This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of NASA installations.

Responsibility for the space flight activity is located at the John F. Kennedy Space Center, Kennedy Space Center, Fla.; Lyndon B. Johnson Space Center, Houston, Tex.; Marshall Space Flight Center, Huntsville, Ala.; and the National Space Technology Laboratories, Bay St. Louis, Miss. The scientific investigations in space and space applications activities are concentrated principally at the Ames Research Center, Moffett Field, Calif.; Goddard Space Flight Center, Greenbelt, Md.; Langley Research

Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; Lyndon B. Johnson Space Center; Marshall Space Flight Center; National Space Technology Laboratories; and the Wallops Flight Center, Wallops Island, Va.

The space research and technology activity is conducted at the Ames, Goddard, Langley, Lewis, Johnson, Marshall, and Wallops Centers, as well as the Flight Research Center, Edwards, Calif.

Aeronautical research and technology work is conducted at the Ames, Flight, Langley, and Lewis research centers.

Programwide support and management are provided by NASA Headquarters, Washington, D.C. Support activities for tracking and data acquisition requirements are performed at the Goddard Space Flight Center and Wallops Flight Center.

The following table reflects the distribution of the direct obligations by installation:

This appropriation provides funding for the payment of compensation and pension benefits to veterans and survivors who satisfy certain requirements as set forth in title 38, United States Code. Other benefits, which are related to, but not readily combined with either the compensation or pension programs, are also funded by this, appropriation.

This appropriation's funding requirements for 1977 are estimated to be \$8,068.4 million, a decrease of \$180.8 million from 1976.

1. *Compensation.*—Compensation is payable as either a disability benefit or a survivorship benefit. Criteria for entitlement are based on a veteran's disabilities incurred in or aggravated by active military service, death while on active duty, or death resulting from service-connected disabilities.

Veteran compensation cases will decrease by 1,104 cases to an estimated 2,217,512 average cases during 1977. Survivor cases are projected to decline by 1,768 to an estimated 366,188 during 1977.

Public Law 94-71, effective August 1, 1975, increased disability compensation for severely disabled veterans by 12%, disability compensation for less severely disabled veterans by 10%, and DIC rates for widows and children by 12%. Public Law 94-169, effective January 1, 1976 through September 30, 1976, increased rates for DIC parents by 8%.

COMPENSATION AND PENSIONS—Continued

*Pensions.*—As with compensation, pension may be paid to a veteran or his survivor(s). Veterans' entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Public Law 94-169, effective January 1, 1976, through September 30, 1976, increased rates for "new law" pension recipients by 8%.

Veteran pension cases are projected to decrease by 43,470 from 1976 to 1977. Survivor pension cases will also decrease by 22,113 during the same period.

3. *Burial benefits.*—Provides for the payment of a burial allowance up to \$800 when a veteran dies as the result of a service-connected disability, the payment of a plot allowance of \$150 when an eligible veteran is not buried in a national cemetery or other cemetery under the jurisdiction of the United States, and the furnishing of a headstone or marker for the grave of a veteran. Other burial benefits paid from this appropriation include an allowance of \$250 to help the deceased veteran's family pay burial and funeral expenses; transportation costs where death occurs under VA care; and provision of a flag for a casket. Legislation will be proposed in 1977 to eliminate burial benefit payments which duplicate those which are provided through other federally financed programs.

4. *All other.*—These payments cover miscellaneous benefits which are not readily combined with any of the preceding categories. They include payments for retired officers, adjusted service and dependents' pay, special allowance dependents, invalid lifts and other devices, tort claim settlements, veterans' mortgage life insurance, veterans clothing allowance, death gratuities, veterans' group life insurance, and beginning in 1977, soldiers' and sailors' civil relief.

READJUSTMENT BENEFITS\*

\*See Part III for additional information.

For the payment of readjustment and rehabilitation benefits to or on behalf of veterans as authorized by law (38 U.S.C. chapters 21, 31, and 33-39), **[\$5,414,475,000]** \$4,873,000,000, to remain available until expended.

For "Readjustment benefits" for the period July 1, 1976, through September 30, 1976, \$1,039,472,000, to remain available until expended. (38 U.S.C. 3021; Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1976.)

This appropriation finances the education, training, and rehabilitation of veterans and servicemen who served since February 1, 1955 (post-Korean conflict veterans). It also finances educational assistance allowances for eligible dependents of those veterans (a) who died from service-connected causes or have a total and permanent rated service-connected disability and (b) servicemen who were prisoners of war or missing in action.

1. *Education and training.*—The number of post-Korean conflict veterans and servicemen in training is expected to decrease in 1977 to a level of 2,197,160. This decrease in trainees is attributable to the May 31, 1976, delimiting date for veterans separated from service prior to June 1, 1966; smaller active duty force levels and proposed legislation which would repeal the 2-year delimiting date extension provided by Public Law 93-337; terminate the GI bill; eliminate correspondence and flight training; and terminate the PREP program.

The number of sons and daughters receiving educational assistance in 1977 is expected to decrease slightly to a level of 87,200. The number of wives and widows using GI bill benefits is also projected to decrease slightly to 21,740 primarily as a result of proposed legislation to eliminate correspondence training.

The following table provides a comparison of trainees and costs for the three types of trainees mentioned above.

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment. The number of trainees will continue to decline to 24,000 by 1977. Due to experienced increases in tuition charges, the average trainee cost for 1977 is projected at \$3,173.

Specially adapted housing grants are provided to certain severely disabled veterans. The number is expected to decrease slightly in 1977.

An allowance is provided to certain disabled veterans and certain persons on active duty toward the purchase price of new automobiles, adaptive equipment, and the maintenance and replacement of such equipment. The projected decrease of 4,000 automobiles from 1976 to 1977 is a result of a return to normalcy following the initial impact of Public Law 93-538 which extended entitlement to post-World War II peacetime veterans.

The following table shows a caseload and cost comparison for these beneficiaries.

The Veterans insurance and indemnities appropriation is made up of the former appropriations for military and naval insurance, applicable to World War I veterans, the national service life insurance, applicable to certain World War II veterans and the servicemen's indemnities, applicable to Korean conflict veterans. The appropriation also provides supplemental funds for the Service-disabled veterans insurance fund. Financing is mainly by congressional appropriation, and by a small amount of premiums. Premium receipts are appropriated under 38 U.S.C. 719(b).

1. *Military and naval insurance.*—Payments are made to the U.S. Government life insurance fund as a reimbursement for claims traceable to extra hazards of military service. Payments are made also to policyholders and beneficiaries for claims on war-risk insurance issued to servicemen and veterans of World War I.

2. *National service life insurance.*—Payments are made to the National service life insurance fund as a reimbursement for costs of the following: (a) disability and death claims traceable to the extra hazards of service; (b) gratuitous insurance granted to certain persons who were unable to make application for national service life insurance; and (c) death claims on policies under waiver of premiums while the insured was on active duty.

General and special funds—Continued

VETERANS INSURANCE AND INDEMNITIES—Continued

Payments are made also to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the policies in force is indicated in the following table (dollars in thousands):

3. Payment to service-disabled veterans insurance fund.—

Payments are made to the Service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities.

Financing.—Operations are financed by appropriation funding and a small amount of premiums.

The Veterans Administration is committed to providing the highest quality medical care to its veteran beneficiaries. To this end, the VA operates the largest medical care delivery system in the country, with 172 hospitals, 18 domiciliaries, 89 nursing homes, and 229 outpatient clinics in 1977. In addition, patients are cared for in contract Federal and community hospitals, community nursing homes and State-run domiciliaries, nursing homes and hospitals, with VA support. This system will treat over 1.3 million patients in 1977, and fund over 15.7 million outpatient medical and dental visits to VA and community facilities.

In conjunction with this mission, it is essential that effective education and training programs be conducted within the VA which serve several purposes—to enable VA personnel to obtain the latest information concerning treatment and related clinical matters; to provide a recruitment source for highly qualified physicians and other personnel; and to contribute significantly, but on a selective basis, to those portions of the national health manpower pool which have a continuing need for additional or replacement personnel.

The Veterans Administration is continuing efforts to increase the flexibility of the medical care delivery system by providing treatment through the program most suited to the patient's need. This is most significantly reflected in expanded use of outpatient and ambulatory care programs, particularly to obviate the need for hospital admissions. Likewise, increasing emphasis will be placed on use of community living arrangements such as home based care and foster home care, which will permit increased outplacement of hospitalized veterans with a corresponding reduction in lengths of stay. Arrangements to provide for hospital and medical care in the private sector, for certain dependents and survivors of veterans as authorized by law will be continued and improved.

The Veterans Administration is also continuing an expanding program of demonstrations of new models of health organization and delivery including regionalization of its hospitals and improvements in design, location, and number of outpatient clinics.

Specific increases are requested in 1977 for (1) non-controllable payroll increases, (2) increased usage of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies, and operating supplies, (3) maintenance and repair, minor improvements, equipment, real property rental, and operating support for completed construction projects for other new facilities (other than new hospitals), (4) workload increases, (5) annualization for specialized medical services, (6) annualization for other new and innovative programs such as aging and sickle cell anemia programs, and (7) staffing improvement to complete the requirements of the quality survey.

A supplemental appropriation in the amount of \$108,390 thousand for 1976 and \$31,235 thousand for the transition quarter is anticipated under supplemental now requested, existing legislation.

1. *Maintenance and operation of VA facilities.*—(a) *VA hospital care.*—This paragraph is a summary of the medical, surgical, and psychiatric bed sections in VA hospitals. Increased cost over 1976 is \$237,746 thousand. Estimated operating levels are as follows:

1. *Medical, hospital, and domiciliary administration* covers the Central Office development, implementation, and administration of policies, plans, and broad objectives, as well as providing for executive direction of all agency medical programs. It also includes the central office staff element for health services research and development which, prior to 1976, was identified as a separate program.

2. *Postgraduate and inservice training* provides for tuition and registration payments, lecturer fees, travel expenses, and training materials incidental to continuing education programs for professional medical and administrative staff. This also serves as a media for disseminating information on medical advances resulting from research efforts.

3. *Exchange of medical information* provides for entering into agreements with medical schools, hospitals, research centers, and individual institutions and members of the medical-scientific community under which physicians at hospitals not affiliated with medical schools will maintain closer contact with such schools and other primary sources of medical information.

A supplemental appropriation in the amount of \$381 thousand for 1976 and \$134 thousand for the transition quarter is anticipated under supplemental now requested, existing legislation.

<sup>1</sup> Includes capital outlay as follows: 1975, \$4,549 thousand; 1976, \$2,935 thousand; TQ, \$641 thousand; 1977, \$4,181 thousand.

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits; operation and maintenance of 103 national cemeteries by the National Cemetery System; data processing operations and communications systems through the Department of Data Management; and top management direction and support through agency-level staff offices.

Amounts requested for 1977 are \$25.3 million above the total 1976 estimate including supplemental requirements. These additional funds are requested to support expansion of the National Cemetery System; a strengthened audit and investigative function; increased ADP services to expanding agency programs; further development of the revised C.P. & E. Target System; an additional reimbursement to the General Services Administration for present and newly occupied space; the net impact of within-grade salary increases, annualization of the October 12, 1975, pay raise, and other increases in communications and program support costs.

1. *General administration.*—This activity contains the executive direction of the agency and several top level supporting offices. In addition, it covers the Board of Veterans Appeals which decides all cases of appeals to the Administrator on claims involving benefits under veterans legislation.

2. *Data management.*—This activity manages all computer operations and provides technical support and assistance in the development of new computer and communications systems.

3. *Veterans benefits.*—This activity determines eligibility and adjudicates all claims for compensation, pensions,

educational assistance, housing loan assistance, and insurance awards. A summary of program objectives and anticipated workload is included in the following paragraphs:

(c) *Veterans services.*—The mission of this Service is to provide information, advice and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors. FX and WATS telephone service will be expanded to all States during 1977. Workloads in all categories are expected to remain high through 1977 as reflected in the following chart (in thousands):

Field examinations.....	108	95	102	25	100

(d) *Compensation, pension, and education.*—This activity provides timely and efficient service to veterans and their dependents related to compensation, pension and education benefits under the various laws enacted by Congress. Compensation and pension workloads are expected to continue to increase through 1977, while the number of education trainees is expected to decrease in 1977 as reflected in the following table (in thousands):

Number of trainees.....	2,462	2,804	3,434	1,737	2,870

(e) *Loan guaranty.*—This program mission is to provide a viable form of credit assistance whereby housing credit needs of veterans and servicemen may be satisfied by private capital on more liberal terms than generally available to nonveterans. An anticipated rise in the level of loan originations and added responsibilities associated with the Housing Act of 1974 and the Real Estate Settlement Procedures Act of 1974 produce a continued high level of loan activity. Key workloads are listed below (in thousands):

4. *National Cemetery System.*—Effective September 1, 1973, the Veterans Administration became responsible for administering the National Cemetery System. Ceme-

terial operations include overall program administration, maintenance of grounds and equipment, and headstone procurement and assignment. Key workload forecasts are as follows (in thousands):

**General and special funds—Continued**

**CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES—Cont.**

These funds, which were appropriated prior to 1973, remain available to complete projects which were started in prior years.

The 1973 appropriation bill (Public Law 92-383), which was approved on August 14, 1972, established the Construction, major project appropriation and the Construction, minor project appropriation. The unexpended balance of construction of hospital and domiciliary facilities appropriation is to remain available until expended.

As a result of establishing the new appropriations, many of the projects have dual funding, thereby necessitating not only two cost controls for one project but increasing workload. At the time the construction of hospital and domiciliary facilities appropriation ceased there remained an unobligated balance of \$44,102,718 and an unexpended balance of \$134,781,713. It is estimated that by the end of the transitional period, the unobligated balance of the appropriation will approximate \$3,814 thousand and the unexpended balance \$7,000 thousand respectively.

The 1977 unexpended balances of this appropriation are being transferred to Construction, major projects and Construction, minor projects as appropriate.

CONSTRUCTION, MINOR PROJECTS

For constructing, altering, extending, and improving any of the facilities under the jurisdiction or for the use of the Veterans Administration, including planning, architectural and engineering services, and site acquisition, or for any of the purposes set forth in sections 1004, 1006, 5001, 5002 and 5004 of title 38, United States Code, where the estimated cost of a project is less than \$1,000,000, and for necessary expenses of the Office of Construction, [\$106,426,000] \$93,061,000, to remain available until expended.

[For "Construction, minor projects" for the period July 1, 1976, through September 30, 1976, \$16,490,000, to remain available until expended.] (5 U.S.C. chaps. 1-7, 21-89; 31 U.S.C. 686; 38 U.S.C. 213, 230, 233, chaps. 24, 73, 81, 83; 41 U.S.C. 5; Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1976.)

