

APPENDIX

**THE
BUDGET
OF THE UNITED STATES GOVERNMENT**

FISCAL YEAR 1971

FOREWORD

This is one of several documents which relate to the budget for 1971. *The Budget of the United States Government, 1971*, is a volume containing the Budget Message of the President, information on the Federal program by function, and summary tables and statistical information.

The Budget of the United States Government, 1971—Appendix contains the text of appropriation estimates proposed for the consideration of the Congress together with specific supporting information on the various appropriations and funds, and other supplementary material. The contents of this volume are further explained at the beginning of each of its three parts.

The Budget of the United States Government, 1971—The District of Columbia is a volume which relates specifically to the estimates for the municipal government of the District of Columbia.

In addition, a pamphlet type of publication, *The Budget in Brief, 1971*, is available for those who wish a more concise and less technical presentation than any of the foregoing three official volumes.

A second pamphlet type of publication, *Special Analyses, Budget of the United States, 1971*, contains 18 special analyses of significant aspects of the Federal budget.

NOTE.—Unless otherwise indicated, all references to years in this volume are to fiscal years ending June 30. Financial tables are nearly always stated in thousands of dollars; details may not add to the totals because of rounding.

EXPLANATION OF ESTIMATES

Part I contains various types of tables and schedules in support of the budget, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item for which congressional action in an appro-

priation bill is required. It also contains the text of general appropriation provisions proposed for enactment by the Congress which often apply to entire agencies or groups of agencies.

ARRANGEMENT

The chapters of this part reflect the branches of Government, and the major departments and agencies of the executive branch. For the latter, smaller agencies are grouped in one chapter—"Other independent agencies."

Within each chapter there are three main sections. The first section covers programs authorized by existing legislation (including items for which extension or renewal of existing legislation is requested). This section is organized by major subordinate organizations within the agency (usually bureaus). For each bureau, *Federal funds*, covering the funds owned by the Government, precede *trust funds*, covering funds which are held in a fiduciary capacity by the Government.

The second major section of each chapter covers the *legislative program* which reflects the costs of proposed new legislation. This section is also organized by bureau, or other major subordinate organization. The proposals are applicable to Federal funds unless otherwise indicated.

The third section of each chapter includes the *general provisions* of appropriation language which are applicable to the agency as a whole, and are in addition to the specific language pertaining to individual appropriation items.

An explanation of the types of funds included in the budget may be found in the compact volume—The Budget of the United States Government, 1971 (part 6).

FORM OF DETAILED MATERIAL

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1971 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for separate transmittal. The language of the 1970 appropriation acts, printed in roman type, is used as a base. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit, as in this example:

SALARIES AND EXPENSES

For necessary expenses to carry into effect the provisions of the Commodity Exchange Act, as amended (7 U.S.C. 1-17[a]b), **[\$2,321,000]** *\$2,552,000.* (Department of Agriculture and Related Agencies Appropriation Act, 1970.).

Following the language, and printed in italics within parentheses, are citations to relevant authorizing legislation and to the appropriation act from which the text is taken.

BASIS FOR SCHEDULES

The basic schedules for Federal and trust funds usually exclude supplemental estimates, which will be transmitted to Congress separately for 1970 and 1971; these are covered separately by brief schedules of program and financing, without appropriation language. However, in the 1970 column, the basic schedules include (and identify) supplementals required to meet costs of military and civilian pay increases effective during 1970 in accordance with legislation enacted in 1967, and those resulting from wage-board decisions.

The 1971 column includes, within the regular schedules, appropriations for recommended extension or renewal of expiring laws; however, money for new legislation is shown separately, under the legislative program. Appropriation language is included for the former, but not for the latter.

Where the required data are available in the accounting system, budgets are presented in terms of costs. Detailed

operating cost figures for each activity or object are the value of goods and services consumed in carrying out the program. In the case of capital outlay programs, they are the value of assets acquired.

Total obligations are always shown; activities and objects are reflected on an obligation basis where cost data are not available. Obligations refer to orders placed, contracts awarded, loan agreements made, and recurring services (such as rent, utilities, and personal services) received during the year, regardless of the time of payment.

For a few Government corporations, the detail and the totals of limitations are on the basis of accrued expenditures.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of three parts. In the program by activities section, costs or obligations are classified by purpose, program, type of activity, or project for 1969, 1970, and 1971. This classification is individually developed for each appropriation or fund, and is not uniform on a Government-wide basis. Similarly, the identification of capital outlay is not handled uniformly. Where it is of significance, capital outlay is shown by activity. Otherwise, the total for each year is disclosed by footnote.

Where budgets are presented in terms of costs, the relation of costs to obligations is summarized in an entry "Change in selected resources." For appropriation accounts, and for revolving funds for which no business-type financial statements are presented, this entry is supported by a footnote identifying the amounts of the resources involved. For the remaining revolving funds, the items are identified on the statement of financial condition and the appended tabulation.

In certain cases, this schedule is expanded to include additional columns that provide a more informative presentation. This is done, for example, in some construction or procurement programs to show related cost data; for certain Defense items to identify the total obligations

programed; and for programs financed at a "preobligation" stage (such as "commitments" in some loan programs).

Program and Financing (in thousands of dollars)

Identification code 05-40-1900-0-1-355	1969 actual	1970 est.	1971 est.
Program by activities:			
1. Licensing and auditing of brokerage houses.....	563	638	638
2. Supervision of futures trading.....	780	1,160	1,234
3. Investigation.....	418	680	680
Total program costs, funded ¹	1,761	2,478	2,552
Change in selected resources ²	97		
10 Total obligations.....	1,858	2,478	2,552
Financing:			
25 Unobligated balance lapsing.....	23		
Budget authority.....	1,881	2,478	2,552
Budget authority:			
40 Appropriation.....	1,895	2,321	2,552
41 Transferred to other accounts.....	-14	-13	
43 Appropriation (adjusted).....	1,881	2,308	2,552
44.20 Proposed supplemental for civilian pay act increases.....		170	
Relation of obligations to outlays:			
71 Obligations incurred, net.....	1,858	2,478	2,552
72 Obligated balance, start of year.....	110	224	270
74 Obligated balance, end of year.....	-224	-270	-316
77 Adjustments in expired accounts.....	-12		
90 Outlays, excluding pay increase supplemental.....	1,732	2,269	2,499
91.20 Outlays from civilian pay act supplemental.....		163	7

¹ Includes capital outlay as follows: 1969, \$24 thousand; 1970, \$0; 1971, \$0.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$30 thousand (1969 adjustments, -\$12 thousand); 1969, \$115 thousand; 1970, \$115 thousand; 1971, \$115 thousand.

The "Financing" section shows the fund sources, budget authority, and other means of financing the program, and the disposition of amounts not used during the year.

The section on "Relation of obligations to outlays" shows obligations net of receipts and other offsets, obligated balances at the start and end of the year, and other items which affect the relation of obligations to outlays.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable, the narrative statement presents accomplishments in relation to financial requirements, and available measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS	30 ACQUISITION OF CAPITAL ASSETS
11 Personnel compensation	31 Equipment
12 Personnel benefits	32 Lands and structures
13 Benefits for former personnel	33 Investments and loans
20 CONTRACTUAL SERVICES AND SUPPLIES	40 GRANTS AND FIXED CHARGES
21 Travel and transportation of persons	41 Grants, subsidies, and contributions
22 Transportation of things	42 Insurance claims and indemnities
23 Rent, communications, and utilities	43 Interest and dividends
24 Printing and reproduction	44 Refunds
25 Other services	
26 Supplies and materials	

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used. Data according to this classification are illustrated in the following schedule:

Object Classification (in thousands of dollars)

Identification code 05-40-1900-0-1-355	1969 actual	1970 est.	1971 est.
Personnel compensation:			
11.1 Permanent positions.....	1,448	1,839	1,851
11.3 Positions other than permanent.....	1	6	6
11.5 Other personnel compensation.....	1	1	1
Total personnel compensation.....	1,450	1,846	1,858
12.1 Personnel benefits: Civilian employees.....	109	147	153
21.0 Travel and transportation of persons.....	34	65	76
22.0 Transportation of things.....	2	6	6
23.0 Rent, communications, and utilities.....	64	78	199
24.0 Printing and reproduction.....	28	37	39
25.0 Other services.....	126	250	174
26.0 Supplies and materials.....	11	17	25
31.0 Equipment.....	34	32	22
99.0 Total obligations.....	1,858	2,478	2,552

Several of the object classes are broken down into subclasses—personnel compensation, for example, is shown separately for permanent positions, for positions other than permanent, and for certain other payments. A third digit is therefore used in the object schedules to identify the subclasses; a zero is used for the third digit when there are no subclasses. Additional entries are shown for unvouchered obligations—those for which accountability is waived (coded 91.0); for amounts which cannot be distributed by object class (coded 92.0); and for certain other adjusting entries that are needed to reach a total which agrees with the total obligations shown on line 10 in the program and financing schedule.

A personnel summary is appended to the object classification schedule, as illustrated:

Personnel Summary

Total number of permanent positions.....	155	180	180
Average number of all employees.....	150	170	170
Average GS grade.....	7.8	7.8	7.8
Average GS salary.....	\$9,633	\$10,218	\$10,286

Permanent positions are those of a full-time nature and indefinite duration. Some are filled by persons with temporary appointments. Other positions include those of a temporary nature (a year or less), part-time jobs (less than a full workweek), and intermittent employment (occasional employees).

Average grades and salaries are computed arithmetically. Thus the average salary can fall outside the salary range of the average grade.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement is usually on a full accrual basis, including provision for depreciation, for losses on receivables, etc. Where a fund consists of several programs, or revenue is derived from nonoperating sources revenue and expense are identified for each, as follows:

Revenue, Expense, and Retained Earnings (in thousands of dollars)			
	1969 actual	1970 est.	1971 est.
Sales program:			
Revenue.....	63,206	63,823	64,865
Expense.....	-62,427	-63,459	-64,554
Net operating income, sales program..	779	364	311
Nonoperating income or loss:			
Proceeds from sale of equipment.....	39	39	40
Net book value of assets sold.....	-89	-89	-89
Net loss from sale of equipment.....	-51	-50	-49
Miscellaneous income.....	178	193	192
Net nonoperating income.....	128	143	143
Net income for the year.....	906	507	454
Analysis of retained earnings:			
Retained earnings, start of year.....	11,002	11,861	12,368
Transfer to general fund.....	-47		
Retained earnings, end of year.....	11,861	12,368	12,823

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any adjustments of retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether as cash, inventories, or other assets).

STATEMENT OF FINANCIAL CONDITION

For each fund showing a revenue and expense statement, there is also presented a balance sheet of assets, liabilities, and equity of the Government at the close of the year.

The balance sheet excludes balances of appropriations and borrowing authorizations which have not yet been paid into the revolving fund. The section on equity of the Government is divided into three subsections as appropriate: (a) interest-bearing capital, (b) non-interest-bearing capital, and (c) retained earnings.

Financial Condition (in thousands of dollars)				
	1968 actual	1969 actual	1970 est.	1971 est.
Assets:				
Cash with Treasury, in banks, on hand, and in transit.....	3,047	3,687	3,921	4,217
Accounts receivable.....	549	515	515	515
Selected assets: ¹				
Commodities for sale.....	6,583	6,603	6,649	6,744
Prepaid expenses and other assets.....	16	20	20	20
Fixed assets, net.....	4,272	4,683	4,921	5,061
Total assets.....	14,468	15,508	16,027	16,557
Liabilities:				
Accounts payable and accrued liabilities.....	3,098	3,279	3,290	3,366
Government equity:				
Non-interest-bearing capital:				
Start of year.....	368	368	368	368
Donated property.....				
End of year.....	368	368	368	368
Retained earnings.....	11,002	11,861	12,368	12,823
Total Government equity.....	11,370	12,229	12,737	13,191

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is normally appended to the balance sheet an "Analysis of Government Equity" which shows obligations other than liabilities, the unobligated balance, unfilled customers' orders on hand from other Government accounts (where relevant), and invested capital and earnings.

Analysis of Government Equity (in thousands of dollars)

Unpaid undelivered orders ¹	1,782	2,040	2,040	2,040
Unobligated balance.....	-1,284	-1,117	-895	-674
Invested capital and earnings.....	10,871	11,306	11,591	11,825
Total Government equity.....	11,370	12,229	12,737	13,191

¹ The changes in these items are reflected on the program and financing schedule.

BUDGETS NOT SUBJECT TO REVIEW

The presentations herein for the Legislative Branch, the Judiciary, the Comptroller of the Currency and the Exchange Stabilization Fund in the Treasury Department, the Federal Deposit Insurance Corporation, and the Milk

Market Orders Assessment Fund of the Department of Agriculture have been included, without review, in the amounts submitted by the agencies.

DIFFERENCES BETWEEN BUDGET TABLES AND APPENDIX TABLES

EXPENDITURES AND LOANS

Under the unified budget concept, the compact budget volume breaks down outlays to show separately *expenditures* and the amount of *net lending* for most loan programs. Similarly, for budget authority, it segregates *loan authority* from *new obligational authority*. While the individual schedules in Part I of the Appendix do not make this breakdown, the details on net lending are set forth in a separate table in Part III.

INTRABUDGETARY TRANSACTIONS

The consolidation of Government-administered funds in the compact budget volume requires the deduction of intrabudgetary transactions, i.e., interfund and intragov-

ernmental transactions, from the combined aggregates, to avoid duplication in the totals. Schedules in the Appendix show the various funds and accounts separately, and therefore do not make such deductions.

PROPRIETARY RECEIPTS FROM THE PUBLIC

The compact budget volume offsets against expenditures for each agency and function the receipts from the public which are market-oriented or are mainly payments for goods and services, regardless of the fund structure. The Appendix continues the conventional practice of offsetting in the individual schedules only those receipts that are earmarked by law for use in revolving funds, or as reimbursements to appropriations or other funds.

LEGISLATIVE BRANCH

SENATE

General and special funds:

COMPENSATION OF THE VICE PRESIDENT AND SENATORS, MILEAGE OF THE PRESIDENT OF THE SENATE AND SENATORS, AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT AND LEADERS OF THE SENATE

COMPENSATION OF THE VICE PRESIDENT AND SENATORS

For compensation of the Vice President and Senators of the United States, **[\$4,685,530]** \$4,707,200. (*Legislative Branch Appropriation Act, 1970.*)

MILEAGE OF PRESIDENT OF THE SENATE AND OF SENATORS

For mileage of the President of the Senate and of Senators, \$58,370. (*Legislative Branch Appropriation Act, 1970.*)

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, AND MAJORITY AND MINORITY LEADERS

For expense allowance of the Vice President, \$10,000; Majority Leader of the Senate, \$3,000; and Minority Leader of the Senate, \$3,000; in all, \$16,000. (*Legislative Branch Appropriation Act, 1970.*)

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For clerical assistance to the Vice President, **[\$281,187]** \$367,263. (*Legislative Branch Appropriation Act, 1970.*)

[\$24,966.] (Supplemental Appropriation Act, 1970.)

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For offices of the Majority and Minority Leaders, **[\$106,930:** *Provided*, That effective November 1, 1969, the respective leaders may each appoint and fix the compensation of an administrative assistant at not to exceed \$31,317 per annum, a legislative assistant at not to exceed \$28,908 per annum, an executive secretary at not to exceed \$15,111 per annum, and a clerical assistant at not to exceed \$12,921 per annum in lieu of the positions heretofore authorized by Senate Resolution 158, agreed to December 9, 1941, Public Law 86-30, approved May 20, 1959, and Senate Resolution 240, agreed to January 24, 1952] \$176,514. (*Legislative Branch Appropriation Act, 1970.*)

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For offices of the Majority and Minority Whips, **[\$68,730:** *Provided*, That effective November 1, 1969, the whips may each appoint and fix the compensation of an administrative assistant at not to exceed \$30,003 per annum, and an executive secretary at not to exceed \$15,111 per annum] \$90,228. (*Legislative Branch Appropriation Act, 1970.*)

OFFICE OF THE CHAPLAIN

For office of the Chaplain, **[\$17,185:** *Provided*, That effective November 1, 1969, the compensation of the Chaplain shall be \$10,074 per annum and he shall be subject to election at the beginning of each Congress: *Provided further*, That the Chaplain may appoint and fix the compensation of a secretary at not to exceed \$8,541 per annum] \$18,615. (*Legislative Branch Appropriation Act, 1970.*)

OFFICE OF THE SECRETARY

For Office of the Secretary, **[\$1,675,448]** \$1,860,405, including **[\$144,673]** \$143,226 required for the purpose specified and authorized by section 74b of title 2, United States Code [*Provided*, That effective November 1, 1969, the Secretary may fix the compensation of the Assistant Secretary at not to exceed \$11,826 per annum, employ and fix the compensation of a Special Assistant at not to exceed \$10,293 per annum in lieu of an Assistant at \$8,760 per annum, employ and fix the compensation of an Editor, Digest at not to exceed \$21,024 per annum, an Assistant Editor, Digest at not to exceed \$18,396 per annum, and a Clerk, Digest at not to exceed \$8,541 per annum: *Provided further*, That, effective November 1, 1969, the Secretary is authorized to appoint a Comptroller of the Senate at a salary of \$35,259 per annum, and a Secretary to the Comptroller at a salary of not to exceed \$12,921 per annum, and the allowance for clerical assistance and readjustment of salaries in the disbursing office is hereby made available for personnel at such titles and per annum rates as may be necessary, at no time exceeding an aggregate of \$249,660]. (*Legislative Branch Appropriation Act, 1970.*)

COMMITTEE EMPLOYEES

For professional and clerical assistance to standing committees and the Select Committee on Small Business, **[\$4,017,014]** \$4,420,734. (*Legislative Branch Appropriation Act, 1970.*)

CONFERENCE COMMITTEES

For clerical assistance to the Conference of the Majority, at rates of compensation to be fixed by the chairman of said committee, **[\$115,619]** \$127,239.

For clerical assistance to the Conference of the Minority, at rates of compensation to be fixed by the chairman of said committee, **[\$115,619]** \$127,239. (*Legislative Branch Appropriation Act, 1970.*)

ADMINISTRATIVE AND CLERICAL ASSISTANTS TO SENATORS

For administrative and clerical assistants to Senators, **[\$24,656,-608:** *Provided*, That the clerk hire allowance of each Senator from the State of Connecticut shall be increased to that allowed Senators from States having a population of three million, the population of said State having exceeded three million inhabitants: *Provided further*, That, effective November 1, 1969, paragraph (1) of section 105(d) of the Legislative Branch Appropriation Act, 1968, as amended (2 U.S.C. 61-1(d)), is amended by increasing each of the amounts in the table therein relating to Senators' clerk hire allowances by \$23,652, and paragraph (2)(i) of such section is amended to read as follows: "(i) the salary of two employees may be fixed at gross rates of not more than \$23,652 per annum,"] \$27,909,141. (*Legislative Branch Appropriation Act, 1970.*)

OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

For Office of Sergeant at Arms and Doorkeeper, **[\$4,915,909:** *Provided*, That effective November 1, 1969, the Sergeant at Arms is authorized to employ the following additional employees: A Systems Programmer at \$15,987 per annum, a Production Manager at \$14,454 per annum, an Applications Programmer at \$13,797 per annum, an Operator at \$10,074 per annum, an Operator at \$9,417 per annum, and six plainclothesmen, Police Force, at \$8,760 per annum each in lieu of six Privates at \$8,322 per annum each] \$5,431,886. (*Legislative Branch Appropriation Act, 1970.*)

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

For the offices of the Secretary for the Majority and the Secretary for the Minority, **[\$196,612]** \$216,372. (*Legislative Branch Appropriation Act, 1970.*)

General and special funds—Continued**OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE**

For salaries and expenses of the Office of the Legislative Counsel of the Senate, **[\$374,100.] \$415,130.** (*Legislative Branch Appropriation Act, 1970.*)

[PAYMENT TO WIDOW OF DECEASED SENATOR]

[For payment to Louella Dirksen, widow of Everett McKinley Dirksen, late a Senator from the State of Illinois, \$49,500.] (*Legislative Branch Appropriation Act, 1970.*)

CONTINGENT EXPENSES OF THE SENATE**SENATE POLICY COMMITTEES**

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, **[\$236,720] \$261,430** for each such Committee; in all, **[\$473,440.] \$522,860.** (*Legislative Branch Appropriation Act, 1970.*)

AUTOMOBILES AND MAINTENANCE

For purchase, exchange, driving, maintenance, and operation of four automobiles, one for the Vice President, one for the President Pro Tempore, one for the Majority Leader, and one for the Minority Leader, **[\$50,880.] \$55,220.** (*Legislative Branch Appropriation Act, 1970.*)

FURNITURE

For service and materials in cleaning and repairing furniture, and for the purchase of furniture, \$31,190: *Provided*, That the furniture purchased is not available from other agencies of the Government. (*Legislative Branch Appropriation Act, 1970.*)

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, including **[\$431,775] \$456,625** for the Committee on Appropriations, to be available also for the purposes mentioned in Senate Resolution Numbered 193, agreed to October 14, 1943, **[\$6,646,755,** of which amount \$6,000 is hereby made available for obligations incurred in fiscal year 1968.] **\$7,341,580.** (*Legislative Branch Appropriation Act, 1970.*)

FOLDING DOCUMENTS

For the employment of personnel for folding speeches and pamphlets at a gross rate of not exceeding \$2.82 per hour per person, **[\$46,355.] \$51,015.** (*Legislative Branch Appropriation Act, 1970.*)

MAIL TRANSPORTATION

For maintaining, exchanging, and equipping motor vehicles for carrying the mails and for official use of the offices of the Secretary and Sergeant at Arms, \$16,560. (*Legislative Branch Appropriation Act, 1970.*)

MISCELLANEOUS ITEMS

For miscellaneous items, exclusive of labor, **[\$5,708,986] \$6,188,736** including \$497,000 for payment to the Architect of the Capitol in accordance with section 4 of Public Law 87-82, approved July 6, 1961, and \$15,000 for expenses of the Commission on Art and Antiquities of the Senate.

[For an additional amount for "Miscellaneous Items, fiscal year 1969", \$300,000, to be derived by transfer from the appropriation "Salaries, officers and employees, Senate, fiscal year 1969".] (*Legislative Branch Appropriation Act, 1970.*)

POSTAGE STAMPS

For postage stamps for the Offices of the Secretaries for the Majority and Minority, \$240; and for air mail and special delivery stamps for the Office of the Secretary, \$350; Office of the Sergeant at Arms, \$215; Senators and the President of the Senate, as authorized by law, \$119,328: *Provided*, That the maximum allowance per capita of \$960 is increased to \$1,056 for the fiscal year 1970 and thereafter: *Provided further*, That Senators from States partially or wholly west of the Mississippi River shall be allowed an additional \$264 each fiscal year; in all, \$120,133. (*Legislative Branch Appropriation Act, 1970.*)

STATIONERY (REVOLVING FUND)

For stationery for Senators and the President of the Senate, \$363,600; and for stationery for committees and officers of the Senate, \$14,250; in all, \$377,850: *Provided*, That effective with the fiscal year 1970 and thereafter the allowance for stationery for each Senator and the President of the Senate shall be at the rate of \$3,600 per annum: *Provided further*, That section 106 of the Legislative Branch Appropriation Act, 1969 (Public Law 90-417, approved July 23, 1968), is hereby made applicable to the President of the Senate. (*Legislative Branch Appropriation Act, 1970.*)

[COMMUNICATIONS]

[For an amount for communications which may be expended interchangeably, in accordance with such limitations and restrictions as may be prescribed by the Committee on Rules and Administration, for payment of charges on official telegrams and long-distance telephone calls made by or on behalf of Senators or the President of the Senate, in addition to those otherwise authorized, \$15,150.] (*Legislative Branch Appropriation Act, 1970.*)

ADMINISTRATIVE PROVISIONS

[Effective October 1, 1969, the third paragraph under the heading "Administrative Provisions" in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1957, as amended (2 U.S.C. 53), is amended by striking out "\$300" and inserting in lieu thereof "\$400", and by inserting before the colon preceding the proviso therein a comma and the following: "or incurred for subscriptions to newspapers, magazines, periodicals, or clipping or similar services".]

[Effective July 1, 1969, the third paragraph under the heading "Administrative Provisions" in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1959, as amended (2 U.S.C. 43b), is amended by striking out the portion thereof relating to payments from the Contingent Fund of the Senate and inserting in lieu thereof the following:]

["The Contingent Fund of the Senate is hereafter made available for reimbursement of transportation expenses incurred by Senators in traveling, on official business, by the nearest usual route, between Washington, District of Columbia, and any point in their home States, for not to exceed twelve round trips (or the equivalent thereof in one-way trips) in each fiscal year,".]

[Section 6(c) of the District of Columbia Traffic Act, 1925 (D.C. Code, sec. 40-603(c)), is amended by inserting after "Senate and House of Representatives," the words "Comptroller of the Senate,".]

[The first sentence of the second paragraph under the heading "Administrative Provisions" in the Legislative Branch Appropriation Act, 1962, as amended (2 U.S.C. 127), is amended to read as follows: "The contingent fund of the Senate is hereafter made available for reimbursement of transportation expenses incurred in traveling by the nearest usual route between Washington, District of Columbia, and any point in the home State of the Senator involved, for not to exceed eight round trips made by employees in each Senator's office in any fiscal year, such payment to be made only upon vouchers approved by the Senator containing a certification by such Senator that such travel was performed in line of official duty." This provision shall take effect with respect to round trips commencing on or after the date of enactment of this Act.]

[No part of any appropriation disbursed by the Secretary of the Senate shall be available for payment of compensation to any person for any period for which such person is carried in a leave without pay status from a position in or under any department or agency of the Government.] (*Legislative Branch Appropriation Act, 1970.*)

Effective July 1, 1970, and thereafter, the contingent fund of the Senate is made available, in accordance with rules and regulations prescribed by the Committee on Rules and Administration of the Senate, for the reimbursement to Senators and the President of the Senate of strictly official telephone and telegraph communications charges incurred by them or on their behalf, to be in addition to reimbursement or payment authority contained in any other law.

HOUSE OF REPRESENTATIVES

General and special funds:

For payment to Pearle Jean Bates, widow of William H. Bates, late a Representative from the State of Massachusetts, \$42,500. (*Legislative Branch Appropriation Act, 1970.*)

STATIONERY (REVOLVING FUND)

For a stationery allowance for each Member for the **[second]** *first* session of the **[Ninety-first]** *Ninety-second* Congress, as authorized by law, \$1,308,000, to remain available until expended. (*Legislative Branch Appropriation Act, 1970.*)

POSTAGE STAMP ALLOWANCES

Postage stamp allowances for the **[second]** *first* session of the **[Ninety-first]** *Ninety-second* Congress, as follows: Clerk, \$1,120; Sergeant at Arms, \$840; Doorkeeper, \$700; Postmaster, \$560, air-mail and special-delivery postage stamps for each Member, the Speaker, the majority and minority leaders, the majority and minority whips, and to each standing committee, as authorized by law; \$320,390. (*Legislative Branch Appropriation Act, 1970.*)

REVISION OF LAWS

For preparation and editing of the laws as authorized by 1 U.S.C. 202, 203, 213, \$38,000, to be expended under the direction of the Committee on the Judiciary. (*Legislative Branch Appropriation Act, 1970.*)

LEADERSHIP AUTOMOBILES

For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the Speaker, **[\$14,250]** *\$15,750.*

For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the majority leader of the House, **[\$14,250]** *\$15,750.* (*Legislative Branch Appropriation Act, 1970.*)

For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the minority leader of the House, **[\$14,250]** *\$15,750.* (*Legislative Branch Appropriation Act, 1970.*)

[NEW EDITION OF THE UNITED STATES CODE]

[For preparation of a new edition of the United States Code, \$150,000, to remain available until expended, and to be expended under the direction of the Committee on the Judiciary.] (*Legislative Branch Appropriation Act, 1970.*)

NEW EDITION OF THE DISTRICT OF COLUMBIA CODE

For preparation of a new edition of the District of Columbia Code, \$150,000, to remain available until expended, and to be expended under the direction of the Committee on the Judiciary. (Legislative Branch Appropriation Act, 1970.)

[HOUSE OF REPRESENTATIVES]

[For payment to Justina Ronan, mother, and to Eileen Burke and Betty Dlouhy, sisters, of Daniel J. Ronan, late a Representative from the State of Illinois, \$42,500, one-half to the mother and one-quarter each to the sisters.] (*Supplemental Appropriation Act, 1970.*)

ADMINISTRATIVE PROVISIONS

Except as provided by the House Employees Position Classification Act (2 U.S.C. 291 and following) or by any other provision of law to the contrary, salaries or wages paid out of the items herein for the House of Representatives shall be computed at basic rates, plus increased and additional compensation, as authorized and provided by law. (*Legislative Branch Appropriation Act, 1970.*)

[HOUSE BEAUTY SHOP]

[The management of the House Beauty Shop and all matters connected therewith shall be under the direction of a select committee to be composed of three Members of the House of Representatives to be appointed by the Speaker, one of whom shall be designated as Chairman. Any vacancy occurring in the membership of the committee shall be filled in the manner in which the original appointment was made. The committee is authorized to issue such rules and regulations as it may deem necessary for the operation and the employment of necessary assistance for the conduct of said Beauty Shop by such business methods as may produce the best results consistent with economical and modern management.

[Effective the first of the month following approval of this Act, there is established in the Treasury of the United States a revolving fund for the House Beauty Shop. The revolving fund shall be self-sustaining. The net assets of the Shop on the effective date of this section shall constitute the capital of the fund and the existing liabilities shall be paid from the fund. All moneys thereafter received by the House Beauty Shop from fees for services or from any other source shall be deposited in such fund; and moneys in such fund shall be available without fiscal year limitation for disbursement by the Clerk of the House of Representatives for all expenses of the Shop, including but not limited to the care, maintenance, and operation of the Shop, procurement of supplies and equipment, and compensation of personnel.

[An adequate system of accounts for the revolving fund shall be maintained and financial reports prepared on the basis of such accounts. The activities of the Shop shall be subject to audit by the General Accounting Office at such times as the select committee may direct, and reports of such audits shall be furnished to the Speaker of the House, to the select committee, and to the Clerk of

the House. The Comptroller General, or any of his duly authorized representatives, shall have access for the purposes of audit and examination to such books, documents, papers, records, personnel, and facilities of the Shop as he may deem necessary.]

The net profit established by the General Accounting Office audit after restoring any impairment of capital and providing for replacement of equipment, shall be transferred to the general fund of the Treasury. (*Legislative Branch Appropriation Act, 1970.*)

JOINT ITEMS

For joint committees, as follows:

JOINT COMMITTEE ON REDUCTION OF FEDERAL EXPENDITURES

For an amount to enable the Joint Committee on Reduction of Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the Committee, **[\$55,000] \$61,000**, to be disbursed by the Secretary of the Senate. (*Legislative Branch Appropriation Act, 1970.*)

CONTINGENT EXPENSES OF THE SENATE

JOINT ECONOMIC COMMITTEE

For salaries and expenses of the Joint Economic Committee, **[\$468,165] \$542,900**. (*Legislative Branch Appropriation Act, 1970.*)

JOINT COMMITTEE ON ATOMIC ENERGY

For salaries and expenses of the Joint Committee on Atomic Energy **[\$400,595] \$434,640**. (*Legislative Branch Appropriation Act, 1970.*)

JOINT COMMITTEE ON PRINTING

For salaries and expenses of the Joint Committee on Printing, **[\$212,855] \$236,110**. (*Legislative Branch Appropriation Act, 1970.*)

CONTINGENT EXPENSES OF THE HOUSE

JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

For salaries and expenses of the Joint Committee on Internal Revenue Taxation, **[\$597,650] \$657,715**. (*Legislative Branch Appropriation Act, 1970.*)

JOINT COMMITTEE ON DEFENSE PRODUCTION

For salaries and expenses of the Joint Committee on Defense Production as authorized by the Defense Production Act of 1950, as amended, **[\$107,950] \$118,800**. (*Legislative Branch Appropriation Act, 1970.*)

For other joint items, as follows:

OFFICE OF THE ATTENDING PHYSICIAN

For medical supplies, equipment, and contingent expenses of the emergency rooms, and for the attending physician and his assistants, including (1) an allowance to one thousand dollars per month to the attending physician; (2) an allowance of one hundred fifty dollars per month each to three medical officers while on duty in the attending physician's office; and (3) an allowance of one hundred fifty dollars per month each to not to exceed eight assistants on the basis heretofore provided for such assistants, **[\$70,800] \$77,300**. (*Legislative Branch Appropriation Act, 1970.*)

CAPITOL POLICE

GENERAL EXPENSES

For purchasing and supplying uniforms; the purchase, maintenance, and repair of police motor vehicles, including two way police radio equipment; contingent expenses, including \$25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House, as may be designated by the Chairman of the Board; \$134,000. (*Legislative Branch Appropriation Act, 1970.*)

CAPITOL POLICE BOARD

To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, **[\$900,000] \$885,800**. Such sum shall be expended only for payment of salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioner of the District of Columbia is authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and are authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and shall be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioner of the District of Columbia is directed (1) to pay the deputy chief of police detailed under the authority of this paragraph and serving as Chief of the Capitol Police, the salary of the rank of deputy chief plus \$4,000 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent, (2) to pay the two acting inspectors detailed under the authority of this paragraph and serving as assistants to the Chief of the Capitol Police, the salary of the rank of inspector plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as these positions are held by the present incumbents, (3) to pay the two detective sergeants detailed under the authority of this paragraph and serving as acting lieutenants the salary of the rank of lieutenant plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as these positions are held by the present incumbents, (4) to pay the three detectives permanently detailed under the authority of this paragraph and serving as acting detective sergeants the salary of the rank of detective sergeant and such increases in basic compensation as may be subsequently provided by law, and (5) to pay the acting sergeant of the uniform force regularly assigned as such the salary of the rank of sergeant and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent.

No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol buildings for police duty on the Capitol Grounds and on the Library of Congress Grounds. (*Legislative Branch Appropriation Act, 1970.*)

EDUCATION OF PAGES

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, **[\$112,307] \$112,310**, which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1970.*)

OFFICIAL MAIL COSTS

For expenses necessary for official mail costs pursuant to title 39, U.S.C., section 4167, **[\$10,161,000] \$12,066,000**, to be available immediately.

The foregoing amounts under "other joint items" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1970.*)

General and special funds—Continued

JOINT ITEMS—Continued

STATEMENTS OF APPROPRIATIONS

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives, of the statements for the [first] second session of the Ninety-first Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, \$13,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (*Legislative Branch Appropriation Act, 1970.*)

EXTENSION OF THE CAPITOL

For an additional amount for "Extension of the Capitol", \$2,275,000, to be expended under the direction of the Commission for Extension of the United States Capitol as authorized by law: *Provided*, That such portion of the foregoing appropriation as may be necessary shall be used for emergency shoring and repairs of, and related work on, the west central front of the Capitol: *Provided further*, That not to exceed \$250,000 of the foregoing appropriation shall be used for the employment of independent nongovernmental engineering and other necessary services for studying and reporting (within six months after the date of the employment contract) on the feasibility and cost of restoring such west central front under such terms and conditions as the Commission may determine: *Provided, however*, That pending the completion and consideration of such study and report, no further work toward extension of such west central front shall be carried on: *Provided further*, That after submission of such study and report and consideration thereof by the Commission, the Commission shall direct the preparation of final plans for extending such west central front in accord with Plan 2 (which said Commission has approved), unless such restoration study report establishes to the satisfaction of the Commission:]

(1) That through restoration, such west central front can, without undue hazard to safety of the structure and persons, be made safe, sound, durable, and beautiful for the foreseeable future;]

(2) That restoration can be accomplished with no more vacating of west central front space in the building proper (excluding the terrace structure) than would be required by the proposed extension Plan 2;]

(3) That the method or methods of accomplishing restoration can be so described or specified as to form the basis for performance of the restoration work by competitive, lumpsum, fixed price construction bid or bids;]

(4) That the cost of restoration would not exceed \$15,000,000; and]

(5) That the time schedule for accomplishing the restoration work will not exceed that heretofore projected for accomplishing the Plan 2 extension work: *Provided further*, That after consideration of the restoration study report, if the Commission concludes that all five of the conditions hereinbefore specified are met, the Commission shall then make recommendations to the Congress on the question of whether to extend or restore the west central front of the Capitol.] (*Legislative Branch Appropriation Act, 1970.*)

【EXTENSION OF ADDITIONAL SENATE OFFICE BUILDING SITE】

【To enable the Architect of the Capitol, under the direction of the Senate Office Building Commission, to acquire on behalf of the United States, in addition to the real property heretofore acquired as a site for an additional office building for the United States Senate under the provisions of the Second Deficiency Appropriation Act, 1948, approved June 25, 1948 (62 Stat. 1028) and Public Law 85-591, approved August 6, 1958 (72 Stat. 495-496), by purchase,

condemnation, transfer, or otherwise, for purposes of extension of such site, all publicly or privately owned property contained in lots 863, 864, 892, 893, 894, and 905 in Square 725 in the District of Columbia, and all alleys or parts of alleys and streets contained within the curblines surrounding said square, as such square appears on the records in the office of the surveyor of the District of Columbia as of the date of the approval of this Act: *Provided*, That any proceeding for condemnation brought under this Act shall be conducted in accordance with the Act of December 23, 1963 (16 D.C. Code, secs. 1351-1368: *Provided further*, That, notwithstanding any other provision of law, any real property owned by the United States and any alleys or parts of alleys and streets contained within the curblines surrounding Square 725 shall, upon request of the Architect of the Capitol, made with the approval of the Senate Office Building Commission, be transferred to the jurisdiction and control of the Architect of the Capitol, and any alleys or parts of alleys or streets contained within the curblines of said square shall be closed and vacated by the Commissioner of the District of Columbia, appointed pursuant to Part III of Reorganization Plan Number 3 of 1967, in accordance with any request therefor made by the Architect of the Capitol with the approval of such Commission: *Provided further*, That, upon acquisition of any real property pursuant to this Act, the Architect of the Capitol, when directed by the Senate Office Building Commission to so act, is authorized to provide for the demolition and/or removal of any buildings or other structures on, or constituting a part of, such property and, pending demolition, to use the property for Government purposes or to lease any or all of such property for such periods and under such terms and conditions as he may deem most advantageous to the United States and to incur any necessary expenses in connection therewith: *Provided further*, That the jurisdiction of the Capitol Police shall extend over any real property acquired under this Act and such property shall become a part of the United States Capitol Grounds; and the Architect of the Capitol, under the direction of the Senate Office Building Commission, is authorized to enter into contracts and to make such expenditures, including expenditures for personal and other services, as may be necessary to carry out the purposes of this appropriation; \$1,250,000, to remain available until expended.】

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The Library's collections are developed in accordance with established acquisition policies; materials are procured by purchase, gift, exchange, copyright deposit, transfer and official deposit; and materials are selected for addition to the permanent collections. The objective for 1971 is continued improvement in acquisitions procedures. The collections totaled 59,890,533 items as of June 30, 1969, and consisted of 14,846,317 books and pamphlets; 29,572,093 manuscript pieces and 15,472,123 maps, pieces of music, reels of microfilm, photographs and other miscellaneous items. Of the items received, about 1.5 million were added to the permanent collections. Those received from various sources in 1969 and estimated for 1970 and 1971 are as follows:

<i>Description</i>	<i>1969 actual</i>	<i>1970 estimate</i>	<i>1971 estimate</i>
Purchase.....	921,046	1,000,000	1,100,000
Deposit by virtue of law:			
Copyright.....	486,010	495,000	500,000

Title II C activities.....	101,789	120,000	140,000
Total.....	6,741,594	7,365,000	7,770,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked and arranged; Library of Congress catalogs are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1971 are the continued maintenance on a current basis of the Library's record of serial publications, the maintaining of currency in the filing of cards into the Library Card Catalog, the reduction of cataloging arrears, the improvement of cataloging methods and procedures to assure the usefulness of the collections, the continued microfilming of deteriorating materials as a necessary preservative and space-saving measure, and the conversion of the nitrate portion of the Archival Collection of Motion Pictures to safety base film.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Selected performance data for 1969 and estimated for 1970 and 1971 (not including processing activities performed by the Reference Department and the Law Library) are as follows:

Description	1969 actual	1970 estimate	1971 estimate
Volumes fully cataloged and added to the classified collections	289,057	300,000	310,000
Items otherwise organized for use (without full cataloging)	21,610	22,000	22,000
Cards filed in catalogs	3,088,052	3,200,000	3,400,000
Volumes bound	178,306	210,000	230,000
Items repaired, cleaned, mounted, etc.	237,572	260,000	285,000
Cards received by the National Union Catalog	2,983,649	3,300,000	3,500,000
Serial parts processed	1,600,629	1,800,000	2,000,000

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objective of this activity for 1971 is to organize more material for use and to improve reference and circulation services. The workload in all major activities is expected to increase in 1970 and 1971 as follows:

Description	1969 actual	1970 estimate	1971 estimate
a. Reader and reference services:			
Materials served	1,924,786	2,000,000	2,050,000
Units issued on loan	252,272	255,000	260,000
Number of readers given reference assistance in person	324,216	350,000	360,000
Reference requests by telephone	303,007	320,000	330,000
Reference letters	122,998	130,000	140,000
b. Law Library reader and reference services:			
Books and pamphlets served	561,867	615,000	625,000
Reference inquiries answered	180,015	190,000	225,000

4. *Maintenance and protective services.*—A staff of 196, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space, and operates the receiving and stock rooms. The guard force staff of 79 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and costs for 1969 and estimates for 1970 and 1971 are as follows:

	1969 actual	1970 estimate	1971 estimate
Income:			
Fees applied.....	1,879,831	1,940,000	1,995,000
Estimated value of materials deposited and transferred to the Library of Congress.....	1,997,599	2,100,000	2,165,000
Total income.....	3,877,430	4,040,000	4,160,000
Costs:			
Salaries.....	2,732,950	3,126,000	3,365,000
Other costs.....	253,059	272,000	329,000
Total costs.....	2,986,009	3,398,000	3,694,000

The program and performance under each of the activities described are predicated on an estimated 320,000 copyright registrations during 1971, an estimated 310,300 during 1970, and an actual 301,258 during 1969.

1. *Receiving and accounting for applications, fees, and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1969 and estimated for 1970 and 1971 are as follows:

	1969 actual	1970 estimate	1971 estimate
Registrations.....	301,258	310,300	320,000
Mail received and dispatched.....	675,611	695,900	717,000

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1969 actual	1970 estimate	1971 estimate
Cases and documents examined.....	326,946	336,800	347,000
Registrations and recordation of documents.....	318,524	328,000	338,000
Letters written.....	50,316	51,900	53,500

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 301,258 registrations cataloged in 1969 and estimates for 1970 and 1971 are 310,300 and 320,000, respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1969 actual	1970 estimate	1971 estimate
Titles searched.....	187,993	194,000	200,000
Letters and search reports written.....	25,904	26,700	27,500

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

LEGISLATIVE REFERENCE SERVICE—Continued

SALARIES AND EXPENSES—continued

1. *Research and analysis.*—The Legislative Reference Service assists Members and committees of Congress by preparing research reports, digests, translations, charts, and consultative services, and by supplying reference information and materials. The bulk of these services are furnished through seven subject-matter divisions and a reference division: American law, economics, education and public welfare, foreign affairs, government and general research, environmental policy, science policy research and the congressional reference division. Under specific authorization of the Legislative Reorganization Act of 1946, senior specialists are also available for high-level research and consultative services in the following fields: International economics, international relations, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, taxation and fiscal policy, and science and technology. In 1969, 140,267 congressional inquiries were answered. The number of inquiries in 1970 is estimated at 150,000, and in 1971, 160,000.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covers all public bills and resolutions. It is expected that the number of bills to be digested during the second session of the 91st Congress will be somewhat higher than the number digested for the second session of the 90th Congress.

3. *Reference files and bibliographic services.*—Reference files, containing clippings, pamphlets and documents, are maintained as the basis for reply to a high percentage of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the Congressional Reading Room. During 1969, 132,181 reference file items were processed, 30,751 bibliographic citations prepared, and 674,489 published items acquired and processed.

The Card Division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 218 million catalog cards representing approximately 5 million titles, and fills orders from approximately 25,000 regular subscribers—mostly libraries—in the United States and abroad. In 1969, 82% of this appropriation was recovered in the form of receipts from card and publications sales. Receipts of \$5,965,111 were deposited in miscellaneous receipts of the Treasury in 1969. The objectives for 1971 are: Meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; the continued development of the "National Union Catalog" as the country's major bibliographic and locational tool; the development of other technical publications; and the use of new technology to increase efficiency and reduce costs.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1969 was 34,347,376; estimated for 1970, 36 million; and estimated for 1971, 38 million.

2. *Supplying cards for other libraries.*—The number of cards sold in 1969 was 63,404,123; estimated for 1970, 64 million; and for 1971, 66 million.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the "Classification Schedules," lists of "Subject Headings," "Cataloging Service Bulletins," and similar publications.

4. *Preparation, printing, and distribution of the "National Union Catalog."*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of "Motion Pictures and Filmstrips" (quarterlies with annual cumulation), "Music and Phonorecords" (issued on a 6-month basis and annual cumulation), as well as the "Register of Additional Locations," and the "National Register of Microform Masters." There were 2,240 paid subscriptions for all issues in calendar year 1968 and it is estimated that there will be 2,300 subscriptions for 1969 and 2,400 for 1970.

5. *Preparation, printing, and distribution of the "Subject Catalog."*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 893 paid subscriptions for calendar year 1968. It is estimated that there will be 950 paid subscriptions in 1969 and about 1,000 in 1970.

This appropriation is used to acquire library materials, both current and noncurrent, in all subject fields except those in the field of law. Materials acquired by purchase constitute an exceedingly important part of the Library's acquisitions although they represent only a segment of the material received annually. The objectives for 1971 are: To continue the program for procurement of important research materials to insure the continuous development of the Library's collections and to maintain their national preeminence; to continue the acquisition of important foreign newspapers and periodicals; to continue the program for procurement of essential research materials from areas critical to the U.S. foreign policy, particularly from Eastern Europe, Africa, Asia, and Latin America; to continue to strengthen and maintain up-to-date the Library's acquisitions in the rapidly expanding fields of science and technology; and to acquire highly selected, important, noncurrent materials needed by the Library to provide better service to Congress and to increase the usefulness to current research of the historical subject collections.

This appropriation constitutes the only means of acquiring law books published in the regular domestic trade (except for copyright deposits) and many foreign law books published in countries all over the world. The legal publications acquired by purchase constitute a most important part of the Law Library's acquisitions, although a substantial part of the annual receipts is received by means other than purchase. The special objectives for 1971 are: To continue the procurement of current foreign legal materials by placing purchase orders for certain necessary publications now received only irregularly through exchange or gift; to improve the procurement of important Hispanic, African, and Far Eastern materials; to continue the procurement of both current and noncurrent materials needed to strengthen the Law Library's already comprehensive coverage of critical areas in Eastern Europe, Asia, and Africa; and to continue the acquisition of photoduplicates of important research items, especially those from critical areas, which are no longer obtainable in the original.

The Division for the Blind and Physically Handicapped is responsible for administering a national program to provide reading material for the blind and physically handicapped (Public Law 89-522) of the United States, and its outlying areas. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 43 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies and libraries. The maintenance and procurement of these books are shown in the following table:

Description	1969 actual	1970 estimate	1971 estimate
Talking books:			
(a) New titles.....	508	600	600
(b) Older titles reissued.....	92	100	100

Phonographs repaired (includes conversion to 3 speeds).....	20,600	20,000	20,000
Phonographs salvaged—scrapped.....	17,500	10,000	15,000
Cassette players purchased.....	9,750	-----	20,000

¹ Estimated figures.

Objectives for 1971 are: (1) Sustained procurement of books and magazines in braille and sound recording media, and (2) procurement of a sufficient number of machines to equip newly registered blind and physically handicapped readers and to replace some of the obsolete machines.

2. *Cataloging, reference, circulating, and training services.*—Catalogs of recorded and braille books are provided, often in braille, recorded, and large type forms for the convenience of readers. The Division maintains the national collections of braille and recorded books to supplement titles deposited in libraries across the country. During the past 5-year period, 1965-69, the number of readers throughout the country requiring catalogs from which to select reading matter has grown from about 102,000 to over 165,000 and circulation from approximately 3,850,000 units (volumes, containers, and reels) to over 5,725,000. As a result of the expanded program, the number of readers and circulation are expected to continue to increase in 1970 and 1971. Inquiries are received concerning library and related services available to the blind and to other physically handicapped persons. Individuals throughout the Nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During 1969, 725 individuals were certified, and it is anticipated that this level will continue during 1970 and 1971. In addition, tape recorded books are recorded by volunteers throughout the country.

The purpose of this program is to preserve the contents of the Papers of the Presidents and great Americans other than those who achieved the Presidency, and to make them more readily available for research. It was started in 1959, following enactment of Public Law 85-147 (71 Stat. 368), approved August 16, 1957, which authorized an appropriation of \$720 thousand to remain available until expended, to arrange, index, and microfilm the Papers of the Presidents of the United States in the

collections of the Library of Congress. This law was amended by Public Law 88-299 (78 Stat. 183), approved April 27, 1964, which removed the \$720 thousand limitation and authorized to be appropriated such amounts as may be necessary to carry out the provisions of Public Law 85-147. The objectives for 1971 will be to provide master negatives and positive service copies on microfilm of material arranged and indexed, to commence arranging and indexing the papers of great Americans, and to continue publishing indexes in editions of 1,000 copies or more. Expansion to include other great Americans is consistent with the basic reference program of the Library.

Under authority originally granted in section 104(n) of Public Law 85-931 (now sec. 104(b)(5) of the Food for Peace Act of 1966) the Librarian of Congress may use foreign currencies accruing under this act to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United States. The program is being carried on in eight countries in 1970: Ceylon, India, Israel, Nepal, Pakistan, Poland, the United Arab Republic, and Yugoslavia. Of the total amount requested, \$2,148 thousand will be used to purchase foreign currencies, while \$239 thousand will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Based upon the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies from eight countries and distributed to selected libraries and research centers in the United States, including the Library of Congress.

2. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries and personnel benefits of U.S. personnel abroad, salaries of the coordinating staff at the Library of Congress, travel in some instances, and equipment and supplies which cannot be procured abroad.

The Oliver Wendell Holmes Devise Fund was established by 69 Stat. 533 to (1) prepare a history of the

Supreme Court of the United States, and, if deemed advisable, (2) to finance an annual lecture or series of lectures, and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court; annual lectures are also financed by this fund.

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by the Library of Congress Trust Fund Board, and (3) interest at the rate of 4% per annum paid by the Treasury on the principal funds deposited therewith as described under Library of Congress trust fund, principal accounts. (2 U.S.C. 156-160; 31 U.S.C. 725s, 37 Stat. 319.)

1. *Acquisition of library materials.*—During 1969, this included the procurement of manuscripts, Hispanic materials, fine prints, rare books, and other library materials from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1969 included the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings

GIFT AND TRUST FUND ACCOUNTS, NON-REVOLVING—Continued

of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization and control of the collections.*—In February 1967, the Library of Congress began the largest single bibliographical project in its 167-year history, the publication of the pre-1956 *National Union Catalog*. It is expected that the project will be completed in 10 years, and that the published Catalog will comprise 610 volumes. In the summer of 1969 work was completed on the publication of the 1963–67 quinquennial cumulation of the *National Union Catalog*. The preparation of the 18th full edition and the 10th abridged edition of the *Dewey Decimal Classification*, begun during fiscal year 1966, was continued in fiscal year 1969. Editorial work on the 1968 issue of the *National Union Catalog of Manuscript Collections*, scheduled for publication in late 1969, was substantially completed during fiscal year 1969. The preparation of the index and subject headings for *Dissertation Abstracts* was discontinued, and the work progressed on the latest issue of the *National Register of Microform Masters*.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including

employees engaged by the day or hour or in piecework); and services as authorized by 5 U.S.C. 3109.

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Funds available to the Library of Congress may be expended to reimburse the Department of State for medical services rendered to employees of the Library of Congress stationed abroad and for contracting on behalf of and hiring alien employees for the Library of Congress under compensation plans comparable to those authorized by section 444 of the Foreign Service Act of 1946, as amended (22 U.S.C. 889(a)); for purchase or hire of passenger motor vehicles; for payment of travel, storage and transportation of household goods, and transportation and per diem expenses for families en route (not to exceed twenty-four); for benefits comparable to those payable under sections 911(9), 911(11), and 941 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1136(9), 1136(11), and 1156, respectively); and travel benefits comparable with those which are now or hereafter may be granted single employees of the Agency for International Development, including single Foreign Service personnel assigned to A.I.D. projects, by the Administrator of the Agency for International Development—or his designee—under the authority of section 636(b) of the Foreign Assistance Act of 1961; Public Law 87-195, 22 U.S.C. 2396(b); subject to such rules and regulations as may be issued by the Librarian of Congress.

Payments in advance for subscriptions or other charges for bibliographical data, publications, materials in any other form, and services may be made by the Librarian of Congress whenever he determines it to be more prompt, efficient, or economical to do so in the interest of carrying out required Library programs. (*Legislative Branch Appropriation Act, 1970.*)

GOVERNMENT PRINTING OFFICE

Federal Funds

General and special funds:

PRINTING AND BINDING

For authorized printing and binding for the Congress; for printing and binding for the Architect of the Capitol; expenses necessary for preparing the semimonthly and session index to the Congressional Record, as authorized by law (44 U.S.C. 902); printing, binding, and distribution of the Federal Register (including the Code of Federal Regulations) as authorized by law (44 U.S.C. 1509, 1510); and printing and binding of Government publications authorized by law to be distributed without charge to the recipients: **[\$30,300,000] \$32,000,000: Provided,** That this appropriation shall not be available for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Yearbook of Agriculture): *Provided further,* That this appropriation shall be available for the payment of obligations incurred under the appropriations for similar purposes for preceding fiscal years. (*Legislative Branch Appropriation Act, 1970.*)

Program and Financing (in thousands of dollars)

This appropriation covers all authorized printing, binding, and distribution of publications for the Congress, the Federal Register, the Code of Federal Regulations, and Government publications authorized by law to be distributed without charge to the recipients (82 Stat. 411).

OFFICE OF SUPERINTENDENT OF DOCUMENTS
SALARIES AND EXPENSES

For necessary expenses of the Office of Superintendent of Documents, including compensation of all employees in accordance with the Act entitled "An Act to regulate and fix rates of pay for employees and officers of the Government Printing Office", approved June 7, 1924 (44 U.S.C. 305); travel expenses (not to exceed \$10,000); price lists and bibliographies; repairs to buildings, elevators and machinery; and supplying books to depository libraries; **[\$9,650,000] \$13,005,000: Provided,** That \$200,000 of this appropriation shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), with the approval of the Public Printer, only to the extent necessary to provide for expenses (excluding permanent personal services) for workload increases not anticipated in the budget estimates and which cannot be provided for by normal budgetary adjustments. (*Legislative Branch Appropriation Act, 1970.*)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$261 thousand; 1969, \$153 thousand; 1970, \$159 thousand; 1971, \$173 thousand.

The programs of the Office of the Superintendent of Documents are of a service nature. There is no control over the volume of work, which is required by law.

1. *Sales distribution.*—Selected Government publications are purchased from the Public Printer to be placed on sale to the public. The acquisition costs for these publications are paid from sales receipts. Consequently, no appropriation is required for printing sales copies. The sales price is the cost plus 50%, as required by law. At the end of each year, net profits from the sales program are turned in to the Treasury Department as miscellaneous receipts. For 1969, \$10,629 thousand was returned under this program. It is estimated that \$10,250 thousand will be returned in 1970 and an additional \$10,285 thousand in 1971. These returns more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the past 10 years the sales volume has increased 189%. The current public interest in the Government's publishing program clearly indicates a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services are also provided for Farmers' Bulletins, Soil Surveys, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—Upon request, one copy of every Government publication is supplied to libraries which are designated as depositories for Government publications. The number of depository libraries has increased 68% since 1962.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of U.S. Government Publications and the Numerical List and Schedule of Volumes.

This appropriation provides for preliminary planning, site selection, preparation of drawings and specifications, and related costs incident to a new Government Printing Office building.

GOVERNMENT PRINTING OFFICE REVOLVING FUND

The Government Printing Office is hereby authorized to make such expenditures, within the limits of funds available and in accord with the law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs and purposes set forth in the budget for the current fiscal year for the "Government Printing Office revolving fund": Provided, That during the current fiscal year the revolving fund shall be available for the hire of one passenger motor vehicle and the purchase of one passenger motor vehicle (station wagon). For payment to the "Government Printing Office revolving fund" for improving electrical and air conditioning

systems, and building structures, as necessary for the operation and maintenance of the Government Printing Office, \$2,000,000 to remain available until expended. (Legislative Branch Appropriation Act, 1970.)

¹ Balances of selected resources are identified on the statement of financial condition.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C. 309).

All printing and binding work for the Congress and Federal agencies is done and financed through the Government Printing Office revolving fund. The fund is reimbursed by the customer agencies and net operating income is retained for reuse by the fund.

The General Accounting Office is responsible directly to the Congress for conducting independent reviews, audits, and investigations of programs, activities, and financial transactions of Federal agencies; for rendering legal decisions relating to Government fiscal matters; for developing principles, standards, and related requirements for Federal agency accounting systems, cooperating in developing agency systems, and approving them; for the settlement of certain claims for and against the Government; and, for advising and assisting the Congress and Government agencies on matters relating to public funds.

1. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General, who is assisted by the Assistant Comptroller General and staff. The staff assists the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual members, and is responsible for continuing analysis and review of programs and activities of the General Accounting Office.

2. *Office of the General Counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government, the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

3. *Office of Administrative Services.*—This office is responsible for the preparation and execution of the GAO budget; maintenance of the administrative accounting, payroll and leave systems; management of space and government fiscal records; coordination, publication and distribution of manuals, reports, and other documents; and furnishing general office services.

4. *Office of Personnel Management.*—In addition to administering our regular personnel functions such as appointment, placement, and classification, employee relations and services, and processing, recording, and reporting personnel actions, this office performs professional staff development functions, including (a) formulating and executing recruiting programs, (b) developing and carrying out training and professional career development programs, (c) participating in general control over the assignment of staff, and, (d) obtaining appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

5. *Office of Policy and Special Studies.*—This office develops auditing policies for the guidance of audit work performed by General Accounting Office auditors; internal auditing objectives, principles, and standards for guidance of the executive agencies; and accounting principles, standards, and related requirements for observance by Federal agencies. It provides cooperative assistance to departments and agencies in the development of accounting systems and makes recommendations relating to approval of accounting systems. It conducts special studies or reviews agency studies of programs and activities requiring application of systems analysis techniques. It represents the General Accounting Office in the Joint Financial Management Improvement program conducted

with the Bureau of the Budget, the Treasury Department, and the Civil Service Commission. It conducts Government-wide studies of the management of automatic data processing systems; and provides advice and assistance to the Congress in its area of responsibility.

6. *Civil division.*—7. *Defense division.*—8. *International division.*—These divisions, located in Washington, D.C., are responsible for the performance of the accounting, auditing, and investigative functions of the General Accounting Office in the Federal departments and agencies and the District of Columbia, as assigned by the Comptroller General. These functions include the review and analysis of Government programs and activities for the purpose of determining (a) whether the funds and other resources are utilized only for authorized programs and activities and are properly accounted for and reported, (b) whether agency resources are managed efficiently and economically, and (c) whether programs are achieving the objectives intended by the Congress in enacting legislation. In addition, audits are made of negotiated contracts and accounting systems are reviewed and evaluated.

The International division includes two overseas branches. The European branch, with headquarters in Frankfurt, Germany, is responsible for performing assigned General Accounting Office functions in the European area, including the Near East, South Asia, and Africa. The Far East branch, with headquarters in Honolulu, Hawaii, is responsible for performing assigned General Accounting Office functions in Hawaii and the Far East area, including Southeast Asia and the Southwest Pacific.

