 1968.

(b) *Administrative expense.*—Expenses for the loan programs financed by this revolving fund are financed by transfer of funds to the appropriation, Salaries and expenses. Use of these funds for salaries, travel and related expenses are accordingly reflected in the schedules for that appropriation account.

(c) *Payment of insufficiencies on participation certificates sold.*—In respect to participation sales as discussed below under "Financing," the Participation Sales Act of 1966 authorizes appropriations without fiscal year limitations of such sums as may be necessary to permit any trustor agency to pay the trustee any insufficiencies as may be required by the trustee on account of authorized participations. Appropriations in an indefinite amount were made in the Independent Offices Appropriation Act, 1967 pursuant to the authority cited. The current estimate of \$3,800 thousand of costs to be reimbursed from the available appropriation represents the differential between estimated interest to be paid on participation certificates in 1968 and the interest collections on the loans placed in trust as security for such participations.

Financing.—This fund was initially capitalized by a transfer of the applicable portion of the assets, liabilities, and unexpended balance of the Revolving fund, Small Business Administration on July 1, 1966, and the unexpended balance of appropriations for Trade adjustment assistance loans. In addition, appropriations are authorized to be made to the fund as capital to the extent required to carry out the authorized functions. Appropriation requests are based on the additional amounts required to finance the estimated program volume and related administrative, interest, and other expenses after taking into consideration unobligated funds from prior years and funds becoming available through principal repayments, sales, and revenue.

Current Administration policy is to substitute private for public credit to the maximum extent possible. The Participation Sales Act of 1966, authorized SBA to place loans in a trust and through the FNMA as trustee to sell participation certificates in such loan pools. The aggregate amount of such participations for any one trustor agency may not exceed the amount authorized for such trustor in an appropriation act. In respect to SBA, the Independent Offices Appropriation Act, 1967 authorized participation sales of not to exceed \$850 million, said authority to be available through June 30, 1968. Participation sales of \$500 million in 1967 and \$500 million in 1968 are presently anticipated against loan pools established from this fund and the Disaster Loan Fund. Additional authority is being requested to permit the sale of the additional \$150 million. The total of \$1 billion in anticipated sales over the 2-year period covers \$875 million from this fund and \$125 million from the Disaster Loan Fund. For this fund, the proceeds from planned sales, together with repayments and revenues on unpledged loans, are estimated to be sufficient to finance the 1968 program level and provide a carryover balance at June 30, 1968 of \$476.5 million for use in subsequent years. Sales of \$350 million of participation certificates in 1966 under the predecessor fund were authorized by a separate section of the Participation Sales Act of 1966 and excepted from the requirement for authorization in an appropriation act.

Operating results.—The fund will operate at a deficit.

SMALL BUSINESS ADMINISTRATION—Continued

Public enterprise funds—Continued

BUSINESS LOAN AND INVESTMENT FUND—continued

Interest and fee income will not be sufficient to cover interest, administrative and other expenses and a provision for estimated losses. Primarily, this results from the cost of processing a large number of loan applications which are not approved and the cost of servicing an expanding number of widely scattered loans which are relatively small in size.

94	Applicable receipts.....				-181,456	-37,946

¹Balances of selected resources are identified on the statement of financial condition.

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance disaster loans other than those to displaced businesses, made pursuant to sections 7(b)(1), 7(b)(2), 7(b)(4), and 7(c)(2) of the Small Business Act, as amended. These loans are commonly referred to as natural disaster loans. Administrative and other related expenses are also financed from this fund.

In the tables and narrative which follow, 1966 data are shown for comparative purposes although the transactions were financed from the predecessor fund.

No limitation was placed on the amount of loans and commitments (reservations) which may be outstanding at any one time from the fund. Actual and estimated outstanding disaster loans and reservations at the end of each year are as follows (in millions of dollars):

	1966 actual	1967 estimate	1968 estimate
Investment in outstanding loans ¹	\$292.5	\$327.1	\$359.6
Outstanding loan reservations:			
Deferred participation loans disbursed			
by banks.....	.1	-----	-----
Undisbursed loan authorizations.....	28.6	15.0	17.0
Total, loans and reservations.....	321.2	342.1	376.6

¹Includes \$89.8 million in 1966, \$175.9 million in 1967, and \$196.3 million in 1968 of pooled loans pledged as security for outstanding participation certificates.

No restrictions exist on the amount which may be loaned to an individual or business suffering loss from a natural disaster. No restrictions exist on the size of business firm which may be eligible for a natural disaster loan. The interest rate may not exceed 3% on the Small Business Administration's share of the loan. The maximum term is 30 years.

Through June 30, 1966, a total of 57,867 disaster loans for \$511.7 million had been approved. Approvals during 1966 were 30,920 for \$199.2 million (the highest year of record in both number and amount). Recognizing that such loans cannot be predicted, the estimate for both 1967 and 1968 is \$100 million in new loans in view of the extensive amount of loans approved in 1966.

The following tabulation reflects certain data on disaster loans and includes as applicable funds disbursed and collected by banks and other private lending institutions on participation and guaranteed loans. Accordingly, the Small Business Administration's share of disbursements and repayments will not in all instances agree with related data in the financial statements which reflect transactions on the basis of only the Small Business Administration's cash funds involved.

¹ Includes pooled loans pledged as security for outstanding participation certificates as referred to in previous tabulation.

Operating costs—(a) Interest expense.—Interest is payable into miscellaneous receipts of the Treasury based on the outstanding interest-bearing disbursements from the fund. Interest rates are determined by the Secretary of the Treasury after taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. A rate of 4¾% has been set for disbursements in 1967. This rate has also been used in computing interest expense for 1968.

(b) Administrative expense.—Administrative expenses for this program are financed by transfer of funds from the revolving fund to the appropriation, Salaries and expenses. Use of these funds for salaries, travel and related expenses are accordingly reflected in the schedules for that appropriation account.

(c) Payment of insufficiencies on participation certificates sold.—In respect to participation sales as discussed below under "Financing," the Participation Sales Act of 1966 authorizes appropriations without fiscal year limitations of such sums as may be necessary to permit any trustor agency to pay the trustee any insufficiencies as may be required by the trustee on account of authorized participations. Appropriations in an indefinite amount were made in the Independent Offices Appropriation Act, 1967 pursuant to the authority cited. The current estimate of \$3,438 thousand of costs to be reimbursed from the available appropriation represents the differential between estimated interest to be paid on participation certificates in 1968 and the interest collections on the loans placed in trust as security for such participations.

Financing.—This fund was initially capitalized by transfer of an applicable portion of the assets, liabilities, and unexpended balances of the Revolving fund, Small Business Administration on July 1, 1966. In addition, appropriations are authorized to be made to the fund as capital to the extent required to carry out the authorized functions. Appropriation requests are based on the additional amounts required to finance the estimated program volume and related administrative, interest, and

other expenses after taking into consideration unobligated funds from prior years and funds becoming available through principal repayments, sales, and revenue.

Current Administration policy is to substitute private for public credit to the maximum extent possible. The Participation Sales Act of 1966 authorizes SBA to place loans in a trust and through the FNMA as trustee to sell participation certificates in such loan pools. The aggregate amount of such participations for any one trustor agency may not exceed the amount authorized for such trustor in an appropriation act. In respect to SBA, the Independent Offices Appropriation Act, 1967 authorized participation sales of not to exceed \$850 million, said authority to be available through June 30, 1968. Participation sales of \$500 million in 1967 and \$500 million in 1968 are presently anticipated against loan pools established from this fund and the Business Loan and Investment Fund. Additional authority is being requested to permit the sale of the additional \$150 million. The total of \$1 billion in anticipated sales over the 2-year period covers \$125 million from this fund and \$875 million from the Business Loan and Investment Fund. For this fund, the proceeds from planned sales, together with repayments and revenues on unpledged loans, are estimated to be sufficient to finance the 1968 program level and provide a carryover balance at June 30, 1968 of \$103.4 million for use in subsequent years. Sales of \$350 million of participation certificates in 1966 under the predecessor fund were authorized by a separate section of the Participation Sales Act of 1966 and excepted from the requirement for authorization in an appropriation act.

Operating results.—The fund will operate at a deficit. With the interest rate on loans set by statute at 3%, interest and fee income are not sufficient to cover interest to Treasury at the current rate of 4¾%, as well as administrative expenses and a provision for estimated losses.

New obligational authority:			
42 Transferred from "Revolving fund, Small Business Administration" (70 Stat. 484).....	5,000		
43 Appropriation (adjusted).....	5,000		

This fund was established to finance a program of insurance to guarantee payments on leases of small business concerns displaced by urban renewal projects and those eligible for loans under title IV of the Economic Development Act of 1964. It was capitalized by the transfer of \$5 million from the Revolving fund, Small Business Administration pursuant to Public Law 89-117. In order to make the fund self-sustaining, lessees are to pay an insurance premium of not to exceed 2½% of the lease amount, or a premium based on sound actuarial computation. An operating program is in the process of being developed.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders (1965 adjustments, \$2 thousand): 1965, \$1,557 thousand; 1966, \$1,857 thousand; 1967, \$1,657 thousand; 1968, \$1,657 thousand.

The Smithsonian Institution maintains public exhibits, representative of the arts, American history, aeronautics, space, technology, anthropology, geology, and biology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historic interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts in the United States and in many foreign countries; and participates in the international exchange of scientific literature. The areas of research in the natural sciences include anthropology, biology, geology, solar radiations, and astrophysics. The Smithsonian is also undertaking an intensive program of classification and study of marine organisms collected in connection with the Government's expanded oceanographic program.

The Institution administers three museums, five scientific programs, three art galleries, the Armed Forces Museum Advisory Board, and associated international programs. It is responsible also for the operation and maintenance of seven main exhibition buildings; the Astrophysical Observatory in Cambridge, Mass.; the Smithsonian Tropical Research Institute in the Panama Canal Zone; the River Basin Surveys in Lincoln, Nebr.; a major storage facility at Silver Hill, Md.; a conference center at Belmont, Md.; the Barney Studio House; the Chesapeake Bay Center for Field Biology; and supporting laboratories and storage space.

During the budget year the National Collection of Fine Arts and the National Portrait Gallery will continue to improve the condition of their collections and will prepare exhibitions in readying the Fine Arts and Portrait Galleries Building for opening to the public in 1968.

The National Air and Space Museum, with authorization for the construction of a suitable building, will expand its program to record and exhibit the history of air and space flight; and to provide educational facilities and programs for the public and the scholar in the science and technology of aeronautics and astronautics. The Institution will continue to extend its scientific activities. Programs of cooperative research and training will be continued, and greater emphasis will be placed on the use of museum resources in primary and secondary school programs.

The John F. Kennedy Center for the Performing Arts was created, as a bureau of the Smithsonian Institution by the Act of September 2, 1958, as amended. The Board of Trustees of the Center is authorized to construct and operate a national cultural center in Washington, D.C., on a site provided by the Federal Government. Warrants totaling \$15.5 million were issued as the Federal Government's contribution to the costs of constructing the Center to match a like amount contributed by the public prior to June 30, 1965. A Federal loan of \$15.4 million is authorized for construction of foundations and underground parking facilities, which is to be repaid from parking receipts. The remaining costs of construction and operating the Center are to be provided by the trustees from public contributions. Construction is underway and it is anticipated that the building will be completed in 1969.

Adjudication of cases and legal activities.—Upon petitions being filed, the Board holds formal hearings and determines whether: (a) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (b) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (c) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be canceled; and (d) a particular Communist-infiltrated organization has ceased to be a Communist-infiltrated organization. The Board's determinations involve the consideration of petitions, motions, answers, and evidence adduced at the hearings. In the individual registration proceedings as well as in proceedings involving organizations, the Board is empowered to hold hearings—which shall be public—to examine witnesses and receive evidence, and to compel the attendance and testimony of witnesses and the production of documents relevant to the matter under inquiry. In each case the Board issues a report in writing setting forth its rulings and findings as to the facts, and issues an appropriate order.

A supplemental appropriation for 1967 is anticipated for separate transmittal.