These funds finance minor construction, where the estimated cost of the project is less than \$1 million, for (1) construction of new facilities, (2) modernization of existing facilities, (3) alteration and improvement of facilities under the jurisdiction of the Veterans Administration, and (4) expenses of the Office of Construction. It provides funds for planning, architectural and engineering services, and site acquisition in addition to construction funds.

A total request of \$93,061 thousand is recommended for 1977 to be financed with budget authority (appropriation) for Construction, minor projects. This amount includes \$3,000 thousand for research and education projects, \$7,228 thousand for cemetery projects, \$65,600 thousand for other projects and \$17,233 thousand for general administration.

In addition to new budget authority, funds transferred from "Construction of hospital and domiciliary facilities" will be liquidated as appropriate.

This program provides grants to assist the States in the construction of State nursing facilities, and to remodel, modify, or alter existing hospital and domiciliary facilities in State homes for providing care and treatment to war

veterans. Grants for State nursing facilities may not provide for more than 2½ beds per 1,000 veteran population in any State. Grants to any one State to remodel, modify, or alter existing hospital or domiciliary facilities in State homes may not exceed 20% of the amount appropriated in any one year.

Public Law 93-82, approved August 2, 1973, increased the maximum amount that may be granted from 50% to 65% of the cost of each project. As of October 31, 1975, funds in excess of \$48.1 million have been obligated to help finance the construction of 4,165 nursing care beds in 20 States.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

For payment to the Republic of the Philippines of grants as authorized by law (38 U.S.C. 631-634), \$2,100,000, of which \$50,000 for hospital equipment, plant, and facilities rehabilitation grants shall remain available until expended.

For "Grants to the Republic of the Philippines" for the period July 1, 1976, through September 30, 1976, \$525,000, of which \$13,000 for hospital equipment, plant, and facilities rehabilitation grants shall remain available until expended. The Housing Act of 1964, as amended by the Participation Sales Act of 1966, authorized the pooling of mortgages or other types of obligations of certain Government departments or agencies and the sale by the Federal National Mortgage Association (now the Government National Mortgage Association), as trustee, of beneficial interests, or participations, in such pools. The Participation Sales Act of 1966 provided that the aggregate amount of participations issued for the account of any trustor may not exceed the amount authorized for that trustor in an appropriation act.

The Participation Sales Act of 1966 also authorized the establishment of appropriations to cover payment for insufficiencies in the amount required to be paid by trustors on account of outstanding participations. These insufficiencies are primarily comprised of the excess of interest payments to holders of participation certificates over the interest payments received from the pooled mortgages or other obligations. For sales authorized in 1968, the respective appropriation acts, 1968 through 1975 established annual, definite appropriations for the payment of insufficiencies on account of sales authorized in that act. No appropriation is proposed for 1976, the transition quarter, or 1977.

The definite insufficiency appropriation for 1975 is reflected in the Loan guaranty revolving fund.

**Public enterprise funds:**

**LOAN GUARANTY REVOLVING FUND**

During the current fiscal year, the Loan guaranty revolving fund shall be available for expenses, but not to exceed \$550,000,000, for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations under chapter 37, title 38, United States Code, except administrative expenses, as authorized by section 1824 of such title: *Provided*, That the unobligated balances including retained earnings of the Direct loan revolving fund shall be available, during the current fiscal year, for transfer to the Loan guaranty revolving fund in such amounts as may be necessary to provide for the timely payment of obligations of such fund and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer.

**Public enterprise funds—Continued**

**LOAN GUARANTY REVOLVING FUND—Continued**

【During the period July 1, 1976, through September 30, 1976, the Loan guaranty revolving fund shall be available for expenses, but not to exceed \$150,000,000, for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations.】 (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1976.)

To assist eligible veterans to obtain credit for the purchase or construction of homes, the Veterans Administration guarantees loans made by private lenders. The total number of guaranteed or insured loans closed is expected to be 325,750 in 1976, 91,250 in the transition quarter, and 361,650 in 1977, bringing the total amount of guaranteed loans outstanding by the end of 1977 to \$67 billion. The Loan guaranty revolving fund provides for expenses and revenues of property and loan transactions resulting from settlement of guaranty claims.

**Budget program.—1. Real property acquisitions.**—Private lenders who have acquired property as a result of foreclosure on defaulted guaranteed or insured loans may elect to convey that property to the Veterans Administration. The table below reflects this activity and excludes the amount of indebtedness established against the veteran:

	1975 act.	1976 est.	TQ est.	1977 est.

Total cost (in thousands).....	\$256,682	\$300,000	\$74,052	\$304,500

**2. Property improvements.**—After conveyance of the property to the Veterans Administration, capital expenditures are often necessary to place the property in salable condition. The following table summarizes these expenditures:

	1975 act.	1976 est.	TQ est.	1977 est.
Number of improvements to acquired properties.....	16,921	17,660	4,270	17,000

**3. Claims processed.**—These payments are made to lenders in accordance with the Veterans Administration guaranty contract and represent the difference between the amount owed by the veteran on a defaulted loan and the value of the foreclosed property (as established by Veterans Administration). These payments are in addition to property acquisition costs shown in 1, above. The following table reflects this activity:

**4. Repurchase of loans sold, net.**—Pursuant to Veterans Administration Regulation 4600, dated March 22, 1962, the Administrator may sell with full recourse loans which have been created incident to the sale of Veterans Administration acquired property. If the loans go into default, the Administrator may repurchase them. The following table reflects this activity:

Total cost (in thousands).....	\$3,006	\$5,747	\$1,435	\$19,902

10. *Interest expense on participation certificates.*—Represents the amount of interest the trustee is required to pay holders of participation certificates in respect to which vendee accounts have been set aside pursuant to 38 U.S.C. 1820(e). To the extent this expense exceeds the amount of interest collections on an equal amount of loans pledged to the trustee, participation sales insufficiencies result.

*Financing.*—Normal revenue and receipts consist principally of interest income, cash proceeds from the sale of real property acquired as a result of foreclosure on guaranteed or insured loans, and repayments on mortgages made incident to such sales. It is estimated that \$181.1 million in 1976, \$47.0 million in the transition quarter, and \$186.7 million in 1977 will be received from these sources. Also an estimated \$318 million vendee loans will be sold in 1976, \$32 million in the transition quarter, and an additional \$504 million in 1977.

The Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1976 (Public Law 94-116) provided that the unobligated balances including retained earnings of the Direct loan revolving fund shall be available for transfer to the Loan guaranty revolving fund. No transfers are expected in 1976 or 1977.

Direct loans are made to veterans to purchase, construct or improve homes, to purchase farms on which there are farm residences to be occupied by the veterans as their homes; or to construct, alter, repair, or improve farm dwellings to be occupied by the veterans as their homes.

Such loans are made only in rural areas, small cities, and towns where private credit for the making of guaranteed loans is and has been generally unavailable. The maximum term is 30 years and the maximum loan amount is \$25 thousand. The interest rate is the same as the rate allowable for guaranteed loans.

**Budget program.—1. Direct loans to veterans.**—Under existing legislation, there is no terminal date on the authority to make direct loans. The Veterans Housing Act of 1970 revived the expired unused loan entitlement of World War II and Korean conflict veterans and provided that direct lending authority and veterans eligibility would be opened until their entitlement is used.

**2. Cash advances and repurchases, vendee loans.**—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary subsequently to advance cash on behalf of the borrower in order to protect the interest of the Government. These advances are added to unpaid loan balances. In addition, vendee loans sold with full recourse may be repurchased if they go into default.

**3. Property improvements.**—Properties are acquired by foreclosures on, or the voluntary conveyance of, title to properties securing loans owned by the Veterans Administration. Capital expenditures are often necessary to put the property in salable condition. The following table summarizes these expenditures:

	1975 act.	1976 est.	TQ est.	1977 est.

**4. Interest on borrowings.**—Interest expense is accrued monthly. These accruals are computed on the interest bearing capital of the fund and adjusted for the unexpended balance of the fund.

**5. Property management and selling expense.**—Property management expense includes local real estate taxes, services performed by management brokers, and maintenance of the property in salable condition. Sales expense includes brokers' fees and advertising costs incident to the sale of property owned by the Veterans Administration. This cost averages approximately 5% of the selling price. Operating expenses generally include a variety of miscellaneous expenses paid by the Government incident to closing and liquidating loans:

*Financing.*—Normal revenue and receipts consist principally of interest income and repayments on direct loans made to veterans. It is estimated that \$124.3 million in 1976 and \$29.6 million in the transition quarter and \$114.1 million in 1977 will be received from these sources. In addition, it is estimated that \$60.2 million will be realized in 1976 from the sale of direct loans, \$10.0 million in the transition quarter, and \$201.0 million in 1977.

The Veterans Canteen Service was established by Congress in 1946 to furnish, at reasonable prices, merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201-08).

*Budget program.*—Sales are expected to be \$119,300 thousand in 1976, \$29,850 thousand during the 3-month transition quarter (July 1, 1976, through September 30, 1976) and it is estimated sales will be \$130,400 thousand in 1977.

*Financing.*—No appropriation by the Congress will be required for the operation of the Veterans Canteen Service during 1977. Operations will be financed from current revenues. The Congress originally appropriated a total of \$4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling \$12,068 thousand have been paid to the Treasury as of June 30, 1975.

*Operating results and financial condition.*—Operating revenue is expected to be sufficient to cover operating expenses. Retained earnings are required for necessary working capital, therefore, no funds are available for payment to the Treasury during 1976.

This fund finances the payment of claims on non-participating life insurance policies issued and currently open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. As a result, premium payments do not cover operating and capital reserve requirements. Annual deficits are met by transfers from the Veterans insurance and indemnities appropriation. Administrative expenses are paid from the General operating expenses appropriation.

**Operating costs.**—Death claims represents payments to designated beneficiaries.

All other represents payments to policyholders who surrender their policies for their cash value and who hold endowment policies which have matured.

**Capital outlay.**—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	June 30, 1974 actual	June 30, 1975 actual	June 30, 1976 estimate	Sept. 30, 1976 estimate	Sept. 30, 1977 estimate
Number of policies	154,619	160,893	164,550	165,300	166,800
Insurance in force	\$1,397,275	\$1,454,476	\$1,488,000	\$1,495,000	\$1,509,000

**Financing.**—Operations are financed from premiums and other receipts. Additional funds are derived from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund. It is estimated that the payments from that appropriation will be \$3.0 million in 1976, \$1.7 million in transition quarter, and \$4.7 million in 1977.

**Operating results and financial conditions.**—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$117.6 million by September 30, 1977.

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemen's Group Life Insurance Act of 1965 (38 U.S.C. Sec. 765-776) as amended and any expenses incurred by the Veterans Administration in administration of the act.

**Budget program.—1. Premium payments.**—This item represents the payment of premiums to private insurance companies. The large decline in payments during 1976 is due chiefly to the discontinuance during 1975, of extra hazard contributions from the Services. Projected decreases in the transition quarter and 1977 is consistent with the estimated reduction in the number of members.

**2. Payment to General operating expenses appropriation.**—This item represents payment for administrative costs incident to the program. The one-time costs incident to implementation of Public Law 93-289, enacted in May 1974, increased the 1975 payments considerably above normal and account for the decrease in 1976. An annual reduction in requirements is forecast.

Under the provisions of 38 U.S.C. 5011, the Supply fund finances on a reimbursable basis the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support.

**Budget program.**—The fund provides financial support for: (1) Maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) a publications depot including printing services to VA installations on a centralized basis; (4) operation of a service and reclamation program operating out of the supply depots; (5) centralized periodical procurement and library cataloging; and (6) a marketing center or central buying office.

The publications and reproduction program provides printing service and distribution of printed matter to VA installations. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a VA-operated plant, and from commercial sources.

The marketing center is responsible for determining the levels of inventories to be carried at depots and acquiring stock to maintain such levels. It is also responsible for the central contracting of items not available from other Government sources for VA installations and other Government agencies as may be determined economical or advisable.

**Intragovernmental funds—Continued**

**SUPPLY FUND—Continued**

The Supply fund does not finance costs for the operation and administration of supply activities at field stations. These costs are charged directly to applicable appropriations.

*Financing.*—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving the goods and services.

*Operating results and financial conditions.*—The fund operated at a profit of \$193 thousand in 1975 and carried forward a loss of \$311 thousand from prior years. During the past 10 years the fund has shown a profit of \$204 thousand on a total of \$1.5 billion cost of goods sold in the same period. Recovery of prior years losses is anticipated in 1976.

This fund consists of gifts, bequests, and proceeds of sale of property left in the care of the facilities by former beneficiaries; patient's fund balances, and proceeds of sale of effects of beneficiaries who die leaving no heirs or without having otherwise disposed of their estate. Such funds are used to promote the comfort and welfare of veterans at hospitals and homes where no general appropriation is available (38 U.S.C. chapters 83 and 85).

This fund (72 Stat. 1154) was established in 1940 as the financing mechanism for World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies have been issued under this program. Since issuance of new policies ended in 1951, the insurance in force is estimated to decrease by \$562 million, representing 42,100 policies in 1977. Activity of the fund reflects rising claim and loan workloads, and a decline in the number of policies in force, shown as follows (dollars in thousands):

This fund finances the payment of claims on life insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951 (38 U.S.C., sec. 723). No new policies can be issued and the number of policies in force is expected to decline approximately 7,000 each year. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

**Budget program.—1. Death claims.**—Represents payments to designated beneficiaries.

**2. Cash surrenders.**—A policyholder may terminate his insurance by cashing in his policy for its cash value.

**3. Dividends.**—Public Law 93-289, enacted May 24, 1974, provides for policyholders to participate in the distribution of annual dividends.

**4. All other.**—Classified in this category are payments to policyholders who: (a) Hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently becomes disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (dollars in thousands):

	June 30, 1974 actual	June 30, 1975 actual	June 30, 1976 estimate	Sept. 30, 1976 estimate	Sept. 30, 1977 estimate
Number of policies.....	598,221	590,269	583,460	581,850	574,700
Insurance in force.....	\$5,238,027	\$5,166,109	\$5,109,033	\$5,091,371	\$5,030,173

**Financing.**—Payments from this fund are financed primarily from premium receipts and interest on investments.

**Operating results and financial condition.**—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. The retained earnings have, since the inception of the program, been reduced by payments of a special dividend and subsidy payments to the Veterans insurance and indemnities appropriation and the Veterans reopened insurance fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

**ADMINISTRATIVE PROVISIONS**

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. ## OTHER INDEPENDENT AGENCIES

### ACTION

ACTION, the Federal agency for volunteer service, was established on July 1, 1971. The agency brings together a number of volunteer programs including the Peace Corps, Volunteers in Service to America (VISTA), Foster Grandparents (FGP), Retired Senior Volunteer Program (RSVP) and the University Year for ACTION (UYA).