9. *Field operations division.*—This division, composed of a central office and regional offices in principal cities in the United States, performs assigned accounting, auditing, and investigative work outside the metropolitan area of Washington, D.C.

10. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

11. *Transportation division.*—This division audits freight and passenger transportation payments for the account of the United States, reviews the transportation practices and traffic management of agencies, and settles claims involving transportation charges.

12. *Data processing center.*—This organization performs the automatic data processing operations for all other divisions and offices, including ADP systems analysis, programing, and computing services for both administrative and program applications.

GENERAL PROVISIONS

Sec. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

Sec. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in House Resolutions [995 and 1211, Ninetieth Congress, and House Resolutions 357, 441, and 502, Ninety-first Congress,] shall be the permanent law with respect thereto. (*Legislative Branch Appropriation Act, 1970.*)

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The U.S. Court of Claims has jurisdiction over all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has

general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by the Congress, and the commissioners of the court have jurisdiction to render reports to the Congress on claims set forth in bills referred to the chief commissioner by either house of Congress.

The primary and appellate jurisdictions of the courts of the United States are vested in the 93 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts, including the Federal Probation System, is under this heading.

The estimate for 1971 provides for the employment of 32 additional deputy clerks for the courts of appeals. Provision also has been made for adjustments in the salaries of clerks and chief deputy clerks of the courts of appeals and district courts pursuant to a resolution of the Judicial Conference of the United States.

77 Adjustments in expired accounts.....	-26		
90 Outlays.....	11,749	14,794	15,747

This appropriation provides for the statutory fees and allowances of jurors, fees of jury commissioners, and the fees and related benefits of U.S. commissioners who serve primarily as committing magistrates.

The earnings of commissioners are directly related to the volume of cases presented by law enforcement officials. The amount of service and the compensation of jurors depends largely on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts. The estimate for 1971 takes into account a projected deficiency in obligational authority for fees of jurors based on grand and petit juror services in fiscal year 1969. A request for a supplemental appropriation of \$800,000 for 1970 is proposed.

90 Outlays.....	6,885	6,980	8,090

Funds appropriated under this heading are for expenses of travel and subsistence incurred by judges and supporting personnel in attending sessions of court or transacting other official business and for equipment, lawbooks, supplies, and other incidental expenses of operating the 11 courts of appeals and 93 district courts of the United States.

The estimate for 1971 will provide for expenses relating to requests for additional personnel under the heading Salaries of supporting personnel. Provisions have been made for increased subsistence allowances for official travel, rates increases for local and long-distance telephone services, a greater volume of copywork, for increased volumes and cost of printing opinions, and continuation material required to maintain court libraries.

The office, pursuant to section 604 of title 28, United States Code, under the supervision and direction of the Judicial Conference of the United States, is responsible for the administration of the U.S. Courts, including the probation and bankruptcy systems. The principal functions consist of providing staffs and services for the courts; conducting a continuous study of the rules of practice and procedure in the Federal courts; examining the state of the dockets of the various courts; compiling and publishing statistical data concerning the business transacted by the courts; and administering the Judicial Survivors Annuity System under title 28, United States Code, section 376. The office also is responsible for the preparation and submission of the annual budget estimates as well as supplemental and deficiency estimates; the disbursement of and accounting for moneys appropriated for the operation of the courts and the Federal Judicial Center; the audit and examination of accounts; the purchase and distribution of supplies and equipment; and for securing adequate space for occupancy by the courts and for such other matters as may be assigned by the Supreme Court and the Judicial Conference of the United States.

The estimate for 1971 provides for 16 additional positions: two positions to cope with an increased workload relating to the Jury Selection and Service Act of 1968; one position required to process vouchers from attorneys appointed by the Juvenile Court for the District of Columbia under the Criminal Justice Act; 10 positions for establishment of a division for U.S. magistrates; and three positions for development of improved systems and programs and more extensive supervision of keypunching activities in the data processing unit. Provisions also have been made for increased subsistence allowances for official travel, rental of a larger computer, and other auxiliary equipment.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and benefits are paid from this appropriation, which is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings.

General and special funds—Continued

SALARIES OF REFEREES—Continued

The estimate for 1971 provides for increased Government contributions to the Civil Service Retirement Fund pursuant to Public Law 91-93 approved October 20, 1969.

This appropriation is for the operation of the Federal Judicial Center which was established by the act of December 20, 1967, Public Law 90-219 (81 Stat. 664). The Center is charged with the responsibility for furthering the development and adoption of improved judicial administration in the courts of the United States.

The estimate for 1971 takes into account the difference between the full- and part-year cost of positions authorized for 1970. Provisions also have been made for two additional professional assistants for the Center, additional funds for research, implementation of prior studies and contractual programs, and for innovation and systems development.

The number of judges participating in the system increased in 1969 from 488 to 503. There were 552 judges on the roll at the end of the year as compared with 539 at the beginning of the year. As of June 30, 1969, there were 49 nonparticipants as compared with 51 a year ago.

On June 30, 1969, there were 148 survivor annuitants which is the same number on the roll June 30, 1968. The average annuity increased \$156, from \$3,921 to \$4,077. Current awards to annuitants are higher due to statutory increases in the salaries of judges.

GENERAL PROVISIONS—THE JUDICIARY

SEC. 402. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 403. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than \$6.50 per volume.

SEC. 404. None of the funds contained in this title shall be available for the salaries or expenses of deputy clerks in any office that has discontinued the taking of applications for passports subsequent to October 31, 1968 and has not resumed such service on a permanent basis. (*Judiciary Appropriation Act, 1970.*)

The 1971 estimate is a new departure, proposed in the interest of candor and accuracy, to give the Congress and the Nation a long overdue appreciation of White House costs and needs. For the first time in many years this estimate combines into one appropriation the actual White House Office staff costs that traditionally have been dispersed and obscured. In fiscal year 1970 and prior years a considerable segment of White House Office staff costs have not been readily apparent, as many White House staff personnel have been paid from the appropriations of other Federal agencies. The President's Special Projects fund has also been drawn on year after year to augment funds for the regular White House Office staff complement. This practice must be discontinued in order to restore the President's flexibility to deal with the special problems that the fund is provided to meet.

So that the total costs of White House Office staff operations can be clearly seen and accurately measured in future years, the 1971 Budget request provides direct funding for all regular office staff assistance and administrative services within the Salaries and expenses, White House Office appropriation.

In connection with a general tightening in the executive branch, the requested level provides for a decrease from the actualities of 1970 both in staff and funds. Appropriate adjustments have been made in the employment and accounts of those agencies from which details have been provided the White House in prior years. Funds and end-of-year employment for the consolidated White House Office appropriation on a comparable basis with 1970 are shown in the following table:

	1970		1971	
	Amount	Employment	Amount	Employment
Salaries and expenses, White House Office.....	\$3,940	208	\$8,550	548
Special projects.....	2,240	95	-----	---
Personnel detailed from other Federal agencies.....	2,820	273	-----	---
Total	9,000	576	8,550	548

A separate special projects appropriation is retained, to be utilized by the President for special requirements such as those of a nonrecurring nature and those outside the normal responsibility of other funded program areas.

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of executive management.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

4. *Office of program evaluation.*—Leadership for the development and implementation of the Planning-Programming-Budgeting System throughout the Federal Government is provided.

5. *Office of statistical policy.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical programs, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among six divisions: (a) economics, science, and technology programs; (b) general government management; (c) human resources programs; (d) international programs; (e) national security programs; and (f) natural resources programs.

The Office of Emergency Preparedness advises and assists the President with respect to nonmilitary emergency preparedness activities. This includes coordinating emergency preparedness programs of Federal departments and agencies and providing staff support and policy guidance for emergency resource management planning functions. The President has delegated to the Office of Emergency Preparedness responsibility for administering the Disaster assistance fund and related natural disaster activities (see p. 70). In addition, OEP undertakes, through the Office of Telecommunications Management, certain telecommunications management and policy functions. Specific programs include:

1. *Emergency readiness.*—OEP develops policies, plans, and programs to provide for continuity of civil government at the Federal, State, and local levels. The principal objectives are to preserve duly constituted authority and leadership and to enable civil government to respond to, and operate in, a national emergency. OEP undertakes planning related to mobilization and management of critical resources for use during a national emergency, and develops plans to permit all levels of government to undertake economic stabilization activities during an emergency situation.

2. *Critical materials policy planning.*—OEP provides guidance to other Federal departments and agencies on the development of programs to administer national policy for certain critical material items.

3. *Analytic and computational support.*—The program activities described in paragraphs 1 and 2 above require extensive analytical and computational support. This support is provided by the activities in this program.

4. *Executive direction, staff, and administrative support.*—Executive direction and staff and administrative support for the Office of Emergency Preparedness is provided under this activity. Funds are included to finance the salaries of the Presidential appointees and their immediate staffs. Also contained in this activity are funds for the housekeeping expenses of the Office of Emergency Preparedness in Washington, general administrative functions, congressional liaison activities, public information support, and health and legal advisory personnel.

The Director of Telecommunications Management provides advice and assistance to the President and the Director, Office of Emergency Preparedness, on telecommunications matters.

1. *Telecommunications management.*—This activity provides for: (1) establishing executive branch telecommunication goals in support of national objectives and providing policy direction for Government telecommunication activities including the National Communications System; (2) coordinating and encouraging the application of new technology; (3) developing mobilization and preparedness policies for telecommunications in a national

emergency; (4) assigning frequencies to Federal radio stations and developing procedures and rules for their use; (5) developing data on Government frequency usage and requirements; (6) providing assistance and advice to the Department of State on international telecommunications matters; (7) assisting the President with respect to his functions under the Communications Satellite Act of 1962; (8) promoting efficiency and economy in the procurement and management of telecommunications throughout the Government; and (9) establishing an engineering facility to solve frequency compatibility problems.

2. *Research and development.*—This activity funds contractual studies and research in support of the activities described in paragraph 1.

90 Outlays.....		930	570

The Council is (1) undertaking a thorough review of the organization of the executive branch in light of today's

changing requirements of government, (2) seeking solutions to organizational problems which arise from among the many departments, offices, agencies, and other separate organizational units in the executive branch, and (3) evaluating the effectiveness of the organizational relationship of the Federal Government to States and cities in carrying out the many domestic programs in which the Federal Government is involved.

Established by the President on April 7, 1969, the Council received initial financing for its activities from the Emergency Fund for the President. It is anticipated that the Council will complete its work in 1971.

Executive Order 11365, establishing a National Advisory Commission on Civil Disorders, authorized each department or agency, to the extent permitted by law and within the limits of available funds, to furnish information and assistance to the Commission. Those departments and agencies which were closely concerned with the areas of the Commission's activities, and which were most likely to benefit from the Commission's findings, formed an Interagency Committee on Civil Disorders to support the work of the Commission through investigations and studies into civil disorders.

The work of the Committee was financed from contributions from the Departments of Justice, Commerce, Labor, Health, Education, and Welfare, and Housing and Urban Development, and from the Office of Economic Opportunity. In addition, the Department of Defense provided support for contractual studies undertaken for the Commission pursuant to the Executive order.

The Committee's work ceased early in 1969 upon final publication of supplementary studies underlying the Commission's report of March 1968.

The expenses of the Commission itself were funded from an allocation from the Emergency Fund for the President.

The National Advisory Commission on Rural Poverty was established by the President in Executive Order 11306, dated September 27, 1966, to assist the President's Committee on Rural Poverty, established in the same Executive order, in carrying out the committee's primary function of developing recommendations for providing rural people additional opportunities and higher living standards. The Commission has completed its work. Findings and recommendations were presented to the President in a report, "The People Left Behind," issued September 1967. In addition, a report of background information, "Rural Poverty in the United States," was issued by the Commission in May 1968.

The Commission was financed by the eight departments and agencies designated by the President in Executive Order 11306 to comprise the Committee on Rural Poverty. No new funds were involved after 1968.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$0; 1969, \$37 thousand; 1970, \$0; 1971, \$0.

The National Commission on the Causes and Prevention of Violence was created by Executive Order 11412 of June 10, 1968, and extended by Executive Order 11469 of May 23, 1969. The Commission consisted of 13 members—four from the Congress and nine from private life appointed by the President.

The Commission has published 11 studies in areas such as the following: The causes and prevention of lawless acts of violence in our society; the causes and prevention of disrespect for law, order, and public officials; violent disruptions of public order by individuals and groups, the relationship of violent behavior to the mass media; and political assassination. The Commission has also published five investigative reports on civil disturbance: Chicago, 1968; Cleveland, 1968; Miami, 1968; San Francisco State College, 1969; and the Presidential inaugural, 1969.

The Commission completed its work on December 10, 1969.

The Congress recognized the Commission's efforts in enacting Public Law 90-608, which appropriated to Juvenile Delinquency Prevention and Control \$5 million, of which \$650 thousand was made available to the Commission by specific direction of both committee reports. Prior to that action, funds had been made available by transfer from other accounts in the Department of Health, Education, and Welfare. After the congressional action, the Commission contracted to perform a study for the Department of Justice and obtained additional funds by transfer from HEW.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$45 thousand (1969 adjustments, \$6 thousand); 1969, \$23 thousand; 1970, \$0.

The President's Committee on Equal Opportunity in Housing was established by Executive Order 11063, dated November 20, 1962, to assist in the implementation of the order, which is designed to assure equal opportunity to all citizens in the purchase or leasing of housing owned or assisted by the Federal Government. The cost of these activities has now been assumed by the Department of Housing and Urban Development under the Fair Housing title of the Civil Rights Act of 1968.

Previously, the committee was financed through contributions from the Federal agencies represented on the committee: The Department of the Treasury, the Department of Defense, the Department of Justice, the Department of Agriculture, the Department of Housing and Urban Development, the Veterans Administration, and the Federal Home Loan Bank Board.

GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 502. Positions in the agencies covered by this Act, whether financed from funds contained in this Act or from other sources, may be filled during the fiscal year 1970 without regard to the provisions of section 201 of Public Law 90-364, and such positions shall not be taken into consideration in determining numbers of employees under subsection (a) of that section or numbers of vacancies under subsection (b) of that section.

SEC. 503. Section 5(b) of the Act entitled "An Act creating a commission to be known as the Commission on Obscenity and Pornography", approved October 3, 1967 (Public Law 90-100), as amended, is amended by striking out "July 31, 1970" and inserting in lieu thereof "September 30, 1970". (Treasury, Post Office, and Executive Office Appropriation Act, 1970.)

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 501. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (60 Stat. 810), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,650 except station wagons for which the maximum shall be \$1,950.

SEC. 502. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from Poland or the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 503. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with title II of the Act of September 6, 1960 (74 Stat. 793).

SEC. 504. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 505. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code, Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest,

or in excess of \$6.50 per volume for the current or future volumes of the Modern Federal Practice Digest.

SEC. 506. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with 5, U.S.C. 3109; and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 507. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. 508. No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any corporation or agency, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress.

SEC. 509. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 510. No part of any appropriation contained in this or any other Act, shall be available to finance interdepartmental boards, commissions, councils, committees, or similar groups under section 214 of the Independent Offices Appropriation Act, 1946 (31 U.S.C. 691) which do not have prior and specific congressional approval of such method of financial support. (*Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

GENERAL PROVISIONS

[SEC. 1001. During the current fiscal year, restrictions contained within appropriations, or provisions affecting appropriations or other funds, limiting the amounts which may be expended for expenses of travel, or for purposes involving expenses of travel, or amounts which may be transferred between appropriations or authorizations available for or involving expenses of travel, are hereby increased to the extent necessary to meet increased per diem costs authorized by Public Law 91-114, approved November 10, 1969.]

[SEC. 1002. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.]

[SEC. 1003. Section 102 of the Act of November 14, 1969 (Public Law 91-117), as amended, is further amended by striking "the sine die adjournment of the first session of the Ninety-first Congress" and inserting in lieu thereof, "January 30, 1970".] (*Supplemental Appropriation Act, 1970.*)

After the 1964 Alaska earthquake the Alaska Omnibus Act was amended (Public Law 88-451) to authorize grants to match funds provided by the State of Alaska to indemnify homeowners by retiring or adjusting mortgages on homes severely damaged or destroyed by the earthquake. In 1967, a grant of \$2.6 million was made to the State for this purpose. The full grant was not required to pay the Federal share of the indemnity program and the State refunded \$1.4 million to the Federal Government in 1969.

The Appalachian Regional Development Program assists the Appalachian region to meet its special problems, promote its economic development, and to establish a framework of joint Federal and State efforts to provide the basic facilities essential to economic growth in Appalachia.

Program investments made in the Appalachian region are concentrated in areas where there is significant potential for future growth and where the expected return on public dollars invested will be the greatest.

The States, acting through the Appalachian Regional Commission, are responsible for recommending local and State projects within their borders for assistance under this program.

General and special funds—Continued

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS—Continued

1. *Appalachian Development Highway system.*—Section 201 of the Appalachian Regional Development Act authorizes construction of an Appalachian Development Highway system including local access roads. This system is designed to improve the accessibility of Appalachia; to reduce highway transportation costs to and within Appalachia; to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. In addition, access roads to specific development facilities are authorized. The program, since 1969, is funded through contract authority and States are encouraged to prefinance work, with later Federal reimbursement.

The status of the system of roads including mileage prefinaanced by the State follows:

Development system miles (cumulative):	1969 actual	1970 estimate	1971 estimate
Approved for construction.....	1,326	1,326	1,326
Miles contracted.....	647	980	1,170
Prefinanced miles.....	(19)	(205)	(210)
Miles completed.....	165	460	600
Access roads (cumulative):			
Number of projects approved.....	124	175	250
Miles approved.....	483	610	840
Miles contracted for construction....	235	535	840
Miles completed.....	90	190	265

2. *Demonstration health projects.*—Grants are made for the construction, equipping, and operation of multicounty demonstration health facilities, including hospitals, regional health diagnostic or treatment centers, and other facilities. Under the 1969 amendments to the act, emphasis will be given to programs for child development and nutrition and to continued operational assistance for health activities in selected demonstrations within the Appalachian region.

Number of projects (cumulative):	1969 actual	1970 estimate	1971 estimate
Operation and planning.....	95	175	220
Construction.....	29	52	60

3. *Mine area restoration.*—Section 205 of the act authorizes a program for the sealing and filling of voids in abandoned coal mines, the planning and execution of projects for the extinguishment and control of underground and outcrop mine fires, and the reclamation and rehabilitation of strip and surface mine areas, including waste banks, on public land in those areas where the greatest potential for economic growth exists in Appalachia. States or local sponsors must bear 25% of projects costs. Projects under contract on a cumulative basis are:

	1969 actual	1970 estimate	1971 estimate
Mine fires.....	33	36	39
Mine subsidence.....	7	8	9
Surface restoration and well sealing....	10	15	25

4. *Vocational education facilities.*—Grants are made to States and local districts within the Appalachian region for the construction and equipment of vocational education facilities in Appalachia. Vocational education facilities are key elements for the training and upgrading of potential and existing labor force entrants in skills required in commercial and other vocations. Grants are administered through the Office of Education. Vocational education projects approved, including those aided by supplementary grants, are as follows:

Projects approved (cumulative).....	1969 actual	1970 estimate	1971 estimate
	215	295	375

5. *Supplements to Federal grant-in-aid programs.*—This program provides supplemental grants to enable areas to take advantage of other Federal programs. Direct grants, plus supplemental grants, cannot exceed 80% of the project cost. The amount of supplemental grant depends upon the relative need of the area and nature of the project.

The estimates provide for approved projects as follows: 1969, 200 projects; 1970, 215 projects; 1971, 225 projects. Supplemental assistance has been provided from inception through 1969 to the following types of projects:

	Number	Cost (in millions)
Vocational education.....	184	34.4
Higher education.....	145	31.6
Libraries.....	72	6.0
NDEA.....	9	4.2
Educational television.....	11	2.0
Health facilities.....	202	37.6
Sewage treatment.....	105	15.5
Airports.....	43	4.2
Water and sewer systems.....	24	3.3
All other.....	24	1.8
Total.....	819	140.6

6. *Research and local development district program.*—Appalachian planning assistance is provided through grants to multicounty local development districts and for research and demonstration projects. Grants are made for up to 75% of the administrative expenses of local development districts. Other planning and technical assistance is provided for (a) programs which improve the base for economic growth, (b) programs which will attract industrial development within the region, (c) programs which improve the health, education, and skills of people, and (d) projects which conserve, maintain, or improve natural resources.

	1969 actual	1970 estimate	1971 estimate
Planning districts aided.....	37	43	56
Research projects (Commission and State).....	35	36	40

7. *Land stabilization, conservation, and erosion control.*—Section 203 of the act authorizes contracts of up to 10 years for assistance for landowners, operators, or occupiers of land in the Appalachian region. Such contracts provide for land stabilization, erosion and sediment control, and reclamation through changes in land use, and the establishment of measures for the conservation and development of the region's soil, water woodland, wildlife and recreation resources. The Federal share may not exceed 80% of the total cost on not more than 50 acres of land for any person. The program is administered through the Department of Agriculture, with the following cumulative workload:

	1969 actual	1970 estimate
Number of contracts.....	12,790	17,431
Acres under contract.....	335,045	455,711

8. *Sewage treatment facilities.*—Grants were made to the States in the Appalachian region for construction of sewage treatment facilities. Funds under this program were in addition to those allocated to the State under the authority of Public Law 660 administered by the Department of the Interior and were subject to the same requirements. The program has assisted in the funding of 62 projects.

The Secretary of Housing and Urban Development is authorized to make loans, and in certain cases grants through waivers, for up to 80% of the preliminary cost of planning a project and obtaining an insured mortgage under section 221 of the National Housing Act, including such costs as preliminary site engineering and architectural fees, site options, FHA and FNMA fees, and construction loan fees and discounts.

The 1969 amendments authorize the Secretary to make technical assistance grants for the organization of State housing corporations and local nonprofit groups to encourage low and moderate income housing. Funds are transferred from the Appalachian Regional Development Program appropriations to this revolving fund for the following workload:

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$22,403 thousand (1969 adjustments, -\$13,982 thousand); 1969, \$13,085 thousand; 1970, \$13,085 thousand; 1971, \$13,085 thousand.

1. *Administration.*—Funds are provided to administer and coordinate disaster relief assistance for the States. Simultaneously with the President's authorization of an allocation of funds to OEP, he authorizes an additional allocation to OEP for administrative purposes.

2. *Aid to disaster areas.*—Under Public Laws 81-875, 89-769, and 91-79, the Federal Government provides supplementary assistance to State and local governments in the event of a declared major disaster by the President. Allocations may be made directly to a State, or to Federal agencies as reimbursement for expenditures in disaster relief work performed under this authority. Responsibility for administration of this program is delegated to OEP by Executive Orders 10427 and 11495.

EMERGENCY FUND FOR THE PRESIDENT

Federal Funds

General and special funds:

EMERGENCY FUND FOR THE PRESIDENT

For expenses necessary to enable the President, through such officers or agencies of the Government as he may designate, and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, to provide in his discretion for emergencies affecting the national interest, security, or defense which may arise at home or abroad during the current fiscal year, \$1,000,000: *Provided*, That no part of this appropriation shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the Ninety-first Congress or first session of the Ninety-second Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body. (*Executive Office Appropriation Act, 1970.*)

90 Outlays.....	165,959	17,843	-89,762

¹ Balances of selected resources are identified on the statement of financial condition.

Under the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to expand production of critical materials for programs certified as essential to the national defense by the Office of Emergency Preparedness. The program has been conducted primarily through a revolving fund financed by borrowing from the Treasury. The amount borrowed may not exceed \$2.1 billion outstanding at any one time.

Allocations of borrowing authority by the Office of Emergency Preparedness and net borrowing from the U.S. Treasury as of June 30, 1969, were as follows (in thousands of dollars):

Authorized agency	Borrowing authority allocated	Borrowings outstanding	Net available for borrowing
General Services Administration ¹	1,959,000	1,911,700	47,300
Department of Agriculture.....	101,381	81,398	19,983
Department of the Interior.....	39,300	38,800	500
Office of Emergency Preparedness (reserve).....	319		319
Total.....	2,100,000	2,031,898	68,102

¹ In addition, an appropriation of \$108 million was applied to General Services Administration activities, thus providing financing of \$2,067 million to that agency.

No new loans were authorized during 1969. It is anticipated that there will be no additional loans authorized during 1970 or 1971.

Loans outstanding are estimated for 1970 and 1971 as follows (in thousands of dollars):

	1969	1970	1971
Outstanding, beginning of year.....	10,129	7,881	5,374
Repayments during year.....	2,248	2,507	600
Outstanding, end of year.....	7,881	5,374	4,774

Financial condition of the fund.—Losses under these programs are reflected as \$1.2 billion as of June 30, 1969, with inventory of metals and minerals carried at acquisition cost of approximately \$0.9 billion. Using inventory market price of \$600 million, the deficit would amount to \$1.5 billion. Under the current system, interest expense on borrowing from Treasury will increase to more than \$120 million for 1971 and annually thereafter with negligible offsetting income.

For this reason legislation will be submitted to terminate the present financing system and substitute new arrangements as required. It is proposed to amend title III of the Defense Production Act of 1950, as amended, to prohibit the financing of any new contracts under the provisions of section 304; to terminate interest payments on notes issued pursuant to that section; to provide for the orderly retirement of those notes; and to provide for the cancellation of any remaining borrowing authority under section 304.

The budget schedules to reflect the proposed legislation are shown on page 103.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$199 thousand; 1969, \$102 thousand; 1970, \$72 thousand; 1971, \$72 thousand.

These funds are to enable the President to develop and install improvements in the management, organization, and operation of the agencies of the executive branch. During 1969, funds were used to study and determine the improvements needed in telecommunications management, and to develop an integrated information system for the Executive Office of the President. Previous studies have been made of Federal employee retirement systems, changes in occupational patterns, and decisionmaking in the regulatory agencies.

The Inter-American Development Bank (IDB) is an intergovernmental institution, corporate in form, whose capital stock is owned by its member governments. The Bank promotes economic development in member countries through loans, technical assistance, and guarantees of private investment in development projects. Twenty-three Western Hemisphere republics, including the United States, are members of the Bank.

Ordinary capital.—The total subscribed capital of the IDB was \$2,263.7 million as of October 31, 1969. The U.S. share was \$967.6 million. Total IDB commitments from ordinary capital as of the same date amounted to \$1,185.4 million equivalent on 180 loans.

Fund for special operations.—In addition to its ordinary capital operations, the Bank lends from its Fund for Special Operations in circumstances where ordinary capital financing is not appropriate. As of October 31, 1969, commitments from the Fund for Special Operations amounted to \$1,440.6 million equivalent on 228 loans.

The Board of Governors of the Bank in 1967 recommended an increase in fund resources of \$400 million per year to support operations during a 3-year period. The U.S. share of this increase—\$300 million per year—was authorized on September 22, 1967 (Public Law 90-88). An appropriation for the third installment of the U.S. contribution is included in the 1970 budget.

Proposed for separate transmittal, existing legislation:

In June 1968 (Public Law 90-325—82 Stat. 168), Congress authorized an increase of \$411,760 thousand in the U.S. subscription to the callable capital of the Inter-American Development Bank (IDB) in accordance with a resolution adopted at the Bank's annual meeting in 1967. The first half of this increase was appropriated on October 17, 1968 (Public Law 90-581). A 1970 supplemental appropriation for \$205,880 thousand is required to subscribe to the remaining half of the current callable capital increase.

SUBSCRIPTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

For payment of the third installment of the United States share of the 1969-71 increase in the resources of the International Development Association, \$160,000,000, to remain available until expended (22 U.S.C. 284e, 83 Stat. 10).

Note.—The regular appropriation for this account for 1970 has not yet been enacted. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

The International Development Association is an international organization affiliated with the International Bank for Reconstruction and Development. The Association provides its less developed member countries with development financing in the form of long-term credits at a nominal service charge.

U.S. membership in the International Development Association was authorized by Public Law 86-565 (74 Stat. 293) approved June 30, 1960. The United States joined the Association in August 1960, and the institution began operations in November 1960.

As of October 31, 1969, the Association had made credit commitments for high-priority economic development projects totaling \$2.3 billion in 50 countries and territories.

The Board of Governors of the Association during 1968 recommended an increase in the Association's resources of \$1.2 billion over a 3-year period to be provided by developed country members. The U.S. share of the increase is \$480 million to be provided in three annual installments of \$160 million. Appropriation of these amounts was authorized on May 23, 1969 (Public Law 91-14). The third and final installment of the U.S. contribution, for which an appropriation will be required in 1971, is due November 8, 1970.

ASIAN DEVELOPMENT BANK

For payment of the fifth installment subscription on paid-in capital stock to the Asian Development Bank, \$20,000,000, to remain available until expended. (22 U.S.C. 285-285h.)

Note.—The regular appropriation for this account for 1970 has not yet been enacted. A temporary appropriation, not shown here, is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

The Asian Development Bank finances economic development projects and programs in the developing countries of Asia. The Bank's membership includes 20 countries in the Asian and Pacific region and 13 developed countries outside the region.

The authorized capital stock of the Bank is \$1.1 billion. Of this amount, \$978 million has been subscribed: \$623 million by the regional members, including \$200 million by Japan, and \$355 million by the nonregional members.

The Asian Development Bank Act (Public Law 89-369) of March 16, 1966, authorized U.S. membership in the Bank and authorized the appropriation of the U.S. subscription of \$200 million. Of this amount \$100 million is to be paid in five equal annual installments and \$100 million is callable. Four installments on the paid-in portion of the U.S. subscription have been paid. The fifth and final installment is due August 22, 1970.

In addition to its ordinary operations the Bank has established and accepted contributions to the Consolidated Special Funds of the Asian Development Bank for use in financing high-priority development projects on easier repayment terms than those applied to the Bank's loans from ordinary capital resources.

Legislation will be proposed to the Congress to authorize a U.S. contribution of \$100 million to the Bank's Consolidated Special Funds in three annual installments: \$25 million in 1970, \$35 million in 1971, and \$40 million in 1972.

The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development. The Bank's total authorized capital stock (June 30, 1969) is \$24 billion, of which \$23.04 billion has been subscribed by its 110 member countries.

The U.S. subscription is \$6.35 billion, of which the paid in portion is \$635 million. The balance, \$5,715 million, is subject to call if required to meet the Bank's obligations. Calls on unpaid subscriptions, were they ever to occur, would be made on the basis of a uniform percentage applied to the subscription of each member country.

As of October 31, 1969, the Bank has made loans totaling \$12.8 billion (net of cancellations) in 87 member countries and territories and to the International Finance Corporation.

FOREIGN ASSISTANCE**Federal Funds**

For expenses necessary to enable the President to carry out the provisions of the Foreign Assistance Act of 1961, as amended, and for

other purposes, to remain available until June 30, 1971, unless otherwise specified herein, as follows:

MILITARY ASSISTANCE**Federal Funds****General and special funds:****MILITARY ASSISTANCE**

Military assistance: For expenses authorized by section 504(a) of the Foreign Assistance Act of 1961, as amended, including administrative expenses and purchase of passenger motor vehicles for replacement only for use outside the United States, \$350,000,000: Provided, That none of the funds contained in this paragraph shall be available for the purchase of new automotive vehicles outside of the United States: Provided further, That none of the funds appropriated in this paragraph shall be used to furnish sophisticated weapons systems, such as missile systems and jet aircraft for military purposes, to any underdeveloped country other than Greece, Turkey, the Republic of China, the Philippines, and Korea, unless the President determines that the furnishing of such weapons systems is important to the national security of the United States and reports within thirty days each such determination to the Congress: Provided further, That the military assistance program for any country shall not be increased beyond twenty per centum of the amount justified to the Congress, unless the President determines that an increase in such program is essential to the national interest of the United States and reports each such determination to the House of Representatives and the Senate within thirty days after each such determination.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

The Military assistance program strengthens the security of the free world by contributing to the development, maintenance, and training of modern military forces through the grant of defense articles and services. The military forces of countries receiving military equipment on a grant basis provide free world defense capability, depth in reserves, and flexibility. Many of these countries have joined regional defense pacts such as NATO, and some have entered into bilateral defense arrangements with the United States.

Military assistance is now substantially reduced from the program level of earlier years. Most Western European countries no longer receive defense articles as grant military assistance. Moreover, other countries throughout the world are assuming an increasing share of the costs of their military forces as their economic capacities increase. The costs of military assistance to Laos and Thailand and of the U.S. share of NATO infrastructure (military facilities constructed for the use of, and jointly financed by, the participating nations of the North Atlantic Treaty Organization) were transferred to the budgets of the military departments in 1968.

The program for 1971 does not provide for the U.S. share of the costs of International military headquarters and agencies (administrative support costs of military headquarters and agencies primarily of NATO, but also of CENTO and SEATO). Funds needed to meet these costs in 1971 are included in the budgets of the military departments.

The major portion of the military equipment and supplies which the United States furnishes under the military assistance program is produced in the United States and is obtained by placing orders with the U.S. military services. Military assistance funds are reserved when the orders are placed and the military services accounts are reimbursed when the items are delivered. The materiel supplied by the United States varies with our objectives and the requirements and capabilities of individual countries. The current emphasis is on the maintenance of existing forces and materiel, although modernization is included as funds permit. Materiel already on hand, but excess to the needs of U.S. forces, is supplied, whenever possible, at no charge to the military assistance appropriation except for the costs of rehabilitation and transportation.

The administrative costs related to foreign military sales are included in military assistance appropriations.

This is an annual account used to finance the sale of defense articles and services to foreign countries and international organizations. Legislation was first proposed in calendar year 1968 for its establishment. The Foreign

MILITARY ASSISTANCE—continued

General and special funds—Continued

FOREIGN MILITARY CREDIT SALES—continued

Military Sales Act was enacted by Congress, October 22, 1968. The funds for this account are provided by appropriations and will be used to (1) finance directly credit sales, (2) guaranty privately financed credit sales, and (3) guaranty sales of prommissory notes received from credit sales.

An appropriation of \$272.5 million is requested for 1971 to cover a credit sales program of \$385 million. Of the \$385 million program, \$150 million will be privately financed and \$37.5 million of the appropriation will be set aside as a guaranty reserve for this private credit.

The administrative expenses related to this program are funded from the military assistance appropriation.

Public enterprise funds:

This liquidation account was established as of June 30, 1968, under the authority of section 201(h)(3) of the Foreign Assistance Act of 1967. The Foreign military sales fund terminated as of the same date and the assets were transferred to this account to be available solely for the purpose of discharging outstanding liabilities and obligations arising from credit agreements and guaranties issued prior to June 30, 1968. Any funds in this account in excess of the aggregate amount of such liabilities and obligations will from time to time be transferred to the general fund of the Treasury.

ECONOMIC ASSISTANCE

Federal Funds

General and special funds:

GRANTS AND OTHER PROGRAMS

Technical cooperation and development grants: For expenses authorized by section 212, \$183,500,000: Provided, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Congress, except projects or activities relating to the reduction of population growth.

American schools and hospitals abroad: For expenses authorized by section 214(c), \$8,895,000.

International organizations and programs: For expenses authorized by section 302(a), \$122,620,000: Provided, That the President shall seek to assure that no contribution to the United Nations Development Program authorized by the Foreign Assistance Act of 1961, as amended, shall be used for projects for economic or technical assistance to the Government of Cuba, so long as Cuba is governed by the Castro regime: Provided further, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Congress, except projects or activities relating to the reduction of population growth.

Indus Basin development fund, loans: For expenses authorized by section 302(b)(1), \$7,960,000, to remain available until expended.

Indus Basin development fund, grants: For expenses authorized by section 302(b)(2), \$5,850,000.

United Nations Relief and Works Agency (Arab refugees): For expenses authorized by section 302(e), \$1,000,000.

Supporting assistance: For expenses authorized by section 402, \$514,600,000.

Contingency fund: For expenses authorized by section 451(a), \$15,000,000.

Alliance for Progress, technical cooperation and development grants: For expenses authorized by section 252(a), \$90,750,000: Provided,

As authorized by sections 21 and 22 of the Foreign Military Sales Act of 1968, this trust fund is used for sales of defense articles and services. Defense articles sold consist largely of aircraft, ships, combat and other vehicles, missiles, electronic equipment, spare parts, and related supporting equipment. In dollar volume, the major portion of this program consists of sales to European and other developed countries of the free world.

Defense articles from Department of Defense stocks and defense services are sold to eligible countries and international organizations if they agree to pay in U.S. dollars not less than the value thereof in advance or, as authorized by the President, within a reasonable period not to exceed 120 days after delivery.

Defense articles and defense services are also procured for sale if the purchasers provide the U.S. Government with a dependable undertaking (1) to pay the full amount of the procurement contract, which assures the Government against any loss on the contract; and (2) to make funds available in such amounts and at such times as may be required to meet the payments or other costs under the contract. Where it is found to be in the national interest, the Department of Defense may accept a dependable undertaking under which the eligible purchaser agrees to pay 120 days after delivery. In such cases, Department of Defense appropriations are used to meet payments required by such contracts, and these appropriations are reimbursed by amounts subsequently received from the purchasers.

ECONOMIC ASSISTANCE—Continued

General and special funds—Continued

GRANTS AND OTHER PROGRAMS—continued

That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Congress, except projects or activities relating to the reduction of population growth.

Administrative expenses: For expenses authorized by section 637(a), \$51,125,000.

Administrative and other expenses: For expenses authorized by section 637(b) of the Foreign Assistance Act of 1961, as amended, and by section 305 of the Mutual Defense Assistance Control Act of 1951, as amended, \$4,200,000.

Unobligated balances as of June 30, 1970, of funds heretofore made available under the authority of the Foreign Assistance Act of 1961, as amended, except as otherwise provided by law, are hereby

continued available for the fiscal year 1971, for the same general purposes for which appropriated and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the subparagraphs under "Economic assistance", are hereby continued available for the same period as the respective appropriations in such subparagraphs for the same general purpose: Provided, That such purpose relates to a project or program previously justified to Congress and the Committees on Appropriations of the House of Representatives and the Senate are notified prior to the reobligation of funds for such projects or programs. (Additional authorizing legislation to be proposed for supporting assistance in the amount of \$100,000,000.)

Note.—The regular appropriations for these accounts for 1970 have not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

1. *Technical cooperation worldwide.*—and 11. *Alliance for Progress, technical cooperation.*—Increased emphasis is being placed on Technical Assistance activities, particularly new and innovative techniques to overcome bottlenecks to development. Grants are used in developing countries to: (1) Provide the advisers, teachers, training, and equipment required for the improvement of educational, administrative, technical, and professional skills; (2) assist in the control and eradication of major disease and other menaces to health; (3) establish and improve institutions which further economic and social development programs and projects; (4) assist family planning programs; and (5) finance research and the development of American universities and other institutions concerned with problems of economic development.

2. *American schools and hospitals abroad.*—Grants are provided to American-sponsored institutions abroad to help train qualified leadership in developing countries.

3. *Prototype desalting plant.*—The Congress provided up to \$20 million in 1970 to finance not more than 50 % of the capital costs and 50 % of the operation and maintenance costs for a demonstration period of a prototype large-scale water treatment and desalting plant in Israel, provided the President determines the project to be feasible.

4. *Surveys of investment opportunities.*—This program, was for the purpose of encouraging private enterprise to undertake surveys of investment opportunities in developing countries. Under the terms of the Foreign Assistance Act of 1969, this type of activity will be assumed by the Overseas Private Investment Corporation.

5. *International organizations and programs.*—Voluntary contributions are provided to programs affiliated with the United Nations and its specialized agencies. These programs promote economic and social development of developing countries. Increased contributions are planned for the U.N. development program.

6 and 7. *Indus Basin Development.*—Grants and loans are made to the Indus Basin development fund associated with the World Bank, which finances a construction program designed to insure an equitable division of the waters of the Indus Basin between India and Pakistan.

8. *United Nations Relief and Works Agency (Arab refugees).*—These funds are for training Arab refugees. Other funds for the refugees are included under supporting assistance.

9. *Supporting assistance.*—Commodities and services are provided to countries which need help in maintaining defensive forces or in attaining economic and political stability. When country situations have stabilized sufficiently, reductions in supporting assistance are made and efforts are concentrated on development. The largest portion finances economic programs to help Vietnam preserve its national independence. This appropriation also includes certain voluntary contributions to multilateral organizations to help meet the humanitarian needs of the Palestine refugees and to help maintain peace in threatened areas.

10. *Contingency fund.*—These funds are used for urgent requirements which cannot be foreseen at the time the budget is prepared. They are available for emergency

assistance in disasters and to meet international situations which need an immediate response in the U.S. national interest.

12. *Administrative expenses (Agency for International Development).*—These funds are used in Washington and in overseas missions to administer economic aid programs.

13. *Administrative and other expenses (State).*—Expenses are provided for Department of State activities related to the administration of U.S. missions to NATO, OECD, and the Battle Act; and coordination of the military assistance program.

Loans.—A small portion of economic assistance funds available for grants are lent rather than granted. These loans may be repayable either in dollars or in foreign currency.

The following table summarizes the loans made from grant funds each year, repayable in dollars and foreign currencies (in millions of dollars and dollar equivalents):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Loan obligations incurred:				
Repayable in dollars.....	54	15	5	13
Repayable in foreign currency.....	--	--	--	--
Loan disbursements made:				
Repayable in dollars.....	51	44	33	27
Repayable in foreign currency.....	1	2	4	--

(b) Procurement for third countries ..	113	383	80	
Total obligations.....	7,265	9,454	7,453	
Financing:				
Recovery of prior year obligations.....	-298			
Unobligated balance, start of year.....	-13,860	-7,946	-5,392	
Adjustment due to changes in exchange rates.....	-51			
Unobligated balance, end of year.....	7,946	5,392	4,839	
Unobligated balance lapsing.....	255			
Authority to expend foreign currency receipts: Permanent (86 Stat. 832; 75 Stat. 424).....	1,258	6,900	6,900	
Relation of obligations to outlays:				
Obligations incurred, net.....	6,967	9,454	7,453	
Obligated balance, start of year.....	4,482	2,839	3,188	
Adjustment due to changes in exchange rates.....	-57			
Obligated balance, end of year.....	-2,839	-3,188	-1,712	
Outlays.....	8,555	9,105	8,929	

Distribution of outlays by account:				
Sec. 401, Foreign Assistance Act of 1961, as amended.....	6,248	6,500	7,000	
Sec. 402, Mutual Security Act of 1954.....	2,023	2,505	1,900	
Sec. 502, Mutual Security Act of 1954.....	276	100	29	
Sec. 505(a), Mutual Security Act of 1954.....	8			

Through 1961, a portion of the mutual security appropriations was used to purchase surplus agricultural commodities which were then sold to friendly countries for their currencies. These local currencies accruing from the sales are used for economic and military activities in

furtherance of objectives of the U.S. foreign assistance program, including local costs of projects and procurement of supplies and equipment for third countries. Starting in 1967, certain supporting assistance section 401 funds are being used to generate local currency for support of U.S. projects.

¹ Balances of selected resources are identified on the statement of financial condition.

The Alliance for Progress was established in 1961 as a cooperative effort of the United States and Latin American countries to promote the economic and social development of Latin America. The United States is helping in these efforts by providing economic and technical aid. The Latin American countries, in addition to providing a steadily increasing share of their own resources to development, are carrying out substantial reform programs. The United States assists development activities, particularly in agriculture, education, health, and economic integration. In order to stimulate economic activity in the region, this administration has made AID alliance loan dollars, previously restricted to U.S. procurement, eligible for procurement of goods and services throughout Latin America. It is estimated that the Congress will appropriate \$255 million for the Alliance loan program in 1970, which, through that fiscal year would make an estimated cumulative total of \$3,165 million that has been appropriated. Total Alliance for Progress appropriations of \$428.2 million are proposed for 1971. Of this amount \$337.5 million is proposed for development loans to support private industry, agriculture, education, and regional integration. Also proposed is \$90.7 million in grants to support technical assistance in these same areas and in trade promotion, capital markets, and science and technology.

DEVELOPMENT LOANS—REVOLVING FUND

Development loans: For expenses authorized by section 202(a), \$570,000,000, together with such amounts as are authorized to be made available under section 203, all such amounts to remain available until expended.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

Development loans including those made under the Alliance for Progress are made to promote economic progress in developing countries. Funds are used to provide imports from the United States of goods needed for industrial and agricultural production and for the financing of specific projects and institutions.

Before a loan is made, the Agency for International Development must take into account: (1) whether financing could be obtained in whole or in part from other free world sources on reasonable terms, including private sources within the United States; (2) the economic and technical soundness of the activity to be financed, including the capacity of the recipient country to repay the loan at a reasonable rate of interest; (3) whether the activity gives reasonable promise of contributing to the development of economic resources or to the increase of productive capacities; (4) the consistency of the activity with other development activities being undertaken or planned, and its contribution to realistic long-range objectives; (5) the extent to which the recipient country is demonstrating its determination to take effective self-help measures; and (6) possible effects upon the economy of the United States. Development loans are not made unless there is a finding of a reasonable prospect of repayment. Additional loan criteria and standards are established by an inter-agency Development Loan Committee chaired by the Administrator of the Agency for International Development.

Development loans are repayable in U.S. dollars. Under the provisions of the Foreign Assistance Act of 1968,

interest charged on all loans, with the exception of those covered by special provisions relative to the use of the facilities of the International Development Association and those funds already committed to be lent, will be at an interest rate of not less than 3% per annum. Loan repayments must begin not later than 10 years following the date on which the funds are lent. During the initial 10-year period the rate of interest shall not be lower than 2% per annum.

This program replaced the Development Loan Fund corporation, which was abolished November 3, 1961. A total of \$300 million was appropriated for development loans in 1969, an estimated \$300 million in 1970, and \$570 million is proposed for 1971.

DEVELOPMENT LOAN FUND (LIQUIDATION ACCOUNT)—continued

The Development Loan Fund was established as a corporation by the Mutual Security Act of 1958 to extend loans, credits, and guaranties to American or foreign individuals, businesses, financial institutions, or foreign governments in order to provide capital for projects and programs contributing to the economic growth of friendly developing countries.

Under the Foreign Assistance Act of 1961, the Development Loan Fund Corporation was abolished and its functions were transferred, effective November 3, 1961, to the Agency for International Development. Subsequent to that date, the fund has remained open for the purpose of liquidating outstanding obligations. As of June 30, 1969, the undisbursed loan agreements amounted to \$28.8 million. It is estimated that this balance will decrease to \$12.9 million in 1970 and to \$3.9 million in 1971.

Loan repayments and interest earned totaled \$149.7 million in 1969 and are scheduled to total \$132.8 million in 1970 and \$141.0 million in 1971.

¹ Balance of selected resources are identified on the statement of financial condition.

The Foreign Investment Guaranty Fund in 1971 will include only the Latin American housing program and the worldwide housing programs including predecessor housing programs formerly contained in the extended risk guaranty program.

Under authority of the Foreign Assistance Act of 1969, all obligations, assets, and related rights and responsibilities for administering the nonhousing programs are to be transferred in 1970 to the Overseas Private Investment Corporation (OPIC). These programs include the predecessor specific risk guaranty and insurance program and the predecessor nonhousing portion of the extended risk guaranty program. The Act provided that \$50 million in accumulated fees were to remain in the Foreign Investment Guaranty Fund as a reserve to discharge liabilities of the current housing programs.

Prior to June 30, assets of \$88 million will be transferred to OPIC. A reserve of \$50 million from accumulated fees will be retained in the current Foreign Investment Guaranty Fund.

The purpose of the Latin American housing guaranty program is to assist in the development in the American Republics of self-liquidating housing projects, the development of institutions engaged in Alliance for Progress programs, including cooperatives, free labor unions, savings and loan type institutions, and other private enterprise programs in Latin America engaged directly or indirectly in the financing of home mortgages, the construction of homes for lower income persons and families, the increased mobilization of savings and the improvement of housing conditions in Latin America.

The purpose of the worldwide housing guaranty program is to facilitate and increase the participation of private enterprise in furthering the development of the economic resources and productive capacities of less developed friendly countries and areas, and to promote the development of thrift and credit institutions engaged in programs of mobilizing local savings for financing the construction of self-liquidating housing projects and related community facilities.

The Foreign Assistance Act of 1969 continued available the \$550 million issuing authority for the Latin American housing guaranty program. The total face amount of guaranties that may be outstanding at any one time under the worldwide housing program, was limited to \$130 million, not including the \$30.1 million authorized and issued under predecessor programs. It is estimated that these ceilings are adequate through 1971 and no increase is proposed.

The value of gross contracts issued under the housing programs is as follows (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Latin American housing:			
Start of year.....	165,712	201,299	275,000
Issued during year.....	35,587	73,701	125,000
End of year.....	201,299	275,000	400,000
Worldwide housing:			
Start of year.....	18,000	23,000	30,100
Issued during year.....	5,000	7,100	50,000
End of year.....	23,000	30,100	80,100
Total issued, end of year.....	224,299	305,100	480,100

As of June 30, 1971, there will be an estimated Government equity of \$51.3 million, consisting of \$47.7 million in unobligated funds and \$3.6 million in the market value of acquired securities and collateral. As of June 30, 1969, the cumulative total of claims paid since the inception of the housing guaranty programs was \$657.8 thousand. Based on experience to date, it is estimated that the current and projected reserve is adequate to meet likely future claims. In addition to the reserve available in the program, all claims are backed by the full faith and credit of the United States.

Consistent with the intent of Congress that the housing programs be totally self-supporting, the costs of administration, program evaluation and development, and claims investigations are paid from fee income.

¹ Balances of selected resources are identified on the statement of financial condition.

Section 608 of the Foreign Assistance Act of 1961 created a revolving fund to provide for more effective use of U.S. Government-owned excess personal property in foreign assistance programs by authorizing such property to be acquired and rehabilitated in advance of specifically known requirements for country programs.

Many types of excess property such as tractors, construction and roadbuilding equipment, machinery, and

machine tools, the general needs for which can be anticipated with a reasonable degree of certainty, are included.

PRIVATE INVESTMENT ASSISTANCE

Federal Funds

Public enterprise funds:

OVERSEAS PRIVATE INVESTMENT CORPORATION

Overseas Private Investment Corporation, capital: For expenses authorized by section 232, such amounts as are authorized to be made available under said section, such amounts to remain available until expended.

Overseas Private Investment Corporation, reserves: For expenses authorized by section 235(f), \$37,500,000, to remain available until expended.

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the program set forth in the budget for the current fiscal year.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

74	Obligated balance, end of year.....	-47,400	-89,400
90	Outlays.....		-15,800

¹ Balance of selected resources are identified on the statement of financial condition.

The Foreign Assistance Act of 1969 established the Overseas Private Investment Corporation (OPIC) which will take over the ongoing investment insurance and guaranty programs of the Agency for International Development and also establish a direct investment loan fund program. The Corporation is expected to become the U.S. Government's major tool for facilitating U.S. private investment in the developing countries, and is expected to engage in an active promotion effort to this end.

The Overseas Private Investment Corporation is a wholly owned Government corporation with a capital stock authorization of \$40 million. Capital stock of \$40 million is to be purchased by U.S. Treasury in 1970 and 1971, respectively, in the amount of \$20 million per year.

The corporation's net income is estimated to be \$15,800 thousand in 1971. This net income is after deduction of \$7,500 thousand for payments of claims. The OPIC will add the net profit of \$15,800 thousand to reserves for future contingencies.

Data on the Guaranty and insurance programs are as follows (in thousands of dollars):

Guaranties and insurance outstanding, beginning of year:	1969 actual	1970 estimate	1971 estimate
Guaranties issued, net.....			150,000
Insurance issued, net.....			7,700,000
Budget authority:			
Guaranties issued, 1971.....			120,000
Insurance issued, 1971.....			1,500,000
Repayments, claims, cancellations, and expirations (current year):			
Guaranties.....			(4,000)
Insurance.....			(600,000)
Guaranties and insurance outstanding at yearend:			
Guaranties.....	150,000		266,000
Insurance.....	7,700,000		8,600,000
Statutory authority beginning of year:			
Guaranties.....			900,000
Insurance.....			13,700,000
Guaranties and insurance outstanding, end of year:			
Guaranties.....			(266,000)
Insurance.....			(8,600,000)
Old authority canceled 1971: ¹			
Guaranties.....			
Insurance.....			(600,000)
Balance of authority available, end of year:			
Guaranties.....			634,000
Insurance.....			4,440,000

¹ As of the enactment of the Foreign Assistance Act of 1969, insurance authority was increased by \$7,500 thousand to a maximum contingent liability of \$13,700 thousand, with provisions that cancellations, repayments, and expirations under old authority could not be reissued, eventually reducing the overall authority until it again reaches the \$7,500 thousand level.

GENERAL PROVISIONS

Sec. 101. None of the funds herein appropriated (other than funds appropriated for use under chapter 4, part 1 of the Foreign Assistance Act of 1961, as amended), shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the United States of America as per memorandum of the President dated May 15, 1962.

Sec. 102. Obligations made from funds herein appropriated for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of \$25,000 shall be reported to the Senate and House of Representatives at least twice annually.

Sec. 103. Except for the appropriations entitled "Contingency fund", "Alliance for Progress, development loans", and "Development loans", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.

Sec. 104. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay, or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.

Sec. 105. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress, insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.

Sec. 106. It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds ap-

propriated under this title these principles shall be applied as the President may determine.

SEC. 107. (a) No assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry to Cuba, so long as it is governed by the Castro regime, in addition to those items contained on the list maintained by the Administrator pursuant to title I of the Mutual Defense Assistance Control Act of 1951, as amended, any arms, ammunition, implements of war, atomic energy materials, or any other articles, materials, or supplies of primary strategic significance used in the production of arms, ammunition, and implements of war or of strategic significance to the conduct of war, including petroleum products.

(b) No economic assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry items of economic assistance to Cuba, so long as it is governed by the Castro regime or to North Vietnam.

SEC. 108. Any expenditure made from funds provided in this title for procurement outside the United States of any commodity in bulk and in excess of \$100,000 shall be reported to the Senate and the House of Representatives at least twice annually: Provided, That each such report shall state the reasons for which the President determined, pursuant to criteria set forth in section 604(a) of the Foreign Assistance Act of 1961, as amended, that foreign procurement will not result in adverse effects upon the economy of the United States or the industrial mobilization base which outweigh the economic or other advantages to the United States of less costly procurement outside the United States.

SEC. 109. (a) No assistance shall be furnished to any nation whose government is based upon that theory of government known as communism, under the Foreign Assistance Act of 1961, as amended, for any arms, ammunition, implements of war, atomic energy materials, or any articles, materials, or supplies, such as petroleum, transportation materials of strategic value, and items of primary strategic significance used in the production of arms, ammunition, and implements of war, contained on the list maintained by the Administrator pursuant to title I of the Mutual Defense Assistance Control Act of 1951, as amended.

(b) No economic assistance shall be furnished to any nation whose government is based upon that theory of government known as communism, under the Foreign Assistance Act of 1961, as amended (except section 214(b)), unless the President determines that the withholding of such assistance would be contrary to the national interest and reports such determination to the House of Representatives and the Senate. Reports made pursuant to this subsection shall be published in the Federal Register within seven days of submission to the Congress and shall contain a statement by the President of the reasons for such determination.

SEC. 110. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used for making payments on any contract for procurement to which the United States is a party entered into after the date of enactment of this Act which does not contain a provision authorizing the termination of such contract for the convenience of the United States.

SEC. 111. None of the funds appropriated or made available by this or any predecessor Act for the years subsequent to fiscal year 1962 for carrying out the Foreign Assistance Act of 1961, as amended, may be used to make payments with respect to any contract for the performance of services outside the United States by United States citizens unless the President shall have promulgated regulations that provide for the investigation of such citizens for loyalty and security to the extent necessary to protect the security and other interests of the United States: Provided, That such regulations shall require that any such United States citizen who will have access, in connection with the performance of such services, to information or material classified for security reasons shall be subject to such investigation as may otherwise be provided by law and Executive order.

SEC. 112. None of the funds appropriated or made available under this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to make payments with respect to any capital project financed by loans or grants from the United States where the United States has not directly approved the terms of the contracts and the firms to provide engineering, procurement, and construction services on such projects.

SEC. 113. Of the funds appropriated or made available pursuant to this Act not more than \$10,000,000 may be used during the fiscal year ending June 30, 1971, in carrying out research under section 241 of the Foreign Assistance Act of 1961, as amended.

SEC. 114. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to pay in whole or in part any assessments, arrearages, or dues of any member of the United Nations.

SEC. 115. None of the funds made available by this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be obligated for financing, in whole or in part, the direct costs of any contract for the construction of facilities and installations in any underdeveloped country, unless the President shall have promulgated regulations designed to assure, to the maximum extent consistent with the national interest and the avoidance of excessive costs to the United States, that none of the funds made available by this Act and thereafter obligated shall be used to finance the direct costs under such contracts for construction work performed by persons other than qualified nationals of the recipient country or qualified citizens of the United States: Provided, however, That the President may waive the application of this amendment if it is important to the national interest.

SEC. 116. No assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country that sells, furnishes or permits any ships under its registry to carry to North Vietnam any of the items mentioned in subsection 107(a) of this Act.

SEC. 117. None of the funds appropriated or made available in this Act for carrying out the Foreign Assistance Act of 1961, as amended, shall be available for assistance to the United Arab Republic, unless the President determines that such availability is essential to the national interest of the United States.

SEC. 118. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to finance the procurement of iron and steel products for use in Vietnam containing any component acquired by the producer of the commodity, in the form in which imported into the country of production, from sources other than the United States or a country designated as a limited free world country by code number 901 in the July 1968 Geographic Code Book compiled by the Agency for International Development, and at a total cost (delivered to the point of production) that amounts to more than 10 per centum of the lowest price (excluding the cost of ocean transportation and marine insurance) at which the supplier makes the commodity available for export sale (whether or not financed by the Agency for International Development).

SEC. 119. (a) In order to restrain arms races and proliferation of sophisticated weapons, and to ensure that resources intended for economic development are not diverted to military purposes, the President shall take into account before furnishing development loans, Alliance loans, or supporting assistance to any country under this Act, and before making sales under the Agricultural Trade Development and Assistance Act of 1954, as amended:

(1) the percentage of the recipient or purchasing country's budget which is devoted to military purposes,

(2) the degree to which the recipient or purchasing country is using its foreign exchange resources to acquire military equipment; and

(3) the amount spent by the recipient or purchasing country for the purchase of sophisticated weapons systems, such as missile systems and jet aircraft for military purposes, from any country.

(b) The President shall report annually to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate his actions in carrying out this provision.

OFFICE OF ECONOMIC OPPORTUNITY

Federal Funds

General and special funds:

ECONOMIC OPPORTUNITY PROGRAM

For expenses necessary to carry out the provisions of the Economic Opportunity Act of 1964 (Public Law 88-452, approved August 20, 1964), as amended, \$2,080,200,000, plus reimbursements: Provided, That this appropriation shall be available for transfers to the economic opportunity loan fund for loans under title III, and amounts so transferred shall remain available until expended: Provided further, That this appropriation shall be available for the purchase and hire of passenger motor vehicles, and for construction, alteration, and repair of buildings and other facilities, as authorized by section 602 of the Economic Opportunity Act of 1964, and for purchase of real property

General and special funds—Continued

ECONOMIC OPPORTUNITY PROGRAM—Continued

for training centers: Provided further, That this appropriation shall not be available for contracts under titles I, II, V, VI, and VII extending for more than twenty-four months: Provided further, That no part of the funds appropriated in this paragraph shall be available for any grant until the Director has determined that the grantee is qualified to administer the funds and programs involved in the proposed grant: Provided further, That all grant agreements shall provide that the General Accounting Office shall have access to the records of the grantee which bear exclusively upon the Federal grant: Provided further, That those provisions of the Economic Opportunity Amendments of 1967 and 1969 that set mandatory funding levels shall not be effective during the fiscal year ending June 30, 1971.

¹ Includes 1969 Head Start \$5 million supplemental.

1. *Work and training programs.*—In 1970 and 1971 all work and training programs will be administered by the Department of Labor in conjunction with programs authorized by the Manpower Development and Training Act. They offer a wide range of manpower services to low-income persons, including work experience, counseling, remedial education, on-the-job training, and job placement. Individuals served through these programs are unemployed or underemployed and need special assistance in order to achieve their full occupational potential. Nearly 1 million persons will be enrolled in work and training programs in 1971 with the \$802 million of new budget authority requested.