The major responsibility of the Commission is to assess the impact of United States and foreign trade policies on domestic industries and to provide reports to the President, the Congress, and the public on these matters. The increased complexity of our foreign trade relations, the increase in our foreign trade in recent years, and the greatly changing patterns of world trade have created a greater need for research, investigations, and reports on tariff and trade activities.

The Trade Expansion Act of 1962 and the Automotive Products Trade Act of 1965 have further increased the need for the Commission to assemble information enabling it to make determinations on petitions for adjustment assistance.

The Tax Court hears and decides cases involving income tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1968, the court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 6,300 cases.

The actual and estimated work volume of the court is presented in the following tabulation:

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$188 thousand; 1966, \$1,814 thousand; 1967, \$1,500 thousand; 1968, \$1,400 thousand.

The Commission consists of five men from private life, appointed by the President. The Commission has initiated a full and complete investigation and study, including on-site surveys to determine the feasibility of and most suitable site for an interoceanic sea-level canal, the best means of construction, whether by conventional or nuclear means, and the estimated cost. This effort includes the study of foreign policy considerations, national defense aspects, canal finance, interoceanic and intercoastal shipping, public information and engineering feasibility. The Commission will prepare a report setting forth its findings, conclusions and recommendations at the completion of the study.

The National Advisory Commission on Food and Fiber was established by the President in Executive Order 11256, dated November 4, 1965, to assist the President's Committee on Food and Fiber, established in same Executive order, in carrying out the Committee's primary function of appraising existing and alternative agricultural policies and related foreign trade policies. This appraisal will consider the current economic situation and trends in American farming, including productivity, costs, prices, incomes, farm employment, labor standards, foreign trade and related matters.

The Commission will submit its final report and recommendations to the Committee no later than July 1967 with interim reports as deemed necessary. The Commission must terminate 90 days after submission of its final report, or approximately October 11, 1967.

The financial requirements of the Commission for the period July 1, 1967, to October 11, 1967, is estimated to be \$175 thousand, which will cover in part the Commission's final report to the President, terminal leave payments, releasing of rental equipment and all other related expenses pertinent to fulfilling the function for which the Commission was created.

1. *Investigation of crime and delinquency in the United States.*—The President's Commission on Law Enforcement and the Administration of Justice was established by Executive Order No. 11236, dated July 23, 1965. It is scheduled to report to the President in January 1967. The President requested the Commission to make a new and penetrating examination of the causes of crime and delinquency, measures for their prevention, the adequacy of law enforcement, and the administration of justice. The Commission will also recommend actions to be taken by the Federal, State, and local governments to improve the effectiveness of performance in these fields.

2. *Investigation of crime and delinquency in the District of Columbia.*—The President's Commission on Crime in the District of Columbia was established by Executive Order No. 11234, dated July 16, 1965. The Commission presented an interim report, on the organization of the Metropolitan Police Department, in September 1966. The Commission's final report was completed recently, and its recommendations are being considered by the President and the District of Columbia Board of Commissioners. A number of the recommendations contained in the interim report have already been implemented.

¹ Includes capital outlay as follows: 1966, \$16 thousand; 1967, \$5 thousand; 1968, \$5 thousand.

The Public Land Law Review Commission was created by Public Law 88-606 (78 Stat. 982) to review the laws, policies, and practices governing the public lands of the United States, and their administration and application by Federal agencies. The Commission is charged with reporting to the President and the Congress by December 31, 1968, and with recommending such modification in law, regulation, policy and practice as will, in the judgment of the Commission, assure that the public lands of the United States shall be retained and managed or disposed of all in a manner to provide the maximum benefit for the general public.

Public lands within the purview of the Commission's review responsibility are: (a) the public domain of the United States, (b) reservations, other than Indian reservations, created from the public domain, (c) lands permanently or temporarily withdrawn, reserved, or withheld from private appropriation and disposal under the public land laws, including the mining laws, (d) outstanding interests of the United States in lands patented, conveyed in fee or otherwise, under the public land laws, (e) national forests, (f) wildlife refuges and ranges, and

(g) the surface and subsurface resources of all such lands, including the disposition or restriction on disposition of the mineral resources in lands defined by appropriate statute, treaty, or judicial determination as being under the control of the United States in the Outer Continental Shelf.

The major portion of the Commission's study work will be performed under contract or by consultants. Full-time staff will design studies, supervise contracts and study projects, and evaluate results.

Study design work on approximately 25 major fields of study is scheduled for completion during the remainder of 1967. Actual study work will be initiated for the major portion of these fields of study by the end of the first quarter of 1968.

A series of nationwide regional public meetings held to obtain the views of interested citizens and individual public land users will be completed early in 1968. It is expected that public hearings may be required following the completion of the public meeting series to develop information or data required to supplement study reports. Other hearings may be necessary to (1) review possible alternatives to existing policies, and (2) seek the views of citizens on what policy changes, if any, are desirable.

The Select Commission on Western Hemisphere Immigration was established by Public Law 89-236, which amends the Immigration and Nationality Act, and which was approved October 3, 1965. These amendments provide, among other changes, for the imposition of a limitation of 120,000 per year on immigration from Western Hemisphere countries, beginning with 1969. The Select Commission was established to further consider the desirability of such a limitation. In particular, the Select Commission is to study demographic, technological, and economic trends, especially in the Western Hemisphere; present and projected unemployment in the United States in relation to immigration from other Western Hemisphere countries; interrelationships between immigration and national and international programs and projects of Western Hemisphere nations; the operation of the U.S. immigration laws as they pertain to Western

TENNESSEE VALLEY AUTHORITY—Continued**Public enterprise funds—Continued**

TENNESSEE VALLEY AUTHORITY FUND—Continued

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. TVA is a corporation wholly owned by the Federal Government. Its program in 1968 will be financed from three sources: (1) Appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from non-power activities.

Budget program—1. River and power development.—A major objective of the TVA Act is full development and use of the water resources of the Tennessee River and its tributaries. The development of these natural resources is reflected in regional and national gains in the fields of navigation, flood control, power, light and heavy industry, and recreation. System facilities to be operated in 1968 consist of 29 dams with hydroelectric generating stations, 14 navigation locks at 10 dams, 11 steam-electric generating stations, a power transmission network of about 15,161 circuit miles, and reservoir shorelines totaling 10,000 miles. In addition, TVA will operate in cooperation with local interests a multipurpose system of small dams in the Beech River tributary watershed and local flood control facilities at Bristol, Tenn.-Va.

(a) *Navigation operations* of the multipurpose river development system include maintenance of adequate depths for the all-year 9-foot channel from the mouth of the river at Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles. The TVA estimate of traffic on the Tennessee waterway in calendar year 1965 was 17.4 million tons and 2.2 billion ton-miles. Transportation savings to shippers on this volume of traffic are estimated at \$29.3 million, the difference between freight charges actually paid and those which would have been paid if the river had not been improved for navigation. About 95% of these savings applied on freight originating outside the valley or moving from the valley to outside destinations. Engineering work assures that physical facilities are operated, maintained, and modified or improved to meet the needs of modern waterborne commerce. Technical studies appraise the opportunities for use of the waterway and the barriers inhibiting its use. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of this important resource development tool. Advisory work with State and local agencies leads to new or improved public programs by those agencies to help assure full utilization of the waterway.

The capital outlay program for *navigation facilities* in 1968 provides for miscellaneous minor additions and improvements.

(b) *Flood control operations* of the Tennessee River system maintain and use storage space in upstream reservoirs for seasonal retention of excessive runoff and regulate discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Dams on the Tennessee River and its tributaries provide 11.8 million acre-feet of storage for flood control at the beginning of the flood season. Flood crests are reduced along the Tennessee River and along the tributaries downstream from the reservoirs and to a lesser degree along the lower Ohio and Mississippi Rivers. Since the first project in the TVA system was placed in operation in 1936, regulation of TVA reservoirs to reduce flood crests has averted damages of

about \$326 million in the Tennessee Valley and about \$40 million on the lower Ohio and Mississippi Rivers. As a supplement to operating its reservoir system for flood control, TVA collects and analyzes flood data and studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance given to State and local agencies in finding solutions to local urban and rural flood control problems will be continued in 1968. A frequent and valuable by-product of these efforts is the establishment or revitalization of local planning agencies.

Capital outlay costs for *flood control facilities* in 1968 are estimated at \$760 thousand, including \$454 thousand for resumption of channel improvement work at Red Bank-White Oak, Tenn., \$260 thousand for completion of channel improvements at Sevierville, Tenn., and \$46 thousand for other facilities.

(c) *Power operations* involve generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of power. As of September 1, 1966, power was purchased and distributed by 157 local public agencies and 2 small privately owned utility companies. Total energy to be supplied to the power system from generating facilities of TVA, the Department of the Army on the Cumberland River, the Aluminum Company of America on the Little Tennessee River, and exchange receipts from other utilities is estimated to be 93.1 billion kilowatt-hours in 1968. This is about 10.8 billion kilowatt-hours greater than the energy supplied to the system in 1966 and about 4.3 billion kilowatt-hours above that estimated to be supplied in 1967. Net income from power operations, after depreciation, is estimated to be \$44.8 million for 1968, as compared with \$47.9 million in 1966, and an estimate of \$44.9 million in 1967. The estimates assume average streamflow conditions. Better than average streamflows could produce some increase in net income over the estimates; with sub-normal streamflows, the net income would be reduced by increases in production expenses.

Of the \$91,560 thousand estimate for power supply facilities, all to be financed from power proceeds and borrowings, \$43,580 thousand is for continuing construction of Paradise steam unit 3 and \$47,045 thousand is for continuing construction of Browns Ferry nuclear units 1-2. In addition, an estimate of \$3,710 thousand is included in multipurpose projects for completing construction of Nickajack hydro units 1-4. Scheduled for service in November 1967 and January 1968, the Nickajack units will replace capacity presently available from the Hales Bar project which is to be removed from service. Paradise steam unit 3 is scheduled for commercial operation in October 1969, and the two Browns Ferry nuclear units in October 1970 and October 1971.

Completion of the units as scheduled will bring the estimated dependable capacity of the system by the winter of 1971-72 to 20.42 million kilowatts, including the Army plants on the Cumberland River and other plants operated as a part of the TVA system. Total demands in the winter of 1971-72 are estimated at 19.45 million kilowatts, of which 1.65 million kilowatts will be served by capacity owned by others but made available to TVA under interchange arrangements. There will be a reserve of 14.7% over estimated demands of 17.80 million kilowatts served by TVA capacity to allow for loss of capacity because of breakdown of generating equipment and needs for its maintenance, failure of substation equipment and trans-

mission lines, drawdown of reservoirs during dry periods, and other contingencies. Present indications are that capacity additions now underway will be adequate to meet demands and reserve requirements through the winter of 1971-72.

The 1968 budget includes \$560 thousand for preliminary design work on additional generating capacity tentatively scheduled for operation in the fall of 1972. Capital outlay in 1968 for all power system facilities, including transmission system facilities, is estimated at \$164,272 thousand.

(d) *Multipurpose reservoir operations* involve the management, operation, and maintenance of the 20 multipurpose reservoirs created by TVA dams. This includes water dispatching operations, water control investigations, investigations and control of reservoir ecology, plant protection and services to visitors, operation and upkeep of dam reservations, and operation of reservoir lands. Operating costs, funded, are estimated at \$6,843 thousand for 1968, of which \$1,822 thousand is allocated to navigation operations, \$1,908 thousand to flood control operations, \$2,472 thousand to power operations, and \$275 thousand to cooperative valley development. The remaining \$366 thousand is offset by nonpower proceeds derived principally from operation of reservoir lands.

A total of \$30,824 thousand for multipurpose projects includes \$10,515 thousand to continue construction of Tims Ford multipurpose dam and reservoir started in 1966. Estimated total cost is \$40,500 thousand. An estimate of \$7,300 thousand provides for continuing construction of the Tellico multipurpose project for which the estimated total cost is \$47,000 thousand. To continue construction of Bear Creek multipurpose dam and reservoir, 1968 costs are estimated at \$3,850 thousand; total estimated cost is \$27,500 thousand. The Tellico and Bear Creek projects were started in fiscal year 1967.