Funds for ACTION are requested in two appropriations: (1) Operating expenses, domestic programs; and (2) Operating expenses, international programs (Peace Corps). These appropriations each contain a share of the agency's common support costs. This share is included in the program support activity in each appropriation. Special schedules of these common support costs are presented following the regular appropriation schedules.

##### OPERATING EXPENSES, INTERNATIONAL PROGRAMS (PEACE CORPS)

For expenses necessary for ACTION to carry out the purposes of the Peace Corps Act, as amended (22 U.S.C. 2501 et seq.), \$67,155,000. (Additional authorizing legislation to be proposed.)

Note.—The regular appropriation for this account for 1976 had not been enacted at the time this budget was prepared. A temporary continuing resolution is in effect for the period July 1, 1975, to March 31, 1976.

Note.—Excludes \$3,938 in 1977 for activities transferred to: Salaries and expenses, State. Comparable amounts for 1975 (\$2,560), 1976 (\$3,360), and TQ (\$939) are included above.

*International programs.*—This appropriation finances the Peace Corps, one of the component programs of ACTION. Major elements which will be funded are the recruitment and training of applicants, volunteer operations overseas, and the management and support staff required to support the volunteers.

1. *Training and specialized recruiting.*—Each volunteer is given intensive training which is designed to develop language abilities, provide a knowledge of the country in which he will work, and further develop required job skills. Trainees receive preservice training in specialized skills and orientation to the country of assignment. Volunteers receive inservice training to increase their technical and language skills. In addition, several specialized recruiting activities are conducted in this activity.

2. *Volunteers.*—In 1977, volunteers will be serving in countries throughout the world. Volunteer assignments are concentrated in several broad areas: education at all levels, agricultural development, business and public management, health and nutrition, urban development and public works projects, and conservation. In 1977, program priorities will be agriculture, education, health and nutrition, and conservation.

3. *Program support.*—This activity includes salaries, travel, rents, and other costs associated with staff operations in the United States and abroad. It also includes a share of ACTION agencywide costs, such as the recruitment, selection, and placement of volunteers, auditing, legal counsel, and similar functions.

This appropriation finances the Federal share of volunteer programs within the United States. The 1977 ACTION budget request conforms with the President's desire to reduce Federal spending. ACTION will continue to provide funds for the needy by financing full-time and part-time voluntarism in local communities.

1. *Volunteers in Service to America.*—This full-time program is directed primarily toward providing volunteers to low-income communities working on poverty problems. During 1977 VISTA will concentrate on improving the volunteer delivery system with the purpose of increasing the responsiveness of the program to local needs.

2. *Service learning programs.*—These programs provide participating high school and college students the opportunity to enhance their learning experience through volunteer service. The Service Learning Programs, which include University Year for ACTION, Youth Challenge Program and the National Student Volunteer Program offer the students personal development outside the traditional academic environment.

3. *Older Americans volunteer programs.*—In 1977 these highly successful programs are intended to continue alleviating the problems of the aging. These valuable programs will again offer individuals age 60 and over an opportunity to serve on projects which meet community service needs.

4. *Special volunteer programs.*—Two major areas of concentration will form the nucleus of developmental efforts to encourage broader participation in volunteer activities in 1977. The State volunteer services coordinator program will continue to aid State offices in providing assistance to localities. Funds are also provided for technical assistance to provide voluntarism in local communities.

5. *Program support.*—Administrative costs of operating both the headquarters and regional offices are financed through this activity. In 1977 the primary thrust will again be toward increasing the responsibility and accountability for program operations at the regional and State levels in order to assure proper coordination and execution of all domestic volunteer programs.

The American Battle Monuments Commission is responsible for the maintenance and construction of U.S. monuments and memorials commemorating the achievements in battle of our Armed Forces since April 6, 1917. It is also responsible for controlling erection of monuments and markers by U.S. citizens and organizations in foreign countries, and for the design, construction, and maintenance of permanent military cemetery memorials on foreign soil.

Altogether, the Commission maintains on foreign soil 23 military cemetery memorials; 11 monuments and memorials not a part of the cemeteries; and 2 bronze tablets. In addition, the Commission maintains three large memorials on U.S. soil.

The remains of 30,920 honored dead of World War I, 93,227 of World War II, and 750 of the Mexican War are interred in these cemeteries. Additionally, the 91,598 service men and women of World War I, World War II, and the Korean conflict who were missing in action, or lost or buried at sea are memorialized at the cemeteries and memorials by the inscription of their names on the "Tablets of the Missing."

1. *Purchase of flowers.*—Private citizens deposit funds with the Commission for the purchase of flowers to decorate graves and tablets of the missing at the cemeteries and memorials administered by the Commission. The donor is advised when the flowers have been placed, and is furnished a color polaroid photograph of the decoration in place.

2. *Repair of non-Federal war memorials.*—When requested to do so and upon receipt of the necessary funds, the Commission arranges for and oversees the repair of war memorials to U.S. Forces erected in foreign countries by American citizens, States, municipalities, or associations. Such moneys are accounted for through this fund.

Note.—Excludes \$705 thousand in 1977 for activities transferred to the Department of State: Salaries and expenses, \$335 thousand; acquisition, operation, and maintenance of buildings abroad, \$8 thousand; missions to international organizations, \$362 thousand. Comparable amounts for 1975 (\$473 thousand), 1976 (\$623 thousand), TQ (\$174 thousand), are included above.

The Agency advises the President and the Secretary of State on arms control and disarmament policy and its implementation, conducts negotiations with other countries looking toward international agreements to control, reduce, or eliminate arms, and directs, as appropriate, U.S. participation in such control systems as may be adopted. Most ACDA resources in 1977 will be devoted to support of the anticipated third phase of the Strategic Arms Limitation Talks with the Soviet Union, negotiations on mutual and balanced force reductions in Europe, further exploration of means to limit the testing of nuclear weapons, and development of equipment and techniques to prevent proliferation of nuclear weapons under the multilateral Non-Proliferation Treaty.

The external research activity is conducted through contracts or grants with nongovernmental research organizations and through reimbursement agreements with other U.S. Government departments and agencies.

The Board for International Broadcasting makes grants to and oversees the operations of Radio Free Europe and Radio Liberty. The radios broadcast in 25 languages to the peoples of the Union of Soviet Socialist Republics and Eastern Europe. They act as independent media, providing news and features on events within the broadcast areas and throughout the world.

The reduced budget for 1977 results, to a large degree, from the consolidation of the management and operations of the two radios.

The Board regulates the economic aspects of domestic and international air carrier operations. In 1977, the Board will pursue major reforms of air carrier economic regulation, as discussed below, including the overall modernization of its procedures in order to maximize its own capacity to be more responsive in the face of changing conditions.

1. *Awards of operating authority.*—This program involves processing applications and conducting investigations regarding operating authority or modification of authority; international negotiations involving operating authority with foreign countries; and the issuance of foreign carrier permits. For 1977, there will be an increase in route hearing activity encompassing additions to the present air system and requests for new competitive service. During this time frame, the Board will conduct a comprehensive review of its service to small communities program in light of changing economic conditions and technological advances.

A new charter concept—one stop charters—which could greatly expand the availability of low-cost air transportation as well as the Board's other charter programs will be an area of increasing activity during 1977. In international aviation, the Board's workload will increase as a result of the growing complexity of international aviation problems and substantial growth of bilateral and multilateral negotiations/consultations. Also, the Board will participate in the Government-wide review of international aviation policy.

2. *Regulation of rates and fares.*—This program covers regulation of passenger and cargo rates, establishment of minimum rates applicable to services performed by the civil air carriers for the Military Airlift Command (MAC); review of petitions for the establishment or revision of service mail rates; and processing of subsidy rate cases and related matters. For 1977, major efforts will be devoted to: evaluating a higher load factor standard for rate-making purposes; reviewing the return on investment standard as a rate-making criterion; providing a laboratory in which to experiment with different regulatory concepts and stimulate innovation; providing greater protection of consumer and public interests in evaluating carrier rate and fare proposals; and developing a new class rate concept to insure that subsidy goes to support air transportation services to small and isolated communities.

3. *Regulation of agreements and interlocking relationships.*—This includes: review of applications requesting Board approval of acquisitions of control, approval of interlocking directorates, and agreements between air

carriers and any other common carrier affecting air transportation; and review of agreements on rates and fares under which U.S.-flag carriers participate in the International Air Transport Association (IATA).

4. *Regulation of air carrier accounting and reporting.*—This program includes: design, prescription, and administration of uniform systems of accounts and reports; substantiation of carriers' conformance with prescribed accounting and reporting regulations; preparing special analyses and evaluations of air carriers' financial data; and on-site audits of carriers' books, records, and reports. In 1977, the Board plans to develop new accounting and reporting systems that will move the Board's systems more in line with business accounting practices and to implement a data system that will be developed to provide information necessary to monitor and evaluate the liberalized and expanded activities of the charter operators. Also, the Board's research, analytical, and informational capabilities will be reinforced in order to assist the Board in achieving regulatory reforms in light of changing economic conditions.

5. *Enforcement and consumer advocacy.*—This includes: handling of passenger and shipper complaints; investigation of violations of the economic provisions of the Federal Aviation Act; the taking of enforcement action and the achievement of compliance by informal enforcement action, formal administrative proceedings, and the prosecution of enforcement cases in the courts; and representation of consumer interests in Board proceedings. During 1977, enforcement activity will continue to focus on the seven substantive program areas (integrity of Board processes, antitrust violations, consumer-oriented violations, charter violations, unauthorized air transportation, tariff violations and cargo violations), with special emphasis in the latter three areas. Also, the monitoring of any injunctions, which may result from the recent probes into ticket discounting will necessitate a considerable expenditure of investigative and legal effort in those areas where violations are found. Major investigations are expected to develop in the area of unauthorized air transportation where persons not now within the regulatory framework are operating as common carriers. Regarding the consumer, the Board will step up its consumer advocacy activities by focusing efforts on formal complaints filed by organized consumer groups and by responding, in a timely manner, to the rapidly growing volume of public correspondence.

The Civil Aeronautics Board fixes rates of subsidy compensation to promote the development of air transportation required for the commerce of the United States, the Postal Service, and the national defense. The Board makes subsidy payments to subsidy-eligible certificated air carriers who have demonstrated a statutory need therefor. Subsidy is provided to cover the carrier's operating loss incurred under honest, economical, and efficient management and to provide it an opportunity to earn a fair return (after taxes) on investment used and useful in the air transportation services.

Of the 43 certificated U.S. domestic and international air carriers, only 8 local service carriers and 3 Alaskan carriers are currently subsidized.

1. *Assuring a merit work force.*—This activity consists of (a) keeping personnel policies current, including resources to implement the recommendations of the President's Panel on Federal Compensation; (b) staffing for Federal employment; (c) assuring fitness and suitability in Federal employment; and (d) improving personnel and management. During 1977 the Commission will expand personnel management evaluations to minimize merit system abuses, and continue the updating of qualification standards.

The workloads for this activity are reflected on the following table:

PRODUCTION COUNT			
	1975 act.	1976 est.	1977 est.
Applications processed for Federal employment.....	1,878,900	1,820,000	1,794,600

National agency check and inquiry cases processed.....	385,689	358,200	360,000

2. *Providing retirement and insurance benefits.*—The Commission administers retirement, group life insurance, and health benefits programs for Federal employees. The principal functions of this activity include: adjudicating annuity, death, refund, and deposit claims; making

payments to annuitants and other claimants; negotiating with private carriers to provide the insurance and health benefits authorized; auditing the records and operations of insurance underwriters; and maintaining the trust funds that were established for financing these benefits programs. Increases in 1977 provide for an expanded open season for the health benefits programs and allow for continuing automation improvements in administration of benefit programs.

Workloads are reflected in the following table:

3. *Strengthening State and local personnel administration.*—The purpose of the Intergovernmental Personnel Act of 1970, as administered by the Commission, is to strengthen and improve the personnel resources of State and local governments. The Commission provides grant moneys and technical assistance to develop and encourage personnel administration programs consistent with prescribed merit employment principles. Workloads are reflected in the following table:

PRODUCTION COUNT			
	1975 act.	1976 est.	1977 est.
IPA grant projects started.....	648	650	450
Number of jurisdictions assisted.....	885	900	900

4. *Other programs.*—This activity consists of four functions: (1) Administration of the Voting Rights Act of 1965, as amended; (2) the President's Commission on Personnel Interchange; (3) the President's Commission on White House Fellowships; and (4) the Federal employees appeals program. The Civil Service Commission provides administrative support to the two Presidential Commissions, and, under provisions of the Voting Rights Act, maintains lists of eligible voters and appoints examiners and election observers at the request of the Attorney General.

In 1977 the Commission will continue processing the rising appeals workloads. Workloads in the voting rights program are expected to increase in 1977.

The following table displays anticipated workloads for 1977.

**PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND—Continued**

2. *Payment of Government share of retirement costs.*—The Civil Service Retirement Amendments of 1969 provide for financing of current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) increases in pay is deemed to authorize appropriations to the Fund to finance the unfunded liability created by such statute.

A one-time payment of \$1,363,581 thousand is included in 1977 to restore interest lost to the Retirement fund because of the change in fiscal year time period.

3. *Transfers for interest on unfunded liability and payment of military service annuities.*—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund on the basis of a sliding scale of percentages of an amount equivalent to: (1) interest on the unfunded liability; and (2) annuity disbursements attributable to military service. The Civil Service Commission, at the end of each year, beginning in 1971, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and the Congress. The required percentage of the total amount for 1976 is 60% and for 1977, 70% of such amount.

Executive Order 11491 entitled "Labor-Management Relations in the Federal Service" established the Federal Labor Relations Council as a central authority to administer and interpret the order, decide major policy issues, prescribe regulations, and from time to time report and make recommendations to the President.

The order also establishes the Federal Service Impasses Panel as an agency within the Council. The Panel is authorized to consider impasses resulting from negotiations between labor organizations and agency management and to take whatever action it considers necessary to settle an impasse.

Additional resources are required in 1977 for the expanded workload generated by growing interest in labor relations and contract negotiations in the Federal Government, and by the first full year of operations in which a new type of appeal will be handled.

Under authority of 5 U.S.C. 1304 and other laws and Executive orders, the Civil Service Commission conducts full field security investigations for other departments and agencies and performs training activities and miscellaneous services for Federal agencies and State and local governments on a reimbursable basis.

**Budget program.**—Based on forecasts of agency requirements, full field workloads for 1977 are expected to decrease. Both the training and the State and local activities are estimated to decrease from the 1976 level.

Chief workloads of the major activities are displayed below:

The fund finances the cost of health benefits for: (1) Active employees, (2) employees who retired after June 1960, or their survivors, and (3) the related expenses of the Commission in administering the program.

