This appropriation provides for the acquisition, construction, rebuilding, and improvements of vessels, aircraft, shore facilities, and aids to navigation.

Direct program.—1. *Vessels.*—Construction of one polar icebreaker will begin a program for replacement of *Wind* class icebreakers. Modernization and improvement of existing facilities include habitability and operational improvements on 327-foot high-endurance cutters and the icebreaker *Storis*; installation of new generators

and air conditioning on seagoing buoy tenders; and improvements on coastal buoy tenders.

2. *Aircraft.*—This activity provides for the acquisition of six replacement aircraft and replacement of center-wing sections on seven C-130 aircraft.

3. *Shore stations and navigational aids.*—The program under this activity includes projects to: (a) Procure pumping/storage equipment for pollution control; (b)

General and special funds—Continued

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS—Continued

replace and improve facilities at five locations; (c) relocate two facilities; (d) relocate communications facilities in Pacific Northwest; (e) provide housing for Coast Guard personnel and their dependents in areas where living accommodations are inadequate; and (f) facilitate the survey and design of future major construction projects. The program for lighthouse automation and modernization will be continued in 1971. This activity also provides for the establishment of and changes to aids to navigation marking river and harbor improvements effected by the U.S. Corps of Engineers, and other urgent needs. Also included is an extensive program for replacing obsolete Loran equipment and improving other facilities at three Loran-A stations and one Loran-C station.

4. *Repair and supply facilities.*—The expansion of support facilities in 1971 provides for the construction of a new base at Portsmouth, Va.; and improvements in the electrical system at Base, New York, N.Y. Equipment at the Coast Guard Yard, Curtis Bay, Md., will be replaced and modernized.

91.30 Outlays from military pay act supplemental.....	-----	350	-----

This appropriation provides for retired pay of military personnel of the Coast Guard and Coast Guard Reserve, members of the former Lighthouse and Lifesaving Services, and for annuities payable to beneficiaries of retired military personnel under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431-1446).

Members are added to and removed from the rolls each month. The average numbers on the rolls will rise

in 1971 and will continue to rise in future years. The actual number on the rolls at the end of 1969 was 13,483 and the number estimated to be on the rolls at the end of 1970 and 1971 is 14,280 and 14,988, respectively. The following tabulation shows the average number of personnel on the rolls during 1969 compared with estimated numbers for 1970 and 1971.

Category	AVERAGE NUMBER		
	1969 actual	1970 estimate	1971 estimate
Enlisted men.....	8,438	8,875	9,462
Commissioned officers.....	2,637	2,659	2,688
Warrant officers.....	1,636	1,740	1,828
Former Lighthouse and Lifesaving Services personnel.....	449	430	409
Reserve personnel.....	234	275	314
Total.....	13,394	13,979	14,701

Under the provisions of the Retired Serviceman's Family Protection Plan, retired Coast Guard military personnel who elect to receive reduced amounts of retired pay may provide for monthly payments to their survivors. Appropriation requirements are reduced by the difference between the amount deducted from retired pay and the amount paid as survivors' benefits. The liability for future payments is not funded. The analysis of the accumulated deductions is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Accumulated deductions, net start of year.....	2,610	2,864	3,115
Current deductions during the year.....	438	449	464
Payments of survivors' benefits.....	-184	-198	-213
Accumulated deductions, net end of year.....	<u>2,864</u>	<u>3,115</u>	<u>3,366</u>

Proposed for separate transmittal, existing legislation:

Additional funds of \$1,590 thousand are required in 1970 to cover increased costs of military retired pay effective on November 1, 1969, authorized September 29, 1969, under continuing provisions of 10 U.S.C. 1401a. Those who are entitled to military retired pay based on pay scales in effect before July 1, 1969, will be entitled to a 5.3% increase in their retired pay. In addition, those who are entitled to retired pay based on pay scales

effective July 1, 1969, will be entitled to a 0.9% cost-of-living adjustment.

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law, including repayment to other Coast Guard appropriations for indirect expenses, for regular personnel, or reserve personnel while on active duty, engaged primarily in administration and operation of the reserve program; maintenance and operation of facilities; and supplies, equipment, and services; [and the maintenance, operation, and repair of aircraft; \$25,900,000] \$10,000,000: *Provided*, That amounts equal to the obligated balances against the appropriations for "Reserve training" for the two preceding years shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation; *Provided further*, That none of the funds appropriated herein shall be available for a Selected Reserve program to be in excess of 15,000 personnel on June 30, 1970. (14 U.S.C.; 5 U.S.C. 8334; 10 U.S.C. Subtitle A; 26 U.S.C. 3111; 37 U.S.C.; Department of Transportation and Related Agencies Appropriation Act, 1970.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$227 thousand (1969 adjustments, -\$59 thousand); 1969, \$75 thousand; 1970, \$75 thousand; 1971, \$75 thousand.

The Coast Guard selected reserve training program will be phased out during 1971. The emergency wartime functions of the selected reserve can reasonably be handled by the growing number of regular Coast Guardsmen on the retired roles and enlistees who are required to serve in a standby status for 2 years after completing 4 years of active service. Costs are distributed to activities as follows:

1. *Initial training.*—Direct costs associated with enlisted trainees on initial active duty (2 years) and initial training

General and special funds—Continued

RESERVE TRAINING—Continued

duty (5 to 11 months) are programed under this activity. The 5 to 11 month element includes: (a) trainees who will attend class A school and whose period of initial training duty is governed by the length of the class A school (plus recruit training); and (b) 5-month trainees who do not attend class A school but receive about 3 months' post-recruit training at various operating units.

2. *Continuing training.*—Direct costs of officer and enlisted trainees for drill and annual active duty for training are programed under this activity.

3. *Operation and maintenance of training facilities.*—All costs for the operation and maintenance of Reserve training facilities are programed under this activity. Included are the prorated share of the cost of joint usage of Coast Guard and other Armed Forces facilities, the cost of providing stationkeeper support to the organized Reserve training units and the procurement of training aids and facilities (under \$50,000).

4. *Administration.*—This activity encompasses all administrative costs of the Reserve training program.

Total selected resources.....		60		

This appropriation provides for administration and conduct of basic and applied scientific research, development, test, and evaluation with maintenance, rehabilitation, lease, and operation of facilities and equipment.

1. *Search and rescue.*—The program includes projects to increase our search effectiveness, for both cooperative and noncooperative targets, and to improve our rescue capability under adverse weather conditions. Comparative model testing and analytical development of domestic ice-breaking capability will be continued in 1971, together with an evaluation of icebreaking concepts developed in 1970.

2. *Aids to navigation.*—Work will be continued towards developing an all-weather harbor approach and navigation system, which will build on the knowledge gained in the San Francisco Harbor Advisory Radar project initiated in 1969. Additional effort will be directed towards developing sub-systems for an improved, short range audio-visual aids to navigation system.

3. *Marine safety.*—This program includes activities directed towards developing safety requirements for non-military submersibles. The submersible effort will include both search and rescue features and construction standards for nonmilitary submersibles. The various activities in developing commercial vessel safety standards for U.S. flag vessels will continue. Investigations into the disaster potential of hazardous materials transported by vessels will continue, while a new effort will determine the hull strength requirements of longer hull forms for Great Lakes ore ships.

4. *Marine law enforcement.*—The major emphasis in this program is on oil pollution control in the coastal and offshore environment. Containment systems developed in 1970 will be tested, and development of oil recovery systems will be intensified. Development of oil slick surveillance and forecasting systems, and investigations of special control techniques will be continued, as will research leading to the development of a Hazardous Material Information System. In the second part of this program, Recreational Boating Safety, 1970 efforts directed towards the reduction of boating accidents will continue.

5. *Oceanography, meteorology, and polar operations.*—This program includes oceanographic research and data collection in the Arctic area, with emphasis on ice research. The program includes evaluation of airborne detection systems for measuring ice coverage, thickness, strength, and movement.

In 1971, the advanced development phase of the national data buoy development project will continue, leading to the deployment of preprototype test buoys in 1972 and 1973.

The Coast Guard Supply Fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing, commissary provisions, general stores, and technical material. The fund is financed by reimbursements from sale of goods.

Costs of approximately \$27,000 thousand to be incurred under this fund in 1971 are divided 7% for uniform clothing, 57% for commissary provisions, and 36% for general stores and technical materials, including electronics.

Sales are expected to be \$185 thousand less in 1970 than 1969 actual and \$871 thousand more in 1971 than 1970. This reduction in sales for 1970 is a result of the transfer of supply support of patrol boats in Southeast Asia to the Navy. Increase in 1971 over 1970, as well as the growth in the level of general stores, is due to an increase in stocking of engine parts and electronics.

The cash balance will decrease by \$500 thousand in 1971 due to the purchase of additional inventory items required for the support responsibilities for engine parts items and electronic type items.

The Coast Guard Cadet Fund is utilized by the Superintendent of the Coast Guard Academy to receive, plan, control, and expend personal funds of Coast Guard cadets. By use of the fund each cadet is assured funds to meet personal expenses while at the Academy and an adequate balance in his account at graduation for officer outfits, civilian clothing, and graduation leave expenses. The fund also receives and expends funds of the Coast Guard Academy Athletic Association.

1. *Operation of traffic control system.*—This activity covers the operation on a daily 24-hour basis of a national system of air traffic management in the United States and its possessions. With the aid of radar, communications, and other facilities, traffic management personnel at 27 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Control towers are operated at 329 major civil airports to guide traffic movements on and in the vicinity of the airports. Some 344 domestic and international flight service stations transmit weather and other information to pilots and relay traffic control data between ground controllers and pilots. The increase in 1971 will provide for operating 271 major newly commissioned air traffic control facilities, and navigation aids, for expanded and improved terminal radar services and for handling greater workload demands brought about by the projected growth in aviation activity.

TRENDS IN VOLUME OF AIR TRAFFIC

Fiscal year	Landings and takeoffs at airports with FAA towers (in millions)	Instrument operations at airports with FAA traffic control service (in millions)	General aviation hours flown (in millions)	Revenue passenger miles (in billions)
1965.....	35.6	9.6	16.2	62.6
1966.....	41.2	10.7	18.9	76.4
1967.....	47.6	12.1	21.6	86.3
1968.....	53.0	14.6	22.9	106.5
1969.....	55.9	16.7	24.8	119.8
1970 estimate.....	55.7	18.0	25.3	130.2
1971 estimate.....	58.7	19.2	26.8	141.3

2. *Installation and materiel services.*—This activity covers the direction and engineering services related to the establishment and improvement of facilities and equipments in the traffic control system; procurement, contracting, and materiel management programs; supply support and leased communications services for the traffic control system; and supply support for agency aircraft except for aircraft related to research and development programs. Major increases in 1971 are to provide supply support and leased communications services for air traffic control and air navigation facilities.

3. *Maintenance of traffic control system.*—This activity covers the technical operation and maintenance of a national network of air navigation and traffic control aids in the United States and its possessions. Major increases in 1971 are for the maintenance of new air traffic control and navigation aids planned for commissioning and for improvements, modification, and support items necessary to the maintenance of electronic equipment and the plant system.

4. *Administration of flight standards program.*—This activity covers the establishment and enforcement of the civil air regulations which are designed to assure the high standards of safety in aviation. Inspections are made and certificates issued for aircraft, airmen, aircraft operators, and air agencies that meet safety or competency requirements. Facility flight inspection functions and management and maintenance of agency aircraft are also included in this activity.

5. *Administration of medical programs.*—This activity covers the development of regulations governing the physical and mental fitness of airmen and other persons whose health affects safety in flight; the development and supervision of a health and medical program for agency personnel; the administration of an aviation medical research program, the project costs of which are financed under R. & D.; and the operation of the Civil Aeromedical Institute building.

6. *Research direction.*—This activity covers: (a) the planning, direction and evaluation of the research and development program, the direct project costs of which are financed under the R. & D. appropriation; and (b) related administrative support for the operation of the National Aviation Facilities Experimental Center at Atlantic City, N.J.

7. *Administration of airports program.*—This activity includes costs of preparing the annual national airport plan; development of airport planning, design, and construction standards; furnishing of planning and engineering advisory services; administration of the Federal-aid airport program; assuring compliance of public agencies with the provisions of agreements relating to airports; and promoting airport safety.

Under this appropriation, the Federal airways system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs such as aircraft for facility flight inspection and training, and experimental facilities for the research and development program. In 1970 Congress appropriated \$90 million more than budget request. Use of these funds is contingent on the enactment of the proposed airways and airports development and user charge legislation. The 1971 estimate will carry forward the program to increase the capacity of the airways system and make its operations more efficient and safer. It provides for continuation of major efforts already underway to provide an automation capability in the air traffic control system. Operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

1. *Air route traffic control centers.*—(a) *Long-range radar* provides FAA air traffic controllers with information on aircraft positions, at distances up to 185 miles. (b) *Automation equipment* covers computers and other devices which aid controllers in handling en route air traffic. (c) *Other center facilities* covers the installation of equipment to provide communications and related services.

2. *Airport traffic control towers.*—(a) *Terminal area radar* aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 60 miles. (b) *Terminal area automation* covers computers and other devices which aid controllers in handling terminal air traffic. (c) *Other tower facilities* cover the establishment, improvement and relocation of airport traffic control tower facilities.

3. *Flight service stations.*—(a) *Domestic flight service* stations and associated facilities provide flight assistance service to pilots. (b) *International flight service* stations provide long-distance communications for transoceanic flights.

4. *Air navigation facilities.*—(a) *Very high frequency omnidirectional radio ranges* equipped with tactical air navigation capabilities (VORTAC) are standard short-range navigation aids used to define airways and air routes and to provide distance and direction information to pilots. (b) *Low and medium frequency facilities* include radio beacons and ranges which provide pilots with direction and weather information. (c) *Instrument landing systems* provide pilots with direction, distance, and glide slope information necessary for making safe approaches to runways under poor visibility conditions. (d) *Visual aids* consist primarily of lighting aids which also assist the pilot in making final approaches to airport runways, particularly in areas where terrain or other environmental factors cause potential hazards to safe landings. (e) *Intermediate fields* are emergency landing areas provided on a few air routes where public airports are not available.

5. *Housing, utilities and miscellaneous facilities.*—This section includes general support facilities and items not covered elsewhere.

General and special funds—Continued

FACILITIES AND EQUIPMENT—Continued

6. *Aircraft and related equipment.*—For: (a) Facility flight inspection covering aircraft and avionics equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air; (b) training aircraft used to provide flight training to agency personnel and to maintain the proficiency of operations inspectors; (c) aircraft and equipment used to provide logistics support for remote facilities, for use by agency officials, and for other general purpose missions.

7. *Research, test, and evaluation facilities.*—This activity provides for the construction and improvement of plant and facilities at the National Aviation Facilities Experimental Center in Atlantic City, N.J. It also covers the procurement of capital items of equipment for use in the research and development program.

The Federal Aviation Administration conducts a program to improve and modernize the national system of aviation facilities, and to initiate an airport/airspace increased capacity development program to meet projected 1980 traffic demands. The agency also carries out a program of medical research.

Research and development is conducted through contracts with qualified firms, universities, and individuals, or by agency staff or other Government agencies.

1. *Air traffic control.*—This provides for improving the airways system by the development of systems for automation of air traffic control to expedite aircraft operations and improve aviation safety. This also provides for a program aimed at solving the problem of inadequate capacity of the present and near future airports/airways systems to meet projected aviation requirements. The objective is to double the capacity of the airports/airways systems by 1980 and increase by five-times over current capacity by 1995.

2. *Navigation.*—This provides for modernization, expansion, and improvements of the common system navigation facilities in the United States and in overseas areas where international agreements require U.S. participation. Work in the fields of landing systems, short and long distance navigation, and flight inspection is included.

3. *Aviation weather.*—This provides for a program, coordinated with the Departments of Defense and Commerce, to develop devices and improve techniques for the communication and display of weather information to aviation users. The effects of weather in air traffic management techniques and systems are also analyzed.

4. *Aircraft safety.*—This activity provides for a program, coordinated with the Department of Defense and the National Aeronautics and Space Administration, to study, develop, and evaluate devices to enhance the safety of civil aircraft. Also included are the analysis and solution of noise and sonic boom problems.

This appropriation finances management, operations, maintenance, and capital outlay costs for equipment and maintenance projects at the federally owned Washington National and Dulles International Airports which serve the National Capital Area. The 1971 request reflects an increase in the level of facility maintenance at both airports.

The operation of the airports is conducted on a business basis with revenues derived from landing fees, concession activity, and lease arrangements deposited as receipts in the general fund of the Treasury. The direct operating costs and capital outlays are financed by direct appropriation.

The following statements reflect financial results of the total operations at the two airports. These statements include computation of unfunded depreciation and interest on a basis comparable to that used by other major commercial airports, and total actual revenues.

The Washington National Airport is operating at a profit while Dulles International Airport continues operating at a deficit which results in a deficit for the combined operation of these airports. The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses and an appropriate return on the Government's investment during the useful life of the airports. Revenues, however, are expected to grow at a faster rate than expenses.

¹ Note.—Fees paid by the air carriers for landing jet aircraft at Washington National Airport are identical to the air carrier landing fees paid at Dulles International Airport. The difference between the jet and lower propeller aircraft landing fees at National is credited to Dulles. This difference which is presently included in Washington National's revenues, increases Dulles' revenues for fiscal years 1969, 1970 and 1971 by the respective amounts of \$767 thousand, \$705 thousand and \$812 thousand.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$683 thousand (1969 adjustments, \$4 thousand); 1969, \$556 thousand; 1970, \$2,516 thousand; 1971, \$9,218 thousand.

This appropriation finances construction of major improvements and expansion of facilities at Washington National Airport and Dulles International Airport. Projects are undertaken whenever necessary to insure the capability of these airports to adequately, safely, and conveniently meet air traffic needs of the public and to promote development of aviation activities in general.

All outlays for physical improvements are added to the airports' capital investment and will be subsequently recovered through fees and charges to the tenants and users of the airports.

Under the Federal Airport Act (49 U.S.C. 1101), grants are made to public agencies to aid in the development and improvement of public airports. These grants generally cover 50 percent of the cost of approved projects and are limited to facilities deemed essential for safe operation of aircraft at airports. Contract authorizations were provided for this program through 1961. These remaining authorizations together with appropriations to liquidate obligations under the authorizations are reflected in the above schedule.

Public Law 89-647 amended the Federal Airport Act further to authorize additional appropriations of \$75 million for each of the years 1968, 1969, and 1970.

A new legislative program of airport development has been proposed, which consists of an expanded planning effort and the provision of additional Federal aid for the construction and improvement of airports. In 1970 Congress appropriated \$50 million more than the budget request. Use of these funds depends on passage of the proposed legislation.

CIVIL SUPERSONIC AIRCRAFT DEVELOPMENT

For an additional amount for expenses, not otherwise provided for, necessary for the development of a civil supersonic aircraft, including the construction of two prototype aircraft of the same design, and advances of funds without regard to the provisions of section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), [\$85,000,000] \$239,965,000, to remain available until expended. (49 U.S.C. 1353(b); Department of Transportation and Related Agencies Appropriation Act, 1970.)

The objective of this program is to develop a supersonic transport which will be safe, economically profitable in airline service and more technically advanced than any other commercial aircraft. To the extent possible, the development is being carried out by private enterprise in a manner which will maintain the normal industry/customer relationship. Because of the magnitude of the funds required to develop the aircraft, the technical risk associated with this first U.S. supersonic transport, and the long period between investment and potential profit, Government financial support is essential. The program is a cost-sharing venture involving the Government, the aircraft manufacturers, and their customers—the airlines.

The program is now in the prototype construction phase which includes 100 hours of flight testing. The amount requested is a current estimate of funds needed in 1971 to continue work on the construction of two prototype aircraft.

90 Outlays.....	-1	9	9

The fund provides premium Aviation War Risk Insurance in the event of an outbreak of war. Binders are issued to cover aircraft, persons, and property and will become war risk insurance in wartime and in situations short of war; policies covering aircraft, persons, and property which become active insurance upon issuance are available to certain civil air carriers in connection with Government contract operations. Administrative costs are out of fee receipts (49 U.S.C. 1531, as amended; 75 Stat. 210).

Unfunded contingent liability as of June 30, 1970, is estimated at \$50 billion.

This account finances those activities of the Federal Highway Administration which provide overall program direction and central advisory, coordinating and support service for the entire Administration. Prior to 1970, these activities were financed by transfers of funds from the major appropriation of each of the Federal Highway Administration's three component bureaus. Beginning in 1970, a general fund appropriation and a transfer from the appropriation, "Federal-aid Highways (Trust Fund)" finance these activities.

The offices included are the Office of the Federal Highway Administrator, Office of the Chief Counsel, Office of Program Review and Investigations, Office of Policy Planning, Office of Administration, Office of Public Affairs, Office of Civil Rights, and field counterparts of these organizations.

A description of each program activity follows:

1. *Executive direction.*—Provides overall direction and coordination of the highway transportation mission.

2. *Legal services.*—Provides legal service for all aspects of the Federal-aid highway programs, motor vehicle and highway safety programs, and motor carrier safety enforcement programs.

3. *Policy planning.*—Formulates policy, multiyear and long-range plans, and goals for highway programs, and develops data and analyses to support legislative recommendations and program planning decisions.

4. *Program review and investigations.*—Develops policies and is responsible for executing programs to provide a continuing audit of claims against Federal funds, and to insure a thorough investigation of alleged irregularities in connection with programs administered by the Federal Highway Administration.

5. *Administrative services.*—Provides organization and management systems; budgeting; accounting; personnel management, training, and security; contracting and procurement; program analysis; administrative services; and computer services for all elements of the Federal Highway Administration.

6. *Public affairs.*—Plans, directs, coordinates, and improves programs of public information and intergovernmental relations for all elements of the Federal Highway Administration.

7. *Civil rights and equal opportunity.*—Develops and recommends policies and standards to assure full and affirmative implementation of civil rights and equal opportunity procedures for use within the Federal Highway Administration and by recipients of grants-in-aid administered by the Federal Highway Administration.

8. *Field services.*—Provides the above advisory and support services at the Federal Highway Administration's nine regional offices and 52 division offices.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$60,581 thousand (1969 adjusted, -\$1,192 thousand); 1969, \$42,196 thousand; 1970, \$35,296 thousand; 1971, \$46,096 thousand.

This appropriation provides funds for projects initiated pursuant to the provisions of the Highway Beautification Act of 1965 and the Federal-Aid Highway Act of 1968.

1. *Landscaping and scenic enhancement.*—Provides funds for grants-in-aid for landscaping and roadside development.

2. *Control of outdoor advertising and junkyards.*—Finances the programs to control outdoor advertising and junkyards along interstate and primary highways. Costs will be incurred for (1) compensating sign and property owners for the removal of billboards, (2) removing and relocating junkyards, and (3) screening other junkyards.

3. *Administrative expenses.*—Provides necessary administrative expenses in support of the above activities.

The Federal-Aid Highway Act of 1968 authorized a \$25 million program in 1970. Legislation has been proposed to provide a \$30 million program in 1971. Legislation will be proposed to provide a \$25 million program in 1972. Contract authorization becomes available for obligation 1 year before the year for which the program is authorized.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$14,190 thousand; 1969, \$18,977 thousand; 1970, \$21,170 thousand; 1971, \$31,170 thousand.

1. *Program direction and coordination.*—The Director provides direction, coordination, and implementation of the Bureau's overall policies, programs, and objectives. To assist him in this responsibility, staff offices have been established which carry out responsibilities in planning, scientific matters, and implementation of research findings.

2. *Vehicle safety program.*—These funds will be used to continue development of motor vehicle and tire safety standards, the procedures for evaluating and assuring compliance, and studies to determine the effect of standards on product costs and the necessary lead time for implementing the standard by the industry.

3. *Highway safety program.*—These funds will be required to provide policy, program, and technical guidance to the States in executing State and community highway safety programs, to determine the effectiveness of highway safety programs and to provide overall administration of the Federal assistance aspects of these programs, to

conduct training and education programs, and to conduct demonstration projects that will speed the implementation of new safety techniques into practice. Funds are advanced to this account to administer the State and community highway safety programs authorized by 23 U.S.C. 402, as added by the Highway Safety Act of 1966.

4. *Research and analysis.*—These funds are required for motor vehicle and highway safety research and development activities and for the collection of data from all sources for the purpose of determining the relationship between motor vehicle or motor vehicle equipment performance characteristics and (1) crashes involving motor vehicles, and (2) the occurrence of death or personal injury as a result of such crashes.

5. *Staff and administrative support services.*—Provides salaries and expenses of staff and administrative support services performed in support of the programs of the National Highway Safety Bureau. This activity will be funded under the appropriation, Office of the Administrator, Salaries and expenses, in 1970 and thereafter.

Appropriation to liquidate contract authority.....	29,000	25,000	20,000

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$27,057 thousand; 1969, \$24,673 thousand; 1970, \$18,996 thousand; 1971, \$31,996 thousand.

² Reimbursement from non-Federal sources are derived from State agencies 23 U.S.C. 308 (a-b)).

Main highways within or adjacent to national forests are constructed and improved with these funds. Projects are jointly selected by the States, the Forest Service, and the Federal Highway Administration on the basis of their

contribution to meeting traffic requirements within the national forests. Authorities are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authority of \$33 million is available for each of 1970 and 1971. Legislation will be proposed to provide contract authority in 1972 and 1973. Funds can be obligated in the year prior to the year for which authorized.

The 1971 estimate of \$20 million finances the balance of the 1969 authority and \$50 thousand of the 1970 authority provided by the Federal-Aid Highway Act of 1968.

Actual and estimated progress of the program is summarized in the following table (dollars in thousands):

Fiscal year	Annual authority ¹	Miles completed	Unobligated balance, end of year	Obligations for projects	Outlays
1967.....	\$33,000	303	\$47,421	\$26,500	\$28,947
1968.....	33,000	213	46,392	32,773	31,590
1969.....	33,000	225	50,602	27,190	32,348
1970 (estimate).....	33,000	135	65,602	16,200	26,177
1971 (estimate).....	33,000	260	65,602	31,200	20,000

¹ Each fiscal year authority becomes available for obligation not later than January 1 in the preceding year.

Legislation will be proposed to finance this program from the Highway trust fund commencing in 1971.

	7,600	7,000	15,000

Highways are constructed and improved through public lands in States with large areas of such lands. Funds for this program are available a year in advance of the year for which authorized. Contract authority was made available by the Federal-Aid Highway Act of 1968 for 1970 and 1971 in the amount of \$16 million for each year. Legislation will be proposed to provide contract authority in 1972 and 1973.

The 1971 appropriation estimate finances \$14.3 million, the remainder of the 1969 authority, and \$0.7 million, a portion of the 1970 authority.

Legislation will be proposed to finance this program from the Highway trust fund commencing in 1971.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$9,110 thousand; 1969, \$13,668 thousand; 1970, \$13,668 thousand; 1971, \$13,668 thousand.

Expenses for administration of the Federal-aid highway program and for highway research by the Bureau of Public Roads are financed by deductions from Federal-aid authorizations. Administrative services for other programs of the Bureau and for road construction programs of other Federal agencies are initially financed from this activity, and reimbursements are collected from these programs. This limitation does not cover administrative expenses of highway beautification, which are handled by a separate appropriation.

1. *Program direction and coordination.*—Provides overall program direction and coordination of the missions of the Bureau of Public Roads.

2. *Program development.*—(a) *Engineering and operations.*—This activity provides engineering guidance to Federal and State agencies and to certain foreign governments.

(b) *Traffic operations.*—The purpose of this program is to reduce highway hazards and to encourage use of modern traffic engineering to increase the capacity of existing highways.

(c) *Highway planning.*—Current and long-range planning and programing is carried out with special emphasis on solutions to urban highway problems.

(d) *Right-of-way and location.*—States, other Federal agencies, and certain foreign countries, are assisted in right-of-way acquisition.

(e) *Research and development.*—This is direct and contract research and development relating mainly to traffic operations, new construction techniques, and the social and economic aspects of highways.

3. *Program operations.*—These funds finance the costs of the nine regional offices and 52 division offices related to engineering supervision of the interstate and primary, secondary, and urban programs.

4. *Training programs.*—Highway engineers and program managers are trained on the job.

5. *Staff and administrative support services.*—These funds provide for support of the staff of the highway administration. This activity will be funded under the appropriation, Office of the Administrator, Salaries and expenses, in 1970 and thereafter.

Transfer from Highway trust fund to liquidate contract authority	4,155,370	4,419,279	4,360,000

Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided in the Federal-Aid Highway Act of 1956 and subsequent highway legislation to cover 90% of the costs of completing the 42,500-mile National System of Interstate and Defense Highways, and to match State funds on a 50-50 basis for the primary, secondary, and urban programs. The Federal share of project costs is increased in those States with large areas of public domain. Payments to the States for work done are made out of the Highway trust fund, into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers, truck use, truck parts and accessories, and on lubricating oil used in highway vehicles.

The Federal-Aid Highway Act of 1961 authorized additional appropriations for the interstate program, and also provided increased revenues to finance these increased authorizations. The Federal-aid Highway Act of 1968 provided \$1.1 billion for each of the years 1970 and 1971 to continue the Federal-aid primary, secondary, and urban programs; provided increased authorizations for the Interstate System for years 1970-1974 inclusive; provided \$200 million for each of the years 1970 and 1971 to initiate traffic operations projects in urban areas (TOPICS); and an additional amount of \$125 million in each of the years

1970 and 1971 for the Federal-aid primary and secondary systems in rural areas. Legislation will be proposed to provide contract authority in 1972 and 1973 for the Federal-aid primary, secondary and urban programs, the TOPICS program, and Federal-aid primary and secondary systems in rural areas. All authorizations are available for use in the year prior to the year for which authorized.

The latest cost estimate to complete the Interstate System is \$50.64 billion, which is \$8.34 billion more than previously estimated. Congress approved authorizations through 1974 to cover this latest estimate. Present revenue sources will finance these additional costs until September 30, 1972, the termination date of the Highway trust fund. Legislation will be proposed to extend the Highway trust fund and provide revenue beyond September 30, 1972.

As of October 1, 1969, almost 28,750 miles of the 42,500-mile Interstate System were open to traffic. Most of the mileage, exclusive of toll roads, was built or improved under the Federal-aid Interstate program, under the 90% Federal, 10% State matching program launched in 1956. Toll roads, bridges, and tunnels incorporated in the system totaled 2,303 miles. In addition to the sections open to traffic, 5,259 miles were under construction with Interstate funds, and engineering or right-of-way acquisition was in progress on another 6,615 miles. Thus, some form of work was under construction or completed on 40,622 miles of the 42,500-mile system—about 95% of the total system mileage.

Construction projects involving 233,855 miles in the regular Federal-aid program (primary, secondary, and urban) have been completed since July 1, 1956, at a total cost of \$20.49 billion; and contracts involving 15,351 miles at a cost of \$3.92 billion were authorized or underway on July 1, 1969. In addition, \$1.65 billion of engineering and right-of-way acquisition work had been completed, and \$796 million was underway.

Actual and estimated progress of Federal-aid programs are summarized in the following table:

PAYMENTS UNDER CONTRACT AUTHORITY

[Dollars in thousands]

Fiscal year	Contract authority ¹	Unobligated contract authority, end of year	Federal payments	Projects approved		
				Number	Total cost	Federal share

The Federal-Aid Highway Act of 1968 makes provision for the establishment of a right-of-way revolving fund for the advance acquisition of rights-of-way by the States and payments of relocation expenses including the State share of the cost and without interest.

An appropriation of \$100 million in each of the years 1970, 1971, and 1972 was authorized from the Highway trust fund. Funds can be obligated in the year prior to the year for which authorized.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the general fund to the highway trust fund of revenue from the gasoline tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, annual appropriations are authorized from this trust fund to meet expenditures for Federal-aid highways. Legislation has been proposed to increase certain highway excise taxes to provide a more equitable distribution of the cost of highway programs. Legislation will be proposed to finance forest and public lands highway programs from the highway trust fund beginning in 1971.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968 \$7,278 thousand; 1969, \$7,518 thousand; 1970, \$5,287 thousand, 1971, \$5,287 thousand.

1. *Contributions for highway research programs.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment (23 U.S.C. 307).

2. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways (23 U.S.C. 204).

3. *Equipment, supplies, etc., for cooperating countries.*—In connection with the construction of the Inter-American Highway, the Federal Highway Administration acts as agent for the cooperating Central American Republics in

purchase of equipment, supplies, and services (23 U.S.C. 212, 308).

4. *Technical assistance, U.S. dollars advanced from foreign governments.*—Under the Foreign Economic Assistance Act and under agreement with the International Bank for Reconstruction and Development and the Export-Import Bank of Washington, the Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. During the current year, these services are being rendered for Costa Rica, the Dominican Republic, Ethiopia, Iran, Nicaragua, and the Philippines (64 Stat. 204-209).

5. *Improvement of Pentagon road network.*—Public Law 87-307, approved September 26, 1961, authorized an appropriation for improvement of certain roadways on the Pentagon road network. The improvements have now been completed and title to the roads was conveyed to the Commonwealth of Virginia by deed dated January 31, 1967.

HIGH-SPEED GROUND TRANSPORTATION RESEARCH AND DEVELOPMENT

For necessary expenses for research, development, and demonstrations in high-speed ground transportation, [\$11,000,000, of which

\$150,000 shall be available only for a feasibility study of extending a transit line to Dulles International Airport \$21,688,000, to remain available until expended. (49 U.S.C. 1631 et seq.; 82 Stat. 424; additional authorizing legislation to be proposed; Department of Transportation and Related Agencies Appropriation Act, 1970.)

Program and Financing (in thousands of dollars)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$11,132 thousand; 1969, \$12,165 thousand; 1970, \$14,064 thousand; 1971, \$11,319 thousand.

This appropriation finances research and development and demonstrations programs in high-speed ground transportation.

1. *Research and development.*—This includes materials, aerodynamics, vehicle propulsion, vehicle control, communications, guideways, and research testing on new systems, components, and techniques.

2. *Demonstrations.*—This provides for conducting demonstrations to determine the contributions that high-speed ground transportation can make to more efficient and economical intercity transportation systems. Demonstrations of improved services will be conducted to measure and evaluate public reaction and acceptance of such services. Travel needs and preferences will be analyzed and performance and costs compared.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$30 thousand; 1969, \$151 thousand; 1970, \$251 thousand; 1971, \$801 thousand.

This appropriation provides for research which deals exclusively with railroad matters. During 1970 and 1971, emphasis will be placed on conducting research studies relating to: Railroad safety; rail-highway grade crossing safety; and policy formulation involving a wide range of rail industry problems.

Public enterprise funds:

ALASKA RAILROAD

ALASKA RAILROAD REVOLVING FUND

The Alaska Railroad Revolving Fund shall continue available until expended for the work authorized by law, including operation and maintenance of oceangoing or coastwise vessels by ownership, charter, or arrangement with other branches of the Government service, for the purpose of providing additional facilities for transportation of freight, passengers, or mail, when deemed necessary for the benefit and development of industries or travel in the area served; and payment of compensation and expenses as authorized by 5 U.S.C. 8146, to be reimbursed as therein provided: *Provided*, That no employee shall be paid an annual salary out of said fund in excess of the salaries prescribed by the Classification Act of 1949, as amended, for grade GS-15, except the general manager of said railroad, one assistant general manager at not to exceed the salaries prescribed by said Act for GS-17, and five officers at not to exceed the salaries prescribed by said Act for grade GS-16. (Department of Transportation Act, 80 Stat. 931; Executive Order 11340 dated March 30, 1967; Department of Transportation and Related Agencies Appropriation Act, 1970.)

¹ Balances of selected resources are identified on the statement of financial condition.

The Alaska Railroad was located, built, and is operated by the Federal Government under the act of March 12, 1914 (38 Stat. 305). The authority to construct and operate the railroad was vested by that act, in the President, who, by Executive Order 2129 of January 26, 1915, delegated this authority to the Secretary of the Interior. After completion of the railroad in 1923, the President, in Executive Order 3861, authorized and directed the Secretary of the Interior to operate the railroad.

On April 25, 1965, the President superseded Executive Order 3861 with Executive Order 11107 which continued the authority of the Secretary of the Interior to operate the Alaska Railroad, but conferred certain powers to the Interstate Commerce Commission with respect to the tariffs of the Alaska Railroad.

Under the Department of Transportation Act (act of October 15, 1966, 80 Stat. 931; Public Law 89-670), the authority of the Secretary of the Interior as regards the Alaska Railroad was transferred to the Secretary of Transportation. The law did not change that part of Executive Order 11107 which conferred certain authorities to the Interstate Commerce Commission with regard to tariffs of the Alaska Railroad. The railroad now operates as a bureau of the Federal Railroad Administration.

In furtherance of the general policy to withdraw the Federal Government from programs and enterprises more appropriately carried on at other governmental levels or in the private sector, legislation will be proposed to authorize the sale of the Alaska Railroad during 1971.

¹ Balances of selected resources are identified on the statement of financial condition.

The Urban Mass Transportation Act of 1964 (49 U.S.C. 1601), as amended, authorizes grants and loans to public bodies for: (1) financing of urban transportation facilities and equipment; (2) demonstration and research projects designed to meet urban transportation needs and improve urban transportation service; and (3) grants to provide managerial training for employees of urban transportation systems. Applicants must show that facilities to be financed under the program are necessary for a program for a unified or officially coordinated public transportation system in the urban area, and are necessary for the sound, economic, and desirable development of the area. This program was transferred from the Department of Housing and Urban Development to the Department of Transportation on July 1, 1968.

Budget program.—Net grant and loan approvals are expected to increase from \$180 million in 1970 to \$214 million in 1971.

Program activity is anticipated as follows:

1. **Research, development, and demonstration grants.**—Federal grants and contracts assist in the development, testing, and demonstration of new ideas, methods, and technologies for improving mass transportation systems and services. In 1971, the program is expected to further the changes in emphasis that were started in 1969 and 1970. Efforts will be directed toward: (1) solutions of problems in user and community acceptance; (2) stimulating private investments in promising areas of technological innovation; and (3) influencing institutional constraints which inhibit the development and application of new systems. A \$20 million program is anticipated.

2. **University research and training grants.**—Grants under this activity provide: (1) fellowships for training personnel of the transit industry; and (2) assistance to public and private institutions of higher learning in the conduct of programs in training and research of public transit problems. An estimate of 12 universities will be participating in this program in 1971. The program level will be \$3 million in 1971.

3. **Technical studies grants.**—Grants to State and local public agencies are made for the planning, engineering, and designing of urban mass transportation systems. In 1971, the program will further expand to provide funds to urban areas for transportation systems planning. An anticipated \$15 million will be used in this program.

4. **Capital facilities grants.**—These grants assist State and local public bodies, and authorized interstate and regional public bodies, in the acquisition, construction, and improvement of capital facilities and equipment which are needed for their urban transportation systems. An estimated \$176 million in grants will be approved in 1971.

5. **Capital facilities loans.**—Loans are available to assist State and local bodies, and authorized interstate and regional public bodies, in the acquisition, construction, and improvement of capital facilities and equipment. The loans bear interest at a rate slightly greater than that paid by the Treasury on its borrowings and usually mature in 15 years. Loans occasionally are the only means for financially assisting urban communities in meeting their mass transportation requirements.

Financing.—This fund was initially capitalized by transfer of an applicable portion of the assets and unexpended balance of the Public Enterprise Fund, Urban Mass Transportation Fund, Department of Housing and

Urban Development on July 1, 1968. Appropriations contributed additional capital in 1970 under the provisions of section 4(b) of the Urban Mass Transportation Act of 1964. In 1971, \$196 million of the unexpended appropriated capital will be disbursed.

Operating results.—The fund will operate at a decreasing deficit as interest income is credited to this account.

¹ Balance of selected resources are identified on the statement of financial condition.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the St. Lawrence Seaway within the territorial limits of the United States (33 U.S.C. 981). The seaway has been constructed and is being operated and maintained jointly by the Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada, in conjunction with the related power development works provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario.

Projects for achieving cost effective seaway operations.—An analysis is being conducted presently for use of a portion of its income to be applied to the following categories of projects for achieving a cost effective operation of the seaway. The categories and projects would benefit all seaway users with particular emphasis in enhancing the Great Lakes region.

(a) *Research and development projects*, i.e., study feasibility for year-round utilization of the seaway; study of seaway user requirements to enhance the effectiveness of seaway service, especially Europe and Far East; and, increased informational services.

(b) *Financial studies*, i.e., formulate appropriate studies to develop a financial philosophy of an appropriate nature within the statute including utilization of any retained income.

Operating results.—The Corporation is self-supporting through tolls assessed shippers using the seaway facilities. All operating costs are paid from toll revenues and net operating income returned to the Treasury in payment of interest and principal. Any interest charges not earned are deferred for later repayment in accordance with an agreement with the Treasury Department. For 1971, the Corporation's total revenue is estimated at \$7.5 million to be applied:

(a) To pay estimated operating expenses for 1971 of \$3 million, consisting of administrative expenses of \$0.7 million (subject to congressional limitation) and \$2.3 million for operation and maintenance of the seaway facilities.

(b) To return \$4.5 million to the U.S. Treasury in payment of interest on borrowings. This payment is estimated to be \$1.7 million less than the interest charges on borrowings estimated at \$6.2 million for 1971.

Capital outlay.—The Corporation's construction pro-

gram consists of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the St. Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The total cost of the United States share of the seaway is estimated at \$132.1 million. Work in place at the end of 1970 is estimated at \$131.4 million. The 1971 program of \$0.7 million includes needed improvements and modifications to buildings and grounds, modernization of navigation aids, improved vessel traffic control works for extension of season, and various equipment purchases.

The locks rehabilitation program for 1971 is estimated at \$0.4 million to provide for continuation of the instrumentation and investigation program and for posttensioning of downstream north gate monolith at Eisenhower Lock. At the end of 1971, costs are estimated to reach \$9.5 million, leaving \$3.6 million to complete after 1971.

Financing.—The Corporation has authority to borrow \$140 million from the Treasury for financing the costs of the seaway and to provide for working capital and claims of which \$135.5 million will have been used by the end of 1971. It is estimated that \$1 million will be used during 1971. Capitalized interest accrued during the construction phase of the seaway amounting to \$6.7 million is not charged against the borrowing authority limitation.

Tolls review.—The review of the St. Lawrence Seaway tariff of tolls was completed in 1967 and an international agreement became effective upon the opening of the 1967 navigation season which provided for no change in tolls on the seaway for the next 4 years; a change in the division of tolls from 71% to Canada and 29% to the United States to 73% to Canada and 27% to the United States. Discussions with the Canadian Seaway Authority are scheduled to be performed before the end of the 1970 navigation season with respect to the level of tolls and other matters affecting the adequacy of income.

¹ Includes capital outlay as follows: 1969, \$35 thousand; 1970, \$29 thousand; 1971, \$86 thousand.

² Unpaid undelivered orders, 1968, \$52 thousand; 1969, \$23 thousand; 1970, \$23 thousand; 1971, \$23 thousand.

The Safety Board investigates, determines the probable cause, and issues reports on all civil aviation accidents; makes final cause determination and reports the facts and circumstances of major surface transportation accidents, relying on the administrations within the Department of Transportation to investigate such surface transportation accidents; conducts special transportation safety studies; makes recommendations for the purpose of preventing accidents and promoting safety in transportation; and reviews, on appeal, actions against any certificate or license issued by the Secretary or an administrator of the Department of Transportation.

1. *Policy formulation, legal assistance, and information services.*—This activity covers the formulation and devel-

opment of policy and program objectives, providing legal advice and assistance to the Safety Board components, rendering decisions on transportation safety matters, and providing information services concerning the Safety Board's activities.

2. *Program execution and support.*—This activity covers the centralized management, control, and execution of day-to-day operations of the Safety Board's programs.

3. *Aviation accident cause determination and safety promotion.*—This activity covers investigations of all U.S. civil aviation accidents, except investigations which are delegated to the Federal Aviation Administration; determination of accident cause and reporting the facts and circumstances in all aviation accidents; conducting special studies; and making recommendations on matters pertaining to aviation safety promotion and aviation accident prevention.

4. *Surface transportation accident cause determination and safety promotion.*—This activity covers the fields of railroad, highway, pipeline, and marine safety. The Safety Board delegates accident cause determinations of most accidents to the administrations within the Department of Transportation, but reserves the right to make cause determinations and report the facts and circumstances of all surface transportation accidents which it declares to be major. The Safety Board conducts surface transportation studies and acts as an energizer in surface transportation safety promotion and surface transportation accident prevention.

5. *Certificate or license appeal.*—This activity covers the review, on appeal, of the suspension, amendment, modification, revocation, or denial of any certificate or license issued by the Secretary or an administrator of the Department of Transportation.

Legislative Program

Proposed for separate transmittal, proposed legislation:

FEDERAL AVIATION ADMINISTRATION

AIRWAYS AND AIRPORT DEVELOPMENT

Program and Financing (in thousands of dollars)

Identification code 21-20-1359-2-1-501	1969 actual	1970 est.	1971 est.
Program by activities:			
1. Expanded airways and airport development:			
(a) Facilities and equipment.....		26,000	60,000
(b) Research and development.....		20,500	12,500
(c) Grants-in-aid for airport development.....		11,000	220,000
10 Total obligations.....		57,500	292,500
Financing:			
40 Budget authority (proposed supplemental appropriation).....		57,500	292,500
Relation of obligations to outlays:			
71 Obligations incurred, net.....		57,500	292,500
72 Obligated balance, start of year.....			55,200
74 Obligated balance, end of year.....		-55,200	-184,700
90 Outlays.....		2,300	163,000

This estimate will: (1) increase the facilities and equipment and the research and development programs of the Federal Aviation Administration in order to expand the capacity and effectiveness of the Federal airways system and (2) provide for a new and expanded airport development program.

Under the proposed legislation, grants will be made to public agencies to aid in the development and improvement of public airports. The bill, if enacted, would authorize a 10-year program of Federal aid for airport development. Together with matching grants on a 50-50 basis with State and local governments, this program will provide financing for new and expanded airfield facilities in the order of \$5 billion.

The grants-in-aid of \$220 million for 1971 will help finance the development of airfield facilities, the conduct of airport systems planning, and airport planning and development activities carried on by the States.

