

THE
BUDGET
OF THE UNITED STATES GOVERNMENT

APPENDIX

FISCAL YEAR 1972

FOREWORD

This is one of several documents which relate to the budget for 1972:

The Budget of the United States Government, 1972, is a volume containing the Budget Message of the President, information on the Federal program by function and by agency and account, summary tables, and statistical information.

The Budget of the United States Government, 1972—Appendix contains the text of appropriation estimates proposed for the consideration of the Congress together with specific supporting information on the various appropriations and funds, and other supplementary material.

The contents of this volume are further explained at the beginning of each of its three parts.

The Budget of the United States Government, 1972—District of Columbia is a volume which relates specifically to the estimates for the municipal government of the District of Columbia.

The U.S. Budget in Brief, 1972, a pamphlet type publication, is available for those who wish a more concise and less technical presentation than any of the foregoing three official volumes.

The Special Analyses, Budget of the United States Government, 1972, contains 19 special analyses of significant aspects of the Federal budget.

NOTE.—Unless otherwise indicated, all references to years in this volume are to fiscal years ending June 30. Financial tables are nearly always stated in thousands of dollars; details may not add to the totals because of rounding.

EXPLANATION OF ESTIMATES

Part I contains various types of tables and schedules in support of the budget, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item for which congressional action in an appro-

priation bill is required. It also contains the text of general appropriation provisions proposed for enactment by the Congress, which often apply to entire agencies or groups of agencies.

ARRANGEMENT

The chapters of this part reflect the branches of Government, and the major departments and agencies of the executive branch. For the latter, most smaller agencies are grouped in one chapter—"Other independent agencies."

Within each chapter there are three main sections. The first section covers programs authorized by existing legislation (including items for which extension or renewal of existing legislation is requested). This section is organized by major subordinate organizations within the agency (usually bureaus). For each bureau, *Federal funds*, covering the funds owned by the Government, precede *trust funds*, covering funds which are held in a fiduciary capacity by the Government.

The second major section of each chapter covers the *legislative program* which reflects the costs of proposed new legislation. This section is also organized by bureau, or

other major subordinate organization. The proposals are applicable to Federal funds unless otherwise indicated.

The third section of each chapter includes the *general provisions* of appropriation language which are applicable to the agency as a whole, and are in addition to the specific language pertaining to individual appropriation items. General provisions which apply to specified groups of agencies are placed in the chapter covering the first agency which appears in the respective appropriation act. The general provisions which apply to most agencies and are contained in the Public Works for Water Pollution Control, and Power Development and Atomic Energy Commission Appropriations Act, are placed at the end of the Executive Office of the President chapter.

An explanation of the types of funds included in the budget may be found in the compact volume—*The Budget of the United States Government, 1972* (part 7).

FORM OF DETAILED MATERIAL

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1972 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for separate transmittal. The language of the 1971 appropriation acts, printed in roman type, is used as a base. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit, as in this example:

SALARIES AND EXPENSES

For necessary expenses to carry into effect the provisions of the Commodity Exchange Act, as amended (7 U.S.C. 1-17b), **[\$2,552,000]** including not to exceed \$20,000 for employment under 5 U.S.C. 3109, \$2,671,000. (Department of Agriculture and Related Agencies Appropriation Act, 1971.)

Following the language, and printed in italic within parentheses, are citations to relevant authorizing legislation and to the appropriation act from which the text is taken. (When an appropriation bill has not been enacted at the time the budget is submitted, the language relates only to 1972 and is italicized with no brackets shown.)

BASIS FOR SCHEDULES

The basic schedules for Federal and trust funds usually exclude supplemental estimates which are transmitted to Congress separately. These separate transmittals are covered by brief program and financing schedules, without appropriation language. However, in the 1971 column, the basic schedules include (and identify) supplementals required to meet costs of military and civilian pay increases resulting from legislation enacted between September 30, 1969, and December 31, 1970; also included are regular wage-board pay increases effective during 1971.

The 1972 column includes, within the regular schedules, appropriations for recommended extension or renewal of expiring laws; however, money for new legislation is shown separately, under the legislative program. Appropriation language is included for the former, but not for the latter.

Where the required data are available in the accounting system, budgets are presented in terms of costs. Detailed operating cost figures for each activity or object are the value of goods and services consumed in carrying out the program. In the case of capital outlay programs, they are the value of assets acquired.

Total obligations are always shown; activities and objects are reflected on an obligation basis where cost data are not available. Obligations refer to orders placed, contracts awarded, loan agreements made, and recurring services (such as rent, utilities, and personal services) received during the year, regardless of the time of payment.

For a few Government corporations, the detail and the totals of limitations are on the basis of accrued expenditures.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of three parts. In the program by activities section, costs or obligations are classified by purpose, program, type of activity, or project for 1970, 1971, and 1972. This classification is individually developed for each appropriation or fund, and is not uniform on a Government-wide basis. Similarly, the identification of capital outlay is not handled uniformly. Where it is of significance, capital outlay is shown by activity. Otherwise, the total for each year is disclosed by footnote.

Where budgets are presented in terms of costs, the relation of costs to obligations is summarized in an entry "Change in selected resources." For appropriation accounts, and for revolving funds for which no business-type financial statements are presented, this entry is supported by a footnote identifying the amounts of the resources involved. For the remaining revolving funds, the items are identified on the statement of financial condition and the appended tabulation.

In certain cases, this schedule is expanded to include additional columns that provide a more informative presentation. This is done, for example, in some construction or procurement programs to show related cost data; for certain Defense items to identify the total obligations programed; and for programs financed at a "preobligation" stage (such as "commitments" in some loan programs).

Program and Financing (in thousands of dollars)

90 Outlays, excluding pay increase supplemental.....	2,167	2,505	2,614
91.20 Outlays from civilian pay act supplemental.....		115	6

¹ Includes capital outlays as follows: 1970, \$34 thousand; 1971, \$0; 1972, \$0.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders: 1969, \$115 thousand (1970 adjustments, -\$13 thousand); 1970, \$237 thousand; 1971, \$237 thousand; 1972, \$237 thousand.

The "Financing" section shows the fund sources, budget authority, and other means of financing the program, and the disposition of amounts not used during the year. (Additionally, some program and financing schedules display, in the 1970 column, an additional line 40 (Appropriation) to cover the indefinite appropriation provided by Public Law 91-305 for the pay increase authorized by Public Laws 91-231 and 90-207.)

The section on "Relation of obligations to outlays" shows obligations net of receipts and other offsets, obligated balances at the start and end of the year, and other items which affect the relation of obligations to outlays.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable, the narrative statement presents accomplishments in relation to financial requirements, and available measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS	30 ACQUISITION OF CAPITAL ASSETS
11 Personnel compensation	31 Equipment
12 Personnel benefits	32 Lands and structures
13 Benefits for former personnel	33 Investments and loans
20 CONTRACTUAL SERVICES AND SUPPLIES	40 GRANTS AND FIXED CHARGES
21 Travel and transportation of persons	41 Grants, subsidies, and contributions
22 Transportation of things	42 Insurance claims and indemnities
23 Rent, communications, and utilities	43 Interest and dividends
24 Printing and reproduction	44 Refunds
25 Other services	
26 Supplies and materials	

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used. Data according to this classification are illustrated in the following schedule:

Object Classification (in thousands of dollars)			
Identification code 05-40-1900-0-1-355	1970 actual	1971 est.	1972 est.
Personnel compensation:			
11.1 Permanent positions.....	1,750	1,949	1,949
11.3 Positions other than permanent.....	12	20	20
11.5 Other personnel compensation.....	18	20	20
Total personnel compensation.....	1,780	1,989	1,989
12.1 Personnel benefits: Civilian employees.....	138	159	164
13.0 Benefits for former personnel.....		10	
21.0 Travel and transportation of persons.....	61	69	69
22.0 Transportation of things.....	3	5	5
23.0 Rent, communications, and utilities.....	60	169	169
24.0 Printing and reproduction.....	35	39	39
25.0 Other services.....	226	199	204
26.0 Supplies and materials.....	17	18	18
31.0 Equipment.....	81	14	14
99.0 Total obligations.....	2,401	2,671	2,671

Several of the object classes are broken down into subclasses—personnel compensation, for example, is shown separately for permanent positions, for positions other than permanent, and for certain other payments. A third digit is therefore used in the object schedules to identify the subclasses; a zero is used for the third digit when there are no subclasses. Additional entries are shown for unvouchered obligations—those for which accountability is waived (coded 91.0); for amounts which cannot be distributed by object class (coded 92.0); and for certain other adjusting entries that are needed to reach a total which agrees with the total obligations shown on line 10 in the program and financing schedule.

A personnel summary is appended to the object classification schedule, as illustrated:

Personnel Summary			
Total number of permanent positions.....	180	180	180
Average number of all employees.....	166	170	170
Average GS grade.....	8.1	8.4	8.4
Average GS salary.....	\$11,257	\$11,748	\$11,748

Permanent positions are those of a full-time nature and indefinite duration. Some are filled by persons with temporary appointments. Other positions include those of a temporary nature (a year or less), part-time jobs (less than a full workweek), and intermittent employment (occasional employees).

Average grades and salaries are computed arithmetically. Thus the average salary can fall outside the salary range of the average grade.

STATEMENT OF REVENUE AND EXPENSE

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement is usually on a full accrual basis, including provision for depreciation, for losses on receivables, etc. Where a fund consists of one (or more) programs, or revenue is derived from nonoperating sources, revenue and expense are identified for each, as follows:

Revenue and Expense (in thousands of dollars)			
	1970 actual	1971 est.	1972 est.
Sales program:			
Revenue.....	67,337	68,379	69,090
Expense.....	-66,435	-67,983	-68,724
Net operating income, sales program..	901	396	366
Nonoperating income or loss (-):			
Proceeds from sale of equipment.....	34	36	38
Net book value of assets sold.....	-88	-88	-88
Net loss from sale of equipment.....	-53	-52	-50
Miscellaneous income.....	183	190	190
Net nonoperating income.....	130	138	140
Net income for the year.....	1,031	534	506

STATEMENT OF FINANCIAL CONDITION

For each fund showing a revenue and expense statement, there is also presented a balance sheet for assets, liabilities, and equity of the Government at the close of the year. This balance sheet excludes balances of appropriations and borrowing authorizations which have not yet been paid into the revolving fund. Because the balance sheet is on an accrual basis, the "Liabilities" section does not reflect obligations incurred for which the liability has not accrued. Nor does the "Assets" section reflect unfilled customer orders received, even though such orders are a basis for obligation in the case of intragovernmental revolving funds. The "Government equity" section, therefore, shows obligations (which have not yet become accrued liabilities), the unobligated balance, unfilled customers' orders on hand (where relevant), and invested capital and earnings.

BUDGETS NOT SUBJECT TO REVIEW

The presentations herein for the Legislative Branch, the Judiciary, the Comptroller of the Currency and the Exchange Stabilization Fund in the Treasury Department, the Federal Deposit Insurance Corporation, and the Milk

Market Orders Assessment Fund of the Department of Agriculture have been included, without review, in the amounts submitted by the agencies.

DIFFERENCES BETWEEN BUDGET TABLES AND APPENDIX TABLES

EXPENDITURES AND LOANS

Under the unified budget concept, the compact budget volume breaks down outlays to show separately *expenditures* and the amount of *net lending* for most loan programs. Similarly, for budget authority, it segregates *loan authority* from *new obligational authority*. While the individual schedules in Part I of the Appendix do not make this breakdown, the details on net lending are set forth in a separate table in Part III.

INTRABUDGETARY TRANSACTIONS

The consolidation of Government-administered funds in the compact budget volume requires the deduction of intrabudgetary transactions, i.e., interfund and intragov-

Financial Condition (in thousands of dollars)

	1969 actual	1970 actual	1971 est.	1972 est.

¹ The change in selected resources are reflected on the program and financing schedule.

There is appended to the balance sheet an "Analysis of Changes in Government Equity." This analysis is divided into three sections, as appropriate: (a) interest-bearing capital, (b) non-interest-bearing capital, and (c) retained earnings. Each of these sections shows the beginning balance, changes occurring during the year (e.g., net income for the year, retained earnings transferred to the general fund, net borrowing, etc.), and the balance at the end of the year.

Analysis of Changes in Government Equity (in thousands of dollars)

	1970 actual	1971 est.	1972 est.

End of year.....	12,892	13,426	13,932

ernmental transactions, from the combined aggregates, to avoid duplication in the totals. Schedules in the Appendix show the various funds and accounts separately, and therefore do not make such deductions.

PROPRIETARY RECEIPTS FROM THE PUBLIC

The compact budget volume offsets against expenditures for each agency and function the receipts from the public which are market-oriented or are mainly payments for goods and services, regardless of the fund structure. The Appendix continues the conventional practice of offsetting in the individual schedules only those receipts that are earmarked by law for use in revolving funds, or as reimbursements to appropriations or other funds.

LEGISLATIVE BRANCH

SENATE

COMPENSATION OF THE VICE PRESIDENT AND SENATORS, MILEAGE OF THE PRESIDENT OF THE SENATE AND SENATORS, AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT AND LEADERS OF THE SENATE

COMPENSATION OF THE VICE PRESIDENT AND SENATORS

For compensation of the Vice President and Senators of the United States, **[\$4,707,200]** \$4,719,125. (*Legislative Branch Appropriation Act, 1971.*)

MILEAGE OF THE PRESIDENT OF THE SENATE AND OF SENATORS

For mileage of the President of the Senate and of Senators, \$58,370. (*Legislative Branch Appropriation Act, 1971.*)

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, AND MAJORITY AND MINORITY LEADERS

For expense allowance of the Vice President, \$10,000; Majority Leader of the Senate, \$3,000; and Minority Leader of the Senate, \$3,000; in all, \$16,000. (*Legislative Branch Appropriation Act, 1971.*)

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

[For additional amounts for increased costs as authorized by the Legislative Reorganization Act of 1970, related costs, and for other purposes, as follows:**]**

["Salaries, Officers and Employees", \$878,352: *Provided*, That effective January 1, 1971, the per annum compensation of the six expert transcribers in the Office of the Secretary shall not exceed \$16,008 each, and the Secretary of the Senate may employ and fix the compensation of a Special Assistant and a Clerk at not to exceed \$16,472 each in lieu of two Clerks at not to exceed \$15,312 each.**]** *Supplemental Appropriations Act, 1971.*

OFFICE OF THE VICE PRESIDENT

For clerical assistance to the Vice President, **[\$367,263]** \$398,344. (*Legislative Branch Appropriation Act, 1971.*)

OFFICE OF THE PRESIDENT PRO TEMPORE

For office of the President Pro Tempore, **[\$44,165: *Provided***, That, effective August 1, 1970, the President Pro Tempore is authorized to appoint a Comptroller of the Senate at a salary of \$36,000 per annum, and the Comptroller may appoint a Secretary to the Comptroller at a salary of not to exceed \$13,688 per annum, which appointments shall be in lieu of the two appointments authorized by the second proviso contained in the paragraph "Office of the Secretary" under the heading "SENATE" in the Legislative Branch Appropriation Act, 1970: *Provided further*, That the Comptroller of the Senate shall prepare budgets and amendments to the budgets of the Senate and shall audit all financial records of the Senate relating to the expenditure of appropriated funds. The Comptroller shall have complete access to all information as may be necessary to carry out his budget and auditing duties**]** \$49,688. (*Legislative Branch Appropriation Act, 1971.*)

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For **[the]** offices of the Majority and Minority Leaders, **[\$176,514]** \$186,992. (*Legislative Branch Appropriation Act, 1971.*)

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For offices of the Majority and Minority Whips, **[\$90,228]** \$95,584. (*Legislative Branch Appropriation Act, 1971.*)

OFFICE OF THE CHAPLAIN

For office of the Chaplain, **[\$18,615: *Provided***, That effective July 1, 1970, the compensation of the Chaplain shall be \$10,208 per annum and the compensation of the secretary to the Chaplain may be fixed at not to exceed \$8,584 per annum**]** \$18,792. (*Legislative Branch Appropriation Act, 1971.*)

OFFICE OF THE SECRETARY

For office of the Secretary, **[\$1,816,240]** \$1,931,904, including **[\$68,145]** \$64,960 required for the purpose specified and authorized by section 74b of title 2, United States Code**[**: *Provided*, That effective August 1, 1970, the Secretary may employ and fix the compensation of an administrative assistant at not to exceed \$22,040 per annum, an assistant legislative clerk at not to exceed \$27,376 per annum, a second assistant legislative clerk at not to exceed \$20,648 per annum, a special assistant at not to exceed \$16,704 per annum, a receptionist at not to exceed \$12,528 per annum in lieu of an assistant secretary at not to exceed \$12,528 per annum, and an assistant legislative analyst in the library at not to exceed \$11,832 per annum in lieu of a custodian of records at \$11,832 per annum: *Provided further*, That any specific rate of compensation established by law, as such rate has been increased or may hereafter be increased by or pursuant to law, for any position under the jurisdiction of the Secretary shall be considered as the maximum rate of compensation for that position, and the Secretary is authorized to adjust the rate of compensation of an individual occupying any such position to a rate not exceeding such maximum rate**]**. (*Legislative Branch Appropriation Act, 1971.*)

COMMITTEE EMPLOYEES

For professional and clerical assistance to standing committees and the Select Committee on Small Business, **[\$4,420,734]** \$6,412,480. (*Legislative Branch Appropriation Act, 1971.*)

CONFERENCE COMMITTEES

For clerical assistance to the Conference of the Majority, at rates of compensation to be fixed by the chairman of said committee, **[\$127,239]** \$137,112.

For clerical assistance to the Conference of the Minority, at rates of compensation to be fixed by the chairman of said committee, **[\$127,239]** \$137,112. (*Legislative Branch Appropriation Act, 1971.*)

ADMINISTRATIVE AND CLERICAL ASSISTANTS TO SENATORS

For administrative and clerical assistants to Senators, **[\$27,909-141]** \$29,565,848. (*Legislative Branch Appropriation Act, 1971.*)

OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

For office of Sergeant at Arms and Doorkeeper, **[\$5,713,520: *Provided***, That effective July 1, 1970, the Sergeant at Arms may employ a video engineer at \$20,880 per annum, an assistant video engineer at \$17,632 per annum, three automatic typewriter repairmen at \$10,672 per annum each in lieu of one automatic typing repairman at \$10,672 per annum, a driver-messenger for attending physician at \$10,672 per annum, eight laborers in the service department, at \$6,728 per annum each, five additional sergeants, police force at \$10,904 per annum each if not qualified as provided by

SALARIES, OFFICERS AND EMPLOYEES—Continued

For payment to Nellie B. Dawson, widow of William L. Dawson, late a Representative from the State of Illinois, \$42,500. (Legislative Branch Appropriation Act, 1971; Supplemental Appropriations Act, 1971.)

ADMINISTRATIVE PROVISIONS

Except as provided by the House Employees Position Classification Act (2 U.S.C. 291 and following) or by any other provision of law to the contrary, salaries or wages paid out of the items herein for the House of Representatives shall be computed at basic rates, plus increased and additional compensation, as authorized and provided by law.

The provisions of House Resolutions 1270 and 1276, relating to certain official allowances; House Resolution 1241, relating to compensation of the clerks to the Official Reporters of Debates; and House Resolution 1264, relating to the limitation on the number of employees who may be paid from clerk hire allowances, all of the Ninety-first Congress, shall be the permanent law with respect thereto. (Legislative Branch Appropriation Act, 1971; Supplemental Appropriations Act, 1971.)

JOINT ITEMS

For joint committees, as follows:

JOINT COMMITTEE ON REDUCTION OF FEDERAL EXPENDITURES

For an amount to enable the Joint Committee on Reduction of Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the Committee, \$61,000 \$65,130, to be disbursed by the Secretary of the Senate. (Legislative Branch Appropriation Act, 1971.)

CONTINGENT EXPENSES OF THE SENATE**JOINT ECONOMIC COMMITTEE**

For salaries and expenses of the Joint Economic Committee, \$572,900 \$614,005.

For an additional amount for "Joint Economic Committee", \$3,750. (Legislative Branch Appropriation Act, 1971; Supplemental Appropriations Act, 1971.)

JOINT COMMITTEE ON ATOMIC ENERGY

For salaries and expenses of the Joint Committee on Atomic Energy, \$434,640 \$467,285.

【For an additional amount for "Joint Committee on Atomic Energy", \$5,000.】 (*Legislative Branch Appropriation Act, 1971; Supplemental Appropriations Act, 1971.*)

JOINT COMMITTEE ON PRINTING

For salaries and expenses of the Joint Committee on Printing, 【\$236,110; and for salaries and expenses of compiling, preparing, and indexing material for the 1970 edition of the Biographical Congressional Directory, \$17,000; in all, \$253,110】 \$272,335.

【For an additional amount for "Joint Committee on Printing", \$11,700.】 (*Legislative Branch Appropriation Act, 1971; Supplemental Appropriations Act, 1971.*)

CONTINGENT EXPENSES OF THE HOUSE

JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

For salaries and expenses of the Joint Committee on Internal Revenue Taxation, 【\$657,715】 \$714,780. (*Legislative Branch Appropriation Act, 1971.*)

JOINT COMMITTEE ON DEFENSE PRODUCTION

For salaries and expenses of the Joint Committee on Defense Production as authorized by the Defense Production Act of 1950, as amended, 【\$118,800】 \$125,930. (*Legislative Branch Appropriation Act, 1971.*)

JOINT COMMITTEE ON CONGRESSIONAL OPERATIONS

For salaries and expenses of the Joint Committee on Congressional Operations, including the Office of Placement and Office Management, \$425,000.

For other joint items, as follows:

OFFICE OF THE ATTENDING PHYSICIAN

For medical supplies, equipment, and contingent expenses of the emergency rooms, and for the attending physician and his assistants, including (1) an allowance of one thousand dollars per month to the attending physician; (2) an allowance of one hundred fifty dollars per month each to three medical officers while on duty in attending physician's office; and (3) an allowance of one hundred fifty dollars per month each to not to exceed eight assistants on the basis heretofore provided for such assistants, 【\$77,300】 \$83,300. (*Legislative Branch Appropriation Act, 1971.*)

CAPITOL POLICE

GENERAL EXPENSES

For purchasing and supplying uniforms; the purchase, maintenance, and repair of police motor vehicles, including two-way police radio equipment; contingent expenses, including \$25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House as may be designated by the Chairman of the Board; \$134,000. (*Legislative Branch Appropriation Act, 1971.*)

CAPITOL POLICE BOARD

To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, 【\$880,000】 \$1,009,865. Such sum shall be expended only for payment of salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioner of the District of Columbia is authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and are authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and shall be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or

under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioner of the District of Columbia is directed (1) to pay the deputy chief of police detailed under the authority of this paragraph and serving as Chief of the Capitol Police, the salary of the rank of deputy chief plus \$4,000 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent, (2) to pay the two acting inspectors detailed under the authority of this paragraph and serving as assistants to the Chief of the Capitol Police, the salary of the rank of inspector plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as these positions are held by the present incumbents, (3) to elevate and pay the two acting lieutenants detailed under the authority of this paragraph and serving as supervisors of the plainclothes officers to the rank and salary of captains plus \$1,625 and such increases in basic compensation as may be subsequently provided by law so long as these positions are held by the present incumbents, (4) to pay the three detectives permanently detailed under the authority of this paragraph and serving as acting detective sergeants the salary of the rank of detective sergeant and such increases in basic compensation as may be subsequently provided by law, and (5) to elevate and pay the acting sergeant of the uniform force regularly assigned as such to the rank and salary of lieutenant and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent.

No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol buildings for police duty on the Capitol Grounds and on the Library of Congress Grounds. (*Legislative Branch Appropriation Act, 1971.*)

CAPITOL GUIDE SERVICE

For salaries and expenses of the Capitol Guide Service, \$360,000.

EDUCATION OF PAGES

For education of congressional pages and pages of the Supreme Court pursuant to section 243 of the Legislative Reorganization Act, 1946, 【\$112,310】 \$129,850, which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1971.*)

OFFICIAL MAIL COSTS

For expenses necessary for official mail costs pursuant to title 39, U.S.C., section 【4167】 3216, 【\$11,244,000】 \$14,942,000, to be available immediately. (*Legislative Branch Appropriation Act, 1971.*)

The foregoing amounts under "other joint items" shall be disbursed by the Clerk of the House.

STATEMENTS OF APPROPRIATIONS

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives, of the statements for the 【second】 first session of the 【Ninety-first】 *Ninety-second* Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, \$13,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (*Legislative Branch Appropriation Act, 1971.*)

ARCHITECT OF THE CAPITOL

Federal Funds

【EXTENSION OF ADDITIONAL SENATE OFFICE BUILDING SITE】

【To enable the Architect of the Capitol, under the direction of the Senate Office Building Commission, to acquire on behalf of the United States, in addition to the real property heretofore acquired under the provisions of the Second Deficiency Appropriation Act, 1948, approved June 25, 1948 (62 Stat. 1028), as a site for an additional office building for the United States Senate, and under Public Law 85-591, approved August 6, 1958 (72 Stat. 495-496) and Public Law 85-429, approved May 29, 1958 (72 Stat. 148-149), for purposes of extension of such site or for additions to the United States Capitol Grounds, and authorized to be acquired for such purposes by Public Law 91-145, approved December 12, 1969 (83 Stat. 352-353), by purchase, condemnation, transfer, or otherwise, for purposes of further extension of such site or for additions to the United States Capitol Grounds, all privately owned property contained in lots 845 and 832 in square 724 in the District of Columbia, as such square appears on the records in the office of the surveyor of the District of Columbia as of the date of the approval of this Act: *Provided*, That any proceeding for condemnation brought under this Act shall be conducted in accordance with the Act of December 23, 1963 (16 D.C. Code, secs. 1351-1368): *Provided further*, That for the purposes of this Act, square 724 shall be deemed to extend to the outer face of the curbs surrounding such square: *Provided further*, That, notwithstanding any other provision of law, any parts of streets contained within the curblines surrounding square 724 shall, upon request of the Architect of the Capitol, made with the approval of the Senate Office Building Commission, be transferred to the jurisdiction and control of the Architect of the Capitol: *Provided further*, That, upon acquisition of any real property pursuant to this Act, the Architect of the Capitol, when directed by the Senate Office Building Commission to so act, is authorized to provide for the demolition and/or removal of any buildings or other structures on, or constituting a part of, such property and, pending demolition, to use the property for Government purposes or to lease any or all of such property for such periods and under such terms and conditions as he may deem most advantageous

to the United States and to incur any necessary expenses in connection therewith: *Provided further*, That the jurisdiction of the Capitol Police shall extend over any real property acquired under this Act and such property shall become a part of the United States Capitol Grounds; and the Architect of the Capitol, under the direction of the Senate Office Building Commission, is authorized to enter into contracts and to make such expenditures, including expenditures for personal and other services, as may be necessary to carry out the purposes of this appropriation; \$510,000, to remain available until expended.】

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The Library's collections are developed in accordance with established acquisition policies: Materials are procured by purchase, gift, exchange, copyright deposit, transfer, and official deposit; and materials are selected for addition to the permanent collections. The objective for 1972 is continued improvement in acquisitions procedures. The collections totaled 61,579,153 items as of June 30, 1970, and consisted of 15,258,327 books and pamphlets; 29,936,636 manuscript pieces and 16,384,190 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1,688,000 were added to the permanent collections. Those received from various sources in 1970 and estimated for 1971 and 1972 are as follows:

Description	1970 actual	1971 estimate	1972 estimate
Purchase	774,672	900,000	1,000,000
Deposit by virtue of law:			
Copyright	505,995	520,000	540,000
Other	890,372	950,000	1,100,000

Transfer from Federal agencies	2,096,705	2,500,000	2,700,000
Official donation from State and local agencies	219,265	250,000	300,000
Exchange	534,708	540,000	550,000
Gift from individual and unofficial sources	1,199,597	1,200,000	1,200,000
Public Law 480 foreign currency activities	66,884	110,000	120,000
Title II C activities	90,510	120,000	140,000
Total	6,378,708	7,090,000	7,650,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1972 are the continued maintenance on a current basis of the Library's record of serial publications, the maintaining of currency in the filing of cards into the Library Card Catalogs, the reduction of cataloging arrearages, the improvement of cataloging methods and procedures to assure the usefulness of the collections, the continued microfilming of deteriorating materials as a necessary preservative and space-saving measure, and the conversion of the nitrate portion of the Archival Collection of Motion Pictures to safety base film.

Selected performance data for 1970 and estimated for 1971 and 1972 (not including processing activities performed by the Reference Department and the Law Library) are as follows:

Description	1970 actual	1971 estimate	1972 estimate
Volumes fully cataloged and added to the classified collections	282,512	300,000	310,000
Items otherwise organized for use (without full cataloging)	12,758	22,000	22,000
Cards filed in catalogs	2,950,907	3,200,000	3,400,000
Volumes bound	189,738	209,000	230,000
Items repaired, cleaned, mounted, etc.	189,190	208,000	229,000
Cards received by the National Union Catalog	3,347,086	3,500,000	3,700,000
Serial parts processed	1,441,852	1,800,000	2,000,000

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objective of this activity for 1972 is to organize more material for use and to improve reference and circulation services. The workload in all major activities is expected to increase in 1971 and 1972 as follows:

Description	1970 actual	1971 estimate	1972 estimate
a. Reader and reference services:			
Materials served	1,849,039	1,900,000	2,000,000
Units issued on loan	251,755	255,000	260,000
Number of readers given reference assistance in person	323,218	345,000	355,000
Reference requests by telephone	313,390	330,000	340,000
Reference letters	109,850	115,000	125,000
b. Law Library reader and reference services:			
Books and pamphlets served	572,581	590,000	610,000
Reference inquiries answered	173,050	180,000	190,000

4. *Maintenance and protective services.*—A staff of 159 cleans and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space, and operates the receiving and stock rooms. The guard force staff of 79 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both

General and special funds—Continued

SALARIES AND EXPENSES—Continued

buildings in which is assembled one of the greatest accumulations of national treasures in the world.

5. *National program for acquisitions and cataloging.*—Acquiring so far as possible, copies of all library materials currently published throughout the world which are of value to scholarship and providing to other American libraries cataloging information as promptly as possible, the objectives of this activity in 1972 are the continuance of this basic program at its 1971 level which will result in our continuing to provide necessary catalog copy automatically and rapidly to college, university, and other research libraries which have come to rely upon the Library of Congress for such cataloging. This program was previously financed by the Department of Health, Education, and Welfare, Office of Education, in 1970 and 1971 in the amount of \$5,811,450 and \$6,853 thousand (estimate) respectively, (20 U.S.C. 1041).

6. *Executive direction and general administrative services.*—This activity supports the staff of the Office of the Librarian, and the Administrative Department, except for the maintenance and protective services forces. Included are funds for development of library automated information systems, for library preservation activities, and for undistributed general administrative overhead costs.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and costs for 1970 and estimates for 1971 and 1972 are as follows:

	1970 actual	1971 estimate	1972 estimate
Income:			
Fees applied.....	1,956,441	2,015,000	2,076,000
Estimated value of materials deposited and transferred to the Library of Congress.....	2,212,206	2,433,000	2,677,000
Total income.....	4,168,647	4,448,000	4,753,000
Costs:			
Salaries.....	3,068,740	3,478,000	3,908,000
Other costs.....	419,527	329,000	437,000
Total costs.....	3,488,267	3,807,000	4,345,000

The program and performance under each of the activities described are predicated on an estimated 336,000 copyright registrations during 1972, an estimated 326,000 during 1971, and an actual 316,466 during 1970.

1. *Receiving and accounting for applications, fees, and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1970 and estimated for 1971 and 1972 are as follows:

	1970 actual	1971 estimate	1972 estimate
Registrations.....	316,466	326,000	336,000
Mail received and dispatched.....	715,567	737,000	759,000

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1970 actual	1971 estimate	1972 estimate
Cases and documents examined.....	343,144	354,000	364,000
Registrations and recordation of documents.....	333,393	343,000	354,000
Letters written.....	53,919	56,000	57,000

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 316,466 registrations cataloged in 1970 and estimates for 1971 and 1972 are 326,000 and 336,000 respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1970 actual	1971 estimate	1972 estimate
Titles searched.....	187,962	194,000	200,000
Letters and search reports written.....	28,559	29,500	30,400

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *Microfilming of copyright records.*—This is a project to microfilm for protection, critical back files of Copyright Office concerning registration records.

7. *General supervision and legal services.*—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

1. *Policy analysis and research.*—The Congressional Research Service (formerly known as the Legislative Reference Service) provides research, information, and consultative services to Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of legislative issues and proposals, and of recommendations submitted to the Congress by the President or executive branch agencies. This support comes in the form of research reports, in-depth policy analyses, consultations, briefings, legal research, assistance with committee hearings, background studies, and related data and materials. Lists of subjects and policy areas which might profitably be pursued are periodically made available to each congressional committee. These services are directed toward assisting Members and committees in determining the advisability of enacting legislative proposals, in estimating the probable results of such

General and special funds—Continued

[LEGISLATIVE RESEARCH] CONGRESSIONAL RESEARCH SERVICE—Continued

SALARIES AND EXPENSES—continued

proposals and of alternatives to them, and in evaluating methods for accomplishing the results sought.

2. *Documentation and status of legislation.*—The Service prepares and publishes on a periodic basis for distribution to Members and committees the Digest of Public General Bills, which includes summaries of all public bills and resolutions introduced in the Congress, the changes made therein during the legislative process, the status of bills receiving action, and various pertinent indexes. The Service also prepares and distributes weekly reports on the status of selected major legislation. Upon request from Members and committees, the Service provides legislative history memoranda with respect to measures on which hearings have been announced, and it compiles and makes available to each committee reports on legislatively authorized programs and activities which are within that committee's jurisdiction and which are scheduled to terminate during the current Congress.

3. *Information and reference services.*—The Congressional Research Service assists Members in the performance of their representative duties. Reference files, containing clippings, pamphlets, and documents, are maintained for rapid informational use. Staff researchers and Members are alerted to current articles and publications in their fields of interest by computer produced citations. Lists of multilithed reports prepared by CRS staff for use of congressional offices providing information on legislative issues are circulated, and reader services are provided by the Congressional Reading Room.

The Card Division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 218 million catalog cards representing approximately 5 million titles, and fills orders from approximately 30,000 regular subscribers—mostly libraries—in the United States and abroad. In 1970, 79% of this appropriation was recovered in the form of receipts from card and publications sales. Receipts of \$6,346,273 were deposited in miscellaneous receipts of the Treasury in 1970. The objectives for 1972 are: meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; the continued development of the *National Union Catalog* as the country's major bibliographic and locational tool; the development of other technical publications; and the use of new technology to increase efficiency and reduce costs.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1970 was 40,140,177; estimated for 1971, 45 million; and estimated for 1972, 50 million.

2. *Supplying cards for other libraries.*—The number of cards sold in 1970 was 64,551,799; estimated for 1971, 70 million; and for 1972, 75 million.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the *Classification Schedules*, lists of *Subject*

Headings, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the "National Union Catalog."*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of *Motion Pictures and Filmstrips* (quarterlies with annual cumulation), *Music and Phonorecords* (issued on a 6-month basis and annual cumulation), as well as the *Register of Additional Locations*, and the *National Register of Microform Masters*. There were 2,425 paid subscriptions for all issues in calendar year 1969 and it is estimated that there will be 2,525 subscriptions for 1970 and 2,675 for 1971.

5. *Preparation, printing, and distribution of the "Subject Catalog."*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 899 paid subscriptions for calendar year 1969. It is estimated that there will be 1,000 paid subscriptions in 1970 and about 1,100 in 1971.

6. *Contingency fund.*—This fund is authorized for use only to the extent necessary to provide for expenses for workload increases not anticipated in the budget estimates and which cannot be provided for by normal budgetary adjustments.

BOOKS FOR THE GENERAL COLLECTIONS

For necessary expenses (except personal services) for acquisition of books, periodicals, and newspapers, and all other material for the increase of the Library, ["\$800,000"] \$1,090,000, to remain available until expended, including \$25,000 to be available solely for the purchase, when specifically approved by the Librarian, of special and unique materials for additions to the collections. (2 U.S.C. 131, 132, 132a; Legislative Branch Appropriation Act, 1971.)

This appropriation is used to acquire library materials, both current and noncurrent, in all subject fields except those in the field of law. Materials acquired by purchase constitute an exceedingly important part of the Library's acquisitions although they represent only a segment of the material received annually. The objectives for 1972 are: To continue the program for procurement of important research materials to insure the continuous development of the Library's collections and to maintain their national preeminence; to continue the acquisition of important foreign newspapers and periodicals; to continue the program for procurement of essential research materials from areas critical to the U.S. foreign policy, particularly from eastern Europe, Africa, Asia, and Latin America; to continue to strengthen and maintain up-to-date the Library's acquisitions in the rapidly expanding fields of science and technology; and to acquire highly selected, important, noncurrent materials needed by the Library to provide better service to Congress and to increase the usefulness to current research of the historical subject collections.

BOOKS FOR THE LAW LIBRARY—Continued

This appropriation constitutes the only means of acquiring law books published in the regular domestic trade (except for copyright deposits) and many foreign law books published in countries all over the world. The legal publications acquired by purchase constitute a most important part of the Law Library's acquisitions, although a substantial part of the annual receipts is received by means other than purchase. The special objectives for 1972 are: to continue the procurement of current foreign legal materials by placing purchase orders for certain necessary publications now received only irregularly through exchange or gift; to improve the procurement of important Hispanic, African, and Far Eastern materials; to continue the procurement of both current and noncurrent materials needed to strengthen the Law Library's already comprehensive coverage of critical areas in Eastern Europe, Asia, and Africa; and to continue the acquisition of photoduplicates of important research items, especially those from critical areas, which are no longer obtainable in the original.

The Division for the Blind and Physically Handicapped is responsible for administering a national program to provide reading material for the blind and physically handicapped (Public Law 89-522) of the United States, and its outlying areas. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 48 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 73 State agencies and libraries. The maintenance and procurement of these books are shown in the following table:

Description	1970 actual	1971 estimate	1972 estimate
Talking books:			
(a) New titles.....	605	600	600
(b) Older titles reissued.....	100	100	100
(c) Magazines.....	22	22	25
(d) Cassette titles.....	319	100	100
(e) Tape titles (open reel).....	454	500	500
Embossed books:			
(a) Press braille.....	281	275	275
(b) Magazines.....	16	16	18
(c) Music (books and scores).....	2,284	2,000	2,000
Machines:			
Phonographs and cassette players purchased.....	39,000	40,000	40,000
Phonographs and cassette players repaired.....	27,098	21,000	17,000
Phonographs salvaged/scrapped.....	10,000	15,000	15,000

Objectives for 1972 are: (1) Sustained procurement of books and magazines in braille and sound recording media, and (2) procurement of a sufficient number of machines to equip newly registered blind and physically handicapped readers and to replace some of the obsolete machines.

2. *Cataloging, reference, circulating, and training services.*—Catalogs of recorded and braille books are provided, often in braille, recorded, and large type forms for the convenience of readers. The division maintains the national collections of braille and recorded books to supplement titles deposited in libraries across the country. During the past 5-year period, 1966-70, the number of readers throughout the country requiring catalogs from which to select reading matter has grown from about 109,000 to almost 223,000 and circulation from approximately 4,470,000 units (volumes, containers, and reels) to over 6,280,000. As a result of the expanded program, the number of readers and circulation are expected to continue to increase in 1971 and 1972. Inquiries are received concerning library and related services available to the blind and to other physically handicapped persons. Individuals throughout the Nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During 1970, 523 individuals were certified, and it is anticipated that this level will continue during 1971 and 1972. In addition, tape recorded books are recorded by volunteers throughout the country.

Under authority originally granted in section 104(n) of Public Law 85-931 (now sec. 104(b)(5) of the Food for Peace Act of 1966) the Librarian of Congress may use foreign currencies accruing under this act to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United

General and special funds—Continued

COLLECTION AND DISTRIBUTION OF LIBRARY MATERIALS—Continued

States. The program is being carried on in seven countries in 1971: Ceylon, India, Israel, Nepal, Pakistan, the United Arab Republic, and Yugoslavia. Of the total amount requested, \$2,625 thousand will be used to purchase foreign currencies, while \$264 thousand will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Based upon the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies from seven countries and distributed to selected libraries and research centers in the United States, including the Library of Congress.

2. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries and personnel benefits of U.S. personnel abroad, salaries of the coordinating staff at the Library of Congress, travel in some instances, and equipment and supplies which cannot be procured abroad.

Note.—Estimate is for \$570 thousand in 1972 for activities previously financed from: Architect of the Capitol, Library buildings and grounds, furniture and furnishings, 1970, \$350 thousand; 1971, \$350 thousand.

1. *Repair of office machines.*—This appropriation is used for the proper maintenance, repair, and reconditioning of approximately 2,427 office machines of various types essential to Library operations: 1,765 typewriters, 330 adding and calculating machines, and 332 other items, such as duplicating machines, collators, copying devices, dictating and transcribing machines, microfilm readers, mailing machines, power files, bookkeeping machines, and other office machines.

3. *Purchase of annual furniture and equipment.*—This is required to meet annual replacements due to obsolescence, to obtain furniture and equipment for increased staff, and to provide more efficient furniture and equipment for tasks performed.

4. *Purchase of nonrecurring furniture and equipment.*—These are required to replace larger items of furniture and equipment, and to provide additional items to meet a growing workload. Included are such things as card catalog cases, microfilm equipment, map cases, and duplicating equipment. It also includes a special request for furniture, equipment, and typewriters to support the proposed expanded Congressional Research Service.

5. *Purchase of typewriters.*—This is required for regular annual replacements of obsolete typewriters and to provide typewriters for additional staff.

The Oliver Wendell Holmes Devise Fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (2) to finance an annual lecture or series of lectures, and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court; annual lectures are also financed by this fund.

Service fees.....	2,038	2,182	2,201
Library of Congress trust fund investment account.....	-2	-----	-----

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by the Library of Congress Trust Fund Board, and (3) interest at the rate of 4 percent per annum paid by the Treasury on the principal funds deposited therewith as described under "Library of Congress Trust Fund, Principal Accounts." (2 U.S.C. 156-160; 31 U.S.C. 725s; 37 Stat. 319.)

1. *Acquisition of library materials.*—During 1970, this included the procurement of manuscripts, Hispanic materials, fine prints, rare books, and other library materials from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1970 included the preparation of bibliographies, indexes, digests, and checklists; lectures; surveys of bibliographic

services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization of the collections.*—In February 1967, the Library of Congress began the largest single bibliographical project in its 167-year history, the publication of the pre-1956 *National Union Catalog*. It is expected that the project will be completed in 10 years, and that the published catalog will comprise 610 volumes. Over 100 volumes have been published. In 1970, work was begun on the publication of the 1965-69 quinquennial cumulation of the Library of Congress Catalog—*Books: Subjects*. The preparation of the 18th full edition and the 10th abridged edition of the *Dewey Decimal Classification*, begun during 1966, was continued in 1970. The 1968 issue of the *National Union Catalog of Manuscript Collections* was published in December 1969; editorial work on the 1970 issue proceeded during most of 1970. Work progressed on the latest issue of the *National Register of Microform Masters*.

Obligations by major source of funds for 1970 and estimated for 1971 and 1972 are as follows (in thousands of dollars):

	1970 actual	1971 estimate	1972 estimate

24 Unobligated balance available, end of year	5,268	5,268	5,268
60 Budget authority (appropriation) (permanent)-----	1		

¹ Additional principal not available for obligation.

This schedule covers two principal accounts—permanent loan and bequest of Gertrude M. Hubbard.

Both funds represent gifts or bequests in cash, which have been deposited with the Treasurer of the United States as permanent loans to the United States, the interest upon which, at 4% per annum, payable semi-annually, is available to the Librarian for the purposes specified in each case.

As of June 30, 1970, the principal in the permanent loan account, which shall not exceed the sum of \$10 million (2 U.S.C. 158; 31 U.S.C. 725s, Public Law 87-522), was distributed as follows:

Music activities.....	2,708,730
Fine arts.....	396,558
American history.....	307,040
Hispanic activities.....	211,315
Poetry and literature.....	1,008,240
Miscellaneous purposes.....	616,034
Total principal.....	5,247,917

The additional principal sum of \$20 thousand, representing the bequest of Gertrude M. Hubbard, is for the purchase of engravings and etchings (37 Stat. 319).

The use of the income from these accounts is described under Library of Congress gift and trust fund income accounts.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by 5 U.S.C. 3109.

Not to exceed twenty positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Funds available to the Library of Congress may be expended to reimburse the Department of State for medical services rendered to employees of the Library of Congress stationed abroad and for contracting on behalf of and hiring alien employees for the Library of Congress under compensation plans comparable to those authorized by section 444 of the Foreign Service Act of 1946, as amended (22 U.S.C. 889(a)); for purchase or hire of passenger motor vehicles; for payment of travel, storage and transportation of household goods, and transportation and per diem expenses for families en route (not to exceed twenty-four); for benefits comparable to those payable under sections 911(9), 911(11), and 941 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1136(9), 1136(11), and 1156, respectively); and travel benefits comparable with those which are now or hereafter may be granted single employees of the Agency for International Development, including single Foreign Service personnel assigned to A.I.D. projects, by the Administrator of the Agency for International Development—or his designee—

under the authority of section 636(b) of the Foreign Assistance Act of 1961 (Public Law 87-195, 22 U.S.C. 2396(b)); subject to such rules and regulations as may be issued by the Librarian of Congress.

Payments in advance for subscriptions or other charges for bibliographical data, publications, materials in any other form, and services may be made by the Librarian of Congress whenever he determines it to be more prompt, efficient, or economical to do so in the interest of carrying out required Library programs. (*Legislative Branch Appropriation Act, 1971.*)

GOVERNMENT PRINTING OFFICE

Federal Funds

General and special funds:

PRINTING AND BINDING

For authorized printing and binding for the Congress; for printing and binding for the Architect of the Capitol; expenses necessary for preparing the semimonthly and session index to the Congressional Record, as authorized by law (44 U.S.C. 902); printing, binding, and distribution of the Federal Register (including the Code of Federal Regulations) as authorized by law (44 U.S.C. 1509, 1510); and printing and binding of Government publications authorized by law to be distributed without charge to the recipients; **[\$32,000,000] \$33,000,000: Provided,** That this appropriation shall not be available for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Yearbook of Agriculture): *Provided further,* That this appropriation shall be available for the payment of obligations incurred under the appropriations for similar purposes for preceding fiscal years. (*Legislative Branch Appropriation Act, 1971.*)

Program and Financing (in thousands of dollars)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders: 1969, \$141 thousand; 1970, \$177 thousand; 1971, \$187 thousand; 1972, \$277 thousand.

The programs of the Office of the Superintendent of Documents are of a service nature. There is no control over the volume of work, which is required by law.

1. *Sales distribution.*—Selected Government publications are purchased from the Public Printer to be placed on sale to the public. The acquisition costs for these publications are paid from sales receipts. Consequently, no appropriation is required for printing sales copies. The sales price is the cost plus 50%, as required by law. At the end of each year, net profits from the sales program are turned in to the Treasury Department as miscellaneous receipts. For 1970, \$9,098 thousand was returned

under this program. It is estimated that \$9,712 thousand will be returned in 1971 and an additional \$10,683 thousand in 1972. These returns more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the past 10 years the sales volume has increased 151%. The current public interest in the Government's publishing program clearly indicates a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services are also provided for farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—Upon request, one copy of every Government publication is supplied to libraries which are designated as depositories for Government publications. The number of depository libraries has increased 74% since 1962.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of U.S. Government Publications and the Numerical List and Schedule of Volumes.

GOVERNMENT PRINTING OFFICE REVOLVING FUND

For payment to the "Government Printing Office revolving fund", [\$22,000,000] \$3,500,000, to remain available until expended, for improving electrical and air-conditioning systems, and building structures, and additional capital as necessary for the operation and maintenance of the Government Printing Office.

The Government Printing Office is hereby authorized to make such expenditures, within the limits of funds available and in accord with the law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs and purposes set forth in the budget for the current fiscal year for the "Government Printing Office revolving fund": *Provided*, That during the current fiscal year the revolving fund shall be available for the hire of one passenger motor vehicle and the purchase of one passenger motor vehicle (station wagon). (*Legislative Branch Appropriation Act, 1971.*)

¹ Balances of selected resources are identified on the statement of financial condition.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C. 309).

All printing and binding work for the Congress and Federal agencies is done and financed through the Government Printing Office revolving fund. The fund is reimbursed by the customer agencies and net operating income is retained for reuse by the fund.

The General Accounting Office is responsible directly to the Congress for conducting independent reviews, audits, and investigations of programs, activities, and financial transactions of Federal agencies, for rendering legal decisions relating to Government fiscal matters; for developing principles, standards, and related requirements for Federal agency accounting systems, cooperating in developing agency systems, and approving them; for the settlement of certain claims for and against the Government; and for advising and assisting the Congress and Government agencies on matters relating to public funds.

1. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General, who is assisted by the Assistant Comptroller General and staff. The staff assists the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual members, and is responsible for continuing analysis and review of programs and activities of the General Accounting Office.

2. *Office of the General Counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government, the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

3. *Office of Administrative Services.*—This office is responsible for the preparation and execution of the GAO budget; maintenance of the administrative accounting, payroll, and leave systems; management of space and Government fiscal records; coordination, publication and distribution of manuals, reports, and other documents; and furnishing general office services.

4. *Office of Personnel Management.*—In addition to administering our regular personnel functions such as appointment, placement, and classification, employee re-

General and special funds—Continued

SALARIES AND EXPENSES—Continue

lations and services, and processing, recording, and reporting personnel actions, this office performs professional staff development functions, including (a) formulating and executing recruiting programs, (b) developing and carrying out training and professional career development programs, (c) participating in general control over the assignment of staff, and (d) obtaining appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

5. *Office of Policy and Special Studies.*—This office develops auditing policies for the guidance of audit work performed by General Accounting Office auditors; internal auditing objectives, principles, and standards for guidance of the executive agencies; and accounting principles, standards, and related requirements for observance by Federal agencies. It provides cooperative assistance to departments and agencies in the development of accounting systems, and reviews, evaluates, and makes recommendations relating to approval of accounting systems. It conducts special studies or reviews agency studies of programs and activities requiring application of systems analysis techniques. It represents the General Accounting Office in the Joint Financial Management Improvement Program conducted with the Office of Management and Budget, the Treasury Department, and the Civil Service Commission. It conducts Government-wide studies of the management of automatic data processing systems; and provides advice and assistance to the Congress in its area of responsibility.

6. *Civil division.*—7. *Defense division.*—8. *International division.*—These divisions, located in Washington, D.C., are responsible for the performance of the accounting, auditing, and investigative functions of the General Accounting Office in the Federal departments and agencies and the District of Columbia, as assigned by the Comptroller General. These functions include the review and analysis of Government programs and activities for the purpose of determining (a) whether the funds and other resources are utilized only for authorized programs and activities and are properly accounted for and reported, (b) whether agency resources are managed efficiently and economically, and (c) whether programs are achieving the objectives intended by the Congress in enacting legislation. In addition, audits are made of negotiated contracts.

The International division includes two overseas branches. The European branch, with headquarters in Frankfurt, Germany, is responsible for performing assigned General Accounting Office functions in the European area, including the Near East, South Asia, and Africa. The Far East branch, with headquarters in Honolulu, Hawaii, is responsible for performing assigned General Accounting Office functions in Hawaii and the Far East area, including Southeast Asia and the Southwest Pacific.

9. *Field operations division.*—This division, composed of a central office and regional offices in principal cities in the United States, performs assigned accounting, auditing, and investigative work outside the metropolitan area of Washington, D.C.

10. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

This division also exercises primary responsibility in carrying out GAO functions under the Federal Claims Collection Act of 1966 and the waiver of pay statute (5 U.S.C. 5584) and reviews the claim settlement and debt collection operations of other agencies.

11. *Transportation division.*—This division audits freight and passenger transportation payments for the account of the United States, reviews the transportation practices and traffic management of agencies, and settles claims involving transportation charges.

12. *Data processing center.*—This organization performs the automatic data processing operations for all other divisions and offices, including ADP systems analysis, programing, and computing services for both administrative and program applications.

The Tax Court hears and decides cases involving income, estate and gift tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1972, the Court proposes a trial program of 200 weeks consisting of 160 weeks of regular trial sessions and 40 weeks of small tax case sessions, such trials to be held in about 110 cities throughout the United States, including the District of Columbia, Alaska, and Hawaii. This trial program should result in the closing of approximately 7,300 cases.

The actual and estimated work volume of the Court is presented in the following tabulation.

This fund, established under 26 U.S.C. 7448, is used to pay survivorship benefits to eligible widows and dependent children of deceased judges of the United States Tax Court. Participating judges pay into the fund 3% of their salaries or retired pay to cover creditable service for which payment is required and such additional funds as are needed are provided through the annual appropriation to the United States Tax Court.

On June 30, 1970, 18 judges of the court were participating in the fund, and one eligible widow was receiving survivorship annuity payments.

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in House Resolutions 644 and 865, Ninety-first Congress, shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. (*Legislative Branch Appropriation Act, 1971.*)

THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the operation of the Supreme Court, as required by law, excluding care of the building and grounds, including purchase, or hire, driving, maintenance and operation of an automobile for the Chief Justice, hire of automobiles for the Associate Justices and Officers and staff of the Supreme Court, and for miscellaneous expenses, to be expended as the Chief Justice may approve; \$4,460,000. (28 U.S.C. 1, 5, 411, 412, 671-675; Judiciary Appropriation Act, 1971.)

The Supreme Court of the United States is the highest court of our country and stands at the apex of the judicial branch of our constitutional form of government. The U.S. Supreme Court is the only constitutionally indispensable court in the Federal court system of the United States. The jurisdiction of the Supreme Court is as spelled out in the Constitution and as allotted by Congress. The funds herein requested are required to enable the U.S. Supreme Court to carry out its constitutional and congressionally allotted responsibilities. This account was previously financed under the following five accounts:

	1970	1971
Appropriated, 1970 and 1971:

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The Court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The U.S. Court of Claims has jurisdiction over all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the Court by the Congress, and the commissioners of the Court have jurisdiction to render reports to the Congress on claims set forth in bills referred to the chief commissioner by either house of Congress.

The statutory salaries and benefits of all active U.S. circuit and district judges and all justices and judges who have retired or resigned in pursuance of law are payable from this appropriation. This item also includes the payment of annuities to widows of Supreme Court Justices.

The estimate for 1972 contemplates payment of compensation and benefits for an average of 610 judges compared with 581 in 1971. This is based on an anticipated increase in the number of senior judges and the additional judgeships created by Public Law 91-272, June 2, 1970.

The primary and appellate jurisdictions of the courts of the United States are vested in the 93 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts, including the Federal Probation System, is under this heading.

FEES AND EXPENSES OF REPRESENTATION BY COURT-APPOINTED COUNSEL AND OPERATION OF DEFENDER ORGANIZATIONS

For compensation and reimbursement of expenses of attorneys appointed to represent defendants in criminal cases and for investigative, expert or other services pursuant to the Criminal Justice Act of 1964 (62 Stat. 684), \$4,300,000. For the operation of Federal Public Defender and Community Defender organizations, and the compensation and reimbursement of expenses of attorneys appointed to represent persons under the Criminal Justice Act of 1964 (18 U.S.C. 3006A, as amended by Public Law 91-447, October 14, 1970), \$13,300,000.