*Budget program.*—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each year are as follows:

	1975 act.	1976 est.	1977 est.
Active employees.....	2,288,900	2,334,700	2,393,300
Annuitants.....	867,700	932,100	1,009,900
Total.....	3,156,600	3,266,800	3,403,200

In determining a biweekly subscription rate to cover program costs, 1% is added to the rates developed by health benefit carriers, for administrative expense, and 3% is added for a contingency reserve held by the Commission for each carrier. The Commission is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees the Government's contribution to the health benefits premiums is 75% of the current unweighted average of the high option premiums of six large plans in 1976. For general-schedule and wage-board employees the Government's contribution is 60% in 1976.

*Financing.*—The fund is financed by: (1) Withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Commission.

*Operating results.*—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods. About \$12 million unused administrative funds were transferred to the contingency reserve in 1975. The contingency reserves are retained by the Commission and paid to carriers, as necessary, to defray future rate increases or to provide increased benefits.

**Intragovernmental funds—Continued**

**EMPLOYEES LIFE INSURANCE FUND—Continued**

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Civil Service Commission in administering the program. Separate cost data are maintained for employees regular group life insurance, an additional \$10 thousand authorized in 1967, and insurance for members of former beneficial associations.

*Budget program.*—The status of the basic (regular and optional) life insurance program on June 30, 1975 and 1976, and September 30, 1977, is as follows:

	1975 act.	1976 est.	1977 est.
Life insurance in force (in billions of dollars):			
On active employees <sup>1</sup> .....	47.6	49.7	52.4
On retired employees.....	12.1	13.4	15.1
Total.....	<u>59.7</u>	<u>63.1</u>	<u>67.5</u>
Number of participants (in thousands):			
Active employees.....	2,453	2,444	2,426
Annuityants.....	912	967	1,033
Total.....	<u>3,365</u>	<u>3,411</u>	<u>3,459</u>

<sup>1</sup> Excludes equal amount of accidental death and dismemberment insurance.

*Financing.*—For non-Postal Service employees premium costs for the regular program are met by withholding 35½ cents biweekly from the salaries of employees, for each \$1 thousand of life insurance and a 50% matching by employer agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities and the beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the fiscal years is as follows (in millions of dollars):

	1975 act.	1976 est.	1977 est.
Held in special contingency reserves:			
By basic program insurer.....	100.0	50.0	50.0
By beneficial associations insurer.....	5.5	4.5	4.0

Total reserves.....	<u>1,804.5</u>	<u>2,165.5</u>	<u>2,656.0</u>

In 1976, as in 1975, special contingency reserve funds now held by the carrier will be returned to the employees life insurance fund in annual increments of \$50 million. The carrier-held contingency reserve will be reduced to \$50 million by June 30, 1976, and it is expected to remain at this level in subsequent years. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the "Employees life insurance fund." The operations of the insurer for the regular and optional life insurance program to the end of each fiscal year follow (in millions of dollars):

This fund, created by the Retired Federal Employees Health Benefits Act, finances: (1) The cost of health benefits for retired employees and survivors who enroll in the Government-sponsored uniform health benefits plan; (2) the contribution to retired employees and survivors who retain or purchase private health insurance; and (3) expenses of the Civil Service Commission in administering the program.

Budget program.—The fund is available without fiscal year limitation. Amounts contributed by the Government shall be paid into the fund from annual appropriations. Numbers of participants at the end of the fiscal year are as follows:

Table with 4 columns: 1975 act., 1976 est., 1977 est., and rows for Uniform plan, Private plans, and Total.

Financing.—The fund is financed by contributions from those participants enrolled in the Government-sponsored plan and by Government contributions. The special contingency reserve with the carrier of the uniform plan is currently limited to \$375,000 at the end of the policy year. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Retired employees health benefits program.

Operating results.—There will be an estimated \$17.4 million contingency reserve in the fund at the end of 1977 as compared with an estimated \$19.3 million in 1976.

<sup>1</sup> Includes capital outlay as follows: 1975, \$47 thousand; 1976, \$15 thousand; TQ, \$0; 1977, \$23 thousand.

1. *Nonlegal reports and studies.*—Studies concerning areas in which there may be civil rights denials are conducted and reports issued with recommendations to the President and the Congress. In 1977, studies will be completed in the area of employment, education, social indicators for minorities, political participation, women's rights, and problems of Asian Americans.

2. *Hearings, legal reports, and studies.*—Hearings are conducted by the Commissioners to investigate and obtain information about civil rights denials. Legal and quasi-legal studies are conducted and reports issued with recommendations to the President and the Congress. In 1977, four hearings will be held to support ongoing Commission projects. Reports, staff papers, and transcripts will be issued.

3. *State advisory committee and community programs.*—State advisory committees hold conferences, open and closed meetings, and issue reports to gather and disseminate information about civil rights problems. Programing to implement Commission recommendations and to provide solutions to civil rights problems is maintained. In 1977, 300 such meetings and conferences will be held and 20 reports issued.

4. *Liaison and information dissemination.*—The Commission uses publications, films, liaison with private and public groups, the media, and a variety of other techniques to provide civil rights information to those who have rights, those who have responsibilities to comply with Federal civil rights laws and policies, those who implement these laws and policies and the general public. In 1977, the Civil Rights Digest will be issued quarterly; liaison will be maintained with private groups by distributing publications and exhibiting at conventions; and appropriate Commission publications will be translated into Spanish and Asian languages.

5. *Federal program evaluation and complaints.*—Programs of Federal agencies are appraised for compliance with civil rights laws to determine whether their benefits reach all groups equitably. Complaints which allege discrimina-

tion are received from the public and referred to Federal agencies having jurisdiction. In 1977, 2,000 complaints will be processed and monitoring of Federal agencies for compliance with civil rights laws will continue.

6. *National issues and conferences.*—In 1977, current civil rights issues will be examined and monographs, statements, or reports will be prepared dealing with those issues. Conferences will be held in connection with Commission projects or in order to provide liaison with private and public civil rights agencies. Publications dealing with those conferences will be issued.

7. *Basic civil rights research and clearinghouse library.*—In 1977, basic civil rights research in the causes of discrimination will be conducted. Technical assistance in research methodology will be provided to staff working on ongoing Commission studies. The library supporting research, studies, hearings, conferences, and other Commission activities will be maintained.

8. *Age discrimination programs.*—As mandated by Public Law 94-135, hearings will be conducted and a study undertaken dealing with unreasonable age discrimination in programs receiving Federal funds. Findings and recommendations will be submitted to the President and the Congress by May 28, 1977.

The Committee for Purchase from the Blind and Other Severely Handicapped was established by the Wagner-O'Day Act of 1938, as amended. Its primary objective is to increase the employment opportunities for the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. The Committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and makes rules and regulations necessary to carry out the purposes of the act.

The Committee staff supervises the selection and assignment of new commodities and services, assists in establishing prices, reviews and adjusts these prices, verifies the qualifications, and monitors the performance of workshops.

Total obligations.....	479.3	516.3	334.0

<sup>1</sup> Transferred to Legal Services Corporation in 1976.

1. *Community action operations.*—The Headstart, Economic Opportunity, and Community Partnership Act of 1974 requires the non-Federal share of 20% in 1975 for local initiative programs to rise to 40% in 1977. In the case of community action agencies whose annual operating level is \$300 thousand or less, such non-Federal share is 30% of the total approved cost. The 1977 estimate of \$260 million reflects the amended Federal/non-Federal local initiative program shares.

In 1977, funding through this appropriation for categorical community action programs, which duplicate the program responsibilities of other Federal agencies, is not requested. These programs include the community food and nutrition, national youth sports, summer youth recreation, and research and demonstration programs. The State economic opportunity offices have been allocated sufficient funds for operations through March 31, 1976. Funding for the energy conservation services program in 1977 will be replaced by a larger, more comprehensive winterization program administered by the Federal Energy Administration. The senior opportunities and services program, which provides outreach and referral activities for the elderly poor in service areas, will be funded at \$10 million in 1976 and 1977.

2. *Community economic development.*—The community economic development program is directed toward providing economic and community development impact in rural and urban areas housing concentrations of low-income persons. The 1976 and 1977 requests of \$39 million continue this activity at current levels and will enable a concentration of funding on the more successful community development models and on continued research and development.

3. *Legal services.*—The Legal Services Corporation, an independent private corporation, was established in 1976 to administer this program. Requests for this activity are discussed elsewhere in this appendix.

4. *Program administration.*—This activity provides supportive administration for the community action program and declines \$3.2 million in 1977 to reflect decreased employment levels due to transfer of the legal services program and elimination of direct funding for duplicative categorical programs.

The Consumer Product Safety Act of 1972 established the Consumer Product Safety Commission as an independent regulatory agency for the purpose of reducing the unreasonable risk of injury associated with consumer products. The Commission also administers the Federal Hazardous Substances Act, the Poison Prevention Packaging Act, the Flammable Fabrics Act, and the Federal Refrigerator Safety Act.

1. *Hazard identification.*—Activities undertaken in this program provide an information base on injuries and hazards associated with consumer products.

2. *Hazard strategy analysis.*—Activities in this program involve research on specific product hazards in order to identify the most appropriate remedial approaches; and research to develop data sources, forecasts, and new methodologies for product testing and analysis.

3. *Regulatory development.*—Activities in this program are geared toward developing and promulgating product safety standards, regulations, rules, and test methods as specified in the Consumer Product Safety Act and related acts, implementing Commission policy on voluntary standards, and processing recommendations on petitions to the Commission.

4. *Information and education.*—Activities in this program are designed to produce and disseminate product safety information, develop education strategies and campaigns, supplement new product regulations, and provide operational training.

5. *Compliance and enforcement.*—Activities in this program emphasize monitoring conformance with the statutes administered by the Commission, and selecting the appropriate administrative and/or legal action to encourage and enforce response to the Commission's mandate to reduce unreasonable risk from consumer products.

6. *Administration.*—Activities conducted in this program involve formulation and implementation of policies, and provision of a variety of nontechnical support services.

The Corporation for Public Broadcasting assists in the development and improvement of noncommercial television and radio broadcasting through direct support of national interconnection services, research and analysis activities, fund raising support, and substantial direct payments to radio and television stations for general operational support. These general support grants for licensees are fixed by law at a percentage of annual appropriations.

The Corporation also makes grants to radio and television stations throughout the country for production of programs for national, regional, and local use. In addition, it provides financial support to the station program cooperative, which is a market mechanism whereby local public television stations purchase programs for local use.

The District of Columbia Self-Government and Governmental Reorganization Act terminated, as of January 2, 1975, authority for the District to borrow from the U.S. Treasury to finance its capital improvements program.

The same act authorized the District to issue tax-exempt general obligation bonds to fund capital projects. In addition, it authorized appropriations for interest-bearing loans from the U.S. Treasury to finance capital projects for which funds had been authorized or appropriated before January 2, 1975, and to fund the District's share of the cost of the adopted regional system specified in the National Capital Transportation Act of 1969. This interim authority for the District to borrow from the U.S. Treasury is intended to prevent undue disruption of the city's capital improvements program during the transition to the bonding program.

A single debt ceiling was established by the District of Columbia Self-Government and Governmental Reorganization Act to replace existing borrowing limits for the general fund and the special funds. Under the new, unified debt ceiling, annual payments of principal and interest on the District's outstanding debt for a given year may not exceed 14% of the estimated revenues to the District for that year.

1. *General fund loans.*—For 1977, the District of Columbia is requesting general fund loan appropriations from the U.S. Treasury of \$108,187 thousand. Together with funds available under previous loan authority, the amount requested for 1977 will meet the full cash requirements for ongoing capital projects financed from the general fund. This amount is being requested to help insure necessary financing of the capital program in the event that the District is unable to issue bonds for that purpose in a timely manner. Funds for new general fund projects for 1976 and 1977 will have to be obtained from bond issues.

2. *Special fund loans.*—For 1977, the District of Columbia is requesting loan appropriations from the U.S. Treasury of \$6,000 thousand for the highway fund. Together with loan authority previously authorized, this amount will meet the full cash requirements for ongoing capital projects financed from the special funds. The amount being requested is to insure necessary financing of the capital program in the event that the District is unable to issue bonds for that purpose in a timely manner. Funds for new special fund projects for 1976 and 1977 will have to be obtained from bond issues.

The Emergency Loan Guarantee Act created an Emergency Loan Guarantee Board composed of the Secretary of the Treasury, as chairman, the Chairman of the Board of Governors of the Federal Reserve System, and the Chairman of the Securities and Exchange Commission. The Board was given authority to guarantee, or make commitments to guarantee, loans to major business enterprises. The maximum amount for outstanding loans guaranteed shall not exceed \$250 million at any time.

In accordance with provisions of section 9(a) of the act, there is established in the Treasury an emergency loan guarantee fund to be administered by the Board. The fund shall be available for the payment of the expenses of the Board and for fulfilling the obligations of the Board under the act. The fund is to be credited with fees prescribed by the Board in connection with each loan guaranteed under the act.

On September 9, 1971, the Guarantee Board found that Lockheed Aircraft Corp. met the requirements of the act and approved a Government guarantee to 24 banks which may lend to Lockheed up to \$250 million. The guarantee commitment to Lockheed and its lending banks required repayment of the guaranteed portion of the borrowings by December 31, 1977, unless the Board and the lending banks consent to extend the maturity date for 1 additional year, as provided for under the act.

The Equal Employment Opportunity Commission was created by title VII of the Civil Rights Act of 1964. The purposes of the Commission are to end discrimination based on race, color, religion, sex, or national origin in hiring, promotion, firing, wages, testing, training, and all other conditions of employment. An amendment to the 1964 act, in March 1972, gave the Commission authority to bring civil action in Federal district courts to enforce the provisions of title VII.

The Equal Employment Opportunity Commission is composed of five Commissioners appointed by the President, one of whom is designated Chairman, and a General Counsel, also appointed by the President. A Commis-

sioner's term is for 5 years, the General Counsel's term is for 4 years. The Commission conducts its program through 7 regional offices, 32 district offices, 5 litigation centers, and program and administrative support offices in Washington.

The budget for the agency supports five activities:

1. *Management.*—Includes the top policymaking, decisionmaking offices of the Commission responsible for directing the agency's program. Certain other offices which provide internal and external liaison functions for the Commission are also included in this activity.

2. *Administrative support.*—Includes those offices which supply mandatory support services to the Commission such as budget planning, training, personnel, labor-management relations and building services.

3. *Legal programs.*—Reviews unsuccessful conciliation attempts for the purpose of recommending lawsuits against respondents unwilling to voluntarily comply with title VII; monitors and participates in litigation brought by private parties; and, provides legal counsel to staff and the public relative to the provisions of title VII.

4. *Enforcement and affirmative action.*—Programs under activity No. 4 provide for the investigation, determination of cause, and conciliation of charges of employment discrimination filed with the Commission; provide for affirmative action programs on the national and local level; and, implement the provisions of title VII which authorizes the Commission to enter into cooperative agreements with State and local fair employment practice agencies in furtherance of the goals of the Commission.