Cost of continuing construction of Nickajack Dam and Reservoir, begun in fiscal year 1964 to replace the Hales Bar project, is estimated at \$9,159 thousand in 1968, of which \$3,710 thousand will be financed from power proceeds and borrowings. Total estimated cost, including a navigation lock and four power generating units, is \$69,000 thousand of which \$26,000 thousand is estimated to be financed from power proceeds and borrowings.

The multipurpose projects are in each case important new assets to the region, each tailored to meet specific problems and to open doors to new opportunities for advancing the region's economy.

2. *Fertilizer, agricultural, and munitions development.*—Chemical facilities at Muscle Shoals, Ala., are maintained and operated as a national fertilizer development center, but by statute they must also be available for munitions purposes. These facilities are important to the national defense.

Fertilizer, agricultural, and munitions development activities are of three general types: Research on fertilizer products, processes, and uses; developmental production of fertilizer materials; and demonstration and educational introduction of new materials and improved fertilizer uses to the American farmer.

(a) *Research on fertilizer products, processes, and uses* consists of fundamental research, applied research, process engineering, technical studies of full-scale plant operations, and research on the agronomic requirements and effects of fertilizer materials. TVA works cooperatively with the Department of Agriculture, the land-grant colleges, and with industry to maximize effectiveness of research, hasten use of findings, and to avoid undesirable

duplication. Research results on technological developments and on new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. In 1968, research will be intensified on the development of improved methods of making nitric phosphate fertilizer. Pilot-plant production of potassium polyphosphate also will be underway. Pilot-plant studies directed toward the incorporation of micronutrients in high-analysis fertilizer will continue. Further work will be done on discovering basic fertilizer-soil-plant relationships. Agronomic studies will include investigations of the behavior of anhydrous ammonia and sulfur in the soil and research on aquatic weeds.

(b) *Developmental fertilizer production* has these objectives: To demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense.

(c) *Demonstration and educational introduction* of TVA fertilizers is carried on cooperatively with the land-grant colleges and includes carefully controlled small plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms, and widespread educational introduction of fertilizers, which is also conducted in cooperation with commercial fertilizer manufacturers, distributors, and dealers. Farmers and the fertilizer industry pay for the fertilizers used. The price is dependent upon the novelty of the material or practice, the nature of the demonstration, and the value of the plant nutrient content as measured by commercial fertilizer prices. Agricultural extension services of the land-grant colleges give educational and technical guidance in demonstrating and introducing new fertilizers and fertilizer practices in the participating States. Studies and investigations are conducted to provide information for planning, conducting, and appraising agricultural development activities.

Capital outlay costs in 1968 for chemical facilities are chiefly for continuing the rehabilitation program begun in 1960, including completion of replacement facilities for preparation of charges for electric phosphorus furnaces. Each step of the rehabilitation program makes significant contributions toward reduction in emissions of air and water pollutants.

3. *Cooperative valley development.*—Special attention to selected areas and resources of the Tennessee Valley region, in particularly close cooperation with State and local agencies and with tributary area associations, constitutes an additional phase of TVA's program for the proper use, conservation, and development of the region's natural resources. Investigations identify current problems and opportunities for development under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems.

Cooperative valley development activities are of four principal types: Forestry projects, mineral resources investigations, tributary area development, and regional water quality management. The category also includes research and development of processes for recovery of sulfur and a small research activity directed toward disposal of solid wastes as soil amendments.

(a) *Forestry projects* aid the States, counties, landowners and the timber industry in making full use of the existing

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

forest resource of the valley and of developing it for maximum long-term production of quality timber, consistent with the needs of watershed protection. Forestry projects include appraisals of the quality and quantity of the forest resource and research and demonstrations in forest management, reforestation, industrial wood use, forest tree improvement, forest fertilizer tests, and strip mine reclamation.

(b) *Mineral resources investigations* will continue in 1968 in cooperation with State agencies, with emphasis on economic geology and the preparation in cooperation with State agencies of geologic maps essential to the development of regional minerals.

(c) *Tributary area development* is a comprehensive and concentrated approach to resource development in areas of the Tennessee Valley where specific opportunities exist for further development of the resource base, and where local groups have organized to deal with problems of economic advancement and area improvement. In 1968, TVA will work closely with organized groups in 16 tributary areas of which 14 lie wholly or in part in the Appalachia portion of the Tennessee Valley.

(d) *Regional water quality management* comprises the determination of basic facts about water quality, research on protecting and improving water quality, and demonstrations of ways of maintaining or upgrading the quality of the water resource. This work is conducted in cooperation with appropriate Federal, State, and local agencies and with industrial users of water.

(e) *Research and development of processes for recovery of sulfur* from stack gases will contribute to reducing atmospheric pollution. The objective of this cooperative activity is to develop methods for the recovery of sulfur in useful form and thereby help relieve the worldwide shortage of this material.

(f) *Disposal of solid wastes as soil amendments* will be continued as a study in cooperation with the Public Health Service.

4. *Land Between the Lakes demonstration*.—The 1968 budget program includes provision for continuing development, as a demonstration of new ideas in public outdoor recreation and conservation education, of an area in western Kentucky and Tennessee of approximately 170,000 acres, situated between TVA's Kentucky reservoir and the Corps of Engineers' Barkley Lake. Adequately developed, the area will serve as a stimulus to the lagging economy of the surrounding area by encouraging further private development and will serve as a guide to possible public development of other areas for recreation in the Tennessee Valley region and the Nation. The project will include a variety of activities through which an urbanizing population may use part of its increased leisure to renew its acquaintance with the land and gain new understandings of modern concepts of resource use and conservation. During 1968, funds will be used to continue land acquisition, for construction activities, and for operations. Total capital outlays for the Land Between the Lakes demonstration are estimated at \$51,500 thousand.

5. *General service activities*.—Operating costs for general service activities cover topographic mapping, bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies.

Topographic maps of the Tennessee Valley are vital to TVA's planning, construction, and operational needs. In order to be of practical utility, these maps, which now cover the entire Tennessee Valley, must be revised periodically. The 1968 program will concentrate on those maps which most urgently need revision and which are most necessary for regional development purposes at this time.

The 1968 estimate for reimbursable services is \$2,933 thousand.

Capital outlay funds will cover additions and replacements of office, transportation, and electronic computing equipment and facilities used jointly in conducting all TVA programs.

Total financed from appropriations and nonpower proceeds.....			36,713	49,602	48,696	34,522	52,435	49,106	49,106

Financing.—Amounts estimated to become available in 1968 would be derived from (1) the requested appropriation of \$62,150 thousand; (2) nonpower revenues and receipts of \$24,970 thousand; and (3) power revenues and receipts of \$367,373 thousand. In addition, the budget program anticipates financing from borrowings of \$100 million backed by future revenues. A summary of the application of appropriations follows:

Unobligated balance carried forward.....	-8,386	-6,000	-----
Obligations against appropriated funds.....	52,371	66,086	68,150

Operating results and financial condition.—Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1968 are estimated at \$62 million—\$47 million as a dividend (return on the appropriation investment in the power program) and \$15 million as a reduction in the appropriation investment in the power program.

Total assets are estimated to increase by \$124,861 thousand during 1968. The increase is mainly in fixed assets, reflecting expenditures for construction of facilities; \$86,360 thousand of the increase in assets is in the power program and \$38,501 thousand is in nonpower programs. The estimate of current liabilities at June 30, 1968, is \$6,614 thousand greater than the estimate at June 30, 1967. The increase reflects liabilities mainly related to construction. Borrowings from the public for the power program are expected to increase by \$100 million during 1968. The total Government equity at June 30, 1968, is estimated to be \$18,247 thousand more than that at June 30, 1967. This change largely represents increases in investments in assets financed from sources other than borrowings.

The Agency advises the President and the State Department on arms control and disarmament policy and its implementation, conducts negotiations with other countries looking toward international agreements to control, reduce, or eliminate arms, and will direct, as appropriate, U.S. participation in such control systems as may be adopted.

Approximately 60% of the 1968 request will be for research contracts with industrial firms, nonprofit organizations, and universities. During 1968, the Agency will emphasize in its research efforts studies on nonproliferation of nuclear weapons, controlling hostilities, and economic consequences of arms control proposals.

UNITED STATES INFORMATION AGENCY

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan No. 8 of 1953, the Mutual Educational and Cultural Exchange Act (75 Stat. 527), and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil service and classification laws, of (1) persons on a temporary basis (not to exceed \$20,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such as aliens to be investigated for such employment in accordance with procedures established by the Director of the Agency and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); entertainment within the United States not to exceed \$500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; services as authorized by [section 15 of the Act of August 2, 1946 (5 U.S.C. 55a)] 3109; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; purchase of uniforms for not to exceed fourteen guards; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under [the Travel Expense Act of 1949] 5 U.S.C. 5701-5708, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [\$148,818,000] \$160,900,000 [of which not less than \$11,000,000 shall be used for payments in foreign currencies or credits owed to or owned by the Treasury of the United States]: *Provided*, That not to exceed \$110,000 may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201(c) of the Act of June 30, 1949 (40 U.S.C. 481(c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed \$1,500: *Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), the United States Information Agency is authorized, in making contracts for the use of international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during

the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1967.*)

Note.—Includes \$1,267 thousand obligated in 1966 and shown in the schedules as a comparative transfer from United States Information Agency. Salaries and expenses, special foreign currency program.

The United States Information Agency seeks, by means of communication techniques, to influence public attitudes abroad to achieve U.S. foreign policy objectives. The Agency also advises those responsible for formulating and implementing foreign policies and programs as to the probable impact of those policies on foreign opinion.

Agency operations are largely financed from this appropriation, which covers dollar and certain foreign currency costs, and from the special foreign currency appropriation below.

A 1967 supplemental of \$3.5 million for Southeast Asia is anticipated for separate transmittal. In 1968, the increase of about \$10.2 million in obligations funded from the salaries and expenses appropriation will fund nondiscretionary increases required to maintain the 1967 program level and will provide for selective program increases. The increases are for a stepped-up training program for Agency personnel; for assistance to binational centers and expansion of the student affairs program in

UNITED STATES INFORMATION AGENCY—Con.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Latin America; and increases in research and analysis funds and staff.

1. *Overseas missions.*—The program is carried out in 112 countries. The Agency operates through 233 posts and supports 131 binational centers. The overseas missions carry out country programs designed to influence local attitudes and actions in support of U.S. foreign policy. Overseas missions prepare materials using local facilities and use materials provided by the media services in Washington. The following table summarizes the total cost of dollar and all foreign currency financed mission operations, including the cost of materials supplied by the media services and shared administrative support services provided by the Department of State (in thousands of dollars):

Area	1966 actual	1967 estimate	1968 estimate
East Asia and Pacific.....	18,625	22,340	23,826
Africa.....	11,575	11,862	12,235
Near East and South Asia.....	19,882	20,318	20,683
Latin America.....	15,865	16,863	17,780
West Europe.....	9,948	10,218	10,756
Special European program.....	5,183	5,212	5,501
Soviet Union and East Europe.....	1,393	1,548	1,651
Worldwide missions.....	7,709	9,283	9,685
Total, mission costs.....	90,180	97,644	102,117

2. *Media services.*—These services provide support for overseas country programs.

(a) *Press and publications service* maintains communications facilities for the transmission of editorial and feature materials for adaptation by overseas missions. It produces two monthly magazines titled "America Illustrated," one for distribution in the Soviet Union and the other in Poland; one Arabic language magazine, "Life in America," for distribution throughout the Arab world; and a monthly magazine, "Topic," for the African area, in French and English editions. The service also operates three regional printing centers and provides overseas missions with printing supplies and equipment.

(b) *Motion picture and television service* produces and acquires motion picture films and television programs which are then translated into as many as 58 foreign languages. It adapts these programs for specific country or area use, and supports the foreign production, use, and distribution of films and television programs. The service also supplies the missions with equipment for showing motion pictures.

(c) *Information center service* supports U.S.-operated libraries and reading rooms, and binational centers, providing them with collections of American publications, both in English and in translations, and with English language teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display, and provides books and periodicals for presentation to selected individuals and groups.