The proposed legislation also increases airways user charges to offset the additional costs of these programs.

Proposed for separate transmittal, proposed legislation:

FEDERAL HIGHWAY ADMINISTRATION

Legislation will be proposed to finance the forest highways and public lands highways programs from the highway trust fund. The following schedules indicate the effect of this proposal.

FOREST HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION)

90 Outlays			4,000

Under this proposal, the United States in cooperation with the Republic of Panama and the Government of Colombia will participate in the construction of approximately 250 miles of highway through the Darien Gap.

It is estimated that the total cost of the highway will be \$150 million with the United States participating up to \$100 million and the remaining \$50 million being supplied by Colombia and Panama. Completion of the highway will take 10 years, however, it is contemplated that a passable all-weather gravel surface will be in place in 5 years.

This highway will connect the Inter-American Highway of Central America with the Pan American Highway System of South America creating a single, cohesive network stretching from Alaska to every South American country.

URBAN MASS TRANSPORTATION FUND—Continued

	1969 actual	1970 est.	1971 est.
Unfunded balance, start of year.....			
Contract authority.....			2,802,000
Unfunded balance, end of year.....			-2,802,000
Appropriation to liquidate contract authority.....			

An additional amount of \$636 million in grants is expected to be approved in 1971 under the authorities contained in the Urban Mass Transportation Assistance Act of 1969. (Major systems improvements can be undertaken in the States of California, Massachusetts, New York, New Jersey, and Pennsylvania and in urban areas of Cleveland, Chicago, New York City, and Philadelphia.) State and local tax revenues are being made available to improve transit systems in many areas. Requests for assistance to improve, extend or construct major systems are anticipated from public bodies in these areas.

Liquidation of obligations incurred under the contract authority in the Urban Mass Transportation Assistance Act of 1969 of not more than \$80 million will occur in 1971. Provisions of the proposed bill include a \$3,100 million initial program of a 12 year \$10,000 million total. Since \$214 million has been provided for 1971 in the Department of Transportation Appropriations Act, 1970, \$4 million is estimated for Salaries and expenses, and an \$80 million appropriation is proposed for separate transmittal in 1971, contract authority of only \$2,802 million need be provided under the proposed legislation, computed as follows (in millions of dollars):

Proposed initial program.....	3,100
Less:	
Appropriation for 1971, enacted.....	-214
Appropriation, proposed.....	-80
Salaries and expenses request for 1971.....	-4
Contract authority	2,802

GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the [Federal Aviation Administration] *Department of Transportation* shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds appropriated under this Act for expenditure by the Federal Aviation Administration may be expended for reimbursement of other Federal agencies for expenses incurred, on behalf of the Federal Aviation Administration, in the settlement of claims for damages resulting from sonic boom in connection with research conducted as part of the civil supersonic aircraft development.

SEC. 303. None of the funds provided under this Act shall be available for the planning or execution of programs the obligations for which are in excess of \$16,100,000 for "Highway Beautification" in fiscal year 1970.

SEC. 304. None of the funds provided under this Act shall be available for the planning or execution of programs the obligations for which are in excess of \$70,000,000 in fiscal year 1970 for "State and Community Highway Safety".

SEC. 305. None of the funds provided under this Act shall be available for the planning or execution of programs the obligations for which are in excess of \$18,000,000, exclusive of the reimbursable program, in fiscal year 1970 for "Forest Highways".

SEC. 306. None of the funds provided under this Act shall be available for the planning or execution of programs the obligations for which are in excess of \$8,000,000 in fiscal year 1970 for "Public Lands Highways".

SEC. [307] 303. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 308. None of the money appropriated hereby shall be used to make any payment on any lease purchase contract for jet airplanes to be used by the Federal Aviation Administration wherein the total cost of the lease payments plus the amount needed to exercise the purchase option exceeds the purchase price of the aircraft (which would have been charged were the aircraft to be purchased by normal appropriations) by more than 20 per centum.

SEC. 309. None of the funds provided under this Act shall be available for the planning or execution of programs for any further construction of the Miami jetport or of any other air facility in the State of Florida lying south of the Okeechobee Waterway and in the drainage basins contributing water to the Everglades National Park until it has been shown by an appropriate study made jointly by the Department of the Interior and the Department of Transportation that such an airport will not have an adverse environmental effect on the ecology of the Everglades. (5 U.S.C. 596a; 5 U.S.C. 2131; *Department of Transportation and Related Agencies Appropriation Act, 1970.*)

FEDERAL LAW ENFORCEMENT TRAINING CENTER—Continued

SALARIES AND EXPENSES—continued

The consolidated Federal Law Enforcement Training Center will provide the necessary facilities and equipment for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the participating agencies. This appropriation is established to pay for the Director, staff, and other operating expenses of the center for common law enforcement training and for research in law enforcement training methods and curriculum content. The 1971 estimate makes provision for only the Director and a portion of his staff and for the functions previously handled by the Treasury Law Enforcement Training School.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$0; 1970, \$550 thousand; 1971, \$0.

This appropriation provides for the costs of the first phase of constructing and equipping the consolidated Federal Law Enforcement Training Center in Beltsville, Md. It will consist of a campus-like training center with modern classrooms, ranges, special training areas and equipment, and dormitories and support facilities to accommodate more than the 750 resident students as projected in the original interagency proposal. The total presently estimated cost for facilities and equipment will approximate \$21.5 million. The center will conduct recruit, advanced, specialized, and refresher training for enforcement personnel of participating agencies.

The Secretary of the Treasury may invest the principal of the Pershing Hall Memorial Fund in interest-bearing U.S. bonds. Earnings are paid to the American Legion for use in the maintenance of Pershing Hall in Paris, France (49 Stat. 426).

There is pending legislation which would transfer the control of Pershing Hall to the Administrator of Veterans Affairs. The proposed legislation would abolish the Pershing Hall Memorial Fund and provides that the Secretary of the Treasury shall liquidate any nonliquid assets in such fund and cover the proceeds and other fund assets into the Treasury as miscellaneous receipts.

2. *Federal tax deposit operations.*—Business organizations make deposits through authorized commercial banks or directly with Federal Reserve banks to pay their withheld income, social security, railroad retirement, excise and corporation taxes into the Treasury.

3. *Financial reporting and maintenance of the Government's central accounts.*—This activity includes the maintenance of the central accounts of appropriations, receipts, and expenditures and the preparation and publication of financial reports on the fiscal operations of the Government as a whole. It also includes accounting for purchases, sales and redemptions of securities; processing of capital stock subscriptions of Government corporations; and investment in interest-bearing securities for certain funds such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans' insurance trust fund, and various Government retirement funds.

4. *Other central fiscal operations.*—Banking facilities are provided for all agencies of the Government through designation of selected institutions to act as official depositories of the Government's funds. Other functions include Government-wide guidance and regulations in certain special areas; systems work within the Fiscal Service and the Bureau of Accounts; examination of the financial condition of companies issuing surety bonds in the favor of the United States; payment of international and other claims; performing internal audit in the Bureau, and other audits of a departmental character.

5. *Executive direction.*—This provides for the overall management for the Bureau of Accounts.

74 Obligated balance, end of year.....	-----	-----	-69
90 Outlays.....	330	167	331

This account was created as self-insurance to cover losses in shipment of Government property such as coin, currency, securities, certain losses incurred by the Post Office Department, and losses in connection with the redemption of savings bonds (40 U.S.C. 722). Since these claims are only partially offset by recoveries, the net losses have gradually increased to \$2,617 thousand as of June 30, 1969, and are expected to increase to \$2,784 thousand by June 30, 1970.

EISENHOWER COLLEGE GRANTS

Program and Financing (in thousands of dollars)

1. *Losses in melting gold.*—Out of the receipts to be covered into the Treasury under section 7 of the Gold Reserve Act of 1934, an amount is made available sufficient to cover the difference between the value of gold as carried in the general account of the Treasurer of the United States and the value of such gold after melting and refining (48 Stat. 1061).

2. *National defense conditional gift fund.*—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles, other than money, are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

3. *Esther Cattell Schmitt gift fund.*—Public Law 87-467 (76 Stat. 88) authorized the acceptance of the gift made to the United States by the will of Esther Cattell Schmitt. The income received from the gift to the United States is paid by the Secretary of the Treasury to beneficiaries named in provisions of the will.

The Bureau of Customs collects the duties and taxes on imported merchandise, inspects all international traffic, regulates certain marine and aircraft activities, combats smuggling, undervaluation, and frauds on the customs revenue, and performs related functions in connection with the importation and exportation of merchandise.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Direct obligations are estimated to be \$137,085 thousand for 1971, an increase of \$12,014 thousand over the amount now appropriated for 1970. This amount reflects \$5,267 thousand for increases to maintain the current level of employment and \$6,747 thousand for program increases.

1. *Processing of arriving persons and cargo.*—This activity processes all persons arriving in the United States and all merchandise imported into the United States. It assesses and collects duties, taxes, and fees on imported merchandise, inspects international traffic, combats smuggling, performs certain marine activities relating to the movement of vessels in the foreign trade, and enforces the laws of other Government agencies affecting imports and exports. It examines and ascertains the value of imported merchandise, and performs scientific analysis and identification of merchandise for tariff and enforcement purposes.

SELECTED WORKLOAD DATA

Samples tested.....	165	170	175

2. *Investigations and law enforcement.*—The customs agents in the United States and abroad make investigations in the enforcement of the Tariff Act of 1930, the Narcotics Drug Act of 1934, the Gold Reserve Act of 1934, the Export Control Act, and other laws affecting the movement of merchandise into and out of the United States. They also secure market value information for customs import specialists. In 1969, a total of 28,175 investigations were made. The estimates for 1970 and 1971 are 31,000 and 33,000, respectively.

3. *Internal audit.*—Performs internal audit of procedures, accounts, and records, property and control of imported merchandise, as well as the evaluation of entry procedures on import and drawback entries. Also audits the accounts and records of customhouse brokers and of certain wool manufacturers and processors.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$66 thousand; 1969, \$81 thousand; 1970, \$0; 1971, \$0.

Air conditioning the Bureau of Engraving and Printing buildings.—This appropriation provides for all expenses for the replacement of existing windows in the Bureau's main building. The replacement of the old and corroded windows is being made in conjunction with the project of installing air conditioning in the building in order to control atmospheric conditions and to insure a more uniform quality product in the production of U.S. securities. This program will be completed during fiscal year 1970.

¹ Includes the following amounts earned by contractors for work performed against contracts for the fabrication of equipment (constructive receipts): 1969, \$478 thousand; 1970, \$868 thousand.

² Balances of selected resources are identified in the statement of financial condition.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of U.S. currency and Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as food coupons, postage, internal revenue, customs, and savings stamps. In addition, the Bureau prints a wide variety of miscellaneous commissions, certificates, etc., and executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing.*—(a) *Currency.*—Estimates for the current and budget years indicate an increase in delivery requirements to 2.66 and 2.70 billion notes, respectively, as compared with the delivery of 2.43 billion notes in 1969. The unit cost rate for manufacturing currency reached an all-time low of \$7.95 per thousand notes in 1969. Annual savings of over \$450 thousand will be realized on this product during 1970 and 1971 as a result of increased productivity and reduced material costs.

(b) *Stamps.*—This category of work is comprised mainly of postage and internal revenue stamps, and food coupons. The budget estimates for 1970 and 1971 show continued substantial increases in the requirements for certain types of stamps for the Internal Revenue Service and books of food coupons which are ordered by the Department of Agriculture. These increases have been offset to some extent by a reduction in the projected requirements for certain types of postage stamp products.

(c) *Securities.*—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of the Public Debt and certain other agencies of the Government. The anticipated requirements of the agencies reflect an increase of 8% in 1970 and 18% in 1971 over the quantities delivered in 1969.

(d) *Commissions, certificates, etc.*—An increase of approximately 7% is noted in the number of units to be delivered for this class of work in 1971 as compared with 1969. However, the production costs associated with these items represent a very small percentage of the overall engraving and printing program of the Bureau.

2. *Operation and maintenance of the incinerator and space utilized by other agencies.*—Charges are made to other agencies on an actual cost basis for use of the incinerator and maintenance services provided for the space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services.*—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

Bureau operations were completed during 1969 with a profit of \$168 thousand. In accordance with the provisions of 31 U.S.C. 181, \$129 thousand of this profit will be retained to offset an accumulative deficit brought forward from prior years. The balance of \$39 thousand will be returned to the Treasury as miscellaneous receipts. Outlays were \$7 thousand below receipts in 1969. Outlays are expected to be in excess of receipts in the amount of \$1,244 thousand in 1970 and it is anticipated that receipts and expenditures will be equalized in 1971.

The capital of the fund is expected to remain at \$25.3 million represented by an appropriation of \$3.3 million and donated assets of \$22 million.

90	Outlays, excluding pay increase supplemental	14,216	17,200
91.20	Outlays from civilian pay act supplemental		476

² Reimbursements from non-Federal Sources above are receipts from foreign coinage (31 U.S.C. 367) (Jan. 29, 1874, Stat. 6); and proceeds from sale of medals and proof coins, and uncirculated coins (31 U.S.C. 369) (as amended Sept. 5, 1962, 76 Stat. 440).

The Bureau of the Mint manufactures coins, receives deposits of gold and silver bullion, safeguards the Government's holdings of monetary metals, and refines gold and silver bullion (see miscellaneous permanent appropriations.)

1. *Manufacture of coins.*—Production of coins is the major Mint activity. Funds requested for 1971 will permit production of approximately 8.7 billion coins.

DOMESTIC COINAGE WORKLOAD

[In millions of pieces]

Denomination:	1968 actual	1969 actual	1970 estimate	1971 estimate

TOTAL COST BY DENOMINATION

[In thousands of dollars]

Denomination:	1968 actual	1969 actual ¹	1970 estimate ¹	1971 estimate ¹
1 cent	3,642	4,723	5,417	7,480
5 cents	250	334	1,060	1,146
10 cents	1,137	1,129	1,397	1,150
25 cents	1,486	869	1,500	2,340
50 cents	1,235	371	372	372
Total	7,750	7,426	9,746	12,488

¹ Includes depreciation on equipment.

2. *Processing deposits and issues of monetary metals and coins.*—This activity includes receipt of gold and silver bullion for exchange and settlement of international balances; disbursements of coins; moving, shipping, storing, and verifying bullion and coin; and counting and classifying uncurrent coins returned to the Mints for recoinage.

SELECTED STATISTICS REGARDING DEPOSIT ACTIVITY

[In thousands]

Description	1969 actual	1970 estimate	1971 estimate
Number of deposit transactions	3	2	2
Gold receipts and disbursements (value)	\$792,666	\$1,000,000	\$1,000,000

Silver receipts and disbursements (fine ounces)	252,380	85,000	60,000
Total coins shipped (pieces)	8,358,866	7,828,205	8,700,000
Uncurrent coins received (pieces)	10,377	10,000	10,000

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protection devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. These are deposited to miscellaneous receipts.

5. *Executive direction.*—This provides for the overall management of the Bureau of the Mint.

Total selected resources	-510	-117	-477	-265	-265

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

1. Issuance, servicing, and retirement of savings-type securities.—This activity consists of (a) procuring, receiving, storing, and distributing securities; (b) issuing securities and maintaining records; (c) adjudicating claims for the replacement or payment of lost, stolen, or destroyed securities; (d) handling reissues and other transactions incident to servicing outstanding securities; (e) retiring securities; and (f) determining and authorizing semiannual interest payments on series H bonds.

UNITED STATES SAVINGS-TYPE SECURITIES

[Number of pieces in thousands]

	1969 actual	1970 estimate	1971 estimate
Issues:			
Sales	129,767	135,900	132,900
Reissues and claims	4,316	4,600	4,800
Total	134,083	140,500	137,700
Retirements:			
Redemptions	118,278	121,300	133,200
Reissues, claims, and spoils	5,682	6,200	6,300
Total	123,960	127,500	139,500

2. Issuance, servicing, and retirement of other Treasury securities.—This activity covers the same type of functions

as described above for all U.S. securities other than savings-type securities except that there are, in addition, certain functions related to the processing of interest coupons which are not a part of the savings-type securities activity.

TREASURY SECURITIES OTHER THAN SAVINGS-TYPE

[Number of pieces in thousands]

	1969 actual	1970 estimate	1971 estimate

74 Obligated balance, end of year.....	-----	-2,150	-----
90 Outlays.....	-----	1,100	2,150

A supplemental appropriation in the amount of \$3,250 thousand is anticipated to provide additional funds necessary (1) to pay agents additional fees due to the redemption of 7,800,000 pieces of savings-type securities above the original estimate, (2) to reimburse the Federal Reserve banks for their services as fiscal agents of the Bureau, due to an increase in workload, and (3) to pay for the cost of printing, at higher unit costs, a larger quantity of marketable securities than originally estimated because of the increased volume of sales and exchanges.

INTERNAL REVENUE SERVICE

The Internal Revenue Service is responsible for administration and enforcement of the internal revenue laws. It seeks to preserve and enhance the productivity of the Nation's tax system by fostering voluntary compliance with internal revenue laws and reducing non-compliance.

To encourage lawful compliance with these laws the Service maintains an automatic data processing master file system, informs taxpayers of the requirements of law, assists them in fulfilling these requirements, audits tax returns, collects unpaid taxes, investigates and prosecutes willful tax evaders, etc.

The number of taxpayers and the volume of revenue increases as the population, individual prosperity, and national economy increase. This growth is reflected in the following figures:

Year:	Tax returns filed (in millions)	Gross revenue collections (in billions of dollars)
1963 actual.....	97.8	105.9
1968 actual.....	107.6	153.6
1969 actual.....	110.7	187.9
1970 estimate.....	113.0	200.3
1971 estimate.....	109.6	(1)

¹ See estimate in part 3 of the Budget document.

The additional funds requested for 1971 are principally to provide additional manpower (net of productivity increases) to maintain compliance levels on the 109.6 million tax returns expected and to meet increased costs of maintaining the staff already authorized. Important technological advances are utilized by extending the use of the direct data entry system, and work will begin on three additional Internal Revenue Service Centers which will

provide for processing of the increased volume of tax returns filed in future years.

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Internal Revenue Service, not otherwise provided for, including executive direction, administrative support, and internal audit and [security;] security, including purchase (not to exceed seven, for police-type use without regard to the general purchase price limitation for the current fiscal year) and hire of passenger motor vehicles; and services of expert witnesses at such rates as may be determined by the Commissioner; [\$23,080,000] \$26,096,000. (5 U.S.C. 901-913; Title 26 U.S.C.; Treasury Department Appropriation Act, 1970.)

Total selected resources	430	77	190	190	190

This appropriation provides for the overall planning and direction of the Internal Revenue Service, and the internal audit and internal security functions. This 1971 appropriation request provides for maintaining a balanced level of administrative programs, internal audits, and integrity investigations.

1. *Executive direction.*—This activity sets policies and goals; provides the research and planning necessary for orderly and effective accomplishment of the Service's mission; provides leadership and direction in the execution of plans; and provides for the administrative support of all operations.

2. *Internal audit and security.*—This activity establishes and verifies maintenance of quality controls in the Service. It provides a continuing and independent review

of all Service operations, thereby assuring the Commissioner and operational managers that appropriated funds are spent only for authorized purposes, that tax revenues are properly safeguarded, and that public confidence in the integrity of Service employees is maintained.

This appropriation provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of the payments, and verification through a master file ADP system of the accuracy of information provided on the tax returns. It also provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible tax evaders (nonfilers) for investigation, and assistance in selection of tax returns which appear to warrant an audit. It provides for preparation of reports (statistics of income) based on tax return data, for other statistical studies of the tax system, and for forecasting (for work planning purposes) the number of tax returns to be filed by type and size and geographical area (and related workload data) for many years ahead.

District manual operations and service center automated operations are concerned with tax return processing and revenue accounting. Statistical reporting provides for the statistics of income and other statistical research and reports and for tax return and related workload forecasting.

The additional funds requested for 1971 are principally to provide for growth in population, economy, and programs. Important technological advances are anticipated by upgrading the National Computer Center systems, by extending the use of direct data entry equipment, by providing computer capability for improved analysis of the effectiveness of Service operations, and work will begin on three additional Internal Revenue Service Centers to provide for efficient processing of the increased volume of tax returns filed in future years.

This appropriation provides (1) for assistance to taxpayers in understanding and complying with the tax laws and (2) for detecting and correcting instances of noncompliance.

Additional funds requested for 1971 are necessary to begin restoring the compliance enforcement element of the tax administration system to a level which will insure a continued high degree of voluntary compliance with the internal revenue laws. This requires the Service to meet the normal increase in the number of returns to be audited to prevent a deterioration in the level of taxpayer compliance, to accelerate identification of taxpayers who do not file returns, to promptly collect taxes due but unpaid, and to provide quality taxpayer service and education.

1. *Audit of tax returns.*—This activity provides for a selective examination of tax returns to see if taxpayers have properly complied with the internal revenue laws. It corrects errors and explains corrections to the taxpayers. It also makes determinations as to whether certain organizations or funds are exempt from taxation.

2. *Collection of delinquent accounts and securing delinquent returns.*—This activity provides assistance to taxpayers in understanding their tax obligations and is responsible for securing tax returns due but unfiled and collecting taxes due but unpaid.

3. *Tax fraud and special investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of tax laws. It investigates cases of suspected intent to defraud; recommends prosecution as warranted; and assists in the preparation and trial of criminal tax cases. It is responsible for directing Service participation in the drive against organized crime.

4. *Alcohol, tobacco, and firearms regulation and enforcement.*—This activity provides for administration and enforcement of internal revenue laws and regulations relating to alcohol and tobacco products. It is also responsible for administering and enforcing the Federal Alcohol Administration Act, the National Firearms Act, and title IV of the Omnibus Crime Control and Safe Streets Act of 1968.

5. *Taxpayer conferences and appeals.*—This activity provides for administrative consideration and settlement of taxpayer appeals of audit findings.

6. *Technical rulings and services.*—This activity develops tax return forms, instructions, and guides; issues rulings and opinions as to application of the tax laws, and

meets with taxpayer groups to review and resolve special tax problems.

7. *Legal services.*—This activity provides for the legal counsel and legal assistance needed by the Service to administer and enforce the internal revenue laws.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966 solely to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than

Public enterprise funds—Continued**FEDERAL TAX LIEN REVOLVING FUND—Continued**

the first lien holder's equity, but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

This office: (a) receives, keeps, and disburses the moneys of the United States; (b) processes claims for the proceeds of Government checks; (c) issues and redeems currency and Government securities; (d) maintains fiscal accounts; and (e) prepares financial statements and reports.

1. *Payment and reconciliation of checks.*—This activity maintains checking accounts of Government disbursing officers and Government-owned corporations; proves all debits and credits to the general account of the Treasurer by Federal Reserve banks and U.S. depositories; performs centralized payment function of all checks drawn on the Treasurer of the United States; reconciles deposits claimed and checks issued as reported by disbursing officers with the deposits credited and checks paid by the Treasurer and determines the outstanding checks in each disbursing account. Electronic equipment has been used by this activity since August 1956 in paying and reconciling checks. Postal money orders have also been processed on this equipment since June 1962 as a reimbursable service for the Post Office Department.

In addition to Government checks and postal money orders, Federal tax deposit forms are also being processed on this equipment. This form represents payment of corporation, employment, and excise taxes. The amounts paid are deposited in the Treasurer's account and the forms are sent to the Treasurer for proving and for conversion of the information on the forms to magnetic tape. The tape records are then sent to Internal Revenue Service for direct input to its computerized central filing system of Federal taxes.

MAJOR APPROPRIATED FUND WORKLOAD

[In thousands of items]

	1969 actual	1970 estimate	1971 estimate
Checks paid and reconciled.....	571,515	597,839	614,774
Checks processed per man-year.....	2,764	2,813	2,840

2. *Processing check claims.*—This activity processes all claims for proceeds of Government checks, including the allowance and disallowance of claims against the United States and the enforcing of claims of the United States against banks, endorsers, principals, and sureties or other

parties having liability due to the fraudulent or otherwise improper negotiation of checks.

MAJOR APPROPRIATED FUND WORKLOAD

The Check Forgery Insurance Fund was established in the amount of \$50 thousand by the act approved November 21, 1941 (31 U.S.C. 561). It was increased to \$100 thousand by appropriation of an additional \$50 thousand in 1964. An additional increase of \$100 thousand was requested in 1970 and was approved by the Congress.

The fund is for use by the Treasurer in making settlement with the payees or special endorsees in cases of checks drawn on the Treasurer which have been paid on forged endorsements and in which it appears that recovery from those liable may be delayed or be unsuccessful.

The Service must provide for the protection of the President of the United States, members of his immediate family, the President-elect, the Vice President or other officer next in the order of succession to the office of the President, and the Vice President-elect; persons who are determined to be major presidential or vice presidential candidates, unless such protection is declined; the person of a former President and his wife during his lifetime, the person of the widow of a former President until her death or remarriage and minor children of a former President until they reach 16 years of age, unless such protection is declined. The Service is also responsible for investigation of counterfeiting of currency, specie, and securities; forgery and altering of Government checks and bonds; and non-criminal cases.

The Executive Protective Service protects the Executive Residence and grounds in the District of Columbia and any building in which White House offices are located. This operation is clearly allied with the personal protection of the President and his family while they are in residence. In addition, the Executive Protective Service protects foreign diplomatic missions in the Washington metropolitan area, and such other areas in the United States as the President may direct on a case-by-case basis.

The Treasury Guard Force is responsible for safeguarding paper currency and other Government securities and obligations in the money and security handling divisions of the Treasury Department. It also provides protection for the main Treasury building and its annex.

¹ Balances of selected resources are identified on the statement of financial condition.

The Office of the Comptroller of the Currency was created for the purpose of establishing and regulating a national banking system. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665) provided for the chartering and supervising functions in this connection. The income of the Comptroller's Office is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations. In accordance with 12 U.S.C. 481 assessments paid by national banks are not construed to be Government funds. No funds derived from taxes or Federal appropriations are allocated to or used by the Comptroller's Office in any of its operations.

The administrator of national banks charters new banking institutions only after investigations and due consideration. Supervision of existing national banks is aided by the required submission of periodic reports and detailed, on-site examinations, the latter conducted by a staff of approximately 1,600 national bank examiners. At the present time there are approximately 4,700 national banks having in excess of 11,000 operating branches. As a result of the reports submitted and the examinations conducted, the Office determines the financial condition of individual national banks and the system as a whole, the soundness of operations and compliance with applicable laws and regulations.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank, and applications from banks to establish branches. The Comptroller of the Currency promulgates rules and regulations for the guidance of national banks, bank directors, etc., and publishes them as manuals so that they are readily available to the interested parties.

For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury is authorized to

EXCHANGE STABILIZATION FUND—Continued

enter into stabilization agreements, and to deal in gold and foreign exchange and other instruments of credit and securities. An exchange stabilization fund, with a capital of \$200 million (derived from the increment resulting from the reduction in the weight of the gold dollar which took place in 1934) is authorized by law for this purpose (31 U.S.C. 822a). All earnings and interest accruing are paid into this fund and are available for the purposes thereof, including expenses.

The principal sources of the fund's income have been the handling charge imposed on purchases and sales of gold for the account of the fund, profits on foreign exchange transactions, and interest on investments held by the fund. The income of the fund has consistently exceeded its expenses; the cumulative income of the fund from the time it began operations has been \$438.1 million and its expenses \$65.5 million, resulting in a net income as of June 30, 1969, of \$372.6 million.

It is not practicable to forecast the transactions of the fund in gold, foreign currencies, foreign investments, and the like. The budget schedules, therefore, are incomplete for all items other than operating expenses for 1970 and 1971.

Liabilities of the fund include \$1,125 million borrowed by the Secretary from the International Monetary Fund.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act to the Department of the Treasury shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-2) including maintenance, repairs, and cleaning; and services as authorized by title 5, United States Code, section 3109.

SEC. 102. Hereafter, upon approval of the Secretary of the Treasury, agents on protective missions, as provided by law, may be reimbursed for subsistence expenses without regard to rates provided by 5 U.S.C. 5702. (Treasury Department Appropriation Act, 1970.)

ATOMIC ENERGY COMMISSION

Federal Funds

General and special funds:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; services authorized by 5 U.S.C. 3109; hire, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair and cleaning of uniforms; official entertainment expenses (not to exceed \$30,000); reimbursement of the General Services Administration for security guard services; hire of passenger motor vehicles; **[\$1,862,269,000]** \$2,010,900,000 and any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955, as amended (42 U.S.C. 2301)) received by the Commission, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended: *Provided*, That of such amount \$100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of \$90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of \$45,000 per annum. (*42 U.S.C. 2011; 2017; 2291; 83 Stat. 46; Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970; additional authorizing legislation to be proposed.*)

The Atomic Energy Commission conducts a variety of production, research and development, and supporting activities directed toward its responsibilities for national defense and peaceful applications of atomic energy. Most of the activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Total program costs in 1971 are estimated at \$2,194.1 million or \$4.9 million more than the estimated 1970 costs of \$2,189.2 million, and \$33.3 million less than actual costs of \$2,227.4 million for 1969. The 1971 increases are principally in the special nuclear materials, weapons, and reactor development programs, partially offset by decreases in the raw materials and civilian applications of nuclear explosives programs, and in the cost of work for others.

In 1971, total program obligations will exceed program costs, the difference being obligations incurred for future years' costs. Total program obligations for operating expenses in 1971 are estimated to be \$2,238.9 million compared to \$2,165.0 million in 1970, and \$2,221.3 million in 1969.

The schedule of costs by activity does not include non-budgetary costs such as depreciation charges, accrued annual leave earned but not taken by AEC employees, and the cost of source and special nuclear materials consumed; in total, these are as follows: 1969, \$458 million; 1970 estimate, \$483 million; 1971 estimate, \$543 million.

1. *Raw materials.*—In 1971, approximately 1,391 tons of uranium concentrate will be delivered from domestic

General and special funds—Continued

OPERATING EXPENSES—Continued

producers. The estimate provides for delivery of the final portion of the additional material which AEC agreed to purchase in calendar years 1969–70 pursuant to the domestic stretchout program announced in 1962. The 1971 estimate of 1,391 tons is down significantly from 7,124 tons in 1969 and an estimated 4,058 tons in 1970.

2. *Special nuclear materials.*—Special nuclear materials are produced primarily for use in nuclear weapons and as fuels for nuclear reactors. Major production plants are located at Richland, Wash.; Savannah River, S.C.; Oak Ridge, Tenn.; Paducah, Ky.; and Portsmouth, Ohio. Production of uranium enriched in the isotope U²³⁵ will start to increase in 1971 as a result of increased cascade power purchases.

The increased level of enriched uranium production reflects the rising demand for enrichment of uranium by the electric power industry. AEC charges industry for its services in enriching uranium, and the related revenues are included in the receipts from non-Federal sources in the Program and financing schedule and in the section on revenues below.

Work will continue on process improvements to assure efficiency and safety of operation and to develop more economical methods of production. By major category, the costs are as follows (in thousands of dollars):

Category	1969 actual	1970 estimate	1971 estimate
Production of feed materials.....	26,251	25,051	26,749
Production of enriched uranium.....	119,297	113,683	132,787
Production of plutonium and other reactor products.....	132,544	131,420	139,170
Process development.....	25,822	27,726	25,473
Safeguards research and materials management.....	2,510	3,425	4,200
All other.....	22,240	20,055	20,139
Total.....	328,664	321,360	348,518

3. *Weapons.*—The weapons program encompasses production of nuclear weapons; maintenance of stockpiled weapons in a state of constant readiness; design, development, and underground testing of new weapons types, including the use of supplemental test sites; conduct of an atmospheric test readiness program; and participation with the Department of Defense in the development of test detection methods. By major category, the costs are as follows (in thousands of dollars):

Category	1969 actual	1970 estimate	1971 estimate
Production and surveillance.....	265,121	304,550	361,400
Research and development.....	240,754	249,930	248,860
Testing of nuclear weapons.....	310,404	253,670	231,500
Total weapons.....	816,279	808,150	841,760

4. *Reactor development.*—This program includes the development of nuclear power reactors for central station applications and the development of power and propulsion reactors for a variety of military, civilian, and space applications, together with research and development on reactor technology and nuclear safety. By major category, the costs are as follows (in thousands of dollars):

Category	1969 actual	1970 estimate	1971 estimate
Civilian power reactors.....	125,192	122,825	130,000
Cooperative power reactor demonstration program.....	8,795	9,590	11,609
Euratom.....	1,916	—	—
Space propulsion systems.....	52,898	46,175	43,000
Space electric power development.....	41,894	34,200	33,395
Terrestrial electric power development.....	4,200	3,500	2,200
General reactor technology.....	49,185	46,600	42,000
Nuclear safety.....	33,700	37,300	35,940
Operational services.....	10,555	2,955	1,890
Naval propulsion reactors.....	115,064	120,855	132,000
Total reactor development program.....	443,399	424,000	432,034

The emphasis of the civilian power reactor program continues to be directed to development of the Liquid Metal Fast Breeder Reactor (LMFBR) which promises to produce more fissionable nuclear fuel than it consumes in the process of producing power. Research and development on advanced converter and thermal breeder power reactors and studies of the application of nuclear power to desalting and other processes will also be continued.

Costs of \$11.6 million will be incurred for the cooperative power reactor demonstration program in which AEC provides financial aid to assist industry in development and construction of civilian power reactor prototypes of advanced design. In 1971, the definitive cooperative arrangement for an LMFBR demonstration plant will be initiated following completion of the project definition phase.

The space propulsion systems program (Project Rover) is carried out in cooperation with the National Aeronautics and Space Administration to develop nuclear rocket technology for potential space applications.

The space electric power development program is conducted in cooperation with the National Aeronautics and Space Administration and the Department of Defense to develop nuclear reactor and radioisotopic power systems for space applications.

The terrestrial electric power development program provides for development of radioisotopic power systems for terrestrial applications.

General reactor technology includes development work in support of the overall reactor program in such areas as reactor fuels, materials, physics, heat transfer, components, chemistry, and chemical separations.

The nuclear safety program provides for research and development and investigation of safety problems, conduct of field tests, and application of effective engineered safeguards in the construction and operation of nuclear reactors and other facilities.

The naval propulsion reactor program provides for the design and development of improved nuclear propulsion plants for installation in ships ranging from small submarines to large combatant surface ships.

5. *Physical research.*—This program comprises basic and applied research in the physical sciences. By major category, the costs are as follows (in thousands of dollars):

Category	1969 actual	1970 estimate	1971 estimate
High energy physics.....	118,630	120,530	119,450
Medium energy physics.....	11,266	12,790	13,140
Low energy physics.....	29,620	29,480	27,860
Mathematics and computer research.....	5,686	5,800	5,410
Chemistry research.....	54,482	53,970	51,980
Metallurgy and materials research.....	27,719	27,930	26,980
Controlled thermonuclear research.....	26,541	27,680	29,610
Total physical research.....	273,944	278,180	274,430

The Commission serves as executive agent for the Nation's high energy physics program. Costs for high energy physics research will be reduced by \$1.1 million in 1971. Within this total, an increase is required for preconstruction research and development support associated with design and experimental utilization of the 200 Bev accelerator. To help maintain high priority activities, smaller increases are required for the Alternating Gradient Synchrotron and Stanford Linear Accelerator Center. To provide for these increases, other program activities will be funded at reduced levels in 1971.

The increase in medium energy physics is primarily for the Los Alamos Meson Physics Facility to continue construction related research and development and to prepare for the experimental and theoretical research programs.

The objective of thermonuclear plasma research is to determine whether the energy released by thermonuclear reactions can be controlled and made useful. This research is expected to expand in 1971 to complete fabrication of large new experimental devices and initiate others needed to test recent concepts for improved plasma confinements and expand the research associated with these concepts.

To provide for the aforementioned increased activities, other parts of the physical research program comprised of low energy physics, mathematics and computer research, chemistry research, and metallurgy and materials research will operate at reduced levels in 1971.

6. *Biology and medicine.*—Basic and applied research and development is conducted on the effects of radiation on living organisms and on the environment, protection against the injurious effects of radiation, and development of methods for using radioactive materials in the diagnosis, treatment, and understanding of human diseases such as cancer. The program includes measurement and study of the effects of radioactivity (including fallout) in the atmosphere, soils, fresh water, and oceans for establishment of standards to insure that AEC activities are conducted safely. The program is coordinated with other Government agencies conducting programs in related aspects of biomedical research.

In 1971, emphasis will be given to studies of effects of plutonium and radon on the lung in order to minimize the hazards to uranium miners and others who might be exposed to these materials. There will also be an evaluation of effects of the discharge of heated effluents from nuclear powerplants. Important research on effects of radiation and other environmental mutagenic agents in the production of mutant organisms will be continued. The radiation preservation of foods program will also be continued.

7. *Training, education, and information.*—This program includes specialized training courses; graduate fellowships and traineeships; assistance to schools, faculty, and students; operation of the Puerto Rico Nuclear Center; training in nuclear materials safeguards; dissemination of scientific and technical information; and operation of nuclear science and technology demonstrations and exhibits, including preparatory costs for participation in the United Nations' Fourth International Conference on the Peaceful Uses of Atomic Energy.

In 1971, AEC will provide a reduced number of graduate fellowships and traineeships. The cooperative use of specialized atomic energy laboratory facilities and staff in assisting the educational programs of colleges and universities throughout the country will continue.

Training in nuclear materials safeguards will be provided in order to detect and deter possible diversion of nuclear materials from peaceful to unauthorized use.

To broaden knowledge and understanding of atomic energy, information will be provided at both a technical and popular level. Results of scientific research and technical developments will be made available to other Government agencies and to the public.

8. *Isotopes development.*—This program is designed to promote and encourage the development of new uses of radioisotopes and radiation technology. Emphasis is given to development of heat sources for potential applications including a circulatory support system (nuclear powered artificial heart) and to development of isotopic measuring and diagnostic systems for tracing and analyzing environmental pollution. Technology development for radiation preservation of foods will continue at a reduced level.

9. *Civilian applications of nuclear explosives.*—This program, also known as Plowshare, provides for the investigation, development, and demonstration of peaceful uses for nuclear explosives. The 1971 budget provides for continuation of research and development aimed at a fundamental understanding of nuclear explosive design and explosion phenomenology and its application. The 1971 budget also provides for an expansion of the underground engineering phase of the program, including field testing of nuclear explosive designs suitable for such underground engineering applications as natural gas production stimulation, natural gas storage, and recovery of copper from low-grade ore bodies and continuation of efforts on several cooperative underground engineering projects.

10. *Communities.*—Operating costs for the community program are estimated at \$7.8 million in 1971. The 1971 estimate includes assistance payments to the former AEC communities of Oak Ridge, Tenn., and Los Alamos, N. Mex., under the Atomic Energy Community Act of 1955, as amended. The 1971 estimate provides \$3.7 million for the final assistance payment to the Richland School District. The estimate also includes costs at Los Alamos, principally for fire protection.

11. *Regulation.*—This program covers salaries and other costs for employees engaged in the discharge of regulatory functions of the Commission, including development of policies, standards, and procedures; administering licenses and regulations applicable to licensees; compliance and safeguards inspections for licensees; and cooperation with States in regulatory activities. The 1971 estimate provides for 504 employees located in the headquarters and field offices. This is the same level as the June 30, 1970 strength.

12. *Program direction and administration.*—This program includes the salaries and other costs for employees engaged in executive direction, general management, and technical supervision of the atomic energy program. Employees are located in the Washington headquarters and in field offices. The 1971 estimate provides for 5,161 employees, which is 116 employees less than the estimated June 30, 1970 strength of 5,277.

13. *Security investigations.*—The Atomic Energy Act of 1954, as amended, requires investigations of those persons proposed for access to restricted data of the atomic energy program. The number of background investigations to be requested in 1971 is estimated at 17,000 compared with 17,300 for 1970 and 15,327 for 1969.

General and special funds—Continued

OPERATING EXPENSES—Continued

14. *Cost of work for others.*—In furthering the objective of widespread utilization of atomic energy for peaceful purposes, AEC, when requested, furnishes materials and services to industrial organizations and other private parties. Charges made for such products and services are reflected in the budget under receipts and reimbursements from non-Federal sources (revenues applied) and are applied as a source of funds, thereby reducing the amount of appropriations required. The items included are (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Cost of products sold.....	18,457	39,507	19,784
Cost of services performed.....	2,606	3,374	4,462
Total costs (excluding depreciation).....	21,063	42,881	24,246
Related revenues.....	25,728	63,439	33,491
Excess of revenues over related funded costs.....	4,665	20,558	9,245

Receipts and reimbursements from non-Federal sources (revenues applied).—This item, shown as a source of financing on the program and financing schedule, reduces appropriation requirements. The income is obtained from the following sources (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Income from products sold and services performed included in program costs of current or prior years:			
Sale of source and special nuclear materials.....	23,649	4,401	6,006
Uranium enrichment services.....	30,026	67,941	126,207
Income from lease of materials, consumption charges for special nuclear materials and interest on deferred sale of materials.....	35,524	44,030	54,634
Income from charges for recovery of source and special nuclear materials.....	1,237	1,415	855
Other income.....	3,769	5,103	6,764
Subtotal.....	94,205	122,890	194,466
Income from other products sold and services performed, costs of which are incurred at request of others and included under cost of work for others:			
Products sold.....	22,492	59,646	28,687
Services performed.....	3,236	3,793	4,804
Subtotal.....	25,728	63,439	33,491
Total receipts and reimbursements from non-Federal sources (revenues applied).....	119,933	186,329	227,957

PLANT AND CAPITAL EQUIPMENT

For expenses of the Commission, as authorized by law, in connection with the purchase and construction of plant and the acquisition of capital equipment and other expenses incidental thereto necessary in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of not to exceed five hundred and [thirty] twenty-two, of which five hundred and ten are for replacement only (including seven for police-type use without regard to the general purchase price limitation), and hire of passenger motor vehicles; purchase (one) and hire of aircraft; [\$355,500,000] \$352,100,000, to remain available until expended. (42 U.S.C. 2017; 83 Stat. 46; Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970; additional authorizing legislation to be proposed.)

90 Outlays.....	411,334	472,900	463,600

This appropriation provides for construction of plants and facilities and for acquisition of capital equipment required for the production, research and development, and supporting programs of the Atomic Energy Commission. Of the budget authority of \$352.1 million being requested for 1971, \$76.2 million applies to new construction projects or modification of existing facilities, \$92.5 million is applicable to construction projects which were previously authorized by Congress, \$9.6 million is applicable to a project for which amended authorization is being requested, and \$173.8 million is required for acquisition of capital equipment not related to construction.

The funds applicable to the previously authorized projects include annual funding of \$65 million for the 200 Bev accelerator, Du Page and Kane Counties near Chicago, Ill. (total estimated cost \$250 million); \$17 million for the new weapons production capabilities project (total estimated cost \$315 million); and \$10.5 million for the meson physics facility, Los Alamos Scientific Laboratory, N. Mex. (total estimated cost \$56 million). The 200 Bev accelerator will provide the highest energy proton beam in the world, permitting experiments to be conducted in an energy range which is now inaccessible. The results of experiments at higher energies are vital for a better understanding of particle physics, the study of the fundamental

constituents of atomic nuclei, and thus of all matter. The weapons production project provides for new capability and increased capacity required for production of warheads for the Minuteman, Poseidon, and Safeguard systems. The meson physics facility will be a medium energy accelerator capable of producing a particle beam of extremely high intensity for basic research in physics.

The authorization amendment being requested includes funding of \$9.6 million for construction of waste encapsulation and storage facilities at Richland, Wash. (total estimated cost \$10.8 million).

New construction projects include \$5 million for initiation of design of support facilities for the long-term Cascade Improvement program to increase the capacity of the uranium enrichment plants in anticipation of increased future demand for civilian nuclear powerplant fuels. In addition, funding of \$6.3 million for in-tank waste solidification systems, Richland, Wash., is included.

A wide variety of capital equipment is procured to fill the various needs of all operating programs. Such needs range from routine replacement of worn out and obsolete equipment to procurement of new research devices and computers. Additions are needed for expanding programs and to keep pace with rapidly changing technology in the production and research programs.

GENERAL PROVISIONS

SEC. 101. Not to exceed 5 per centum of appropriations made available for the current fiscal year for "Operating expenses" and "Plant and capital equipment" may be transferred between such appropriations, but neither such appropriation, except as otherwise provided herein, shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

SEC. 102. No part of any appropriation herein shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony, and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*42 U.S.C. 2011; Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

¹ Includes capital outlay as follows: 1969, \$443 thousand; 1970, \$416 thousand; 1971, \$400 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$953 thousand (1969 adjustments, -\$142 thousand); 1969, \$3,103 thousand; 1970, \$3,103 thousand; 1971, \$3,103 thousand.

This appropriation provides for the basic real property operations of General Services Administration, including acquisition, operation, maintenance, protection, and utilization of general-purpose buildings and space; and for overall direction of buildings design, construction, repair, and modernization.

The appropriation request for 1971 of \$344,153 thousand is a net increase of \$10,000 thousand above the comparable amount for 1970. The 1970 amount includes proposed transfers of \$5,732 thousand for replacement space and moving costs incident to demolition of the main Navy and Munitions buildings, Washington, D.C.; \$14,354 thousand for annual cost of expansion space acquired in 1969, not provided for in GSA's 1970 budget; and \$7,222 thousand proposed for separate transmittal for wage-board and pay act increases effected in 1970.

The net increase of \$10,000 thousand provides primarily for management and operation of new Federal buildings scheduled for occupancy in 1970 and 1971, offset by credits for space released resulting from new construction.

Fair value of property received from other appropriations or funds without cost for use by GSA (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Real property.....	2,232	25,430	1,123

1. *Buildings management*.—This activity provides for rental, operation, protection, and utilization of Government-owned and leased space, as indicated in the following table:

	Average net square feet (in thousands)		
	1969 actual	1970 estimate	1971 estimate
Government-owned space.....	97,633	100,342	101,059
Leased space.....	32,069	35,313	36,206

The net increase for 1971 of \$9,969 thousand over the comparable amount for 1970 is composed of increases in operation and protection of Government-owned space, \$6,692 thousand; and in rental, operation, and protection of leased space, \$7,241 thousand, offset by a reduction of \$3,964 thousand in moving, alterations, and related cost.