5. *Development and planning.*—This activity is responsible for long- and short-term planning as well as the development of statistical analysis and other data relevant to the timely resolution of charges filed with the Commission. The Commission's research program is included under activity No. 5 as well as the Commission's management information system. The latter program was implemented to give the agency the ability to track the status of charges from the filing date through the various stages of resolution and/or litigation.

The Export-Import Bank of the United States was organized in 1934. Its programs are authorized under the Export-Import Bank Act of 1945, as amended. The purpose of the Bank is to aid in financing and to facilitate U.S. exports and imports.

To accomplish its objectives, Eximbank authority and resources are used to supplement the private financing market by:

1. Providing financing for large projects for which private institutions have difficulty marshaling the funds;
2. Providing repayment terms needed by the buyer to meet his cash flow projections;
3. Moderating the cost of financing to meet foreign officially sponsored competition; and
4. Risk-taking such as sharing commercial risks and assuming political risks that cannot appropriately be taken by the exporter or private banks.

Excluded by statute from the budget totals since August 17, 1971, the Bank's receipts and disbursements will again be included in the budget totals beginning October 1, 1976.

Operating results and financial condition.—The bank is a wholly owned Government corporation. Capital stock of

\$1 billion was purchased by the U.S. Treasury. In addition the Bank is authorized to borrow from the Treasury up to \$6 billion; the Bank pays interest on such borrowings.

The Bank's net income is estimated to be \$97,022 thousand in 1977, compared with \$102,300 thousand in 1976 and \$80,544 thousand in 1975. From its net income, the Bank paid a \$20.0 million dividend to the Treasury in 1975 and added the remaining balance of \$60.5 million to its retained earnings reserve to provide for future contingencies. Total investment of the Government in the corporation is estimated to be \$2,828 million on September 30, 1977.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Federal Farm Credit Board.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of: 12 Federal land banks; 13 banks for cooperatives; 12 Federal intermediate credit banks; 552 Federal land bank associations; and 433 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

An increase in the limitation on administrative expenses needed to finance the civilian pay raise effective in October 1975 has been requested (\$172,000 for 1976 and \$64,000 for the period of July 1, 1976 through September 30, 1976). Also, an increase in the limitation on administrative expenses to fund accrued annual leave and deferred other services in the amount of \$410,000 has been requested for 1976.

The Corporation was created by Congress for the purpose of protecting bank depositors and to foster sound practices in the Nation's banking system. As of June 30, 1975, the deposit insurance fund amounted to \$6.4 billion. The entire fund is considered a reserve for the protection of depositors in insured banks and for the payment of administrative and insurance expenses. Income is accumulated principally from assessments paid by insured banks and interest from its investments in obligations of the U.S. Treasury. The insurance fund is strengthened by an authorization to borrow up to \$3 billion from the Treasury of the United States.

<sup>1</sup> No provision is made in this report for disbursements which might be made by reason of additional bank closings after October 31, 1975, because there is no sound basis for predicting which insured banks, if any, will close after that date.

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. Initially deposit insurance was limited to \$2,500 per depositor. This protection increased to \$5,000 in 1935, to \$10,000 in 1950, \$15,000 in 1966 and \$20,000 in 1969. It has been \$40,000 since November 27, 1974. In order to accomplish its varied functions in the protection of bank depositors the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. A basic program for examining State banks which are not members of the Federal Reserve System and liquidation activities attendant to closed insured banks constitute the major portion of the Corporation's operations.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of June 30, 1975, the deposit insurance funds amounted to \$6.4 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the U.S. Treasurer. No borrowing under this authorization has been made to date and none is anticipated in 1976 and 1977.

The estimates for 1976 and 1977 in these statements make no provision for losses and expenses which might

occur by reason of the closing of any bank after October 31, 1975, because there is no sound basis for predicting which insured banks, if any, will close after that date.

1. *Executive direction and administration.*—Includes the responsibilities of the Administrator, as well as the supporting services necessary to the proper execution of the Administrator's responsibilities: legal, financial, personnel, procurement, public affairs, congressional affairs, private grievances and redress, intergovernmental relations, consumer affairs, and maintenance of relations with States on energy matters.

2. *Energy policy and analysis.*—The major activities are the development, coordination, and evaluation of energy policy and legislation, statistical and analytical studies, quantitative analysis, and assessment of the economic and social impacts of national energy policies. Develops econ-

ometric models to perform impact analysis, analyzes long-term energy supply/demand and produces short-term and long-range energy forecasts, and controls all ADP support for the Federal Energy Administration (FEA).

3. *Regulatory programs.*—Executes audit and enforcement activities required to assure compliance with existing regulations. Provides a standby force to develop regulations and maintain operational readiness in accordance with the mandate of the Federal Energy Administration Act. Provides a continuous capability to review, develop, and update national energy contingency plans.

4. *Energy conservation and environment.*—Develops information through economic and policy analysis, promotes efficiencies in the use of energy in transportation, buildings, industries, and utilities, develops and oversees the implementation of energy conservation programs, and insures that environmental concerns are balanced with national energy goals.

5. *Energy resource development.*—Develops and implements policies and programs to increase production and utilization of energy. Activities include the analysis of financial incentives, nuclear energy policy, energy facility siting, and coal conversion.

6. *International energy affairs.*—Major activities are the participation in the International Energy Agency and analysis of international energy prices and international trade in oil, natural gas, coal, nuclear feedstocks, enriched uranium, liquefied natural gas and petrochemicals. Coordinates FEA's participation in national security council matters, multinational energy negotiations, and liaison with defense and nuclear energy agencies.

7. *Strategic petroleum storage planning.*—Provides for the planning necessary to implement a national strategic petroleum storage program.

## FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies for, and supervises the operations of, the 12 Federal home loan banks, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation. It is also responsible for the examination of all Federal savings and loan associations, and for the

examination and supervision of all State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented in this document as business-type budgets. Several important features of this presentation are governed by statute. The Homeowners Loan Act of 1933, as amended, provides that all expenses of the Division of Examinations, Federal Home Loan Bank Board, shall be considered nonadministrative. The Independent Offices Appropriation Act, 1962 provides that expenses of any functions of supervision (except of Federal home loan banks) vested in or exercisable by the Board shall be considered as nonadministrative expenses.

The administrative expenses of the Federal Home Loan Bank Board (including the home office of the Office of Examinations and Supervision) are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

The expenses of the field offices of the Office of Examinations and Supervision are paid from fees collected from savings and loan institutions examined and from assessments against the Federal Savings and Loan Insurance Corporation.

Title I of the Emergency Home Finance Act of 1970 authorized the Federal Home Loan Bank Board to subsidize the interest rate charged by each of the 12 Federal home loan banks on lending to member savings and loan associations, in order to stabilize the flow of funds into residential construction.

The program was initiated in 1971 with an appropriation of \$85 million. An additional \$62.5 million was appropriated in 1972. The program was phased out in 1973.

**Budget program.**—The Board's budget program consists of seven activities.

1. **Examination and supervision of Federal home loan banks.**—The Board examines and supervises the operations of the 12 Federal home loan banks.

2. **Examination and supervision of Federal and State-chartered thrift institutions.**—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal Home Loan Bank System which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State

charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering and insuring savings and loan associations.*—Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of the insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

4. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

5. *Analysis of operations.*—Analyses are made of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

6. *Administrative services.*—These consist of auditing; accounting, budgetary, and financial reporting; internal budget control; and fiscal organization and management. These services also include general housekeeping and operating services, including printing and reproduction work.

7. *Acquisition and construction of a building in the District of Columbia.*—The Demonstration Cities and Metropolitan Development Act of 1966 authorized the Board to acquire property and construct a building in the District of Columbia to provide quarters and facilities for the Board. Under the law, the Board is required to prepare and submit an annual budget program for the building as provided in title I of the Government Corporation Control Act.

8. *Authority of the Treasury to purchase Federal home loan bank obligations.*—The 12 Federal home loan banks seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Authority to borrow from the Treasury was temporarily increased from \$4 to \$6 billion by an amendment to the National Housing Act, approved October 28, 1974. The increase expired on August 10, 1975. Approximately \$330 million will be borrowed from the Treasury in 1976. No additional borrowing is anticipated in 1977.

The amounts shown in the schedules for the activities discussed above include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from \$15.0 million in 1976 to \$17.1 million in 1977. Nonadministrative expenses covering examination and supervision of savings and loan associations are discussed separately, below.

The Office of Examinations and Supervision has the major role in fulfilling the Federal Home Loan Bank Board's statutory responsibility for monitoring and regulating the savings and loan industry. This Office examines and, when necessary, supervises and assists all savings and loan associations to assure the public that savings deposited in these associations are safe and to make credit more accessible to potential homebuyers.

The Federal Savings and Loan Insurance Corporation (FSLIC) also relies on the Office of Examinations and Supervision to protect its assets against depletion from the financial failure of any insured savings and loan association. The Office's responsibility extends to all institutions insured by the Federal Savings and Loan Insurance Corporation as well as to noninsured member institutions of the Federal home loan bank system not subject to State examination.

The Office monitors savings and loan associations through continual analysis of their operating policies and financial reports, regularly scheduled examinations, and occasional special examinations. The purpose of the monitoring process is to determine compliance with Federal Home Loan Bank Board regulations and to ascertain the quality of management and the financial soundness of the member associations. If the Office detects actual or potentially unsafe or unsound practices in insured associations, supervisory agents from the Federal home loan banks work with the associations to prevent or correct poor financial or management performance. The operations

NONADMINISTRATIVE EXPENSES—Continued

of the Office are funded substantially through direct examination charges imposed on savings and loan associations.

The Office also has examination and supervisory responsibilities with respect to savings and loan holding companies and their subsidiaries. In addition, the Office has assumed responsibilities outside the scope of traditional examinations because of legislation in the areas of consumer credit protection, equal opportunity, and security measures.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection, which insures each saver in a member association against financial loss up to a statutory limit of \$40 thousand, may be provided either through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as receiver, or co-receiver upon request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

In carrying out its responsibility for protecting savings in insured savings and loan associations, the Corporation has settled 110 cases since its creation 40 years ago. Actual losses sustained and provision for losses to June 30, 1975, have amounted to \$176.6 million representing approximately 5% of cumulative gross income. Detailed information on these cases is summarized in the following table:

<sup>1</sup> Actual losses sustained \$166.1 million.

*Budget program*—1. *Administrative expenses subject to limitation*.—This category includes the estimated costs of executive direction and policy formulation related to insurance operations in 1977.

2. *Payment to Federal Home Loan Bank Board for services and facilities*.—The Corporation will pay 21% of the administrative expenses of the Federal Home Loan Bank Board in 1977 in return for services and facilities from the Board, including the Washington office of the Office of Examinations and Supervision. The Corporation will also pay 36% of the district offices' expenses of the Office of Examinations and Supervision.

3. *Contributions and provision for contributions*.—This item is the estimated amount needed in 1977 to prevent the default of insured institutions.

4. *Refund of additional premium prepayments*.—Section 404(b) of the National Housing Act, as amended, requires each insured institution to pay a basic insurance premium in an amount equal to one-twelfth of 1% of its savings accounts. A more recent amendment to the act required an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year, less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The amendment also provided for the crediting of a return on the accumulated prepayment of each insured association at a rate equal to the average realized by the Corporation on its own investment portfolio.

The same amendment further provided for the establishment of a primary reserve to be the general reserve of the Corporation and a secondary reserve to which would be credited additional premium payments. If the sum of these two reserves should equal or exceed 2% of total savings, the cash payment of the regular premiums and the prepayments would no longer be required and the Corporation would begin transferring the secondary reserve to the primary reserve by crediting each insured association's accumulated prepayments to its regular premium liability.

Public Law 93-100, approved August 16, 1973, removed the requirement for the Corporation to accept or receive prepayments of future premiums and provided that if the aggregate of the two reserves drops to below 1.25% of total savings, the cash payment of the regular premium will resume until the 1.25% ratio is again reached. If the aggregate of the two reserves equals or exceeds 1.25% but the primary reserve does not equal or exceed 2%,

the Corporation commences transferring each insured institution's pro rata share of the secondary reserve, to the extent available, to discharge its regular insurance premium obligation on a basis of not less than 30% nor more than 70%, as the Corporation may determine. (This credit is reflected on the Analysis of changes in Government equity statement, below.) The law requires the Corporation to accumulate a primary reserve (as of the close of any December 31) equal to 2% of the total amount of all accounts of insured members before collection of regular premiums may be discontinued, provided that each insured institution has paid regular premiums for at least 20 years.

Another amendment to the National Housing Act provides for a phaseout of the secondary reserve over the first 10 minimum net reduction years occurring after December 31, 1973. In May of each year, the Corporation will reduce the amount of each insured institution's pro rata share of the secondary reserve as of the preceding December 31 by a cash refund of the difference between the pro rata share and the percentage of its beginning balance on a percentage basis prescribed in the law.

5. *Other expenses*.—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agreements, the disposition of assets purchased from, and loans to insured institutions to prevent default.

*Financing*.—The original capital of \$100 million has been completely repaid to the Treasury, together with an additional \$43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of \$750 million outstanding at any one time. No borrowings under this authorization have ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members.

*Operating results*.—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of \$3,933.5 million as of June 30, 1975. Total revenues and other receipts since 1934 of \$4,327.6 million have been applied as follows:

USE OF FUNDS (Dollars in millions)		
	Amount	Percent
Expenses.....	\$174.5	4.0

Return on capital stock to U.S. Treasury.....	43.0	1.0
Reserve for contingencies.....	3,933.5	90.9
Total.....	\$4,327.6	100.0

Funded operating expenses for 1977 are estimated at \$126.6 million. Net operating income for 1977, which is expected to be \$450.3 million, will be retained by the Corporation to meet future contingencies.

The Federal Maritime Commission administers the shipping statutes which require regulation of the domestic offshore and international waterborne commerce of the United States. Its objective for 1977 is to achieve compliance with the statutes through an effective regulatory program. This will entail continuing and comprehensive analysis of the activities of conferences, carriers, and others subject to Commission jurisdiction, as they relate to the following program areas: ocean freight rates; rate-making and other agreements; malpractices; foreign discriminatory actions; freight forwarders; terminal operators; passenger vessel certification; and water pollution responsibility. In addition, the Commission will be actively involved in the development of a program to determine appropriate rate bases for carriage of military cargo.

The Service, under title II of the Labor Management Relations Act of 1947, assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production, other than rail and air transportation, whenever in its judgment such disputes threaten to cause a substantial interruption of commerce. Under the authority of Executive Order 11491 of October 29, 1969, as amended by Executive Orders 11616, 11636, and 11838, the Service also makes its mediation and conciliation facilities available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. Public Law 93-360, effective August 25, 1974, amended the National Labor Relations Act to extend its coverage to employees working in private nonprofit health care institutions. The Service is involved in special notice and mediation procedures designed to minimize work stoppages in contract disputes at all private non-profit health care institutions throughout the Nation.