For an additional amount for "Fees and expenses of court-appointed counsel", \$5,700,000: *Provided*, That not to exceed \$1,000,000 shall be available for the liquidation of obligations incurred in the prior year. (Judiciary Appropriation Act, 1971; Supplemental Appropriations Act, 1971.)

90 Outlays.....	5,083	7,500	12,000

Funds appropriated under this heading are for furnishing representation for any person financially unable to obtain adequate representation: (1) who is charged with a felony or misdemeanor (other than a petty offense) or with juvenile delinquency by the commission of an act which if committed by an adult would be a felony or misdemeanor or with violation of probation; (2) who is under arrest, when such representation is required by law; (3) who is subject to revocation of parole, in custody as a material witness, or seeking collateral relief under section 2241, 2254, or 2255 of title 28 or 4245 of title 18, United States Code; or, (4) for whom the sixth amendment

to the Constitution requires the appointment of counsel or for whom, in a case in which he faces loss of liberty, any Federal law requires the appointment of counsel. Representation shall include counsel and investigative, expert, and other services authorized pursuant to the Criminal Justice Act of 1964, as amended.

The estimate for 1972 takes into account the broader scope of coverage and higher fees authorized by Public Law 91-447, approved October 14, 1970. The estimate also contemplates the establishment of Public Defender Organizations and grants to Community Defender Organizations.

This appropriation provides for the statutory fees and allowances of jurors and fees of jury commissioners.

The amount of service and the compensation of jurors depends on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts.

Public Law 90-578, approved October 17, 1968, established the Office of United States Magistrate to replace U.S. Commissioners. Funds available for fees of commissioners were transferred during 1970 to the new appropriation for Salaries and Expenses of United States Magistrates.

Funds appropriated under this heading are for expenses of travel and subsistence incurred by judges and supporting personnel in attending sessions of court or transacting other official business and for equipment, lawbooks, supplies, and other incidental expenses of operating the 11 courts of appeals and 93 district courts of the United States.

The estimate for 1972 will provide for expenses related to requests for new personnel included under the heading "Salaries of Supporting Personnel", increased volume of official mail, rate increases for local and long-distance

telephone services, a greater volume of copywork, for increased volume and cost of printing opinions, and continuation material required to maintain court libraries.

The office, pursuant to section 604 of title 28, United States Code, under the supervision and direction of the Judicial Conference of the United States, is responsible for the administration of the U.S. courts, including the probation and bankruptcy systems. The principal

functions consist of providing staffs and services for the courts; conducting a continuous study of the rules of practice and procedure in the Federal courts; examining the state of the dockets of the various courts; compiling and publishing statistical data concerning the business transacted by the courts; and administering the Judicial Survivors Annuity System under title 28, United States Code, section 376. The office also is responsible for the preparation and submission of the annual budget estimates as well as supplemental and deficiency estimates; the disbursement of and accounting for moneys appropriated for the operation of the courts, the public defender system for the District of Columbia and the Federal Judicial Center; the audit and examination of accounts; the purchase and distribution of supplies and equipment; and for securing adequate space for occupancy by the courts and for such other matters as may be assigned by the Supreme Court and the Judicial Conference of the United States.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and benefits are paid from this appropriation, which is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings.

This appropriation is for the operation of the Federal Judicial Center which was established by the act of December 20, 1967, Public Law 90-219 (81 Stat. 664). The Center is charged with the responsibility for furthering the development and adoption of improved judicial administration in the courts of the United States.

The estimate for 1972 makes provision for four additional staff members for the Center, additional funds for research, implementation of prior studies and contractual programs and for innovation and systems development. Funds are also provided for the transfer of responsibility and personnel (four positions) for operating the Chicago Probation Training Center and for conducting in-service training institutes for probation officers.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$160 thousand (1970 adjustments, -\$16 thousand); 1970, \$236 thousand; 1971, \$236 thousand; 1972, \$236 thousand.

The Office of Emergency Preparedness advises and assists the President with respect to nonmilitary emergency preparedness activities. This includes coordinating emergency preparedness programs of Federal departments and agencies and providing staff support and policy guidance for emergency resource management planning functions. The President has delegated to the Office of

Emergency Preparedness responsibility for administering the Disaster relief fund and related natural disaster activities. (See p. 70.) Specific programs funded here include:

1. *Emergency readiness.*—OEP develops policies, plans, and programs to provide for continuity of civil government at the Federal, State, and local levels. The principal objectives are to preserve duly constituted authority and leadership and to enable civil government to respond to, and operate in, a national emergency. OEP undertakes planning related to mobilization and management of critical resources for use during a national emergency, and develops plans to permit all levels of government to undertake economic stabilization activities during an emergency situation.

2. *Critical materials policy planning.*—OEP provides guidance to other Federal departments and agencies on the development of programs to administer national policy for certain critical material items. The Director of OEP is responsible for determining whether imports threaten to impair the national security; and for policy direction, coordination, and surveillance of the oil import program.

3. *Analytic and computational support.*—The program activities described in paragraphs 1 and 2 above require extensive analytical and computational support. This support is provided by the activities in this program.

4. *Executive direction, staff, and administrative support.*—Executive direction and staff and administrative support for the Office of Emergency Preparedness is provided under this activity. Funds are included to finance the salaries of the Presidential appointees and their immediate staffs. Also contained in this activity are funds for the housekeeping expenses of the Office of Emergency Preparedness, general administrative functions, congressional liaison activities, public information support, and health and legal advisory personnel.

This appropriation provides for the emergency preparedness functions of eight Federal departments and agencies which are not supported by their regularly appropriated funds. The eight included are the Departments of Agriculture; Commerce; Health, Education, and Welfare; Interior; Labor; Transportation; Treasury; and the Interstate Commerce Commission.

The funds allocated to these agencies are for emergency preparedness tasks. The Office of Emergency Preparedness provides guidance for and reviews progress in these activities.

The Office assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Budget review division.*—Budget instructions and procedures are developed, review of agency estimates coordinated, and the budget document is prepared.

2. *Evaluation division.*—Leadership for the development and implementation of evaluation techniques throughout the Federal Government is provided.

3. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among six divisions: (a) national security programs, (b) international programs, (c) economics, science, and technology programs, (d) natural resources programs, (e) general government programs, and (f) human resources programs.

4. *Executive development and labor relations division.*—Programs to develop, deploy, recruit, and motivate career executives in the Federal service are developed and wage and salary comparability studies are conducted.

5. *Legislative reference division.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

6. *Organization and management systems division.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Office to improve agency management.

7. *Program coordination division.*—Domestic programs and activities administered by various Federal departments are coordinated and the delivery of the intended services is expedited.

8. *Statistical policy and management information systems division.*—The Government's statistical programs are coordinated and improved and proposed agency reporting plans and forms are reviewed. Management information systems are developed to support preparation and publication of the President's budget and to provide periodic reports of program accomplishments, objectives, and plans.

Telecommunications management.—The Office of Telecommunications Policy was created in the Executive Office of the President pursuant to Reorganization Plan No. 1 of 1970. The Office is headed by a Director who serves as the President's principal adviser on telecommunications, coordinates the telecommunications activities of the executive branch, and formulates policies and standards therefor; helps formulate national telecommunications policies, and assures that the executive branch views are effectively presented to the Congress and the Federal Communications Commission on telecommunications policy matters. The activities of this Office were financed in 1970 under Salaries and expenses, Telecommunications, Office of Emergency Preparedness.

Research and development.—A contractual program is conducted to provide in-depth studies and research in areas of national importance.

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 501. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (60 Stat. 810), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,650 except station wagons for which the maximum shall be \$1,950.

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Continued

SEC. 502. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from Poland or the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 503. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with title II of the Act of September 6, 1960 (74 Stat. 793).

SEC. 504. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 505. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code, Annotated, and such volumes shall be purchased on

condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest, or in excess of \$6.50 per volume for the current or future volumes of the Modern Federal Practice Digest.

SEC. 506. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with 5 U.S.C. 3109; and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 507. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefore is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. 508. No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any corporation or agency, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress.

SEC. 509. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 510. No part of any appropriation contained in this or any other Act, shall be available to finance interdepartmental boards, commissions, councils, committees, or similar groups under section 214 of the Independent Offices Appropriation Act, 1946 (31 U.S.C. 691) which do not have prior and specific congressional approval of such method of financial support.

(*Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1971.*)

FUNDS APPROPRIATED TO THE PRESIDENT

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

Federal Funds

General and special funds:

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

For expenses necessary to carry out the programs authorized by the Appalachian Regional Development Act of 1965, as amended, except expenses authorized by section 105 of said Act, including services as authorized by 5 U.S.C. 3109, and hire of passenger motor vehicles, to remain available until expended, **[\$293,500,000]** ~~\$282,000,000~~, of which \$175,000,000 shall be available for the Appalachian Development Highway System, but no part of any appropriation in this Act shall be available for expenses in connection with commitments for contracts or grants for the Appalachian Development Highway System in excess of the total amount herein and heretofore appropriated.

[For an additional amount for "Appalachian Regional Development Programs", \$8,500,000, to remain available until expended.] (Independent Offices and Department of Housing and Urban Development Appropriation Act, 1971; Supplemental Appropriations Act, 1971; additional authorizing legislation to be proposed for \$107,000,000.)

The Appalachian Regional Development Program assists the Appalachian region to meet its special problems, promote its economic development, and to establish a framework of joint Federal and State efforts to provide the basic facilities essential to economic growth in Appalachia.

Program investments made in the Appalachian region are concentrated in areas where there is significant potential for future growth and where the expected return on public dollars invested will be the greatest.

The States, acting through the Appalachian Regional Commission, are responsible for recommending local and State projects within their borders for assistance under this program.

Legislative authority for appropriations for 1972 will be requested for other than highway programs.

1. *Appalachian Development Highway system.*—Section 201 of the Appalachian Regional Development Act authorizes construction of an Appalachian Development Highway system, including local access roads. This system is designed to improve the accessibility of Appalachia; to reduce highway transportation costs to and within Appalachia; to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. In addition, access roads to specific development facilities are authorized. The program, since 1969, is funded through contract authority and States are encouraged to prefinance work, with later Federal reimbursement.

The status of the system of roads including mileage prefinaanced by the State follows:

Development system miles (cumulative):	1970 actual	1971 estimate	1972 estimate
Approved for construction.....	1,388	1,425	1,450
Miles contracted.....	798	1,000	1,165
Prefinanced miles.....	(25)	(65)	(70)
Miles completed.....	314	550	800

General and special funds—Continued

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS—Continued			
	1970 actual	1971 estimate	1972 estimate
Access roads (cumulative):			
Number of projects approved.....	171	200	250
Miles approved.....	574	660	800
Miles contracted for construction.....	356	600	750
Miles completed.....	146	250	350
Funds committed, cumulative (thousands):			
Development highway.....	\$588,224	\$755,000	\$912,000
Access roads and administration.....	\$39,959	\$65,000	\$83,000
Prefinanced by States.....	\$23,252	\$54,000	\$65,000
Total.....	\$651,435	\$874,000	\$1,060,000
Annual obligation (thousands).....	\$168,411	\$191,818	\$175,000

2. *Demonstration health projects.*—Grants are made for the construction, equipping, and operation of multi-county demonstration health facilities, including hospitals, regional health diagnostic or treatment centers, and other facilities. Emphasis will be given to programs for child development and nutrition and to continued operational assistance for health services in selected demonstrations within the Appalachian region.

	1970 actual	1971 estimate	1972 estimate
Number of projects (cumulative):			
Health operations.....	146	236	251
Construction.....	74	96	96
Child development.....	2	66	66
Funds obligated (thousands).....	\$39,064	\$45,669	\$45,000

3. *Mine area restoration.*—Section 205 of the act authorizes a program for the sealing and filling of voids in abandoned coal mines, the planning and execution of projects for the extinguishment and control of underground and outcrop mine fires, and the reclamation and rehabilitation of strip and surface mine areas, including waste banks, on public land in those areas where the potential for economic growth exists in Appalachia. States or local sponsors must bear 25% of projects cost. Approved projects on a cumulative basis are:

	1970 actual	1971 estimate	1972 estimate
Mine fires.....	33	34	35
Mine subsidence.....	7	8	9
Surface restoration and well sealing.....	10	18	26

4. *Vocational education facilities.*—Grants are made to States and local districts within the Appalachian region for the construction and equipment of vocational education facilities in Appalachia. Vocational education facilities are key elements for the training and upgrading of potential and existing labor force entrants in skills required in commercial and other vocations. Grants are administered through the Office of Education. Vocational education projects approved, including those aided by supplementary grants, are as follows:

	1970 actual	1971 estimate	1972 estimate
Projects approved (cumulative).....	260	310	355
Funds obligated—Section 211.....	\$24,150	\$24,988	\$24,000
Supplemental grants—Section 214.....	\$8,737	\$9,000	\$9,000

5. *Supplements to Federal grant-in-aid programs.*—This program provides supplemental grants to enable areas to take advantage of other Federal programs. Direct grants, plus supplemental grants, cannot exceed 80% of the project cost. The amount of supplemental grant depends upon the relative need of the area and nature of the project.

The estimates provide for approved projects as follows: 1970, 168 projects, \$31,928; 1971, 220 projects, \$44,498; 1972, 220 projects, \$44,000. Supplemental assistance has been provided from inception through 1970 to the following types of projects:

	Number	Cost (in millions)
Vocational education.....	234	\$43.1
Higher education.....	157	34.9
Libraries.....	83	6.5
NDEA.....	17	4.9
Educational television.....	13	2.3
Health facilities.....	231	46.8
Sewage treatment.....	121	18.4
Water and sewer systems.....	52	6.9
Airports.....	48	4.8
All other.....	37	2.7
Total.....	995	171.4

6. *Research and local development district program.*—Appalachian planning assistance is provided through grants to multicounty local development districts and for research and demonstration projects. Grants are made for up to 75% of the administrative expenses of local development districts. Other planning and technical assistance is provided for (a) programs which improve the base for economic growth, (b) programs which will attract industrial development within the region, (c) programs which improve the health, education, and skills of people, and (d) projects which conserve, maintain, or improve natural resources.

¹ Balances of selected resources are identified on the statement of financial condition.

The Secretary of Housing and Urban Development is authorized to make loans, and in certain cases grants through waivers, for up to 80% of the preliminary cost of planning a project and obtaining an insured mortgage under section 221 of the National Housing Act, including such costs as preliminary site engineering and architectural fees, site options, FHA and FNMA fees, and construction loan fees and discounts.

The Secretary is also authorized to make technical assistance grants for the organization of State housing corporations and local nonprofit groups to encourage low- and moderate-income housing. Funds were transferred from the Appalachian Regional Development Program appropriations to this revolving fund for the following workload:

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$13,085 thousand (1970 adjustments, -\$2,450 thousand); 1970, \$19,993 thousand; 1971, \$19,993 thousand; 1972, \$19,993 thousand.

1. Aid to disaster areas.—Under the Disaster Relief Act of 1970, the Federal Government will provide supplementary assistance to State and local governments and to individuals in the event of a declared major disaster by the President. Funds may be made available directly to a State, or to Federal agencies as reimbursement for expenditures in disaster relief work performed under this authority. In addition, funds are also pro-

vided to States for disaster planning. Responsibility for administration of this program is delegated to the Director of OEP by Executive order.

2. Administration.—Up to 3% of the funds provided for disaster relief may be used for the administrative expenses of OEP in coordinating and administering the disaster relief program.

EMERGENCY FUND FOR THE PRESIDENT

Federal Funds

General and special funds:

EMERGENCY FUND FOR THE PRESIDENT

For expenses necessary to enable the President, through such officers or agencies of the Government as he may designate, and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, to provide in his discretion for emergencies affecting the national interest, security, or defense which may arise at home or abroad during the current fiscal year, \$1,000,000: *Provided*, That no part of this appropriation shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during [the Ninety-first Congress or first session of] the Ninety-second Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body. (*Treasury, Post Office, and Executive Office Appropriation Act, 1971.*)

Program and Financing (in thousands of dollars)

Under the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to expand production of critical materials for programs certified as essential to the national defense by the Office of Emergency Preparedness. The program is conducted primarily through a revolving fund financed by borrowing from the Treasury. The amount borrowed may not exceed \$2.1 billion outstanding at any one time.

Allocations of borrowing authority by the Office of Emergency Preparedness and net borrowing from the U.S. Treasury as of June 30, 1970, were as follows (in thousands of dollars):

Authorized agency	Borrowing authority allocated	Borrowings outstanding	Net available for borrowing
General Services Administration ¹	1,959,000	1,872,500	86,500
Department of Agriculture.....	101,568	93,850	7,718
Department of the Interior.....	39,300	38,800	500
Office of Emergency Preparedness (reserve).....	132		132
Total.....	2,100,000	2,005,150	94,850

¹ In addition, an appropriation of \$108 million was applied to General Services Administration activities, thus providing financing of \$2.067 billion to that agency.

No new loans were authorized during 1970. It is anticipated that there will be no additional loans authorized during 1971 or 1972.

Loans outstanding are estimated for 1971 and 1972 as follows (in thousands of dollars):

	1970	1971	1972
Outstanding, beginning of year.....	7,881	7,068	6,468
Repayments during year.....	813	600	600
Outstanding, end of year.....	7,068	6,468	5,868

Financial condition of the fund.—Losses under these programs are reflected as \$1.4 billion as of June 30, 1970, with inventory of metals and minerals carried at acquisition cost of approximately \$750 million. Using inventory market price of \$475 million, the deficit would amount to about \$1.7 billion. Interest expense on borrowing from Treasury will increase to more than \$125 million for 1972 and annually thereafter with negligible offsetting income.

Legislation was submitted last year, and will be resubmitted this year, to terminate the present financing system and substitute new arrangements as required. It is proposed to amend title III of the Defense Production Act of 1950, as amended, to prohibit the financing of any new contracts under the provisions of section 304; to terminate interest payments on notes issued pursuant to that section; to provide for the orderly retirement of those notes; and to provide for the cancellation of any remaining borrowing authority under section 304.

The budget schedules to reflect the proposed legislation are shown on page 106.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$102 thousand; 1970, \$75 thousand; 1971, \$95 thousand; 1972, \$95 thousand.

These funds are to enable the President to develop and implement improvements in the management, organization, and operation of the agencies of the executive branch. During 1970, funds were used to study and determine the improvements needed to simplify Federal grant-in-aid programs, and to develop a more integrated information system in the White House Office. In 1971, funds are being used to study and determine the improvements needed in long-range transportation planning and intergovernmental management systems. Previous studies have been made of telecommunications management, Federal employee retirement systems, and decisionmaking in regulatory agencies.

The President's proposal for a coordinated and strengthened international security assistance program contains an important military assistance component. Under this program, grants of defense articles and services are made to assist other countries in improving their defensive capabilities. As the security of the free world is strengthened and other nations are increasingly able to rely on their own resources, particularly manpower, the need for U.S. forces abroad should decline and the likelihood of having to commit U.S. ground combat forces in the future should decrease.

The major portion of the military items furnished under this program is produced in the United States. Orders are placed through the U.S. military services, which are reimbursed from this account when the items are delivered. Materiel already on hand, but excess to the needs of U.S. forces, is supplied to friendly governments at no charge to the military assistance appropriation except for the costs of rehabilitation and transportation. The administrative costs related to foreign military sales are included in this account. The costs of assistance to Vietnam, Laos, and Thailand, and U.S. contributions to activities of NATO, CENTO, and SEATO are carried in the budgets of the military services.

In 1971, necessary additional funds were obtained in a supplemental appropriation. While the 1972 request is less than the final 1971 program, it is still significantly higher than the level in 1970.

71 Obligations incurred, net.....	70,000	200,000	510,000
72 Obligated balance, start of year.....	222,215	199,070	259,070
74 Obligated balance, end of year.....	-199,070	-259,070	-479,070
77 Adjustments in expired accounts.....	-629		
90 Outlays.....	92,516	140,000	290,000

This appropriation provides funds to finance credit sales of defense articles and services to foreign countries and international organizations. Two types of financing arrangements are used: (1) direct U.S. Government credit, and (2) commercial loans guaranteed by the U.S. Government. The U.S. Government also has the authority to sell promissory notes it holds in the commercial markets.

An appropriation of \$510 million is requested for 1972 to cover a credit sales program of \$582 million. Of the \$582 million program, \$96 million will be privately financed and \$24 million of the appropriation will be set aside as a guarantee reserve for this private credit.

The administrative expenses related to this program are funded from the military assistance appropriation.

MILITARY CREDIT SALES TO ISRAEL

[For expenses, not otherwise provided for, necessary to enable the President to finance sales of defense articles and defense services to Israel, as authorized by law, \$500,000,000.] (*Public Law 91-441; Supplemental Appropriations Act, 1971.*)

74 Obligated balance, end of year.....		-125,000	-----
90 Outlays.....		375,000	125,000

This account was created to fund credit sales to Israel authorized by section 501 of the Defense Procurement Act of 1970. Since the Foreign Military Sales Act had not yet been enacted and credits for Israel were urgently required, Congress enacted the separate authorization. The \$500 million appropriated in the Supplemental Appropriations Act, 1971, is shown in this account. No request is being made in this account for 1972 since funds for Israel are included in the regular foreign military credit sales account.

The administrative expenses related to this program are funded from the military assistance appropriation.

SUPPORTING ASSISTANCE

【Supporting assistance:】 For 【expenses authorized by section 402,】 necessary expenses of supporting assistance, 【\$414,600,000:】 \$778,000,000, 【Provided, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Congress】 to remain available until expended.

【For an additional amount for "Supporting assistance", \$155,000,000: Provided, That this appropriation shall be available only upon enactment into law of authorizing legislation: Provided further, That obligations incurred from funds appropriated herein shall not exceed the total amount authorized in H.R. 19911, or similar legislation.】 (Foreign Assistance and Related Programs Appropriation Act, 1971; Supplemental Appropriations Act, 1971; authorizing legislation to be proposed.)

Note.—Excludes \$13,300 thousand in activities of the United Nations Relief and Works Agency for Pakistan Refugees previously financed from: Supporting assistance, 1970, \$13,300 thousand; 1971, \$13,300 thousand.

As part of the President's proposal for a strengthened and coordinated U.S. international security assistance effort, supporting assistance funds provide financial and technical aid to countries which need help in maintaining defensive forces or in attaining economic and political stability. Public safety activities will be funded under this appropriation. The bulk of supporting assistance funds is for countries in Southeast Asia to help them in their efforts to maintain political independence. This appropriation also includes a contribution to the United Nations to help maintain peace in Cyprus.

This liquidation account was established as of June 30, 1968, under the authority of section 201(h)(3) of the Foreign Assistance Act of 1967. The foreign military sales fund terminated as of the same date and the assets were transferred to this account to be available solely for the purpose of discharging outstanding liabilities and obligations arising from credit agreements and guaranties issued prior to June 30, 1968. Any funds in this account in excess of the aggregate amount of such liabilities and obligations will from time to time be transferred to the general fund of the Treasury.

As authorized by sections 21 and 22 of the Foreign Military Sales Act of 1968, as amended, this trust fund is used to facilitate cash sales of defense articles and services. The purpose of the trust fund, which is strictly a cash account, is to enable foreign governments to take advantage of savings which result from procurement through U.S. Government channels. In dollar volume, the major portion of this program consists of sales to European and other developed countries of the free world.

Defense articles from Department of Defense stocks are sold for U.S. dollars to eligible countries and international organizations if they agree to pay in advance or, as authorized by the President, within 120 days after delivery.

Defense articles and defense services may also be procured by the Department of Defense for foreign purchasers if the purchasers agree to pay the full amount of the procurement contract, which assures the Government against any loss on the contract. The Department of

Defense may accept a dependable undertaking under which the purchaser agrees to pay within 120 days after delivery, in which case Department of Defense appropriations are used to meet contract payments. Defense appropriations are subsequently reimbursed with payments received from the purchasers.

Administrative expenses related to the execution of contracts under this authority are funded in the military assistance appropriation.

1. *Investment in International Development Association.*—The International Development Association is an international organization affiliated with the International Bank for Reconstruction and Development. The Association is designed to provide its less developed member countries with development financing in the form of long-term credits at a nominal service charge.

U.S. membership in the International Development Association was authorized by Public Law 86-565 (74 Stat. 293), approved June 30, 1960. The United States joined the Association in August 1960, and the institution began operation in November 1960.

The U.S. share of contributions provided by the 18 developed member countries of the Association is approximately 40%. As of June 30, 1970, the Association had made credit commitments for high priority economic development projects totaling \$2.8 billion in 55 countries.

An appropriation of \$320 million under proposed legislation will be sought in 1972 for the first installment of a U.S. \$960 million contribution to the third replenishment of the resources of the International Development Association.

2. *Investment in Inter-American Development Bank.*—The Inter-American Development Bank (IDB) is an intergovernmental institution, corporate in form, whose capital stock is owned by its member governments. The Bank promotes economic development in member countries through loans and technical assistance. Twenty-three Western Hemisphere republics, including the United States, are members of the Bank. Pursuant to Public Law 86-147 (73 Stat. 229), the United States joined the Bank in December 1959, and it began operations in October 1960.

Ordinary capital.—As of October 31, 1970, the total subscribed capital of the IDB was \$2,763 million, of which \$388.5 million was paid in. The U.S. share was \$1,173.5 million, including \$150 million paid in, approximately 42½% of capital actually subscribed. Total IDB loan commitments from ordinary capital and borrowings as of the same date amounted to \$1,437.6 million equivalent on 199 loans.

Fund for Special Operations.—In addition to its ordinary capital operations, the Bank lends from its Fund for Special Operations in circumstances where ordinary capital financing is not appropriate. Contributions to the Fund total \$2,328 million. The United States has contributed 77%, or \$1,800 million of this amount. As of October 31, 1970, commitments from the Fund for Special Operations amounted to \$1,947.5 million equivalent on 273 loans.

Appropriation of \$50 million for the second installment of the U.S. share of the increase in paid-in ordinary capital is recommended for 1972. Supplemental appropriations under existing legislation are anticipated in 1971 in the amount of \$50 million for the first installment of the U.S. share of an increase in paid-in ordinary capital of the Inter-American Development Bank, \$336.8 million for the first installment of the U.S. share of an increase in the callable capital of the Bank, and \$100 million for the first installment of the U.S. share in a proposed replenishment of the Fund for Special Operations. An appropriation is anticipated in 1972 under proposed authorizing legislation

of \$450 million for the second installment of the U.S. share in the replenishment of the Fund for Special Operations.

3. *Investment in Asian Development Bank.*—The Asian Development Bank finances economic development projects and programs in the developing countries of Asia. The Bank's membership includes 21 countries in the Asian and Pacific region and 14 developed countries outside the region.

The authorized capital stock of the Bank is \$1.1 billion. Of this \$1,004 million has been subscribed; \$624 million by the regional members, including \$200 million by Japan, and \$380 million by the nonregional members.

The Asian Development Bank Act (Public Law 89-369) of March 16, 1966, authorized U.S. membership in the Bank. The U.S. subscription is \$200 million; of that amount, \$100 million is paid in and \$100 million is callable.

In addition to its ordinary operations the Bank has established and accepts contributions to the Consolidated Special Funds of the Bank for use in financing high priority development projects on easier repayment terms than those applied to the Bank's loans from ordinary capital resources.

A proposed 1971 supplemental appropriation of \$60 million under proposed legislation is anticipated for the first and second installments of a U.S. contribution to the Consolidated Special Funds of the Asian Development Bank, and an appropriation of \$40 million for the third installment is anticipated in 1972.

4. *Investment in International Bank for Reconstruction and Development.*—The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development. The Bank's total authorized capital stock as of June 30, 1970, was \$24 billion, of which \$23.16 billion had been subscribed by 113 member countries.

The U.S. subscription is \$6.35 billion, of which the paid-in portion is \$635 million. The balance (\$5,715 million) is subject to call if required to meet the Bank's obligations. Calls on unpaid subscriptions, were they ever to occur, would be made on the basis of a uniform percentage applied to the subscription of each member country.

As of June 30, 1970, the Bank had made loans totaling \$14.3 billion (net of cancellations) in 88 member countries and to the International Finance Corporation.

As shown in the schedule below, proposed 1971 supplemental appropriation under existing legislation of \$246.1 million is anticipated for an increase in the U.S. subscription to the capital of the Bank. Ten percent of the increase, or \$24.61 million, will be paid in. The balance of \$221.49 million will add to the callable portion of the U.S. subscription.

1. *Investment in Inter-American Development Bank.*—Supplemental appropriations of \$50 million for the first installment of the U.S. share of an increase in paid-in ordinary capital of the Inter-American Development Bank, \$336.8 million for the first installment of the U.S. share of an increase in the callable ordinary capital of the Bank, and \$100 million for the first installment of the U.S. share in a proposed replenishment of the Fund for Special Operations are anticipated in 1971.

2. *Investment in International Bank for Reconstruction and Development.*—A supplemental appropriation of \$246.1 million for an increase in the U.S. subscription to the capital of the International Bank for Reconstruction and Development is anticipated in 1971. Ten percent of the increase, or \$24.61 million, will be paid in. The balance of \$221.49 million will add to the callable portion of the U.S. subscription. The increase in the U.S. subscription will be made pursuant to a proposed increase of \$3 billion in the authorized capital of the Bank to accommodate special increases in capital subscriptions from 75 member countries in amounts corresponding to increases considered special in their quotas in the International Monetary Fund. In the aggregate, the proposed special increases total \$2.2 billion.

UNITED STATES QUOTA, INTERNATIONAL MONETARY FUND

(MEMORANDUM)

【To finance an increase in the quota of the United States in the International Monetary Fund, \$1,540,000,000 to remain available until expended.】 (*Foreign Assistance and Related Programs Appropriation Act, 1971.*)

Program and Financing (in thousands of dollars)

	1970 actual	1971 est.	1972 est.
Program by activities:			
Payment of quota increase (costs—obligations)	-----	1,540,000	-----
Financing:			
Budget authority (appropriation)	-----	1,540,000	-----
Relation of obligations to cash position:			
Obligations incurred, net	-----	1,540,000	-----
Obligated balance, start of year	2,725,000	1,923,000	3,078,000
Obligated balance, end of year	-1,923,000	-3,078,000	-3,078,000
Change in cash position	802,000	385,000	-----

The Board of Governors of the International Monetary Fund has approved an increase in members' quotas amounting to a total of \$7.6 billion. The new quota for the United States is \$6,700 million, an increase of \$1,540 million from the previous quota of \$5,160 million. The United States consented to this increase on December 31, 1970, pursuant to an authorization contained in Public Law 91-599 approved December 30, 1970, and an appropriation provided for in Public Law 91-619 approved December 31, 1970. As a monetary transaction, the increase in the U.S. quota did not result in budget expenditures.

LOANS TO THE INTERNATIONAL MONETARY FUND (MEMORANDUM)

Program and Financing (in thousands of dollars)

	1970 actual	1971 est.	1972 est.
Financing:			
Unobligated balance available, start of year	-2,000,000	-2,000,000	-2,000,000
Unobligated balance available, end of year	2,000,000	2,000,000	2,000,000
Budget authority	-----	-----	-----

Public Law 87-490, approved June 19, 1962, authorized an appropriation to remain available until expended, of \$2 billion for U.S. participation in a 10-nation, \$6 billion arrangement providing, under specified conditions, for loans by the participants to the International Monetary Fund when needed to forestall or cope with an impairment of the international monetary system. The appropriation for these arrangements, known as the General Arrangements to Borrow (GAB), was obtained on October 24, 1962.

The GAB has been drawn on by the Fund on six occasions in the total amount of \$2,155 million. The United States has not yet participated in the loans extended under the GAB because the Fund's holdings of dollars have been adequate.

The Executive Directors of the International Monetary Fund renewed the GAB on October 17, 1969, for a period of 5 years, beginning October 24, 1970. The U.S. commitment to lend up to \$2 billion to the Fund under the GAB will continue during the renewal period.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

【Indus Basin Development Fund, grants: For expenses authorized by section 302(b)(2), \$4,925,000.】

【Indus Basin Development Fund, loans: For expenses authorized by section 302(b)(1), \$6,980,000, to remain available until expended.】

【United Nations Relief and Works Agency (Arab refugees): For expenses authorized by section 302(e), \$1,000,000.】

For international organizations and programs, including loans and grants for the Indus Basin Development Fund, as authorized by section 302(b) of the Foreign Assistance Act of 1961, as amended, \$168,000,000, to remain available until expended. (*Foreign Assistance and Related Programs Appropriation Act, 1971; additional authorizing legislation to be proposed.*)

Program and Financing (in thousands of dollars)

90	Outlays	99,724	129,795 143,400

Note.—Includes \$13,300 thousand in 1972 for activities of the United Nations Relief and Works Agency for Palestine Refugees previously financed from: Supporting assistance, 1970, \$13,300 thousand; 1971, \$13,300 thousand.

Voluntary contributions are provided for international organizations and programs to encourage their development assistance efforts. Of the \$141 million requested for United Nations technical assistance and other programs, \$100 million is for the United Nations Development Program which finances most technical assistance and capital project feasibility studies undertaken within the United Nations system. Other major contributions are provided for the United Nations Children's Fund, the United Nations Fund for Population Activities, and the United Nations Fund for Drug-Abuse Control, as well as the United Nations Relief and Works Agency for Palestine Refugees which was previously funded from the Supporting Assistance account.

Grants and loans are made to the Indus Basin development fund associated with the World Bank. This fund, to which a consortium of donors contributes, finances a construction program designed to insure an equitable division of the waters of the Indus Basin between India and Pakistan. It has removed a critical source of friction between the two nations and is supplementing irrigation and helping provide arable land for over 50 million people in the area. Funds are called for from donor nations only as they are needed to cover disbursement needs. The project is entering a new phase involving a major construction effort.

As part of the President's proposal for a strengthened U.S. international development assistance effort, grant funds are provided for a new U.S. International Development Institute. Assistance will be provided in areas identified by the developing countries, by international organizations and by our own analysis as being of high priority to development. Special emphasis will be placed on

research, training, and control of population growth. Maximum use will be made of private channels; present overseas U.S. personnel will be substantially reduced. Funds are included for grants to American-sponsored institutions abroad to help train qualified leadership in developing countries. Funds are also provided to meet the cost of transition to the new approaches proposed by the President.

Sec. 502, Mutual Security Act of 1954.....	73	50	6

Through 1961, a portion of the mutual security appropriations was used to purchase surplus agricultural commodities which were then sold to friendly countries for their currencies. These local currencies accruing from the sales are used for economic and military activities in furtherance of objectives of the U.S. foreign assistance program.

¹ Balances of selected resources are identified on the statement of financial condition.

Development loans are made to promote economic progress in developing countries. In line with the President's proposal for a strengthened U.S. international development assistance effort, funds are provided for the new U.S. International Development Corporation. Increasing emphasis will be placed on providing U.S. bilateral development lending within a framework established by the World Bank and regional development banks, such as the Inter-American Development Bank. The United States will seek to follow the lead of the multilateral lending institutions which have demonstrated their ability to take on an expanded role in the development process. In addition, U.S. bilateral development lending will, wherever possible, be channeled through consortia, consultative groups, and similar arrangements through which the efforts of bilateral donors and multilateral lending institutions can be effectively coordinated.

¹ Balances of selected resources are identified on the statement of financial condition.

The Development loan fund was established as a corporation by the Mutual Security Act of 1958 to extend loans, credits, and guaranties to American or foreign individuals, businesses, financial institutions, or foreign governments in order to provide capital for projects and programs contributing to the economic growth of friendly developing countries.

Under the Foreign Assistance Act of 1961, the Development Loan Fund Corporation was abolished and its functions were transferred, effective November 3, 1961, to the Agency for International Development. Subsequent to that date, the fund has remained open for the purpose of liquidating outstanding obligations. As of June 30, 1970, the undisbursed loan agreements amounted to

¹ Balances of selected resources are identified on the statement of financial condition.

The Housing investment guaranty fund includes the Latin American housing guaranty program and the worldwide housing guaranty program.

The purpose of the Latin American housing guaranty program is to assist in the development in the American republics of self-liquidating housing projects, the development of institutions engaged in Alliance for Progress programs, including cooperatives, free labor unions, savings and loan type institutions, and other private enterprise programs in Latin America engaged directly or indirectly in the financing of home mortgages, the construction of homes for lower income persons and families, the increased mobilization of savings and the improvement of housing conditions in Latin America.

The purpose of the worldwide housing guaranty program is to facilitate and increase the participation of private enterprise in furthering the development of the economic resources and productive capacities of less developed friendly countries and areas, and to promote the development of thrift and credit institutions engaged in programs of mobilizing local savings for financing the construction of self-liquidating housing projects and related community facilities.

Consistent with the intent of Congress that the housing programs be totally self-supporting, the costs of administration, program evaluation and development, and claims investigations are paid from fee income.

¹ Balances of selected resources are identified on the statement of financial condition.

The Foreign Assistance Act of 1969 established the Overseas Private Investment Corporation (OPIC) which is taking over the ongoing investment insurance and guaranty programs of the Agency for International Development and which also has a small direct investment loan fund program. The Corporation was created to be the U.S. Government's major tool for facilitating and encouraging U.S. long-term private investment in the developing countries, and it is expected to engage in an active promotion effort to this end.

OPIC is a wholly owned Government Corporation with a capital stock authorization of \$40 million which has been fully purchased by the U.S. Treasury: \$20 million in 1970 and \$20 million in 1971. An additional \$20 million capitalization is proposed for 1972 as a third tranche in the planned \$100 million capitalization by 1974.

The Corporation's net income in 1972 is estimated to be \$17.7 million. This net income is after deduction of an estimated \$16.6 million transferred from current earnings to the insurance and guaranty reserves to compensate those accounts for possible claim payments during the year. OPIC will allocate the net earnings of \$17.7 million to reserves for future contingencies.

Data on the guaranty and insurance programs are as follows:

PROGRAM ACTIVITY				
(In billions of dollars)				
A. Insurance:	1970 actual	1971 estimate	1972 estimate

The Foreign Assistance Act of 1969 established the Inter-American Social Development Institute (ISDI) which will support innovative Latin American initiatives in social areas. Projects will be carried out primarily through nonprofit U.S. private organizations.

The 1972 program is estimated at \$10.9 million of which \$9 million is estimated for grants in such areas as agriculture, education, and research. Funding is provided through transfers of \$10 million in 1970 and \$20 million in 1971 from the Agency for International Development.

This revolving fund was created to provide for more effective use of U.S. Government-owned excess personal property by authorizing such property to be acquired and rehabilitated in advance of specifically known requirements for country programs.

Many types of excess property such as tractors, construction, and roadbuilding equipment, machinery, and machine tools, the general needs for which can be anticipated with a reasonable degree of certainty, are included.

¹ Child development programs appropriated to Department of Health, Education, and Welfare in 1972.

² Work and training programs appropriated to Department of Labor in 1971 and 1972.

1. *Research, development, and evaluation.*—Projects supported under research and development provide the basis for planning national programs to alleviate poverty and promote equality of opportunity. This consists of systematic analyses of the causes of poverty, identification of need, design of social experiments, development of accepted hypotheses into working models, expanding successful concepts to demonstration scale, and developing mechanisms for moving these programs to full-scale operation either within or outside the agency. The 1972 research and development effort will center around an assessment of experiments undertaken in prior years and completed during 1972, a continuation of the most promising activities begun in prior years, the initiation of new experiments in carefully selected areas, and the augmentation of an in-house research capability.

Evaluation activities included in this component are of two types: (a) those providing an overall assessment of the impact and effectiveness of antipoverty programs, with emphasis on the extent to which programs are successful in achieving basic objectives, and (b) those aimed at assessing the relative effectiveness of different program strategies, approaches, and techniques used by antipoverty programs.

2. *Community development programs.*—(a) *Community action operations.*—The community action agency (CAA) structure at the community and neighborhood levels is funded under community action operations. This includes local staff to plan and administer programs as well as to bring about program improvements, participation of the poor, and mobilization of resources. Community action operations include local initiative program funds which can be tailored to meet each particular community's problems, ranging from manpower, education and health programs to consumer action, cooperatives, and youth programs.

Continuing emphasis will be given in 1972 to developing further the relationships between community action agencies and Federal, State, and local institutions. The local matching required for local initiative funds will be increased to 25% as a means of broadening the local base of support for community action. This higher matching requirement may be waived for Indian CAA's and specialized hardship cases. Although the 1972 allocation of \$296 million for local initiative programs may require selective program reductions, the turnover of local initiative funds should permit some program redirection. Incentive resource mobilization grants will be continued.

Regional and local administrators will have greater latitude in 1972 in both determining and providing the training and technical assistance requirements of individual projects. The \$12 million level for this component provided in the 1972 budget reflects a decline in nationally directed training and technical assistance. State economic opportunity offices will be sustained at their 1971 levels, although less new obligational authority will be required. These offices will assist in the provision of local technical assistance, and perform representation and resource mobilization functions at the State level. Senior opportunities and services programs will be continued at the increased levels attained in 1971.

PROGRAM OBLIGATIONS

	[In millions of dollars]		
	1970 actual	1971 estimate	1972 estimate
Local initiative.....	317.3	312.9	296.4

State economic opportunity offices.....	10.4	14.0	13.0
Senior opportunities.....	6.8	8.0	8.0
Program direction.....	14.8	16.0	16.6
Total.....	368.2	368.4	346.0

(b) *Health and nutrition.*—A number of additional health services projects will be started in 1972 to explore new ways to deliver comprehensive care to the poor. The major effort will be in developing communitywide programs involving a number of institutions forming a coordinated network of services for the poor. Family planning and narcotics rehabilitation programs will also be expanded. A number of programs will be transferred to HEW: \$10 million has been added to the HEW budget for family planning projects, \$16 million for comprehensive health projects, and \$4 million for narcotics rehabilitation projects. Based upon the significant expansion of the primary Federal food assistance program, and enactment of a family assistance program, administrative action will be taken to phase down emergency food and medical services grants. However, current program levels will be substantially maintained in 1972 as many of these projects were funded for extended periods during 1970 and 1971. In addition, it is expected that community action agencies will continue to remain active in mobilizing

resources and in providing outreach to assure maximum effectiveness of nutrition programs. OEO support for alcoholic prevention and recovery programs may also be phased out if funding can be assumed by other sources.

(c) *Special impact.*—The special impact program authorized under title I-D is directed toward meeting some of the special problems of economically depressed urban and rural areas. During 1971 and 1972 there will be continued experimentation with community development corporations and other program models designed to impact on the problems of these areas.

(d) *Special migrant and Indian programs.*—These programs will be sustained at the expanded levels attained in 1971. The 1970 migrant program reached an estimated 256,000 farmworkers and family members. Approximately 11,000 job placements were recorded, and 2,500 persons were enrolled in non-OEO job training programs on a full-time stipend basis. Two thousand adult education trainees received high school equivalency diplomas with an equal number pursuing postsecondary studies; over 10,000 family members were involved in 1,988 self-help housing starts; and nearly 14,000 children participated in extended-hours day care programs during peak harvest periods. Most other participants benefit from some form of "in-stream" aid. Special Indian programs served an estimated 320,000 persons in 1970 through 67 community action organizations. These programs had a predominant rural and reservation emphasis. For 1972, program development will focus on the needs of urban Indians which constitute a universe of need nearly as large as reservations. Urban Indian centers and their linkage to reservation community services programming will be emphasized. Programs of advanced professional career study will be continued at current levels.

(e) *Legal services program.*—This program will continue to offer legal aid to people unable to afford such services. In 1970, approximately 2,000 legal services lawyers handled an estimated 900,000 cases on behalf of the poor through 268 field projects utilizing 900 locations. This program provides three types of legal assistance: (1) direct legal advice and representation in individual cases) (2) education concerning legal rights and responsibilities; and (3) improvement of the legal system to make it more responsive to the needs of the poor. This program will be continued at the 1971 level.

(f) *Volunteers in Service to America (VISTA).*—This program assigns individual volunteers or teams to non-profit private or public organizations to assist in projects of direct help to the poor within six broad categories: health, economic development, education and manpower development, housing, social services, and community planning. In 1972, approximately 4,000 man-years of service will be delivered on behalf of the poor. The program will continue to emphasize skilled volunteers, structured training, well-defined project assignments under regular supervision, and project evaluation.

(g) *Rural economic opportunity loan program.*—The rural economic opportunity loan program will be phased out beginning in 1971. Current borrowers will continue to receive supervision until their loans are repaid. Funds for this purpose in an amount of \$6 million will be provided during 1971.

3. *General support.*—This activity provides supportive administrative functions for the OEO programs described above. The organizations included under this activity also coordinate and review all Economic Op-

portunity programs delegated to other agencies and assists in coordinating the programs of all Federal agencies in an integrated attack on poverty.

4. *Child development programs.*—Head Start and Follow Through funds will be appropriated directly to the Department of Health, Education, and Welfare in 1972.

5. *Work and training programs.*—Programs funded through the Office of Economic Opportunity in 1970 are funded through direct appropriations to the Department of Labor in 1971 and 1972.

Rural economic opportunity loan program.—This program has been administered by the Farmers Home Administration of the Department of Agriculture through delegation of authority. Under the program loans were provided to low-income rural residents for small farm and nonfarm enterprises to help increase their incomes. Loans were also made to rural cooperative enterprises serving the rural poor through purchasing, processing, and marketing activities.

Evaluations of the program have shown that it has not proven effective in improving the income potentials of the rural poor. Small loans for small businesses do not appear to be capable of reversing the forces leading to the economic decline of rural areas, especially rural areas with substantial degrees of poverty. Thus, this program will be phased out beginning in 1971.

The purposes of the Peace Corps are to provide trained Americans to interested countries in need of middle-level manpower and to promote understanding between the people of the United States and the peoples served.

Volunteers are working in five principal kinds of assignments at the request of host countries. Approximately 48% are engaged in teaching at all levels and 24% are serving in agricultural development. Additionally, about 11% are involved in public works and public administration, 10% in health programs, and 7% in rural and urban development projects.

Prior to overseas assignment, each volunteer is given intensive training designed to develop required skills, to provide a knowledge of the country to which he will be sent, to develop his language abilities and to assure physical fitness for service overseas. During training, all prospective volunteers are carefully evaluated through continuous observation. To provide the most realistic training environment and experience, about 75% of all volunteers will receive some portion of their training in the host countries where they will serve.

Planning is based on a program year which runs from the beginning of September through the end of August.

1. *Volunteer and project costs.*—This activity includes all costs directly associated with volunteers. The 1972 budget supports a total strength of 5,850 volunteers in training and overseas by August 31, 1972. The planned assignment of these volunteers is as follows:

	Aug. 31, 1970 (actual)	Aug. 31, 1971 (planned)	Aug. 31, 1972 (planned)
Africa.....	2,469	1,850	1,600
East Asia and Pacific.....	2,119	1,600	1,350
Latin America.....	2,928	2,200	1,900
North Africa, Near East, and South Asia...	1,484	1,100	1,000
Total.....	9,000	6,750	5,850

Country requests for Peace Corps Volunteers are calling for more specialized projects which require higher skill levels. To meet these needs, the Peace Corps is providing more technical and skill-related training to its volunteers. The proposed 1972 strength of 5,850 is designed to meet this demand through programing criteria which assure the correlation of project aims, volunteer capabilities, and the purposes of the Peace Corps Act.

Volunteers for African countries will continue to be in primary and secondary education. However, growing emphasis is being placed on agriculture and health programs.

Most of the volunteers in the East Asia and Pacific region will be engaged in teacher training, classroom teaching, health programs, and new activities in agricultural production.

In Latin America, agriculture and community development comprise the major thrust with education, particularly training of primary level teachers, as the third major program area.

The North Africa, Near East, and South Asia region has a wide variety of programs. The majority of volunteers in the region are working in agricultural and educational activities.

2. *Administrative expenses.*—This activity includes expenses related to recruitment, selection, direction of training, and the management of the Peace Corps, both in Washington and overseas.

Under an amendment (Public Law 88-94) to the Philippine war damage legislation of 1963, a special fund (\$28.1 million) for education derived from the Philippine war damage claims fund has been established to be used as jointly determined by the two Presidents for the purpose of furthering educational programs to the mutual advantage of both countries. Projects totaling \$26.8 million have been approved to support various educational projects in the Republic of the Philippines. It is anticipated that the balance of the funds will be utilized in 1971.

PROTECTION OF VISITING FOREIGN DIGNITARIES

PROTECTION OF VISITING FOREIGN DIGNITARIES ATTENDING THE OBSERVANCE OF THE TWENTY-FIFTH ANNIVERSARY OF THE UNITED NATIONS

For expenses necessary to enable the President, through such officers or agencies of the Government as he may designate, and without regard to such provisions of law regarding the expenditure of Government funds as he may specify, to provide adequate security protection to foreign heads of state and other foreign dignitaries while visiting in the United States during or in connection with the twenty-fifth anniversary of the founding of the United Nations, \$1,650,000. (Treasury, Post Office, and Executive Office Appropriation Act, 1971.)

Program and Financing (in thousands of dollars)

74.47 Obligated balance, end of year: Authority to spend public debt receipts			423,218
90 Outlays			

It is proposed to amend title III of the Defense Production Act of 1950, as amended, to prohibit the financing of any new contracts under the provisions of section 304; to terminate interest payments on notes issued pursuant to that section; to provide for the orderly retirement of those notes; and to provide for the cancellation of any remaining borrowing authority under section 304. The effect of the legislation is reflected in the above schedule.

Proposed for separate transmittal, proposed legislation:

INTERNATIONAL FINANCIAL INSTITUTIONS

Program and Financing (in thousands of dollars)

Identification code 04-10-0050-2-1-152	1970 actual	1971 est.	1972 est.
Program by activities:			
1. Investment in International Development Association			320,000
2. Investment in Inter-American Development Bank			450,000
3. Investment in Asian Development Bank		60,000	40,000
4. Provision for expanded multilateral assistance			35,000
10 Total program costs, funded—obligations		60,000	845,000
Financing:			
40 Budget authority (proposed supplemental appropriation)		60,000	845,000
Relation of obligations to outlays:			
71 Obligations incurred, net		60,000	845,000
72 Obligated balance, start of year			58,000
74 Obligated balance, end of year		-58,000	-846,000
90 Outlays		2,000	57,000

1. *Investment in International Development Association.*—An appropriation of \$320 million will be sought in 1972 for the first installment of a U.S. \$960 million contribution to the third replenishment of the resources of the International Development Association. Legislation to authorize this contribution will be sought in the 92d Congress. The U.S. contribution will be part of a total increase in the Association's resources of over \$2.4 billion to be provided by member countries over a 3-year period. The second \$320 million installment of the U.S. contribution will be sought in 1973 and the third in 1974. The amounts to be contributed by the United States will not be expended until the International Development Association needs the funds to meet disbursements on credits extended out of the third replenishment resources.

2. *Investment in Inter-American Development Bank.*—An appropriation of \$450 million for the second installment of the U.S. share in the proposed replenishment of the Fund for Special Operations is recommended for 1972. A further appropriation of \$450 million will be sought in 1973. The appropriations will be sought pursuant to proposed authorizing legislation.

3. *Investment in Asian Development Bank.*—A proposed 1971 supplemental appropriation of \$60 million is anticipated for the first and second installments of a U.S. contribution to the Consolidated Special Funds of the Asian Development Bank. A final installment of \$40 million is recommended for 1972. These appropriations will be sought pursuant to proposed authorizing legislation. The U.S. contribution would constitute a minority share of total contributions by all donors and would not be the largest single contribution. The amounts contributed by the United States would not be expended until needed by the Asian Development Bank to meet disbursement requirements.

4. *Provision for expanded multilateral assistance.*—When internationally agreed proposals have been formulated, legislation will be recommended to Congress to authorize U.S. contributions for expanded economic assistance to be provided through the international financial institutions. This will enable the United States to provide its fair share in the multilateral support of programs undertaken by the developing nations to promote their own economic growth and social advancement.

GENERAL PROVISIONS

【SEC. 101. None of the funds herein appropriated (other than funds appropriated for "Technical Assistance, Multilateral Organizations" and "Indus Basin Development Fund") shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the United States of America as per memorandum of the President dated May 15, 1962.】

【SEC. 102. Obligations made from funds herein appropriated for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of \$25,000 shall be reported to the Senate and House of Representatives at least twice annually.】

【SEC. 103. Except for the appropriations entitled "Contingency fund", "Alliance for Progress, development loans", and "Development loans", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.】

【SEC. 104. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or

any prior Act shall be used to pay pensions, annuities, retirement pay, or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.]

【SEC. 105. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used for making payments on any contract for procurement to which the United States is a party entered into after the date of enactment of this Act which does not contain a provision authorizing the termination of such contract for the convenience of the United States.】

【SEC. 106. None of the funds appropriated or made available under this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to make payments with respect to any capital project financed by loans or grants from the United States where the United States has not directly approved the terms of the contracts and the firms to provide engineering, procurement, and construction services on such projects.】

【SEC. 107. Of the funds appropriated or made available pursuant to this Act not more than \$9,000,000 may be used during the fiscal year ending June 30, 1971, in carrying out research under section 241 of the Foreign Assistance Act of 1961, as amended.】

【SEC. 108. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to pay in whole or in part any assessments, arrearages, or dues of any member of the United Nations.】

【SEC. 109. None of the funds made available by this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be obligated for financing, in whole or in part, the direct costs of any contract for the construction of facilities and installations in any underdeveloped country, unless the President shall have promulgated regulations designed to assure, to the maximum extent consistent with the national interest and the avoidance of excessive costs to the United States, that none of the funds made available by this Act and thereafter obligated shall be used to finance the direct costs under such contracts for construction work performed by persons other than qualified nationals of the recipient country or qualified citizens of the United States: *Provided, however,* That the President may waive the application of this amendment if it is important to the national interest.】

【SEC. 110. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to finance the procurement of iron and steel products for use in Vietnam containing any component acquired by the producer of the commodity, in the form in which imported into the country of production, from sources other than the United States or a country designated as a limited free world country by code number 901 in the July 1968 Geographic Code Book compiled by the Agency for International Development, and at a total cost (delivered to the point of production) that amounts to more than 10 per centum of the lowest price (excluding the cost of ocean transportation and marine insurance) at which the supplier

makes the commodity available for export sale (whether or not financed by the Agency for International Development).】

【SEC. 111. None of the funds contained in Title I of this Act may be used to carry out the provisions of sections 205 and 251(h) of the Foreign Assistance Act of 1961, as amended.】

Unobligated balances as of June 30, [1970] 1971, of funds heretofore made available under the authority of the Foreign Assistance Act of 1961, as amended, except as otherwise provided by law, are hereby continued available for the fiscal year [1971] 1972, for the same general purposes for which appropriated; and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the [subparagraphs under "Economic Assistance",] *appropriations in this Act* are hereby continued available for the same period as the respective appropriations [in such subparagraphs] for any of the same general purposes: *Provided,* That such purpose relates to a project or program previously justified to Congress and the Committees on Appropriations of the House of Representatives and the Senate are notified prior to the reobligation of funds for such projects or programs. (*Foreign Assistance and Related Programs Appropriation Act, 1971.*)

TITLE V—GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

SEC. 502. No part of any appropriation contained in this Act shall be used for expenses of the Inspector General, Foreign Assistance, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering foreign assistance legislation, appropriations, or expenditures, has delivered to the Office of the Inspector General, Foreign Assistance, a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report, or other material in the custody or control of the Inspector General, Foreign Assistance, relating to any review, inspection or audit arranged for, directed, or conducted by him, unless and until there has been furnished to the General Accounting Office or to such committee or subcommittee, as the case may be, (A) the document, paper, communication, audit, review, finding, recommendation, report, or other material so requested or (B) a certification by the President, personally, that he has forbidden the furnishing thereof pursuant to such request and his reason for so doing.