2. *Space management*.—This activity provides for (a) review, analysis, and determination of Federal space requirements and the development of programs and projects; (b) acquisition of real property by lease, purchase, exchange, or donation, including the management of building sites pending construction; and (c) assignment and reassignment of Government-owned and leased space.

3. *Design and construction*.—This activity provides overall direction for the nationwide Federal building design, construction, and alteration programs, including projects financed with funds transferred from other Government agencies.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$38,401 thousand (1969 adjustments -\$1,149 thousand); 1969, \$35,300 thousand; 1970, \$37,300 thousand; 1971, \$34,300 thousand.

This appropriation provides for day-to-day maintenance repair work of all types, repairs, remodeling, improvement of space and tenant alterations, conversions, and extensions of federally owned buildings under the jurisdiction of the General Services Administration for these purposes. The budget for 1971 provides for continuation of the long-range program initiated in 1957 to alleviate deterioration and obsolescence of buildings which adversely affect efficient operations of occupying agencies.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1969, \$13 thousand; 1970, \$15 thousand; 1971, \$15 thousand.

1. *Maintenance repairs.*—Normal needs for day-to-day repairs to buildings and equipment are programed at a rate of \$0.19 per net square foot for general office-type space and \$0.06 per net square foot for warehouse-type space.

2. *Repairs and improvements.*—Major and minor repair and improvement projects are selected from an inventory of urgently needed work to offset obsolescence and deterioration of buildings and to bring the properties up to modern standards of usefulness.

3. *Conversions and extensions.*—Building conversions and extensions estimated to cost in excess of \$25 thousand are performed under this heading to provide space to meet current requirements.

4. *Program direction.*—Overall direction and program development are provided under this activity.

CONSTRUCTION, PUBLIC BUILDINGS PROJECTS

For an additional amount for expenses, not otherwise provided for, necessary to construct and acquire public buildings projects and alter public buildings by extension or conversion where the estimated cost for a project is in excess of \$200,000, pursuant to the Public Buildings Act of 1959 [(73 Stat. 479)], as amended (40 U.S.C. 601-615), including fallout shelters and equipment for such buildings, [\$26,533,000, and not to exceed \$500,000 of this amount shall be available to the Administrator for construction or alteration of small public buildings outside the District of Columbia as the Administrator approves and deems necessary,] \$101,664,500, including \$6,000,000 to replace funds previously used in accordance with the Supplemental Appropriation Act, 1969, all to remain available until expended: *Provided*, That a total amount of [\$7,336,400] \$82,725,500 heretofore appropriated for projects located at [Port-hill, Idaho, Cambridge, Massachusetts, Detroit, Michigan, Helena, Montana, Pittsburgh, Green Tree, Pennsylvania, Westerly, Rhode Island, and Houston, Texas] Augusta, Georgia, Honolulu, Hawaii, Indianapolis, Indiana, Frankfort, Kentucky, Houma, Louisiana, New Orleans, Louisiana, Fitchburg, Massachusetts, Albany, New York, Bronx, New York, Providence, Rhode Island, Denton, Texas, San Antonio, Texas, and Seattle, Washington, under this heading in the Independent Offices Appropriation Acts, 1963, 1964, [1965, 1966] and 1967, and the Independent Offices and Department of Housing and Urban Development Appropriation [Act, 1968] Acts, 1968 and 1970, respectively, are hereby made available for the purposes of this appropriation: *Provided further*, That the foregoing amounts shall be available for public buildings projects at locations and at maximum construction improvement costs (excluding funds for sites and expenses), as follows:

- [Post office and Federal office buildings, Talladega, Alabama, in addition to the sum heretofore appropriated, \$76,000;]
- [Border station, Alaska Highway, Alaska, in addition to the sum heretofore appropriated, \$398,000;]
- [Federal office building, Los Angeles County, California, in addition to the sum heretofore appropriated, \$1,258,000;]
- [Federal office building, Chicago, Illinois, in addition to the sum heretofore appropriated, \$13,285,000;]
- [Post office and courthouse, Concord, New Hampshire, (Claims), in addition to the sum heretofore appropriated, \$47,900;]
- [Charles A. Buckley Post Office and Federal office building, Bronx, New York, formerly Post office and Federal office building,

- Bronx, New York, in addition to the sum heretofore appropriated, \$3,948,000;]
- [Courthouse and Federal office building, Rochester, New York, in addition to the sum heretofore appropriated, \$2,085,000;]
- [Courthouse and Federal office building, San Antonio, Texas, in addition to the sum heretofore appropriated, \$1,075,500;]
- [Federal Bureau of Investigation Academy, Quantico, Virginia, in addition to the sum heretofore appropriated, \$7,396,000;]
- [Federal Bureau of Investigation building (substructure), District of Columbia, in addition to the sum heretofore appropriated, \$3,800,000] Post office and Federal office building, Petersburg, Alaska, in addition to the sum heretofore appropriated, \$488,000;
- Federal office building, Los Angeles County, California, in addition to the sum heretofore appropriated, \$1,098,000;
- Border station, San Diego, California, formerly Border station, San Ysidro, California, \$5,430,000;
- Post office and Federal office building, Fort Collins, Colorado, in addition to the sum heretofore appropriated, \$864,000;
- Courthouse, customhouse, and Federal office building, Wilmington, Delaware, \$9,127,000;
- Post office and courthouse, West Palm Beach, Florida, \$6,089,000;
- Federal office building (superstructure), Chicago, Illinois, in addition to the sum heretofore appropriated, \$9,195,000;
- Courthouse and Federal office building, Grand Rapids, Michigan, \$9,411,000;
- Post office and Federal office building, Keene, New Hampshire, in addition to the sum heretofore appropriated, \$477,000;
- Federal office building, Gallup, New Mexico, in addition to the sum heretofore appropriated, \$193,000;
- Courthouse and Federal office building (superstructure), Philadelphia, Pennsylvania, \$61,800,000;
- Post office and Federal office building, Barrington, Rhode Island, in addition to the sum heretofore appropriated, \$96,000;
- Post office, courthouse and Federal office building (construction and alteration), Brattleboro, Vermont, in addition to the sum heretofore appropriated, \$530,000;
- Post office and Federal office building, Morgantown, West Virginia, \$3,792,000; and Federal Bureau of Investigation building (superstructure), District of Columbia, \$69,800,000: *Provided further*, That the foregoing limits of costs may be exceeded to the extent that savings are effected in other projects, but by not to exceed 10 per centum. (Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.)

General and special funds—Continued

CONSTRUCTION, PUBLIC BUILDINGS PROJECTS—Continued

This appropriation provides for the construction of new buildings pursuant to the Public Buildings Act of 1959, as amended. Expenses for related site acquisition, design and supervision are provided under Sites and expenses, public buildings projects.

MAGNITUDE OF THE FUNDED AND UNFUNDED APPROVED
CONSTRUCTION PROGRAM

Funded program:	Number of projects	Construction cost (in millions)
Projects funded, 1959 through 1970 (excludes projects canceled or reprogrammed).....	437	\$1,364.0
In 1971 budget.....	5	101.7
Subtotal through 1971.....	442	1,465.7
Projects to be funded after 1971:		
Approved projects funded for sites and expenses, construction funding to be budgeted after 1971 (includes 17 projects previously funded and reprogrammed).....	56	488.5
Balance of funding for 3 projects for which substructures were previously funded.....	---	145.6

Approved projects partially or wholly unfunded for sites and expenses.....	22	231.4
Subtotal after 1971.....	78	\$865.5
Total approved construction program.....	520	2,331.2

¹ Includes \$40.4 million for substructures for New York, N.Y., Customs Court and Federal Office Building Annex; Philadelphia, Pa., Courthouse and Federal Office Building and FBI, Labor Department, and South Portal buildings in the District of Columbia. (\$145.6 million remains to be funded after 1971 for three superstructures.)

² Estimates based on current market conditions.

The recommended appropriation of \$101.7 million for 1971 provides for five new projects; increases for seven projects, and one superstructure previously funded; funding for two superstructures; and replacement of funds previously used in accordance with the Supplemental Appropriation Act, 1969.

SITES AND EXPENSES, PUBLIC BUILDINGS PROJECTS

For an additional amount for expenses necessary in connection with the construction of public buildings projects not otherwise provided for, including preliminary planning by contract or otherwise, **[\$11,000,000]** \$14,000,000, to remain available until expended. (Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.)

¹ Total includes \$777 thousand for construction of small public building projects outside the District of Columbia.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$9,558 thousand; 1969, \$9,061 thousand; 1970, \$9,461 thousand; 1971, \$10,061 thousand.

This appropriation provides for preliminary planning of public buildings, acquisition of sites, preparation of drawings and specifications, supervision of construction, and related costs incident to projects approved under the Public Buildings Act of 1959, as amended. Costs for construction are financed from Construction, public buildings projects.

The estimate of \$14 million for 1971 provides \$4 million for the acquisition of sites; \$3.2 million for design; \$5.2 million for supervision; \$1.1 million for preliminary plan-

ning and development; and \$0.5 million for administrative operations support.

1. *Site acquisition.*—Acquisition of sites, including title evidence for three of the 11 projects included in the estimate, and deficiency judgment and interest thereon arising out of condemnation proceedings.

2. *Design.*—Preparation of drawings and specifications, by contract or otherwise, technical services, and reproduction of plans and specifications for nine of the 11 projects.

3. *Supervision.*—Construction supervision and inspection by contract or otherwise.

4. *Preliminary planning and development.*—Feasibility studies, site investigations, selections and appraisals, including options to purchase; topographical surveys, including test borings, design through tentative stage, and development of projects prior to prospectus authorization.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$1,291 thousand; 1969, \$797 thousand; 1970, \$647 thousand; 1971, \$0.

Public Law 89-372, approved March 18, 1966, authorized the appointment of 10 circuit and 35 district judges. An additional amount of \$6 million was appropriated in the Independent Offices Appropriation Act, 1967, approved September 6, 1966, to provide equipped facilities for the judges by performing alterations to existing facilities, rental of space, and alterations of temporary facilities pending the construction of new buildings under separate financing authority.

The Administrative Office of the U.S. Courts has requested GSA to provide the facilities required for the judges and their staffs at locations where the judges will hold court. To date, the President has appointed all of the judges authorized under Public Law 89-372, and court facilities are at various stages of completion.

Public Law 90-347, approved June 18, 1968, authorized the appointment of nine additional circuit judges, of which eight have been appointed to date. Additional funds will be required at a later date to provide facilities for these judges as well as for approximately 75 full-time magistrates under Public Law 90-578, approved October 17, 1968.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$2,126 thousand; 1969, \$332 thousand; 1970, \$0.

This appropriation provides for design and construction of a Federal office building on square 167. A construction contract covering the first phase was awarded in January 1964 and was completed in September 1967. The design contract for the second phase was awarded in October 1964, and construction contracts were awarded in August 1967, September 1967, and May 1968. This phase was completed in November 1969.

Total selected resources.....	128,764	124,127	123,202	123,202

This fund finances, on a reimbursable basis, building management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; modernization and recurring repairs to Government-owned space under jurisdiction of General Services Administration; protection and maintenance of excess and surplus properties; maintenance of sites acquired for future construction of Federal buildings; uniforms and uniform allowances; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1971 are estimated at \$516.7 million, an increase of \$13.3 million over 1970.

1. *Buildings management.*—(a) *Operation and protection of Government-owned space.*—Provides for operation and protection of an average of 156.2 million square feet of space in 1971 compared to an average of 154.0 million square feet in 1970 and an average of 149.7 million square feet in 1969. The change from 1970 reflects net additional space to be serviced due to construction of new buildings, and certain buildings being transferred to GSA for operation and protection.

(b) *Rental, operation and protection of leased space.*—Provides for an average of 52.9 million square feet in 1971

Intragovernmental funds—Continued

BUILDINGS MANAGEMENT FUND—Continued

compared to an average of 51.9 million square feet in 1970 and an average of 48.5 million square feet in 1969, based on currently projected requirements of Federal agencies.

2. *Moving, alterations and related costs.*—Provides for moving and related alterations based on experience factors of buildings management operations and for moving and space adjustments incident to the new construction program.

3. *Protection and maintenance, surplus properties.*—Provides for protection and maintenance of excess and surplus properties.

4. *Maintenance repairs.*—Provides for day-to-day maintenance of GSA operated buildings, and other Government buildings under jurisdiction of GSA.

5. *Security and special guarding.*—Provides security and above normal guarding service required by other agencies.

6. *Operation and maintenance of sites held for future construction.*—Provides for maintenance of sites acquired for future construction of Federal buildings and repairs to improvements located thereon.

7. *Job order work.*—Provides for special services and repairs and improvements to buildings for GSA and other agencies.

8. *Other.*—Provides for program supervision of repair and improvement operations as distinguished from architectural and design activities initially financed from the Construction services fund, utility services furnished in the District of Columbia to buildings operated by other agencies and utilities to concessionaires.

Operating results and financial condition.—At the end of 1969, the net investment in the fund was \$5.6 million composed of \$3.5 million appropriated, \$7.9 million capitalized assets, \$2.2 million retained earnings, less \$8 million provision for unfunded leave liability.

Construction services activities consisting of preparation of drawings and specifications for the construction or alteration of public buildings; supervision of construction and alteration activities; and surveys and test borings performed in connection with the acquisition of Federal building sites and other related services are financed by this fund on a reimbursable basis from funds appropriated, transferred, or advanced to General Services Administration (40 U.S.C. 296).

Operations.—Initial financing of this fund provides for salaries and related expenses of all personnel engaged in architectural and engineering services in connection with buildings design and construction, both departmental and field. Estimates for 1970 and 1971 cover the GSA public building construction program, the repair and improvement program, and additional workload in connection with projects assigned to GSA by other Federal agencies.

Operating results.—Retained earnings were increased in 1969 to approximately \$2,444 thousand. Losses of \$481 thousand and \$904 thousand are projected for fiscal years 1970 and 1971, respectively, due to fiscal restrictions on construction activity, with retained earnings reduced to \$1,059 thousand at the close of fiscal year 1971.

¹ Excludes adjustment of prior year cost of -\$78 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$1,282 thousand (1969 adjustment, \$95 thousand); 1969, \$1,388 thousand; 1970, \$1,388 thousand; 1971, \$1,388 thousand.

This appropriation provides for (1) establishment of efficient supply and property management practices throughout the Federal Government, and (2) expenses of operating the worldwide supply system through which commercial-type commodities are sold to Government agencies, Federal grantees, and cost-type contractors from depot stocks, or by direct delivery from suppliers, whichever is more economical and meets the needs of the Government and (3) assistance to business concerns and the public, interested in Government procurement and disposal. Except for customer orders placed directly with suppliers under Federal supply schedule contracts, most of the purchases of commodities are financed initially from the General supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from suppliers are paid directly from funds of the requisitioning agency without

General and special funds—Continued

OPERATING EXPENSES, FEDERAL SUPPLY SERVICE—Continued

involving the General supply fund. This appropriation also provides for the necessary expenses of carrying out some of the Government-wide automated data management activities within the jurisdiction of the General Services Administration.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1969, \$22 thousand; 1970, \$22 thousand; 1971, \$23 thousand.

1. *Supply distribution.*—Stocks of commercial-type commodities are received, warehoused, and issued on a world-wide basis to Federal agencies through a national supply distribution system consisting of both wholesale and retail distribution facilities. Stores stock sales will increase from \$528.4 million in 1969 to an estimated \$540 million in 1971.

2. *Procurement.*—Commodities are procured to maintain inventories at stores depots to insure availability in advance of sales orders and for direct delivery to agencies. Term contracts for commercial-type commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages. Total procurement in 1969 was \$2,443.2 million; total procurement for 1970 is estimated at \$2,735 million; and 1971 total procurement is estimated to reach \$2,792 million.

3. *Supply control.*—The Office of Supply Control is a newly created organization within the Federal Supply Service, established on July 1, 1969. Its activities encompass the order processing and control of incoming requisitions, commodity and data management, catalog publication responsibility, supply data systems controls and the management of the GSA stores inventory.

4. *Inspection.*—Timely delivery of commodities of specified quality is assured by inspection and surveillance at contractors' plants or supply depots, by laboratory tests and analyses of samples prior to acceptance, and by contract administration assistance. In 1971, Quality Control will inspect \$651 million of stores items, \$230 million non-stores items, and \$70 million of items procured from Federal Supply Schedules.

5. *Supply standardization.*—Qualitative requirements of Federal agencies are reflected in Federal specifications, Federal standards, and Federal item identifications which are mandatory for use in procurement. In 1971, the standardization program will consist of the promulgation of 1,085 Federal specification and standards actions and 215,000 cataloging actions.

6. *National supply policies and programs.*—In 1971, supply management activities will continue to place emphasis on agreements between GSA, the Department of Defense, and the civil agencies for the governing of supply management relationships. Studies and recommendations will continue to be made in order to improve the internal supply systems of Federal agencies. Priority support to the Department of Defense and the Agency for International Development requirements in Southeast Asia will receive continued emphasis.

7. *Automated data management services.*—During 1971, the resources for this program will be devoted to such functions as procurement assistance, contracting, determination of sharing resources, establishment, maintenance, and publication of ADP management information, reutilization of equipment, furnishing technical assistance, and performing technical research.

The Automatic Data Processing Fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease, and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer or otherwise of ADP equipment, maintenance of equipment, and operation of service centers and related functions.

Budget program.—The estimate provides for a continued increase in data processing services for agencies during 1970 and 1971. Sales are estimated to increase from \$13,926 thousand in 1969 to \$18,574 thousand in 1970 and to \$21,783 thousand in 1971.

1. **Data processing.**—Provides for the operation of Government-wide Federal data processing centers; pools of programmer analysts and equipment operators to assist agencies on an as-required basis; joint use facilities for common central ADP services of an installation operated by an agency under GSA policy guidance and/or financing; maintenance support for Government-owned equipment of General Services Administration; a time sharing center where a single computer serves multiple users at various locations, thereby eliminating the need for multiple computer sites; and a magnetic surfaces laboratory to develop test methods for specifications and perform acceptance testing on all magnetic tapes procured through Federal supply schedules. In 1969 the ADP fund assumed operational responsibility for the data processing center at Huntsville, Ala., previously operated by NASA. This increased to 12 the number of GSA operated Federal data processing centers. Expansion of the center operations and other related operations in 1970 and 1971 are estimated to increase the revenue from sales from \$12,929 thousand in 1969 to \$15,466 thousand in 1970 and to \$16,270 thousand in 1971.

2. **Lease program.**—Finances the purchases of ADP equipment and software programs from manufacturers for subsequent lease to Federal agencies when a distinct economic advantage will accrue to the Government. The cost to these Federal agencies as a result of leasing equipment from the ADP fund is substantially below the cost of leasing the same equipment from the equipment manufacturers. Revenue from lease is estimated to increase from \$997 thousand in 1969 to \$3,108 thousand in 1970 and to \$5,513 thousand in 1971.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Related operating expenses are provided for under the appropriation, "Operating expenses, Federal Supply Service."

Also financed by the fund and reimbursed by using agencies are the operations of interagency motor vehicle pools and the rehabilitation and repair of furniture and equipment.

Budget program.—This estimate provides for sales to both military and civilian agencies. It also provides for the operation of a separate depot established under the retrograde program for the purpose of processing returned military materials.

1. *Supply operations.*—(a) *Stores, regular.*—Stocks of common-use commodities are purchased in volume and stored in supply depots for sale to Government agencies. From a total of \$528.4 million in 1969, sales are estimated to increase to \$538 million and \$540 million in 1970 and 1971, respectively.

(b) *Stores, direct delivery.*—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$57.4 million in 1969, and are estimated to increase to \$62 million in 1970 and 1971.

(c) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to using agencies. Sales through the fund are expected to increase from \$222 million in 1969 to \$348 million in 1970 and \$351 million in 1971.

2. *Export operations.*—Stores and nonstores items are shipped to overseas customers. Receipts to the fund covering packing, transportation costs, and other reimbursable services are expected to increase from \$35.8 million in 1969 to \$36 million in 1970 and 1971.

Equipment rental.—Operating and administrative equipment is purchased and charged on an accrual basis to the using activities. Receipts are estimated to increase from \$2 million in 1969 to \$2.3 million in 1970 and \$2.5 million in 1971.

3. *Rehabilitation and repair of furniture and equipment.*—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are expected to remain at \$0.9 million through 1971.

4. *Motor pools.*—Services are provided to agencies through a system of interagency motor pools. Sales are

estimated to increase from \$49.9 million in 1969 to \$53.2 million in 1970 and \$58 million in 1971.

Other revenue and expense.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1971 is estimated at \$411.6 million consisting of \$242.7 million direct appropriations, \$168.5 million donated assets, and \$0.6 million capitalized surplus with \$0.2 million deducted for long-term leave liability.

Any operating surplus, as determined by the General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payment to be so made in 1970 is \$4,077 thousand.

91.20	Outlays from civilian pay act supplemental.....		1,529	63

¹ Includes capital outlay as follows: 1969, \$145 thousand; 1970, \$100 thousand; 1971, \$100 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$278 thousand (1969 adjustments, -\$32 thousand); 1969, -\$541 thousand; 1970, \$541 thousand; 1971, \$541 thousand.

This appropriation provides for basic operations dealing with management of the Government's archives and records and for operation of presidential libraries.

The estimate for 1971 is \$1,087 thousand more than 1970 financing. Of this amount, \$987 thousand is required to begin restoring nontextual records whose condition has reached the critical point; and \$100 thousand to increase the staff of the Johnson Library.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1969, \$12 thousand; 1970, \$12 thousand; 1971, \$12 thousand.

In 1971 records in custody of the National Archives and Federal records centers will total 11.2 million cubic feet which will represent an estimated 41% of the total Federal records. Reference services will total 10 million, a 22-percent increase over 8.2 million in 1969.

1. *Records management and centers.*—The workload in the 13 regional records centers continues to increase, reflecting agencies demands for service. In 1971 record transfers from agencies will be held to the minimum—an estimated 600,000 cubic feet—consistent with holding down Federal expenditures. Records disposal from the records centers will be held at a 500,000 cubic foot level and reference services will continue at the current high level of 7 million annually.

In 1969 the existence and operation of Federal records centers accounted for a Government-wide cost avoidance of \$17.8 million representing the value of space and equipment released by the transfer of records to centers and the storage of agency records received in previous years more economically than agencies could have done.

The records management activity helps agencies control their paper workload, which for all of the Federal Government consists of some 8 to 10 billion pages a year. In 1969 GSA's direct assistance to agencies produced a net first-year savings of \$10.2 million including 194 thousand man-days saved or released for other duty.

General and special funds—Continued

OPERATING EXPENSES, NATIONAL ARCHIVES AND RECORDS SERVICE—Continued

Approximately 80% of the assistance was financed by appropriated funds.

2. *Archives and related services.*—In 1971 the regularly recurring workload in the National Archives will be held at the 1970 level. Additional funds are requested, however, to begin a 6-year program to restore approximately 55 million units of nontextual records whose condition has reached the critical point where further postponement of essential preservation measures will result in the irreplaceable loss of the records and the information they contain.

An increase in staff is necessary for the Johnson Library, which will be opened to the public early in 1971.

¹ Excludes prior year costs of -\$6 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$37 thousand; 1969, \$44 thousand; 1970, \$44 thousand; 1971, \$44 thousand.

This appropriation provides for improving management of transportation, communication, and public utility services in all civilian agencies, and for providing specialized services to civilian agencies in each of these fields.

1. *Transportation services.*—Guides, procedures, and educational programs for improving transportation practices and operations in civilian agencies are developed; reasonable rates are negotiated with carriers; and procurement assistance, rates, routing, and related services are supplied to executive agencies.

2. *Communication services.*—Networks are designed and engineered for a Federal communications system for general and national defense use, compatible with the National Communications System. Studies of equipment utilization, service, rates, and economic factors are made, contracts negotiated, and management and control of operations are provided. The projected program for 1971 provides for the management of the Federal Telecommunications System financed through the FT fund whose sales volume will increase from \$128.5 million in 1970 to an estimated \$143.8 million in 1971, and for increasing emphasis on the management of Government-wide communications.

3. *Motor vehicle management.*—Government-wide policies and procedures are developed to improve the overall efficiency of the operation of the Government-owned motor vehicle fleet, and to assist the various Federal agencies with motor equipment management.

4. *Public utilities services.*—Negotiations are conducted with public utilities companies on behalf of executive agencies and technical assistance is rendered in connection with regulatory proceedings. In 1971, continued emphasis will be placed on the above areas, where in 1969, savings to the Government of \$1,923 thousand accrued.

In the Transportation, Communications, and Public Utilities services, the regulatory representation function consists of (1) negotiations with carriers and utility companies concerning consumer considerations of the Government, and (2) participation in regulatory proceedings. New rate proposals are discussed with the carriers before they become effective which, it is anticipated, will minimize the number of rate proceedings in which GSA will participate during this year on behalf of the Government as a user.

This fund was authorized by Public Law 87-847, approved October 23, 1962. It finances, on a reimbursable basis, a telecommunications system for the Federal Government which is operationally compatible with military communications systems. The system provides local and long distance voice, teletype, data, facsimile, and other communications services.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from available appropriations and funds of any agency or organization for telecommunications services and facilities made available to them.

Initial capital of \$9 million was appropriated by Public Law 88-25, approved May 17, 1963. This sum may be increased by donations of supplies and equipment.

Budget program.—The estimate provides for a continued increase in volume and quality of communications services provided to executive agencies of the Government. Total sales for 1969 were \$110.7 million and are estimated at \$128.5 million in 1970 and \$143.8 million in 1971.

1. *Voice program.*—Provides for a telephonic system which will enable personnel in each Federal agency office to communicate directly on a machine-to-machine or station-to-station basis with any other agency office in the Nation. The system will provide day-to-day service as well as incorporate features which would be necessary in emergency situations. The program for 1971 contemplates a sales level of \$124.7 million, an increase of \$13.7 million over 1970, and an anticipated traffic volume of 83 million intercity calls being handled by FTS.

2. *Record program.*—Provides common unified records communications system to satisfy record communications requirements of all Federal civil agencies by providing machine-to-machine service for transmission of information by data, teletypewriter, facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. The continued development of the records program is reflected in the projected sales increase of \$1.4 million in 1971 over the \$11.5 million anticipated in 1970.

3. *Circuit procurement program.*—Provides for centralized procurement of circuits for civil agencies to obtain the benefits of multiple tariff offerings of commercial carriers, while at the same time permitting each agency to maintain operational control over its own circuits. Sales are projected at \$5.2 million in 1970 and 1971.

4. *Special programs.*—Provides for an effective communications security program for civil agencies in keeping with objectives of the U.S. communications security plan, and for a consolidated program of procurement and maintenance of equipment to implement such security plans. These programs insure that the Federal Telecommunications System will remain operational in the event any portion of the normal system is disabled or destroyed.

5. *Operating results and financial condition.*—At the end of 1970 the net investment in the fund is estimated to be \$8.7 million, composed of \$9 million appropriated, \$0.2 million donated assets capitalized, less \$0.5 million unfunded leave liability. Following the close of each fiscal year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

PROPERTY MANAGEMENT AND DISPOSAL ACTIVITIES

Federal Funds

General and special funds:

OPERATING EXPENSES, PROPERTY MANAGEMENT AND DISPOSAL SERVICE

For expenses, not otherwise provided for, necessary for carrying out the functions of the Administrator with respect to the utilization of excess property; the disposal of surplus property; the rehabilitation of personal property; the appraisal of real and personal property; the national stockpile established by the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98-98h); the supplemental stockpile established by section 104(b) of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 456, as amended by 73 Stat. 607); the national industrial reserve established by the

National Industrial Reserve Act of 1948 (50 U.S.C. 451-462); including services as authorized by 5 U.S.C. 3109, and reimbursement for security guard services, [\$29,000,000] \$32,479,000, to be derived from proceeds from transfers of excess property, disposal of surplus property, and sales of stockpile materials: *Provided*, That during the current fiscal year the General Services Administration is authorized to acquire leasehold interests in property, for periods not in excess of twenty years, for the storage, security, and maintenance of strategic, critical, and other materials in the national and supplemental stockpiles provided said leasehold interests are at nominal cost to the Government: *Provided further*, That during the current fiscal year there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with section 6 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e), may be transferred without reimbursement to the national stockpile: *Provided further*, That during the current fiscal year materials in the inventory maintained under the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061-2166), and excess materials in the national stockpile and the supplemental stockpile, the disposition of which is authorized by law, shall be available, without reimbursement, for transfer at fair market value to contractors as payment for expenses (including transportation and other accessorial expenses) of acquisition of materials, or of refining, processing, or otherwise beneficiating materials, or of rotating materials, pursuant to section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b), and of processing and refining materials pursuant to section 303(d) of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2093(d)). (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

¹ Includes capital outlay as follows: 1969, \$140 thousand; 1970, \$51 thousand; 1971, \$51 thousand. (Excludes adjustment of prior year costs of \$712 thousand.)
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$1,958 thousand (1969 adjustments, -\$519 thousand); 1969, \$1,521 thousand; 1970, \$1,521 thousand; 1971, \$1,521 thousand.

The Property Management and Disposal Service has the responsibility for: (a) acquisition, administration, and disposal of national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act; (b) custody and disposal of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act; (c) administration of government wide utilization and disposal functions of the General Services Administration with respect to excess and surplus real and personal property; (d) rehabilitation of personal property; and (e) administration of the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act.

The estimate for 1971 provides for storage, maintenance, inspection and upgrading of stockpiled materials and disposal of those stockpile materials excess to objectives, the administration of the industrial equipment reserve activities, the appraisal of real and personal property, and continuing emphasis on reuse of existing real and personal property to obviate new capital and procurement outlays, with prompt disposal of those items no longer required and the rehabilitation of personal property to extend its useful life.

1. *Property management.*—Covers the cost of acquiring, upgrading, rotating, inspecting, and maintaining materials in the national and supplemental stockpiles and administration of the national industrial equipment reserve.

a. *Strategic and critical materials.*—Strategic and critical materials amounting to approximately 40.7 million tons with a market value of \$6.3 billion were stored at 140 locations as of June 30, 1969. Distribution of depot storage costs for these materials is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Recurring costs.....	6,711	6,835	6,755
Nonrecurring costs.....	1,369	1,300	1,300
Relocation, transportation, and handling	449	600	300
Total cost or estimate.....	8,529	8,735	8,355

In addition to depot storage, this activity provides for the acquisition of new materials, upgrading, and rotation of present materials and provides inspection and stockpile management services relative to maintaining the national and supplemental stockpiles.

b. *Industrial reserve.*—Administration is also provided

by this activity of a National Industrial Equipment Reserve inventory of 9,340 tools as of June 30, 1969.

2. *Real property disposal.*—This activity provides for utilization of excess and disposal of surplus real property, including national industrial reserve properties. The estimate for 1971 provides for utilization transfers of 125 properties, sale of 280 surplus properties, and other surplus disposal (donations, etc.) totaling 235 properties. The selling price of real property and rental revenue in 1971 is estimated at \$76 million.

Physical care, handling, protection, maintenance, and repair of certain excess and surplus real properties pending disposal are also provided. In addition, this activity is responsible for the appraisal of excess and surplus real property as well as the coordination of regulations, standards, and methods governing such appraisals.

3. *Personal property disposal.*—Covers the cost of disposal of strategic stockpile and similar materials excess to objectives, and management of the Government-wide programs for the utilization, donation, rehabilitation, and sale of surplus and exchange/sale personal property.

a-c. *Personal property (other than strategic and critical materials).*—This activity embraces the property of all Government agencies, and provides for utilization of excess personal property, thereby reducing new procurement; donation of all surplus personal property for public benefit purposes; sale of surplus and exchange/sale personal property (except DOD property); and rehabilitation of personal property owned by the Government to extend its useful life. The estimate for 1971 provides for inter-agency utilization transfers and donations by GSA totaling \$1,135 million at acquisition cost, an increase of \$115 million over 1970, and proceeds from sale of surplus and exchange/sale property totaling \$14.5 million, the same level as 1970. Rehabilitation of personal property will amount to \$165 million at replacement cost, an increase of \$10 million over 1970.

d. *Strategic and critical materials disposals.*—This activity provides for the disposal of excess strategic and critical materials. Strategic and critical materials sales commitments from the national and supplemental stockpiles are estimated at \$140.7 million and \$565 million in 1970 and 1971, respectively. The estimates are based on the assumption of a continuation of present economic conditions and the passage of new disposal legislation.

4. *Program support.*—Provides program support, planning, and coordination of all activities of the Property Management and Disposal Service. This activity is responsible for data collection and economic analyses of all factors bearing on stockpile materials, such as supply, demand, consumption, prices, etc. The budgetary functions for Property Management and Disposal Service are carried out under this activity. This area serves the entire Property Management and Disposal Service in development of financial plans and operating schedules, long-range plans and programs, analysis of problem areas, and evaluation of actual program results in relation to approved plans and objectives. This activity is also responsible for internal Service operations, including personnel, property, space, etc., and also serves as the central point for internal and external reports, and development and coordination of all procedures and regulatory material.

5. *Service direction.*—General direction over all programs assigned to the Property Management and Disposal Service is provided by the Commissioner and immediate

General and special funds—Continued

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$302 thousand (1969 adjustment, -\$73 thousand); 1969, \$181 thousand; 1970 \$181 thousand; 1971, \$181 thousand.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts from disposals within each year in accordance with 40 U.S.C.A. 485(b). Also paid from such proceeds is the direct expense in connection with utilization of excess real and related personal property (68 Stat. 1051). Properties sold by auctioneers totaled six in 1969 and are estimated at 10 in 1970 and 1971. Disposal appraisals totaled 482 in 1969 and are estimated to reach 575 and 595 in 1970 and 1971, respectively.

Guarantees are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions, the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has not been necessary to date. Net earnings are retained to meet possible future loan defaults (50 U.S.C. App. 2091).

The Government's maximum contingent liability as guarantor on one loan now in effect is estimated to be \$4.9 million at the end of 1971. Retained earnings are estimated to be \$0.1 million at the end of 1971.

WILLIAM LANGER JEWEL BEARING PLANT REVOLVING FUND

Program and Financing (in thousands of dollars)

Identification code 23-30-4092-0-3-059	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Production of jewel bearings (costs—obligations) (object class 25.0)		954	1,564

90 Outlays	-25	-180	

This fund, authorized by Public Law 90-469, approved August 8, 1968, provides for the operation of the William

Langer Jewel Bearing Plant at Rolla, N. Dak. This Government-owned plant is the only facility in the continental United States capable of producing jewel bearings in quantity. The Office of Emergency Preparedness has determined that the plant is an essential part of the national mobilization base and that its continued operation as a domestic source of jewel bearings is in the interest of the United States.

All jewel bearings required for the national stockpile are produced in this plant. Under the requirements of both the Armed Services Procurement Regulations and Federal Procurement Regulations, Government contractors are required to procure and use jewel bearings manufactured at the Langer Jewel Bearing Plant under certain specified conditions.

It is anticipated that this revolving fund will be activated January 1, 1970. There are authorized to be appropriated to this fund any additional sums which may be required for operation of the plant. However, the requirement for appropriated capital is not anticipated at this time.

90 Outlays.....	-98	-159	-159

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1971 the servicing of leases and conditional sales agreements covering two facilities, and one other miscellaneous asset. Financial and legal servicing will also be required on one case in the hands of the Department of Justice under the complex food subsidy program. In 1971 administrative expenses in connection with financial and legal services will be absorbed in funds available from regular GSA programs.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

¹ Excludes prior year adjustments of \$2 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$86 thousand (1969 adjustments, \$5 thousand); 1969, \$96 thousand; 1970, \$96 thousand; 1971, \$96 thousand.

This management fund provides financing of administrative operations services on a centralized and integrated basis for all General Services Administration programs.

1. *Administration.*—Consisting of accounting and reporting, credit, insurance, and related financial services, budget, personnel administration, management systems, and office services. Overall management of GSA's centralized field duplicating services is provided under this head; however, financing of these services is reflected in the Working capital fund.

2. *Audits and compliance.*—Provides management with an independent and objective review and appraisal of all GSA programs through the medium of contract and internal audits, and investigations.

3. *Equal employment opportunity.*—Development, implementation, and surveillance of an effective GSA equal employment opportunity program.

4. *Legal services.*—In the fields of real property, personal property, archives and records, transportation and communications, strategic and critical materials stockpiling, and finance and administration.

Estimated amounts available for 1971 from the various sources and comparable data for 1969 and 1970 are (in thousands of dollars):

Central blueprinting, photostating, duplicating, and distribution services are financed by a working capital fund pending reimbursements (40 U.S.C. 293). The Joint Committee on Printing, U.S. Congress, has authorized GSA to establish and operate one departmental printing plant in Washington, D.C., and 13 field printing plants to meet the needs of GSA and other Federal agencies. In addition, GSA operated 11 duplicating plants at the end of 1969.

GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may be so transferred, with the approval of the Bureau of the Budget.

Appropriations to the General Services Administration under the heading "Construction, Public Buildings Projects" shall be available, subject to the provisions of the Public Buildings Act of 1959 for (1) acquisition of buildings and sites thereof by purchase, condemnation, or otherwise, including prepayment of purchase contracts, (2) extension or conversion of Government-owned buildings, and (3) construction of new buildings, in addition to those set forth

under that appropriation: *Provided*, That nothing herein shall authorize an expenditure of funds for acquisition, extension or conversion, or construction without the approval of the Committees on Appropriations of the Senate and House of Representatives.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be increased thereby more than 2 per centum: *Provided*, That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of \$2,000,000.

Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for (a) reimbursement to the General Services Administration for those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 479) or other applicable law, and (b) transfer or reimbursement to applicable appropriations to said Administration for rents and related expenses, not otherwise provided for, of providing subject to Executive Order 11035, dated July 9, 1962, directly or indirectly, suitable general purpose space for any such department or agency, in the District of Columbia or elsewhere.

No part of any appropriation contained in this Act shall be used for the payment of rental on lease agreements for the accommodation of Federal agencies in buildings and improvements which are to be erected by the lessor for such agencies at an estimated cost of construction in excess of \$200,000 or for the payment of the salary of any person who executes such a lease agreement: *Provided*, That the foregoing proviso shall not be applicable to projects for which a prospectus for the lease construction of space has been submitted to the Congress and approval made in the same manner as for the public buildings construction projects pursuant to the Public Buildings Act of 1959. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Funds

General and special funds:

RESEARCH AND DEVELOPMENT

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, and alteration of real and personal property;

and purchase, hire, maintenance, and operation of other than administrative aircraft necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration, **[\$3,006,000,000]** \$2,606,100,000, to remain available until expended. (42 U.S.C. 2451, et seq., 50 U.S.C. 511-515; Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970; additional authorizing legislation to be proposed.)

² Reimbursements from non-Federal sources are receipts for services performed on Communications Satellite Corporation projects (42 U.S.C. 2473).

The National Aeronautics and Space Administration was established October 1, 1958, pursuant to Public Law 85-568 (72 Stat. 426; 42 U.S.C. 2451), approved July 29, 1958, for the conduct of the nonmilitary space programs of the United States, including the exploration of space and its utilization for peaceful purposes, and to conduct and support advanced research and development related to space and aeronautics in support of both civil and military requirements. This appropriation provides for research and development activities of the National Aeronautics and Space Administration as follows:

1. *Manned space flight.*—These estimates provide for all manned space flight missions conducted by the United States. Funding supports the Apollo, Apollo applications, space shuttle and space station, and advanced manned mission programs. These programs include completion of currently approved Saturn V launch vehicles, Apollo Command and Service Modules, and Lunar Modules; the development of the Saturn V Workshop; the development of lunar science and earth orbital science, applications, and technology experiments; the definition and design of a manned reusable earth to orbit space vehicle and a semi-permanent earth orbit space station; launch and flight operations; and studies and research on future manned space systems.

(a) *Apollo.*—The Apollo program conducted five manned Apollo/Saturn V flights in the past year. On Christmas Eve, 1968, the crew of Apollo 8 performed the first manned lunar orbital mission. In March 1969, the Lunar Module was flight qualified in earth orbit on Apollo 9. Apollo 10 conducted the separate flights of the Command and Service Modules and the Lunar Module in lunar orbit, and the rendezvous and docking of the two spacecraft. Apollo 11 was one of the great events in the entire history of man as astronauts Armstrong and Aldrin walked on the

surface of the moon on July 20, 1969, retrieved surface samples, emplaced scientific instruments, and departed the lunar surface for rendezvous with astronaut Collins in the Command and Service Module for safe return to earth. Apollo 12, in November 1969, landed in the Ocean of Storms, demonstrating the ability to land at a pre-determined location, and conducted detailed scientific exploration of the moon. The crew deployed scientific instruments; made lengthy traverses of the lunar surface; retrieved surface samples; and removed selected parts of the unmanned Surveyor spacecraft, which had landed on the lunar surface 30 months earlier.

These missions have provided the initial basis for an understanding of the moon and its relationship to the earth and the solar system. The moon affords an unequalled opportunity to study the formative processes of the solar system, without the obliterating consequences of terrestrial erosion. Data from this source will provide a better understanding of the evolutionary history of earth and the dynamic processes that continue to transform it. Additional lunar missions are planned in a continuing effort to increase our knowledge of the moon through its exploration and the conduct of scientific experiments.

The production of Apollo spacecraft and Saturn V launch vehicles will be suspended upon completion of the hardware procured for the Apollo program.

(b) *Apollo applications program.*—The Apollo Applications effort commences manned earth orbital missions directed toward accomplishing life science, astronomy, applications, and technology objectives. It will begin with a launching of the Saturn V Workshop in late 1972 with its experiment systems followed by manned missions to the Workshop for nearly a year using Saturn IB's to launch Apollo Command and Service Modules.

(c) *Space shuttle and space station.*—The space shuttle and space station are the key elements in future space operations. The space shuttle will provide a low-cost reusable space vehicle for transporting men, supplies, and satellites to and from earth orbit. Definition, design, and advanced technology studies in critical areas will continue in 1971, with emphasis on the airframe, avionics, and the liquid hydrogen/oxygen engine. The space station will be capable of long duration operations to conduct scientific, applications, and technology experiments. The 1971 effort will focus on the design of the basic module and experiments for the space station and the conclusion of initial definition studies started in 1970.

(d) *Advanced manned mission studies.*—This program examines advanced manned space flight program concepts and develops technical information and other data upon which future program decisions can be based.

2. *Scientific investigations in space.*—The objective of this activity is to increase our knowledge of the earth, interplanetary space, the moon, the sun, the solar system, other stars and galaxies, and the effects of the space environment on living organisms. The flight systems used are sounding rocket probes, orbiting spacecraft, and spacecraft designed for planetary and interplanetary missions.

(a) *Physics and astronomy.*—This program is directed toward the increase of our knowledge of the space environment of the earth and the sun; the sun's relationship to the earth's environment and to interplanetary space, stars, and nebulae. It is a coordinated research program with national and international participation. A variety of tools are used in this research including automated observatories, interplanetary spacecraft, explorers, sounding rockets, balloons, aircraft, ground based observatories, laboratory and theoretical research.

(b) *Lunar and planetary exploration.*—This program is directed toward increasing our knowledge of the moon, the planets, and other bodies in the solar system through ground based research and by direct observations from automated spacecraft. An orderly program of exploration of another celestial body includes fly-bys, orbiters, and landing missions. We have completed the first stages of such a program for the moon with the Ranger, Lunar Orbiter, and Surveyor missions. Exploration of Mars has so far been conducted by the Mariner IV, VI, and VII fly-by missions. Orbiter missions will be flown using Mariner spacecraft in 1971. In 1975, combined orbiter-lander missions will be flown by the Viking project. These spacecraft will continue the photographic, spectrographic, and radiometric observations of the planet's surface and atmosphere from orbit, and will make the first direct measurements of the atmosphere and surface features from landing vehicles. Exploration of Jupiter will begin with Pioneer fly-by spacecraft to be launched in 1972 and 1973. In addition to making visual observations of the planet's features, the spacecraft will measure magnetic and radiation fields in the vicinity of Jupiter and in interplanetary space. The exploration of Venus will be continued and the exploration of Mercury begun by a single Mariner spacecraft to be launched in 1973 to fly by both planets. Lunar exploration effort will be devoted to continuing laboratory investigation, theoretical and planning studies to increase our scientific knowledge of the moon, and to improve experiments on future lunar missions.

(c) *Bioscience.*—This program will continue to investigate the origin, nature, and distribution of life in the universe. These investigations will be based on analysis of data from the biosatellite spacecraft, and from planetary missions and manned flights.

(d) *Launch vehicle development and support.*—This program includes those launch vehicle activities which

are not specifically chargeable to spacecraft missions such as range support, launch operations, and maintenance engineering necessary to sustain and improve the performance of existing vehicles.

3. *Space applications.*—The objective of this activity is to achieve and expand the beneficial applications of space flights in the fields of meteorology, earth resources, geodesy, communication, and navigation. Specific objectives are to improve satellite instrumentation and data handling technology; to provide data for atmospheric, earth resources, and geodetic research; to participate in design and development of operational satellite systems as required; and to study advanced satellite systems.

The earth resources survey program will continue to develop the technology for surveying the earth's resources from space. The major areas of interest are: agriculture/forestry, geology/mineralogy, hydrology/oceanography, and geography/cartography. In 1971, work on an Earth Resources Technology Satellite for experimental application of the technology developed in the earth resources survey program will continue. Flight experiments and activities will also be carried out with the Tiros, Nimbus, Applications Technology and Geodetic Satellites, on an experimental synchronous meteorological satellite, and on meteorological sounding rockets.

4. *Space technology.*—This activity is comprised of research and development effort relating to space vehicle systems and operations, and associated equipment and components for space missions. Emphasis is placed on space vehicle structures, auxiliary power systems, propulsion systems, and life support technology, with particular emphasis on their application to the development of a space shuttle and space station. The program includes continuation of development of a flight type NERVA I nuclear rocket engine having a thrust of about 75,000 pounds to provide basic propulsion capability for future high energy, high payload missions; including a reusable orbit-to-orbit transfer vehicle. The improvement of electronic systems for control, data acquisition, and communications will be continued. Much of the foregoing effort as well as other basic research is carried out in laboratories and special ground based test facilities located at the various NASA centers.