The tables below show enrollment statistics attributable to Economic Opportunity Act funds for the various programs:

Mainstream.....	8,000	9,800	11,500	326,800
Total.....	278,500	277,900	315,200	326,800

¹ First time enrollment during the fiscal year.

² Economic Opportunity Act funds only.

³ These programs are part-year; thus average enrollment levels are considerably below new enrollee levels.

(a) *Job opportunities in the business sector (JOBS).*—Through the combined efforts of industry and Government, the JOBS program secures employment and on-the-job training for hardcore unemployed persons by reimbursing participating firms for expenses incurred in providing training and supportive services. Both Manpower Development and Training Act (MDTA) and Economic Opportunity Act (EOA) funds are provided for this program, which has expanded from 50 cities in 1969 to 131 cities in early 1970, with nationwide implementation by the end of 1970.

JOB OPPORTUNITIES IN THE BUSINESS SECTOR

	1968 actual	1969 actual	1970 estimate	1971 estimate
Manpower Development and Training Act (in millions).....	\$44.6	\$42.5	\$230.0	\$320.0
Economic Opportunity Act (in millions).....	\$60.1	\$111.3	\$70.0	\$55.0
Total, new enrollees.....	6,000	51,000	74,600	172,700
Total, average enrollment.....	2,000	13,500	43,000	98,700

(b) *Concentrated employment program (CEP).*—This program is designed to cope with the problems of impacted unemployment and underemployment in selected urban and rural areas. CEP provides a localized system for delivering a broad range of manpower services to disadvantaged individuals, with one sponsor providing

effective linkage and coordination between various local manpower efforts. Both MDTA and EOA budget authority are provided for this program.

CONCENTRATED EMPLOYMENT PROGRAM

	1968 actual	1969 actual	1970 estimate	1971 estimate
Manpower Development and Training Act (in millions).....	\$22.1	\$31.4	\$49.6	\$76.0
Economic Opportunity Act (in millions).....	\$73.0	\$83.0	\$149.4	\$123.0
Total, new enrollees.....	54,000	127,000	151,900	155,200
Total, average enrollment.....	12,000	44,500	69,500	68,000
Total number of CEP's, end-of-year.....	62	80	82	82

(c) *Public service careers (PSC).*—Beginning in 1970, this program provides special incentives to local, State, and Federal government agencies to stimulate the hiring of disadvantaged persons for existing public sector job opportunities. PSC incorporates the existing New Careers program. In 1971, MDTA funds will provide an additional 11,600 man-years for this program.

(d) *In-school and summer.*—These programs assist disadvantaged students of high school age to remain in school by providing school year and summer work experience. The summer program is operated with both MDTA and EOA funds.

IN-SCHOOL AND SUMMER

	1968 actual	1969 actual	1970 estimate	1971 estimate
In-school:				
Obligations.....	\$58.9	\$49.0	\$62.4	\$62.4
Enrollment opportunities.....	136,000	101,900	100,000	100,000
Total, summer (calendar year):				
Obligations.....	\$126.8	\$148.0	\$147.9	\$146.5
Enrollment opportunities ¹	324,100	368,100	368,000	364,400

¹ Calculated on the basis of full summer equivalents for opportunities funded from supplemental appropriations.

(e) *Out-of-school.*—Youthful high school dropouts from low-income families receive necessary remedial education, vocational training, and other services to prepare them for employment or to resume their formal education. The program has been redesigned to better accomplish these purposes.

(f) *Job Corps.*—Job Corps provides disadvantaged youth with vocational training, work experience, and other services in a residential setting. The especially intensive assistance provided through the Job Corps program is carried out in three distinct types of centers: Conservation Centers, Men's and Women's Regional Centers, and the new Community Residential Centers. The program is being redirected by the closing of less effective centers, its delegation to the Department of Labor, and the opening of 30 new community centers located in or near major cities.

JOB CORPS

	1968 actual	1969 actual	1970 estimate	1971 estimate
Enrollment at end-of-year.....	33,200	19,000	23,000	24,000
Centers at end-of-year:				
Community residential centers.....	-----	1	30	30
Men's and women's regional centers.....	24	16	16	16
Conservation centers.....	82	33	32	32
Experimental centers.....	2	1	-----	-----

(g) *Operation mainstream.*—This program is designed to provide work experience for chronically unemployed adults who have poor prospects for full-time employment. The program is directed primarily toward impoverished older citizens in rural areas.

(h) *Work experience.*—In 1969 this program was replaced by the Work Incentive Program authorized by the Social Security Act amendments of 1967.

General and special funds—Continued

ECONOMIC OPPORTUNITY PROGRAM—Continued

(i) *Foster grandparents.*—1970 legislation included this program as a part of the Older Americans Act administered by the Department of Health, Education, and Welfare.

(j) *Program support.*—This activity provides for staff salaries, contract evaluation, and associated expenses for all work and training programs except Job Corps, for which these expenses are included in the program request.

2. *Child development programs.*—(a) *Head Start.*—Operated under delegation agreement by the Office of Child Development in the Department of Health, Education, and Welfare, this program is a major element of the administration's emphasis on child development during the first 5 years of life. In 1970, it is estimated that local Head Start sponsors will continue to reduce summer programs in order to enroll more children in full-year and full-day programs. This is consistent with program evaluations which indicate longer and more noticeable results for full-year programs. Funding for experimental programs will reach \$15 million in 1971, permitting expansion of testing and evaluation of different program models and some locally developed experimentation. Reductions in the operating program will be offset by expanded experimentation in day care, which will reach about 15,000 children in 1971. Funds for day care are provided under Research and Pilot programs below.

(b) *Follow Through.*—This program, designed to develop more effective educational techniques for poor children in the early elementary years, will be increased by \$13 million in 1971. Most of the increase will allow children entering school for the first time to participate in previously implemented programs as existing Follow Through children are promoted through the third grade. Follow Through is delegated to the Office of Education of the Department of Health, Education, and Welfare.

CHILDREN SERVED

[In thousands]

	1969 actual	1970 estimate	1971 estimate
Head Start:			
Full-year.....	217.0	248.0	248.0
Experimental.....	---	6.5	10.5
Summer.....	447.0	258.0	178.0
Experimental day care.....	---	5.0	15.0
Follow Through.....	35.0	62.0	77.3

3. *Community development programs.*—Each of the activities discussed below is operated directly by the Office of Economic Opportunity: (a) *Community action operations.*—The Community Action Agency (CAA) structure at the community and neighborhood levels is funded under community action operations. This includes local staff to plan and administer programs as well as to facilitate innovation, participation of the poor, and coordination and mobilization of resources. Community action operations include local initiative program funds which can be tailored to solve each particular community's problems. These programs cover the range of needs of the poverty community from manpower, education and health to consumer action, co-ops, and youth programs. The 1971 allocation of \$324 million will maintain the program at the 1970 level. Turnover of local initiative funds will allow some program redirection to fund local developmental projects. CAA's which defund a component program, either because it is ineffective or because it can be funded by an outside resource, will be eligible

for funds for a new project. The cost of the new project would equal that of the defunded one plus an incentive increment.

Training and technical assistance provided for in the above program will be maintained at the 1970 program level. An increased amount of specialized technical assistance will be offered to local grantees by State Economic Opportunity Offices in 1971. Increases are also provided for staff and programs of State offices which demonstrate a high potential for performance in such areas as mobilizing resources and advocacy for the poor at the State level, advising the Office of Economic Opportunity and the Governors on poverty problems within States, and operating programs.

PROGRAM OBLIGATIONS

[Dollars in millions]

	1969 actual	1970 estimate	1971 estimate
Local initiative.....	326.1	325.9	324.0
Training and technical assistance.....	25.5	24.0	22.4
State economic opportunity offices.....	6.9	9.0	14.0
Senior opportunities.....	6.4	7.6	7.8
Program direction.....	15.2	13.3	12.9
Total.....	380.1	379.8	381.1

(b) *Health and nutrition.*—A number of additional comprehensive health services projects will be started to explore new ways of delivering comprehensive care to poor families. Included will be pilot projects to restructure hospital outpatient department services, new models for rural settings, and experimental health manpower development efforts. In addition, \$30 million has been added to the HEW budget to fund mature existing projects. This will free an equal amount of Economic Opportunity Act funds to support new experimental projects. Family planning services will be continued, with emphasis on finding more effective ways to provide this essential service. Activities concerned with prevention and treatment of narcotics addiction, alcoholism, and mental disorders will also be expanded. Emergency food and medical services projects initiated in 1970 will be expanded, assisting poor people to take advantage of food stamp and direct distribution programs and meeting emergency needs where necessary.

(c) *Legal services.*—This program will continue to offer legal aid to people unable to afford these services. In 1969, about 1,800 neighborhood legal services lawyers handled approximately 600,000 cases on behalf of the poor. This program provides three types of legal assistance: (1) Direct legal advice and representation in individual cases; (2) education concerning legal rights and responsibilities; and (3) improvement of the legal system to make it more responsive to the needs of the poor, achieved primarily through test litigation and proposing appropriate changes in statutes, regulations, and administrative practices.

(d) *Special impact.*—Authorized under title I-D of the Economic Opportunity Act, this is a multifaceted effort directed toward meeting the special economic needs of urban areas with highly concentrated poor populations, and of rural areas with histories of substantial out-migration to urban centers. During 1970 and 1971 there will be continued experimentation with the community development corporation concept initiated earlier, as well as testing of other ideas to stimulate a viable environment for economic development.

(e) *Research, pilot programs, and evaluation.*—This provides for research and demonstration projects, day care, and support, as follows (in millions of dollars):

	1969	1970	1971
Research, pilot programs, evaluation.....	35.3	68.6	90.0
Day care.....	-----	10.0	24.0
Support.....	1.5	2.9	4.1
Total estimated obligations.....	36.8	81.5	118.1

Research and pilot projects are designed to serve as the basis for planning national programs for alleviating poverty and promoting equality of opportunity. This includes identification of need, design of experimental projects, the conduct and evaluation of social experiments, the expansion of successful experimental efforts to pilot scale, and the development of mechanisms for moving these programs to full-scale operation either within the agency or to other organizations. A major effort will be devoted to the development of effective means of providing day care and to the development of models that will facilitate the rapid expansion of day care facilities.

The evaluation activities included in this component are of two types: those providing an overall assessment of the impact and effectiveness of antipoverty programs, with emphasis on the extent to which programs are successful in achieving basic objectives, and those aimed at assessing the relative effectiveness of different program strategies in carrying out a program.

(f) *Migrants.*—The 1971 program will reach an estimated 241,000 farmworkers and family members. Major program thrust is on job-oriented education, opportunity improvement and reemployment programs which will enable over 32,000 adult members of this universe to get higher skilled, permanent jobs at better pay rates. Special "in-stream" assistance programs for migrant families during peak harvest seasons will continue to provide emergency services through centers established along migrant routes. Approximately 178,000 family members will benefit from some form of "in-stream" aid in 1971.

(g) *VISTA.*—The Volunteers in Service to America program channels the skills and concern of individual Americans into constructive projects which directly help relieve poverty. Emphasis is placed on technically skilled and community volunteers. As of June 30, 1969, there were 5,692 volunteers in training or on field assignments. During 1970, VISTA will provide about 5,085 man-years of service to the poor; this represents a 12.4% increase over 1969. There will be an additional 4.5% increase in 1971, bringing the total number of man-years to 5,315. In addition to the regular volunteer program, 1,500 associate volunteers will serve for shorter periods of time during both 1970 and 1971.

	1969	1970	1971
Budget authority (in millions).....	\$32.8	\$37.0	\$39.0
Volunteer man-years.....	4,523	5,085	5,315

(h) *Other opportunity programs.*—The only activity to be financed under this heading in 1971 will be the administrative expenses for the Rural Economic Opportunity Loan program operated by the Farmers Home Administration of the Department of Agriculture. Operating expenses for this program are included in the schedules for the Economic Opportunity Loan Fund.

4. *General support.*—The Office of Economic Opportunity directly administers the community development programs described above. The Office also coordinates and reviews all Economic Opportunity programs delegated

to other agencies and assists in coordinating the programs of all Federal agencies in an integrated attack on poverty.

¹ Balances of selected resources are identified on the statement of financial condition.

Rural economic opportunity loan program.—The requested amount will permit new loan activity and program support to meet servicing requirements of an active borrower caseload estimated at 48,000. The \$14 million new loan-making level proposed is \$5 million less than 1970 levels. Total loans receivable under the individual and cooperative loan programs at the end of 1971 are estimated at \$86.5 million representing a decrease of \$2.2 million from 1970 loan volume.

PEACE CORPS

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to enable the President to carry out the provisions of the Peace Corps Act (75 Stat. 612), as amended, including purchase of not to exceed five passenger motor vehicles for use outside the United States, \$98,800,000, of which not to exceed \$31,400,000 shall be available for administrative expenses.

Note.—The regular appropriation for this account for 1970 had not been enacted at the time this budget was printed. A temporary continuing appropriation is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

The purposes of the Peace Corps are to provide trained Americans to interested countries in need of middle-level manpower and to promote understanding between the people of the United States and the peoples served.

Volunteers are working in five principal kinds of assignments at the request of host countries. Approximately 53% are engaged in teaching at all levels and 19% are serving in agricultural development. Additionally, about 12% are involved in rural and urban development, 10% in health programs, and 6% in public works and public administration projects.

Prior to overseas assignment, each volunteer is given intensive training designed to develop required skills, to provide a knowledge of the country to which he will be sent, to develop his language abilities, and to assure physical fitness for service overseas. During training, all prospective volunteers are carefully evaluated through continuous observation. To provide the most realistic training environment and experience, about 68% of all volunteers will receive some portion of their training in the host countries where they will serve.

Planning is based on a program year which runs from the beginning of September through the end of August.

1. *Volunteer and project costs.*—This activity includes all costs directly associated with volunteers. The 1971 budget supports a total strength of 10,000 volunteers in training and overseas by August 31, 1971. The planned assignment of these volunteers is as follows:

	Aug. 31, 1969 (actual)	Aug. 31, 1970 (planned)	Aug. 31, 1971 (planned)
Africa.....	2,865	2,540	2,460
East Asia and Pacific.....	2,447	2,365	2,255
Latin America.....	3,266	3,645	3,435
North Africa, Near East, and South Asia.....	2,080	1,950	1,850
Total.....	10,658	10,500	10,000

Country requests for Peace Corps volunteers are calling for more specialized projects which require higher skill levels. To meet these needs, the Peace Corps is providing more technical and skill-related training to its volunteers. The proposed 1971 strength of 10,000 is designed to meet this demand through programing criteria which assure the correlation of project aims, volunteer capabilities, and the purposes of the Peace Corps Act. The Planning, Programing and Budgeting System (PPBS) is being used to attain this end and for focusing programs more sharply on key problems in the developing countries.

Volunteers for African countries will continue to be in primary and secondary education. However, growing emphasis is being placed on agricultural and health programs.

Most of the volunteers in the East Asia and Pacific region will be engaged in teacher training, classroom teaching, health programs, and new activities in agricultural production.

In Latin America, community development activities are being supplemented by agricultural programs focusing on basic grain production. In addition, there will be a continued emphasis on education, particularly teacher training at the primary level.

The North Africa, Near East, and South Asia region has a wide variety of programs. The majority of volunteers in the region are working in agricultural and educational activities.

2. *Administrative expenses.*—This activity includes expenses related to recruitment, selection, and the management of the Peace Corps, both in Washington and overseas.

Under an amendment (Public Law 88-94) to the Philippine war damage legislation of 1963, a special fund (\$28.1 million) for education derived from the Philippine war damage claims fund has been established to be used as jointly determined by the two Presidents for the purpose of furthering educational programs to the mutual advantage of both countries. Projects totaling \$26.2 million have been approved to support various educational projects in the Republic of the Philippines. Additional educational projects are currently under consideration for the utilization of the balance of the funds in 1971.

It is proposed to amend title III of the Defense Production Act of 1950, as amended, to prohibit the financing of any new contracts under the provisions of section 304; to terminate interest payments on notes issued pursuant to that section; to provide for the orderly retirement of those notes; and to provide for the cancellation of any remaining borrowing authority under section 304. The effect of the legislation is reflected in the above schedule.

Proposed for separate transmittal, proposed legislation:

INTERNATIONAL FINANCIAL INSTITUTIONS

ASIAN DEVELOPMENT BANK

Program and Financing (in thousands of dollars)

Identification code 04-08-0076-2-1-152	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Investment in Asian Development Bank.		25,000	35,000
Financing:			
40 Budget authority (appropriation)		25,000	35,000
Relation of obligations to outlays:			
71 Obligations incurred, net		25,000	35,000
72 Obligated balance, start of year			19,000
74 Obligated balance, end of year		-19,000	-44,000
90 Outlays		6,000	10,000

A proposed 1970 supplemental appropriation of \$25 million is anticipated for the first installment of a U.S. contribution to the Consolidated Special Funds of the Asian Development Bank. A second installment of \$35 million is recommended for 1971. These appropriations will be sought pursuant to a proposed authorization for a U.S. contribution of \$100 million in three annual installments over the period 1970-72. The U.S. contribution would constitute a minority share of total contributions by all donors and would not be the largest single contribution. The amounts contributed by the United States would not be expended until needed by the Asian Development Bank to meet disbursement requirements.

Proposed for separate transmittal, proposed legislation:

PROVISION FOR EXPANDED MULTILATERAL ASSISTANCE

Program and Financing (in thousands of dollars)

Identification code 04-08-0082-2-1-152	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Provision for expanded multilateral assistance (cost—obligations) (object class 33.0)			540,000
Financing:			
40 Budget authority (appropriation)			540,000
Relation of obligations to outlays:			
71 Obligations incurred, net			540,000
74 Obligated balance, end of year			-500,000
90 Outlays			40,000

When internationally agreed proposals have been formulated, legislation will be recommended to Congress to authorize U.S. contributions for expanded economic assistance to be provided through the international financial institutions. This will enable the United States to maintain its fair share in the multilateral support of

programs undertaken by the developing nations to promote their own economic growth and social advancement. A number of matters are or will be under international discussion during the year. Negotiations are underway which are expected to lead to an increase by the United States and a number of other countries in their subscriptions to the World Bank's capital, in harmony with certain increases which the United States and others are expected to obtain in International Monetary Fund quotas. Consideration is also being given to ways in which the United States might join with Latin American nations through expanded multilateral programs in support of development initiatives.

Proposed for separate transmittal, proposed legislation:

OFFICE OF ECONOMIC OPPORTUNITY

ECONOMIC OPPORTUNITY PROGRAM

Program and Financing (in thousands of dollars)

74 Obligated balance, end of year			279,700
90 Outlays			-689,300

The President has proposed a new Manpower Training Act which brings together a number of separate program authorizations into one comprehensive manpower training program. The act assigns greater responsibility to State and local governments for planning and operating manpower programs to meet local needs and conditions. Obligations for programs now funded in the Office of Economic Opportunity, which will be consolidated in the Department of Labor under the act, total \$622 million in budget authority for 1971. In 1972 the Job Corps will also be transferred. The total program level for all Labor Department and OEO programs brought under the act is about \$1.6 billion.

TITLE V—GENERAL PROVISIONS

Sec. 501. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

Sec. 502. No part of any appropriation contained in this Act shall be used for expenses of the Inspector General, Foreign Assistance, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering foreign assistance legislation, appropriations, or expenditures, has delivered to the Office of the Inspector General, Foreign Assistance, a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report or other material

in the custody or control of the Inspector General, Foreign Assistance, relating to any review, inspection, or audit arranged for, directed, or conducted by him, unless and until there has been furnished to the General Accounting Office or to such committee or subcommittee, as the case may be, (A) the document, paper, communication, audit, review, finding, recommendation, report, or other material so requested or

(B) a certification by the President, personally, that he has forbidden the furnishing thereof pursuant to such request and his reason for so doing.

Sec. 503. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

MEMORANDUM

LOANS TO THE INTERNATIONAL MONETARY FUND

Program and Financing (in thousands of dollars)

	1969 actual	1970 est.	1971 est.
Financing:			
Unobligated balance available, start of year	-2,000,000	-2,000,000	-2,000,000
Unobligated balance available, end of year	2,000,000	2,000,000	2,000,000
New authority			

Public Law 87-490, approved June 19, 1962, authorized an appropriation to remain available until expended, of \$2 billion for U.S. participation in a 10-nation, \$6 billion arrangement providing, under specified conditions, for loans by the participants to the International Monetary Fund when needed to forestall or cope with an impairment of the international monetary system. The appropriation for these arrangements, known as the General Arrangements to Borrow (GAB), was obtained on October 24, 1962.

The GAB has been drawn on by the Fund on four occasions in the total amount of \$1,871 million. The United States has not yet participated in the loans made under the arrangements because the Fund's holdings of dollars have been adequate.

The Executive Directors of the International Monetary Fund renewed the GAB on October 17, 1969, for a period of 5 years, beginning October 24, 1970. Renewal of the arrangements must, in accordance with its terms, be decided upon by the Fund not later than 12 months prior to expiration. The U.S. commitment to lend up to \$2 billion to the Fund under the GAB will continue during the renewal period.

UNITED STATES QUOTA, INTERNATIONAL MONETARY FUND

Program and Financing (in thousands of dollars)

	1969 actual	1970 est.	1971 est.
Program by activities:			
Payment of quota increase (costs—obligations)			1,540,000
Financing:			
New authority (proposed legislation)			1,540,000
Relation of obligations to cash position:			
Obligations incurred, net			1,540,000
Obligated balance, start of year	1,785,250	2,725,000	2,725,000
Obligated balance, end of year	-2,725,000	-2,725,000	-3,880,000
Change in cash position	-939,750		385,000

The International Monetary Fund is currently engaged in its Fifth Quinquennial Review of Quotas. The Fund's Executive Board has proposed an adjustment of quotas which must be approved by vote of 85% of the weighted votes of the Board of Governors. Moreover, an increase in a member's quota becomes effective only when the member has notified the Fund that it consents to the increase and has paid the increase in full. The Board recommended as part of the quota adjustments that the U.S. quota be increased from \$5,160 million to \$6,700 million.

The Bretton Woods Act, as amended, requires congressional approval of any change in the U.S. quota. The last change in the U.S. quota was authorized by Public Law 89-31, approved June 2, 1965. Authorizing legislation and an appropriation for the recommended increase in the U.S. quota will be proposed. As a monetary transaction, the increase in the U.S. quota will not result in budget expenditures.

DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, marketing, nutrition and consumer use, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work: *Provided*, That appropriations hereunder shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$75,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed \$25,000, except for six buildings to be constructed or improved at a cost not to exceed \$55,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$7,500 or 7.5 per centum of the cost of the building, whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to a total of \$100,000 for facilities at Beltsville, Maryland: *Provided further*, That the limitations on construction contained in this Act shall not apply to a total of \$350,000 for construction of a post-mortem and incinerator facility for animal disease and parasite research:

Research: For research and demonstrations on the production and utilization of agricultural products; agricultural marketing and distribution, not otherwise provided for; home economics or nutrition and consumer use of agricultural and associated products; and related research and services; and for acquisition of land by donation, exchange, or purchase at a nominal cost not to exceed \$100; **[\$131,802,200]** *\$141,437,200*, and in addition not to exceed \$15,000,000 from funds available under section 32 of the Act of August 24, 1935, pursuant to Public Law 88-250 shall be transferred to and merged with this [appropriation, of which \$935,000 shall remain available until expended for plans, construction, and improvement of facilities without regard to limitations contained herein] *appropriation: Provided*, That the limitations contained herein shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): *Provided further*, That none of the funds appropriated in this Act shall be used to formulate a budget estimate for fiscal [1971] 1972 of more than \$15,000,000 for research to be financed by transfer from funds available under section 32 of the Act of August 24, 1935, and pursuant to Public Law 88-250;

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c), **[\$90,809,750]** *\$98,763,750*, of which \$1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects, plant diseases and animal diseases to the extent necessary to meet emergency conditions: *Provided*, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by any State of at least 40 per centum: *Provided further*, That [not to exceed \$1,500,000 shall remain available until expended for construction of facilities without regard to limitations contained herein: *Provided further*, That], in addition, in emergencies which threaten the livestock or poultry industries of the country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious

diseases of animals, or European fowl pest and similar diseases in poultry, and for expenses in accordance with the Act of February 28, 1947, as amended, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts;

Special fund: To provide for additional labor, subprofessional and junior scientific help to be employed under contracts and cooperative agreements to strengthen the work at research installations in the field, not more than \$2,000,000 of the amount appropriated under this head for the previous fiscal year may be used by the Administrator of the Agricultural Research Service in departmental research programs in the current fiscal year, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research". (5 U.S.C. 5901; 7 U.S.C. 135-135k, 145, 147a-148a, 148c-150jj, 151-164a, 165a-167, 281-283, 391, 394a-396, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-430, 433-434, 436-437, 450-450b, 450i, 612c, 1292, 1441 note, 1621-1628, 1651-1656, 1884, 1901, 1904-1905, 2131-2154, 2201-2202, 2208, 2220, 2225, 2228-2229, 2232-2233, 2239, 2250-2250a, 2258-2260, 2262-2263; 10 U.S.C. 2306; 15 U.S.C. 69c; 16 U.S.C. 581-581a, 581f, 590a-590b, 590f, 590k; 18 U.S.C. 1114; 19 U.S.C. 1306a, 1306c; 20 U.S.C. 191-194; 21 U.S.C. 94-94a, 101-105, 111-114c, 114d-2 to 114d-6, 114e-131, 134-134h, 151-158, 342(a), 346-346a, 611-614, 618, 621, 622, 676; 42 U.S.C. 1476(b)-1476(e), 1483, 1891-1893; 45 U.S.C. 71-74; 46 U.S.C. 466a-466b; 49 U.S.C. 1474(a), 1509(d); 46 Stat. 67; 78 Stat. 939-940; Department of Agriculture and Related Agencies Appropriation Act, 1970.)

Note.—Excludes \$49 thousand in 1971 for activities transferred to Salaries and expenses, Office of the Inspector General, Agriculture, 1969, \$49 thousand; 1970, \$49 thousand.

The Service conducts basic and applied research relating to the production, utilization and marketing of agricultural products, research on nutrition and consumer use, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantine, the control of diseases and pests of animals and plants, and related work.

1. *Research.*—(a) *Farm research.*—Improved breeding, feeding, and management practices, including management of animal wastes, are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases, parasites, and insect pests affecting them and to protect them from toxic chemical poisons and other hazards.

Investigations are conducted to improve varieties of food, feed, fiber, and other plants, and to develop new crops; to improve crop-production practices, including methods to control plant diseases and nematodes, and reduce cost of production; and to develop safe chemical, biological, and other methods for control of harmful pests affecting farm production.

Investigations are conducted to improve the management of natural resources, including investigations to improve soil and water management (including salinity and saline soils), irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soil types and water to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs.

Attention continues to be given to the production of agricultural products having industrial uses. Increased attention has been given to studies on protection of plants, animals, and natural resources from harmful effects of polluted soil, water, and air. Research also concerns the application of remote sensing techniques in meeting agricultural problems. The proportion of funds going into basic research is currently estimated at 45% of the total funds for farm research. The basic research is fundamental to and strengthens the other research efforts.

The increase requested for 1971 would provide for expanded research to improve quality, reproductive and feed efficiency of beef; improve methods for the control of mastitis in dairy cattle; improve methods for diagnosis and control of bluetongue of sheep and cattle; improve potato varieties and production practices to control the golden nematode; expand remote sensing research; and conduct pollution research concerned with animal waste management.

(b) *Utilization research and development.*—Chemical, physical, and biological research is conducted to develop increased industrial uses of farm products, and new and improved foods, feeds, and fabrics; and to develop improved methods for processing agricultural commodities.

The research aim is to expand the demand for farm products by developing new and improved products and economical processes tailored to the requirements of the domestic and foreign markets. The research conducted includes studies to protect food and feed products from harmful micro-organisms and naturally occurring toxins and studies of health-related problems of tobacco. Increased effort is being given to the processing of agricultural commodities to minimize waste formation and to utilize waste products to avoid pollution.

No change in appropriation is proposed for this activity in 1971.

(c) *Nutrition and consumer use research.*—Studies are made of human nutritional requirements, composition and nutritive value of foods, and consumer and food economics. The research aim is to determine nutrient requirements and how foods can supply these to best assure nutritional well-being of people throughout their lifespan; to provide up-to-date information about food consumption and nutrition of the population; and to develop improved procedures for household preparation, care, and preservation of foods which will preserve their nutritional, sanitary, and wholesome quality.

No change in appropriation is proposed for this activity in 1971.

(d) *Marketing research.*—Practical answers to reduce costs and maintain product quality in moving products from farm to consumer are sought through research. For farm products as they pass through marketing channels, efforts are made to develop safe methods to protect against insect attack, find objective methods to determine quality, reduce losses from waste and spoilage, and improve efficiency in physical handling. The work includes research at each stage of marketing, such as assembly points and storage facilities, and of transportation at terminal or central markets. Research is also concerned with mycotoxins in agricultural products in relation to off-farm handling, conditioning, and storage.

No change in appropriation is proposed for this activity in 1971.

(e) *Coordination of departmental and interdepartmental activities related to pests and their control.*—The 1971 estimates continue the availability of \$208 thousand for the use of the Secretary to meet emergency situations relating to the safe use of pesticides. The project provides for coordination with the Department of Health, Education, and Welfare, Department of the Interior, and other agencies of the Federal Government in development of measures to protect the public health, producers, and resources.

(f) *Construction of facilities.*—The 1971 estimates provide for a decrease of \$935 thousand to eliminate nonrecurring amounts which were provided for planning and construction of facilities in 1970.

(g) *Contingencies.*—Beginning in 1962, \$1 million is available to meet urgent research needs that develop unexpectedly during the year, when such needs cannot be met by redirection of resources from other projects.

2. *Plant and animal disease and pest control.*—(a) *Plant disease and pest control.*—Programs are designed to keep out of this country by inspection at ports of entry those harmful insects, plant diseases, nematodes, and other pests that cause great damage to agriculture in other countries. Working with the States, programs are conducted to eradicate or prevent spread of crop pests that become established in this country. Assistance is given to the States to suppress incipient and emergency outbreaks of crop pests when and where they occur. The 1971 estimates propose increases for control of the imported fire ant and plant quarantine inspection at ports-of-entry because of increased travel and shipping; and the elimination of four programs: European chafer, soybean cyst nematode, phony peach and peach mosaic, and sweetpotato weevil.

The level of activities for plant pest control is shown by the selected examples that follow:

Acres treated (thousands):	1969 actual	1970 estimate	1971 estimate
Boll weevil.....	617	750	1,250
Cereal leaf beetle.....	58	100	100
Grasshopper.....	626	1,000	1,000
Gypsy moth.....	54	100	150
Imported fire ant.....	11,122	12,000	18,000
Japanese beetle.....	13	13	13
Pink bollworm.....	3,929	4,000	4,000
Sterile flies released (millions): Mexican fruit fly.....	49	30	25
Sterile moths released (millions): Pink bollworm (adult moth).....	18	90	210

The level of activities for plant quarantine inspection at ports of entry is as follows:

Plant import inspection:	1969 actual	1970 estimate	1971 estimate
Airplanes (thousands).....	296	325	340
Vessels (thousands).....	62	63	64
Vehicles from Mexico (millions).....	38	40	42
Baggage, pieces, including mandado (millions).....	75	82	90
Mail, packages (millions).....	68	70	71
Interceptions (thousands):			
Unauthorized plant materials.....	619	---	---
Plant pests.....	41	---	---

(b) *Animal disease and pest control.*—Programs are conducted to keep communicable diseases of foreign origin from entering this country and to prevent the spread of disease through interstate shipments of livestock or distribution of impure or impotent veterinary biologics. Other programs are directed at the control and eradication of livestock diseases. The animal welfare program is concerned with the humane care and handling of certain laboratory animals. The increase requested for 1971 would be used for the control of hog cholera and to establish an anti-hog cholera serum reserve.

The level of activities for the major control programs on animal diseases and pests is as follows:

	1969 actual	1970 estimate	1971 estimate
Brucellosis:			
Certified free States, plus Virgin Islands.....	15	21	28
Modified certified States, plus Puerto Rico.....	29	27	20
Herds tested (thousands):			
Blood tests.....	307	275	250
Milk ring tests.....	1,394	1,250	1,100
Reactors found (thousands).....	130	---	---
Hog cholera:			
Hog cholera-free States.....	12	17	31
Suspicious outbreaks reported.....	5,397	---	---
Outbreaks confirmed.....	1,055	---	---
Tuberculosis:			
Modified accredited States, plus Puerto Rico and Virgin Islands.....	51	51	52
Cattle tested (thousands).....	4,501	4,500	5,000
Reactors found (thousands).....	2.6	---	---
Scabies:			
Sheep inspected (millions).....	10	10	10
Infected sheep:			
Psoroptic.....	647	---	---
Chorioptic.....	841	---	---
Cattle inspected (millions).....	29	27	27
Infected cattle:			
Psoroptic.....	1,554	---	---
Chorioptic.....	30,131	---	---
Sarcoptic.....	1,390	---	---
Screwworm:			
Sterile flies released (millions).....	7,287	7,800	7,500
Cases in United States outside of barrier.....	3,266	250	225
Cases in United States part of barrier.....	5,936	650	650
Cases in Mexico part of barrier.....	17,803	10,000	8,500
Salmonella: States with cooperative rendering plant programs, plus Puerto Rico.....	51	51	51
Ticks:			
Cattle inspected (millions).....	1	1	1
Outbreaks.....	47	---	---
Veterinary Biologics:			
Serials produced.....	13,068	13,100	13,100
Serials potency tested.....	3,754	1,600	1,700
Unsatisfactory for potency.....	104	---	---
Serials sterility tested.....	6,771	2,720	2,800
Unsatisfactory for sterility.....	93	---	---
Public stockyards inspection:			
Animals inspected (millions).....	42.4	41.8	41.0
Diseased animals found (thousands).....	403	---	---

The level of activities for animal inspections and quarantine is as follows:

Animal import inspection:	1969 actual	1970 estimate	1971 estimate
All animals (thousands).....	1,068	1,000	1,100
Import animal byproducts, pounds (millions).....	952	1,000	1,100
Vessels inspected—sea stores and garbage (thousands).....	39	46	50

(c) *Pesticides regulation.*—This activity is concerned with administration of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, and related provisions of the Federal Food, Drug, and Cosmetic Act. The increase requested for 1971 would be used to expand and strengthen enforcement and registration activities under the act.

The level of activities for pesticides regulation is as follows:

Enforcement:	1969 actual	1970 estimate	1971 estimate
Samples collected.....	6,758	7,200	9,200
Violative products.....	1,022	---	---
Shipments seized.....	57	---	---
Recall actions—violative products.....	42	60	100
Product registration:			
New.....	3,437	4,000	4,000
Amended.....	6,696	6,500	6,500
Cancelled.....	3,544	2,000	2,000
Total, end of period.....	45,014	47,000	49,000
Label reviews.....	28,017	30,000	30,000

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Registration workload depends on the activity of the industry in developing new products and new use claims (amended registrations) for currently registered products.

(d) *Construction of facilities.*—The 1971 estimates provide for a decrease of \$1,500 thousand to eliminate non-recurring amounts which were provided for planning and construction of facilities in 1970.

90 Outlays	7,053	7,810	7,577

¹ Includes capital outlay as follows: 1969, \$0; 1970, \$5 thousand; 1971, \$5 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$19,284 thousand (1969 adjustments, \$207 thousand); 1969, \$17,786 thousand; 1970, \$15,161 thousand; 1971, \$12,468 thousand.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, are used by the Department for market development research under subsection 104(b)(1) and for agricultural and forestry research under subsection 104(b)(3) of the Act. Work is carried on through agreements, in both basic and applied fields, by research institutions and organizations in foreign countries. In addition to developing scientific information of great importance to American agriculture, the research under this program contributes to the solution of agricultural production and related problems of the countries in which it operates. Accordingly, it represents an important component in achievement of U.S. foreign policy and technical assistance in the food and agricultural area. It serves to preserve and expand existing markets and develop new ones for agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, and fruit and vegetables. It also provides for research supplementary to domestic programs on farm, forest, marketing, utilization, agricultural economics, and human nutrition problems. Specialized projects provide for the translation and dissemination of foreign language scientific publications. No change in appropriation is proposed for 1971. The 1971 appropriation will be used to purchase those currencies determined to be excess to the normal requirements of the United States. Total estimated cost in U.S. dollars (charged to regular appropriations) for program direction and supervision of projects in 1971 is \$526 thousand.

¹ Includes capital outlay, \$1 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$6 thousand; 1969, \$0; 1970, \$0; 1971, \$0.

Funds were appropriated in 1961 and 1962 for construction of facilities for research at a number of locations. With the completion of the laboratory for research on biological control of insects at Columbia, Mo., in May 1967, all the principal facilities authorized by this appropriation have been provided. Obligations incurred in fiscal year 1968 were for the installation of laboratory equipment at the Soil and Water Research Laboratory at Ithaca, N.Y. At the end of fiscal year 1969, there was an outstanding claim of only \$300. Payment of this amount in 1970 will close out this account.

¹ Includes capital outlay as follows: 1969, \$7 thousand; 1970, \$6 thousand; 1971, \$12 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$8,116 thousand (1969 adjustments, -\$102 thousand); 1969, \$7,006 thousand; 1970, \$7,421 thousand; 1971, \$6,880 thousand.

The Service administers funds for payments and grants to State agricultural experiment stations and other eligible institutions for the support of research in agriculture, the rural home, the rural community, and forestry. This administration involves supervision of the funds, and close advisory relations with the State agricultural experiment stations, schools of forestry, and other institutions eligible to receive funds. The Service participates in planning and coordination of research programs among the States and between the States and the Department.

1. *Payments to agricultural experiment stations under the Hatch Act.*—Grants under the Hatch Act are allocated to agricultural experiment stations of the land-grant colleges in the 50 States and Puerto Rico for agricultural research including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural community.

The increase requested for 1971 will provide for pollution research, a major research effort in support of community resource development, and increased cost of research.

2. *Grants for cooperative forestry research.*—These grants are allocated to land-grant colleges or agricultural experiment stations in the 50 States and Puerto Rico and other State-supported colleges and universities offering graduate training in the sciences basic to forestry and having a forestry school. The act requires that the Federal funds paid to each institution be matched by funds from non-Federal sources for forestry research. In 1971, emphasis will be placed on timber production, forest pest, and increased cost of forestry research.

3. *Contracts and grants for scientific research.*—These funds are for the support of grants on specific research problems at nonprofit institutions of higher education or nonprofit organizations whose primary purpose is the conduct of such research. Funding is on a competitive basis. Every research proposal selected for funding must be evaluated and classified as outstanding and appropriate to the needs of the designated problem area.

The increase requested for 1971 will provide for food and nutrition research and community resource development work.

5. *Penalty mail.*—Funds to cover the cost of penalty mailings for State agricultural experiment station directors are provided under this appropriation.

6. *Federal administration.*—A coordinating and review staff is maintained to examine research projects and assist State institutions and Federal agencies.

The planned distribution of the funds requested for 1971 compared with 1970 is as follows (in thousands of dollars):

Payments to agricultural experiment stations under the Hatch Act:	1970	1971
Statutory formula.....	42,574	48,989
Regional research fund.....	11,183	13,411
Total research program.....	53,757	62,400
Set aside for Federal administration: (3% of increase).....	1,432	1,699
Total, Hatch Act.....	55,189	64,099
Grants for cooperative forestry research.....	3,785	4,412
Contracts and grants for scientific research.....	2,000	3,350
Grants for facilities.....	1,000	-----
Penalty mail.....	160	160
Federal administration (direct appropriation).....	514	514
Total.....	62,648	72,535

EXTENSION SERVICE

Federal Funds

General and special funds:

COOPERATIVE EXTENSION WORK, PAYMENTS AND EXPENSES

Payments to States and Puerto Rico: For payments for cooperative agricultural extension work under the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, and the Act of October 5, 1962 (7 U.S.C. 341-349), to be distributed under sections 3(b) and 3(c) of the Act, **[\$83,621,000] \$89,321,000**; payments for the nutrition education program for low-income areas under section 3(d) of the Act, **[\$28,560,000] \$48,560,000**; payments for rural development work under section 3(d) of the Act, **\$10,400,000**; payments and contracts for such work under section 204(b)-205 of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623-1624), **\$1,450,000**; and payments for extension work under section 109 of the District of Columbia Public Education Act, as amended by the Act of June 20, 1968 (7 U.S.C. 329), **[\$375,000] \$700,000**; in all, **[\$114,006,000] \$150,431,000**: *Provided*, That funds hereby appropriated pursuant to section 3(c) of the Act of June 26, 1953, shall not be paid to any State or Puerto Rico prior to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

Retirement and employees' compensation costs for extension agents: For cost of employer's share of Federal retirement and for reimbursement for benefits paid from the Employees' Compensation Fund for cooperative extension employees, **[\$10,240,000] \$13,515,000**.

Penalty mail: For costs of penalty mail for cooperative extension agents and State extension directors, **[\$3,400,000] \$3,617,000**.

Federal Extension Service: For administration of the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, and the Act of October 5, 1962 (7 U.S.C. 341-349), and extension aspects of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), and of the District of Columbia Public Education Act, as amended by the Act of June 20, 1968 (7 U.S.C. 329), and to coordinate and provide program leadership for the extension work of the Department and the several States and insular possessions, **[\$3,838,000] \$4,088,000**. (5 U.S.C. 8147; 39 U.S.C. 4156; Department of Agriculture and Related Agencies Appropriation Act, 1970.)

Total selected resources	353	-7	386	466	469

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, and related subjects. This educational work takes research results, technological advancements, and situation and program facts of the Department, the State agricultural colleges and experiment stations, and incorporates them into a national educational program for action. In its educational role, the Service interprets, disseminates, and encourages practical use of knowledge. It transmits information from researchers to the people.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the

basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of State and county extension workers who work with rural families, marketing concerns, and others by providing advice and assistance in the application of improved methods involved in production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is accomplished largely through 4-H clubs. Funds also provide for Federal program support. Extension agents are paid from Federal, State, and county sources. The increase of \$36,184 thousand in this item will be used (1) to expand the Nutrition Education program for the poor; (2) to expand extension services for State and multicounty rural development activities; (3) to strengthen extension services in the District of Columbia for nutrition education and family living; and (4) to provide for increased costs of program operations.

2. *Retirement and employees' compensation costs for extension agents.*—The increase of \$3,275 thousand is composed of an increase of \$3,285 thousand required to meet retirement costs for cooperative extension agents offset by a reduction of \$10 thousand in payments to the Bureau of Employees' Compensation Fund. The mandatory retirement contribution is authorized under Public Law 854, approved July 31, 1956. The employer's contribution to the Federal retirement fund, to match contribution of these agents, is provided by this Federal appropriation.

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation. The increase of \$217 thousand proposed is required to meet these costs.

4. *Federal Extension Service.*—The Service provides leadership, counsel, and assistance to the States and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, inservice training for extension personnel, and administrative services. The Service also coordinates the educational activities of other agencies of the Department. The increase provides \$228 thousand for evaluation and pilot studies related to the nutrition and rural development programs and \$13 thousand in support of a cooperative agreement needed in carrying out the extension program in the District of Columbia.

The Service conducts research, directly advises cooperative leaders and others, promotes cooperative organization and development through other Federal and State agencies, and publishes reports, "News for Farmer Cooperatives," and other educational material. This work is aimed at (1) helping farmers get better prices for their products and reduce operating expenses, (2) helping rural and small-town residents use cooperatives to develop rural resources, (3) helping these cooperatives expand their services and operate more efficiently, and (4) helping all Americans understand the work of these cooperatives. The Service also administers the Agricultural Fair Practices Act of 1967.

In 1971, the Service will assist cooperatives in developing farmer integrated forward marketing and help expand the benefits of cooperative marketing and purchasing to all income groups.

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities of the Department, including seven action programs for which separate appropriations are made, reimbursements from other agencies for technical services performed, trust funds and miscellaneous accounts involving cooperative agreements with local organizations.

The main purposes of these program operations are to help farmers, ranchers, and other landowners in making needed land use adjustments; to conserve soil, water, and plant resources; to reduce the hazards of floods, sedimentation, and related damages; and to assist in establishing a permanent and economically sound agriculture. Such soil and water conservation treatments also provide for recreational uses of rural lands and the beautification of rural communities. These activities are conducted in cooperation with Federal and State agencies, locally managed conservation districts, and other sponsoring organizations.

The Service provides professional leadership in soil, water, and plant conservation and works directly with locally managed conservation districts and sponsors of watershed projects. Local programs and cooperative work plans are designed for the benefit of rural and urban people in their areas.

The Service also furnishes technical services for the Agricultural Conservation program; the soil and water conservation loans made by the Farmers Home Administration; the State and county committees on rural development; and other agencies or local groups having soil and water conservation problems. These interrelated program activities are primarily for the conservation, protection, and improvement of land and water resources for the beneficial uses of all people.

Federal Funds

General and special funds:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation [nurseries] plant materials centers; classification and mapping of soil; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft, [\$118,786,000] \$128,435,000: *Provided*, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for one building to be constructed at a cost not to exceed \$25,000 and eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building:

Provided further, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a-590f) in demonstration projects: *Provided further*, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$5,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. (7 U.S.C. 1387, 1807, 2201-2202, 2250; 16 U.S.C. 590q-1; Department of Agriculture and Related Agencies Appropriation Act, 1970.)

CONSERVATION OPERATIONS—Continued

Assistance to conservation districts, community groups, and other cooperators consists mainly of the following:

(a) Standard soil surveys and investigations, with interpretations and publications, that provide physical land facts needed for program development, farm and ranch conservation planning, installation of planned practices, and for use by other Federal, State, and local agencies;

MAIN WORKLOAD FACTORS

	1969 actual	Total as of June 30, 1969 ¹	1970 estimate	1971 estimate
Soil surveys (1,000 acres).....	45,071	751,590	45,000	49,200

Reconnaissance surveys (1,000 acres)....	3,769	24,755	3,000	2,000
Reports published (number).....	42	---	48	60

¹ Cumulative acres mapped in districts exclude about 234 million acres of limited purpose surveys.

(b) Technical assistance to cooperating farmers and ranchers in planning conservation programs and installation of needed conservation treatments;

(c) Technical programming, design, layout, installation services, and consultation on practices and measures provided for in farm and ranch conservation plans;

MAIN WORKLOAD FACTORS

Total number	1969 actual	1970 estimate	1971 estimate
Conservation districts.....	3,017	3,032	3,040
District cooperators (cumulative).....	2,193,102	2,227,000	2,261,000
Conservation plans (cumulative).....	1,721,228	1,752,200	1,783,200
District cooperators assisted.....	1,074,244	1,085,000	1,100,000
Community-type group job plans.....	3,352	3,360	3,400
Conservation plans.....	72,472	72,000	72,000
Revision of conservation plans.....	33,894	34,000	35,000
Acres planned (each year).....	50,311,841	51,000,000	52,000,000

(d) Technical and other assistance with community-type jobs, mine-spoil restoration, control of pollutants and other special problems that can be best solved through coordinated local action;

(e) Granting of special equipment to soil conservation districts for use in applying conservation practices;

(f) Snow surveys in Western States which provide water supply forecasts that are useful for efficient seasonal use of water;

(g) Selection and testing of plant materials to determine their suitability for erosion control and conservation purposes;

(h) Technical assistance to participants in the agricultural conservation program in establishing specified permanent-type practices;

(i) Technical services to participants in other programs which involve land use adjustments;

(j) Technical assistance in planning and application of soil and water conservation practices for which loans are made by the Farmers Home Administration; and

(k) Consultative assistance to State committees on rural development.

Needed soil and water conservation practices are planned in combinations which will assure well balanced conservation programs in each district and for each farm or ranch. Both vegetative and structural measures

are used according to the needs for land protection and treatment and resource improvement in a particular area. Each plan reflects the decisions of the cooperating landowner or operator as to how he will use and treat his land.

Technicians of the Service explain the various soil conditions, develop alternative uses and treatments with each cooperator, help to evaluate the costs and returns of conservation farming, and furnish assistance in applying the needed treatments.

Cooperating landowners and operators provide more than half the cost of practices and measures installed in district programs. Local agencies and private individuals also furnish about one-third of the total installation services used to help cooperators apply soil and water conservation practices in districts throughout the country.

River basin program development and coordination.—Section 6 of Public Law 566, 83d Congress, as amended, authorizes the Department to cooperate with other Federal, State, and local agencies in making surveys and investigations of the watersheds of rivers and other waterways. Such surveys form the basis for the planning of coordinated water and related land resource development programs. The Department currently is participating in cooperative surveys and investigations in river basins with the Corps of Engineers and other interested Federal and State agencies. In connection with this work, the Department is represented on the Water Resources Council which was established to coordinate water and related land resource activities of Federal departments and agencies. The Department also maintains representation on four river basin commissions and four river basin interagency committees. These groups serve as points of contact and coordination between representatives of this Department and of other Federal departments and agencies and the States in these basin areas. They keep all concerned mutually informed of the activities of the member agencies and facilitate matters of interagency coordination. During fiscal year 1970 the Department maintained such representation on river basin commissions and interagency committees in the Arkansas-White-Red, Missouri, Pacific Southwest and Southeast river basin areas. The Department also is represented on the Water Resources Council which was formed in accordance with section 101, Public Law 89-80, the Water Resources Planning Act.

The Senate Select Committee on National Water Resources has proposed the goal of surveying all of the Nation's river basins and making determinations of our future water and related land resources needs.

This Department and other member departments of the Water Resources Council have jointly considered needs for river basin surveys and investigations necessary to attain the goal.

Based on this joint consideration, current needs are \$2,040 thousand to continue interagency comprehensive surveys now in progress during fiscal year 1971 and to start one new survey; \$5,354 thousand to continue other Federal-State cooperative river basin surveys now in progress and to start eight new surveys; \$200 thousand for interregional economic analyses; \$160 thousand for flood hazard analyses; and \$1,289 thousand for interagency coordination and program formulation.

The following tabulation shows the number of surveys and actual or estimated obligations by type of survey in fiscal years 1969, 1970, and 1971.

Small watershed project investigations and planning.—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in cooperation with local sponsors. These plans outline the soil and water management problems in the watershed; the steps that have been, or are authorized to be, taken to alleviate these problems; the proposed works of improvement to be installed; the estimated benefits and costs; cost-sharing and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development.

The Department cooperates with the States and other agencies in installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the costs of certain works of improvement.

MAIN WORKLOAD FACTORS

Status of projects approved for operations:	1969 actual	1970 estimate	1971 estimate
Approved, current fiscal year	103	33	50
Approved, cumulative at June 30	937	970	1,020
Completed, current fiscal year	33	60	65
Completed, cumulative at June 30	238	298	363
Work in progress at June 30	699	672	657

1. *Watershed works of improvement.*—The Department provides technical and financial assistance to local organizations to install watershed works of improvement for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife development features specified in the work plans.

(a) *Pilot demonstration watersheds.*—Sixty-two pilot watersheds were started in 1954 in cooperation with local sponsors under authority of the act of April 27, 1935 (16 U.S.C. 590a-f), to demonstrate and evaluate the effectiveness of works of improvement installed in small watersheds for watershed protection and flood prevention. As of June 30, 1969, work had been discontinued in eight projects and completed as planned in 54, except for three structures now under contract.

Also, project evaluation studies will be underway through 1970 in some project areas. Obligations for such studies amounted to \$63 thousand in 1969 and are estimated at \$110 thousand for 1970.

The following table shows the current status of pilot watershed projects:

Explanation	1969 actual		1970 estimate	
	Number	Amount	Number	Amount
1. Uncompleted projects at beginning of year and estimated completion cost	2	\$46	---	-----
2. Status of projects and amounts obligated:				
(a) Projects completed during the year	2	46	---	-----
(b) Projects continuing construction and land treatment	---	-----	---	-----
Total	2	46	---	-----
3. Uncompleted projects at end of year:				
(a) Obligations to date	---	-----	---	-----
(b) Estimated completion cost	---	-----	---	-----
4. Projects completed (cumulative) and total cost	54	43,260	54	\$43,260

5. Projects discontinued (cumulative) and total cost.....	8	330	8	330
6. Total projects approved and estimated total cost.....	62	43,590	62	43,590
7. Total obligations (cumulative) ¹		43,590	--	43,590

¹ Includes \$1,264,860 for project evaluation studies charged to project costs prior to the fiscal year 1960.

(b) *Public Law 566 watersheds.*—After local sponsoring organizations have developed watershed work plans, either with the Department's assistance or with State and local resources, and the projects have been approved as suitable for Federal participation, technical services and financial assistance are provided for specified works of improvement.¹ On non-Federal lands local sponsoring organizations may contract for construction work or request the SCS to do the contracting for them. The local sponsors operate and maintain the projects. In the case of multiple-purpose structures, they also bear a share of construction costs.

Local organizations must acquire water rights and furnish land, easements, and rights-of-way for all structural measures. However, the Federal Government may pay up to one-half the cost of land, easements, and rights-of-way allocated to public fish and wildlife and recreational developments. Federal agencies do this work on Federal lands which they administer. Appropriate contributions are made by local people who receive benefits.

Preconstruction land treatment and engineering services are furnished to all approved projects before they are advanced to the construction stage. During the preconstruction stage, surveys and investigations are made and detailed designs, specifications, and engineering cost estimates are prepared for construction of structural works; areas are delineated where easements are required; and technical services are furnished for accelerating the planning and application of land treatment measures if provided for in the watershed work plan.

The project construction stage begins either with the execution of the first project agreement for construction of works of improvement, or with the signing of a construction contract (in projects for which the Federal Government does the contracting). Under a project agreement, the local sponsoring organization agrees to construct a segment of the project. This may consist of an individual or an interrelated group of structures. The agreement (or contract, where Federal contracting is involved) obligates the Department to furnish its share of the construction cost. Engineering and other services are provided for the preparation of contracts and inspection of construction.

When the local sponsoring organization does the contracting, payments are made to it in accordance with the project agreement as the work progresses. When a local organization requests the Service to do the contracting for works of improvement, the Service makes payments directly to the contractor as work progresses. This includes both the amounts financed from Federal funds and contributions received from local organizations for their share of construction cost. Technical assistance in planning and installing land treatment measures is continued as specified in the watershed work plan.

The following table shows the status of Public Law 566 projects and amounts obligated or estimated to be obligated. The table does not reflect minor obligations for project evaluation studies (\$253 thousand cumulatively as of June 30, 1969), for balances remaining in the undistributed equipment account (\$498 thousand cumulatively as of June 30, 1969), or for advances for future water supplies (\$450 thousand cumulatively as of June 30, 1969).

The table shows, on a national basis, the status of projects by category of assistance provided, funds obligated in fiscal year 1969 and funds programed for obligations in fiscal years 1970 and 1971, on the basis of available funds.

5. Total projects approved (cumulative) and total cost.....	937	1,162,515	970	1,228,567	1,020	1,302,567
6. Total obligations (cumulative).....	---	511,378	---	577,667	---	651,595

2. *Loans and related expense.*—Loans are made to local sponsoring organizations to finance the local share of the costs of installing works of improvement in approved watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements become available. Loans are made from the direct loan account of the Farmers Home Administration; \$5 million is available for fiscal year 1970 and \$4 million is recommend-

ed for 1971. Loan services related to processing and making loans will be financed from this appropriation.

FLOOD PREVENTION

For necessary expenses, in accordance with the Flood Control Act, approved June 22, 1936 (33 U.S.C. 701-709, 16 U.S.C. 1006a), as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including funds for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$100,000 for employment under 5 U.S.C. 3109, to remain available until expended; **[\$20,223,000]** \$21,037,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided, That \$400,000 of funds in the direct loan account of the Farmers Home Administration shall be available until expended for loans. (7 U.S.C. 2201-2202; Department of Agriculture and Related Agencies Appropriation Act, 1970.)*

For an additional amount for "Flood prevention", for emergency measures for runoff retardation and soil erosion prevention, as provided by section 216 of the Flood Control Act of 1950 (33 U.S.C. 701 b-1), \$3,700,000, to remain available until expended.

1. *Works of improvement.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention and for furthering the conservation, development, utilization, and disposal of water in the 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares in the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development facilities.

The Department furnishes additional technical and in certain instances financial assistance to landowners to accelerate planning and installation of land treatment measures for runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land, easements and rights-of-way, water rights, and the entire cost of works of improvement for nonagricultural water management measures, except those for fish and wildlife development and recreation, and operate and maintain all completed works of improvement.

Within the 11 watersheds authorized for flood prevention work by the Flood Control Act of 1944, 402 subwatershed areas have been identified in which installation of flood prevention works of improvement is feasible. Installation progress in these subwatersheds is shown in the following table:

Subwatershed status:	End of fiscal year		
	1969	1970	1971
In construction.....	126	126	126
Completed.....	132	142	152
Not started.....	144	134	124

2. *Loans and related expense.*—Loans are made to local organizations to help finance their share of the costs of planned works of improvement. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. In 1970 and 1971 loans will be made from funds available for this purpose from the direct loan account of the Farmers Home Administration. Loan services related to processing and making loans will be financed from funds available in this appropriation.

This program is a voluntary program which supplements other conservation programs of the Department in 424 designated counties of 10 Great Plains States. It provides cost-sharing assistance and technical services to participating farmers and ranchers in the development and installation of long-term conservation plans for their land. Cost-sharing contracts with individual landowners extend over periods of 3 to 10 years.

Plans for conservation operations are developed for each participating farm or ranch in the eligible area. These plans serve as a basis for cost-sharing contracted practices. The primary purpose of this program is to achieve needed land use adjustments, conservation treatments, and economic stability of each operating unit. Planned work is installed under contract within specific time schedules.

The need for technical help to farmers and ranchers will increase over a period of years as more participants enter the program. This increasing workload has two parts: (a) assistance to new participants in preparing long-term contracts; and (b) installation services in accord with the terms and period of time specified in each contract.

MAIN WORKLOAD FACTORS

Program participants:	1969 actual	1970 estimate	1971 estimate
New contracts during year	3,484	2,750	2,720
Active contracts end of year (net of terminations)	18,925	18,375	17,680

As of June 30, 1969, there was a backlog of 5,342 un-serviced applications on hand. A total of 18,925 farmers and ranchers were cooperating in this cost-share program. Cooperating landowners finance the entire cost of installing recurring management-type practices and pay a specified part of the cost-shared practices installed on their land.

Program regulations provide that cost-share rates offered in any contract shall not exceed 80% of the average cost of installing each eligible practice within the designated county. The rate of cost-sharing varies among practices and among States due to differences in average costs for installation. There is also a total dollar limit of \$25 thousand per contract. Federal cost-sharing

has a dollar limit of \$2,500 for the construction, enlarging, or deepening of any dam, pit, or pond for irrigation water. Also, there is a limit of not more than \$2,500 or one-fourth of the total Federal obligation, whichever is larger, for irrigation practices in any one contract.

Each participant who signs a Great Plains program contract is responsible for installing his plan of operations. The Department is committed to furnishing the necessary technical help for design, layout, and other similar services. Cooperating farmers and ranchers are encouraged to make use of other available assistance under local, State and Federal programs as a means of further improving their land and water resources.

Undisbursed loans.....	1,068	458	-----	-----
Total selected resources.....	2,938	1,298	1,350	3,794

The Department cooperates with other Federal agencies, States, local units of government, groups and individuals in developing and carrying out programs and plans for resource conservation and development. It shares in the cost of installing planned project measures, when justified as a public need. Loans are provided to qualified local sponsoring organizations when needed to help them finance their share of the cost of certain project measures which are in the public interest. Project measures planned will contribute to improvement in the economy of the area and to needed land use adjustments.

In each project area approved for planning, technical assistance is provided to help sponsoring organizations prepare overall plans for resource conservation and development. Project plans are expected to be finished and operations begun in 60 areas by June 30, 1970. The eight project plans started in 1970 and completed in 1971 will bring the number of plans authorized for operations by June 30, 1971 to 68.