1. *Mediation services.*—During 1975, dispute notices and other notifications affecting 96,855 employers were received by the Service. A total of 24,935 dispute mediation assignments were closed in the private and public sectors and 32,707 mediation conferences were conducted by mediators. Cases in process at the end of 1975 totaled 6,403. The projected workload for mediation assignments closed for 1976 is estimated to be 27,120 and 30,750 for 1977. The following table shows a 5-year comparison of workload data.

*Service function in the Federal sector.*—Executive Order 11491 of October 29, 1969, as amended by Executive Orders 11616, 11636, and 11838, places responsibility in the agency for providing mediation assistance to Federal

agencies and labor organizations in the resolution of negotiation disputes. The Service was engaged in dispute mediation activities in 790 cases during 1975 as compared with 517 for 1974. The projected number of cases for 1976 is estimated to be 900 and 1,100 for 1977.

*Service function in the health care industry.*—Public Law 93-360 provides that upon receipt of notice of contract termination, modification, or initial contract negotiations, the Service is mandated to contact the parties in an effort to achieve agreement through mediation, with the parties being required to participate in meetings called by the Service. If settlement is not reached, the Director of the Service, after due notice, may establish an impartial board of inquiry to look into the facts of the dispute. Use of board-of-inquiry procedures does not preclude continued mediation efforts by FMCS during this period. During 1975, the Service handled a total of 1,400 health care assignments.

*2. Technical services.*—The primary functions of this program are technical assistance, research, education, and training. These functions are used to create programs which will meet the urgent requirement for greater understanding of the collective bargaining process. Through its technical assistance program, the Service has initiated and developed conferences, seminars, and specialized workshops on a wide range of contemporary issues in collective bargaining. This program provides a clearing center for information, approaches, and techniques developed in industrial relations. Through this program the Service will continue to work with both contracting parties to bring about a better understanding of the collective bargaining process, and to improve their day-to-day working relationships. During 1975 the Service closed 935 technical assistance cases. It is estimated that 1,075 cases will be closed in 1976 and 1,400 in 1977.

Separate technical assistance conferences conducted.....	1,630	1,401	1,943	2,365	3,080

*3. Arbitration services.*—The Service provides panels of arbitrators from its roster for the resolution of employee grievances or disputes in the private and public sectors involving the interpretation or application of existing agreements.

The Service is responsible for providing boards of inquiry as an impasse resolution procedure for the health care industry. This responsibility is carried out through the assignment of arbitrators who are experienced in conducting factfinding hearings. In addition, the Service administers expedited arbitration for the U.S. Postal Service in major metropolitan areas of the country.

In 1975 the Service provided 20,508 panels of arbitrators. The projected number of panels issued is estimated to be 24,000 in 1976 and 29,000 in 1977. The projections are based on the anticipated increased demand for arbitration by the parties.

*4. Management and administrative support.*—This program provides for policy planning, evaluation, direction, coordination, management, and administrative support for the programs of the Federal Mediation and Conciliation Service.

*5. Ad hoc boards, panels, mediators, and consultants.*—Provision is made for ad hoc employment of labor relations experts, individually or in panels, in support of the mediation function, and for boards of inquiry appointed by the President in emergency disputes.

Public Law 93-360 also amended title II of the Labor Management Relations Act, 1947, by adding a new section 213 which provides that the FMCS may appoint an impartial board of inquiry to look into the facts of a contract dispute involving health care institutions and to publicly report its findings and recommendations to the parties. During 1975, a total of 54 boards of inquiry were appointed.

The Board was established to act as an appeals board to which mine operators could make application for annulment or revision of orders issued under the provisions of the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 721-740).

The Board was abolished in the 1976 continuing resolution (Public Law 94-41) and its functions are now performed by the Secretary of the Interior.

The Federal Power Commission administers the Federal Power Act and Natural Gas Act, and performs other work relating to Federal electric power developments and associated natural resources.

1. *Hydroelectric power regulation.*—The Commission licenses non-Federal hydroelectric projects and makes water resources appraisal studies. The Commission determines whether projects with expiring licenses should be relicensed or recommended to Congress for Federal takeover. The environmental impact of proposed licensed hydroelectric projects is assessed by the Commission.

2. *Electric power industry systems evaluation.*—The Commission encourages the interconnection and coordination of the Nation's electric power systems to insure an adequate and reliable supply of electric energy.

The Commission studies the electric power industry's problems and prospects to encourage electric utilities to meet the Nation's power requirements by timely installation of adequate generating and transmission facilities with minimum impact on our environment. Continuous surveillance of the changing requirements of the electric power industry is conducted to identify current trends, project load growth, and suggest patterns of generation and transmission to meet future requirements.

3. *Electric power utilities regulation.*—The Commission regulates the wholesale rates and service, the accounts reporting requirements, depreciation practices, certain security issues, the disposition of property, mergers, and interlocking directorates of interstate electric utilities.

4. *Natural gas pipeline regulation.*—The Commission issues certificates of public convenience and necessity to permit construction of new facilities and extensions by interstate natural gas companies. The environmental impact of proposed interstate pipeline construction is assessed by the Commission.

The Commission also regulates the wholesale rates charged by interstate natural gas pipeline companies, their accounting and reporting requirements, depreciation practices, and abandonment of property.

7. *Services to other agencies and to the public.*—The Commission studies industry systems and prepares reports for use of other agencies, the industries, and the public.

The Commission participates with other Federal agencies in planning the development of power at water resources projects. For certain Federal projects, it approves the rate of sale of power and allocates the costs to project purposes. It participates in activities of the Water Resources Council and in Federal-State water resources studies.

8. *Energy utilization.*—This program analyzes the interacting effects of the Nation's energy supply system and its capital distribution and marketing requirements.

9. *Administration.*—Executive, managerial, and administrative support personnel perform the decisionmaking and support functions.

The Federal Trade Commission is charged by law with ensuring that competition in the marketplace is vigorous, free and fair. This is accomplished by eliminating threats to fair and honest competition from all sources, both public and private.

1. *Maintaining competition.*—The antitrust laws were enacted to foster and preserve competition and the free enterprise system. The Commission examines competitive restraints imposed by the private sector or by Government regulatory action that unduly restrict or limit the competitive process. In 1977, the Commission will continue to focus antitrust attention on energy, food and health care industries, which exhibit high concentration and rapid price rises. The thrust of these activities will continue to be on removing barriers to the operation of an unfettered market system—barriers that may permit critical non-market determined price increases.

2. *Consumer protection.*—The Commission is charged with eliminating unfair or deceptive marketing practices which inhibit or restrict the free exercise of informed choice. The Magnuson-Moss warranty—Federal Trade Commission Improvement Act of 1975 substantially strengthened the Commission's ability to promulgate trade regulation rules and to initiate more effective enforcement action. In 1977, a major part of the Commission's consumer protection activities will be directed to implementation of the Magnuson-Moss Act. The Commission will attempt to allow the market to act as a corrective to consumer injury practices by removing impediments to competition and by injecting relevant information into the marketplace.

3. *Economic activities.*—The most important economic activity will continue to be the line-of-business reporting program. In addition, in 1977, approximately one-third of the Commission's economic analyses resources will be devoted to direct support of maintenance of competition and consumer protection activities, while a quarter of the Commission's economic resources will be allocated to in-depth studies of business conduct in several industries.

4. *Executive direction and policy planning.*—The Commission will strengthen policy development and cost/benefit evaluation activities and refine program planning and budget execution capabilities. Increased emphasis will be placed on the use of management tools to enhance accountability and productivity of Commission staff.

5. *Administration and management.*—This includes the formulation and implementation of all administration management policies and functions. In 1977, key legal support tools will become fully operational and computer processing operations will be fully consolidated.

The authorization level needed to support the Commission's missions is \$52,833 thousand. Section 20 of the Federal Trade Commission Act, amended January 4, 1975, limits the Commission's appropriation for 1977 to \$50 million. Therefore, an increase in authorization to \$52,833 thousand is requested.

This independent Commission of five members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States. Of the 613 claims docketed, 438 were completed on June 30, 1975. Payments of awards are dependent upon subsequent appropriations made through claims, judgments, and private relief acts appropriations to the Treasury Department.

**INTERGOVERNMENTAL AGENCIES**

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

The Advisory Commission on Intergovernmental Relations is an independent, bipartisan body which attempts to identify and analyze the causes of intergovernmental conflicts, and recommends ways of strengthening and improving the American federal system. The 26-member Commission includes representatives of the executive, legislative, and administrative branches of all levels of government—Federal, State, and local—as well as representatives of the general public.

Continuing projects of the Commission include monitoring general revenue sharing, coordinating the review procedures established by the Office of Management and Budget Circular A-85, polling public opinion on government and taxes, surveying State and local finances, and monitoring the legislation of State and local governments.

Other projects which are nonrecurring include studies of intergovernmental aid (categorical and block grants), criminal justice, national growth policy, the taxation of military personnel, and the effects of "full deposit" insurance on State pledging laws, the municipal bond market, and housing and redevelopment.

The Consolidated working fund receives funds from other Federal agencies for special projects carried out by the Commission pursuant to contracts with these agencies. Each contract is charged for a share of the Commission's overhead expenses.

Projects scheduled for completion in 1976 include a study of categorical and block grants, the development of a State legislative program, and an analysis of criminal justice programs and the LEAA. The projects are financed by the Department of Health, Education, and Welfare; the Department of Housing and Urban Development; and the Law Enforcement Assistance Administration.

Contributions from State and local governments are used to strengthen the Commission's clearinghouse, information, and policy-implementation services to State and local governments, and to improve intergovernmental coordination.

The Commission's contribution program is under review. In 1977, an attempt will be made to secure greater financial support from the other levels of government which are represented on the Commission.

In 1975, the National Conference on American Federalism in Action was financed through contributions from individuals, nonprofit organizations, State and local governments, and other Federal agencies.

The Appalachian Regional Development Act assigns the following major responsibilities to the Commission:

1. Develop, on a continuing basis, comprehensive and coordinated plans and programs and establish priorities thereunder, giving due consideration to other Federal, State, and local planning in the region;

2. Conduct and sponsor investigations, research, and studies, including an inventory and analysis of the resources of the region, and in coordination with Federal, State, and local agencies, sponsor demonstration projects designed to foster regional productivity and growth;

3. Review and study, in cooperation with the agency involved, Federal, State, and local public and private programs and, where appropriate, recommend modifications or additions which will increase their effectiveness in the region;

4. Encourage private investment in industrial, commercial, and recreational projects; and

5. Serve as a focal point and coordinating unit for Appalachian programs.

It is the function of the Federal cochairman of the Commission and his staff to coordinate the Appalachian program with all Federal agencies.

The Appalachian Regional Development Act also provides for a professional Commission staff. Employees of the Commission, under the act, are determined not to be Federal employees but are the joint employees of the Federal and State governments.

As authorized in the Appalachian Regional Development Act, the 13 Appalachian States share with the Federal Government the administrative expenses of the Appalachian Regional Commission. The States will advance funds in the amount of \$1,573 thousand to pay their share of these expenses in 1977.

The Appalachian Regional Commission will provide technical support for the research and local development districts' programs by an advance of funds in the amount of \$275 thousand from the "Appalachian regional development programs" appropriation.

The Office of the States' Regional Representative established by the Appalachian State Governors advises the 13 Appalachian States on the day-to-day operation of the Commission. That office is supported solely by the States, and is not included in these accounts.

The Washington Metropolitan Area Transit Authority is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and provide for the construction and operation of a rail rapid transit system to serve the National Capital area.

Funded by the National Capital Transportation Act of 1969, the Authority has responsibility for the development of a regional transit system which will extend from a central distributor system into the participating jurisdictions of Maryland and Virginia. Under the act, the Federal share is two-thirds of the net project cost.

In 1972, the National Capital Transportation Act of 1969 was amended by Public Law 92-349 to provide additional funding. It provided for a Federal guaranty of the Authority's bonds in an amount not to exceed \$1.2 billion, conversion of the Authority's bonds from a tax-exempt to a taxable security, and payment of an interest subsidy by the Federal Government to the Authority of 25% of the net interest cost.

The Metrorail capital budget estimates for 1977 and 1978 are being reviewed to reflect the restructuring of the construction program for the rail rapid transit system caused by an increase in the total system cost from \$2.977 billion to \$4.651 billion. This increase has resulted from schedule delays, design changes, and higher inflation than earlier assumed. In keeping with practices encouraged by GAO, cost estimates will be adjusted semiannually to show increases or decreases that have or are expected to occur.

The funds available to the Authority in 1977 in this account are the Federal matching funds provided under the authorization in the National Capital Transportation Act of 1969, as amended. It provides \$90.1 million in Federal funds to be matched with \$45.0 million in local moneys for a total in 1977 of \$135.1 million. In addition, under the 1973 Highway Act, local jurisdictions may identify interstate highway projects no longer necessary, whose Federal and local matching shares may be used to support the rapid rail system. In 1976, the District of Columbia transferred \$286.6 million in this way, matched 20% by WMATA funds, for Metro construction purposes. Additional resources are anticipated through this mechanism from area jurisdictions. The availability of additional Federal funds to match such local resources is discussed in the Urban Mass Transportation Administration (Department of Transportation) section of this document.

During 1977, 11 final design contracts are programmed—6 for design of transit facilities and stations, and 5 for design of system equipment. Also, 34 construction contracts have been programmed, of which 28 involve construction of transit facilities and stations and 6 are for procurement and installation of system equipment.

The Federal authorization of \$1,147,044 thousand, contained in the National Capital Transportation Act of 1969, as amended, will be exhausted in 1978.

While the Federal fiscal year was changed, the Authority has retained its fiscal year on a July 1 through June 30 basis. Federal funding for the transition quarter (July 1 through September 30, 1976) in the amount of \$26,700 thousand is provided in the Department of Transportation and Related Agencies Appropriation Act, 1976, along with the year-in-advance funding approval for the new Federal 1977, in the amount of \$90,059 thousand. The balance of the total authorized Federal contribution amounts to \$15,421,779, and is the amount of year-in-advance funding requested for Federal 1978. This amount, added to the \$26,700 thousand, will represent a total of \$42,121,779 in Federal funds available in 1978, to be matched by \$20,855 thousand in local funds, providing a total availability from this source of \$62,976,779.

The Authority's 1977 capital program includes provision for handicapped facilities, which are separately funded from the above amounts. Federal funds of \$6.8 million will be matched by local moneys of \$1.7 million, on an 80/20 cost-sharing basis, to produce a program of \$8.5

million in 1977; and, \$2.7 million in Federal funds will be matched by \$0.6 million in local moneys in 1978.