5. *Aviation technology.*—The objective of this activity is to extend the national capability in aeronautics in cooperation with other Government agencies having aeronautical interests and responsibilities such as the Departments of Defense and Transportation. Aviation research will continue in V/STOL, subsonic, supersonic, and hypersonic technology in support of civil and military aircraft development. Continued emphasis will be placed on research in noise reduction and alleviation, and greater effort will be applied to V/STOL aircraft.

6. *Supporting activities.*—The programs grouped in this activity provide general support for the attainment of NASA mission objectives.

(a) *Tracking and data acquisition.*—Operation and equipment of the stations of the NASA tracking and data acquisition networks are provided for here, as well as research and development to increase the capability of the specialized ground equipment.

(b) *Sustaining university program.*—This program has included training grants awarded for graduate studies in specialized interdisciplinary space-related fields, and multidisciplinary research grants. No funds are requested for 1971.

(c) *Technology utilization.*—The objective of this program is to accelerate the transfer of new advances in technology generated by NASA and NASA contractors into the economy.

				66,116

This appropriation provides for contractual services for the design, major rehabilitation, and modification of facilities; the construction of new facilities; the purchase of related equipment and advanced design related to facilities planned for future authorization. The principal projects in the 1971 program are described below:

1. *Manned space flight.*—This activity includes funding for construction of launch support facilities at the John F. Kennedy Space Center, NASA, Kennedy Space Center, Fla.; a calibration laboratory at the Manned Spacecraft Center, Houston, Tex.; and a multispectral photographic laboratory at the Marshall Space Flight Center, Huntsville, Ala.

2. *Scientific investigations in space.*—The estimates for this activity provide for modifications to a solar simulator at the Jet Propulsion Laboratory, Pasadena, Calif.

3. *Space applications.*—Funds for this activity will provide for an earth resources technology laboratory at the Goddard Space Flight Center, Greenbelt, Md.; and alterations to a space launch complex at the Western Test Range, Vandenberg Air Force Base, Calif.

4. *Space technology.*—The estimate for this activity will provide for a polymer research laboratory at the Ames Research Center, Moffett Field, Calif.; an isotope thermoelectric systems application laboratory at the Jet Propulsion Laboratory; and an engine/stage test stand at the Nuclear Rocket Development Station, Jackass Flats, Nev.

5. *Aviation technology.*—No 1971 projects.

6. *Supporting activities.*—This activity includes funds for facility planning and design; for an addition to the powerplant at the Goldstone Complex, Fort Irwin, Calif.; for the relocation of a transportable tracking station; and for essential rehabilitation of and modifications to facilities at NASA installations and at plants operated by contractors for NASA.

RESEARCH AND PROGRAM MANAGEMENT

For necessary expenses of research in Government laboratories, management of programs and other activities of the National Aeronautics and Space Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); minor construction; awards; purchase of not to exceed one and hire, maintenance and operation of administrative aircraft; purchase (not to exceed [thirty-five] thirty-nine for replacement only) and hire of passenger motor vehicles; and maintenance, repair, and alteration of real and personal property; [\$637,400,000] \$692,300,000: Provided, That contracts may be entered into under this appropriation for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year. (42 U.S.C. 2451, et seq., 50 U.S.C. 511-515; Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970; additional authorizing legislation to be proposed.)

² Reimbursements from non-Federal sources are receipts for services performed on Communications Satellite Corporation projects (42 U.S.C. 2473) and for personal property sold for replacement purposes (40 U.S.C. 481).

This appropriation provides for expenses of research in Government laboratories, management of programs, and other expenses for the operation of NASA installations.

Responsibility for the manned space flight activity is located at the John F. Kennedy Space Center, NASA, Kennedy Space Center, Fla.; Manned Spacecraft Center, Houston, Tex.; and Marshall Space Flight Center, Huntsville, Ala. The scientific investigations in space and space applications activities are concentrated principally at the Ames Research Center, Moffett Field, Calif.; Goddard Space Flight Center, Greenbelt Md.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; Manned Spacecraft Center, Houston, Tex.; and the Wallops Station, Wallops Island, Va. The space technology activity is conducted at all major NASA installations.

Other locations to which portions of the above activities are assigned include: Flight Research Center, Edwards, Calif.; and the Space Nuclear Propulsion Office, Germantown, Md.

Aviation technology work is carried out at the Ames, Flight, Langley, and Lewis Research Centers.

Programwide support and management are provided by NASA Headquarters, Washington, D.C. Support activities for tracking and data acquisition requirements are performed at the Goddard Space Flight Center and Wallops Station.

In 1971 the Electronics Research Center, Cambridge, Mass., will be closed.

The following table reflects the distribution of the direct obligations by installation:

International cooperation.—U.S. dollars are advanced from foreign governments to allow the National Aeronautics and Space Administration to procure, in the United States, nonmilitary space-oriented materials and services on their behalf. Authority for this action is granted by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.).

GENERAL PROVISIONS

Not to exceed 5 per centum of any appropriation made available to the National Aeronautics and Space Administration by this Act may be transferred to any other such appropriation.

Not to exceed \$35,000 of the appropriation "Research and Program Management" in this Act for the National Aeronautics and Space Administration shall be available for scientific consultations or extraordinary expense, to be expended upon the approval or authority of the Administrator and his determination shall be final and conclusive. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

VETERANS ADMINISTRATION

¹ Selected resources as of June 30 are as follows: Accounts receivable (benefit overpayments collectible from beneficiaries): 1968, \$26,723 thousand; 1969, \$25,184 thousand; 1970, \$25,184 thousand; 1971, \$25,184 thousand.

This appropriation provides for the payment of compensation, pensions and related benefits to veterans and their dependents. In June 1969 there were an estimated 23.8 million living war veterans of which 3.2 million, or 13.4% were receiving benefits. In addition, 2.2 million dependents of deceased veterans were receiving benefits.

Significant increases in cost were experienced during 1969. This was attributable, in part, to legislative amendments effective the last half of the fiscal year, which increased the rates of payment for both compensation and pension. In addition, other factors contributing to the increasing cost: (a) the average degree of disability increased noticeably more in 1969 than anticipated, particularly among veterans of World War II and Korean conflict who as a group are showing a worsening in degree of service-connected disability ostensibly due to advancing age; (b) veterans of the Vietnam era are coming on the compensation rolls faster than initially estimated and at an average degree of disability considerably greater than the veterans of prior wars currently on the rolls; (c) an increase has occurred in the number of beneficiaries receiving survivors compensation and who are being paid at a higher average rate than initially estimated; (d) the average payment for disability pension has increased significantly due to the movement of pension cases into the lower income categories thereby drawing higher pension rates and a greater number of pension cases being paid the higher aid and attendance and housebound rates; and (e) the unanticipated effect of "old law" veteran and survivor pensioners electing Public Law 90-275 rates.

The same factors which caused the increases in 1969 have been projected into 1970 thereby causing an increase

General and special funds—Continued

COMPENSATION AND PENSIONS—Continued

of \$237,045 thousand in budget authority. In addition, Public Law 91-96 enacted October 27, 1969, increased certain dependency and indemnity compensation rates on December 1, 1969, and will add \$36,000 thousand to budget authority requirements for 1970 and \$62,000 thousand in 1971. Consequently, a supplemental appropriation amounting to \$273,045 thousand is required in 1970 as shown under Proposed for separate transmittal, existing legislation, to meet the increased cost of uncontrollable caseloads and higher average payments and the new legislation. In 1970, costs of \$1,000 thousand, and in 1971 net savings of \$104,000 thousand are anticipated, as shown under Proposed for separate transmittal, proposed legislation.

1. *Compensation.*—Compensation is payable to living veterans who have suffered impairment of earning power from service-connected disabilities. Death compensation or dependency and indemnity compensation is payable to the widow and dependents of veterans whose deaths are related to service-connected disabilities.

The increasing trend in veterans average caseload for 1970 and 1971 is due basically to the continuing growth of the Vietnam era caseload which more than offsets the declining caseload trends of the earlier war periods. The increase in average payments experienced in 1969, was not only attributable to the increased rates provided by Public Law 90-493, but was also due to the substantially higher average degree of disability occurring in World War II and Korean conflict categories, ostensibly due to the advancing age of these veterans.

The increase to the average survivors caseload in 1970 and 1971 is largely due to the growth of the Vietnam era roll where the extra hazards of military service created by the Southeast Asian crisis is a factor. Increases in the average payment for 1970 and 1971 are anticipated because of the increasing proportion of cases receiving the higher dependency and indemnity compensation rates over those receiving the "old" death compensation rates. This is accentuated somewhat in 1970 because of previously authorized increases in military pay which indirectly causes higher monthly payments to widows receiving dependency and indemnity compensation. In addition, Public Law 91-96 restructured the dependency and indemnity compensation rates payable to such widows, and their eligible children, effective December 1, 1969, and also provided an additional allowance for those service-connected widows needing the regular aid and attendance of another person. This further increases the average payment in each of the budget years.

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death.

A slight decrease in average veterans caseload is projected for 1970 and 1971 because of the continuing caseload decline in the earlier war period categories where the age and mortality rates are the main factors. These decreases more than offset the estimated rise in the World War II, Korean conflict and Vietnam era categories, as well as the increases in cases attributable to the higher income limitations provided by Public Law 90-275. Projected increases in annual average payments for 1970 and 1971 are attributable, in part, to the full-year effect of rate increases authorized to most pensioners by Public Law 90-275. However, substantial increases to the normal average payment caused by "old law" elections of Public Law 90-275 rates and increasing numbers drawing the additional benefits allowed for aid and attendance, and housebound conditions, also contribute to the higher average payment in 1970 and 1971.

Based on trends experienced in recent years, a continuing increase in survivors' caseload is projected for 1970 and 1971. In addition, higher income limitations established by Public Law 90-275, will add some new cases. The increase in the average payment projected during 1970 and 1971 is partly attributable to the full year effect of the higher rates provided by Public Law 90-275. In addition, significant increases in the normal payments occurred in 1969, and are extended through 1971, due to "election" activity as well as increasing numbers of the older widows earning entitlement to the added benefit authorized for aid and attendance where needed. The recently enacted increases in social security benefits will not become effective for pension cases on the rolls until January 1, 1971. On that date such increases will be countable as income for pension purposes and certain downward adjustments in veteran and survivor caseloads, average payments and total costs are reflected in fiscal year 1971.

3. *Other.*—These miscellaneous benefits cover payments which are not readily combined with any one of the preceding compensation or pension categories.

(a) *Retired officers.*—Emergency officers of World War I and certain officers of the Regular Establishment who have retired because of service-connected disability are entitled to special benefits. The average caseload is declining steadily (as these officers age) from an actual of 730 in 1969 to an estimated 610 in 1971. The annual average payment in 1969 was \$2,738. An average of \$2,796 is projected for 1970, and \$2,808 in 1971, with total requirements approximating \$1,873 thousand in 1970 and \$1,713 thousand in 1971.

(b) *Adjusted service and dependents pay.*—Claims made pursuant to the provisions of the World War Adjusted Compensation Act of 1924, as amended, are payable from this appropriation. If the amount of adjusted service credit was more than \$50 the veterans were entitled to receive adjusted service certificates. The payment of adjusted service certificates was heretofore made from an adjusted service certificate fund. Activities of this fund were transferred in 1966 to this appropriation.

During 1969, costs of the combined activity were \$34,426. It is anticipated that costs will approximate \$31 thousand in 1970 and \$26 thousand in 1971.

(c) *Subsistence allowance.*—Payments are made to disabled veterans enrolled in vocational rehabilitation and education programs. These costs are expected to increase somewhat in 1970 and 1971 reflecting Vietnam era activities as well as additional part-time trainees authorized by Public Law 90-431.

	1969 actual	1970 estimate	1971 estimate
Total costs.....	\$20,042,538	\$25,960,000	\$31,160,000
Annual average payment.....	\$2,189	\$2,200	\$2,200
Average caseload.....	9,156	11,800	12,300

(d) *Burial benefits.*—The Administrator is currently authorized to (1) pay an allowance of \$250 (plus transportation charges where death occurs under VA care) to cover the burial and funeral expenses of a deceased veteran and (2) furnish a flag to drape the casket of each deceased veteran entitled thereto. The increase in costs is mainly related to the estimated increase in veterans deaths.

	1969 actual	1970 estimate	1971 estimate
Total costs.....	\$68,599,942	\$73,925,000	\$78,073,000
Burial allowances:			
Cost.....	\$66,949,862	\$72,050,000	\$75,980,000
Average payment.....	\$254.78	\$262.00	\$262.00
Number.....	262,772	275,000	290,000
Burial flags:			
Cost.....	\$1,650,080	\$1,875,000	\$2,093,000
Average payment.....	\$7.10	\$7.50	\$7.75
Number.....	232,309	250,000	270,000

(e) *Special allowances, dependents.*—Under certain conditions, a special allowance (38 U.S.C. 412) is payable to dependents of certain veterans who died after December 31, 1956, but who were not fully and currently insured under the Social Security Act. Projected increases assume that the current strengths and death rates for the Armed Forces will be maintained through 1971. An average of 478 cases were paid \$477,138 in 1969; 550 cases costing \$561 thousand are estimated for 1970; and 620 cases costing \$640 thousand are estimated for 1971.

(f) *Invalid lifts and other devices.*—The Administrator may furnish an invalid lift to veterans in receipt of pension under 38 U.S.C. 617 based on the need of regular aid and attendance. The rise in costs to \$783,728 in 1969 is attributable to Public Law 90-77, which authorized the award of devices and equipment to include most aid and attendance cases in need. It is estimated such costs will rise to approximately \$1,240 thousand in 1970 and \$1,540 thousand in 1971.

(g) *Tort claim settlements.*—Payment of compromises or settlement under 38 U.S.C. 351 resulting from litigation under the Federal Tort Claims Act are made from this appropriation.

During 1969 nine compromise payments were made at a cost of \$90,950. Compromise payments for 1970 and 1971 are estimated at \$200 thousand for each year.

(h) *Death gratuities.*—Public Law 89-214, approved September 29, 1965, authorized a death gratuity of not to exceed \$5 thousand for payment to the eligible beneficiary of a veteran whose death occurred during the period from January 1, 1957, through September 28, 1965, and was attributed to certain hazards of service. Actual costs in 1969 were \$69,765. Any future activity in this program should be negligible as the last date for making application was November 1, 1967.

74 Obligated balance, end of year		-16,900	
90 Outlays		256,145	16,900

A supplemental appropriation of \$273,045 thousand is required to cover unforeseen increases in caseloads and higher payments which manifested themselves in 1969 after the 1970 budget request was submitted to Congress, as well as the costs of legislation enacted subsequent to such submission. Requirements by major category are as follows (in thousands of dollars):

1. Compensation:

- (a) Veterans.—Significant increases in the average payment due to higher degrees of average disability, together with greater than expected increases in the Vietnam caseload
- (b) Survivors.—Greater than anticipated increases in the average payment caused by high proportion receiving greater DIC benefits and slightly higher increase in Vietnam caseload than expected, costing \$26,517 thousand and Public Law 91-96 approved October 27, 1969, and effective December 1, 1969, restructured rates payable to widows receiving dependency and indemnity compensation and for their eligible children; also provided a special allowance for widows in need of regular aid and attendance of another person, costing \$36,000 thousand. Total estimated requirements

2. Pensions:

- (a) Veterans.—Significantly greater-than-expected increases in average payment caused by unanticipated elections of "new law" rates by "protected" pensioners, as well as substantially greater numbers becoming entitled to the higher benefits associated with age and related physical infirmities, more than offsets a rather significant decline in caseload caused by fewer new cases than expected due to increase in income limitations (Public Law 90-275)
- (b) Survivors.—Greater-than-expected increases in average payment caused by unanticipated elections of "new law" rates by "protected" pensioners as well as unanticipated sizable proportion of widows becoming entitled to additional benefits provided for aid and attendance, more than offsets the downward adjustment in caseload increase caused by fewer new cases than expected due to raise in income limitation (Public Law 90-275)
- Total supplemental requirements

READJUSTMENT BENEFITS

For the payment of readjustment and rehabilitation benefits to or on behalf of veterans as authorized by law (38 U.S.C. chapters 21, 31 (except section 1504), and 33-39), [\$742,200,000] \$1,079,000,000, to remain available until expended. (38 U.S.C. 3021; Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.)

90 Outlays	681,144	770,600	1,071,700

¹ Selected resources as of June 30 are as follows: Accounts receivable (benefit overpayments collectible from beneficiaries) 1968, \$3,763 thousand (1969 adjustments, \$29 thousand); 1969, \$7,747 thousand; 1970, \$7,747 thousand; 1971, \$7,747 thousand.

This appropriation provides education and training assistance to veterans of post-Korean military service; educational assistance allowances for eligible dependents of deceased and disabled veterans; and special assistance to disabled veterans in the form of vocational rehabilitation, housing grants, and automobiles or other conveyances.

1. *Education and training.*—Post-Korean conflict veterans whose education plans were interrupted or impeded by active service in the Armed Forces since February 1, 1955, are provided an educational assistance allowance under the provisions of the Veterans Readjustment Benefit Act of 1966, as amended.

The number of veterans and servicemen who will seek educational assistance is mainly related to the size of the Armed Forces and the yearly rate of discharge. The extent of participation of post-Korean conflict veterans who will further their education or job training continues to increase. There were 238,094 more trainees in 1969 than in 1968. For 1971, it is estimated that 1,472,000 veterans will avail themselves of educational opportunities or on-the-job training. This is an increase of 147,000 over the 1,325,000 projected for 1970, and almost 547,000 over the number (925,013) who trained in 1969.

Costs of \$990 million are estimated for 1971. This is an increase of \$98 million over the estimated cost of \$892 million for 1970.

Prior to the enactment of Public Law 90-631, only the sons and daughters of veterans were eligible for educational assistance. Wives and widows who are eligible are now entitled to educational assistance.

Estimated costs of \$42 million in 1971 will provide educational opportunities to 46,600 sons and daughters. This is an increase of 3,331 over the 43,269 individuals trained during 1969, at a cost of \$39 million, and 900 over the 45,700 expected to train during 1970, at a cost of \$41 million. The relatively smaller increase in trainees for 1971 over 1970 indicates a near-balance between the number becoming eligible and the number going off the rolls as their entitlement is exhausted.

After the passage of Public Law 90-631, which extended educational assistance to eligible wives and widows, educational opportunities became available in 1969 to 2,819 trainees at a cost of over \$1 million. Since this is a new program it is anticipated that more wives and widows will seek training assistance in 1970 and 1971. Costs of \$21 million, estimated for 1971, will provide training opportunities for an estimated 21,000 wives and widows. This is an increase of 6,500 trainees and \$9 million over the 14,500 estimated for 1970, at a cost of \$12 million.

NUMBER OF TRAINEES AND COSTS

	1969 actual	1970 estimate	1971 estimate
Post-Korean conflict veterans:			
Number of trainees.....	925,013	1,325,000	1,472,000
Average cost per trainee.....	\$673	\$673	\$673
Total cost (in thousands).....	\$622,352	\$891,665	\$990,415
Sons and daughters:			
Number of trainees.....	43,269	45,700	46,600
Average cost per trainee.....	\$917	\$909	\$903

Average cost per trainee.....	\$398	\$800	\$1,000
Total cost (in thousands).....	\$1,123	\$11,600	\$21,000

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive assistance to cover costs of tuition, books, supplies, and equipment. An increase in the number of trainees is projected for both 1970 and 1971, and is basically related to the casualties associated with the Southeast Asian crisis. The increase also recognizes recent legislation authorizing part-time rehabilitative training and the continued buildup of trainees from the seriously disabled of World War II and the Korean conflict.

Grants are provided for specially adapted housing to veterans having suffered the loss of both feet, to certain blind veterans, and to paraplegic veterans. Public Law 91-22 liberalized the eligibility requirements and increased the maximum amount of such grant to \$12,500.

This new legislation will cause a temporary increase in the number of grants in 1970.

Allowances up to \$1,600 are made to certain disabled veterans toward the purchase of automobiles or other conveyances. Activity since Public Law 90-77, which authorized this benefit to veterans not previously entitled, has remained high. A nominal increase is projected in both 1970 and 1971.

1. *Military and naval insurance.*—Payments are made to the U.S. Government life insurance fund as a reimbursement for claims: (1) traceable to extra hazards of military service, and (2) for claims while insured was under premium waiver provisions in active military service. Payments are made also to policyholders and beneficiaries for claims on war-risk insurance issued to servicemen and veterans of World War I.

2. *National service life insurance.*—This appropriation pays certain expenses of the National service life insurance fund and receives premiums and pays claims on non-participating insurance policies issued to certain disabled veterans of World War II. Premium receipts are appropriated under 38 U.S.C. 719(b).

(a) *Payment to National service life insurance fund.*—(1) For each death claim traceable to extra hazards of service, an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund.

(2) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for National service life insurance. Under a court ruling in 1964 gratuitous insurance payments are made to illegitimate children previously denied recognition.

(3) The fund is reimbursed when recovery of erroneous payments or overpayments is waived.

(4) The fund is reimbursed for death claims of policies under waiver of premiums while the insured is on active military duty.

(b) *Direct payments to policyholders and beneficiaries.*—(1) Claims are paid on nonparticipating National service life insurance policies issued to World War II veterans with service-connected disabilities.

(2) Claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty.

(3) Claims are paid on death which occurred after application, but before effective date of a National service life insurance policy.

(4) Claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

(5) Payments are made to policyholders who terminate their insurance for the cash value of their policies and to policyholders who have matured endowments.

(6) The general decline in the policies in force is indicated in the following table:

	June 30, 1968 actual	June 30, 1969 actual	June 30, 1970 estimate	June 30, 1971 estimate
Number of policies.....	5,699	5,525	5,350	5,175
Amount of insurance....	\$31,131,866	\$30,346,572	\$29,385,357	\$28,424,153

3. *Service-disabled veterans insurance fund.*—Payments are made to the Service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities, but who were otherwise insurable. The increase in payments to the fund in 1970 and 1971 is due to an increase in death claims payments to beneficiaries and an increase in policy loans to the policyholders each year.

Financing.—It is planned to transfer \$6.5 million in 1970 and \$7 million in 1971 of surplus retained earnings from the Veterans special term insurance fund to this account.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$33,446 thousand (1969 adjustments, -\$294 thousand); 1969, \$39,681 thousand; 1970, \$39,681 thousand; 1971, \$39,681 thousand.

This appropriation provides for the cost of care and treatment of eligible beneficiaries in Veterans Administration hospital, domiciliary and nursing care beds, restoration centers, outpatient clinics, contract care facilities, and State homes.

General and special funds—Continued

MEDICAL CARE—Continued

To be eligible for inpatient care and treatment, a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or, within the limits of Veterans Administration facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital, nursing home, or domiciliary care. Outpatient medical and dental treatment is provided to veterans with service-connected disabilities by staffs of Veterans Administration outpatient clinics and by physicians and dentists participating in the hometown medical care program; to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training; pensioners of nations allied with the United States in World War I and in World War II; and veterans of the Spanish-American War, Indian Wars, Boxer Rebellion, and Philippine Insurrection; in addition, Public Law 91-102 authorizes complete outpatient services for a non-service-connected disability to any war veteran who has a permanent total disability resulting from a service-connected disability, and Public Law 91-101 eliminates the 6-month limitation on the furnishing of nursing home care in the case of veterans with service-connected disabilities; veterans also are provided examinations in outpatient clinics for purposes of rating for compensation and pension, insurance, and determining their need for hospitalization or domiciliary care.

Medical services may be furnished on an outpatient basis for non-service-connected disabilities to veterans who have been determined to need hospital care and whose admission to a hospital has been scheduled, or who require post-hospital treatment to complete hospital care.

Increases in 1971 cover (a) legislated wage and salary increases and other payroll adjustments; (b) full activation of the new hospitals located at Gainesville, Fla., and Miami, Fla., and the continued activation of the new hospital at San Juan, P.R.; (c) expansion of the education and training program; (d) the extension of specialized medical services approved in the prior fiscal year; (e) the establishment of additional specialized medical services; (f) increased outpatient medical and dental workloads resulting from the Vietnam conflict; (g) increased usage of drugs, utilities, communications, linens, prosthetic appliances; (h) increased reimbursements to the Department of Data Management for data processing services, and to the Department of Labor for employees compensation payments; and (i) increased equipment and maintenance and repairs including minor improvements.

1. Maintenance and operation of VA facilities.—

(a) *Neuropsychiatric hospitals.*—This covers the operation of neuropsychiatric hospitals. The estimated costs for 1971 are below 1970 costs by \$1,119 thousand. Estimated operating levels are:

	1969 actual	1970 estimate	1971 estimate
Average number of operating beds.....	44,643	40,056	36,680
Average daily patient census.....	38,909	36,050	33,012
Average employment (net, including consultants).....	33,723	33,397	32,633

(b) *General hospitals.*—This covers the operation of general hospitals. The estimated costs for 1971 exceed 1970 by \$32,010 thousand. Estimated operating levels are:

	1969 actual	1970 estimate	1971 estimate
Average number of operating beds.....	62,370	60,059	58,581
Average daily patient census.....	52,969	51,050	49,794
Average employment (net, including consultants).....	77,427	76,986	78,068

(c) *Nursing home care.*—This covers the operation of nursing care beds in Veterans Administration facilities. The increase in the estimated cost over 1970 is \$8,470 thousand.

	1969 actual	1970 estimate	1971 estimate
Average number of operating beds.....	4,000	4,000	5,155
Average daily nursing patient census....	3,700	3,820	4,889
Average employment (net, including consultants).....	2,373	2,830	3,643

(d) *Domiciliary care.*—This covers the cost of domiciliary care of veterans in Veterans Administration facilities. The increase in the estimated cost over 1970 is \$807 thousand.

	1969 actual	1970 estimate	1971 estimate
Average number of operating beds.....	13,523	12,632	12,632
Average daily member census.....	12,412	12,000	12,000
Average employment (net, including consultants).....	3,146	3,102	3,102

(e) *Restoration centers.*—This covers the cost of restoration care of veterans in Veterans Administration facilities. The increase in the estimated cost over 1970 is \$58 thousand.

	1969 actual	1970 estimate	1971 estimate
Average number of operating beds.....	759	759	759
Average daily restoration census.....	642	722	722
Average employment (net, including consultants).....	308	308	308

(f) *Outpatient care.*—This covers the expense of outpatient medical and dental care provided by Veterans Administration staff and by physicians and dentists participating under a fee basis arrangement in the hometown care program. The increase in the estimated cost over 1970 is \$23,684 thousand.

NUMBER OF MEDICAL VISITS AND DENTAL CASES COMPLETED

[In thousands]

	1969 actual	1970 estimate	1971 estimate
Medical visits:			
Staff.....	5,774	6,195	6,662
Fee.....	1,173	1,230	1,190
Total.....	6,947	7,425	7,852
Dental cases completed:			
Examinations:			
Staff.....	103	111	119
Fee.....	19	32	47
Total.....	122	143	166
Treatments:			
Staff.....	71	80	84
Fee.....	22	39	62
Total.....	93	119	146

(g) *Miscellaneous benefits and services.*—This covers items of expense not directly connected with medical care and treatment such as beneficiary travel allowances, care of the dead, operation of personnel quarters at medical facilities, and the cost of furnishing supply, engineering, housekeeping, and other administrative support service to other Veterans Administration departments on a non-reimbursable basis. The increase in the estimated cost over 1970 is \$1,768 thousand.

2. *Contract care.*—(a) *Hospitalization.*—This covers the hospitalization in other Federal hospitals for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under the provisions of 38 U.S.C. 1506, and veterans in U.S. territories and posses-

sions may also receive treatment of non-service-connected disabilities. The decrease in the estimated cost below 1970 of \$1,242 thousand is due primarily to the reduced contract hospital census in Puerto Rico, resulting from the activation of the larger San Juan replacement general hospital.

	1969 actual	1970 estimate	1971 estimate
Average daily patient census:			
Non-Federal hospitals.....	375	449	434
Federal hospitals.....	400	409	398
Manila, Philippine Islands.....	185	188	188
San Juan, P.R.....	709	641	400
Total.....	1,669	1,687	1,420

(b) *Nursing home.*—This covers the cost of nursing care beds in private facilities where Veterans Administration facilities are not available. The increase in the estimated cost over 1970 is \$2,928 thousand to provide for an increase in the per diem rate and workload.

	1969 actual	1970 estimate	1971 estimate
Average daily nursing census.....	3,177	3,678	4,065

3. *Grants for State home care.*—(a) *Domiciliary.*—This covers the cost of domiciliary care of veterans in State homes. The decrease in estimated cost from 1970 of \$1,551 thousand results from the lower census.

	1969 actual	1970 estimate	1971 estimate
Average daily member census.....	7,140	5,661	4,447

(b) *Nursing home.*—This covers the cost of nursing care of veterans in State homes. The \$663 thousand increase in estimated cost over 1970 results from the higher census.

	1969 actual	1970 estimate	1971 estimate
Average daily nursing census.....	2,153	2,879	3,242

(c) *Hospitalization.*—This covers the cost of hospital care of veterans in State homes.

	1969 actual	1970 estimate	1971 estimate
Average daily patient census.....	959	959	1,918

The requirements presented in this budget submission take into consideration the contemplated receipt in 1971 of an equivalent amount of property and supplies from other Federal agencies or from the General Post Fund, National Homes, Veterans Administration, to that experienced in 1969 which had an acquisition value of \$2,993 thousand. This does not, however, represent the value of the items when transferred.

91.20 Outlays from civilian pay act supplemental.....		2,746	137

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$4,455 thousand (1969 adjustments, \$34 thousand); 1969, \$4,450 thousand; 1970, \$4,450 thousand; 1971, \$4,450 thousand.

1. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in other institutions on a contract basis, whichever is more advantageous or economical.

In addition to amounts provided for the medical research program by direct appropriation, the Veterans Administration receives advances, grants, and donations from the National Institutes of Health and from other organizations sponsoring medical research. Various affiliated medical schools also receive grants for research in which the Veterans Administration participates. It is expected that approximately \$16 million will be available from these sources for research purposes in 1970 and 1971.

2. *Prosthetic research.*—This is a research program to develop and test prosthetic, orthopedic, and sensory aids for the purpose of improving the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans, and broad objectives, and provides executive direction for all agency medical programs.

2. *Postgraduate and inservice training.*—This provides for tuition and registration payments, lecturer fees, travel expenses, and training materials incidental to continuing education programs for professional medical and administrative staff. This also serves as a media for disseminating information on medical advances resulting from research efforts.

3. *Exchange of medical information.*—This provides for entering into agreements with medical schools, hospitals, research centers and individual institutions, and members of the medical-scientific community under which physicians at hospitals not affiliated with medical schools will maintain closer contact with such schools and other primary sources of medical information.

This appropriation provides for administration of all nonmedical veterans benefits through the Department of Veterans Benefits; operation of advanced data processing and communications systems through the Department of Data Management; and top management direction and support through agency level staff offices.

Funds requested for 1971 total \$2.5 million above the 1970 estimate. These additional funds represent the minimum increment needed to provide the manpower and related resources to handle the growing workloads from recent veterans benefit legislation and to meet the needs of an aging and expanding veteran and beneficiary population.

Specifically the requested increase is primarily due to a larger uncontrollable payment to State approval agencies reflecting increased nationwide participation in veterans' training programs, the effect of within grades and annualization of the 1970 pay raise, and increases in communications and postage resulting from the larger workloads.

1. *General administration.*—This activity contains the executive direction of the agency and several top level supporting offices. In addition, it covers the Board of Veterans Appeals which decides all cases of appeals to the Administrator on claims involving benefits under veterans legislation.

2. *Data management.*—This activity manages all computer operations and is responsible for research into new computer and communications systems. Payback from this applied research will reduce costs and improve agency operations.

3. *Veterans benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads (in thousands):

	1968 actual	1969 actual	1970 estimate	1971 estimate
New claims (disability and death).....	332	387	442	552
Reopened claims (disability and death)...	331	325	330	356
Dependency and income claims (disability and death).....	866	1,232	1,440	1,384
Cases involving guardianship or fiduciary relationship.....	667	720	764	796
Field examinations completed.....	198	188	189	190

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined and guidance is furnished to trainees. Total number of individuals trained and expected to be trained are as follows:

	1968 actual	1969 actual	1970 estimate	1971 estimate
Readjustment training.....	686,919	925,013	1,325,000	1,472,000
Sons and daughters.....	40,480	43,269	45,700	46,600
Wives and widows.....		2,819	14,500	21,000
Vocational rehabilitation.....	14,373	18,969	24,200	24,900

Loan guaranty operations include issuance of certificates of loan guaranty or insurance, servicing of loans reported in default, payment of claims from lenders on defaulted loans, acquisition, management, and disposal

of property when necessary to protect the Government's interest, making of direct loans to veterans in certain areas, and providing assistance to specified paraplegic veterans in acquiring specially adapted housing. Key workload forecasts are as follows (in thousands):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Guaranteed or insured loans closed.....	220	219	220	222
Direct loans closed and fully disbursed....	12	11	12	12

¹ Selected resources as of June 30 are as follows:

	1968	1969	1970	1971
Unpaid undelivered orders	55,209	112,909	70,162	132,385
Advances	2,136	1,616	1,500	1,400
Total selected resources	57,345	114,525	71,662	133,785

These funds provide for the construction of new hospital and domiciliary facilities, replacement and relocation of existing hospitals and domiciliaries, acquisition of sites, modernization and other improvements, alterations and additions for medical research facilities, nursing home beds, regional offices, supply depots, and data processing centers, including construction planning, administration, and related staff activities. This estimate is for the 11th increment for financing a program to modernize the hospital system. While this program will be primarily for improvements to the older (pre-World War II) hospitals, it will also provide for replacement of hospitals, for air conditioning where indicated and for the correction of deficiencies in post-World War II hospitals as necessary to bring them up to more modern medical standards.

A construction program of \$59 million is recommended for 1971 to be financed with budget authority (appropriation). The amount for construction of replacement and relocation hospitals includes financing in the amount of \$300 thousand for site acquisition for a 600-bed hospital at Augusta, Ga.; \$1,500 thousand for site acquisition for a 450-bed hospital at Baltimore, Md.; \$200 thousand for site acquisition for a 700-bed hospital at Richmond, Va. The amount for modernization and other improvements projects includes \$20,480 thousand to continue projects for which design is in progress and \$19,346 thousand for new projects which will ultimately cost \$39,570 thousand. The amount of \$2,500 thousand is included for nursing home care projects at various stations, and the amount included for medical research facilities is \$1,560 thousand

to complete the research additions at Chicago, Ill. (Research), and Washington, D.C., hospitals; and \$6,775 thousand for new projects that will ultimately cost \$25,286 thousand. Also included is \$6,339 thousand for planning, administration, design and construction supervision, and related staff activities.

1. *Hospitals.*—(a) *New.*—This activity covers the new hospitals and bed-addition projects authorized in 1947 and subsequent years. This part of the program was completed with the opening of the Washington, D.C., 710-bed hospital in 1965.

(b) *Replacement and relocation.*—Beds which are housed in temporary, obsolete, or hazardous structures are to be replaced or relocated. The program initiated in 1955 currently includes 29 projects for approximately 19,009 beds. Status of beds to be provided under this title follows:

	1969 actual	1970 estimate	1971 estimate
Under construction beginning of year	4,024	4,799	2,849
Put under construction during year	1,901		760
Completed during year	1,126	1,950	948
Total completed at end of year since initiation of the program	9,920	11,870	12,818
Under construction at end of year	4,799	2,849	2,661
Not under construction at end of year	4,290	4,290	3,530

(c) *Modernization.*—Pre-World War II hospitals are to be brought up to the standards of the new hospitals insofar as practicable. The status of projects in this program, excluding those which were financially completed as of June 30, 1968, follows (dollars in thousands):

General and special funds—Continued

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES—Con.

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1969.....	11	\$39,064
Under construction June 30, 1969.....	4	15,420
Scheduled to be placed under construction, 1970.....	2	367
Scheduled to be placed under construction, 1971.....	10	56,728
To be placed under construction, after 1971.....	5	55,259

(d) *Other improvements.*—This activity provides for needed improvements, other than modernization, at hospitals. The listing excludes projects of \$100 thousand or less. The status of the projects in this program, excluding those which were financially completed as of June 30, 1968, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1969.....	24	\$28,625
Under construction June 30, 1969.....	38	18,705
Scheduled to be placed under construction, 1970.....	30	11,499
Scheduled to be placed under construction, 1971.....	18	27,265
To be placed under construction, after 1971.....	12	21,753

2. *Domiciliaries.*—This activity provides for construction at domiciliary facilities, including restoration centers. The status of the projects in this program, excluding those which were financially completed as of June 30, 1968, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1969.....	1	\$1,789
Scheduled to be placed under construction, after 1971.....	1	2,500

3. *Nursing homes.*—This activity provides for the construction necessary to establish VA nursing home facilities. A total of 6,000 nursing home beds has been authorized under this program since it was initiated in 1965. These facilities are being provided by altering existing hospital and domiciliary facilities and by the construction of one new nursing home. Construction is complete on all of the original 4,000 beds authorized except for three projects with 164 beds. Funds in the amount of \$2,500 thousand are requested in 1971 to provide construction funds for 800 nursing home beds at various stations.

4. *Research facilities.*—This activity provides for construction of medical research facilities. The status of the projects in this program, excluding those which were financially completed as of June 30, 1968, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1969.....	9	\$5,647
Under construction June 30, 1969.....	7	6,681
Scheduled to be placed under construction, 1970.....	6	5,672
Scheduled to be placed under construction, 1971.....	6	7,747
To be placed under construction, after 1971.....	10	22,150

5. *Other facilities.*—This activity provides for necessary construction at all other VA facilities including regional offices, supply depots, and data processing centers. The status of the projects in this program, excluding those which were financially completed as of June 30, 1968, follows (dollars in thousands):

	Number of projects	Total estimated cost of projects
Completed as of June 30, 1969.....	1	\$495
Under construction June 30, 1969.....	1	46

6. *General administration.*—This activity provides for planning, administration, and related staff activities.

This program provides grants to assist the States in the construction of State facilities for furnishing nursing home care to war veterans. Grants may not exceed 50 percent of the estimated cost of construction of each project, and may not provide for more than one and one-half beds per thousand veteran population in any State. As of June 30, 1969, funds in excess of \$14 million have been obligated to help finance the construction of 1,989 beds in 14 States.

Also provided for, beginning in 1971, are grants to States which have submitted, and have had approved by the Administrator, applications for assistance in remodeling, modification, or alteration of existing hospital or domiciliary facilities in State homes providing care and treatment for veterans. The amount which may be granted to a State home shall not exceed 50 per centum of the estimated cost of the project, nor may any one State receive in any fiscal year more than 20 per centum of the amount appropriated for that fiscal year.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

For payment to the Republic of the Philippines of grants, as authorized by law (38 U.S.C. 631-634), **[\$1,362,000]** \$2,000,000. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

Prior to the enactment of Public Law 89-612, September 30, 1966, grants-in-aid were made to the Republic of the Philippines for the medical care and treatment at the Veterans Memorial Hospital of Philippine Commonwealth Army veterans with service-connected disabilities. Public Law 89-612 extended the program for another 5 years through June 30, 1973, and expanded reimbursement to include payments for hospital care of Commonwealth Army veterans with non-service-connected disabilities, if financial need exists. The program was extended further to give new Philippine Scouts, both service-connected and non-service-connected, the same coverage to which the Commonwealth Army veterans are entitled. To assist the Republic of the Philippines in replacing and upgrading of equipment and in rehabilitating the physical plant and facilities of the Veterans Memorial Hospital, \$500 thousand was appropriated for this purpose in 1967, to remain available until expended. Also, \$100 thousand was authorized for each fiscal year through 1972 for making grants for medical research and training of health service personnel. Comparative census for 1969, 1970, and 1971 are shown below.

CONSTRUCTION, CORREGIDOR-BATAAN MEMORIAL—Continued

The construction of a memorial on Corregidor Island to commemorate the veterans who served in the Pacific area during World War II was authorized by Public Law 88-240 approved December 23, 1963.

A total of \$1,500 thousand has been appropriated for this purpose. Construction of the memorial was supervised by the Department of Navy in accordance with plans furnished by the Veterans Administration. The project was completed and dedicated on June 22, 1968.

The Republic of the Philippines will administer and maintain the area in accordance with the agreement dated December 22, 1965.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
Health, Education, and Welfare: Public Health Service, "National Cancer Institute."

PAYMENT OF PARTICIPATION SALES INSUFFICIENCIES

For the payment of such insufficiencies as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations in Direct loan revolving fund assets or Loan guaranty revolving fund [assets] assets, authorized by the Independent Offices and Department of Housing and Urban Development Appropriation Act, 1968, to be issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717(c)), [\$5,716,000] \$6,123,000. (Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.)

90 Outlays.....	-----	-----	-----

The Housing Act of 1964, as amended by the Participation Sales Act of 1966, authorized the pooling of mortgages or other types of obligations of certain Government departments or agencies and the sale by the Federal National Mortgage Association (now the Government National Mortgage Association), as trustee, of beneficial interests, or participations, in such pools. The Participation Sales Act of 1966 provided that the aggregate amount of participations issued for the account of any trustor may not exceed the amount authorized for that trustor in an appropriation act.

The Participation Sales Act of 1966 also authorized the establishment of appropriations to cover payment for insufficiencies in the amounts required to be paid by trustors on account of outstanding participations. These insufficiencies are primarily comprised of the excess of interest payments to holders of participation certificates over the interest payments received from the pooled

mortgages or other obligations. For sales authorized in 1967, the Independent Offices Appropriation Act, 1967, established a permanent, indefinite appropriation to cover insufficiencies as may be required on account of those sales. For sales authorized in 1968, the Independent Offices and Department of Housing and Urban Development Appropriation Act, 1968, 1969, and 1970, established annual, definite appropriations for the payment of insufficiencies on account of sales authorized in that act. An appropriation of \$6.1 million is proposed for 1971.

The definite and indefinite insufficiency appropriations, are reflected in the direct loan revolving fund and loan guaranty revolving fund.

Public enterprise funds:

LOAN GUARANTY REVOLVING FUND

【During the current fiscal year, the】 *The* Loan guaranty revolving fund shall *hereafter* be available for expenses【, but not to exceed \$425,000,000,】 for property acquisitions and other loan guaranty and insurance operations under Chapter 37, title 38, United States Code, except administrative expenses, as authorized by section 1824 of such title: *Provided*, That the unobligated balances including retained earnings of the Direct loan revolving fund shall *hereafter* be available【, during the current fiscal year,】 for transfer to the Loan guaranty revolving fund【in such amounts as may be necessary】 to provide for the timely payment of obligations of such fund and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

Note.—The above statement excludes the following exchanges of nonworking capital assets: The settlement of VA-guaranteed or insured loans by the acquisition of real property (1969, \$152,168 thousand; 1970, \$173,400 thousand; 1971, \$186,805 thousand); the settlement of defaulted VA-owned loans by acquisition of real property (1969, \$55,396 thousand; 1970, \$62,085 thousand; 1971, \$65,271 thousand); the acquisition of vendee loans in exchange for real property (1969, \$220,055 thousand; 1970, \$265,980 thousand; 1971, \$274,560 thousand).

To assist eligible veterans to obtain credit for the purchase or construction of homes, the Veterans Administration guarantees loans made by private lenders. The number of guaranteed loans closed is expected to increase from 220,000 in 1970 to 222,000 in 1971 bringing the total amount of guaranteed loans outstanding by the end of 1971 to \$36.7 billion. The Loan guaranty revolving fund provides for expenses and revenues of property and loan transactions resulting from settlement of guaranty claims.

Budget program.—1. *Real property acquisitions.*—Private lenders who have acquired property as a result of foreclosure on defaulted guaranteed or insured loans may elect to convey that property to the Veterans Administration. The table below reflects this activity and excludes the amount of indebtedness established against the veteran:

Number of property acquisitions processed.....	1969 actual	1970 estimate	1971 estimate
Average cost per acquisition.....	\$12,816	\$13,500	\$14,000
Total cost (in thousands).....	\$155,266	\$178,200	\$177,100

2. *Property improvements.*—After conveyance of the property to the Veterans Administration, capital expenditures are often necessary to place the property in saleable condition. The following table summarizes these expenditures:

Number of properties acquired.....	1969 actual	1970 estimate	1971 estimate
Average cost per property.....	\$1,071	\$1,200	\$1,300
Total cost (in thousands).....	\$18,362	\$22,400	\$25,100

3. *Claims paid.*—These payments are made to lenders in accordance with the Veterans Administration guaranty

contract and represent the difference between the amount owed by the veteran on a defaulted loan and the value of the foreclosed property (as established by Veterans Administration). These payments are in addition to property acquisition costs shown in 1, above. The table below reflects this activity:

	1969 actual	1970 estimate	1971 estimate
Number of claims.....	12,208	13,500	12,915
Average cost per payment.....	\$1,020	\$1,125	\$1,200
Total cost (in thousands).....	\$12,452	\$15,200	\$15,500

4. *Repurchase of loans sold, net.*—Pursuant to Veterans Administration Regulation 4600, dated March 22, 1962, the Administrator may sell with full recourse loans which have been created incident to the sale of Veterans Administration acquired properties. If the loans go into default, the Administration may repurchase them.

	1969 actual	1970 estimate	1971 estimate
Number of loans repurchased.....	1,535	1,930	2,045
Average cost per repurchase.....	\$10,388	\$11,000	\$11,500
Total cost (in thousands).....	\$15,946	\$21,223	\$23,510

5. *Cash advances—Vendee loans.*—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary to subsequently advance cash on behalf of the borrower in order to protect the interest of the Government.

6. *Loans acquired.*—Guaranteed or insured loans in a default status may be purchased by the Administrator to avoid foreclosure when temporary forbearance will allow the veteran borrowers to cure the default.

	1969 actual	1970 estimate	1971 estimate
Number of loans acquired.....	96	150	150
Average cost per acquisition.....	\$13,475	\$14,000	\$14,000
Total cost (in thousands).....	\$1,294	\$2,100	\$2,100

7. *Property management expense.*—Includes local real estate taxes, services performed by management brokers, and maintenance of property in a salable condition.