(d) *Broadcasting service* produces radio broadcasts in English and in 37 foreign languages. Programs are

broadcast from transmitters at 5 domestic and 11 overseas locations. The service also supplies the overseas missions with recorded radio programs and scripts for placement on foreign stations and with radio supplies and equipment.

3. *Program direction and other services.*—This activity encompasses Agency managerial staffs and centralized servicing functions, as well as the staff engaged in cooperative programs with private organizations. Included are the Office of the Director, the assistant directors for geographic areas, the Office of Policy and Research, physical and personnel security functions, legal counsel, central administrative services and emergency planning.

4. *Shared administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

UNITED STATES INFORMATION AGENCY—Con.

General and special funds—Continued

SPECIAL INTERNATIONAL EXHIBITIONS—Continued

The purpose of this program, except for trade missions, is to increase mutual understanding between the people of the United States and those of other lands through suitable U.S. exhibitions in international fairs and other demonstrations of American economic, social, industrial, scientific, and cultural attainments.

1. *International trade missions* are sent abroad to further the development of American export markets. There were 24 trade missions in 1966, 30 are planned for 1967, and 28 are requested for 1968.

2. *Labor missions* are sent to selected fairs and exhibitions abroad. There were seven labor missions in 1966; eight are planned in 1967; and six are requested for 1968.

3. *Fairs and exhibitions* combine the former international trade fair and special purpose exhibition programs. In 1966 a fourth series of two exhibits was inaugurated under the U.S.—U.S.S.R. exchange agreement, both to be shown in three sites in the Soviet Union in 1967, seven exhibits were mounted at international fairs, and there were two reshowings of prior year exchange exhibits in one country in Eastern Europe. In 1967 12 exhibits are planned at international fairs and six reshowings of prior year exchange exhibits in three countries in Eastern Europe. The 1968 estimate provides for 14 trade fair exhibits, advance costs for the fifth series of U.S.—U.S.S.R. exchange exhibits, and nine reshowings of earlier exchange exhibits in four East European countries.

4. *Montreal Fair*.—U.S. participation in the Canadian Universal and International Exhibition to be held in calendar year 1967 is funded at \$9.3 million appropriated in 1965. Obligations for the Fair will be incurred through fiscal year 1968.

¹ Excludes interest to Treasury pending action by Congress on proposed legislation.

² Balances of selected resources are identified on the statement of financial condition.

Congressional action in connection with the Agency's 1967 appropriation called for the termination of informational media guarantee operations. Accordingly, the

Agency is completing action on the contracts in process, and has stopped the issuance of new guarantees. A proposal to revise the legislative base for informational media guarantee will be submitted to the 90th Congress. Pending action on the new legislation the old program is being phased out.

Under the program now being terminated, foreign countries with serious dollar exchange problems have imported U.S. books, periodicals, films, and other informational media.

Operations in each country were carried out under terms of bilateral country agreements. Under the program, foreign importers made payments in their own currency to American exporters, who then exchanged the foreign currency for U.S. dollars through application to the United States Information Agency. The foreign currencies acquired under the program were available for sale to other U.S. Government agencies for appropriated dollars, which were credited to the informational media guarantee revolving fund.

Program.—Under present authority, payments under existing contracts will be made but no new contracts will be issued for 1968.

Financing.—At present no additional borrowings from Treasury are anticipated. Resources of the fund consisting of cash on hand plus receipts from sales of foreign currencies and contract fees are expected to be sufficient to finance payments to contractors.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$0; 1966, \$66 thousand; 1967, \$66 thousand; 1968, \$66 thousand.
² Includes capital outlay as follows: 1966, \$64 thousand; 1967, \$1 thousand; 1968, \$8 thousand.

The Water Resources Planning Act of 1965 (Public Law 89-80, July 22, 1965) established the Water Resources Council and authorized river planning commissions which, working together, engage in activities designed to meet national and regional water requirements. Federal coordination takes the form of assessing requirements, coordinating water policies and programs of the several Federal agencies, developing procedures for Federal participation in regional or river basin plans, reviewing plans developed by river basin commissions, and making recommendations to the President on possible Federal projects to meet the national water requirements.

The river basin commissions develop for review and approval by the Council regional water and related land use plans designed to make the optimum use of such resources.

Title III of the Water Resources Planning Act of 1965 authorizes financial assistance to the States in developing comprehensive water and related land resources plans. The Water Resources Council, in administering the program, coordinates the grant program with related planning assistance programs of other Federal agencies to determine if they can contribute to achieving the purposes of the act.

Estimates for financing the river planning commissions authorized by title II of the Water Resources Planning Act of 1965 (Public Law 89-80) have been transferred in the estimates to "Water resources planning." The \$110 thousand appropriated for 1966 has been lapsed since no commission was established in that fiscal year.

INDEPENDENT OFFICES—GENERAL PROVISIONS

Sec. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed in connection with the investigation of aircraft accidents by the Civil Aeronautics Board; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans' Administration; or to payments to interagency motor pool where separately set forth in the budget schedules.

Sec. 103. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

Sec. 104. No part of any appropriation made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

GENERAL PROVISIONS

Sec. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.

Sec. 302. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the corporation or agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; wage administration; and processing, recording, and reporting.

Sec. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount equal to as much as the entire cost of such project.

Sec. 304. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. (*Independent Offices Appropriation Act, 1967.*)

General and special funds:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1967] 1968, out of (1) the general fund of the District of Columbia (unless otherwise herein specifically provided), hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and [\$50,000,000] \$60,000,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1966] 1967), (2) the highway fund (when designated as payable therefrom), established by law (D.C. Code, title 47, ch. 19), including the motor vehicle parking account (when designated as payable therefrom), established by law (Public Law 87-408), (3) the water fund (when designated as payable therefrom), established by law (D.C. Code, title 43, ch. 15), and [\$2,146,000] \$2,205,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1966] 1967), (4) the sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 364, 83d Congress), and [\$1,248,000] \$1,294,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1966] 1967), and (5) the metropolitan area sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 86-515); and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, [\$37,527,500] \$49,600,000, which, together with balances of previous appropriations for this purpose, shall remain available until expended, for loans authorized by the Act of May 18, 1954 (68 Stat. 101), and the Act of June 6, 1958 (72 Stat. 183), as amended (77 Stat. 130, 79 Stat. 666), to be advanced upon request of the Commissioners to the following funds: general fund, [\$25,027,500] \$33,300,000, highway fund, [\$12,000,000] \$14,300,000 and water fund, [\$500,000] \$2,000,000. (*District of Columbia Appropriation Act, 1967.*)

Program and Financing (in thousands of dollars)

Identification code 40-00-1700-0-1-555	1966 actual	1967 est.	1968 est.
Program by activities:			
1. Payment to District of Columbia.....	44,250	50,000	60,000
2. Payments for water and sewer service.....	3,122	3,394	3,499
10 Total program costs, funded—obligations.....	47,372	53,394	63,499
Financing:			
40 New obligational authority (appropriation).....	47,372	53,394	63,499
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures).....	47,372	53,394	63,499
90 Expenditures.....	47,372	53,394	63,499

The Federal payment of \$60 million is the authorized annual payment by the United States toward defraying expenses of the government of the District of Columbia and \$3,499 thousand as payment for water and sewer services (61 Stat. 361; 68 Stat. 113; 70 Stat. 183). A supplemental appropriation for 1967 and 1968 is anticipated for separate transmittal.

Object Classification (in thousands of dollars)

Identification code 40-00-1700-0-1-555	1966 actual	1967 est.	1968 est.
23.0 Rent, communications, and utilities.....	3,122	3,394	3,499
41.0 Grants, subsidies, and contributions.....	44,250	50,000	60,000
99.0 Total obligations.....	47,372	53,394	63,499

Proposed for separate transmittal:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Program and Financing (in thousands of dollars)

Identification code 40-00-1700-1-1-555	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Payment to District of Columbia (costs—obligations).....		10,000	10,600
Financing:			
40 New obligational authority (proposed supplemental appropriation).....		10,000	10,600
Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures).....		10,000	10,600
90 Expenditures.....		10,000	10,600

Under existing legislation, 1967.—A supplemental request will be submitted to appropriate the balance of the \$60 million Federal payment currently authorized. The 1967 appropriation act included a Federal payment of \$50 million.

Under proposed legislation, 1968.—Legislation will be recommended to fix the authorization for a Federal payment to the District of Columbia at 25 percent of local tax revenues accruing to the general fund. This will provide an equitable contribution of the Federal Government toward the expenses of the District of Columbia government.

LOANS TO DISTRICT OF COLUMBIA FOR CAPITAL OUTLAY, GENERAL FUND

Program and Financing (in thousands of dollars)

Relation of obligations to expenditures:			
71 Total obligations (affecting expenditures) ..	-----	-----	-----
90 Expenditures	-----	-----	-----

Under proposed legislation, 1968.—Legislation will be recommended to place the general fund loan authorization on a basis which relates the authorization to the ability of the District of Columbia government to repay loans from local revenues and the annual Federal payment. Using this method, an outstanding debt of \$335

million could be supported in 1968. This is an increase of \$45 million over the current fixed limitation of \$290 million now authorized for general fund borrowing.

LOANS TO DISTRICT OF COLUMBIA FOR CAPITAL OUTLAY,
HIGHWAY FUND

Program and Financing (in thousands of dollars)

Identification code 40-00-0139-0-1-555	1966 actual	1967 est.	1968 est.
Program by activities:			
10 Construction of the District of Columbia highway system (costs—obligations) (object class 33.0)	5,500	10,000	15,000
Financing:

90 Expenditures.....	757	787	661

An advance of \$757 thousand was made in 1966 to the stadium sinking fund to meet interest payments on stadium bonds since such payment could not be financed from receipts (2 D.C. Code 1727). Repayment of these advances, with interest, was made in 1967. It is estimated that \$787 thousand will be advanced in 1967 to meet interest payments accruing on December 1, 1966 and June 1, 1967. Repayment, with interest, will be made in 1968. It is further estimated that \$661 thousand will be advanced in 1968.

PART II

DETAILED ESTIMATES FOR TRUST FUNDS

1025

EXPLANATION OF ESTIMATES FOR TRUST FUNDS

Part II contains detailed schedules and explanatory statements on the various trust funds. It excludes the detail on trust fund programs which require annual action by Congress (shown in part I) and the detail on the District of Columbia municipal government funds (contained in a separate budget volume).

TRUST AND DEPOSIT FUNDS DISTINGUISHED

The funds which are covered in this part of the budget are of two types as follows:

Trust funds are those funds established to account for receipts which are held in a fiduciary capacity by the Government for use in carrying out specific purposes and programs in accordance with a trust agreement or a statute. Within the category of trust funds, there is a subcategory of *trust revolving* funds, which are trust funds used to carry on a cycle of business-type operations, including certain corporations which are partly owned by the Government and partly by private interests.

Deposit funds are those funds established to account for collections that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government, or (b) held by the Government as banker or agent for others, being paid out in lump sums at the direction of the owner. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

While the transactions in these groups of funds are a part of the financial program of the Government, trust and deposit funds are reserved for the purposes of the trust or the terms of the deposit; hence these transactions are excluded from the administrative budget totals.

OBLIGATIONAL AUTHORITY FOR TRUST FUNDS

Most trust fund receipts are made available for use by permanent law, without requiring further action by Congress. In a few cases receipts of trust funds can be obligated and expended only in accordance with appropriations enacted by Congress from year to year. Examples are the funds of the United States Soldiers' Home and the general municipal revenues of the District of Columbia. In the case of the Highway trust fund, Congress controls expenditures by appropriations annually, but it grants contract authorizations in advance thereof. In a few other cases, the trust receipts are permanently available for program purposes, but Congress imposes annual limitations on administrative expenses.

1026

FORM OF TRUST FUND PRESENTATIONS

The detailed material in part II covers the trust funds which do not require annual action by Congress. Consolidated schedules are used for the smaller trust funds of each bureau or independent agency.

The material here follows the general format of the similar material in part I. In most cases, all receipts of a trust fund are permanently appropriated as the receipts are collected. In cases where the receipts are not appropriated as the money is collected, an additional schedule identifies the amounts available for appropriation. No appropriation language appears here, and the narrative statement of program and performance usually consists only of an explanation of the sources of money for the fund, the purposes for which it is authorized to be spent, and the legal citations.