Estimates of the Authority's capital programs for 1977 and 1978 are as follows (in thousands of dollars):

	1977 est.	1978 est.
Federal grant.....	96,859	44,822
Local contributions.....	46,729	21,455

(Virginia).....	(19,641)	(11,619)
Other sources.....	509,912	582,023
Total.....	653,500	648,300

Apart from the capital program for construction of the rail rapid transit system is the requirement of annual interest costs on outstanding Authority bonds sold in support of the construction program. The Federal Government, in accordance with Public Law 92-349, provides an annual bond interest subsidy of 25% of total estimated costs. The estimated bond interest subsidy for 1977 is \$19,374 thousand.

<sup>1</sup> Includes capital outlay as follows: 1975, \$152 thousand; 1976, \$170 thousand; TQ, \$30 thousand; 1977, \$169 thousand.

The Tariff Act of 1930 empowers the U.S. International Trade Commission (formerly the U.S. Tariff Commission) to investigate and report to the President and Congress on the conditions, causes, and effects of competition between domestic and foreign industry.

Various statutes direct the Commission to conduct specific types of investigations and, where appropriate, to make findings and recommendations to the Executive or the Congress in cases where: Serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; imports of goods sold at less than fair value may injure an industry; imports of agricultural products may materially interfere with certain programs of the Department of Agriculture; unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry in the United States; or foreign governments may have subsidized imports into the United States. The Trade Act of 1974 provides that the Commission's responsibility regarding unfair import practices be adjudicative and that its determinations thereon be on the record with all proceedings subject to the Administrative Procedures Act.

The Commission provides technical assistance to the U.S. representatives in international trade negotiations. The Commission also publishes the Tariff Schedules of the United States Annotated, which includes both tariff provisions relating to all imported articles and the statistical subdivisions to be used in reporting the commodity composition of imports.

The Trade Act of 1974 requires the Commission to consider the consumer interest in conducting investigations under several sections of the act. In cooperation with other agencies, the Commission is directed to study means of making statistics on imports, exports, and production compatible and to participate directly in international efforts to develop a harmonized commodity code which is intended to be suitable for imposition of import duties, the collection of trade data, and documentation of domestic and international transportation. The Trade Act of 1974 also requires the Commission to monitor U.S. trade with nonmarket economy countries and to publish quarterly a detailed summary of the data collected.

In 1977, the Commission will concentrate much of its efforts in several activities which were heavily affected by

## SALARIES AND EXPENSES—Continued

the Trade Act of 1974. Extensive support to U.S. representatives in international negotiations will be required. The workload of investigations of import injury to industries will continue to grow. Processing of a growing number of investigations of alleged unfair import practices will be particularly demanding in view of the Trade Act requirement for prescribed procedures. Extensive efforts must be devoted to the development of compatible statistical systems and to international development of a harmonized commodity code.

The Interstate Commerce Commission regulates economic aspects of surface transportation in interstate and foreign commerce to the extent it takes place within the United States.

Personnel levels have been reduced below 1976; however, in view of the phasing out of the expired rail services planning function and extensive reprogramming of resources to priority reform functions, the budget will allow the Commission to pursue major reform of its regulatory processes in 1977. Reform activities will include: (1) implementation of procedural actions to expedite formal case processing, (2) development of a permanent planning capability, (3) emphasis on expanding the use of rule-making proceedings to reduce time consuming case-by-case adjudication, (4) enhanced use of economic analysis in decisionmaking and development of improved cost/benefit criteria, (5) assessment and evaluation of the Commission's compliance program, and (6) establishment of an Office of Public Counsel.

The Commission's resources are divided among four major programs:

1. *Formal proceedings.*—This program encompasses the operations involved in deciding all formal and certain informal proceedings filed with the Commission. It includes granting operating authorities, regulating rates and deciding financial matters, providing necessary economic, cost and financial data used in the decision-making process and administrative and management support.

2. *Compliance.*—This program includes the compliance and enforcement activities of the Commission designed to insure that carrier operations are in compliance with the Interstate Commerce Act and related statutes. It includes surveys and investigations of carrier operations, handling complaints with particular emphasis on those of individual consumers, assuring that carriers are properly insured, and administrative and management support.

Section 1(16) of the Interstate Commerce Act, as amended by the Regional Rail Reorganization Act of 1973, authorizes the Commission to direct rail service over the lines of a rail carrier which has ceased a portion or all of its operations under the conditions specified in the statute. The Commission is further authorized to make payments to directed carriers to cover costs incurred to the extent they exceed direct revenues.

The funds appropriated in 1976 provide funding for: (1) Directed service over the lines of the Lehigh and New England Railway Co.; (2) service that may be directed over the lines of other railroads if required and, (3) auditing carrier accounts to validate payments.

The Legal Services Corporation operates pursuant to authority provided by Congress in the Legal Services Corporation Act of 1974. The act created an independent nonprofit corporation for the purpose of providing financial support to programs which offer legal assistance in non-criminal proceedings to low-income persons.

The act provided for the transfer of responsibility for the delivery of legal assistance to eligible clients from the Office of Legal Services, Community Services Administration, to the new Corporation, within 90 days after the Corporation board of directors held its first meeting, on July 14, 1975. It authorized an appropriation of \$100 million to the Corporation for 1976 and such sums as may be necessary for 1977.

The National Center for Productivity and Quality of Working Life was established by Public Law 94-136 on November 28, 1975. The new Center absorbs the functions of the National Commission on Productivity and Work Quality and is established to assist in the formulation of national policies for productivity, to coordinate Federal activities affecting productivity, to report to Congress on the effect of public regulatory agencies on productivity and to otherwise stimulate and support both private and public sector efforts to improve productivity and the quality of working life. It is directed by a board of directors of 27 members, appointed by the President and confirmed by the Senate, and will be administered by an executive director. In 1977, the new Center will be engaged in an expanded range of responsibilities and functions not previously assigned to the Commission. Particular emphasis will be placed on Federal productivity program coordination and analysis.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

**Budget program.**—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c)

providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions.

The extent of the program is estimated as follows:

Item	1975 act.	1976 est.	1977 est.
Number of insured credit unions.....	15,150	16,819	17,794
Number of insured member accounts (thousands).....	21,104	24,400	27,800
Shares of insured member institutions as of December 31 of the previous calendar year (millions of dollars).....	19,563	23,610	27,300

It is estimated that approximately 5,000 State-chartered credit unions will be enrolled in the program by the end of 1977.

**Financing.**—Each insured credit union is required to pay a normal premium of one-twelfth of 1% of the total amount of its member accounts. These premiums, estimated approximately \$18,262 thousand in 1976 and \$21,950 thousand in 1977 will be sufficient to cover expected expenses and claims in those years. The balance will be held as an insurance reserve, invested in Government interest-bearing securities. The fund is structured to be self-supporting, with \$100 million borrowing authority from the Treasury for use in unforeseen emergencies. The authority to borrow from the Treasury will probably not be exercised in 1976 or 1977.

**Operating results.**—Anticipated net income of \$20,621 thousand will be retained in the fund, raising the balance for unforeseen emergencies to \$89 million by the end of 1977.

The National Foundation on the Arts and the Humanities provides catalytic support to cultural institutions and to individuals throughout the country. This support, while designed to provide increased access on the part of all citizens to artistic and humanistic activities and works, is further aimed at increasing private and other forms of support in these areas.

The Foundation is made up of two operating units—the National Endowment for the Arts and the National Endowment for the Humanities.

1. *Promotion of the arts.*—Grants are made to individuals, institutions, cities, regional groups, and State arts agencies. Programs assist the individual artist, increase citizen participation in the arts, support preservation of our cultural heritage, and expand audiences for the arts. Additional funds will be used to encourage increased giving from private and other sources, to assist major artistic and cultural institutions, to encourage folk arts, to further dissemination of the arts through film, television and radio, and to aid State arts agencies and regional groups.

2. *Promotion of the humanities.*—Support is provided to foster humanistic activities on a broad scale through grants to institutions, individuals, and State and community-based groups; and for national dissemination through the media and cultural institutions. These activities are designed to improve the quality of knowledge and teaching in the humanities, and to increase public participation in humanistic endeavors.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1975 was 31,253 unfair labor practice cases and 13,670 representation cases. Estimates for unfair labor practice cases are 33,615 for 1976, 8,895 for the transition quarter, and 36,510 for 1977. Representation case estimates are 15,195 for 1976, 4,300 for the transition quarter, and 15,135 for 1977.

1. *Field investigation.*—Charges of unfair labor practice and petitions for elections to resolve representation disputes are investigated by regional office personnel. Over 90% of the unfair labor practice cases and about 82% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The Agency strives to maximize the voluntary settlement of disputes, and the avoidance of litigation.

2. *Administrative law judge hearing.*—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1975 there were 1,074 hearings closed, 24 proceedings adjusted after close of hearing, and 995 decisions issued. The estimate for 1976 is for 1,200 hearings to be closed, 57 adjusted after hearing, and 1,143 decisions. The transition quarter estimate is for 307 hearings closed, 31 adjusted after hearing, and 276 decisions. The estimate for 1977 is for 1,355 hearings to be closed, 60 adjusted after hearing, and 1,295 decisions.

3. *Board adjudication.*—In an unfair labor practice case a judge's decision becomes a Board order if no exceptions are filed. About 30% of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed require contested Board decision. In 1975, 855 such Board decisions issued; the estimate for 1976 is 1,021 and for the transition quarter and for 1977, 255 and 1,294 respectively. In representation cases regional directors initially decide the issues by Board delegation. In 1975 regional directors issued 2,202 such decisions; and the estimate is 2,362 for 1976, 590 for the transition quarter and 2,510 in 1977.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1975 the Board issued 195 representation decisions; the estimates for 1976, the transition quarter, and 1977 are 295, 74, and 376, respectively. The Board also ruled on 364 objection and challenge questions in election cases in 1975; it is estimated that 395 such rulings will be required in 1976, 98 in the transition quarter, and 504 in 1977.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1975 a total of 272 Board decisions of all kinds required such litigation; the estimate for 1976 is 333, for the transition quarter 102, and for 1977, 390.

The National Science Foundation (NSF) supports basic and applied research, science and technology policy research, science education improvement activities, and related scientific programs in order to promote the progress of science and to advance the Nation's health, prosperity, welfare, and security.

The Foundation's 1977 programs are designed to: (1) strengthen basic research in the mathematical, physical, biological, environmental, and social sciences and

General and special funds—Continued

SALARIES AND EXPENSES—Continued

in engineering and materials; (2) expand and accelerate research on selected national problems, including productivity, resources, and the environment; (3) promote international cooperation through science and technology; (4) provide for the development of an adequate scientific manpower base to meet future needs; and (5) analyze major science, technology, and energy R. & D. policy issues.

The major program activities of the Foundation are:

1. *Mathematical and physical sciences and engineering.*—This activity provides support for research projects directed at increasing understanding of natural laws and phenomena and gaining new knowledge about engineering principles and materials to strengthen the Nation's technology base. Major research efforts in mathematics, physics, chemistry, engineering, materials, and computer science are supported.

2. *Astronomical, atmospheric, Earth and ocean sciences.*—This activity includes six major basic research programs: Astronomy, atmospheric, Earth, ocean sciences, Arctic research, and the U.S. Antarctic research program. General objectives are to gain new knowledge in astronomy and atmospheric sciences over the entire spectrum of physical phenomena; to better understand the physical and chemical makeup of the Earth and its geologic history; and to increase insight into the composition, structure, behavior, and resources of the oceans. In support of ocean research, funding is provided for part of the cost of the academic fleet. To support research in astronomy and the atmospheric sciences, NSF sponsors five national research centers; four for astronomy and one for atmospheric sciences. These centers provide specialized facilities, equipment, staffing, and operational support which are beyond the capability of most individual educational or research institutions to provide. In the field of radio astronomy, the Very Large Array (the most advanced facility in the world) now under construction will provide an expanded capability to study the nature of the universe.

3. *Biological, behavioral, and social sciences.*—The biological, behavioral, and social sciences activity consists of four major programs: Physiology, cellular and molecular biology; behavioral and neural sciences; environmental biology; and social sciences. This activity aims to increase knowledge and understanding of fundamental life processes and forces affecting man as an individual and as a member of society. Emphasis is being given to plant sciences in 1977 because of their potential for providing knowledge on various questions related to food production.

4. *Science education.*—This activity is aimed at increasing the quality and providing appropriate kinds of U.S. scientific and technical manpower; improving institutional capabilities for science and engineering instruction, fostering needed innovations in curriculum materials, in techniques for the teaching of science, and in the use of technological advances for instruction; and increasing public understanding of science and technology and their role in meeting national needs. It includes programs involving individual students and teachers, and schools, colleges, and universities.

5. *Research applied to national needs (RANN).*—The RANN program focuses research on selected problems of national importance. It serves as the bridge between the Foundation's basic research efforts and the development, demonstration, and operational programs of Federal mission agencies, State and local governments, and industry. The principal research areas are resources, environment,

productivity, intergovernmental science and R. & D. incentives, and exploratory research and technology assessment.

6. *Scientific, technological, and international affairs.*—This activity includes research and other efforts aimed at enhancing U.S. science through international cooperative science and technology programs, improving science information transfer, and defining options for science and technology to contribute to economic growth. The programs in this area include a range of planning and policy studies such as identification of R. & D. needs and priorities and the relationship between Federal policies and technological innovation and economic strength.

The special foreign currency program utilizes U.S.-owned excess currencies in certain foreign countries to support cooperative scientific projects, seminars, and the travel of U.S. and foreign scientists involved in mutually beneficial efforts. In addition, support is provided for the translation, publication, and dissemination of foreign scientific and technical information considered to be of interest to the U.S. scientific community. The Foundation awards grants to both U.S. and foreign institutions and scientists. Payments for this program are made in foreign currencies which the Department of the Treasury determines to be excess to the requirements of the United States.

The Independent Safety Board Act of 1974 charges the National Transportation Safety Board with investigating accidents, conducting special studies, promoting transportation safety, and reviewing on appeal actions against certificates or licenses issued by the Department of Transportation.

1. *Aviation accident and safety investigation.*—The Board investigates all U.S. civil aviation accidents, except for the field phase of investigation of most nonfatal accidents which has been delegated to the Federal Aviation Administration for factfinding purposes; determines accident cause and reports facts and circumstances in all aviation accidents; conducts special studies of aviation safety problems; and develops recommendations to prevent aviation accidents.

2. *Surface accident and safety investigation.*—Under this activity, which includes highway, marine, railroad, pipeline, hazardous materials, and intermodal transportation, the Board investigates accidents, determines their probable cause, and reports facts and circumstances of surface transportation accidents. The Board also conducts special studies of surface safety problems and develops recommendations to prevent surface transportation accidents.