SEC. 503. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. (*Foreign Assistance and Related Programs Appropriation Act, 1971.*)

DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, marketing, nutrition and consumer use, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work: *Provided*, That appropriations hereunder shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$75,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed **[\$25,000]** \$40,000, except for six buildings to be constructed or improved at a cost not to exceed **[\$55,000]** \$80,000 each, and the cost of altering any one building during the fiscal year shall not exceed **[\$7,500]** \$15,000, or **[7.5]** 15 per centum of the cost of the building, whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to a total of \$100,000 for facilities at Beltsville, Maryland: **[Provided further**, That the limitations on construction contained in this Act shall not apply to a total of \$350,000 for construction of a post-mortem and incinerator facility for animal disease and parasite research:]

Research: For research and demonstrations on the production and utilization of agricultural products; agricultural marketing and distribution, not otherwise provided for; home economics or nutrition and consumer use of agricultural and associated products; and related research and services; and for acquisition of land by donation, exchange, or purchase at a nominal cost not to exceed \$100; **[\$151,633,000]** \$153,037,000, and in addition not to exceed \$15,000,000 from funds available under section 32 of the Act of August 24, 1935, pursuant to Public Law 88-250 shall be transferred to and merged with this appropriation, except that \$200,000 of the foregoing amount shall be available for matching with funds utilized for research on cottonseed proteins under Public Law 89-502, and \$4,580,000 shall remain available until expended for plans, construction, and improvement of facilities without regard to limitations contained herein: *Provided*, That the limitations contained herein shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): **[Provided further**, That none of the funds appropriated in this Act shall be used to formulate a budget estimate for fiscal 1972 of more than \$15,000,000 for research to be financed by transfer from funds available under section 32 of the Act of August 24, 1935, and pursuant to Public Law 88-250: *Provided further*, That none of the funds appropriated in this Act shall be used to formulate a budget estimate for fiscal 1972 of less than the amount required to conduct the pesticides research program as authorized pursuant to Public Laws 88-573 and 89-316:]

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c), **[\$98,619,750]** \$96,842,650, of which \$1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects, plant diseases and animal diseases to the extent necessary to meet emergency conditions: *Provided*, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by any State of at least 40 per centum: *Provided further*, That, in addition, in emergencies which threaten the livestock or poultry industries of the country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European

fowl pest and similar diseases in poultry, and for expenses in accordance with the Act of February 28, 1947, as amended, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts;

Special fund: To provide for additional labor, subprofessional and junior scientific help to be employed under contracts and cooperative agreements to strengthen the work at research installations in the field, not more than \$2,000,000 of the amount appropriated under this head for the previous fiscal year may be used by the Administrator of the Agricultural Research Service in departmental research programs in the current fiscal year, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research". (5 U.S.C. 5901; 7 U.S.C. 145, 147a-148a, 148c-150jj, 151-164a, 165a-167, 281-283, 391, 394a-396, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-430, 433-434, 436-437, 450-450b, 450i, 612c, 1292, 1441 note, 1621-1628, 1651-1656, 1884, 1901, 1904-1905, 2131-2154, 2201-2202, 2208, 2220, 2225, 2228-2229, 2232-2233, 2239, 2250-2250a, 2258-2260, 2262-2263; 10 U.S.C. 2306; 15 U.S.C. 69e; 16 U.S.C. 581-581a, 581f, 590a-590b, 590f, 590k; 18 U.S.C. 1114; 19 U.S.C. 1306a, 1306c; 20 U.S.C. 191-194; 21 U.S.C. 94-94a, 101-105, 111-114c, 114d-2-114d-6, 114e-131, 134-134h, 151-158, 611-614, 618, 621, 622, 676; 42 U.S.C. 1476(b)-1476(e), 1483, 1891-1893; 45 U.S.C. 71-74; 46 U.S.C. 466a-466b; 49 U.S.C. 1474(a), 1509(d); 46 Stat. 67; 78 Stat. 939-940; Department of Agriculture and Related Agencies Appropriation Act, 1971.)

The Service conducts basic and applied research relating to the production, utilization, and marketing of agricultural products, research on nutrition and consumer use, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantine, the control of diseases and pests of animals and plants and related work.

1. *Research.*—(a) *Farm research.*—Improved breeding, feeding, and management practices, including management of animal wastes, are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases, parasites, and insect pests affecting them and to protect them from chemical toxicity and other hazards.

Investigations are conducted to improve varieties of food, feed, fiber, and other plants, and to develop new crops; to improve crop-production practices, including methods to control plant diseases and nematodes, and reduce cost of production; and to develop safe chemical, biological, and other methods for control of harmful pests affecting farm production.

Investigations are conducted to improve the management of natural resources, including investigations to improve soil and water management (including salinity and saline soils), irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to

determine the relation of soil types and water to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs. Increased attention has been given to studies on protection of plants, animals, and natural resources from harmful effects of soil, water, and air pollutants. Research also concerns the application of remote sensing techniques in meeting agricultural problems.

The net decrease requested for 1972 would provide for research to develop effective controls against emergency outbreaks of plant diseases; decreases to eliminate certain items of increase added by the Congress, and a decrease in public relations activities.

(b) *Utilization research and development.*—Chemical, physical, and biological research is conducted to develop increased industrial uses of farm products, and new and improved foods, feeds, and fabrics; and to develop improved methods for processing agricultural commodities.

The research aim is to expand the demand for farm products by developing new and improved products and economical processes tailored to the requirements of the domestic and foreign markets. The research conducted includes studies to protect food and feed products from harmful micro-organisms and naturally occurring toxins and studies of health-related problems of tobacco. Increased effort is being given to the processing of agricultural commodities to minimize waste formation and to utilize waste products to avoid pollution.

The decrease requested for 1972 would provide for a reduction in public relations activities and the elimination of certain items of increase added by the Congress in 1971.

(c) *Nutrition and consumer use research.*—Studies are made of human nutritional requirements, composition and nutritive value of foods, and consumer and food economics. The research aim is to determine nutrient requirements and how foods can supply these to best assure nutritional well-being of people throughout their lifespan; to provide up-to-date information about food consumption and nutrition of the population; and to develop improved procedures for household preparation, care, and preservation of foods which will preserve their nutritional, sanitary, and wholesome quality. The decrease requested for 1972 would provide for a reduction in public relations activities.

(d) *Marketing research.*—Practical answers to reduce costs and maintain product quality in moving products from farm to consumer are sought through research. For farm products as they pass through marketing channels, efforts are made to develop safe methods to protect against insect attack, find objective methods to determine quality, reduce losses from waste and spoilage, and improve efficiency in physical handling and transportation. The work includes research at each stage of marketing, such as assembly points and storage facilities, and of transportation at terminal or central markets, and at wholesale and retail markets. Research is also concerned with mycotoxins in agricultural products in relation to off-farm handling, conditioning, and storage. The decrease for 1972 would eliminate certain items of increase added by the Congress in 1971 and provide for a reduction in public relations activities.

(e) *Coordination of departmental and interdepartmental activities related to pests and their control.*—The 1972 estimates provide for the availability of \$158 thousand for the use of the Secretary to meet emergency situations relating to the safe use of pesticides. Part of this activity transferred to the Environmental Protection Agency in accordance with Reorganization Plan No. 3 of 1970, effective December 2, 1970. The project provided for coordination with the Department of Health, Education, and Welfare, Department of the Interior, and other agencies of the Federal Government in development of measures to protect the public health, producers, and resources.

(f) *Construction of facilities.*—The 1972 estimates provide for a decrease of \$4,580 thousand to eliminate non-recurring amounts provided for construction of facilities in 1971.

(g) *Contingencies.*—Beginning in 1962, \$1 million is available to meet urgent research needs that develop unexpectedly during the year, when such needs cannot be met by redirection of resources from other projects.

2. *Plant and animal disease and pest control.*—(a) *Plant disease and pest control.*—Programs are designed to keep out of this country by inspection at ports of entry those harmful insects, plant diseases, nematodes, and other pests that cause great damage to agriculture in other countries. Working with the States, programs are conducted to eradicate or prevent spread of crop pests that become established in this country. Assistance is given to the States to suppress incipient and emergency outbreaks of crop pests when and where they occur. The 1972 estimates propose increases to initiate a cooperative program with the States for managing the use of pesticides and for plant quarantine inspection; and decreases to eliminate four programs: European chafer, soybean cyst nematode, phony peach and peach mosaic, and sweetpotato weevil; and a reduction in public relations activities.

The level of activities for plant pest control is shown by the selected examples that follow:

Acres treated (thousands):	1970 actual	1971 estimate	1972 estimate
Boll weevil.....	771	1,250	1,000
Cereal leaf beetle.....	118	100	100
Grasshopper.....	318	500	750
Gypsy moth.....	156	175	150
Imported fire ant.....	14,508	13,000	15,000
Japanese beetle.....	32	25	30
Sterile moths released (millions): Mexican fruit fly.....	28.6	30	30
Sterile moths released (millions): Pink bollworm (adult moth).....	94.3	100	100

The level of activities for plant quarantine inspection at ports of entry is as follows:

Plant import inspection:	1970 actual	1971 estimate	1972 estimate
Airplanes (thousands).....	308.3	320	328
Vessels (thousands).....	55	56	56
Vehicles from Mexico (millions).....	36.9	40	43
Baggage, pieces, including mandato (millions).....	40.2	41.7	43
Mail, packages (millions).....	68.5	70	70
Interceptions (thousands):			
Unauthorized plant materials.....	643.6	655	663
Plant pests.....	43.2	44	45

(b) *Animal disease and pest control.*—Programs are conducted to keep communicable diseases of foreign origin from entering this country and to prevent the spread of disease through interstate shipments of livestock or distribution of impure or impotent veterinary biologics. Other programs are directed at the control and eradication of

livestock diseases. The animal welfare program is concerned with the humane care and handling of certain laboratory animals. The 1972 estimates propose an increase for veterinary biologics regulation, a reduction in the level of activity for the brucellosis eradication program, and a reduction in public relations activities.

The level of activities for the major control programs on animal diseases and pests is as follows:

	1970 actual	1971 estimate	1972 estimate
Brucellosis:			
Certified free States, plus Virgin Islands.....	20	27	30
Modified certified States, plus Puerto Rico.....	28	25	22
Herds tested (thousands):			
Blood tests.....	226.3	234	186
Milk ring tests.....	1,271.3	1,209	1,140
Reactors found (thousands).....	93.2	-----	-----
Hog cholera:			
Hog cholera-free States.....	15	30	40
Suspicious outbreaks reported.....	5,857	-----	-----
Outbreaks confirmed.....	1,231	-----	-----
Tuberculosis:			
Modified accredited States, plus Puerto Rico and Virgin Islands.....	49	48	49
Cattle tested (thousands).....	4,150	4,100	4,000
Reactors found (thousands).....	2.5	-----	-----
Scabies:			
Sheep inspected (millions).....	10	12.5	11.5
Infected sheep:			
Psoroptic.....	109	-----	-----
Chorioptic.....	120	-----	-----
Cattle inspected (millions).....	29	45	45
Infected cattle:			
Psoroptic.....	7,700	-----	-----
Chorioptic.....	33,594	-----	-----
Sarcoptic.....	401	-----	-----
Screwworm:			
Sterile flies released (millions).....	6,885	6,700	6,700
Cases in United States outside of barrier.....	6	30	30
Cases in United States part of barrier.....	53	400	375
Cases in Mexico part of barrier.....	5,249	7,000	6,500
Salmonella: States with cooperative rendering plant programs, plus Puerto Rico.....	50	50	50
Ticks:			
Cattle inspected (millions).....	1.4	1.4	1.5
Outbreaks.....	52	-----	-----
Veterinary biologics:			
Serials produced.....	12,040	12,000	12,000
Serials potency tested.....	2,772	2,000	2,000
Unsatisfactory for potency.....	117	-----	-----
Serials sterility tested.....	4,080	2,000	2,000
Unsatisfactory for sterility.....	70	-----	-----
Public stockyards inspection:			
Animals inspected (millions).....	47	45	43
Diseased animals found (thousands).....	388	-----	-----

The level of activities for animal inspections and quarantine is as follows:

Animal import inspection:	1970 actual	1971 estimate	1972 estimate
All animals (thousands).....	1,321	1,100	1,150
Import animal byproducts, pounds (millions).....	855	900	950
Vessels inspected—sea stores and garbage (thousands).....	24.9	30	35

(c) *Pesticides regulation.*—This activity, concerned with administration of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, and related provisions of the Federal Food, Drug, and Cosmetic Act was transferred to the Environmental Protection Agency in accordance with Reorganization Plan No. 3 of 1970, effective December 2, 1970.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The level of activities for pesticides regulations is as follows:

	1970 actual	1971 estimate	1972 estimate
Enforcement:			
Samples collected.....	5,876	-----	-----
Violative products.....	2,065	-----	-----
Shipments seized.....	26	-----	-----
Recall actions—violative products.....	401	-----	-----
Product registration:			
New.....	1,029	-----	-----
Amended.....	4,298	-----	-----
Canceled.....	5,236	-----	-----
Total, end of period.....	40,807	-----	-----
Label reviews.....	19,044	-----	-----

(d) *Contingencies*—Of the total annual amounts provided under the subappropriation plant and animal disease and pest control, the appropriation language authorizes that \$1.5 million shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects, plant diseases, and animal diseases to the extent necessary to meet emergency conditions. Prior to a change in language in the 1970 appropriation act, which expanded this fund to include its use for animal insects and pests, this fund was merged under the activity plant disease and pest control.

72	Obligated balance, start of year.....	18,720	17,631	16,357
74	Obligated balance, end of year.....	-17,631	-16,357	-18,206
90	Outlays.....	5,956	7,250	8,503

¹ Includes capital outlay as follows: 1970, \$0; 1971, \$5 thousand; 1972, \$5 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$17,786 thousand; 1970, \$17,125 thousand; 1971, \$14,870 thousand; 1972, \$16,035 thousand.

Foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States are used for expenses of carrying out programs of the Department of Agriculture as authorized by law and described under sections 104(b) (1) and (3) of the Agricultural Trade Development and Assistance Act of 1954, as amended. Research is carried on through agreements negotiated with research institutions and organizations in foreign countries. The research must be of importance to American agriculture. It serves to preserve and expand existing markets and develop new ones for agricultural commodities. It provides for research supplementary to domestic programs on problems of farm, forest, marketing, utilization, agricultural economics, and human nutrition, and makes possible the conduct of research on exotic insect pests and diseases of plants and animals which could not be done in the United States. Specialized projects provide for the translation and dissemination of foreign language scientific publications. The increase proposed in 1972 would be used to purchase foreign currencies in those countries determined to be excess to the normal requirements of the United States to expand overseas research of value to U.S. agriculture and forestry. Total estimated cost in U.S. dollars (charged to regular appropriations) for program direction and supervision of projects in 1972 is \$550 thousand.

Public Law 88-592, approved September 12, 1964, authorized the sale of the Animal Quarantine Station, at Clifton, N.J., to the city of Clifton, and application of the proceeds of sale to the planning and construction costs of a new station in the New York-New Jersey port and airport area. A sales contract between the Department and the city of Clifton was executed on December 16, 1966, at the appraised value of \$527 thousand. Of that amount, \$100 thousand was paid to the Department upon execution of the contract. A total of \$6 thousand has been spent by the Department on survey and related costs associated with obtaining a new site. An additional \$1.5 million was provided in 1970 under the appropriation, Salaries and expenses, for the remainder of the total cost of \$2,027 thousand for the new station. A new site is under consideration.

This fund finances, on a reimbursable basis, central facilities and services furnished to agencies at the Agricultural Research Center (64 Stat. 658). The capital consists of \$300 thousand appropriated in 1951 and donated assets of \$354 thousand as of June 30, 1970. Earnings are retained to furnish adequate working capital.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$104 thousand; 1970, \$109 thousand; 1971, \$219 thousand; 1972, \$199 thousand.

Note.—Excludes \$39 thousand in 1971 and \$20 thousand in 1972 for activities transferred to Environmental Protection Agency in accordance with Reorganization Plan No. 3 of 1970, effective Dec. 2, 1970.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others.

1. *Expenses and refunds, inspection, certification, and quarantine of animal products* and byproducts not intended for human food, and for other purposes, moving in interstate and foreign commerce primarily to prevent introduction and spread of animal diseases (7 U.S.C. 1622 h and n) (21 U.S.C. 111). Fees are paid in advance for services to be rendered.

2. *Expenses, feed, and attendants for animals in quarantine* are paid from fees advanced by importers (21 U.S.C. 102).

3. *Miscellaneous contributed funds* received from States, local organizations, individuals, and others are available for work under cooperative agreements on miscellaneous farm, utilization, and marketing research activities, plant and animal quarantine inspection, and cooperative plant and animal disease and pest control activities (7 U.S.C. 450d, 2220).

¹ Includes capital outlay as follows: 1970, \$7 thousand; 1971, \$15 thousand; 1972, \$10 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$7,006 thousand (1970 adjustments, -\$66 thousand); 1970, \$7,631 thousand; 1971, \$6,604 thousand; 1972, \$7,631 thousand.

The Service administers funds for payments and grants to State agricultural experiment stations and other eligible institutions for the support of research in agriculture, the rural home, the rural community, and forestry. This administration involves supervision of the funds, and close advisory relations with the State agricultural experiment stations, schools of forestry, and other institutions eligible to receive funds. The Service participates in planning and coordination of research programs among the States and between the States and the Department.

1. *Payments to agricultural experiment stations under the Hatch Act.*—Grants under the Hatch Act are allocated to agricultural experiment stations of the land-grant colleges in the 50 States and Puerto Rico for agricultural research including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural community.

2. *Grants for cooperative forestry research.*—These grants are allocated to land-grant colleges or agricultural experiment stations in the 50 States and Puerto Rico and other State-supported colleges and universities offering graduate training in the sciences basic to forestry and having a forestry school. The act requires that the Federal funds paid to each institution be matched by funds from non-Federal sources for forestry research.

3. *Contracts and grants for scientific research.*—These funds are for the support of grants on specific research problems at nonprofit institutions of higher education or nonprofit organizations whose primary purpose is the conduct of research. To meet the requirements for selection, each proposal must be evaluated and classified as outstanding and appropriate to the needs of the designated problem areas. A major portion of the funds will be allocated to colleges established under the second Morrill Act of 1890.

5. *Penalty mail.*—Funds to cover the cost of penalty mailings for State agricultural experiment station directors are provided under this appropriation.

6. *Federal administration.*—A coordinating and review staff is maintained to examine research projects and assist State institutions and Federal agencies.

The planned distribution of the funds requested for 1972 compared with 1971 is as follows (in thousands of dollars):

	1971	1972

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, community development, 4-H youth programs, and related subjects. This educational work takes research results, technological advancements, and program facts of the Department of Agriculture, State agricultural colleges and experiment stations, and incorporates them into a program for action. Cooperative Extension Service interprets, disseminates, and encourages practical use of knowledge. It transmits information from researchers to people.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act are distributed to States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of State and county extension workers who work with rural families, marketing concerns, and others by providing advice and assistance in the application of improved methods for production, marketing, and family living. Work with youth is accomplished largely through 4-H clubs. Funds also provide for Federal payment to the Bureau of Employees' Compensation Fund. Extension agents are paid from Federal, State, and county sources. The mandatory retirement contribution for these agents is authorized by Public Law 854, approved July 31, 1956. The employer's contribution to the retirement fund, is provided by this Federal appropriation. The increase of \$10,249 thousand in this item will be used (1) to provide for increased costs of program operations; (2) for payments for rural development; (3) for payments for extension work by colleges receiving the benefits of the second Morrill Act under section 3(d) of the act; (4) to strengthen extension services in the District of Columbia; (5) to provide retirement costs related to increased operating costs and to rural development increase; and (6) for payment to Bureau of Employees' Compensation.

2. *Penalty mail.*—Funds for the cost of penalty mailings for State extension directors and cooperative extension agents are provided under this appropriation.

3. *Federal administration and coordination.*—The Extension Service provides leadership, and assistance to States and Puerto Rico in developing extension programs, improving teaching methods, efficient use of available resources, evaluation of programs, and administrative services. Extension Service also coordinates the educational activities of U.S. Department of Agriculture agencies. The

increase of \$205 thousand will be used (1) \$4 thousand in support of extension work in the District of Columbia; and (2) \$201 thousand for cooperative agreements with State extension services for pilot programs for low-income families and rural development.

¹ Includes capital outlay as follows: 1970, \$5 thousand; 1971, \$5 thousand; 1972, \$5 thousand.
² Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1969, \$46 thousand (1970 adjustments, \$2 thousand); 1970, \$57 thousand; 1971, \$57 thousand; 1972, \$57 thousand.

Farmer Cooperative Service conducts research, advises directly with cooperative leaders and others, promotes cooperative organization and development through other Federal and State agencies, and publishes reports, *News for Farmer Cooperatives*, and other educational material. This work is aimed (1) to help farmers get better prices for their products and reduce operating expenses, (2) to help rural and smalltown residents use cooperatives to develop rural resources, (3) to help these cooperatives expand their services and operate more efficiently, and (4) to help all Americans understand the work of these cooperatives.

In 1972, the Service will help cooperatives improve their markets and operating practices to serve farmers more effectively.

(d) Technical and other assistance with community-type jobs, mine-spoil restoration, control of pollutants, and other special problems that can best be solved through coordinated local action;

(e) The granting of special equipment to soil conservation districts for use in applying conservation practices;

(f) Water supply forecasts prepared from snow surveys in Western States that are useful in making efficient seasonal use of water;

(g) The selection and testing of plant materials to determine their suitability for erosion control and conservation purposes;

(h) Technical assistance to participants in the agricultural conservation program in establishing specified permanent-type practices;

(i) Technical services to participants in other programs involving land use adjustments;

(j) Technical assistance in the planning and applying of soil and water conservation practices for which loans are made by the Farmers Home Administration; and

(k) Consultative assistance to rural development committees.

General and special funds—Continued

CONSERVATION OPERATIONS—Continued

Combinations of needed soil and water conservation practices are planned together and in relation to each other so as to have well balanced conservation programs in each district and for each farm or ranch. Both vegetative and structural measures are used in accordance with the needs of the land for protection, treatment, and resource improvement. Each plan reflects the decisions of the cooperating landowner or operator as to how he will use and treat his land.

Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments with each cooperator, help to evaluate the costs and returns of conservation farming, and furnish assistance in applying the needed treatments.

Cooperating landowners and operators are providing more than half the cost of practices and measures installed in district programs. Local agencies and private individuals also furnish about one-third of the total installation services used to help cooperators apply soil and water conservation practices in districts throughout the country.

RIVER BASIN SURVEYS AND INVESTIGATIONS

For necessary expenses to conduct research, investigations and surveys of the watersheds of rivers and other waterways, in accordance with section 6 of the Watershed Protection and Flood Prevention Act, approved August 4, 1954, as amended (16 U.S.C. 1006), to remain available until expended; **[\$9,043,000] \$9,591,000**, with which shall be merged the unexpended balances of funds heretofore appropriated to the Department for river basin survey purposes: *Provided*, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$60,000 shall be available for employment under 5 U.S.C. 3109. (7 U.S.C. 2201-2202; Department of Agriculture and Related Agencies Appropriation Act, 1971.)

¹ In addition, there have been 18 interim reports completed in the Colorado River, Oregon River, and Sevier River studies.
² Includes review studies of Cape Fear, Yazoo-Mississippi, and Tombigbee River basins.

River basin program development and coordination.—Section 6 of Public Law 566, 83d Congress, as amended, authorizes the Department to cooperate with other Federal, State, and local agencies in making surveys and investigations of the watersheds of rivers and other waterways as a basis for the development of coordinated water and related land resource programs. The department currently is participating in cooperative surveys and investigations in river basins with the Corps of Engineers and other interested Federal and State agencies. The Department is represented on the Water Resources Council which was established to coordinate water and related land resource activities of Federal departments and agencies. The Department also maintains representation on four river basin commissions and four river basin interagency committees. These serve as points of contact and coordination between representatives of this Department and of other Federal departments and agencies and the States in these basin areas. They keep all concerned mutually informed of the activities of the

member agencies and facilitate matters of interagency coordination. During fiscal year 1970, the Department maintained such representation on committees in the Arkansas-White-Red, Missouri, Pacific Southwest, and Southeast areas. The Department also is represented on the Water Resources Council which was formed in accordance with section 101, Public Law 89-80, the Water Resources Planning Act.

The Senate Select Committee on National Water Resources has proposed the goal of surveying all of the Nation's river basins and making determinations of our future water and related land resources needs.

This Department and other member departments of the Water Resources Council have jointly considered needs for river basin surveys and investigations necessary to attain the goal.

Based on this joint consideration, current needs are \$631 thousand to continue interagency comprehensive surveys now in process during fiscal year 1972; \$6,731 thousand to continue other Federal-State cooperative river basin surveys now in progress and to start seven additional surveys in cooperation with States; \$315 thousand for interregional economic analyses; \$400 thousand for flood hazard analyses; and \$1,514 thousand for interagency coordination and program formulation.

The following tabulation shows the number of surveys and actual or estimated obligations by type of survey in fiscal years 1970, 1971, and 1972.

[Dollars in thousands]

Small watershed project investigations and planning.—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in co-operation with local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost-sharing and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development.

The Department cooperates with the States and other agencies in installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the costs of certain works of improvement.

MAIN WORKLOAD FACTORS

Status of projects approved for operations:	1970 actual	1971 estimate	1972 estimate
Approved, current fiscal year.....	64	65	65
Approved, cumulative at June 30....	1,001	1,066	1,131
Completed, current fiscal year.....	35	55	55
Completed, cumulative at June 30....	273	328	383
Work in progress at June 30.....	728	738	748

1. *Watershed works of improvement.*—The Department provides technical and financial assistance to local organizations to install the watershed works of improvement for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife development features specified in the work plans.

(a) *Pilot demonstration watersheds.*—Sixty-two pilot watersheds were started in 1954 in cooperation with local sponsors under authority of the act of April 27, 1935 (16 U.S.C. 590a-f) to demonstrate and evaluate the effectiveness of works of improvement installed in small watersheds for watershed protection and flood prevention. As of June 30, 1970, work had been discontinued in eight projects and completed as planned in 54.

The following table shows the total cost for the completed pilot watershed projects:

Explanation	1970 actual	
	Number	Amount (thousands)
Uncompleted projects at beginning of year and estimated completion cost.....	1	\$1
Status of projects and amounts obligated:		
1. Projects completed during the year.....	1	1
2. Projects continuing construction and land treatment..	—	—
Total.....	1	1

3. Projects completed (cumulative) and total cost ¹	54	43,258
4. Projects discontinued (cumulative) and total cost.....	8	330
Total projects approved and total cost.....	62	43,588
Total obligations (cumulative).....	—	43,588

¹ Includes \$1,264,860 for project evaluation studies charged to project costs prior to fiscal year 1960.

(b) *Public Law 566 watersheds.*—After local sponsoring organizations have developed watershed work plans with the Department's assistance or with State and local resources, and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution in excess of \$250 thousand for construction or any single structure having a capacity in excess of 2,500 acre-feet require congressional approval), technical services and financial assistance are provided for specified works of improvement. On non-Federal lands, local sponsoring organizations may contract for construction work or request the SCS to do the contracting for them, operate and maintain the projects, and in the case of multiple-purpose structures, bear a share of construction costs. In addition, local organizations must acquire water rights and furnish land, easements, and rights-of-way for all structural measures except that the Federal Government may pay up to one-half the cost of land, easements, and rights-of-way allocated to public fish and wildlife and recreational developments. Federal agencies do this work on Federal lands which they administer with appropriate contributions being made by the local people who receive benefits.

Preconstruction and land treatment and engineering services are furnished to all approved projects before they are advanced to the construction stage. During the preconstruction stage, surveys and investigations are made and detailed designs, specifications, and engineering cost estimates are prepared for construction of structural work; areas are delineated where easements are required, and technical services are furnished for accelerating planning and application of land treatment measures if provided for in the watershed work plan.

The project construction stage begins either with the execution of the first project agreement for construction of works of improvement or with the signing of a construction contract in projects which the Federal Government does the contracting. Under a project agreement, the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an inter-related group of structures. The agreement (or contract where Federal contracting is involved) obligates the Department to furnish its share of the construction cost. Engineering and other services are provided for the preparation of contracts and inspection of construction. Payments are made to the local contracting organization when they do the contracting in accordance with the project agreement as the work progresses. When a local organization requests the SCS to do the contracting for works of improvement, the SCS makes payments directly to the contractor as work progresses. This will include both amounts financed from Federal funds and contributions received from local organizations for their share of construction cost. Technical assistance in planning and installing land treatment measures is continued as called for in the watershed work plan.

The following tabulation shows the status of Public Law 566 projects by stage of assistance and amounts obligated or estimated to be obligated. The table excludes obligation for loan services.

[Dollars in thousands]

Explanation	1970 estimate		1971 estimate		1972 estimate

Total.....	-----	578,473	-----	656,188	-----	731,560

¹ Includes \$8,660 for Institute of Tropical Forestry.

2. *Loans and related expense.*—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in approved watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements have become available. Loans will be made from \$6,750 thousand available in 1971 and \$5 million in 1972 from the Direct loan account of the Farmers Home Administration. Loan services related to processing and making loans will be financed from this appropriation.

1. *Works of improvement.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention and for furthering the conservation, development, utilization, and disposal of water in the 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares in the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development facilities.

The Department furnishes additional technical and, in certain instances, financial assistance to landowners to accelerate planning and installation of land treatment measures for runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land easements, and rights-of-way, water rights, and the entire cost of works of improvement for nonagricultural water management measures, except those for fish and wildlife development and recreation, and operate and maintain all completed works of improvement.

Within the 11 watersheds authorized for flood prevention work by the Flood Control Act of 1944, 402 subwatershed areas have been identified in which installation of flood prevention works of improvement is feasible. Installation progress in these subwatersheds is shown in the following table:

Subwatershed status:	End of fiscal year		
	1970	1971	1972
In construction.....	133	139	141
Completed.....	139	149	159
Not started.....	130	114	102
Total.....	402	402	402

2. *Loan services.*—Loans are made to local organizations to help finance their share of the costs of planned works of improvement. Repayment with interest is required within 50 years after the principal benefits of improvements first become available for this purpose. Loans will be made from funds available for this purpose from the direct loan account of the Farmers Home Administration. Loan services related to processing and making loans are financed from funds available to this appropriation.

¹ Accrued annual leave as of June 30 is as follows: 1969, \$496 thousand; 1970, \$526 thousand; 1971, \$572 thousand; 1972, \$562 thousand.
² Selected resources as of June 30 as follows: Unpaid undelivered orders. 1969, 29,603 thousand; 1970, 28,837 thousand; 1971, 28,488 thousand; 1972, 27,754 thousand.

This program provides cost-sharing assistance and technical services to participating farmers and ranchers in the development and installation of long-term conservation plans for their land. It is a voluntary program which supplements other conservation programs of the Department in 453 designated counties of 10 Great Plains States. Cost-sharing contracts with individual landowners range from 3 to 10 years.

Plans of conservation operations are made for each farm or ranch as a basis for cost-sharing certain practices. The fundamental purposes of this program are to achieve needed land use adjustments, conservation treatments, and economic stability of each operating unit. The planned work is installed under contract according to specific time schedules.

New contracts during year.....	3,038	3,125	3,000
Active contracts end of year.....	18,440	18,325	18,000

As of June 30, 1970, there was a backlog of 6,158 un-serviced applications pending, and a total of 18,440

General and special funds—Continued

GREAT PLAINS CONSERVATION PROGRAM—Continued

farmers and ranchers were cooperating in this cost-share program. Cooperating landowners finance the entire cost of installing recurring management type practices and pay a specified part of the cost-shared practices installed on their land.

Program regulations provide that cost-share rates offered in any contract shall not exceed 80 percent of the cost of installing each eligible practice within the designated county. Cost-sharing varies among practices and between States due to differences in conservation and program needs. Cost-sharing for practices that are primarily to enhance fish and wildlife and recreation resources, to promote the economic use of land, or to reduce or control agricultural related pollution is limited to not more than \$2,500 in any one contract, or one-fourth of the total Federal obligation, whichever is larger. Federal cost-sharing is further limited to \$2,500 for the construction, enlarging, or deepening of any dam, pit, or pond for irrigation water; and to not more than \$2,500 for irrigation practices in any one contract, or one fourth of the total Federal obligation, whichever is larger. There is also a cost-sharing limitation of \$25 thousand for any contract.

Each participant who signs a Great Plains program contract is responsible for implementing his plan of operations; and the Department is committed to furnish the necessary technical help needed for design, layout, and other services. Cooperating land-users are encouraged to make use of other available assistance under local, State and Federal programs as a means of further improving their land and water resources.

Total selected resources.....	1,298	3,127	4,367	4,547

The Department cooperates with other Federal agencies, States, local units of government, groups and individuals in developing and carrying out programs and plans for resource conservation and development and shares in the cost of installing planned project measures, when justified as a public need. Loans are provided to qualified local sponsoring organizations when needed to help them finance their share of the cost of certain project measures which are in the public interest. Project measures planned will contribute to improvement in the economy of the area and to needed land use adjustments.

Technical assistance is provided in each project area approved for planning to help sponsoring organizations prepare overall plans for resource conservation and development. Project plans will have been finished and operations begun in 68 areas by June 30, 1971. Project planning will be initiated in 10 areas during 1972 and completed in another 10 areas where planning will be initiated in 1971. The 10 project plans completed in 1972 will bring the number of plans authorized for operations by June 30, 1972, to 78.

Each project authorized for operations is provided technical assistance to help cooperating groups and individuals plan and install land treatment measures; to design and supervise installation of community-type project measures; and, to assist in the preparation of plans for resource development and economic improvement within project areas.

The main workload factors in 1972 include:

- (a) Assistance to local sponsors in developing suitable plans.
- (b) Operations in 78 project areas for which plans will have been completed.
- (c) Acceleration of project measures installation expected to be made possible by additional State and local funds, and through the use of Resource Conservation and Development program technical and financial assistance for eligible erosion and sediment control, flood prevention,

agricultural water management, and public water-based recreation and fish and wildlife measures.

Field work under this program consists primarily of planning, designing, and supervision of installation of project measures and conservation practices, the purpose of which is to develop or improve the economic use of natural resources. This includes outdoor recreation facilities and income-producing enterprises where needed and where consistent with good land use. Investigations, surveys and planning are prerequisite to the operating phase of this program. Financial contributions, loans, and other Federal assistance are used to help plan and install project measures as specified in project plans.

Loans are made to qualified local organizations to help finance their share of the costs of installing project measures. Funds will be available for loans from the direct loan account of the Farmers Home Administration.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1970, \$5 thousand; 1971, \$4 thousand; 1972, \$0.

Public Law 90-85, approved September 11, 1967, authorized the Secretary of Agriculture to convey to the county of Alameda, State of California, by quitclaim deed, for not less than fair market value as determined by independent appraisal, all rights, title, and interest of the United States in and to the Pleasanton Plant Materials Center, situated in Alameda County, Calif.

Section 2 of Public Law 90-85 authorized the Secretary of Agriculture to apply the proceeds of the sale of the Pleasanton Plant Materials Center to the costs of acquiring other lands or interests in land in the State of California which the Secretary deems suitable for a plant materials center to be established as a replacement for the Pleasanton Plant Materials Center, to the cost of construction and alteration of buildings and the development of such other improvements thereon as may be necessary for the establishment of the plant materials center, and

to the costs of removal to such center of the functions of the Pleasanton Plant Materials Center, including the expenses incident to the transfer of personnel, and the removal of equipment, planting stock, and other property.

The Pleasanton Plant Materials Center was sold to the county of Alameda, State of California, on January 20, 1970, for \$745 thousand and an initial payment of \$300 thousand was made to the Soil Conservation Service. The amount of \$100 thousand was made on March 1, 1970, another \$100 thousand was made on October 1, 1970, and the remaining \$245 thousand is to be made on or before January 1, 1971.

A new nursery site to be known as the Lockeford Plant Materials Center was purchased on April 7, 1970, for \$250 thousand. The land has been paid for and some land conditioning has been done. Buildings will be constructed, which are authorized in Public Law 90-85, and nursery stock planted, and employees transferred during fiscal years 1971 and 1972.

¹ Includes capital outlay as follows: 1970, \$43 thousand; 1971, \$43 thousand; 1972, \$43 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$703 thousand (1970 adjustments, -\$130 thousand); 1970, \$825 thousand; 1971, \$825 thousand; 1972, \$825 thousand.

Agricultural economics research in the Department is administered by the Service. The results of the research program are relied upon by (a) producers, dealers, importers and exporters as aids in planning the most profitable adjustments in their operations, (b) Government agencies in formulating and administering agricultural

programs, and (c) Congress in considering agricultural legislation.

1. *Farm economics.*—Research is conducted to measure, appraise, and analyze on a continuing basis, economic changes that occur in farming and in the use of human and natural rural resources and to indicate needed adjustments.

Research on the economics of farm production includes the economics of organization and management of farms; adjustments of production to prospective demands and changing technologies; appraisals of costs and returns on farms representative of important types, sizes, and locations, and the appraisal of costs of producing important commodities; development of measures of farm output and productivity; problems of farm size and capital requirements; financing of farm enterprises; and appraisal of alternative agricultural production policies and programs.

Natural resources economics is concerned with the economics of use, conservation, development, management, and control of natural resources and their relationship to economic activity. It includes economic analysis of land and water resources, resource institutions, and the economic and social conditions affecting use of resources.

Economic development is focused upon the well-being and opportunities of rural people. It includes a broad research program on economic development of rural areas, opportunities and employment of rural people and factors affecting them, including local governments and other organizations. Special attention is given to the poor who are found in heavy concentrations among rural people.

2. *Marketing economics.*—This activity covers economic aspects of marketing farm products, including the nature of farmers' bargaining power; potentials for new products and new uses; market structure, performance costs and margins; the economic effects of school feeding, food stamp, and direct food distribution programs.

3. *Domestic and foreign economic analysis.*—Domestic economic analysis is concerned with identifying, measuring, and analyzing: (1) the factors affecting demand, supply, and price of agricultural commodities; (2) relationships between agriculture and the national economy; (3) farm income and the income of the farm population; (4) demand for and consumption of farm products; (5) long-term projections of economic growth and demand for farm products; and (6) historical developments in the policies, programs, and organization of the Department.

Foreign economic analysis includes trade studies and investigation of supply-demand relationships. The trade and market studies focus on the problems of developing foreign markets and the effect of these developments on U.S. agricultural production. Research is carried on for more than 100 countries around the world, focusing on the forces affecting supply, demand, and trade in farm products, and their impact on U.S. agricultural exports.

¹ Includes capital outlay as follows: 1970, \$117 thousand; 1971, \$0; 1972, \$0.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$461 thousand (1970 adjustment, -\$60 thousand); 1970, \$636 thousand; 1971, \$636 thousand; 1972, \$636 thousand.

The Service administers the Department's programs of crop and livestock estimates and statistical research and service. Statistical and economic data developed by the Service on food and agriculture are essential to farmers, processors, and handlers in making production and marketing decisions. It also helps legislators, administrators, and others concerned with developing and administering agricultural programs. Further, data provided by the Service is basic to economic research and analysis and other agricultural research programs.

1. *Crop and livestock estimates.*—The Service provides the official national estimates of acreage, yield, and production of crops; stocks and value of farm commodities; and numbers and inventory value of livestock items. Data on approximately 150 crop and livestock products are covered in some 600 reports issued each year. Data collected and published on prices paid and received by farmers are basic to computation of parity prices.

The work of the Service is conducted through 44 State offices serving 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide much additional State and county data; Federal funds are not available for collection and publication of this data. During 1970, cooperating States expended an estimated \$3.2 million of their own funds on such associated State programs.

A comparison of activities in 1969 and 1970, including work performed under cooperative arrangements, follows:

	1969 actual	1970 actual
Separate mailings of inquiry forms, average per field office	421	419
Total questionnaires handled:		
Number distributed	9,150,000	8,550,000
Number of returns tabulated	2,760,000	2,759,000
Number of objective survey contacts (measurements and interviews)	282,000	266,000
Number of official reports issued, all offices	10,500	10,200
Copies of reports distributed	16,273,000	15,843,000
Copies of publications distributed	2,466,000	2,265,000
Special requests for information answered by field offices	75,600	85,100

2. *Statistical research and service.*—This work includes review of all statistical forms, survey plans, and reporting and recordkeeping requirements originating in the Department which require Office of Management and Budget approval; liaison within the Department and with other agencies for coordination of statistics; research on and development of sampling, forecasting, and other basic statistical techniques and methods to improve the crop and livestock estimates of the Department; provision of technical consulting services on new or improved statistical techniques to other agencies of the Department; use of and consultation on automatic data processing, to develop and adapt this technology to the improvement of the accuracy and timeliness of crop and livestock estimates; and conduct of special surveys relating to the marketing of agricultural products. A comparison of activity in 1969 and 1970 is as follows:

	1969 actual	1970 actual
Statistical forms-reports (Federal Reports Act): Departmental clearance and review for submission to Office of Management Budget	543	423
Improvement of crop and livestock estimating methods:		
Number of research projects	11	11
Special surveys: Number of research projects	6	8

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$402 thousand (1970 adjustments, -\$517 thousand); 1970, \$341 thousand; 1971, \$341 thousand; 1972, \$341 thousand.

³ Includes capital outlay as follows: 1970, \$5 thousand; 1971, \$5 thousand; 1972, \$5 thousand.

⁴ Receipts from appeal inspections on grain (21 U.S.C. 468; 7 U.S.C. 78).

These activities provide consumer protection through inspection for wholesomeness of meat and poultry products. They assist producers and handlers of agricultural commodities through various marketing and regulatory services. These services continue to expand and become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the market structure undergoes dramatic changes. These marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional

competition, vertical integration, and contract farming. The individual activities include:

1. *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. The information is collected and disseminated at year-round and seasonal offices maintained in more than 140 cities and towns, often with local and other support and cooperation, generally from State departments of agriculture. Dissemination is made primarily by radio, television, and mimeographed reports. The volume of work performed is indicated by examples given in the following table:

MARKET NEWS SERVICE

States covered by cooperative agreement.....	1968 actual	1969 actual	1970 actual
.....	43	43	43
Field offices:			
Year-round.....	179	176	172
Seasonal.....	42	43	40
Buyers and sellers interviewed.....	17,997	18,309	17,073
Mimeographed releases to growers, shippers, and others.....	21,176,021	21,147,160	19,200,918
Names on mailing list.....	205,483	207,479	197,610

2. *Inspection, grading, classing, and standardization.*—
(a) *Meat inspection.*—Federal meat inspection is required for all meat and meat products moving in interstate and foreign commerce to assure a clean and wholesome meat supply for human consumption, free from adulteration, and truthfully labeled. Also, since December 15, 1970, all meat and meat products moving in intrastate commerce must be federally inspected or inspected by States to standards at least equal to the Federal. The work includes inspection of animals, carcasses, meat, and meat-food products at various stages of handling and processing. Measures are enforced to assure informative labeling, and that meats imported or exported are inspected. The Federal program also provides financial and technical assistance to States for improving the quality of their inspection programs.

The estimates for 1972 include increases to provide for inspection of additional plants.

The volume of inspections and examinations is indicated by examples given in the following table:

MEAT INSPECTION

	1969 actual	1970 estimate	1971 estimate	1972 estimate
Number of establishments covered.....	3,178	3,330	3,626	4,222
Post mortem inspection (thousands).....	121,751	118,144	119,989	120,995
Animals and carcasses condemned (thousands).....	275	312	360	400
Inspection of processed meat and meat-food products (million pounds).....	45,177	44,883	46,500	48,922

(b) *Poultry inspection.*—Inspection of poultry meat and poultry meat products for wholesomeness is provided pursuant to the Poultry Products Inspection Act of 1957, as amended. All poultry processed in plants shipping in interstate or foreign commerce is required to be inspected both before and after slaughter. Birds found to be unfit for human consumption are condemned and removed from channels of trade. The Federal program also provides financial and technical assistance to States for improving the quality of their inspection programs.

The increase for 1972 provides for inspection of an anticipated increased volume of poultry and poultry products. The volume of work performed is indicated by examples given in the following table:

POULTRY INSPECTION

	1970 actual	1971 estimate	1972 estimate
Billion pounds to be inspected.....	23.8	25.5	27.1
Plants under inspection.....	1,091	1,294	1,389
Operating lines under inspection, June 30.....	1,706	1,775	1,915

(c) *All other (inspection, grading, classing, and standardization).*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: Promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 78% of the total cost of this work was offset by fees and other revenue in 1970.

An increase of \$3,387 thousand is being proposed in 1972 for inspection of egg products. The volume of work performed is indicated by examples given in the following tables:

STANDARDIZATION ACTIVITIES

	1968 actual	1969 actual	1970 actual

Volume inspected at markets (million pounds).....	2,072	2,063	2,058
Sets of buyers.....	234	234	234

3. *Regulatory activities.*—These include the administration of regulatory laws such as the U.S. Warehouse and Federal Seed Acts to assure fairplay in the marketplace, to protect producers and handlers of agricultural commodities from financial loss due to careless or fraudulent marketing practices, and to preserve free and open competition in the marketing of farm products. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Cotton Research and Promotion Act is designed to improve the competitive position and expand markets for cotton through a program of self-assessment by cotton producers. The Service also administers the Wheat Research and Promotion Act, the Agricultural Fair Practices Act of 1967, and the Plant Variety Protection Act.

The volume of work performed is indicated by examples given in the following table:

4. *Administration and coordination of State payments.*—This project covers Federal activity required in administering and coordinating the marketing service work performed by the States and financed jointly by State funds and Federal funds provided by the appropriation, Payments to States and possessions. In 1970 this work was carried on in 44 States and 150 work projects.

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in utilizing marketing research results.

This program covers such projects as: Methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; collecting and disseminating special State and local market information and statistics; and improving the organizational structure of the marketing system. Through this cooperative approach, the Federal Government's leadership and money are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

Total selected resources.....	143,473	-130	133,125	133,125	133,125

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30% of customs receipts collected during each calendar year (except for an amount equal to 30% of such receipts col-

lected on fishery products transferred to the Department of Commerce to encourage the distribution of fishery products), plus unused balances up to \$300 million are available for expanding domestic and foreign market outlets for farm commodities. As provided in recent appropriation acts, transfers have been made from this fund primarily to the school lunch program for the purchase and distribution of agricultural commodities and cash reimbursements for meals served. Section 32 funds are also authorized for the administration of marketing agreements and orders. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities.

1. *Commodity program payments* are of five types: (a) *Direct purchases* are donated to schools, summer camps, child-care centers, nonprofit institutions serving needy persons, persons certified by welfare as eligible for relief, and disaster victims; (b) *Diversion payments* enable processors to purchase surplus commodities on the domestic market, divert them to byproducts and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities; (c) *Export payments* enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; (d) *Production payments*, none of which were made in 1970, help to reestablish farmers' purchasing power; (e) *Financial assistance to States* enable State distributing agencies to improve the distribution system supplying commodities to needy families. During the past 2 years, assistance under these programs was given to the following commodity groups (in millions of dollars):

OBLIGATIONS		
	1969	1970
Dairy products.....	120.9	103.6
Eggs and poultry.....	55.9	71.2
Fats and oils.....	13.7	3.5
Fruits and vegetables.....	38.7	60.3
Grain products.....	8.8	15.5
Livestock products.....	82.3	72.8
Peanut butter.....	14.9	15.3
Miscellaneous.....	5.1	5.8
Total.....	340.3	348.0

¹ Includes special feeding program commodities purchased for special food packages donated in food stamp areas: \$0.9 million in fiscal year 1969 and \$10.3 million in fiscal year 1970.

The use of section 32 program funds is contingent upon marketing conditions. The estimates for both 1971 and 1972 reflect the foreseeable needs for perishables and other activities regularly financed with section 32 funds. If troublesome surpluses not now foreseen should develop, steps will be taken to use additional available funds for their removal or diversion as conditions might warrant.

Funds have been used for the certification and distribution of food to needy families in selected counties where local governmental agencies are unwilling or unable to operate food distribution programs.

2. The *special feeding program* was initiated in 1969 to meet the urgent need for providing additional foods to needy children and adults who are determined to be suffering from general and continued hunger. The funds provided are channeled primarily through the child feeding programs authorized by the School Lunch and Child Nutrition Acts.

Working with the Department of Health, Education, and Welfare and the Office of Economic Opportunity, the Department has developed a distribution system to provide special food packages for infants, and expectant and new mothers. These packages are being distributed in both food stamp and commodity donation areas. Funds have also been used for conducting a pilot food certificate program designed to increase the food purchasing power for expectant and new mothers and infants through the issuance of certificates to be exchanged at their local grocery for certain commodities.

3. *Surplus removal operating expenses* occur mainly in connection with purchasing, diverting, and exporting surplus commodities, and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1970, including that under section 6 of the National School Lunch Act, is summarized below (in millions):

Distribution	Number of recipients (peak month)	Value of commodities distributed	Pounds of commodities distributed
By recipients:			
Schoolchildren.....	23.2	\$258.9	1,046.6
Needy persons.....	4.1	291.1	1,180.3
Persons in charitable institutions.....	1.3	20.6	118.6
Total.....	---	570.6	2,345.5
By program:			
Section 32.....	---	350.1	1,132.9
Donation by Commodity Credit Corporation, section 416.....	---	156.2	956.4
Section 6, National School Lunch Act.....	---	64.3	256.2
Total.....	---	570.6	2,345.5

In cooperation with the food trade, press, and radio, greater consumption of abundant foods is encouraged through publication of a monthly plentiful foods list and conducting various food drives. In 1970 the monthly plentiful foods list contained an average of seven foods. Fourteen national and four area, State, and local drives were conducted.

4. *Marketing agreements and orders* are put into effect upon request of producers or handlers after hearings and investigations, and upon approval of producers (and handlers in the case of marketing agreements). They help to stabilize prices, and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessment upon handlers. On June 30, 1970, there were in effect 68 orders for milk, 46 agreements and orders for tree fruits, nuts, and vegetables, and one order for shade grown tobacco. The expenses of advisory committees established to advise the Secretary, public hearings, referenda to determine producer sentiment, and other developmental work as authorized by the Agricultural Act of 1961 are also financed under this project.

5. *Food and nutrition aides program* is being financed by the Extension Service in 1971 and 1972.

90 Outlays	996	1,140	1,189

¹ Includes capital outlay as follows: 1970, \$2 thousand; 1971, \$3 thousand; 1972, \$3 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$2.4 thousand; 1970, \$0.3 thousand; 1971, \$0.3 thousand; 1972, \$0.3 thousand.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491-497, 499a-499s). The law currently provides that annual license fees may be set at a maximum of \$100. The Department proposes to increase the license fee to \$60 on January 1, 1971.

The acts are intended to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation awards, and (c) suspension or revocation of license and/or publication of the facts.

WORKLOAD FACTORS

Activity	1969 actual	1970 actual	1971 estimate

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are responsible for carrying out locally the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

Each milk order is administered locally by a market administrator who is appointed by the Secretary. His staff is employed directly by the market administrator.

The activities conducted in the local office are concerned primarily with monthly computations and public announcement of class and uniform blend prices, associated butterfat differentials, examination of handlers records and facilities to verify their reports and payments to producers, and in checking weights and tests of producer milk.

The expenses of each local office are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order provides for the expense of disseminating market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order. Adjustments below these rates are made from time to time to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers as the case may be.

Milk sold by regulated handlers supplied over 122 million persons in calendar year 1969.

The following table gives an indication of the growing role of Federal orders on the marketing of milk over the past few years:

	Calendar year				
	1965	1966	1967	1968	1969

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$39 thousand; 1970, \$4 thousand; 1971, \$0; 1972, \$0.

1. *Cash payments to States.*—This program is designed to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, child-care centers, summer camps and similar nonprofit institutions.

Funds are provided under letters of credit to State agencies to reimburse eligible participants for a part of the cost of the fluid milk consumed. Beginning in fiscal year 1968, available funds were apportioned among the States on the basis of payments made to schools and child-care institutions for program reimbursement during the preceding fiscal year. In especially needy schools, reimbursement payments may be made for the full cost of this milk for children who are unable to pay. In fiscal year 1970 the program was financed by a direct appropriation of \$84 million and an additional \$20 million provided under the section 32 special feeding program.

In 1970 almost 3 billion half-pints of fluid milk were consumed by children—over six times the quantity in 1955, the first year of operation of the program. This represents more than 3% of the total nonfarm consumption of the fluid milk in the United States. The need for a separate special milk program has been eliminated by the serving of complete lunches, including milk, under the school lunch program. No funds are provided, therefore, beyond fiscal year 1971.

Program activities for 1970 and 1971 are as follows:

	1970 actual	1971 estimate
Outlet participation	97,090	97,000
Half-pints of milk reimbursed (millions)	2,867.8	2,900.0
Average reimbursement rate per half-pint (cents)	3.44	3.55

2. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools, and child-care institutions. Policies, procedures, and standards are developed for administering the program and determining eligibility. The program is administered directly in approximately 9,000 outlets where no State agency has assumed the responsibility for its

General and special funds—Continued

¹ Includes capital outlay as follows: 1970, \$83 thousand; 1971, \$115 thousand; 1972, \$115 thousand; excludes downward adjustment of \$225 thousand in prior year costs.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$2,460 thousand (1969 adjustments, \$5 thousand); 1970, \$1,154 thousand; 1971, \$1,154 thousand; 1972, \$1,154 thousand.

This program helps to improve the nutrition of households with limited resources and makes more effective use of our food abundance. Food coupons of sufficient value to purchase an adequate diet are issued to certified needy families at a cost to them which reflects family size and net family income. Recently enacted amendments to the Food Stamp Act provide for the issuance of stamps free to the very poorest households and limit the amount other families must pay for stamps to 30% of net family income. Food coupons may be used by participating households in retail stores for the purchase of commercial brand foods. The program is inaugurated in local communities at the request of State welfare agencies which are responsible for certification and coupon issuance functions.

The Department determines the amounts of the total food coupon allotment and the amounts of the purchase requirements which must be applied uniformly in all States operating the program. In 1972 these amounts will be revised to make the program more consistent with the principles embodied in the administration's proposed Family Assistance Plan.

Cash paid for the coupons by participants is deposited periodically in a designated Federal depository. Food stores receive cash or credit for the coupons from any commercial bank, which must accept them at face value. The coupons then flow through regular banking channels to the Federal Reserve banks where they are redeemed.

The Food Stamp Act of 1964 was amended on November 13, 1969, to provide appropriation authority of \$610 million for fiscal year 1970. With this increased funding purchase requirements were reduced so that a family is required to pay no more than one-third of its income for food stamps and receives a total food coupon allotment equal to the cost of the USDA economy food plan. As a result of this modification, June 1970 participation climbed to 6.5 million persons in 1,747 areas within 45 States and the District of Columbia. Participation continues to increase, reaching 8.8 million people in October 1970. During the year, priority was also given to areas without a family food-aid program. As of November 1970, only 10 areas in five States did not have plans for a food assistance program.