	1969 actual	1970 estimate	1971 estimate
Average number of properties.....	11,913	11,479	10,842
Average cost per property.....	\$718	\$852	\$886
Total cost (in thousands).....	\$8,548	\$9,775	\$9,603

8. *Sales expense.*—Includes brokers' fees and advertising costs incident to the sale of acquired properties.

	1969 actual	1970 estimate	1971 estimate
Number of sales.....	18,136	19,200	19,800
Average cost per sale.....	\$650	\$725	\$750
Total cost (in thousands).....	\$11,795	\$13,920	\$14,850

9. *Commission and discount on sale of participation certificates—Participation sales fund.*—Represents the Veterans Administration portion of the cost of marketing participation certificates, through a nationwide group of underwriters, by the Government National Mortgage Association as trustee. These costs are in direct proportion to the sale of participation certificates. No sales are anticipated in 1971.

10. *Interest expense on participation certificates.*—Represents the amount of interest the trustee is required to pay holders of participation certificates in respect to which vendee accounts have been set aside pursuant to 38 U.S.C. 1820(e). To the extent this expense exceeds the amount of interest collections on an equal amount of loans pledged to the trustee, participation sales insufficiencies result.

Public enterprise funds—Continued

LOAN GUARANTY REVOLVING FUND—Continued

Financing of participation sales insufficiencies is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Interest accrued on participation certificates for which insufficiencies are authorized.....	45,916	47,092	45,539
Interest on equal amount of loans in the pool.....	-38,512	-39,350	-37,650
Insufficiency.....	7,404	7,742	7,889
Financed by: Investment income from Participation sales fund.....	-1,505	-1,645	-1,540
Carried forward to subsequent year.....	-54		
Brought forward from prior year.....	1,284	54	
Budget authority.....	7,129	6,151	6,349
Portion of budget authority applicable to:			
Sales authorized in 1968 appropriation act (definite appropriation).....	7,129	5,716	6,128
Sales authorized in 1967 appropriation act (indefinite appropriation).....		435	221

Financing.—Normal revenue and receipts consist principally of interest income, funding fees received from guaranteed and direct loans closed pursuant to Public Law 89-358, cash proceeds from the sale of real property acquired as a result of foreclosure on guaranteed loans, and repayments on mortgages made incident to such sales. It is estimated that \$153.3 million in 1970 and \$153.4 million in 1971 will be received from these sources. Also an estimated \$60.0 million vendee loans will be sold in 1970 and an additional \$400.0 million in 1971. In addition, budget authority of \$6.2 million and \$6.3 million will be required in 1970 and 1971 to meet participation sales insufficiencies, including \$435 thousand and \$221 thousand in 1970 and 1971, respectively, because of sales authorized in 1967 for which a permanent indefinite appropriation has been established.

The Independent Offices and Department of Housing and Urban Development Act, 1970 (Public Law 91-126) provided that the unobligated balances including retained earnings of the Direct loan revolving fund shall be available for transfer to the Loan guaranty revolving fund. No transfers are expected in 1970 or 1971.

¹ Balances of selected resources are identified on the statement of financial condition.

Note.—The above statement excludes the following exchanges of nonworking capital assets: The settlement of defaulted veterans loans by foreclosures and conveyances (1969, \$6,101 thousand; 1970, \$5,902 thousand; 1971, \$6,425 thousand); the settlement of vendee loans by foreclosures and conveyances (1969, \$901 thousand; 1970, \$1,095 thousand; 1971, \$1,150 thousand); the acquisition of vendee loans in exchange for real property (1969, \$6,767 thousand; 1970, \$7,065 thousand; 1971, \$7,500 thousand).

Direct loans are made to purchase, construct, or improve a home; to purchase a farm on which there is a farm residence to be occupied by the veteran as his home; or to construct, alter, repair, or improve a farm dwelling to be occupied by the veteran as his home.

Such loans are made only in rural areas, small cities, and towns where private credit for the making of guaranteed loans is and has been generally unavailable. The maximum term is 30 years and the maximum loan amount is \$21 thousand except in high cost areas where such a limitation is inadequate. In such areas the Administrator is authorized to increase the maximum amount up to \$25 thousand. The interest rate is the same as the rate allowable for guaranteed loans (38 U.S.C. 1811, as amended).

Budget program.—1. *Direct loans to veterans.*—Under existing legislation, the eligibility of World War II veterans and Korean conflict veterans has been phasing out since 1962, with terminal dates of July 25, 1970, for World War II veterans, and January 31, 1975, for Korean conflict veterans. Effective March 3, 1966, Public Law 89-358 extended the authority to make or to enter into commitments to make loans to post-Korean veterans and some active duty servicemen. This authority terminates January 31, 1975.

	1969 actual	1970 estimate	1971 estimate
Loans approved:			
Number.....	10,296	12,597	12,415
Average per loan.....	\$12,864	\$13,400	\$13,900
Amount (in thousands).....	\$132,450	\$168,300	\$172,450
Loans closed:			
Number.....	11,162	12,375	11,500
Average per loan.....	\$12,864	\$13,400	\$13,900
Amount (in thousands).....	\$143,571	\$165,800	\$159,950

2. *Cash advances and repurchases—Vendee loans.*—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary to subsequently advance cash on behalf of the borrower in order to protect the interest of the Government. These advances are added to the unpaid loan balances. In addition, vendee loans sold with full recourse may be repurchased if they go into default.

3. *Property improvements.*—Properties are acquired by foreclosure on, or the voluntary conveyance of, title to properties securing loans owned by the Veterans Administration. Capital expenditures are often necessary to put the property in salable condition. The following table summarizes these expenditures:

	1969 actual	1970 estimate	1971 estimate
Number of properties acquired.....	793	825	875
Average per property.....	\$681	\$750	\$825
Total cost (in thousands).....	\$540	\$620	\$725

4. *Interest on borrowings from Treasury.*—Interest expense is accrued monthly. These accruals are computed on the interest bearing capital of the fund and adjusted for the unexpended balance of the fund.

5. *Operating expenses, general.*—Includes a variety of miscellaneous expenses borne by the Government incident to closing, and liquidating loans.

6. *Property management expense.*—Includes local real estate taxes, services performed by management brokers, and maintenance of the property in a salable condition:

	1969 actual	1970 estimate	1971 estimate
Average number of properties owned....	584	549	512
Average cost per property.....	\$468	\$575	\$595
Total cost (in thousands).....	\$273	\$315	\$304

7. *Sales expense.*—Includes brokers' fees and advertising costs incident to the sale of properties owned by Veterans Administration and averages approximately 5 percent of selling price.

	1969 actual	1970 estimate	1971 estimate
Number of sales.....	823	875	900
Average cost per sale.....	\$443	\$500	\$525
Total cost (in thousands).....	\$365	\$438	\$473

Public enterprise funds—Continued

DIRECT LOAN REVOLVING FUND—Continued

8. *Interest expense on participation certificates.*—Represents the amount of interest the trustee is required to pay holders of participation certificates in respect to which direct loans have been set aside pursuant to 38 U.S.C. 1820(e). To the extent this expense exceeds the amount of interest collections on an equal amount of loans pledged to the trustee, participation sales insufficiencies result.

Financing of participation sales insufficiencies is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Interest accrued on participation certificates for which insufficiencies are authorized.....	18,336	16,948	16,043
Interest on equal amount of loans in the pool.....	-14,213	-13,640	-12,700
Insufficiency.....	4,123	3,308	3,343
Financed by:			
Investment income from Participation sales fund.....	-1,439	-1,205	-1,170
Retained earnings reserved for payment of insufficiencies.....	-2,684	-2,103	-2,173
Budget authority.....			

Financing.—Normal revenue and receipts consist principally of interest income and repayments on direct loans made to veterans. It is estimated that \$176.4 million in 1970 and \$178.8 million in 1971 will be received from these sources. In addition, it is estimated that \$1.0 million will be realized in 1970 and \$126.4 million in 1971 from the sale of direct loans. Most of the 1971 sales are contingent upon legislation removing the statutory prohibition on the sale of direct loans at less than 98% of par.

¹ Balances of selected resources are identified on the statement of financial condition.

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201-08).

Budget program.—Sales are expected to be \$63,823 thousand in 1970 and it is estimated sales will be \$64,865 thousand during 1971.

Financing.—No appropriation by the Congress will be required for the operation of the Veterans Canteen Service during 1971. Operations will be financed from current revenues. The Congress originally appropriated a total of \$4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling \$12,068 thousand have been paid to the Treasury as of June 30, 1969.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expenses. Retained earnings are required for necessary working capital, therefore, no funds are available for payment to the Treasury during 1971.

This fund finances the payment of claims on nonparticipating insurance policies issued to veterans with service-connected disabilities but who are otherwise insurable (38 U.S.C. 722). Administrative expenses are paid from the appropriation, General operating expenses.

Budget program.—1. *Death claims.*—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

2. *Cash surrenders and matured endowments.*—A policyholder may terminate his insurance by cashing in his policy for its cash value.

4. *Policy loans made.*—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	June 30, 1968 actual	June 30, 1969 actual	June 30, 1970 estimate	June 30, 1971 estimate
Number of policies.....	72,528	81,111	89,000	96,500
Insurance in force.....	\$629,435	\$707,818	\$776,000	\$842,000

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the appropriation Veterans insurance and indemnities, instead of direct appropriations to this fund. It is estimated that the payment will be \$6 million in 1970 and \$5.6 million in 1971.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue to increase with capital impairment reaching an estimated \$59.7 million by June 30, 1971.

The capital of the fund consists of \$4.5 million with \$1 million transferred from Readjustment benefits appropriation in fiscal year 1954 and \$3.5 million appropriated directly in fiscal years 1952, 1956, and 1958.

This fund finances claims arising from the guarantee of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Administrative expenses are paid from the appropriation, General operating expenses.

Public enterprise funds—Continued

SOLDIERS' AND SAILORS' CIVIL RELIEF—Continued

Budget program.—Insurance program.—Claims paid on application for coverage submitted and approved prior to October 6, 1942, are not reimbursable to the fund. Loans receivable are established for any payments made on applications for coverage submitted after that date, since these payments are reimbursable to the fund.

Financing.—Payment of claims against this fund is financed from collections of loans receivable, revenue, and appropriations as needed.

Operating results and financial condition.—The payment of claims has continually resulted in expenses in excess of the small revenue of the fund, thereby steadily increasing the deficit to an estimated \$2 million through 1971.

This fund finances payment of claims and administrative costs on nonparticipating insurance policies issued after April 30, 1965, and prior to May 3, 1966, under the three insurance programs—(1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) non-service-disabled insurance—established by provisions of the National Service Life Insurance Act of 1940, as amended (38 U.S.C. 725(b)(c)), to extend a new opportunity for insurance coverage to disabled veterans who no longer were eligible for other Government insurance.

Each program is self-contained and premiums may be adjusted to insure that each is self-sustaining, as required by law. For this purpose, separate accounting and actuarial records are maintained for each program to determine the individual program costs. Payments are made to the General operating expenses appropriation to cover the administrative costs of processing claims, and maintaining the accounts.

Budget program.—1. Death claims.—Payments to surviving beneficiaries will continue to increase as deaths occur among policyholders.

2. Disability claims.—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled.

4. Cash surrenders.—A policyholder may terminate his insurance by cashing in his policy for its cash value.

5. Payments to General operating expenses appropriation.—Payments to cover the administrative cost of processing claims and maintaining the accounts.

7. Policy loans made.—A policyholder may borrow up to 94% of the cash value of his policy.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	June 30, 1968 actual	June 30, 1969 actual	June 30, 1970 estimate	June 30, 1971 estimate

This fund finances the payment of claims on nonparticipating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U.S.C., sec. 723). Policyholders were given the right (72 Stat. 1716) to convert to a permanent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the unlimited term insurance. Policyholders under all plans of VSTI may purchase total disability income coverage with the payment of an additional premium. Administrative expenses are paid from the appropriation General operating expenses.

Budget program.—1. *Death claims.*—Payments to surviving beneficiaries continue to increase as deaths occur among policyholders.

Public enterprise funds—Continued

VETERANS SPECIAL TERM INSURANCE FUND—Continued

2. *Disability claims.*—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled began in 1960.

3. *Cash surrenders.*—A policyholder may terminate his insurance by cashing in his policy for its cash value.

6. *Policy loans made.*—The policyholders who converted their insurance from term to permanent plan were subsequently entitled to borrow up to 94% of the cash value of the new policy.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	June 30, 1968 actual	June 30, 1969 actual	June 30, 1970 estimate	June 30, 1971 estimate
Number of policies.....	628,142	624,675	621,000	618,000
Insurance in force.....	\$5,516,291	\$5,480,679	\$5,448,000	\$5,422,000

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. The retained earnings have been reduced by payments of a special dividend and payments to the Veterans insurance and indemnities appropriation and the Veterans reopened insurance fund.

This fund is used to make loans up to \$100 to disabled veterans eligible for vocational rehabilitation who are without sufficient funds to meet their expenses (38 U.S.C. 1507). Repayments are used to make new loans.

Increased loan activity in this fund is projected in both 1970 and 1971 which is based on an increase in the number of trainees for both years. The increase also recognizes recent legislation authorizing part-time rehabilitative training and the continued buildup of trainees from the seriously disabled of World War II and the Korean conflict.

Administrative expenses are borne by the appropriation, General operating expenses.

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemen's Group Life Insurance Act of 1965 (38 U.S.C.

sec. 765-776) and any expenses incurred by the Veterans Administration in administration of the act.

Budget program.—1. *Premium payments.*—The payment of premiums to private insurance companies in 1970 and 1971 is expected to be sizably less than in 1969. This is due to a decrease in contributions for the extra hazards of service.

2. *Payment to General operating expenses appropriation.*—The 1969 administration cost to the Veterans Administration was \$251 thousand. One third of this cost is attributable to printing, reproduction and the mailing of required forms and the remaining to personal services and travel. The total costs should be slightly higher through the budget year.

Financing.—Premium costs are met by withholding from the salaries of insured members their share of the cost of the insurance and by contributions of amounts representing the extra hazard costs from appropriations of the departments involved. The extra hazards contributions will be sizably less in 1970 and 1971 over 1969. This is due to the recent decrease in death claims resulting from the extra hazards of service.

¹ Balances of selected resources are identified on the statement of financial condition.

The Supply Fund finances, on a reimbursable basis, warehouse inventories and procurement of recurring need supplies and centrally acquired equipment throughout the Veterans Administration in accordance with the provisions of 38 U.S.C. 5011, and items and services to other Government agencies when agencies request such support.

Budget program.—The fund provides financial support for the procurement of supplies and equipment, the maintenance and operation of two supply depots and one subdepot, located at Hines, Ill., Somerville, N.J., and Bell, Calif., the operation of service and reclamation program for each supply depot and subdepot, a centralized periodical procurement activity, printing service to VA installations on a centralized basis, and a marketing center located at Hines, Ill.

The publications and reproduction program provides printing service to VA installations. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a VA operated plant in Arlington, Va., and from commercial sources.

The marketing center is responsible for determining the level of inventories at the three supply depots and to acquire stocks to maintain such levels as well as the central procurement of items not available from Government sources for VA installations and other Government agencies as may be determined economical.

Personal services and other costs incident to the operations and administration of supply activities at field stations and other than those directly related to the Supply Fund in the Veterans Administration central office are charged directly to applicable appropriations and are not an operating expense of the Supply Fund.

Financing.—Consuming appropriations reimburse the fund for the cost of supplies and equipment provided and services rendered. Operating costs are recovered from the appropriations receiving supplies, equipment, and services at time of reimbursement.

Operating results and financial condition.—The fund operated at a \$17,657 profit during 1969. This profit reduces the prior years deficit to \$15,878.

This fund consists of gifts, bequests, and proceeds of sale of property left in the care of the facilities by former beneficiaries; patient's fund balances and proceeds of sale of effects of beneficiaries who die leaving no heirs or without having otherwise disposed of their estate. Such funds are used to promote the comfort and welfare of veterans at hospitals and homes where no general appropriation is available (38 U.S.C. Chapters 83 and 85).

This fund (72 Stat. 1154) was established in 1940 as the financing mechanism for World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies have been issued under this program. Because issuance of new policies ended in 1951 the insurance in force will continue to decline. The general decline in the activity of the fund is indicated in the following table (dollars in millions):

	June 30, 1968 actual	June 30, 1969 actual	June 30, 1970 estimate	June 30, 1971 estimate
Number of policies in force.....	4,590,082	4,508,002	4,413,000	4,318,000
Amount of insurance in force.....	\$30,204	\$29,712	\$29,086	\$28,460

The status of the fund excluding noncash transactions is as follows (in thousands of dollars):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Unexpended balance of fund, beginning of year.....	6,011,122	6,232,707	6,247,021	6,380,515
Cash income during year:				
Premiums and other receipts.....	476,472	477,984	469,008	482,247
Payments from general and special funds.....	5,287	5,840	5,155	4,970
Interest on investments.....	210,752	224,539	249,069	266,207
Total annual income.....	692,511	708,363	723,232	753,424
Cash outlay during year.....	470,927	626,548	657,239	675,986
Transactions not applied to income or outlay.....	-----	-67,500	67,500	-----
Unexpended balance of fund, end of year.....	6,232,707	6,247,021	6,380,515	6,457,953

The fund is operated on a commercial basis to the greatest possible extent consistent with law. Administrative expenses are charged to the appropriation General operating expenses.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the appropriation Veterans insurance and indemnities, for claims (1) resulting from extra hazards of the veterans' service, and (2) arising on certain policies held by personnel on active duty.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$7,104 million as of June 30, 1969 to \$7,365 million as of June 30, 1971. The actuarial estimate of policy obligations as of June 30, 1969, totals \$7,008 million, leaving a balance of \$96 million for contingency reserves.

71 Obligations incurred, net	-----	-40,000
90 Outlays	-----	-40,000

Legislation will be proposed to effect reimbursement to the Veterans Administration by private insurers for 1971 of \$40 million for the cost of medical care and treatment provided to veterans with non-service-connected disabilities.

Proposed for separate transmittal, proposed legislation :

DIRECT LOAN REVOLVING FUND

Program and Financing (in thousands of dollars)

Identification code 29-00-4024-2-3-803	1969 actual	1970 est.	1971 est.
Financing:			
14 Receipts and reimbursements from: Non-Federal sources: Sale of loans without recourse	-----	-----	-125,000

24 Unobligated balance available, end of year: Fund balance	-----	125,000
Budget authority	-----	
Relation of obligations to outlays:		
71 Obligations incurred, net	-----	-125,000
90 Outlays	-----	-125,000

Legislation is proposed to remove the statutory prohibition on sale of direct loans at less than 98 percent of par. Enactment of this legislation is expected to permit the sale of loans resulting in net proceeds of \$125.0 million in 1971.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

The appropriation available to the Veterans Administration for the current fiscal year for "Medical care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by 38 U.S.C. 902), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

OTHER INDEPENDENT AGENCIES

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Federal Funds

74 Obligated balance, end of year	-46	-51	-61
77 Adjustments in expired accounts	-1	-----	-----
90 Outlays	238	245	370

¹ Includes capital outlays as follows: 1969, \$8 thousand; 1970, \$4 thousand; 1971, \$2 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$38 thousand (1969 adjustments, -\$1 thousand); 1969, \$28 thousand; 1970, \$28 thousand; 1971, \$28 thousand.

The Conference, established pursuant to 5 U.S.C. 571, et seq., is authorized on a permanent basis to assist the President, the Congress, the administrative agencies, and executive departments in improving existing administrative procedure. It is responsible for conducting studies of the efficiency, adequacy, and fairness of present procedures by which Federal administrative agencies and executive departments determine the rights, privileges, and obligations of private persons.

During 1970 the Administrative Conference Act was amended to raise the authorization ceiling from \$250 thousand to \$450 thousand. This action recognized the fact that the smaller and outdated limitation prevented the Conference from carrying out its important mandate. The new ceiling is designed to permit the agency to seek funds for larger research projects leading to more significant recommendations to improve agency procedures, including the lessening of delays and reduction of expenditures.

The chairman is required, on behalf of the Conference, to transmit to the President and the Congress an annual report and such interim reports as he deems desirable.

The American Battle Monuments Commission is responsible for the construction and maintenance of U.S. monuments and memorials commemorating the participation in battle of our Armed Forces since April 6, 1917. It is also responsible for controlling erection of monuments and markers by U.S. citizens and organizations in foreign countries, and for the design, construction, and maintenance of permanent military cemetery memorials on foreign soil. The Commission maintains on foreign soil 23 military cemetery memorials; 11 monuments and memorials not a part of the cemeteries; and two bronze tablets. In addition, the Commission maintains three large memorials on U.S. soil.

The remains of 30,912 honored dead of World War I, 93,222 of World War II, and 750 of the Mexican War are interred in these cemeteries. In addition, the 91,591 servicemen and women of World War I, World War II, and the Korean conflict who were missing in action, or lost or buried at sea are memorialized at the cemeteries and memorials by the inscription of their names on the "Walls of the Missing." Many American tourists and local citizens visit these cemeteries and memorials to pay homage to those interred and commemorated in them.

1. *Purchase of flowers.*—Funds are deposited with the Commission by private citizens for the purchase of floral decorations for graves in the World War I and World War II military cemeteries. The donor is advised when the flowers have been placed.

2. *Repair of non-Federal war memorials.*—When requested to do so and upon receipt of the necessary funds, the Commission will arrange for and oversee the repair of war memorials to U.S. forces erected in foreign countries by American citizens, States, municipalities, or associations. Such moneys are accounted for through this fund.

The Agency advises the President and the Secretary of State on arms control and disarmament policy and its implementation, conducts negotiations with other countries looking toward international agreements to control, reduce, or eliminate arms, and will direct, as appropriate, U.S. participation in such control systems as may be adopted.

The external research and field testing activities are conducted through contracts or grants with nongovernmental research organizations and through reimbursement agreements with other U.S. Government departments and agencies. The proposed 1971 research and field test program will be significantly smaller and will emphasize the control, limitation, and reduction of strategic offensive and defensive weapons systems in support of the bilateral negotiations on strategic arms limitations.

The Cabinet Committee on Opportunities for the Spanish-Speaking People, the successor to The Inter-Agency Committee on Mexican-American Affairs, which expired December 30, 1969, seeks to create solutions to Mexican-American problems; assure that Federal programs are reaching the Mexican-Americans and providing the assistance they need; and develop new programs that may be necessary to handle problems that are unique to the Mexican-American community. The Committee is striving to assure that the recommendations resulting from the initial hearings held in October 1967 are carried out.

The Committee is also working to bring to other Spanish-speaking peoples throughout the United States the same assistance specifically outlined for the Mexican-American communities.

The resources available to the Committee prior to 1970 were provided by transfers from other Federal agencies.

The Board regulates the economic aspects of air carrier operations, both domestic and international and participates in the development of international air transportation.

1. *Awards of operating authority.*—This includes (a) processing of applications for operating authority or modification of authority; (b) conducting investigations initiated by the Board involving operating authorities; (c) international aviation work involving obtaining, granting, or exchanging of operating authority with foreign countries, and the handling of day-to-day operating problems with foreign governments and airline officials; and (d) the issuance of foreign carrier permits.

2. *Regulation of rates and fares.*—This includes (a) review of passenger and cargo rate tariffs to determine those rates and fares that should be permitted to become effective without investigation, become effective but at the same time investigated, and suspended pending investigation; (b) review of complaints against air carrier rates; (c) conducting formal (hearing process) investigations of those rates, fares, rules, or related tariff provisions that the Board has found may be unlawful or contrary to the public interest; (d) establishment of minimum rates applicable to services performed by the civil air carriers for the Military Airlift Command (MAC); and (e) review of petitions for the establishment or revision of service mail rates.

3. *Regulation of agreements and interlocking relationships.*—This includes (a) the review of applications requesting Board approval of acquisitions of control, approval of interlocking directorates, and agreements between air carriers and any other common carrier affecting air transportation; and (b) review of agreements on rates

and fares under which U.S. flag carriers participate in the International Air Transport Association (IATA).

4. *Subsidy support of air service.*—This includes (a) processing of subsidy rate cases; (b) necessary studies, forecasts, and analyses; (c) provision of economic assistance to Board components on cases with subsidy implications; (d) making recommendations to the Secretary of Transportation as to the Government guaranty of private loans to air carriers for the purchase of more modern aircraft; and (e) verification of subsidy claims submitted by the air carriers.

5. *Regulation of air carrier accounting and reporting.*—This includes (a) design, prescription, and administration of uniform systems of accounts and reports; (b) substantiation of carrier conformance with prescribed accounting and reporting regulations; (c) preparing special analyses and evaluations of air carrier financial data; (d) field audit of carriers' books, records, and reports; and (e) performance of special financial and accounting factfinding services in the field.

6. *Enforcement of applicable laws and regulations.*—This includes (a) handling of passenger and shipper complaints; (b) investigation of violations of the economic provisions of the Federal Aviation Act and with all of the regulations, orders, certificates, permits, exemptions, and other requirements issued thereunder; and (c) the taking of enforcement action and the achievement of compliance by informal (nonhearing) enforcement action, formal (hearing) administrative proceedings, and the prosecution of enforcement cases in the courts.

SELECTED WORKLOAD DATA

Route cases and related matters completed:	1969 actual	1970 estimate	1971 estimate
Formal hearing cases.....	116	108	115
Nonhearing matters.....	844	1,358	3,600

The Civil Aeronautics Board fixes rates of subsidy compensation to promote the development of air transportation to the extent and of the quality required for the commerce of the United States, the Postal Service, and the national defense. The Board makes subsidy payments to subsidy-eligible certificated air carriers who have demonstrated a statutory need therefor. Subsidy is provided to cover the carrier's operating loss incurred under honest, economical and efficient management and to provide it an opportunity to earn a fair return (after taxes) on investment used and useful in the air transportation services.

The following table reflects the estimated program amounts becoming due finally for each year, together with the adjustments between years:

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS RELATED TO APPROPRIATIONS

[In thousands of dollars]

Estimated subsidy earnings under final Board action:	1969 actual	1970 estimate	1971 estimate
Local service operations.....	40,643	36,000	31,000
Alaska operations.....	5,469	4,917	4,623
Total earnings.....	46,112	40,917	35,623
Earnings in prior years recorded within the year.....	383	262	-----

Reduction of earnings recorded in prior years.....	-3,737	-4,625	-2,500
Total obligations (less recoveries)	42,758	36,554	33,123

The following analysis shows the subsidy outlook for 1971 for the 52 certificated air carriers:

CERTIFICATED CARRIER UNITS

	Non-subsidized	Subsidized	
Domestic operations:			
Domestic trunklines.....	11	-	Local service carriers need for subsidy will continue at reduced levels.
Helicopter operations.....	4	-	
Local service operations.....	-	9	
Alaska operations.....	1	4	Subsidy will continue to support routes between Alaska and Continental United States and to remote localities of Alaska.
Hawaiian operations.....	2	-	
U.S. flag operations.....	2	-	The U.S. flag operations which represent the all-international operations, the all-cargo operations, and all other operations are on a non-subsidized basis.
All-cargo operations.....	4	-	
Other operations.....	2	-	
Supplemental air carriers.....	13	-	No subsidy is provided the supplemental carriers.

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competitive merit system through examinations held by the offices of the Commission and the interagency board network operating under the supervision of the Commission. In order to insure that Federal agencies are staffed with well qualified people and the information about Federal employment opportunities is made known to all citizens, the Commission supplies information to and carries out a program of visits to colleges, junior colleges, high schools, business schools, veterans' organizations, military separation centers, and other likely sources of manpower supply.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The Interagency Board network was established at the President's direction and has made possible the modernization of the recruiting and examining system. There is at least one interagency board in each State; in the larger States with a high concentration of Federal employment there are two or more. The interagency boards announce and rate examinations and provide the public with on-the-spot comprehensive information and advisory service about Federal job opportunities and examinations.

All agency boards of examiners except those of the Post Office were merged into the new interagency board system by June 30, 1968. Post Office boards will be merged into the system approximately January 1, 1970. The interagency board network will then provide full examination coverage for all positions under the merit system.

Workloads are reflected in the following table:

PRODUCTION COUNT			
	1969 actual	1970 estimate	1971 estimate
Applications processed.....	1,651,695	1,970,000	2,290,000
Names certified.....	1,194,510	1,553,000	1,910,700
Inquiries answered.....	5,497,552	5,700,000	5,900,000

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions, and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system. Included is investigations of U.S. citizens for employment by international organizations required by Executive Order 10422, as amended.

PRODUCTION COUNT			
	1969 actual	1970 estimate	1971 estimate
National agency check and inquiry cases.....	356,819	343,300	343,300
Suitability cases.....	2,283	2,300	3,900
Investigations—records and correspondence.....	29,448	28,700	28,700
Other personnel investigations.....	2,324	2,990	2,990

3. *Inspections.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. The Commission also conducts classification reviews to insure compliance with classification standards.

4. *Federal executive manpower.*—The Commission's program is to develop and use the talent and competency existing within and outside the Government to help staff agency executive positions throughout the Federal service within full merit principles. It will meet and work with agencies to develop the most effective top-level organization and position structure related to present and future agency missions.

5. *Developing policies and standards.*—The Commission develops programs, devises tests, issues standards and regulations, administers pay and leave regulations, and proposes legislation to improve the Federal personnel system for both competitive and noncompetitive positions. The Commission also administers the new coordinated wage system for blue-collar employees.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; reviewing and processing of discrimination complaints, under authority of Executive

Order 11246; and providing advice to agencies and individuals regarding rights of appeal.

7. *Training.*—The Commission makes overall and individual agency appraisals of training operations, and coordinates interagency training programs to achieve full utilization and to avoid duplication and, where it is more economical to do so, conducts training programs for agency personnel on a reimbursable basis.

9. *Administration of the Voting Rights Act of 1965.*—The Commission provides examiners to prepare and maintain lists of eligible voters and to observe election procedures in States or other political subdivisions designated by the Attorney General. The Commission receives complaints, hears and determines challengers, and assists in the defense of challenge cases filed in U.S. circuit courts of appeals as prescribed by the act.

10. *Enforcement of restrictions on political activity.*—Under chapter 15 and subchapter III of chapter 73 of title 5, United States Code and the Civil Service Rules, the Civil Service Commission administers and enforces political activity restrictions as applied to Federal civil service employees, as well as to officers and employees of State or local agencies whose principal employment is in connection with a federally financed activity.

11. *Occupational health.*—The Commission assists departments and agencies to develop adequate occupational health programs with services provided at work locations, issues standards and guidelines and, in cooperation with other agencies works toward achieving a modern and comprehensive health program for the Federal work force.

12. *Administration of retirement and insurance programs.*—The Commission administers retirement, group life insurance, and health benefits programs for Federal employees. It is required to adjudicate annuity, death, benefit, refund, and deposit claims; make payments to annuitants and other claimants; collect and account for moneys received; maintain control accounts and systems for the funds; negotiate with private carriers to provide the insurance and health benefits authorized; determine eligibility in certain cases; audit the records of insurance underwriters; and manage the trust funds established for financing the programs.

Section 103 of the Civil Service Retirement Amendments of 1969, establishes a new basis for requiring Federal contributions to the civil service retirement and disability fund. Rather than the Congress making annual appropriations to cover benefits provided by part III of Public Law 87-793 (76 Stat. 868) the new law now requires the Secretary of the Treasury to make annual payments from general revenues into the retirement fund on the basis of a sliding scale of percentages of an amount equivalent to: (1) interest on the unfunded liability, and (2) annuity disbursements attributable to military service. The Civil Service Commission, at the end of each fiscal year, beginning in 1971, notifies the Secretary of the Treasury of the amount of payment to be made to the retirement fund and reports such sums to the President and the Congress.

FEDERAL LABOR RELATIONS COUNCIL, SALARIES AND EXPENSES

For expenses necessary to carry out functions of the Civil Service Commission under Executive Order No. 11491 of October 29, 1969, [\$300,000] \$900,000: *Provided*, That public members of the Federal Service Impasses Panel may be paid travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5703) for persons employed intermittently in the Government service, and compensation at the rate of not to exceed [\$100 per day when engaged in the performance of the Panel's duties.] *the per diem rate equivalent to the rate for grade GS-18. (Supplemental Appropriation Act, 1970.)*

Executive Order 11491, entitled "Labor-Management Relations in the Federal Service," established the Federal Labor Relations Council as a central authority to administer and interpret the provisions of the order by deciding major policy issues, prescribing regulations, and from time to time reporting and making recommendations to the President.

The order also established the Federal Service Impasses Panel as an agency within the Council. The Panel is authorized to consider impasses resulting from negotiations between labor organizations and agency management and to take whatever action it considers necessary to settle an impasse.

This fund finances, on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (5 U.S.C. 1304(e)).

Budget program.—Because work on some investigations will be started in one fiscal year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1970 and 1971 as compared to 1969 experience, are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1969 actual	1970 estimate	1971 estimate
On hand, beginning of year.....	5,898	5,730	5,730

90 Outlays.....	1,811,608	2,809,566	3,205,855

This fund is used to pay annuities to retired employees or their survivors; to make refunds to former employees for amounts withheld, and to beneficiaries of employees who died before retirement or before the annuities equaled the amount withheld (5 U.S.C. 8331-8348); and to pay administrative expenses of the Commission in administering the program. Estimates for 1970 and 1971 include impact from Civil Service Retirement Amendments of 1969, Public Law 91-93, approved October 20, 1969. The estimated unfunded liability of the civil service retirement system as of June 30, 1969, is \$57.7 billion. Pertinent statistics as of June 30 are shown below:

	1969 actual	1970 estimate	1971 estimate
Active employees.....	2,714,000	2,714,000	2,714,000
Annuitants.....	910,849	967,870	1,009,500

The status of the fund is as follows (in thousands of dollars):

	U.S. securities (par).....	-1,262	
90	Outlays.....	-17,738	14,919

¹ Balances of selected resources are identified on the statement of financial condition.

The fund finances the cost of health benefits for: (1) active employees, (2) employees who retired after June 1960, or their survivors (5 U.S.C. 8901-8913), and (3) the related expenses of the Commission in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants on June 30 are as follows:

	1969 actual	1970 estimate	1971 estimate
Active employees.....	2,174,108	2,184,108	2,184,108
Annuitants.....	393,502	447,652	489,152
Total.....	2,567,610	2,631,760	2,673,260

In determining a biweekly subscription rate to cover program costs, 1% is added to the rates developed by health benefit carriers, for administrative expense, and 3% is added for a contingency reserve held by the Commission for each carrier. Government contributions are limited by law to 50% of the subscription rate, up to a maximum of \$1.68 for single coverage, and \$4.10 for family coverage. The Commission is authorized to transfer unused administrative reserve funds to the contingency reserve.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants, (2) agency contributions for active employees, appropriated to agencies, and (3) Government contributions for annuitants appropriated to the Commission.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods. About \$5.3 million unused administrative funds were transferred to the contingency reserve in 1969. The contingency reserves are retained by the Commission and paid to carriers, as necessary, to defray future rate increases or to provide increased benefits.

90 Outlays.....	-151,559	-147,039	-153,597

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance (5 U.S.C. 8701-8716) and expenses of the Civil Service Commission in administering the program. Separate cost data is maintained for employees regular group life insurance, an additional \$10 thousand authorized in 1967, and insurance for members of former beneficial associations.

Budget program.—The status of the basic (regular and optional) life insurance program on June 30 is as follows:

Life insurance in force (in billions of dollars):	1969 actual	1970 estimate	1971 estimate
On active employees ¹	36.1	39.7	39.7
On retired employees.....	2.7	3.0	3.0
Total.....	38.8	42.7	42.7
Number of participants (in thousands):			
Active employees.....	2,600	2,625	2,625
Annuitants.....	475	500	525
Total.....	3,075	3,125	3,150

¹ Excludes equal amount of accidental death and dismemberment insurance.

Financing.—Premium costs for the regular program are met by withholding 27½ cents biweekly from the salaries of employees, for each \$1 thousand of life insurance and a 50% matching by employer agencies; for the optional program by withholding from employees' salaries, or retirees' annuities; and for the beneficial association program by direct collection from members. Most

of the difference between receipts and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves on June 30 is as follows (in millions of dollars):

Held in special contingency reserves:	1969 actual	1970 estimate	1971 estimate
By basic program insurer.....	200	200	200
By beneficial associations insurer.....	6	6	6
Held in trust by U.S. Treasury.....	654	801	955
Total reserves.....	860	1,007	1,161

The special contingency reserve with the insurer for the regular and optional insurance program is limited to \$200 million. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees' Life Insurance Fund. The operations of the insurer for the regular and optional life insurance program to June 30 each year follow (in millions of dollars):

Income:	1969 actual	1970 estimate	1971 estimate
Premiums received and accrued.....	374	398	411

¹ Balances of selected resources are identified on the statement of financial condition.

This fund created by the Retired Federal Employees Health Benefits Act (Public Law 86-724) finances: (1) the cost of health benefits for retired employees and survivors who enroll in the Government-sponsored uniform health benefits plan; (2) the contribution to retired employees and survivors who retain or purchase private health insurance; and (3) expenses of the Civil Service Commission in administering the program.

Budget program.—The fund is available without fiscal year limitation. Amounts contributed by the Government

shall be paid into the fund from annual appropriations. Numbers of participants on June 30 are as follows:

	1969 actual	1970 estimate	1971 estimate
Uniform plan.....	80,157	77,157	74,257
Private plans.....	95,063	92,063	89,463
Total.....	175,220	169,220	163,720

Financing.—The fund is financed by contributions from those participants enrolled in the Government-sponsored plan and by Government contributions. The special contingency reserve with the carrier of the Uniform Plan is currently limited to \$5 million at the end of the policy year. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Retired Employees Health Benefits program.

Operating results.—There will be an estimated \$35.2 million contingency reserve in the fund at the end of fiscal year 1971 as compared with an estimated \$33.0 million in 1970.

CORPORATION FOR PUBLIC BROADCASTING

Federal Funds

General and special funds:

PAYMENT TO THE CORPORATION FOR PUBLIC BROADCASTING

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

Program and Financing (in thousands of dollars)

The Corporation for Public Broadcasting is a nonprofit private corporation which was created in 1968 pursuant to the Public Broadcasting Act of 1967 (Public Law 90-129). The purpose of the Corporation is to develop and improve noncommercial educational broadcasting and assist in establishing a public broadcasting service more widely available throughout the Nation.

The Corporation is financed for the most part by Federal grants, but also receives grants each year from non-Federal sources. In 1969, these private contributions totaled \$1.9 million and an estimated \$3 million is expected to be contributed in 1970.

In 1970, the Corporation estimates it will make operating grants to over 150 public television stations and 83 public radio stations. The Corporation also will support the production of quality public television and radio programs through grants to national production centers such as National Educational Television, the Children's Television Workshop, and the newly organized National Public Radio program-production center. The Corporation also makes grants to regional centers and local stations for new programs. In 1970, an estimated total of 765 hours of new public television programs will be produced with the Corporation financing all or part of the cost.

One of the most important services provided by the Corporation is the support of a national interconnection system for public broadcasts. Through grants to the Public Broadcasting Service, the Corporation in 1970 will support interconnection of 166 local television stations for an estimated 42 hours per week. Payments to the corporation for 1971 appear under legislative program proposals.

DISTRICT OF COLUMBIA

Federal Funds

Note.—The appropriation language for Federal payments and loans to the District of Columbia appears in the District of Columbia budget along with the detailed estimates of local funds for the various municipal expenses of the city government. The estimates below for Federal funds to the District of Columbia are based on the Mayor's recommendations to the City Council and may be amended later to reflect final action on the District's budget.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA—Continued

The District of Columbia Revenue Act of 1969 (Public Law 91-106) approved October 31, 1969, authorized \$105 million as the annual payment by the United States toward defraying expenses of the government of the District of Columbia. The act also authorized an additional \$5 million for 1970 in order to increase the effectiveness of law enforcement in the District of Columbia. This appropriation also includes \$3,938 thousand as payment for water and sewer services (61 Stat. 361, 68 Stat. 113, 70 Stat. 183, 80 Stat. 857, 82 Stat. 612). Supplemental appropriations for 1970 and 1971 are anticipated for separate transmittal.

71 Obligations incurred, net.....	68,250	107,807	122,425
90 Outlays.....	68,250	107,807	122,425

1. *General fund loans.*—Appropriations for 30-year interest-bearing loans from the U.S. Treasury are made available for financing construction of the general public works program of the District of Columbia, including school construction (72 Stat. 183); for the District of Columbia's contribution to the Washington Metropolitan Area Transit Authority for the city's share of construction costs of the rail rapid transit system authorized by the National Capital Transportation Act of 1969 (83 Stat. 320); and for education facilities for the Federal City College and the Washington Technical Institute (80 Stat. 1426). The loans to the general fund through the fiscal year ending June 30, 1970 are appropriated under a borrowing authority which is related to the ability of the District of Columbia to repay. The loans made under this authorization may not cause the general fund debt service to exceed 6% of local revenues and the annual Federal payment to be credited to the fund (81 Stat. 339). Under existing law the borrowing limitation continues at the June 30, 1970 level unless the formula authorization is extended or revised by subsequent amendment. The status of general fund borrowing on a cumulative basis is as follows (in millions of dollars):

	1969 actual	1970 estimate	1971 estimate
Loan authorization:			
Limit on debt service ¹	25.8	30.4	30.4
Limit on outstanding debt ²	360.2	407.5	407.5
Status of loans:			
Cumulative borrowing from U.S. Treasury: ³			
General public works.....	114.1	172.2	240.4
Rail rapid transit.....	5.1	⁴ 28.0	62.3

Less principal repaid (cumulative)....	—2.3	—3.6	—5.4
Net outstanding debt.....	121.9	210.5	314.2
Cumulative appropriations:			
General public works.....	273.0	283.7	283.7
Rail rapid transit.....	9.7	51.3	51.3
Higher education.....	10.7	15.6	15.6
Total appropriations.....	293.4	350.6	350.6

¹ Based on revenues of \$430.4 million for 1969, \$507 million for 1970 and \$572 million for 1971.

² Based on Treasury loan interest rates of 5% for 1969 and 6¼% for 1970 and 1971.

³ Against loan appropriations and unobligated balances.

⁴ Includes \$1,293 thousand proposed for separate transmittal.

2. *Special fund loans.*—Appropriations for interest-bearing loans from the U.S. Treasury are made available to assist in financing highway construction projects (68 Stat. 110); expansion and improvement of the water system (64 Stat. 195; 68 Stat. 103); construction, operation, maintenance, and the repair of the water system (64 Stat. 195; 68 Stat. 103); construction, operation, maintenance, and the repair of the sanitary sewage works of the District of Columbia (68 Stat. 105; 74 Stat. 811); and construction of a sanitary sewerline from the Dulles International Airport to the District of Columbia (74 Stat. 210). The status of the loan authorizations on a cumulative basis is as follows (in millions of dollars):

	1969 actual	1970 estimate	1971 estimate
Highway fund loan (authorization of \$85.2 million):			
Appropriations.....	84.6	85.2	85.2
Funds withdrawn.....	75.0	85.2	85.2
Amounts repaid.....	-4.2	-5.3	-6.7
Water fund loan (authorization of \$35 million):			
Appropriations.....	34.8	35.0	35.0
Funds withdrawn.....	25.8	29.8	35.0

Sanitary sewage works loan (authorization of \$32 million):			
Appropriations.....	29.8	32.0	32.0
Funds withdrawn.....	15.5	20.3	32.0
Amounts repaid.....	-7	-9	-1.1
Metropolitan area sanitary sewage works loan (authorization of \$25 million): ¹			
Appropriations.....	25.0	25.0	25.0
Funds withdrawn.....	24.5	24.7	24.7
Amounts repaid.....		-2.4	-2.4
Total, special funds (authorizations of \$177.2 million):			
Appropriations.....	174.2	177.2	177.2
Funds withdrawn.....	140.8	160.0	176.9
Loan writeoff for Potomac interceptor.....	-12.3	-12.4	-12.4
Principal repaid.....	-9.4	-13.8	-16.1
Net outstanding debt.....	119.1	133.8	148.4

¹ The District Government is required to repay only 50% of the total loans advanced to the metropolitan area sanitary sewage works fund (81 Stat. 225). Repayment of principal and interest may be deferred pending receipt of additional income from charges for sewer service (74 Stat. 211).

Supplemental appropriations for 1970 and 1971 are anticipated for separate transmittal. New legislation will be proposed to provide non-Federal capital outlay financing. See legislative program.

Proposed for separate transmittal, existing legislation:

LOANS TO THE DISTRICT OF COLUMBIA FOR CAPITAL OUTLAY

Program and Financing (in thousands of dollars)

Identification code 30-42-9999-1-1-909	1969 actual	1970 est.	1971 est.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$769 thousand; 1969, \$1,055 thousand; 1970, \$1,055 thousand; 1971, \$1,055 thousand.

The Equal Employment Opportunity Commission carries out the provisions of title VII of the Civil Rights Act of 1964, designed to eliminate discrimination in employment based upon race, color, religion, sex, or national origin, through the investigation and conciliation of complaints of discrimination and through programs to secure voluntary compliance from employers and others covered by the act.

1. *Enforcement.*—Provides for the investigation, determination of cause, and attempted conciliation of complaints of discrimination filed under title VII.

2. *Technical assistance.*—Develops and implements on a national, local, industry, or other appropriate level affirmative action programs to assist those subject to the act in complying with the spirit as well as the letter of the law in order to overcome past and present discriminatory practices to provide real employment opportunities for minority groups.

3. *State and local projects.*—Carries out the provisions of title VII that authorize cooperative agreements between the Commission and State and local fair employment practice agencies to reduce discrimination in employment.

4. *Legal and research program support.*—Furnishes legal guidance to Commission staff and the public relative to all aspects of title VII; and develops and interprets statistical analyses and other background data to support Commission programs.

5. *Administration.*—Provides executive direction, staff support in public and congressional relations, and administrative and housekeeping services for Commission programs.