Each project authorized for operations is provided technical assistance to help cooperating groups and individuals plan and install land treatment measures; to design and supervise installation of community-type project measures; and to assist in the preparation of plans for resource development and economic improvement within project areas.

The main workload factors in 1971 include:

- (a) Assistance to local sponsors in developing suitable plans.
- (b) Operations in 68 project areas for which plans will have been completed.
- (c) Acceleration of project measures installation expected to be made possible by additional State and local funds.

Field work under this program consists primarily of planning, designing, and supervision of installation of project measures and conservation practices. The purpose of such measures and practices is to develop or improve the economic use of natural resources. This includes outdoor recreation facilities and income-producing enterprises. Such projects are based on and must be in accord with need and proper land use. Investigations, surveys and planning are prerequisite to the operating phase of this program. Financial contributions, loans, and other Federal assistance are used to help plan and install project measures as specified in project plans.

Loans are made to qualified local organizations to help finance their share of the costs of installing project measures. Funds will be available for loans from the Direct loan account of the Farmers Home Administration.

Agricultural economics research in the Department is administered by the Service. The results of the research program are relied upon by (a) producers, dealers, importers and exporters as aids in planning the most profitable adjustments in their operations, (b) Government agencies in formulating and administering agricultural programs, and (c) Congress in considering agricultural legislation.

1. *Farm economics.*—Research is conducted to measure, appraise, and analyze on a continuing basis, economic changes that occur in farming and in the use of human and natural rural resources and to indicate needed adjustments.

Research on the economics of farm production includes the economics of organization and management of farms; adjustments of production to prospective demands and changing technologies; appraisals of costs and returns on farms representative of important types, sizes, and locations, and the appraisal of costs of producing important commodities; development of measures of farm output and productivity; problems of farm size and capital requirements; financing of farm enterprises; and appraisal of alternative agricultural production policies and programs.

Natural resources economics is concerned with the economics of use, conservation, development, management, and control of natural resources and their relationship to economic activity. It includes economic analysis of land and water resources, resource institutions, and the economic and social conditions affecting use of resources. The increase proposed in fiscal year 1971 will be used to adapt and test remote sensing techniques for use in making resource inventories.

Economic development is focused upon the well-being and opportunities of rural people. It includes a broad research program on economic development of rural areas, opportunities and employment of rural people and factors affecting them, including local governments and other organizations. Special attention is given to the poor, who are found in heavy concentrations among rural people. The increase requested in fiscal year 1971 will permit development of a responsive research and data base for community development planning and action.

2. *Marketing economics.*—This activity covers economic aspects of marketing farm products, including the nature

of farmers' bargaining power; potentials for new products and new uses; market structure, performance costs and margins; the economic effects of school feeding, food stamp, and direct food distribution programs.

No change in appropriation is proposed for this activity in fiscal year 1971.

3. *Domestic and foreign economic analysis.*—Domestic economic analysis is concerned with identifying, measuring, and analyzing: (1) the factors affecting demand, supply, and price of agricultural commodities; (2) relationships between agriculture and the national economy; (3) farm income and the income of the farm population; (4) demand for and consumption of farm products; (5) long-term projections of economic growth and demand for farm products; and (6) historical developments in the policies, programs, and organization of the Department. The increase requested in fiscal year 1971 will be used to develop better measures of farm income and improve techniques of forecasting farm prices and income.

Foreign economic analysis includes trade studies and investigation of supply-demand relationships. The trade and market studies focus on the problems of developing foreign markets and the effect of these developments on U.S. agricultural production. Research is carried on for more than 100 countries around the world, focusing on the forces affecting supply, demand, and trade in farm products, and their impact on U.S. agricultural exports. The request for additional funds in fiscal year 1971 is based on the need for more accurate and timely information on the impact of world agricultural development and adjustment on U.S. foreign trade. This need stems from increasing world competition for agricultural export markets.

The Service administers the Department's programs of crop and livestock estimates and statistical research and service. Statistical and economic data developed by the Service on food and agriculture are essential to farmers, processors, and handlers in making production and marketing decisions. It also helps legislators, administrators, and others concerned with developing and administering agricultural programs. Further, data provided by the Service is basic to economic research and analysis and other agricultural research programs.

1. *Crop and livestock estimates.*—The Service provides the official national estimates of acreage, yield, and production of crops; stocks and value of farm commodities; and numbers and inventory value of livestock items. Data on approximately 150 crop and livestock products are covered in some 650 reports issued each year. Data collected and published on prices paid and received by farmers are basic to computation of parity prices.

The work of the Service is conducted through 44 State offices serving 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide much additional State and county data; Federal funds are not available for collection and publication of this data. During 1969, cooperating States expended an estimated \$2.9 million of their own funds on such associated State programs.

A comparison of activities in 1968 and 1969, including work performed under cooperative arrangements, follows:

	1968 actual	1969 preliminary
Separate mailings of inquiry forms, average per field office.....	428	421
Total questionnaires handled:		
Number distributed.....	8,980,000	8,814,000
Number of returns tabulated.....	2,700,000	2,295,000
Number of objective survey contacts (measurements and interviews).....	240,000	208,000
Number of official reports issued, all offices.....	10,500	10,500
Copies of reports distributed.....	16,290,000	16,273,000
Copies of publications distributed.....	3,470,000	2,466,000
Special requests for information answered by field offices.....	74,100	75,700

The increase for 1971 provides for expanding the multi-frame livestock sampling program to 16 important States, probability surveys to make quarterly estimates of farm stocks of grain in 12 North Central States, and preparatory work on proposed farm expenditure surveys.

2. *Statistical research and service.*—This work includes review of all statistical forms, survey plans, and reporting and recordkeeping requirements originating in the Department which require Bureau of the Budget approval; liaison within the Department and with other agencies for

coordination of statistics; research on and development of sampling, forecasting, and other basic statistical techniques and methods to improve the crop and livestock estimates of the Department; provision of technical consulting services on new or improved statistical techniques to other agencies of the Department; use of and consultation on automatic data processing, to develop and adapt this technology to the improvement of the accuracy and timeliness of crop and livestock estimates; and conduct of special surveys relating to the marketing of agricultural products. A comparison of activity in 1968 and 1969 is as follows:

	1968 actual	1969 actual
Statistical forms-reports (Federal Reports Act): Departmental clearance and review for submission to Bureau of the Budget.....	475	543
Improvement of crop and livestock estimating methods:		
Number of research projects.....	7	11
Special surveys: Number of research projects.....	10	6

The increase for 1971 will provide additional research to improve crop and livestock estimates of the Department, including research on remote sensing.

⁴ Receipts from appeal inspections on grain (21 U.S.C. 468; 7 U.S.C. 78).

These activities provide consumer protection through inspection of meat and poultry products for wholesomeness. They assist producers and handlers of agricultural commodities through various marketing and regulatory services. These services continue to expand and become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the market structure undergoes dramatic changes. These marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of inter-regional competition, vertical integration, and contract farming. The individual activities include:

1. *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 140

cities and towns, often with local and other support and cooperation, generally from State departments of agriculture. Dissemination is made primarily by radio, television, and mimeographed reports. The volume of work performed is indicated by examples given in the following table:

MARKET NEWS SERVICE

States covered by cooperative agreement.....	1967 actual	1968 actual	1969 actual
.....	42	43	43
Field offices:			
Year-round.....	177	179	176
Seasonal.....	39	42	43
Buyers and sellers interviewed.....	20,597	17,997	18,309
Mimeographed releases to growers, shippers, and others.....	21,492,489	21,176,021	21,147,160
Names on mailing list.....	193,893	205,483	207,479

2. *Inspection, grading, classing, and standardization.*—
(a) *Meat inspection.*—Federal meat inspection is required for all meat and meat products moving in interstate and foreign commerce to assure a clean and wholesome meat supply for human consumption, free from adulteration and truthfully labeled. The work includes inspection of animals, carcasses, meat, and meat-food products at various stages of handling and processing. Measures are enforced to assure informative labeling, and that meats imported or exported are inspected. The Federal program also provides financial and technical assistance to States for improving the quality of their inspection programs.

The estimates for 1971 include increases to provide for inspection of additional plants and expanded facilities in presently inspected plants, Federal inspection of intrastate plants as provided by the Wholesome Meat Act of 1967, and financial assistance to States.

The volume of inspections and examinations is indicated by examples given in the following table:

MEAT INSPECTION

	1968 actual	1969 actual	1970 estimate	1971 estimate
Number of establishments covered.....	2,860	3,178	3,554	5,614
Post mortem inspection (thousands).....	115,912	121,640	127,721	134,107
Animals and carcasses condemned (thousands).....	272	290	310	334
Inspection of processed meat and meat-food products (million pounds).....	44,520	45,115	49,536	54,391

(b) *Poultry inspection.*—Inspection of poultry meat and poultry meat products for wholesomeness is provided pursuant to the Poultry Products Inspection Act of 1957, as amended. All poultry processed in plants shipping in interstate or foreign commerce is required to be inspected both before and after slaughter. Birds found to be unfit for human consumption are condemned and removed from channels of trade. The Federal program also provides financial and technical assistance to States for improving the quality of their inspection programs.

The increase for 1971 provides for inspection of an anticipated increased volume of poultry and poultry products and for inspection of intrastate plants as provided by the Wholesome Poultry Products Act of 1968. The volume of work performed is indicated by examples given in the following table:

POULTRY INSPECTION

	1969 actual	1970 estimate	1971 estimate
Billion pounds to be inspected.....	20.1	21.7	22.8
Plants under inspection June 30.....	936	943	1,551
Operating lines under inspection June 30.....	1,544	1,552	1,969

(c) *All other (inspection, grading, classing, and standardization).*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: Promote confidence between

buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 75% of the total cost of this work was offset by fees and other revenue in 1969.

Proposed legislation to repeal the Naval Stores Act and to amend the Cotton Statistics and Estimates Act, Tobacco Inspection Act, and Grain Standards Act, will result in a reduction of \$4,549 thousand in appropriated funds for 1971. The volume of work performed is indicated by examples given in the following tables:

STANDARDIZATION ACTIVITIES

	1967 actual	1968 actual	1969 actual
Grade standards in effect.....	550	567	561
Number of commodities covered.....	315	316	318

Tobacco auction markets.....	175	175	175
Volume inspected at markets (million pounds).....	1,913	1,850	1,850
Sets of buyers.....	236	233	233

3. *Regulatory activities.*—These include the administration of regulatory laws such as the U.S. Warehouse and Federal Seed Acts to assure fair play in the marketplace, to protect producers and handlers of agricultural commodities from financial loss due to careless or fraudulent marketing practices, and to preserve free and open competition in the marketing of farm products. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Cotton Research and Promotion Act is designed to improve the competitive position and expand markets for cotton through a program of self-assessment by cotton producers.

Proposed legislation to repeal the Naval Stores Act and the Tobacco Seed and Plant Exportation Act will result in a total reduction of \$28 thousand for 1971.

The volume of work performed is indicated by examples given in the following table:

REGULATORY ACTIVITIES

	1969 actual	1970 estimate	1971 estimate
Warehouse Act:

4. *Administration and coordination of State payments.*—This project covers Federal activity required in administering and coordinating the marketing service work performed by the States and financed jointly by State funds

and Federal funds provided by the appropriation, Payments to States and possessions. In 1969 this work was carried on in 44 States and 166 work projects.

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in utilizing marketing research results.

This program covers such projects as: Methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; collecting and disseminating special State and local market information and statistics; and improving the organizational structure of the marketing system. Through this cooperative approach, the Federal Government's leadership and money are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30% of customs receipts collected during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of the Interior to encourage the distribution of fishery products), plus unused balances up to \$300 million, are available for expanding domestic and foreign market outlets for farm commodities. As provided in recent appropriation acts, transfers have been made from this fund, primarily to the school lunch program for the purchase and distribution of agricultural commodities and the special milk program to cover the full or partial cost of milk served to school children. Section 32 funds are also authorized for the administration of marketing agreements and orders. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities.

1. *Commodity program payments* are of four types: (a) *Direct purchases* are donated to schools, summer camps, child-care centers, nonprofit institutions serving needy persons, persons certified by welfare as eligible for relief, and disaster victims; (b) *Diversion payments* enable processors to purchase surplus commodities on the domestic market, divert them to byproducts and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities; (c) *Export payments* enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; (d) *Production payments*, none

of which were made in 1969, nor are planned for 1970 or 1971, help to reestablish farmers' purchasing power. During the past 2 years, assistance under these programs was given to the following commodity groups (in millions of dollars):

OBLIGATIONS		
	1968	1969
Dairy products.....	9.1	120.9
Eggs and poultry.....	44.6	55.9
Fats and oils.....	9.6	13.7
Fruits and vegetables.....	24.7	38.7
Grain products.....	10.6	8.8
Livestock products.....	58.0	82.3
Peanut butter.....	10.9	14.9
Miscellaneous.....	1.8	5.1
Total.....	169.3	340.3

The use of section 32 program funds is contingent upon marketing conditions. The estimates for both 1970 and 1971 reflect the foreseeable needs for perishables and other activities regularly financed with section 32 funds. If troublesome surpluses not now foreseen should develop, steps will be taken to use additional available funds for their removal or diversion as conditions might warrant.

Funds have been used to develop and implement a cost-sharing program whereby financial assistance is offered to selected low-income counties to enable those with inadequate resources to distribute food to needy families. The Department provides for the certification and distribution of food to needy families in selected counties where local governmental agencies are unwilling or unable to operate food distribution programs. Additional cost-sharing arrangements are being developed to improve existing programs which are locally financed.

Working with the Department of Health, Education, and Welfare and the Office of Economic Opportunity, the Department has developed a distribution system to provide special food packages for infants, young children, and expectant and new mothers. These packages are being distributed in both food stamp and commodity donation areas.

2. The *special feeding program* was initiated in 1969 to meet the urgent need for providing additional foods to needy children and adults who are determined to be suffering from general and continued hunger. The funds provided are channeled primarily through the child feeding programs authorized by the School Lunch and Child Nutrition Acts.

3. *Surplus removal operating expenses* occur mainly in connection with purchasing, diverting, and exporting surplus commodities, and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1969, including that under section 6 of the National School Lunch Act, is summarized below (in millions):

Distribution	Number of recipients (peak month)	Value of commodities distributed	Pounds of commodities distributed
By recipients:			
School children.....	24.1	\$272.1	1,042.0
Needy persons.....	3.8	224.9	1,064.8
Persons in charitable institutions.....	1.2	25.4	135.5
Total.....		522.4	2,242.3
By program:			
Section 32.....		251.6	907.5
Donation by Commodity Credit Corporation, Section 416.....		206.6	1,049.1
Section 6, National School Lunch Act.....		64.2	285.7
Total.....		522.4	2,242.3

In cooperation with the food trade, press, and radio, greater consumption of abundant foods is encouraged through publication of a monthly plentiful foods list and conducting various food drives. In 1969 the monthly plentiful foods list contained an average of 7.5 foods. Five national and 22 area, State, and local drives were conducted.

4. *Marketing agreements and orders* are put into effect upon request of producers or handlers after hearings and investigations, and upon approval of producers (and handlers in the case of marketing agreements). They help to stabilize prices, and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessment upon handlers. On June 30, 1969, there were in effect 67 orders for milk, 46 agreements and orders for tree fruits, nuts, and vegetables, and one order for shade grown tobacco. The expenses of advisory committees established to advise the Secretary, public hearings, referendums to determine producer sentiment, and other developmental work as authorized by the Agricultural Act of 1961 are also financed under this project.

5. *Food and nutrition aides program* is being financed by the Federal Extension Service in 1970 and 1971.

74 Obligated balance, end of year	-59	-60	-62
90 Outlays	911	1,057	1,140

¹ Includes capital outlay as follows: 1969, \$1 thousand; 1970, \$5 thousand; 1971, \$5 thousand.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491-497, 499a-499s). Public Law 91-107, enacted November 4, 1969, raised the authorized ceiling on license fees to \$100. The Department proposes to increase the license fee on January 1, 1971.

The acts are intended to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation awards, and (c) suspension or revocation of license and/or publication of the facts.

WORKLOAD FACTORS

Activity	1968 actual	1969 actual	1970 estimate

The Secretary is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are responsible for carrying out locally the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

Each milk order is administered locally by a market administrator who is appointed by the Secretary. His staff is employed directly by the market administrator.

The activities conducted in the local office are concerned primarily with monthly computations and public announcement of class and uniform blend prices, associated butterfat differentials, examination of handlers records and facilities to verify their reports and payments to producers, and in checking weights and tests of producer milk.

The expenses of each local office are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order provides for the expense of disseminating market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers as the case may be.

Milk sold by regulated handlers supplied about 117 million persons in calendar year 1968.

The following table gives an indication of the growing role of Federal orders on the marketing of milk over the past few years:

	Calendar year				
	1964	1965	1966	1967	1968
Population of market areas (millions)	99.3	102.4	100.0	103.6	117.0

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$1 thousand (1969 adjustments, -\$1 thousand); 1969, \$39 thousand; 1970, \$0; 1971, \$0.

1. *Cash payments to States.*—This program is designed to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, child-care centers, summer camps and similar nonprofit institutions. The program will be terminated at the end of fiscal year 1970 as programs for feeding balanced meals to needy school children are further expanded. Most of these meals will include milk.

Funds are provided under letters of credit to State agencies to reimburse eligible participants for a part of the cost of the fluid milk consumed. Based upon available funds and prior year participation, initial reserves were established for each State for reimbursement payments

through fiscal year 1967. Beginning in fiscal year 1968, available funds were apportioned among the States on the basis of payments made to schools and child-care institutions for program reimbursement during the preceding fiscal year. In especially needy schools, reimbursement payments may be made for the full cost of this milk for children who are unable to pay. In fiscal year 1970 the program is being financed by a direct appropriation of \$84 million and an additional \$20 million provided under the section 32 special feeding program.

In 1969 almost 3 billion half-pints of fluid milk were consumed by children—over six times the quantity in 1955, the first year of operation of the program. This represents more than 3% of the total nonfarm consumption of the fluid milk in the United States. The child nutrition programs and additional section 32 funds aid in financing all child food assistance. These programs are directed at providing complete meals and food supplements, including milk, with particular emphasis on assistance for needy children. The further expansion of these programs proposed in 1971 will result in an increase in milk consumption with the additional meals to be served. These factors eliminate the need for a separate special milk program appropriation.

Program activities from 1968 through 1970 are as follows:

	1968 actual	1969 actual	1970 estimate
Outlet participation.....	94,422	99,085	99,100
Half-pints of milk reimbursed (millions).....	3,035.7	2,903.9	3,000.0
Average reimbursement rate per half-pint (cents).....	3.36	3.51	3.44

2. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools, and child-care institutions. Policies, procedures, and standards are developed for administering the program and determining eligibility. The program is administered directly in over 9,000 outlets where no State agency has assumed the responsibility for its administration, or where such agencies are prohibited by law from disbursing funds to such participants.

The primary objective of the child nutrition programs is to make the best possible nutrition available to every child, regardless of the economic condition of the child's family or the local district. Special emphasis is directed toward reaching needy children in low income areas in schools, child-care centers, settlement houses, recreation centers, and similar nonprofit institutions devoted to the care and training of children. They also contribute to a second major objective, to increase farm income, by expanding agricultural markets.

These programs are authorized by the National School Lunch Act, as amended, and the Child Nutrition Act of 1966, as amended.

1. *Cash payments to States.*—The programs are operated under an agreement entered into by the State educational agency and the Department. Funds are advanced under letters of credit to State agencies for use in reimbursing participating schools and child-care institutions. Sponsors make application to the State agency and if accepted are reimbursed in accordance with the terms of their agreement.

(a) *School lunch program.*—Assistance in the form of both funds and food is provided to the States, as defined in the National School Lunch Act, for serving lunches to schoolchildren. Each State's portion of the funds available is determined by a statutory formula. The formula takes into account the participation rate in the State, and the relationship between the per capita income of the State and the average United States per capita income. States must match the Federal cash grant from sources within the State at a 3 to 1 ratio. For States with below-average per capita income, this ratio is decreased.

In 1969, the States contributed to this program \$1,516 million, most of which came from children's payments. This was far in excess of the statutory matching requirement of \$3 for each Federal dollar of cash payment.

The program during the peak month in 1969 provided lunches to about 39.4 percent of the approximately 51 million schoolchildren in the country. The number of lunches served increased approximately 4.6 percent over 1968. Participation in the program in December 1968 reached about 20.1 million children in 74,558 schools and an appreciable increase is expected in 1970 and 1971.

(b) *Special assistance.*—To schools drawing attendance from needy families, section 11 of the National School Lunch Act provides special assistance for serving free or reduced price lunches. The legislation carries carefully prescribed criteria as to the eligibility of these schools, and a special formula for the apportionment of funds among the States.

In fiscal year 1969, about 300,000 children were served 57.5 million lunches. In addition, 1 million children received 184.1 million lunches under the special section 32 funding. The increases for 1970 will provide lunches for every needy child in the country by yearend.

(c) *School breakfast program.*—The Child Nutrition Act of 1966 authorized a school breakfast program for 2 years on a pilot basis to assist States through grants-in-aid and other means to initiate, maintain, or expand nonprofit breakfast programs in schools. Public Law 90-302, approved May 8, 1968, extended the breakfast program through 1971.

Funds are apportioned to States by a statutory formula. While the basic payments are limited to food assistance, in circumstances of severe need, financial assistance may be authorized up to 80 percent of the operating costs. Applicant schools must provide justification of the need for additional assistance.

The program is operated in schools drawing attendance from areas in which poor economic conditions exist and where a substantial portion of the children enrolled travel long distances. In fiscal year 1969, programs operated in schools in 49 States, the District of Columbia, Guam, and Puerto Rico.

In fiscal year 1969, an average of 205,000 children consumed 37 million breakfasts in 2,922 schools, including special section 32 funding. About 72 percent of the breakfasts were served free or at token charges to children. In fiscal year 1970 it is estimated that an average of 407,000 children will be participating in some 3,300 schools.

(d) *Nonfood assistance program.*—The Child Nutrition Act of 1966 authorized a permanent program to assist the States through grants-in-aid and other means to supply schools in low-income areas with food service equipment, other than land or buildings.

Applicant schools are required to justify their need for assistance on a project basis and submit a detailed description of the equipment to be acquired, including their proposals for its use in meeting the nutritional needs of children. In addition, State and local sources must bear 25% of the cost of equipment or facilities financed under this authority.

In fiscal year 1969 a total of 938 schools in all States, the District of Columbia, Guam, Puerto Rico, and American Samoa, serving meals to some 934,000 children, received equipment assistance of about \$748,000. In 100 of these schools, no food service had been available prior to receiving equipment funds. In addition 1,990 schools received equipment assistance from the special section 32 funds.

In order to provide nutritious meals, many schools in the country must be provided funds for kitchen equipment. In 1970 the funds provided will reach about 1,000 schools. The increase for 1971 would be sufficient to provide equipment for 1,250 schools at an average contribution of \$10,000 a school.

(e) *State administrative expenses.*—The Child Nutrition Act of 1966 provides for advances to each State educational agency for administrative expenses. These funds are to be used for supervising and giving technical assistance to the local school districts for additional activities undertaken by them to reach more needy children under the school lunch, special assistance, school breakfast, nonfood assistance, and nonschool food programs.

(f) *Nonschool food program.*—The National School Lunch Act was amended in 1968 to authorize a pilot program for 3 years to assist States through grants-in-aid and other means, to initiate, maintain, or expand nonprofit food service programs for children in service institutions. These programs will reach school-age children during the summer months in settlement houses, neighborhood houses, and recreation centers. Preschool children will receive year-round assistance in child day-care centers.

Each State may receive a basic grant of not more than \$50,000. The remaining funds will be apportioned by a formula to be determined by the ratio of the number of children (aged 3 to 17 inclusive) from families with income under \$3,000 per year in each State, to the total number of such children in all States. Up to 80% of the total cost of meals served may be paid in cases of severe need, and not more than 75 percent of the equipment costs may be paid to the institutions. All meals served must meet minimum nutritional standards as a condition for receiving assistance.

In fiscal year 1969, 312,570 children were reached on a partial-year basis. At an average of about 40 cents per

child per day, it is estimated that this program will reach about 400,000 children in fiscal year 1970.

2. *Commodity procurement.*—Commodity procurement under section 6 of the National School Lunch Act provides additional commodities to schools to supplement foods purchased locally for the lunch program. Section 6 procurement helps to insure nutritionally adequate lunches and appreciation for quality foods. It also broadens agricultural markets. Commodities are purchased by the Department on the basis of their nutritional value and acceptability to schools.

Protein items of chicken and meat accounted for about two-thirds of the purchases in fiscal year 1969. The remaining one-third consisted of fruits and vegetables. In fiscal year 1970 frozen ground beef, chicken, and fruits and vegetables are being purchased with funds transferred from section 32, Removal of Surplus Agricultural Commodities.

Commodities acquired under price support and surplus removal programs are available to schools and child-care institutions. The volume of surplus commodities distributed depends upon market conditions.

During 1969, over \$1,272 million worth of agricultural commodities and other foods were used. About 22% of this amount represented commodities contributed under section 6 and the Federal surplus removal and price support programs. Over 78% was purchased through local suppliers.

3. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools and child-care institutions. Policies, procedures, and standards are developed for administering the programs and determining eligibility. The programs are administered directly in private schools where the State educational agency is prohibited by law from disbursing funds and in child-care institutions where no State agency has assumed the responsibility for administering the program.

Participation in the programs from 1968 through 1971 are as follows:

77 Adjustments in expired accounts.....	-623	-----	-----
90 Outlays.....	247,766	575,000	1,249,305

¹ Includes capital outlay as follows: 1969, \$66 thousand; 1970, \$100 thousand; 1971, \$100 thousand; excludes downward adjustment of \$623 thousand in prior year costs.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$199 thousand; 1969, \$2,460 thousand; 1970, \$2,460 thousand; 1971, \$2,460 thousand.

This program helps provide improved nutrition to households with limited resources. Food coupons which may be used in retail stores for the purchase of commercial brand foods are issued to needy households that qualify to participate. The program is inaugurated at the request of State welfare agencies and these agencies are responsible for certification and coupon issuance functions.

The Department determines the allotment of coupons for each household unit, including the portion to be purchased, based on income, food needs, and other factors.

Coupons are issued by a non-Federal issuing office. Cash paid for the coupons by participants is deposited periodically in a designated Federal depository. Food stores receive cash or credit for the coupons from any commercial bank, which must accept them at face value. The coupons then flow through regular banking channels to the Federal Reserve banks where they are redeemed.

The Food Stamp Act of 1964 was amended on November 13, 1969, to provide appropriation authority of \$610 million for fiscal year 1970. Legislation has been proposed to make substantial changes in the basic food stamp authority. The 1971 budget is based on the passage of the recommended legislation.

The \$610 million appropriated for 1970 will finance needed program modifications and expansion into some new areas. The increased funds will be used to provide a greater total coupon allotment at a reduced cash outlay to the participant. The cash requirement will be reduced substantially and the total coupon allotment will be sufficient to provide a nutritionally adequate diet. It is anticipated that a participation level of 5.4 million will be reached by June 30, 1970. An increase of \$640 million in 1971 will be needed to finance the full year costs of the program changes made at midyear in 1970 and provide financing for expansion into an estimated 600 new project areas to be operating by June 30, 1971. The program would then be reaching about 7.5 million people—2.1 million above 1970.

The following table reflects coverage, participation and costs for fiscal years 1962 (the first full year of operation of the pilot program) and 1969, and estimates for fiscal years 1970 and 1971 (dollars in millions):

	1962 actual	1969 actual	1970 estimate	1971 estimate

The Service helps American agriculture to maintain and expand foreign markets for its products and reports foreign developments as a guide to American agricultural production, policies, and programs.

(a) The Service helps to develop foreign markets for U.S. farm products through effective market promotion under special export programs and through continuous efforts to remove international trade barriers that inhibit export sales.

(b) The Service maintains a worldwide agricultural intelligence and reporting service that enables American agriculture to carry out its production, policies, and programs in the context of world developments. Pertinent agricultural and economic data of foreign production and markets, and information on foreign agricultural policies are continuously analyzed and reported.

1. *International trade.*—The Service directs and coordinates Department responsibilities in international trade agreement programs and negotiations, under the authority of the Trade Expansion Act. It identifies and strives to reduce foreign trade barriers to U.S. agricultural exports. Developments in foreign trade policies are examined and their effect on agricultural trade and operations are reported with recommendations as to courses of action.

The Service recommends Department positions and participates in negotiations on trade agreements and international commodity agreements. It reviews and reports trade regulations of countries (primarily those signatory to the General Agreement on Tariffs and Trade) as to how such regulations affect the movement of U.S. farm products in world trade.

The Service administers a program of import controls, in accordance with section 22 of the Agricultural Adjustment Act, on foreign farm products which would render ineffective or materially interfere with Department programs relating to agricultural commodities. It is also responsible for administering import controls established under the 1964 Meat Import Act and section 204 of the Trade Expansion Act.

2. *Agricultural attachés.*—The Service maintains agricultural attachés at 60 foreign posts to assist in the development of markets abroad for U.S. agricultural commodities. They work closely with numerous U.S. agricultural trade groups and maintain contacts with foreign governments to promote greater market accessibility for U.S. farm products. They carry out a comprehensive schedule of reporting foreign agricultural production, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

3. *Market development.*—The Service administers programs concerned with the development of foreign markets for agricultural products of the United States, and coordinates interagency participation and action essential to administration of these programs. These functions involve: (a) Developing a system of worldwide promotional programs, on a commodity-by-commodity basis, in cooperation with national organizations of producers, processors, and exporters, and providing overall guidance to these organizations in carrying out cooperative programs; (b) developing, operating, and evaluating a worldwide system of multicommodity promotional programs utilizing trade fairs, trade centers and point-of-purchase campaigns to expand overseas markets; (c) reviewing foreign marketing plans; providing technical assistance in their design; developing procedures and controlling budgets and funds essential to their implementation; and evaluating programs implemented; (d) cooperating with State and local organizations in programs designed to provide technical assistance to U.S. agricultural export firms and to stimulate participation of new U.S. "cooperator" groups in promotional projects; (e) developing and guiding a systematic review of foreign markets on a country-by-country basis to find new market opportunities for U.S. agricultural products and to develop long-range promotional plans for such markets; and (f) exploring new methods and techniques to stimulate the flow of U.S. farm products into overseas markets.

4. *Commodity programs.*—Information essential to domestic planning and to foreign marketing of specific U.S. farm commodities is obtained, analyzed, and made available to U.S. farm and trade groups and to Government. Foreign agricultural competition is analyzed and reported. Marketing programs, in which producers, exporters, and Government officials participate, are developed to maintain and expand the foreign market for U.S. farm products. Assistance is given to U.S. trade representatives in negotiations with foreign officials. Assistance is given to American exporters and foreign importers to bring them together under conditions favorable to trade.

5. *Barter and stockpiling.*—Functions previously performed by the Service were transferred to Export Marketing Service in March 1969.

6. *General sales management.*—Functions previously performed by the Service were transferred to Export Marketing Service in March 1969.

Market development projects.—Foreign currencies generated by the sale of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, as well as foreign currencies acquired by the United States from other sources, are used by the Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco.

The types of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In 1971, it is planned that the unobligated balance brought forward in this appropriation will be used to purchase those currencies necessary to carry on the program. Dollar funds for use in other countries are included in the appropriation Salaries and expenses.

Note.—Figures reflect only those funds which were transferred to, and expended by, the Export Marketing Service since its establishment on Mar. 28, 1969.

The Service was established on March 28, 1969, pursuant to the authority of 5 U.S.C. 301 and the Reorganization Plan No. 2 of 1953. The programs of the Service were formerly performed by the Foreign Agricultural Service and the Agricultural Stabilization and Conservation Service.

The major objective of the Service is to promote and assist in the expansion of export sales of U.S.-produced farm products. This is accomplished through a series of programs and activities described in the three major

categories below, and through continuing cooperation with other U.S. Government agencies, foreign governments, export trade firms, banks, and ocean chartering agencies.

1. *Commodity exports.*—The Service administers programs to facilitate and expand the commercial export sales of privately owned and Commodity Credit Corporation (CCC) owned agricultural commodities, and develops related pricing policies. The Service also carries out the domestic operations to implement the Wheat Trade Convention of the International Grains Arrangement, including the fixing of payment rates and certificate costs for export marketing certificates.

2. *Exports under Public Law 480 and the CCC export credit sales program.*—The Service conducts programs which facilitate the sale of agricultural commodities for dollars on credit terms or for foreign currencies. In addition, large quantities of these commodities are donated to foreign governments and intergovernmental and voluntary agencies in over 100 countries. These programs are authorized by titles I and II of the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480). The Service also conducts a program to finance the commercial export credit sales of agricultural commodities.

3. *Barter program.*—The Service conducts barter transactions under the CCC Charter Act, the Agricultural Acts of 1949 and 1956, and the Agricultural Trade and Development Act of 1954, which are designed to utilize U.S. agricultural commodities in lieu of dollars in acquiring from other countries, goods, materials, equipment, and services for the national strategic and critical materials stockpile and the supplemental stockpile. Other than in barter for stockpiling purposes, the agricultural commodities may be those held in private stocks as well as those acquired by CCC in its price support operations. Barter for strategic and other materials for the supplemental stockpile is limited to deliveries from uncompleted contracts. No new contracts have been made since fiscal year 1968 and none are planned.

Funds for the operation of the Service are provided from the limitation on amounts available for administrative expenses of the CCC.

The Service administers the Department's responsibilities in the agricultural phases of the U.S. foreign development assistance programs. This includes direction of the Department's activities under agreement with the Agency for International Development (AID), particularly agricultural technical assistance and training programs. The Service participates with AID in the planning of agricultural development policy, in the formulation of self-help agreements with food-aid nations, and in the review and evaluation of agricultural assistance efforts. In performing these functions the Service works closely with other U.S. and international organizations to help them utilize the scientific and institutional competence of American agriculture in carrying out development assistance programs. The Service is financed with funds allocated from AID.

¹ Includes capital outlay as follows: 1969, \$24 thousand; 1970, \$0; 1971, \$0.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$30 thousand (1969 adjustments, -\$12 thousand); 1969, \$115 thousand; 1970, \$115 thousand; 1971, \$115 thousand.

The major objectives of the Authority, in the enforcement of the Commodity Exchange Act, are to protect the price and hedging services of the commodity futures markets. These services are widely used by farmers, merchandisers, and processors. To carry out its enforcement objectives, the Authority works to maintain fair trading practices and competitive pricing on commodity exchanges, and to prevent price manipulation, cheating, fraud, and abusive acts and practices in commodity transactions. Enforcement of the act includes supervision of 19 commodity exchanges designated as contract markets, approximately 400 brokerage firms registered as futures commission merchants, and about 1,000 registered floor brokers operating on the exchanges.

The highlight of fiscal 1969 was the new record set in volume of futures trading, up 15% from the previous year. An estimated 17.1 million futures transactions were

General and special funds—Continued

SALARIES AND EXPENSES—Continued

made in fiscal year 1969, with a value of \$67.5 billion, compared with 14.9 million transactions, valued at \$60.1 billion a year earlier. A large part of the increased trading activity was in new commodities added to the Commodity Exchange Act in 1968. Burgeoning markets in livestock, livestock products, and frozen concentrated orange juice showed a 45% jump in trading volume over the previous year. Frozen pork bellies, most actively traded of the new commodities, was the second largest futures market in fiscal year 1969, surpassing the wheat and soybean markets which had been extremely active in recent years. Pork belly trading rose to 3,316,000 contracts in fiscal year 1969, an increase of 26% over the trading of the previous year. Volume of trading in live beef cattle showed a 117% rise over the trading of a year ago, reaching 1,219,000 contracts in fiscal year 1969. Choice steers, the other major cattle market in fiscal year 1969, had a volume of 92,000 contracts, 68% larger than the volume of a year earlier. The largest growth occurred in the frozen concentrated orange juice market where 360,000 contracts were traded in fiscal year 1969, an increase of 131% over the previous year.

1. *Licensing and auditing of brokerage houses.*—This consists of (a) protection of customers' funds through the establishment and enforcement of minimum financial standards for futures commission merchants, and periodic audits of their books and records; and (b) annual registration of futures commission merchants and floor brokers.

REGISTRATIONS AND AUDITS

	1969 actual	1970 estimate	1971 estimate
Audit of customers' segregated funds...	365	400	400
Accounts examined.....	40,810	44,000	47,000
Financial statements examined.....	414	920	900
Financial requirements audits.....	6	160	160
Futures commission merchants registered.....	404	440	440
Floor brokers registered.....	1,021	1,100	1,200

2. *Supervision of futures trading.*—This activity develops information and economic evidence for the prevention of price manipulation and market corners; controls excessive speculation by enforcement of limits on trading and positions; detects false and misleading market information affecting prices; and disseminates reports and statistics on trading and special futures market situations.

REPORTS TABULATED AND ANALYZED

	1969 actual	1970 estimate	1971 estimate
Daily trading volume and open contracts...	219,100	231,000	248,000
Daily and weekly reports of large traders...	476,000	486,000	521,000
Delivery notices.....	66,000	68,000	72,000

3. *Investigation.*—Apparent or alleged violations of the law and regulations are investigated, and trade practice surveys are made to discover violations. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings. Investigations are made to determine whether exchanges are enforcing their trading rules and contract terms as required by the act.

¹ Includes capital outlay as follows: 1969, \$570 thousand; 1970, \$570 thousand; 1971, \$570 thousand.

² Selected resources as of June 30 are as follows:

	1968	1969	1970	1971
Stores	132	149	149	149
Unpaid undelivered orders	1,052	784	784	784
Total selected resources	1,184	933	933	933

³ Reimbursements from non-Federal sources are in large part service charges from producers and receipts from sales of aerial photographs (7 U.S.C. 1387).

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of direct appropriation, transfers from the Commodity Credit Corporation (CCC), and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of National, Commodity, State, and county offices.

The Commodity offices and the data processing centers in Kansas City and New Orleans play an important role in administering price support programs and the field operations stemming from producer loan and purchase agreements, inventory management, and merchandising activities.

The State committees are in general administrative charge of all programs carried out in their respective States. Within the framework of national policy, they determine the policies to be followed and direct the adaptation of national programs to the State.

The Agricultural Stabilization and Conservation county committees are responsible for the local administration of programs. They carry out all functions dealing directly with farmers. The elected county committee is in charge of the county office.

The programs and activities carried out by this Service include: Agricultural conservation program; Appalachian Region conservation program; acreage allotment and marketing quota programs; Sugar Act program; conserva-

tion reserve program; wheat and feed grain diversion programs; cropland conversion program; cropland adjustment program; dairy indemnity payment program; Wool Act program; bin storage program; and price support and related programs.

The activities carried out by the Service fall within three major categories:

1. *Program formulation and appraisal.*—The supply adjustment, conservation, and price support programs, and the management and merchandising of commodities acquired under the price support program, have a tremendous impact on the national and to a lesser extent, the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate even more effective programs.

2. *Operation of supply adjustment, conservation, and price support programs.*—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments; (e) establishing proportionate shares for sugar farms when necessary; (f) notifying producers of allotments, proportionate shares, productivity indexes, and payment rates; (g) determining farm marketing allocations; (h) handling appeals; (i) determining county normal yields; (j) conducting referendums and certifying results; (k) checking compliance with acreage allotments and use of diverted acres; (l) developing pooling agreements under which several farmers work jointly to solve a common conservation problem which cannot be solved by individual action; (m) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (n) processing producer requests for conservation cost-sharing; and (o) processing commodity loan documents and issuing sight drafts.

3. *Inventory management and merchandising.*—This activity includes: (a) overall management of CCC-owned commodities; (b) selling commodities; (c) donating commodities; and (d) accounting for loans and commodities. The value of the commodities owned by CCC on June 30, 1969, was about \$1,252 million.

The volume of work in fiscal year 1969 under some of the major programs financed from this account is set forth below:

Acreage allotments and marketing quotas (allotments):	
Tobacco	535,495
Peanuts	101,289
Cotton	608,511
Rice	17,454
Agricultural conservation program:	
Requests for cost-sharing	1,858,628
Conservation materials and services orders	996,001
Applications for payment	1,297,820
Pooling agreements	4,835
Sugar Act program:	
Participating ownership tracts	40,500
Estimated planted acreage	2,418,987
Conservation reserve program: Number of farm contracts	87,131
Feed grain and wheat programs: Number of participating farms	1,903,069

The objectives are to provide consumers with adequate supplies of sugar at reasonable prices, to protect the welfare of the domestic sugar industry, and to promote the export trade of the United States. Total U.S. requirements and quotas are determined each year. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing. Restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

Payments are made which supplement the income of domestic producers of cane and beets. Payments require compliance with specified conditions of employment, production, and price. Payments are also made for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

The decrease of \$9.4 million proposed for 1971 is based on two factors. One is the establishment of restrictive proportionate shares on the 1970 sugarbeet crop. The other factor is an indication that actual production from the 1969 and 1970 crops will be less than previously estimated.

Tax collections from imports of sugar exceed total obligations by \$612 million for fiscal years 1938 through 1969.

The principal outputs are:

PRODUCTION, THOUSANDS OF SHORT TONS, RAW VALUE

This program is designed to encourage conservation by sharing with farmers, ranchers, and woodland owners the cost of carrying out approved soil-building and soil- and water-conserving practices, including related wildlife-conserving practices. These are practices which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing averages about 50% of the cost. Cost-sharing may be in the form of conservation materials and services or a payment after completion of the practice.

Conservation measures offered include those primarily designed to establish permanent protective cover, improve and protect established vegetative cover, conserve and dispose of water, establish temporary vegetative cover, temporarily protect soil from wind and water erosion, and provide wildlife and beautification benefits.

The following and other practices were installed under the 1968 program on a million farms:

[In thousands]

Constructing water storage reservoirs.....	structures..	41
Constructing terraces.....	acres..	608
Establishing stripcropping systems.....	do.....	302
Establishing permanent sod waterways.....	do.....	40
Establishing or improving enduring vegetative cover.....	do.....	9,683
Controlling competitive shrubs on range or pasture.....	do.....	1,911
Planting trees and shrubs.....	do.....	163
Improving stands of forest trees.....	do.....	169

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the Agricultural Stabilization and Conservation State committees to counties. The county committees approve conservation practice cost-sharing for eligible persons.

Loans from Commodity Credit Corporation are used to make advance payments to vendors. These payments are

General and special funds—Continued

The Cropland adjustment program, authorized by the Food and Agriculture Act of 1965, assists farmers, through long-term agreements, to divert cropland from the production of certain crops to more needed uses that will promote the development and conservation of our soil, water, forest, wildlife, and recreational resources. The period of an agreement cannot be less than 5 years nor more than 10 years. The program also helps farmers establish, protect, and conserve open spaces and natural beauty, and prevent air and water pollution.

In return for diverting the cropland to approved public benefit uses, producers receive adjustment payments. They also are eligible to receive cost-sharing assistance for establishing approved land treatment measures. Additional incentive payments are made to producers who enter into agreements to permit free public access to land designated under the Cropland adjustment program agreement, for hunting, trapping, fishing, and hiking.

Under the Greenspan provisions of the program, funds may also be made available to Federal, State, or local governmental agencies for use in acquiring cropland to be permanently converted to specified public uses, and cost-shares may be paid to such agencies for establishing ap-

proved land treatment measures consistent with the conditions and costs under agreements entered into with producers.

Cropland adjustment programs were approved for 1966 and 1967. There were no authorizations to place additional acreage in this program for 1968, 1969, or 1970.

CONSERVATION RESERVE PROGRAM

[For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U.S.C. 1831-1837, 1802-1814, and 1816), and to carry out liquidation activities for the acreage reserve program, to remain available until expended, \$37,250,000, with which may be merged the unexpended balances of funds heretofore appropriated for soil bank programs: *Provided*, That no part of these funds shall be paid on any contract which is illegal under the law due to the division of lands for the purpose of evading limits on annual payments to participants.] (*Department of Agriculture and Related Agencies Appropriation Act, 1970.*)

This program, initiated in 1956, has two objectives. One is to bring total crop acreage more nearly in line with demand by withdrawing cropland from production. The other is to establish and maintain sound conservation practices on the land withdrawn. The Secretary was authorized, through calendar year 1960, to enter into 3- to 15-year contracts with producers. For removing designated cropland from production and for establishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period. He also receives cost-sharing assistance for the establishment of required practices. Total annual rental payments to a producer are limited to \$5 thousand.

Participation in the program is summarized below:

Number of contracts, 1969 program.....	34,922
Number of acres, 1969 program.....	3,378,116
Payments made in program year 1968.....	\$106,733,103
Estimated payments to be made in program year 1969.....	\$39,544,654

EMERGENCY CONSERVATION MEASURES

For emergency conservation measures, to be used for the same purposes and subject to the same conditions as funds appropriated under this head in the Third Supplemental Appropriation Act, 1957, to remain available until expended, \$5,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated for emergency conservation measures. (71 Stat. 176; *Department of Agriculture and Related Agencies Appropriation Act, 1970.*)

Program and Financing (in thousands of dollars)

90 Outlays.....	7,144	7,300	7,500

¹ Selected resources as of June 30 are as follows: Advances, 1968, \$13,943 thousand (1969 adjustments, \$4,303 thousand); 1969, \$12,099 thousand (1970 adjustments, \$3,000 thousand); 1970, \$8,099 thousand (1971 adjustments, \$3,400 thousand); 1971, \$0.

This appropriation provides special funds for sharing the cost of emergency conservation measures to deal with cases of severe damage to farm and rangelands resulting from natural disasters. The criteria under which assistance may be made available are set forth in the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590(h)).

Funds are allocated for use only in those counties designated by the Secretary as disaster counties. Assistance is made available to treat new conservation problems which (1) if not treated will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Under the 1969 program cost-sharing assistance is being provided to treat farmlands damaged by drought, flood, tornado, and hurricane. As of August 31, 1969, there were 198 counties in 27 States where assistance is being provided.

INDEMNITY PAYMENTS TO DAIRY FARMERS

For necessary expenses to carry out the provisions of the Act of August 13, 1968 (Public Law 90-484), \$200,000: *Provided*, That none of the funds contained in this Act shall be used to make indemnity payments to any farmer whose milk was removed from commercial markets as a result of his willful failure to follow procedures prescribed by the Federal Government. (Department of Agriculture and Related Agencies Appropriation Act, 1970.)

Under this program the Department makes payments to dairy farmers who have been directed to remove their milk from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government.

This program began in 1964 and was funded from the Office of Economic Opportunity appropriations, since the authorization was in the Economic Opportunity Act of 1964 (sec. 331).

For fiscal year 1968, the program was funded by transfer from Office of Economic Opportunity of funds provided in the Supplemental Appropriation Act, 1968. The program was extended through June 30, 1970 by Public Law 90-484, and the programs for fiscal years 1969 and 1970 were funded by direct appropriations to the Department of Agriculture.

Claims made from the beginning of the program through June 30, 1969, totaled \$1,083,451.

It is estimated that additional claims totaling \$200 thousand will occur during fiscal year 1970.

CROPLAND CONVERSION PROGRAM

Long-range agreements were approved with farmers and ranchers from 1963 to 1967 to make changes from their past cropping systems and land uses to other income producing, public benefit uses.

The agreements, not to exceed 10 years, provide for payments, the furnishing of materials and services, and other assistance to farmers. In return, farmers change the land use and install and maintain conservation practices. Adjustment payments were authorized to be made either upon approval of the agreement or on an annual installment basis. Land treatment practice payments are made after the practice is installed.

The law places a limit of \$10 million on payments made in a calendar year under signed agreements.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allotments and allocations from other accounts are included in the schedules of the parent appropriation as follows:
Agriculture:
Soil Conservation Service, "Great Plains Conservation Program."
Funds appropriated to the President:
"Appalachian Region Conservation Program."
"Revolving fund, Defense Production Act."

COMMODITY CREDIT CORPORATION

Federal Funds

General and special funds:

REIMBURSEMENT FOR NET REALIZED LOSSES

To reimburse the Commodity Credit Corporation for net realized losses sustained in prior years but not previously reimbursed, pursuant to the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12), in the following amounts: [fiscal year 1961, \$57,047,170; fiscal year 1967, \$2,210,668,971;] fiscal year 1968, [\$2,948,217,859] \$249,998,669; fiscal year 1969, \$3,113,156,331; in total, [\$5,215,934,000] \$3,363,155,000: *Provided*, That no funds appropriated by this Act shall be used to formulate or administer programs for the sale of agricultural commodities pursuant to title I of Public

Law 480, 83d Congress, as amended, to any nation which sells or furnishes or which permits ships or aircraft under its registry to transport to North Vietnam any equipment, materials or commodities, so long as North Vietnam is governed by a Communist regime. (*Department of Agriculture and Related Agencies Appropriation Act, 1970.*)

² Statutory obligations against borrowing authority include only borrowings from, or with the approval of, Treasury. A sufficient amount of CCC's borrowing authority is required to be reserved to cover obligations to purchase notes, certificates of interest, or other obligations evidencing loans held by banks and accrued interest thereon, but such obligations, other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowings from Treasury. Only that portion of the borrowing authority is available which has neither been so reserved nor charged by actual borrowings.

Public enterprise funds—Continued**REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL
WOOL ACT—Continued**
COMMODITY CREDIT CORPORATION FUND—Continued

The Corporation was created to stabilize, support, and protect farm income and prices, help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers, and help in their orderly distribution (15 U.S.C. 714–714p). It may also make available materials and facilities required in connection with the production and marketing of agricultural commodities. In addition to its basic functions, it is used to administer, and in some cases, temporarily finance numerous special activities.

The Corporation's capital stock of \$100 million is held by the United States. Up to \$14.5 billion may be borrowed to finance operations.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1970 and 1971 budget estimates: (a) Employment, production, and national income will rise both in 1970 and 1971 from the present level; (b) generally, exports of agricultural commodities in 1971 will increase over 1970 levels; (c) yields for the 1970 crops are based on recent averages adjusted for trend; (d) acreage allotments and marketing quotas will be in effect for the 1970 crops of peanuts, rice, cotton, and certain kinds of tobacco (flue-cured tobacco will be on an acreage-poundage program); and (e) special programs for cotton, feed grains, and wheat will be in operation.

It is difficult to forecast with accuracy, requirements for the year ending June 30, 1971. Complex and unpredictable factors are involved, such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

PROGRAMS OF THE CORPORATION

The basic functions of the Corporation include the following programs for which appropriations are made for net realized losses sustained (in thousands of dollars):

Program	1971 estimate		Net realized loss for year
	Gross obligations	Outlays	
Price support payments.....	1,593,200	1,593,200	1,593,200
Wheat certificates issued (530 million bushels).....	852,500	429,500	429,500
Other price support.....	3,309,453	332,188	645,779
Commodity export.....	302,715	112,415	121,415
Storage facilities.....	19,000	—36,000	—
Supply.....	150	—80	—30
Feed grain diversion (38 million acres).....	801,000	801,000	801,000
Wheat diversion (17 million acres).....	88,000	77,000	77,000
Cotton diversion (small farms).....	28,000	28,000	28,000
Other items not distributed by program.....	561,709	366,463	495,016
Total.....	7,555,727	3,703,686	4,190,880

Price support.—The Corporation, through loans, purchases, payments, and other means, supports the prices of agricultural commodities to producers. This is done mainly under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.) and the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.).

The 1949 act makes price support mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. It also requires support of the following nonbasic commodities: Tung nuts, honey, milk, butterfat, and the products of milk and butterfat, barley, oats, rye, and grain sorghums. The National Wool Act of 1954, as amended (7 U.S.C. 1781–1787) requires price

support for wool and mohair. Price support for other nonbasic commodities is discretionary. However, whenever the price of either cottonseed or soybeans is supported, the support price of the other must be set at such level as the Secretary determines will cause them to compete on equal terms on the market. The price support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing price support are loans to and purchases from producers. With limited exceptions, price support loans are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may generally deliver such collateral to satisfy his obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases for the removal of surpluses are made under certain laws, for example: The act of August 19, 1958, as amended (7 U.S.C. 1431 note), and section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431). For feed grains, in addition to loans and purchases, a portion of the price support is made through issuance of negotiable payment-in-kind certificates which are handled in the same manner as payment-in-kind certificates issued under the feed grain acreage diversion programs. For upland and extra-long staple cotton, producers receive price support payments in addition to loans. For wheat, in addition to loans and purchases, producers receive marketing certificates as hereinafter described.

In price support operations, normal trade facilities are used to the maximum extent practicable. Cooperatives and financial institutions are used in lending activities. Commercial facilities are used to a great extent for storage.

Besides the Charter Act and laws mentioned above, many other laws are applicable to the disposition through sales, donations, and barter of commodities acquired under the price-support program. For accounting purposes, the Corporation credits to the price-support program, proceeds of commodities sold from its price-support stocks, including those disposed of through redemption of domestic and export payment-in-kind certificates and through special activities.

Commodity export.—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments, and other operations. Other than in barter for stockpiling purposes, such commodities and products may be those held in private trade channels as well as those acquired by the Corporation in its price-support operations. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and (f), and in accordance with specific

statutes where applicable. Export sales for foreign currencies are made under the Agricultural Trade Development and Assistance Act of 1954, as amended, although such sales of commodities owned by the Corporation may also be made under its charter authority.

The activities described below are illustrative of those conducted under this program during 1970. With respect to barter, the emphasis is on exports in connection with various types of offshore procurement of materials and services needed by the Department of Defense, the Agency for International Development, and other agencies, for which they pay the Corporation. Barter for strategic and other materials for the supplemental stockpile is limited to deliveries from uncompleted contracts. No new contracts have been made since fiscal year 1968 and none are planned. Commodities available for barter vary from time to time.

When necessary to encourage export movement from free-market supplies, as well as from its own stocks, the Corporation makes payments on wheat, wheat products, cotton, corn, grain sorghum, barley, oats, rye, rice, flaxseed, linseed oil, tobacco, butter, nonfat dry milk, milkfat, and cheese. The rate of payment generally is the difference between the prevailing world export sales price and the domestic market price, and in the case of wheat, the payments are made at levels needed to meet U.S. obligations under the International Grains Arrangement.

To help develop or expand foreign markets, the Corporation may furnish farm commodities and products for samples or exhibits at international trade fairs and for use abroad in testing consumer acceptance and commercial market potentials.

To maximize exports of agricultural commodities, including products thereof, the Corporation conducts an export credit sales program under which it finances for a period of not to exceed 3 years, commercial export credit sales by exporters of agricultural commodities obtained either from Corporation inventories or from private stocks. These commercial transactions are financed under the Corporation's charter authority and section 4 of the Food for Peace Act (7 U.S.C. 1707a) and are to be distinguished from the long-term credit contracts involving foreign assistance authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended. Section 4 of the Food for Peace Act of 1966 authorizes appropriations to reimburse the Corporation annually for its actual costs incurred or to be incurred under this program. Estimates for this activity are included under special activities.

Storage facilities.—The Corporation conducts a program to provide storage adequate to fulfill its program needs. This program is conducted pursuant to sections 4 (h) and (m), and 5 (a) and (b) of the charter.

The Corporation has authority to buy bins (in storage-short areas) and equipment for the care and storage of grain owned by the Corporation or under its control. This authority to purchase bins has not been exercised since 1956. The Corporation has now reduced its storage capacity by more than 50%. The Corporation makes loans for the purchase, building, or expanding of facilities for storage and care of commodities on the farm, and sells to producers and others, bins needed for the storage of agricultural commodities. Bins sold by the Corporation may be those acquired for resale for such storage or those which are no longer required by the Corporation for the storage of its own commodities. Public Law 89-758 permits the sale of grain storage facilities no longer needed for such program use to public and private nonprofit agencies and organizations. The Corporation may also provide storage use

guarantees to encourage building of commercial storage, and undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

Supply and foreign purchase.—The Corporation procures from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies. It similarly procures or aids in the procurement of such foods, commodities, products, and material for sale to meet domestic requirements during periods of short supply or during such other times as will stabilize prices or facilitate distribution. Through purchases, loans, sales, or other means, the Corporation may also make available materials and facilities needed for the production and marketing of agricultural commodities.

Purchases for other Federal agencies of commodities not in the Corporation's price-support stocks has been the main activity. Purchases of limited quantities of breeder, foundation, and registered seeds of improved varieties of grasses and legumes are made through production contracts in order to assure supplies thereof for farmers. No foreign purchases have been made in recent years.

This program is conducted under section 5 (b) and (c) of the Commodity Credit Corporation Charter Act. Section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), requires that the Corporation be fully repaid from funds of such agencies for services performed, losses sustained, operating costs incurred, or commodities bought or delivered to or on behalf of any other Federal agency. Previously, administrative expenses for the supply program were not subject to the administrative expense limitation. Hereafter, they will be included within such limitation. Operations not subject to section 4 may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

Feed grain acreage diversion program.—An acreage diversion program is being conducted on 1969 and 1970 crops of feed grains by the Agricultural Stabilization and Conservation Service utilizing the facilities and stocks of the Corporation. This program is carried out under the Soil Conservation and Domestic Allotment Act, as amended by the Food and Agriculture Act of 1965 (Public Law 89-321), as extended by Public Law 90-559. Under this program, payments are made to farmers who divert acreage from the production of feed grains to an approved conservation use.

Payments are made by the issuance of negotiable payment-in-kind certificates. The farmer may elect either to have the certificates redeemed in feed grains from the Corporation's stocks or market the certificate with the Corporation's assistance.

Wheat certificate program.—A wheat certificate program for 1969 and 1970 crops is being conducted by the Agricultural Stabilization and Conservation Service utilizing the funds and facilities of the Corporation. This program is authorized by the Agricultural Adjustment Act of 1938, as amended by the Food and Agriculture Act of 1962, the Agricultural Act of 1964, and the Food and Agriculture Act of 1965, as extended by Public Law 90-559.

Under the voluntary wheat certificate program, domestic marketing certificates are issued to participating farmers which may be sold at face value to the Corporation. Processors of wheat are required to buy domestic certificates equivalent to the number of bushels of wheat used in the manufacture of food products.

Exporters may not ship abroad any wheat without buying export marketing certificates equivalent to the number of bushels exported, at a cost determined by the

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

Secretary to make U.S. wheat and wheat flour competitive in the world market, avoid disruption of world market prices, and fulfill the international obligations of the United States. The net proceeds, if any, from the sale of export marketing certificates, after deducting export subsidies paid to exporters, will be distributed to producers on a pro rata basis.

Wheat acreage diversion program.—An acreage diversion program is being conducted on the 1969 and 1970 crops of wheat by the Agricultural Stabilization and Conservation Service under section 339(b) of the Agricultural Act of 1938, as amended by the Food and Agriculture Act of 1965, as extended. Payments will be made to wheat producers who divert a portion of their acreage to approved conservation use.

Cotton acreage diversion program.—An acreage diversion program, including small farm payments, is conducted on the 1969 and 1970 crops of upland cotton by the Agricultural Stabilization and Conservation Service under section 103(d) of the Agricultural Act of 1949, as amended by the Food and Agriculture Act of 1965, as extended. Cotton producers complying with allotments or diverting a portion of their cotton acreage allotments to conservation uses receive payments from CCC.

Loan operations.—The following table reflects the loan operations of the Corporation which apply to the preceding programs (in thousands of dollars):

Administrative expenses.—Administrative expenses are for the services of: The Agricultural Stabilization and Conservation Service, the Consumer and Marketing Service, the Export Marketing Service, the Foreign Agricultural Service and other agencies of the Department engaged in the Corporation's activities; the General Accounting

Office for audit; and the General Services Administration for space. Estimates for 1971 include a limitation of \$36.5 million for costs of administration including a reserve of not less than 7% for contingencies.

The requested authorization excludes administrative expenses in connection with the wool and mohair program under the National Wool Act of 1954, as amended, and the sale of long-staple cotton transferred from the national stockpile, which are included with the costs of those programs under Special activities.

Nonadministrative expenses.—Expenses of acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Such expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal or State licensed inspectors; work performed on a contract or fee basis by Agricultural Stabilization and Conservation county committees; and special services performed by other Federal agencies outside of this Department.