The following table reflects coverage, participation, and costs for the first full year of operation of the pilot program and 1970 (dollars in millions):

The child nutrition programs have been greatly strengthened and expanded by Public Law 91-248, which became law on May 14, 1970. This law clearly establishes that priority shall be given to reaching needy children, and provides for the establishment of a national minimum eligibility standard for free and reduced price meals and a maximum price which may be charged for these meals. The new law emphasizes that access to the school lunch program shall be available to children in all schools. Nutritional training as related to workers, cooperators and participants is authorized by the new act.

1. *Cash payments to States.*—The programs are operated under an agreement entered into by the State educational agency and the Department. Funds are advanced under letters of credit to State agencies for use in reimbursing participating schools and child-care institutions. Sponsors make application to the State agency and if accepted are reimbursed in accordance with the terms of their agreement.

(a) *School lunch program.*—Assistance in the form of both funds and food is provided to the States, as defined in the National School Lunch Act, for serving lunches to schoolchildren. Each State's portion of the section 4 general assistance funds available is determined by a statutory formula. The formula takes into account the participation rate in the State, and the relationship between the per capita income of the State and the average

General and special funds—Continued

CHILD NUTRITION PROGRAMS—Continued

U.S. per capita income. States must match the Federal cash grant from sources within the State at a 3-to-1 ratio. For States with below-average per capita income, this ratio is decreased. In 1970, sources within the States contributed to this program \$1,664 million, most of which came from children's payments. In 1972 the States are required to provide at least 4% of the matching requirement from State revenues.

The program during the peak month in fiscal year 1970 provided lunches daily to about 44% of the approximately 47.5 million children in daily attendance. The number of lunches served increased approximately 6.7% over fiscal 1969. Participation in the program in December 1969 reached a daily average of about 20.9 million children in 76,563 schools and a large increase is expected in 1971.

(b) *Special assistance.*—Under the new legislation, special cash assistance may be provided to any school which has needy children in attendance. The statutory formula for apportionment of funds to States relates to children from families with incomes of less than \$4 thousand per year. Increased funding provides a Federal average cash reimbursement rate of 30¢ per free or reduced price meal, in addition to the average of 5¢ per meal from section 4 funds. In fiscal year 1970, a daily average of approximately 4.1 million children were served 736.5 million free or reduced price lunches. At the end of the 1969-70 school year over 5 million children were receiving free or reduced price lunches. Based on these average reimbursement rates, the increases for fiscal 1971 should provide lunches for a daily average of 6.6 million needy children this school year.

(c) *School breakfast program.*—The Child Nutrition Act of 1966 authorized a school breakfast program for 2 years on a pilot basis to assist States through grants-in-aid and other means to initiate, maintain, or expand nonprofit breakfast programs in schools. Public Law 90-302, approved May 8, 1968, extended the breakfast program through 1971.

Funds are apportioned to States by a statutory formula. While the basic payments are limited to food assistance, in circumstances of severe need, financial assistance may be authorized up to 80% of the need for additional assistance.

The program is operated in schools drawing attendance from areas in which poor economic conditions exist and where a substantial portion of the children enrolled travel long distances. In fiscal year 1970, approximately 384,000 children were served 69.1 million breakfasts in 4,377 schools. About 73.5% of the breakfasts were served free or at token charges to children. In fiscal year 1971 it is estimated that a daily average of 555,000 children will participate.

(d) *Nonfood assistance program.*—The Child Nutrition Act of 1966 authorized a permanent program to assist the States through grants-in-aid and other means to supply schools in low-income areas with food service equipment, other than land or buildings. Under the Public Law 91-248 amendments, 50% of the funds for equipment assistance will be apportioned among the States on the same basis as the section 4 apportionment, with the remaining funds apportioned on the basis of children enrolled in schools without a food service.

Applicant schools are required to justify their need for assistance on a project basis and submit a detailed description of the equipment to be acquired, including their proposals for its use in meeting the nutritional needs of children. In addition, State and local sources must bear 25% of the cost of equipment or facilities financed under this authority.

In fiscal year 1970 a total of 8,116 schools with an attendance of over 4.2 million students received equipment assistance of about \$16,673 thousand. This money included special section 32 funds, and provided assistance in all States, the District of Columbia, Guam, Puerto Rico, and American Samoa.

(e) *State administrative expenses.*—The Child Nutrition Act of 1966 provides for advances to each State educational agency for administrative expenses. These funds are used for supervising and giving technical assistance to the local school districts and service institutions for additional activities undertaken by them to reach more children under the school lunch, special assistance, school breakfast, non-food assistance, and nonschool food programs.

(f) *Nonschool food program.*—The National School Lunch Act was amended in 1968 to authorize a pilot program for 3 years to assist States to initiate, maintain, or expand nonprofit food service programs for children in service institutions where children are not maintained in residence. Preschool children receive year-round assistance in child day-care centers. These programs also reach school-age children from areas of economic need and from areas with a high concentration of working mothers, during the summer months in settlement houses, neighborhood houses, and recreation centers.

Each State may receive a basic grant of \$50 thousand. The remaining funds are apportioned by a formula determined by the ratio of the number of children (aged 3 to 17 inclusive) from families with income under \$3 thousand per year in each State, to the total number of such children in all States. Up to 80% of the total cost of meals served may be paid in cases of severe need, and not more than 75% of the equipment costs may be paid to the institutions. All meals served must meet minimum nutritional standards as a condition for receiving assistance.

In fiscal year 1970, 50.2 million meals were served to approximately 229,900 children in the 1969 summer program and to 91,600 children on a year-round basis. At an average cost of about 40¢ per child per day, it is estimated that this program will reach about 500,000 children in fiscal year 1971. With each child receiving an average of two meals per day, it is expected that about 100 million meals will be consumed.

2. *Commodity procurement.*—Commodity procurement under section 6 of the National School Lunch Act provides additional commodities to schools to supplement foods purchased locally or otherwise made available for the lunch program. As amended by Public Law 91-248, these commodities may also be used to supplement the school breakfast and nonschool food programs. Section 6 procurement helps to insure nutritionally adequate meals and appreciation for quality foods. It also broadens agricultural markets. Commodities are purchased by the Department on the basis of their nutritional value and acceptability to schools and service institutions.

Protein items of chicken and meat accounted for about two-thirds of the purchases in fiscal year 1970. The remaining one-third consisted of fruits and vegetables. In

fiscal year 1971 frozen ground beef, chicken, and fruits and vegetables are being purchased.

Commodities acquired under price support and surplus removal programs are also available to schools and child-care institutions. The volume of surplus commodities distributed depends upon market conditions.

During 1970 over \$1,259 million worth of agricultural commodities and other foods were used. About 21% of this amount represented commodities contributed under section 6 and the Federal surplus removal and price support programs. Over 79% was purchased through local suppliers.

3. *Nutritional training and surveys.*—Up to 1% of the total funds available may be used for nutritional training and for studies and surveys of food service requirements, as provided for in Public Law 91-248. In the first year of operation—fiscal year 1971—concentration is being placed on surveys and training of managerial workers at the supervisory, school system and local levels to assure effective delivery of nutritionally adequate meals to children.

4. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools and child-care institutions. Policies, procedures, and standards are developed for administering the programs and determining eligibility. The programs are administered directly in private schools where the State educational agency is prohibited by law from disbursing funds and in child-care institutions where no State agency has assumed the responsibility for administering the program.

Participation in the programs from 1969 through 1972 is as follows:

The Foreign Agricultural Service helps American agriculture to maintain and expand foreign markets for its products and reports foreign developments as a guide to American agricultural production, policies, and programs.

The Service helps to develop foreign markets for U.S. farm products through effective market promotion under special export programs and through continuous efforts to remove international trade barriers that inhibit export sales.

It also maintains a worldwide agricultural intelligence and reporting service that enables American agriculture to carry out its production, policies, and programs in the context of world developments. Pertinent agricultural

and economic data of foreign production and markets, and information on foreign agricultural policies are continuously analyzed and reported.

1. *International trade.*—The Service directs and coordinates Department responsibilities in international trade agreement programs and negotiations, under the authority of the Trade Expansion Act. It identifies and strives to reduce foreign trade barriers to U.S. agricultural exports. Developments in foreign trade policies are examined and their effect on agricultural trade and operations are reported with recommendations as to courses of action.

The Service recommends Department positions and participates in negotiations on trade agreements and international commodity agreements. It reviews and reports trade regulations of countries (primarily those signatory to the General Agreement on Tariffs and Trade) as to how such regulations affect the movement of U.S. farm products in world trade.

The Service administers a program of import controls, in accordance with section 22 of the Agricultural Adjustment Act, on foreign farm products which would render ineffective or materially interfere with Department programs relating to agricultural commodities. It is also responsible for administering import controls established under the 1964 Meat Import Act and section 204 of the Trade Expansion Act.

2. *Agricultural attachés.*—The Service maintains agricultural attachés at 61 foreign posts to assist in the development of markets abroad for U.S. agricultural commodities. They work closely with numerous U.S. agricultural trade groups and maintain contacts with foreign governments to promote greater market accessibility for U.S. farm products. They carry out a comprehensive schedule of reporting foreign agricultural production, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

3. *Market development.*—The Service administers programs concerned with the development of foreign markets for agricultural products of the United States, and coordinates interagency participation and action essential to administration of these programs. These functions involve: (a) Developing a system of worldwide promotional programs, on a commodity-by-commodity basis, in cooperation with national organizations of producers, processors, and exporters, and providing overall guidance to these organizations in carrying out cooperative programs; (b) developing, operating, and evaluating a worldwide system of multicommodity promotional programs utilizing trade fairs, trade centers and point-of-purchase campaigns to expand overseas markets; (c) reviewing foreign marketing plans; providing technical assistance in their design; developing procedures and controlling budgets and funds essential to their implementation; and evaluating programs implemented; (d) cooperating with State and local organizations in programs designed to provide technical assistance to U.S. agricultural export firms and to stimulate participation of new U.S. "cooperator" groups in promotional projects; (e) developing and guiding a systematic review of foreign markets on a country-by-country basis to find new market opportunities for U.S. agricultural products and to develop long-range promotional plans for such markets; and (f) exploring new methods and techniques to stimulate the flow of U.S. farm products into overseas markets.

4. *Commodity programs.*—Information essential to domestic planning and to foreign marketing of specific U.S. farm commodities is obtained, analyzed, and made

available to U.S. farm and trade groups and to Government. Foreign agricultural competition is analyzed and reported. Marketing programs, in which producers, exporters, and Government officials participate, are developed to maintain and expand the foreign market for U.S. farm products. Assistance is given to U.S. trade representatives in negotiations with foreign officials. Assistance is given to American exporters and foreign importers to bring them together under conditions favorable to trade.

Foreign currencies generated by the sale of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, as well as foreign currencies acquired by the United States from other sources, and declared to be excess to the normal requirements of the United States by the Treasury Department are used to develop new foreign markets and expand existing markets for U.S. agricultural commodities. The commodities include cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco.

The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In 1972, it is planned that the unobligated balance brought forward in this appropriation will be used to purchase those currencies necessary to carry on the program. Dollar funds for use in other countries are included in the appropriation Salaries and expenses.

¹ The figures in this column reflect only CCC funds which were transferred to and expended by the Export Marketing Service.

The Service was established on March 28, 1969, pursuant to the authority of 5 U.S.C. 301 and the Reorganization Plan No. 2 of 1953. The programs of the Service were formerly performed by the Foreign Agricultural Service and the Agricultural Stabilization and Conservation Service.

The major objective of the Service is to promote and assist in the expansion of export sales of U.S.-produced farm products. This is accomplished through a series of programs and activities described in the three major categories below, and through continuing cooperation with other U.S. Government agencies, foreign governments, export trade firms, banks, and ocean chartering agencies.

1. *Commodity exports.*—The Service administers programs to facilitate and expand the commercial export sales of privately owned and Commodity Credit Corporation (CCC) owned agricultural commodities, and develops related pricing policies. The Service also carries out the domestic operations to implement the Wheat Trade Convention of the International Grains Arrangement, including the fixing of payment rates and certificate costs for export marketing certificates. These programs are authorized by the CCC Charter Act, and the Agricultural Acts of 1949 and 1970, as amended.

2. *Exports under Public Law 480 and the CCC export credit sales program.*—The Service conducts programs which facilitate the sale of agricultural commodities for dollars on credit terms or for foreign currencies. In addition, large quantities of these commodities are donated to foreign governments and intergovernmental and voluntary agencies in over 100 countries. These programs are authorized by titles I and II of the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480). The Service also conducts a program to finance the commercial export credit sales of agricultural commodities.

3. *Barter program.*—The Service conducts, under the CCC Charter Act and the Agricultural Trade Development and Assistance Act of 1954, barter transactions which use agricultural exports to generate the funds to pay for goods and services which U.S. Government agencies would otherwise buy abroad with dollars. Exports are restricted to areas where they will help maintain or increase the U.S. share of markets, thereby benefiting the balance of payments. In exceptional circumstances, barter may also be used to procure strategic materials for the national and supplemental stockpiles. Other than in stockpile barter, the agricultural commodities may be from private stocks or from those acquired by CCC in its price support operations. Present stockpile barter activity is limited to deliveries under uncompleted contracts. No new contracts for strategic materials have been made since fiscal year 1968 and none are planned.

Funds for the operation of the Service are provided from the limitation on amounts available for administrative expenses of the CCC.

The Service administers the Department's responsibilities in the agricultural phases of the U.S. foreign development assistance programs. This includes direction of the Department's activities under agreement with the Agency for International Development (AID), particularly agricultural technical assistance and training programs. The Service participates with AID in the planning of agricultural development policy, in the formulation of self-help agreements with food-aid nations, and in the review and evaluation of agricultural assistance efforts. In performing these functions, the Service works closely

with other U.S. and international organizations to help them utilize the scientific and institutional competence of American agriculture in carrying out development assistance programs. The Service is financed with funds allocated from AID.

The major objectives of the Commodity Exchange Authority, in the enforcement of the Commodity Exchange Act, are to protect the price and hedging services of the commodity futures markets. These services are widely used by farmers, merchandisers, and processors. To carry out its enforcement objectives, the Commodity Exchange Authority works to maintain fair trading practices and competitive pricing on commodity exchanges, and to prevent price manipulation, cheating, fraud, and abusive acts and practices in commodity transactions. Enforcement of the act includes supervision of 20 commodity exchanges designated as contract markets, approximately 350 brokerage firms registered as futures commission merchants, and about 1,100 registered floor brokers operating on the exchanges.

The highlight of fiscal 1970 was the new record set in volume of regulated futures trading, up 20% from the previous year. An estimated 10.3 million futures transactions (one side only) were made in fiscal 1970, with a value of \$92.9 billion, compared with 8.6 million transactions, valued at \$67.5 billion a year earlier. A large part of the increased trading activity was in the soybean complex commodities (beans, oil, meal). More than one-fourth of the 23 regulated commodities in fiscal 1970 had record volumes of trading:

Commodity	Unit	1969-70	Previous record	Year
Frozen pork bellies.....	Contracts.....	2,287,292	1,670,102	1968-69
Live beef cattle.....	do.....	860,858	624,922	1968-69
Live hogs.....	do.....	119,716	12,834	1968-69
Soybean oil.....	do.....	1,672,031	587,305	1965-66
Soybean meal.....	do.....	717,604	423,178	1966-67
Shell eggs.....	do.....	629,477	489,645	1960-61

The above commodities, plus soybeans, shouldered the major increase in volume of trading in fiscal 1970. Most other commodities, although showing decreases from the previous year, continued with high-level trading volume in 1969-70.

1. *Registration and auditing of brokerage houses.*—This consists of (a) protection of customers' funds through the establishment and enforcement of minimum financial standards for futures commission merchants and periodic

audits of their books and records, and (b) annual registration of futures commission merchants and floor brokers.

REGISTRATIONS AND AUDITS

	1970 actual	1971 estimate	1972 estimate
Audit of customers' segregated funds.....	289	325	340
Accounts examined.....	21,576	25,000	26,000
Financial statements examined.....	234	300	300
Financial requirements audits.....	89	100	100
Futures commission merchants registered.....	369	350	350
Floor brokers registered.....	1,088	1,100	1,200

2. *Supervision of futures trading.*—This activity develops information and economic evidence for the prevention of price manipulation and market corners, controls excessive speculation by enforcement of limits on trading and positions, detects false and misleading market information affecting prices, and disseminates reports and statistics on trading and special futures market situations.

REPORTS TABULATED AND ANALYZED

	1970 actual	1971 estimate	1972 estimate
Daily trading volume and open contracts.....	210,300	248,000	266,000
Daily and weekly reports of large traders.....	457,900	523,000	561,000
Delivery notices.....	72,900	79,000	84,000

3. *Investigations.*—Apparent or alleged violations of the law and regulations are investigated, and trade practice surveys are made to discover violations. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings. Investigations are made to determine whether exchanges are enforcing their trading rules and contract terms as required by the act.

INVESTIGATIONS AND PROCEEDINGS

91.20	Outlays from civilian pay act supplemental		6,610	295

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of direct appropriation, transfers from the Commodity Credit Corporation (CCC), and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of National, Commodity, State and county offices.

The Commodity offices and the data processing centers in Kansas City and New Orleans play an important role in administering price support programs and the field operations stemming from producer loan and purchase agreements, inventory management, and merchandising activities.

The State committees are in general administrative charge of all programs carried out in their respective States. Within the framework of national policy, they determine the policies to be followed and direct the adaptation of national programs to the State.

The Agricultural Stabilization and Conservation county committees are responsible for the local administration of programs. They carry out all functions dealing directly with farmers. The elected county committee is in charge of the county office.

The programs and activities carried out by this Service include: Rural environmental assistance program (formerly the Agricultural conservation program); Appalachian Region conservation program; acreage allotment and marketing quota programs; Sugar Act program; conservation reserve program; wheat and feed grain diversion programs; cropland conversion program; cropland adjustment program; dairy and beekeeper indemnity payment program; Wool Act program; bin storage program; and price support and related programs.

The activities carried out by the Service fall within three major categories:

1. *Program formulation and appraisal.*—The supply adjustment, conservation, and price support programs, and the management and merchandising of commodities acquired under the price support program, have a tremendous impact on the national and, to a lesser extent, the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate even more effective programs.

2. *Operation of supply adjustment, conservation, and price support programs.*—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments; (e) establishing pro-

General and special funds—Continued

EXPENSES, AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE—Continued

portionate shares for sugar farms when necessary; (f) notifying producers of allotments, proportionate shares, productivity indexes, and payment rates; (g) determining farm marketing allocations; (h) handling appeals; (i) determining county normal yields; (j) conducting referendums and certifying results; (k) checking compliance with acreage allotments and use of diverted acres; (l) developing pooling agreements under which several farmers work jointly to solve a common conservation problem which cannot be solved by individual action; (m) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (n) processing producer requests for conservation cost-sharing; and (o) processing commodity loan documents and issuing sight drafts.

3. *Inventory management and merchandising.*—This activity includes: (a) overall management of CCC-owned commodities; (b) selling commodities; (c) donating commodities; and (d) accounting for loans and commodities. The value of the commodities owned by CCC on June 30, 1970, was about \$1,860 million.

The volume of work in fiscal year 1970 under some of the major programs financed from this account is set forth below:

Acreage allotments and marketing quotas (allotments):	
Tobacco.....	533, 169
Peanuts.....	102, 520
Cotton.....	598, 014
Rice.....	17, 161
Agricultural conservation program:	
Requests for cost-sharing.....	1, 736, 865
Conservation materials and services orders.....	916, 760
Applications for payment.....	1, 200, 600

The objectives are to provide consumers with adequate supplies of sugar at reasonable prices, to protect the welfare of the domestic sugar industry, and to promote the export trade of the United States. Total U.S. requirements and quotas are determined each year. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing. Restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

Payments are made which supplement the income of domestic producers of cane and beets. Payments require compliance with specified conditions of employment, production, and price. Payments are also made for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

The increase of \$2.4 million proposed for 1972 is required to provide necessary funds to complete payments on the 1970 crop, and to make payments on the 1971 crop to all eligible producers in the fiscal year 1972.

Tax collections from imports of sugar exceed total obligations by \$630.4 million for fiscal years 1938 through 1970.

The principal outputs are:

PRODUCTION, THOUSANDS OF SHORT TONS, RAW VALUE

Area	Crop year

For approximately 35 years, the Agricultural Conservation Program has encouraged conservation by sharing with farmers, ranchers, and woodland owners the cost of carrying out approved soil-building and soil and water-conserving practices, including wildlife-conserving measures. However, in recognition of the changes in economic and conservation problems which have occurred, the program has been renamed the Rural Environmental Assistance Program.

The modified program is focusing on demonstration of good environmental enhancement practices and preservation of the environment. Some of the measures offered include those designed to establish permanent protective cover, improve and protect established vegetative cover, enhance wildlife resources, and reduce or control agriculture-related pollution.

The following and other practices were installed under the 1969 Agricultural Conservation Program on nearly a million farms:

[In thousands]

Constructing water storage reservoirs.....	structures.....	45
Constructing terraces.....	acres.....	615
Establishing stripcropping systems.....	do.....	294
Establishing permanent sod waterways.....	do.....	37
Establishing or improving enduring vegetative cover.....	do.....	9,005
Controlling competitive shrubs on range or pasture.....	do.....	1,912
Planting trees and shrubs.....	do.....	147
Improving stands of forest trees.....	do.....	154

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the Agricultural Stabilization and Conservation State committees to counties. The county committees approve conservation practice cost-sharing for eligible persons.

Loans from Commodity Credit Corporation are used to make advance payments to vendors. These payments are for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

Amounts repaid or estimated to be repaid on the Commodity Credit Corporation loans are:

[In thousands of dollars]

	1970 actual	1971 estimate	1972 estimate	Total
Loan repayment.....	30,000	27,200	27,200	84,400
Interest.....	29	25	25	79

A level of \$140 million for the 1972 program is proposed, excluding administrative expenses. Payments for the 1972 program will be made principally from the 1973 appropriation.

WATER BANK ACT PROGRAM

For necessary expenses to carry into effect the provisions of the Water Bank Act (Public Law 91-559), \$10,000,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code 05-44-3320-0-1-351	1970 actual	1971 est.	1972 est.
Program by activities:			
10 Cost sharing and technical assistance (costs—obligations) (object class 41.0).....			10,000
Financing:			
40 Budget authority (appropriation).....			10,000
Relation of obligations to outlays:			
71 Obligations incurred, net.....			10,000
90 Outlays.....			10,000

The purposes of this program are to preserve, restore, and improve the wetlands of the Nation, and thereby to conserve surface waters, to preserve and improve habitat for migratory waterfowl and other wildlife resources, to reduce runoff, soil and wind erosion, and contribute to flood control, to contribute to improved water quality and reduce stream sedimentation, to contribute to improved subsurface moisture, to reduce acres of new land coming into production and to retire lands now in agricultural production, to enhance the beauty of the landscape, and to promote comprehensive water management planning.

The Secretary of Agriculture will enter into agreements with landowners and operators for the conservation of specified wetlands. The agreements will be for 10 years with provision for renewal for additional periods. During the period of the agreement the landowner agrees not to drain, burn, fill, or otherwise destroy the wetland character of such areas, nor to use such areas for agricultural purposes, as determined by the Secretary. The Secretary will make annual payments to the owner or operator at a rate to be determined. The rate of annual payment may be increased if the owner or operator agrees to permit, without other compensation, access by the general public for hunting, trapping, fishing, and hiking. The Secretary may also share the cost of establishing and maintaining conservation and development practices on the wetlands and adjacent areas.

The Secretary will carry out the program in harmony with wetlands programs administered by the Secretary of the Interior and will utilize the technical and related services of appropriate State, Federal, and private conservation agencies to assure proper coordination.

CROPLAND ADJUSTMENT PROGRAM

For necessary expenses to carry into effect a cropland adjustment program as authorized by the Food and Agriculture Act of 1965 (7 U.S.C. 1838), \$77,800,000, \$69,800,000. (Department of Agriculture and Related Agencies Appropriation Act, 1971.)

Program and Financing (in thousands of dollars)			
Identification code 05-44-3335-0-1-351	1970 actual	1971 est.	1972 est.
Program by activities:			
10 Adjustment, cost-sharing and technical assistance (program costs, funded—obligations) (object class 41.0)-----	77,200	77,800	69,800
Financing:			
Budget authority-----	77,200	77,800	69,800
Budget authority:			
40 Appropriation-----	78,600	77,800	69,800
41 Transferred to other accounts-----	-1,400	-----	-----
43 Appropriation (adjusted)-----	77,200	77,800	69,800

74 Obligated balance, end of year-----	-5,788	-6,438	-6,258
90 Outlays-----	77,372	77,150	69,980

The Cropland adjustment program was authorized by the Food and Agriculture Act of 1965 which expires with the 1970 crop year. This program assists farmers, through long-term agreements, to divert cropland from the production of certain crops to more needed uses that will promote the development and conservation of our soil, water, forest, wildlife, and recreational resources. The period of an agreement cannot be less than 5 years nor more than 10 years. The program also helps farmers establish, protect, and conserve open spaces and natural beauty, and prevent air and water pollution.

In return for diverting the cropland to approved public benefit uses, producers receive adjustment payments. They also are eligible to receive cost-sharing assistance for establishing approved land treatment measures. Additional incentive payments are made to producers who enter into agreements to permit free public access to land designated under the Cropland adjustment program agreement, for hunting, trapping, fishing, and hiking.

Under the Greenspan provisions of the program, funds may also be made available to Federal, State, or local governmental agencies for use in acquiring cropland to be permanently converted to specified public uses, and cost-shares may be paid to such agencies for establishing approved land treatment measures consistent with the conditions and costs under agreements entered into with producers.

Cropland adjustment programs were approved for 1966 and 1967.

CONSERVATION RESERVE PROGRAM

Program and Financing (in thousands of dollars)

74 Obligated balance, end of year-----	-1,165	-238	-149
90 Outlays-----	38,620	927	89

This program, initiated in 1956, has two objectives. One is to bring total cropland more nearly in line with demand by withdrawing cropland from production. The other is to establish and maintain sound conservation practices on the land withdrawn. The Secretary was authorized, through calendar year 1960, to enter into 3- to 15-year contracts with producers. For removing designated cropland from production and for establishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period. He also receives cost-sharing assistance for the establishment of required practices. Total annual rental payments to a producer are limited to \$5 thousand.

Participation in the program is summarized below:

Number of contracts, 1970 program-----	1,957
Number of acres, 1970 program-----	74,989
Payments made in program year 1969-----	\$38,620,111
Estimated payments to be made in program year 1970-----	\$927,124

EMERGENCY CONSERVATION MEASURES

For emergency conservation measures, to be used for the same purposes and subject to the same conditions as funds appropriated under this head in the Third Supplemental Appropriation Act, 1957, to remain available until expended, \$5,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated for emergency conservation measures. (71 Stat. 176; Department of Agriculture and Related Agencies Appropriation Act, 1971.)

Program and Financing (in thousands of dollars)

Identification code 05-44-3316-0-1-354	1970 actual	1971 est.	1972 est.

90 Outlays-----	8,304	7,500	7,500

¹ Selected resources as of June 30 are as follows: Advances, 1969, \$12,099 thousand (1970 adjustments, \$4,918 thousand); 1970, \$6,104 thousand (1971 adjustments, \$5,250 thousand); 1971, \$1,354 thousand (1972 adjustments, \$3,000 thousand); 1972, \$0.

This appropriation provides special funds for sharing the cost of emergency conservation measures to deal with cases of severe damage to farm and rangelands resulting from natural disasters. The criteria under which assistance may be made available are set forth in the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590(h)).

Funds are allocated for use only in those counties designated by the Secretary of Agriculture as disaster counties. Assistance is made available to treat new conservation problems which: (1) if not treated will impair

General and special funds—Continued

EMERGENCY CONSERVATION MEASURES—Continued

or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Under the 1970 program cost-sharing assistance is being provided to treat farmlands damaged by drought, flood, tornado, winds, hurricane, and icing. As of August 31, 1970, there were 190 counties in 28 States where assistance was being provided.

Major disaster assistance is also made available on a reimbursable basis for the Office of Emergency Preparedness relating to debris removal pursuant to the provisions of Public Law 91-79.

DAIRY AND BEEKEEPER INDEMNITY [PAYMENTS TO DAIRY FARMERS] PROGRAMS

For necessary expenses involved in making payments to dairy farmers and manufacturers of dairy products who have been directed to remove their milk or milk products from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government, [\$250,000] and to beekeepers who through no fault of their own have suffered losses as a result of the use of economic poisons which had been registered and approved for use by the Federal Government, \$5,500,000, to remain available until expended: Provided, That none of the funds contained in this Act shall be used to make indemnity payments to any farmer whose milk was removed from commercial markets as a result of his willful failure to follow procedures prescribed by the Federal Government. (Public Law 91-524; Department of Agriculture and Related Agencies Appropriation Act, 1971.)

[For an additional amount for "Indemnity Payments to Dairy Farmers", in accordance with subsections (a) and (b) of section 204 of the Agriculture Act of 1970, which qualifies processors for indemnity payments under certain conditions, \$300,000.] (Supplemental Appropriations Act, 1971.)

Program and Financing (in thousands of dollars)

74 Obligated balance, end of year	-115	-165	-165
90 Outlays	126	500	5,500

Under this program the Department makes indemnification payments to dairy farmers, manufacturers of dairy products, and beekeepers.

This program began in 1964 and was limited (until the passage of the Agricultural Act of 1970) to payments to dairy farmers, who were directed to remove their milk from commercial markets because it contained residues of

chemicals registered and approved for use by the Federal Government.

The Agricultural Act of 1970 authorized indemnification payments, beginning with the date of its enactment, to manufacturers of dairy products who have been directed to remove their products because it contained residues of chemicals registered and approved for use by the Federal Government.

The Agricultural Act of 1970 also authorized payments to beekeepers who, through no fault of their own, have suffered losses of honey bees after January 1, 1967, as a result of utilization of economic poisons near or adjacent to the property on which the beehives of such beekeepers were located.

Indemnification to dairy farmer claims for the period January 1, 1964, through June 30, 1970, amounted to \$1,283,451.

Proposed for separate transmittal, existing legislation:

DAIRY AND BEEKEEPER INDEMNITY PROGRAMS

Program and Financing (in thousands of dollars)

Identification code 05-44-3314-1-1-351	1970 actual	1971 est.	1972 est.
Program by activities:			
10 Indemnity payments to beekeepers (costs—obligations) (object class 41.0)	-----	3,500	-----
Financing:			
40 Budget authority (proposed supplemental appropriation)	-----	3,500	-----
Relation of obligations to outlays:			
71 Obligations incurred, net	-----	3,500	-----
90 Outlays	-----	3,500	-----

The Agriculture Act of 1970 authorized indemnification payments to beekeepers under the conditions indicated above. It is currently anticipated that \$3.5 million will be needed for these payments in 1971.

CROPLAND CONVERSION PROGRAM

Program and Financing (in thousands of dollars)

Identification code 05-44-3333-0-1-351	1970 actual	1971 est.	1972 est.
Relation of obligations to outlays:			
71 Obligations incurred, net	-----	-----	-----
72 Obligated balance, start of year	3,815	1,539	1,339
74 Obligated balance, end of year	-1,539	-1,339	-1,189
90 Outlays	2,276	200	150

Long-range agreements were approved with farmers and ranchers from 1963 to 1967 to make changes from their past cropping systems and land uses to other income-producing, public benefit uses.

The agreements, not to exceed 10 years, provide for payments, the furnishing of materials and services, and other assistance to farmers. In return, farmers change the land-use and install and maintain conservation practices. Adjustment payments were authorized to be made either upon approval of the agreement or on an annual installment basis. Land treatment practice payments are made after the practice is installed.

The law placed a limit of \$10 million on payments made in a calendar year under signed agreements.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allotments and allocations from other accounts are included in the schedules of the parent appropriation as follows:

- Agriculture:
 - Soil Conservation Service, "Great Plains Conservation Program."
 - Funds appropriated to the President:
 - "Revolving fund, Defense Production Act."
 - Appalachian Region Commission, "Appalachian Region Conservation Program."

COMMODITY CREDIT CORPORATION

Federal Funds

General and special funds:

REIMBURSEMENT FOR NET REALIZED LOSSES

To reimburse the Commodity Credit Corporation for net realized losses sustained in prior years but not previously reimbursed, pursuant to the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12), in the following amounts: fiscal year 1968, \$249,998,669; fiscal

year 1969, \$3,113,156,331; in total, \$3,363,155,000. *Provided*, That no funds appropriated by this Act shall be used to formulate or administer programs for the sale of agricultural commodities pursuant to title I of Public Law 480, 83d Congress, as amended, to any nation which sells or furnishes or which permits ships or aircraft under its registry to transport to North Vietnam any equipment, materials or commodities, so long as North Vietnam is governed by a Communist regime. (*Department of Agriculture and Related Agencies Appropriation Act, 1971.*)

² Statutory obligations against borrowing authority include only borrowing from, or with the approval of Treasury. A sufficient amount of CCC's borrowing authority is required to be reserved to cover obligations to purchase notes, certificates of interest, or other obligations evidencing loans held by banks and accrued interest thereon, but such obligations, other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowing from Treasury. Only that portion of the borrowing authority is available which has neither been so reserved nor charged by actual borrowings.

The Corporation was created to stabilize, support, and protect farm income and prices, help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers, and help in their orderly distribution (15 U.S.C. 714-714p). It may also make available materials and facilities required in connection with the production and marketing of agricultural commodities. In addition to its basic functions, it is used to administer and, in some cases, temporarily finance numerous special activities.

The Corporation's capital stock of \$100 million is held by the United States. Up to \$14.5 billion may be borrowed to finance operations.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1971 and 1972 budget estimates: (a) Employment, production, and national income will rise both in 1971 and 1972 from the present level; (b) generally, exports of agricultural commodities in 1972 will increase over 1971 levels; (c) yields for the 1971 crops are based on recent averages adjusted for trend; (d) acreage allotments and marketing quotas will be in effect for the 1971 crops of peanuts, rice, and certain kinds of tobacco (flue-cured tobacco will be on an acreage-poundage program); and (e) special programs for cotton, feed grains, and wheat will be in operation.

It is difficult to forecast with accuracy, requirements for the year ending June 30, 1972. Complex and unpredictable factors are involved, such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

PROGRAMS OF THE CORPORATION

The basic functions of the Corporation include the following programs for which appropriations are made for net realized losses sustained (in thousands of dollars):

Program	1972 estimate		
	Gross obligations	Outlays	Net realized loss for year
Price support payments.....	1,838,000	1,838,000	1,838,000
Wheat certificates issued (535 million bushels).....	898,000	395,900	395,900
Commodity export payments.....	116,863	116,863	116,863
Short-term export credit sales.....	311,826	67,973	-----
Other price support and related.....	3,137,609	431,537	602,449
Storage facilities.....	74,000	13,800	-----
Supply.....	150	-80	-30
Feed grain set-aside (17 million acres).....	-----	-----	-----
Wheat set-aside (13 million acres).....	-----	-----	-----
Cotton set-aside (small farms).....	5,000	5,000	5,000
Other items not distributed by program.....	498,769	755,435	414,617
Total.....	6,880,217	3,624,428	3,372,799

Price support.—The Corporation, through loans, purchases, payments, and other means, supports the prices of

agricultural commodities to producers. This is done mainly under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.) and the Agricultural Act of 1949, as amended by the Agricultural Act of 1970, Public Law 91-524 (7 U.S.C. 1421 et seq.).

The 1949 act makes price support mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. It also requires support of the following nonbasic commodities: Tung nuts, honey, milk, barley, oats, rye, and grain sorghums. The National Wool Act of 1954, as amended (7 U.S.C. 1781-1787), requires price support for wool and mohair. Price support for other nonbasic commodities is discretionary. The price support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing price support are loans to and purchases from producers. With limited exceptions, price support loans are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may generally deliver or forfeit such collateral to satisfy his obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases for the removal of surpluses are made under certain laws, for example: The act of August 19, 1958, as amended (7 U.S.C. 1431 note), and section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431). For feed grains, in addition to loans and purchases, producers receive payments. For upland and extra-long staple cotton, producers receive payments in addition to loans. For wheat, in addition to loans and purchases, producers receive marketing certificates as hereinafter described. In the feed grains, wheat, and cotton programs, the producers must comply with acreage set-aside provisions (hereinafter described), if in effect, in order to be eligible for loans, purchases, payments, and certificates (in the case of wheat). Also, the total amount of payments which a person is entitled to receive under each of these three programs for the 1971, 1972, or 1973 crop of the commodity shall not exceed \$55 thousand.

In price support operations, normal trade facilities are used to the maximum extent practicable. Cooperatives and financial institutions are used in lending activities. Commercial facilities are used to a great extent for storage.

Besides the Charter Act and laws mentioned above, many other laws are applicable to the disposition through sales, donations, and barter of commodities acquired under the price-support program. For accounting purposes, the Corporation credits to the price-support program, proceeds of commodities sold from its price-support stocks, including those disposed of through redemption of domestic and export payment-in-kind certificates and through special activities.

Commodity export.—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments, and other operations. Other than in barter for stockpiling purposes, such commodities and products may be those held in private trade channels as well as those acquired by the Corporation in its price support operations. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and (f), and in accordance with specific statutes where applicable. Export sales for foreign currencies or on long-term credit are financed by the Corporation under the Agricultural Trade Development and Assistance Act of 1954, as amended, although such sales of commodities owned by the Corporation may also be made under its charter authority.

The activities described below are illustrative of those conducted under this program during 1971. With respect to barter, the emphasis is on exports in connection with various types of offshore procurement of materials and services needed by the Department of Defense, the Agency for International Development, and other agencies, for which they pay the Corporation. Barter for strategic and other materials for the supplemental stockpile is limited to deliveries from uncompleted contracts. No new contracts have been made since fiscal year 1968 and none are planned. Commodities available for barter vary from time to time.

When necessary to encourage export movement from free-market supplies, as well as from its own stocks, the Corporation makes payments on exports of agricultural commodities. The rate of payment generally is the difference between the prevailing world export sales price and the domestic market price.

To help develop or expand foreign markets, the Corporation may furnish farm commodities and products for samples or exhibits at international trade fairs and for use abroad in testing consumer acceptance and commercial market potentials.

To maximize exports of agricultural commodities, including products thereof, the Corporation conducts an export credit sales program under which it finances, for a period of not to exceed 3 years, commercial export credit sales by exporters of agricultural commodities obtained either from Corporation inventories or from private stocks. These commercial transactions are financed under the Corporation's charter authority and section 4 of the Food for Peace Act (7 U.S.C. 1707a) and are to be dis-

tinguished from the long-term credit contracts involving foreign assistance authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended. Section 4 of the Food for Peace Act authorizes appropriations to reimburse the Corporation annually for its actual costs incurred or to be incurred under this program.

Storage facilities.—The Corporation conducts a program to provide storage adequate to fulfill its program needs. This program is conducted pursuant to sections 4 (h) and (m), and 5 (a) and (b) of the charter.

The Corporation has authority to buy bins (in storage-short areas) and equipment for the care and storage of commodities owned by the Corporation or under its control. This authority to purchase bins has not been exercised since 1956. The Corporation has now reduced its storage capacity by more than 50%. The Corporation makes loans for the purchase, building, or expanding of facilities for storage and care of commodities on the farm and sells, to producers and others, bins needed for the storage of agricultural commodities. Bins sold by the Corporation may be those acquired for resale for such storage or those which are no longer required by the Corporation for the storage of its own commodities. Public Law 89-758 permits the sale of grain storage facilities no longer needed for such program use to public and private nonprofit agencies and organizations. The Corporation may also provide storage use guarantees to encourage building of commercial storage, and undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

Section 805 of the Agricultural Act of 1970 authorizes the Secretary to make or guarantee loans for construction of farm storage facilities for baled hay from diverted or set-aside acreage. This program would be conducted through the ASC county committees and be financed with capital funds of the Corporation.

Supply and foreign purchase.—The Corporation procures from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies. It similarly procures or aids in the procurement of such foods, commodities, products, and material for sale to meet domestic requirements during periods of short supply or during such other times as will stabilize prices or facilitate distribution. Through purchases, loans, sales or other means, the Corporation may also make available materials and facilities needed for the production and marketing of agricultural commodities. This program is conducted under section 5 (b) and (c) of the Commodity Credit Corporation Charter Act.

Purchases for other Federal agencies of commodities not in the Corporation's price-support stocks has been the main activity. Purchases of limited quantities of breeder, foundation, and registered seeds of improved varieties of grasses and legumes are made through production contracts in order to assure supplies thereof for farmers. No foreign purchases have been made in recent years.

Section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), requires that the Corporation be fully repaid from funds of such agencies for services performed, losses sustained, operating costs incurred, or commodities bought or delivered to or on behalf of any other Federal agency. Operations not subject to section 4 may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

Wheat certificate program.—The Agricultural Adjustment Act of 1938, as amended by the Agricultural Act of 1970,

authorizes a wheat certificate program for the 1971, 1972, and 1973 crops to be conducted by the Secretary through the Corporation. Domestic marketing certificates are to be issued to participating farmers which may be sold at face value to the Corporation. Processors of wheat are required to buy domestic certificates equivalent to the number of bushels of wheat used in the manufacture of food products. The Corporation is to sell certificates at a cost of 75¢ per bushel. While existing law provides for the acquisition of export marketing certificates by wheat exporters, the Agricultural Act of 1970 authorizes the Secretary to suspend this requirement for the period July 1, 1971 through June 30, 1974.

Set-aside programs.—The Agricultural Act of 1970 authorizes the Secretary to conduct, through the Corporation, set-aside programs on the 1971, 1972, and 1973 crops of wheat, feed grains, and upland cotton if he determines that otherwise the total supply of agricultural commodities will likely be excessive. If a set-aside is in effect for any such commodity, producers must, as a condition of eligibility for loans, purchases, payments, and certificates (in the case of wheat) on such commodity, set aside and devote to approved conservation uses specified acreages of cropland and otherwise comply with program requirements.

Land diversion payments.—To assist in adjusting the acreage of commodities to desirable goals, the Secretary is authorized by the Agricultural Act of 1970 to make land diversion payments, through the Corporation, to producers who devote to approved conservation uses acreages of cropland in addition to those required to be so devoted under the set-aside programs.

Cotton research and promotion.—Under section 601 of the Agricultural Act of 1970, the Corporation, through the Cotton Board, and upon approval of the Secretary, is authorized to enter into agreements for cotton market development, research, and sales promotion programs, programs to aid in the development of new and additional markets, marketing facilities, and uses for cotton and cotton products, and programs to facilitate the utilization and commercial application of cotton research findings. Each year, the amount available for such programs shall be the sum of amounts, not exceeding \$10 million, which are not paid to cotton producers because of statutory payment limitations. For each of the 1972 and 1973 crops, an additional amount, not exceeding \$10 million may be used by the Secretary for such programs from funds available for payments on 1972 and 1973 crop cotton.

Loan operations.—The following table reflects loan operations of the Corporation which apply to the preceding programs (in thousands of dollars):

Item	1970 actual	1971 estimate	1972 estimate

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL
WOOL ACT—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

Administrative expenses.—Administrative expenses are for the services of: The Agricultural Stabilization and Conservation Service, the Consumer and Marketing Service, the Export Marketing Service, the Foreign Agricultural Service and other agencies of the Department engaged in the Corporation's activities; the General Accounting Office for audit; and the General Services Administration for space. Estimates for 1972 include a limitation of \$38.5 million for costs of administration including a reserve of not less than 7% for contingencies.

The requested authorization excludes administrative expenses in connection with the wool and mohair program under the National Wool Act of 1954, as amended, which are included with the cost of this program under Special activities.

Nonadministrative expenses.—Expenses of acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Such expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal or State licensed inspectors; work performed on a contract or fee basis by Agricultural Stabilization and Conservation county committees; and special services performed by other Federal agencies outside of this Department.

Most of these general nonadministrative expenses, including storage and handling, transportation, inspection, classing, and grading and resale payments are included in program costs, in the entry entitled Storage, transportation, and other costs not included above, in the program and financing schedule. The item Nonadministrative expense, which appears in the schedule, covers county offices, other Agricultural and Stabilization Conservation Service expenses offset by revenue, custodian and agency expense of the Federal Reserve banks and lending agencies, and miscellaneous costs.

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 (7 U.S.C. 447-449) by the States from Corporation stocks to feed resident wildlife threatened with starvation, through the appropriation Reimbursement for net realized losses. The Corporation also obtains recovery through this appropriation for the funds transferred to the Agricultural Research Service pursuant to the Department of Agriculture and Related Agencies Appropriation Act of 1964, for cost of production research and other related research designed to reduce surplus commodities held by the Corporation.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows (in thousands of dollars):

Item	1972 estimate	
	Gross obligations	Outlays (reimbursable)
(1) Sale of agricultural commodities for foreign currencies.....		-201,000
(2) Sale of agricultural commodities for dollars on credit terms.....	911,611	817,611
(3) Commodities supplied in connection with dispositions abroad.....	345,000	345,000
(4) Bartered materials for supplemental stockpile.....		
(5) Military housing (barter and exchange).....		
(6) National Wool Act.....	67,008	67,008
(7) Grain for migratory waterfowl feed.....	40	
(8) Surplus grain for migratory birds.....		
(9) Grading and classing activities ¹		
(10) Research to increase domestic consumption of farm commodities ¹		
(11) Defense activities ¹		
(12) Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.....		
(13) Loans for agricultural conservation.....	27,200	
(14) Use of CCC facilities for ASCS programs:		
(A) Conservation reserve program ¹		
(B) Cropland conversion, rural environmental assistance, and emergency conservation measures programs ¹		
(C) Cropland adjustment program ¹		
(D) Appalachia regional conservation program ¹		
(E) Sugar program ¹		
(F) County office expenses ¹		
(15) Purchases of dairy products under sec. 709 of the Food and Agricultural Act of 1965.....		
Total.....	1,350,859	1,028,619

¹ Financial data included under respective appropriation item.

The Corporation receives appropriations or reimbursement for cost of these activities as described under each.

To the extent that sufficient appropriations are not provided in advance, expenditures under the Agricultural Trade Development and Assistance Act of 1954, as amended, and investments in materials transferred to the supplemental stockpile, are made by the Corporation subject to reimbursement from subsequent appropriations authorized for such purpose.

Activities currently being carried out are as follows (see foreign assistance programs and special export program for details of items (1)-(4)):

(1) *Sale of agricultural commodities for foreign currencies (title I, Public Law 480).*

(2) *Sale of agricultural commodities for dollars on credit terms (title I, Public Law 480).*

(3) *Commodities supplied in connection with dispositions abroad (title II, Public Law 480).*

(4) *Bartered materials for supplemental stockpile.*

(5) *Military housing (barter and exchange).*—During 1957, a contract was completed for the disposition of Corporation-owned commodities valued at \$50 million for the construction of military housing in France with foreign currencies obtained from this transaction. 10 U.S.C. 2681 as amended, provides for annual payment to the Corporation by the Department of Defense until liquidation of the amounts due for foreign currencies obtained under Public Law 480 for military housing. It is estimated that \$2 million will be applied against the amounts due under the French housing transaction in each year. Beginning in 1967, the Treasury Department has classified this as a nonexpenditure transaction.

(6) *National Wool Act.*—Under the National Wool Act of 1954, as amended by the Agricultural Act of 1970,

support of prices of wool and mohair is mandatory. The Corporation makes payments to producers in order to bring the national average price received by all producers up to the support price required under the act.

COST OF THE NATIONAL WOOL ACT

[Dollars in thousands]

Item	1970 actual	1971 estimate	1972 estimate
Volume of marketings:

¹ Deductions from producer payments for promotional advertising and selected marketing development activities.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual or estimated payments compared with this limitation are as follows (in thousands of dollars):

Item	1970 actual	1971 estimate	1972 estimate
70 percent of customs receipts on wool and wool manufactures, cumulative from Jan. 1, 1953, to end of preceding calendar year (estimate).....	1,318,506	1,425,606	1,532,706
Cumulative incentive payments on marketings to end of preceding calendar year.....	724,295	796,495	859,895
Balance of limitation available for payments in succeeding marketing years.....	594,211	629,111	672,811

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70% of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

Estimated costs and appropriations to the Corporation are indicated in the following table (in thousands of dollars):

Item	1970 actual	1971 estimate	1972 estimate
Due start of year.....	67,893	56,273	76,012
Cost for year:

Interest.....	1,249	1,362	1,158
Subtotal.....	56,273	76,012	67,008
Total due.....	124,166	132,285	143,020
Appropriations to Commodity Credit Corporation for the year.....	67,893	56,273	76,012
Appropriation 1971, 1972, and 1973.....	56,273	76,012	67,008

(7) *Grain for migratory waterfowl feed.*—To prevent damage of crops by migratory waterfowl, the Corporation is directed to furnish to the Secretary of the Interior (7 U.S.C. 442-445) such grain acquired through price support operations and certified by the Corporation as available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition. This appropriation item is included under that department.

(8) *Surplus grain for migratory birds.*—Under Public Law 87-152, approved August 17, 1961 (7 U.S.C. 448), the Secretary of the Interior may requisition grain of the Corporation to feed starving migratory birds. This appropriation item is included under that department.

(9) *Grading and classing activities.*—The Corporation may make advances to the Consumer and Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a, 440). Such advances used for classing cotton and grading tobacco not placed under price support loan are repaid from an appropriation of the Service.

(10) *Research to increase domestic consumption of farm commodities.*—The Department of Agriculture and Related Agencies Appropriation Act of 1964 authorized the transfer of not more than \$16 million from the appropriation removal of surplus agricultural commodities (sec. 32) to the Corporation to be used to increase domestic consumption of surplus farm commodities, and provided for the transfer for such purposes thereafter of such sums not in excess of \$25 million in any one year, as may be approved by Congress. The 1965 appropriation act authorized the transfer of \$12,175 thousand of section 32 funds for this purpose. The Corporation transfers such funds to the Agricultural Research Service and Cooperative State Research Service to conduct the required research.

(11) *Defense activities.*—Upon the declaration of a national emergency, the facilities, services, authorities, and funds of the Corporation may be used, as directed by the Secretary and in accordance with applicable provisions of law, to carry out responsibilities and functions assigned to the Secretary under the Defense Production Act of 1950, as amended, the Civil Defense Act, as amended, and such other defense legislation as may be enacted.

(12) *Transfer of long-staple cotton from the national stockpile for sale by Commodity Credit Corporation.*—The act of July 10, 1967 (71 Stat. 290), authorized the transfer of 50,000 bales of domestically grown cotton from the national stockpile to the Corporation for sale. Also, about 219,000 bales of cotton, both American-Egyptian and foreign grown, in the stockpile were made available to the Corporation for disposition under Public Law 87-548, approved July 25, 1962. The cotton is not recorded as a Corporation asset. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts from time to time. No interest is paid by the Corporation for the use of the money prior to covering.

(13) *Loans for rural environmental assistance.*—Under section 391 of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed \$50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made from balances of prior appropriations or from new funds appropriated for the rural environmental assistance program.

(14) *Use of CCC facilities for Agricultural Stabilization and Conservation Service programs.*—Under the respective

Public enterprise funds—Continued

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL
WOOL ACT—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

enabling legislation, the services, facilities, and authorities of the Corporation are used to make payments to producers under various programs administered by the Agricultural Stabilization and Conservation Service.

Among these programs are conservation reserve, cropland conversion, rural environmental assistance, cropland adjustment, Appalachia regional conservation, emergency conservation measures, and the Sugar Act program.

(15) *Purchases of dairy products under section 709 of the Food and Agriculture Act of 1965.*—The Corporation, on behalf of the Secretary, purchases at market prices dairy products which are donated to meet the requirements for schools, domestic relief distribution, community action programs, and other programs as are authorized by law, when there are insufficient stocks of such products in the hands of the Corporation available for such purposes. This program is conducted under section 5 of the Corporation's charter act and section 709 of the Food and Agriculture Act of 1965. Costs incurred for this activity are included in the Corporation's net realized loss for which it is reimbursed annually by appropriation pursuant to Public Law 87-155.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made or held by lending agencies or other financial institutions or certificates of interest issued in connection with the financing of price-support operations. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on certificates of interest and lending agency obligations for the period the agencies have their funds invested.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964, on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after June 30 of the fiscal year in which such losses are realized.

The computation of the transfer from interest-bearing to non-interest-bearing capital is (in thousands of dollars):

Item	1970 actual	1971 estimate	1972 estimate
Realized deficit not previously reimbursed, start of year.....	8,579,089	7,576,486	8,371,126
Less appropriations for year.....	5,215,934	3,363,155	4,213,331
Total, non-interest-bearing, end of year.....	3,363,155	4,213,331	4,157,795

On the basis of the budgetary assumptions, the estimated requirements indicate no need for an increase in borrowing authority. Since there are so many uncontrollable factors involving crops which have not even been planted, it must be recognized that estimates are highly tentative.

POSITION WITH RESPECT TO BORROWING AUTHORITY
AS OF JUNE 30

[In thousands of dollars]

Item	1970 actual	1971 estimate	1972 estimate
Statutory borrowing authority.....	14,500,000	14,500,000	14,500,000
Deduct:			
Borrowings from Treasury (total statutory borrowing authority in use)...	12,261,584	12,428,271	11,469,494
Net statutory borrowing authority available.....	2,238,416	2,071,729	3,030,506

Note.—A sufficient amount of the borrowing authority is required to be reserved to cover obligations to purchase notes and certificates of interest held by financial institutions and accrued interest thereon. Such obligations, however, as well as accounts payable, accrued liabilities and other outstanding obligations not reflected on this table, do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds which may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority. The budget reflects a net decrease of \$932 million in 1970, a decrease of \$698 million in 1971, and a decrease of \$660 million in 1972.

Appropriations.—Under section 2 of Public Law 87-155 (15 U.S.C. 713a-11), annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year.

The realized losses for the price support and related programs for 1970 were \$4,213 million, and the cumulative losses not yet appropriated for were \$7,576 million. It is estimated that an appropriation of \$4,213 million would provide sufficient funds for the operations described for 1972. It would also leave a desirable operating margin to assure flexibility of operations in view of the volume of transactions handled.

The special activities are financed as indicated in the program description above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above) and for foreign assistance and special export programs (see that heading on p. 172).

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows (in thousands of dollars):

PRICE SUPPORT AND RELATED PROGRAMS	
Realized losses, 1933 to 1970, inclusive.....	44,589,870
Reimbursements by the Treasury:

FOREIGN ASSISTANCE PROGRAMS AND SPECIAL EXPORT PROGRAM

Facilities and funds of the Commodity Credit Corporation may by law be used in carrying out programs for exporting agricultural commodities. The laws also authorize appropriations to be made to cover costs of such programs. When funds become available, advances are made to the Corporation for estimated costs. If the amounts appropriated are greater than actual needs, the excess is used to reduce future appropriation requests. If appropriations are less than actual needs, other Corporation funds may be used temporarily to finance the balance of authorized costs.

FOREIGN ASSISTANCE PROGRAMS

Included in this category are the following activities carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, as amended: sale of agricultural commodities for foreign currencies (title I); sale of agricultural commodities for dollars on credit terms (title I); and commodities supplied in connection with dispositions abroad (title II).

Federal Funds

General and special funds:

PUBLIC LAW 480

For expenses during the current fiscal year, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1701-1710, 1721-1725, 1731-1736d), to remain available until expended, as follows: (1) sale of agricultural commodities for foreign currencies and for dollars on credit terms pursuant to title I of said Act, **[\$411,100,000]** *\$866,565,000*; and (2) commodities supplied in connection with dispositions abroad, pursuant to title II of said Act, **[\$291,400,000]** *\$453,835,000*. (*Department of Agriculture and Related Agencies Appropriation Act, 1971.*)

1. *Sales of agricultural commodities for foreign currencies and for dollars on credit terms* are made under title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), as amended by the Food for Peace Act of 1966 (Public Law 89-808 and Public Law 90-436), as extended by Public Law 91-524.