TRUST FUND RECEIPTS AND EXPENDITURES

Receipts.—Like administrative budget receipts, trust fund receipts are based upon collections received and deposited, including U.S. Government securities received in lieu of cash and contributions to the trust funds from the general fund. Reported receipts exclude borrowing and the sale or redemptions of U.S. Government securities.

Expenditures.—Like administrative budget expenditures, trust fund expenditures are stated on a checks-issued basis, less refunds collected. The repayment of borrowing and the purchase of U.S. Government securities are excluded from the expenditure figures.

Trust revolving funds.—The small group of funds which constitute trust revolving funds are reported on a *net* expenditure basis. The collections of trust revolving funds, instead of being reported as receipts, are deducted from expenditures.

DEPOSIT FUND EXPENDITURES

Deposit fund expenditures are shown only in total for each agency as a whole. These expenditures are on a net basis; that is, the collections are deducted from checks issued, and the resulting figure is shown as an expenditure. *Checks issued* include transactions to move money into other funds, as well as refunds and the return of money to depositors. When the collections are larger than the gross expenditures, the amount shown as an expenditure is a negative item.

Intergovernmental trust funds.....	4		

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by the Library of Congress Trust Fund Board, and (3) interest at the rate of 4% per annum paid by the Treasury on the principal funds deposited therewith as described under Library of Congress trust fund, principal accounts. (2 U.S.C. 156-160; 31 U.S.C. 725s; 37 Stat. 319.)

1. *Acquisition of library materials.*—During 1966, this included the procurement of manuscripts, Hispanic materials, fine prints, books and other library materials

from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1966 included the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization and control of the collections.*—After more than 6 years of preparation, the monumental third edition of the Union Lists of Serials in Libraries of the United States and Canada was published in February 1966 in five volumes. The Library of Congress Catalog, Books: Subjects 1960-1964, a 5-year cumulation, was published in 25 volumes in April 1966. The 17th edition of the Dewey Decimal Classification was published in July 1965 and the 9th abridged edition in September, following which work was begun on the 18th full and the 10th abridged editions. Work was completed on the 1961-1965 quinquennial edition of New Serial Titles and publication is scheduled for October 1966. The first two issues of the National Register of Microform Masters were published in September 1965 and January 1966, and a third issue is scheduled for October 1966 publication. The preparation of the index and subject headings for Dissertation Abstracts was continued as well as the preparation of printed catalog cards for additional manuscript collections located in the Library of Congress and other institutions. The National Union Catalog of Manuscript Collections, 1963-1964, was published during September 1965, and work was completed on the 1965 issue, with publication scheduled for the fall of 1966.

Obligations by major source of funds for 1966 and estimated for 1967 and 1968 are as follows (in thousands of dollars):

90 Expenditures.....	-----	-----	-----

This schedule covers two principal accounts—permanent loan and bequest of Gertrude M. Hubbard.

Both funds represent gifts or bequests in cash, which have been deposited with the Treasurer of the United States as permanent loans to the United States, the interest upon which, at 4 percent per annum, payable semiannually, is available to the Librarian for the purposes specified in each case.

As of June 30, 1966, the principal in the permanent loan account, which shall not exceed the sum of \$10 million (2 U.S.C. 158; 31 U.S.C. 725s, Public Law 87-522), was distributed as follows (in thousands of dollars):

Music activities.....	2,604
Fine arts.....	397
American history.....	307
Hispanic activities.....	211
Poetry and literature.....	995
Miscellaneous purposes.....	616
Total principal.....	5,130

The additional principal sum of \$20 thousand, representing the bequest of Gertrude M. Hubbard, is for the purchase of engravings and etchings (37 Stat. 319).

The use of the income from these accounts is described under Library of Congress gift and trust fund income accounts.

This trust fund is used for military assistance sales of defense articles and services. Defense articles sold consist largely of aircraft, ships, combat and other vehicles, missiles, electronic equipment, spare parts, and related supporting equipment. In dollar volume, the major portion of this program consists of sales to European and other developed countries of the free world.

Defense articles from Department of Defense stocks and defense services are sold to eligible countries and international organizations if they agree to pay in dollars not less than the value thereof in advance or, as authorized by the President, within 3 years after delivery. Payment within 120 days of delivery is normally required and the 3-year credit provision is rarely used.

Defense articles and defense services are also procured for sale if the purchasers provide the Government with a dependable undertaking to (1) pay the full amount of the procurement contract, which assures the Government against any loss on the contract; and (2) make funds available in such amounts and at such times as may be required to meet the payments or other costs under the contract. Where it is found to be in the national interest, the Department of Defense may accept a dependable undertaking under which the eligible purchaser agrees to pay 120 days after delivery. In such cases, Department of Defense appropriations are used to meet payments required by such contracts, and these appropriations are reimbursed by amounts subsequently received from the purchasers.

Expenses, feed, and attendants for animals in quarantine.....	65	136	80
Miscellaneous contributed funds.....	1,235	1,551	1,155

¹ Includes capital outlay as follows: 1966, \$33 thousand; 1967, \$26 thousand; 1968, \$12 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$34 thousand; 1966, \$77 thousand; 1967, \$94 thousand; 1968, \$135 thousand.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others.

1. *Expenses and refunds, inspection, certification, and quarantine of animal products and byproducts not intended for human food, and for other purposes, moving in interstate and foreign commerce primarily to prevent introduction and spread of animal diseases (7 U.S.C. 1622h and n)(21 U.S.C. 111). Fees are paid in advance for services to be rendered.*

2. *Expenses, feed, and attendants for animals in quarantine are paid from fees advanced by importers (21 U.S.C. 102).*

3. *Miscellaneous contributed funds received from States, local organizations, individuals, and others are available for work under cooperative agreements on miscellaneous farm, utilization, and marketing research activities, plant quarantine inspection, and cooperative plant pest control activities (68 Stat. 1227 and 41 Stat. 270).*

These funds are administered by the Farmers Home Administration, under agreements with 36 individual States, for use in carrying out subtitles A and B of the Consolidated Farmers Home Administration Act of 1961. In these States, real estate-type loans are made from these funds and insured under the regular Farmers Home Administration insured loan program. In some States, operating-type loans are made at 5% interest. The entire assets of the 36 State corporations are being administered by the Farmers Home Administration, with the exception of \$15.4 million representing the partial return of cash and other assets, at face value, to 18 of these States for rural rehabilitation purposes agreed upon between each corporation and the Federal Government. The entire assets of six other State rural rehabilitation corporations have been returned to those States.

Actual and estimated loan operations for the fiscal years 1965, 1966, 1967, and 1968 are as follows (in thousands of dollars):

90 Expenditures.....	5,010	35,530	34,736

In connection with the insurance of loans and mortgages which are for construction, reconstruction, or reconditioning of vessels, and which are financed by sale of bonds to the general public, section 1111, Merchant Marine Act, 1936, as amended (73 Stat. 272, 273), authorizes the Secretary of Commerce to accept deposits in escrow of proceeds from the sale of such bonds, together with interest due the bondholders.

Funds so deposited are to be used for (a) payments becoming due on the construction, reconstruction, or reconditioning of the vessels, (b) interest on the loan or mortgage, or (c) payments on account of principal in cases of default. Investments of the fund may be made in obligations of the United States, with any income realized paid to the borrower or mortgagor.

Establishment of the fund was authorized by Public Law 86-127, enacted July 31, 1959. Through September

15, 1966, \$146,682 thousand had been deposited therein covering construction of 30 vessels. As of September 15, 1966, a balance of \$47,944 thousand remained in the account.

Expenditures are distributed as follows:			
Advances, Federal Republic of Germany.....	807	14,991	-----
General gift fund, Army.....	482	160	100
Kermit Roosevelt fund.....	1	4	-----

1. *Advances, Federal Republic of Germany.*—This account was established in order to deposit advances from the

Federal Republic of Germany for work on the bi-Government development of the Main Battle Tank (22 U.S.C. 2211).

2. *General gift fund, Army.*—Included in this fund are gifts and bequests limited to specific purposes by the donor, such as the Evangeline G. Bovard Award, Cormack Medal Fund, ETO Quartermaster Foundation, Inc., Henry C. McLean Bequest and President Kennedy's Grave Site. In addition, it accounts for gifts and bequests not limited to specific use by the donor which may be used for purposes determined by the Secretary of the Army (62 Stat. 71).

DEPARTMENT OF DEFENSE—MILITARY—Con.

NAVY TRUST FUNDS—Continued

1-3. *Gift funds.*—Activities 1, 2, and 3 consist primarily of contributions from individuals subject to conditions specified by the donor, for the benefit of the Naval Academy, the Naval Academy Museum, and other institutions of the Navy (10 U.S.C. 2601, 6973-4).

4. *Ships' stores profits, Navy.*—Profits earned in the operation of ships' stores are expended at the discretion of the Secretary of the Navy for the amusement, comfort, contentment, and welfare of officers and enlisted personnel on ships or outside the United States (10 U.S.C. 7604; 31 U.S.C. 725s (68)).

5. *Office of Naval Records and History fund.*—This fund represents gifts of money for the benefit of the Office of Naval Records and Library, Navy Department, and royalties received from sale of histories of U.S. naval operations (10 U.S.C. 7222).

1. *Benefit payments.*—The Social Security Act provides for payment of monthly benefits to retired workers and their dependents and to survivors of deceased workers.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—Continued

SOCIAL SECURITY ADMINISTRATION—Continued

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND—CON.

These benefits are financed from contributions made by workers, employers, and self-employed individuals in the form of taxes on earnings which are deposited in this trust fund. Any excess of income over outgo together with annual interest is invested in Government securities (42 U.S.C. 401).

2. *Construction*—3. *Administration*.—The administrative expenses of the Department of Treasury and the Social Security Administration are distributed currently on an estimated basis among the four social security trust funds. Adjustment is made in each succeeding year for the difference between actual and estimated costs for these organizations and for costs of certain components of Department of Health, Education, and Welfare initially borne by the old-age and survivors insurance trust fund. For 1966 only, the administrative costs chargeable to the supplementary medical insurance trust fund were borne by the old-age and survivors insurance trust fund with reimbursement for these costs plus interest lost to be made in 1967. Unliquidated obligations for all of the trust funds, including the unused part of the contingency reserve for Salaries and expenses, Social Security Administration, in 1967 and 1968, are shown in the old-age and survivors insurance trust fund. For the other trust funds, obligations and expenditures are the same.

4. *Payment to Railroad retirement account*.—Payments are made between this trust fund and the railroad retirement account so as to place this fund in the same position in which it would have been if railroad employment after 1936 had been included in social security coverage (45 U.S.C. 228E).

5. *Vocational rehabilitation services*.—The Social Security Act provides that payments may be made from this fund for the purpose of making vocational rehabilitation services available to disabled children of retired or deceased workers, who receive benefits under this program. The total amount of these payments may not exceed 1% of the total benefits certified for payment to such individuals in the preceding year.

The status of the trust fund including proposed legislation is as follows (in thousands of dollars):

Under proposed legislation, 1968.—Improvements in the old-age and survivors insurance program would provide benefit increases averaging 19% for persons now on the benefit rolls, including an increase in the minimum monthly benefit from \$44 to \$70; liberalize the retirement test; and extend entitlement to benefits to disabled widows and certain other groups. Improvements to this program and to the disability insurance and hospital insurance programs will be financed by a three-step increase in the covered wage base from \$6,600 in calendar year 1967 to \$10,800 by 1974, and by a two-step increase in the combined tax rate from 7.8 in 1967 to 10% by 1973.

90 Expenditures.....	1,936,764	1,981,647	2,112,144

1. *Benefit payments.*—The Social Security Act provides for monthly disability insurance benefits for certain disabled individuals and their dependents. Funds are provided from taxes on earnings which are deposited in this trust fund.

2. *Construction and administration.*—Beginning in fiscal year 1966 the administrative costs of the Social Security Administration were charged to this trust fund on an estimated basis in the year in which the costs were incurred. For years prior to 1966, the administrative expenses chargeable to this fund were determined after the close of the fiscal year; and a transfer of funds was made to the Federal old-age and survivors insurance trust fund which had originally borne the expenses for the disability program. Because this change in procedure occurred in fiscal year 1966, the administrative costs for that year include a reimbursement for 1965 expenses of the Social Security Administration and the expenses for 1966.