Most of these general nonadministrative expenses, including storage and handling, transportation, inspection, classing, and grading, resale payments are included in program costs, in the entry entitled Storage, transportation, and other costs not included above, in the program and financing schedule. The item Nonadministrative expense, which appears in the schedule, covers county offices, other Agricultural and Stabilization Conservation Service expenses offset by revenue, custodian, and agency expense of the Federal Reserve banks and lending agencies, and miscellaneous costs.

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 (7 U.S.C. 447-449) by the States from Corporation stocks to feed resident wildlife threatened with starvation, through the appropriation Reimbursement for net realized losses. The Corporation also obtains recovery through this appropriation for the funds transferred to the Agricultural Research Service pursuant to the Department of Agriculture and Related Agencies Appropriation Act of 1964, for cost of production research and other related research designed to reduce surplus commodities held by the Corporation.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows (in thousands of dollars):

Item	1971 estimate	
	Gross obligations	Outlays (reimbursable)
(1) Sale of agricultural commodities for foreign currencies.....	211,800	35,800
(2) Sale of agricultural commodities for dollars on credit terms.....	570,400	465,400
(3) Commodities supplied in connection with dispositions abroad.....	351,030	351,030
(4) Bartered materials for supplemental stockpile.....	67	67
(5) Military housing (barter and exchange).....	---	---

¹ Financial data included under respective appropriation item.

The Corporation receives appropriations or reimbursement for cost of these activities as described under each.

To the extent that sufficient appropriations are not provided in advance, expenditures under the Agricultural Trade Development and Assistance Act of 1954, as amended, and investments in materials transferred to the supplemental stockpile, are made by the Corporation subject to reimbursement from subsequent appropriations authorized for such purpose.

Activities currently being carried out are as follows (see foreign assistance programs and special export program for details of items (1)-(4)):

- (1) Sale of agricultural commodities for foreign currencies (title I, Public Law 480).
- (2) Sale of agricultural commodities for dollars on credit terms (title I, Public Law 480).
- (3) Commodities supplied in connection with dispositions abroad (title II, Public Law 480).
- (4) Bartered materials for supplemental stockpile.

(5) *Military housing (barter and exchange).*—During 1957, a contract was completed for the disposition of Corporation-owned commodities valued at \$50 million for the construction of military housing in France with foreign currencies obtained from this transaction. 10 U.S.C. 2681(b) as amended, provides for annual payment to the Corporation by the Department of Defense until liquidation of the amounts due for foreign currencies obtained under Public Law 480 for military housing. It is estimated that \$2 million will be applied against the amounts due under the French housing transaction in each of 1970 and 1971. Beginning in 1967, the Treasury Department has classified this as a nonexpenditure transaction.

(6) *National Wool Act.*—Under the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of about 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers in order to bring the national average price received by all producers up to the announced incentive level which is determined in accordance with a formula specified in the act.

Total.....	\$67,893	\$58,100	\$65,300

¹ Deduction from producer payments for promotional advertising and selected marketing development activities.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual and estimated payments compared with this limitation are as follows (in thousands of dollars):

Item	1969 actual	1970 estimate	1971 estimate
70% of customs receipts on wool and wool manufactures, cumulative from Jan. 1, 1953, to end of preceding calendar year (estimate).....	1,211,500	1,329,100	1,446,700
Cumulative incentive payments on marketings for preceding calendar year.....	671,652	726,552	788,552
Balance of limitation available for payments on succeeding marketing years.....	539,848	602,548	658,148

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70% of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

Estimated costs and appropriations to the Corporation during 1969, 1970, and 1971 are indicated in the following table (in thousands of dollars):

Item	1969 actual	1970 estimate	1971 estimate
Due start of year.....	72,451	67,893	58,100
Costs for year:			
Program.....	67,074	57,185	64,285
Interest.....	819	915	1,015

Appropriation to Commodity Credit Corporation for the year.....	72,451	67,893	58,100
Appropriation 1969, 1970, and 1971.....	67,893	58,100	65,300

(7) *Grain for migratory waterfowl feed.*—To prevent damage of crops by migratory waterfowl, the Corporation

is directed to furnish to the Secretary of the Interior (7 U.S.C. 442-445) such grain acquired through price support operations and certified by the Corporation as available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition. This appropriation item is included under that department.

(8) *Surplus grain for migratory birds.*—Under Public Law 87-152, approved August 17, 1961 (7 U.S.C. 448) the Secretary of the Interior may requisition grain of the Corporation to feed starving migratory birds. This appropriation item is included under that department.

(9) *Grading and classing activities.*—The Corporation may make advances to the Consumer and Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a, 440). Such advances used for classing cotton and grading tobacco not placed under price support loan are repaid from an appropriation of the Service.

(10) *Research to increase domestic consumption of farm commodities.*—The Department of Agriculture and Related Agencies Appropriation Act of 1964 authorized the transfer of not more than \$16 million from the appropriation Removal of surplus agricultural commodities (sec. 32) to the Corporation to be used to increase domestic consumption of surplus farm commodities, and provided for the transfer for such purposes thereafter of such sums not in excess of \$25 million in any one year, as may be approved by Congress. The 1965 appropriation act authorized the transfer of \$12,175 thousand of section 32 funds for this purpose. The Corporation transfers such funds to the Agricultural Research Service and Cooperative State Research Service to conduct the required research.

(11) *Defense activities.*—Upon the declaration of a national emergency, the facilities, services, authorities, and funds of the Corporation may be used, as directed by the Secretary and in accordance with applicable provisions of law, to carry out responsibilities and functions assigned to the Secretary under the Defense Production Act of 1950, as amended, the Civil Defense Act, as amended, and such other defense legislation as may be enacted.

(12) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—The act of July 10, 1957 (71 Stat. 290), authorized the transfer of 50,000 bales of domestically grown cotton from the national stockpile to the Corporation for sale. Also, about 219,000 bales of cotton, both American-Egyptian and foreign grown, in the stockpile were made available to the Corporation for disposition under Public Law 87-548, approved July 25, 1962. The cotton is not recorded as a Corporation asset. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts from time to time. No interest is paid by the Corporation for the use of the money prior to covering.

(13) *Loans for agricultural conservation.*—Under section 391(c) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391(c)), the Corporation advances funds to the Secretary in amounts not to exceed \$50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made from balances of prior appropriations or from new funds appropriated for the agricultural conservation program.

(14) *Use of CCC facilities for Agricultural Stabilization and Conservation Service programs.*—Under the respective enabling legislation, the services, facilities, and authorities of the Corporation are used to make payments to producers under various programs administered by the Agricultural Stabilization and Conservation Service.

No disbursements are made unless funds have been received in advance from the applicable appropriation. Among these programs are: Conservation reserve, cropland conversion, agricultural conservation, cropland adjustment, Appalachia regional conservation, emergency conservation measures, and the Sugar Act program.

(15) *Export credit sales (short-term)*.—This program is described under the Corporation's commodity export program on p. 160.

(16) *Purchases of dairy products under sec. 709 of the Food and Agriculture Act of 1965*.—The Corporation, on behalf of the Secretary, purchases at market prices dairy products which are donated to meet the requirements for schools, domestic relief distribution, community action programs, and other programs as are authorized by law, when there are insufficient stocks of such products in the hands of the Corporation available for such purposes. This program is conducted under sec. 5(g) of the Corporation's charter act and sec. 709 of the Food and Agriculture Act of 1965. Costs incurred for this activity are included in the Corporation's net realized loss for which it is reimbursed annually by appropriation pursuant to Public Law 87-155.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made or held by lending agencies or other financial institutions or certificates of interest issued in connection with the financing of price-support operations. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on certificates of interest and lending agency obligations for the period the agencies have their funds invested.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964, on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after June 30 of the fiscal year in which such losses are realized.

The computation of the transfer from interest-bearing to non-interest-bearing capital is (in millions of dollars):

Item	1969 actual	1970 estimate	1971 estimate
Realized deficit not previously reimbursed, start of year.....	9,654	8,579	7,416
Less appropriations for year.....	4,188	5,216	3,363
Total non-interest-bearing, end of year.....	5,466	3,363	4,053

On the basis of the budgetary assumptions, the estimated requirements indicate no need for an increase in borrowing authority. Since there are so many uncontrollable factors involving crops which have not even been planted, it must be recognized that estimates are highly tentative.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

Item	[In millions of dollars]		
	1969 actual	1970 estimate	1971 estimate
Statutory borrowing authority.....	14,500	14,500	14,500
Deduct:			
Borrowings from Treasury.....	12,115	12,070	12,357
Obligations to purchase loans or certificates held by financial institutions (guaranteed by Commodity Credit Corporation).....	1,589	-----	-----
Accrued interest on above obligations and certificates held by financial institutions.....	22	-----	-----
Total statutory borrowing authority in use.....	13,726	12,070	12,357
Net statutory borrowing authority available.....	774	2,430	2,143

Note.—A sufficient amount of the borrowing authority is required to be reserved to cover obligations to purchase notes and certificates of interest held by financial institutions and accrued interest thereon. Such obligations, however, as well as accounts payable, accrued liabilities, and other outstanding obligations not reflected on this table, do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds which may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority. The budget reflects a net increase of \$1,283 million in 1969, a decrease of \$1,381 million in 1970, and an increase of \$499 million in 1971.

Appropriations.—Under section 2 of Public Law 87-155 (15 U.S.C. 713a-11), annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year.

The realized losses for the price support and related programs for 1969 were \$3,113 million, and the cumulative losses not yet appropriated for were \$8,579 million. It is estimated that an appropriation of \$3,363 million would provide sufficient funds for the operations described for 1971. It would also leave a desirable operating margin to assure flexibility of operations in view of the volume of transactions handled.

The special activities are financed as indicated in the program description above. In addition to certain reimbursements for other agencies, appropriations are made for the National Wool Act (see above) and for foreign assistance and special export programs (see that heading on p. 168).

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows (in thousands of dollars):

PRICE SUPPORT AND RELATED PROGRAMS	
Realized losses, 1933 to 1969, inclusive.....	40,376,539

¹ The change in this item is reflected on the program and financing schedule.

² A sufficient amount of the borrowing authority is required to be reserved to cover obligations to purchase notes and certificates of interest held by financial institutions and accrued interest thereon. Such obligations, however, as well as accounts payable, accrued liabilities, and other outstanding obligations not reflected on this table, do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Note.—In addition to obligations other than liabilities, the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established.

FOREIGN ASSISTANCE PROGRAMS AND
SPECIAL EXPORT PROGRAMS

Facilities and funds of the Commodity Credit Corporation may by law be used in carrying out programs for exporting agricultural commodities. The laws also author-

ize appropriations to be made to cover costs of such programs. When funds become available, advances are made to the Corporation for estimated costs. If the amounts appropriated are greater than actual needs, the excess is used to reduce future appropriation requests. If the appropriations are less than actual needs, other Corporation funds may be used temporarily to finance the balance of authorized costs.

FOREIGN ASSISTANCE PROGRAMS

Included in this category are the following activities carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, as amended by the Food for Peace Act of 1966 (Public Law 89-808, approved Nov. 11, 1966), and by Public Law 90-436, approved July 29, 1968: Sale of agricultural commodities for foreign currencies (title I); sale of agricultural commodities for dollars on credit terms (title I); and commodities supplied in connection with dispositions abroad (title II).

Federal Funds

General and special funds:

PUBLIC LAW 480

For expenses during the current fiscal year, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1701-1710, 1721-1725, 1731-1736d), to remain available until expended, as follows: (1) sale of agricultural commodities for foreign currencies and for dollars on credit terms pursuant to title I of said Act, **[\$420,000,000]** \$526,100,000; and (2) commodities [disposed of and other costs incurred] supplied in connection with [donations] dispositions abroad, pursuant to title II of said Act, **[\$500,000,000]** \$406,400,000. (Department of Agriculture and Related Agencies Appropriation Act, 1970; additional authorizing legislation to be proposed for \$230,000,000.)

1. Sales of agricultural commodities for foreign currencies and for dollars on credit terms are made under title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), as amended by the Food for Peace Act of 1966 (Public Law 89-808 and Public Law 90-436).

The Commodity Credit Corporation finances all sales made pursuant to agreements concluded under title I. Sales are made to friendly countries—as defined in sec-

tion 103(d) of the act—and must not displace expected commercial sales for cash dollars (secs. 103 (c) and (n)).

The estimates assume extension of current legislation which provides that no agreements may be entered into after December 31, 1970 (section 409) and that agreements may not be made under title I in any calendar year which call for an appropriation to reimburse the Corporation in excess of \$1.9 billion, plus unused prior years' authorizations.

Whenever practicable, terms of agreements must require payment at time of delivery of not less than 5% of the purchase price in dollars or in currencies convertible to dollars. These initial payments are applied against costs to reduce appropriation requests. On credit agreements under title I, the President is authorized to require payment upon delivery in dollars or foreign currencies of amounts needed for payment of U.S. obligations and certain other purposes.

Factors determining availability of commodities for disposition under Public Law 480 are productive capacity, domestic requirements, farm and consumer price levels, anticipated commercial exports, and adequate carryover. No commodity is available for disposition if the disposition thereof would reduce the domestic supply below that needed to meet domestic requirements, adequate carryover, and anticipated exports for dollars.

The Corporation may finance only the differential between U.S.-flag rates and world rates in the case of regular foreign currency sales.

(a) Sales of agricultural commodities for foreign currencies (title I).—Sales of agricultural commodities for foreign currencies are made to countries unable to expand commercial purchases because of a lack of dollar exchange. Foreign currencies received in payment are deposited to the account of the U.S. Treasury and can be used only as stated in section 104. The dollar value of such deposits through June 30, 1969, amounted to \$12.3 billion.

Uses fall into two groups—those of benefit to the foreign country, mainly loans and grants to promote economic development and to support common defense, and those of benefit to the United States. The latter includes, among others, expenses of the U.S. Government abroad, agricultural market development, educational exchange, construction of military family housing, and sales of foreign currency to U.S. citizens and tourists.

Foreign currencies for U.S. uses, certain foreign currency grants, and uses of foreign currency loan repayments are subject to the appropriation process. Sales agreements specify particular uses, and in those entered into after December 31, 1964, at least 20% of the foreign currencies are required to be subject to the appropriation process, with certain exceptions. Such uses reduce dollar outflow and the deficit in the balance of payments of the United States. The Corporation is reimbursed for the dollar value of currencies so used. Proceeds from sales of foreign currencies and from dollar repayments of foreign currency loans are applied as a reduction in appropriation requests.

Section 509 of Public Law 86-500, approved June 8, 1960 (7 U.S.C. 1704b note) provides that at least 75% of the total cost of foreign military housing projects (unless otherwise specified) shall be paid from foreign currencies acquired under title I. Pursuant to 10 U.S.C. 2681(b), as amended, the estimates reflect transfer to the Corporation of \$6 million each year to liquidate amounts due, including the French housing barter transaction discussed under the Corporation's special activities. It is estimated that \$4 million will be applied against

General and special funds—Continued

PUBLIC LAW 480—Continued

amounts due, with a balance of \$38 million remaining unpaid as of June 30, 1971.

From inception through June 30, 1969, sales agreements have been signed with 53 countries. They cover sales of commodities at an export market value of over \$12.8 billion. Major items are wheat, cotton, and fats and oils.

The following table reflects costs incurred (in thousands of dollars):

Fiscal year	Program expenditures	Interest	Total
1955 to 1967	15,869,273	247,191	16,116,464
1968	784,810	-----	784,810

1970 (estimate)	293,548	-----	293,548
1971 (estimate)	211,800	-----	211,800
Cumulative totals	17,532,433	247,191	17,779,624
Deduct sales of currencies, loan repayments, and receipts from Department of Defense	-----	-----	2,365,145
Net costs (foreign currency sales)	-----	-----	15,414,479
Long-term credit sales financed from this appropriation	-----	-----	160,718
Total net costs financed from this appropriation	-----	-----	15,575,197
Appropriations through June 30, 1971	-----	-----	15,536,904
Unreimbursed costs, through June 30, 1971, representing amounts due from Department of Defense (financed by CCC borrowing authority)	-----	-----	38,293

(b) *Sales of agricultural commodities for dollars on credit terms (title I).*—Sales of U.S. agricultural commodities under long-term dollar credit terms are also authorized. The act provides for a progressive shift from foreign currency sales to dollar credit sales, to be completed by December 31, 1971.

Agreements are made with friendly countries or with United States and foreign private trade. They may provide for delivery in annual installments for not more than 10 years from the date of the agreement, subject to the availability of the commodity.

Payments are in dollars with interest at rates not less than the minimum required by section 201 of the Foreign Assistance Act of 1961, as amended, for loans made under that section. Payments are made in reasonable annual amounts over periods of not to exceed 20 years from the date of last delivery in each calendar year under the agreement, except that the first annual payment may be deferred for a period of not more than 2 years after such date of last delivery. Interest is computed from the date of such last delivery. As payments are received each year, they are applied against current costs to reduce the appropriation request. Private trade agreements must provide for projects to establish improved storage or marketing facilities or otherwise encourage private economic enterprise in friendly countries.

To the extent that transition from foreign currency sales to dollar credit sales is not possible, transition to convertible foreign currency credit sales is authorized on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement. Credit terms are to be no less favorable to the United States than those for development loans made under section 201 of the Foreign Assistance Act of 1961, as amended, which authorizes loans to be made on the basis of payment in 40 years with a 10-year grace period. Dollar payments, when received, will also be applied to reduce appropriation requests.

Total agreements made since inception to June 30, 1969, amount to \$1,970.3 million cost value, including ocean freight for shipment on U.S. ships. Major commodities were wheat, cotton, and oils and oilseeds. Payments for the period amount to \$204 million, of which \$146.7 million was applied to principal and the rest to interest.

The following table reflects costs incurred (in thousands of dollars):

Fiscal year	Program expenditures	Interest	Total
1962 to 1967	877,601	4,102	881,703
1968	350,031	-----	350,031

Total	100,000	420,000	526,100

2. *Commodities supplied in connection with dispositions abroad (title II).*—Available agricultural commodities are furnished to meet famine or other urgent or emergency relief needs. Also, commodities are furnished to promote economic and community development in friendly developing countries, to combat malnutrition, and for needy people, and nonprofit school lunch and preschool feeding programs. They are furnished through friendly governments and private or public agencies, including intergovernmental organizations such as the World Food program. The Food for Peace Act, in amending title II, expressed the sense of Congress that other advanced nations should be encouraged to make increased contributions for the purpose of combating world hunger and malnutrition, and that to achieve this objective, the United States should work to expand the United Nations' World Food program.

The Agency for International Development is responsible for administering title II programs. However, the Corporation makes available the commodities or products requested for disposition under title II. Such commodities or products are made available from the Corporation's stocks of commodities or products acquired under its price support program or are purchased at market prices when this is determined to be in the best interest of the Government.

The Corporation is authorized to pay with respect to commodities made available, the costs of acquisitions, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery to U.S. ports, and ocean freight charges and general average contributions arising out of ocean transport.

Approximately \$7½ million each year may be used to buy foreign currencies accruing under title I of this act to meet costs (other than personnel and administrative costs of cooperating sponsors, distributing agencies, and recipient agencies) directed to community and other self-help activities designed to alleviate the causes for the need for such aid.

Through December 31, 1969, appropriations totaling \$4,900 million were authorized. No programs of assistance may be entered into after December 31, 1970, and none shall be undertaken under this title during any calendar year, which call for an appropriation of more than \$600 million to reimburse the Corporation for costs incurred, including its investment, plus any amount by which programs of assistance undertaken under this title in the preceding calendar year have called or will call for appropriations in amounts less than authorized during the preceding year. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against the Corporation's costs to reduce appropriation requests. The estimates assume extension of current legislation.

Since inception through June 30, 1969, transfer authorizations under title II have been issued for \$2,787 million worth of food, including ocean freight costs. Of this amount, \$1,069 million (38%) was for disaster relief of victims of floods, earthquakes, droughts, and plagues; \$218 million (8%) for refugee relief; \$19 million (1%) for other emergency assistance; \$298 million (11%) for child feeding; \$749 million (27%) for economic development; and \$436 million (15%) for voluntary agency programs. (Prior to the November 1966 amendment to Public Law 480, commodities were supplied for voluntary agency programs under authority granted under section 416 of Agricultural Act of 1949.) Also, \$520 million was authorized for ocean freight costs on commodities shipped through

nonprofit voluntary organizations and \$9 million for purchase of title I foreign currencies for self-help activities, making total authorizations of \$3,316 million for the 15 years this program has been in effect.

The following reflects the composition of the appropriations for 1969, 1970, and 1971 (in thousands of dollars):

Under section 206 of the Agricultural Act of 1956 (7 U.S.C. 1856), the Commodity Credit Corporation transfers to the supplemental stockpile, which was established pursuant to section 104(b) of the Agricultural Trade Development and Assistance Act of 1954, strategic and

General and special funds—Continued

BARTERED MATERIALS FOR SUPPLEMENTAL STOCKPILE—Continued

other materials acquired from the barter and exchange of agricultural commodities. This does not cover those acquired for the national strategic and critical materials stockpile or for other agencies on a reimbursable basis.

Appropriations are authorized for the value of the transfers based on the cost to the Corporation or the domestic market price, whichever is lower. The estimates reflect the shift from stockpile procurement to reimbursable offshore procurement through barter for other Government agencies, and delivery of commodities under previously authorized contracts. No new contracts for supplemental stockpile purposes have been made since 1968 and none are planned.

The following shows the composition of the appropriation (in thousands of dollars):

The Federal Crop Insurance Corporation, a wholly-owned Government Corporation, was created on February 16, 1938 (7 U.S.C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage,

plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

The crop insurance programs are developed and analyzed in the Washington headquarters office and are administered in the field by four area offices and 25 State offices. Sales and servicing of contracts at the county level is performed by private agents under contractual agreements with the Corporation and by Corporation employees hired on a permanent, part-time or WAE (when actually employed) basis. Detailed administrative and program accounting and statistical functions are performed by the National Service Office in Kansas City, Mo.

Budget program.—The program for fiscal year 1971 will provide crop insurance protection to farmers amounting to approximately \$933 million on the following commodities: apples, barley, beans, citrus, combined crops, corn, cotton, flax, grain sorghum, grapes, oats, peaches, peanuts, peas, raisins, rice, soybeans, sugarbeets, sugarcane, tobacco, tomatoes, tung nuts, and wheat. Also, the Corporation is reinsuring about 15 percent of the crop insurance written by the Commonwealth of Puerto Rico beginning with crop year 1969.

The following table indicates the scope of the insurance operations planned for 1970 and 1971, as compared with 1969. Amounts in the 1969 column are actual, and pertain to the 1968 crop year. The 1970 column pertains to the 1969 crop year, and the 1971 column pertains to the 1970 crop year.

Loss ratio.....	1.05	.97	.90

Financing.—Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1969, the Secretary of the Treasury held receipts for \$40 million of authorized stock, leaving \$60 million unissued. However, additional unexpected losses on citrus, cotton, grain sorghum, sugarbeets, and wheat developed during crop year 1968. These losses, coupled with the continuing annual charging of loss adjusters costs and a portion of administrative and operating expenses against premium income, reduced the Corporation's capital to a dangerously low point compared to outstanding risks. The 1970 Appropriation Act has provided that an additional \$10 million of capital stock will be issued for a total of \$50 million issued and outstanding.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts for deposit to this fund come mainly from premiums paid by farmers for crop insurance protection. The principal payments from this fund are for: indemnities to insured farmers; the direct cost of adjusting crop losses; and a part of the administrative and operating expenses.

The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

No additional capital funds are being requested for fiscal year 1971 program operations based on the following: (1) The Corporation's gross income for the 1970 crop year is estimated at \$50,700,000; and (2) crop losses occurring

Public enterprise funds—Continued

FEDERAL CROP INSURANCE CORPORATION FUND—Continued

in crop year 1969 and/or 1970 are based on average losses. If heavy losses should occur and additional funds be necessary, the Corporation will submit a request for additional capital funds.

Operating results and financial condition.—As of June 30, 1969, the Corporation reflected a deficit of \$25.1 million. This reduced the net capital to \$14.9 million from \$21.1 million reflected on June 30, 1968. Although premium income for crop year 1968 was higher than in the preceding year, indemnities for the 1968 crop year totaled \$51.3 million, exceeding premiums by \$2.4 million. The resultant loss ratio is 1.05, as compared with the 1967 loss ratio of 1.27.

However, it is estimated that the current deficit will be at approximately the same level as in the preceding year, provided that crop losses do not become excessive.

Current estimates for crop year 1969 appear to be favorable. Premiums of \$48.8 million are estimated to exceed indemnities by \$1.5 million. For the crop years 1948 through 1968, premium income of \$514.0 million exceeded indemnity costs of \$496.9 million by \$17.1 million. Premium income exceeded indemnity costs in 11 years of the 21-year period.

The following table summarizes the insurance operations by commodities for 1969, 1970, and 1971:

¹ Selected resources as of June 30 are as follows: Undisbursed loan obligations, 1968, \$1,165,282 thousand (1969 adjustments, -\$3,407 thousand); 1969, \$1,158,741 thousand (1970 adjustments, -\$1,044 thousand); 1970, \$1,116,597 thousand; 1971, \$1,094,597 thousand.

The Administration conducts two capital investment programs: (a) the rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making repayable loans are borrowed from the Secretary of the Treasury.

General and special funds—Continued

LOAN AUTHORIZATIONS—Continued

1. *Rural electrification.*—This capital investment program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment.

The 1971 budget request anticipates that a private source of supplementary financing will be available to satisfy a part of the capital requirements of the rural electric systems.

2. *Rural telephone.*—This capital investment program is financed through loans which are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

The 1971 budget request anticipates that a supplementary source of financing, using both private and Government capital, will be available to satisfy a part of the capital requirements of the rural telephone systems.

¹ Includes capital outlay as follows: June 30, 1969, \$40 thousand; 1970, \$36 thousand; 1971, \$45 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$27 thousand (1969 adjustments, \$6 thousand); 1969, \$31 thousand; 1970, \$31 thousand; 1971, \$31 thousand.

The Administration assists electrification borrowers and potential borrowers to negotiate for adequate supplies of power on reasonable terms, and makes loans for the extension and improvement of electric and telephone service in rural areas. Business management and technical help is furnished borrowers where needed to protect the Government's loan security, to assure that construction and operation of their systems conform to approved standards and will provide continuous and reliable service and to facilitate the most effective use of resources to achieve program objectives.

Rural water and waste disposal grants.—This program is authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961, as amended. It provides for planning grants to be made to public and private bodies with authority to prepare comprehensive plans for the development of water or sewer systems in rural areas which do not have funds available for such planning. In addition, development grants are made to associations, including nonprofit corporations and public and quasi-public agencies to finance specific projects for the development, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. The amount of the grant may not exceed 50% of the development cost of the project.

Development grants to associations may be made in connection with direct or insured loans for water and sewer systems described under the Farmers Home Administration direct loan account.

Rural housing for domestic farm labor.—Financial assistance in the form of grants is provided to public or private nonprofit organizations for low-rent housing and related facilities for domestic farm labor as authorized by the Housing Act of 1964.

Assistance not to exceed two-thirds of the total development cost may be provided for new structures and sites, and for the rehabilitation, alteration, conversion or improvement of dwellings, dining halls, community rooms or buildings, and infirmaries used by domestic farm laborers. Such financial assistance may be made in connection with insured farm labor housing loans under the Rural Housing Insurance Fund.

Mutual and self-help housing.—This assistance was authorized by section 1005 of the Housing and Urban Development Act of 1968 (Public Law 90-448). These grants are especially designed to aid the development of comprehensive plans to permit an expansion of mutual and self-help housing programs under which groups of families build their own homes by mutually exchanging labor. It is estimated that 15 grants to nonprofit organizations will be made in 1970 and 26 grants will be made in 1971. These organizations will provide technical staffs to assist approximately 1,000 low-income families in 1970 and 1,700 low-income families in 1971 to build their homes by the self-help method.

SALARIES AND EXPENSES

For necessary expenses of the Farmers Home Administration, not otherwise provided for, in administering the programs authorized by the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1921-1991), as amended, title V of the Housing Act of 1949, as amended (42 U.S.C. 1471-1490c, 83 Stat. 399), the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U.S.C. 440-444), and for carrying out the responsibilities of the Secretary of Agriculture under sections 235 and 236 of the National Housing Act, as amended (12 U.S.C. 1715z-1715z-1), and section 701 of the Housing Act of 1954, as amended (40 U.S.C. 461), [\$66,250,000] \$85,000,000, together with not more than \$2,250,000 of the charges collected in connection with the insurance of loans as authorized by section 309(e) of the Consolidated Farmers Home Administration Act of 1961, as amended, and [section] sections 514(b)(3) and 517(z) of the Housing Act of 1949, as amended: *Provided*, That, in addition, not to exceed \$500,000 of the funds available for the various programs administered by this agency may be transferred to this appropriation for temporary field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225) to meet unusual or heavy work [loan] load increases: *Provided further*, That no part of any funds in this paragraph may be used to administer a program which makes rural housing grants pursuant to section 504 of the Housing Act of 1949, as amended. (*Department of Agriculture and Related Agencies Appropriation Act, 1970.*)

Funds are available, in addition to funds provided in other accounts, to administer all loan and grant programs of the Administration, including reviewing applications, making and collecting loans, and providing technical assistance and guidance to borrowers; and to assist in extending other Federal programs to people in rural areas.

The recommended increase is primarily for administration of the proposed expansion in the low- to moderate-income program, which is an important part of the President's housing program.

¹ Balance of selected resources are identified on the statement of financial condition.

Farmers Home Administration direct loan account.—This account was established on October 16, 1961, pursuant to section 338(c) of the Consolidated Farmers Home Administration Act of 1961. Real estate and operating loans are made under the authorities of subtitles A and B of the act to farmers and ranchers and to associations unable to obtain credit from other sources at reasonable rates. The appropriation act for 1970 provided for making watershed protection loans, flood prevention loans, and resource conservation and development loans from funds available in the Direct loan account. Under Public Law 90-488, farm ownership and operating loans may include funds for enterprises needed to supplement farm income and loans may be made to finance outdoor recreational enterprises or to convert to recreational uses existing farming or ranching operations. Loans made under these and similar prior authorities are reported and accounted for in this account.

In 1970, the total for direct loans reflected in the following schedules is \$349.4 million. In 1971, the total for these loans is \$327.0 million. It is proposed to carry out the estimated loan program through utilization of receipts to the Direct loan account representing collections on loans outstanding and through sales of assets in prior years under the Participation Sales Act of 1966. No new borrowing authority is estimated for 1971.

1. *Real estate loans.*—(a) *Farm ownership loans.*—Direct and insured loans are made to farmers and ranchers for acquiring, enlarging or improving farms, including dwellings and farm buildings; for financing land and water development, use and conservation; for developing recreational or other nonfarm enterprises; for forestry development; for refinancing indebtedness; and for loan closing costs. Loans are confined to farms which are not larger than family farms and cannot exceed the normal value of the farm or \$60 thousand whichever is the lesser. The loan limitation includes the unpaid indebtedness against the farm or other security.

FARM OWNERSHIP LOANS—OBLIGATIONS

Insured loans.....	62	\$1,904	260	\$6,000	338	\$8,000

(c) *Soil and water loans to individuals and association loans.*—Direct and insured loans are made to farmers, ranchers, and nonoperator owners for land and water development, use and conservation. Direct and insured loans are made to public and nonprofit associations for the effective development and utilization of water supplies and waste disposal systems and for the improvement of land by soil and water conserving facilities and practices. Loans to associations also are made for shifts in land use including grazing, the development of recreational facilities, and for irrigation development. Direct land conservation and development loans to individuals are made in the Appalachian region to establish and carry out land stabilization, conservation, and erosion control practices. There is no limitation on the size of farms that may be improved with loans to individual farmers. For loans to individuals, a loan cannot exceed the normal value of the farm or \$60 thousand whichever is the lesser. The loan limitation includes the unpaid indebtedness against the farm or other security. For loans to associations, the unpaid principal indebtedness, together with the amount of any grant assistance, is limited to \$4 million. Loans to associations may be made to serve residents of open country and rural towns and villages of not more than 5,500 population, which are not part of an urban area.

Public enterprise funds—Continued

DIRECT LOAN ACCOUNT—Continued

Estimates for fiscal year 1970 and fiscal year 1971 are subject to minor shifts between some categories.

Farm ownership, recreation, soil and water, and land conservation and development loans to individuals and associations are repayable in not more than 40 years and bear interest not in excess of 5%. Insured loans are made through the Agricultural credit insurance fund with funds advanced by private lenders. Annual payments of principal and interest to lenders are fully guaranteed. The Administration services these insured loans, makes collections, and pays the lenders.

2. *Operating loans.*—Direct loans are made to farmers and ranchers for costs incident to reorganizing a farming system for more profitable operations; for a variety of essential farm expenses such as the purchase of livestock, farm equipment, feed, seed, fertilizer, and farm supplies, and other essential farm operating expenses, including cash rent, and costs incident to the production and harvesting of forestry products; for financing land and water development, use and conservation; for developing recreational or other nonfarm enterprises; for refinancing indebtedness; for other farm and home needs; and for loan closing costs. Loans are confined to operators of not-larger-than-family farms. The outstanding principal loan balance for operating loans to any individual is limited to \$35 thousand. Loans bear interest at a rate based on the average rate paid by the U.S. Treasury on obligations with a similar maturity period. The rate for fiscal year 1970 is 6%. Loans may be made for periods up to 7 years, but may be renewed for not more than 5 additional years. Loans are secured by crop and chattel liens and, when necessary, by real estate mortgages.

Self-Help Housing Land Development Fund.—This fund was authorized by section 1005 of the Housing and Urban Development Act of 1968 (Public Law 90-448). The Self-Help Housing Land Development Fund is used as a revolving fund for making loans to public or private nonprofit organizations for the acquisition and development of land as building sites to be subdivided and sold to eligible families, nonprofit organizations and cooperatives. It is estimated that 30 loans will be made in 1970 and 40 loans will be made in 1971.

¹ Balances of selected resources are identified on the statement of financial condition (analysis of Government equity).

This fund was established in 1965 pursuant to section 517(e) of title V of the Housing Act of 1949, as amended by Public Law 89-117 and Public Law 89-754. This fund is used to insure rural housing loans, farm labor housing loans, and loans for rural rental housing. Initial capitalization of the fund at \$100 million was provided by the Supplemental Appropriation Act, 1966.

If the borrowers are persons of low or moderate income, and if their need for necessary housing cannot be met with financial assistance from other sources, including assistance available under sections 235 or 236 of the National Housing Act, the loans made by the Farmers Home Administration will bear interest at 6¼% with provisions for interest credits up to 5¼% under certain circumstances. Loans to persons other than those of low or moderate income bear interest currently at a rate of 7½% plus a ½ of 1% insurance charge. The other than low- to moderate-income housing program is being discontinued in 1971. Procedures are being developed to more effectively utilize HUD housing authorities in serving this target population in rural areas.

Estimates for fiscal years 1970 and 1971 are subject to minor shifts between some categories.

The Housing and Urban Development Act of 1969 (Public Law 91-152, approved December 24, 1969) provided that the Rural housing direct loan account be abolished and that the assets and liabilities of, and authorizations applicable to, that direct loan account be transferred to the Rural housing insurance fund. Subsequent to the date of such transfer, the direct loans estimated above will be made from the Rural housing insurance fund.

Direct loans heretofore made from the Rural housing direct loan account are for the following purposes:

1. *Low- to moderate-income loans.*—Loans of \$1,000 or less are made at an interest rate of 6¼% and are repayable in not more than 10 years when the loan cannot be made on an insured basis. Disaster loans without a limit as to amount are made at 3% interest to provide for repair or replacement of farm or rural dwellings, farm service buildings, and related facilities damaged by a natural disaster. These loans are repayable in not more than 33 years and are made to farm owners, to owners of other real estate in rural areas, to long-term farm leaseholders, and to other rural residents. Loans are made to construct, repair, or replace dwellings and essential farm service buildings and may include funds to buy a house, farm service buildings, and a building site.

2. *Very low-income housing repair loans.*—Repair and improvement loans not in excess of \$1,500 are made to very low-income families who are owners of farms or nonfarm rural property to repair or improve their dwellings and essential farm buildings in order to make them safe and sanitary and to remove health hazards to the families and the community. These loans are made at 1% interest and are repayable in not more than 10 years.

3. *Rural rental housing loans.*—Loans are made to private nonprofit corporations and consumer cooperatives to provide modest cost rental or cooperative housing and related facilities for elderly persons in rural areas with low or moderate incomes or other persons with low incomes in rural areas. These loans which bear 3% interest and are repayable in not more than 50 years are generally restricted to existing borrowers who need subsequent loans.

The new obligational authority required for Insufficiencies is computed as follows (in thousands of dollars):

¹ Balances of selected resources are identified on the statement of financial condition.

This fund is authorized by subtitle C of the Consolidated Farmers Home Administration Act of 1961 to finance emergency loans in areas where agricultural credit is not readily available because of natural disasters. Loans are generally confined to areas designated by the Secretary as emergency areas. Loans may be made outside of such areas under certain conditions, to eligible applicants who have suffered severe production losses not general to the area. Loans also may be made to previously indebted borrowers to permit orderly repayment of such indebtedness.

Loans.—(a) Emergency loans.—Emergency loans are made at 3% interest to eligible farmers, ranchers, or oyster planters and to domestic corporations or partnerships engaged primarily in farming, ranching, or oyster planting. Loans are made primarily for financing farm operating needs, family living expenses, and a number of closely related purposes. Public Law 91-79, approved October 1, 1969, authorized loans until December 31, 1970, with special provisions for refinancing real estate debts under restricted conditions, for cancellation of a portion of interest and principal up to \$1,800, and for deferment of interest and principal payments up to 3 years on loans for other than operating expenses; it also authorized loans to eligible applicants who are able to obtain credit elsewhere except that such loans will bear interest at 5% and no part of such loans may be canceled or deferred.

(b) Other loans.—Where necessary to protect the Government's investment, obligations are incurred in connection with outstanding loans to provide for payment of such costs as taxes and insurance. Such advances are charged to the borrowers' accounts.

Administrative expenses.—The administrative expenses are related to the emergency loan program of the Administration. These expenses are estimated at \$6.8 million in 1970 and \$6.1 million in 1971. Any additional expenses are paid from the appropriation Salaries and expenses. Administrative expenses for the Office of the General Counsel are estimated at \$39 thousand in 1970 and 1971.

Financing the program.—No new budgetary authorization is required for 1971. A net loss of \$6.9 million is estimated on an accrual basis. Receipts are estimated to exceed expenditures by \$3.0 million on a cash basis. During 1971, the program will be wholly financed by receipts from operations of the revolving fund.

Operating results and financial conditions.—Revenue for 1971, consisting principally of interest on loans, is estimated at \$3 million, compared to expense of \$9.9 million, resulting in an estimated loss of \$6.9 million. A net gain of \$2.3 million is estimated for 1970, and a net loss of \$9.8 million resulted in 1969.

Loans receivable after allowance for losses, are expected to amount to \$70.6 million on June 30, 1971, as compared to \$80.6 million on June 30, 1970, and \$125.3 million on June 30, 1969.

The Government investment at June 30, 1971, is expected to be \$137.8 million, consisting of \$267.8 million appropriated and donated, less a deficit of \$133 million.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund is used to insure farm ownership, soil and water, and recreation loans to individuals, and association loans as authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961, as amended. The insurance endorsement on each insured loan may include an agreement by the Government to purchase the loan after a specified initial period. The initial fund of \$1 million may be supplemented by amounts retained by the Government out of interest collected from insured loan borrowers and by borrowing from the Secretary of the Treasury. From any amounts so retained, not to exceed one-half of 1% of the outstanding principal obligations must be deposited to the fund to cover losses. Any remainder of such charges may be used for administrative expenses. Loans may be made directly from the fund from available receipts or borrowings from the Treasury for the purpose of acquiring blocks of loans, if there is reasonable assurance that the loans can be sold to investors without undue delay. With respect to new loans made from this fund, not more than \$100 million may be held in the fund at any one time. Interest paid to the Secretary of the Treasury on borrowings is

based on the current average market yield of outstanding marketable obligations of the United States having maturities comparable to the notes issued for borrowings from the Treasury for operation of the fund.

Budget program.—Capital outlay is estimated at \$585.5 million in 1971, a decrease of \$203.6 million from 1970 and a decrease of \$28.4 million from 1969. Included in capital outlay is \$313.3 million in 1970 and \$324 million in 1971 for making loans from the fund which will later be sold on an insured basis. The volume of sales of loans from the fund is based on all insured loans being made by the fund for later sale in order to permit a premium yield to investors. Insured loans outstanding, which are contingent liabilities against the insurance fund, are expected to increase from \$1,548 million on June 30, 1969 to approximately \$1,780 million at June 30, 1970, and \$2,134 million by June 30, 1971.

Financing.—Net repayments to the Treasury are estimated at \$15 million in 1970 and \$115 million in 1971.

Operating results and retained earnings.—Total revenue, consisting of loan insurance charges and interest income on loans held by the fund, is estimated at \$29.8 million in 1970 and \$26.3 million in 1971.

Net outstanding loans receivable of \$213.9 million are estimated at June 30, 1971. By the end of 1971, the deficit of \$96.7 million when subtracted from the \$1 million appropriation and estimated borrowings of \$234.3 million from the Treasury represent a \$138.6 million Government equity.

¹ Balance of selected resources are identified on the statement of financial condition (analysis of equity of States).

These funds are administered by the Administration under agreements with 36 individual States, for use in carrying out subtitles A and B of the Consolidated Farmers Home Administration Act of 1961. In these States, real-estate-type loans are purchased with these funds and insured under the Agricultural Credit Insurance Fund. The entire assets of the 36 State corporations are being administered by the Farmers Home Administration, with the exception of \$17.9 million representing the partial return of cash or other assets, at face value, to 18 of these States for rural rehabilitation purposes agreed upon between each corporation and the Federal Government. The entire assets of six other State rural rehabilitation corporations have been returned to those States.

Actual and estimated loan obligations for the fiscal years 1968, 1969, 1970, and 1971 are as follows (in thousands of dollars):

The preceding schedule reflects expenditures from the Consolidated Working Fund, Department of Agriculture. Advances were received from the Department of Commerce, Economic Development Administration (formerly the Area Redevelopment Administration) for operations carried out as well as special technical assistance projects. Funds were received into this account as an administrative convenience and were allotted to the individual agencies of the Department which carried out the program.

OFFICE OF THE INSPECTOR GENERAL

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Inspector General, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$10,000 for employment under 5 U.S.C. 3109, **[\$13,657,000]** \$15,846,000. (7 U.S.C. 450b, 2201, 2202, 2220; Department of Agriculture and Related Agencies Appropriation Act, 1970.)

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$100 thousand (1969 adjustments, -\$48 thousand); 1969, \$32 thousand; 1970, \$32 thousand; 1971, \$32 thousand.

Note.—Includes \$49,000 for activities previously financed from Salaries and expenses, Agricultural Research Service, 1969, \$49,000; 1970, \$49,000.

The Office serves as the audit and investigative arm of the Secretary. It performs all audit and investigative activities of the Department. The Office assures the Secretary of completely independent and objective selection of departmental activities for audit; critical reviews and examination of the Department's programs and activities; and factual, unbiased reporting of the results of these audits and investigations. This assures that existing laws, policies, and Department regulations are complied with, that Department programs are effectively managed, and that corrective action is taken where necessary.

The Office also coordinates internal audit and investigative activities of the Department with other investigative agencies of the executive and legislative branches of the Government.

The recommended increase is for additional audit and investigative service, primarily for the food and nutrition programs and for the agricultural stabilization and conservation program.

¹ Includes capital outlay as follows: 1969, \$13 thousand; 1970, \$17 thousand; 1971, \$14 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$27 thousand (1969 adjustments, -\$18 thousand); 1969, \$35 thousand; 1970, \$35 thousand; 1971, \$35 thousand.

This program is aimed at assuring fair play in the marketing of livestock, meat, and poultry. Its principal purpose is to maintain effective competition for livestock, meats, and poultry, so as to bring to farmers and ranchers the true market value of their livestock and poultry. Members of the livestock, poultry, and meat industries are also protected against unfair business practices of competitors. Consumers are also protected from unfair practices in the marketing of meats and poultry, and from restrictions on competition which could unduly increase meat and poultry prices.

The increase for 1971 will be used to expand the Department's activities in the areas of (1) livestock and poultry marketing practices, (2) effective competition, (3) checkweighing livestock, and (4) financial protection.

The volume of work performed is indicated by the following examples:

	1969 actual	1970 est.	1971 est.

The Office serves as legal counsel for the Secretary and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law. It represents the Department in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department activities.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, agricultural and closely related groups, and to the public the Department's research, action, regulatory, and other programs, using all information media. This work is carried on in close cooperation with the land-grant institutions and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

1. *Publications review and distribution.*—The Department's printed publications are reviewed, published, and distributed. Processed publications are reviewed. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's widespread activities require extensive preparation of information material for

press, radio, and television use, as well as for specific agricultural outlets and the general public. Periodic crop, price, and market reports and press releases are issued. Digests, newsletters, special articles, and other editorial services are made available to press associations, farm and general publications, trade publications, daily newspapers, and encyclopedic annuals. Radio is used to reach farmers locally through single stations, and to broadcast nationally through the major networks. Films, television packages, and other services are prepared for the use of land-grant institutions, television farm broadcasters, and TV networks. Information campaigns involving activities of cross-agency interest are developed using all media. The Yearbook of Agriculture is published by the Office and distributed by the Members of Congress.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and nonprofit organizations associated with agriculture, produced on a reimbursable basis under the Department's working capital fund, are distributed through cooperating State film libraries. Still photographs, illustrations, graphics, and exhibits are similarly produced for use in explaining and reporting on Department programs. News and general-type photographs of Department programs and activities are available to news media from a centralized library.

¹ Includes capital outlay as follows: 1969, \$61 thousand; 1970, \$35 thousand; 1971, \$7 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$715 thousand (1969 adjustments, -\$10 thousand); 1969, \$569 thousand; 1970, \$569 thousand; 1971, \$569 thousand.

Note.—Includes \$13 thousand in 1971 for activities previously financed from: Salaries and expenses, Office of Management Services.

The National Agricultural Library, cooperating jointly with the two other national libraries—the Library of Congress and the National Library of Medicine—provides coverage and servicing of worldwide publications in the agricultural, chemical, and biological sciences. It serves the research, extension, regulatory, and other programs of the Department and State agricultural agencies. Since the library's primary purpose is to provide for research needs, it has acquired and preserved what is considered to be the most exhaustive body of literature available on all phases of agriculture and the allied sciences—botany, chemistry, animal industry, veterinary medicine, biology,

agricultural engineering, rural sociology, forestry, entomology, food and nutrition, soils and fertilizers, and the marketing, transportation, and other economic aspects of agricultural products. Publications are currently acquired from more than 150 governments and jurisdictional entities in some 50 different languages. In addition, printed information of agricultural societies, organizations and cooperatives, and general material in the field of agriculture are collected and made available for use.

Information contained in the agricultural literature is disseminated through bibliographies, reference services, loans and photocopies to agricultural colleges and universities, research institutions, Government agencies, agricultural associations, industry, individual scientists, farmers, and the general public in every part of the world.

During 1969, 214,772 separate issues of periodicals were added to the collection by purchase, gift, and exchange. During the same period, 173,621 loans of books and periodicals were made and 110,166 reference questions answered.

The increase proposed would be used to develop, expand, and maintain a comprehensive collection of agricultural materials, through the acquisition and processing of additional books and periodicals. The materials will be used for the purpose of providing more complete and timely agricultural information to users.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders. 1968, \$1,253 thousand; 1969, \$164 thousand; 1970, \$0; 1971, \$0.

Funds for the preparation of plans, specifications, and drawings for new facilities were appropriated in 1964.

Funds were appropriated in fiscal year 1966 for construction of the new library at Beltsville, Md. The construction contract was awarded in November 1966. The cornerstone of the building was laid on September 28, 1967. During fiscal year 1969 the building was accepted by GSA as "substantially completed" and the library staff and collection were transferred to the new building between May 15 and June 15, 1969. Final settlement for this building has not been made because certain corrections are still pending. The increase proposed would be used for the construction and furnishing of a cafeteria and related facilities in the National Agricultural Library at Beltsville, Md.

¹ Includes capital outlay as follows: 1969, \$14 thousand; 1970, \$50 thousand; 1971, \$90 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$47 thousand (1969 adjustments, -\$8 thousand); 1969, \$56 thousand; 1970, \$56 thousand; 1971, \$56 thousand.

Note.—Excludes \$13 thousand in 1971 for activities transferred to National Agricultural Library, Salaries and expenses.

The Office of Management Services (OMS) provides consolidated and centralized management support services to several agencies and offices of the Department. It was established by Secretary's Memorandum No. 1529, dated January 29, 1963, to provide greater economy and effectiveness in the rendering of management service and advice through improved utilization of manpower and management techniques, increased specialization of professional skills, and more extensive use of timesaving equipment.

The consolidated management support functions include budget and finance, personnel and related programs, administrative services, and public information work. These functions are financed by direct appropriation to OMS, except for activity performed for others on a reimbursable or advance payment basis; OMS is reimbursed for management support of these activities.

The organizational structure of OMS is based upon these functions with operating divisions providing the services for the following agencies and offices: Office of the Secretary, Office of Budget and Finance, Office of Hearing Examiners, Judicial Officer, Office of Management Improvement, Office of Personnel, Office of Plant and Operations, Rural Community Development Service, Office of Information, National Agricultural Library, Office of the General Counsel, Office of the Inspector General, Farmer Cooperative Service, Commodity Exchange Authority, Cooperative State Research Service, Economic Research Service, Statistical Reporting Service, Federal Economic Development Service, and the Packers and Stockyard Administration.

The proposed increase will provide management support services for the increased program levels requested by the agencies and offices served by OMS. In addition, it will provide for replacement of equipment used in essential accounting and budgeting processes; for design, implementation, and automation of accounting systems; and for training OMS personnel.

¹ Includes capital outlay as follows: 1969, \$12 thousand; 1970, \$15 thousand; 1971, \$15 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$108 thousand (1969 adjustments, \$24 thousand); 1969, \$166 thousand; 1970, \$166 thousand; 1971, \$166 thousand.

General administration covers the overall planning, coordination and administration of the Department's

programs. Also included are certain services on a Department-wide basis.

2. *Budgetary and financial administration.*—This covers departmental budgetary and financial management. Policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial and related implications.

3. *General operations.*—These embrace departmental policies and procedures for real and personal property and supply activities. Department-wide central services of mail distribution, telephone, telegraph, reproduction, and supply are furnished.

4. *Management improvement.*—This covers the coordination and direction of the development of new and improved management techniques, acquisition and utilization of data processing equipment, development of methods of measuring the effectiveness of program operations, records management, and the application of operations research techniques to the administrative, program and scientific activities of the Department.

5. *Personnel administration.*—This covers general direction, leadership, and coordination of the personnel management program of the Department. Departmental policies and procedures are issued, and the Office coordinates a review program to evaluate the effectiveness of agency personnel programs. Cost reduction and related management improvement programs for the Department are also administered by this Office.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with prescribing new regulations and orders and on disciplinary complaints filed by the Department, or on petitions filed by private parties asking relief from actions of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. "Agriculture Decisions" is published monthly.

7. *Equal opportunity.*—This covers program and policy direction in the development and enforcement of Department equal opportunity responsibilities; review, analysis, and evaluation of agency programs and operations to ascertain compliance with applicable policies, rules and regulations of the Department and the Government; and processing of complaints made to the Department on discrimination in Department programs, including final Department disposition.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund finances by advances or reimbursements certain central services in the Department, including duplicating, photographic, and other visual information services, art and graphics, motion picture, tabulating, supply, library photocopy and micro-filming services, civil defense activities, interagency employee training programs, mail and messenger services, and the centralized automatic data processing system for payroll, financial management, and other services.

The capital consists of \$400 thousand appropriated (5 U.S.C. 542-1), \$608 thousand in donated assets, and accumulated earnings of \$216 thousand as of June 30, 1969. Earnings are kept at a low level through adjustments in rates charged for services, to maintain as nearly as possible the nonprofit nature of the fund.

FOREST SERVICE

The Service carries on three primary functions: (1) protection, development, and use of about 187 million acres of land in national forests and national grasslands in the United States and Puerto Rico; (2) forestry research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to improve methods for developing and managing recreation resources; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey; and (3) cooperation with States and private landowners to obtain better fire protection on approximately 519 million acres of forest land and nonforest watersheds; to provide technical advice and financial assistance to promote development, improvement, and expansion of forest pest detection and suppression programs; to improve forest practices on about 395 million acres of State and local government and privately owned commercial timber lands; and to encourage reforestation and stimulate development and management of State, county, and community forests.

These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

Federal Funds

General and special funds:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$192,810,000] \$211,561,000**, of which \$4,275,000 for fighting and preventing forest fires and \$1,910,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than \$1,300,000 of this appropriation may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U.S.C. 513-519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$42,137,000] \$45,066,000**.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **[\$22,729,000] \$21,939,000**. (7 U.S.C. 428a, 1010-1012, 1621-1627, 2201, 2202, 2250; 16 U.S.C. 207c, 471-583i, 594-1-594-5, 594a, 1004, 1005; 30 U.S.C. 601-604, 611-615; 81 U.S.C. 534; 42 U.S.C. 1891-1893; 43 U.S.C. 1181h-1181j; 36 Stat. 557-579; 67 Stat. 633; Department of the Interior and Related Agencies Appropriation Act, 1970.)

Total selected resources.....	27,750	28,184	24,971	25,350

1. *Forest land management.*—(a) *National forest protection and management.*—The 154 national forests and 19 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wildlife are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land. These management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (74 Stat. 215). Work programs and budget estimates are related to the development program for the national forests, a plan to meet the increasing demands for specific national forest resource needs through 1972 and for long-term objectives to the year 2000. Increases are provided in the budget to further attainment of these program objectives. Construction funds of \$9.9 million are budgeted for construction or rehabilitation of campground and picnic facilities and other recreation improvements; the construction of dwellings or barracks for employee housing; fire lookouts; service and storage buildings; communication facilities; and other improvements. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

MAIN WORKLOAD FACTORS

Description	1969 actual	1970 estimate	1971 estimate
Area administered and protected:			
(a) National Forest lands (acres).....	182,681,252	182,989,100	183,289,200
(b) National Grasslands (acres).....	3,801,807	3,802,400	3,803,400
(c) Land utilization projects (acres).....	149,093	149,100	149,100
Timber managed and protected (billion board feet).....	1,100	1,105	1,099
Timber sales (number).....	147,366	150,000	155,000
Timber harvested (billion board feet).....	11.8	12.9	13.4
Grazing use permits (calendar year):			
Paid.....	18,500	18,500	18,500
Exempt.....	50,000	50,000	50,000
Estimated number of livestock on National Forest ranges (including calves and lambs).....	7,260,000	7,300,000	7,400,000
Special use permits, excluding recreation (number).....	45,730	46,500	48,300
Recreation special use permits (number).....	21,000	22,000	23,000
Estimated number of visitor days to National Forests (calendar year).....	167,200,000	178,000,000	192,500,000
Tree planting and seeding (acres).....	112,455	105,900	140,000
Timber stand improvement (acres treated).....	122,432	127,500	216,000
Range reseeding and removal of competing vegetation (acres).....	178,000	210,000	210,000
Receipts (thousands of dollars):			
Timber sales.....	306,811	336,700	371,400
Grazing.....	3,842	4,328	4,415
Power.....	152	152	152
Recreation.....	2,468	2,670	2,870
Admission and user fees.....	1,237	1,540	1,840
Land uses.....	4,658	4,737	4,860
National grasslands and land utilization.....	2,087	2,130	2,165
Total receipts.....	321,255	352,257	387,702

(b) *Water resource development related activities.*—This activity provides for the development of recreational facilities and for other activities, required by water resource projects of other agencies, which are located within or adjacent to the national forests.

(c) *Fighting forest fires.*—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. Costs above the amounts estimated for the current and budget years are authorized to be met from advances from other Forest Service appropriations. In addition, a supplemental appropriation for fighting forest fires is anticipated for 1970 (proposed for later transmittal).

	Calendar year		
	1968 actual	1969 estimate	1970 estimate
Forest fires controlled (number)-----	9,731	9,500	10,400
Area burned (acres)-----	212,420	95,000	202,000

(d) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and evaluate infestations of forest insects and infections of tree diseases, and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust.

(e) *Acquisition of lands.*—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber, with the approval of the National Forest Reservation Commission.

2. *Forest research.*—Research is conducted at eight regional forest experiment stations, the Forest Products Laboratory, and the Institute of Tropical Forestry.

(a) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage for domestic livestock and improve habitat for wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water and reduce floods and sedimentation; and improve methods for developing and managing recreation resources.

(b) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. Forest fire research provides improved methods of predicting fire danger, and preparing for and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(c) *Forest products and engineering.*—Studies are conducted to develop: New and improved forest products, reduction and utilization of waste, and use of low-quality wood and less-desirable species. These include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers. Research is also conducted to advance the mechanization and efficiency of forestry operations, and to develop and evaluate machines and similar equipment for such operations as logging, planting, timber-stand improvement, and protection of forests.

(d) *Forest resource economics.*—Investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Studies of the economics of forest crop production and of marketing of forest products are also included.

3. *State and private forestry cooperation.*—These programs are carried on with the States, other public agencies, and private agencies and individuals. Their purposes are to improve forest management on private and non-Federal public lands, and improve the production of forest products and services. By so doing, the welfare of rural people will be improved and an adequate supply of forest resources for the future will be assured. The privately owned forest lands that are involved comprise three-fourths of the Nation's commercial forest area and produce about 75% of all timber cut.

(a) *Forest fire control.*—Assistance is furnished 50 States in preventing and suppressing forest fires on private and State-owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 94% of the 519 million acres of non-Federal ownership planned for protection is now covered. During 1968 the acreage burned on protected areas was 0.33% as against an estimated 4.88% on unprotected lands. Of the total expenditures under this program, 84.7% is contributed by States and counties, 1.3% by private owners, and 14.0% by the Federal Government.

(b) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 70 million acres altogether—the States provide planting stock at reasonable prices. The Federal Government shares the cost of producing the stock with the State and private landowners.

(c) *Forest management and processing.*—In cooperation with 49 States, Puerto Rico, and the Virgin Islands, technical assistance is given to woodland owners in applying good multiple use management to their forest holdings. Also, assistance is provided operators of small primary forest products manufacturing plants to improve their production and marketing. In 1969, 113,000 owners and 13,300 processors were assisted.

(d) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

Proposed for separate transmittal, existing legislation:

FOREST PROTECTION AND UTILIZATION

Program and Financing (in thousands of dollars)

Identification code 05-96-1100-1-1-402	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Forest land management: Fighting forest fires (costs—obligations).....		21,000	
Financing:			
40 Budget authority (proposed supplemental appropriation).....		21,000	
Relation of obligations to outlays:			
71 Obligations incurred, net.....		21,000	
90 Outlays.....		21,000	

A supplemental appropriation of \$21 million for 1970 is anticipated for fighting forest fires.

COOPERATIVE RANGE IMPROVEMENTS

For artificial revegetation, construction, and maintenance of range improvements, control of rodents, and eradication of poisonous and noxious plants on national forests in accordance with section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), to be derived from grazing fees as authorized by said section, \$700,000, to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1970.*)

Program and Financing (in thousands of dollars)

Identification code 05-96-5207-0-2-402	1969 actual	1970 est.	1971 est.
Program by activities:			
10 Advanced to forest protection and utilization (cost—obligations) (object class 25.0).....	700	700	700
Financing:			
40 Budget authority (appropriation) (special fund).....	700	700	700
Relation of obligations to outlays:			
71 Obligations incurred, net.....	700	700	700
90 Outlays.....	700	700	700

Part of the grazing fees from the national forests, when appropriated, are used to protect or improve the productivity of the range, mainly by construction and maintenance of fences, stock watering facilities, bridges, corrals, and driveways. These funds are advanced to and merged with the appropriation Forest protection and utilization, subappropriation Forest land management.