The Commodity Credit Corporation finances all sales made pursuant to agreements concluded under title I. Sales are made to friendly countries—as defined in section 103(d) of the act—and must not displace expected commercial sales for cash dollars (secs. 103 (c) and (n)).

No agreements may be entered into after December 31, 1973 (sec. 409), and agreements may not be made under title I in any calendar year which call for an appropriation to reimburse the Corporation in excess of \$1.9 billion, plus unused prior years' authorizations.

Whenever practicable, terms of agreements must require payment at time of delivery of not less than 5% of the purchase price in dollars or in currencies convertible to dollars. These initial payments are applied against costs to reduce appropriation requests. On credit agreements under title I, the President is authorized to require payment upon delivery in dollars or foreign currencies of amounts needed for payment of U.S. obligations and certain other purposes.

The act provides for a progressive shift from foreign currency sales to dollar credit sales, to be completed by December 31, 1971. These estimates reflect the completion of this shift. To the extent that transition from foreign currency sales to dollar credit sales is not possible, transition to convertible foreign currency credit sales is authorized on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement.

Factors determining availability of commodities for disposition under Public Law 480 are productive capacity, domestic requirements, farm and consumer price levels, anticipated commercial exports, and adequate carryover. No commodity is available for disposition if the disposition thereof would reduce the domestic supply below that needed to meet domestic requirements, adequate carryover, and anticipated exports for dollars.

The Corporation may finance only the differential between U.S.-flag rates and world rates in the case of regular foreign currency sales.

(a) *Sales of agricultural commodities for foreign currencies (title I).*—Sales of agricultural commodities for foreign currencies are made to countries unable to expand commercial purchases because of a lack of dollar exchange. Foreign currencies received in payment are deposited to the account of the U.S. Treasury and can be used only as stated in section 104. The dollar value of such deposits through June 30, 1970, amounted to \$12.5 billion.

Uses fall into two groups—those of benefit to the foreign country, mainly loans and grants to promote economic development and to support common defense, and those of benefit to the United States. The latter includes, among others, expenses of the U.S. Government abroad, agricultural market development, educational exchange, construction of military family housing, and sales of foreign currency to U.S. citizens and tourists.

Foreign currencies including foreign currency loan repayments for U.S. uses, and certain foreign currency grants, are subject to the appropriation process. Sales agreements specify particular uses, and in those entered into after December 31, 1964, at least 20% of the foreign currencies are required to be subject to the appropriation process, with certain exceptions. Such uses reduce dollar outflow and the deficit in the balance of payments of the United States. The Corporation is reimbursed for the dollar value of currencies so used. Proceeds from sales of foreign currencies and from dollar repayments of foreign

currency loans are applied as a reduction in appropriation requests.

Section 509 of Public Law 86-500, approved June 8, 1960 (7 U.S.C. 1704b note) provides that at least 75% of the total cost of foreign military housing projects (unless otherwise specified) shall be paid from foreign currencies acquired under title I. Pursuant to 10 U.S.C. 2681(b), as amended, the estimates reflect transfer to the Corporation of \$6 million each year to liquidate amounts due. Of this amount, \$2 million will be applied to the French housing barter transaction discussed under the Corporation's special activities and the remaining \$4 million will be applied against other amounts due, with a balance of \$35 million remaining unpaid as of June 30, 1972.

From inception through June 30, 1970, sales agreements have been signed with 53 countries. They cover sales of commodities at an export market value of over \$13.1 billion. Major items are wheat, cotton, and fats and oils.

The following table reflects costs incurred (in thousands of dollars):

Fiscal year	Program expenditures	Interest	Total
1955 to 1968.....	16,654,083	247,191	16,901,274
1969.....	373,002	-----	373,002

1972 (estimate).....	-----	-----	-----
Cumulative totals.....	17,726,467	247,191	17,973,658
Deduct sales of currencies, loan repayments, and receipts from Department of Defense.....	-----	-----	2,692,911
Net costs (foreign currency sales).....	-----	-----	15,280,747
Long-term credit sales financed from this appropriation.....	-----	-----	369,474
Total net costs financed from this appropriation.....	-----	-----	15,650,221
Appropriations through June 30, 1972.....	-----	-----	15,615,218
Unreimbursed costs, through June 30, 1972, representing amounts due from Department of Defense (financed by CCC borrowing authority).....	-----	-----	35,003

(b) *Sale of agricultural commodities for dollars on credit terms (title I).*—Sales of U.S. agricultural commodities under long-term dollar credit terms are also authorized.

Agreements are made with friendly countries or with United States and foreign private trade. They may provide for delivery in annual installments for not more than 10 years from the date of the agreement subject to the availability of the commodity.

Payments are in dollars with interest at rates not less than the minimum required by section 201 of the Foreign Assistance Act of 1961, as amended, for loans made under that section. Payments are made in reasonable annual amounts over periods of not to exceed 20 years from the date of last delivery in each calendar year under the agreement, except that the first annual payment may be deferred for a period of not more than 2 years after such date of last delivery. Interest is computed from the date of such last delivery. As payments are received each year, they are applied against current costs to reduce the appropriation request. Private trade agreements must provide for projects to establish improved storage or marketing facilities or otherwise encourage private economic enterprise in friendly countries.

Credit terms for convertible foreign currency credit sales are to be no less favorable to the United States than those for development loans made under section 201 of the Foreign Assistance Act of 1961, as amended, which authorizes loans to be made on the basis of payment in

40 years with a 10-year grace period. Dollar payments, when received, will also be applied to reduce appropriation requests.

Total agreements made since inception to June 30, 1970, amount to \$2,210 million cost value, including ocean freight for shipment on U.S. ships. Major commodities are wheat, cotton, and oils and oilseeds. Payments for the period amount to \$281.2 million, of which \$181.3 million was applied to principal and the rest to interest.

The following table reflects costs incurred (in thousands of dollars):

Fiscal year	Program expenditures	Interest	Total
1962 to 1968.....	1,227,632	4,102	1,231,734

General and special funds—Continued

PUBLIC LAW 480—Continued

2. *Commodities supplied in connection with dispositions abroad (title II).*—Available agricultural commodities are furnished to meet famine or other urgent or emergency relief needs. Also, commodities are furnished to promote economic and community development in friendly developing countries, to combat malnutrition, and for needy people, and nonprofit school lunch and preschool feeding programs. They are furnished through friendly governments and private or public agencies, including intergovernmental organizations such as the World Food program. The Food for Peace Act, in amending title II, expressed the sense of Congress that other advanced nations should be encouraged to make increased contributions for the purpose of combating world hunger and malnutrition, and that to achieve this objective, the United States should work to expand the United Nations' World Food program.

The Agency for International Development is responsible for administering title II programs. However, the Corporation makes available the commodities or products requested for disposition under title II. Such commodities or products are made available from the Corporation's stocks of commodities or products acquired under its price support program or are purchased at market prices when this is determined to be in the best interest of the Government.

The Commodity Credit Corporation is authorized to pay, with respect to commodities made available, the costs of acquisitions, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery to U.S. ports and ocean freight charges and general average contributions arising out of ocean transport.

Approximately \$7½ million each year may be used to buy foreign currencies accruing under title I of this act to meet costs (other than personnel and administrative costs of cooperating sponsors, distributing agencies, and recipient agencies) directed to community and other self-help activities designed to alleviate the causes for the need for such aid.

Through December 31, 1970, appropriations totaling \$5,500 million were authorized. No programs of assistance may be entered into after December 31, 1973, and none shall be undertaken under this title during any calendar year which call for an appropriation of more than \$600 million to reimburse the Corporation for costs incurred, including its investment, plus any amount by which programs of assistance undertaken under this title in the preceding calendar year have called or will call for appropriations in amounts less than authorized during the preceding year. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against Commodity Credit Corporation costs to reflect a reduction in appropriation requests.

Since inception through June 30, 1970, transfer authorizations under title II have been issued for \$3,282 million worth of food, including ocean freight costs. Of this amount, \$1,149 million (35%) was for disaster relief of victims of floods, earthquakes, droughts, and plagues; \$246 million (7%) for refugee relief; \$19 million (1%) for other emergency assistance; \$383 million (12%) for child feeding; \$863 million (26%) for economic development; and \$621 million (19%) for voluntary agency programs. (Prior to the November 1966 amendment to Public Law 480, commodities were supplied for voluntary agency programs under authority granted under section

416 of Agricultural Act of 1949.) Also, \$570 million was authorized for ocean freight costs on commodities shipped through nonprofit voluntary organizations and \$13 million for purchase of title I foreign currencies for self-help activities, making total authorizations of \$3,865 million for the 16 years this program has been in effect.

The following reflects the composition of the appropriations (in thousands of dollars):

Item	1970 actual	1971 estimate	1972 estimate
Expenses of shipments:

SPECIAL EXPORT PROGRAM

In addition to the foreign assistance programs described, the Commodity Credit Corporation conducts a special export program for bartered materials for the supplemental stockpile (7 U.S.C. 1856).

BARTERED MATERIALS FOR SUPPLEMENTAL STOCKPILE

【For unrecovered prior years' costs related to strategic and other materials acquired as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to the Act of May 28, 1956, as amended (7 U.S.C. 1856), \$25,000, to remain available until expended.】 (*Department of Agriculture and Related Agencies Appropriation Act, 1971.*)

Program and Financing (in thousands of dollars)

Identification code 05-48-2275-0-1-351	1970 actual	1971 est.	1972 est.
Program by activities:			
10 Bartered materials for supplemental stockpile (cost—obligations) (object class 25.0).....	1,250	25	-----
Financing:			
40 Budget authority (appropriation).....	1,250	25	-----
Relation of obligations to outlays:			
71 Obligations incurred, net.....	1,250	25	-----
90 Outlays.....	1,250	25	-----

Under section 206 of the Agricultural Act of 1956 (7 U.S.C. 1856), the Commodity Credit Corporation transfers to the supplemental stockpile, which was established pursuant to section 104(b) of the Agricultural Trade

Development and Assistance Act of 1954, strategic and other materials acquired from the barter and exchange of agricultural commodities. This does not cover those acquired for the national strategic and critical materials stockpile or for other agencies on a reimbursable basis.

Appropriations are authorized for the value of the transfers based on the cost to the Corporation or the domestic market price, whichever is lower. The estimates reflect the shift from stockpile procurement to reimbursable offshore procurement through barter for other Government agencies, and delivery of commodities under previously authorized contracts. No new contracts for supplemental stockpile purposes have been made since 1968 and none are planned.

The following shows the composition of the appropriation (in thousands of dollars):

The Federal Crop Insurance Corporation, a wholly-owned Government Corporation, was created on February 16, 1938 (7 U.S.C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

The Crop insurance programs are developed and analyzed in the Washington headquarters office and are administered in the field by four area offices and 25 State offices. Sales and servicing of contracts at the county level is performed by private agents under contractual agreements with the Corporation and by Corporation employees hired on a permanent, part-time or WAE (when actually employed) basis.

Budget program.—The program for fiscal year 1972 will provide crop insurance protection to farmers amounting to approximately \$871 million on the following commodities: apples, barley, beans, citrus, combined crops, corn, cotton, flax, grain sorghum, grapes, oats, peaches, peanuts, peas, raisins, rice, soybeans, sugar beets, sugarcane, tobacco, tomatoes, and wheat. Also, the Corporation is reinsuring about 11.8% of the crop insurance written by the Commonwealth of Puerto Rico beginning with crop year 1970.

The following table indicates the scope of the insurance operations planned for 1971 and 1972, as compared with 1970. Amounts for each fiscal year pertain to the preceding crop year.

	1970 fiscal year (1969 crop year) actual	1971 fiscal year (1970 crop year) estimate	1972 fiscal year (1971 crop year) estimate
Number of States.....	39	39	39
Number of counties.....	1,425	1,423	1,423
Insurance in force beginning of fiscal year (thousands).....	\$919,471	\$852,300	\$871,000
Insured acreage (thousands).....	17,314	16,000	16,400
Number of crops insured.....	436,095	397,009	407,000
Premiums (thousands).....	\$48,867	\$44,313	\$45,000
Indemnities (thousands).....	\$53,213	\$35,450	\$40,500
Loss ratio.....	1.09	0.80	0.90

Financing.—Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1970, the Secretary of the Treasury held receipts for \$50 million of authorized stock, leaving \$50 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums paid by farmers for crop insurance indemnity costs. The principal payments from this fund are for: indemnities to insured farmers; the direct cost of adjusting crop losses; and a part of the administrative and operating expenses.

The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

It is estimated that gross income of \$45 million from operations will provide adequate operating funds for fiscal year 1972, unless unforeseen losses occur early in the fiscal year. Such losses could deplete the available funds below the amount necessary to pay indemnity claims and related expenses. Therefore, the Corporation is requesting an issuance of \$10 million additional capital stock to provide the necessary funds, if required, to meet such emergencies. This change would increase the amount of issued capital stock from \$50 million to \$60 million and likewise increase the June 30, 1972, net capital from \$19.3 million to \$29.3 million.

Operating results and financial condition.—As of June 30, 1970, the Corporation reflected a deficit of \$33.7 million, which is an increase of \$8.7 million above the amount shown for June 30, 1969. Lower premium income and higher indemnities for crop year 1969 than in the preceding year resulted in increasing the deficit. Crop year 1969 indemnities of \$53.2 million exceeded premiums by over \$4.3 million resulting in a loss ratio of 1.09 as compared with the 1968 loss ratio of 1.05.

A .80 loss ratio is estimated for crop year 1970. Premiums of \$44.3 million are estimated to exceed indemnities by \$8.9 million. For the crop years 1948 through 1969, premium income \$562.7 million) exceeded indemnity costs (\$550.1 million) by \$12.6 million; the loss ratio for the period was 0.98. Premium income exceeded indemnity costs in 11 of the 22 years.

The following table summarizes the insurance operations by commodities for 1970, 1971, and 1972:

¹ Selected resources as of June 30 are as follows: Undisbursed loan obligations, 1969, \$1,158,741 thousand (1970 adjustments, -\$2,742 thousand); 1970, \$1,128,188 thousand (1971 adjustments, -\$933 thousand); 1971, \$1,065,690 thousand; 1972, \$1,025,690 thousand.

The Administration conducts two capital investment programs: (a) The rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making repayable loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This capital investment program is financed through loans which are made for construction, operation, improvement, and acquisition of electric distribution, generation, and transmission facilities in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

Loans are also made at 2% interest for shorter periods of time to electrification borrowers to be reloaned to their consumers for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment.

The 1972 budget request anticipates that a private source of supplemental financing will be available in the latter half of the fiscal year 1971 and in the fiscal year 1972 to satisfy a part of the capital requirements of the rural electric systems.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$31 thousand (1970 adjustments, -\$7 thousand); 1970, \$56 thousand; 1971, \$56 thousand; 1972, \$56 thousand.

The Rural Electrification Administration makes loans for the extension and improvement of electric and telephone service in rural areas. Assistance is provided to electrification borrowers and potential borrowers to negotiate for adequate supplies of power on reasonable terms. Business management and technical help is furnished borrowers where needed to protect the Government's loan security, to assure that construction and operation of their systems conform to approved standards, and that the systems will provide continuous and reliable service and facilitate the most effective use of resources to achieve program objectives.

Rural water and waste disposal grants.—This program is authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961, as amended. It provides for planning grants to be made to public and private bodies with authority to prepare comprehensive plans

for the development of water or sewer systems in rural areas which do not have funds available for such planning. In addition, development grants are made to associations, including nonprofit corporations and public and quasi-public agencies, to finance specific projects for the development, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. The amount of the grant may not exceed 50% of the development cost of the project.

Development grants to associations may be made in connection with direct or insured loans for water and sewer systems described under the Farmers Home Administration direct loan account.

Rural housing for domestic farm labor.—Financial assistance in the form of grants is provided to public or private nonprofit organizations, or other eligible organizations for low-rent housing and related facilities for domestic farm labor, as authorized by the Housing Act of 1964.

Assistance not to exceed 90% of the total development cost may be provided for new structures (including household furnishings) and sites, and for the rehabilitation, alteration, conversion or improvement of dwellings, dining halls, community rooms or buildings, and infirmaries used by domestic farm laborers. Such financial assistance may be made in connection with insured farm labor housing loans under the Rural Housing Insurance Fund.

GRANT OBLIGATIONS

Rural housing grants for domestic farm labor:	1970 actual	1971 estimate	1972 estimate
Number of grants	6	16	16
Amount of grants (thousands of dollars)	\$2,134	\$3,700	\$3,767

MUTUAL AND SELF-HELP HOUSING

For grants pursuant to section 523(b)(1)(A) of the Housing Act of 1949 (42 U.S.C. 1490c), [\$775,000] \$2,000,000, to remain available until expended. (*Department of Agriculture and Related Agencies Appropriation Act, 1971.*)

Program and Financing (in thousands of dollars)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$0; 1970, \$0; 1971, \$950 thousand; 1972, \$1,400 thousand.

Mutual and self-help housing.—This assistance was authorized by section 1005 of the Housing and Urban Development Act of 1968 (Public Law 90-448). These grants are especially designed to aid the development of comprehensive plans to permit an expansion of mutual and self-help housing programs under which groups of families build their own homes by mutually exchanging labor. It is estimated that 30 grants totaling \$2,450 thousand will be made to nonprofit organizations in 1971 as well as in 1972. These organizations will provide technical staffs to assist approximately 2,000 low-income families in each year to build their homes by the self-help method.

SALARIES AND EXPENSES

For necessary expenses of the Farmers Home Administration, not otherwise provided for, in administering the programs authorized by the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1921-1991), as amended, title V of the Housing Act of 1949, as amended (42 U.S.C. 1471-1490c, 83 Stat. 399), the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U.S.C. 440-444), and for carrying out the responsibilities of the Secretary of Agriculture under sections 235 and 236 of the National Housing Act, as amended (12 U.S.C. 1715z-1715z-1), and section 701 of the Housing Act of 1954, as amended (40 U.S.C. 461), [\$86,000,000] \$92,800,000, together with not more than \$2,250,000 of the charges collected in connection with the insurance of loans as authorized by section 309(e) of the Consolidated Farmers Home Administration Act of 1961, as amended, and sections 514(b)(3) and 517(i) of the Housing Act of 1949, as amended, of which not more than \$250,000 shall be available for the administration of Public Law 91-229: *Provided, That, in addition, not to exceed \$500,000 of the funds available for the various programs administered by this agency may be transferred to this appropriation for temporary field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225) to meet unusual or heavy workload increases: Provided further, That no part of any funds in this paragraph may be used to administer a program which makes rural housing grants pursuant to section 504 of the Housing Act of 1949, as amended. (Department of Agriculture and Related Agencies Appropriation Act, 1971.)*

Farmers Home Administration direct loan account.—This account was established on October 16, 1961, pursuant to section 338(c) of the Consolidated Farmers Home Administration Act of 1961. Real estate and operating loans are made under the authorities of subtitles A and B of the act to farmers and ranchers and to associations unable to obtain credit from other sources at reasonable rates. The appropriation act for 1971 provided for making watershed works of improvement loans, flood prevention loans, and resource conservation and development loans from funds available in the Direct loan account. Under Public Law 90-488, farm ownership and operating loans may include funds for enterprises needed to supplement farm income, and loans may be made to finance outdoor recreational enterprises or to convert to recreational uses existing farming or ranching operations. Loans made under these and similar prior authorities are reported and accounted for in this account.

In 1971, the total for direct loans reflected in the following schedules is \$371.1 million. In 1972, the total for these loans is \$283.7 million. It is proposed to carry out the estimated loan programs through utilization of receipts to the Direct loan account representing collections on loans outstanding and sales of assets in prior years under the Participation Sales Act of 1966. No new borrowing authority is estimated for 1972.

1. *Real estate loans.*—(a) *Farm ownership loans.*—Direct and insured loans are made to farmers and ranchers for acquiring, enlarging, or improving farms, including dwellings and farm buildings; for financing land and water development, use and conservation; for developing recreational and other nonfarm enterprises; for forestry development; for refinancing indebtedness; and for loan closing costs. Loans are confined to farms which are not larger than family farms and cannot exceed the normal

value of the farm or \$100 thousand, whichever is the lesser. The loan limitation includes the unpaid indebtedness against the farm or other security.

FARM OWNERSHIP LOANS—OBLIGATIONS

	[Dollars in thousands]					
	1970 actual		1971 estimate		1972 estimate

Insured loans.....	11,273	256,491	10,340	210,000	10,130	\$210,000

(b) *Recreation loans.*—Insured recreation loans are made to individual farmers and ranchers for converting all or a portion of the farms or ranches they own or operate to outdoor income-producing recreation enterprises which will supplement or supplant farm income and permit carrying on sound and successful operations. These loans are made under the same terms and limitations as farm ownership loans, except that the loans may be made on farms which are larger than family farms and may include funds for operating purposes.

Insured loans.....	43	\$1,211	185	\$5,000	185	\$5,000

(c) *Soil and water loans to individuals and association loans.*—Direct and insured loans are made to farmers, ranchers, and nonoperator owners for land and water development, use and conservation. Direct and insured loans are made to public and nonprofit associations for the effective development and utilization of water supply and waste disposal systems and for the improvement of land by soil and water conserving facilities and practices. Loans to associations also are made for shifts in land use including grazing, the development of recreational facilities, and for irrigation development. Direct land conservation and development loans to individuals are made in the Appalachian region to establish and carry out land stabilization, conservation, and erosion control practices. There is no limitation on the size of farms that may be improved with loans to individual farmers. For loans to individuals, a loan cannot exceed the normal value of the farm or \$100 thousand, whichever is the lesser. The loan limitation includes the unpaid indebtedness against the farm or other security. For loans to associations, the unpaid principal indebtedness, together with the amount of any grant assistance, is limited to \$4 million. Loans to associations may be made to serve residents of open country and rural towns and villages of not more than 5,500 population, which are not part of an urban area.

Estimates for fiscal years 1971 and 1972 are subject to minor shifts between some categories.

(d) *Indian tribe land acquisition loans.*—Insured Indian tribe land acquisition loans are made to qualified Indian tribes or tribal corporations to acquire land or interests in land within the tribe's reservation or Alaskan Indian community, as determined by the Secretary of the Interior. These loans are made under the same terms and limitations as association loans.

INDIAN TRIBE LAND ACQUISITION LOANS—OBLIGATIONS

	[Dollars in thousands]					
	1970 actual		1971 estimate		1972 estimate	
	Number	Amount	Number	Amount	Number	Amount
Number of applications....	--	-----	50	-----	100	-----
Insured loans.....	--	-----	25	\$5,000	50	\$10,000

Farm ownership, recreation, soil and water, and land conservation and development loans to individuals, as well as association loans and Indian tribe land acquisition loans, are repayable in not more than 40 years and bear interest not in excess of 5%. Insured loans are made through the Agricultural credit insurance fund with funds advanced by private lenders. Annual payments of principal and interest to lenders are fully guaranteed. The Administration services these insured loans, makes collections, and pays the lenders.

2. *Operating loans.*—Direct loans are made to farmers and ranchers for costs incident to reorganizing a farming system for more profitable operations; for a variety of essential farm expenses such as the purchase of livestock, farm equipment, feed, seed, fertilizer, and farm supplies, and other essential operating expenses, including cash rent, and costs incident to the production and harvesting of forestry products; for financing land and water development, use and conservation; for developing recreational or other nonfarm enterprises; for refinancing indebtedness; for other farm and home needs; and for loan closing costs. Loans are confined to operators of not-larger-than-family farms. The outstanding principal loan balance for operating loans to any individual is limited to \$35 thousand. Loans bear interest at a rate based on the average rate paid by the U.S. Treasury on obligations with a similar maturity period. The rate for fiscal year 1971 is 7 7/8%. Loans may be scheduled for payment over periods from 1 to 7 years depending on loan purposes. In some situations, they may be renewed for not more than 5 additional years. Loans are secured by crop and chattel liens and, when necessary, by real estate mortgages.

The Self-Help Housing Land Development Fund was authorized by section 1005 of the Housing and Urban Development Act of 1968 (Public Law 90-448). It is used as a revolving fund for making loans to public or private nonprofit organizations for the acquisition and development of land as building sites to be subdivided and sold to eligible families, nonprofit organizations and cooperatives. In fiscal year 1970, three loans were obligated for \$114,370. It is estimated that 31 loans for \$1,225 thousand will be made in 1971 as well as in 1972.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund was established in 1965 (Public Law 89-117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. Initial capitalization of the fund at \$100 million was provided by the Supplemental Appropriation Act, 1966.

Public Law 91-152, approved December 24, 1969, provided that the Rural housing direct loan account be abolished and that the assets and liabilities of, and authorizations applicable to, that direct loan account be transferred to the Rural housing insurance fund.

This fund is used to insure rural housing loans, farm labor housing loans, rural housing site loans, and loans

Public enterprise funds—Continued

RURAL HOUSING INSURANCE FUND—Continued

for rural rental housing. If the borrowers are persons of low or moderate incomes, and if their need for necessary housing cannot be met with financial assistance from other sources, including assistance available under sections 235 or 236 of the National Housing Act, the loans made by the Farmers Home Administration in fiscal year 1971 will bear interest at 7¼% with provision for interest credits up to 6¼% under certain circumstances. Loans to persons other than those of low or moderate incomes were made at an interest rate of 8½% plus a one-half of 1% insurance charge in fiscal year 1970. Farm labor housing loans bear interest at the rate of 1%.

The appropriation act for 1971 provided for making direct loans from funds available in the Rural housing insurance fund. These direct loans, to which interest credits do not apply, are made for the following purposes:

1. *Low- to moderate-income building loans.*—Loans of \$1 thousand or less are made at an interest rate of 7¼% in fiscal year 1971 and are repayable in not more than 10 years when the loan cannot be made on an insured basis. Disaster loans without a limit as to amount are made at 3% interest to provide for repair or replacement of farm or rural dwellings, farm service buildings, and related facilities damaged by a natural disaster.

2. *Very-low-income housing repair loans.*—Repair and improvement loans not in excess of \$2,500 are made to very-low-income families who are owners of farms or non-farm property to repair or improve their dwellings and essential farm buildings in order to make them safe and sanitary and to remove health hazards to the families and the community. Such loans which involve water supply, septic tanks, or bathroom and kitchen plumbing facilities may be made in amounts not in excess of \$3,500. These loans are made at 1% interest and are repayable in not more than 10 years.

3. *Rural rental housing loans.*—Loans are made to private nonprofit corporations and consumer cooperatives to provide modest cost rental or cooperative housing and related facilities for elderly persons in rural areas with low or moderate incomes or other persons with low incomes in rural areas. These loans which bear 3% interest and are repayable in not more than 50 years are generally restricted to existing borrowers who need subsequent loans.

Insured and direct building loans are made to farm-owners, owners of other real estate in rural areas, others who are or will become rural residents, and long-term farm leaseholders. Loans are repayable in not more than 33 years. Loans are made to enable eligible applicants to construct, improve, alter, repair, or replace dwellings and essential farm service buildings, and may include funds to buy a house, building site, and farm service buildings. Loans are limited to rural areas which include towns, villages, or other rural places of not more than 10,000 population, which are not part of an urban area.

¹ Balance of selected resources are identified on the statement of financial condition.

This fund is authorized by subtitle C of the Consolidated Farmers Home Administration Act of 1961 to finance emergency loans in areas where agricultural credit is not readily available because of natural disasters. Loans are generally confined to areas designated by the Secretary of Agriculture as emergency areas. Loans may be made outside of such areas under certain conditions to eligible applicants who have suffered severe production losses not general to the area. Loans also may be made to previously indebted borrowers to permit orderly repayment of such indebtedness.

Loans.—(a) *Emergency loans.*—Emergency loans are made at 6% interest or less to eligible farmers, ranchers, or oyster planters and to domestic corporations or partnerships engaged primarily in farming, ranching, or oyster planting. Loans are made primarily for financing farm operating needs, family living expenses, and a number of closely related purposes. Public Law 91-606, approved December 31, 1970, authorized loans with special provisions for refinancing real estate debts under restricted conditions, for cancellation of a portion of principal up to \$2,500, and for deferment of interest and principal payments up to 3 years on loans for other than operating expenses.

(b) *Other loans.*—Where necessary to protect the Government's investment, obligations are incurred in connection with outstanding loans to provide for payment of such costs as taxes and insurance. Such advances are charged to the borrowers' accounts.

Administrative expenses.—The administrative expenses are related to the emergency loan program of the administration. These expenses are estimated at \$6.8 million in 1971 and in 1972. Any additional expenses are paid from the appropriation Salaries and expenses. Administrative expenses for the Office of the General Counsel are estimated at \$39 thousand in 1971 and 1972.

Financing the program.—No new budgetary authorization is required for 1972. A net loss of \$6.9 million is estimated on an accrual basis. Receipts are estimated to exceed expenditures by \$408 thousand on a cash basis. During 1972, the program will be wholly financed by receipts from operations of the revolving fund.

Operating results and financial conditions.—Revenue for 1972, consisting principally of interest on loans, is estimated at \$2.5 million, compared to expense of \$9.3 million, resulting in an estimated loss of \$6.8 million. A net gain of \$179 thousand is estimated for 1971, and a net loss of \$8.8 million resulted in 1970.

Loans receivable, after allowance for losses are expected to amount to \$71.8 million on June 30, 1972, as compared to \$79.1 million on June 30, 1971, and \$103.9 million on June 30, 1970.

The Government investment at June 30, 1972, is expected to be \$126.9 million, consisting of \$267.8 million appropriated and donated, less a deficit of \$140.9 million.

¹ Balances of selected resources are identified on the statement of financial condition.

This fund is used to insure farm ownership, soil and water, and recreation loans to individuals, as well as association loans and Indian land acquisition loans, as authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961, as amended. The

insurance endorsement on each insured loan may include an agreement by the Government to purchase the loan after a specified initial period. The initial fund of \$1 million may be supplemented by amounts retained by the Government out of interest collected from insured loan borrowers and by borrowing from the Secretary of the Treasury. From any amounts so retained, not to exceed one-half of 1% of the outstanding principal obligations must be deposited to the fund. Any remainder of such charges may be used for administrative expenses. Loans may be made directly from the fund from available receipts or borrowings from the Treasury for the purpose of acquiring blocks of loans if there is reasonable assurance that the loans can be sold to investors without undue delay. With respect to new loans made from this fund, not more than \$100 million may be held in the fund at any one time. Interest paid the Secretary of the Treasury on borrowings is based on the current average market yield of outstanding marketable obligations of the United States having maturities comparable to the notes issued for borrowings from the Treasury for operation of the fund. Present money market interest rates are in excess of the 5% statutory rate paid by borrowers. The excess interest paid to private investors to make the loans salable is paid from Treasury borrowings.

Budget program.—Capital outlay is estimated at \$487.3 million in 1972, a decrease of \$96.1 million from 1971 and a decrease of \$215.5 million from 1970. Included in capital outlay is \$317.8 million in 1971 and \$361.5 million in 1972 for making loans from the fund which will later be sold on an insured basis. The volume of sales of loans from the fund is based on all insured loans being made by the fund for later sale in order to permit a premium yield to investors. Insured loans outstanding which are contingent liabilities against the insurance fund are expected to increase from \$1,975 million on June 30, 1970, to approximately \$2,262 million at June 30, 1971, and \$2,596 million by June 30, 1972.

Financing.—Net repayments to the Treasury in 1971 are estimated at \$34 million. Treasury borrowings are not contemplated in 1972.

Operating results and retained earnings.—Total revenue, consisting of loan insurance charges and interest income on loans held by the fund, is estimated at \$4.7 million in 1971 and \$5.5 million in 1972.

Net outstanding loans receivable of \$85.8 million are estimated at June 30, 1972. By the end of 1972, the deficit of \$209.8 million when added to the \$1 million appropriation and estimated borrowings of \$228.8 million from the Treasury represent a \$20 million Government equity.

These funds are administered by the Farmers Home Administration, under agreements with 35 individual States, for use in carrying out subtitles A and B of the

Consolidated Farmers Home Administration Act of 1961. In these States, real-estate type loans are purchased with these funds and insured under the Agricultural Credit Insurance Fund. The entire assets of seven State corporations are being administered by the Farmers Home Administration. A partial return of cash or other assets, at face value, has been made to 28 of these States for rural rehabilitation purposes agreed upon between each corporation and the Federal Government. The entire assets of seven other State rural rehabilitation corporations have been returned to those States. The face value of returned corporation assets totals \$30.6 million.

The preceding schedule reflects expenditures from the Consolidated Working Fund, Department of Agriculture. Advances were received from the Department of Commerce, Economic Development Administration (formerly the Area Redevelopment Administration) for operations carried out, as well as special technical assistance projects. Funds were received into this account as an administrative convenience and were allotted to the individual agencies of the Department of Agriculture, which carried out the program. The 1970 outlay will close this account.

OFFICE OF THE INSPECTOR GENERAL

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Inspector General, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$10,000 for employment under 5 U.S.C. 3109, **[\$12,412,000]** **\$13,581,000**, and in addition, **[\$3,434,000]** **\$3,602,000** shall be derived by transfer from the appropriation, "Food Stamp Program" and merged with this appropriation. (7 U.S.C. 450b, 2201, 2202, 2220; Department of Agriculture and Related Agencies Appropriation Act, 1971.)

¹ Includes capital outlay as follows: 1970, \$4 thousand; 1971, \$7 thousand; 1972, \$8 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$32 thousand (1970 adjustments, -\$12 thousand); 1970, \$50 thousand; 1971, \$50 thousand; 1972, \$50 thousand.

Note.—Excludes \$19 thousand in 1972 and \$11 thousand in 1971 for activities transferred to "Operations, research, and facilities," Environmental Protection Agency.

The Office serves as the audit and investigative arm of the Secretary. It performs all audit and investigative activities of the Department. The Office assures the Secretary of completely independent and objective selection of departmental activities for audit; critical reviews and examination of the Department's programs and activities; and factual, unbiased reporting of the results of these audits and investigations. This assures that existing laws, policies, and Department regulations are complied with, that Department programs are effectively managed, and that corrective action is taken where necessary.

The Office also coordinates internal audit and investigative activities of the Department with other investigative agencies of the executive and legislative branches of the Government.

The recommended increase is for audit and investigation service, primarily in county offices of FHA, and for the child nutrition programs.

¹Includes capital outlay as follows: 1970, \$63 thousand; 1971, \$30 thousand; 1972, \$12 thousand.
²Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$35 thousand (1970 adjustments, -\$9 thousand); 1970, \$77 thousand; 1971, \$77 thousand; 1972, \$77 thousand.

The program is aimed at assuring fairplay in the marketing of livestock, meat, and poultry. Its principal purpose is to maintain effective competition for livestock, meats, and poultry, so as to bring to farmers and ranchers the true market value of their livestock and poultry. Members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of meats and poultry, and from restrictions on competition which could unduly increase meat and poultry prices.

No increase is requested for fiscal year 1972.

The volume of work performed is indicated by the following examples:

	1970 actual	1971 estimate	1972 estimate

Note.—Excludes \$18 thousand in 1972 and \$10 thousand in 1971 for activities transferred to Operations, research, and facilities, Environmental Protection Agency.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department activities.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, agricultural, and closely related groups, and to the public the Department's research, action, regulatory, and other programs, using all information media. This work is carried on in close cooperation with the land-grant institutions and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

1. *Publications review and distribution.*—The Department's printed publications are reviewed, published, and distributed. Processed publications are reviewed. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's widespread activities require extensive preparation of information material for press, radio, and television use, as well as for specific agricultural outlets and the general public. Periodic crop, price, and market reports and press releases are issued. Digests, newsletters, special articles, and other editorial services are made available to press associations, farm and general publications, trade publications, daily newspapers, and encyclopedic annuals. Radio is used to reach farmers locally through single stations, and to

broadcast nationally through the major networks. Films, television packages, and other services are prepared for the use of land-grant institutions, television farm broadcasters, and TV networks. Information campaigns involving activities of cross-agency interest are developed using all media. The Yearbook of Agriculture is published by the Office and distributed by the Members of Congress.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and nonprofit organizations associated with agriculture, produced on a reimbursable basis under the Department's working capital fund, are distributed through cooperating State film libraries. Still photographs, illustrations, graphics, and exhibits are similarly produced for use in explaining and reporting on Department programs. News and general-type photographs of Department programs and activities are available to news media from a centralized library.

¹ Includes capital outlay as follows: 1970, \$45 thousand; 1971, \$109 thousand; 1972, \$7 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$569 thousand (1970 adjustments, -\$34 thousand); 1970, \$414 thousand; 1971, \$414 thousand; 1972, \$414 thousand.

The National Agricultural Library, cooperating jointly with the two other national libraries—the Library of Congress and the National Library of Medicine—provides coverage and servicing of worldwide publications in the agricultural, chemical, and biological sciences. It serves the research, extension, regulatory, and other programs of the Department and State agricultural agencies. Since the Library's primary purpose is to provide for research needs, it has acquired and preserved what is considered to be the most exhaustive body of literature available on all phases of agriculture and the allied sciences—botany, chemistry, animal industry, veterinary medicine, biology, agricultural engineering, rural sociology, forestry, entomology, food and nutrition, soils and fertilizers, and the marketing, transportation, and other economic aspects of agricultural products. Publications are

currently acquired from more than 150 governments and jurisdictional entities in some 50 different languages. In addition, printed information of agricultural societies, organizations and cooperatives, and general material in the field of agriculture are collected and made available for use.

Information contained in the agricultural literature is disseminated through bibliographies, reference services, loans and photocopies to agricultural colleges and universities, research institutions, Government agencies, agricultural associations, industry, individual scientists, farmers, and the general public in every part of the world.

During 1970, 194,477 separate issues of periodicals were added to the collection by purchase and exchange. During the same period 149,480 loans of books and periodicals were made and 164,715 reference questions answered.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$164 thousand; 1970, \$79 thousand; 1971, \$0; 1972, \$0.

Funds for the preparation of plans, specifications, and drawings for new facilities were appropriated in 1964.

Funds were appropriated in fiscal year 1966 for construction of the new Library at Beltsville, Md. The construction contract was awarded in November 1966. The cornerstone of the building was laid on September 28, 1967. During fiscal year 1969 the building was accepted by GSA as "substantially completed" and the Library staff and collection were transferred to the new building between May 15 and June 15, 1969. Final settlement has not been made because certain corrections are still pending.

¹ Includes capital outlay as follows: 1970, \$34 thousand; 1971, \$60 thousand; 1972, \$30 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$56 thousand (1970 adjustments, -\$5 thousand); 1970, \$71 thousand; 1971, \$71 thousand; 1972, \$71 thousand.

The Office of Management Services (OMS) provides consolidated and centralized management support services to several agencies and offices of the Department. It was established by Secretary's Memorandum No. 1529, dated January 29, 1963, to provide greater economy and effectiveness in the rendering of management service and advice through improved utilization of manpower and management techniques, increased specialization of professional skills, and more extensive use of timesaving equipment.

The consolidated management support functions include budget and finance, personnel and related programs, administrative services, and public information work. These functions are financed by direct appropriation to OMS, except for activity performed for others on a reimbursable or advance payment basis; OMS is reimbursed for management support of these activities.

The organizational structure of OMS is based upon these functions with operating divisions providing the services for the following agencies and offices: Office of the Secretary, Office of Budget and Finance, Office of Hearing Examiners, Judicial Officer, Office of Management Improvement, Office of Personnel, Office of Plant and Operations, Rural Development Activities, Office of Information, National Agricultural Library, Office of the General Counsel, Office of the Inspector General, Farmer Cooperative Service, Commodity Exchange Authority, Cooperative State Research Service, Economic Research Service, Statistical Reporting Service, Foreign Economic Development Service, and the Packers and Stockyards Administration.

¹ Includes capital outlay as follows: 1970, \$38 thousand; 1971, \$40 thousand; 1972, \$40 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$166 thousand (1970 adjustments, \$6 thousand); 1970, \$112 thousand; 1971, \$112 thousand; 1972, \$112 thousand.

General administration covers the overall planning, coordination, and administration of the Department's programs. Also included are certain services on a Department-wide basis.

2. *Budgetary and financial administration.*—This covers departmental budgetary and financial management; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

3. *General operations.*—These embrace departmental policies and procedures for telecommunications, construction, contracting, procurement, property, mail, space, supply and transportation management; and Department-wide central services of mail distribution, telephone, telegraph, reproduction and supply are furnished.

4. *Management improvement.*—This covers the coordination and direction of the development of new and improved management techniques; acquisition and utilization of data processing equipment, development of

methods of measuring the effectiveness of program operations; and records management, cost reduction and the management improvement program of the Office of Management and Budget and the Department.

5. *Personnel administration.*—This covers general direction, leadership, and coordination of the personnel management program of the Department. Departmental policies and procedures are issued and the Office coordinates a review program to evaluate the effectiveness of agency personnel programs.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. "Agriculture Decisions" is published monthly.

7. *Equal opportunity.*—This covers program and policy direction in the development and enforcement of Department equal opportunity responsibilities; reviews, analyzes and evaluates agency programs and operations to ascertain compliance with applicable policies, rules and regulations of the Department and the Government. Processes complaints made to the Department on discrimination in Department programs and provides final Department disposition.

¹ Balances of selected resources are identified in the statement of financial condition.

This fund finances by advances or reimbursements certain central services in the Department of Agriculture, including duplicating, photographic, and other visual information services, art and graphics, motion picture, tabulating, supply, library photocopy and microfilming services, civil defense activities, interagency employee training programs, mail and messenger services, and the centralized automatic data processing system for payroll, financial management, and other services. The capital

consists of \$400 thousand appropriated (5 U.S.C. 542-1), \$608 thousand in donated assets, and accumulated earnings of \$275 thousand as of June 30, 1970. Earnings are kept at a low level through adjustments in rates charged for services to maintain as nearly as possible the nonprofit nature of the fund.

FOREST SERVICE

The Service carries on three primary functions: (1) protection, development, and use of about 187 million acres of land in national forests and national grasslands in the United States and Puerto Rico; (2) forestry research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to improve methods for developing and managing recreation resources; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey; and (3) cooperation with States and private land-owners to obtain better fire protection on approximately 519 million acres of forest land and nonforest watersheds; to provide technical advice and financial assistance to promote development, improvement, and expansion of forest pest detection and suppression programs; to improve forest practices on about 395 million acres of State and local government and privately-owned commercial timber lands; and to encourage reforestation and stimulate development and management of State, county, and community forests.

These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

Federal Funds

General and special funds:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$199,617,000]** \$225,118,000, of which \$4,275,000 for fighting and preventing forest fires and \$1,910,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$45,591,000]** \$47,668,000.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **[\$23,939,000]** \$24,067,000. [For an additional amount for "Forest land management", \$150,000. For an additional amount for "Forest research", \$108,000.] (7 U.S.C. 1010-1012, 1621-1627, 2201, 2202, 2250; 16 U.S.C. 207c, 471-533i, 594-1-594-5, 594a, 1004, 1005; 30 U.S.C. 601-604, 611-615; 31 U.S.C. 534; 42 U.S.C. 1891-1893; 43 U.S.C. 1181h-1181j; 36 Stat. 557-579; 67 Stat. 633; Department of the Interior and Related Agencies Appropriation Act, 1971; Supplemental Appropriations Act, 1971.)

Total selected resources	28,184	-457	24,353	19,903	19,403

1. *Forest land management.*—(a) *National forest protection and management.*—The 154 national forests and 19 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wildlife are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land. These management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (74 Stat. 215). Work programs and budget estimates are related to the development program for the national forests, a plan to meet the increasing demands for specific national forest resource needs through 1972 and for long-term objectives to the year 2000. Increases are provided in the budget to further attainment of these program objectives. Funds appropriated under Cooperative Range Improvements are merged with this appropriation for obligational purposes.

MAIN WORKLOAD FACTORS

Description	1970 actual	1971 estimate	1972 estimate
Area administered and protected:			
(a) National forest lands (acres)	182,938,520	182,988,780	183,038,780
(b) National grasslands (acres)	3,807,615	3,807,615	3,807,615
(c) Land utilization projects (acres)	153,823	153,823	153,823
Timber managed and protected (billion board feet)	11.05	10.99	10.99
Timber sales (number)	150,000	155,000	155,000
Timber harvested (billion board feet)	11.5	13.4	13.8
Grazing use permits (calendar year):			
Paid	18,222	18,225	18,225
Exempt	68,515	68,515	68,515
Estimated number of livestock on national forest ranges (including calves and lambs)	7,200,000	7,300,000	7,400,000
Special use permits, excluding recreation (number)	45,700	46,500	48,300
Recreation special use permits (number)	25,600	25,700	25,800
Estimated number of visitor days to national forests (calendar year)	170,600,000	178,500,000	186,700,000
Tree planting and seeding (acres)	101,845	117,400	122,200
Timber stand improvement (acres treated)	123,558	154,000	154,000
Range reseeding and removal of competing vegetation (acres)	182,100	184,000	192,000
Receipts (thousands of dollars): National forests fund:			
Timber sales	\$274,028	\$312,320	\$341,900
Grazing	3,772	3,850	5,000
Power	193	200	220
Recreation	2,982	3,500	4,000
Admission and user fees	1,157	1,500	1,750
Land uses	5,637	6,400	6,975
Oregon and California grant lands	9,885	10,000	10,000
National grasslands and land utilization	2,049	2,050	2,050
Total	299,703	339,820	371,895

(b) *Water resource development related activities.*—Provides for impact surveys, construction liaison, land treatment, soil stabilization and cover improvement required by water resource projects of other agencies located within or adjacent to the national forests.

(c) *Fighting forest fires.*—Provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met under national forest protection and management. Costs above estimates for the current and budget years are authorized from advances from other Forest Service appropriations. A supplemental appropriation for fighting forest fires is anticipated for 1971 (proposed for later transmittal).

	Fiscal year		
	1969 actual	1970 estimate	1971 estimate
Forest fires controlled (number)-----	9,913	11,662	14,500
Area burned (acres)-----	135,904	97,293	540,000

(d) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and evaluate infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust.

2. *Forest research.*—Research is conducted at eight regional forest experiment stations, the Forest Products Laboratory, and the Institute of Tropical Forestry.

(a) *Forest and range management.*—Provides land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at least cost; improve forage and habitat for livestock and wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation; and improve methods for developing and managing recreation resources.

(b) *Forest protection.*—Research is conducted to develop measures for the protection of forests from damage by fire, insects, and diseases. Forest fire and atmospheric science research provides improved methods of predicting fire danger, and preparing for and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(c) *Forest products and engineering.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and less-desirable species. Research is also conducted to advance the mechanization and efficiency of forestry operations, and to develop and evaluate machines and similar equipment for such operations as logging, planting, timber-stand improvement, and protection of forests.

(d) *Forest resource economics.*—Investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, the potential need for timber products, and the economics and marketing potential of forest crop production.

3. *State and private forestry cooperation.*—Assist States, other public and private agencies and individuals to protect, manage, and develop non-Federal forest lands, and improve the production of forest products. By so doing, the social and economic welfare of rural people will be improved and an adequate supply of forest and related resources for the future will be assured. The 397 million

acres of non-Federal forest lands produce about 65% of all timber cut.

(a) *Forest fire control.*—Assistance is furnished 50 States in preventing and suppressing forest fires on private and State-owned lands by financial aid, coordination, training, development, and procurement of equipment, and a nationwide fire prevention campaign. About 94% of the 543 million acres of non-Federal ownership planned for protection is now covered. During 1969 the acreage burned on protected areas was 0.31% as against an estimated 3.21% on unprotected lands. Of the total expenditures under this program, 84.5% is contributed by States and counties, 1.3% by private owners, and 14.2% by the Federal Government.

(b) *Forest tree planting.*—Financial and technical assistance is provided to the States for the production, acquisition, and distribution of over half of the Nation's tree planting stock for forest and windbarrier planting on non-Federal lands. More than 70 million acres of nonstocked, poorly stocked, or open lands need to be reforested.

(c) *Forest management and processing.*—In cooperation with 49 States, Puerto Rico, and the Virgin Islands, technical assistance is given to woodland owners in applying multiple-use management to their forest holdings, and to operators of forest products manufacturing plants in improving their manufacturing and processing techniques to extend timber supplies.

(d) *General forestry assistance.*—Technical management assistance is provided usually by Federal personnel but also through other arrangements to State, community, private, and other Federal agencies, forest industries, colleges, and landowners. This program also provides forest products utilization assistance to wood-using industries and loggers.

¹ Includes capital outlay as follows: 1971, \$8,000 thousand; 1972, \$6,500 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1971, \$1,550 thousand; 1972, \$1,662 thousand.

1. *Forest land management construction.*—(a) *Recreation facilities.*—To provide facilities necessary to safely meet increased recreation demand without sacrificing environment values and without unduly impinging upon other resource uses of the national forests.

(b) *Other facilities.*—To provide for construction and acquisition of fire, administrative, and other improvements and related facilities necessary to carry out national forest programs. Includes fire lookouts, offices, dwellings, and barracks for employee housing, service and storage buildings, insectories, tree nursery buildings, basic communication systems, and other forest resource management projects. Also includes acquisition of land and interests therein for administrative purposes.

2. *Research construction.*—To provide for construction, alteration, and improvement of research laboratories and related facilities, and for procurement and installation of necessary initial equipment needed to put the facility into operating condition.

3. *Pollution abatement.*—To provide for bringing water and air pollution control at existing recreation, research, fire, and administrative facilities to the quality standards adopted pursuant to the Federal Water Pollution Control Act, as amended, the Clean Air Act, as amended, or as prescribed pursuant to Executive Order 11507, dated February 4, 1970.

4. *Land acquisition, Weeks Act.*—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber, with the approval of the National Forest Reservation Commission.

A pilot program will be designed to determine the best methods for meeting the objectives of the Youth Conservation Corps Act of 1970 (Public Law 91-378, ap-

proved Aug. 13, 1970). The objectives of the act are to provide (1) gainful employment of America's youth, ages 15 through 18, during the summer months in a healthful outdoor atmosphere; (2) an opportunity for understanding and appreciation of the Nation's natural environment and heritage; and (3) the further development and maintenance of the natural resources of the United States by the youth.

Roads and trails are essential to protection and management of national forests and utilization of their resources.

The Federal-Aid Highway Act of 1970 provides authority of \$170 million each for 1972 and 1973. The authority is available for obligation a year in advance of the year for which authorized. This budget provides for utilization of \$137.2 million unused contract authority.

The 1972 program will involve the construction and reconstruction of about 1,500 miles of general purpose and recreation roads and timber access roads to harvest national forest timber. This compares with 1,324 miles built in 1970 and 1,529 miles being built in 1971.

Of the revenues received annually from national forest activities, 10 percent is available under the permanent appropriation Roads and trails for States, for construction and maintenance within the States from which such proceeds are derived. Such amounts are merged with this appropriation for obligational purposes.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$185 thousand; 1970, \$197 thousand; 1971, \$0; 1972, \$0.

1. *Acquisition of lands for Uinta National Forest, Utah.*—79 Stat. 899, approved October 1, 1965, provided authorization for the appropriation of \$300 thousand for purchase of nonfederally owned land to promote the control of floods and the reduction of soil erosion through restoration of adequate vegetative cover. The full amount of this authorization was appropriated in fiscal year 1967.

2. *Acquisition of lands for Wasatch National Forest, Utah.*—76 Stat. 545, approved September 14, 1962, added some 24,000 acres to the Wasatch National Forest and

authorized the appropriation of \$400 thousand for purchase of privately owned lands within the area to aid in the control of floods and reduction of soil erosion. The 1965 appropriation completed the authorization.

3. *Acquisition of lands for Superior National Forest, Minnesota.*—The authorization for the purchase of land within this forest was increased to \$4.5 million (16 U.S.C. 577c–577h). The 1963 appropriation completed the authorization for acquisition of the remaining tracts.

4. *Acquisition of lands for Cache National Forest, Utah.*—Lands are acquired to enable control and minimization of soil erosion and flood damage.

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriations, as follows:

- Agriculture:
 - Agricultural Stabilization and Conservation Service: "Expenses."
 - Rural Community Development Service: "Salaries and Expenses."
 - Soil Conservation Service:
 - "Flood prevention."
 - "Watershed planning."
 - "Works of improvement."
 - "River basin surveys and investigations."
 - "Resource conservation and development."
- Funds appropriated to the President:
 - "Office of Economic Opportunity."
 - "Appalachian regional development programs, executive."
- Commerce: Economic Development Assistance, "Development Facilities."
- Interior:
 - Bureau of Land Management, "Oregon and California grant lands."
 - Bureau of Outdoor Recreation, "Land and water conservation fund."
- Transportation: Federal Highway Administration, "Federal-Aid Highways Trust Fund."

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed one hundred and [ninety] *seventy-one* passenger motor vehicles of which one hundred and [seventy] *fifty* shall be for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed four for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$25,000 for employment under 5 U.S.C. 3109; (c) uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901–5902); (d) purchase, erection, and alteration of buildings and other public improvements (7 U.S.C. 2250); (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514); and (f) acquisition of land and interests therein for sites for administrative and not to exceed \$75,000 for research purposes, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a).

Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513–519, 521), where such land is not within the boundaries of an established national forest or purchase unit. (*Department of the Interior and Related Agencies Appropriation Act, 1971.*)

¹ Includes capital outlay as follows: 1970, \$235 thousand; 1971, \$316 thousand; 1972, \$340 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$582 thousand; 1970, \$791 thousand; 1971, \$882 thousand; 1972, \$932 thousand.

1. *Roads and trails for States, national forests fund.*—With minor exceptions, 10% of the money received from the national forests is advanced to and merged with the appropriation Forest roads and trails for construction and maintenance of roads and trails within the State from which such proceeds are derived (16 U.S.C. 501).

General and special funds—Continued

FOREST SERVICE PERMANENT APPROPRIATIONS—Continued

2. *Brush disposal.*—Payments made for this purpose by purchasers of national forest timber are used to dispose of or treat slash and other debris that result from cutting operations (16 U.S.C. 490).

3. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

4. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (16 U.S.C. 579c).

5. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

6. *Payments to counties, national grasslands.*—Of the revenues received from the use of national grasslands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

7. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national forest receipts for school purposes (36 Stat. 562, 573).

8. *Payments to States, national forests fund.*—With minor exceptions, 25% of the money received from the national forests is paid to the States for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

¹ Balances of selected resources are identified on the statement of financial condition.

The Working capital fund was established by the act of August 3, 1956 (16 U.S.C. 579b), as amended by the act of October 23, 1962 (16 U.S.C. 579b). It is a self-sustaining revolving fund which provides services to national forests, experiment stations, and when necessary, to other Federal agencies, and as provided by law to State and private agencies and persons who cooperate with the Forest Service in fire control and other authorized programs.

The following services were provided by the Working capital fund in fiscal year 1970:

1. *Equipment service.*—This service owns, operates, maintains, and replaces approximately 13,500 pieces of common use motor driven and similar equipment. This equipment is rented to a total of 146 administrative units; i.e., national forests, experiment stations and other units,

and in some cases to other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which when added to depreciation earnings and the residual value of equipment provides sufficient funds to replace the equipment. This service operates 93 repair shops.