4. *Payment to Railroad retirement account.*—Annual payments are made between this account and the railroad retirement account so as to place these funds in the same position in which they would have been if railroad retirement employment had been included under social security coverage (45 U.S.C. 228E).

5. *Vocational rehabilitation services.*—The Social Security Act provides that payments may be made from this fund for the purpose of making rehabilitation services available to disabled individuals entitled to disability insurance benefits. The total amount of these payments may not exceed 1% of the total benefits certified for payment to such individuals in the preceding year.

1. The hospital insurance program pays for most of the costs of hospital and related services furnished almost all aged individuals and, effective January 1, 1967, for the services of extended care facilities. Benefits and administrative costs for those on the social security and railroad retirement rolls are financed from a payroll tax, and costs of benefits for those not insured under the social security or railroad retirement program are met from general revenues of the Treasury.

² Sales of preferred stock to Treasury represent receipts to this fund but do not increase the total authority available to the fund, which is determined by the authority for such sales, not the sales actually made.

Under its secondary market operations, the Federal National Mortgage Association provides limited liquidity for Government insured and guaranteed mortgages and improves the distribution of investment capital available for home mortgage financing. Purchases of Federal Housing Administration-insured and Veterans Administration-guaranteed mortgages, or loans insured by the Farmers Home Administration, and short-term loans secured by such mortgages and loans, are financed by the proceeds from (1) the sale of FNMA's obligations to private investors or the Secretary of the Treasury (the Secretary of the Treasury may not at any one time hold more than \$2.25 billion of such obligations), (2) subscriptions by the Secretary of the Treasury for FNMA preferred stock (\$92.8 million was authorized in 1955, \$50 million in 1957, \$65 million in 1958, and \$110 million in 1966, making a total of \$317.8 million), (3) mandatory contributions into capital incident to subscriptions for the Association's common stock by sellers of mortgages and borrowers, (4) sales of mortgages or loans to the investing public, (5) repayments and prepayments of mortgage or loan principal, and (6) income from operations. Recommendations for such legislation as may be necessary or desirable to transfer ownership of the As-

sociation to the private holders of the common stock must be submitted to the Congress as promptly as practicable after all of the Treasury-held preferred stock has been retired. Meanwhile, the present interim program, financed by private as well as by Government investment funds, is treated as a trust fund. Operations are discussed in part I of this document in connection with the program's general fund financing and effect on budget expenditures. (12 U.S.C. 1716, et seq.)

The Participation Sales Act of 1966 amended the Federal National Mortgage Association Charter Act with respect to the Association's authority to establish trusts or other fiduciary undertakings for financing purposes. Under this revised authority, the Association creates trusts providing for pools of mortgages and other loan obligations owned by Government agencies and sells to private investors participations in the interest and principal collections on such obligations, in principal amounts not to exceed the unpaid principal amounts of the obligations placed in the pools. The receipts from the participations sold are paid to the trustor agencies which own the obligations placed in the pools.

Collections on the pooled obligations are retained in the Participation sales trust fund for distribution to the holders of participation certificates in accordance with the terms of the certificates. Interest is distributed semiannually and principal on the certificate maturity dates.

**DEPARTMENT OF HOUSING AND URBAN
DEVELOPMENT—Continued**

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Con.

PARTICIPATION SALES TRUST FUND—Continued

In the event collections on the pooled obligations are insufficient to cover required distributions, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. Such insufficiencies result from interest rates on obligations placed in the pool which are lower than the interest rates specified on participation certificates and from administrative and other costs, net of investment income of the trusts. Permanent indefinite appropriations for such insufficiency payments by trustor agencies are authorized by appropriation acts, as described in part I of this document under the accounts of the trustor agencies.

The following table summarizes expected participation sales in 1967 and 1968. No distribution of principal repayments to certificate holders is anticipated in either year.

[In millions of dollars]

94 Applicable receipts: Office of Education			

Under proposed legislation, 1968.—Legislation is proposed for a new program of Federal loans to colleges to provide capital for their student loan funds, as described in part I of this document under "Office of Education."

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—Continued

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Con.

Proposed for separate transmittal—Continued

PARTICIPATION SALES TRUST FUND—Continued

Participations will be sold in pools of these loans. Since payments of interest and principal will be deferred until after the college students complete their education, the interest becoming due on the certificates sold will be covered by receipts for insufficiencies from the Office of Education. Sales of \$100 million of participation certificates in these loans are planned for 1968.

3. Preservation, birthplace of Abraham Lincoln.....		10	11
4. National Park trust fund.....	-3	89	98
5. Jefferson National Expansion Memorial, contributions.....	96	501	630

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1965, \$1,323 thousand; 1966, \$1,773 thousand; 1967, \$1,773 thousand; 1968, \$1,773 thousand.

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park and Monument System (16 U.S.C. 6). Donations amounting to \$886,141 were received from 154 contributors during fiscal year 1966. It is estimated that \$900,000 will be received during each of the 1967 and 1968 fiscal years.

2. *Advances from District of Columbia, National Park Service.*—The National Park Service develops, administers, operates, and maintains the portion of the National Capital Parks system within the District of Columbia; it provides protection for the system through the enforcement of laws and regulations by the U.S. Park Police.

A three-agency agreement of November 20, 1962, between the District of Columbia, the Bureau of Public Roads, and the National Park Service provides for the construction of an inner loop, Constitution Avenue to 14th Street NW.

3. *Preservation, birthplace of Abraham Lincoln.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest thereon is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Ky. (16 U.S.C. 211, 212). The amount of \$2,540 was appropriated in 1966.

4. *National Park trust fund.*—The National Park Trust Fund Board holds and administers gifts of personal property for the benefit of, or in connection with, the National Park Service. Interest accruals or donations to the fund are used for current needs, or invested in U.S. Treasury bonds (16 U.S.C. 6a, 19). The amount of \$127,439 was appropriated in 1966.

5. *Jefferson National Expansion Memorial, contributions.*—Pursuant to the act of May 17, 1954 (68 Stat. 98-100), as amended, the Secretary of the Interior is authorized to construct upon the Jefferson National Expansion Memorial National Historic Site, St. Louis, Mo., an appropriate national memorial to those persons who made possible the territorial expansion of the United States. Contributions are accepted from the city of St. Louis or other non-Federal sources in the ratio of \$1 to each \$3 of Federal appropriations.

1. *Construction.*—Various public and private utilities advance funds to provide facilities which are not provided by the Administration under its customer service policy. These facilities are of benefit to the Government as well as to the customers and serve to promote greater efficiency on the system, reduce loads on existing facilities, and improve service to customers. Also, non-Federal groups advance funds for relocating facilities of the Administration as required for highway construction and other purposes (50 Stat. 736).

Seized property in the United States, of the governments or nationals of Germany and Japan, vested in the name of the Attorney General, is prepared for liquidation as soon as practicable (50 U.S.C. app.). At June 30, 1966, there had been transferred to the War Claims Fund \$464.2 million. No additional transfers are contemplated for the fiscal year ending June 30, 1967, but it is anticipated that between \$25 million and \$30 million will be transferred in the following year. In 1966, a total of \$2.9 million in claims and litigation settlements was made from such property operations and it is expected that \$3.2 million will be paid in 1967 and \$33 million in 1968. Interest in vested property is estimated to be \$62 million at June 30, 1967, with a zero balance at June 30, 1968.

Property in the United States of the governments or nationals of Bulgaria, Hungary, and Rumania, seized pursuant to title II of the International Claims Settlement Act of 1949 (22 U.S.C. 1621), has been vested in the name of the Attorney General like property seized from the governments and nationals of Germany and Japan. As of June 30, 1966, a total of \$26.6 million had been vested and liquidated. Funds thus realized are earmarked for payment of war damages and nationalization claims assertable by U.S. nationals against Bulgaria, Hungary, and Rumania. A total of \$24.9 million already has been covered into the Treasury. This program will be terminated as of June 30, 1968.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment trust fund. In the Federal-State system, benefit payments are made by each State, financed by special State payroll taxes. These tax receipts are deposited in the Unemployment trust fund and are invested in Government securities until needed for benefit payments. The expenses of State and Federal administration (including those of the Federal-State employment service), are paid from the fund out of revenue from the Federal unemployment tax, assessed on employers, of 0.4% of the first \$3 thousand of wages.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

On June 30, 1966, the cash balance of \$9,299,954 thousand was distributed as follows among the various accounts maintained in the fund (in thousands of dollars):

State unemployment trust accounts	8,959,880
Railroad unemployment insurance account:	
Benefits and refunds	5,283
Administrative expense account	6,386
Employment Security Administration account	100,383
Federal unemployment account	227,813

penalty payments. In 1966 receipts were \$12 thousand and interest was \$14 thousand (33 U.S.C. 908; 31 U.S.C. 725; 33 U.S.C. 944).

The trust funds are available for payments of additional compensation for second injuries. When a second injury results in a permanent partial disability combined with a previous disability, the employer provides compensation only for the disability caused by the subsequent injury. Upon cessation of compensation for the subsequent injury then payment for permanent total disability must be paid from this fund. Determinations made in these cases are based on the claimant's age and liabilities calculated by use of the mortality rates. Also, payments are made for maintenance for employees undergoing vocational rehabilitation to enable them to return to remunerative occupations; cases where judgment against employers cannot be satisfied by reason of insolvency or other circumstances precluding payment and to provide medical, surgical, and other treatment in disability cases where there has been a default by insolvency of the employer. In addition, under the subactivity Administration of rehabilitation, provision is made for the costs of necessary rehabilitation services not otherwise available to disabled longshoremen and harbor workers.

Actuarial computations for reserved liabilities to be paid from the trust fund presently exceeds security bonds and cash on hand, exclusive of any administrative costs to be transferred from the account. To partially overcome this continuous depletion of the fund it is recommended that the administrative costs to administer the rehabilitation program be financed through a direct appropriation.

The fund is maintained through (a) contributions by participants, including all Foreign Service officers and eligible Foreign Service staff officers and employees, of 6.5% of their basic annual salaries; (b) matching Government (employer) contributions from the appropriations from which salaries are paid; and (c) interest on investments (22 U.S.C. 1071).

It is estimated that approximately 1,708 annuitants will be paid retirement benefits from this fund at the end of 1968 compared with 1,428 at the end of 1966 and 1,568 at the end of 1967. Gratuities represent payments made to Foreign Service officers in classes 4, 5, 6, and 7 who are selected out of the Service.

1. *Advances from Alaska.*—Pursuant to the agreement between the Federal Government and the State of Alaska, the Bureau of Public Roads performs State highway func-

tions on the Federal-aid systems for Alaska with funds contributed by the State (23 U.S.C. 120(8), 308).

2. *Advances from State cooperating agencies.*—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Bureau of Public Roads (23 U.S.C. 308).

3. *Contributions for highway research program.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment (23 U.S.C. 307).

4. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways (23 U.S.C. 204).

5. *Equipment, supplies, etc., for cooperating countries.*—In connection with the construction of the Inter-American Highway, the Bureau acts as agent for the cooperating Central American Republics in purchase of equipment, supplies, and services (23 U.S.C. 212, 308).

6. *Technical assistance, U.S. dollars advanced from foreign governments.*—Under the Foreign Economic Assistance Act and under agreement with the International Bank for Reconstruction and Development and the Export-Import Bank of Washington, the Bureau of Public Roads renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. During the current year, these services are being rendered for Costa Rica, Ethiopia, Iran, Nicaragua, and the Philippines (64 Stat. 204–209).

The Secretary of the Treasury may invest the principal of the Pershing Hall Memorial Fund in interest-bearing U.S. bonds. Earnings are paid to the American Legion for use in the maintenance of Pershing Hall in Paris, France (49 Stat. 426).

There is pending legislation which would transfer the control of Pershing Hall to the Administrator of Veterans' Affairs. The effect of the proposed legislation will abolish the Pershing Hall Memorial Fund and the Secretary of the Treasury shall cover any funds therein into the Treasury as miscellaneous receipts and shall liquidate any nonliquid assets in such fund and cover the proceeds therefrom into the Treasury as miscellaneous receipts.