FOREST ROADS AND TRAILS (LIQUIDATION OF CONTRACT
[AUTHORIZATION] Authority)

For expenses necessary for carrying out the provisions of title 23, United States Code, sections 203 and 205, relating to the construction and maintenance of forest development roads and trails, [\$100,570,000] \$115,000,000, to remain available until expended, for liquidation of obligations incurred pursuant to authority contained in title 23, United States Code, section 203: *Provided*, That funds available under the Act of March 4, 1913 (16 U.S.C. 501), shall be merged with and made a part of this appropriation: *Provided further*, That not less than the amount made available under the provisions of the Act of March 4, 1913, shall be expended under the provisions of such Act. (7 U.S.C. 2250; 16 U.S.C. 532-536; 23 U.S.C. 101, 125, 209; 79 Stat. 132; Department of the Interior and Related Agencies Appropriation Act, 1970.)

Appropriation to liquidate contract authority.....			
	91,000	100,570	115,000

Roads and trails are essential to protection and management of national forests and utilization of their resources.

The Federal-Aid Highway Act of 1968 provides authority of \$170 million each for 1970 and 1971. The authority is available for obligation a year in advance of the year for which authorized. This budget provides for utilization of \$15.8 million unused 1969 authorization and \$116.4 million of unused 1970 authorization.

The 1971 program will involve the construction and reconstruction of about 1,529 miles of general purpose and recreation roads and timber access roads to harvest national forest timber. This compares with 1,028 miles built in 1969 and 1,324 miles being built in 1970.

Of the revenues received annually from national forest activities, 10% is available under the permanent appropriation Roads and trails for States, for construction and maintenance within the States from which such proceeds are derived. Such amounts are merged with this appropriation for obligational purposes.

ACQUISITION OF LANDS FOR NATIONAL FORESTS

SPECIAL ACTS

For acquisition of land to facilitate the control of soil erosion and flood damage originating within the exterior boundaries of the following national forests, in accordance with the provisions of the following Acts, authorizing annual appropriations of forest receipts for such purposes, and in not to exceed the following amounts from such receipts, Cache National Forest, Utah, Act of May 11, 1938 (52 Stat. 347), as amended, \$20,000; Uinta and Wasatch National Forests, Utah, Act of August 26, 1935 (49 Stat. 866), as amended, \$20,000; Toiyabe National Forest, Nevada, Act of June 25, 1938 (52 Stat. 1205), as amended, \$8,000; [Cleveland] Angeles National Forest, California, Act of June 11, 1940 (54 Stat. [297] 299), \$32,000; in all, \$80,000: *Provided*, That no part of this appropriation shall be used for acquisition of any land which is not within the boundaries of the national forests and/or for the acquisition of any land without the approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1970.*)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$199 thousand (1969 adjustments, -\$1 thousand); 1969, \$185 thousand; 1970, \$0; 1971, \$0.

1. *Acquisition of lands for Uinta National Forest.*—79 Stat. 899, approved October 1, 1965, provided authorization for the appropriation of \$300 thousand for purchase of nonfederally owned land to promote the control of floods and the reduction of soil erosion through restoration of adequate vegetative cover. The full amount of this authorization was appropriated in fiscal year 1967. As of June 30, 1969, 8,847 acres have been approved for purchase.

2. *Acquisition of lands for Wasatch National Forest.*—76 Stat. 545, approved September 14, 1962, added some 24,000 acres to the Wasatch National Forest and authorized the appropriation of \$400 thousand for purchase of privately owned lands within the area to aid in the control of floods and reduction of soil erosion. The 1965 appropriation completed the authorization. As of June 30, 1969, approximately 12,345 acres of land had been acquired.

3. *Acquisition of lands for Superior National Forest.*—The authorization for the purchase of land within this forest was increased to \$4.5 million (16 U.S.C. 557c-577h). The 1963 appropriation completed the authorization for acquisition of the remaining tracts.

4. *Acquisition of lands for Cache National Forest.*—Lands are acquired to enable control and minimization of soil erosion and flood damage.

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriations, as follows:

- Agriculture:
 - Agricultural Stabilization and Conservation Service: "Expenses."
 - Soil Conservation Service:
 - "Flood prevention."
 - "Watershed planning."
 - "Works of improvement."
 - "River basin surveys and investigations."
 - "Resource conservation and development."
- Funds appropriated to the President:
 - "Office of Economic Opportunity."
 - "Appalachian regional development programs, executive."
- Interior:
 - Bureau of Land Management, "Oregon and California grant lands."
 - Bureau of Outdoor Recreation, "Land and water conservation fund."
 - National Park Service, "Management and protection."
 - National Park Service, "Maintenance and Rehabilitation of Physical Facilities."
- Commerce: Economic Development Assistance, "Development Facilities."
- Transportation: Federal Highway Administration, "Federal-Aid Highways Trust Fund."

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed [two] one

hundred and [twelve] ninety passenger motor vehicles of which one hundred and [eighty] seventy shall be for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed [two] four for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$25,000 for employment under 5 U.S.C. 3109; (c) uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); (d) purchase, erection, and alteration of buildings and other public improvements (7 U.S.C. 2250); (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514); and (f) acquisition of land and interests therein for sites for administrative and not to exceed \$75,000 for research purposes, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a).

Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513-519, 521), where such land is not within the boundaries of an established national forest or purchase unit. (*Department of the Interior and Related Agencies Appropriation Act, 1970.*)

Distribution of outlays by account:			
Roads and trails for States, national forests fund.....	20,931	31,206	34,292
Brush disposal.....	9,017	14,100	14,475
Forest fire prevention.....	63	92	127
Restoration of forest lands and improvements.....	14	25	25
Payment to Minnesota.....	146	258	258
Payments to counties, national grasslands.....	538	488	488
Payments to school funds, Arizona and New Mexico.....	90	125	125
Payments to States, national forests fund.....	52,151	78,204	85,728

1. *Roads and trails for States, national forests fund.*—With minor exceptions, 10% of the money received from the national forests is advanced to and merged with the appropriation Forest roads and trails for construction and maintenance of roads and trails within the State from which such proceeds are derived (16 U.S.C. 501).

2. *Brush disposal.*—Payments made for this purpose by purchasers of national forest timber are used to dispose of or treat slash and other debris that result from cutting operations (16 U.S.C. 490).

3. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

4. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (16 U.S.C. 579c).

5. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

6. *Payments to counties, national grasslands.*—Of the revenues received from the use of national grasslands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

7. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national forest receipts for school purposes (36 Stat. 562, 573).

8. *Payments to States, national forests fund.*—With minor exceptions, 25% of the money received from the national forests is paid to the States for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

The Working capital fund was established by the act of August 3, 1956 (16 U.S.C. 579b), as amended by the act of October 23, 1962 (16 U.S.C. 579b). It is a self-sustaining revolving fund which provides services to national forests, experiment stations, and when necessary, to other Federal agencies, and as provided by law to State and private agencies and persons who cooperate with the Forest Service in fire control and other authorized programs.

The Working capital fund requires no cash appropriation. Initially, its assets were purchased by regular Forest Service appropriations and donated to the fund. Where expansion of Working capital fund operations is required it generally is financed prorata by benefiting Forest Service appropriations and the resulting assets are donated to the fund. In some instances, assets have been obtained without cost to Forest Service appropriations or the Working capital fund. In other instances, the expansion was financed by the Working capital fund.

The following services were provided by the Working capital fund in fiscal year 1969:

1. *Equipment service.*—This service owns, operates, maintains, and replaces approximately 13,500 pieces of common use motor driven and similar equipment. This equipment is rented to a total of 166 proclaimed national forests, experiment stations and other units, and in some cases to other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which when added to depreciation earnings and the residual value of equipment provides sufficient funds to replace the equipment. This service operates 90 repair shops.

2. *Aircraft service.*—This service operates and maintains 57 Forest Service-owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are based at 11 locations and are rented to national forests, experiment stations, and in some cases to other agencies, at rates which recover the cost of operation, maintenance, repair, and improvements in the air-worthiness of the aircraft. Replacement costs and the costs of additional aircraft are financed prorata by benefiting Forest Service appropriations. This service operates three aircraft maintenance shops.

3. *Supply service.*—This service operates the following common services:

(a) *Central supply.*—This service has two locations for procurement, warehousing, and supply of common use items, such as work project tools, provisions, and supplies. Grass seed is procured, stored, and issued from two other locations. Issuances and sales are made to national forests, experiment stations, and others at prices which recover cost.

(b) *Photo reproduction.*—Four photo reproduction laboratories store, reproduce, and supply aerial photographs, aerial maps, and other photographs of national forest lands. The photographic reproductions are sold to national forests, experiment stations, and others at cost.

(c) *Sign shops.*—These include 11 small shops which manufacture and supply special signs for the national forests for use in regulating traffic and as information to the public and other users of the national forests. The signs are sold to national forests and experiment stations at cost.

(d) *Subsistence.*—There are 28 facilities which prepare and serve meals at cost to Forest Service work crews working in remote areas where adequate public restaurant facilities are not available.

(e) *Cribbing.*—This facility is located on the Angeles National Forest, Calif., to manufacture special concrete structural material used in embankments for erosion control purposes along access roads in the national forests. This material is sold to national forests at prices which recover costs.

4. *Nurseries.*—This service operates 14 forest tree nurseries and cold storage facilities for storage of tree and seed stock, and one seed extractory. Tree seed is procured, cleaned, bagged, and stored in refrigerated facilities. Tree and seed stock is sold to national forests, States, and other Federal agencies at cost.

Legislation will be proposed to authorize charging users for the full cost of services provided under the Cotton Statistics and Estimates Act, Tobacco Inspection Act, and U.S. Grain Standards Act. It is estimated that receipts will total \$4,523 thousand in 1971.

In addition, a reduction of \$54 thousand is anticipated for 1971 resulting from proposed legislation to repeal the Tobacco Seed and Plant Exportation Act of 1940 and the Naval Stores Act of 1923.

Proposed for separate transmittal, proposed legislation :

Legislation will be requested to require producers and handlers to pay Federal administrative expenses of the marketing agreements and orders program.

GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [five hundred and fifty-two (552)] *six hundred and sixty-two (662)* passenger motor vehicles, of which [four hundred and sixty-eight (468)] *four hundred and fifty-six (456)* shall be for replacement only, and for the hire of such vehicles.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

SEC. 507. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 508. None of the funds in this Act shall be available to finance interdepartmental boards, commissions, councils, committees, or similar groups under sec. 214 of the Independent Offices Appropriation Act, 1946 (31 U.S.C. 691) which do not have prior and specific Congressional approval of such method of financial support.

SEC. 509. No part of the funds appropriated under this Act shall be used to pay salaries of any Federal employee who is convicted in any Federal, State, or local court of competent jurisdiction, of inciting, promoting, or carrying on a riot, or any group activity resulting in material damage to property or injury to persons, found to be in violation of Federal, State, or local laws designed to protect persons or property in the community concerned.

SEC. 510. Positions in the agencies covered by this Act, whether financed from funds contained in this Act or from other sources, may be filled during the fiscal year 1970 without regard to the provisions of section 201 of Public Law 90-364, and such positions shall not be taken into consideration in determining numbers of employees under subsection (a) of that section or numbers of vacancies under subsection (b) of that section. (Department of Agriculture and Related Agencies Appropriation Act, 1970.)

The Office contributes to the advancement of the economy through the preparation of facts and analyses essential to the formulation and execution of policies relating to the major economic problems that confront the Nation. The principal programs are:

1. *Preparation of national income and product data.*—Calculations are made of the gross national product, national income, personal income, and their components, providing an overall view of the state of the economy. Input-output accounts supplement the national income and product accounts by providing a closeup of the manner in which the various industries interact in the production of the national output. Regional accounts provide a profile of our economy by States and smaller subdivisions. During 1971, programs to provide monthly estimates of the gross national product, new measures for evaluating the economic impact of Federal activity, and more timely estimates of interindustry relationships will be initiated.

2. *Analysis of business trends.*—The business situation is assessed monthly, and the results of continuing analyses of the major factors underlying cyclical developments and long-range business trends are published regularly. Included are surveys that collect information on business investment plans, and the work on an econometric model which forecasts the future movement of the gross national product, its components, and other key elements in the national accounts. During 1971, the existing plant and equipment survey will be expanded (1) to include industries not now covered; and (2) to provide separate information on expenditures for plant and equipment.

3. *Computation of the balance of payments.*—Balance-of-payments accounts provide yet another elaboration of the national income and product accounts by depicting in detail all economic transactions with foreign nations.

1. *Distribution and service.*—Periodic sample surveys are conducted which provide estimates of retail sales (1) weekly for major kinds of business, and monthly for individual kinds of business for the total United States and (2) monthly for summary and selected kinds of business for regions, census geographic divisions, and selected large States and individual standard metropolitan statistical areas (SMSA's), and monthly sales of department stores for many SMSA's and counties. Also provided are end-of-month national estimates of retail inventories and accounts receivable balances by kind of business,

BUREAU OF THE CENSUS—Continued

General and special funds—Continued

SALARIES AND EXPENSES—continued

annual national estimates of sales-inventory ratios by kind of business, and annual national measures on the merchandise line composition of retail sales. Surveys also provide (1) monthly national estimates of the receipts of selected service trades and (2) sales and inventories of merchant wholesalers for individual kinds of business on the national level, and for summary and selected kinds of business for major geographic regions. In addition, during the marketing season, estimates are made of canned food stocks held by distributors, and quarterly reports are prepared regarding green coffee roastings, and inventories.

A county business patterns report, providing statistics on employment payrolls by detailed kinds of business and by individual county, is prepared annually; this report covers nonfarm paid employment included in the social security program.

In 1971, the Service Trades Survey will be extended to provide for the collection of data for nonprofit organizations; engineering and architectural services; accounting, auditing and bookkeeping services; and some additional miscellaneous services not elsewhere classified. This extension will provide substantially complete coverage of the service trades. In addition, work will be initiated to improve the accuracy of an advance monthly retail trade report.

2. *Construction.*—Monthly reports are published for housing starts, residential and nonresidential construction authorized by building permits, and the value of new construction put in place. Quarterly reports are provided on expenditures for residential alterations and repairs, and annual price indexes are compiled for new single-family houses sold, including value of site.

In 1970, quarterly national and annual regional price indexes will be developed for new single-family houses, and quarterly national and annual regional price indexes will be developed for multifamily dwellings.

In 1971, the quality of the data on value of new non-residential building construction put in place will be improved, and separate data for significant types of non-residential building construction will be provided. In addition, price indexes for: (a) school and (b) hospital construction will be developed.

3. *Manufacturing.*—Statistics are provided monthly on manufacturers' sales, orders, and inventories for total manufacturing and for about 35 industry breakdowns. In 1970, the inventory data for nonmanufacturing locations of manufacturing companies will be included. An Annual Survey of Manufactures produces statistics on the important measures of factory operations such as employment, value added by manufactures, shipments in total and by class of products, inventories, and investment. Separate data are provided for the defense activities in defense-oriented industries. Monthly, quarterly, and annual surveys are conducted of production, shipments, orders, and materials consumed for important industries and products. Statistics are also being developed to provide measures of the forces changing the location, structure, and growth of industry.

In 1971, work will begin on a report of industrial mergers, acquisitions, and disposals for the years 1967 through 1969. The report will be prepared annually when the 1967, 1968, and 1969 reports are completed.

4. *Foreign trade.*—Monthly, quarterly, and annual reports are published on the quantity, shipping weight, dollar value of imports and exports, by mode of transportation, detailed commodity category, customs district and country of origin or destination.

5. *Transportation.*—Methods are developed and tested for undertaking or improving periodic surveys in transportation areas as directed by statutory requirements.

6. *State and local governments.*—Reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. Quarterly information on the national level is furnished regarding State and local tax revenue by type of tax and governmental level. Technical consultation and assistance are provided to State and local government officials, and catalogs are published detailing the statistical publications and data available at the Census Bureau which would be of use to State and local governmental officials. Statistics regarding the construction expenditures of State and local governments are provided monthly.

In 1971, the local government employment and finances surveys will be expanded to provide comprehensive comparative statistics for the 72 largest standard metropolitan statistical areas, their 223 component county areas, and for 47 other county areas having 200,000 or more inhabitants. Financial statistics will be developed for cities of 50,000 or more inhabitants.

7. *Population.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility, and other characteristics of the population, as well as statistics concerning purchases, stocks, and intentions to purchase. It also provides annual estimates of the population of the United States, of each of the States, and for a limited number of standard metropolitan statistical areas. A developmental program is underway to prepare local area estimates of population and income through the use of administrative records. Statistics from existing surveys are used to prepare statistical reports and analyses on poverty trends.

In 1971, work will start on updating the Current Population Survey Sample, and on the expansion and improvement of its social statistics content. A Federal-State Co-operative Program for preparing local population estimates will be implemented.

8. *Housing.*—National and regional quarterly estimates are provided for housing vacancy rates. The program also provides vacancy rates by broad classes of the rental and homeowner portions of the housing market and to produce selected characteristics of the occupied inventory. In addition, technical assistance is available to local areas wishing to conduct vacancy surveys.

In 1971, a program to provide objective indicators of neighborhood blight having nationwide applicability will be developed.

9. *Agriculture.*—Information on cotton ginnings and production, as required by statute, is compiled and published. Statistical services are provided regarding the information from the census of agriculture.

10. *Statistical abstract and special reports.*—The "Statistical Abstract," issued annually, summarizes government and private statistics on the industrial, social, political, and economic activities of the United States. A comprehensive set of statistical indicators is published monthly in the "Business Conditions Digest" report; the principal time series on defense activity which influence short-term

changes in the national economy are published monthly in "Defense Indicators;" and a report is published on "Long-Term Economic Trends." Other general reports are published periodically.

11. *Boundary and coding guide updating.*—This program will update the Bureau's present area boundary and address location files to recognize changes in boundaries of incorporated places and to reflect changes in street patterns resulting from urban developments.

12. *Research and development.*—Research and development is conducted on survey methods and techniques, including sample survey methods and theory, questionnaire design, response errors, equipment design and utilization, computer editing, and administrative control, operations, analytical techniques including techniques of geographic analysis, for the purpose of increasing accuracy, output, and usefulness of statistical data per unit of cost.

The Nineteenth Decennial Census includes the census of population and housing and the census of agriculture.

1. *Census of population and housing.*—This census will provide counts of the Nation's population and housing units, as well as statistics regarding significant demographic characteristics of the country.

In 1971, State population counts for congressional apportionment will be furnished to the President by December 1, 1970. Data processing will continue and publication of the results begin. In addition, data will be collected (on a sample basis) for the Components of Housing Inventory and Residential Financing Surveys, and the Barriers to Employment Survey.

A supplemental appropriation for 1970 is anticipated for separate transmittal.

2. *Census of agriculture.*—This census will provide information on the number of farms, the characteristics of farms and farm operations, use of agricultural land, production, and sales of farm products, farm credit and debt, and principal cash expenditures.

In 1971, followup on nonrespondent cases will continue and be completed. Full-scale processing and the issuance of county reports will begin.

A census of governments is required "for the year 1957 and every fifth year thereafter" by 13 U.S.C. 161. The law specifies that "each such census shall include, but shall

not be limited to data on tax and tax valuations, governmental receipts, expenditures, indebtedness, and employees of States, counties, cities, and other governmental units."

In 1971, preparatory work relating to the content, timing, and coverage of the census will be completed. Planning on data collection and processing procedures will be initiated.

The 1972 Economic Censuses will supply statistics, as provided for in 13 U.S.C. 131, on the volume of production and trade, the number, size, geographical distribution,

and other characteristics of the Nation's business and industrial enterprises.

In 1971, preparatory work on planning the content, and the procedures for the collection, processing, and publication of the data will be initiated.

For expenses necessary for the purchase of two electronic computer systems and peripheral equipment, \$3,000,000. (13 U.S.C. 12.)

Program and Financing (in thousands of dollars)

Identification code 06-08-0425-0-1-506	1969 actual	1970 est.	1971 est.
Program by activities:			
Electronic equipment (total program costs, funded)	434	2	3,000
Change in selected resources ¹	-434	-2	
10 Total obligations (object class 31.0)			3,000
Financing:			
40 Budget authority (appropriation)			3,000
Relation of obligations to outlays:			
71 Obligations incurred, net			3,000
72 Obligated balance, start of year	735	264	
74 Obligated balance, end of year	-264		-3,000
77 Adjustments in expired accounts	-41		
90 Outlays	431	264	

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$459 thousand (1969 adjustments, -\$23 thousand); 1969, \$2 thousand; 1970, \$0; 1971, \$0.

In 1971, the appropriation request provides for the purchase of two computers and peripheral equipment needed to meet the Bureau's present and projected workload.

SURVEY OF POPULATION CHANGE

For expenses necessary to prepare for taking, compiling, and publishing statistics on social and economic changes, \$200,000, to remain available until December 31, 1974 (13 U.S.C. 181).

Program and Financing (in thousands of dollars)

Identification code 06-08-0431-0-1-506	1969 actual	1970 est.	1971 est.
Program by activities:			
Program costs:			
1. Survey of population change			179
2. General administration			21
10 Total program costs, funded—obligations			200
Financing:

Relation of obligations to outlays:			
71 Obligations incurred, net			200
74 Obligated balance, end of year			-25
90 Outlays			175

A large-scale sample survey is proposed for 1973, in order to measure postcensus changes in the social and economic characteristics of population and housing. Information would be supplied on a broad range of subjects covered in the 1970 census. Statistics would be provided separately for each State, for each metropolitan area, for each city with 100,000 or more inhabitants, and for areas of concentrated poverty in cities of 250,000 or more. Statistics would also be provided for the rural and urban parts of each State outside of metropolitan areas.

In 1971, planning work on the procedures of data collection, processing, and publication will be done.

² Reimbursements from non-Federal sources are derived at cost from State and local governments for special statistical work (13 U.S.C. 8(d)).

The Bureau undertakes work for governmental and other bodies to the extent that such work meets desirable public needs, can be performed without adversely affecting activities financed from funds appropriated to the Bureau, and can be more appropriately or efficiently performed by the Bureau than by the sponsoring agency.

Significant work includes the collection of data for the Bureau of Labor Statistics, the Department of Health, Education, and Welfare; and the providing of statistical training to foreign nationals and statistical assistance to underdeveloped countries. The latter two programs are financed by the AID.

The Bureau performs, at cost, special statistical work for State and local governments, universities, trade associations, and individuals requesting such data. These services are provided only when it has been determined that it is in the public interest; are consistent with the Bureau's duties; and that the statistics furnished will not identify individuals or particular organizations. In addition, the Bureau furnishes age and citizenship data from past census records on a fee basis. Funds received for these purposes are used to pay expenses in the performance of such work (13 U.S.C. 8).

77 Adjustments in expired accounts.....	-277		
90 Outlays.....	28,040	95,904	132,706

¹ Includes capital outlay as follows: 1969, \$26,356 thousand; 1970, \$21,600 thousand; 1971, \$38,000 thousand.

Note.—Excludes \$31,490 thousand in 1971 for activities transferred to Regional Development Programs; 1969, \$12,451 thousand; 1970, \$16,500 thousand.

Grants and loans for development facilities are made to improve the environmental essentials for growth and expansion of private enterprise, so as to increase employment and raise income in areas where economic growth is lagging behind the rest of the Nation.

1. *Redevelopment area assistance.*—Development facilities funds are concentrated on projects in redevelopment areas which promise the greatest contribution to the development process of combining the investments of public agencies and private groups to achieve economic growth.

Basic grants of up to 50% of project cost are made which will directly or indirectly assist in the creation of additional long-term employment opportunities and benefit the long-term unemployed and members of low-income families. Basic grants can be supplemented up to 80% of project cost depending upon the relative need of the area and nature of the project. Construction grants by other agencies may also be supplemented up to 80% of project cost so that the areas can take advantage of other Federal programs which will make a significant contribution toward stimulating economic growth.

Long-term, low-interest loans may also be a part of development facilities project financing when financial assistance is not otherwise available from private lenders or Federal agencies on terms which would permit accomplishment of the project. The interest rate on 1970 loans is 5¾%.

Program volume for redevelopment area assistance is estimated as follows:

	Projects		
	1969	1970	1971
New projects.....	160	412	500
Projects brought forward.....	150	113	219
Projects denied or withdrawn.....	9	62	177
Projects carried forward.....	113	219	357
Projects approved.....	188	244	185

2. *Economic development districts and centers assistance.*—This activity includes development facility grants and loans for projects in economic development centers, redevelopment centers, and redevelopment areas within economic development districts. Each district must include at least two redevelopment areas and have one or more designated centers. A center must be economically related to redevelopment areas so that its economic growth can be expected to alleviate economic distress in the district.

Additional funds for this activity will enhance the growth potential of underdeveloped multicounty districts and provide an alternative to the present migration patterns of the unemployed.

Program volume for economic development districts and centers assistance is estimated as follows:

	Projects

77 Adjustments in expired accounts.....	-142		
90 Outlays.....	14,903	52,014	42,050

¹ Includes capital outlay as follows: 1969, \$49,566 thousand; 1970, \$49,675 thousand; 1971, \$56,050 thousand.

Long-term, low-interest loans and working capital loan guarantees are made to encourage industrial development. The objective is to increase employment opportunities and family income in areas which lag behind the rest of the Nation economically.

1. *Redevelopment area assistance.*—Commercial and industrial loans are made in qualified areas for a maximum of 65% of project cost with repayment periods up to 25 years. The interest rate for 1970 loans is 6¾%. Financial assistance must be otherwise unavailable from private lenders or Federal agencies on terms which would permit accomplishment of the project. Working capital loans made by private lenders in connection with Economic Development Administration industrial development loan projects may be guaranteed for up to 90% of the outstanding balance.

2. *Economic development districts and centers assistance.*—This activity includes loans and working capital loan guarantee projects in economic development centers, redevelopment centers, and redevelopment areas within economic development districts. The 1971 program level is designed to enhance industrial and commercial growth in economic development districts to provide jobs for the rural unemployed who might otherwise migrate to large urban areas.

3. *Collateral protection.*—The employment potential of, and Government investment in, projects in temporary difficulty are frequently protected by the purchase of senior liens to prevent the premature liquidation of projects by other secured creditors. This program covers collateral protection costs in connection with loans made under both the Area Redevelopment Act and the Public Works and Economic Development Act.

General and special funds—Continued

INDUSTRIAL DEVELOPMENT LOANS AND GUARANTEES—continued

Note.—Excludes \$13,127 thousand in 1971 for activities transferred to Regional development programs; 1969, \$6,488 thousand; 1970, \$6,879 thousand.

1. *Redevelopment and other area assistance.*—Aids communities in their economic development through:

Area planning grants.—These grants, not to exceed 75% of total costs, help provide professional staffs to develop comprehensive economic planning and strengthen and implement overall economic development programs. The 1971 program will fund 10 more area planning organizations outside the boundaries of development districts.

Technical assistance.—The 1971 program will provide informational and institutional technical assistance on diverse economic development problems and projects. These projects include industrial site development, plant location, facility and building reuse, potentials for resource utilization, new products research and technology, and support of university centers for economic development. In addition, the program provides management and operational assistance with particular attention to EDA borrowers and the needs of development facilities applicants. Increasing emphasis is being placed on a program of technical assistance for local development corporations which identify opportunities for business expansion and secure investment capital and management assistance at the local level.

Research.—A continuing program of research, training, and education is performed through contracts and grants. This permits the use of the best talent available in universities, other governmental agencies and private institutions to help determine the causes and cures of unemployment, underemployment and low incomes. This information is then made available for use by government and community leaders to help guide the formulation and evaluation of remedial programs.

Program volume is estimated as follows (dollars are obligations in thousands):

	1969		1970		1971	
	Number	Amount	Number	Amount	Number	Amount
Area planning grants.....	24	\$758	25	\$760	35	\$1,100
Technical assistance.....	150	10,065	272	12,410	192	10,270
Research.....	27	1,638	24	2,190	39	3,000
Total.....	201	12,461	321	15,360	266	14,370

2. *Economic development districts and centers assistance* is provided by:

District planning grants.—These administrative expense grants fund up to 75% of the total cost of salaries and associated expenses required to hire full-time, professional staffs for planning and implementing the comprehensive development programs of multicounty economic development districts. The 1971 program will provide assistance to 15 more district organizations than are being funded in 1970, bringing the total funded districts to 123.

Technical assistance.—The 1971 program will finance informational and institutional technical assistance projects in economic development centers, redevelopment centers, and redevelopment areas within districts.

Program volume is estimated as follows (dollars are obligations in thousands):

	1969		1970		1971	
	Num-ber	Amount	Num-ber	Amount	Num-ber	Amount
District planning grants	87	\$4,539	108	\$4,840	123	\$5,500
Technical assistance	49	990	---	---	80	2,330
Total	136	5,529	108	4,840	203	7,830

3. *Regional planning and technical assistance.*—These regional activities will be financed in the Regional development programs appropriation in 1971. Subactivity functions for 1969 and 1970 which were financed in this appropriation are discussed in (a) through (c) below:

(a) *Expenses of regional action planning commissions* are financed by grants to the Commissions. The Commissions formulate basic strategy and implement specific programs for the economic development of the regions. In 1970 State members will match the Federal contribution to the expenses of three Commissions which will have received two Federal fiscal years of full Federal support.

(b) *Expenses of the Federal cochairmen.*—The Federal Government is represented on each Regional Action Planning Commission by a Federal cochairman.

(c) *Other planning and technical assistance.*—The Commissions conduct their own programs of region-specific technical assistance and research and support State investment planning activities through direct grants from the Federal Government. The Economic Development Administration carries out research on broader problems of regional economic development.

¹ Includes capital outlay as follows: 1969, \$56 thousand; 1970, \$38 thousand; 1971, \$91 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$617 thousand; 1969, \$490 thousand; 1970, \$490 thousand; 1971, \$490 thousand.

Note.—Excludes \$383 thousand in 1971 for activities transferred to Regional development programs; 1969, \$384 thousand; 1970, \$339 thousand.

Salaries, support services rendered by other agencies, and other related administrative costs involved in operating Economic Development Administration programs are financed by this appropriation.

1. *Area and district development programs.*—Included are the functions of processing, monitoring, and coordinating economic development projects. The 1971 program includes increases for the Federal management functions and loan servicing related to the industrial development

General and special funds—Continued

OPERATIONS AND ADMINISTRATION—continued

loan program and additional agency professional support for local economic development planning and execution. Subactivity functions are discussed in (a) through (e) below.

(a) *Development facilities.*—Includes expenses of administering the development facilities program. Preapplication conferences are held; applications are processed; and program payments are monitored.

(b) *Industrial development loans and guarantees, EDA.*—Includes expenses of administering the business loans and working capital loan guarantee programs. Increases in personnel for this subactivity are sought for handling additional loan servicing workload in the field.

(c) *Industrial development loans and guarantees, SBA.*—This covers the advance of funds to the Small Business Administration which provides assistance to EDA in preliminary processing and field credit investigations of business loan applications.

(d) *Planning, technical assistance, and research.*—Includes the expenses of administering the planning, technical assistance, and research programs.

(e) *Direct supporting services.*—Includes program direction and guidance, legal, equal employment opportunity, and field coordination assistance to the program functions. Increases in personnel for this subactivity will augment staffing for field coordination and support to local development activities.

2. *Regional programs.*—This activity will be financed in the Regional development programs appropriation in 1971.

3. *Executive direction and administration.*—Includes costs of the executive direction of the agency, the staff offices, and the general direction of the area offices.

	1969	1970
Development facilities.....	\$12,451	\$16,500
Planning, technical assistance and research.....	6,488	6,879
Operations and administration.....	384	339

The regional development programs of the Department consist of the activities of the Regional Action Planning Commissions and the coordination of the national regional economic development effort. It is proposed to consolidate within this appropriation the regional activities formerly financed under Development facilities, Planning, technical assistance, and research, and Operations and administration.

Five Commissions covering all or parts of 20 States have been established pursuant to title V of the Public Works

General and special funds—Continued

REGIONAL DEVELOPMENT PROGRAMS—Continued

and Economic Development Act of 1965 in the Coastal Plains, Four Corners, New England, Ozarks, and Upper Great Lakes sections of the Nation. The Commissions are composed of a Federal cochairman and the Governors of the States within each region, and are assisted by a Commission staff that is supported by both the Federal Government and the member States.

The Commissions began in 1966 with a program of planning and technical assistance. In 1967 the Congress authorized supplemental grants to provide a portion of the local share of Federal grant-in-aid programs to allow the Commissions some influence over the location of Federal investments in their regions. Legislation during the first session of the 91st Congress (Public Law 91-123) authorized the Commissions to make first dollar grants, where the basic Federal share is not available, and to conduct demonstration and training programs. The Secretary of Commerce provides funds to the Federal cochairmen for the Commissions' programs.

1. *Development programs.*—The Commissions concentrated during their initial years on the development of broad comprehensive economic development plans. The Secretary of Commerce will complete the required review of the plans and transmit them to the President before June 30, 1970. Preliminary findings indicate large investments are needed in transportation, human and natural resources, and industrial development to bring the regions on a parity with the national level of prosperity. An accelerated action program is budgeted for 1971 to make a beginning on the improvements required to provide the jobs and higher incomes needed to close the gap between the regions and the Nation. Funds are also budgeted to continue the Department's Regional Research program. The program levels for 1971 are:

Region:	1971
Coastal Plains.....	\$8,365,000
Four Corners.....	7,390,000
New England.....	9,113,000
Ozarks.....	7,900,000
Upper Great Lakes.....	8,892,000
Subtotal.....	41,660,000
Regional research.....	417,000
Total.....	42,077,000

2. *Administrative expenses.*—This activity provides for the staff costs of the Commissions, the Federal cochairmen, and the Special Assistant to the Secretary for Regional Economic Coordination.

The States of the Coastal Plains and Four Corners Regions will begin to pay 50% of the administrative expenses of the Commissions as they have completed their period of full Federal financing.

The Federal interest in each Commission is represented by a Federal cochairman who is assisted by a small staff. Coordination of the 1971 program requires an additional position for each Federal cochairman.

The Special Assistant for Regional Economic Coordination was established by Executive Order 11386 and assists the Secretary of Commerce in administering title V of the Public Works and Economic Development Act of 1965. Major responsibilities include advising the Secretary on regional economic development policy, coordinating the Federal review of the comprehensive plans of the Regional

Commissions, preparation of the title V budget, and conducting the Regional Research program.

The following are the 1971 administrative expense levels:

Region:	1971
Coastal Plains.....	\$535,000
Four Corners.....	510,000
New England.....	587,000
Ozarks.....	500,000
Upper Great Lakes.....	408,000
Special Assistant.....	383,000
Total.....	2,923,000

This trust fund consists of grants to the Commissions from the Department of Commerce, pursuant to title V of the Public Works and Economic Development Act of 1965, as amended. The Commissions receive grants for their administrative expenses, technical assistance, and State investment planning. In 1971, the 20 Member States of the Ozarks, Upper Great Lakes, New England, Coastal Plains, and Four Corners Commissions will match the Federal grants for administrative expenses. The State contribution is estimated at \$1,383 thousand.

¹ Includes capital outlay as follows: 1969, \$19 thousand; 1970, \$17 thousand; 1971, \$82 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$121 thousand (1969 adjustments, -\$10 thousand); 1969, \$136 thousand; 1970, \$136 thousand; 1971, \$136 thousand.

The Administration provides business and government with information, advice and analytical studies on current and potential problems that affect industry.

1. *Industry analysis.*—Business and industry are provided with market, distribution, and production data essential to development and growth of American business. BDSA produces an annual *U.S. Industrial Outlook*, a number of one-time reports addressed primarily to and about domestic commerce on a topical and timely basis, and a series of domestic and overseas market reports and world-trade commodity reports.

2. *Government/business policy development.*—Commodity industry advice is provided to industry and government agencies in support of Government policies and programs dealing with inflationary pressures, technological advancement, short supply areas, environmental conservation

BUSINESS AND DEFENSE SERVICES ADMINISTRATION—Continued

General and special funds—Continued

SALARIES AND EXPENSES—continued

improvements, urbanization, business problems, and regional business growth. Government agencies are kept informed of the probable impact on business and industry of proposed legislative and regulatory measures. Advice and assistance are furnished on problems relating to commodities, industries, and services.

3. *Promotion of industry growth and technical services.*—Commodity industry advice is provided the business community dealing with productivity increases, industrial manpower needs, urbanization and business problems, and business growth. This advice is provided to business firms, individuals, consumer groups, and the public generally in support of business and private programs to assist in the continued economic growth of the business sector.

Increases in 1971 are to develop an export-import-shipment data bank; expand the textile program involving wool and man-made fiber textiles; expand information and analysis supporting the U.S.-Canadian automotive trade agreement; analyze the changing industrial costs resulting from air and water pollution controls; and improve the trade opportunities program.

¹ Includes capital outlay as follows: 1969, \$73 thousand; 1970, \$188 thousand; 1971, \$301 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$701 thousand (1969 adjustments, -\$169 thousand); 1969, \$1,850 thousand; 1970, \$2,538 thousand; 1971, \$3,575 thousand.

International activities of the Department are designed to stimulate the expansion of U.S. foreign commerce. This assists in the growth of the national economy by creating new jobs, increasing industry profits, reducing the balance-of-payments deficit, and maintaining U.S. leadership among world trading nations. Free market forces are encouraged to play the maximum possible role in the conduct of international business, and assistance is available to U.S. firms to more effectively conduct their international business.

1. *Overseas trade promotions.*—The sale of American-made goods overseas is promoted by providing facilities for the exhibition of American products in international trade fairs, trade centers, America-week promotions, and through joint export association programs.

The effectiveness of this activity is indicated by the dollar volume of immediate and projected first-year export sales by exhibitors, and their overseas sales agency relationships established as a result of these promotions. Actual and projected results of major ongoing trade promotion programs are as follows:

(a) *Trade and industrial exhibitions.*—At 20 commercial exhibitions in 1969, 12-month export sales totaled \$79.5 million and 338 new agencies were established. Based on operating experience, expected results from 23 commercial exhibitions planned for 1971 are projected at about \$80 million in sales and the establishment of 410 new agencies.

(b) *Trade centers.*—Twelve-month export sales made at 46 shows held at six trade centers in 1969 totaled \$79 million and 384 new agencies were established. Expected results from 63 shows planned for 1971 are projected at \$76 million in sales and the establishment of about 500 new agencies. New centers at Paris, France, and Sydney, Australia, will bring the number of trade centers operating at the close of 1970 to eight. Use of trade center facilities by individual firms between regularly scheduled shows in 1969 resulted in additional sales of \$6.2 million. Between-show promotions in 1971 are expected to result in more than \$10 million in export sales.

(c) *America weeks.*—Nine America-week promotions were held in 1969 with initial sales of \$2.1 million. Initial sales for 1971 are projected at \$5 million.

INTERNATIONAL ACTIVITIES—Continued

General and special funds—Continued

SALARIES AND EXPENSES—continued

(e) *Joint export associations.*—This new program involves contractual relations with private U.S. trade organizations for the development of export markets. The groups of firms assisted are required to show that their export development programs are incremental in nature, in addition to providing at least 50% of approved expenses. Contracts resulting in 12-month sales of \$4 million were signed with five joint export associations in 1969. In 1971, 13 new contracts will bring to 20 the number active, and export sales of \$58 million are expected to be generated.

2. *Export development in the United States.*—Through an integrated series of marketing techniques, U.S. industry is motivated to increase its share of world exports. American firms not now exporting are stimulated to enter foreign markets and present exporters to increase their foreign activities. These efforts are based on a detailed identification of export sales potentials by country and product. In addition, an overall national export strategy is being developed with the support of private industry and other Government agencies to assist U.S. exporters in opening up new markets overseas.

3. *International commercial information.*—Business and Government agencies are provided information on economic and commercial developments abroad. Assistance is rendered to American exporters in identifying overseas sales opportunities, and in selecting and establishing profitable relationships with overseas representatives and manufacturers through such media as Trade Lists, World Trade Directory Reports and Trade Contact Surveys, and the American International Traders Index.

4. *International trade and investment policy.*—Efforts are made to remove barriers to, improve the climate for, and otherwise advance and protect the interests of American business operating abroad. Such efforts include (1) the development of policies and programs in connection with international trade, finance and export credit, business practices, and export service industries; (2) the provision of special assistance to business firms or industry groups in identifying and analyzing specific major trade opportunities and in dealing with U.S. and foreign policy, administrative, and legal problems confronting them in market development efforts; (3) the preparation of specific programs for each country where U.S. commercial interests are substantial in order to identify the problems facing U.S. trade and investment and to summarize the policy and promotional measures responsive to those problems and opportunities which will be undertaken during the year; (4) the formulation of long-term policies in the international investment field; (5) the facilitation of investment in developing countries by U.S. firms; (6) the conduct of international commercial and financial negotiations in major international forums (such as GATT, OECD, UN); and (7) the representation of American interests in obtaining equitable treatment in foreign countries. In addition, U.S. policy and business interests are advanced by stimulating investment and licensing by foreign firms in the United States, particularly in those industries with clear potential for import savings.

5. *Foreign commercial/economic program support.*—The Department participates in the recruitment, assignment, career management, and promotion of commercial/economic officers in the Foreign Service who represent U.S. commercial interests overseas.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$82 thousand; 1969, \$4 thousand; 1970, \$9 thousand; 1971, \$20 thousand.

The use of excess foreign currencies to support U.S. export expansion programs in developing countries helps to improve our balance-of-payments position and assists in strengthening the U.S. economy by stimulating and expanding our foreign commerce.

(1) *Overseas trade promotions: Trade and industrial exhibitions.*—The use of excess foreign currencies enables the mounting of commercial exhibitions to bring American products to the attention of foreign buyers, and promotes foreign policy objectives of the United States in developing countries.

(2) *Export development in the United States: Export market identification.*—In those developing countries where the United States holds an excess of foreign currency, the use of such currency enables the purchase of market research for use in export market identification.

¹ Includes capital outlay as follows: 1969, \$12 thousand; 1970, \$12 thousand; 1971, \$12 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$85 thousand (1969 adjustments, -\$5 thousand); 1969, \$62 thousand; 1970, \$62 thousand; 1971, \$62 thousand.

In 1971, the export control program will operate under new legislation, but the objectives of the control program will remain generally the same as under the Export Con-

trol Act of 1949 as amended: To safeguard national security by regulating exports of strategic materials, to prevent excessive exports of commodities in short supply, and to implement U.S. foreign policy.

Revised procedures, as well as new criteria for commodity controls under the revised legislation, will result in some changes in the location and type of workload, but will not make a substantial change in the overall volume of work. Export license applications are expected to average about 520 per day, a decrease from the 1970 rate of 562 (July-October 1969). On the other hand, an actual increase in applications for Eastern Europe is expected, particularly in view of the encouragement given such trade by the new legislation, and these applications require far more intensive review than those for the free world. Bulk licenses, established recently, account for part of the expected decrease in total applications to be received from exporters, but at the same time, each bulk application received will require more review, follow-up, and investigation by the Department than would an individual application. Furthermore, recent simplifications in export documentation requirements, along with other anticipated changes in enforcement procedures, will reduce work for exporters but are not expected to effect any reduction in the enforcement-compliance program conducted jointly by Commerce and the Bureau of Customs.

¹ Includes capital outlay as follows: 1969, \$12 thousand; 1970, \$12 thousand; 1971, \$31 thousand.

² Selected resources as of June 30 are as follows: Unpaid, undelivered orders, 1968, \$31 thousand (1969 adjustment, -\$13 thousand); 1969, \$8 thousand; 1970, \$8 thousand; 1971, \$8 thousand.

The 42 field offices of the Office of Field Services serve as the local points of contact with the American business community for the Department of Commerce to carry out its statutory responsibilities to develop, foster, and promote foreign and domestic commerce in the continuing program to increase U.S. economic growth.

The following table shows examples of some of the field office workload for 1969 and estimates for 1970 and 1971:

	1969 actual	1970 estimate	1971 estimate
Total number of business inquiries.....	1,126,218	1,135,000	1,160,000
Dissemination of foreign trade leads.....	69,425	75,000	75,000

Domestic trade seminars held.....	636	400	400
Out-of-office visits.....	22,463	26,000	27,200

1. *Promotion of foreign commerce.*—Field offices support the Department's international activities programs by (1) providing local businessmen with information on overseas markets and buyers, (2) counseling on commercial laws and regulations affecting oversea business, and (3) informing business of specific opportunities for foreign trade and investment.

2. *Domestic business development.*—Information to industry is furnished on the business services of the Department, including (1) publicizing the results of Government generated research and development, (2) informing and counseling business on factors affecting production, marketing, and national economic trends, and (3) assistance on such Government programs as youth opportunity and business assistance to minority groups. The Office also publishes the "Commerce Business Daily" which is the prime source of data for business on Government contracting activity. There is a proposed 1970 supplemental of \$105 thousand for this activity.

3. *Exposition coordination.*—The Department has been assigned the authority for meeting the Government's responsibilities in connection with U.S. membership in the Bureau of International Expositions (BIE). That international body regulates activities with respect to the organization, operation, timing, and frequency of international expositions hosted by member nations. The Department's U.S. Expositions Staff will provide and administer standards and criteria governing international expositions held in the United States. It will also evaluate proposals by local sponsors to host such expositions, so

that only the most viable are recommended by the Federal Government for BIE registration and international participation. The Staff will also analyze the various proposals and make recommendations on the manner and extent of Federal participation in approved expositions. Additional responsibilities include giving guidance and counsel to many of the actual and prospective sponsors of the more than 3,000 domestic trade fairs and expositions held annually in the United States. In this connection the Staff also administers certification procedures under the Trade Fair Act of 1959.

The increase requested for 1971 will enable the Office of Field Services to increase the effort in the promotion of foreign trade, especially their personal contact with the business community in areas away from a field office; broaden the scope of the "Commerce Business Daily"; and permit the U.S. Expositions Staff to carry out the Department's responsibilities for expositions coordination.

A supplemental appropriation for 1970 is anticipated to provide funds to cover increased costs of the "Commerce Business Daily" resulting from recommendations contained in a study initiated at the request of the Senate Select Committee on Small Business. These supplemental funds will be used to (a) meet increased printing costs imposed by the Government Printing Office, (b) publish the increased number of procurement notices from the Department of Defense and the General Services Administration, and (c) proofread the "Commerce Business Daily," which heretofore has not been done.

¹ Selected resources for June 30 are as follows: Unpaid undelivered orders, 1968, \$1,004 thousand (1969 adjustments, -\$47 thousand); 1969, \$1,512 thousand; 1970, \$1,512 thousand; 1971, \$1,512 thousand.

The Service develops, plans, and carries out programs to stimulate and encourage travel to the United States. The principal program activities are carried out by: (1) a marketing division which supervises (a) the creation and placement of trade and consumer travel advertising, (b) production and distribution of sales promotion materials to the public and the travel industry abroad, (c) solicitation and writing of timely articles for placement in the foreign press, (d) production of travel films for use overseas, and (e) the operation of overseas offices for answering travel inquiries and for carrying out promotional activities at the local level; (2) a visitor services division which works with the domestic travel industry and with U.S. communities for improving the reception, service, and hospitality given to foreign visitors; and (3) a research and analysis division which conducts research programs in the support of promotional activities, and works with foreign and other U.S. Government agencies to reduce official barriers to travel. In 1971, seven overseas travel information offices will serve as centers for answering public and trade inquiries on U.S. travel, and as headquarters for sales calls and other promotional activities. The estimate includes funds for increased emphasis on the production of a wider range and quantity of promotional materials, and for a matching fund program through which efforts will be exerted to more actively enlist the talent and resources of the States and cities to improve their own foreign visitor facilities and services, and to produce multilingual material suitable for overseas promotion of State-city attractions. The request will also permit a strengthening of the Service's headquarters support, more intensive market research in present and new country markets, and expansion of the activities of the Convention Bureau.

1. *Weather forecasts and warnings.*—Operations under this activity are concerned with current weather conditions, observations, communications, public and special forecasts and warnings, hurricane and tornado warnings, air pollution observations, and climatology. The 1971 program increases are to improve public weather forecasts; to establish and operate additional urban air quality control units; to expand the aviation weather service programs; to improve the basic observing and communications networks; and to modernize and automate climatological services.

SELECTED OUTPUT DATA

	1969 actual	1970 estimate	1971 estimate

2. *River and flood forecasts and warnings.*—Provides the Nation with river forecasting service including flood forecasts and warnings, water supply forecasts, and continuous forecasts of river stage, flow, and velocity. The 1971 increases will primarily provide funds in support of the work of the Water Resources Council.

SELECTED OUTPUT DATA

	1969 actual	1970 estimate	1971 estimate
Forecasts issued.....	1,385,000	275,000	285,000

¹ Large number of forecasts due to unusually high hydrologic activity throughout the Nation.

3. *Earth description, mapping, and charting.*—These services provide precise measurements of the physical parameters of the earth, distribution in strength and direction of the earth's magnetic field, location and intensities of earthquakes and tsunamis, seismological studies of the

earth, and publication of aeronautical charts for air navigation. The 1971 increases will be used for expansion of the horizontal control surveys; to increase the effort to provide more seismological surveys in earthquake epicentral zones; and provide funds for expansion of the number of aeronautical charts of various types being produced.

Pages of geophysical data disseminated.....	25,951	27,300	28,700
Seismograms furnished.....	1,970,806	2,150,000	2,290,000

4. *Marine description, mapping, and charting.*—Provides services connected with the charting of the coastal waters of the United States and its possessions for the safety of navigation; the systematic mapping of the U.S. continental shelves; survey of selected deep ocean areas to determine bathymetric, geophysical, and geological properties of the ocean floor and the underlying structure; and the description of the physical, chemical, and dynamic properties of the water mass. Nautical charts, bathymetric maps, tide tables, tidal current charts and tables, sea-level information, and predictions of estuarine flushing rates and their variations are produced as products of this activity. The 1971 increases will provide funds for an effective level of funding for vessel and equipment maintenance; for increasing the capability to incorporate all new data directly into the automated nautical chart compilation system; and will complete the funding of the ocean survey ship *Researcher*.

SELECTED OUTPUT DATA

	1969 actual	1970 estimate	1971 estimate
Lineal nautical miles surveyed (oceanographic).....	101,570	130,000	160,000
Square nautical miles surveyed (hydrographic).....	18,662	21,000	23,000
Nautical charts produced.....	503	492	514

5. *Telecommunications and space services.*—Services describe and predict properties, conditions, and the disturbances of the atmosphere and space which influence its use as a telecommunication medium or which can affect man and materials in exploitation and use of upper atmosphere and space; and services facilitate fuller exploitation of the electromagnetic spectrum for communications. No increase is planned for 1971.

¹ Includes capital outlay as follows: 1969, \$1,950 thousand; 1970, \$383 thousand; 1971, \$696 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$4,097 thousand; 1969, \$3,585 thousand; 1970, \$3,585 thousand; 1971, \$4,085 thousand.

1. *Weather forecasts and warnings.*—Consists of meteorological research and development designed to improve the weather forecasting and warning services by gaining a fuller understanding of the composition, dynamics, and circulation of the atmosphere and developing better instrumentation and techniques for weather observing and forecasting. The 1971 increases provide for expansion of weather modification studies, improvement of severe storms forecasting, extension of forecasting and data gathering programs to a worldwide scale, and development of climatological data systems.

2. *River and flood forecasts and warnings.*—Includes research and development for further improvements in river and flood forecasting services and development of specialized equipment related to forecasts and water resources services. The 1971 increase provides for data acquisition system studies.

3. *Earth description, mapping and charting.*—Includes research directed toward understanding the intricate processes and phenomena of the solid earth, such as, determining the size and shape of the earth, seismological studies and warnings, and improvement in the aeronautical charting program. The 1971 increase provides for systems development for automated cartography.

4. *Marine description, mapping and charting.*—Includes research directed toward the further improvement of oceanographic data systems and nautical charting systems leading to understanding of ocean properties and processes, including ocean and environment interaction. The 1971 increases provide for ocean structure and ocean-atmosphere interaction studies.

5. *Telecommunications and space services.*—Includes research leading to improved understanding of the propagation of radio and light waves, directed toward improvement in predictions of propagation conditions, warnings of electromagnetic disturbances and effective use of radio and light waves. No increase is requested for 1971.

6. *Environmental satellite.*—Provides for research in the environmental satellite program to determine the most beneficial method of data selection, collection, and use by operational programs. The 1971 increases provide for technological applications to additional parameters and development of sensing devices.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$469 thousand (1969 adjustments, -\$58 thousand); 1969, \$308 thousand; 1970, \$473 thousand; 1971, \$229 thousand.

The special foreign currency program utilizes foreign currencies which are excess to the normal requirements of the United States. In order to augment and supplement its

domestic research and service programs, ESSA enters into cooperative projects with foreign government agencies, universities, and other research organizations. These projects utilize to advantage scientific competence, environmental data sources, physical facilities, and regional environmental conditions in countries where Public Law 83-480 funds are available. The program consists of individual projects which vary from year to year. In 1971, these projects will be supported entirely by carryover funds and will consist of:

1. *Weather forecasts and warnings.*—Studies of cloud physics and other meteorological factors; study of agricultural potential of arid areas where rainfall amounts are marginal and studies of techniques for regional analysis and prediction of marine environmental factors.

2. *River and flood forecasts and warnings.*—Studies of meteorological characteristics of watersheds and river basins for use in developing hydrologic models and improving river forecasting techniques.

3. *Earth description, mapping, and charting.*—Studies in geodesy, geomagnetism, and seismology; studies of the earth's magnetic field and its secular changes, and studies of energy dissipated along fault lines as compared with the latent energy which is built up in other areas.

4. *Marine description, mapping, and charting.*—Studies leading to a better understanding of the large scale motions of the ocean system and its interaction with the atmosphere.

5. *Telecommunications and space services.*—Studies of the upper atmosphere and space; studies of the influence of water vapor, irregular terrain, climate, and weather on radio wave propagation.

6. *Environmental satellite.*—Utilization of satellite data in studies of meteorology, geomagnetism, ionospheric physics, and radio propagation.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$7,402 thousand; 1969, \$5,167 thousand; 1970, \$2,006 thousand; 1971, \$1,976 thousand.

This account provides for capital outlay items, such as construction related to meteorological, oceanographic, geomagnetic, and seismological facilities, including ships, and for purchase and installation of equipment and instrumentation required in support of operational and research programs.

1. *Weather forecasts and warnings.*—Programs concern observing, gathering, processing, and transmitting meteorological data to the public in the form of forecasts, warnings, and advisories. The 1971 request will provide additional equipment and instrumentation needed in the areas of weather modification, air pollution, and the basic observation network. It also provides for additional computer capacity in weather analysis and forecasts and a start toward modernization of the climatological data banks.

2. *River and flood forecasts and warnings.*—Provides for equipment needed to operate the river and flood forecasts and warnings network and for effective water resources management. The 1971 request will provide for upgrading the hydrologic network and additional flash flood warning equipment.

3. *Earth description, mapping, and charting.*—The 1971 request for this activity will provide instrumentation for seismological surveys and a five-color press for aeronautical chart production.

5. *Telecommunications and space services.*—In 1971 funds are requested for relocating an ionospheric observation station.

It is estimated that an unobligated balance of \$4,224 thousand under this no-year appropriation will be brought forward from 1970 and \$739 thousand carried forward to 1972. These balances are required to complete the long-lead time construction, procurement, and installation actions inherent in the activities financed under this account.

Total.....	63,563	49,089	-2,600	38,319	41,009

This appropriation provides for the establishment and operation of a national satellite system to meet operational requirements for environmental data, especially meteorological. The system is based on plans for the National Operational Meteorological Satellite System (NOMSS), established to observe worldwide weather conditions and to process, analyze, and archive the data for use in environmental services and research. The satellite system is administered by the National Environmental Satellite Center (NESC) at Suitland, Md.

The first element of NOMSS, the Tiros Operational Satellite (TOS) system, became operational in 1966 providing global observations during daylight hours. Improved TOS (ITOS) spacecraft, which adds a nighttime observational capability to the system, will be launched beginning in 1970. Funds to implement the second element of NOMSS, a Geostationary Operational Environmental

Satellite (GOES) system, were provided in 1970. This system is designed to provide nearly continuous observations of the earth and its environment, initially of the Western Hemisphere, in response to requirements placed on the NOMSS in 1961. A Synchronous Meteorological Satellite (SMS), the prototype spacecraft to implement GOES, is being funded and constructed by NASA.

The 1971 estimate provides for continued operation of the TOS/ITOS system, the continued implementation of the GOES, and for the operational use of NASA's synchronous Applications Technology Satellites, ATS-I and ATS-III, with particular emphasis on using the data in the severe storm and hurricane surveillance and advisory program.

1. *Spacecraft and launching.*—Covers the design, construction, and launching of operational satellites. Funds are required in 1971 to continue procurement of two ITOS spacecraft, to initiate procurement of one GOES spacecraft, and to fully fund one ITOS launch and two launch vehicles.

2. *Command and data acquisition.*—Covers the establishment and operation of ground facilities to command the spacecraft, acquire the observational data, and transmit the data to the processing and analysis center. The 1971 estimate provides for around-the-clock operation and maintenance of these facilities, procurement of ground equipment for the ITOS and GOES systems, and procurement of ground equipment essential for the operations with ATS-I and ATS-III.

3. *Data processing, analysis, and archiving.*—Converts satellite signals to forms suitable for immediate operational use in forecasting and service programs, and subsequent use for research and climatological purposes. The 1971 estimate covers continued operation and maintenance of the data processing facility and the Washington-Moscow communications link, procurement of GOES data handling equipment, and items of specialized equipment needed for the display and use of data from ATS-I and ATS-III.

4. *Technical management.*—Technical management and support for the satellite program is provided by the National Environmental Satellite Center and by NASA on a reimbursable basis.

¹ Includes capital outlay as follows: 1969, \$248 thousand; 1970, \$492 thousand; 1971, \$501 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$3,208 thousand (1969 adjustments, -\$51 thousand); 1969, \$3,081 thousand; 1970, \$3,081 thousand; 1971, \$3,081 thousand.

The Office administers laws governing the granting of patents for invention and the registration of trademarks.

In 1969, patent application disposals totaled 102,070, slightly higher than the 101,512 disposed of in 1968. It is expected that levels of 102,000 and 104,000 will be attained in 1970 and 1971, respectively. The 1971 estimate includes requests for funds to reduce the overload of applications awaiting printing for which fees have been paid and for increased staff to improve internal and public services. It also includes modernization measures that will make possible more rapid and effective classification, storage, retrieval, and dissemination of information.

Receipts from fees were \$25.5 million in 1969. In 1970 and 1971, receipts from fees are estimated to be \$26.5 million and \$29.0 million, respectively.

1. *Examination and issuance of patents.*—Applications are examined to determine the patentability of claimed inventions; and quasi-judicial functions are performed in appeal and interference proceedings within the Office. Specifications and drawings of successful applications are printed, and issued patents are regularly published. In addition, this activity includes preparation and issuance of patent grants, furnishing copies of records, maintenance of public search room and scientific library facilities, and recording instruments conveying ownership of patent and trademark rights.

2. *Examination and registration of trademarks.*—Applications are examined to determine the registrability of trademarks, and quasi-judicial functions are performed in appeal or adversary proceedings within the Office. Specifications and drawings of successful applications are printed, and registered trademarks are regularly published.

SUMMARY OF WORKLOAD DATA

	1968 actual	1969 actual	1970 estimate	1971 estimate
New applications for patents and trademark registrations received:				
Applications for patents.....	90,663	96,821	99,000	102,000

90 Outlays, excluding pay increase supplemental.....	36,200	36,906	40,301
91.20 Outlays from civilian pay act supplemental.....		2,084	103

¹ Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1968, \$1,466 thousand (1969 adjustments, -\$67 thousand); 1969, \$1,654 thousand; 1970, \$1,776 thousand; 1971, \$2,425 thousand.

The proposed increase will strengthen the Bureau's program particularly with regard to the central core of the physical measurement system, reference materials, and fire research and safety. It will provide also for continued implementation of the Metric System Study Act. A transfer of \$950 thousand will be made to the working capital fund to provide capital for equipment in support of research and technical programs and for preparation of standard reference materials.