2. *Aircraft service.*—This service operates and maintains 57 Forest Service-owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are based at 16 locations and are rented to national forests, experiment stations, and in some cases to other agencies, at rates which recover the cost of operation, maintenance, repair, and improvements in the airworthiness of the aircraft. Replacement costs and the costs of additional aircraft are financed prorata by benefiting Forest Service appropriations. This service operates three aircraft maintenance shops.

3. *Supply service.*—This service operates the following common services:

(a) *Central supply.*—This service has two locations for procurement, warehousing, and supply of common use items, such as work project tools, provisions, and supplies. Grass seed is procured, stored, and issued from two other locations. Issuances and sales are made to national forests, experiment stations, and others at prices which recover cost.

(b) *Photo reproduction.*—Six photo reproduction laboratories store, reproduce, and supply aerial photographs, aerial maps, and other photographs of national forest lands. The photographic reproductions are sold to national forests, experiment stations, and others at cost.

(c) *Sign shop.*—These include seven small shops which manufacture and supply special signs for the national forests for use in regulating traffic and as information to the public and other users of the national forests. The signs are sold to national forests and experiment stations at cost.

(d) *Subsistence.*—There are 27 facilities which prepare and serve meals at cost to Forest Service work crews working in remote areas where adequate public restaurant facilities are not available.

(e) *Cribbing.*—This facility is located on the Angeles National Forest, Calif., to manufacture special concrete structural material used in embankments for erosion control purposes along access roads in the national forests. This material is sold to national forests at prices which recover costs.

4. *Nurseries.*—This service operates 13 forest tree nurseries and cold storage facilities for storage of tree and seed stock and one seed extractor. Tree seed is procured, cleaned, bagged, and stored in refrigerated facilities. Tree and seed stock is sold to national forests, States, and other Federal agencies at cost.

VOLUME OF BUSINESS FOR THE VARIOUS MAJOR ACTIVITIES OF THE WORKING CAPITAL FUND

[In thousands of dollars]

	1970 actual	1971 estimate	1972 estimate
Equipment service.....	20,863	22,593	23,545
Aircraft service.....	974	1,057	1,098
Supply service.....	2,987	3,285	3,304
Nursery service.....	2,752	2,877	2,939
Total.....	27,576	29,812	30,886

The Working capital fund requires no cash appropriation. Initially, its assets were purchased by regular Forest Service appropriations and were donated to the fund.

Where expansion of facilities is required that expansion is financed by Forest Service regular appropriations and the resulting assets are donated to the fund.

Our objective over the long run is to operate the fund on a break-even basis; i.e., with income and costs approximately equal. However, certain earnings in excess of current costs are required to replace equipment in a rising economy.

An analysis of retained earnings for each of the 4 years follows. This analysis shows:

Fund balance.....			-88,500
90 Outlays.....			

Legislation will be proposed to amend the Rural Electrification Act of 1936, as amended, to provide an additional source of capital for the rural telephone program as a supplement to the present REA loan program. A rural telephone bank would be established and capitalized initially by Government purchase of class A stock to be financed from amounts appropriated from net collection proceeds in the rural telephone program. The bank would obtain additional funds from non-Federal sources through the sale of class B and class C stock to borrowers and the sale of debentures, to be authorized at up to eight times paid-in capital, on the open market. Loans by the bank would be made to supplement loans to borrowers able to pay higher interest rates. S. 3387 passed the Senate the second session of the 91st Congress, and a similar bill, H. R. 7, was pending in the House Rules Committee. The establishment of the bank would require an annual appropriation of as much as \$30 million for purchase of class A stock by the Government. It is estimated that the bank would obtain an additional \$6 million in capital in 1972 from the sale of class B and class C stock to borrowers. It is estimated that the Bank will borrow \$58.5 million from public investors during fiscal year 1972.

Proposed for separate transmittal, proposed legislation :

FARMERS HOME ADMINISTRATION

DIRECT LOAN ACCOUNT

Program and Financing (in thousands of dollars)

Identification code 05-60-4220-2-3-351	1970 actual	1971 est.	1972 est.
Program by activities:			
10 Operating loans (capital outlay, funded—obligations).....			-275,000
Financing:

Relation of obligations to outlays:			
71 Obligations incurred, net.....			
90 Outlays.....			

Under proposed legislation, 1972.—Legislation has been proposed to authorize the making of insured operating loans. If this legislation is enacted, insured loan levels will be increased by \$275 million. Legislation will be proposed to increase the interest rate for farm ownership loans from 5% to the market level. If enacted, the farm ownership loan program will increase by \$70 million.

GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed six hundred and [sixty-two (662)] seventy-one (671) passenger motor vehicles, of which four hundred and [fifty-six (456)] sixty-one (461) shall be for replacement only, and for the hire of such vehicles.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

SEC. 507. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. (*Department of Agriculture and Related Agencies Appropriation Act, 1971.*)

¹ Includes capital outlay as follows: 1970, \$14 thousand; 1971, \$5 thousand; 1972, \$5 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$123 thousand (1970 adjustments, \$4 thousand); 1970, \$149 thousand; 1971, \$60 thousand; 1972, \$60 thousand.

Note.—Includes \$472 thousand in 1972 for activities previously financed from:

Domestic Business Activities: Salaries and expenses	\$34,000
Maritime Administration: Salaries and expenses	74,000
U.S. Travel Service: Salaries and expenses	100,000
National Science Foundation: Salaries and expenses	14,000
Department of the Interior, Office of the Secretary: Salaries and expenses	228,000
Department of the Army, Corps of Engineers: General expenses	22,000

The 1972 request includes amounts transferred, as noted above, for the increased activity associated with Reorganization Plan No. 4 of 1970, which created the National Oceanic and Atmospheric Administration; and the Maritime Act of 1970 and the International Tourism Act of 1961, as amended, which created two new Assistant Secretaries of Commerce, an Assistant Secretary for Maritime Affairs, and an Assistant Secretary for Tourism.

1. *Executive direction of the Department.*—Provides for the formulation of Government policy on matters affecting programs and functions assigned to the Department and executive direction of the Department.

2. *Departmental staff services.*—Staff assistance and supervision in the general management and administration of the Department are provided in audit, budget and program analysis, financial systems, emergency readiness, legal, management and organization, motor vehicles, personnel, policy development, procurement, property, public affairs, publications, records, safety, security, and space matters.

3. *Administrative services.*—Provides general administrative services to the offices financed by the appropriation.

This trust fund was established to account for gifts and bequests in furtherance of programs and activities of the Department of Commerce (78 Stat. 991). Contributions from private sources have been applied to the cost of programs of the National Bureau of Standards (15 U.S.C. 27a); construction of a chapel at the Merchant Marine Academy, Kings Point, N.Y. (68 Stat. 1050 and 62 Stat. 172); for expenses and maintenance of sailing craft in custody of the U.S. Merchant Marine Academy; and for participation in EXPO 70 in Osaka, Japan.

¹ Includes capital outlay as follows: 1970, \$7 thousand; 1971, \$20 thousand; 1972, \$42 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$240 thousand (1970 adjustments, \$5 thousand); 1970, \$75 thousand; 1971, \$75 thousand; 1972, \$75 thousand.

The Office of Business Economics contributes to the advancement of the economy through the preparation of facts and analyses essential to the formulation and execution of policies relating to the major economic problems that confront the Nation. The principal programs are:

1. *Preparation of national income and product data.*—Calculations are made of the gross national product, national income, personal income, and their components, providing an overall view of the state of the economy. Input-output accounts supplement the national income and product accounts by providing a closeup of the manner in which the various industries interact in the production of the national output. Regional accounts provide a profile of our economy by States and smaller subdivisions. During 1972, programs would be instituted to provide new measures for evaluating the economic impact of Federal activity and for maintaining and improving indicators of business conditions.

2. *Analysis of business trends.*—The business situation is assessed monthly, and the results of continuing analyses

of the major factors underlying cyclical developments and long-range business trends are published regularly. Included are surveys that collect information on business investment plans, and the work on an econometric model which forecasts the future movement of the gross national product, its components, and other key elements in the national accounts.

3. *Computation of the balance of payments.*—Balance of payments accounts provide yet another elaboration of the national income and product accounts by depicting in detail all economic transactions with foreign nations. During 1972, bilateral balance of payments accounts which depict the transactions between the United States and individual foreign countries would be extended and improved.

1. *Distribution and service.*—Periodic sample surveys are conducted which provide estimates of retail sales (1) weekly for major kinds of business, and monthly for individual kinds of business for the total United States and (2) monthly for summary and selected kinds of business for regions, census geographic divisions, and selected large States and individual standard metropolitan statistical areas (SMSA's), and monthly sales of department stores for many SMSA's and counties. Also provided are end-of-month national estimates of retail inventories and accounts receivable balances by kind of business and annual national estimates of sales-inventory ratios by kind of business. Surveys also provide (1) monthly national estimates of the receipts of selected service trades and (2) sales and inventories of merchant wholesalers for individual kinds of business on the national level, and for summary and selected kinds of business for major geographic regions. In addition, during the marketing season, estimates are made of canned food stocks held by distributors, and quarterly reports are prepared regarding green coffee roastings, and inventories. During 1971, work will be initiated to improve the advance monthly retail trade reports.

A county business patterns report, providing statistics on employment payrolls by detailed kinds of business and by individual county, is prepared annually; this report covers nonfarm paid employment included in the social security program.

In 1972, the monthly retail trades survey sample size will be increased to reduce the variance in national totals, improve the reliability of the estimates currently published by kind of business and permit publication of more kinds of business categories and geographic detail. In addition, service trade statistics will be expanded to provide coverage for nonprofit organizations; engineering and architectural services; accounting, auditing, and bookkeeping services; and some additional services not elsewhere classified.

2. *Construction.*—Monthly reports are published for housing starts, residential and nonresidential construction

authorized by building permits, and the value of new construction put in place. Quarterly reports are provided on expenditures for residential alterations and repairs, and quarterly price indexes are compiled for new single-family houses sold. Publication, on a quarterly basis, of the one-family house price index will begin in 1971 and a quarterly index for multifamily residential structures is scheduled for later issuance. An annual report is published on permits issued for demolition of residential structures. Additional resources were provided in 1971 to improve the data on the value of nonresidential buildings put in place.

Beginning in 1972, work will be initiated to provide price indexes for selected types of nonresidential buildings including educational, hospital, and health care institutional structures.

3. *Manufacturing.*—Statistics are provided monthly on manufacturers' sales, orders, and inventories for total manufacturing and for about 35 industry breakdowns. An Annual Survey of Manufactures produces statistics on the important measures of factory operations such as employment, value added by manufactures, shipments in total and by class of products, inventories, and investment. Separate data are provided for the defense activities in defense-oriented industries. Monthly, quarterly, and annual surveys are conducted of production, shipments, orders, and materials consumed for important industries and products. Work is now beginning on a report of industrial mergers, acquisitions, and disposals. In 1972, manufacturing statistics will be improved through a strengthening of the monthly survey of manufacturers' sales, orders, and inventories and the Annual Survey of Manufactures.

4. *Industrial directory.*—In 1972, developmental work will begin on a directory of industrial companies and establishments to coordinate and expedite censuses and surveys, and thereby provide a consistent data base for measuring the performance of the economy.

5. *Foreign trade.*—Monthly, quarterly, and annual reports are published on the quantity, shipping weight, dollar value of imports and exports, by mode of transportation, detailed commodity category, customs district and country of origin or destination.

6. *Transportation.*—Methods are developed and tested for undertaking or improving periodic surveys in transportation areas as directed by statutory requirements.

7. *State and local governments.*—Reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. Quarterly information on the national level is furnished regarding State and local tax revenue by type of tax and governmental level. Technical consultation and assistance are provided to State and local government officials, and catalogs are published detailing the statistical publications and data available at the Census Bureau which would be of use to State and local governmental officials. Statistics regarding the construction expenditures of State and local governments are provided monthly. In 1971, the local government employment and finances survey will be expanded to provide statistics for additional standard metropolitan statistical areas and other local areas.

8. *Population.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility, and other characteristics of the population, as well as statistics concerning purchases, stocks, and intentions to purchase.

It also provides annual estimates of the population of the United States, of each of the States, and for a limited number of standard metropolitan statistical areas. Statistics from existing surveys are used to prepare statistical reports and analyses on poverty trends. In 1971, work will start on updating the Current Population Survey Sample frame and to provide supplemental demographic data.

9. *Housing.*—National and regional quarterly estimates are provided for housing vacancy rates. The program also provides vacancy rates by broad classes of the rental and homeowner portions of the housing market and produces information on selected characteristics of the occupied housing inventory. In addition, technical assistance is available to local areas wishing to conduct vacancy surveys. In 1971, developmental work will begin on a program to provide objective indicators of neighborhood blight.

In 1972, an annual housing survey will update the benchmark housing data obtained in the decennial census. In addition, annual estimates and projections of the housing inventory size will be prepared and developmental work for a mobile home placement survey will begin.

10. *Agriculture.*—Information on cotton ginnings and production, as required by statute, is compiled and published. Statistical services are provided regarding the information from the census of agriculture.

11. *Statistical abstract and special reports.*—The "Statistical Abstract," issued annually, summarizes Government and private statistics on the industrial, social, political, and economic activities of the United States. A comprehensive set of statistical indicators is published monthly in the "Business Conditions Digest" report; principal time series on defense activity which influence short-term changes in the national economy are published monthly in "Defense Indicators," and a report is published on "Long-Term Economic Trends." Other general reports are published periodically.

Beginning in 1972, a periodic report on social indicators will be compiled. The new report will draw from all sources of technically adequate statistics both within and outside the Federal Government.

12. *Boundary and coding guide updating.*—This program, started in 1971, will update the Bureau's present area boundary and address location files to recognize changes in boundaries of incorporated places and to reflect changes in street patterns resulting from urban development.

13. *Research and development.*—Research and development is conducted on survey methods and techniques, including sample survey methods and theory, questionnaire design, response errors, equipment design and utilization, computer editing, and administrative control, operations, analytical techniques including techniques of geographic analysis, for the purpose of increasing accuracy, output, and usefulness of statistical data per unit of cost.

BUREAU OF THE CENSUS—Continued

General and special funds—Continued

NINETEENTH DECENNIAL CENSUS—continued

The Nineteenth Decennial Census includes the census of population and housing and the census of agriculture.

1. *Census of population and housing.*—This census provides the count of the Nation's population and housing units, as well as statistics regarding significant demographic characteristics of the country. State population counts for congressional apportionment were furnished to the President on November 30, 1970. During 1971, data collection will be completed. Much of the data will be processed, and the publication of results will begin. The 1972 request provides for completing the processing and evaluation activities and the publication of the final reports from the census.

2. *Census of agriculture.*—This census will provide information on the number of farms, the characteristics of farms and farm operations, use of agricultural land, production, and sales of farm products, farm credit and debt, and principal cash expenditures.

During 1971, the bulk of the data collection work will be completed, much of the data will be processed, and the issuance of county reports will begin. The 1972 request provides for completing data collection, processing, evaluation, and the publication of results.

A census of governments is required "for the year 1957 and every fifth year thereafter" by 13 U.S.C. 161. The law specifies that "each such census shall include, but shall not be limited to data on tax and tax valuations, governmental receipts, expenditures, indebtedness, and employees of States, counties, cities, and other governmental units."

In 1972, collection and processing of governmental organizational data is scheduled. Field enumeration of assessed valuations and real estate transactions will be largely accomplished. Detailed procedures and instructions relating to the collection and examination of public employment and finances data will also be prepared.

¹ Selected resources as of June 30 are as follows: Accrued annual leave at inception, -\$200 thousand; 1971, -\$200 thousand; 1972, -\$200 thousand.

The 1972 Economic Censuses will supply statistics, as provided for in 13 U.S.C. 131, on the volume of production and trade, and the number, size, geographical distribution and other characteristics of the Nation's business and industrial enterprises.

During 1972, plans and specifications for the collection, processing, and publication of the data will be largely completed. This phase includes the design and preparation of report forms, updating of reference material, preparation of mailing lists, and the testing and completion of computer programs. In addition, plans are being made to substantially improve the timing of the release of publications.

² Reimbursements from non-Federal sources are derived at cost from State and local governments for special statistical work (13 U.S.C. 8(d)).

The Bureau undertakes work for governmental and other bodies to the extent that such work meets desirable public needs, can be performed without adversely affecting activities financed from funds appropriated to the Bureau, and can be more appropriately or efficiently performed by the Bureau than by the sponsoring agency.

Significant work includes the collection of data for the Bureau of Labor Statistics, the Department of Health, Education, and Welfare; and the providing of statistical training to foreign nationals and statistical assistance to underdeveloped countries. The latter two programs are financed by the AID.

The Bureau performs, at cost, special statistical work for State and local governments, universities, trade associations, and individuals requesting such data. These services are provided only when it has been determined that it is in the public interest, are consistent with the Bureau's duties, and that the statistics furnished will not identify individuals or particular organizations. In addition, the Bureau furnishes age and citizenship data from past census records on a fee basis. Funds received for these purposes are used to pay expenses in the performance of such work (13 U.S.C. 8).

OBLIGATIONS BY PROGRAM

[In thousands of dollars]

	1970	1971	1972
1. Redevelopment area assistance	71,045	84,350	65,500
2. Economic development districts and centers assistance	86,851	75,650	94,500
3. Regional development assistance	16,003		
Total obligations	173,899	160,000	160,000
Change in selected resources	-10,533	43,791	41,031
Total program costs, funded	163,366	203,791	201,031

Development facilities funds are used to assist communities whose economic growth is lagging behind the rest of the Nation to construct or improve the basic public services and industrial infrastructure required to attract growth-generating private enterprise. Projects assisted include water and sewer utilities, industrial park development, street and road construction, water pollution control facilities for treatment of industrial waste, tourist facilities, harbor development, skill center construction, health and community facilities, and regional airports.

This type of assistance is currently available through grants-in-aid and loans. Basic grants of up to 50% of the cost of development facilities projects are made to assist, directly or indirectly, in the creation of long-term employment opportunities. These basic grants can be supplemented up to 80% of total project cost depending on the relative need of the community and the nature of the project. Construction grants made by other Federal agencies can also be supplemented up to 80% of project cost enabling communities to take advantage of other Federal programs making significant contributions toward stimulating economic growth.

Long-term, low-interest loans are made when financial assistance is not otherwise available from private lenders or Federal agencies on terms which would permit accomplishment of the project. The interest rate on 1971 loans is 6¾%.

1. *Redevelopment area assistance.*—In 1972 attention will be given to the development facilities needs of urban areas suffering from high unemployment and those of eligible Indian areas which have not received meaningful levels of economic development assistance. It is proposed that assistance to other individual redevelopment areas be reduced in order that more financial resources may be made available to redevelopment areas in development districts.

Program financing for this activity is estimated as follows (obligations in thousands of dollars):

	1970	1971	1972
Grants	63,429	76,850	58,700
Loans	7,616	7,500	6,800
Total	71,045	84,350	65,500

It is estimated that the above financial tools, alone or in combination, will fund the following number of redevelopment area projects: 1970, 130; 1971, 161; 1972, 119.

2. *Economic development districts and centers assistance.*—Assistance will be provided for the public service and infrastructure needs of redevelopment areas and growth centers which are cooperating through districts to achieve economic development on a multicounty scale. Basic grants will be applied to projects which will enhance the ability of growth centers to attract large-scale industrial and commercial growth. The full range of development facilities financial tools will be made available to district redevelopment areas, including bonus and supplemental grants to increase grant financing up to 80% of project cost. District program financing is estimated as follows (obligations in thousands of dollars):

	1970	1971	1972
Grants	83,204	69,150	87,300
Loans	3,647	6,500	7,200
Total	86,851	75,650	94,500

It is estimated that the above financial tools will permit approval of the following number of district projects: 1970, 178; 1971, 147; 1972, 189.

3. *Regional development assistance.*—This activity and additional regional programs are being financed in the Regional development programs appropriation beginning in 1971.

Change in selected resources.....	-22,101	-12,249	-7,021
Total program costs, funded.....	27,892	62,249	42,979

Industrial development funds serve to motivate and assist the location or expansion of private business enterprises in economically distressed communities. The program is the agency's most direct means of generating new employment opportunities in these areas.

Long-term, low-interest direct loans for fixed assets—land, buildings, machinery and equipment—and guarantees of private loans for working capital are currently available. The direct loans are available for up to 65% of total project cost with repayment periods up to 25 years. The interest rate for 1971 loans is 7¼%. Working capital

loans made by private lenders for projects which have received EDA direct loan assistance may be guaranteed for up to 90% of the outstanding balance. In any case, financial assistance must be otherwise unavailable from private lenders or other Federal agencies on terms which would permit accomplishment of the project.

1. *Redevelopment area assistance.*—The development needs of distressed parts of cities, Indian reservations and designated redevelopment areas outside the boundaries of economic development districts are budgeted in this activity. A decrease in assistance for the latter is proposed in 1972 so that more funds can be directed to districts which contain the majority of redevelopment areas. Program financing for redevelopment area assistance is estimated as follows (obligations in thousands of dollars):

	1970	1971	1972
Fixed-asset loans.....	24,599	28,500	22,500
Working capital loan guarantees.....	300		300
Total.....	24,899	28,500	22,800

It is estimated that the above financial tools, alone or in combination, will be applied to the following numbers of area projects: 1970, 28; 1971, 26; 1972, 24.

2. *Economic development districts and centers assistance.*—The increase requested for 1972 will provide a greater number of larger-size industrial development projects to suit the particular needs of redevelopment areas and, especially, growth centers within districts. Direct business development assistance in the centers is designed to improve their capacity to uplift the overall district economy, as well as to serve the population in surrounding distressed areas either through commutation or migration to job opportunities created. Program financing is estimated as follows (obligations in thousands of dollars):

	1970	1971	1972
Fixed-asset loans.....	24,761	17,500	23,000
Working capital loan guarantees.....	45		200
Total.....	24,806	17,500	23,200

It is estimated that the above financial tools will permit financing of the following numbers of district projects: 1970, 15; 1971, 14; 1972, 21.

3. *Collateral protection.*—The employment potential of, and Government investment in, projects in temporary difficulty are frequently protected by the purchase of senior liens to prevent the premature liquidation of projects by other secured creditors. This program covers collateral protection costs in connection with loans made under both the Area Redevelopment Act and the Public Works and Economic Development Act.

Total commitments (contingent liability) for working capital loan guarantees for the entire appropriation are as follows:

	Amount
1970.....	12,711,000
1971 (estimated).....	11,656,000
1972 (estimated).....	11,909,000

OBLIGATIONS BY PROGRAM

[In thousands of dollars]

	1970	1971	1972
1. Redevelopment and other area assistance.....	11,806	11,465	10,520
2. Economic development districts and centers assistance.....	6,111	7,140	8,435
3. Research.....	2,272	2,190	1,900
4. Regional planning and technical assistance:			
(a) Expenses of regional action planning commissions.....	5,643	-----	-----
(b) Expenses of the Federal co-chairman.....	937	-----	-----
(c) Other planning and technical assistance.....	224	-----	-----
Total obligations.....	26,993	20,795	20,855
Change in selected resources.....	1,345	-58	263
Total program costs, funded.....	28,338	20,737	21,118

The activities of this appropriation support local initiatives to achieve lasting economic development by providing expert assistance in identifying problems and solutions and formulating long-range development plans. This support takes the form of technical assistance, research, and grants for professional planning staffs. The funds are primarily applied to redevelopment areas and development districts but may also be extended to other areas of substantial need for which informational and planning support can be instrumental in stimulating local economic development.

1. *Redevelopment and other area assistance.*—Aids communities in their economic development through:

Area planning grants.—These grants, not to exceed 75% of total costs, help provide full-time professional staffs to assist local organizations to plan and implement overall economic development programs. Areas assisted include Indian reservations, U.S. territories, and areas outside the boundaries of development districts.

Technical assistance.—This program provides institutional and informational assistance on a wide variety of economic development problems and projects. Institutional projects are funded to establish permanent sources of competent technical assistance available to local areas and businesses, such as organizations offering managerial counseling. Informational projects supply professional research and technical data to assist communities and organizations to evaluate local resources and apply them to economic development. Special attention in the form of trade adjustment assistance will be given to certain industries to ameliorate the adverse effects of foreign competition. Program volume is estimated as follows (dollars are obligations in thousands):

	1970		1971		1972	
	Number	Amount	Number	Amount	Number	Amount
Area planning grants.....	26	\$914	30	\$1,195	32	\$1,240
Technical assistance.....	208	10,892	208	10,270	180	9,280
Total.....	266	11,806	238	11,465	212	10,520

2. *Economic development districts and centers assistance.*—Aids multicounty districts through:

District planning grants.—These administrative expense grants fund up to 75% of the total cost of salaries and associated expenses required to hire full-time professional personnel for planning and implementing the comprehensive economic development programs of multicounty economic development organizations.

Technical assistance.—The proposed increase for 1972 will provide assistance similar to that outlined for redevelopment and other areas above to district organizations and to growth centers and other localities within district boundaries. Such assistance often stimulates a wide range of other public and private financial assistance leading to economic growth. Program volume is estimated as follows (dollars are obligations in thousands):

	1970		1971		1972	
	Number	Amount	Number	Amount	Number	Amount
District planning grants.....	102	\$4,606	115	\$5,000	115	\$4,955
Technical assistance.....	50	1,505	61	2,140	87	3,480
Total.....	152	6,111	176	7,140	202	8,435

ECONOMIC DEVELOPMENT ADMINISTRATION—Continued

General and special funds—Continued

PLANNING, TECHNICAL ASSISTANCE, AND RESEARCH—continued

3. *Research.*—A continuing program of research, training and education is performed through contracts and grants. This permits the use of the best talent available in universities, other governmental agencies, and private institutions to help determine the causes and remedies of unemployment, underemployment, and low incomes, which information is then made available for use by government and community leaders to help guide the formulation and evaluation of remedial programs. Program volume is estimated as follows (dollars are obligations in thousands):

	1970		1971		1972	
	Num-ber	Amount	Num-ber	Amount	Num-ber	Amount
Research grants and con-tracts.....	29	\$2,272	27	\$2,190	24	\$1,900

4. *Regional planning and technical assistance.*—These regional activities are being financed in the Regional development programs appropriation beginning in 1971.

¹ Includes capital outlay as follows: 1970, \$44 thousand; 1971, \$68 thousand; 1972, \$65 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$490 thousand; 1970, \$286 thousand; 1971, \$286 thousand; 1972, \$286 thousand.

Note.—Excludes \$408 thousand in 1972 for activities transferred to Regional development programs beginning in 1971; 1970, \$340 thousand; 1971, \$408 thousand.

Salaries, support services rendered by other agencies, and other related administrative costs involved in operating Economic Development Administration programs are financed by this appropriation.

1. *Area and district development programs.*—This includes the functions of processing, monitoring, and co-ordinating economic development projects. Subactivity functions are discussed in (a) through (e) below.

(a) *Development facilities.*—This includes the expenses of administering the development facilities program.

(b) *Industrial development loans and guarantees, EDA.*—This includes the expenses of administering the industrial development program.

(c) *Industrial development loans and guarantees, SBA.*—This covers the advance of funds to the Small Business Administration which provides assistance to EDA in preliminary processing and field credit investigations of business loan applications.

(d) *Planning, technical assistance, and research.*—This includes the expenses of administering the planning, technical assistance, and research programs.

(e) *Direct supporting services.*—This includes program direction and guidance, legal, equal employment opportunity, and field coordination assistance to the program functions. The increased personnel will be assigned to investigate contract compliance on approved projects and

to examine potential projects for equal opportunity compliance.

2. *Regional programs.*—This activity is being financed in the Regional development programs appropriation beginning in 1971.

3. *Executive direction and administration.*—This includes the costs of the executive direction of the agency, the staff offices, and the general direction of the regional offices.

¹ Includes capital outlay as follows: 1970, \$0; 1971, \$10 thousand; 1972, \$10 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$0; 1970, \$0; 1971, \$22,849 thousand; 1972, \$40,401 thousand.

The regional development programs of the Department consist of the activities of the Regional Action Planning Commissions and the coordination of the national regional economic development effort.

Five Commissions, covering all or parts of 20 States, have been established pursuant to title V of the Public Works and Economic Development Act of 1965, in the Coastal Plains, Four Corners, New England, Ozarks, and Upper Great Lakes sections of the Nation. The Commissions are composed of a Federal cochairman, and the Governors of the States within each region, and are assisted by a Commission staff that is supported by both the Federal Government and the member States.

The Commissions began in 1966 with a program of planning and technical assistance. In 1967 the Congress authorized supplemental grants to provide a portion of the local share of Federal grant-in-aid programs, allowing the Commissions some influence over the location of Federal investments in their regions. Legislation enacted by the 91st Congress (Public Law 91-123) authorized the Commissions to make first dollar grants, where the basic Federal share is not available, and to conduct demonstration and training programs. The Secretary of Commerce provides funds to the Federal cochairmen for the Commissions' programs.

1. *Development programs.*—The Commissions concentrated during their initial years on the development of broad comprehensive economic development plans. Preliminary findings indicate large investments are needed in transportation, human and natural resources, and industrial development to bring the regions on a parity with the national level of prosperity. A continuation of the action program initiated in 1971 is budgeted for 1972 to make a beginning on the improvements required to provide the jobs and higher incomes needed to close the gap between the regions and the Nation. Funds are also budgeted to continue the Department's regional research program. Current program levels and the estimates for 1972 are:

Region:	1971	1972
Coastal Plains.....	\$7,055,000	\$7,270,000
Four Corners.....	6,285,000	6,475,000
New England.....	7,720,000	7,955,000
Ozarks.....	6,670,000	6,875,000
Upper Great Lakes.....	7,370,000	7,595,000
Subtotal.....	35,100,000	36,170,000
Regional research.....	377,000	377,000
Total.....	35,477,000	36,547,000

2. *Administrative expenses.*—This activity provides for the staff costs of the Commissions, the Federal cochairmen, and the Special Assistant to the Secretary for Regional Economic Coordination.

The administrative expenses of all the Commissions are paid 50% by the Federal Government and 50% by the member States. The Federal interest in each Commission is represented by a Federal cochairman who is assisted by a staff.

The Office of Regional Economic Coordination was established pursuant to Executive Order 11386 and assists the Secretary of Commerce in administering title V of the Public Works and Economic Development Act of 1965. Major responsibilities include advising the Secretary on regional economic development policy, coordinating the Federal review of the comprehensive plans of the Regional Commissions, preparation of the title V budget, and conducting the regional research program.

The following are the administrative cost levels:

Region:	1971	1972
Coastal Plains.....	\$541,000	\$545,000
Four Corners.....	516,000	520,000
New England.....	593,000	597,000
Ozarks.....	506,000	510,000
Upper Great Lakes.....	414,000	418,000
Subtotal.....	2,570,000	2,590,000
Office of Regional Economic Coordination.....	408,000	408,000
Total.....	2,978,000	2,998,000

The Regional Action Planning Commissions' Trust Fund consists of grants in the Commissions from the Department of Commerce pursuant to title V of the Public Works and Economic Development Act of 1965, as amended. The Commissions receive grants for their administrative expenses, technical assistance, and State investment planning. The 20 State members of the Ozarks, Upper Great Lakes, New England, Coastal Plains, and Four Corners Commissions match the Federal grants for administrative expenses. The State contribution is estimated at \$1,383 thousand in 1972.

The table below indicates the estimated level of activity (obligations in thousands of dollars):

Coastal Plains Regional Commission:			
1. Administrative expenses.....	494	600	600

90 Outlays, excluding pay increase supplemental.....	8,956	13,816
91.20 Outlays from civilian pay act supplemental.....	617	26

¹ Includes capital outlay as follows: 1971, \$31 thousand; 1972, \$20 thousand.

Note.—Includes \$14,325 thousand in 1972 for activities previously financed from Salaries and expenses, Business and Defense Services Administration, and Salaries and expenses, Office of Field Services (in thousands of dollars):

	1970	1971
Salaries and expenses, BDSA.....	7,147	7,811
Salaries and expenses, OFS.....	5,793	6,102

Actual transfers in 1971 were: Salaries and expenses, Business and Defense Services Administration, \$5,381 thousand; Salaries and expenses, Office of Field Services, \$4,315 thousand.

This appropriation includes programs previously financed by Business and Defense Services Administration, Salaries and expenses, the Office of Field Services, Salaries and expenses and the Foreign Trade Zones Board and International Resources Policy Division programs financed under International activities, Salaries and expenses. The activities have been consolidated into two new operating units: the Bureau of Domestic Commerce and an import affairs organization.

The purpose of the financial and operation reorganization is to bring more closely together and improve the effectiveness of programs directly affecting the domestic business economy, including liaison with business and business associations, services to business, the administration of import control programs, and the former BDSA activities relating to Government/business policy problems and the analysis and reporting of industry and commodity activity. The budget structure has been reorganized to more clearly present the resource allocations and justification for these activities.

The reorganization of the domestic business activities is being accomplished within the existing program level.

1. *National business programs and policy studies.*—Studies are conducted and reports made on issues that affect the economic and technological growth of the domestic economy, including continuing attention to marketing, consumer affairs, management-labor relations problems, insurance, business support of national growth policies and programs. Reviews requests of individual companies for trade adjustment assistance, and makes certifications enabling injured companies to obtain tax exemption or financial assistance under the provisions of the Trade Expansion Act of 1962.

2. *Business research and data service.*—Existing data from Government and non-Government sources on business and industrial activity are evaluated and organized into a consistent body of information for all major industrial sectors to the four digit SIC level. Data elements include pricing, product output, raw materials used, employment, sales, distribution, and regulation.

The data are used by Government, industry, and others in analyzing and assessing developments and trends in selected industry areas, and in establishing appropriate policy and program recommendations. Information is disseminated through a series of 10 periodic reports on major industries, and the annual "Industrial Outlook." Special tabulations and reports are made available to individual users on a cost/reimbursable basis.

3. *Business services.*—Direct contact with the local business community through 42 field offices, and through liaison with national business and trade organizations, State and local governments, professional groups and institutions to: (a) promote the support and participation

of business in national programs and policies affecting business, and (b) provide local assistance and services to business in utilizing business-related information generated by Commerce and other agencies.

Information, promotional assistance, and certification services for duty-free entry of foreign goods for exhibition purposes are provided to industry associations, and business and civic groups relating to domestic trade fairs. Requests for Federal Government recognition and participation in international expositions to be held in the United States are reviewed and recommendations prepared.

4. *Import affairs.*—Analyses are prepared to assess the economic impact of certain foreign products on domestic markets, and to assist the executive branch and the Congress in the development of policies and programs to improve the position of certain industries experiencing difficulty from imports.

Programs are administered under law or international agreement concerning the entry of foreign products as follows: (a) textiles, (b) oil, (c) scientific and technical equipment for research and educational programs, (d) watch components, (e) products entering foreign trade zones, (f) foreign excess property, (g) coffee, (h) steel, and other similar international commodities.

71 Obligations incurred, net.....			110,000
74 Obligated balance, end of year.....			-50,000
90 Outlays.....			60,000

Note.—Includes \$110,000 thousand for activities previously financed from business loans and investment funds, Small Business Administration, 1970, \$0; 1971, \$15,400 thousand.

The Trade Expansion Act of 1962 authorizes trade adjustment assistance to firms who are injured or threatened by increased imports where the rise in the level of imports is due to a tariff reduction granted under a trade agreement entered into by the United States. The rationale for making assistance available to those firms injured by imports is that, since tariff reductions benefit the entire economy, the Nation should share the cost of any injury to individual businesses resulting from this policy.

Under the law, a petition for a determination of injury may be filed with the Tariff Commission by an industry or an individual firm. The Tariff Commission reviews the case and files a report with the President. Upon a finding by the President of injury, firms are authorized to apply to the Department of Commerce for technical or financial assistance. The Department of Commerce certifies a firm to be eligible for assistance, determines the type and extent of assistance appropriate, and provides the technical and financial assistance. Heretofore, after receipt of Commerce Department certification, a firm applied to the Small Business Administration for financial assistance. Effective in 1972, financial assistance will be provided by the Commerce Department. This transfer in responsibility will reduce the number of Government agencies a firm must deal with in applying for assistance.

Firms which have been certified eligible may receive financial assistance which consists of guaranteed loans, immediate participation loans, or direct loans for land, plant, buildings, equipment, facilities, machinery, and in exceptional cases, working capital. The loans may be granted with maturities of 25 years or less and bear interest rates established by the Secretary of the Treasury.

To date, the piano, sheet glass, and barber chair industries have been found to be injured, in addition to three firms in other industries. Ten firms have applied for assistance under these findings. The Commission is currently reviewing elements of the shoe industry and the billiard ball industry.

The Department is required by law to maintain operating reserves with respect to anticipated claims under the loan guarantee portion of the program. By establishing reserves of 10% of the guarantee amount, obligations of \$10 million will support a \$100 million guarantee program. This, coupled with the \$100 million loan program will comprise a 1972 program totaling \$200 million.

¹ Includes capital outlay as follows: 1970, \$323 thousand; 1971, \$246 thousand; 1972, \$230 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$1,850 thousand (1970 adjustments, -\$24 thousand); 1970, \$2,923 thousand; 1971, \$4,057 thousand; 1972, \$3,487 thousand.

Note.—Includes \$455 thousand in 1972 for Trade Mission activities previously financed from USIA, Special International Exhibitions; 1970, \$465 thousand; 1971, \$455 thousand.

International activities of the Department of Commerce are promotional, informational, and policy formulation programs designed to advance and protect U.S. foreign commerce. In response to the continuing serious balance-

of-payments problems, current emphasis is on activities that stimulate and assist U.S. industry to expand current export activity and to develop foreign markets for long-term export sales. These programs are a major positive element of the national effort to bring our balance of payments into durable equilibrium. These activities strengthen the U.S. economy by fostering greater business earnings and creating additional jobs.

1. *International trade promotions.*—The sale of U.S. goods and services overseas is promoted by providing facilities for the exhibition of American products in international trade fairs and U.S. trade centers, and by supporting U.S. business efforts to reach and develop foreign market opportunities through the trade missions program.

The effectiveness of this activity is indicated by the dollar volume of first-year export sales by participating firms and their overseas sales agency relationships established as a result of these promotions. Actual and projected results of major ongoing trade promotion programs are as follows:

(a) *Trade and industrial exhibitions.*—At 22 commercial exhibitions in 1970, 12-month export sales totaled \$77 million and 450 new agencies were established. Based on operating experience, expected results from 19 commercial exhibitions planned for 1972 are projected at about \$70 million in sales and the establishment of 400 new agencies.

(b) *Trade centers.*—Twelve-month export sales made at 49 shows held at eight trade centers in 1970 totaled \$104 million and 400 new agencies were established. Expected results from 53 shows planned for 1972 are projected at \$170 million in sales and the establishment of about 560 new agencies. Use of trade center facilities by individual firms between regularly scheduled shows in 1970 resulted in additional sales of \$53 million. Between-show promotions in 1972 are expected to result in more than \$63 million in export sales. As part of the continuing emphasis on the less developed countries, it is proposed to establish four trade development centers, which are a modification and adaptation of the trade center concept designed specifically for developing countries with large potential for export market growth and other promising markets where particular problems exist. This trade development program will offer U.S. business increased market and product exposure by assisting U.S. Foreign Service posts in conducting a continuing program of trade promotion activities in selected areas of the world. The first of these trade development centers is planned for the latter part of 1971 and will involve conversion of the existing trade center at Bangkok, where this adaptive technique has been developed and tested. Subsequent trade development centers will be established in Buenos Aires, Lagos, and probably either East Africa or the Middle East. The trade development centers will be financed within available funds by closing the Milan Trade Center and by reprogramming part of the joint export association funds intended for less developed countries.

(c) *Joint export associations.*—This program was begun in 1969 to develop export markets through jointly financed contracts with groups of private U.S. firms. At the end of the first half of 1971, seven contracts were in force covering projects anticipating sales of \$70 million during the terms of the contracts. It is expected that additional sales will result beyond the life of the contracts. This program will continue in 1972 at a lower funding level.

(d) *Trade missions.*—Trade missions are teams of U.S. businessmen traveling abroad to develop business opportunities. Three different types of missions are supported by this activity, as follows:

A. Industry-organized/Government-approved (IOGA) missions are organized by trade associations, States, and cities, and sponsored by the Department of Commerce. The 255 firms participating in the 30 IOGA missions in 1970 established 68 agencies overseas and estimated that, within 12 months, they would make \$30 million of export sales to contacts made through the missions. Present plans call for 30 such missions in 1972.

B. Specialized missions are organized and sponsored by the Department of Commerce. Through the Department's market research and Foreign Service recommendations, a single product theme is selected and an itinerary developed to pursue identified opportunities. Then business groups in the related U.S. industry are invited to organize an IOGA mission. When business groups do not take advantage of these opportunities, the Department organizes a small specialized mission. The 56 members of nine specialized missions conducted in 1970 anticipated 12-month sales of \$9 million from mission activities and the four agency agreements concluded. Fifteen such missions are planned for 1972.

C. Government-organized missions are teams of business executives and Government officials who go abroad to assess opportunities for future trade development, and report their conclusions to the U.S. business community and Government agencies. Two such missions are planned for 1972.

2. *Export development in the United States.*—Through an integrated series of marketing techniques, U.S. industry is motivated to increase its share of world exports. American firms not now exporting are stimulated to enter foreign markets, and present exporters to increase their foreign activities. These efforts include special dissemination of detailed information on export sales potentials by country and product, counseling on export procedures and techniques, and an export awareness advertising campaign to dispose U.S. industry to make exporting a standard consideration in corporate planning.

3. *International commercial information.*—Business and Government agencies are provided information on economic and commercial conditions and developments abroad. Assistance is rendered to American exporters in identifying overseas sales opportunities, and in selecting and establishing profitable relationships with overseas representatives and manufacturers through such media as Trade Lists, World Trade Directory Reports and Trade Contact Surveys, and the American International Traders Index. Counseling is provided to U.S. firms on business practices, legal requirements, business and investment climates, trade regulations, etc., in all countries of the world. Furthermore, several series of reports are regularly published to describe and analyze these and related topics, economic and commercial data, and trade trends of significance to U.S. industry.

4. *International trade and investment policy.*—Efforts are made to remove barriers to, improve the climate for, and otherwise advance and protect the interests of American business operating abroad. Such efforts include (1) the development of policies and programs in connection with international trade, finance and export credit, resources, business practices, and exporter service industries; (2) the

provision of special assistance to business firms or industry groups in identifying and analyzing specific major trade opportunities and in dealing with U.S. and foreign policy, administrative, and legal problems confronting them in market development efforts; (3) the preparation of specific programs for each country where there are substantial U.S. commercial interests in order to identify the problems facing U.S. trade and investment in the country, and to summarize the policy and promotional measures responsive to these problems and opportunities which will be undertaken during the year; (4) the formulation of long-term policies in the international investment field; (5) the facilitation of investment in developing countries by U.S. firms; (6) the conduct of international commercial and financial negotiations in major international forums (such as GATT, OECD, UN); and (7) the representation of American business interests in obtaining equitable treatment in foreign countries. In addition, U.S. policy and business interests are advanced by stimulating investment and licensing by foreign firms in the United States, particularly in those industries where there is clear potential for import savings.

5. *Foreign commercial/economic program support.*—The Commerce Department participates in the recruitment, assignment, career management, and promotion of commercial/economic officers in the Foreign Service who represent U.S. commercial interests overseas.

The use of excess foreign currencies to support export expansion programs in developing countries helps to improve our balance-of-payments position and assists in strengthening the U.S. economy by stimulating and expanding our foreign commerce. In those developing countries where the United States holds an excess of foreign currency, the use of such currencies enables the purchase of market research and the mounting of commercial exhibitions to bring American products to the attention of foreign buyers, and promotes U.S. foreign policy objectives by presenting a favorable image of the United States in the developing countries.

¹ Includes capital outlay as follows: 1970, \$1 thousand; 1971, \$12 thousand; 1972, \$12 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$62 thousand (1970 adjustments, \$4 thousand); 1970, \$268 thousand; 1971, \$268 thousand; 1972, \$268 thousand.

Export controls are required by the Export Control Act of 1949 and the Export Administration Act of 1969 to control exports to the extent necessary (1) to protect the national security; (2) to protect the domestic economy from the excessive drain of scarce commodities; and (3) to further the foreign policy of the United States. The program is administered by selective licensing of U.S. exports of strategic or short supply commodities and exports to certain countries in accordance with U.S. foreign policy interests.

In 1972, export license applications are expected to total about 100,000 (or 400 per day), representing a decrease in total receipts. The reduction is concentrated entirely in free world cases. Applications for the Communist countries will remain at the same level as 1971. For these countries, reductions in some commodity areas are expected to be offset by increased applications in areas that remain under license. Cases for Communist destinations require more intensive individual processing than those for free world countries; consequently, a heavy licensing workload is expected to continue. The reduction in free world license applications will result, it is anticipated, from the termination of some controls and from the expanded use of multiple licenses. The latter require more review and analysis as a prelude to licensing judgments and more extensive postlicensing supervision, so there is less of a workload savings that the reduction in application volume would appear to indicate.

In addition to the processing of license applications, there will continue to be a heavy volume of analytical work connected with the review of U.S. controls, the biennial review of international (COCOM) controls, and the consideration of requests for exceptions to the COCOM embargo. Lastly, 1972 will see a marked increase in the compliance work in the area of export clearance initiated by the Department in 1971.

MINORITY BUSINESS ENTERPRISE—Continued

General and special funds—Continued

SALARIES AND EXPENSES—continued

The Office of Minority Business Enterprise was established under Executive Order 11458 of March 5, 1969, and began operations in 1969. The office: (a) coordinates and strengthens Federal programs which contribute to the establishment of minority business enterprise; (b) stimulates the mobilization of the resources of State and local governments, business and trade associations, universities, foundations, and professional organizations and other groups, for the growth of minority business enterprises; and (c) collects and disseminates information that is helpful to persons and organizations throughout the Nation in undertaking and successfully operating a minority business.

In its leadership role of coordinating the minority business enterprise program, the office seeks to create the best climate whereby the minority people of the United States have an equal opportunity to participate in the American business system.

Working with other Federal agencies and private organizations, the Office of Minority Business Enterprise has initiated programs in the areas of finance, management assistance, business opportunities, and community organizations which have and will continue to increase opportunities and abilities of minorities to become owners and managers of successful businesses.

In 1972, a field staff will be established in selected metropolitan areas having significant minority populations. The field staff will aid in carrying out the Office's responsibilities at the local community level.

Executive Order 11523, April 9, 1970, established the National Industrial Pollution Control Council to advise the President and the Chairman of the Council on Environmental Quality, through the Secretary of Commerce, on programs of industry relating to the quality of the environment. The role of the NIPCC is to: (1) survey and evaluate the plans and actions of industry in the field of environmental quality, (2) identify and examine problems of the effects on the environment of industrial practices and the needs of industry for improvements in the quality of the environment, and recommend solutions to those problems, (3) provide liaison among members of the business and industrial community on environmental quality matters, (4) encourage the business and industrial community to improve the quality of the environment, and (5) advise on plans and actions of Federal, State, and local agencies involving environmental quality policies affecting industry which are referred to it by the Secretary of Commerce, or by the Chairman of the Council on Environmental Quality through the Secretary.

The activity is carried out through 30 subcouncils of industry categories such as chemicals, airlines, each composed of six to eight industry executives of large and small companies. These subcouncils promote a knowledgeable industry-by-industry approach to industrial environmental quality improvement.

¹ Selected resources for June 30 are as follows: Unpaid undelivered orders, 1969, \$1,332 thousand (1970 adjustments \$1 thousand); 1970, \$1,032 thousand; 1971, \$1,032 thousand; 1972, \$1,032 thousand.

The U.S. Travel Service develops, plans, and carries out a program to stimulate and encourage travel to the United States by residents of foreign countries. Its marketing division supervises (1) the creation and placement of trade and consumer travel advertising, (2) the production and distribution of sales promotion materials to the public and the travel industry abroad, (3) the solicitation and writing of timely articles for placement in the foreign press, (4) the production of travel films for use overseas and (5) the operation of overseas offices for carrying out promotional activities at the local level. Its convention office develops and implements programs for attracting international congresses and organizations to hold meetings in the United States. Its visitor services division works with the domestic travel industry and with U.S. communities for improving the reception, service, and hospitality given to foreign visitors, works with other foreign and U.S. Government agencies to reduce official barriers to travel, and administers a matching grant program to promote foreign travel to selected areas of the United States and by a research and analysis division which conducts research programs in the support of promotional activities.

The budget estimate for the U.S. Travel Service for 1972 is \$5,900 thousand an increase of \$1,327 thousand over the 1971 appropriation.

Budget increases are requested in 1972 for printing of promotional literature and for sponsorship of special exhibitions in major tourist market centers around the world, including presentation of the VISIT USA mobile exhibit, which appeared for the first time at EXPO '70 in Osaka, Japan.

UNITED STATES TRAVEL SERVICE—Continued

General and special funds—Continued

SALARIES AND EXPENSES—continued

Increases are also requested for the overseas advertising program, which in 1971 was limited to four countries. The 1972 advertising budget provides for a campaign in seven of the eight primary markets, with limited campaigns in Australia and South America aimed at the travel trade.

Additionally, plans have been made for opening a regional office in Canada. There are few obstacles to travel by Canadians to the United States, and it is expected that an aggressive promotional program there could produce benefits fairly quickly.

Legislation has been approved by the Congress which raises the level of authorizations for the Travel Service from \$4.7 million to \$15 million. Included in the legislation is authorization for a matching funds program. The 1972 budget estimate contains \$420 thousand for this new program.

In 1970, the advances and reimbursements program represents the Federal Government participation (other than the U.S. Travel Service) in the VISIT USA exhibit at EXPO '70 in Osaka, Japan.

In 1971, the advances and reimbursements program consists of joint Travel Service-Bureau of Indian Affairs participation in a project celebrating the 350th anniversary of the landing at Plymouth Rock.

SCIENCE AND TECHNOLOGY

ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION

Note.—The functions of this Administration have been transferred to the National Oceanic and Atmospheric Administration. Appropriations previously made to the Environmental Science Services Administration are merged with the amounts shown under the National Oceanic and Atmospheric Administration.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the Environmental Science Services Administration National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft; expenses of an authorized strength of 339 345 commissioned officers on the active list; pay of commissioned officers retired in accordance with law and payments under the Retired Serviceman's Family Protection Plan; purchase of supplies for the upper-air weather measurements program for delivery through December 31 of the next fiscal year; purchase of not to exceed seven passenger motor vehicles for replacement only (including one for police-type use); \$140,713,000 \$179,956,000: Provided, That this appropriation shall be reimbursed for at least press costs and costs of paper for navigational charts furnished for official use of other Government departments and agencies. (Department of Commerce Appropriation Act, 1971; Reorganization Plan No. 4 of 1970, effective October 3, 1970.)

Total.....	160,034

1. *Environmental prediction and warnings.*—Operations in this activity include the taking, communication, processing, and archiving of observations of current weather conditions and the preparation and issuance of public and special forecasts and warnings such as hurricane and tornado, air pollution potential, fire weather, agricultural, aviation, marine, and river and flood. The 1972 increases provide for expansion of the air pollution observational support units, the weather radar network, and the forecasts and warnings communications networks, for increasing the data analyses and processing capability

to utilize advanced techniques in improving short-range forecasts, and for summarizing and publishing climatic data for 1961-70.

2. *Mapping, charting, and marine description.*—Operations under this activity encompass the systematic collection, processing, analysis, and dissemination of data required for mapping and describing: (a) The coastal waters and estuaries of the United States, including the Great Lakes, (b) the continental shelves and related deep ocean areas, and (c) the national airspace system. Primary end products widely used by the public and private sectors are aeronautical and nautical charts, bathymetric maps, tide and current charts and tables, and water level information. The 1972 increases will provide funds to reach an effective level of maintenance and repair for the National Oceanic and Atmospheric Administration oceanographic and hydrographic surveying fleet; to begin automating marine chart data acquisition, processing, compilation, and reproduction; to move forward in systematically surveying and mapping the U.S. continental shelves and deep ocean basins; to initiate a program to determine the offshore boundary between Federal and State jurisdictions; to revise the charts for the Great Lakes; and to strengthen the environmental data storage and retrieval capabilities.

3. *Solid earth monitoring and services.*—Operations under this activity include precise measuring of: (a) the physical parameters of the earth, (b) the distribution and direction of the earth's magnetic field, (c) the location and intensity of earthquakes, (d) maintenance of the National Geodetic Control Networks, and (e) production of seismic risk maps. The 1972 increases will provide for extending urban-type horizontal geodetic control surveys into the rapidly developing urban regions across the country; for maintenance and repair of NOAA's geomagnetic and seismological observatories; and for installation and servicing of equipment and instrumentation in the National Strong Motion Network.

4. *Ocean fisheries and living resources.*—Operations under this activity provide services connected with assessing the abundance and geophysical distribution of living marine resources; and identifying, describing, and explaining environmentally caused fluctuations in these resources. The 1972 increases will provide for continuous operation of a marine monitoring and assessment program (MARMAP) and a State-Federal fisheries management program; for a strengthening of the mechanisms for control of international exploitation of resources, for specific fishery analyses, for mercury contaminants, and enforcement and surveillance programs.

5. *Retired pay, commissioned officers.*—This provides for retirement pay in 1972 for an average of 129 commissioned officers as authorized by 33 U.S.C. 853(o), and payments to survivors of retired officers under the retired serviceman's family protection plan.

6. *Executive direction and administration.*—This activity provides for the overall technical leadership and top management functions of the National Oceanic and Atmospheric Administration and for administrative management and support activities at headquarters and in the field.

RESEARCH, DEVELOPMENT AND FACILITIES

For necessary expenses of research, including development, testing, and evaluation of new operational systems and equipment; maintenance, operation, and hire of aircraft; acquisition and installation of research instrumentation; and construction of facilities, including initial equipment; alteration, modernization, and relocation of facilities; and acquisition of land for facilities; \$110,942,000, to remain available until expended. (Reorganization Plan No. 4 of 1970, effective October 3, 1970.)

[RESEARCH AND DEVELOPMENT]

For expenses necessary for the conduct of research by the Environmental Science Services Administration, including development, testing, and evaluation of new operational systems and equipment; maintenance, operation, and hire of aircraft; and the acquisition and installation of research instrumentation; \$27,500,000, to remain available until expended. (Department of Commerce Appropriation Act, 1971.)

[FACILITIES, EQUIPMENT, AND CONSTRUCTION]

For an additional amount for expenses necessary for the construction of surveying ships, magnetic, seismological, oceanographic, and meteorological facilities, including the initial equipment and outfitting of new facilities; alteration, modernization, and relocation of operational facilities; acquisition, establishment, and relocation of research facilities and related equipment; and the acquisition of land for the foregoing facilities; \$4,365,000, to remain available until expended. (Department of Commerce Appropriation Act, 1971.)

[CONSTRUCTION OF FISHING VESSELS]

For expenses necessary to carry out the provisions of the Act of June 12, 1960 (74 Stat. 212), as amended by the Act of August 30, 1964 (78 Stat. 614), to assist in the construction of fishing vessels, \$200,000, to remain available until expended. (Department of the Interior and Related Agencies Appropriation Act, 1971.)

[FEDERAL AID FOR COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT]

For expenses necessary to carry out the provisions of the Commercial Fisheries Research and Development Act of 1964 (78 Stat. 197) as amended by the Act of October 4, 1968 (82 Stat. 957) \$4,040,000, of which not to exceed \$240,000, shall be available for program administration: *Provided*, That the sum of \$3,800,000 available for apportionment to the States pursuant to section 5(a) of the Act shall remain available until the close of the fiscal year following the year for which appropriated: *Provided further*, That the unexpended balance on June 30, 1970, of the amount appropriated under this head in fiscal year 1970 for disaster aid pursuant to section 4(b) of the Act shall remain available until expended. (Department of the Interior and Related Agencies Appropriation Act, 1971.)