EXPORT-IMPORT BANK OF THE UNITED STATES

Federal Funds

Public enterprise funds:

The Export-Import Bank of the United States is hereby authorized to make such expenditures within the limits of funds and borrowing authority available to such corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation, except as hereinafter provided.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

¹ Balances of selected resources are identified on the statement of financial condition.

The Export-Import Bank of the United States was organized in 1934 and its existing programs are authorized under the Export-Import Bank Act of 1945, as amended. The purpose of the Bank is to aid in financing and to facilitate U.S. exports and imports.

Since export expansion is essential to the Administration's effort to achieve a more favorable U.S. balance of payments, the Bank has vigorously embarked on a series of new programs specifically designed to help U.S. exporters enter new and develop existing overseas markets. These programs include:

1. Expanding existing guarantee and insurance programs, which have been made more attractive by the introduction last year of the medium-term-short-term combination policy, and by authorizing under the Export Expansion Facility short-term policy Special Buyer Credit Limits.

2. Increasing the use of the financial guarantee facility, which permits the Bank to offer significant assistance to exporters and commercial bank financing of exports.

3. Guaranteeing foreign bank dollar loans to their importers, if the loan is used to purchase U.S. products. This has the advantage of providing the U.S. balance of payments with an immediate impact for the full value of the exports, as opposed to having the favorable impact spread over a period of time as would be the case if a U.S. commercial bank made the loan. However, the Bank will not allow this program to become competitive with U.S. banks—it will be used only when U.S. banks are not willing or able to make the credit.

4. Assisting, under the direct credit program, areas such as commercial jet aircraft, nuclear power, agriculture machinery, machine tools, and engineering and construction machinery, which offer outstanding opportunities for significant increases in U.S. exports.

5. Increasing the use of the Bank's relending facility in cooperation with various foreign banks.

6. Implementing the new discount program, which since its inauguration July 1, 1969, has brought requests for over 300 advance commitments from more than 50 commercial banks.

7. Promoting and encouraging the use of Eximbank's facilities by having exhibits and representatives at trade fairs, visiting individual exporters and commercial banks,

Public enterprise funds—Continued

mailing promotional and informative literature to banks and exporters, and speaking at and participating in meetings of various organizations and conferences.

8. Emphasizing improved administrative efficiency to provide better and faster service to Eximbank's customers.

The following tables show the proposed 1971 new program activity compared to the actual for 1969 and the estimate for 1970.

¹ Includes loans sold with recourse that are charged fractionally at 25%.

Operating results and financial condition.—The Bank is a wholly owned Government corporation. Capital stock of \$1 billion was purchased by the U.S. Treasury. In addition, the Bank is authorized to borrow from the Treasury up to \$6 billion; the Bank pays interest on such borrowings.

The Bank's net income is estimated to be \$120,878 thousand in 1971, compared with \$122,917 thousand in 1970 and \$104,029 thousand in 1969. From its net income, the Bank paid a \$50 million dividend to the Treasury in 1969 and added the remaining balance of \$54 million to its retained earnings reserve to provide for future contingencies. The Bank expects to follow a similar course in 1970 and 1971. Total investment of the Government in the corporation is estimated to be \$5,054 million on June 30, 1971.

LIQUIDATION OF CERTAIN RECONSTRUCTION FINANCE CORPORATION ASSETS

Reorganization Plan No. 2 of 1954 relating to the liquidation of the Reconstruction Finance Corporation transferring certain foreign bonds, notes, and securities to the Export-Import Bank became effective as of close of business, June 30, 1954.

In April 1969, the remaining securities were converted to notes totaling \$3 million. The proceeds of these notes will be credited directly to the Treasury Department, who will establish and maintain all of the accounts for these securities and render all necessary reports.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their co-operatives.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year limitations on administrative expenses.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of: 12 Federal land banks; 13 banks for cooperatives; 12 Federal intermediate credit banks; 652 Federal land bank associations; and 451 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

This fund is available to the Governor of the Farm Credit Administration as a revolving fund for investment in the class A capital stock of the Federal intermediate

credit banks and class A and class C stock of the production credit associations.

Budget program.—On December 31, 1968, the Government's investment in the class A stock of the banks was retired in full, thus making them privately owned. The \$107 million paid the Treasury for government capital stock was distributed: \$43 million as a credit to proprietary receipts of the general fund, and \$64 million as a credit in this fund. Also, the last of the Government's investment in the production credit associations was repaid. No return of Government capital in any of the banks or associations is anticipated in the near future.

The banks for cooperatives, as mixed-ownership enterprises, were operated through a trust revolving fund up to December 31, 1968, when they became privately owned. This budget presentation relates only to the period up through that date, including the conversion to private ownership. Their activities during the remainder of 1969 and estimates during 1970 and 1971 are presented in an annexed budget in Part III of this document.

Ownership and structure.—The banks, of which there are 13, are under the general supervision of the Farm Credit Administration. They finance the operation of farmers' cooperatives.

The banks' lending funds are obtained primarily from the sale of debentures to the public and from their own capital. The debentures are not guaranteed by the U.S. Government, either as to principal or interest. Their administrative expenses are paid out of their own resources. Thus, neither their lending funds nor expenses are obtained by direct appropriation from the Government.

The banks' capital funds now consist of capital stock owned by borrowing cooperatives, equities of borrowing cooperatives, and retained earnings. The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. At the time the 1955 Act was passed, the U.S. Government had an investment in the

Public enterprise funds—Continued

BANKS FOR COOPERATIVES FUND—Continued

banks of \$150 million. By December 31, 1968, this investment had been retired in full while the equities of borrowing cooperatives amounted to \$205 million.

Budget program.—The banks are permitted by law to borrow the money needed to meet loan commitments at a debt-to-capital ratio of 8 to 1. The authorization to borrow counts as budget authority. Actual borrowings were kept to the sum needed for the banks' activities.

Conversion to private ownership.—Public Law 90-582 was enacted on October 17, 1968, to expedite retirement of Government capital from the banks and from other institutions in the Farm Credit System. Accordingly, on December 31, 1968, there was transferred from the banks for cooperatives to certain Treasury funds, the sum of \$19,826,811, in full payment of the Government capital stock, the par value of which was recorded at \$21,735,600. With this transaction, title to the Government's share of the banks' retained earnings, valued at \$12,346,934, was vested in the private stockholders. Also, this transaction removed the banks from the category of mixed ownership enterprises, and therefore, from the budget totals.

The conversion to private ownership significantly reduced both the loans outstanding and the agency debt outstanding in the Government's central accounts. Under ordinary circumstances, such transactions would be recorded as a reduction in budget outlays. However, only a sum equal to the revalued capital stock has been so credited in the budget accounts; the remainder of the conversion credits have been reported as special items outside the budget totals, as follows:

CONVERSION TRANSACTIONS

[In thousands of dollars]

Noncash assets transferred to private ownership:			
Loans.....	1,561,222		
Acquired security and collateral.....	531		
Accounts receivable.....	26,177

The Federal intermediate credit banks, as mixed-ownership enterprises, were operated through a trust revolving fund up to December 31, 1968, when they became privately owned. This budget presentation relates only to the period up through that date, including the conversion to private ownership. Their activities during the remainder of 1969 and estimates during 1970 and 1971 are presented in an annexed budget in part III of this document.

Ownership and structure.—The banks, of which there are 12, are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to, local financing institutions, such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of debentures to the public and from their own capital. The debentures are not guaranteed by the U.S. Government, either as to principal or interest. Their administrative expenses are paid out of their own resources. Thus, neither their lending funds nor expenses are obtained by direct appropriation from the Government.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the

Public enterprise funds—Continued

FEDERAL INTERMEDIATE CREDIT BANKS FUND—Continued

banks. However, because of the increased credit demands placed upon the Federal intermediate credit banks, it was necessary for the Government to invest additional capital in the banks in order to permit the banks to borrow the money to meet these demands within the 10-to-1 debt-to-capital ratio then permitted by law. Public Law 89-237 enacted on October 4, 1965, increased the maximum debt-to-capital ratio of the credit banks to 12 to 1, and Public Law 90-345 enacted on June 18, 1968, further increased this ratio to 20 to 1.

Budget program.—During 1969, the banks extended credit totaling \$6.3 billion. In the first 6 months of 1969, the gross loans were \$3.0 billion, more than offset by receipts, which brought net outlays to a negative \$332 million (that is, to net receipts of that amount).

Budget authority.—The change in borrowing ratio mentioned above, together with the increase in privately owned capital stock and the growth of retained earnings in 1968, increased by \$3 billion the banks' authority to issue debentures and notes. The authorization to borrow counts as budget authority. Actual borrowings were kept to the sums needed for the banks' activities.

Conversion to private ownership.—Public Law 90-582 was enacted on October 17, 1968, to expedite the retirement of Government capital from the banks and from other institutions in the Farm Credit System. Accordingly, in December, there was transferred from the Federal intermediate credit banks to certain Treasury funds, the sum of \$107,496,625, in full payment of the Government's capital stock, the par value of which was recorded at \$125,789,120. With this transaction, title to the Government's share of the banks' retained earnings valued at \$33,937,770 was vested in the private stockholders. Also, this transaction removed the banks from the category of mixed-ownership enterprises, and therefore from the budget totals.

The conversion to private ownership significantly reduced both the loans outstanding and the agency debt outstanding in the Government's central accounts. Under ordinary circumstances, such transactions would be recorded as a reduction in budget outlays. However, only a sum equal to the revalued capital stock has been so credited in the budget accounts; the remainder of the conversion credits have been reported as extraordinary items outside the budget totals, as follows:

CONVERSION TRANSACTIONS

[In thousands of dollars]

Noncash assets transferred to private ownership:	
Loans.....	3,675,327
Accounts receivable.....	105,930
Other assets.....	5,556

The Board determines appeals by coal mine operators, seeking annulment or revision of, and temporary relief from, orders issued by the U.S. Bureau of Mines, under Title II of the Federal Coal Mine Safety Act, as amended on March 26, 1966. This act was repealed by the Federal Coal Mine Health and Safety Act of 1969, approved on December 30, 1969, and it is anticipated that the functions of the Board, which are continued for an interim period under the provisions of the new act, will be completed during fiscal 1970.

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to (1) attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and (2) regulate the rates and services of communications common carriers.

1. *Commissioners.*—This activity includes the top adjudicatory, policymaking, planning, and decisionmaking for the Commission's basic functions.

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. Pertinent data are shown in the following table:

	1968 actual	1969 actual	1970 estimate	1971 estimate
Stations regulated ¹	10,194	10,590	10,940	11,280
Applications received for new stations or major change of facilities:				
AM.....	304	188	25	25
FM.....	442	393	400	375
TV.....	128	77	75	75
Translators.....	424	361	350	350

¹ As of June 30 of each year.

3. *Common carrier.*—The Commission regulates the rates and practices of telephone, telegraph, and cable companies including satellite communications and con-

siders proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications to use radio in communication services.

4. *Safety and special.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follows (in thousands):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Stations regulated ¹	1,723	1,769	1,797	1,835
License applications received.....	669	705	733	771

¹ As of June 30 of each year.

5. *Field engineering.*—Field employees inspect radio stations; administer operator examinations; collect engineering data; monitor the spectrum; and determine the location of lost ships, lost aircraft, and illegal sources of radio emission.

6. *Research and planning.*—The Commission undertakes broad studies designed to improve the utilization of the radio spectrum, approves certain equipment for public use, and licenses experimental radio stations.

7. *Community antenna TV.*—The Commission regulates and governs the CATV system which receives and amplifies the transmission of one or more TV broadcast stations and then redistributes the signals by cable to private homes or places of business of those who subscribe to the service for a fee.

8. *Support activities.*—This activity includes the professional management and legal services provided to the Commission as well as all routine administrative services.

The Corporation was created by Congress for the purpose of protecting bank depositors and to foster sound practices in the Nation's banking system. As of June 30,

1969, the deposit insurance fund amounted to \$3.9 billion. The entire fund is considered a reserve for the protection of depositors in insured banks and for the payment of administrative and insurance expenses. Income is accumulated principally from assessments paid by insured banks and interest from its investments in obligations of the U.S. Treasury. The insurance fund is strengthened by an authorization to borrow up to \$3 billion from the Treasurer of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1970 and 1971.

¹ No provision is made in this report for expenses which might be incurred by reason of additional bank closings after Sept. 11, 1969, because there is no sound basis for predicting which, if any, insured banks will close in the future.
² Balances of selected resources are identified on the statement of financial condition.

The Federal Deposit Insurance Corporation was created by Congress to provide protection for bank depositors and to foster sound banking practices. Initially, deposit insurance was limited to \$2,500 per depositor. This protection was increased to \$5 thousand, then to \$10 thousand and finally in 1966 to the present maximum of \$15 thousand. In order to accomplish its varied functions in the protection of bank depositors the Corporation is authorized

FEDERAL DEPOSIT INSURANCE CORPORATION FUNDS—Continued

to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. A basic program for examining State banks which are not members of the Federal Reserve System and liquidation activities attendant to closed insured banks constitute the major portion of the Corporation's operations.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investments in U.S. Government securities. As of June 30, 1969, the deposit insurance fund amounted to \$3.9 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the U.S. Treasurer. No borrowing under this authorization has been made to date and none is anticipated in 1970 and 1971.

The estimates for 1970 and 1971 in these statements make no provision for losses and expenses which might occur by reason of the closing of any bank after September 11, 1969 (the date on which these reports were prepared) because there is no basis for predicting which, if any, insured banks will close in the future.

The Congress has authorized appropriations of not to exceed \$500,000 for the 2-fiscal-year period ending June 30, 1971, for planning economic development programs and projects in Alaska (Public Law 91-123). The Federal Field Committee for Development Planning in Alaska plans and coordinates Federal programs involved in the enhancement and growth of Alaska's economy. In 1971, these programs will focus on promoting economic growth in northern and western Alaska and improving the living conditions of the natives.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the current fiscal year for each such corporation or agency except as hereinafter provided. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 12 Federal home loan banks, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation; it is also responsible for the examination of all Federal savings and loan associations, and for the examination and supervision of all State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the Division of Examinations, Federal Home Loan Bank Board, shall be considered nonadministrative.

Public Law 87-141, approved August 17, 1961, provides that expenses of any functions of supervision (except of Federal home loan banks) vested in or exercisable by the Board shall be considered as nonadministrative expenses.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

The expenses of the home office of the Office of Examinations and Supervision are paid from assessments

General and special funds—Continued

against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

The expenses of the field offices of the Office of Examinations and Supervision are paid from fees charged against and collected from savings and loan institutions examined and from assessments against the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan

associations, and the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 12 Federal home loan banks, and the Federal Savings and Loan Insurance Corporation.

[Dollars in millions]

	1969 actual	1970 estimate	1971 estimate
Number of members of Federal home loan bank system.....	4,856	4,710	4,550
Total assets of members.....	\$164,219	\$172,200	\$181,600
Savings invested in members.....	\$140,190	\$143,800	\$152,200
Mortgage loans of members.....	\$140,392	\$147,800	\$157,000
Number of insured institutions examined and supervised.....	4,460	4,360	4,235
Federal home loan bank advances outstanding.....	\$6,413	\$10,900	\$13,300

Budget program.—The Board's budget is based on nine activities.

1. *Examination and supervision of Federal home loan banks.*—The Board examines and supervises the operations of the Federal home loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering Federal and insuring savings and loan associations.*—Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion into Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of the insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

6. *Analysis of operations.*—An analysis is made of the financial condition of member institutions, the flow of savings, the character and volume of mortgage lending, as well as selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance, including volume of activity and interest rates of all major types of mortgage lenders.

7. *Administrative services.*—These consist of auditing; accounting, budgetary, and financial reporting; internal budget control; and fiscal organization and management. These services also include general housekeeping and operating services, including printing and reproduction work.

8. *Special studies of the savings and loan industry.*—The special study of the savings and loan industry authorized

by Public Law 89-426, 80 Stat. 141, 142, approved May 13, 1966, was completed in August 1969. Publication of the complete study by the Superintendent of Documents is expected sometime early in calendar 1970.

9. *Acquisition and construction of a building in the District of Columbia.*—The Board is authorized by Public Law 89-754, 80 Stat. 1255, 1293, approved November 3, 1966, to acquire property and construct a building in the District of Columbia to provide quarters and facilities for the Board. Under the law, the Board is required to prepare and submit an annual budget program for the building as provided in title I of the Government Corporation Control Act.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from \$5.7 million in 1970 to \$6.6 million in 1971. Nonadministrative expenses covering the expenses of examining and supervising savings and loan associations are discussed separately below.

The Office of Examinations and Supervision under the general direction of the Director of the Office conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, insured State-chartered savings and loan associations, other institutions of the savings and loan type insured by the Federal Savings and Loan Insurance Corporation, and noninsured member institutions of the Federal Home Loan Bank System not subject to State supervision. The Office also examines and analyzes the financial condition of institutions which apply for membership in the System, for insurance of accounts, or for conversion from a State to a Federal charter. The institutions examined bear the cost of examinations.

The Office is also responsible for the supervision of institutions insured by the Federal Savings and Loan Insurance Corporation. The purpose of such supervision is to prevent the development or continuance of unsafe and unsound financial practices in these institutions and to correct such practices where found. In carrying out the supervisory function, the Office reviews and analyzes the examination reports forwarded by the chief examiners of the respective district offices. The authority for examination and supervision of insured savings and loan associations was expanded by the Financial Institutions Supervisory Act of 1966, effective October 16, 1966. The Savings and Loan Holding Company Amendments of 1967, which became effective February 14, 1968, imposed additional examination and supervisory responsibilities on the Office with respect to savings and loan holding companies and their subsidiaries.

The following table reflects the work of the Office (dollars in millions):

The 12 Federal home loan banks stabilize and strengthen the member institutions which own all their capital stock. The banks obtain funds advanced to members primarily from public issuances of consolidated obligations. Authority to borrow from the Treasury was increased from \$1 to \$4 billion by Public Law 91-151, approved December 23, 1969. No borrowings were made prior to 1970 and none are anticipated in 1971. Borrowings in 1970 are estimated to be repaid within the year. (Transactions of the banks are shown in the annexed budgets at the end of this document.)

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U.S.C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of \$20 thousand (increased from \$15 thousand by a 1969 law), may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver or coreceiver upon request of State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board (under legislation effective July 1968, Public Law 90-389) is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

[Dollars in millions]

	1969 actual	1970 estimate	1971 estimate
Number of insured member institutions...	4,460	4,360	4,235

Corporation's reserve for insurance losses.....	\$2,627	\$2,952	\$3,176

1. *Administrative expenses subject to limitation.*—In carrying out its role of protecting savings in insured sav-

ings and loan associations the Corporation has settled 80 cases since its creation 35 years ago. Actual losses sustained and provision for losses to June 30, 1969, have amounted to \$125.9 million representing approximately 8% of cumulative gross income. Detailed information with respect to all of the insurance cases is summarized in the following table (dollars in thousands):

Method of settlement	Number	Number of investors protected	Actual losses sustained and provision for losses ¹
Acquisition of assets.....	13	75,782	\$35,949
Acquisition of assets and contribution.....	9	66,689	27,677

Total	80	502,025	125,916

¹ Actual losses sustained \$54.5 million.

2. *Payment to Federal Home Loan Bank Board for services and facilities.*—The Corporation will pay 25% of the administrative expenses of the Board as a direct charge and 48% of the remaining administrative expenses of the Federal Home Loan Bank Board in 1971 in return for services and facilities by the Board and staff offices. The Corporation will also pay 48% of the Washington office expenses and 42% of the District offices expenses of the Office of Examinations and Supervision for supervisory services by that office.

5. *Other expenses.*—Provides for liquidation and other expenses of the Corporation in connection with the disposition of assets purchased from and loans to insured institutions to prevent default.

Financing.—The original capital of \$100 million has been completely repaid to the Treasury, together with an additional \$43 million for the use of the funds.

The Corporation has continuing authority to borrow from the Treasury for insurance purposes, with a limitation of \$750 million outstanding at any one time. No borrowings under this authorization have ever been made.

The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any one year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no one year have its operating expenses amounted to more than 10% of total income; in 1969 they amounted to 7.6% and are estimated to be 9% in 1971. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, and to establish a reserve for contingencies of \$2,627.4 million as of June 30, 1969. Total revenues and other receipts since 1934, of \$2,864.6 million, have been applied as follows (in millions of dollars):

	Amount	Percent
Expense.....	\$68.3	2.4
Actual losses sustained and provision for losses.....	125.9	4.4
Return on capital stock to U.S. Treasury.....	43.0	1.5
Reserve for contingencies.....	2,627.4	91.7
Total	2,864.6	100.0

Operating expenses (funded) for 1971 are estimated at \$23.6 million, consisting of administrative expenses of the Corporation of \$408 thousand, \$10.5 million for services

rendered by the Federal Home Loan Bank Board, \$5 million for contributions to insured institutions, and \$7.6 million for other expenses.

Net operating income for 1971, which is expected to be \$13.4 million or 9.0% above the net operating income for 1969, will be retained by the Corporation to meet future contingencies.

Section 404(b) of the National Housing Act, as amended, requires each insured institution to pay a basic insurance premium in an amount equal to one-twelfth of 1% of its savings accounts. Public Law 87-210, which became effective January 1, 1962, as amended, requires annual payment to the Corporation of an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year, less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The law also provides for the crediting of a return on the accumulated prepayments of each insured association at a rate equal to the average realized by the Corporation on its own investment portfolio.

Public Law 87-210 further provides for the establishment of a primary reserve which shall be the general reserve of the Corporation and a secondary reserve to which shall be credited additional premiums. When the sum of these two reserves equals 2% of total savings, the cash payment of the regular premiums and the prepayments cease and the Corporation commences transferring the secondary reserve to the primary reserve by crediting each insured association's accumulated prepayments to its regular premium liability. (This credit is reflected on the revenue, expense, and retained earnings statement below.) If the aggregate of the two reserves drops to below 1.75%, the prepayments and the cash payment of the regular premium resume and continue until the 2% ratio is again reached. The law requires the Corporation to accumulate a primary reserve (as of the close of any December 31) equal to 2% of the total amount of all accounts of insured members before collection of regular premiums may be discontinued, provided, however, that each insured institution has paid regular premiums for at least 20 years.

Public Law 91-151, approved December 23, 1969, removed references to creditor obligations from the computation of the basic insurance premium and the base on which the required reserve levels are determined. Under this law, the maximum required level of primary and secondary reserves was deemed to have been reached on December 31, 1969. As of the end of 1971 it is anticipated that the primary reserve will reach \$1,475.8 million or 1% of estimated savings of \$141.9 billion and that the primary and secondary reserves will be at a level of \$2,951.1 million or 2.1% of these estimated savings.

Public Law 91-152, approved December 24, 1969, provided that savings losses during 1966 recaptured in later years would not be reflected as savings growth on which the liability for payments to the secondary reserve is based. This measure amended prior law which already extended such treatment to losses occurring in 1967 and later years. Refunds due to this new legislation are reflected as item 4 on the program and financing schedule.

The Federal Maritime Commission administers the shipping statutes which require regulation of the domestic offshore and international waterborne commerce of the United States. Program objectives for 1970 and 1971 are directed toward (a) continued surveillance over concerted activities of conferences and carriers engaged in the foreign commerce of the United States; (b) elimination of foreign discriminatory actions against U.S. shipping; (c) reasonable rates and practices in the domestic offshore trades in compliance with the statutes; (d) certification of financial responsibility of passenger vessel owners and operators in compliance with Public Law 89-777; (e) completion of a comprehensive economic rate study into the conditions existing in the Puerto Rico and Virgin Islands trades; and (f) continuation of a study concerning the regulatory aspects of rates, rules, and practices related to movement of containerized cargo.

The Service assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production other than rail and air transportation.

1. *Mediation and conciliation of labor disputes.*—During the last year, dispute notices and other notifications affecting approximately 85,000 employers were received by the Service. Cases totaling 21,839 were assigned for mediation and 21,986 mediation assignments were closed during the year. Cases pending at the end of the fiscal year totaled 5,113.

WORKLOAD DATA

	1965	1966	1967	1968	1969
Cases pending beginning of year.....	5,281	5,472	4,781	5,036	5,260

Cases pending end of year.....	5,472	4,781	5,036	5,260	5,113

2. *Ad hoc boards, panels, mediators, and consultants.*—Provision is made for ad hoc employment of labor relations experts, individually or in panels, in support of the mediation function; and for boards of inquiry appointed by the President in emergency disputes.

Executive Order 11491, signed October 29, 1969, places responsibility in the agency for providing mediation assistance to Federal agencies and labor organizations in the

resolution of negotiation disputes. The Service estimates it will be actively engaged in mediation of impasses in about 400 such negotiations each year. Through its preventive mediation program, the Service will also work with both contracting parties to bring about a better understanding of the collective bargaining process, and to improve their day-to-day working relationships.

Total selected resources.....	349	261	261	261

The Federal Power Commission administers the Federal Power Act and Natural Gas Act, and has additional duties relating to Federal power developments and related natural resources.

1. *Hydroelectric power regulation.*—The Commission issues licenses for non-Federal hydroelectric projects which are best adapted to comprehensive development of the country's water and related land resources, including development of recreation facilities, scenic beauty, historic sites, protection of fish and wildlife, water quality control, and provision for multiple uses of water. Projects are inspected during construction and operation for compliance with license requirements, safety and adequacy, and sound engineering practices.

Pertinent data on the Commission's licensing program are:

Description	1969 actual	1970 estimate	1971 estimate
Licensed projects—more than 2,000 horsepower (end of year).....	319	344	374
Applications completed during year.....	167	165	160
Applications pending (end of year).....	415	423	433
New construction.....	28	28	28
Unlicensed existing construction.....	154	147	158
Relicensing under section 15.....	33	49	45
Amendments, transmission lines, surrenders, etc.....	200	199	202
Annual receipts from license fees (in millions of dollars).....	\$3.5	\$4.9	\$4.0

Of a potential 178.5 million kilowatts of conventional hydroelectric power in the United States, approximately 48.8 million kilowatts had been developed as of January 1969. Of this total, 28.4 million kilowatts had been developed by non-Federal interests, of which nearly 82% are under Commission license.

The licensing program is self-supporting except for the statutory exemption of public bodies from payment of administrative fees and for certain old licenses with fixed payments for which the Commission does not have authority to require additional fees. In 1971, annual fees from licensees are expected to bring in \$4 million to the U.S. Treasury.

Public Law 90-451 provides the Commission with procedures for processing expiring licenses of projects which are subject to possible Federal takeover. Under these procedures, the Commission will in a single proceeding determine either that a project should be relicensed or recommend that Congress take over the project.

Licenses for 72 projects subject to recapture or relicensing will expire in calendar years 1970 through 1975.

The Commission participates in studying river basin developmental plans with the Departments of the Interior and Army and other Federal and State agencies to optimize utilization and protect these life-dependent resources for generations to come.

2. *Electric power industry systems evaluation.*—The Federal Power Act places upon the Commission the duty to promote and encourage the interconnection and coordination of the Nation's power systems for the purpose of assuring an abundant supply of economical electric energy while providing for the proper utilization and conservation of natural resources. At present major portions of the Nation have interconnected systems for generation, transmission, and sale of electric energy. Distribution companies can draw power from systems hundreds of miles distant when it is needed to supply the demands of their customers.

The lessons of several massive power failures pinpoint the need for continued Commission-industry cooperation to insure dependable energy to beneficiaries of power grids. The Commission and the industry are working together to implement recommendations contained in the 1967 Report to the President on Prevention of Power Failures for improving utility system planning and coordination, and enhancing reliability of bulk power supply.

The National Electric Reliability Council was established in June 1968. Utilities in five regions of the country have joined together to establish regional coordinating groups for strengthening intersystem planning, construction, and operation. Electric utilities, as required by an FPC order, reported 145 power interruptions during 1967 and 1968, and 87 in 1969.

The 1964 National Power Survey is a prime example of the Commission's constant search for improvement of its activities through studies and special analyses of the industry's problems and prospects. The regulatory objective is to assure that electric energy needs are met by timely installation of required generating and transmission facilities with a minimum impact on our environment. The Commission must balance the social concern for a healthy environment with the practical concern of supplying power, recognizing that both ends must be balanced to maintain quality of life. The Commission is working with industry to update the Survey and a new survey report will be issued in 1970. A similar power survey of Alaska was issued in July 1969.

3. *Electric power utility regulation.*—The Commission regulates the wholesale rates and service, the accounts, depreciation practices, certain security issues, disposition of property, mergers, and interlocking directorates of interstate electric utilities.

Pertinent data on a calendar-year basis are:

Description	1968 actual	1969 estimate	1970 estimate
Number of public utilities regulated.....	217	217	217
Operating revenues of regulated utilities (in billions).....	\$16.4	\$17.9	\$18.4
Number of utilities reporting for statistical purposes.....	793	793	793
Operating revenues of all reporting utilities (in billions)—includes publicly owned.....	\$19.8	\$21.4	\$23.2

In 1969, the Commission's rate program resulted in annual rate reductions totaling \$5.4 million for the year. Inflationary pressures in the economy are expected to lead to a growing number of filings requesting rate increases.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Workloads are as follows:

	1969 actual	1970 estimate	1971 estimate
Electric rate filings.....	2,259	2,202	2,302
Electric cases.....	37	38	37

4. *Natural gas pipeline regulation.*—There were 123 natural gas pipeline companies regulated by the Commission in 1969. Although this figure will remain approximately the same in 1970 and 1971, the industry will continue to grow at a rate of 5% to 7% each year. As a result of increased cost pressures on the industry, the number of proceedings involving rate increase proposals opposed by consumers, the Commission staff, State and local regulatory agencies, and other interested parties are rising at a rapid pace.

The regulatory responsibilities of the Commission affect millions of natural gas consumers, the millions of stockholders of the individual pipeline companies, and the metal fabrication and construction industries. The speed and care by which certificate and rate cases are adjudicated bear significantly on the economic health of the natural gas industry and the Nation's economy in general.

On November 30, 1969, there was in excess of \$400 million involved in cases before the Commission, under suspension or in effect subject to refund. This compares to \$121.4 million in rate increases involved in the pipeline rate cases before the Commission on November 30, 1968.

Filing fees levied on applications for pipeline certificates are expected to bring \$2 million into the Treasury in 1971 to help defray the cost of pipeline regulation.

Pipeline workloads are as follows:

	1969 actual	1970 estimate	1971 estimate
Applications for certificates of public convenience and necessity.....	695	714	717
Rate filings.....	1,454	1,519	1,557
Cases.....	104	122	132

The Commission reviews annually the earning levels of pipeline companies and verifies flowthrough of refunds and rate reductions acted upon by the Commission. In 1969, the Commission approved annual rate reductions totaling \$80.6 million and refunds of \$111.8 million.

5. *Natural gas producers regulation.*—The Commission regulates about 4,000 natural gas producers who had a total of over 18,000 rate schedules on file as of June 30, 1969. The Supreme Court's affirmation of the Permian Basin Opinion in May 1968 firmly established the Commission's area rate concept of producer regulation—fixing ceiling prices for gas by geographic area—and generated a significant workload of rate compliance filings and refund reports. By 1971, the Commission will have issued opinions on just and reasonable rates for areas producing 93% of the jurisdictional sale of gas. More importantly, planning is underway for updating the area price ceilings on a continuing, coordinated, and comprehensive basis.

Work program	1969 actual	1970 estimate	1971 estimate
Applications for certificates of public convenience and necessity.....	3,603	3,813	4,018
Rate filings.....	10,053	10,379	12,310
Cases.....	7	6	7

Refunds ordered during 1969 in the Permian Basin alone amounted to \$89.7 million. Nationally, increases proposed and suspended by the Commission for investigation amounted to some \$134 million annually at the end of fiscal 1969.

6. *Natural gas industry systems evaluation.*—The Commission plans to initiate a National Gas Survey in 1971.

To carry out its regulatory responsibilities to assure adequate service to the consumer, it is essential that the Commission analyze basic data relating to gas supply and production, transmission and distribution facilities. The National Gas Survey will be an essential complement to the National Power Survey in forecasting energy service and requirements. There are indications of a natural gas shortage which may be attributable in part to unreliable regulatory and industry forecasts in the past.

7. *Services to other agencies and to the public.*—The Commission studies industry systems and reports significant data on a recurring basis for use of other agencies, the industries and the public.

The owners of non-Federal hydroelectric projects which derive benefits from upstream Federal reservoirs are assessed annual charges determined by the Commission. Collections amounting to \$2.6 million were received during 1969 for benefits provided by projects of Interior's Bureau of Reclamation and the Department of Army.

The Commission assists other Federal agencies in planning the development of power at water resources projects. For certain Federal projects, it approves the rate for sale of power and allocates the cost to project purposes. It participates in activities of the Water Resources Council and in Federal-State water resources studies.

8. *Administration.*—This activity includes executive, managerial, and support personnel whose functions are applicable to the Commission as a whole.

¹ Includes capital outlays as follows: 1969, \$0; 1970, \$1 thousand; 1971, \$1 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$40 thousand (1969 adjustments, -\$5 thousand); 1969, \$18,000 thousand; 1970, \$0; 1971, \$0.

The purpose of the Federal Radiation Council is to advise the President with respect to radiation matters, directly or indirectly affecting health, including guidance for all Federal agencies in the formulation of radiation standards, and in the establishment and execution of programs of cooperation with the States. The Council was established by Executive Order 10831, August 14, 1959, and Public Law 86-373 (sec. 274h).

The Council membership consists of the Secretaries of Health, Education, and Welfare (Chairman); Agriculture; Commerce; Defense; Interior; Labor; and the Chairman of the Atomic Energy Commission.

The Council recommends basic guides for radiation protection. When approved by the President, these guides become the basis for the promulgation of operational procedures and regulations by Federal agencies. The Council's activities in radiation protection and evaluation of health effects of radioactive materials have resulted in a number of memorandums and reports to the President, to agencies of the Executive branch, and to the public.

The funds requested provide for the salaries of the permanent staff, consultant services which are required from time to time on different projects, and funds for

General and special funds—Continued

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly*.—All types of monopolistic restrictions, including price-fixing conspiracies, boycotts, price discriminations, and illegal mergers and acquisitions are examined and corrected. Economic analysis is used in the development of antimonopoly cases. The Commission also oversees the registration and operation of associations of American exporters engaged solely in export trade. In 1971, program activities will emphasize investigation and trial of mergers and other antimonopoly cases, particularly trade restraints in basic consumer industries; expanded compliance efforts to halt illegal mergers and enforce divestiture orders, and an increased enforcement effort to implement Commission decisions.

2. *Deceptive practices*.—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including voluntary trade-practice conferences and advertising guides; business and the public are protected from misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1971, program activities will emphasize consumer protection and education; additional clarification and enforcement of the Fair Packaging and Labeling Act, increased compliance enforcement of Commission orders, monitoring of food and drug advertising, scientific advice and assistance on product content, and affirmative action on product disclosure and standardization.

3. *Consumer credit enforcement*.—Inspections and other enforcement activities of the program will expand as recruiting, training, and organizing permit.

4. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

The Foreign Claims Settlement Commission is responsible for the settlement of claims of U.S. nationals against foreign nations and other claims programs as authorized by law.

Administration and adjudication of claims.—The Commission will administer three claims programs in 1971. Public Laws 88-666, 89-780, and 90-421 require, respectively, the adjudication of an estimated 7,400 claims of U.S. citizens against the current Cuban regime, approxi-

Funds were appropriated in 1963 pursuant to Public Law 87-616 to cover the balance of payments to be made on award previously determined by the Philippine War Damage Commission. Amending legislation (Public Law 88-94), enacted August 12, 1963, placed a \$25 thousand limit on payments of any individual claim. Amounts payable beyond the \$25 thousand limitation were appropriated to the President in 1966 and 1967 for educational programs in the Philippines.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders (total selected resources), 1968, \$0; 1969, \$9 thousand; 1970, \$9 thousand; 1971, \$9 thousand.

The American Revolution Bicentennial Commission (ARBC) was established in July of 1966 by Public Law 89-491 to "plan, initiate, develop, and coordinate" the 200th anniversary of the United States. The Commission will prepare for the President a National Bicentennial Plan submitting its report to the President on July 4, 1970. That report will be the product of the Commission's planning efforts from January 1969 to July 4, 1970, and will incorporate in it the ARBC's recommendations for State, local, national, and international events, activities, and programs related to a truly national anniversary throughout the United States, and the world, with a role and sense of involvement for every American.

This independent Commission of five members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States. Of the 605 claims filed, approximately 305 have been completed. Payments of awards are dependent upon subsequent appropriations made through claims, judgments, and private relief acts appropriations to the Treasury Department.

This appropriation provides for continuing attention by the Commission to interrelations of Federal, State, and local governments. The Commission brings together representatives of Federal, State, and local governments for consideration of common problems and easing of friction points in the Federal system. The policies, administration and coordination of Federal and State grant and other programs having an intergovernmental impact are examined and emerging problems of Federal-State-local relations are identified and explored.

Federal and State proposals in the field of taxation are developed and reviewed with a view to balance, simplification and reduction of overlap and costs of tax administration.

Technical assistance is provided in the review of proposed legislation to determine its overall effect on the Federal system, and the most desirable allocations of governmental functions, responsibilities, and revenues among the several levels of Government are recommended.

Recommendations and published studies growing out of the Commission's work are submitted to the executive or legislative branches of Federal, State, and local governments.

The Appalachian Regional Commission's 1971 budget calls for a total in Federal and State funds of \$1,897 thousand. Under the act, the Federal Government has full funding responsibility for the Federal staff of the Commission, the States' responsibility for the Office of States' Regional Representative, and the Federal and State Governments share equally in bearing the costs of the Commission staff and Commission operations.

The Appalachian Regional Development Act assigns the following major responsibilities to the Commission:

(1) Develop, on a continuing basis, comprehensive and coordinated plans and programs and establish priorities thereunder, giving due consideration to other Federal, State, and local planning in the region;

(2) Conduct and sponsor investigations, research, and studies, including an inventory and analysis of the resources of the region, and, in cooperation with Federal, State, and local agencies, sponsor demonstration projects designed to foster regional productivity and growth;

(3) Review and study, in cooperation with agency involved, Federal, State, and local public and private programs and, where appropriate, recommend modifications or additions which will increase their effectiveness in the region;

(4) Encourage private investment in industrial, commercial, and recreational projects;

(5) Serve as a focal point and coordinating unit for Appalachian programs.

It is the function of the Federal cochairman of the Commission and his staff to coordinate the Appalachian program with all Federal agencies.

The Appalachian Regional Development Act also provides for a professional Commission staff. Employees of the Commission, under the act, are determined not to be Federal employees but are the joint employees of the Federal and State Governments.

As authorized in the Appalachian Regional Development Act, the 13 Appalachian States share with the Federal Government the administrative expenses of the Appalachian Regional Commission. The States will advance funds in the amount of \$738.5 thousand to pay their share of these expenses for 1971.

The Appalachian Regional Commission will provide technical support for the research and local development districts programs by an advance of funds in the amount of \$200 thousand from the Appalachian Regional Development Programs appropriation.

The office of the States' Regional Representative established by the Appalachian State Governors and supported solely by the States, represents the 13 Appalachian States in the day-to-day operation of the Commission.

This appropriation provides for the Federal share of the annual expenses of the Commission. The compact provides that the amount required to balance the Commission's current expense budget shall be apportioned equitably among the signatory parties by unanimous vote of the Commission. The amount recommended for the Federal contribution to the Commission's annual expense budget for 1971 is approximately 24 percent, exclusive of the grant portion of the water quality program.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Federal Funds

General and special funds:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), \$5,000. (Public Works Appropriation Act, 1970.)

Contribution to the Commission.—The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution. This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission. The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

Federal Funds

General and special funds:

FEDERAL CONTRIBUTION

To enable the Department of Transportation to pay the Washington Metropolitan Area Transit Authority, as part of the Federal contribution toward expenses necessary to design, engineer, construct, and equip a rail rapid transit system, as authorized by the National Capital Transportation Act of [1965] 1969 (Public Law 91-143), [as amended (79 Stat. 663; 80 Stat. 1352; 81 Stat. 670)], including acquisition of rights-of-way, land and interests therein, [\$43,173,000] to remain available until expended \$180,028,000 for the fiscal year 1971, and \$188,011,000 for the fiscal year 1972.

The Washington Metropolitan Area Transit Authority, a non-Federal agency, was established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary function is to plan, develop, finance, and provide for the operation of a rail rapid transit system to serve the National Capital Area.

In accordance with the National Capital Transportation Act of 1969 (Public Law 91-143), approved December 9, 1969, the Authority has responsibility for the development of a full regional transit system which will extend from a central distributor system within the District of Columbia out into the participating jurisdictions of Maryland and Virginia. The system includes a total area-wide network of approximately 98 miles. Under this authorization the Federal share is two-thirds of the net project cost.

Engineering and architectural activities have been carried forward and substantial progress made in the development of system standards, criteria, specifications, and scheduling matters, together with extensive soil investigations and testing essential to the engineering program. Contracts for final design of those sections of the system scheduled for early construction have been completed. Actual construction of the system was commenced on December 9, 1969.

Final design contracts will be let for the remainder of the originally authorized basic system by the end of 1971 and final design awards for project units on routes in the newly authorized regional system will be accelerated. Construction will proceed as programed so that the full system will become operational in 1979. The acquisition of land and rights-of-way will proceed in phase with the design and construction programs along with relocation of utilities required by construction.

In order for the Transit Authority to sell its own revenue bonds on a sound planning basis and to permit the local participating jurisdictions to adequately plan the funding of their annual capital contributions by sale of their bonds, funds for the Federal share of the 1972 program are also being requested at this time. With a year in advance funding of the Federal contribution, financial planning can proceed on a more orderly basis.

The 1971 budget is the first year in which revenue bonds to be issued by the Transit Authority will be available to help finance the regional transit program. The sources of funding and the overall financial plan are as follows (in thousands of dollars):

¹ Includes \$687 million in net bond proceeds, \$61 million for debt service during construction, \$43 million from system net revenues and \$44 million in interest earned on construction funds, of which \$10 million from interest earned on local jurisdiction contributions is to be used for executive management costs of the Transit Authority.

² Includes \$82.9 million proposed for separate transmittal.

³ Includes \$18.7 million to match Federal funds appropriated in 1969.

A supplemental appropriation for 1970 is anticipated for separate transmittal.

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY—Continued

General and special funds—Continued

The Commission regulates surface transportation in interstate commerce and foreign commerce to the extent that it takes place within the United States.

1. *Regulation of carrier rates, practices, operating authorities, and finance.*—This activity of the Commission consists of preparing studies and analyses of operating costs for use in rate proceedings; regulating rates; granting operating authorities; approving applications for abandonments and extensions of railroad lines, financial reorganizations, and rate agreements between carriers; reviewing proposed discontinuances of or change in the operation

or service of trains and ferries and formally issuing orders, rules, and regulations.

SELECTED WORKLOAD DATA

	1969 actual	1970 estimate	1971 estimate
Application for permanent motor carrier operating authorities:			
Received during year	5,021	5,300	5,700
Disposed of during year	5,129	5,200	5,200
Other proceedings:			
Received during year	239	200	200
Disposed of during year	197	200	200
Cases involving finance matters:			
Received during year	2,155	2,200	2,200
Disposed of during year	2,146	2,150	2,150
Rate proceedings:			
Filed during year	1,085	1,200	1,200
Disposed of during year	1,142	1,150	1,150

2. *Compliance.*—The Commission enforces statutes and regulations affecting transportation and carriers. Examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and investigations are made of water carriers, freight forwarders, rate bureaus, and shippers' associations and agents to determine that there is compliance with statutory requirements.

SELECTED WORKLOAD DATA

	1969 actual	1970 estimate	1971 estimate
Enforcement activities:			
Investigations instituted	1,004	1,200	1,200
Investigations concluded	1,075	1,200	1,200
Court proceedings instituted	634	700	700
Court proceedings concluded	573	700	700

3. *Supervision and analysis of carrier accounting and statistics.*—The Commission is responsible for the formulation and policing of uniform systems of accounts; the maintenance of current inventory and cost records; the development of elements of value used in regulating carriers; the compiling of statistics from carrier reports; and the preparation of studies of operating, financial, and related transportation problems.

SELECTED WORKLOAD DATA

	1969 actual	1970 estimate	1971 estimate
Field audits of carrier accounts	1,445	1,340	1,340

4. *Supervision and interpretation of tariffs.*—Carrier tariffs, or rate schedules, are examined for compliance with the Commission's tariff rules; authority to publish rates on less-than-statutory notice is, under certain conditions, granted; and informal complaints and carrier requests to pay reparations are processed.

SELECTED WORKLOAD DATA

1. *Planning development of the National Capital.*—The National Capital Planning Commission is the official planning agency for the District of Columbia as well as for the Federal Government in the District and the National Capital region. In planning for the orderly development of the Nation's Capital, the Commission develops and maintains long-range comprehensive plans and makes recommendations on specific land use and development projects.

2. *Pennsylvania Avenue redevelopment planning.*—The Temporary Commission on Pennsylvania Avenue was established by Executive Order No. 11210 of March 25, 1965. The 20-member Commission includes cabinet officers and the heads of agencies with specific interests in the Avenue. Funds appropriated to the National Capital Planning Commission for financing expenses of this temporary Commission were terminated on October 15, 1969.

¹ Capper-Cramton Act, May 29, 1930, as amended (46 Stat. 482).
² Includes \$3,000 thousand for loan (advances) to Maryland.
³ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$277 thousand; 1969, \$277 thousand; 1970, \$0; 1971, \$0.

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along both shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon. One-half the cost is borne by the local jurisdictions.

2. *Stream valley parks.*—Land has been acquired by public bodies with the aid of a one-third contribution from the National Capital Planning Commission. No further grants for land acquisition are anticipated.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is acquired in the District of Columbia, with all expenditures being repaid over a period of years to the United States by the District of Columbia. Acquisitions are part of the comprehensive plan for the park, parkway, and playground system of the National Capital.

The purpose of the National Foundation on the Arts and the Humanities is to improve the quality of American life. Two operating units, the Arts Endowment and the Humanities Endowment, promote the arts and humanities through grants, consultative services with public and private agencies and the stimulation of private philanthropy. The Foundation may receive private gifts, either for specific purposes or unrestricted as to use, which are matched by Federal appropriations.