Payment of unclaimed moneys.....	60	100	100
Esther Cattell Schmitt gift fund.....	9	26	18

1-5. *Foreign claims settlement.*—The Foreign Claims Settlement Commission is authorized to adjudicate claims of American nationals against Bulgaria, Czechoslovakia, Hungary, Italy, Mexico, Panama, Poland, Rumania, Soviet Union, and Yugoslavia. Upon certification by the Commission, the Secretary of the Treasury is authorized to make payments on awards.

6. *Losses in melting gold.*—Out of the receipts to be covered into the Treasury under section 7 of the Gold Reserve Act of 1934, an amount is made available sufficient to cover the difference between the value of gold as carried in the general account of the Treasurer of the United States and the value of such gold after melting and refining (48 Stat. 1061).

7. *National defense conditional gift fund.*—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles other than money, are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

8. *Payment of pre-1934 bonds of the Government of the Philippines.*—This trust account provides for payment of principal and interest on outstanding bonds of the Philippines, provinces, cities, and municipalities issued prior to May 1, 1934, under authority of acts of Congress (22 U.S.C. 1393(g)(5)). The value of matured bonds payable by the Bank of the Philippines is \$1 thousand as of June 30, 1966.

9. *Payment of unclaimed moneys.*—Payments are made to individuals who establish their right to moneys held in trust pending claims of owners.

10. *Esther Cattell Schmitt gift fund.*—Public Law 87-467 (76 Stat. 88) authorized the acceptance of the gift made to the United States by the will of Esther Cattell Schmitt. The income received from the gift to the United States is paid by the Secretary of the Treasury to beneficiaries named in provisions of the will.

Matured obligations of the District of Columbia.—Funds from inactive accounts are transferred to this account to meet matured obligations of the District of Columbia when and if presented (31 U.S.C. 725s). As of June 30, 1966, there was a balance of \$8 thousand in the fund.

To promote the education of the blind.—The \$250 thousand invested credit, on the books of the Treasury, is an unexpendable endowment fund established to promote the education of the blind in the United States. A permanent annual appropriation of \$10 thousand being equivalent to

4% on the principal, is paid to the American Printing House for the Blind (20 U.S.C. 101).

This fund (72 Stat. 1154) was established in 1940 as the financing mechanism for World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies have been issued under this program. Because issuance of new policies ended in 1951 the insurance in force will continue to decline. The general decline in the activity of the fund is indicated in the following table (dollars in millions):

	June 30, 1965	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies in force.....	4,863,210	4,792,674	4,752,000	4,691,000
Amount of insurance in force....	\$31,802	\$31,358	\$31,150	\$30,685

The status of the fund excluding noncash transactions is as follows (in thousands of dollars):

	1965 actual	1966 actual	1967 estimate	1968 estimate
Unexpended balance of fund, beginning of year.....	5,796,779	5,913,940	6,122,108	6,130,575
Cash income during year:				
Interest on investments.....	182,145	190,783	196,164	203,293
Payments from general and special funds.....	7,029	5,171	5,080	4,605
Premiums and other receipts..	472,984	496,960	503,280	501,758
Total annual income.....	662,157	692,913	704,524	709,656
Cash outgo during year.....	544,996	484,745	696,057	522,257
Unexpended balance of fund, end of year.....	5,913,940	6,122,108	6,130,575	6,317,974

The fund is operated on a commercial basis to the greatest possible extent consistent with law. Administrative expenses are charged to the appropriation General operating expenses.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the appropriation Veterans insurance and indemnities, for claims (1) resulting from extra hazards of the veterans' service, and (2) arising on certain policies held by personnel on active duty.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$6,735 million as of June 30, 1966, to \$7,118 million as of June 30, 1968. The actuarial estimate of policy obligations as of June 30, 1966, totals \$6,669 million, leaving a balance of \$67 million for contingency reserves.

90 Expenditures	68,939	76,494	64,475

This fund (72 Stat. 1161) was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. The general decline in the activity of the fund is indicated in the following table (dollars in millions):

	June 30, 1965	June 30, 1966	June 30, 1967	June 30, 1968
Number of policies	252,631	241,073	231,000	220,000
Insurance in force	\$1,105	\$1,052	\$1,009	\$962

The status of the fund, excluding noncash transactions, is as follows (in thousands of dollars):

	1965 actual	1966 actual	1967 estimate	1968 estimate
Unexpended balance of fund, beginning of year	982,713	960,560	938,776	908,220
Cash income during year:				
Interest on investments	33,762	33,210	32,429	31,426
Payments from general and special fund	-119	85	90	90

Premiums and other receipts	14,733	13,860	13,419	12,745
Total annual cash income	48,375	47,155	45,938	44,261
Cash outgo during year	70,528	68,939	76,494	64,475

Unexpended balance of fund, end of year	960,560	938,776	908,220	888,006
---	---------	---------	---------	---------

The fund is operated on a commercial basis to the greatest possible extent consistent with law. Administrative expenses are charged to the appropriation General operating expenses.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the appropriation Veterans insurance and indemnities for claims (a) resulting from the extra hazards of the veteran's service, and (b) arising on certain policies held by personnel on active military duty.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decline from \$1,024 million as of June 30, 1966, to \$965 million as of June 30, 1968, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of June 30, 1966, totals \$996 million, leaving a balance of \$28 million for contingency reserves.

1. *Purchase of flowers.*—Funds are deposited with the Commission by private citizens for the purchase of floral decorations for graves in the World War I and World War II military cemeteries. The donor is advised when the flowers have been placed (36 U.S.C. 128).

2. *Repair of non-Federal war memorials.*—When requested to do so and upon receipt of the necessary funds, the Commission will arrange for and oversee the repair of war memorials erected in foreign countries by American citizens, States, municipalities, or associations. Such moneys are accounted for through this fund (36 U.S.C. 128).

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, to pay claims for employees who have died before retirement or before their annuities are paid in full (subch. III of ch. 83 of title 5, United States Code), and to pay for expenses incurred by the Commission in the administration of that subchapter. It is estimated that as of June 30, 1968, there will be 883,964 persons on the annuity roll, compared with 844,037 as of June 30, 1967, and 795,521 as of June 30, 1966. The

estimated unfunded liability of the Civil Service Retirement System, as of June 30, 1966, is \$44,021,959,000.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances the payment of subscription charges to approved carriers of the cost of health benefits protection as provided by chapter 89 of title 5, United States Code, together with expenses incurred by the Civil Service Commission in administration of that chapter.

Budget program.—Slightly more than 2 million employees and 273,000 annuitants are participating in this program. By the end of 1968 it is estimated that an additional 107,000 annuitants will participate in the program.

An amount equal to 3% of the contribution toward each plan is set aside in the fund to provide a contingency reserve for that plan. The contingency reserve is used to defray future increased rates, to reduce contributions, or to provide increased benefits. Payments are made to experience rated carriers from the contingency reserve when the reserves held by the carrier are less than a stipulated amount and the plan's contingency reserve held by the fund exceeds 1 month's subscription charges. Community rated carriers may also receive additional payments from their plan's contingency reserve held by the fund, when properly justified. In addition, an amount equal to 1% of all contributions is set aside for administrative expenses incurred by the Commission in the administration of the act. Section 8909(b) of title 5, United States Code, provides that the Commission from time to time and in such amounts as it considers appropriate may transfer unused funds for administrative expenses to the contingency reserve of the plans under contract. In 1966, \$4.2 million was transferred from the administrative expense reserve to the contingency reserve. During 1967 another \$4.8 million will be available for transfer and in 1968 slightly more than \$5.6 million will become available.

Financing.—The fund will be financed by contributions from participants and the Government.

Operating results.—Earnings will be retained to meet the cost of administration and future benefits.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances the payment of group life insurance premiums to private insurance companies under chapter 87 of title 5, United States Code, and any expenses incurred by the Civil Service Commission in administration of that chapter as annually authorized by Congress.

Budget program.—Most of the difference between receipts and benefit payments under the policy is placed in reserves. The insurer holds a contingency reserve of \$150 million, and all amounts above this figure periodically are returned and deposited in the fund to be invested.

A summary statement of the operations of the contingency reserve for the three most recent policy years, 1964 through 1966, and the total at the end of the twelfth policy year follows:

STATEMENT OF ANNUAL ACCOUNTING AND CONTINGENCY RESERVE

[By policy year. In thousands of dollars]

	10th year, July 1, 1963- June 30, 1964	11th year, July 1, 1964- June 30, 1965	12th year, July 1, 1965- June 30, 1966	Totals, end of 12th policy year
1. Premiums accrued.....	155,182	161,216	171,583	1,524,442

(c) Other expense and risk charges.....	1,241	1,290	1,373	12,657
Total.....	4,398	5,337	5,262	43,516
5. Total addition to contingency reserve.....	32,016	33,128	33,885	444,901
6. Contingency reserve for the year (before returns).....	132,016	133,128	167,013	-----
7. Less premiums returned to employees life insurance fund.....	32,016	-----	17,013	294,901
8. Contingency reserve held by insurer at end of year.....	100,000	133,128	150,000	150,000

Through June 30, 1966, individuals whose beneficial life insurance agreements have been assumed by the fund paid \$29.1 million into the fund. It is estimated that in 1968 about \$2.8 million will be paid into the fund by this group. Former members of beneficial associations continue to pay premiums according to the rate schedules in effect at the time their life insurance agreements were assumed by the fund, but the Government makes no current contributions to the fund for these individuals as it does for employees covered under the regular program.

A contingency reserve has been established and held by the insurer at interest under the policy covering members of beneficial associations. This reserve, which was estimated to be \$6.8 million on June 30, 1966, will accumulate interest consistent with that provided under the regular program. The Commission has determined that the contingency reserve under the beneficial association program will be held at a level of \$6 million to meet adverse fluctuation in future charges. Any amount above this level at the end of the policy year December 31, 1966, and any subsequent policy year, will be returned to the fund.

Financing.—Premium costs are met by withholding from the salaries of employees 25 cents biweekly for each \$1 thousand of life insurance, contributions by the Government, and direct premium payments from beneficial association members.

Operating results.—Earnings are retained to meet the cost of future benefits.

U.S. CIVIL SERVICE COMMISSION EMPLOYEES' LIFE INSURANCE FUND

Disposition Schedule of Selected Receipts and Premium Payments, Aug. 29, 1954, Through June 30, 1966

[In thousands of dollars]

Disposition of selected receipts:			
Employees' salary withholdings.....	1,030,013		
Agency contributions.....	515,031

¹ Balances of selected resources are identified on the statement of financial condition.

This fund established in accordance with the Retired Federal Employees Health Benefits Act (Public Law 86-724) finances (1) the payment of subscription charges to an approved carrier for those qualified employees and survivors who enroll in the Government-sponsored uniform health benefits plan, (2) the contribution to qualified employees and survivors who retain or purchase private health insurance, and (3) the payment of expenses incurred by the Civil Service Commission in the administration of the act as annually authorized by Congress.

Budget program.—The act provides that the fund shall be available without fiscal year limitation for all payments toward the health benefits subscription charges of the uniform plan or contributions to qualified annuitants with private health insurance and that the amounts authorized to be contributed by the Government shall be paid into the fund from annual appropriations. During 1968 an estimated \$9.3 million will be paid into the fund by

participating retired employees and survivors and \$12 million by the Government. It is estimated that \$14.3 million in subscription charges will be paid to the carrier of the Government-sponsored plan, and \$6.6 million to annuitants for their private health insurance plans in 1968.

Financing.—The fund will be financed by contributions from those participants enrolled in the Government-sponsored plan and by Government contributions for 1968.

Operating results.—There will be an estimated \$1.1 million surplus in the fund at the end of 1968 as compared with an estimated \$922 thousand in 1967. This is primarily due to interest earned on investments.

This revolving trust fund serves as a clearinghouse for payments by U.S. communications companies and other telecommunications users, including the Federal Government, to foreign governments for receiving and relaying radio-telephone and radio-telegraph messages. The charges of foreign governments against U.S. users are received by the FCC and billed to the users. The FCC then consolidates and disburses all telecommunications payments to a particular government.