1. (a) *Basic measurements and standards.*—This includes research, development, analysis or specifications relating to standards for physical measurement; method of precise measurement of physical quantities; and precise values of fundamental physical constants suitable for tying measurement systems together. Most of the work in this subactivity deals with a basic core of 50 physical quantities such as length, electric current, temperature, etc., which are fundamental to all physical measurements and for which a standard representing unit magnitude is maintained. Each quantity must be measured over a wide range from very large to very small magnitudes, and at each magnitude it must be measurable as accurately as the current state of technology requires.

The increase will be applied to help meet the increasing demands of our technologically oriented society to extend the range and improve the accuracy of the measurement of many of these basic quantities. The greatest emphasis is planned for development of a unified program for one-, two-, and three-dimensional metrology.

Approximately \$600 thousand of the increase is budgeted to implement the Metric System Study Act, Public Law 90-472, which authorized a study to determine the advantages and disadvantages of increased use of the metric system in the United States.

(b) *Reference materials.*—This includes (1) description and development of methods of description of the essential features of composition and structure of selected materials which govern their behavior in technologically important environments, (2) preparation and development of methods to prepare materials of precisely known composition and structure, (3) preparation of reproducible, stable sample materials for use as measurement standards and as specimens in the measurement of behavioral characteristics under given conditions.

The increase in 1971 will be used to prepare and characterize research or reference materials including samples of polymers, pure crystals, metals, ceramics, biologically important compounds, and many other materials.

(c) *Standard reference data.*—This includes programs arising as a result of the Bureau's responsibility for developing a Standard Reference Data System and other programs concerned with standard reference data. Work is directed toward systematically obtaining from the scientific and technical literature and critically evaluating

NATIONAL BUREAU OF STANDARDS—Continued

General and special funds—Continued

RESEARCH AND TECHNICAL SERVICES—continued

numerical data in the physical sciences needed by scientists and engineers. These data are the numbers that describe the properties of matter, the strengths of high temperature materials, the masses of atoms, the rates of chemical reactions, the wavelengths of light in emission spectra, and many others. Programs involve analysis of needs, acquisition of data from all available sources, critical evaluation, and compilation of data for dissemination.

(d) *Data on properties of matter and materials.*—Data concerning the behavioral characteristics of matter and materials is generated in areas of technology where urgently needed and not readily attainable elsewhere. This program is a major resource for research scientists and design engineers in areas such as electronics, polymers, metallurgy, ceramics, communications, defense, and nuclear energy. The program supports and contributes to the Basic Measurement System, the Standard Reference Data System and Standard Reference Materials Program.

The increase will be applied to the development of chemical compounds to improve accuracy of clinical laboratories.

(e) *Technological standards.*—This includes research and development of test methods and standards of performance which serve as a basis for specifications, standards and codes pertaining to materials, products, and systems used in industry and commerce; participation in technical committees for standardizing bodies such as the American National Standards Institute; administration of procedures for voluntary industrial standardization; participation in international standardization activities; and provision of information services pertaining to standardizing activities.

The increase will be used to implement the provisions of the Fire Research and Safety Act of 1968, and for research on flammability of fabrics pursuant to Public Law 90-189, for building technology, and for standardizing activity with regard to industrial and consumer products.

2. (a) *Computer science and technology.*—This includes technical activities of the Bureau aimed at improving the effective utilization by Government of automatic data processing equipment and computer-based data processing and information-handling systems. It includes, but is not limited to, investigation, design, and evaluation of complete systems, and the rendering of advice, consultation, and technical assistance to agencies of the Federal Government in connection with the design, selection, acquisition, and utilization of such systems. Closely connected with these technical activities are the following: providing technical leadership for and monitoring the Federal Government's participation in the development, measurement, and testing of voluntary commercial automatic data processing standards in a manner consonant with Government requirements for a compatible complex of equipments, languages, and practices; determining the need for and recommending establishment of uniform Federal standards where necessary to supplement voluntary commercial standards; and maintaining a specialized information service in support of all of the foregoing activities.

(b) *Federal clearinghouse.*—The Clearinghouse for Federal Scientific and Technical Information provides the following services: Collection of technical reports generated by the Federal Government except those withheld for

reasons of military security; indexing, reproducing, abstracting, announcing, and distributing these reports; analyzing, evaluating, and digesting contents of these reports and providing for special dissemination to regional centers and industries; and maintaining a clearinghouse for foreign technical translations. Costs of acquiring and storage are borne by this appropriation; costs of reproduction and distribution are paid by the customers.

(c) *Invention and innovation.*—This includes programs related to the Bureau's broad mission which serve either to encourage invention and innovation or to encourage the greater use of technology by Government and industry.

The research program financed by this appropriation provides a capability and competence for many services performed by the Bureau for the Government, science, industry, and commerce, including for example, publication of scientific information; calibration of measuring instruments; tests of materials, products or systems; production and sale of standard reference materials; consultation and advice on scientific or technical problems; and specialized research on specific technical problems of other Federal agencies. Generally, when a customer from outside the Bureau receives a unique benefit from any of these services he pays the cost of the service furnished. Selected workload data roughly indicative of the magnitude of these services are as follows:

	1969 actual	1970 estimate	1971 estimate
Number of calibrations and tests performed.....	37,667	38,000	38,000
Units of standard reference materials sold.....	35,508	37,000	39,000
Number of publications.....	1,098	1,100	1,100

RESEARCH AND TECHNICAL SERVICES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the National Bureau of Standards, as authorized by law, \$500,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to the Bureau, for payments in the foregoing currencies. (7 U.S.C. 1701, 1704; 15 U.S.C. 271-278g, 290; Department of Commerce Appropriation Act, 1970.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$448 thousand; 1969, \$199 thousand; 1970, \$661 thousand; 1971, \$465 thousand.

The responsibilities of the Bureau for basic and applied research, improvement of standards, collection and dissemination of standard reference data, and the certification and distribution of standard reference materials are of sufficient breadth to encourage utilization of research capabilities in other countries. The foreign currency program supplements the Bureau's existing program, allows an acceleration of research effort in selected areas, and permits economies to the Bureau's regular appropriations over the long term.

The 1971 request represents no increase in the size of the program. Foreign currencies determined by the Treasury Department to be excess to normal requirements of the United States will be used in countries where scientific talent is available to augment the in-house capabilities of the Bureau in the areas of standard reference materials, standard reference data, and technological standards.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$621 thousand; 1969, \$895 thousand; 1970, \$1,203 thousand; 1971, \$804 thousand.

This will provide for construction and improvements to the plant and facilities of the Bureau and procurement of major special facilities. The Bureau has nearly completed the process of moving from its Washington site to the new Gaithersburg facilities. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and two small radio field stations.

Capital outlay.—1. *Improvements and modifications.*—The budget includes \$200 thousand for minor capital

improvements of a general nature required by the Bureau's laboratories and field stations. Other minor improvements, when of a special project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. *General construction.*—This activity includes improvements and construction items costing more than \$40

NATIONAL BUREAU OF STANDARDS—Continued

General and special funds—Continued

PLANT AND FACILITIES—continued

thousand except for construction associated with the Bureau's relocation at Gaithersburg. Anticipated costs in 1971 are for projects financed in prior years.

3. *Special facilities.*—(a) *NBS facilities.*—This subactivity includes the acquisition of large equipment and any associated building construction or acquisition. The budget includes \$250 thousand for a two-axis interferometer, \$145 thousand for a microwave-antenna measurement range, \$370 thousand for a closed-circuit water tunnel, and \$430 thousand for a high-voltage electron microscope. Anticipated costs in 1971 include \$420 thousand for budget year projects and \$977 thousand for projects financed in prior years.

(b) *Weights and measures standards for the States.*—This subactivity finances the acquisition of basic reference standards of weight and measure for distribution to the States. Such action will help to insure uniformity of weights and measures standards throughout the Nation and to provide the physical tools necessary for precise measurement in business, industry, science, and education. No additional budget authority is required. Acquisition of the standards is expected to be completed by the end of 1971.

This program assists the textile and apparel industries in developing and making more deliberate and extensive use of scientific and technological resources for economic growth. Expanded market opportunities that are made possible by increasing the rate of adoption of technological innovations in processes, products, and services, broaden the base of our civilian economy as well as make it more competitive with foreign producers.

² Receipts from calibrations, services and sales of standard reference materials to non-Federal customers (15 U.S.C. 275a).

The working capital fund finances all operations of the Bureau, except major construction projects, from advances and reimbursements. The principal of the

fund, as of June 30, 1969, consisted of \$5 million in appropriations, \$8.3 million in capital provided by appropriations of the Bureau, and \$139 million in net donated assets. In 1971, \$950 thousand will be transferred from the Research and Technical Services appropriation for additional capital. The Government investment is estimated to grow through donation of cash and other assets financed by the Bureau's appropriations to \$146.5 million by June 30, 1971.

Operating costs.—1. *Technical programs.*—Research and technical services are conducted by the Bureau on the request of other Government agencies and the public, as well as in support of the Bureau's own research program. The program conducted on contract with other agencies constitutes about one-third of the technical work of the Bureau and it is expected to continue at this level.

2. *Plant improvement and special equipment.*—This activity includes the costs of the Working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

Capital outlay.—Working capital of the fund is invested in equipment which is subject to depreciation charges. Some of the equipment for the new laboratories of the Bureau is being purchased as an investment of the fund, the additional capital being provided by payments from the appropriation for construction of facilities. All other equipment and facilities financed by Bureau appropriations are shown as donated assets of the fund.

Operating results.—Retained earnings at the end of each year are transferred to Treasury the year following.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$198,693 thousand; 1969, \$274,580 thousand; 1970, \$296,344 thousand; 1971, \$365,844 thousand.

The 1971 budget includes initial funding for a 10-year program of ship construction and related activities designed to revitalize the U.S.-flag merchant marine. The new Maritime program includes construction of about 30 ships per year by 1973 and will provide sufficient shipping capability by 1983 to meet the Nation's projected emergency military and civilian requirements.

Only 6% of U.S. oceanborne foreign trade is currently carried by the U.S. flag fleet of 650 ships. Nearly 400 of these vessels were constructed in World War II, and are therefore over 20 years old. These war-built ships will likely be lost from the fleet by the end of 1973. Further reductions because of age will occur each year thereafter. By 1982, the present fleet will have declined to about 200 ships capable of carrying less than 3% of U.S. oceanborne foreign trade.

The objectives of the 10-year program are based on shipping capability needed by the Nation for defense in times of crisis and participation in essential international trade in times of peace. Through the use of multiyear procurement, commitments will be entered into for the construction of 19 ships in 1970, 27 ships in 1971, and 30 ships per year thereafter through 1980 which will result in substantial revitalization of the U.S. flag fleet by 1983 when construction on these commitments is completed. At that time, the fleet will be able to meet the maximum military requirements currently foreseen under conditions of limited war and to maintain a minimum capability for participation in the Nation's essential foreign trade. In times of peace, the new fleet will be capable of a 42% by weight and 47.5% by value participation of liner trade

in the essential services. Emergency requirements for transportation of dry and liquid bulk cargoes will also be fully met under the new program. Seafaring job opportunities will total 39,000, including 17,000 resulting from the new vessels to be constructed under the 10-year program. The 309 new ships added to the fleet will generate a net improvement of over \$2 billion in the U.S. balance of payments position by 1983 as compared with the improvement which could be expected from the fleet supported under current levels of new construction.

The following table reflects the planned utilization of estimated available funding in the current and budget year (in thousands of dollars):

This appropriation provides for payments of subsidy to ship operators in order to maintain a U.S. merchant fleet in support of U.S. foreign commerce and capable of serving as a naval auxiliary in event of a national emergency. 1971 marks the initiation of a new Maritime program and, as a result, modifications will be made to the existing system for administering the subsidy system and for calculating the amounts of subsidy payments.

During calendar year 1968, 14 operators had operating subsidy contracts with the Maritime Administration and provided service on 30 essential trade routes. These operators carried approximately 11.7 million long tons of

cargo, 421,000 long tons over calendar year 1967. The increase was due principally to an increase in inbound carryings.

The total of vessel operating expenses for subsidized operators in calendar year 1968 was \$927.6 million, of which \$359.6 million represented subsidizable items of expense.

The operations for which subsidy support is projected are detailed in the following table:

Past years:	Subsidize operators	Maximum voyages under contract	Voyages undertaken	Vessels employed	Estimated obligations (thousands)
Calendar years 1947-63	---	-----	24,858	---	\$1,730,351

Calendar year 1967...	14	2,084	1,695	289	212,438
Calendar year 1968 (6 months).....	14	1,203	755	281	107,913
Fiscal year 1969.....	14	2,100	1,474	278	217,244
Estimated:					
Fiscal year 1970.....	14	2,100	1,530	275	213,738
Fiscal year 1971.....	16	2,100	1,660	262	176,000

¹ Annual.

Passenger and cargo ships.—Fourteen operators using an average of 281 ships conducted and terminated 1,509 voyages from U.S. ports on the Atlantic, Gulf, Pacific, and Great Lakes areas to foreign ports in all of the major coastal areas in the world during calendar year 1968.

To:	From ports on—				
	Total	Atlantic	Gulf	Pacific	Great Lakes
Europe.....	292	245	47	---	-
Mediterranean.....	190	137	44	---	9
Indian Ocean.....	28	28	---	---	-
Far East.....	362	70	73	219	-

South America.....	282	182	50	50	-
Africa.....	112	77	35	---	-
Caribbean.....	159	133	26	---	-
Round the world.....	40	---	---	40	-
Total.....	1,509	890	275	335	9

Status of unfunded contract authority.—The computation and approval of final subsidy rates and audit of annual accountings will make it possible to pay 100% of subsidy payable on account of operations prior to December 31, 1964. The \$143 million unpaid subsidy as of June 30, 1971, represents the balance due operators under the formula for calendar year 1970; estimated amounts earned in the final quarter of 1971 for which vouchers will not be presented or paid during that year; plus a backlog of \$80 million for calendar years 1965 through 1969 withheld pending final audit and rate determinations.

RESEARCH AND DEVELOPMENT

For expenses necessary for research, development, fabrication, and test operation of experimental facilities and equipment; collection and dissemination of maritime technical and engineering information; studies to improve water transportation systems; **【\$11,100,000】 \$20,700,000** to remain available until expended, of which **【\$3,400,000】 \$1,700,000** shall be for **【operation of the N.S. Savannah: Provided, That none of the funds appropriated herein are to be used for a】 the initial phase of layup of the N.S. Savannah: Provided 【further】**, That transfers may be made from this appropriation to the "Vessel operations revolving fund" for losses resulting from expenses of experimental ship operations. (*Department of Commerce Appropriation Act, 1970; authorizing legislation to be proposed.*)

The 1971 program provides funding required to initiate a long-range program designed to serve the needs of the entire maritime complex including Government, shipbuilders, labor, and shipowners. The program will operate in the following major areas.

1. *Joint surface effect ship program.*—This activity covers the Administration's participation with the Navy in the study, design, and development of prototype testcraft designed to properly define the commercial role of such ships in ocean transportation. The Navy will assume the predominant share of financing in 1971.

2. *Maritime science and technology.*—Research conducted herein is planned to raise the level of marine scientific knowledge in order to advance the technological base upon which ships are designed, built, and operated. Primary research will be in hydrodynamics, propulsion, ship structures, navigation-communications electronics, and facilities and systems to disseminate technical information.

3. *Shipping economics and requirements.*—This activity is concerned with forecasting trade and technology and with the economic analyses of total transportation systems. Included are studies of transportation demands as a means for projecting ship numbers and characteristics, advanced vehicles, intermodal aspects, and special economic studies.

4. *Advanced ship engineering and development.*—Concerned with advanced ship design and construction methods. Nuclear and nonnuclear advanced ship design programs, subsystem development, management systems, and shipyard methods are included in this activity, as well as development of computer aided design programs and development for naval hull types.

5. *Improvement in ship operations and shipping systems.*—Includes applied research for all aspects of the maritime field concerned with ship and port operations. Consideration will be given to related operational equipment and procedures for navigation, cargo handling, automated control systems, containerization, manning, training, maintenance, and other aspects of the field.

6. *NS Savannah operation.*—Funds requested for 1971 provide for the initial phase of layup of the NS Savannah.

SALARIES AND EXPENSES

For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the Maritime Administration, including not to exceed \$1,125 for entertainment of officials of other countries when specifically authorized by the Maritime Administrator; not to exceed \$1,250 for representation allowances; **[\$20,578,000]** \$20,750,000. (Department of Commerce Appropriation Act, 1970; additional authorizing legislation to be proposed for \$4,675,000.)

Public Law 415, 84th Congress (46 U.S.C. 1126), established the U.S. Merchant Marine Academy at Kings Point, N. Y., to train cadets for service as officers in the U.S. Merchant Marine. A 4-year course is provided, including 1 year of sea duty, designed to qualify graduates for licenses as deck or engine officers. About 200 cadets are expected to graduate in 1971.

The Academy provides subsistence, quarters, tuition, uniform and textbook allowances, and medical and dental care for the cadets in attendance at the Academy. A small cadet training liaison group in Washington, D. C., provides staff assistance to the Maritime Administrator on training matters, and assists in the selection and appointment of cadets.

STATE MARINE SCHOOLS

For financial assistance to State marine schools and the students thereof as authorized by the Maritime Academy Act of 1958 (72 Stat. 622-624), \$2,040,000 \$2,325,000, of which \$625,000 \$977,000 is for maintenance and repair of vessels loaned by the United States for use in connection with such State marine schools, and \$1,415,000 \$1,348,000, to remain available until expended, is for liquidation of obligations incurred under authority granted by said Act, to enter into contracts to make payments for expenses incurred in the maintenance and support of marine schools, and to pay allowances for uniforms, textbooks, and subsistence of cadets at State marine schools.

For an additional amount for "State Marine Schools" for the Michigan State Maritime Academy, \$50,000. (Department of Commerce Appropriation Act, 1970; authorizing legislation to be proposed; Supplemental Appropriation Act, 1970.)

MARITIME ADMINISTRATION—Continued

General and special funds—Continued

STATE MARINE SCHOOLS—continued

The States of California, Maine, Massachusetts, New York, and Texas maintain schools for the training of merchant marine officers with Federal assistance given in the form of (a) direct grants of \$75 thousand, if matched by State appropriations and if out-of-State students are enrolled; (b) allowance to cadets for uniforms, textbooks, and subsistence; and (c) repairs to Federal training vessels on loan to the schools.

The Maritime Academy Act of 1958 (72 Stat. 622) provides contract authority for the Secretary of Commerce to enter into agreements with States to provide the grants and allowances over a 4-year period. This act provides contract authority without limit as to the amount or fiscal year. The new budget authority includes the estimated obligations to be incurred under this authority. Maintenance and repair of training vessels are accomplished through annual appropriations. The schools are expected to graduate approximately 400 cadets in 1971.

Under the Merchant Marine Act, 1936, the Administration received authority to insure construction loans and mortgages with aggregate outstanding balances of up to \$1 billion, on vessels engaged in the foreign and domestic commerce of the United States. \$25 million of authority has been transferred to the Department of the Interior to insure construction loans and mortgages of fishing vessels.

Budget program.—The program anticipates income in excess of \$4 million in 1970 and 1971. There are no anticipated mortgage defaults or advances to mortgagors in 1970 or 1971.

Financing.—The redemption of defaulted loans or mortgages is financed from insurance premiums and fees, interest earned on U.S. Government securities and mortgages held, together with such amounts as may be necessary by borrowings from the Treasury Department, pursuant to Public Law 85-520 (46 U.S.C. 1275(b)).

Operating results and financial condition.—The 1969 activity of the fund reflects the repayment of \$3.5 million to Vessel operations revolving fund and the purchase of defaulted mortgages in the amount of \$0.9 million. As of June 30, 1969, balances outstanding plus commitments for additional ship mortgages total \$751.6 million. The outstanding balances for loans and mortgages at the end of 1970 and 1971 are projected at \$913.9 million and \$1,209.4 million, respectively. It is anticipated that the fund will purchase Treasury securities in the amount of \$6.5 million in 1970 and \$6.0 million in 1971.

This fund finances operation, reactivation, deactivation, and charter of Government-owned or controlled cargo-type vessels. It is also used for financing the operation of Government-owned experimental vessels (46 U.S.C. 1205).

Budget program.—Vessel operations expenses.—Cargo vessels are operated by private operators as agents of the Administration to carry shipments for the Military Sea Transportation Service and other agencies. In addition, agents operate ships under Government control as a consequence of defaults under title XI guaranteed loans and mortgages.

Financing.—Expenses are financed by revenue from private operators and reimbursements from Military Sea Transportation Service, other agencies and appropriations, in accordance with 69 Stat. 59.

Operating results and financial condition.—Vessel operations.—Charges are made to the Military Sea Transportation Service and other agencies for full costs arising under general agency agreements for ship operations.

¹ Balances of selected resources are identified on the statement of financial condition.

The Administration is authorized by 46 U.S.C. 1281-1294, as amended, to insure against loss or damage by marine war risks when it is found commercial insurance cannot be obtained on reasonable terms and conditions. Authority to underwrite insurance has been authorized to September 1970, having been extended at 5-year intervals since 1950. Legislation will be proposed to continue this program.

Budget program.—As of June 30, 1969, the number of outstanding binders issued for the types of insurance covered by this fund were: 1,418 for hulls, 1,298 for protection and indemnity, and 1,101 for insurance of crew life and personal effects. These binders which become effective as a result of the outbreak of war cover approximately \$15 billion of insurance exposure. During 1969 war risk builder's risk insurance was provided on 10 vessels built in U.S. yards.

In addition, Second seamen's war risk insurance was continued in effect at the request of the Navy, without premium, but on a reimbursable basis as required by 46

U.S.C. 1285, on 21 vessels for the Military Sea Transportation Service. It is estimated that this service from program inception has provided a savings of \$775 thousand through 1969, measured by the difference between the estimated cost of commercial premiums and claims paid. The Administration also provided Second seamen's war risk insurance for 205 vessels under charter to MSTTS, which resulted in additional net savings approximating \$1.3 million for the year, thereby increasing cumulative savings in excess of \$2 million by the end of 1969.

Financing.—46 U.S.C. 1288(a) provides authority for the Secretary to transfer up to \$10 million from the Vessel operations revolving fund to the War risk insurance revolving fund in order to place insurance coverage into effect. Revenue in the fund is received from fees paid for the issuance of interim binders, premiums paid for builder's risk insurance, interest from investments, and reimbursable charges from the Navy.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slopchest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slopchest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (*Department of Commerce Appropriation Act, 1970; authorizing legislation to be proposed.*)

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 302. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act.

SEC. 303. During the current fiscal year appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 304. No part of any appropriation contained in this title shall be used for construction of any ship in any foreign country. (*Department of Commerce Appropriation Act, 1970.*)

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

Military personnel activities are grouped into major program categories corresponding to the planning, programming, and evaluation system of the Department of Defense.

1. *Strategic forces.*—Consists of offensive and defensive aircraft and missile units.

2. *General purpose forces.*—Consists of unified commands, tactical Army combat and support forces, Navy ship and air forces, the Marine Corps fleet forces, including aviation, and Air Force combat and support aircraft units. It also includes related logistics and support units.

3. *Intelligence and communications.*—Missions and activities related to combat forces and centrally directed activities for intelligence, security, and communications.

4. *Airlift and sealift.*—Airlift, sealift, and other transportation, including logistic and support units.

5. *Guard and reserve.*—Consists of support for National Guard and Reserve training units.

6. *Research and development.*—Support for R. & D. activities and projects not related to items approved for procurement or deployment.

7. *Central supply and maintenance.*—Includes nondeployable supply and maintenance depots, and supply and maintenance activities not organic to mission units.

8. *Training, medical, and other general personnel activities.*—Consists of these activities associated with military personnel.

9. *Administration and associated activities.*—The administrative support of departmental and major administrative headquarters, field commands, and administrative activities.

10. *Support of other nations.*—Activities for the support of allies.

ACTIVE FORCES

These appropriations provide for the pay and allowances of officers, enlisted personnel, cadets, and midshipmen; the subsistence of enlisted personnel; permanent change of station travel; and other military personnel costs. Changes in financial requirements are primarily related to military personnel strengths in support of the military programs. The number of active duty military personnel provided for are shown in the following tables:

RESERVE FORCES

The following appropriations are for the National Guard and Reserve components of the Army, Navy, Marine Corps, and Air Force.

National Guard and Reserve personnel.—These programs provide funds for training members of the Ready Reserve required for early mobilization needs of the Active Forces. Most of the paid National Guard and Reserve components personnel perform 48 or 24 drills and attend 2 weeks of active duty for training each year. Other personnel not requiring as intensive training receive only a period of active duty for training (usually 2 weeks) during the year. Active duty for basic training is provided for personnel enlisting in a National Guard or Reserve component who have not previously received military training. Service schools and special tours of active duty training provide additional training for limited numbers of the Ready Reserve.

The numbers of National Guard and Reserve component personnel estimated to participate in the paid training programs are summarized in the following table:

	YEAREND NUMBER		
	1969 actual	1970 estimate	1971 estimate
Defense total	1,013,067	1,028,195	1,026,221
Army Reserve:

Air Force Reserve:			
Paid drills	43,700	47,410	45,900
Nonprior service enlisted active duty for training	1,226	1,535	1,700
Paid drill training, subtotal	44,926	48,945	47,600
Other paid training ¹	2,375	2,600	2,600
Total, Air Force Reserve	47,301	51,545	50,200
Army National Guard:			
Paid drills	376,499	375,483	387,117
Nonprior service enlisted active duty for training	12,455	24,517	12,883
Total, Army National Guard	388,954	400,000	400,000
Air National Guard:			
Paid drills	79,795	86,559	84,307
Nonprior service enlisted active duty for training	3,619	2,087	2,803
Total, Air National Guard	83,414	88,646	87,110

¹ Number receiving training at any one time during year.

Reserve officer candidates.—The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a collegiate institution at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and are ordinarily ordered to active duty for a minimum period of 2 years.

The Reserve Officers' Training Corps Vitalization Act of 1964 authorizes a limited number of scholarships for 4-year ROTC students on a competitive basis. Successful candidates for the scholarships are required to serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. The Army and Air Force each awarded about 4,800 scholarships in 1970 and about 5,500 will be awarded by each of these services in 1971. Approximately 5,500 members of the Navy program will receive scholarships in 1971.

The Army, Navy, Marine Corps, and Air Force provide training for students who elect to enroll in ROTC training at the secondary level of education, and are programed to have units at 650, 110, 27, and 165 schools, respectively, in operation in 1971.

The numbers of candidates commissioned from these programs are summarized below:

91.30 Outlays from military pay act supplemental.....	-----	25,000	-----

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for: (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; (b) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve; and (c) survivors' benefits. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows the average number of personnel on the rolls during 1969 compared with the estimated numbers for 1970 and 1971.

AVERAGE NUMBER

	1969 actual	1970 estimate	1971 estimate
1. Nondisability.....	447,740	491,731	544,714
2. Temporary disability.....	17,472	21,925	28,120
3. Permanent disability.....	111,897	119,348	128,426
4. Fleet reserve.....	107,746	111,946	115,347
5. Survivors' benefits.....	6,833	7,626	8,517
Total.....	691,688	752,576	825,124

A supplemental appropriation for 1970 is anticipated for separate transmittal to provide funds for the additional retirement costs resulting from the increase in the pay of military personnel effective July 1, 1969, and for the cost-of-living increase in retired pay effective November 1, 1969, both under the provisions of Public Law 90-207. Also included in the supplemental appropriation are the additional funds required as the result of recently enacted legislation which adds 1% to any authorized cost-of-living increase occurring after October 31, 1969, including the November 1, 1969, increase.

Under the provisions of the retired servicemen's family

protection plan, retired service personnel who elect to receive reduced amounts of retired pay are able to provide for monthly payments to be continued to their survivors. The reductions are determined on a basis designed to establish an actuarially sound system. Current appropriations provide only for the net payments to be made each year and the liability for future payments of survivor benefits is unfunded. Administrative expenses of this family protection plan are provided as operation and maintenance costs of the military services. The accumulated difference between reductions in retired pay and actual payments of survivor benefits is indicated in the following table (in thousands of dollars):

RETIRED PAY—SURVIVORS' BENEFITS

	1969 actual	1970 estimate	1971 estimate
Accumulated deductions, net, start of year.....	128,650	152,392	178,862
Plus: Current deductions during the year.....	32,751	36,863	40,587
Less: Payment of survivors' benefits... ..	-9,009	-10,393	-11,802
Accumulated deductions, net, end of year.....	152,392	178,862	207,647

Proposed for separate transmittal, existing legislation:

Additional amounts, including amounts related to increases in the consumers price index, are required for payments to retired personnel.

OPERATION AND MAINTENANCE

The appropriations under this title finance the day-to-day costs, except military personnel costs, of operating and maintaining the Armed Forces, including the reserve components, and related support activities of the Department of Defense. These funds include amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements for these appropriations are influenced by a variety of factors, the principal of which are force levels, such as the number of aircraft squadrons or Army or Marine Corps divisions, military strength and deployments, rates of operational activity, numbers of installations, and quantity and complexity of major equipment (aircraft, ships, missiles, tanks, etc.) in operation. The estimates for 1971 reflect a lower military strength to support.

The principal activities in each of these major programs are identified below.

1. *Strategic forces.*—Strategic offensive forces include more than 500 manned B-52 and FB-111 bombers and 1,050 advanced ICBM's operated by the Air Force and the Navy's submarine missile fleet which deploys 656 Polaris and Poseidon missiles. Estimates for 1971 reflect increased deployment of Minuteman III missiles and conversion of additional submarines from Polaris to the more advanced Poseidon ballistic missile.

Strategic defensive forces consist of missile defense units of both Army and Air Force, interceptor fighter aircraft of the Air Force, and various airborne warning and control systems operated by the Air Force. The estimates for 1971 reflect reductions in obsolescent components of the force.

2. *General purpose forces.*—These forces of the four military services operate under the control of the various unified and specified commands. They consist of the tactical air forces of the Navy, Air Force, and Marines, the ground forces and supporting aircraft elements of the Army and Marine Corps, and Navy's combatant and support ships. Among these forces are those deployed to eastern Asia and the western Pacific; the forces deployed to Europe in the NATO area; the fleets operating in the Pacific, the Atlantic, and the Mediterranean; and the backup contingency forces in the United States.

Our tactical air forces consist of the tactical air wings of the Air Force, the carrier air wings of the Navy, and the Marine air wings. Also included are reconnaissance squadrons and a variety of training and other supporting organizations as well as the special operations forces. During 1971 the F-4 will continue to be the most numerous aircraft in the operating inventories of the three services. The A-7 aircraft will displace older attack models in both Air Force and Navy units, while deliveries of F-111's to the Air Force and the newer A-4 models to the Marine Corps will increase the numbers of those aircraft in operation.

Army land forces to be supported in the 1971 budget consist of infantry, mechanized, armored, airborne, and airmobile divisions for the conduct of land warfare. Also provided for are the force elements needed for support of these divisions during the initial stages of combat plus a limited number of units required for sustained combat support.

Marine Corps land forces consist of divisions and supporting force troop elements designed to conduct amphibious assault operations and other missions with the close support of Marine aviation.

Naval forces include attack carriers, submarines, amphibious forces, antisubmarine forces, and anti-air warfare forces. The Navy will operate fewer ships through most of 1971 than in 1970, due to the inactivation of many obsolete World War II types. However, several newly built nuclear submarines will be added to the fleet, and a number of newly constructed ships will replace older models in the destroyer and amphibious forces.

3. *Intelligence and communications.*—This program comprises the centrally directed Defense intelligence and security function, the National Military Command System, communications, and other special activities which are related to and support the missions of the combat forces in the strategic, general purpose, and airlift/sealift programs. Included in the communications category are the bulk of the Defense Communications System (DCS) transmission and switching systems and certain non-DCS communications. Funds to support the intelligence, communications, and security activities are contained in the operation and maintenance appropria-

tions of each military service, and of the Defense agencies for the Defense Communications Agency, the Defense Atomic Support Agency, and the Defense Intelligence Agency. Among the special activities are the oceanographic, weather, air rescue and recovery, and air traffic control and landing systems programs, which are peculiar either to Navy or the Air Force.

4. *Airlift and sealift.*—This provides air and land transportation services for all the Armed Forces in peacetime as well as quick reaction strategic mobility and logistical support in wartime. The major commands in this program are the Military Airlift Command of the Air Force, the Military Traffic Management and Terminal Service of the Army, and the Army-operated overseas waterports outside of Southeast Asia. These activities are reimbursed by the service customers for the direct costs of transportation services provided. The overhead and support costs are included in the Air Force and Army budgets for the airlift-sealift program.

5. *Guard and reserve.*—The military services train National Guard and reserve units and operate and maintain facilities, such as training centers, air bases and active duty field training sites, for the use of such units. In 1971, costs for the major overhaul of equipment used by these forces will be charged to this program rather than to programs supporting the active forces.

7. *Central supply and maintenance.*—This program includes funds for centralized supply and maintenance activities not organic to other programs. It covers requirements for quantitative determination, procurement (excluding acquisition costs), storage, distribution, depot-level maintenance and transportation of military material. These functions are managed by the military services and conducted at various logistical activities worldwide such as supply depots and centers, inventory control points, and repair facilities (e.g., aircraft repair facilities and depots). Workload in excess of the capacity of organic facilities is accomplished through commercial contractors.

In addition, the Defense Supply Agency provides common supply and service support to the military services within the continental United States, including, in addition to the above functions, management of Department of Defense-owned idle industrial plant equipment, the Defense surplus property disposal program and the Federal catalog program. It is also responsible for providing contract administration services, administration and supervision of Department of Defense material utilization program and coordinated procurement programs. Requirements for the Defense Supply Agency are included under operation and maintenance, Defense agencies.

Financial requirements are primarily related to the quantity of material in use and in inventory.

8. *Training, medical, and other general personnel activities.*—Each of the military services engages in the individual training of officers and enlisted men, including recruit training, career training, and specialized training in many skills. Most of this training is accomplished at 21 training centers for the training of new recruits and at 54 technical schools which afford training in specific military occupational skills. These training requirements are influenced by the number of new recruits entering the services, the total strength of the services, and by the introduction of new equipment and weapons.

The estimates contain funds to train 11,745 new aircraft pilots in 1971. Future officers are trained at the three service academies and by 514 Reserve Officer Training Corps units at universities and colleges. These sources will graduate in 1971 an estimated 23,100, most of whom will be commissioned as officers.

The services operate 208 hospitals to provide medical care for active and retired military personnel and their dependents. In addition, this program finances a medicare program at civilian medical facilities for personnel in areas where service hospitals are not accessible.

9. *Administration and associated activities.*—This program includes the costs of departmental administration, major field command headquarters, and general support activities such as finance and audit.

10. *Support of other nations.*—This program includes the direct support of Allied Forces in Southeast Asia, military assistance missions, and advisory groups to foreign nations, and for the U.S. share of the costs of NATO, SEATO, and CENTO, and support of U.S. organizations related to these international military headquarters.

Federal Funds

General and special funds:

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, including administration; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; care of the dead; chaplains' activities; awards and medals; welfare and recreation; recruiting expenses; transportation services; communications services; maps and similar data for military purposes; military surveys and engineering planning; repair of facilities; hire of passenger motor vehicles; tuition and fees incident to training of military personnel at civilian institutions; field exercises and maneuvers; expenses for the Reserve Officers' Training Corps and other units at educational institutions, as authorized by law; and not to exceed **[\$4,061,000] \$3,634,000** for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes, and his determination shall be final and conclusive upon the accounting officers of the Government; **[\$7,214,447,250] \$6,332,000,000**, of which not less than **[\$225,000,000] \$220,000,000** shall be available only for the maintenance of real property facilities: *Provided*, That not to exceed \$142,165,000, in the aggregate of the unobligated balances of appropriations made under this head for prior fiscal years, and subsequently withdrawn under the Act of July 25, 1956 (31 U.S.C. 701), may be restored and transferred to the appropriation account under this head for fiscal year 1966. PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, munitions, and communications; major items for support of the capital equipment when it is in use; the industrial facilities necessary to produce that equipment; and major modification of equipment in inventory where modernization can be achieved without buying new equipment. The capital equipment financed by these appropriations is principally procured from private contractors or produced in Government arsenals, shipyards, and plants.

The 1971 program continues the production of modern equipment and weapons in support of United States and allied forces. The equipment inventories necessary to support conventional as well as strategic warfare missions of armed services will continue to be augmented and modernized. Our military capability is improved by continuing programs to increase the mobility and firepower of ground forces, strengthen the support capabilities of the tactical air forces, modernize airlift forces, and augment the capabilities of antisubmarine warfare forces.

Direct budget programs are estimated as follows (in millions of dollars):

The appropriations for procurement of aircraft, missiles, ships, weapons, and combat vehicles are dependent upon the enactment of authorizing legislation.

Federal Funds

General and special funds:

PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps; purchase of not to exceed five thousand two hundred and [seventy-six] fifty-four passenger motor vehicles [(including one medium sedan at not to exceed \$3,000)] for replacement only; expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; [\$4,254,400,000, and in addition, \$50,000,000 shall be derived by transfer from the Defense stock fund] \$3,251,000,000, to remain available until expended. (10 U.S.C. 2110, 2353, 3012, 4531, 4532, 4682; 31 U.S.C. 638a; Department of Defense Appropriation Act, 1970; additional authorizing legislation to be proposed for \$1,655,500,000.)

¹ Includes \$68,200 thousand in 1971 for other weapons requiring congressional authorization.

² Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments (10 U.S.C. 2210).

This appropriation provides major items of combat and support equipment for approved Army forces in performing their assigned mission to meet successfully both nuclear and conventional war requirements. It also provides for the procurement of spares and repair parts not covered in the Army stock fund as well as production engineering, tooling, and facilities in support of current procurement.

1. *Aircraft.*—The 1971 program contains aircraft which are essential to the combat operation of field forces. To meet the Army's need for battlefield observation, troop movement, medical evacuation, armed escort, and rapid logistical and tactical support for combat engaged forces, the 1971 program continues production to provide additional helicopters.

3. *Missiles.*—This program includes surface-to-air and surface-to-surface missiles. In the former category, continued procurement of Chaparral missiles in 1971 will provide frontline combat units with an effective defense against low-altitude enemy aircraft. Continued procurement of the Safeguard antiballistic missile defense system, as well as procurement of improved Hawk missiles and modifications to the Nike-Hercules systems, are planned for 1971 to provide more effective air defense of continental U.S. and oversea theaters. The 1971 program funds the continued procurement of Tow antitank missile systems to further improve the armor defeating capability of Army combat elements. For the Pershing missile system, the 1971 modification program continues to provide improved performance and survival of the system in its combat role. For the Lance missile system, 1971 program initiates production of the extended range missile to provide nuclear fire support.

5. *Weapons and combat vehicles.*—This program covers the procurement of combat vehicles and weapons including related repair parts and support materiel and production base support. The 1971 program replaces losses, training consumption, wearout, and obsolescence, and will improve inventories of machineguns and rifles. The program also continues procurement of the M60A1 medium tank, and armored personnel carrier family of vehicles.

6. *Tactical and support vehicles.*—Included in this activity are the unarmored wheeled vehicles which provide surface mobility to the field forces and the worldwide logistical system.

7. *Communications and electronics equipment.*—This program provides reliable, rugged, and mobile tactical communication equipment to achieve command control over dispersed forces and weapons systems. Also included are funds for strategic communications equipment required for the worldwide defense communication system.

8. *Other support equipment.*—This program includes combat support, construction, generators, floating and materials handling equipment of Army combat forces in the field.

9. *Ammunition.*—This activity finances the procurement of ammunition for all Army weapons except missiles.

10. *Production-base support.*—This activity provides industrial facilities needed for production of end items and components and for production engineering in advance of procurement. It also provides for the layaway of Government-owned plants and equipment at the time production is completed and where it has been established that the facilities will be required in the event of mobilization.

PROCUREMENT OF AIRCRAFT AND MISSILES, NAVY

For construction, procurement, production, modification, and modernization of aircraft, missiles, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands, and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public or private plants; [\$2,620,000,000 and in addition, \$25,000,000 shall be derived by transfer from the Defense stock fund,] \$3,470,700,000, to remain available until expended. (10 U.S.C. 5012, 5031, 7201, 7341; 31 U.S.C. 718; Department of Defense Appropriation Act, 1970; additional authorizing legislation to be proposed.)

¹ Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments of other aircraft components, and spares and repair parts (22 U.S.C. 2315).

Note.—Includes \$111,100 thousand in 1971 for activities previously financed from Other procurement, Navy; 1969, \$89,700 thousand; 1970, \$101,900 thousand.

This appropriation finances the procurement of aircraft, missiles, and associated support equipment for Navy forces and Marine air wings. It also provides funds for modification of inservice aircraft and missiles to eliminate safety hazards and enhance operational effectiveness. Also included are target drones, aircraft ground support equipment, and repairable spare and repair parts for all end items procured under this appropriation. Funds are included to finance procurement of long leadtime production items in support of the planned subsequent year programs.

1. *Combat aircraft.*—The 1971 program finances the procurement of attack, fighter, electronic warfare, airborne early warning, and antisubmarine patrol aircraft and helicopters for Marine and Navy missions.

3. *Trainer aircraft.*—The 1971 program provides for the procurement of basic and advanced jet trainer aircraft to fulfill training requirements for future Navy/Marine Corps pilots.

5. *Modification of aircraft.*—This activity finances the modification of currently operational aircraft to increase their capability, to extend their useful life, or to improve flight safety.

6. *Aircraft spares and repair parts.*—This activity finances the procurement of aircraft spares and repair parts required for initial outfitting and the replenishment of reparable items.

7. *Aircraft support equipment and facilities.*—This activity provides for modernization and maintenance of Government-owned industrial facilities, component improvement, and miscellaneous support of aircraft production costs. The 1971 program also provides aircraft common ground support equipment previously included in the appropriation, Other procurement, Navy.

8. *Ballistic missiles.*—This activity funds the procurement of fleet ballistic missiles and related support programs.

General and special funds—Continued

PROCUREMENT OF AIRCRAFT AND MISSILES, NAVY—Continued

9. *Other missiles.*—The 1971 program provides for the continued procurement of missiles required for counterair, attack, fleet air defense, and antisubmarine warfare missions. Aerial targets, including drones, for training and the testing of weapons systems are also financed under this activity.

10. *Modification of missiles.*—This activity finances the modification of missiles in inventory to assure their maximum effectiveness consistent with current technology.

11. *Missile spares and repair parts.*—This activity finances the procurement of spares and repair parts for missiles and drones.

12. *Missile support equipment and facilities.*—This activity includes funds for the modernization and maintenance of Government-owned missile industrial facilities and for the support of a navigational satellite.

90	Outlays.....	1,948,758	1,900,000	1,630,000

¹ Reimbursements from non-Federal sources are derived principally from deductions from carriers, on account of loss or damage to materials in transit (31 U.S.C. 489(a)) and proceeds from the sale of personal property being replaced (40 U.S.C. 481(c)).

This appropriation finances the construction of new ships and the conversion of existing ships, including all hull, mechanical and electrical equipment, electronics, guns, torpedo and missile launching systems, and communications systems. It also finances procurement of long leadtime items for ships for which authorization will be required in the 1972 and 1973 programs.

The 1971 program continues the Navy's long-range modernization and replacement program designed to provide the fleet with modern balanced forces which can effectively respond to a wide variety of challenges in supporting our national policies.

1. *Fleet ballistic missile ships.*—Conversion and modernization of six ballistic missile submarines to a POSEIDON missile capability will improve our sea-based ballistic missile weapons system. Long leadtime items will also be procured for additional submarine conversions.

2. *Other warships.*—Funds in the 1971 program provide for long leadtime items for a third *Nimitz* class nuclear attack aircraft carrier.

One new design, nuclear powered, guided missile frigate, designed to operate offensively, independently or with nuclear or conventional strike forces, will be procured with 1971 funds. Advance funding is also provided for additional frigates. Six DD-963-type destroyers will be constructed as part of a new program which over several years will replace older World War II destroyer types. These new design destroyers will stress standardization, automation, improved reliability and maintainability to minimize life cycle costs.

Funds are requested in 1971 for three high-performance, high-speed submarines which will provide a significant increase in the capability of the submarine force. Advance funds are also requested for procurement of long leadtime components for more ships. Modernization of four guided missile frigates will increase fleet anti-air warfare capabilities.

3. *Amphibious ships.*—Two more of the new design, general purpose assault ships will be constructed to improve our amphibious assault capabilities. Additional long leadtime funding for the 1972 program is requested.

4. *Mine warfare and patrol ships.*—Five additional ocean minesweepers will be converted in the program to improve mine warfare capabilities.

5. *Auxiliaries and craft.*—Two oceanographic research ships are to be constructed to provide improved capability for afloat laboratory work. Various kinds of service craft will be procured. Included in this budget activity are funds for outfitting and post delivery work. Funds to finance claims and cost growth incurred in prior programs and expected to mature in 1971 are also requested.

² Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments (10 U.S.C. 2210).

Note.—Excludes \$139,600 thousand in 1971 for activities transferred to:

	1969	1970
Operation and maintenance, Navy.....	\$25,000	\$28,500
Procurement of aircraft and missiles, Navy.....	89,700	101,900

This appropriation finances the procurement of major weapons and equipment other than aircraft, missiles, and ships. Such equipments range from the latest electronic sensors and weapons to update our naval forces, to trucks, training equipment and spare parts. Also included is the cost associated with the installation of ship and shore equipment.

1. *Ships support equipment.*—This activity finances the procurement and installation of necessary shipboard components, including replacement of nuclear cores, to support active fleet ship maintenance, replacement and modernization, and the ship alteration and improvement program.

2. *Communications and electronics equipment.*—This activity funds communications and electronics equipment for ships and shore-based activities.

3. *Aviation support equipment.*—This activity funds the procurement of air-dropped ordnance, and generalized aircraft support equipment.

4. *Ordnance support equipment.*—This activity funds the procurement of ship-launched ordnance, antisubmarine warfare ordnance, and Polaris ground support and training equipment.

5. *Civil engineering support equipment.*—This activity finances the procurement of construction, weight han-

dling, and transportation equipment primarily in support of Navy general purpose forces.

6. *Supply support equipment.*—Procurement of self-propelled materials handling equipment and automated materials handling systems, required in support of the Navy supply system, are financed within this activity.

7. *Personnel and command support equipment.*—This activity finances procurement of training equipment, devices and aids, and procurement of industrial shop, photographic, printing, and oceanographic equipment for activities supported by the Chief of Naval Operations, as well as equipment for the Bureau of Medicine and Surgery and fleet headquarters commands.

¹ Includes \$4,400 thousand in 1971 for other weapons requiring congressional authorization.
² Reimbursements from non-Federal sources are principally the dollar value of mutual security military sales to friendly foreign nations (10 U.S.C. 2210).

This appropriation provides the Marine Corps with weapons, ammunition, and related equipments, most of which are programed for use by the Marine general purpose forces such as Marine divisions, and tank and amphibious tractor battalions. These equipments provide the military hardware and munitions for defense of advanced naval bases, limited war landing operations, and general land warfare.

¹ Reimbursements from non-Federal sources are derived principally from cash sales to foreign governments of aircraft, components, spares, and repair parts (22 U.S.C. 2315).

This appropriation provides for the procurement of aircraft, modification of in-service aircraft, procurement of spare parts including engines and major components, and aircraft support equipment and facilities including aerospace ground equipment.

1. *Combat aircraft.*—This activity provides for the procurement of aircraft to replace losses and continue modernization of the combat forces.

2. *Airlift aircraft.*—Funds to cover the anticipated prior year unfunded deficiencies and contingency provision costs for the C-5A aircraft are included as are funds to procure

additional C-9A aircraft to continue modernization of the medical airlift fleet.

3. *Trainer aircraft.*—To meet new pilot requirements of the service funded military assistance program, (MASF) additional aircraft are being procured. Provision is also made to initiate procurement of a new aircraft to modernize the navigational training fleet.

4. *Other aircraft.*—This activity provides for the procurement of additional helicopters and a limited number of aircraft for the MASF program.

5. *Modification of inservice aircraft.*—This activity provides for modifications for safety of flight, technical improvements, or for changed or improved mission accomplishment.

6. *Aircraft spares and repair parts.*—Provision is made for investment type spares and repair parts including initial spares for new aircraft and replenishment spares and repair parts for aircraft in the operating inventory.

7. *Aircraft support equipment and facilities.*—This activity provides for common aerospace ground equipment, component improvement, industrial facilities, war consumable items, and other charges.

General and special funds—Continued

MISSILE PROCUREMENT, AIR FORCE—Continued

This appropriation provides for procurement, modification, installation, and checkout of missiles, boosters, payloads, drones, and the associated ground support and checkout equipment. It also procures technical data, spares support, transportation, expansion and nonrecurring maintenance of industrial facilities, machine tool modernization, and classified project activities support.

1. *Ballistic missiles.*—This activity provides funds for the procurement of Minuteman intercontinental ballistic missile systems required for operational squadrons and crew training. The 1971 estimate provides for the procurement, installation, and checkout of missiles, aerospace ground equipment, specialized training equipment, and the required technical data for the intercontinental ballistic missile programs.

2. *Other missiles.*—Provides for the procurement of the Shrike antiradiation missile, the Short Range Attack Missile (SRAM) for use on strategic bombers, the Sparrow air-to-air missile, the Maverick air-to-ground missile, and target drones to support test and training requirements.

3. *Modification of in-service missiles.*—Provides for continued support of the Minuteman updating and force modernization programs, the conversion and modification of Thor missiles and modification of missiles and support equipment to correct deficiencies, improve safety, and increase mission capability.

4. *Spare parts and repair parts.*—Provides for initial and replenishment spare subsystems, components, and spare

parts for ballistic and other missiles including provisioning documentation.

5. *Other support.*—Provides for classified project activities, modernization and maintenance of Government-owned production facilities and support of operational space activities.

¹ Reimbursements from non-Federal sources are derived principally from sales to foreign governments, international organizations, individuals, and commercial enterprises (10 U.S.C. 2210).

1. *Munitions and associated equipment.*—The 1971 program sustains the Air Force's capability to meet the tactical and air defense requirements of both conventional and nuclear war.

2. *Vehicular equipment.*—The 1971 program provides for support of the vehicular fleet and for replacement of vehicles considered uneconomical to retain in the operational inventory.

3. *Electronics and telecommunications equipment.*—The 1971 program provides for continued procurement of end-item equipment and ancillary support items to support the electronic and communications subsystems of the Air Force's major weapon systems.

4. *Other base maintenance and support equipment.*—The 1971 program provides for procurement of ground support equipment for operational and logistical units and bases, worldwide.

RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION

The programs funded in this title provide the Department of Defense with scientific and technological capabilities for the development, test, evaluation, and

improvement of weapon systems and related equipment and techniques. Many investigative and engineering activities are performed, including scientific research directly related to defense functions and operations, design and fabrication of weapons and equipment for the future, and testing of these items to evaluate their military utility. This work is performed by Government laboratories, universities, industrial contractors, and non-profit organizations.

Appropriations in this title support the research, development, test and evaluation activities of the Army, Navy, Air Force, and Defense Agencies. Funds required for the research and development related to civil defense responsibilities of the Department of Defense are carried in the separate title, Civil Defense, in this chapter.

Since both uncertainty and risk are involved in pursuing and applying new technology, research and development programs are usually funded so that each year's resources support about 1 year's increment of the total program cost. Development of a new weapon system from initial definition to completion of testing and introduction into the operating forces may require 5 or more years.

The total 1971 budget plan for Defense research, development, test, and evaluation appropriations includes a \$93 million decrease from the current 1970 plan, reaching a total of \$7,346 million. The specific activities included in the 1971 budget plan are discussed below under each budget activity. The budget plans and estimated obligations under appropriations in this title for the Army, Navy, Air Force, Defense Agencies, and the emergency fund are summarized as follows (in thousands of dollars):

	Budget plan			Obligations		
	1969 actual	1970 estimate	1971 estimate	1969 actual	1970 estimate	1971 estimate
Summary of programs by activities:						
1. Military sciences	598,887	556,953	584,542	603,141	552,017	585,241
2. Aircraft and related equipment	1,160,944	1,597,868	1,635,423	1,054,983	1,606,951	1,663,670
3. Missiles and related equipment	2,518,241	2,284,401	2,219,462	2,426,882	2,323,865	2,226,500
4. Military astronautics and related equipment	1,073,762	673,770	480,540	1,064,120	677,770	482,085
5. Ships, small craft, and related equipment	353,814	296,726	378,787	330,358	290,400	375,500
6. Ordnance, combat vehicles, and related equipment	365,996	322,919	320,540	351,170	314,034	329,274
7. Other equipment	1,177,593	1,106,238	1,162,523	1,161,452	1,146,142	1,158,940

9. Emergency fund		75,000	50,000		75,000	50,000
Total direct	7,755,817	7,438,936	7,345,600	7,491,088	7,500,665	7,384,000

1. *Military sciences.*—This activity supports research in the physical, mathematical, environmental, engineering, biomedical, and behavioral sciences, adding needed scientific knowledge leading to applications of military significance. The research tasks selected are derived from an analysis of basic missions and corresponding technological requirements, as well as from a review of technical opportunities related to national security needs. Examples are: oceanography research to increase the future effectiveness of sea-based deterrent, submarine, and antisubmarine warfare systems; biomedical research in shock and trauma; behavioral science research to achieve improvements in methods for personnel training and selection; and electronics research to increase performance and reliability of military components and systems.

The principal support for such in-house organizations as the Naval Research Laboratory and some of the Federal contract research centers is also provided here. In addition

to the amounts directly provided for in this activity, applied research is also performed by industrial contractors supported by certain allowable indirect costs which may be permitted under contracts funded by both the research, development, test, and evaluation and procurement appropriations.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes, engines, avionics and other installed aircraft equipment. Applied research in a wide variety of supporting technologies including flight dynamics, advanced aircraft propulsion systems, avionics and biotechnology are funded here.

Weapon systems commencing major development in 1971 include the Air Force B-1 advanced strategic bomber, the subsonic cruise armed decoy (SCAD), and Navy heavy

lift helicopter. Systems continuing full scale development in 1971 include the Navy F-14A fleet air defense fighter/interceptor and its F14B/C growth versions, the S-3A antisubmarine warfare carrier based aircraft, and the Air Force F-15 air superiority fighter. Programs nearing completion in 1971 include the Air Force FB-111 strategic bomber, the C-5 logistic transport, and the Navy EA-6B electronic warfare aircraft.

Studies and preliminary development will continue on an advanced aerial tanker, light intratheater transport, an improved air defense interceptor for the Air Force, and a Navy destroyer-based helicopter system for fleet defense. Also funded in this activity are research and development centers such as the laboratories located at Wright-Patterson Air Force Base, the Naval Air Development Center at Johnsville, Pa., and the Army Aviation Materials Laboratory at Fort Eustis, Virginia.

3. *Missiles and related equipment.*—This activity provides for research, development, test, and evaluation of missile systems of all types. Development will continue on the Poseidon and Minuteman ballistic missile systems, and increase on an undersea long range missile system. The Safeguard antiballistic missile system as well as other antiballistic missile system concepts will be pursued to assure maximum effectiveness of both retaliatory and defensive forces. Advanced strike weapons such as the strategic short range attack missile, the Condor and Maverick tactical air-to-ground missiles, and an antiship missile are also under continuing development. Tactical air defense missile systems, for protection of both land-based and sea-based forces, remain high priority programs.

In addition to funding contracts with industry in the missile research and development program, this activity is a major source of financial support for the operation of certain test and evaluation facilities, such as the Eastern and Western Test Ranges, the White Sands Missile Range, the Naval Weapons Center at China Lake, and the research and development programs at the Army's Redstone Arsenal.

4. *Military astronautics and related equipment.*—This activity provides for programs directed toward the improvement of space technology for military purposes, and investigations and development of specific military applications of space vehicles. Major programs include military communications satellite systems and ballistic missile early warning systems. Continued support will be provided for flight experiment programs, and ground based applied research and technology development programs in such areas as secondary power sources and navigation, guidance, sensor, reentry, and propulsion systems. Both contractual and in-house efforts relating to space technology are funded from this activity. A significant reduction from the 1969 level results from cancellation of the Air Force Manned Orbiting Laboratory program.

5. *Ships, small craft, and related equipment.*—This activity provides for design of new types of ships and for development of mine warfare weapons, shipboard equipment including command and control systems, and nuclear and nonnuclear propulsion plants. Antisubmarine warfare continues to be emphasized with development of ship and submarine sensors and countermeasures systems, as does advanced surface craft development with the

expansion of the surface effects ship program. A significant portion of the effort at the Naval Ships Research and Development Center is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—This activity provides for the development, test, and evaluation of improved artillery, guns, rocket launchers, mortars, small arms, mines, grenades, torpedoes, nuclear and chemical munitions, and conventional air-launched weapons, as well as exploration and evaluation of new fuzes, propellants, explosives, detonators, dispensers, and armor. Systems contributing to increased or improved mobility, firepower, and counterinfiltration in limited and unconventional warfare in remote areas continue to receive major attention. Development will also continue on the MK-48 torpedo and on the medium antitank/assault weapon (DRAGON) to replace the 90mm recoilless rifle. This activity provides principal support for research and development activities at several Army arsenals and the Naval Ordnance Laboratory at White Oak, Md.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided for under other activities. Examples of the types of programs funded here are ocean engineering systems and technology development, chemical and biological agent detection and protective devices, combat clothing, tactical data processing systems, communications and electronic warfare equipment, improved logistics and materiel handling, mapping and geodetic systems, and biomedical projects. Major emphasis will continue on development of tactical night vision devices, malaria therapy, the airborne warning and control system, and undersea surveillance systems. Much of the support for the research and development effort at the Army Electronic Research and Development Laboratories, the Mitre Corp., and the Lincoln Laboratories is provided under this activity.

8. *Programwide management and support.*—For the Army and the Navy, this activity provides for those costs of operation, management, and maintenance of research, development, and test facilities which are not distributed directly to other budget activities. For the Air Force it provides for certain costs of central administration such as the Air Force Systems Command headquarters and divisions, as well as several large research, development, test, and evaluation centers.

9. *Emergency fund.*—The emergency fund enables the Secretary of Defense to support the exploitation of new scientific developments and technological breakthroughs and to provide for other unforeseen contingencies in the research, development, test, and evaluation programs.

Federal Funds

General and special funds:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; **[\$1,596,820,000]** \$1,735,900,000, to remain available until expended. (10 U.S.C. 2353, 4503; Department of Defense Appropriation Act, 1970; additional authorizing legislation to be proposed.)

MILITARY CONSTRUCTION

The direct military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title are summarized in the following table:

MILITARY CONSTRUCTION PROGRAM

	[In thousands of dollars]		
	1969 actual	1970 estimate	1971 estimate
Active Forces.....	1,128,483	1,035,306	1,336,700
Reserve Forces.....	38,105	53,100	42,000
Interservice activities.....	14,578	53,964	45,600
Total.....	1,181,166	1,142,370	1,424,300

Most of the appropriations required for the military construction accounts are dependent upon the enactment of authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This category provides for the acquisition of land and for construction of military projects as authorized in currently effective military construction acts and the new authorization referred to above. These authorizations include construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction generally exceeds \$25 thousand per project. Under this category the major program elements proposed for 1971 are as follows:

Strategic forces.—Provision has been made for the essential facilities required to continue the deployment of the Safeguard antiballistic missile system. In addition, provision has been made to upgrade existing facilities and provide for personnel support for other strategic warfare systems. Provision has also been made for additional Strategic Air Command satellite basing facilities.

General purpose forces.—Projects in this category support general combat forces including their command organizations, the logistics organizations organic to these forces, and the related support units which are deployed or deployable as constituent parts of military forces and field organizations. A major portion of the 1971 program will expand and improve troop housing facilities through the development of improved living space criteria, and community support projects through the upgrading of hospital and medical facilities.