[ANADROMOUS AND GREAT LAKES FISHERIES CONSERVATION]

For expenses necessary to carry out the provisions of the Act of October 30, 1965 (16 U.S.C. 757a-757f), as amended by the Act of May 14, 1970 (84 Stat. 214), \$2,168,000, to remain available until expended. (Department of the Interior and Related Agencies Appropriation Act, 1971.)

Total.....	93,430

This appropriation provides for the research and development and the acquisition of facilities to support the operational programs of the National Oceanic and Atmospheric Administration.

1. *Environmental prediction and warnings.*—This activity includes programs to increase understanding of the composition and dynamics of the atmosphere; to develop better instrumentation and techniques for weather

observing, analysis, and forecasting; to provide atmospheric and river observational devices and instrumentation; and to equip specialized meteorological and hydrologic laboratories and observatories. The 1972 increases include upgrading of facilities, air and water pollution abatement projects, installation of automatic surface meteorological observing equipment, instrumentation of additional air pollution observational support units, instrumentation of hydrologic equipment for data collection by satellite, expansion of weather modification, hurricane, tornado, and severe storm research, and development of remote sensing mobile meteorological equipment.

2. *Mapping, charting, and marine description.*—This activity includes the research and facilities directed toward continued improvement of NOAA's mapping and charting data acquisition, analysis, processing, and production capability and toward increasing our understanding of ocean and lake properties, processes, and environmental interactions. The 1972 increases will provide for further studies in the areas of marine environmental protection; sea-air interactions; environmental effects of marine mining; and the physical processes along coastlines and estuaries. Funds are also requested for development, test, and evaluation of instrumentation for obtaining oceanographic and atmospheric data; to begin equipping survey ships with water pollution controls; to procure equipment for automation of marine chart production; and for initiation of a program to use deep exploration submersible systems and for continental shelf exploration.

3. *Solid earth monitoring and services.*—This activity includes research directed toward understanding the intricate processes and phenomena of the solid earth, such as determining the size and shape of the earth and seismological studies and warnings; also included is the procurement of equipment, facilities, and the equipping of these facilities. The 1972 increase provides for research to improve geodetic technology; to improve earthquake investigations and services; and for updating geodetic equipment.

4. *Ocean fisheries and living resources.*—This activity includes research directed toward living marine resources and toward improved methods of sport fishery management; also the procurement of equipment, facilities, and the equipping of these facilities. The 1972 increase provides for research on marine contaminants; on the marine resource monitoring and assessment analysis; on the effect of environment on living marine resources; on dynamics and ecology of estuarine waters; continued implementation of research in the sport fisheries program; and for necessary laboratory facilities and equipment aboard vessels.

5. *Environmental satellite.*—This activity provides for research in the environmental satellite program to determine the most beneficial method of data selection, collection, and use by operational programs.

6. *Sea grant.*—The talents and knowledge of academic scientists and engineers are utilized in the practical problems of marine resource development and management. The 1972 program will provide for 11 institutional support and about 30 project support programs.

7. *Data buoy project.*—The data buoy project was established to carry out the development of a system of automatic ocean buoys for obtaining oceanic and atmospheric data. This network of automatic buoys throughout the ocean is designed to bridge an information gap. The data buoy project is currently developing and deploying a

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION—Continued

General and special funds—Continued

RESEARCH, DEVELOPMENT, AND FACILITIES—continued

network of prototype (pilot) oceanographic and marine meteorological data collection buoys preparatory to a future decision on whether or not to deploy an operational system.

8. *Tropical experiment.*—This project is a part of the Global Atmospheric Research Program (GARP)—an international research program to provide scientific knowledge to improve the techniques of weather forecasts, to determine the feasibility of large scale weather modification, and to assess the long-term effects of atmospheric pollution. The tropical experiment is designed to provide an understanding of the mechanisms by which energy locked in water vapor of the air is released and then applied to driving the global atmospheric circulation.

9. *International Field Year for the Great Lakes (IFYGL).*—The International Field Year for the Great Lakes (IFYGL) is a joint United States-Canadian contribution to the International Hydrologic Decade. A single lake and basin, Lake Ontario, has been chosen for study under IFYGL. The central objective is to provide a sound scientific basis for development of an economical, efficient, and healthy water management plan to meet the needs of the United States and Canadian citizens living within the drainage basin of the Great Lakes—St. Lawrence region. This is to be achieved through two major programs: water quantity and water quality.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$636 thousand (1970 adjustments, \$5 thousand); 1970, \$890 thousand; 1971, \$774 thousand; 1972, \$913 thousand.

Note.—Estimate is for activities previously carried under Management and investigation of resources, special foreign currency program, Bureau of Commercial Fisheries: 1970, \$15 thousand; 1971, \$900 thousand.

This program uses foreign currencies which are in excess of the normal requirements of the United States to supplement domestic research and development and to encourage international cooperation in environmental research and allied sciences. The program for 1972 includes:

1. *Environmental prediction and warnings.*—Included under this activity are studies of cloud physics and other meteorological factors; study of the agricultural potential for arid areas where rainfall amounts are marginal; studies of techniques for regional analysis and prediction of marine environmental factors; and studies of meteorological characteristics of watersheds and river basins for use in developing hydrologic models and improving river forecasting techniques.

2. *Mapping, charting, and marine description.*—Studies will be made to obtain a better understanding of the large scale motions of the ocean system and its interaction with the atmosphere.

3. *Solid earth monitoring and services.*—This activity includes studies of the earth's magnetic field and its secular changes, and studies of energy dissipated along fault lines as compared with latent energy which is built up in other areas.

4. *Ocean fisheries and living resources.*—This activity includes technological research involving protein nutritional and fish preservation studies; studies of fishing vessels and gear; and a translation program to gain marketing and technological information from foreign fishery publications and reports.

5. *Environmental satellite.*—This activity provides for use of satellite data in studies of meteorology, geomagnetism, ionospheric physics, and radio propagation.

Total.....	46,489	-222	49,465	41,439	40,832

Note.—Estimate is for activities previously financed from: Department of Commerce, Environmental Science Services Administration, Satellite operations: 1970, \$7,515 thousand; 1971, \$25,000 thousand.

This appropriation provides for the acquisition and operation of a national satellite system to observe worldwide environmental conditions and to process, analyze, and archive the data for use in environmental services and research.

The first operational satellite system, the Tiros Operational Satellite (TOS) began operation in 1966 providing global observation during daylight hours. Improved TOS (ITOS) spacecraft, which adds a nighttime observational capability to the system, was launched in 1970. Funds to acquire an advanced system, the Geostationary Operational Environmental Satellite (GOES), were provided in 1970 and 1971. This system is designed to provide nearly continuous observation of the earth and its environment, initially of the Western Hemisphere.

The 1972 estimate provides for continued operation of the ITOS system, continued acquisition of the GOES system, and continuing operational use of NASA's synchronous Applications Technology Satellites, ATS-1 and ATS-3, with particular emphasis on using the data in the severe storm and hurricane surveillance and advisory program.

1. *Spacecraft and launching.*—Covers the design, construction, and launching of operational spacecraft. Funds are required in 1972 to continue procurement of two ITOS and one GOES spacecraft, to complete the modification of two ITOS spacecraft, and to initiate modification of a third. Funds are also required in 1972 to continue procurement of two launch vehicles and initiate one launch service.

2. *Operations.*—Includes (a) establishment and operation of facilities to command the spacecraft, acquire the data, and relay the data to the processing and analysis center; (b) operation and maintenance of facilities for converting satellite signals to forms usable in the environmental service programs and for dissemination, display, and application of the high-resolution data from ITOS and GOES; and (c) technical management and engineering support.

The 1972 request provides for continued around-the-clock operation and maintenance of facilities and for personnel and equipment needed to acquire, process, and display the data from the Geostationary Operational Environmental Satellite.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$385 thousand; 1970, \$411 thousand; 1971, \$411 thousand; 1972, \$411 thousand.
Note.—Estimate is for activities previously financed under the Department of the Interior.

This fund is derived from the receipts of the sales of fur sealskins and other wildlife products of the Pribilof Islands, and is available for appropriation for administration of the Pribilof Islands, and payment to Alaska from Pribilof Islands receipts as required by law (72 Stat. 339).

1. *Administration of Pribilof Islands.*—Part of the proceeds from sales of fur sealskins and other wildlife products of the Pribilof Islands is used for: (a) management of the Alaska fur seal herd; (b) furnishing schooling and other community services to the natives of the islands; (c) construction of and maintenance of buildings and roads; and (d) maintenance and operation of a supply vessel.

2. *Payment to Alaska from Pribilof Islands fund.*—The above appropriation normally provides for payment to the State of Alaska of 70% of net proceeds from sales of fur sealskins and other wildlife products of the Pribilof Islands as required by the Alaska Statehood Act (72 Stat. 339). Proceeds are estimated to be insufficient in 1971 and 1972 to provide for this payment.

Note.—Estimate is for activities previously financed in this account under the Department of the Interior.

An amount equal to 30% of the gross receipts from customs duties on fishery products is appropriated for resources and environment; public service; and development, test, and evaluation. These funds supplement moneys appropriated to the National Oceanic and Atmospheric Administration for the same purposes under the appropriations, Salaries and expenses; and Research, development, and facilities. These funds also cover the expenses of the American Fisheries Advisory Committee (68 Stat. 376).

The NOAA revolving fund represents that portion of the Corps of Engineers—Civil revolving fund assets applicable to the U.S. Lake Survey functions which were transferred to NOAA from the Department of the Army on October 3, 1970, pursuant to Reorganization Plan No. 4 of 1970. This fund provides temporary financing of Lake Survey operations, which are subsequently charged to the supporting accounts.

Budget program.—The 1971 amounts represent operations only from October 3, 1970. The 1972 amounts represent the same level of operations on a 12-month basis.

40 Pay increase (Public Law 91-305)	1,050		
44.20 Proposed supplemental for civilian pay act increases		2,694	
Relation of obligations to outlays:			
71 Obligations incurred, net	48,594	52,694	57,127
72 Obligated balance, start of year	5,382	5,218	5,537
74 Obligated balance, end of year	-5,218	-5,537	-6,266
77 Adjustments in expired accounts	-85		
90 Outlays, excluding pay increase supplemental	48,673	49,784	56,295
91.20 Outlays from civilian pay act supplemental		2,591	103

¹ Includes capital outlay as follows: 1970, \$701 thousand; 1971, \$284 thousand; 1972, \$299 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$3,081 thousand (1970 adjustments, -\$85 thousand); 1970, \$2,222 thousand; 1971, \$2,222 thousand; 1972, \$2,222 thousand.

The Office administers laws governing the granting of patents for invention and the registration of trademarks.

Patent application disposals totaled 102,070 in 1969, and 103,692 in 1970; 109,000 are estimated for 1971 and 113,000 for 1972. Increased disposals are needed to keep abreast of intake and to progress toward the pendency goal of 18 months for patent applications. A 3-month pendency goal from receipt to first action for trademark applications is also being sought. The 1972 estimate includes funds and staff for the above-mentioned increased production; for increased patent printing and data base program; for meeting increased demands in public service areas; and for modernization measures that will promote rapid retrieval, storage, and dissemination of information.

Receipts from fees were \$26.3 million in 1970. In 1971 and 1972, they are respectively estimated at \$29.4 million and \$30.8 million. Legislation to increase patent fees, which would generate additional income, will be proposed.

A supplemental appropriation is being requested in 1971 to cover increased costs of patent printing.

1. *Examination of patent applications.*—Applications are examined to determine the patentability of claimed inventions; and quasi-judicial functions are performed in appeal and interference proceedings within the Office.

2. *Examination of trademark applications.*—Applications are examined to determine the registrability of trade-

marks, and quasi-judicial functions are performed in appeal or adversary proceedings within the Office. Specifications and drawings of successful applications are printed, and registered trademarks are regularly published.

3. *Collection, assembly, and dissemination of technical and legal patent and trademark information.*—Specifications and drawings of successful applications are printed, and issued patents are regularly published. In addition, this activity includes preparation and issuance of patent grants, furnishing copies of records, maintenance of public search room and scientific library facilities, and recording instruments conveying ownership of patent and trademark rights.

SUMMARY OF WORKLOAD AND PERFORMANCE DATA

	1969 actual	1970 actual	1971 estimate	1972 estimate

91.20	Outlays from civilian pay act increases.....		1,655	131

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$1,654 thousand (1970 adjustments, -\$10 thousand); 1970, \$1,196 thousand; 1971, \$1,324 thousand; 1972, \$1,774 thousand.

Note.—Excludes \$61 thousand in 1972 for activities transferred to Research, Engineering, Analysis and Technical Services, Office of Telecommunications: 1970, \$58 thousand; 1971, \$61 thousand.

The proposed increase will strengthen the Bureau's program particularly with regard to standards of physical measurement, building technology, materials research related to public health and safety, environmental pollution abatement technology, and flammable fabrics. About one-third of the increase will be used for an accelerated cooperative program with the States to achieve greater uniformity in the content and application of building codes.

1. *Basis for Nation's physical measurement system.*—The purpose of this activity is to insure that the users of science and technology in the United States will be able to make physical measurements which are meaningful (measure the desired property), reliable (measure properly and as accurately as needed), reproducible (yield the same results time after time), and compatible (will be reconcilable with other like measurements made elsewhere at different times).

(a) *Measurement methods, standards, and research.*—Programs include development, maintenance, and improvement of the standards of physical measurement which, by common agreement, are compatible with those of other nations. This involves national standards for measurement of some 40 physical quantities (including the "basic six" of physics: mass, length, time, temperature, electric current, and luminous intensity).

Research is conducted to learn new and improved ways to measure the physical and chemical properties of matter, materials, and natural phenomena. The national measurement system is continually evaluated to insure that the Bureau's efforts in improving its measurement capability are linked to the present and future needs of the system and directed toward the highest priority problems.

(b) *Transfer services.*—This involves developing and making readily available a range of specialized products and services, including calibrations and standard reference data, that will effectively transfer the results of the Bureau's work to other elements of the Nation's measurement system. The increase in 1972 will be applied to help meet the increasing demands of our technologically oriented society to extend the range and improve the accuracy of measurement. The greatest emphasis is planned for multidimensional metrology, laser measurements,

operation of a newly rebuilt and relocated standard frequency broadcast station, and fundamental research on reference materials with particular attention to materials needed in clinical, biological, and environmental pollution applications.

2. *Scientific and technological services for industry and Government.*—The purpose of this activity is to facilitate effective use of science and technology by governmental institutions and by industry. In the United States most of the effort devoted to developing and using technology is in the private sector. A variety of problems exist in certain areas of technology, however, where the Government has a substantial investment or where complexity, cost, or scope of impact are such as to require a national-level effort.

Programs in this activity include: (a) Biomaterials, metals, alloys, polymers, inorganic, and composite materials technology; (b) evaluation and improvement of measurement methods in support of environmental pollution abatement programs; (c) research, performance testing and evaluation of building materials and structures; (d) services to improve the effective Government utilization of automatic data processing equipment; (e) electronic technology; and (f) the application of analytical techniques to nontechnological problems such as operations analysis and the management of research.

A proposed increase of \$1.1 million will be used for a cooperative effort with the National Conference of States on Building Codes and Standards to reform the building regulatory system by achieving uniformity and compatibility of codes and standards, establishing a nationwide system for evaluating new building products and technologies, and encouraging the use of performance codes. Increases will also be applied to measurement problems fundamental to environmental pollution abatement and computer technology.

3. *Technical basis for equity in trade.*—The purpose of this activity is to provide a common technical basis for a fair exchange between buyers and sellers in commercial dealings with minimum legal regulation at the Federal level. Programs in this area include (a) voluntary engineering standards services to assist private sector groups to develop national and international engineering standards and disseminate information on such standards, (b) measures of quantities important to commerce to insure a proper degree of measurement accuracy in commercial quantity determinations, including development and promotion of better weights and measures technology, (c) standards to measure the performance of industrial and consumer products, (d) test services to promote the application of product standards and standardized product test methods by Federal, State, and commercial testing laboratories, and (e) fair packaging and labeling programs to reduce undue proliferation of commodity package sizes by voluntary means.

The increase will be applied to test services to expand the Bureau's testing laboratory inspection service to cover new product areas and tests.

4. *Technical services to promote public safety.*—Programs of this activity provide standards, test methods, information and specialized services as required by law to protect the public from certain specified hazards. Subjects included are (a) flammable fabrics, which provides the technical basis for reduction of the hazard of fire involving fabrics and related materials, (b) fire research and safety, which involves research, information and services aimed at reducing loss of life and property due to fire, and (c)

product safety, which provides the technical basis for assessing hazards and aids in setting standards for consumer product safety.

This increase will be assigned to the flammable fabrics program to improve and extend test methods, study the probable impact of standards on both the users and the affected industries, and investigate the effectiveness of various flame retardants when applied to fabrics.

5. *Technical information services.*—The purpose of this activity is to disseminate information on research results and services to users through a variety of appropriate, easily accessible channels. Programs employed to achieve this objective are (a) central reference services, such as NBS information analysis centers which provide highly specialized technical information, (b) symposia, technical meetings, and training courses, (c) research and development in information sciences including employment of experimental hardware/software configurations to improve the response time and adequacy of the Bureau's information-providing services, (d) consulting and advisory services which are made available, usually at no cost to the user, and (e) the National Technical Information Service, which collects and distributes scientific, technological, business and demographic information generated by the Federal Government. Services include indexing, reproducing, abstracting and announcing of reports, and analyzing, evaluating, and digesting contents of these reports.

The increase in 1972 will be applied to development of improved processing and distribution techniques for the National Technical Information Service.

6. *Central technical support.*—The purpose of this activity is to provide the necessary technical supporting services (including operation of major research facilities) to other Bureau programs. These services include operation of major research tools such as the NBS research reactor, linear electron accelerator and other high energy accelerators. Also included are mathematical services, such as assistance involving advanced statistical problems or applying new mathematical techniques. The increase will be applied to refueling the research reactor.

RESEARCH AND TECHNICAL SERVICES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the National Bureau of Standards, as authorized by law, \$500,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to the Bureau, for payments in the foregoing currencies. (7 U.S.C. 1701, 1704; 15 U.S.C. 271-278g, 290; Department of Commerce Appropriation Act, 1971.)

The responsibilities of the National Bureau of Standards for basic and applied research, improvement of standards, collection and dissemination of standard reference data, and the certification and distribution of standard reference materials are of sufficient breadth to encourage utilization of research capabilities in other countries. The foreign currency program supplements the Bureau's existing program, allows an acceleration of research effort in selected areas, and permits economies to the Bureau's regular appropriations over the long term.

The 1972 request represents no increase in the size of the program. Foreign currencies determined by the Treas-

ury Department to be excess to normal requirements of the United States will be used in countries where scientific talent is available to augment the in-house capabilities of the Bureau in the areas of standard reference materials, standard reference data, building research, research to improve measurements on materials, and exploratory research.

90 Outlays	1,135	1,965	1,425	-----	-----	-----

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$895 thousand; 1970, \$887 thousand; 1971, \$791 thousand; 1972, \$135 thousand.

This will provide for construction and improvements to the plant and facilities of the National Bureau of Standards and procurement of major special facilities. The Bureau has nearly completed the process of moving from its Washington site to the new Gaithersburg facilities. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and two small radio field stations.

Capital outlay—1. Improvements and modifications.—The budget includes \$200 thousand for minor capital improvements of a general nature required by the Bureau's laboratories and field stations. Other minor improvements, when of a special project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. General construction.—This activity includes improvements and construction items costing more than \$40 thousand, except for construction associated with the Bureau's relocation at Gaithersburg. Anticipated costs in 1972 total \$387 thousand for projects financed in prior years.

3. Special facilities.—(a) *NBS facilities.*—This subactivity includes the acquisition of large equipment and any associated building construction or acquisition. The budget includes \$390 thousand for an electron injector for the NBS synchrotron. Anticipated costs in 1972 include \$240 thousand for the synchrotron project and \$445 thousand for projects for which funds have been appropriated in prior years.

(b) *Weights and measures standards for the States.*—This subactivity finances the acquisition of basic reference standards of weight and measure for distribution to the States. Such action will help to insure uniformity of weights and measures standards throughout the Nation and to provide the physical tools necessary for precise measurement in business, industry, science, and education. No additional budget authority is required. Acquisition of the standards is expected to be completed by the end of 1971.

¹ Balances of selected resources are identified on the statement of financial condition.

² Receipts from calibrations, services, and sales of standard reference materials to non-Federal customers (15 U.S.C. 275a).

The working capital fund finances all operations of the Bureau, except major construction projects, from advances

and reimbursements. The principal of the fund, as of June 30, 1970, consisted of \$5 million in appropriations, \$8.3 million in capital provided by appropriations of the Bureau, and \$141 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by the Bureau's appropriations to \$144.6 million by June 30, 1972.

Operating costs.—1. *Technical program.*—Research and technical services are conducted by the Bureau on the request of other Government agencies and the public, as well as in support of the Bureau's own research program. The program conducted on contract with other agencies constitutes about one-third of the technical work of the Bureau and it is expected to continue at this level.

2. *Plant improvement and special equipment.*—This activity includes the costs of the working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

Capital outlay.—Working capital of the fund is invested in equipment which is subject to depreciation charges. Some of the equipment for the new laboratories of the Bureau is purchased as an investment of the fund, the additional capital being provided by payments from the appropriation for construction of facilities. All other equipment and facilities financed by Bureau appropriations are shown as donated assets.

Operating results.—Retained earnings at the end of each year are transferred to Treasury the year following.

National Bureau of Standards: Research and technical services.....	58,400	61,000
Executive Office of the President: Salaries and expenses, telecommunications.....	786,910	889,362

The Office of Telecommunications was established as a primary operating unit under the direction of the Assistant Secretary for Science and Technology. The Office provides analysis, engineering, and technical services to support the needs of the Director of the Office of Telecommunications Policy, Executive Office of the President, in the performance of his responsibilities for management of the radio spectrum; and conducts economic and technical research to provide information and alternatives required by the Director. The Office also conducts research and analysis on radio propagation, radio systems characteristics, and operating techniques affecting the utilization of the radio spectrum; and conducts research and analysis in the general field of telecommunication sciences in support of other Government agencies.

The Office of Telecommunications incorporated the Institute for Telecommunication Sciences from the National Oceanic and Atmospheric Administration, a portion of the Frequency Management Directorate from the Office of Telecommunications Policy, and a small management and program staff from the Office of the Assistant Secretary of Commerce. A 1971 supplemental appropriation covers initial funds for work on improved techniques for frequency management and for economic and technical analysis in support of some of the most urgent policy issues confronting the Director of the OTP.

1. *Services for frequency management and usage.*—Assistance in the assignment of Federal telecommunications frequencies is provided through secretariat services for the Interdepartment Radio Advisory Committee. The Office of Telecommunications provides prediction services for radio system performance as it is affected by radio propagation and other technical factors.

2. *Research and analysis for policy formulation.*—Technical assistance is provided to the Director, Office of Telecommunications Policy, for developing the U.S. position in preparation for international conferences.

Issues of competition as contrasted to monopoly are analyzed as a basis for the Office of Telecommunications Policy's recommendations to the Federal Communications Commission. Research, engineering, and analyses are undertaken concerning economic opportunities for community cable distribution, communications alternatives for law enforcement and public safety, impact of new shared communication services, economic implications of various telecommunication interconnections and attachments, and radio resource management and economics. Results of these analyses are provided to OTP for use in formulating executive branch views on selected telecommunications policy matters.

3. *Utilization of telecommunications technology.*—Surveys are made and current information is maintained about the state-of-the-art in selected telecommunications systems and devices. Assessments are made and experiments are conducted to evaluate the relative technical merits and liabilities of alternative modes for providing specified telecommunications services within the immediate and foreseeable state-of-the-art. Investigations are conducted to identify and predict the effect of the physical environment on these modes.

Information is compiled and disseminated, standards are suggested, and technical research is conducted to permit increased productivity in the use of the radio frequency spectrum.

4. *Improvement of Government telecommunications systems.*—New approaches to use of the electro-space and their technical and economic implications are considered. State and local governments are assisted in organizing their telecommunications activities, in developing standards for procurement and acceptance of equipment, and in making greater application of telecommunications to improve urban living. Techniques for measuring and improving the performance of telecommunications systems are developed. Work is carried out on next-generation methods of electromagnetic compatibility analysis, frequency sharing, and services for radio system performance prediction.

Improvement of Government telecommunications systems.—This activity provides telecommunication engineering assistance to other Government agencies. This includes direct assistance in the design of communications systems, design or review of systems designs to meet specified requirements, extensive measurement programs in the various parameters of electromagnetic propagation, and development of predictions of system performance.

Utilization of telecommunications technology.—This activity includes work for other Government agencies, particularly the Department of Defense. It involves propagation experiments and measurements to describe and predict wave transmissions for communication purposes. Studies are aimed at understanding geophysical parameters that impose radio propagation limitations on the reliability and/or precision of propagation systems. The results of this research lead to more efficient and economical design of propagation and communications systems.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$274.580 thousand; 1970, \$245,512 thousand; 1971, \$347,502 thousand; 1972, \$393,189 thousand.

Fiscal 1972 represents the second and final year of the initial buildup phase in preparation for the full-scale effort expected to reach a construction level of 30 ships per year.

The 10-year program is directed at motivating increased efficiency in U.S. shipyards in order to narrow the gap between domestic and foreign merchant ship production costs. Our national objective is the maintenance of a healthy shipbuilding industry adequate to meet defense and commercial requirements of the United States at the least Government expenditure.

The tentative mix of the 1972 building program currently projected is a combined product of many factors. Included are the original projections made for the new Maritime program, preliminary results of the CMX (competitive merchant ship) contract, reappraisals of national defense requirements, statements of operator preferences, indications of interest on the part of the investment community, and updated cost estimates. Of course, none of these factors can as yet yield a conclusive picture, and will require continuous updating; however, best estimates at this time are as follows:

TENTATIVE 1972 SHIP CONSTRUCTION PROGRAM, MULTIYEAR PROCUREMENT
[Dollars in millions]

	Number of ships	Cost
Ore-bulk-oil carrier.....	8	\$170.8
General cargo/bulk.....	5	98.5
Barge carriers.....	5	136.0
Containerships.....	4	114.4
Total cost.....	22	519.7

Government cost (subsidy).....	227.5
Reserve for cancellation of 1973 ships.....	1.6
Subtotal.....	229.1
National defense features.....	.6
Total requirements.....	229.7

This proposed funding level for 1972 of 22 ships is considered to be the minimum level feasible if the Government's intention to achieve a 30-ship-per-year building level is to be realized.

The following table reflects the planned utilization of estimated available funding in the current and budget years:

Fiscal year 1972 will be the second year of operation under a new Maritime program initiated in 1971 which, in the area of operating-differential subsidies, is designed to achieve major improvements in the administration of such subsidies.

During calendar year 1969, 14 operators had operating subsidy contracts with the Maritime Administration and provided service on 30 essential trade routes. These operators carried approximately 9.4 million long tons of cargo.

The total of vessel operating expenses for subsidized operators in calendar 1969 was \$864.9 million, of which \$341.5 million represented subsidizable items of expense.

The operations for which subsidy support is projected are detailed in the following table:

Past years:	Subsidized operators	Maximum voyages under contract	Voyages undertaken	Average vessels employed	Estimated obligations (thousands)
Calendar years 1947-63.....	-----	-----	24,858	-----	\$1,730,991

The 1972 program provides funding for the continuation of the 1971 program which was designed to serve the needs of the entire maritime complex including Government, shipbuilders, labor, and shipowners. The program will operate in the following major areas:

1. *Maritime science and technology.*—Research conducted herein is planned to raise the level of marine scientific knowledge in order to advance the technological base upon which ships are designed, built, and operated. Primary research will be in hydrodynamics, propulsion, ship structures, navigation-communications electronics, and facilities and systems to disseminate technical information. No funds are provided for the joint surface effect ship program in the 1972 estimate.

2. *Shipping systems analysis and requirements.*—This activity is concerned with forecasting trade and technology and with the economic analyses of total transportation systems. Included are studies of transportation demands as a means for projecting ship numbers and characteristics, advanced vehicles, intermodal aspects, and special economic studies.

3. *Advanced ship engineering and development.*—Concerned with advanced ship design and construction methods. Nuclear and nonnuclear advanced ship design programs, subsystem development, management systems, and shipyard methods are included in this activity, as well as development of computer-aided design programs and development for naval hull types.

4. *Improvement in ship operations and shipping systems.*—

Includes applied research for all aspects of the maritime field concerned with ship and port operations. Consideration will be given to related operational equipment and procedures for navigation, cargo handling, automated control systems, containerization, manning, training, maintenance, and other aspects of the field.

5. *NS Savannah.*—Provides for the continuing layup of the NS Savannah.

Note.—Excludes \$74,000 in 1972 for activities transferred to General administration, Department of Commerce.

1. *Ship construction administration.*—This activity provides for the cost of technical and administrative support required for the level of contractual activity financed under the Ship construction appropriation.

2. *Research and development administration.*—Provides for the cost of technical and administrative support required for research and development type contractual activity.

3. *National defense reserve fleet.*—Covers costs for preservation work and security measures performed on ships retained for national defense purposes; custody of ships awaiting sale; and operation of warehouses to receive, issue, and store materials and equipment used in repair and outfitting of such ships.

4. *Operating aids.*—This activity is primarily concerned with the administration of the ship operation subsidy program. Also included are costs of administering the

Maritime Administration's programs for chartering of ships, ship exchange, guideline rate review, and Federal ship mortgage insurance.

5. *Maritime promotion and manpower.*—Includes costs of promotional activities such as market development, container system improvements, and port development; as well as training in radar, navigational aids, and similar courses.

6. *General administration.*—This activity covers executive direction, as well as accounting, budgeting, personnel, management, and other associated administrative support functions.

Public Law 415, 84th Congress (46 U.S.C. 1126), established the U.S. Merchant Marine Academy at Kings Point, N.Y., to train cadets for service as officers in the U.S. Merchant Marine. A 4-year course is provided, including 1 year of sea duty, designed to qualify graduates for licenses as deck or engine officers. About 220 cadets are expected to graduate in 1972.

The Academy provides subsistence, quarters, tuition, uniform and textbook allowances, and medical and dental care for the cadets in attendance at the Academy. A small cadet training liaison group in Washington, D.C., provides staff assistance to the Maritime Administrator on training matters, and assists in the selection and appointment of cadets.

STATE MARINE SCHOOLS

For financial assistance to State marine schools and the students thereof as authorized by the Maritime Academy Act of 1958 (72 Stat. 622-624), [\$2,325,000] \$2,200,000, to remain available until expended, \$2,200,000 of which [\$977,000] \$964,000 is for maintenance and repair of vessels loaned by the United States for use in connection with such State marine schools, and [\$1,348,000] \$1,236,000, to remain available until expended, is for liquidation of obligations incurred under authority granted by said Act, to enter into contracts to make payments for expenses incurred in the maintenance and support of marine schools, and to pay allowances for uniforms, textbooks, and subsistence of cadets at State marine schools.

For an additional amount for "State marine schools", for liquidation of obligations incurred under authority granted by the Marine Academy Act of 1958 (72 Stat. 622-624), \$105,000, to remain available until expended. (Department of Commerce Appropriation Act, 1971; authorizing legislation to be proposed.)

90 Outlays	2,117	2,379	2,100

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1969, \$114 thousand (1970 adjustments, -\$4 thousand); 1970, \$258 thousand; 1971, \$107 thousand; 1972, \$107 thousand.

The States of California, Maine, Massachusetts, Michigan, New York, and Texas maintain schools for the training of merchant marine officers with Federal assistance given in the form of (a) direct grants of \$75 thousand, if matched by State appropriations and if out-of-State

students are enrolled; (b) allowance to cadets for uniforms, textbooks, and subsistence; and (c) repairs to Federal training vessels on loan to the schools. The 1972 estimate provides reduced support for cadet allowances and funds for maintenance and repair of two ships to be used jointly by five of the schools.

The Maritime Academy Act of 1958 (72 Stat. 622) provides contract authority for the Secretary of Commerce to enter into agreements with States to provide the grants and allowances over a maximum 4-year period. This act provides contract authority without limit as to the amount or fiscal year. The new budget authority includes the estimated obligations to be incurred under this authority. The schools are expected to graduate approximately 400 cadets in 1972.

Under the Merchant Marine Act, 1936, the Maritime Administration received authority to insure construction loans and mortgages with aggregate outstanding balances of up to \$1 billion, on vessels engaged in the foreign and domestic commerce of the United States. \$25 million of authority has been transferred to the Department of the Interior to insure construction loans and mortgages of fishing vessels. The Merchant Marine Act of 1970 (Public

Law 91-469) has, increased the authority to insure to \$3 billion.

Budget program.—The anticipated income of \$7.2 million in 1971 and \$9.0 million in 1972 takes into account changes resulting from the new Merchant Marine program. There are no anticipated mortgage defaults or advances to mortgagors in 1971 or 1972.

Financing.—The redemption of defaulted loans or mortgages is financed from insurance premiums and fees, interest earned on U.S. Government securities and mortgages held, together with such amounts as may be necessary by borrowings from the Treasury Department, pursuant to Public Law 85-520 (46 U.S.C. 1275(b)).

Operating results and financial condition.—As of June 30, 1970, balances outstanding of insured mortgages and loans plus commitments for additional ship mortgages total \$919.4 million. The outstanding balances of insured mortgages, loans, and commitments at the end of 1971 and 1972 are projected at \$1.1 billion and \$1.6 billion respectively.

It is anticipated that the fund will purchase Treasury securities in the amount of \$8.5 million in 1971 and \$10.7 million in 1972.

This fund finances operation, reactivation, deactivation, and charter of Government-owned or controlled cargo type vessels. It is also used for financing the operation of Government-owned experimental vessels (46 U.S.C. 1205).

Budget program.—1. *Vessel operations expense.*—Cargo vessels are operated by private operators as agents of the Maritime Administration to carry shipments for the Military Sealift Command and other agencies. In addition, agents operate ships under Government control as a consequence of defaults under title XI guaranteed loans and mortgages.

2. *Experimental ship: NS Savannah.*—Since August 1965 the NS Savannah has been on experimental commercial operation under a bareboat charter agreement. The level of funding anticipates layup of the NS Savannah.

Financing.—Expenses are financed by revenue from private operators and reimbursements from Military Sealift Command, other agencies and appropriations, in accordance with 69 Stat. 59.

Operating results and financial condition.—1. *Vessel operations.*—Charges are made to the Military Sealift Command and other agencies for full costs arising under general agency agreements for ship operations.

2. *Experimental ship: NS Savannah.*—The \$1.7 million represents the estimated 1972 costs to the Government for the NS Savannah which costs are reimbursable in full from the Research and development appropriation.

¹ Balances of selected resources are identified in the statement of financial condition.

The Maritime Administration is authorized by 46 U.S.C. 1281-1294, as amended, to insure against loss or damage by marine war risks when it is found commercial insurance cannot be obtained on reasonable terms and conditions. Authority to underwrite insurance has been authorized to September 1975, having been extended at 5-year intervals since 1950.

Budget program.—As of June 30, 1970, the number of outstanding binders issued for the types of insurance covered by this fund were: 1,267 for hulls, 1,205 for protection and indemnity, and 999 for insurance of crew life and personal effects. These binders which become effective as a result of the outbreak of war cover approximately \$15 billion of insurance exposure. During 1970, builder's war risk insurance was provided on five vessels built in U.S. yards.

In addition, Second seamen's war risk insurance was continued in effect at the request of the Navy, without premium, but on a reimbursable basis as required by 46 U.S.C. 1285, on 20 vessels for the Military Sealift Command. It is estimated that this service from program inception has provided a savings of \$1 million through 1970, measured by the difference between the estimated cost of commercial premiums and claims paid. The Maritime Administration also provided Second seamen's war risk insurance for 170 vessels under charter to the Military Sealift Command, which resulted in additional net savings approximating \$2.5 million for the year, thereby increasing cumulative savings in excess of \$3.5 million by the end of 1970.

Financing.—46 U.S.C. 1288(a) provides authority for the Secretary of Commerce to transfer up to \$10 million from the Vessel operations revolving fund to the War risk insurance revolving fund in order to place insurance coverage into effect. Revenue in the fund is received from fees paid for the issuance of interim binders, premiums paid for builder's risk insurance, interest from investments, and reimbursable charges from the Navy.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slopchest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slopchest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (*Department of Commerce Appropriation Act, 1971.*)

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 302. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act.

SEC. 303. During the current fiscal year appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 304. No part of any appropriation contained in this title shall be used for construction of any ship in any foreign country. (*Department of Commerce Appropriation Act, 1971.*)

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

Military personnel activities are grouped into major program categories corresponding to the planning, programming, and evaluation system of the Department of Defense.

1. *Strategic forces.*—Consists of offensive and defensive aircraft and missile units.

2. *General purpose forces.*—Consists of unified commands, tactical Army combat and support forces, Navy ship and air forces, the Marine Corps fleet forces, including aviation, and Air Force combat and support aircraft units. It also includes related logistics and support units.

3. *Intelligence and communications.*—Missions and activities related to combat forces and centrally directed activities for intelligence, security, and communications.

4. *Airlift and sealift.*—Airlift, sealift, and other transportation, including logistic and support units.

5. *Guard and reserve.*—Consists of support for National Guard and Reserve training units.

6. *Research and development.*—Support for research and development activities and projects not related to items approved for procurement or deployment.

7. *Central supply and maintenance.*—Includes nondisposable supply and maintenance depots, and supply and maintenance activities not organic to mission units.

8. *Training, medical, and other general personnel activities.*—Consists of these activities associated with military personnel.

9. *Administration and associated activities.*—The administrative support of departmental and major administrative headquarters, field commands, and administrative activities.

10. *Support of other nations.*—Activities for the support of allies.

ACTIVE FORCES

These appropriations provide for the pay and allowances of officers, enlisted personnel, cadets, and midshipmen; the subsistence of enlisted personnel; permanent change of station travel; and other military personnel costs. Changes in financial requirements are primarily related to military personnel strengths in support of the military programs. The number of active duty military personnel provided for are shown in the following tables:

RESERVE FORCES

The following appropriations are for the National Guard and Reserve components of the Army, Navy, Marine Corps, and Air Force.

National Guard and Reserve personnel.—These programs provide funds for training members of the Ready Reserve required for early mobilization needs of the Active Forces. Most of the paid National Guard and Reserve components personnel perform 48 drills and attend 2 weeks of active duty for training each year. Other personnel not requiring as intensive training receive only a period of active duty for training (usually 2 weeks) during the year. Active duty for basic training is provided for personnel enlisting in a National Guard or Reserve component who have not previously received military training. Service schools and special tours of active duty training provide additional training for limited numbers of the Ready Reserve.

The numbers of National Guard and Reserve component personnel estimated to participate in the paid training programs are summarized in the following table:

	YEAREND NUMBER		
	1970 actual	1971 estimate	1972 estimate
Defense total	1,038,988	1,040,733	1,025,242
Army Reserve:

Total, Air National Guard.....	89,847	88,670	88,986

¹ Number receiving training at any one time during year.

Reserve officer candidates.—The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a collegiate institution at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and are ordinarily ordered to active duty for a minimum period of 2 years.

The Reserve Officers' Training Corps Vitalization Act of 1964 authorizes a limited number of scholarships for 4-year ROTC students on a competitive basis. Successful candidates for the scholarships are required to serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. The Army and Air Force will award about 5,500 scholarships and the Navy about 5,300 scholarships in 1972.

The Army, Navy, Marine Corps, and Air Force provide training for students who elect to enroll in ROTC training at the secondary level of education, and are programed to have units at 650, 129, 30, and 194 schools, respectively, in operation in 1972.

The numbers of candidates commissioned from these programs are summarized below:

ROTC	1969 actual	1970 actual	1971 estimate	1972 estimate
Army.....	16,306	16,581	12,600	9,200

91.30 Outlays from military pay act supplemental.....		26,600	

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for: (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; (b) retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve; and (c) survivors' benefits. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows the average number of personnel on the rolls during 1970 compared with the estimated numbers for 1971 and 1972.

AVERAGE NUMBER

	1970 actual	1971 estimate	1972 estimate
1. Nondisability.....	491,409	540,612	592,703
2. Temporary disability.....	21,929	24,644	26,909
3. Permanent disability.....	118,991	125,944	133,688
4. Fleet reserve.....	110,255	107,929	107,859
5. Survivors' benefits.....	7,560	8,277	9,123
Total.....	750,144	807,406	870,282

A supplemental appropriation for 1971 is anticipated to provide funds for the additional retirement costs resulting from the increase in the pay of military personnel effective January 1, 1970, under the provisions of Public Law 90-207.

Under the provisions of the retired serviceman's family protection plan, retired service personnel who elect to receive reduced amounts of retired pay are able to provide for monthly payments to be continued to their survivors. The reductions are determined on a basis designed to establish an actuarially sound system. Current appropriations provide only for the net payments to be made each year and the liability for future payments of survivor benefits is unfunded. Administrative expenses of this family protection plan are provided as operation and maintenance costs of the military services. The accumulated difference between reductions in retired pay and actual payments of survivor benefits is indicated in the following table (in thousands of dollars):

RETIRED PAY—SURVIVORS' BENEFITS

	1970 actual	1971 estimate	1972 estimate
Accumulated deductions, net, start of year	152,392	178,789	208,510
Plus: Current deductions during the year	36,680	41,226	44,369
Less: Payment of survivors' benefits	-10,283	-11,505	-12,947
Accumulated deductions, net, end of year	178,789	208,510	239,932

Proposed for separate transmittal, existing legislation:

Additional amounts related to increases in the consumers price index are required for payments to retired personnel.

OPERATION AND MAINTENANCE

The appropriations under this title finance the day-to-day costs, except military personnel costs, of operating and maintaining the Armed Forces, including the reserve components, and related support activities of the Department of Defense. These funds include amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements for these appropriations are influenced by a variety of factors, the principal of which are force levels, such as the number of aircraft squadrons or Army or Marine Corps divisions, military strength and deployments, rates of operational activity, numbers of installations, and quantity and complexity of major equipment (aircraft, ships, missiles, tanks, etc.) in operation. Although less military strength will be supported in 1972, the estimates provide for maintaining the remaining forces and their equipment at a higher level of readiness than in 1971.

The principal activities in each of these major programs are identified below.

1. *Strategic forces.*—Strategic offensive forces include more than 500 manned B-52 and FB-111 bombers and 1,050 advanced ICBM's operated by the Air Force and the Navy's submarine missile fleet which deploys 656 Polaris and Poseidon missiles. Estimates for 1972 reflect increased deployment of Minuteman III missiles and conversion of additional submarines from Polaris to the more advanced Poseidon ballistic missile.

Strategic defensive forces consist of missile defense units of both Army and Air Force, interceptor fighter

aircraft of the Air Force, and various airborne warning and control systems operated by the Air Force. The estimates for 1972 reflect reductions in obsolescent components of the force.

2. *General purpose forces.*—These forces of the four military services operate under the control of the various unified and specified commands. They consist of the tactical air forces of the Navy, Air Force, and Marines, the ground forces and supporting aircraft elements of the Army and Marine Corps, and Navy's combatant and support ships. Among these forces are those deployed to eastern Asia and the western Pacific; the forces deployed to Europe in the NATO area; the fleets operating in the Pacific, the Atlantic, and the Mediterranean; and the backup contingency forces in the United States.

Our tactical air forces consist of the tactical air wings of the Air Force, the carrier air wings of the Navy, and the Marine air wings. Also included are reconnaissance squadrons and a variety of training and other supporting organizations as well as the special operations forces. During 1972 the F-4 will continue to be the most numerous aircraft in the operating inventories of the three services. The A-7 and F-111 aircraft will displace older attack models in the Air Force, and the Marine Corps will introduce the vertical/short takeoff and landing AV8A Harrier.

Army land forces to be supported in the 1972 budget consist of infantry, mechanized, armored, airborne, and airmobile divisions for the conduct of land warfare. Also provided for are the force elements needed for support of these divisions during the initial stages of combat plus a limited number of units required for sustained combat support.

Marine Corps land forces consist of divisions and supporting force troop elements designed to conduct amphibious assault operations and other missions with the close support of Marine aviation.

Naval forces include aircraft carriers, submarines, amphibious forces, antisubmarine forces, and anti-air warfare forces. Although the Navy will operate fewer ships in 1972 due to inactivation of many obsolete World War II ships (such as conventional submarines), the fleet will be modernized with the addition of 31 newly constructed ships.

3. *Intelligence and communications.*—This program comprises the centrally directed Defense intelligence and security function, the National Military Command System, communications, and other special activities which are related to and support the missions of the combat forces in the strategic, general purpose, and airlift/sealift programs. Included in the communications category are the bulk of the Defense Communications System (DCS) transmission and switching systems and certain non-DCS communications. Funds to support the intelligence, communications, and security activities are contained in the operation and maintenance appropriations of each military service, and of the Defense agencies for the Defense Communications Agency, the Defense Atomic Support Agency, and the Defense Intelligence Agency. Among the special activities are the oceanographic, weather, air rescue and recovery, and air traffic control and landing systems programs, which are peculiar either to the Navy or the Air Force.

4. *Airlift and sealift.*—This provides sea, air, and land transportation services for all the Armed Forces in peacetime as well as quick reaction strategic mobility and logistical support in wartime. The major commands in this program are the Military Sealift Command of the

Navy and the Military Airlift Command of the Air Force. The Military Traffic Management and Terminal Service of the Army, and the Army-operated overseas waterports outside of Southeast Asia are also included. These activities are reimbursed by the service customers for the direct costs of transportation services provided. Certain overhead and support costs are included in the Air Force and Army budgets for the airlift-sealift program.

5. *Guard and Reserve.*—The military services train National Guard and Reserve units and operate and maintain facilities such as training centers, air bases, and active duty field training sites for the use of such units.

7. *Central supply and maintenance.*—This program includes funds for centralized supply and maintenance activities not organic to other programs. It covers requirements for quantitative determination, procurement (excluding acquisition costs), storage, distribution, depot-level maintenance and transportation of military materiel. These functions are managed by the military services and conducted at various organic logistical activities worldwide such as supply depots and centers, inventory control points, and repair facilities as well as through commercial contractors.

In addition, the Defense Supply Agency provides common supply and service support to the military services within the continental United States, including, in addition to the above functions, management of Department of Defense-owned idle industrial plant equipment, the Defense surplus property disposal program, and the Federal catalog program. It is also responsible for providing contract administration services, administration and supervision of Department of Defense material utilization program, and coordinated procurement programs. Requirements for the Defense Supply Agency are included under operation and maintenance, Defense agencies.

Financial requirements are primarily related to the quantity of material in use and in inventory.

8. *Training, medical, and other general personnel activities.*—Each of the military services trains individuals for duty as officers or enlisted men. This includes recruit training, career training, and specialized training in many skills. These training requirements are influenced by the number of new recruits entering the services, the total strength of the services, and by the introduction of new equipment and weapons. Most of this training is accomplished at service-operated facilities, such as training centers for the training of new recruits, at technical schools which afford training in specific military occupational skills, and at pilot training bases.

This also includes the training of future officers by the three service academies and by Reserve Officer Training Corps units at universities and colleges. In 1972 it is estimated that 22,200 graduates of these programs will be commissioned as officers.

The services operate 190 hospitals to provide medical care for active and retired military personnel and their dependents. In addition, this program finances a medicare program at civilian medical facilities for personnel in areas where service hospitals are not accessible.

9. *Administration and associated activities.*—This program includes the costs of departmental administration, major field command headquarters, and general support activities such as finance and audit.

10. *Support of other nations.*—This program includes the direct support of Allied Forces in Southeast Asia, military assistance missions, and advisory groups to foreign nations, and for the U.S. share of the costs of NATO, SEATO, and

CENTO, and support of U.S. organizations related to these international military headquarters.

Supplemental appropriations for 1971 are anticipated to provide funds for civilian personnel pay increases under Executive Order 11524, which was issued pursuant to Public Law 91-231, and for wage-board increases effective in 1971 granted under 5 U.S.C. 5341(a).

Federal Funds

General and special funds:

OPERATION AND MAINTENANCE, ARMY

This construction was provided from resources furnished by the Iranian Government pursuant to agreement between the United States and the Iranian Government.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:
 Funds appropriated to the President: "Military Assistance."
 Department of Transportation: "Operations, Federal Aviation Administration."

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, torpedoes, munitions, and communications; major items for support of the capital equipment when it is in use; the industrial facilities necessary to produce that equipment; and major modification of equipment in inventory where modernization can be achieved without buying new equipment. The capital equipment financed by these appropriations is principally procured from private contractors or produced in Government arsenals, shipyards, and plants.

The 1972 program continues the production of modern equipment and weapons in support of United States and

allied forces. The equipment inventories necessary to support conventional as well as strategic warfare missions of armed services will continue to be augmented and modernized. Our military capability is improved by continuing programs to increase the mobility and firepower of ground forces, strengthen the support capabilities of the tactical air forces, modernize airlift forces, and augment the capabilities of antisubmarine warfare forces.

Direct budget programs are estimated as follows (in millions of dollars):

	1970 actual	1971 estimate	1972 estimate
Aircraft.....	6,363.7	6,179.6	6,400.6
Missiles.....	3,158.8	3,382.0	3,772.2
Ships.....	2,464.1	2,590.2	3,328.9
Combat vehicles, weapons, and torpedoes.....	546.0	493.3	476.3
Other.....	7,326.9	5,329.0	5,742.1
Total.....	19,859.5	17,974.1	19,720.1

The appropriations for procurement of aircraft, missiles, ships, weapons, torpedoes, and combat vehicles are dependent upon the enactment of authorizing legislation.

Federal Funds

General and special funds:

PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps; purchase of not to exceed [five] four thousand [two] seven hundred and fifty-[four] two passenger motor vehicles, of which three thousand six hundred and eighty-seven are for replacement only; expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; [\$2,908,500,000, and in addition, \$50,000,000 shall be derived by transfer from the Army stock fund, to remain available for obligation until June 30, 1973: *Provided*, That none of the funds provided in this Act shall be available for the maintenance of more than two active production sources for the supplying of M-16 rifles or for the payment of any price differential for M-16 rifles resulting from the maintenance of more than two active production sources] \$3,719,400,000, to remain available from July 1, 1971, until expended. (10 U.S.C. 2110, 2353, 3012, 4531, 4532, 4632; 31 U.S.C. 638a; Department of Defense Appropriation Act, 1971; additional authorizing legislation to be proposed for \$1,430,100,000.)

² Reimbursements are derived principally from cash sales to foreign governments (22 U.S.C. 2315).

This appropriation provides major items of combat and support equipment for approved Army forces in performing their assigned mission to meet successfully both nuclear and conventional war requirements. It also provides for the procurement of spares and repair parts not covered in the Army stock fund as well as production engineering, tooling, and facilities in support of current procurement.

1. *Aircraft*.—The 1972 program contains aircraft which are essential to the combat operation of field forces. To meet the Army's need for battlefield observation, troop movement, medical evacuation, armed escort, and rapid logistical and tactical support for combat-engaged forces, the 1972 program continues production to provide additional helicopters.

3. *Missiles*.—This program includes surface-to-air and surface-to-surface missiles. In the former category, continued procurement of Chaparral missiles in 1972 will provide frontline combat units with an effective defense against low-altitude enemy aircraft. Continued procurement of the Safeguard antiballistic missile defense system, as well as procurement of improved Hawk missiles and modifications to the Nike-Hercules systems, are planned for 1972 to provide more effective air defense of continental United States and oversea theaters. The 1972 program funds the continued procurement of TOW antitank missile systems to further improve the armor defeating capability of Army combat elements. For the Pershing missile system, the 1972 modification program continues to provide improved performance and survival of the system in its combat role. For the Lance missile system, the 1972 program continues production of the extended range missile to provide nuclear fire support.

5. *Weapons and combat vehicles*.—This program covers the procurement of combat vehicles and weapons including related repair parts and support materiel and production base support. The 1972 program replaces losses, training consumption, wearout, and obsolescence, and will improve inventories of grenade launchers. The program also continues procurement of the M60A1 medium tank and the chassis for the armored vehicle bridge launcher.

6. *Tactical and support vehicles*.—Included in this activity are trucks of all types and other wheeled vehicles which provide surface mobility to the field forces and the worldwide logistical system.

7. *Communications and electronics equipment*.—This program provides reliable, rugged, and mobile tactical communication equipment to achieve command and control over dispersed forces and weapons systems. Also included are funds for strategic communications equipment required for the worldwide defense communication system.

8. *Other support equipment*.—This program includes mobile assault bridges, construction, generators, rail, floating and materials handling equipment for Army combat forces in the field.

9. *Ammunition*.—This activity finances the procurement of ammunition for all Army weapons except missiles.

10. *Production base support*.—This activity provides industrial facilities needed for production of end items and components and for production engineering in advance of procurement. It also provides for the layaway of Government-owned plants and equipment at the time production is completed and where it has been established that the facilities will be required in the event of mobilization.

¹ Reimbursements are derived principally from cash sales to foreign governments (22 U.S.C. 2315).
Note.—Includes \$127,301 thousand in 1971 and \$126,063 thousand in 1972 for activities previously financed from other procurement, Navy; 1970, \$109,660.

General and special funds—Continued

PROCUREMENT OF AIRCRAFT AND MISSILES, NAVY—Continued

This appropriation finances the procurement of aircraft, missiles, and associated support equipment for Navy forces and Marine air wings. It also provides funds for modification of inservice aircraft and missiles to eliminate safety hazards and enhance operational effectiveness. Also included are target drones, aircraft ground support equipment, and repairable spare and repair parts for all end items procured under this appropriation. Funds are included to finance procurement of long leadtime effort and material in support of the planned subsequent year programs.

1. *Combat aircraft.*—The 1972 program finances the procurement of attack, fighter, electronic warfare, airborne early warning, and antisubmarine patrol aircraft and helicopters for Marine and Navy missions.

2. *Airlift aircraft.*—This activity finances the procurement of aircraft for critical personnel and cargo airlift. The 1972 program represents the initial step in a plan to modernize the Navy's tactical airlift capability.

3. *Trainer aircraft.*—The 1972 program provides for the procurement of basic and advanced jet trainer aircraft to fulfill training requirements for future Navy/Marine Corps pilots.

5. *Modification of aircraft.*—This activity finances the modification of currently operational aircraft to increase their capability, to extend their useful life, or to improve flight safety.

6. *Aircraft spares and repair parts.*—This activity finances the procurement of aircraft spares and repair parts required for initial outfitting and the replenishment of repairable items.

7. *Aircraft support equipment and facilities.*—This activity provides for modernization and maintenance of Government-owned industrial facilities, component improvement, and miscellaneous support of aircraft production costs. The 1972 program also provides for aircraft common ground support equipment including the Versatile Avionics Shop Test System (VAST).

8. *Ballistic missiles.*—This activity funds the procurement of fleet ballistic missiles and related support programs.

9. *Other missiles.*—The 1972 program provides for the continued procurement of missiles required for counterair, attack and fleet air defense. Aerial targets, including drones, for training and the testing of weapons systems are also financed under this activity.

10. *Modification of missiles.*—This activity finances the modification of missiles in inventory to assure their maximum effectiveness consistent with current technology.