1. *Promotion of the arts.*—Grants are made to individual artists, institutions, organizations, and State arts councils. Programs assist individual artists, sustain independent artistic institutions, increase citizen participation and enjoyment of the arts, encourage productions of cultural significance, expand audiences for the arts and further planning and research. Increased funds in 1971 will be used to assist major artistic and cultural institutions and State arts councils.

2. *Promotion of the humanities.*—Grants support research and publication, strengthen all levels of the educational system and promote public programs. Fellowships are provided for teachers and scholars. These efforts aim at bringing Americans into contact with humanistic thought and improving the quality of knowledge and teaching in the humanities. A new program of development grants to colleges and universities will be started in 1971.

NATIONAL LABOR RELATIONS BOARD

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, \$37,930,000: Provided, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$380 thousand; 1969, \$317 thousand; 1970, \$330 thousand; 1971, \$280 thousand.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Additional funds are requested to enable the agency to effectively cope with a steadily rising caseload in both unfair labor practice and representation cases. Estimates for 1971 reflect an intake increase over 1970 of 5.4% for unfair labor practice cases and 1% for representation cases.

1. *Field investigations and determinations.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. About 88% of the unfair labor practice cases and about 83% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives for the voluntary settlement of disputes, and the high incidence of informal settlements achieved thus far is expected to continue in 1971.

2. *Trial examiner hearings.*—Trial examiners conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in trial examiner decisions. In 1969 there were 1,057 hearings held, 165 proceedings adjusted and 952 decisions issued. The estimate for 1970 is for 1,085 hearings, 163 adjusted proceedings and 888 decisions. The 1971 estimate is for 1,026 hearings, 158 adjusted proceedings and 854 decisions.

3. *Board adjudication.*—In an unfair labor practice case a trial examiner's decision becomes a Board order if no exceptions are filed. About 33% of these trial examiner decisions become automatic Board orders or are complied with voluntarily. The remainder are referred to the Board for decision, of which the Board issued 813 in 1969. The estimate for 1970 is 725 and the estimate for 1971 is 680. The Board issued 194 decisions in contested representation proceedings in 1969; it is estimated that issuances will be 189 and 191 in 1970 and 1971, respectively. These decisions are inclusive of those cases in which a request for review of regional directors' decisions has been granted. Regional directors issued 1,842 such decisions in 1969 and the estimate is 1,847 for 1970, and 1,838 in 1971.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the courts to enforce its decisions. In 1969 a total of 335 Board decisions of all kinds required litigation; the estimate for 1970 is 384 and the estimate for 1971 is 310.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$98 thousand (1969 adjustment, -\$65 thousand); 1969, \$33 thousand; 1970, \$40 thousand; 1971, \$40 thousand.

1. *Mediation.*—The Board mediates labor disputes and determines collective bargaining representatives for the 700 carriers and the 1 million employees in the railroad and airline industries.

MEDIATION CASES

	1968 actual	1969 actual	1970 estimate	1971 estimate
Pending, start of year.....	629	589	491	451
Received during year.....	261	324	360	360
Closed during year.....	301	422	400	400
Pending, end of year.....	589	491	451	411

2. *Voluntary arbitration and emergency disputes.*—When mediation fails, the parties are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint an emergency board to investigate and report on the disputes as a basis for agreement. Neutral members of arbitration boards and members of emergency boards are paid from this account. Boards of adjustment established pursuant to provisions of Public Law 89-456 are also financed under this program.

NUMBER OF BOARDS CONVENED

	1968 actual	1969 actual	1970 estimate	1971 estimate
Arbitration boards.....	10	5	10	10
Emergency boards.....	2	4	7	7
Special boards of adjustment.....	83	74	50	50
Public law boards.....	125	222	250	300

3. *Adjustment of railroad grievances.*—Railroad employee grievances resulting from application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board. The Board is composed of an equal number of carrier and union representatives compensated by the party or parties he represents. Administrative direction and guidance is provided by the administrative officer and clerical assistants who are compensated by the National Mediation Board. The appropriation also provides for neutral referees to sit with the Board when they are deadlocked.

Funds to support the First Division of the National Railroad Adjustment Board which is currently dormant have been reallocated to boards of adjustment for 1970 and 1971.

¹ Reimbursement for research support services, primarily for university research scientists (e.g., balloons and helium provided by the National Balloon Flight Center at Palestine, Tex.).

The programs of the National Science Foundation provide basic support for development of fundamental knowledge in all fields and disciplines and development of related manpower. This knowledge and basic capability is needed to meet the challenge of maintaining a viable and growing technologically based physical and social environment. Funds are included to continue support of the required discipline oriented research but with a markedly increased emphasis in promoting research in areas where new scientific understanding is needed to aid in the solution of pressing problems affecting mankind.

Increased funds are planned for interdisciplinary research directed at problems of our society, and additional emphasis will be given to projects in the environmental area, including studies of atmospheric processes, oceanography, and ecological systems.

Increased funds are also included for three new programs in the National and Special Research Programs category. These are the Arctic Research Program, the Earthquake Engineering Program, and the International Decade of Ocean Exploration. The Arctic Research Program will focus on ecological studies along the north slope of Alaska and environmental changes introduced by recently initiated development of this region. The International Decade of Ocean Exploration is planned to enhance and augment research in ocean sciences which will contribute to the more effective utilization of the ocean environment and ocean resources.

Increased funds are also included for continued U.S. participation in the International Biological Program (IBP) to permit the Foundation to initiate major integrated research efforts on biological productivity and human adaptation to changing environments, as well as studies of complete ecosystems.

The budget continues support for development and improvement of science and engineering at undergraduate and graduate educational institutions, for improvement of the quality of science instruction in secondary schools, and for the further development of discipline-based science information systems.

1. *Support of scientific research.*—The budget provides for the award of grants and contracts in the various activities as follows:

(a) *Scientific research project support.*—Under this program, the Foundation provides support based on merit, for unsolicited research projects submitted by individual scientists or groups of scientists and for research in specific areas determined by the Foundation to require increased support to promote the national interests.

GRANTS FOR SUPPORT OF SCIENTIFIC RESEARCH PROJECTS

	1968 actual	1969 actual	1970 estimate	1971 estimate
Number of grants awarded.....	3,832	4,053	3,984	4,305

(b) *Specialized research facilities and equipment.*—The Foundation provides support for major specialized scientific facilities and items of equipment, primarily at colleges and universities, required for the conduct of advanced scientific studies.

(c) *National and special research programs.*—The Foundation develops and supports programs in this category in those instances where the magnitude of the effort requires planning and funding on a national basis and in situations where a special research effort is likely to have a beneficial impact on current problems.

(d) *National research centers.*—The Foundation supports the development and operation of national research centers to meet national needs for research in specific areas of science requiring facilities, equipment, and operational support beyond the financial capabilities of academic institutions. Funds are provided for the support of five National Research Centers.

2. *National sea grant program.*—This program provides support, primarily at academic institutions, for research education and training, and advisory services, aimed at assisting man in the intelligent utilization of resources of the seas and the development of the resource potential of the Great Lakes of the United States.

3. *Computing activities in education and research.*—Support is provided for projects designed to explore new applications of computers to education and research and to promote experiments in multi-institutional cooperation in computer utilization.

4. *Science information activities.*—The Foundation supports the collection, translation, and dissemination of information on the results of research and the development of improved methods for the exchange of scientific information.

5. *International cooperative scientific activities.*—Under this program, the Foundation provides support for international cooperative research and science education activities.

6. *Institutional support for science.*—Support is provided to develop institutional capabilities for the conduct of highly advanced scientific projects as well as the interdisciplinary competence needed to gain a fundamental understanding of pressing problems and the kinds and levels of trained manpower necessary for these purposes. Included are grants for the construction, renovation, and equipping of research laboratories, comprehensive grants

to assist developing institutions in achieving a higher level of competence in the sciences and engineering, and grants to permit institutions to develop the necessary interdisciplinary capability to attack broad problems of society.

7. *Science education support.*—The budget provides for a wide variety of programs to support the training and development of scientific manpower including the following programs:

(a) Traineeships and fellowships to graduate students in the various fields of science, mathematics, and engineering; and fellowships to college and university faculty and foreign senior scientists.

FELLOWSHIPS AND TRAINEESHIPS FOR ADVANCED STUDY IN SCIENCE, MATHEMATICS, AND ENGINEERING

	1969 actual	1970 estimate	1971 estimate
Number of fellowships.....	2,567	2,625	2,975
Number of traineeships.....	6,090	6,066	4,262
Total.....	8,657	8,691	7,237

(b) Institutes for the training of secondary school and college teachers of science and mathematics. Emphasis will be placed on short term and summer institutes.

(c) Projects directed toward the improvement of secondary school and undergraduate science and mathematics curricula; and supplementary programs to stimulate interest in and secure improvement of teaching and training in the sciences at secondary school and undergraduate levels.

(d) Initiation of education programs designed to train science and engineering technologists.

8. *Planning and policy studies.*—This activity supports surveys and analytical studies of research and development within the various sectors of the economy and the current and projected status of scientific manpower and other resources required for the conduct of scientific activities. These studies are related to the formulation of national policies concerning science.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$78 thousand (1969 adjustments, -\$20 thousand); 1969, \$1 thousand; 1970, \$0; 1971, \$0.

The President's Council on Youth Opportunity was established by Executive Order 11330, dated March 5, 1967, to plan, coordinate, and evaluate summer and other youth programs of the Federal Government, and to encourage State, local, nonprofit and other private organizations to participate fully in efforts to enhance opportunities for youth. The council is concerned with the development of programs which will contribute to better opportunities for young people, especially for disadvantaged youth, in employment, education, recreation, and health services.

Financing:			
Unobligated balance lapsing	107		
Limitation			
	15,006	15,092	16,740
Proposed increase in limitation for pay act increases		990	

¹ Includes capital outlay as follows: 1969, \$112 thousand; 1970, \$40 thousand; 1971, \$504 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$47 thousand; 1969, \$67 thousand; 1970, \$67 thousand; 1971, \$67 thousand.

The Board administers the Railroad Retirement Act which provides for the payment of regular annuities for age and disability and benefits for survivors. The Board also participates in the administration of the hospital and medical insurance programs for persons covered by the Railroad Retirement Act for which it is reimbursed in part by the Social Security Administration, the activity of which is reflected in the Advances and reimbursements account. The administrative expenses of the Board in the operation of these programs are financed from a portion of the taxes paid jointly by railroad employers and employees under the provisions of the Railroad Retirement Tax Act.

The Board also administers a program for the payment of supplemental annuities to career railroad workers who were awarded regular retirement annuities after June 1966. This annuity is paid to employees aged 65 and over who retire directly from railroad service after completing 25 or more years of service and is in addition to their regular annuities. The administrative expenses of administering this program and the supplemental annuity payments are financed by an excise tax paid by employers of 2 cents for each man-hour of paid employment.

1. *Maintenance of earnings accounts.*—Eligibility for retirement and the amount of benefits paid are based on individual records of earnings, and the workload fluctuates according to such factors as level of employment, and rate of turnover in the railroad industry. Accounts posted were 863,000 in 1969 and are estimated at 845,000 in 1970 and 830,000 in 1971. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—This activity includes the work of processing annuity claims and establishing eligibility of persons for health and medical insurance benefits. Annuity claims processed were 267,000 in 1969 and are estimated to be 266,000 in 1970 and 1971. There also were 17,000 applications from unretired persons to enroll for medicare in 1969 with approximately the same number estimated for 1970 and 1971.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of persons on the rolls receiving monthly benefit payments will increase from 970,000 at the end of 1969 to an estimated 977,000 and 982,000 at the end of 1970 and 1971. The number of persons also receiving supplemental annuities will increase from 51,000 at the end of 1969 to 69,000 and 85,000 at the end of 1970 and 1971. The number of persons enrolled for medicare was 835,000 at the end of 1969 and will increase to 840,000 and 845,000 in 1970 and 1971.

4. *Actuarial services.*—Actuarial studies and estimates of the assets and liabilities of the Railroad retirement account are required by law.

RAILROAD RETIREMENT ACCOUNTS—Continued

Under the railroad retirement system, railroad workers and employers pay taxes on wages to finance the payment of annuities for age and disability and benefits for survivors and to finance the cost of hospital insurance benefits. These taxes are deposited in the railroad retirement account and invested in Government securities. The portion of these taxes which finances hospital insurance benefits is transferred to the Federal hospital insurance trust fund under the financial interchange provisions governing the railroad retirement and social security systems.

The railroad retirement system also provides for the payment of supplemental annuities to career railroad workers who were awarded regular retirement annuities after June 1966. This annuity is paid to employees age 65 and over who retire directly from railroad service after completing 25 or more years of service and is in addition to their regular annuities. This program is financed by an excise tax paid by employers of 2 cents for each man-hour of paid employment. These taxes are deposited in the railroad retirement supplemental account and invested in Government securities.

The status of these trust funds is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate

Balance of fund at end of year	<u>4,632,956</u>	<u>4,762,273</u>	<u>4,842,302</u>

Income.—The income of the Railroad retirement accounts consists of taxes paid by railroad employers and employees; interest on investments; appropriations for military service credits; and payments from the Federal old-age and survivors insurance trust fund and Federal disability insurance trust fund. The railroad retirement system has a reinsurance arrangement of annual financial interchanges with the social security system so as to place that system in the same position in which it would have been if railroad employment had been included in social security coverage.

Retirement, disability, and survivor benefit payments.—Payment estimates reflect the continuing growth in the beneficiary rolls and the increases in benefit rates resulting from the 1967 amendments to the Social Security Act and the 1968 amendments to the Railroad Retirement Act.

Transfers to and from Railroad unemployment insurance account.—The Railroad Unemployment Insurance Act provides that when the balance in the Railroad unemployment insurance account is insufficient to pay benefits due under that act, necessary amounts are to be borrowed from the Railroad retirement account. When the balance in the Railroad unemployment insurance account permits, borrowed amounts are to be repaid to the Railroad retirement account with interest. At the end of 1969 the fund had \$115 million in loans outstanding, which was \$25.4 million less than the loans outstanding a year ago.

Payment to Federal hospital insurance trust fund.—Portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad retirement beneficiaries are made from that fund.

Total program costs, funded ¹	6,097	6,950	7,500
Change in selected resources ²	27	-	-
Total obligations	<u>6,124</u>	<u>6,950</u>	<u>7,500</u>

Financing:			
Recovery of prior year obligations	-2		
Unobligated balance available, start of year	-6,000	-6,000	-6,000
Unobligated balance transferred to other accounts	2,576	1,550	775
Unobligated balance available, end of year	6,000	6,000	6,000
Limitation	8,698	8,500	8,275

¹ Includes capital outlay as follows: 1969, \$94 thousand; 1970, \$37 thousand; 1971, \$511 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$17 thousand; 1969, \$44 thousand; 1970, \$44 thousand; 1971, \$44 thousand.

The Board administers an unemployment and sickness insurance system and an employment service for unemployed railroad workers. Administrative expenses are financed through a permanent authorization of 0.25% of taxable payroll. As of each June 30, the unobligated balance in this fund in excess of \$6 million is transferred to the Railroad unemployment insurance account in the unemployment trust fund (45 U.S.C. 361).

[in thousands of dollars]

	1969 actual	1970 estimate	1971 estimate
Permanent limitation (0.25% of taxable payroll)	8,400	8,200	8,000
Interest on investments	298	300	275
Limitation	8,698	8,500	8,275

1. *Maintenance of earnings accounts.*—Insurance payments for unemployment and sickness benefits are based on individual records of earnings and daily wage rates and the workload fluctuates according to such factors as level of employment and rate of turnover in the railroad industry. The costs are shared on a measured basis with the retirement program. Accounts posted were 863,000 in 1969 and are estimated at 845,000 in 1970 and 830,000 in 1971.

2. *Processing of unemployment insurance claims.*—Workers' claims for unemployment compensation are filed locally and certified for payment through the headquarters offices. Unemployment claims were 515,000 in 1969 and are estimated to be the same in 1970 and 1971.

3. *Processing of sickness claims.*—These claims are filed by mail and certified for payment through the headquarters offices of the Board. Sickness claims were 684,000 in 1969 and are estimated to be 670,000 in 1970 and 655,000 in 1971.

4. *Claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. This resulted in savings of benefit payments of approximately \$1.2 million in 1969 as 6,500 placements were made. Placements are estimated to be the same in 1970 and 1971.

5. *Administration.*—The costs of administration are shared between this and the retirement program on a measured basis.

The Board conducts renegotiation with contractors and subcontractors to determine and eliminate excessive profits in connection with procurement under defense and space programs. The act provides that a report must be filed with the Board by every contractor or subcontractor having receipts or accruals in a fiscal year which exceed \$1 million (\$25 thousand in the case of brokers and manufacturers' agents) from contracts or subcontracts subject

General and special funds—Continued

SALARIES AND EXPENSES—Continued

to the act. Determinations of excessive profits were made by the Board in the amount of \$996.9 million, before adjustment for Federal income and excess profits tax credits, from the date of its establishment through June 30, 1969. Of this total, \$21.3 million was determined during 1969.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes the screening of contractors' filings and the handling of requests for exemption.

2. *Staff operations.*—The Headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations (field).*—The two Regional Boards conduct renegotiation proceedings and make determinations and recommendations. They are authorized to conclude cases involving \$800 thousand or less of renegotiable profits; however, their determinations in such cases may be appealed to the Statutory Board. All determinations in cases involving more than \$800 thousand renegotiable profits are subject to approval by the Statutory Board.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—Issuers of securities for public sale are required to file a registration statement and related prospectus containing significant information about the issuer and the offering with the Commission. This is to insure that investors will be provided with the material facts concerning security offerings. Certain provisions of the Securities Act amendments enacted August 20, 1964, extend to investors in certain over-the-counter securities the same protections now afforded to those in listed securities: namely, registration of classes of securities; annual and periodic company reporting; regulation of proxy solicitation; and restriction upon "insider" trading.

SELECTED WORKLOAD DATA

	1968 actual	1969 actual	1970 estimate	1971 estimate
Examination of registration statements from companies other than investment companies.....	2,141	3,371	3,710	4,000

Periodic reports examined.....	19,347	18,164	26,159	41,610
Ownership and transaction reports examined.....	93,823	93,708	100,000	100,000
Administrative actions closed.....	27	20	25	30
Regulation A filings examined.....	447	870	893	950

2. *Prevention and suppression of fraud.*—Suspected fraud, deceit, and manipulation in the sale and trading of securities is prevented or minimized by prompt investigation. For 1971, the Commission will continue the inspection of broker-dealers with priority given to inspections for "cause." These inspections include the inspection of non-NASD members. Inspection of investment advisers will continue also on the same basis.

SELECTED WORKLOAD DATA

	1968 actual	1969 actual	1970 estimate	1971 estimate
Investigations closed.....	328	379	368	350

Investment adviser inspections.....	165	128	130	130
Applications for investment adviser registration processed.....	450	737	760	770

3. *Supervision and regulation of securities markets.*—National securities exchanges and over-the-counter markets are regulated in the interest of maintaining just and equitable principles of trade for the protection of the public investors. One of the purposes of the Securities Acts amendments of 1964 is, through Commission regulation, to have nonmembers of the National Association of Securities Dealers (NASD) in the same regulatory position as NASD brokers and dealers.

SELECTED WORKLOAD DATA

	1968 actual	1969 actual	1970 estimate	1971 estimate
Review of changes in the rules and procedures of exchanges.....	115	96	105	115
Inspection of exchange operations and investigations of exchange practices.....	325	388	475	535
Inspections made of NASD.....	1	2	5	6

4. *Regulation of investment and public utility holding companies.*—Financing and other corporate matters of interstate public utility holding companies engaged in the electric utility business or in the retail distribution of gas are regulated. A total of 23 holding company systems of which 17 are active, comprising 174 separate companies with assets of \$18.9 billion, are registered under the Public Utility Holding Company Act of 1935. Investment companies are registered also and their activities supervised. The assets of these companies have increased

from \$2.5 billion in 1941 to an estimate of \$72.5 billion on June 30, 1969.

SELECTED WORKLOAD DATA

	1968 actual	1969 actual	1970 estimate	1971 estimate

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Military Selective Service Act of 1967, as amended. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment.

The Military Selective Service Act of 1967 was amended on November 26, 1969, to authorize the President to implement a system of random selection for military service. Acting under that authority, the President issued Proclamation No. 3945 establishing such a system. Effective January 1, 1970, registrants will be selected for induction by that method.

The random selection sequence was established on December 1, 1969, by drawing 366 dates of birth (month and day only). This applied to all registrants 19 but not 26 years of age as of December 31, 1969. The sequence of the drawing of a date of birth determined the random sequence number for selection for induction. The random sequence numbers assigned are permanent and will not change for those registrants included in the December 1, 1969, drawing.

On December 1, 1969, a supplemental drawing was conducted to determine alphabetically the random selection sequence by name among registrants who have the same birthday.

Each year, a drawing will be conducted for the purpose of assigning random sequence numbers to those registrants who attain the 19th anniversary of their dates of birth during that calendar year. These numbers are also permanent for the registrants included in that drawing.

1. *National administration, planning, training, and records management.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration, planning, training, and records servicing.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting over 38 million registrants are accomplished by the over 48,000 uncompensated citizens assisted by about 8,000 compensated personnel at over 4,000 local boards.

4. *National Advisory Committee on the selection of physicians, dentists, and allied specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately administered, but funds are furnished by the Selective Service System from its appropriation.

5. *National Selective Service Appeal Board.*—This Board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

A supplemental estimate for 1970 to cover pay increases and increased physical examinations due to random selection process is proposed for separate transmittal.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$811 thousand (1969 adjustments, -\$13 thousand); 1969, \$733 thousand; 1970, \$733 thousand; 1971, \$733 thousand.

The Small Business Administration counsels, assists, and protects the interest of small business, and provides aid to business firms and homeowners who have suffered losses through disasters. These efforts are conducted through the following activities:

1. *Procurement and management assistance.*—The objectives of this activity are (a) to insure that a fair proportion of Government contracts for purchases of supplies and services, including research and development, and for the sale and disposal of property, be placed with small business enterprises, (b) to provide technical and management assistance through management courses, and counseling on new and improved products and processes, and (c) to provide for greater involvement of the disadvantaged and minority contractors in the Federal Procurement program through the use of the authority contained in section 8(a) of the Small Business Act, as amended. This section enables the Agency to act as prime contractor to provide goods and services to other Government Agencies and in turn arrange for performance of such contracts by negotiating or otherwise letting subcontracts to small business concerns.

2. *Research contracts.*—Research studies designed to reveal matters materially affecting the competitive strength of small business and the effect on small business of Federal laws, programs, and regulations are financed under this activity.

3. *Economic opportunity management assistance.*—As authorized by section 406, title IV of the Economic Opportunity Act of 1964, enacted in the Economic Opportunity Amendments of 1967, SBA will contract for professional management training and support of small business entrepreneurs in areas with high concentrations of unemployed or low income individuals to (1) establish the management training, counseling, and support needs of firms in target areas, (2) identify business opportunities in these areas, and (3) determine the feasibility and profit potential of proposed business development to be located in such areas.

Funds for the above activities are provided by direct appropriation.

4. *Financial assistance.*—This activity comprises: (a) *Business loans.*—This includes loans and financial counseling to small business concerns, businesses displaced because of federally aided construction, businesses affected by changing economic conditions resulting from increased competition from imported articles, and businesses eligible under title IV of the Economic Opportunity Act of 1964.

(b) *Development company loans.*—This covers efforts to encourage private institutions to expand their role in the economic development of their respective States and loans to State and local development companies to enable them to provide the long-term capital—equity and loans—to small businesses.

(c) *Disaster loans.*—This provides financial assistance on favorable terms to victims of natural disasters for rehabilitation of property damaged or destroyed.

5. *Investment company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns, the Small Business Administration is authorized to (a) license, regulate, and examine small business investment companies, and (b) provide funds to such companies for financing small business firms.

6. *Lease guarantees.*—In order to enable small businesses to compete on an equal basis with financially strong businesses in the leasing of facilities in shopping centers and other business properties the Small Business Administration is empowered to guarantee the payment of rentals under leases of commercial and industrial property entered into by small business concerns.

Funds for the administrative support of the above activities are transferred from the appropriate revolving funds.

BUSINESS LOAN AND INVESTMENT FUND

BUSINESS LOAN AND INVESTMENT FUND

For additional capital for the "Business loan and investment fund," authorized by the Small Business Act, as amended \$242,000,000, to remain available without fiscal year limitation. (72 Stat. 384, as amended; 72 Stat. 689, as amended.)

LEASE GUARANTEES REVOLVING FUND

The Small Business Administration is hereby authorized to make such expenditures, within the limits of funds and borrowing author-

ity available to the following funds, and in accord with the law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for the "Disaster loan fund", the "Business loan and investment fund", and the "Lease guarantees revolving fund."

PAYMENT OF PARTICIPATION SALES INSUFFICIENCIES

For the payment of such insufficiencies as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations in obligations of the Small Business Administration authorized by the Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1968, to be issued pursuant to section 302(c) of the Government National Mortgage Association Charter Act, as amended, **[\$1,757,000]** \$1,340,000. (Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1970.)

DISASTER LOAN FUND

For additional capital for the "Disaster loan fund", authorized by the Small Business Act, as amended, \$175,000,000, to remain available without fiscal year limitation. (Supplemental Appropriation Act, 1970.)

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance all loan programs, other than natural disaster loans, and prime contracting activity performed pursuant to sections 7(a), 7(b)(3), 7(e), and 8(a) of the Small Business Act, as amended, titles III and V of the Small Business Investment Act of 1958, as amended, and title IV of the Economic Opportunity Act of 1964, as amended. Administrative and other related expenses are also financed from this fund.

While no ceiling on authorized appropriations is specified, a limitation of \$2.65 billion has been placed on the amount of loans and commitments (reservations) which may be outstanding at any one time. This ceiling is com-

posed of separate limitations on outstanding amounts as follows (in millions of dollars):

Business loans (including a limitation of \$200 million on economic opportunity loans).....	1,900
Development company loans.....	300
Investment company loans.....	450

It is estimated that the limitation on development company loans will be reached this year and that the limitation on business loans and economic opportunity loans will be reached in 1971. Thus, legislation is pending before Congress to increase these limitations.

Outstanding loans and reservations at the end of each year for the programs financed by this fund are as follows (in millions of dollars):

	1969 actual	1970 estimate	1971 estimate
Financial assistance program (business loans):			
Business loans (Economic Opportunity Act of 1964):

Capital outlay.—1. *Financial assistance.*—*Business loans (sec. 7(a), Small Business Act).*—Funds may be loaned to business concerns which are not dominant in their fields. To such small businesses, loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a bank participation is not available and no loan on an immediate participation basis may be made unless it is shown that a guaranteed loan is not available. Under the guaranty plan, the Small Business Administration agrees to purchase the guaranteed portion of the loan only upon default.

The agency's share of an immediate participation or guaranteed loan is limited to 90%. Its maximum outstanding loan and/or commitment to any one borrower is limited by statute to \$350 thousand. Business loans, except for the portion for constructing facilities for which the maximum maturity is 15 years, are limited to a maturity of 10 years and with one exception bear interest at a maximum rate of 5½% per annum on the agency's share thereof.

From the inception of the lending program (Sept. 29, 1953) through June 30, 1969, 94,779 loans have been approved in a total amount of \$4,389.8 million. Participating banks' share of this amount has been \$836.7 million. Sixty-four percent of the total loans approved have been on a participation or guaranteed basis. In 1971, it is estimated that 14,640 loans will be approved, compared with an estimate of 12,120 in 1970.

Business loans (Economic Opportunity Act of 1964).—The Small Business Administration administers a program of financial assistance to small business concerns and to qualified persons seeking to establish such concerns pursuant to authority contained in title IV of the Economic Opportunity Act of 1964 (78 Stat. 526). Loans may be on a direct, immediate participation, or guaranteed basis for up to \$25 thousand, for a maximum term of 15 years. The credit and collateral requirements are more flexible than those applicable to section 7(a) business loans and provision for management training is made an integral part of the program. It is estimated that 9,180 loans will be approved in 1971, in comparison with 5,530 loans in 1970.

Displaced business loans.—Pursuant to authority provided in the Housing Act of 1961, loans are made to small firms that suffer substantial economic injury as a result of being forced to move by federally aided urban renewal, highway, and other construction programs. A recent amendment to the Small Business Act (Federal Aid Highway Act of 1968) further expands the list of eligibles by including small businesses which suffer economic crises as a result of being adjacent to, or near, a federally aided construction project. The interest rate on the Small Business Administration's share of these loans is determined pursuant to a formula prescribed by legislation. For 1969, the rate was 4¾% per annum. An interest rate of 5⅛% will prevail in 1970.

Through June 30, 1969, a total of 1,750 displaced business loans for \$158.9 million had been approved. Approvals during 1969 were 281. It is estimated that 450 loans for \$46 million will be approved in 1971 compared to 441 loans for \$45 million in 1970.

Development company loans.—The Small Business Administration lends funds to State and local development companies pursuant to sections 501 and 502 of the Small Business Investment Act, as amended. Funds are primarily made available to local development companies for plant construction, conversion, or expansion, including the acquisition of land, under section 502. The latter type loans must be so secured as reasonably to assure repayment, may be made directly or in participation with banks or other lending institutions, may be made only when the proceeds are to assist an identifiable small business concern and for a sound business purpose approved by the agency, and are limited to a maximum of \$350 thousand for each such identifiable small business concern.

2. *Investment company assistance.*—A primary function of these companies is to provide a source of needed equity capital for small business concerns. To encourage the formation and growth of such companies, the Small Business Investment Act, as amended, authorizes the Small Business Administration to make loans to any company by purchasing its debentures, directly or in participation with banks or other lending institutions.

Public enterprise funds—Continued**BUSINESS LOAN AND INVESTMENT FUND—Continued**

Such debentures may be subordinate to any other debenture bonds, promissory notes, or other debts and obligations of such companies, unless the Administration determines otherwise in the exercise of reasonable investment prudence. SBA may purchase such debentures in an amount equal to 200% of paid-in capital and paid-in surplus to a maximum of \$7.5 million. Those SBIC's with paid-in capital and paid-in surplus in excess of \$1 million, which have invested (or committed) 65% or more of their funds in venture capital, are eligible to draw 200% of the first \$1 million and 300% of every dollar over \$1 million not to exceed an aggregate maximum of \$10 million.

Prior to the Small Business Investment Act Amendments of 1967, financing of SBIC's by SBA was accomplished by means of the purchase of subordinated debentures (considered as a part of "statutory capital" for borrowing purposes) and by means of "direct" loans.

Operating Costs.—Interest expense.—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund (excluding disbursements for administrative expenses). The interest rate or rates applicable to each year's gross disbursements are determined at the beginning of the year by the Secretary of the Treasury, taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. For interest computation purposes, collections of interest and principal on unpledged loans, proceeds of participation sales, and other receipts to the fund are applied against the earliest year's disbursements still outstanding. The rates set by the Secretary of the Treasury for disbursements in 1970 are 6¼% for investment company debentures, development company loans, and displaced business loans and 6% for section 7(a) business and economic opportunity loans. These same rates have been used in computing interest expense in 1971.

Interest is payable to the holders of participation certificates at specified rates set at the time of sale. Interest collections on pledged loans are remitted to the trustee for the purpose of paying such interest as it comes due. To the extent that the interest rates on certificates exceed the interest rates on pledged loans, the collections of interest on pledged loans will be insufficient to meet the interest payable on the certificates. Appropriations for this insufficiency are authorized, as is discussed in detail below under the heading Participation sales insufficiencies.

Administrative expense.—Expenses for the loan programs financed by this revolving fund are financed by transfer of funds to the appropriation Salaries and expenses. Use of these funds for salaries, travel, and related expenses is accordingly reflected in the schedules for that appropriation account.

Financing.—This fund was capitalized by transfer of an applicable portion of the assets, liabilities, and unexpended balance of the Revolving Fund, Small Business Administration on July 1, 1966, and by transfer of the unexpended balance of appropriations previously made for trade adjustment assistance loans. Appropriations are authorized to be made to the fund as additional capital

to the extent required to carry out the authorized functions.

In recent years, Administration policy has been to provide required additional capital by sale of participation certificates in loan pools, thus substituting private for public credit to the maximum extent possible. The Participation Sales Act of 1966 authorized SBA to place loans in a trust and through the Government National Mortgage Association as trustee to sell participation certificates in such loan pools. The aggregate amount of such participation sales for any one trustor agency may not exceed the amount authorized for such trustor in an appropriation act. Sales of not to exceed \$1.35 billion have been authorized: \$350 million in 1966 from the predecessor revolving fund under special authority in the Participation Sales Act of 1966, \$850 million in 1967, and \$150 million in 1968. The authorizations in 1967 and 1968 were available for both this fund and the Disaster Loan Fund. Through June 30, 1969, actual sales have aggregated the \$1.35 billion, of which \$343 million has been redeemed. Of the total sales, \$1,136 million was allocated to this fund and \$214 million to the Disaster Loan Fund.

It is estimated that additional capital of \$242 million will be required in 1971 to provide sufficient funds to allow the agency to carry out the estimated program levels for that year and have sufficient carryover balance to finance estimated first quarter obligations in 1972. In lieu of participation sales authority, it is proposed that this capital be made available by appropriation.

Participation sales insufficiencies.—In respect to participation sales as discussed immediately above, the Participation Sales Act of 1966 authorized appropriations without fiscal year limitation of such sums as may be necessary to permit any trustor agency to pay the trustee such insufficiency as the trustee may require on account of outstanding participations. This authority is not applicable to the 1966 sales in the predecessor fund. An insufficiency results primarily from the fact that the interest rate on participation certificates exceeds the interest rate on the loans pledged in support of the respective participations.

A permanent appropriation in such amount as may prove necessary each year was provided in the Independent Offices Appropriation Act, 1967, in connection with participation sales of \$850 million as were authorized by that act. However, for each of the years 1968, 1969, and 1970, the Congress provided an annual appropriation for any insufficiency arising from the \$150 million sales authority provided in the Departments of State, Justice, Commerce, the Judiciary, and Related Agencies Appropriation Act, 1968. The budget estimate proposes a similar appropriation for 1971.

The gross insufficiency in any year represents the excess of interest accrued on outstanding participation certificates over interest accrued on an equal amount of loans pledged for such certificates. This gross insufficiency is met from (1) revenue from the participation sales fund arising from the investment of collections on pledged loans in excess of funds required for interest and principal payments on certificates, (2) reserved retained earnings, if any, and (3) appropriations, as discussed above, in that order. The actual and estimated gross insufficiency, revenue, and budget authority (appropriations) applicable to transactions in this fund for 1969, 1970, and 1971 are reflected in the following table (in thousands of dollars):

	Sales authorized 1967 act		
	1969 actual	1970 estimate	1971 estimate
Interest accrued on participation certificates.....	36,247	25,455	25,591
Interest accrued on an equal amount of loans in the pool.....	-25,101	-22,025	-18,693
Insufficiency.....	11,146	3,430	6,898
Financed by:			
Investment income from participation sales fund.....	-7,175	-927	-5,907

	Sales authorized 1968 act		
	1969 actual	1970 estimate	1971 estimate
Interest accrued on participation certificates.....	9,078	9,555	6,320
Interest accrued on an equal amount of loans in the pool.....	-6,462	-6,374	-4,641
Insufficiency.....	2,616	3,181	1,679
Financed by:			
Investment income from participation sales fund.....	-1,088	-1,424	-339
New obligational authority required..	1,528	1,757	1,340

Operating results.—The fund will continue to operate at a deficit. Interest and fee income will not be sufficient to cover interest, administrative and other expenses, and a provision for estimated losses. Primarily, this results from the cost of processing a large number of loan applications which are not approved and the cost of servicing an expanding number of widely scattered loans which are relatively small in size.

¹ Balances of selected resources are identified on the statement of financial condition.

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance disaster loans other than those to displaced businesses, made pursuant to sections 7(b) (1), (2), and (4), and 7(c)(2) of the Small Business Act, as amended. These loans are commonly referred to as natural disaster loans. Administrative and other related expenses are also financed from this fund.

No limitation was placed on the amount of loans and commitments (reservations) which may be outstanding at any one time from the fund. Actual and estimated outstanding disaster loans and reservations at the end of each year are as follows (in millions of dollars):

	1969 actual	1970 estimate	1971 estimate
Investment in outstanding loans.....	344.3	502.0	539.8
Outstanding loan reservations: Undis- bursed loan authorizations.....	12.9	47.6	19.1
Total, loans and reservations....	<u>357.2</u>	<u>549.6</u>	<u>558.9</u>

Although there are no statutory restrictions on the amount that may be loaned under this program, in order to effectively manage the program, administrative limitations have been established. No restrictions exist on the size of a business firm which may be eligible for a natural disaster loan. The interest rate may not exceed 3% on the Small Business Administration's share of the loan. The maximum term is 30 years.

In addition, the Disaster Relief Act of 1969, PL-91-79, passed October 1, 1969, provided for loans to be made without regard to the availability of financial assistance from other sources. The interest on these loans is determined pursuant to a formula prescribed by the legislation. The current rate is 5 $\frac{3}{8}$ %.

Through June 30, 1969, a total of 76,151 disaster loans for \$671 million had been approved. Approvals during 1969 were 2,117 for \$21.9 million. Recognizing that such loans cannot be predicted, the estimate for new loans is \$250 million in 1970 (increase due to Hurricane Camille) and \$50 million in 1971.

Operating costs.—Interest expense.—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund (excluding disbursements for administrative expenses). The interest rate applicable to each year's gross disbursements is determined at the beginning of the year by the Secretary of the Treasury taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. For interest computation purposes, collections of interest and principal on unpledged loans, proceeds of participation sales, and other receipts to the fund are applied against the earliest year's disbursements still outstanding. The rate set by the Secretary of the Treasury for disbursements in 1970 is 6 $\frac{1}{2}$ %. This same rate has been used in computing interest expense in 1971.

Interest is payable to the holders of participation certificates at specified rates set at the time of sale. Interest collections on pledged loans are remitted to the trustee for purposes of paying such interest as it comes due. To the extent that the interest rates on certificates exceeds the interest rate on pledged loans, the collections of interest on pledged loans will be insufficient to meet the interest payable on the certificates. Appropriations for this insufficiency are authorized, as is discussed in detail below under the heading Participation sales insufficiencies.

Administrative expense.—Administrative expenses for this program are financed by transfer of funds from the

revolving fund to the appropriation, Salaries and expenses. Use of these funds for salaries, travel, and related expenses is accordingly reflected in the schedules for that appropriation account.

Financing.—This fund was capitalized by transfer of an applicable portion of the assets, liabilities, and unexpended balance of the revolving fund, Small Business Administration on July 1, 1966. Appropriations are authorized to be made to the fund as capital to the extent required to carry out the authorized functions.

As discussed under the Business Loan Investment Fund, required additional capital was provided by sale of participation certificates in loan pools, thus substituting private for public credit to the maximum extent possible. Due to Hurricane Camille a supplemental of \$175 million was provided in 1970.

Participation sales insufficiencies.—In respect to participation sales as discussed immediately above, the Participation Sales Act of 1966 authorized appropriations without fiscal year limitation of such sums as may be necessary to permit any trustor agency to pay the trustee such insufficiency as the trustee may require on account of outstanding participations. This authority is not applicable to the 1966 sales in the predecessor fund. An insufficiency results primarily from the fact that the interest rate on participation certificates exceeds the interest rate on the loans pledged in support of the respective participations.

A permanent appropriation in such amount as may prove necessary each year was provided in the Independent Offices Appropriation Act, 1967, in connection with participation sales of \$850 million as were authorized by that act. However, for 1968, 1969, and 1970, the Congress provided an annual appropriation for any insufficiency arising from the \$150 million sales authority provided in the Agency's 1968 appropriation act. This budget estimate proposes a similar appropriation for 1971.

The gross insufficiency in any year represents the excess of interest accrued on outstanding participation certificates over interest accrued on an equal amount of loans pledged for such certificates. This gross insufficiency is met from (1) revenue from the participation sales fund arising from the investment of collections on pledged loans in excess of funds required for interest and principal payments on certificates, (2) reserved retained earnings, if any, and (3) appropriations, as discussed above, in that order. The actual and estimated gross insufficiency, revenue, and new obligational authority (appropriations) applicable to transactions in this fund for 1969, 1970, and 1971 are as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Interest accrued on participation certificates.....	9,656	8,038	8,081
Interest accrued on an equal amount of loans in a pool.....	-4,574	-4,193	-3,864
Insufficiency.....	5,082	3,845	4,217
Financed by:			
Investment income from participation sales trust fund.....	-1,254	-476	-527
Budget authority (appropriation, permanent, indefinite).....	3,828	3,369	3,690

Operating results.—The fund will continue to operate at a deficit. With the interest rate on loans set by statute at a maximum of 3%, interest and other income is not sufficient to cover interest to Treasury at the current

Public enterprise funds—Continued

BUSINESS LOAN AND INVESTMENT FUND—Continued

DISASTER LOAN FUND—continued

rate of 6½%, as well as administrative expenses, interest expense on participation certificates, and a provision for estimated losses.

This fund finances a program of insurance to guarantee payments on leases of small business concerns. It was capitalized by the transfer of \$5 million from the Revolving Fund, Small Business Administration, pursuant to Public Law 89-117. In order to make the fund self-sustaining, lessees are to pay an insurance premium of not to exceed 2½% of the lease amount, or a premium based on sound actuarial computation.

It is estimated that 380 commitments for guarantees with a total exposure of \$190 million will be made in 1970. For 1971, the estimate is 580 commitments for guarantees with total exposure of \$290 million. It is anticipated that about two-thirds of the projected amount will be written by private insurance companies, with SBA writing approximately one-third of the total volume.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$2,997 thousand; 1969, \$3,468 thousand; 1970, \$3,568 thousand; 1971, \$3,668 thousand.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology including living animal exhibits; preserves for reference and study purposes millions of items of scientific, cultural, and historic importance; conducts research in the natural and physical sciences and in the history of cultures,

technology, and the arts; presents performances of American arts and crafts, has education programs at all levels; and participates in the exchange of scientific information.

The Institution is responsible for the operation and maintenance of nine exhibition buildings; a zoological park; a preservation and storage facility at Silver Hill, Md.; a conference center at Elkridge, Md.; two natural preserves, in Panama and on the Chesapeake Bay; an observatory on Mount Hopkins, Ariz.; and supporting administrative, laboratory, and storage areas.

During the budget year, emphasis will be placed on research, information, and education related to environmental problems and on preparations for the Smithsonian's participation in the celebration of the American Revolution Bicentennial. Strengthened collection management and related reference system improvements will be stressed, including the application of automatic data processing to the natural history collections. The extensive Joseph H. Hirshhorn art collection will continue to be readied for exhibition in the museum building under construction. The Renwick Gallery of Arts, Crafts, and Design will be opened. Efforts in higher and elementary and secondary education will be emphasized drawing upon the educational resources of staff, collections, exhibits, and laboratories. Anthropology and related cultural history studies and presentations will receive increasing attention.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$26 thousand; 1969, \$21 thousand; 1970, \$0; 1971, \$0.

The John F. Kennedy Center for the Performing Arts was created as a Bureau of the Smithsonian Institution by the act of September 2, 1958, as amended. The Board of Trustees of the Center is authorized to construct and operate a national cultural center in Washington, D.C., on a site provided by the Federal Government. Warrants totaling \$15.5 million were issued as the Federal Government's contribution to the costs of constructing the Center to match a like amount contributed by the public prior to

June 30, 1965. Also, a Federal loan of \$15.4 million was authorized for construction of foundations and underground parking facilities, which is to be repaid from parking receipts. Public Law 91-90, October 17, 1969, amended the statute increasing the appropriation authority to \$23 million and the authorized Federal loan to \$20.4 million. Construction is expected to be completed by September 1971.

Adjudication of cases and legal activities.—Upon petitions being filed, the Board holds formal hearings and determines whether: (a) organizations are Communist-action organizations, Communist-front organizations, or Communist-proposed for separate transmittal in 1971 will bring the Subversive Activities Control Act; (b) individuals are officers or members of a Communist-action organization; (c) organizations or individuals once determined to come within the provisions of the act are no longer of the type so determined and entitled to relief from the further application of the act to them. The Board's determinations involve the consideration of petitions, motions, answers, and evidence adduced at the hearings. In all proceedings the Board is empowered to hold hearings—which shall be public—to examine witnesses and receive evidence, and to compel the attendance and testimony of witnesses and the production of documents relevant to the matter under inquiry. In each case the Board issues a report in writing setting forth its rulings and findings as to the facts and issues an appropriate order. The Board maintains current public lists of organizations as to which and individuals as to whom there are in effect final orders of the Board determining them to come within the provisions of the act.

The major responsibility of the Commission is to assess the impact of foreign trade policies of the United States and of other countries on domestic industries, firms and workers and to provide the President, the Congress, and the public with reports on these and other tariff matters. The growing complexity of the Nation's foreign trade relations and the changing patterns of world trade emphasize the importance of research, investigations, and reports on tariff and trade matters, which the Commission plans to perform with reduced staff.

The Tax Court hears and decides cases involving income, estate, and gift tax deficiencies and claims for refunds of excess profits taxes under the special relief sec-

tions of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1971, the Court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 6,200 cases.

The actual and estimated work volume of the Court is presented in the following tabulation.

This fund, established under 26 U.S.C. 7448, is used to pay survivorship benefits to eligible widows and dependent children of deceased judges of the Tax Court of the United States. Participating judges pay into the fund 3% of their salaries or retired pay to cover creditable service for which payment is required and such additional funds as are needed are provided through the annual appropriation to the Tax Court of the United States.

On June 30, 1969, 13 Judges of the Court were participating in the fund, and two eligible widows were receiving survivorship annuity payments.

Public Law 88-609, approved September 22, 1964, authorized a Commission to study the feasibility of constructing a sea-level canal across the American Isthmus to connect the Atlantic and Pacific Oceans. The Commission was appointed by the President in April 1965. The law has since been amended to extend the time for the study from June 30, 1968, until December 1, 1970, and to increase the authorization for the study from \$17.5 million to \$24 million.