The War Claims Fund consists of funds transferred by the Office of Alien Property, Department of Justice, from the net proceeds derived from the liquidation of former German and Japanese assets vested pursuant to the Trading with the Enemy Act. These funds are used largely to pay claims authorized under the General War Claims Act (Public Law 87-846).

The Appalachian Regional Development Act states that beginning in 1968, the Federal Government and the States will equally share the Commission administrative expenses. The 12 Appalachian States will advance funds to pay 50% of the Commission administrative expenses and for the expenses of the States' regional representative office.

The table below indicates the share to be paid by each of the 12 Appalachian States, as determined by the States, for Commission administrative expenses during 1968. In addition, the table indicates each State's share for the 1968 expenses of the States' Regional Representative's office.

The National Capital Housing Authority operates the low-rent public housing program in the District of Columbia under the authority of the Housing Act of 1937 and titles I and II of the District of Columbia Alley Dwelling Act (48 Stat. 930). The housing program as of June 30 consists of the following:

NUMBER OF HOUSING UNITS

	1966 actual	1967 estimate	1968 estimate
Under management	8,495	9,268	10,147
Under development	3,804	2,999	3,120
Special leasing and rehabilitation programs (under management)	68	600	600
Total	12,367	12,867	13,867

OTHER INDEPENDENT AGENCIES—Continued**NATIONAL CAPITOL HOUSING AUTHORITY—Continued****OPERATION AND MAINTENANCE, TITLES I AND II PROPERTIES
(TRUST REVOLVING FUND)—Continued**

The title I program consists of 72 low-rent housing units which were constructed under the District of Columbia Alley Dwelling Act. Rental receipts from these properties are estimated at \$39 thousand for 1968. The entire amount will be required for operating and maintenance costs and may remain available for such purposes (64 Stat. 81).

The title II program is financed through rental income, loans, and annual contributions. There is no debt service on Federal projects conveyed to the Authority for low-rent use; all other projects are permanently financed through the sale of Housing Authority bonds which are supported by the pledge of the Housing Assistance Administration to pay annual contributions equal to the debt service less any excess operating receipts over operating expense.

Under the railroad retirement system, railroad workers and employers pay taxes on wages to finance the payment of annuities for age and disability benefits for survivors and to finance the cost of hospital insurance benefits established by the 1965 amendments to the Social Security Act. These taxes are deposited in this trust fund and

invested in Government securities bearing interest of at least 3%. The portion of these taxes which finances hospital insurance benefits is transferred to the Federal hospital insurance trust fund under the financial interchange provisions governing the railroad retirement and social security systems (Public Law 234, 82d Congress).

The 1966 amendments to the Railroad Retirement Act, in addition to providing for a new system of supplemental annuities, financed by a separate trust fund, also provided benefit rate increases for many railroad retirement beneficiaries under the Railroad Retirement Act, effective November 1, 1966, and made a number of other changes in the regular retirement system. Some of the more significant changes were: (1) Providing annuities for wives with children in their care where the employee does not have a current connection with the railroad industry; (2) extending children's survivor benefits to full-time students between the ages of 18 and 22; and (3) providing insurance annuities for widows who were separated from their husbands when they died.

To finance these benefit increases, the Railroad Retirement Tax Act was amended to increase the basic tax rate on employers and employees for years after 1966 by one-fourth of 1%.

The status of the trust fund, including proposed legislation, is as follows (in thousands of dollars):

Income.—The income of the Railroad retirement account consists of taxes paid by railroad employers and

employees; interest on investments; appropriations for military service credits; repayments on amounts loaned to the Railroad unemployment insurance account; payments from the Federal old-age and survivors insurance trust fund and Federal disability insurance trust fund. The railroad retirement system has a reinsurance arrangement of annual financial interchanges with the social security system so as to place these systems in the same position in which they would have been if railroad employment had been included in social security coverage.

1. *Retirement, disability, and survivor benefit payments.*—Payment estimates reflect the continuing growth in the beneficiary rolls and the increases in benefit rates provided by the 1965 and 1966 amendments to the Railroad Retirement Act and 1965 amendments to the Social Security Act.

2. *Administrative expenses.*—Such expenses are subject to annual limitations in appropriation acts (see Limitation on salaries and expenses, Railroad Retirement Board, in part I of the budget appendix).

3. *Loan to railroad unemployment insurance account.*—The Railroad Unemployment Insurance Act provides that when the balance in the railroad unemployment insurance account is insufficient to pay benefits due under that act, necessary amounts are to be borrowed from the railroad retirement account. When the balance in the railroad unemployment insurance account permits, borrowed amounts are to be repaid to the railroad retirement account with interest. At the end of 1966 the fund had \$251.4 million in loans outstanding.

4. *Payment to Federal hospital insurance trust fund.*—Portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad retirement beneficiaries are made from that fund.

Under existing legislation, 1967.—This proposal will increase the authorized program for administrative expenses, Railroad Retirement Board, by \$1,175 thousand to cover the cost of handling the work created for the Board by the 1966 admendments to the Railroad Retirement Act.

Under proposed legislation, 1968.—Legislation being proposed for the Social Security system will affect the benefits paid and the taxes received under the Railroad Retirement system. Higher cash benefits under the Social Security system will automatically invoke higher railroad retirement benefits for certain beneficiaries as a result of the social security guarantee provisions. Increases in the maximum taxable wage proposed for the Social Security system also increases the wage base and, consequently, tax receipts under the Railroad Retirement system.

The 1966 amendment to the Railroad Retirement Act provided a system of supplemental annuities payable to the individuals who have attained age 65, have at least

OTHER INDEPENDENT AGENCIES—Continued

RAILROAD RETIREMENT BOARD—Continued

RAILROAD RETIREMENT SUPPLEMENTAL ACCOUNT—Continued

25 years of creditable service, are entitled to a regular annuity as an employee under the provisions of Railroad Retirement Act, and have a current connection with the railroad industry at the time their annuity began to accrue. The legislation provided a minimum supplemental annuity of \$45 for exactly 25 years of service plus \$5 for each additional year of service up to a maximum of \$70 for annuitants with 30 or more years of service.

The supplemental annuity program is financed separately from the regular railroad retirement program by a tax of 2 cents for each man-hour of employment for which the employer paid compensation beginning with the month of November 1966 and continuing for 60 months. These taxes are deposited in this new trust fund and amounts not currently needed for supplemental annuity payments and administrative expenses are invested in Government securities.

The status of the trust fund is estimated to be as follows (in thousands of dollars):

Unobligated balance available, end of year.....	6,000	6,000	6,000
Limitation.....	9,539	9,275	9,225

¹ Includes capital outlay as follows: 1966, \$11 thousand; 1967, \$18 thousand; 1968, \$398 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders 1965, \$13 thousand; 1966, \$11 thousand; 1967, \$11 thousand; 1968, \$11 thousand.

The Board administers an unemployment and sickness insurance system and an employment service for unemployed railroad workers. The administrative expenses are financed through a permanent authorization of 0.25% of taxable payroll. As of each June 30, the unobligated balance in this fund in excess of \$6 million is transferred to the Railroad unemployment insurance account in the unemployment trust fund (45 U.S.C. 361).

[In thousands of dollars]

	1966 actual	1967 estimate	1968 estimate
Permanent limitation (0.25% of taxable payroll).....	9,281	9,050	9,000
Interest on investments.....	258	225	225
Limitation.....	9,539	9,275	9,225

1. *Maintenance of earnings accounts.*—Insurance payments for unemployment, sickness, and maternity benefits are based on individual records of earnings and daily wage rates and the workload fluctuates according to such factors as level of employment and rate of turnover in the railroad industry. The costs are shared on a measured basis with the retirement program. Accounts posted were 930,000 in 1966 and are estimated at 920,000 in 1967 and 910,000 in 1968.

2. *Processing of unemployment insurance claims.*—Workers' claims for unemployment compensation are filed locally and certified for payment through the headquarters offices. Regular unemployment claims were 727,000 in 1966 and are estimated to be 650,000 in 1967 and 1968.

3. *Processing of sickness and maternity claims.*—These claims are filed by mail and certified for payment through the headquarters offices of the Board. Sickness claims were 631,000 in 1966 and are estimated to be 600,000 in 1967 and 1968.

4. *Claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. This resulted in savings of benefit payments of approximately \$3 million in 1966 as 13,300 placements were made. Placements are estimated at 15,000 in 1967 and 1968.

5. *Administration.*—The costs of administration are shared between this and the retirement program on a measured basis.

The National Zoological Park has been assigned the mission and objectives of contributing to the "advancement of science and the instruction and recreation of the people." Accomplishment of the mission and objectives requires continuous efforts to exhibit a broad zoological collection of animals from all parts of the world; to maintain conditions for these animals as near as possible to their natural ecology; to promote and support scientific research programs in wild animal behavior; and to provide for the safety and protection of all concerned.

This fund, established under 26 U.S.C. 7448, is used to pay survivorship benefits to eligible widows and dependent children of deceased judges of the Tax Court of the United States. Participating judges pay into the fund 3% of their salaries or retired pay to cover creditable service for which payment is required and such additional funds as are needed are provided through the annual appropriation to the Tax Court of the United States.

On June 30, 1966, nine judges of the court were participating in the fund, and two eligible widows were receiving survivorship annuity payments.

PART III

PERSONNEL COMPENSATION SCHEDULES

EXPLANATION OF PERSONNEL COMPENSATION SCHEDULES

Part III contains detailed schedules on personnel compensation which are furnished to the Congress pursuant to section 204 of the Budget and Accounting Act, 1921, as amended (31 U.S.C. 581). The schedules show data for (a) permanent positions, (b) positions other than permanent, (c) special personal service payments, and (d) other personnel compensation.

The sections on permanent positions relate to those established for full-time employment without time limit, and to any others occupied for a year or more. Positions authorized at the end of the year are counted, whether filled or unfilled at that time. Positions abolished during the year are not included in the detailed listing of permanent positions, but the average number and net cost thereof are shown as a separate line entry.

Grades and their respective salary ranges are reflected in the stub column; the most commonly used grade series, the general schedule grades, is abbreviated "GS-..." Titles are shown for positions with a base rate of \$15,106 or above. Salaries are reported at the rate effective at the end of the year.

Because most annual salaries are by law the rate for 52 weeks, an additional entry covers the extra earnings whenever there are regular workdays above the 52-week base. For employees with a Monday-through-Friday workweek there was 1 extra day in 1966 and there is 1 in 1967, but none in 1968.

Since within-grade salary advancements occur at various times during the year, the rates shown will not be exactly equal to the compensation earned, but the difference is taken up in the "Lapses" line. That line also covers savings due to vacancies, etc., and is offset in part by terminal leave payments.

The pay scales which became effective in October 1965 are used in the 1966 column. The current pay scales,

which became effective in the early part of July 1966 are used in the 1967 and 1968 columns. Special deduct entries in the 1966 and 1967 columns account for savings because pay was at the older, lesser rates for the first part of the year.

Compensation for "positions other than permanent" distinguishes obligations for full-time temporary positions, for part-time positions (of any duration), and for intermittent positions.

Special personal service payments include compensation to persons who are not considered to be Federal employees, such as casual workers, prison inmates, etc.; payments to other agencies for reimbursable details; and, in certain accounts, an adjustment for the difference between leave earned and leave taken.

"Other personnel compensation" covers overtime, holiday pay, Sunday pay and nightwork differential, post differentials, extra flight pay, etc.

The final amounts in these schedules agree with corresponding entries in the object schedules of parts I and II. In cases where a consolidated schedule in part III contains personnel compensation which is reflected in two or more object schedules, a distribution by account title follows the total line.

The schedules in this part of the appendix, like the object schedules of parts I and II generally, exclude estimates which are proposed for separate transmittal, other than amounts required for 1967 to meet costs of military and civilian pay increases under recently enacted legislation and those resulting from wage-board decisions. Such exclusions relate to a number of items of proposed legislation affecting 1968 and occasionally 1967, a number of supplemental estimates which are presently forecast under existing legislation, and the use of such amounts as are estimated in the special allowance for contingencies.