11. *Missile spares and repair parts.*—This activity finances the procurement of spares and repair parts for missiles and drones.

12. *Missile support equipment and facilities.*—This activity includes funds for the modernization and maintenance of Government-owned missile industrial facilities and for the support of a navigational satellite.

¹ Reimbursements are derived principally from commercial carriers for property lost or damaged in transit (31 U.S.C. 489A), and proceeds from the sale of personal property being replaced (40 U.S.C. 481C).

This appropriation finances the construction of new ships and the conversion of existing ships, including all hull, mechanical and electrical equipment, electronics, guns, torpedo and missile launching systems, and communications systems. It also finances procurement of long-leadtime items for ships for which authorization will be required in the 1973 and 1974 programs.

The 1972 program continues the Navy's long-range modernization and replacement program designed to provide the fleet with modern balanced forces which can effectively respond to a wide variety of challenges in supporting our national policies.

Conversion and modernization of six ballistic missile submarines to a Poseidon missile capability will improve our sea-based ballistic missile weapons system. Long-leadtime items will also be procured for additional future conversions.

Funds in the 1972 program provide for one nuclear powered, guided missile frigate, designed to operate offensively, independently, or with nuclear or conventional strike forces. Advance funding is also provided for future frigates. Seven DD-963 class destroyers will be constructed as part of a new program which over several years will replace older World War II destroyer types. These new design destroyers will stress standardization, automation, improved reliability, and maintainability to minimize life cycle costs.

Funds are requested in 1972 for five high-performance, high-speed submarines which will provide a significant increase in the capability of the submarines force. Advance funds are also requested for procurement of long-leadtime components for more ships. Modernization of two guided missile frigates is also required to increase fleet antiair warfare capabilities.

In the support ship area, the 1972 budget will provide for one replenishment oiler, three salvage ships, two submarine tenders and the conversion of one deep ocean survey ship. Various service craft will be procured. Funds

are also included in this budget activity for outfitting material, post delivery work, cost growth on prior year ships, and for completion of prior year programs.

¹ Includes \$1,300 thousand for other weapons and \$205,500 thousand for torpedoes and related support equipment in 1972 subject to congressional authorization.

² Reimbursements are derived principally from cash sales to foreign governments (10 U.S.C. 2210).

Note.—Excludes \$152,344 thousand in 1971 and \$154,662 thousand in 1972 for activities transferred to (in thousands of dollars):

	1970	1971
Operation and maintenance, Navy.....	28,480	0
Procurement of aircraft and missiles, Navy.....	109,660	0
Salaries and expenses, National Science Foundation.....	3,126	2,728

This appropriation finances the procurement of major weapons and equipment other than aircraft, missiles, and ships. Such equipments range from the latest electronic sensors and weapons to update our naval forces, to trucks, training equipment, and spare parts. Also included is the cost associated with the installation of ship and shore equipment.

1. *Ships support equipment.*—This activity finances the procurement and installation of necessary shipboard components, including replacement of nuclear cores, to support active fleet ship maintenance, replacement, and modernization, and the ship alteration and improvement program.

2. *Communications and electronics equipment.*—This activity funds communications and electronics equipment for ships and shore-based activities.

3. *Aviation support equipment.*—This activity funds the procurement of air-dropped ordnance, and generalized aircraft support equipment.

4. *Ordnance support equipment.*—This activity funds the procurement of ship-launched ordnance, antisubmarine warfare ordnance, and Polaris ground support and training equipment.

5. *Civil engineering support equipment.*—This activity finances the procurement of construction, weight handling, and transportation equipment primarily in support of Navy general purpose forces.

6. *Supply support equipment.*—Procurement of self-propelled materials handling equipment and automated materials handling systems, required in support of the Navy supply system, are financed within this activity.

7. *Personnel and command support equipment.*—This activity finances procurement of training equipment, devices, and aids, and procurement of industrial shop, photographic, printing, and oceanographic equipment for activities supported by the Chief of Naval Operations, as well as equipment for the Bureau of Medicine and Surgery and fleet headquarters commands.

¹ Includes \$2,400 thousand in 1972 for other weapons requiring congressional authorization.

This appropriation provides the Marine Corps with weapons, ammunition, and related equipments, most of which are programmed for use by the Marine general purpose forces such as Marine divisions, and force troop tank and amphibious tractor battalions. These equipments provide the military hardware and munitions for defense of advanced naval bases, limited war landing operations, and general land warfare.

¹ Reimbursements are derived principally from cash sales to foreign governments (22 U.S.C. 2315).

This appropriation provides for the procurement of aircraft, modification of inservice aircraft, procurement of investment type spares and repair parts including spare engines and major components, and aircraft support equipment and facilities including aerospace ground equipment.

1. *Combat aircraft.*—This activity provides for the procurement of aircraft to replace losses and continue modernization of the combat forces. Funds are included to initiate procurement of an international fighter aircraft.

2. *Airlift aircraft.*—In this activity, funds estimated to cover the prior year unfunded deficiencies and contingency provisions for the C-5A aircraft are included, as are

funds to procure C-130 aircraft to maintain the existing airlift fleet.

3. *Trainer aircraft.*—Additional T-41 aircraft have been included to assist in satisfying the pilot production requirements of the service funded military assistance program. Provision is also made for continued procurement of the T-X aircraft to modernize the navigational training fleet.

4. *Other aircraft.*—No funds are being requested in 1972 for this activity.

5. *Modification of inservice aircraft.*—This activity provides for modification of inservice aircraft necessary for

safety of flight and changes incorporating technical improvements or providing for changed or improved mission accomplishment.

6. *Aircraft spares and repair parts.*—Provision is made for investment type spares and repair parts including initial spares for the new aircraft procurements as well as spares and repair parts for aircraft in the operating inventory.

7. *Aircraft support equipment and facilities.*—This activity provides for common aerospace ground equipment, component improvement, industrial facilities, war consumable items, and other charges.

¹ Reimbursements are derived principally from cash sales to foreign governments (22 U.S.C. 2315).

This appropriation provides for procurement, modification, installation, and checkout of missiles, boosters, payloads, drones, and the associated ground support and checkout equipment. It also procures technical data, spares support, transportation, expansion, and nonrecurring maintenance of industrial facilities, machine tool modernization, and classified project activities support.

1. *Ballistic missiles.*—This activity provides funds for the procurement of Minuteman intercontinental ballistic missile systems required for operational squadrons and crew training. The 1972 estimate provides for the procurement, installation, and checkout of missiles, aerospace ground equipment, specialized training equipment, the

General and special funds—Continued

required technical data for the intercontinental ballistic missile program and Minuteman force modernization.

2. *Other missiles.*—Provides for the procurement of the Shrike antiradiation missile, the Short Range Attack Missile (SRAM) for use on strategic bombers, Sparrow and Sidewinder air-to-air missiles, the Maverick air-to-ground missile, and target drones to support test and training requirements.

3. *Modification of inservice missiles.*—Provides for continued support of the Minuteman updating, and the modification of missiles and support equipment to correct deficiencies, improve safety, and increase mission capability.

4. *Spare and repair parts.*—Provides for initial and replenishment spare subsystems, components, and spare parts for ballistic and other missiles including provisioning documentation.

5. *Other support.*—Provides for classified project activities, modernization and maintenance of Government-owned production facilities, and support of operational space activities.

OTHER PROCUREMENT, AIR FORCE

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed [one thousand two] *eight* hundred and [eighty-one] *sixty-four* passenger motor vehicles (including four medium sedans at not to exceed \$3,000 each) for replacement only; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such land, and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title [by the Attorney General] as required by section 355, Revised Statutes, as amended; [\$1,338,700,000, to remain available for obligation until June 30, 1973] \$1,620,816,000, to remain available from July 1, 1971, until expended. (5 U.S.C. 3109; 10 U.S.C. 2110, 2353, 2386, 8012, 9505, 9531-32; 31 U.S.C. 638a, 638c, 649c, 718; 50 U.S.C. 491-94; Department of Defense Appropriation Act, 1971.)

¹ Reimbursements are derived principally from cash sales to foreign governments (22 U.S.C. 2315).

1. *Munitions and associated equipment.*—The 1972 program improves the Air Force's capability to meet the tactical and air defense requirements of both conventional and nuclear war.

2. *Vehicular equipment.*—The 1972 program provides for support of the vehicular fleet and for replacements of vehicles considered uneconomical to retain in the operational inventory.

3. *Electronics and telecommunications equipment.*—The 1972 program provides for continued procurement of end-item equipment and ancillary support items to support the electronics and communications subsystems of the Air Force's major weapon systems.

4. *Other base maintenance and support equipment.*—The 1972 program provides for procurement of ground support equipment for operational and logistical units and bases, worldwide.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Programs in this title fund the development, test, and evaluation of new and improved weapon systems and related equipment. They also provide for scientific research supporting defense functions and operations. Work is performed by Government laboratories, universities, industrial contractors, and nonprofit organizations.

Appropriations in this title support the research, development, test, and evaluation activities of the Army, Navy, Air Force, and Defense Agencies. Funds required for the research and development related to civil defense responsibilities of the Department of Defense are carried in the separate title, Civil Defense, in this chapter.

Since both uncertainty and risk are involved in pursuing and applying new technology, research and development programs are usually funded so that each year's resources support about 1 year's increment of the total program cost. Development of a new weapon system from initial definition to completion of testing and introduction into the operating forces may require 5 or more years.

The total 1972 budget plan for Defense research, development, test, and evaluation appropriations includes a \$759 million increase from the current 1971 plan, reaching a total of \$7,868 million. The specific activities included in the 1972 budget plan are discussed below under each budget activity. The budget plans and estimated obligations under appropriations in this title for the Army, Navy, Air Force, Defense Agencies, and the emergency fund are summarized as follows (in thousands of dollars):

Summary of programs by activities:

1. Military sciences.....	509,023	509,577	540,800	506,438	511,913	555,500
2. Aircraft and related equipment.....	1,640,927	1,642,790	1,988,300	1,456,953	1,704,200	2,069,000
3. Missiles and related equipment.....	2,280,204	2,042,657	2,010,900	2,184,809	2,023,800	2,068,500
4. Military astronautics and related equipment.....	637,704	467,194	499,300	618,469	461,900	504,200
5. Ships, small craft, and related equipment.....	304,522	338,253	490,500	317,005	324,100	496,000
6. Ordnance, combat vehicles, and related equipment.....	331,996	339,916	351,400	311,217	330,200	363,000
7. Other equipment.....	1,188,119	1,175,616	1,389,500	1,146,895	1,203,557	1,398,916
8. Programwide management and support.....	558,431	543,161	567,400	540,364	529,000	568,154
9. Emergency fund.....		50,000	50,000		50,000	50,000

1. *Military sciences.*—This activity supports research of potential military application in the physical, mathematical, environmental, engineering, biomedical, and behavioral sciences. The research tasks selected are derived from an analysis of basic missions and corresponding technological requirements, as well as from a review of technical opportunities related to national security needs. Examples are: oceanography research to increase the future effectiveness of antisubmarine warfare systems; computer research for improved command, control, and communications; biomedical research in shock and trauma; behavioral science research to achieve improvements in methods for personnel training and selection; and materials research to provide improved structures and components for military systems.

The principal support for such in-house organizations as the Naval Research Laboratory and some of the Federal contract research centers such as RAND are also provided here. In addition to the amounts directly provided for in this activity, applied research is also performed by industrial contractors supported by certain allowable indirect costs which may be permitted under contracts funded by both the research, development, test, and evaluation and procurement appropriations.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes, engines, avionics, and other installed aircraft equipment. It also funds applied research in supporting technologies including flight dynamics, advanced aircraft propulsion systems, avionics, advanced weapons, and biotechnology.

Systems commencing major development in 1972 include the joint service heavy lift helicopter, the Air Force A-X close air support aircraft, the LAMPS destroyer helicopter system, and the Army UTTAS logistics helicopter. Systems continuing full scale development in 1972 include the Navy F-14A fleet air defense fighter/interceptor and its F14B growth version, the S-3A antisubmarine warfare carrier based aircraft, the Air Force F-15 air

superiority fighter, the B-1 advanced strategic bomber, and the F-5 international fighter. Programs nearing completion in 1972 include the Air Force F-111 tactical fighter, the C-5 logistic transport, and the Navy EA-6B electronic warfare aircraft.

Also funded in this activity are research and development centers such as the laboratories located at Wright-Patterson Air Force Base, the Naval Air Development Center at Johnsville, Pa., and the Army Aviation Materials Laboratory at Fort Eustis, Va.

3. *Missiles and related equipment.*—This activity provides for research, development, test, and evaluation of missile systems of all types. Major increases include the undersea long-range missile system (ULMS) to assure the continued invulnerability of our sea-based deterrent, the Navy Harpoon antiship missile and Agile air-to-air dogfight missile, and Army terminal homing guidance technology. The Safeguard antiballistic missile system, as well as other antiballistic missile system concepts, will be pursued to maintain the sufficiency of our strategic forces. Under continuing major development is the Aegis fleet defense missile system and the Army SAM-D missile system for air defense. Systems development declining or nearing completion are the Minuteman and Poseidon ballistic missile systems, the Navy Condor and Air Force Maverick air-to-surface missile systems, the Navy Phoenix air-to-air missile, the Air Force strategic short range attack missile (SRAM), and the Army Lance surface-to-surface missile.

In addition to funding contracts with industry in the missile research and development program, this activity is a major source of financial support for the operation of certain test and evaluation facilities, such as the Western Test Range, the White Sands Missile Range, the Naval Weapons Center at China Lake, and the research and development programs at the Army's Redstone Arsenal.

4. *Military astronautics and related equipment.*—This activity provides for programs directed toward the im-

provement of space technology for military purposes, and investigations and development of specific military applications of space vehicles. Major programs include military communications satellite systems and ballistic missile early warning systems. Continued support will be provided for flight experiment programs, and ground based applied research and technology development programs in such areas as secondary power sources and navigation, guidance, sensor, reentry, and propulsion systems. Both contractual and in-house efforts relating to space technology are funded from this activity.

5. *Ships, small craft, and related equipment.*—This activity provides for applied research, development, test, and evaluation of ship structures and equipment, including propulsion systems, communications, navigation and ocean surveillance systems directly affecting ship operations. It includes the design, prototype fabrication, and performance evaluation of new types of ships, sonars, countermeasure devices, marine gas turbines, and nuclear propulsion plants. Development and testing of hydrofoil craft and surface effects ship prototypes will receive increased emphasis, as will antisubmarine warfare sensors, shipboard tactical communications, antiship missile countermeasures, and computer-aided ship designs. A significant portion of the effort at the Naval Ships Research and Development Center is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—This activity provides for the development, test, and evaluation of improved artillery, guns, rocket launchers, mortars, small arms, mines, grenades, torpedoes, nuclear and chemical munitions, and conventional air-launched weapons, as well as exploration and evaluation of new fuzes, propellants, explosives, detonators, dispensers, and armor.

Programs showing increases include lasers for the three services and advanced mines for both the Army and Navy. Undergoing continued development are improved gun systems for the Air Force and an austere version of the XM-803 main battle tank for the Army. Systems completing development are the MK-48 torpedo and the TOW and Dragon antitank weapons. This activity provides principal support for research and development activities at several Army arsenals and the Naval Ordnance Laboratory at White Oak, Md.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided for under other activities. Examples of the types of programs funded here are ocean engineering systems and technology development, chemical and biological agent detection and protective devices, combat clothing, tactical data processing systems, communications equipment, improved logistics and materiel handling, mapping and geodetic systems, and biomedical projects. Showing substantial increases are the Airborne Warning and Control System (AWACS), electronic warfare countermeasures, tactical sensor systems for battlefield surveillance, and undersea surveillance systems. Much of the support for the research and development effort at the Army Electronic Research and Development Laboratories, the MITRE Corporation, and the Lincoln Laboratories is provided under this activity.

8. *Programwide management and support.*—For the Army and the Navy, this activity provides for those costs of operation, management, and maintenance of research, development, and test facilities which are not distributed directly to other budget activities. For the Air Force, it provides for certain costs of central administration such as the Air Force Systems Command headquarters and divisions, as well as several large research, development, test, and evaluation centers.

9. *Emergency fund.*—The emergency fund enables the Secretary of Defense to support the exploitation of new scientific developments and technological breakthroughs and to provide for other unforeseen contingencies in the research, development, test, and evaluation programs.

Federal Funds

General and special funds:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; [\$1,600,200,000, to remain available for obligation until June 30, 1972] \$1,932,100,000, to remain available from July 1, 1971, until expended. (10 U.S.C. 2353, 4503; Department of Defense Appropriation Act, 1971; additional authorizing legislation to be proposed.)

These funds were required to support the accelerated Vietnamization program.

MILITARY CONSTRUCTION

The direct military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title are summarized in the following table:

MILITARY CONSTRUCTION PROGRAM

	[In thousands of dollars]		
	1970 actual	1971 estimate	1972 estimate
Active Forces.....	923,088	1,285,501	1,364,300
Reserve Forces.....	53,111	42,000	89,700
Interservice activities.....	17,438	67,776	28,200
Total.....	993,637	1,395,277	1,482,200

Most of the appropriations required for the military construction accounts are dependent upon the enactment of authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This category provides for the acquisition of land and for construction of military projects as authorized in currently effective military construction acts and the new authorization referred to above. These authorizations include construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction generally exceeds \$50 thousand per project. Under this category the major activities proposed for 1972 are as follows:

Strategic forces.—Provision has been made for the essential facilities required to continue the deployment of the Safeguard antiballistic missile system. In addition, provision has been made to upgrade existing facilities and provide for personnel support for other strategic warfare systems.

General purpose forces.—Projects in this category support general combat forces including their command organizations, the logistics organizations organic to these forces, and the related support units, including medical, which are deployed or deployable as constituent parts of military forces and field organizations. 1972 funding reflects continuing increased emphasis on improved troop housing and community support facilities as well as projects for new and improved operating and maintenance facilities.

Specialized activities.—Funds are provided for the continued support of the joint defense effort of the North Atlantic Treaty Organization. Also, provision is made to continue to improve the logistic and troop facility support for the modernization of the Vietnamese military forces. The control of water pollutants at Defense installations is funded in the 1972 program at the continuing high level, and the air pollution abatement near military bases will be increased substantially over prior year programs.

Research and development.—A major portion of the 1972 program provides for subsequent phases of the relocation and improvement of testing and laboratory facilities of the military services which have been initiated in prior year programs.

Reserve components.—The increased funding programed for facilities required for the training of the National Guard and the other Reserve Forces reflects the importance placed on these activities in view of reductions programed in the Active Forces.

Logistics.—Funding is provided at about the same level as in the past 2 years for the modernization and replacement of aircraft, ship and ground equipment maintenance, overhaul and repair facilities needed to satisfy deficiencies in current operations and meet new requirements resulting from technological advances.

Personnel support.—A significant portion of the 1972 program will provide funds for improved housing, medical and community support for lower grade enlisted personnel and junior grade officers to encourage their retention in the service, and the development of an all-volunteer force. Upgrading of existing facilities with the application of improved standards has been provided in addition to new

construction. In addition, increased funding is provided for hospital and medical facilities, the most significant individual project being the first phase for replacement and modernization of the Walter Reed General Hospital.

2. *Minor construction.*—Provision is made for construction of permanent and temporary projects that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$300 thousand per project for the Active Forces as amended by section 607, Public Law 91-511, and \$50 thousand per project for the Reserve component projects as defined in Department of Defense Directive 1225.5. As proposed for 1972, Active Force projects may be accomplished with use of operation and maintenance funds where the estimated cost of such construction is \$50 thousand or less per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and minor land acquisitions.

Federal Funds

General and special funds:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, and in sections 2673 and 2675 of title 10, United States Code, **[\$646,958,000]** \$642,200,000, to remain available until expended. (*Military Construction Appropriation Act, 1971; additional authorizing legislation to be proposed for \$603,158,000.*)

FAMILY HOUSING, DEFENSE

The Department of Defense family housing management account (76 Stat. 237) finances all expenses of the military family housing program. Funds provided in annual military construction appropriation acts under the title "Family Housing, Defense" are transferred to this account for obligation and expenditure. This appropriation is dependent on the enactment of authorizing legislation which is being submitted to the Congress for early consideration. An appropriation of \$919.2 million is requested for 1972, of which \$285.2 million is for construction of new housing, construction of mobile home facilities, improvement of existing housing and related projects, and \$634 million is for the operation and maintenance of family housing and related facilities, for leasing of family housing, for payments required on the indebtedness assumed to acquire Capehart and Wherry housing and to build surplus commodity housing in foreign countries, and for authorized payments of servicemen's mortgage insurance premiums.

Federal Funds**General and special funds:****FAMILY HOUSING, DEFENSE**

For expenses of family housing for the Army, Navy, Marine Corps, Air Force, and Defense agencies, for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation, maintenance, and debt payment, including leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, [\$806,464,000] \$919,220,000, to be obligated and expended in the Family Housing Management Account established pursuant to section 501(a) of Public Law 87-554, in not to exceed the following amounts:

For the Army:

Construction, [\$46,402,000] \$59,582,000;
 [Operation, maintenance, \$152,500,000;]

For the Navy and Marine Corps:

Construction, [\$95,174,000] \$122,133,000;
 [Operation, maintenance, \$101,661,000;]

For the Air Force:

Construction, [\$75,926,000] \$102,863,000;
 [Operation, maintenance, \$165,075,000;]

For defense agencies:

Construction, [\$326,000] \$642,000;
 [Operation, maintenance, \$5,134,000;]

For Department of Defense:

Debt payment, [\$164,266,000] \$158,917,000;
 Operation, maintenance, \$475,083,000.

Provided, That the amounts provided under this head for construction and for debt payment shall remain available until expended. (Military Construction Appropriation Act, 1971; additional authorizing legislation to be proposed.)

¹ Reimbursements are derived from collection of rentals from occupants of certain military housing units and the sale of homes at excess military installations (69 Stat. 652 and 70 Stat. 1105).

1. *Construction.*—(a) *Construction of new housing.*—The construction of 9,684 new permanent units at an estimated cost of \$244.1 million is proposed in furtherance of the continuing effort to provide adequate family housing for eligible personnel. The 9,684 units are distributed by service as follows: Army—1,920; Navy and Marine Corps—4,254; and Air Force—3,510. In addition to the construction of new permanent family housing units, \$7.3 million is provided for construction of mobile home facilities to accommodate those service members with privately owned mobile homes.

(b) *Construction improvements.*—Execution of the \$33 million improvement program will be realized during 1972, of which \$1.3 million provides for the unforeseen and urgently required projects to be accomplished under the authority of 10 U.S.C. 2674.

(c) *Planning.*—Funds are included in the construction of new housing budget activity to design the 9,684 housing units in the 1972 program. Costs to be incurred for planning future year housing projects and for projects which will not go forward to completion are estimated at \$800 thousand.

2. *Operation, maintenance, and interest payments.*—(a) *Operation.*—\$216.4 million is required in 1972 for the operation of an estimated 371,978 family housing units (excluding leased units); and \$34.4 million is required in 1972 to lease 13,841 units in both the United States and in foreign countries as part of the program to provide adequate family housing for eligible personnel.

(b) *Maintenance of real property.*—The cost of maintenance and repair of the 1972 family housing inventory is estimated at \$229.4 million. Minor alterations, not to exceed an average of \$50 per unit, are funded in this sub-activity.

(c) *Interest payments.*—A total of \$66.1 million is required in 1972 to defray interest charges on the indebtedness assumed to acquire Capehart and Wherry housing and for related expenses. In addition, appropriation of \$92.8 million is required in 1972 for reduction of agency indebtedness that was assumed with the acquisition of the Capehart, Wherry, and surplus commodity housing.

(d) *Mortgage insurance premiums.*—Premium payments of \$7.2 million are required on mortgage insurance provided by the Federal Housing Administration: (1) through the General insurance fund on mortgages assumed by Defense to acquire Capehart and Wherry housing; and (2) on mortgages assumed by active military personnel for housing purchased under the provisions of section 124, Public Law 83-560.

This fund finances a program for reducing the losses of military personnel and civilian employees incident to disposition of their one- or two-family dwellings when military installations are closed or when reductions in the scope of operations are ordered. Eligible personnel may be reimbursed for certain losses resulting from the sale of their dwellings located at or near such installations, or the Department of Defense may acquire such property. Proceeds from sale or rental of such property are deposited in this fund. The following business-type statements reflect operations of the program which started in 1968.

Funds for this program are now reflected in the Research, shelter survey and marking appropriation except that funds appropriated for 1971 are to satisfy a claim associated with the construction of the Federal Regional Emergency Operations Center at Denton, Tex. which was previously financed from this account.

SPECIAL FOREIGN CURRENCY PROGRAM

Federal Funds

General and special funds:

SPECIAL FOREIGN CURRENCY PROGRAM

For payment in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the

United States, for expenses of carrying out programs of the Department of Defense, as authorized by law [L, \$2,621,000, to remain available for obligation until June 30, 1973]; \$12,300,000, to remain available from July 1, 1971, until expended: Provided, That this appropriation shall be available, in addition to other appropriations to such Department, for payments in the foregoing currencies. (Department of Defense Appropriation Act, 1971; additional authorizing legislation to be proposed for \$6,744,000.)

Program and Financing (in thousands of dollars)

REVOLVING AND MANAGEMENT FUNDS

Federal Funds

Public enterprise funds:

DEFENSE PRODUCTION GUARANTEES

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, Air Force, and Defense Supply Agency to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are financed from guarantee fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Net earnings are retained to

purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. app. 2091).

LOANS GUARANTEED

Intragovernmental funds:

DEPARTMENT OF DEFENSE STOCK FUNDS

The Department of Defense stock funds finance the acquisition of inventories of material and supplies for resale and mobilization (10 U.S.C. 2208). These inventories are stocked and sold at designated defense activities worldwide.

Budget program.—Obligations decrease in each year due to reductions in force levels and activity rates. As a result, stock fund inventories will also decrease from year to year. Further inventory reductions are planned due to disposal of long supply and excess stocks. Yearend inventories are estimated as shown below (in millions of dollars):

	1969 actual	1970 actual	1971 estimate	1972 estimate
Army stock fund:				
Operating and other stocks.....	1,661	1,402	971	1,004
Mobilization reserve stocks.....	603	588	658	678
Long supply stocks.....	1,000	1,094	869	700
Total.....	3,264	3,084	2,498	2,382
Navy stock fund:				
Operating and other stocks.....	758	752	744	731
Mobilization reserve stocks.....	251	227	238	250
Long supply stocks.....	1,072	877	674	528
Total.....	2,081	1,856	1,656	1,509

Marine Corps stock fund:				
Operating and other stocks.....	104	96	82	68
Mobilization reserve stocks.....	40	52	75	75
Long supply stocks.....	112	107	32	30
Total.....	256	255	189	173
Air Force stock fund:				
Operating and other stocks.....	959	1,241	1,139	1,063
Mobilization reserve stocks.....	173	169	182	178
Long supply stocks.....	1,338	1,083	955	718
Total.....	2,470	2,493	2,276	1,959
Defense stock fund:				
Operating and other stocks.....	1,657	1,279	1,082	1,038
Mobilization reserve stocks.....	528	534	525	536
Long supply stocks.....	797	1,120	998	885
Total.....	2,982	2,933	2,605	2,459
Total DOD stock funds:				
Operating and other stocks.....	5,139	4,770	4,018	3,904
Mobilization reserve stocks.....	1,595	1,570	1,678	1,717
Long supply stocks.....	4,319	4,281	3,528	2,861
Total.....	11,053	10,621	9,224	8,482

Financing the budget program.—Funds for financing the budget program are usually derived from sales to customers. During 1970, sales of inventory capitalized without cost and reductions to inventory levels generated an excess working capital balance of \$400 million which was transferred to other appropriations. In 1971 an additional excess of \$426 million will be generated and also proposed for transfer. Expenditures in 1972 are projected to decrease by \$1,646 million from 1970 resulting from reductions in inventory levels. Yearly expenditures are estimated as shown below (in millions of dollars):

	Gross expenditures		
	1970 actual	1971 estimate	1972 estimate
Army stock fund.....	3,408	2,909	2,807
Navy stock fund.....	2,005	1,735	1,723
Marine Corps stock fund.....	235	205	186
Air Force stock fund.....	3,026	2,771	2,874
Defense stock fund.....	2,768	2,298	2,206
Total.....	11,442	9,918	9,796

DOD stock funds are authorized to incur obligations in anticipation of future year business (10 U.S.C. 2210(b)). This is necessary because the procurement leadtime on material is greater than the time required to fill and collect for customer orders. Pursuant to this authority contract authorization of \$1,611 million was available at the end of 1970 decreasing to \$316 million in 1972.

Operating results and financial condition.—Net losses of \$493 million and \$181 million are forecast for 1971 and 1972 respectively. These losses result largely from disposal and donation of excess and surplus inventory.

Investment (equity) of the U.S. Government at the end of 1972 is estimated at \$9,707 million, including \$19,236 million in inventory and other assets capitalized less \$5,112 million in working capital transferred out and a cumulative operating deficit of \$4,417 million.

INDUSTRIAL FUNDS

Department of Defense industrial funds finance industrial and commercial type activities on a reimbursable basis (10 U.S.C. 2208). These funds provide a source of working capital used in translating orders from customer appropriations into actual goods and services required by the Defense establishment. Industrial fund activities are financed through customer accounts on a progress payment basis. Reimbursement covers production costs. Government investment as of June 30, 1972, is estimated at \$539 million.

Total costs are projected to decrease by \$422.7 million in 1972 due to generally lower support requirements. The reduction is reflected below (in thousands of dollars):

TOTAL PRODUCTION COSTS

	1970 actual	1971 estimate	1972 estimate
Army industrial fund.....	1,385,263	1,345,056	1,306,164
Navy industrial fund.....	4,636,843	4,098,518	3,953,486
Marine Corps industrial fund.....	24,445	25,864	21,551
Air Force industrial fund.....	2,628,869	2,463,300	2,216,300
Defense industrial fund.....	395,450	394,462	407,028
Total.....	9,070,870	8,327,200	7,904,529

The Army industrial fund is currently used to finance 32 activities engaged in research, development, test, engineering, transportation and traffic management, and limited quantity production and major overhaul of weapons, munitions, missiles, and other military equipment. An essentially level tempo of activity reflects slight reductions in workload within the transportation and terminal activities, and the proving ground and laboratory sector. These are partially offset by increases in depot maintenance activities.

The Navy industrial fund finances the operations of seven aircraft maintenance plants, 17 ordnance facilities, 16 research laboratories, 10 shipyards, three Strategic Systems Project Office activities, 37 printing plants, eight public works centers, and the Military Sealift Command. Operating costs of these organizations are expected to be lower in 1972 than in 1971, reflecting reduced customer workload due, in part, to diminishing Southeast Asia requirements.

The Marine Corps industrial fund finances two depot maintenance activities. The depot maintenance program

is expected to decline as the anticipated equipment overhaul and rebuild workload decreases.

The Air Force industrial fund finances nine printing plants, 29 laundries, the Military Airlift Command, the Alaska Communication System, six depot maintenance activities, and three research and development centers. The Alaska Communication System will be removed from the industrial fund in 1971, as a result of sale to a commercial corporation under the provisions of Public Law 90-135. Two of the research and development activities, Rome Air Development Center and Flight Test Center, began operations under the fund in 1971. The revenue decline in the estimate period is due primarily to reduced depot maintenance and airlift workload.

The Defense industrial fund finances the Defense Clothing and Textile Supply Center and leased communication services procured by the Defense Commercial Communications Office. Cost increases in 1971 and 1972 are due to tariff increases and expansion of automatic switching networks.

This fund was created to simplify the financing and accounting for operations supported by two or more appropriations (10 U.S.C. 2209). The corpus of the fund consists of \$1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*—Finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services.*—Provides for the central payment of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs incurred by the Army.

3. *Construction activity, Europe.*—Finances certain administrative and overhead expenses in the Department of Defense construction programs in Western Europe.

90 Outlays.....	-8,786	9,398	-1,503

This fund was created to facilitate the financing of operations supported by two or more appropriations (10 U.S.C. 2209). The principal activity financed through the fund is the transportation of supplies, materials, and equipment of the Navy. The funds for departmental administrative activities include maintenance and alteration of office space and printing expenses. The Armed Services Board of Contract Appeals is also financed through this fund.

90 Outlays.....	3,212	300	

This fund represents advances received for goods or services furnished foreign governments and private parties (31 U.S.C. 643). Authorized individuals and organizations requesting goods or services are required to advance amounts to cover the estimated value of this fund. These advances are then used to reimburse the Operation and maintenance, Navy appropriation for the value of goods provided or services rendered.

¹ Reimbursements from non-Federal sources are derived from the sale of meals to midshipmen and guests and from funds collected in the operation of the midshipmen's store.

1. *Midshipmen's commissary, U.S. Naval Academy.*—The midshipmen's commissary is operated to provide food service at the U.S. Naval Academy (31 U.S.C. 66(b)). The commissary will be a nonappropriated fund activity in 1972 as are most other similar activities.

2. *Midshipmen's store, U.S. Naval Academy.*—The midshipmen's store is operated to (1) procure clothing and other necessary supplies for the midshipmen, (2) provide barber, cobbler, and tailor shop facilities for the midshipmen, and (3) operate the dairy farm at the Naval Academy. Funds collected from these operations are available for operating expenses of such activities and for other expenditures as the Superintendent of the Naval Academy considers necessary for the interest of the health, comfort, and education of the midshipmen (10 U.S.C. 6971(a)).

GENERAL PROVISIONS

SEC. 801. No part of any appropriation contained in this Act shall be used for publicity or propoganda purposes not authorized by the Congress.

SEC. 802. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with 5 U.S.C. 3109, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 803. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 804. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act.

SEC. 805. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 806. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be

available for acquisition of land or interest therein as authorized by section 2672 or 2675 of title 10, United States Code.

SEC. 807. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding ~~["\$136,700,000"]~~ \$152,100,000, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents: *Provided*, That under such regulations as may be issued by the Secretary of Defense, such schooling in a school operated by the Department of Defense under this section may be provided without tuition for minor dependents of civilian and military personnel of the Department of Defense who died while entitled to compensation or active duty pay: *Provided further*, That where such personnel die subsequent to the date of this Act, such schooling must be continued or commenced within 1 year after the date of death; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for leasing of buildings and facilities including payment of rentals for special purpose space at the seat of government, and in the conduct of field exercises and maneuvers or, in administering the provisions of 43 U.S.C. 315q, rentals may be paid in advance; (f) payments under contracts for maintenance of tools and facilities for twelve months beginning at any time during the fiscal year; (g) maintenance of Defense access roads certified as important to national defense in accordance with section 210 of title 23, United States Code; (h) for the purchase of milk for enlisted personnel of the Department of Defense heretofore made available pursuant to section 1446a, title 7, United States Code, and the cost of milk so purchased, as determined by the Secretary of Defense, shall be included in the value of the commuted ration; (i) transporting civilian clothing to the home of record of selective service inductees and recruits on entering the military services; (j) payments under leases for real or personal property for twelve months beginning at any time during the fiscal year; (k) pay and allowances of not to exceed nine persons, including personnel detailed to International Military Headquarters and Organizations, at rates provided for under section 625(d)(1) of the Foreign Assistance Act of 1961, as amended; (l) under regulations approved by the Secretary of Defense, for transportation from their homes to rest and recuperation centers in the Pacific area and return, plus per diem payments of not to exceed \$30 per day for each dependent for periods not over two weeks, for dependents of military personnel assigned as province or district senior advisers in Vietnam on voluntarily extended tours of duty totaling not less than eighteen months, during periods when such military personnel are granted special incentive leaves at such rest and recuperation centers.

SEC. 808. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners, applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment, prisoners, civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; (e) expenses of prisoners confined in nonmilitary facilities; (f) military courts, boards, and commissions; (g) utility services for buildings erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; (i) expenses of Latin-American cooperation as authorized for the Navy by law (10 U.S.C. 7208); and (j) expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case.

SEC. 809. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with

respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 810. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians, except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.50 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deduction from the pay of civilian employees: *Provided further*, That members of organized nonprofit youth groups sponsored at either the national or local level, when extended the privilege of visiting a military installation and permitted to eat in the general mess by the commanding officer of the installation, shall pay the commuted ration cost of such meal or meals.

SEC. 811. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 812. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and material, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 813. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interests of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

(d) The Secretary of Defense shall immediately advise Congress of the exercise of any authority granted in this section, and shall report monthly on the estimated obligations incurred pursuant to subsections (b) and (c).

SEC. 814. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the

commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 815. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 301 of title 37, United States Code, to certain members of the Armed Forces otherwise entitled to receive flight pay during the current fiscal year (1) who have held aeronautical ratings or designations for not less than fifteen years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights, or who have been assigned to a course of instruction of 90 days or more.

SEC. 816. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in any one shipment having a net weight in excess of thirteen thousand five hundred pounds.

SEC. 817. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 818. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 822 of this Act.

SEC. 819. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer-camp training of the Reserve Officers' Training Corps.

SEC. 820. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to Congress and to the Office of Management and Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. 821. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. 822. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. 823. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 824. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing,

cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided further*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. 825. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 826. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. 827. Appropriations contained in this Act shall be available for the purchase of household furnishings, and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. 828. During the current fiscal year, appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901; 80 Stat. 508).

SEC. 829. During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national, or international rifle matches.

SEC. 830. Funds provided in this Act for congressional liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed **[\$1,150,000]** \$1,200,000: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

SEC. 831. Of the funds made available by this Act for the services of the Military Airlift Command, \$100,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil air fleet.

SEC. 832. Not less than \$5,500,000 of the funds made available in this Act for travel expenses in connection with temporary duty and permanent change of station of civilian and military personnel of the Department of Defense shall be available only for the procurement of commercial passenger sea transportation services on American-flag vessels.

SEC. 833. During the current fiscal year, appropriations available to the Department of Defense for operation may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, unfitness, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

SEC. 834. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by the contractor of personnel required for the performance by the contractor of obligations under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

SEC. 835. Funds appropriated in this Act for maintenance and repair of facilities and installations shall not be available for acquisition of new facilities, or alteration, expansion, extension, or addition of existing facilities, as defined in Department of Defense Directive 7040.2, dated January 18, 1961, in excess of **[\$25,000]** \$50,000: *Provided*, That the Secretary of Defense may amend or change the said directive during the current fiscal year, consistent with the purpose of this section.

SEC. 836. Upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed **[\$600,000,000]** \$1,000,000,000 of the appropriations contained in this Act between such appropriations, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation to which transferred: *Provided*, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority.

SEC. 837. None of the funds appropriated in this Act may be used to make payments under contracts for any program, project, or activity in a foreign country unless the Secretary of Defense or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 838. (a) Not to exceed \$2,500,000,000 of the appropriations available to the Department of Defense during the current fiscal year shall be available for their stated purposes to support: (1) Vietnamese and other free world forces in support of Vietnamese forces; (2) local forces in Laos and Thailand; and for related costs, on such terms and conditions as the Secretary of Defense may determine: *Provided*, That none of the funds appropriated by this Act may be used for the purpose of paying any overseas allowance, per diem allowance, or any other addition to the regular base pay of any person serving with the free world forces in South Vietnam if the amount of such payment would be greater than the amount of special pay authorized to be paid, for an equivalent period of service, to members of the Armed Forces of the United States under section 310 of title 37, United States Code, serving in Vietnam or in any other hostile fire area, except for continuation of payments of such additions to regular base pay provided in agreements executed prior to July 1, 1970: *Provided further*, That nothing in clause (1) of the first sentence of this subsection shall be construed as authorizing the use of any such funds to support Vietnamese or other free world forces in actions designed to provide military support and assistance to the Government of Cambodia or Laos: *Provided further*, That nothing contained in this section shall be construed to prohibit support of actions required to insure the safe and orderly withdrawal or disengagement of U.S. Forces from Southeast Asia, or to aid in the release of Americans held as prisoners of war.

(b) Within thirty days after the end of each quarter, the Secretary of Defense shall render to Congress a report with respect to the estimated value by purpose, by country, of support furnished from such appropriations.

SEC. 839. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: *Provided*, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget.

SEC. 840. No part of the funds appropriated under this Act shall be used to pay salaries of any Federal employee who is convicted in any Federal, State, or local court of competent jurisdiction, of

inciting, promoting, or carrying on a riot, or any group activity resulting in material damage to property or injury to persons, found to be in violation of Federal, State, or local laws designed to protect persons or property in the community concerned.】

【Sec. 841. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan or a grant to any applicant who has been convicted by any court of general jurisdiction of any crime which involves the use of or the assistance to others in the use of force, trespass or the seizure of property under control of an institution of higher education to prevent officials or students at such an institution from engaging in their duties or pursuing their studies.】

【Sec. 842. (a) Appropriations heretofore made available for Procurement of Equipment and Missiles, Army; Procurement of Aircraft and Missiles, Navy; Other Procurement, Navy; Procurement, Marine Corps; Aircraft Procurement, Air Force; Missile Procurement, Air Force; Other Procurement, Air Force; Procurement, Defense Agencies; and Special Foreign Currency Program shall not be available for obligation after June 30, 1973. Appropriations heretofore made available for Shipbuilding and Conversion, Navy, shall not be available for obligation after June 30, 1975. Appropriations heretofore made available under the headings Research, Development, Test, and Evaluation, Army; Research, Development, Test, and Evaluation, Navy; Research, Development, Test, and Evaluation, Air Force; and Research, Development, Test, and Evaluation, Defense Agencies shall not be available for obligation after June 30, 1972. Each such appropriation shall be merged with and shall be available for the same time period as appropriations made in this Act under the same head.】

【(b) Section 642 of the Department of Defense Appropriation Act, 1970 (Public Law 91-171, approved December 29, 1969), is hereby repealed.】

Sec. 【843】 840. In line with the expressed intention of the President of the United States, none of the funds appropriated by this Act shall be used to finance the introduction of American ground combat troops into Laos or Thailand.

Sec. 【844】 841. None of the funds appropriated in this Act shall be available for the purposes authorized by section 610, Public Law 91-511, approved October 26, 1970.

【Sec. 845. After June 15, 1971, no part of the funds in this Act shall be available to support in excess of 138,000 personnel of the Department of Defense (military and civilian) assigned to activities managed under the Intelligence and Security Program of the Department of Defense.】 (*Department of Defense Appropriation Act, 1971.*)

GENERAL PROVISIONS—MILITARY CONSTRUCTION

Sec. 101. Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the 【second】 *first* session of the 【Ninety-first】 *Ninety-second* Congress.

Sec. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed \$25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

Sec. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction, and the application of economical construction practices.

Sec. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories, or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

Sec. 105. Funds appropriated to the Department of Defense for construction are hereby made available for hire of passenger motor vehicles.

Sec. 106. Funds appropriated to the Department of Defense for construction may be used for advances to the 【Bureau of Public Roads,】 *Federal Highway Administration*, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

Sec. 107. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental United States for which specific appropriations have not been made.

Sec. 108. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than \$25,000.

Sec. 109. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

Sec. 110. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriations Acts. (*Military Construction Appropriation Act, 1971.*)

GENERAL PROVISIONS—CIVIL DEFENSE

Appropriations contained in this Act for carrying out civil defense activities shall not be available in excess of the limitations on appropriations contained in section 408 of the Federal Civil Defense Act, as amended (50 U.S.C. App. 2260).

No part of any appropriation in this Act shall be available for the construction of warehouses or for the lease of warehouse space in any building which is to be constructed specifically for civil defense activities. (*Independent Offices and Department of Housing and Urban Development Appropriation Act, 1971.*)

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CEMETERIAL EXPENSES

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of [seven] five passenger motor vehicles of which two shall be for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries, to remain available until expended, [\$18,184,000] \$22,374,000: *Provided*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation. (24 U.S.C. 271, 273-276, 278, 279, 279a-b, 282, 283, 290; *Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1971.*)

91.30 Outlays from military pay act supplemental.....	-----	4	-----

This appropriation provides funds for the operation and maintenance of the national cemetery system and for the procurement and supply of headstones and markers for graves of eligible persons buried in national and private cemeteries.

1. *Operation and maintenance.*—The national cemetery system consists of 118 activities located in 33 States, Puerto Rico, and the District of Columbia. Included are 85 national cemeteries and 33 miscellaneous burial plots and monument sites. A total of 38,028 interments were made in 1970; 37,725 are estimated for 1971, and 38,250 projected for 1972. There will be 2,720 developed acres to be maintained in 1972.

2. *Construction.*—Provision is made for six projects, including two gravesite development projects necessary to preclude closing of cemeteries to interments. An amount is also included for engineering investigations and preparation of plans for future requirements.

3. *Headstone procurement.*—The basis of the 1972 program is a 3.9% increase in normal applications.

	1970 actual	1971 estimate	1972 estimate
Applications from prior year.....	21,461	17,985	12,523
New applications.....	196,969	204,538	212,515
Total applications.....	218,430	222,523	225,038
Applications carried to next year.....	-17,985	-12,523	-15,038
Total procurement.....	200,445	210,000	210,000

4. *Administration.*—Provision is made for 155 man-years required for processing applications and placing orders for headstones and markers; determining eligibility for interment; management of the national cemetery system; and administrative support.

5. *Special construction, Arlington National Cemetery.*—In continuation of the objectives and goals of the master plan, funds are being requested to continue or initiate projects such as renovation of Memorial Trophy Room and adjacent area, a walkway system for the Memorial Amphitheatre, and a Chapel/Columbarium.

CORPS OF ENGINEERS—CIVIL

The civil works program of the Corps of Engineers consists of a number of related activities for the control and development for beneficial use of water resources in the United States, Puerto Rico, and the Virgin Islands.

The requested appropriation is \$1,416 million, which is \$109 million more than the 1971 appropriation, and \$259 million more than the appropriation for 1970.

Federal Funds

General and special funds:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law surveys and studies of projects prior to authorization for construction, **[\$39,597,000] \$50,169,000**, to remain available until expended: *Provided*, That **[\$655,000] \$650,000** of this appropriation shall be transferred to the Bureau of Sport Fisheries and Wildlife for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1938 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army.

For an additional amount for "General Investigations," \$300,000, to remain available until expended. (33 U.S.C. 426-426c, 540, 541, 701; *Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1971; Supplemental Appropriations Act, 1971.*)

Unpaid undelivered orders.....	6,322		8,146	5,578	5,301
Advances.....	2	294	281	300	300
Total selected resources..	6,324	294	8,427	5,878	5,601

1. *Surveys.*—Navigation and flood control studies are made to determine the need and economic justification for proposed water and related land resource developments. Beach erosion control studies are undertaken to determine the need for shore protection and remedial measures at specific localities. Funds are provided in 1972 to continue 89 navigation, 199 flood control, and 16 beach erosion surveys. A total of 3 navigation, 14 flood control, and 2 beach erosion surveys will be initiated.

Comprehensive river basin studies provide for broad consideration of water and related land resource needs of river basins. They are coordinated with the related river basin planning efforts of the Departments of the Interior and Agriculture and other concerned agencies.

Work will be continued in 1972 on the following:

1. Connecticut River Basin ¹
2. Genesee River Basin ¹
3. Great Lakes Region
4. Lower Mississippi Region
5. Pearl River Basin ¹
6. Red River below Denison Dam, Ark., La., Okla., and Tex. ¹
7. Red River of the North, Minn. and N. Dak.
8. Susquehanna River Basin, N.Y., Pa., and Md.
9. Willamette River Basin, Oreg. ¹
10. Long Island Sound, Conn. and N.Y.
11. Southeastern New England River Basins

¹ For preparation of authorization report only.

Special studies are made to resolve unique or especially complex water resources problems. Funds are requested to continue seven special studies and for participation for the first time with the Department of the Interior in the westwide water study. This study is for the preparation of a general plan for comprehensive development of water resources of the western United States. The Bureau of Reclamation has been assigned the responsibility for the study and has requested the cooperation and assistance of the Corps of Engineers.

Surveys are made in coordination with Federal, State, and local agencies and interests. They give appropriate consideration to present and future requirements for all beneficial uses of water and related land resources, including navigation, flood control, water supply, irrigation, water quality control, power, recreation, and fish and wildlife conservation.

2. *Collection and study of basic data.*—Funds are transferred to the Geological Survey for installation, operation, and maintenance of stream gaging stations; to the Weather Bureau for hydrometeorological studies; and to the Bureau of Sport Fisheries and Wildlife for preauthorization studies of the effects of proposed projects upon fish and wildlife. The Corps of Engineers participates on a number of engineering and control boards that study and control international streams mutually affecting the United States and Canada. Information about the flood hazard, advice, and assistance are furnished to the States and local governmental agencies, upon their request, and to other Federal agencies for guidance in the management of flood plain areas to assure the best and safest use of such areas.

3. *Research and development.*—Coastal engineering research and development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to interested Federal, State, and local agencies and individuals.

Civil works investigations are conducted to improve procedures for analysis of engineering data; to conduct research and training activities; to refine design methods; to develop better materials and practices for the construction, operation, and maintenance of water resource facilities; to investigate rapid excavation techniques by use of explosives in the construction of civil works projects; and to improve procedures used in formulating plans for water resources development. A hydrologic engineering center embraces the functions of hydrological research, training, methods systemization, special projects assistance, and ground water hydrology. A scientific and technical information center acquires published and unpublished literature; prepares and distributes abstracts, technical reviews, and evaluations; and answers inquiries for information from scientists and engineers to improve their knowledge of new developments in their fields.

The Mississippi River basin model is being maintained pending completion of computer studies and reports, for demonstrations, and for viewing by the general public. Funds requested will be used for minimum necessary maintenance of the model and for public access.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction): **[\$851,256,000]** \$846,929,000, to remain available until expended: *Provided*, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That in connection with the rehabilitation of the Snake Creek Embankment of the Garrison Dam and Reservoir Project, North Dakota, the Corps of Engineers is authorized to participate with the State of North Dakota to the extent of one-half the cost of widening the present embankment to provide a four-lane right-of-way for U.S. Highway 83 in lieu of the present two-lane highway;

CORPS OF ENGINEERS—CIVIL—Continued

General and special funds—Continued

CONSTRUCTION, GENERAL—continued

¶*Provided further*, That funds appropriated for the Robert S. Kerr Lock and Dam, Oklahoma, shall be available to provide a 9-foot deep auxiliary navigation channel and 1,000-foot long turning basin along Sans Bois Creek, with appropriate widths and an overall length of approximately ten miles: *Provided further*, That the Elk Creek Reservoir Project in Oregon shall not be operated for irrigation purposes until such time as the Secretary of the Interior makes

the necessary arrangements with non-Federal interests to recover the costs, in accordance with Federal Reclamation Law, which are allocated to the irrigation purpose: ¶ *Provided further*, That [§625, 000] \$625,000 of this appropriation shall be transferred to the Bureau of Sport Fisheries and Wildlife for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. 90	Outlays	722,347	906,043	890,000

¹ Advance engineering and design only.

The requested appropriation of \$847 million is a decrease of \$4 million from the appropriation for 1971, and an increase of \$135 million compared with the appropriation for 1970. About 66% of the requested program will be applied to 46 major projects in amounts of \$5 million or more each.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high-priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects.

2. *Navigation projects.*—This activity includes construction of locks, dams, and canals, and improvement of channels and harbors by dredging and by construction of breakwaters, jetties, and dikes. Provision also is made for the construction of small navigation projects not requiring specific congressional authority.

With the funds requested, work will be continued in 1972 on 11 lock, dam, and canal projects; and on 32 channel and harbor projects, of which five will be completed. Construction will be initiated and completed on one channel and harbor project; Myers Chuck Harbor, Alaska.

3. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States and its possessions. Existing law provides for Federal payment of 50% of the cost of beach erosion control works for the protection of non-Federal publicly owned or publicly used shores, and up to 70% of the cost of protection of State and other publicly owned shore parks and conservation areas that meet certain criteria.

Funds are requested for 12 beach erosion projects, of which six are for continuing construction and six are for reimbursement to local interests. Three projects are expected to be completed with 1972 funds.

4. *Flood control projects.*—This activity includes local protection projects and reservoirs for flood control and other purposes, such as water supply, but without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for snagging and clearing work on navigable streams and tributaries when such work is necessary; for emergency bank protection; and for construction of small flood control projects not requiring specific congressional authority.

With the funds requested, work will be continued on 69 local protection projects, of which seven will be completed

with 1972 funds; and on 75 reservoir projects, of which eight will be completed.

Three new local protection projects and three new reservoir projects will be initiated as follows:

LOCAL PROTECTION PROJECTS

1. East St. Louis (Cahokia Dam), Ill.
2. Kalamazoo, Mich.
3. Rio Grande Floodway (Española Valley Unit), N. Mex.¹

¹ To be initiated and completed.

RESERVOIR PROJECTS

1. Beaver Brook Dam and Lake, N.H.
2. Clinton Lake, Kans.
3. Cascadia Dam and Lake, Oreg.

5. *Multiple-purpose projects, including power.*—Work will be continued on 27 multiple-purpose projects with power installations, three of which will be completed with 1972 funds.

6. *Recreation on completed projects.*—Additional public use facilities will be provided at completed projects to accommodate a rapidly increasing number of visitors.

7. *Land acquisition fund.*—This fund, established in 1971, will permit the acquisition of lands required for authorized Federal projects in those cases where delay creates an extreme hardship on the owners. It will be replenished from future appropriations to such projects when made.

8. *Small authorized projects.*—Activities in 1972 will be financed from funds appropriated in prior years.

9. *Coordination Act studies (Fish and Wildlife Service).*—This program provides for detailed studies and reports by the Bureau of Sport Fisheries and Wildlife to determine the effects on fish and wildlife resources of water-control projects of the Corps of Engineers.

10. *Rehabilitation.*—Rehabilitation work will be undertaken on existing projects that have deteriorated to the extent that their usefulness has been impaired. Repair of breakwaters and other structures will be carried out on two navigation projects and one multiple-purpose project, including power.

11. *Aquatic plant control.*—This program is for the control and progressive eradication of water hyacinths, alligatorweed, Eurasian watermilfoil, and other obnoxious aquatic plant growths from navigable waters, tributaries, connecting channels, and other allied waters of the United States, in the interest of navigation, flood control, drainage, agriculture, fish and wildlife conservation, public health, and related purposes. The authority includes research to develop the most effective and economic control measures.

Total selected resources.....	36,709	93	36,589	32,285	34,785

1. *Navigation projects.*—In 1972 operation and maintenance will be carried out on 276 channel and harbor projects, including dikes for containment of polluted dredged material from Great Lakes harbors, and on 32 locks, dams, and canals.

2. *Flood control projects.*—In 1972, 183 flood control reservoirs and 19 local protection projects will be operated and maintained. Other completed flood control projects will be inspected to determine the adequacy of maintenance by local interests.

3. *Multiple-purpose projects, including power.*—By the end of 1972, 62 multiple-purpose projects with an installed capacity of 13,753,734 kilowatts will be operated and maintained.

4. *Protection of navigation.*—Under laws for the protection and preservation of navigable waters for which the Secretary of the Army is responsible, regulations are established and permits granted for activities and structures affecting navigable waters, including implementation of the Refuse Act.

1. *Executive direction and management.*—The Office, Chief of Engineers, and 10 division offices supervise work decentralized in 36 district offices. One division office and the district offices are financed from other appropriations.

2. *River and Harbor Board.*—The Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers.

3. *Coastal Engineering Research Center.*—The Center plans and conducts research in the field of coastal engineering, develops standards, and reviews technical reports as directed by the Chief of Engineers.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for information on the civil works program.