The Commission initiated a full investigation and study, including onsite surveys, to determine the feasibility of

and the most suitable site for such a canal; the best means of constructing it whether by conventional or nuclear methods, and the estimated cost. The Commission is directing five separate studies in order to cover all aspects of the problem. These are the defense study, the foreign policy study, the financial study, the shipping study, and the engineering feasibility study. The Commission will present a report to the President on December 1, 1970, stating its findings, conclusions, and recommendations.

The Commission is approaching the final phase of its studies and is starting the preparation of its final report. All onsite surveys have been terminated and the analysis of all collected data is scheduled for completion by the end of 1970. By prudent management of its program the Commission has managed to reduce its expenditures to below those previously programmed. Because of this, the Commission will not require any further appropriations to complete its work.

The Commission on Government Procurement was established by Public Law 91-129, on November 26, 1969. The Commission is composed of 12 members, including two Members of the Senate, two Members of the House of Representatives, two employees of the executive branch, the Comptroller General, and five persons not employed by the Federal Government. It is responsible for reviewing and recommending improvements in Federal procurement practices and procedures consistent with the congressional policies contained in Public Law 91-129. The Commission is expected to submit its final report to the Congress by November 1971. This report will include its findings and recommendations for changes in statutes, regulations, policies, and procedures.

90 Outlays.....	209	1,300	234

¹ Includes capital outlay as follows: 1969, \$0; 1970, \$3 thousand; 1971, \$0.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$0; 1969 \$88 thousand; 1970, \$0; 1971, \$0.

The Commission on Obscenity and Pornography was established by an Act of Congress, Public Law 90-100 on October 3, 1967. The initial appropriation was effected in July 1968.

Relevant study groups were formed in the areas of distribution and traffic, positive approaches, effects, and legality. These study groups, comprised of Commission members, are augmented by selected members of the staff.

Numerous and timely meetings of the panels and full Commission were held resulting, in a well thought-out design for research in each of the study areas. Primarily the Commission has been concerned with its investigation of obscenity and pornography in the United States in an effort to determine whether more effective means should be devised to control such materials.

After a thorough appraisal of all available material, the Commission will report its findings and recommen-

dations to the Congress in the summer of 1970. The time remaining prior to September 30, 1970 will be used for printing and distribution of the Commission report and the most important and timely of the technical studies.

The Commission intends, through careful management, to meet all financial requirements incurred between now and its termination in September of 1970 from funds appropriated in prior years. Therefore, no additional funds are requested.

72 Obligated balance, start of year.....			38
74 Obligated balance, end of year.....		-38	-56
90 Outlays.....		340	670

The purpose of the Commission, which will be in existence for a period of 26 months, will be to examine the ways in which the probable course of population growth between now and the year 2000 will affect the quality of life in the United States and the activities of Federal, State, and local governments.

The Commission shall be composed of two members of the Senate appointed by the President of the Senate; two Members of the House of Representatives appointed by the Speaker of the House; and no more than 20 members appointed by the President.

On the basis of its examination and inquiry, the Commission will make recommendations to the President and the Congress regarding the resources in the public sector of the economy that will be required to deal with the anticipated growth in population and ways in which all levels of government can best respond to the demands posed by population growth and its geographic distribution.

The Consumer Credit Protection Act of May 29, 1968, established the National Commission on Consumer Finance. The Commission consists of nine members, of whom three are members of the Senate; three are members of the House of Representatives; and three are appointed by the President.

The Commission plans to study and appraise the mechanics and structure of the consumer finance industry. Specifically, the Commission will examine the ability of existing institutions to provide consumer credit at reasonable rates; the adequacy of present regulatory mechanisms to protect the public from unfair practices, and insure the informed use of consumer credit; and the desirability of Federal chartering of consumer credit companies, or other Federal regulatory measures. The Commission will complete its work by December 31, 1970, and make its report to the President at that time.

Pursuant to statute (Public Law 90-146), the Commission is conducting a comprehensive study and investigation of the scope and adequacy of measures currently employed to protect consumers against unreasonable risk of injuries which may be caused by hazardous household products. Such study and investigation includes consideration of the following:

1. The identity of categories of household products which may present an unreasonable hazard to the health and safety of the consuming public;

2. The extent to which self-regulation by industry affords such protection;

3. The protection against such hazardous products afforded at common law in the States, including the relationship of product warranty to such protection; and

4. A review of Federal, State, and local laws relating to the protection of consumers against categories of such hazardous products, including scope of coverage, effectiveness of sanctions, adequacy of investigatory powers, uniformity of application, and quality of enforcement of those laws.

The Commission will complete its work in September 1970. No additional funds are requested for 1971.

The National Commission on Reform of Federal Criminal Laws was established by Public Law 89-801, approved November 8, 1966, to review and recommend improvements in the Federal Criminal Code. The Commission is expected to submit its final report to the President and the Congress by November 1970. This report will include proposed legislation for recodification of the Federal criminal law.

90 Outlays.....	82	950	1,750

¹ Includes capital outlay as follows: 1969, \$2 thousand; 1970, \$14 thousand; 1971, \$5 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$0; 1969, \$36 thousand; 1970, \$18 thousand; 1971, \$18 thousand.

The Commission was established by Public Law 90-515, on September 26, 1968, to review national water resource

needs and problems. The Commission is considering ways of conserving and achieving more efficient use of existing water supplies, innovations to encourage the highest economic use of water, pollution reduction and waste water reuse, desalting and weather modification, and inter-basin transfers of water as alternative means of meeting future water requirements.

The Commission works closely with the Water Resources Council, other Federal agencies, and the River Basin Commissions established under the Water Resources Planning Act. It will develop recommendations and guidelines for the most effective use of the Nation's water resources and report to the President and the Congress.

Fiscal year 1971 will take the Commission to the midpoint of its existence and will require the highest level of funding of the 5-year period. The Commission must terminate its work by September 26, 1973.

The Public Land Law Review Commission was created by Public Law 88-606 (78 Stat. 982) to review the laws, policies, and practices governing the public lands of the United States, and their administration and application by Federal agencies. The Commission will, pursuant to law, report to the President and the Congress by June 30, 1970, recommending such modification in law, regulation, policy, and practice as will, in the judgment of the Commission, assure that the public lands of the United States shall be retained and managed or disposed of all in a manner to provide the maximum benefit for the general public. The Commission will cease to exist 6 months after the report is filed but not later than December 31, 1970.

¹ Balances of selected resources are identified on the statement of financial condition.² Deficiency to be covered by power revenues or proposed legislation if the former is not sufficient (see schedule on page 986).

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. TVA is a corporation wholly owned by the Federal Government. Its program in 1971 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

Budget program—1. Regional development program.—A major objective of the TVA Act is full development and use of all the resources of the Tennessee River Basin. The development of these resources is reflected in regional and national gains in the fields of navigation, flood control, water quality, recreation, and wildlife; in land resources—agriculture, forestry, and minerals; in education and manpower development; in environmental research and development; and in related industrial development.

(a) *Water resources development* includes continuing development of the all-year 9-foot navigation channel from the mouth of the river at Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles. Traffic and savings to shippers continue to increase. More than 90% of the savings apply on freight originating outside the valley or moving from the valley to outside destinations. Technical studies appraise the opportunities for more extensive use of the waterway. Data supplied to shippers and carriers help solve transportation problems. Advisory work with State and local agencies leads to new or improved public programs by those agencies to help assure full industrial use of the waterway.

Flood control activities are concerned with maintenance and use of storage space in upstream reservoirs for sea-

sonal retention of excessive runoff and the regulation of discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Flood crests are reduced along the Tennessee River and along the tributaries downstream from the reservoirs and along the lower Ohio and Mississippi Rivers. Also, TVA collects and analyzes flood data and studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance is given to State and local agencies in finding solutions to localized flood control problems.

Regional water quality management comprises the determination of basic facts about water quality and research and planning of ways of maintaining or upgrading the quality of the water resource. This work is conducted in cooperation with appropriate Federal, State, and local agencies and with industrial users of water.

Recreation and wildlife development activities are designed to promote the optimum development of the water and other scenic resources of the region in a way that will improve the physical and cultural environment, stimulate economic development, and conserve natural and historical resources.

The capital outlay program for *water resources development* includes a total of \$13,807 thousand for continuing construction of multipurpose projects: (1) \$7,621 thousand for the Tims Ford project started in 1966; (2) \$4,797 thousand for the Tellico project started in 1967; and (3) \$1,389 thousand for the Bear Creek project also started in 1967. The program also includes capital outlays of \$325 thousand for navigation facilities. A total of \$515

Public enterprise funds—Continued

PAYMENT TO TENNESSEE VALLEY AUTHORITY FUND—Continued

thousand for flood control facilities includes \$500 thousand for initiating a project at Duffield, Va. The estimate for recreation facilities is \$211 thousand.

All water resources development facilities are planned, constructed, and operated in cooperation with State and local agencies.

(b) *General resources development.*—Special attention to selected areas and resources of the Tennessee Valley region, in particularly close cooperation with State and local agencies and with tributary area associations, constitutes an additional phase of TVA's program for the proper use, conservation, and development of the region's resources. Investigations identify current problems and opportunities for development under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems.

Land resources projects are in the fields of agriculture, forestry, and minerals. Research and demonstrations in agriculture have the objectives of assistance to valley farmers in improving their economic situation and attainment of a higher standard of living through efficient use of land resources and improved farm practices and systems. Forestry activities include appraisals of the quality and quantity of the forest resource, and research and demonstrations in forest management, reforestation, industrial wood use, forest tree improvement, and forest fertilizer tests; the objective is to make full use of the forest resource of the valley and to develop it for maximum sustained economic return. Minerals projects have emphasis on economic geology and preparation, in cooperation with State agencies, of geologic maps essential to the development of regional minerals.

Environmental quality projects are concerned with (1) the cleanup of reservoir shorelines, including driftage, garbage and rubbish left by users of TVA-owned reservoir lands; (2) strip mine experiments and demonstrations; and (3) research on economic disposal of solid wastes in cooperation with the Public Health Service.

Tributary area development is a comprehensive and cooperative approach to resource development in areas of the Tennessee Valley where specific opportunities exist for further development and where local groups have organized to deal with problems of economic advancement and area improvement. Work is in close collaboration with organized groups in the tributary areas, most of which lie wholly or in part in the Appalachia portion of the Tennessee Valley.

Demonstrations in education and manpower development are concerned with bringing into the work force disadvantaged persons and for improving educational systems in low-income rural areas.

(c) *Environmental research and development.*—TVA uses its multidisciplinary resources and the research opportunities in the Tennessee Valley in studying the potential effect of natural resource use and industrial and urban development on the environment with the objective of preventing its degradation and of enhancing its quality. All such TVA activities are coordinated with other appropriate Federal, State, and local agencies and much work is undertaken on a cooperative basis with them in the interest of solving regional and national problems effectively.

(d) *Land Between the Lakes.*—Work will continue on the 170,000-acre development area in western Kentucky and Tennessee situated between TVA's Kentucky reser-

voir and the Corps of Engineers' Barkley Lake. Land Between the Lakes is a demonstration of new ideas in public outdoor recreation and conservation education and its development is stimulating the lagging economy of the surrounding area by encouraging further private development. The project includes a variety of facilities where an urbanizing population can use part of its increased leisure to renew its acquaintance with the land and gain new understandings of modern concepts of resource use and conservation. Work on new facilities to be added to serve the growing number of visitors calls for capital outlays of \$2,194 thousand.

2. *Power program—power supply and use.*—TVA is the sole supplier of electric power in an area of 80,000 square miles of the Tennessee Valley States. Operations involve generation and transmission of power and sale of energy at wholesale to local distribution systems and directly to a small number of industries and Government agencies requiring large amounts of power. Power is purchased and distributed by 160 local public agencies and one small privately owned utility company. Total energy to be supplied is estimated to be 107.6 billion kilowatt-hours in 1971. This is about 9.6 billion kilowatt-hours greater than the energy supplied to the system in 1969 and about 5.8 billion kilowatt-hours above that estimated to be supplied in 1970. Net income from power operations, after interest charges and depreciation, is estimated to be \$96.3 million for 1971, compared with \$50.7 million in 1969, and an estimate of \$85.9 million in 1970.

Of the \$384,181 thousand estimate for power generating facilities, all to be financed from power proceeds and borrowings, \$120,301 thousand is for continuing construction of Browns Ferry nuclear units 1-3, \$111,782 thousand is for continuing construction of Cumberland steam units 1-2, \$86,218 thousand is for Sequoyah nuclear units 1-2, and \$13,880 thousand is for beginning construction of Raccoon Mountain pumped storage units 1-4, \$50.0 million is for construction of two blocks of gas turbine units, and \$2.0 million is for preliminary engineering and design studies related to the addition of three additional generating units. The three Browns Ferry units are scheduled for commercial operation in October 1971, April 1972, and October 1972; the Cumberland units in July 1972 and April 1973; the Sequoyah units in October 1973 and July 1974; and the Raccoon Mountain units at 3-month intervals beginning September 1974. The first block of gas turbine units is scheduled for commercial operation by June 1971 and the second in the fall of 1971. One additional unit is scheduled for October 1975, another for October 1976 and the last unit is for April 1977. Each increment in this program for power generating capacity additions and the schedule for providing it is essential to meeting rapidly growing power needs of the Tennessee Valley region.

Completion of the units as scheduled will bring the estimated dependable capacity of the system by the winter of 1974-75 to 27.5 million kilowatts, including other plants operated as a part of the TVA system. Total demands in the winter of 1974-75 are estimated at 24.9 million kilowatts, of which 2.1 million kilowatts will be served by capacity owned by others but made available to TVA under interchange arrangements. There will be a reserve of 20.5% over estimated demands of 22.8 million kilowatts served by TVA capacity to allow for loss of capacity because of breakdown of generating equipment and needs for its maintenance, failure of substation equipment and transmission lines, drawdown of reservoirs during dry periods, and other contingencies.

Capital outlay in 1971 for all power system facilities, including transmission system facilities, is estimated at \$471,499 thousand.

3. *Fertilizer and munitions development program.*—Chemical facilities at Muscle Shoals, Ala., are maintained and operated as a national fertilizer development center, but by statute they must also be available for munitions purposes. These facilities are important to the national defense.

Program activities are of two general types: fertilizer research and development and introduction to the American farmer of new fertilizer materials and improved fertilizer uses.

Fertilizer research and development consists of basic chemical and agronomic research and fertilizer process research and development. TVA works cooperatively with the Department of Agriculture, the land-grant colleges, and with industry to maximize effectiveness of research, hasten use of findings, and to avoid undesirable duplication. Research results on technological developments and on new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. Special attention is given to methods for the recovery of sulfur in useful form from stack gases.

Fertilizer introduction is carried on cooperatively with the land-grant colleges and includes carefully controlled small plot demonstrations, tests, and demonstrations of fertilizer materials and practices on selected operating

farms, and nationwide educational introduction of fertilizers, which is also conducted in cooperation with commercial fertilizer manufacturers, distributors, and dealers. Farmers and the fertilizer industry pay for the fertilizers used, with prices based upon the value of the plant nutrient content as measured by commercial fertilizer prices but discounted to reflect the novelty of the material or practice and the nature of the demonstration. Developmental production of fertilizer materials has these objectives: to demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense.

Capital outlay costs in 1971 for chemical facilities are chiefly for continuing the rehabilitation program begun in 1960. Modernization of the ammonia plant will be under way as will construction of a demonstration-scale unit for production of urea-ammonium phosphate fertilizers. Each step of the rehabilitation program makes significant contributions toward reduction in emissions of air and water pollutants.

4. *General service activities.*—Operating costs for general service activities cover topographic mapping, bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies. Capital outlay for additions and replacements of office, transportation, electronic computing equipment, and other facilities used jointly in conducting TVA programs is estimated at \$4,133 thousand.

Financing.—Amounts estimated to become available in 1971 are to be derived from (1) the requested appropriation of \$50,080 thousand; (2) nonpower revenues and receipts of \$26,065 thousand; and (3) power revenues and receipts of \$527,921 thousand. In addition, the budget program anticipates financing from borrowings of \$440 million backed by future revenues. A summary of the application of appropriations follows:

Operating results and financial condition.—Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1971 are estimated at \$80 million—\$60 million as a dividend (return on the appropriation investment in the power program) and \$20 million as a reduction in the appropriation investment in the power program.

Total assets are estimated to increase by \$455,391 thousand during 1971. The increase is mainly in fixed assets, reflecting expenditures for construction of facilities; \$439,957 thousand of the increase in assets is in the power program and \$15,434 thousand is in nonpower programs. The estimate of current liabilities at June 30, 1971, is \$17,516 thousand less than the estimate at June 30, 1970. The decrease reflects liabilities mainly related to construction. Total borrowings from the public for the power program are expected to increase by \$440 million during 1971. The total Government equity at June 30, 1971, is estimated to be \$32,944 thousand more than that at June 30, 1970. This change largely represents increases in investments in assets financed from sources other than borrowings.

UNITED STATES INFORMATION AGENCY

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan No. 8 of 1953, the Mutual Educational and Cultural Exchange Act (75 Stat. 527), and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil service and classification laws, of (1) persons on a temporary basis (not to exceed \$20,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Director of the Agency and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); entertainment within the United States not to exceed \$500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; services as authorized by 5 U.S.C. 3109; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; purchase of uniforms for not to exceed fifteen guards; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, scriptwriting, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under 5 U.S.C. 5701-5708, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [\$160,750,000] \$168,300,000: *Provided*, That not to exceed [\$110,000] \$210,000 may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201(c) of the Act of June 30, 1949 (40 U.S.C. 481(c)), and the exchange allowances or proceeds of such sales shall be available for

replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, shall not exceed such amounts as may be otherwise provided by law: *Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), the United States Information Agency is authorized, in making contracts for the use of international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities. (*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1970.*)

Note.—Excludes \$1,932 thousand in 1971, for activities transferred to United States Information Agency, Salaries and expenses, special foreign currency program, 1969, \$1,913 thousand, 1970, \$950 thousand.

The United States Information Agency seeks, by means of communication techniques, to influence public attitudes abroad to achieve U.S. foreign policy objectives. The Agency also advises those responsible for formulating and implementing foreign policies and programs as to the probable impact of those policies on foreign opinion.

The increase of \$2.5 million in obligations funded from the Salaries and expenses appropriations will fund non-discretionary increases required to maintain the lower program level remaining at the end of 1970. Selective program increases are provided for increased informational and cultural activities in East Europe; for representation expenses abroad; and for use of satellite circuits to relay radio and TV programs.

General and special funds—Continued

SALARIES AND EXPENSES—continued

1. *Overseas missions.*—The program is operative in 112 countries. The Agency operates through 233 posts and supports 131 binational centers. The overseas missions carry out country programs designed to influence local attitudes and actions in support of U.S. foreign policy. Overseas missions prepare materials using local facilities, and use materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(a) *The press and publications service* maintains communication facilities for the transmission of editorial, news, and feature materials for adaption by overseas missions. It produces two monthly magazines titled "America Illustrated," one for distribution in the Soviet Union and the other in Poland; and a monthly magazine, "Topic," in French and English editions for the African area, and in Arabic for distribution throughout the Arab world. The service also operates three regional printing centers and provides overseas missions with printing supplies and equipment.

(b) *The motion picture and television service* produces and acquires motion picture and television programs which are then translated into as many as 58 foreign languages. It adapts these programs for specific country or area use, and supports the foreign production, use, and distribution of films and television programs. The service also supplies the missions with equipment for showing motion pictures.

(c) *The information center service* supports U.S.-operated libraries and reading rooms, and binational centers, providing them with collections of American publications, both in English and in translation, and with English language teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display, and provides books and periodicals for presentation to selected individuals and groups.

(d) *The broadcasting service* produces radio broadcasts in English and in 37 foreign languages. Programs are broadcast from transmitters at five domestic and 12 overseas locations. The service also supplies the overseas missions with recorded radio programs and scripts for placement on foreign stations and with radio supplies and equipment.

3. *Program direction and other services.*—This activity encompasses Agency managerial staffs and centralized servicing functions. Included are the office of the Director, the office of policy, research and assessment staffs, physical and personnel security functions, legal counsel, central administrative services, and emergency planning.

4. *Shared administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

¹ Sale proceeds at \$10 thousand and contributions from private sources at \$35 thousand per Executive Order 11380.

The purpose of this program, except for trade missions, is to increase mutual understanding between the people of the United States and those of other lands through suitable U.S. exhibitions in international fairs and other demonstrations of American economic, social, industrial, scientific, and cultural attainments.

1. *Trade missions* are sent abroad to further the development of American export markets. There were 43 trade missions in 1969 and 56 are programed in 1970. Fifty are proposed for 1971.

2. *Labor missions* are sent to selected fairs and exhibitions abroad. There were eight labor missions in 1969; five are programed in 1970; and five are requested for 1971.

3. *Fairs and exhibitions* combine the former international trade fair and special purpose exhibition programs. In 1969, 19 exhibits were mounted at international fairs and a fourth series United States/Soviet exchange exhibit and one special exhibit were reshowed in East Europe. In 1970 seven exhibits will be mounted at international fairs, the fifth series of exchange exhibits will be shown at six sites in the Soviet Union and a fourth series exchange exhibit will be reshowed in an East European country. The 1971 estimate provides for seven trade fair exhibits, re-showings of a fourth series exchange exhibit in two East European countries, and initial showings of the sixth series exhibits in the Soviet Union.

4. *Osaka Fair*.—U.S. participation in the Japan World Exposition to be held in calendar year 1970 is funded at \$10 million, \$9,307 thousand of which was appropriated in the second supplemental appropriation of 1968 and \$693 thousand of which was authorized for transfer from previously appropriated balances. Obligations for the fair were incurred in 1968 and 1969 and will continue through 1971.

90 Outlays.....	7,776	9,000	8,567

These funds, which remain available until expended, will provide for:

1. *Acquisition and construction of facilities.*—The 1970 program reflects the completion of obligations for active major construction projects. No new projects are requested in 1971.

2. *Maintenance and improvement of existing facilities.*—Recurring improvement requirements, to maintain the worldwide plant in good repair.

3. *Research and development.*—Research will continue in engineering development, equipment design, and radio propagation techniques applicable to the Voice of America.

90 Outlays.....	3	-10	-----

¹ Selected resources consist of current liabilities and contingent liabilities on guarantees outstanding. The combined amounts for these items are: 1968, \$123 thousand; 1969, \$0; 1970, \$0; 1971, \$0.

Congressional action in connection with the Agency's 1967 appropriation called for the termination of IMG

operations. Since then the Agency has stopped issuance of new guaranties and has completed action on all contracts.

Under the program recently terminated, foreign countries with serious dollar exchange problems have imported U.S. books, periodicals, films, and other informational media.

Program.—Under present authority, payments under existing contracts were completed. No new contracts are being issued.

Financing.—At present no additional borrowings from Treasury are anticipated. Resources of the fund consisting of cash on hand plus receipts from sales of foreign currencies were sufficient to finance payments to contractors.

The objectives of the United States-Mexico Commission for Border Development and Friendship, a binational commission established by the Presidents of Mexico and the United States in 1966, have been to further the efforts of public and private agencies on both sides of the border in behalf of international friendship and toward improvement of socioeconomic conditions of the border area.

The resources available to the Commission prior to 1970 were provided by transfers from other Federal agencies. The United States section will expire January 31, 1970.

The Water Resources Planning Act of 1965 (Public Law 89-80, July 22, 1965) established the Water Resources Council. Under title I of the act, the Council assesses national and regional water requirements, coordinates the comprehensive planning programs of the Federal agencies, develops procedures for Federal participation in regional or river basin plans, and reviews plans developed by river basin commissions. Title II of the act authorizes river basin commissions for the development of comprehensive regional water and related land use plans designed to make optimum use of such resources. Title III of the act authorizes financial assistance to the States in developing comprehensive water and related land resources plans. The Water Resources Council coordinates the grant program with related planning assistance programs of other Federal agencies.

Program and Financing (in thousands of dollars)

Identification code 30-38-0151-2-1-608	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Payment to the Corporation for Public Broadcasting (costs—obligations).....			22,500
Financing:			
40 Budget authority.....			22,500
Relation of obligations to outlays:			
71 Obligations incurred, net.....			22,500
90 Outlays.....			22,500

This estimate provides continuation of financing for the Corporation for Public Broadcasting. Legislation will be proposed to extend for 3 years the appropriation authorization for the annual Federal contribution and to provide for Federal matching of non-Federal contributions to the Corporation.

Contributions to the Corporation from non-Federal sources in 1971 are expected to total \$7.5 million to support an overall Corporation program of \$30 million.

Proposed for separate transmittal, proposed legislation :

DISTRICT OF COLUMBIA

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA
Program and Financing (in thousands of dollars)

Identification code 30-42-1700-2-1-909	1969 actual	1970 est.	1971 est.
Program by activities:			
1. Payment to District of Columbia general fund.....		7,000	27,000
2. Assistance for financing capital outlay program:			
(a) Capital grants for higher education facilities.....			20,000
(b) Support for local D.C. bond expenses.....			1,000
10 Total program cost funded—obligations.....		7,000	48,000
Financing:			
40 Budget authority (appropriation).....		7,000	48,000
Relation of obligations to outlays:			
71 Obligations incurred, net.....		7,000	48,000
74 Obligated balance, end of year.....			-12,700
90 Outlays.....		7,000	35,300

Legislation will be proposed to increase the annual Federal payment to the District Government and to provide assistance in financing the city's capital outlay program.

1. *Payment to District of Columbia general fund.*—It is proposed that beginning in 1970, the authorization for the annual Federal payment to the District of Columbia be fixed at a level equal to 30% of local revenues accruing to the general fund. This will provide for an equitable contribution of the Federal Government toward the general

operating expenses of the District of Columbia government. The additional \$7 million in 1970 will be paid to the city for augmented police protection. The \$27 million proposed for separate transmittal in 1971 will bring the Federal payment up to a new authorization of \$132 million.

2. *Assistance for financing capital outlay program.*—Legislation will be proposed to provide financial assistance to the District government by authorizing:

(a) *Capital grants for higher education facilities.*—The Federal Government would make direct grants, \$20 million for 1971, for construction of the physical facilities for the Federal City College and the Washington Technical Institute and the District government would continue to pay for operating expenses out of the general revenues of the District of Columbia; and

(b) *Support for local D.C. bond expenses.*—It is proposed that the Federal Government guarantee local taxable bonds to be issued by the District government to finance the city's public works program. (See proposed transition loans to the District of Columbia for capital outlay.) Annual support payments, beginning with \$1 million for 1971, would be made to the District government to cover such expenses as interest costs above the average long-term Treasury interest rate, underwriting charges, and other financing costs.

Proposed for separate transmittal, proposed legislation :

TRANSITION LOANS TO THE DISTRICT OF COLUMBIA FOR CAPITAL OUTLAY

Program and Financing (in thousands of dollars)

Identification code 30-42-9999-2-1-909	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Loans to general and special funds for transition borrowing (costs—obligations).....			27,500
Financing:			
40 Budget authority (appropriation).....			27,500
Relation of obligations to outlays:			
71 Obligations incurred, net.....			27,500
90 Outlays.....			27,500

Legislation will be proposed to permit the District Government to finance its public works program and capital outlay costs by issuing local bonds rather than borrowing from the Federal Government. The conversion to local D.C. bonds is to be on a phased basis which will not require refinancing of existing outstanding debt of the District Government nor adversely affect execution of the city's public works program. In order to provide for an orderly transition period, additional Federal loan authorization will be required for 1971 for capital outlay costs of the District's general and special funds. When the proposed conversion to local D.C. bonds is completed, the District Government's public works financing will be on a basis similar to those of other State and local governments with local capital outlay costs—excluding those for higher education facilities—thus becoming a direct financial responsibility of the District rather than of the U.S. taxpayer.

Proposed for separate transmittal, proposed legislation :

RAILROAD RETIREMENT BOARD

RAILROAD RETIREMENT ACCOUNT

Program and Financing (in thousands of dollars)

Identification code 32-20-8011-2-7-701	1969 actual	1970 est.	1971 est.
Program by activities:			
1. Benefit payments.....		51,600	103,200
2. Administrative expenses.....		500	500
10 Total program costs, funded-- obligations.....		52,100	103,700
Financing:			
21 Unobligated balance available, start of year.....			52,100
24 Unobligated balance available, end of year.....		-52,100	-52,100
40 Budget authority (proposed supple-appropriation).....			103,700
Relation of obligations to outlays:			
71 Obligations incurred, net.....		52,100	103,700
72 Obligated balance, start of year.....			8,600
74 Obligated balance, end of year.....		-8,600	-8,600
90 Outlays.....		43,500	103,700

Legislation enacted in 1969 for the social security system will affect the benefits and administrative expenses because of coordinating provisions in the Railroad Retirement Act. Enactment of amendments to the Social Security Act is expected to be followed by enactment of amendments to the Railroad Retirement Act to provide increases in cash benefits to those beneficiaries on the rolls of the Railroad Retirement Board not receiving increases

as a result of amendments to the Social Security Act. Payroll taxes and maximum taxable earnings base will be increased in an amount sufficient to cover the additional costs.

Proposed for separate transmittal, proposed legislation :

TENNESSEE VALLEY AUTHORITY

Program and Financing (in thousands of dollars)

Identification code 33-15-4110-2-3-401	1969 actual	1970 est.	1971 est.
Financing:			
24.49 Unobligated balance available, end of year: Contract authority.....			200,000
49 Budget authority (contract authority).....			200,000
Contract authority.....			200,000
Unfunded balance, end of year.....			-200,000
Appropriation to liquidate contract authority.....			

In order to have adequate facilities for the power program in subsequent years, it is necessary to incur obligations in 1971 of nearly \$200,000 thousand in excess of funds presently available. The deficiency would be covered by power revenues, or if they are not sufficient, by proposed legislation for budget authority.

The obligations program to be funded in this manner is included in the regular budget presentation for the Authority. The balance entry above slightly more than offsets the deficiency entry in the regular schedules.

PART II

SCHEDULES OF PERMANENT POSITIONS

EXPLANATION OF SCHEDULES OF PERMANENT POSITIONS

Part II contains detailed schedules of permanent positions which are furnished to the Congress, pursuant to section 204 of the Budget and Accounting Act, 1921, as amended (31 U.S.C. 581), and waivers thereunder granted by the Appropriations Committees. These schedules relate to positions established for full-time employment without time limit, and to any others occupied for a year or more. Positions authorized at the end of the year are counted, whether filled or unfilled at that time; positions abolished during the year are not counted.

The first section of the schedule, headed "Grades and ranges," contains a listing of the grades and salary ranges of authorized positions, and the total number in each grade, as illustrated below:

	1969 actual	1970 est.	1971 est.
GRADES AND RANGES			
Executive level V, \$36,000.....	1	1	1
GS-18, \$33,495.....	1	1	1
GS-17, \$28,976 to \$32,840.....	1	1	1
GS-16, \$25,044 to \$31,724.....	3	3	3
GS-15, \$21,589 to \$28,069.....	27	29	29
GS-14, \$18,531 to \$24,093.....	30	30	30
GS-13, \$15,812 to \$20,555.....	66	68	68
GS-12, \$13,389 to \$17,403.....	106	110	110
GS-11, \$11,233 to \$14,599.....	99	99	99
GS-9, \$9,320 to \$12,119.....	26	13	13
GS-8, \$8,449 to \$10,987.....	3	3	3
GS-7, \$7,639 to \$9,934.....	30	28	28
GS-6, \$6,882 to \$8,943.....	23	23	23
GS-5, \$6,176 to \$8,030.....	61	65	65
GS-4, \$5,522 to \$7,178.....	57	51	51
GS-3, \$4,917 to \$6,393.....	11	7	7
GS-2, \$4,360 to \$5,665.....	1	1	1
Total permanent positions.....	546	533	533
Unfilled positions, June 30.....	-21	-5	-5
Total permanent employment, end of year.....	525	528	528

Grades and their respective salary ranges are reflected in the stub column; the most commonly used grade series, the general schedule grades, is abbreviated "GS-..." The

salary ranges shown are the normal ranges of the pay scales which became effective in July 1969 for graded positions, and in March 1969 for executive level grades. These pay scales may be exceeded, however, (in the general schedule grades and certain other positions) when pay rates in private enterprise for one or more occupations in one or more areas or locations are substantially above the statutory rates. In such cases, the Civil Service Commission has authority to permit a higher entrance level (not to exceed the maximum pay step prescribed by statute) and add a corresponding number of steps above the stated pay range. Two additional lines this year provide for deducting the number of unfilled positions to arrive at the total employment in permanent positions at the end of the year.

The second section of the schedule lists operating titles of the individual positions under each grade for which the minimum basic annual salary is equal to or greater than that for grade GS-16 (\$25,044).

HIGHER LEVEL POSITIONS			
Executive level V, \$36,000:			
Commissioner of public buildings.....	1	1	1
GS-18, \$33,495:			
Deputy commissioner of public buildings.....	1	1	1
GS-17, \$28,976 to \$32,840:			
Assistant commissioner for space management.....	1	1	1
GS-16, \$25,044 to \$31,724:			
Deputy assistant commissioner for space management.....	1	1	1
Director of program management.....	1	1	1
Regional director, Public Buildings Service.....	1	1	1

The number of positions shown in a consolidated schedule will equal the sum of the entries for permanent positions reflected in the related personnel summary schedules that appear in Part I of the Appendix.

GRADES AND RANGES—con.

GS-3, \$4,917 to \$6,393.....	118	114	114
GS-2, \$4,360 to \$5,865.....	40	40	40
GS-1, \$3,889 to \$5,057.....	3	3	3

Grades established by act of Aug. 1, 1947 (5 U.S.C. 3104, 3325, 5361):			
Chief of office, \$33,495.....	1	1	1
Grades established by the Secretary of Commerce:			
Professor, \$18,800 to \$25,315.....	20	22	22
Associate professor, \$14,088 to \$22,249.....	35	35	35
Assistant professor, \$10,979 to \$16,781.....	27	27	27
Instructor, \$9,113 to \$12,845.....	18	18	18
Ungraded.....	513	372	322

Total permanent posi- tions.....	2,183	2,021	1,953
Unfilled positions, June 30.....	-239	-205	-120

Total permanent employ- ment, end of year.....	1,944	1,816	1,833
---	-------	-------	-------

HIGHER LEVEL POSITIONS

Executive level V, \$36,000:			
Administrator.....	1	1	1
GS-18, \$33,495:			
Deputy administrator.....	1	1	1
Assistant administrator for maritime aids.....		1	1
Assistant administrator for operations.....		1	1
Assistant administrator for research and development.....		1	1
GS-17, \$28,976 to \$32,840:			
Chief of office.....	2	2	2
Director of systems engineer- ing.....	1	1	1
General counsel.....	1	1	1
GS-16, \$25,044 to \$31,724:			
Assistant administrator for administration.....	1	1	1
Assistant chief for engineer- ing programs.....	1	1	1
Chief hearing examiner.....	1	1	1
Chief of office.....	1	1	1
Regional director.....	1	1	1
Deputy chief of office.....	2	3	3
Deputy general counsel.....	1	1	1
Hearing examiner.....	1	1	1
Program manager.....	1	1	1
Grades established by act of Aug. 1, 1947 (5 U.S.C. 3104, 3325, 5361):			
Chief of office \$33,495.....	1	1	1

Special assistant (logistics plans and policies)	1	1	1	Associate technical director, plans and programs	1	1	1	Head, bioenergetics division				1	1	1
Special assistant (security)	1	1	1	Associate technical director, research	1	1	1	Head, engineering department				1	1	1
Special assistant for plans, policy, and organization	1	1	1	Branch engineer, fire control and guidance branch	1	1	1	Head, engineering psychology branch				1	1	1
Special assistant for small business and labor surplus	1	1	1	Branch engineer, ship installation and design branch	1	1	1	Head, equipment research branch				1	1	1
Special assistant for transportation and traffic management	1	1	1	Branch head, intercom communications, navigation, control and computer systems branch	1	1	1	Head, missile systems department				1	1	1
Supervisory aerospace engineer	14	15	15	Chief analyst, systems analysis office	1	1	1	Head, navigation sensors, and ship control branch				1	1	1
Supervisory cartographer	1	1	1	Chief engineer	1	1	1	Head, propulsion development department				1	1	1
Supervisory chemical engineer	2	2	2	Chief engineer, assistant commander for engineering and design	1	1	1	Head, research department				1	1	1
Supervisory chemist	10	10	10	Chief engineer, missile branch	1	1	1	Head, rocket spectroscopy branch				1	1	1
Supervisory electrical engineer	1	1	1	Chief engineer, range development department	1	1	1	Head, systems development department				1	1	1
Supervisory electronic engineer	30	31	31	Chief engineer, range operations department	1	1	1	Head, technical support department				1	1	1
Supervisory materials engineer	2	2	2	Chief engineer, sonar system office	1	1	1	Head, upper air physics branch				1	1	1
Supervisory mathematician	3	3	3	Chief engineer, technical division	1	1	1	Head, weapons development department				1	1	1
Supervisory mechanical engineer	4	4	4	Chief mathematician	1	1	1	Head, weapons planning group				1	1	1
Supervisory meteorologist	1	1	1	Chief scientist	2	2	2	Program manager, human factors research and development				1	1	1
Supervisory naval architect	5	5	5	Chief scientist for research and development	1	1	1	Research and engineering consultant to CINCPAC				1	1	1
Supervisory nuclear engineer	5	8	8	Chief scientist, laboratory for chemical physics	1	1	1	Scientific adviser				1	1	1
Supervisory oceanographer	1	1	1	Chief systems engineer	1	1	1	Scientific and technical director				1	1	1
Supervisory physical scientist	45	46	46	Deputy assistant oceanographer of Navy and director of Maury Center for Ocean Sciences	1	1	1	Scientific director				3	3	3
Supervisory physicist	38	41	41	Deputy chief and chief scientist	1	1	1	Scientific director, navigation satellite program				1	1	1
Supervisory space scientist	4	4	4	Deputy chief scientist	1	1	1	Scientific director, ONR branch office, London				1	1	1
Supervisory systems analyst	13	12	12	Deputy director, exploratory development division	1	1	1	Special assistant (electronics)				1	1	1
Systems analysis officer	1	1	1	Deputy director of research	1	1	1	Special assistant for antisubmarine warfare and systems development				1	1	1
Technical adviser, real property management	1	1	1	Deputy director, reactor engineering division	1	1	1	Special assistant (science) to assistant secretary of the Navy (R. & D.)				1	1	1
Technical director, information data systems	1	1	1	Deputy director, technical analysis and advisory group	1	1	1	Superintendent, acoustics division				1	1	1
Grades established by 10 U.S.C. 1581: \$25,044 to \$33,495:				Deputy for systems analysis	1	1	1	Superintendent, application research division				1	1	1
Assistant director for mine countermeasures	1	1	1	Deputy technical director	1	1	1	Superintendent, atmosphere and astrophysics division				1	1	1
Assistant director for personnel logistics	1	1	1	Deputy technical director for the research laboratory	1	1	1	Superintendent, chemistry division				1	1	1
Assistant director for strike warfare	1	1	1	Director, advanced systems division	1	1	1	Superintendent, electronics division				1	1	1
Assistant director for surveillance systems	1	1	1	Director, antisubmarine warfare	1	1	1	Superintendent, electronic warfare division				1	1	1
Assistant director for systems planning	1	1	1	Director, behavioral science department	1	1	1	Superintendent, mathematics and information sciences division				1	1	1
Assistant division director and chief naval architect, hull division	1	1	1	Director, biological science division	1	1	1	Superintendent, metallurgy division				1	1	1
Assistant division director and technical director, machinery and systems division	1	1	1	Director, computation and analysis laboratory	1	1	1	Superintendent, nuclear physics division				1	1	1
Assistant for electrical systems	1	1	1	Director, electronics technical standards and compatibility office	1	1	1	Superintendent, ocean sciences and engineering division				1	1	1
Assistant for systems integration and compatibility	1	1	1	Director, evaluation division	1	1	1	Superintendent, ocean technology division				1	1	1
Assistant technical director for sensors	1	1	1	Director, material science division	1	1	1	Superintendent, plasma physics division				1	1	1
Associate director for limited warfare	1	1	1					Superintendent, radar division				1	1	1
Associate director of research for electronics	1	1	1

PART III

ANNEXED BUDGETS AND SUPPLEMENTARY
MATERIAL

EXPLANATION OF ANNEXED BUDGETS AND SUPPLEMENTARY MATERIALS

Part III presents detailed schedules and explanatory statements on the Board of Governors of the Federal Reserve System, and on five Government-sponsored enterprises which are outside the normal budget process. The annexed budgets are not reviewed by the President, and are presented in the amounts submitted by the agencies. The Government-sponsored enterprises are privately owned and therefore are excluded from the budget totals. The Federal National Mortgage Association's secondary market operations fund, formerly under mixed-ownership, became a privately owned venture on September 30, 1968. The Federal land bank system, consisting of 12 Federal land banks, is cooperative and is completely farmer-owned. The 12 Federal intermediate credit banks, and the 13 banks for cooperatives, also supervised by the Farm Credit Administration, became wholly privately owned on December 31, 1968. The 12 Federal home loan

banks, which are supervised by the Federal Home Loan Bank Board, obtain their funds from capital stock owned by member institutions, issuance of their own obligations, and deposits of member institutions. For those enterprises which changed ownership during the fiscal year 1969, the transactions prior to the change are presented in Part I of this volume, and only the transactions since the change are shown here in Part III.

The material on annexed budgets is presented in the general format of similar material for public enterprise and trust revolving funds in Part I. No appropriation language appears because action by Congress is not required.

This part also presents the receipts of the trust funds, organized by agency and fund, and loan disbursements, repayments, and net outlays, also organized by agency and fund.

ANNEXED BUDGETS AND SUPPLEMENTARY MATERIAL

¹ The changes in selected resources are identified on the statement of financial condition and the analysis of equity.

The Federal National Mortgage Association is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by providing a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

To carry out this purpose, FNMA buys, sells, and otherwise deals in mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration, and certain loans insured by the Farmers Home Administration. The corporation also makes short-term loans on the security of any such loans and mortgages, and sells securities based on its own mortgages set aside for that purpose.

The common stock of the corporation is owned by the public and is fully transferable and fully traded. Its capitalization is continuously expanded by the statutory requirement that mortgage sellers make capital contributions in the form of subscriptions to common stock equal to not more than 2% nor less than 1% of the mortgages involved. Borrowers from the corporation are required to make such capital contributions equal to not more than one-half of 1% of the amounts borrowed.

The Federal National Mortgage Association (secondary market operations) was initially capitalized under the Housing Act of 1954 by the issuance of \$92.8 million of preferred stock to the Secretary of the Treasury. Additional preferred stock subscriptions by the Secretary of the Treasury were authorized under subsequent acts, the total of such authorizations having aggregated \$317.8 million.

The authorizing statute, Public Law 83-560, approved August 2, 1954, originally contemplated that FNMA's secondary market operations would ultimately be completely owned and financed by private participants. On September 1, 1968, pursuant to Public Law 90-448, approved August 1, 1968, FNMA's secondary market operations were converted into a Government-sponsored corporation. On September 30, 1968, the \$163.8 million of outstanding preferred stock held by the Secretary of the Treasury was retired and the corporation became completely privately owned. The portion of the retained earnings deemed to have been earned on the Government's investment in the secondary market operations, amounting to \$54 million, was paid to the Treasury on that date under an escrow arrangement, pending a final determination of the amount of such earnings and

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Continued

the disposition of the funds. As a privately owned corporation, FNMA has been able to raise money in the private capital markets and to support the secondary mortgage market unconstrained by considerations which control the Federal budget.

The Association has three separate authorities to borrow money from private sources. It may issue subordinated capital debentures in an amount not in excess of twice the net equity. It may in addition borrow amounts not in excess of the sum of net equity and subordinated capital debentures outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 25. These borrowings usually take the form of debentures, short-term discount notes, or bank loans. Finally, FNMA may issue securities, guaranteed by the Government National Mortgage Association, which are fully backed by pools of mortgages. This last type of borrowing is limited only by the size of FNMA's loan portfolio.

The forecast data contained in this material have been developed based on assumptions that economic activity will moderate during 1970 and that inflationary pressures will subside. These assumptions were adopted to achieve consistency with assumptions underlying the President's budget and should not be construed as the corporation's official forecast.

A summary of the statement of financial condition as of October 1, 1968, the start of the period of completely private ownership, is shown in the following table:

¹ Balances of selected resources are identified on the statement of financial condition.

The banks for cooperatives, of which there are 13, are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of debentures to the public and from their own capital funds. The debentures which the banks issue are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

¹ Balances of selected resources are identified on the statement of financial condition.

The Federal intermediate credit banks, of which there are 12, are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to, local financing institutions, such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of debentures to the public and from their own capital funds. The debentures are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks became mixed-ownership corporations and were made

responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal land banks, through the 643 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States.

The last of the Government capital that had been invested in the banks was repaid in 1947.

¹ Balances of selected resources are identified on the statement of financial condition.

The 12 Federal home loan banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions and their main function is to supply their members—principally savings and loan type institutions, and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home mortgage lenders in their own communities. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1969 the banks extended credit amounting to \$3.3 billion and received repayments of \$1.7 billion. Advances outstanding on June 30, 1969, totaled \$6.4 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On June 30, 1969, \$5.5 billion of these obligations were outstanding. The consolidated obligations are not

guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include 25% of deposits from members (with total deposits amounting to \$1.3 billion on June 30, 1969), and funds paid for the purchase of capital stock by member institutions, amounting to \$1.5 billion at the end of 1969. Funds not immediately needed for advances to members are invested in obligations of the United States or agencies thereof.

The capital stock of the Federal home loan banks is owned entirely by their members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951, and since that time the banks have been owned entirely by their members.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a substantial portion of the Board's administrative and other costs.

¹ Balance of selected resources is identified on the statement of financial condition.

1. *Basic legislation.*—The Federal Reserve System operates under the provisions of the act of December 23, 1913, known as the Federal Reserve Act (38 Stat. 251), as amended (included in Chap. 3, 12 U.S.C.), and other acts of Congress.

2. *Program.*—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

3. *Financing.*—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.