Specialized activities.—Funds are provided to support the U.S. share of the joint defense effort by the members of the North Atlantic Treaty Organization. Also, provision is made to improve the intelligence and security areas as well as the lines of communication in Southeast Asia and the modernization of the Vietnam military forces.

Airlift and sealift.—Additional terminal facilities are provided for the operation and maintenance of the logistic support provided by the transport aircraft assigned to the Military Airlift Command.

Research and development.—An essential portion of the Army program is to provide for the relocation and improvement of testing and laboratory facilities. The Navy and Air Force programs consist of environmental science testing laboratories and supporting research projects.

Reserve forces.—The facilities required for the training of the Reserve Forces components include armories, training centers, maintenance shops, warehouses, airfield pavements, and other related training facilities.

Logistics.—Funds are provided for aircraft, ship and ground equipment maintenance, overhaul and repair facilities which are needed to support increased requirements, satisfy deficiencies in current operations, and replace and modernize outmoded facilities.

Personnel support.—A significant effort has been made to provide funds for adequate housing, medical and community support for military personnel to improve the morale of men in uniform and encourage their retention in the service. Upgrading of existing facilities with the application of improved standards has been provided in addition to new facilities.

2. *Minor construction.*—Provision is made for construction of permanent and temporary projects that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200 thousand per project for the Active Forces, and \$50 thousand per project for the Reserve component projects as defined in Department of Defense Directives 7040.2 and 1225.5, respectively. Projects may be accomplished with use of operation and maintenance funds where the estimated cost of such construction is \$25 thousand or less per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and minor land acquisitions.

Federal Funds

General and special funds:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, [in section 204 of title II, Public Law 91-121,] and in sections 2673 and 2675 of title 10, United States Code, [\$287,228,000] \$708,000,000, to remain available until expended. (Military Construction Appropriation Act, 1970; additional authorizing legislation to be proposed for \$657,800,000.)

FAMILY HOUSING

The Department of Defense family housing management account (76 Stat. 237) finances all expenses of the military family housing program. Funds provided in annual military construction appropriation acts under the title "Family Housing, Defense" are transferred to this account for obligation and expenditure. This appropriation is dependent on the enactment of authorizing legislation, the details of which have been completed and are being submitted to the Congress for early consideration. An appropriation of \$809.0 million is requested for 1971, of which \$219.5 million is for construction of new housing, improvement of existing housing and related projects, and \$589.5 million is for the operation and maintenance of family housing and related facilities, for leasing of family housing, for payments required on the indebtedness assumed to acquire Capehart and Wherry housing and to build surplus commodity housing in foreign countries, for authorized payments of servicemen's mortgage insurance premiums, and for continuance of an offbase housing referral service.

Federal Funds

General and special funds:

FAMILY HOUSING, DEFENSE

For expenses of family housing for the Army, Navy, Marine Corps, Air Force, and Defense agencies, for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation, maintenance, and debt payment, including leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, **[\$688,476,000]** \$809,038,000, to be obligated and expended in the Family Housing Management Account established pursuant to section 501(a) of Public Law 87-554, in not to exceed the following amounts:

For the Army:

Construction, **[\$30,461,000]** \$46,402,000;
Operation, maintenance, **[\$141,440,000]** \$152,776,000;
[\$Debt payment, \$47,480,000.]

For the Navy and Marine Corps:

Construction, **[\$51,892,000]** \$95,174,000;
Operation, maintenance, **[\$94,758,000]** \$101,985,000;
[\$Debt payment, \$31,648,000.]

For the Air Force:

Construction, **[\$41,989,000]** \$77,600,000;
Operation, maintenance, **[\$155,345,000]** \$165,375,000;
[\$Debt payment, \$87,680,000.]

For Defense agencies:

Construction, **[\$449,000]** \$326,000;
Operation, maintenance, **[\$5,334,000]** \$5,134,000;

For Department of Defense: Debt payment, \$164,266,000.

Provided, That the amounts provided under this head for construction and for debt payment shall remain available until expended. (Military Construction Appropriation Act, 1970; additional authorizing legislation to be proposed.)

¹ Reimbursements from non-Federal sources are derived from collection of rentals from occupants of certain military housing units and the sale of homes at excess military installations (69 Stat. 652 and 70 Stat. 1105).

1. *Construction.*—(a) *Construction of new housing.*—The construction of 8,000 new permanent units and the relocation of 27 “relocatable” units to new sites at an estimated cost of \$198.0 million is proposed in furtherance of the continuing effort to provide adequate family housing for eligible personnel. These units are distributed by service as follows: Army—1,700; Navy and Marine Corps—3,500; and Air Force—2,800. The 27 units to be relocated will be placed on Air Force installations.

(b) *Construction improvements.*—Execution of the \$20.4 million improvement program will be realized during 1971

of which \$1.2 million provides for the unforeseen and urgently required projects to be accomplished under the authority of 10 U.S.C. 2674 in 1971.

(c) *Planning.*—Funds are included in the construction of new housing budget activity to design the 8,027 housing units in the 1971 program. Costs to be incurred for planning future year housing projects and for projects which will not go forward to completion are estimated at \$1 million.

General and special funds—Continued

FAMILY HOUSING, DEFENSE—Continued

(d) *Rental guarantee payments.*—The last of the rental guarantee agreements entered into under the original authority (66 Stat. 622) expired in 1965; subsequent agreements entered into under the existing authority (77 Stat. 326) require \$129 thousand during 1971.

2. *Operation, maintenance and debt payment.*—(a) *Operation.*—\$194.5 million is required in 1971 for the operation of an estimated 369,585 family housing units (excluding leased units); and \$29.6 million is required in 1971 to lease 11,466 units in both the United States and in foreign countries as part of the program to provide adequate family housing for eligible personnel.

(b) *Maintenance of real property.*—The cost of maintenance and repair of the 1971 family housing inventory is estimated at \$205.8 million. Minor alterations, not to exceed an average of \$50 per unit, are funded in this subactivity.

(c) *Interest payments.*—A total of \$69.8 million is required in 1971 to defray interest charges on the indebtedness assumed to acquire Capehart and Wherry housing and for related expenses. In addition, appropriation of \$90.5 million is required in 1971 for reduction of agency indebtedness that was assumed with the acquisition of the Capehart, Wherry, and surplus commodity housing.

(d) *Mortgage insurance premiums.*—Premium payments are required on mortgage insurance provided by the Federal Housing Administration: (1) through the General insurance fund on mortgages assumed by Defense to acquire Capehart and Wherry housing; and (2) on mortgages assumed by active military personnel for housing purchased under the provisions of section 124, Public Law 83-560.

SUPPLEMENTARY PERSONAL SERVICES DATA

Since the bulk of the personal services funded from the Family Housing, Defense, appropriation is on a reimbursable part-time basis, it is not reflected in the

foregoing personnel summary. The following supplementary schedule is provided to indicate the man-year equivalent of all the personal services paid for by this appropriation. The full-time positions paid directly from this appropriation are listed in the personnel summary schedule provided for this appropriation. The positions partially supported by reimbursement from this appropriation are listed in the schedules of personnel compensation provided for each of the sponsoring Defense appropriations.

This fund finances programs for reducing the losses of military personnel and civilian employees incident to disposition of their one- or two-family dwellings when military installations are closed (80 Stat. 1291). Eligible personnel may be reimbursed for certain losses as a result of sale of their dwellings located at or near military installations which the Department of Defense has, subsequent to November 1, 1964, ordered to be closed in whole or in part, or the Department of Defense may acquire such property. Proceeds from sale or rental of such property are deposited in this fund. The following business-type statements reflect operations of the program which started in 1968.

90 Outlays, excluding pay increase supplemental	59,915	51,168	49,982
91.20 Outlays from civilian pay act supplemental		832	18

Note.—Excludes \$4,200 thousand in 1971 for activities transferred to Research, shelter survey and marking. 1969, \$2,661 thousand; 1970, \$2,500 thousand.

1. *Warning and detection.*—Provides for the operation, maintenance, and continuing development of the nationwide emergency warning system and the distribution of radiological defense equipment to develop and maintain an effective detection and monitoring system.

2. *Emergency operations.*—Provides for the support of those activities which are required to develop and maintain an optimum capability to perform essential actions in emergency periods to enhance survival probabilities.

3. *Financial assistance to States.*—Provides grants to State and local governments to assist them in meeting their responsibilities under the Federal Civil Defense Act of 1950, as amended.

4. *Management.*—Provides for the administrative expenses of the Office of Civil Defense staff; i.e., salaries, travel and supporting costs for the management and administration of the national civil defense program.

¹ Reimbursement from non-Federal sources are derived from commercial carriers for property lost or damaged in transit (31 U.S.C. 489a).

Note.—Includes \$4,200 thousand in 1971 for activities previously financed from: Operation and maintenance, Civil Defense. 1969, \$2,661 thousand; 1970, \$2,500 thousand.

1. *Shelters*.—Provides for the development of a nationwide inventory of fallout shelters and plans for their use in emergency periods to enhance survival probabilities. The initial phase of a new nationwide system that will distribute civil defense warning information to organizations responsible for the direction of civil defense activities at all levels of Government is provided for.

2. *Emergency operating centers*.—Provides matching grants to State and local governments as authorized by section 201(i) of the Federal Civil Defense Act of 1950 for the design, constructing and equipping of State and local emergency operating centers and the procurement and installation of related capital equipment for such civil defense supporting systems as warning and communications. This program was formerly budgeted for under the Financial Assistance to States program within the Operation and maintenance appropriation.

3. *Research and development*.—Provides for improvement of the technical basis for ongoing and potential future civil defense programs and operations.

REVOLVING AND MANAGEMENT FUNDS**Federal Funds****Public enterprise funds:****DEFENSE PRODUCTION GUARANTEES**

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, Air Force, and Defense Supply Agency to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are financed from guarantee fees and

interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Net earnings are retained to purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. app. 2091).

Intragovernmental funds:

DEPARTMENT OF DEFENSE STOCK FUNDS

The Department of Defense stock funds finance the acquisition of inventories of material and supplies for resale and mobilization (10 U.S.C. 2208). These inventories are stocked and sold at designated defense activities worldwide.

Budget program.—In 1969, as part of the continuing program to improve management of inventories, the stock funds capitalized inventories of expense-type items previously financed by appropriated funds and decapitalized inventories of investment-type items. In 1970, the Air Force extended its stock fund to cover inventories held at bases in the Pacific area. As a result, stock fund inventories are higher than in 1968. The decrease in obligations and inventories in 1971 from 1970 result from decreased troop strengths and activity rates. Yearend inventories are estimated as shown below (in millions of dollars):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Army stock fund:				
Operating and other stocks.....	1,714	1,661	1,254	1,303

Total.....	7,864	11,053	10,094	9,496

Financing the budget program.—Funds for financing the budget program are usually derived from sales to customers. During 1969 sale of inventory capitalized without cost and reductions to inventory levels generated an excess working capital balance of \$1,510 million which was transferred to other appropriations. In 1970 and 1971 additional excesses of \$400 million and \$262 million are generated and also proposed for transfer. Expenditures in 1971 are projected to decrease by \$404 million from 1970 reflecting a reduction to inventory levels due to the decrease in military forces and activity rates as shown below (in millions of dollars):

	Gross expenditures		
	1969 actual	1970 estimate	1971 estimate
Army stock fund.....	3,760	3,513	3,255
Navy stock fund.....	2,027	2,114	2,251
Marine Corps stock fund.....	240	253	213
Air Force stock fund.....	2,835	3,125	3,078
Defense stock fund.....	3,229	2,988	2,792
Total.....	12,091	11,993	11,589

DOD stock funds are authorized to incur obligations in anticipation of future year business (10 U.S.C. 2210(b)). This is necessary because the procurement leadtime on material is greater than the time required to fill and collect for customer orders. Pursuant to this authority contract authorization of \$2,621 million was available at the end of 1969 decreasing to \$1,435 million in 1971.

Operating results and financial condition.—Net loss of \$494 million is forecast for 1970 with a gain of \$28 million projected for 1971.

Investment (equity) of the U.S. Government at the end of 1971 is estimated at \$10,145 million, including \$19,450 million in inventory and other assets capitalized less \$4,948 million in working capital transferred out and a cumulative operating deficit of \$4,357 million.

INDUSTRIAL FUNDS

Department of Defense industrial funds finance industrial and commercial type activities on a reimbursable basis (10 U.S.C. 2208). These programs are supported by orders citing the customers' appropriations. Costs are initially financed by the industrial funds' working capital and subsequently billed to customers' appropriations. Industrial fund activities are reimbursed on a progress payment basis for production costs incurred pursuant to specific orders and for the cost of material inventories which are allocated to specific orders and held in reserve for those orders. Government investment as of June 30, 1971, is estimated at \$663 million.

Total production costs are projected to decrease by \$328.9 million in 1971 reflecting lower support requirements, as indicated below (in millions of dollars):

	Total production costs		
	1969 actual	1970 estimate	1971 estimate
Army industrial fund	1,455.7	1,408.8	1,373.7
Navy industrial fund	4,240.2	4,536.3	4,351.2
Marine Corps industrial fund	24.8	24.9	25.3
Air Force industrial fund	2,270.8	2,441.5	2,301.7

Defense industrial fund	326.2	378.2	408.9
Total	8,317.7	8,789.7	8,460.8

The Army industrial fund is currently used to finance 32 activities engaged in research, development, test, engineering, transportation, and traffic management, and limited quantity production and major overhaul of weapons, munitions, missiles, and other military equipment.

The Navy industrial fund finances nine shipyards, 37 printing plants, six ordnance plants, seven aircraft overhaul and repair facilities, nine public works centers, 17 research activities (of which 13 were chartered under the fund beginning July 1, 1969), 10 naval weapons facilities and ammunition depots, two Polaris missile facilities, and the Military Sea Transportation Service. The cost of goods and services produced in 1971 is expected to decline slightly from the 1970 level, reflecting a reduction in shipyard and MSTs workloads.

The Marine Corps industrial fund finances two depot maintenance activities. The cost of goods and services produced is expected to continue at approximately the same level as in 1970.

The Air Force industrial fund finances nine printing plants, 34 laundries, the Alaska Communication Service, the Military Airlift Command, the six Air Force depot activities, and the Arnold Engineering Development Center. The Alaska Communication Service will be sold as of July 1, 1970, pursuant to Public Law 90-135. No new activities are forecast in this estimate.

The Defense industrial fund finances the Defense Clothing and Textile Supply Center and leased communication services procured by the Defense Commercial Communications Office. Cost increases in 1970 and 1971 are due to tariff increases and expansion of the automatic switching networks into overseas areas.

¹ Balance of selected resources are identified in the statement of financial condition.

² Adjustment in selected resources in 1969 consists of assets capitalized in the amount of \$132,970 thousand less accrued leave liability assumed of \$30,586 thousand, reflecting primarily the initial capitalization of depot maintenance and research activities. The amount for 1971 reflects decapitalization of the Alaska Communication System which has been sold pursuant to Public Law 90-135.

¹ Reimbursements from non-Federal sources are derived from employee service-connected activities such as the Navy Mutual Aid, American Federation of Government Employees, Navy Relief Society, Department of Defense Concessions Committee, Army Welfare Fund, and European Exchange System.

This fund was created to simplify the financing and accounting for operations supported by two or more appropriations (10 U.S.C. 2209). The corpus of the fund consists of \$1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*—Finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services.*—Provides for the central payment of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs incurred by the Army.

3. *Construction activity, Europe.*—Finances certain administrative and overhead expenses in the Department of Defense construction programs in Western Europe.

This fund was created to facilitate the financing of operations supported by two or more appropriations (10 U.S.C. 2209). The principal activity financed through the fund is the transportation of supplies, materials, and equipment of the Navy. The funds for departmental administrative activities include maintenance and alteration of office space and printing expenses. The Armed Services Board of Contract Appeals is also financed through this fund.

This fund represents advances received for goods or services furnished foreign governments and private parties (31 U.S.C. 643). Authorized individuals and organizations requesting goods or services are required to advance amounts to cover the estimated value of this fund. These advances are then used to reimburse the Operation and maintenance, Navy appropriation for the value of goods provided or services rendered.

Distribution of outlays by account:

Surcharge collections, sales of commissary stores, Air Force.....	182	-2,013	-2,256
Air Force cadet fund.....	158	175	185

¹ Reimbursements from non-Federal sources are derived from a surcharge on sales of commissary stores and from funds collected in the operation of the cadet store at the U.S. Air Force Academy.

1. *Surcharge collections, sales of commissary stores.*—This fund was established to reimburse certain appropriations for payments made on behalf of the operations of commissary stores of the Department of the Air Force for operating equipment and supplies, and such other costs as provided by section 614 of the Department of Defense Appropriation Act, 1970 (Public Law 91-171).

2. *Air Force cadet fund.*—The cadet fund is maintained at the U.S. Air Force Academy, Colorado Springs, Colo. Cadet pay is deposited directly into the account and disbursements are made from it against cadet credit charges for meals, uniforms and other clothing, cash payments to cadets, transportation, and sundry other items of personal maintenance (31 U.S.C. 66(b)).

GENERAL PROVISIONS

SEC. 601. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 602. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with 5 U.S.C. 3109, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 603. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 604. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act.

SEC. 605. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 606. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land or interest therein as authorized by section 2672 or 2675 of title 10, United States Code.

SEC. 607. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as

authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding **[\$129,900,000]** \$138,000,000, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for leasing of buildings and facilities including payment of rentals for special purpose space at the seat of government, and in the conduct of field exercises and maneuvers or, in administering the provisions of 43 U.S.C. 315q, rentals may be paid in advance; (f) payments under contracts for maintenance of tools and facilities for twelve months beginning at any time during the fiscal year; (g) maintenance of Defense access roads certified as important to national defense in accordance with section 210 of title 23, United States Code; (h) for the purchase of milk for enlisted personnel of the Department of Defense heretofore made available pursuant to section 1446a, title 7, United States Code, and the cost of milk so purchased, as determined by the Secretary of Defense, shall be included in the value of the commuted ration; (i) transporting civilian clothing to the home of record of selective service inductees and recruits on entering the military services; (j) payments under leases for real or personal property for twelve months beginning at any time during the fiscal year; (k) pay and allowances of not to exceed nine persons, including personnel detailed to International Military Headquarters and Organizations, at rates provided for under section 625(d)(1) of the Foreign Assistance Act of 1961, as amended.

SEC. **[608]** 607. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners, applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment, prisoners, civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; (e) expenses of prisoners confined in non-military facilities; (f) military courts, boards, and commissions; (g) utility services for buildings erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; (i) expenses of Latin-American cooperation as authorized for the Navy by law (10 U.S.C. 7208); and (j) expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case.

SEC. **[609]** 608. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. **[610]** 609. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians, except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.50 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deduction from the pay of civilian employees: *Provided further*, That members of organized nonprofit youth groups sponsored at either the national or local level, when extended the privilege of visiting a military

installation and permitted to eat in the general mess by the commanding officer of the installation, shall pay the commuted ration cost of such meal or meals.

SEC. **[611]** 610. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. **[612]** 611. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. **[613]** 612. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interests of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

(d) The Secretary of Defense shall immediately advise Congress of the exercise of any authority granted in this section, and shall report monthly on the estimated obligations incurred pursuant to subsections (b) and (c).

SEC. **[614]** 613. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. **[615]** 614. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 301 of title 37, United States Code, to certain members of the Armed Forces otherwise entitled to receive flight pay during the current fiscal year (1) who have held aeronautical ratings or designations for not less than fifteen years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights.

SEC. [616] 615. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in any one shipment having a net weight in excess of thirteen thousand five hundred pounds.

SEC. [617] 616. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. [618] 617. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 621 of this Act.

SEC. [619] 618. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer-camp training of the Reserve Officers' Training Corps.

SEC. [620] 619. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to Congress and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. [621] 620. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. [622] 621. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. [623] 622. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. [624] 623. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided further*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. [625] 624. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. [626] 625. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. [627] 626. Appropriations contained in this Act shall be available for the purchase of household furnishings, [house trailers (for the purpose of relieving unusual individual losses occasioned by the relocation of personnel from installations in France),] and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. [628] 627. During the current fiscal year, appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901; 80 Stat. 508).

SEC. [629] 628. During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national, or international rifle matches.

SEC. [630] 629. Funds provided in this Act for congressional liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed \$1,150,000: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

SEC. [631] 630. Of the funds made available by this Act for the services of the Military Airlift Command, \$100,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil air fleet.

SEC. 632. Not less than \$7,500,000 of the funds made available in this Act for travel expenses in connection with temporary duty and permanent change of station of civilian and military personnel of the Department of Defense shall be available only for the procurement of commercial passenger sea transportation service on American-flag vessels.]

SEC. [633] 631. During the current fiscal year, appropriations available to the Department of Defense for operation may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, unfitness, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

SEC. [634] 632. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by that contractor of personnel required for the performance by the contractor of obligations under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

SEC. [635] 633. Funds appropriated in this Act for maintenance of and repair of facilities and installations shall not be available for acquisition or new facilities, or alteration, expansion, extension, or addition of existing facilities, as defined in Department of Defense Directive 7040.2, dated January 18, 1961, in excess of \$25,000: *Provided*, That the Secretary of Defense may amend or change the said directive during the current fiscal year, consistent with the purpose of this section.

SEC. [636] 634. During the current fiscal year, the Secretary of Defense may, if he deems it vital to the security of the United States and in the national interest to further improve the readiness of the Armed Forces, including the reserve components, transfer under the authority and terms of the Emergency Fund an additional [\$200,000,000] \$300,000,000: *Provided*, That the transfer authority made available under the terms of the Emergency Fund appropriation contained in this Act is hereby broadened to meet the requirements of this section: *Provided further*, That the Secretary of Defense shall notify Congress promptly of all transfers made pursuant to this authority.

SEC. [637] 635. None of the funds appropriated in this Act may be used to make payments under contracts for any program, project, or activity in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. [638] 636. (a) Appropriations available to the Department of Defense during the current fiscal year shall be available for their stated purposes to support: (1) Vietnamese and other free world forces in Vietnam; (2) local forces in Laos and Thailand; and for related costs, on such terms and conditions as the Secretary of Defense may determine.

(b) Within thirty days after the end of each quarter, the Secretary of Defense shall render to Congress a report with respect to the estimated value by purpose, by country, of support furnished from such appropriations.

SEC. [639] 637. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: *Provided*, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Bureau of the Budget.

[SEC. 640. No part of the funds appropriated under this Act shall be used to pay salaries of any Federal employee who is convicted in any Federal, State, or local court of competent jurisdiction, of inciting, promoting, or carrying on a riot, or any group activity resulting in material damage to property or injury to persons, found to be in violation of Federal, State, or local laws designed to protect persons or property in the community concerned.]

[SEC. 641. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan or a grant to any applicant who has been convicted by any court of general jurisdiction of any crime which involves the use of or the assistance to others in the use of force, trespass or the seizure of property under control of an institution of higher education to prevent officials or students at such an institution from engaging in their duties or pursuing their studies.]

[SEC. 642. (a) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for procurement (except Shipbuilding and Conversion, Navy) which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for three or more fiscal years, shall be proposed for rescission.

(b) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for Shipbuilding which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for five or more fiscal years, shall be proposed for rescission.

(c) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for research, development, test and evaluation (except Emergency Fund, Defense) which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for two or more fiscal years, shall be proposed rescission.]

SEC. [643] 638. In line with the expressed intention of the President of the United States, none of the funds appropriated by this Act shall be used to finance the introduction of American ground combat troops into Laos or Thailand.

SEC. 639. *The unobligated balances as of June 30, 1971, of the appropriations to the Department of Defense enumerated in Sec. 642 of the Department of Defense Appropriation Act, 1970, are hereby rescinded in the total amount of \$387,400,000, which shall be allocated to such appropriations in such amounts as may be determined by the Secretary of Defense, with the approval of the Director of the Bureau of the Budget. (Department of Defense Appropriation Act, 1970.)*

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the [first] second session of the Ninety-first Congress.

SEC. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed \$25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction, and the application of economical construction practices.

SEC. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories, or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 105. Funds appropriated to the Department of Defense for construction are hereby made available for hire of passenger motor vehicles.

SEC. 106. Funds appropriated to the Department of Defense for construction may be used for advances to the Bureau of Public Roads, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 107. None of the funds appropriated in this Act may be used to begin construction of new bases inside the Continental United States for which specific appropriations have not been made.

SEC. 108. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than \$25,000.

SEC. 109. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 110. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriation Acts.

[SEC. 111. Funds received from the proceeds of handling excess family housing remaining under the jurisdiction of the Department of Defense shall be deposited to the credit of "Family Housing, Defense" to be used for the purpose of reducing debt payments of the military departments.] (*Military Construction Appropriation Act, 1970.*)

GENERAL PROVISIONS—CIVIL DEFENSE

Appropriations contained in this Act for carrying out civil defense activities shall not be available in excess of the limitations on appropriations contained in section 408 of the Federal Civil Defense Act, as amended (50 U.S.C. App. 2260).

No part of any appropriation in this Act shall be available for the construction of warehouses or for the lease of warehouse space in any building which is to be constructed specifically for civil defense activities. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1970.*)

General and special funds:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of seven passenger motor vehicles of which two shall be for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries, to remain available until expended, [\$15,125,000, together with \$991,000 to be derived by transfer from the appropriation "Cemeterial Expenses" contained in the Public Works and Atomic Energy Commission Appropriation Act, 1968] \$17,434,000: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of \$17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation. (24 U.S.C. 271, 273-276, 278, 279, 279a-b, 282, 288, 290; *Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

This appropriation provides funds for the operation and maintenance of the national cemetery system and for the procurement and supply of headstones and markers for graves of eligible persons buried in national and private cemeteries.

1. *Cemetery operation and maintenance.*—The national cemetery system consists of 118 activities located in 33

States, Puerto Rico, and the District of Columbia. Included are 85 national cemeteries and 33 miscellaneous burial plots and monument sites. A total of 39,811 interments were made in 1969; 39,784 are estimated for 1970 and 40,489 are projected for 1971. There will be 2,694 developed acres to be maintained in 1971.

2. *Construction.*—Provision is made for six projects, including one gravesite development project necessary to preclude closing of this cemetery to interments. An amount is also included for engineering investigations and preparation of plans for future requirements.

3. *Headstone procurement.*—The basis of the 1971 program is a 5.1% increase in normal applications.

	1969 actual	1970 estimate	1971 estimate

CORPS OF ENGINEERS—CIVIL

The civil works program of the Corps of Engineers consists of a number of related activities for the control and development for beneficial use of water resources in the United States, Puerto Rico, and the Virgin Islands.

The requested appropriation is \$1,270 million, which is \$115 million more than the 1970 appropriation, and \$24 million more than the appropriation for 1969.

Federal Funds

General and special funds:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, surveys and studies of projects prior to authorization for construction, **[\$41,191,000]** \$39,597,000, to remain available until expended: *Provided*, That **[\$625,000]** \$655,000 of this appropriation shall be transferred to the Bureau of Sport Fisheries and Wildlife for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. (33 U.S.C. 426-426c, 540, 541, 701; *Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

90 Outlays.....	33,713	43,469 40,000

¹ Selected resources as of June 30 are as follows:

	1968	1969	1970	1971
Unpaid undelivered orders.....	5,903	6,322	5,218	4,661
Advances.....	2	2	-----	-----
Total selected resources....	5,905	6,324	5,218	4,661

² Includes \$951 thousand of 1970 appropriations in budgetary reserve for application in 1971.

1. *Surveys.*—Navigation and flood control studies are made to determine the need and economic justification for proposed water and related land resource developments. Beach erosion control studies are undertaken to determine the need for shore protection and remedial measures at specific localities. Funds are provided in 1971 to continue 91 navigation, 195 flood control, and 12 beach erosion surveys. A total of 10 navigation, 18 flood control, and four beach erosion surveys will be initiated.

Comprehensive river basin studies provide for broad consideration of water and related land resource needs of river basins. They are coordinated with the related river basin planning efforts of the Departments of the Interior and of Agriculture and other concerned agencies. One new comprehensive river basin study, Red River of the North, Minnesota and North Dakota, will be initiated. Work will be continued on the following:

- | | |
|----------------------------------|--|
| 1. Big Muddy River | 7. Lower Mississippi Region |
| 2. California Region | 8. North Atlantic Region |
| 3. Columbia-North Pacific Region | 9. Pascagoula River Basin ¹ |
| 4. Great Basin Region | 10. Upper Colorado Region |
| 5. Great Lakes Region | 11. White River Basin ¹ |
| 6. Lower Colorado Region | |

¹ Preparation of authorization report only.

Special studies are made to resolve unique or especially complex water resources problems. Funds are requested to continue seven special studies.

Surveys are made in coordination with Federal, State, and local agencies and interests. They give appropriate consideration to present and future requirements for all beneficial uses of water and related land resources, including navigation, flood control, water supply, irrigation, water quality control, power, recreation, and fish and wildlife conservation.

2. *Collection and study of basic data.*—Funds are transferred to the Geological Survey for installation, operation, and maintenance of stream gaging stations; to the Weather Bureau for hydrometeorological studies and

precipitation stations; and to the Bureau of Sport Fisheries and Wildlife for preauthorization studies of the effects of proposed projects upon fish and wildlife. The Corps of Engineers participates on a number of engineering and control boards that study and control international streams mutually affecting the United States and Canada. Information about the flood hazard, advice, and assistance are furnished to States and local governmental agencies, upon their request, and to other Federal agencies for guidance in the management of flood plain areas to assure the best and safest use of such areas.

3. *Research and development.*—Coastal engineering research and development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to interested Federal, State, and local agencies and individuals.

Civil works investigations are made to improve procedures for analysis of hydrologic and engineering data, refine design methods, develop better materials and practices for the construction and maintenance of hydraulic structures, and improve procedures used in formulating plans for water resources development. A scientific and technical information center will acquire published and unpublished literature, prepare and distribute abstracts, technical reviews, and evaluations, and answer inquiries for information from scientists and engineers to maintain their knowledge of new developments in their fields.

The Mississippi River Basin model is being utilized to improve operation of the reservoir system in the basin and to study potential flood levels on the lower river. Funds requested will be used for maintenance of the model. A one-year program of computer studies will be conducted to substitute mathematical models for the hydraulic model.

Nuclear explosives studies for civil construction are carried out as part of a joint research program with the Atomic Energy Commission. The objective is to develop an engineering capability to use nuclear explosives in the construction of public works projects. The Corps of Engineers has primary responsibility for chemical explosive experiments and development of engineering, construction, and cost data.

The International Hydrological Decade (1965–74) is a joint effort by some 100 countries to advance scientific knowledge of water to meet the growing demands for this resource more effectively. The Corps of Engineers component of the U.S. effort will be devoted to preparing for and conducting studies relative to the International Field Year on the Great Lakes in cooperation with Canada. In addition, the Corps is preparing a technical report outlining techniques and procedures for determining hydrologic engineering criteria under conditions of limited data.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction): **[\$711,992,000]** **\$821,398,000**, to remain available until expended: *Provided*, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That in connection with the rehabilitation of the Snake Creek Embankment of the Garrison Dam and Reservoir Project, North Dakota, the Corps of Engineers is authorized to participate with the State of North Dakota to the extent of one-half the cost of widening the present embankment to provide a four-lane right-of-way for U.S. Highway 83 in lieu of the present two-lane highway: *Provided further*, That funds appropriated for the Robert S. Kerr Lock and Dam, Oklahoma, shall be available to provide a 9-foot deep auxiliary navigation channel and 1,000-foot long turning basin along Sans Bois Creek, with appropriate widths and an overall length of approximately ten miles: *Provided further*, That **[\$600,000]** **\$625,000** of this

¹ Advance engineering and design only.² Includes \$164 million of 1970 appropriations in budgetary reserve for application in 1971.

The requested appropriation of \$821 million is an increase of \$109 million over the amount appropriated for 1970, and a decrease of \$44 million compared with the appropriation for 1969. About 63% of the requested program will be applied to 52 major projects in amounts of \$5 million or more each.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high-priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects.

2. *Navigation projects.*—This activity includes construction of locks, dams, and canals, and improvement of channels and harbors by dredging and by construction of breakwaters, jetties, and dikes. Provision also is made for the construction of small navigation projects not requiring specific congressional authority.

With the funds requested, work will be continued in 1971 on 34 channel and harbor projects, of which one will be completed; and on 14 lock, dam, and canal projects, of which three will be completed. Three new channel and harbor projects and one new lock and dam project will be initiated as follows:

CHANNEL AND HARBOR PROJECTS

1. Sergius and Whitestone Narrows, Alaska.
2. Fort Madison Harbor, Iowa.
3. Manitowoc Harbor, Wis.

LOCK AND DAM PROJECTS

1. Tennessee-Tombigbee Waterway, Alabama and Mississippi.

3. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States and its possessions. Existing law provides for Federal payment of 50% of the cost of beach erosion control works for the protection of non-Federal publicly owned or publicly used shores, and up to 70% of the cost of protection of State and other publicly owned shore parks and conservation areas that meet certain criteria.

Funds are requested for seven beach erosion control projects. Four are for continuing construction and three are for reimbursement to local interests, one of which will be completed with 1971 funds. A number of small beach erosion control projects will be financed from funds appropriated in prior years.

4. *Flood control projects.*—This activity includes local protection projects and reservoirs for flood control and other purposes, such as water supply, but without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for snagging and clearing work on navigable streams and tributaries when such work is necessary, for emergency bank protection, and for construction of small flood

control projects not requiring specific congressional authority.

With the funds requested, work will be continued on 73 local protection projects, of which 11 will be completed with 1971 funds; and on 66 reservoir projects, of which 11 will be completed. Three new local protection projects and seven new reservoir projects will be initiated as follows:

LOCAL PROTECTION PROJECTS

1. Phoenix and vicinity, Ariz. (phase I).
3. Big Stone Lake-Whetstone River, Minnesota and South Dakota.
2. Hays, Kans.

RESERVOIR PROJECTS

1. Trumbull Pond Reservoir, Conn.
5. Tioga-Hammond Reservoir, Pa.
2. Los Esteros-Alamogordo Reservoirs, N. Mex.
6. Stonewall Jackson Lake, W. Va.
3. Falls Reservoir, N.C.
7. La Farge Reservoir and Channel, Wis.
4. Elk Creek Reservoir, Oreg.

5. *Multiple-purpose projects, including power.*—Work will be continued on 29 multiple-purpose projects with power installations, five of which will be completed with 1971 funds. Construction will be initiated on two multiple-purpose including power projects, as follows:

1. Tocks Island Reservoir, New Jersey, New York, and Pennsylvania.
2. Ice Harbor Lock and Dam, Washington (additional units).

6. *Recreation on completed projects.*—Additional public use facilities will be provided at completed projects to accommodate a rapidly increasing number of visitors.

7. *Land acquisition fund.*—This request establishes a replenishable fund to permit the acquisition of lands required for authorized Federal projects in those cases where delay creates an extreme hardship on the owners. The fund will be replenished from future appropriations to such projects when made.

8. *Small authorized projects.*—Activities in 1971 will be financed from funds appropriated in prior years.

9. *Coordination Act studies (Fish and Wildlife Service).*—This program provides for detailed studies and reports by the Bureau of Sport Fisheries and Wildlife to determine the effects on fish and wildlife resources of water control projects of the Corps of Engineers.

10. *Rehabilitation.*—Rehabilitation work will be undertaken on existing projects that have deteriorated to the extent that their usefulness has been impaired. Repair of breakwaters, revetments, and piers will be carried out on five navigation projects and one multiple-purpose including power project.

11. *Aquatic plant control.*—This program is for the control and progressive eradication of water hyacinths, alligatorweed, Eurasian watermilfoil, and other obnoxious aquatic plant growths from navigable waters, tributaries, connecting channels, and other allied waters of the United States, in the interest of navigation, flood control, drainage, agriculture, fish and wildlife conservation, public health, and related purposes. The authority includes research to develop the most effective and economic control measures.

1. *Executive direction and management.*—The Office, Chief of Engineers, and 10 division offices supervise work decentralized in 37 district offices. One division office and the district offices are financed from other appropriations.

2. *River and Harbor Board.*—The Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers.

3. *Coastal Engineering Research Center.*—The Center plans and conducts research in the field of coastal engineering, develops standards, and reviews technical reports as directed by the Chief of Engineers.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for information on the civil works program.

90 Outlays			72,177	76,295	86,000	

¹ Advance engineering and design only.

² Includes \$8,516 thousand of 1970 appropriations in budgetary reserve for application in 1971.

The Corps of Engineers—Civil is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou Lafourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins,

for channel improvement by bank stabilization from Head of Passes, La., to Cairo, Ill., and by dredging a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

1. *General investigations.*—Ten studies will be continued, of which three will be completed with 1971 funds, and two new 1970 starts will be initiated. One new 1971 study will be initiated. Basic data subsequently used in planning and designing projects are collected.

CORPS OF ENGINEERS—CIVIL—Continued

General and special funds—Continued

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES—continued

2. *Advance engineering and design.*—Funds are requested to continue planning on four features, of which two will be completed in 1971.

3. *Construction.*—The total cost of flood control and related improvements in the lower Mississippi River and its alluvial valley is estimated at \$2,706 million, of which \$1,636 million has been appropriated through 1970. The funds requested will be applied to continuation of nine features.

4. *Maintenance.*—Provision is made for operation and maintenance of major features of the project.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance by military personnel at meetings in the manner authorized by 5 U.S.C. 4110, uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902), and for printing, either during a recess or session of Congress, of survey reports authorized

by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [one] two hundred and [eighty-eight] three, of which one hundred and ninety-seven shall be for replacement only) and hire of passenger motor vehicles: *Provided*, That the total capital of said fund shall not exceed [\$176,500,000] \$183,000,000. (*Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:
Appalachian Regional Development Programs, Executive.
General Investigations, Bureau of Reclamation.
Land and Water Conservation, Bureau of Outdoor Recreation.
Construction, International Boundary and Water Commission, United States and Mexico, State.
Contributions, Educational and Cultural Exchange, State.
United States Dollars Advanced from Foreign Governments, United States Educational Exchange Program, State.
Highway Trust Fund.
Construction of Hospital and Domiciliary Facilities, Veterans Administration.
Repair and Improvement of Public Buildings, General Services Administration.
Capital Outlay, United States Soldiers' Home.
Flood Insurance, Federal Insurance Programs, Housing and Urban Development (1969).

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1968, \$781 thousand; 1969, \$0; 1970, \$0; 1971, \$0.

1. *Hydraulic mining in California, debris fund.*—Fees paid by mine operators in the Sacramento and San Joaquin Basins for depositing mine debris in restraining works are used for their maintenance (33 U.S.C. 683).

2. *Maintenance and operation of dams and other improvements of navigable waters.*—License fees are levied by the Federal Power Commission for private construction, operation, and maintenance of dams, conduits, and reservoirs. Half of the fees collected is used for maintenance and operation of Federal dams and other navigation structures and for improvement of navigable waters (31 U.S.C. 725c).

3. *Payments to States.*—Three-fourths of the moneys received from lease of Federal lands acquired for flood control, navigation, and allied purposes is paid to the State in which such property is situated for public schools, roads, or other expenses of county government (33 U.S.C. 701c-3).

¹ Balances of selected resources are identified on the statement of financial condition.

The fund provides for the acquisition, operation, and maintenance of floating and land-based plant and equipment used in civil works functions, for temporary financing of services finally chargeable to civil works appropriations and for the furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons (67 Stat. 199).

Budget program—Operating costs.—Operating costs are expected to remain at about the same level in 1970 and 1971.

Capital outlay.—Land and structures includes replacement costs of buildings, facilities, and related land. Dredges and other floating plant includes replacement and improvement costs for dredges and dredging equipment and other vessels such as tugs, tenders, and towboats. Land-based equipment includes replacement and improvement costs of transportation equipment, construction equipment, and fixed land equipment such as shop tools and fixed power-driven equipment. Major items for replacement and plant expansion are noted in the following narrative.

Land and structures.—The 1971 program includes \$2.4 million for construction of facilities for the Board of Engineers for Rivers and Harbors and the Coastal Engineering Research Center; \$0.3 million for design and construction of a shop building at Corpus Christi, Tex.; \$0.9 million for construction of the North Atlantic Division Materials Testing Laboratory at Staten Island, N.Y.; and \$0.5 million for design and construction of a wind tunnel at the Waterways Experiment Station at Vicksburg, Miss.

Dredges.—The 1971 program includes: \$0.6 million for conversion of hopper dredge *Lyman* to direct pumpout; \$0.3 million for rehabilitation of pipeline dredge *Collins*; \$1.9 million for replacement of cutterhead dredge *St. Genevieve*; and \$0.1 million for completion of rehabilitation of cutterhead dredge *Wahkiakum*.

Other.—Other floating plant includes: \$0.4 million for construction of derrick boat *Nicolet* for use in North Central Division; \$0.8 million for construction of a drift collector vessel for use in New York harbor; and \$0.5 million for rehabilitation of the Vicksburg District's mat sinking barge. Land-based equipment includes \$0.6 million for replacement of the Missouri River Division aircraft and \$3.4 million for procurement of automatic data processing equipment. Remaining capital outlays relate to a variety of relatively small items of floating plant, land-based equipment and tools, office furniture and equipment.

Operating results and financial condition.—Unreserved earnings in 1969 amounted to \$3.4 million and are expected to remain at about the same level in 1970 and 1971.

Initial capital of the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts as carried on the records of the Corps of Engineers—Civil at 30 June 1953, and by an appropriation from the general fund of \$100. Capital (Government equity) of the fund amounted to \$161.9 million at 30 June 1969 and is limited to \$176.5 million by the Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970 (Public Law 91-144). In 1969 capital was increased by net earnings of \$7.3 million. Increases in 1970 and 1971 are

principally due to earnings reserved for plant replacement which are wholly invested in assets. Capital of the fund is expected to reach \$168.8 million at the end of 1970 and \$175.0 million at the end of 1971. To permit operation at program levels for those years and into 1972, increase in authorized capital to \$183 million in 1971 is required.

Consolidated summary of personnel.—The revolving fund is used to initially finance all payrolls of the Corps of Engineers—Civil.

The table which follows shows the distribution of personnel and salary costs to appropriations of the Corps of Engineers and to other accounts.

CONSOLIDATED SUMMARY OF PERSONNEL

RYUKYU ISLANDS, ARMY

Federal Funds

General and special funds:

ADMINISTRATION

For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government of the Ryukyu Islands, as authorized by the Act of July 12, 1960 (74 Stat. 461), as amended (81 Stat. 363); services as authorized by 5 U.S.C. 3109, of individuals not to exceed 10 in number; not to exceed \$4,000 for contingencies for the High Commissioner, to be expended in his discretion; hire of passenger motor vehicles and aircraft; purchase of two passenger motor vehicles, for replacement only; and construction, repair, and maintenance of buildings, utilities, facilities, and appurtenances, \$6,952,000, of which not to exceed \$3,107,000, shall be available for administrative and information expenses: Provided, That expenditures from this appropriation may be made outside continental United States when necessary to carry out its purposes, without regard to sections 355 and 3648, Revised Statutes, as amended, section 4774(d) of title 10, United States Code, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: Provided further, That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the Secretary of the Army to pay ocean transportation charges from United States ports, including territorial ports, to ports in the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals

residing in such areas: Provided further, That the President may transfer to any other department or agency any function or functions provided for under this appropriation, and there shall be transferred to any such department or agency, without reimbursement and without regard to the appropriation from which procured, such property as the Director of the Bureau of the Budget shall determine to relate primarily to any function or functions so transferred: Provided further, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation.

Note.—The regular appropriation for this account for 1970 has not yet been enacted. A temporary appropriation, not shown here, is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

91.20 Outlays from civilian pay act supplemental.....	-----	72	9

This appropriation supports the objective of the act of July 12, 1960, as amended, to provide for the promotion of economic and social development in the Ryukyu Islands, and finances the administration of these islands by the United States, which exercises jurisdiction pursuant to the treaty of peace with Japan. Executive Order 10713, June 5, 1957, as amended, establishes under the Secretary of Defense a civil administration of the Ryukyu Islands to execute the administrative, legislative, and jurisdictional powers reposed in the United States.

Administration.—The program will provide for the general operating expenses of the Office of the High Commissioner and for the staff necessary to plan and execute the aid program, to assist the Government of the Ryukyu Islands in its responsibilities for administration, and to prepare for the reversion of the Ryukyu Islands to Japan.

Aid to the Ryukyuan economy.—The principal elements of the program are summarized in the following table (in thousands of dollars):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Reimbursement to the Government of the Ryukyu Islands for the cost of public safety and public health operations required because of the presence of U.S. forces.....	1,200	1,500	1,500	1,875
Contributions to education, social welfare, public health, public safety, and public works programs.....	7,886	7,884	7,655	795

Contribution to the Government of the Ryukyu Islands to stimulate a higher level of teachers' salaries.....	1,000	4,153	6,000	-----
Scholarships and other technical training and development.....	1,862	2,104	2,345	1,175
Total.....	11,948	15,641	17,500	3,845

The general fund of the civil administration is also available for assisting the economic and social development of the islands. It receives income from three wholly owned corporations, from the purchase and resale of petroleum products, and from investment in the Bank of the Ryukyus. The corporations retain their earnings to provide for necessary growth. A statement of financial condition and summary financial program follows:

STATEMENT OF FINANCIAL CONDITION

(In thousands of dollars)

Expansion of fixed assets of the corporations is planned as indicated in the obligation program summary below (in thousands of dollars):

RYUKYU ISLANDS, ARMY—Continued

General and special funds—Continued

ADMINISTRATION—continued

	1969 actual	1970 estimate	1971 estimate
Ryukyu Electric Power Corporation (REPC).....	30,833	4,506	19,300
Ryukyu Domestic Water Corporation (RDWC).....	3,510	10,025	1,350

The REPC is continuing construction of the \$22 million, 170-megawatt powerplant which was started in 1969. The first 85 mw. unit of the plant will be available in April 1970, and the second in August of the same year. Construction also continues on a \$4 million, 138 kilovolt transmission system which will be completed in October 1970. Power demand continues to grow. The peak power demand in calendar year 1968 was 250 mw. and grew to 295 mw. in 1969, with increased civilian consumption. The completion of a 170 mw. plant in August 1970, will bring total generating capacity to 419 mw. To meet future requirements, design is being initiated on a new powerplant to provide three additional 85 mw. generators. Construction of the first unit of the plant is proposed to begin in 1971, at a cost of \$13 million with the REPC providing 20 percent of funding, and the contractor providing the balance, to be repaid from future corporate earnings. This same financing concept is to be applied to the proposed construction, in 1971, of administrative facilities at a cost of \$3.2 million. Other obligations are principally for expansion of transmission and distribution systems.

The RDWC is continuing its system expansion and water development program begun in 1963 at a total cost of \$54 million; \$28.6 million had been obligated by end of 1969. Phase I construction on Fukuji Dam was initiated in May 1969, and will be completed in April 1970. Phase II will commence in April 1970 at an estimated cost of \$8.8 million with completion scheduled for April 1972. It is planned to finance the balance of \$8.8 million from future earnings of the RDWC and the general fund during the construction period from 1970 to 1972. Design of a pipeline from Fukuji Dam to Ishikawa Treatment Plant is proposed for 1971 at a cost of \$300,000. Water demand continues to grow at predicted rates and reached a peak of 51 million gallons per day during 1969, compared with a 1968 peak of 45 million.

In 1969, the Loan Corporation sold an additional \$1 million of its authorized \$10 million bond issue, bringing the total outstanding to \$3 million. It is planned to sell an additional \$2 million in 1970, and \$2 million in 1971.

In 1969, \$4.2 million was contributed from the general fund for other economic development and public works projects. \$3.1 million is being programmed for this purpose in 1970 and \$9.1 million is proposed for 1971. The funds are required to assist the Government of the Ryukyu Islands in construction of essential facilities necessary for economic progress and enhancement of living conditions for the people of the islands. Construction began in 1969 on a \$1.8 million land reclamation project for a new civil air terminal at Naha. This project is jointly funded by U.S. Government and the Government of Japan, with Government of the Ryukyu Islands having the responsibility for contract administration. \$1 million is proposed in 1971 as the U.S. portion of construction funds required for the second increment to provide taxiways, aircraft parking pavements, and underground utilities. Construction of Highway 41 is being accelerated to reduce the heavily congested traffic on Highway 1. For 1971, \$6

million is proposed for the fourth year increment of construction, while an additional \$1.9 million is proposed to assist the Government of the Ryukyu Islands in the purchase of real estate for this project.

Additional economic aid is furnished by the United States through other programs. One of these is the free distribution of foodstuffs under the Food for freedom program. A second is the provision of long-term credit for purchase of surplus commodities under the same program.

The total amount of external funds being made available for Ryukyuan economic and social development by the United States and Japan is summarized in the following table (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Administration Ryukyu Islands, Army.....	15,641	17,500	3,845
Food for freedom (Public Law 83-480):			
Title I, long-term credits.....	229	-----	-----
Title II, foods.....	1,607	2,923	2,000
General fund.....	16,598	17,107	23,739
Government of Japan:			
Grants.....	34,936	48,469	87,239
Loans.....	7,778	14,722	20,000
Total.....	76,789	100,721	136,823

The Government of the Ryukyu Islands was created by the United States Civil Administration on April 1, 1952. In addition to local revenues derived primarily from income and excise taxes, this government receives grants from the U.S. Government and the Government of Japan. Grants from the United States are related to extraordinary services provided for U.S. Forces and for assistance in development of public facilities and services. A statement of its accounts follows (in thousands of dollars):

	1969 preliminary	1970 estimate	1971 estimate
Obligations:			
Education.....	47,170	51,900	60,300

SOLDIERS' HOME

Trust Funds

OPERATION AND MAINTENANCE

For maintenance and operation of the United States Soldiers Home, to be paid from the Soldiers' Home permanent fund, \$9,822,000: Provided, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army, upon the recommendation of the Board of Commissioners of the Home and the Surgeon General of the Army.

Note.—The regular appropriation for this account for 1970 has not yet been enacted. A temporary appropriation, not shown here, is in effect for the period from July 1 to January 30. A current estimate of the amount of the annual budget authority required is shown in the budget schedules.

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and airmen of the Air Force. Funds for operation and maintenance of the Home are appropriated from the Soldiers' Home permanent fund (trust fund) and not from the general funds of the Treasury.

1. *Medical care.*—A hospital operated as part of the Home cares for the daily average patient loads shown below. In addition, certain members will receive specialized care at other hospitals.

An orderly plan for expansion provides that when the domiciliary or hospital areas of the Home are filled to capacity, new construction will be provided.

Permanent improvements.—The 1971 program provides for the continuation of the orderly expansion of the Home by including funds for plans and specifications for converting a portion of an older domiciliary building to house administrative activities.

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation and other nonfund expense, are recovered and paid into the Treasury as miscellaneous receipts. Such recoveries are derived from individuals and agencies served and from the Panama Canal Company as follows (in thousands of dollars):

Amounts repayable to Treasury (including depreciation):	1969 actual	1970 estimate	1971 estimate
Recoveries from other than Panama Canal Company.....	17,338	19,500	20,821
Net remaining costs reimbursable by Panama Canal Company.....	23,408	24,258	25,557
Total repayable to Treasury.....	40,746	43,758	46,378

1. *Civil functions.*—(a) *Customs and immigration.*—This provides for the activities usually incident to such functions (except that no collection of custom duties is involved) and in addition includes special activities relating to vessels in transit and the execution of certain treaty obligations to the Republic of Panama.

(b) *Postal service.*—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the U.S. Post Office Department.

WORKLOAD

[In thousand pounds]

	1969 actual	1970 estimate	1971 estimate
Airmail dispatched.....	360	374	385
Airmail received.....	1,035	1,066	1,098
Surface mail dispatched.....	549	568	585
Surface mail received.....	4,783	4,985	5,180

(c) *Police protection.*—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and provision of police guards for certain facilities.

(d) *Fire protection.*—All firefighting facilities in the Canal Zone, except those required for aircraft crash fires and fires aboard naval vessels and ammunition depots, are consolidated under the Canal Zone Government.

(e) *Judicial system.*—This includes the operation of two magistrate courts and the expenses of the district court (excluding salaries) which serves as both a State and Federal court.

(f) *Education.*—This provides for the operation of schools, kindergarten through college, for the dependents of Canal Zone residents, the dependents of U.S.-citizen Government employees residing in the Republic of Pan-

ama, and, on a space available basis, certain other residents of the Republic of Panama. There are two school systems; one for U.S. citizens, the other, which is conducted in the Spanish language, for Panamanians and other non-U.S. citizens. There also are specialized facilities for the handicapped.

ENROLLMENT DATA

	1969 actual	1970 estimate	1971 estimate
U.S. citizen schools.....	12,098	13,515	13,786
Latin American schools.....	2,502	2,308	2,216
Total number of students.....	14,600	15,823	16,002

(g) *Public areas and facilities.*—This includes the cleaning, lighting, and maintenance of streets and highways; maintenance of sewers; and, care of public areas within the Canal Zone, not including military reservations. Also included are the operation and maintenance of recreational facilities.

(h) *Library.*—This provides for the operation of public library facilities for residents of the Canal Zone and technical reference services for Government agencies.

(i) *Internal security.*—This provides for loyalty investigations and intelligence and security services for the Government and the Company.

(j) *Other civil affairs.*—This includes licensing, civil defense activities, and supervision of the civil functions program.

2. *Health and sanitation.*—(a) *Hospitals and clinics.*—Two general medical and surgical hospitals, with outpatient clinics, are maintained and operated to furnish medical care to eligible civilian and military personnel. A mental health center and a leprosarium also are operated and maintained.

(b) *Other public health services.*—This provides for communitywide public health services, sanitation and quarantine work in the Canal Zone, and for ships calling at its ports and transiting the Canal, inspection of food processing establishments, and facilities for animal care and quarantine.

3. *General Government expenses.*—(a) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expenses of the office of the Governor and his residence, the office of the Executive Secretary, and provision for certain contingencies.

(b) *Other general Government expense.*—This includes the expenses of recruitment, repatriation, and employees'

home leave travel costs, aid to indigents, a social work program, payments to certain former employees, and other general charges.

Unfunded adjustments to total program costs.—This includes depreciation expense on facilities and equipment acquired under the capital outlay appropriation and the net book loss sustained on retirement of facilities and equipment.

CAPITAL OUTLAY

For acquisition of land and land under water and acquisition, construction, and replacement of improvements, facilities, structures, and equipment, as authorized by law (2 C.Z. Code, Sec. 2; 2 C.Z. Code, Sec. 371), including the purchase of not to exceed [twelve] fourteen passenger motor vehicles for replacement only, of which thirteen for police-type use [which] may exceed by [\$300] \$800 each the general purchase price limitation for the current fiscal year; improving facilities of other Government agencies in the Canal Zone for Canal Zone Government use; and expenses incident to the retirement of such assets; [\$2,000,000] \$2,163,000, to remain available until expended: *Provided*, That notwithstanding the limitation under this head in the Second Supplemental Appropriation Act, 1961, appropriations for "capital outlay" may be used for expenses related to the construction of quarters of non-U.S. citizen employees at a unit cost not exceeding \$16,500. (2 C.Z. Code, sec. 2; 2 C.Z. Code, sec. 31; 2 C.Z. Code, sec. 371; *Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1970.*)

The Panama Canal Company is a wholly owned Government corporation whose primary purpose is maintaining and operating the interoceanic canal at the Isthmus of Panama, and other necessary supporting operations.

The administration of the Company is integrated with that of the Canal Zone Government, an independent agency initially financed by appropriations. The Governor of the Canal Zone is ex officio president of the Company. The Company is expected to be self-sustaining and is required to reimburse the U.S. Treasury for the net cost of the Canal Zone Government, the cost of interest on the net direct investment of the United States in the Company, and for annuity payments made by the United States to the Republic of Panama pursuant to the treaty of 1903, as amended in 1936.

Budget program.—1. *Transit operations.*—The services performed by this activity are (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Maintenance of channels and harbors.....	5,929	6,005	11,391
Navigation service and control.....	17,096	18,636	19,474
Locks operations.....	12,458	13,079	15,426
General repair, maintenance, and engineering services.....	3,563	3,599	3,445
General canal expense.....	1,347	1,256	1,176
Net funded costs	40,393	42,575	50,912

Commercial vessel traffic volume and other indices of workload are as follows (dollars in thousands):

	1968 actual	1969 actual	1970 estimate	1971 estimate
Commercial ships (over 300 net Panama Canal tons).....	13,199	13,150	13,330	13,800
Ships berthed.....	8,573	8,290	8,500	8,600
Tolls and tolls credits at current rates.....	\$93,155	\$95,914	\$97,600	\$101,000
Other transit revenue.....	\$12,147	\$11,856	\$13,059	\$13,381

Capital acquisition costs for 1971 include \$2 million for replacement and addition of equipment, \$1.9 million for the purchase of tugboats, and \$1.5 million for Canal capacity improvements.

2. *Supporting services.*—The services performed by these auxiliary activities are (in thousands of dollars):

	1969 actual	1970 estimate	1971 estimate
Harbor terminals, funded costs.....	11,130	12,133	12,618
Less intra-agency recoveries.....	738	780	800
Net funded costs	10,392	11,353	11,818

Capital acquisition costs for 1971 include \$1.5 million for replacement of the fendering system of Balboa piers, \$130 thousand for improvements to oil handling facilities and \$120 thousand for replacement and addition of equipment.

(b) *Employee services.*—

	1969 actual	1970 estimate	1971 estimate
U.S. community housing.....	2,058	2,258	2,231
Latin American community housing.....	863	1,002	1,046
Marketing operations.....	28,911	31,851	34,544
Total funded costs	31,832	35,111	37,821
Less intra-agency recoveries.....	1,360	1,441	1,505
Net funded costs	30,472	33,670	36,316

Capital acquisition costs for 1971 include \$2.6 million for the construction of U.S. citizen quarters, \$1 million for modernization of existing quarters, and \$644 thousand for replacements and addition of equipment.

(c) *Transportation and utilities services.*—

	1969 actual	1970 estimate	1971 estimate
Railroad.....	2,140	2,200	2,240
Motor transportation.....	3,425	3,726	3,962
Water transportation.....	4,849	5,257	5,713
Power system.....	6,503	7,571	7,913
Communications system.....	930	977	1,008
Water system.....	1,635	1,813	1,869
Central air-conditioning service.....	255	313	326
Total funded costs	19,737	21,857	23,031
Less intra-agency recoveries.....	12,208	13,080	13,717
Net funded costs	7,529	8,777	9,314

Capital acquisition costs for 1971 include \$2.4 million for additions and improvements to the power transmission and distribution system, \$775 thousand for replacement of motor vehicles, and \$437 thousand for replacement and addition of equipment.

(d) *Other supporting services.*—

	1969 actual	1970 estimate	1971 estimate
Tivoli guest house.....	1,000	1,078	1,149
Printing plant.....	660	734	771
Grounds maintenance.....	2,242	2,476	2,799
Interoceanic canal studies, support services.....	829	75	
Supply and related operations.....	11,065	11,550	12,263
Total funded costs	15,796	15,913	16,982

Less intra-agency recoveries.....	12,719	13,382	14,466
Net funded costs.....	3,077	2,531	2,516

Capital acquisition costs for 1971 are estimated at \$399 thousand for the replacement and addition of equipment and \$110 thousand for reroofing storehouse building, Mount Hope.

3. *General corporate expense.*—This includes payments to the Treasury for the net cost of Canal Zone Government and interest expense payable to U.S. Treasury, general and administrative expenses under statutory limitation, and other general corporate expenses not under limitation.

Financing.—The Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. In addition, under Public Law 86-200 (73 Stat. 428), the Company may borrow from the Treasury, at interest, amounts not exceeding \$10 million outstanding at any time. While the latter authorization is utilized to backstop the Company's obligations, no cash withdrawals against it are planned during 1970 or 1971. With the total borrowing authority utilized as a resource, the Company's unobligated balance at June 30, 1971, is estimated at \$3,695 thousand.

Operating results and financial condition.—There will be an increase in retained earnings in 1970 estimated at \$12,120 thousand and a further increase in 1971 estimated at \$8,843 thousand, wholly representing net operating income for those years.