3. *Certificate or license appeal.*—The Board reviews on appeal the suspension, amendment, modification, revocation, or denial of any certificate or license issued by the Secretary or an Administrator of the Department of Transportation.

4. *Policy and support.*—This activity includes the formulation and development of policy and program objectives; centralized management, control, and execution of the Board's programs; provisions of legal advice and assistance to the Board components; and provision of information concerning the Board's activities.

<sup>1</sup> Includes full-year activity from AEC and NRC.  
<sup>2</sup> Includes \$33,891 thousand appropriated to "Operating expenses," Atomic Energy Commission for regulatory activities prior to the creation of NRC on January 19, 1975.

The Nuclear Regulatory Commission (NRC) was established in January 1975 pursuant to the Energy Reorganization Act of 1974. The Commission's program for 1977 is designed to provide a responsive and efficient nuclear regulatory process to achieve broader national policies and needs relating to the supply and cost of energy. Additional responsibilities are specified primarily in the Atomic Energy Act of 1954, as amended and the National Environmental Policy Act of 1969 (NEPA).

*Organization.*—The Reorganization Act of 1974 defined three basic organizational units within the Commission: the Office of Nuclear Reactor Regulation; the Office of Nuclear Materials Safety and Safeguards; and the Office of Nuclear Regulatory Research. Two Commission established offices have, at the same organizational level, performed program functions not specifically mandated by the legislation: the Office of Standards Development and the Office of Inspection and Enforcement. The organizational structure of the Commission also includes two other categories of management and staff entities designed to support the conduct of NRC's regulatory responsibilities and to perform those other functions normal to the conduct of any independent agency. The first category includes staff offices that provide direct program support. These are the Office of the Executive Legal Director, the Office of International and State Programs, the Advisory Committee on Reactor Safeguards, the Atomic Safety and Licensing Board and Licensing Appeal Panels. The second category satisfies the indirect support requirements of the Commission, those concerned with overall policy, direction, resource management efficiency, and administrative and logistic support. This category includes the staff office of the Commissioners and the Executive Director for Operations as shown below:

*The Commission:*

- Commissioners
- Secretary
- General Counsel
- Policy evaluation
- Inspector and auditor
- Congressional affairs
- Public affairs

*Executive Director for Operations:*

- EDO
- Administration
- Controller
- Management information and program control
- Planning and analysis
- Equal opportunity

*The NRC 1977 budget.*—The NRC budget estimate reflects the extension of approved 1976 programs. The nuclear industry continues to grow with the number of commercial power reactors with construction permits or operating licenses expected to increase from 116 in 1975 to 201 in 1977. There will be an increase in operating fuel facilities in 1977 and NRC should receive the initial applications for a gaseous diffusion plant and a laser enrichment R. & D. facility in the latter part of 1976 and three additional applications for centrifuge demonstration plants in 1977. In 1977, material licensing should remain essentially constant at 8,000 licensing actions. While the growth of the nuclear industry necessitates increased NRC effort in 1977, additional effort must also be expended to fulfill basic responsibilities given to NRC by the Energy Reorganization Act. Improved procedures will be undertaken to assure the public that nuclear power is being effectively regulated. New initiatives in the areas of safety, safeguards, and environmental protection will be brought to fruition.

*Nuclear reactor regulation.*—The objectives continue to be: the issuance of reactor licenses with adequate safeguards and environmental considerations; to work toward minimizing the licensing time for new reactors; and to continue progress toward licensing of standard plants. Construction application reviews include custom plant applications, reference designs for a standard plant application, and referencing previously approved standardized designs. Standardization offers promise of savings in time and costs to utilities particularly in reducing construction and design costs. It should also offer improved predictability of design and component part reliability.

*Standards development.*—NRC will develop quality assurance standards directly applicable to nuclear component manufacturers. This will minimize conflicting requirements and will provide for improved component quality. By the end of 1976, most of the standards for light-water reactors and the current system of safeguards will be completed. In 1977, emphasis will be on programs related to development of new safeguards systems for the nuclear fuel cycle of the future. There will be a substantial increase in effort on improved material control systems to include the physical protection of special nuclear material in transit.

*Inspection and enforcement.*—In 1977 NRC will increase the number of its safety inspections to accommodate the increase in operating powerplants and new construction of powerplants. There will also be an increase of inspection effort in nuclear fuel cycle facilities and safeguards. The vendor quality assurance program will remain at essentially the same level as 1976.

*Nuclear safeguards and safety.*—NRC's 1977 budget estimate gives high priority to safeguards. This priority is reflected in the increased resources requested to establish an effective safeguards organization and to accelerate studies to develop integrated and effective safeguard systems consisting of upgraded material control and accounting measures and physical protection measures. Safeguards research will be expanded to develop a more systematic and comprehensive rationale for NRC safeguards policy and programs, and to improve procedures for licensing review and inspection.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

*Research (confirmatory assessment).*—The momentum gained in reactor safety research dedicated to regulation over the past 2 years will continue in 1977. NRC will develop independent assessment capability of the safety and environmental impact of activities comprising the nuclear fuel cycle. In the past the biological and environmental programs of AEC had a much broader motivation than specifically serving regulatory needs. They ranged from very basic research to applied research. All these programs remained in ERDA after the division of the AEC. In developing its own mission-oriented program to supply the confirmatory assessment needs in these areas, NRC has started with the extensive data base developed by AEC and will coordinate its efforts with the large ongoing program in ERDA. Initial NRC efforts will cover four principal areas: (1) health and environmental impact; (2) fuel cycle assessment research; (3) waste management; and (4) transportation. Confirmatory assessment planned for 1977 will continue and expand on the 1976 program at a modest rate.

*Dollar summary.*—The 1977 budget estimate is \$236,330 thousand in "Direct program costs." It is reflective of the President's decision to use nuclear energy as one of the means to solve the Nation's growing energy problem and the resultant requirement to regulate its application to the civil sector. It is an increase of \$36.2 million over 1976. Most of the increase, \$23.5 million, is for contractual effort, test facilities and equipment, primarily for confirmatory research. Personnel costs, including the recent Federal pay raise, amounts to \$8.3 million. The remaining portion of the increase, \$4.4 million, results from increased housekeeping costs for rents, utilities, communications, publications, transportation, and supplies. The following is a summary of direct program costs for 1975-77.

Legislation will be proposed to permit NRC to recover the full direct cost of NRC's operations. Amounts thus collected will be paid to the general fund of the Treasury.

The Pennsylvania Avenue Development Corporation was established by Public Law 92-578, October 27, 1972, to plan for and redevelop the area along the north side of Pennsylvania Avenue between the Capitol and the White House. It is governed by a 23-member Board of Directors. The Corporation drafted and submitted a comprehensive development plan, accepted by Congress as of May 19, 1975, upon expiration of the statutory period for its review. The Corporation is now prepared to implement the plan through the use of its powers to acquire, manage, and dispose of property, undertake development projects, and regulate private activities within the area.

*Executive direction and planning.*—These activities account for the administration and operation of the Corporation itself, its staff and Board of Directors.

*Land acquisition and preparation.*—The Corporation will acquire land, as necessary, to assemble sites and to assure development in conformance with the Pennsylvania Avenue Development plan. Costs include appraisals, litigation (where necessary), site acquisition, demolition, clearance, and utility relocation. It is estimated that most of these costs ultimately will be recovered with the proceeds of land sales and leases.

<sup>1</sup> Restoration of balances to liquidate prior Post Office Department obligations.

This appropriation is for the purpose of reimbursing the U.S. Postal Service for public service costs and loss in revenue associated with revenue foregone on free and reduced-rate mail, pursuant to 39 U.S.C. 2401 (b) and (c).

The \$54,104 thousand requested for previously unfunded liabilities of the former Post Office Department provides \$23,104 thousand to cover payments to the Employees' compensation fund for 1977 for injuries to postal employees which occurred prior to July 1, 1971, and \$31 million to cover one-twelfth of the \$372,796,423 in earned and unused annual leave balances due postal employees on June 30, 1971, from the former Post Office Department.

In accordance with the reorganization mandated under the Postal Reorganization Act, which recognizes the independent status of the U.S. Postal Service, the President under section 2009 of title 39, United States Code, directed that starting with 1974 the operations of the U.S. Postal Service be excluded from the U.S. budget. Therefore, the transactions of the U.S. Postal Service appear in part IV of the Appendix under Annexed Budgets.

A supplemental request for 1976 and the transition quarter to cover phasing of scheduled rate changes is included in Part III of this volume.

**U.S. POSTAL SERVICE APPROPRIATION REQUEST**

Herewith transmitted without change, as required by Public Law 93-328, is the appropriation request of the U.S. Postal Service, as submitted to the Office of Management and Budget.

This appropriation provides for payments from Federal funds to the railroad retirement account for certain costs not financed by contributions from workers and employers. The cost categories are as follows:

1. *Military service credits.*—Railroad workers entering military service may have such service credited toward benefits under the railroad retirement system under certain conditions. The last of 10 yearly installments on the amount due the railroad retirement account for certain creditable military service through June 1963 was appropriated in 1974 and \$3,516 thousand was appropriated for 1975 to provide for an adjustment of interest due the railroad retirement account. No amount was requested for 1976, nor is any amount being requested for 1977.

2. *Payment for dual benefits.*—This is the second request for appropriations authorized by the Railroad Retirement Act of 1974 to cover the cost of the windfall portion of benefits received by persons covered by both the railroad retirement system and the social security system, until the windfall can be phased out.

Because the social security benefit formula heavily favors persons with short periods of service and low earnings, persons acquiring eligibility under both systems generally receive a proportionately higher return for their taxes since in most instances the social security coverage is only supplementary to their regular railroad employment. Under financial arrangements between the two systems, the excess costs resulting from this higher return have been borne by the railroad retirement system and have been a material factor contributing to its financial problems. The higher return will be phased out starting January 1, 1975. While being phased out, the cost is to be financed by general fund appropriations to the railroad retirement system.

The Railroad Retirement Act of 1974 authorizes annual appropriations on a level cost basis from 1976 through the year 2000 for costs of phasing out the windfall portion of dual benefits. Actuarial estimates of the gross level annual amount required is \$285 million. This amount is to be offset by the level annual gain expected from the new investment policy authorized by that act for the railroad retirement account. This annual gain is estimated at \$35 million, which is offset against the \$285 million and results in an appropriation request of \$250 million.

For payment of benefits under section 509 of the Regional Rail Reorganization Act of 1973, to remain available until expended, including not to exceed \$100,000 for payment to the Railroad Retirement Board for administrative expenses, \$40,000,000.

Note.—The regular appropriation for this account for 1976 had not been enacted at the time this budget was prepared. A temporary continuing resolution is in effect for the period July 1, 1975, to March 31, 1976.

The Regional Rail Reorganization Act of 1973 provides for various benefits to protected employees adversely affected in the establishment of the Midwest and North-east rail system provided by that act. The payment of all allowances, expenses, and costs provided protected employees will be made by the Consolidated Rail Corporation, the United States Railway Association (where applicable), and acquiring railroads, as the case may be. These organizations upon certification to the Railroad Retirement Board of the amounts paid to protected employees then will be reimbursed for such amounts by the Board. The act authorizes appropriations to the Board for this purpose up to the aggregate sum of \$250 million. Payments from the account will commence in the second half of 1976 and are estimated to be \$37,600 thousand, \$100 thousand of which are for administrative expenses of the Board. During the transition quarter, payments from the account are estimated to be \$10,030 thousand, \$30 thousand of which is for administrative expenses. The appropriation request of \$40 million for 1977 is to cover the estimated benefits to be paid during that period. Administrative expenses of the Railroad Retirement Board in handling that function are estimated to be \$100 thousand in 1977.

## RAILROAD RETIREMENT ACCOUNT—Continued

Under the railroad retirement system, railroad workers and employers pay taxes on wages to finance the payment of annuities for age and disability, benefits for survivors, and to finance the cost of hospital insurance benefits. These taxes are deposited in the Railroad retirement account and invested in Government securities. The portion of these taxes which finances hospital insurance benefits is transferred to the Federal hospital insurance trust fund under the financial interchange provisions governing the railroad retirement and social security systems.

Supplemental annuities also are paid to certain employees in addition to the regular annuities. This program is financed by a tax paid by employers on each man-hour of paid employment. These taxes are deposited in the Railroad retirement supplemental account and invested in Government securities.

The Railroad Retirement Act of 1974 completely restructured the railroad retirement system. The major revisions to the system were in the retirement benefit formulas, in the eligibility requirements for spouse annuities, in the eligibility for supplemental annuities, in the restrictions placed on the future payment of separate benefits under the railroad retirement and social security systems to the same individual, and cost of living increases to railroad annuitants. The status of these trust funds is as follows (in thousands of dollars):

*Income.*—The income of the Railroad retirement accounts consists of taxes paid by railroad employers and employees; interest on investments; appropriations for military service credits; payments from the Federal old-age and survivors insurance trust fund, the Federal dis-

ability insurance trust fund, and the Federal regional rail transportation protective account, and appropriations for dual benefits while they are being phased out under the provision of the Railroad Retirement Act of 1974. The railroad retirement system has a reinsurance arrangement of annual financial interchanges with the social security system so as to place that system in the same position in which it would have been if railroad employment had been included in social security coverage.

Because the social security benefit formula heavily favors persons with short periods of service and low earnings, persons acquiring eligibility under both that system and the railroad retirement system generally receive a proportionately higher return for their taxes since in most instances the social security coverage is only supplementary to their regular railroad employment. Under financial arrangements between the two systems, the excess costs resulting from this higher return have been borne by the railroad retirement system. The higher return will be phased out starting January 1, 1975. While being phased out, the cost is to be financed by general fund appropriations to the railroad retirement system.

1. *Retirement, disability, and survivor benefit payments.*—Payment estimates reflect the increases in benefit rates provided by law and for certain liberalizations in eligibility requirements provided by the Railroad Retirement Act of 1974.

2. *Administrative expenses.*—Such expenses are subject to annual limitations in appropriation acts (see Limitation on salaries and expenses).

3. *Payment to Federal hospital insurance trust fund.*—Portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad retirement beneficiaries are made from that fund.

1. *Maintenance of earnings accounts.*—Insurance payments for unemployment and sickness benefits are based on individual records of earnings and daily wage rates; and the workload fluctuates according to such factors as level of employment and rate of turnover in the railroad industry. The costs are shared on a measured basis with the retirement program. Accounts posted are estimated at 670,000 in 1977.

2. *Processing of unemployment insurance claims.*—Workers' claims for unemployment compensation are filed locally and certified for payment through the headquarters offices. Unemployment claims receipts are estimated to be 575,000 in 1977.

3. *Processing of sickness claims.*—These claims are filed by mail and certified for payment through the headquarters offices of the Board. Sickness claims receipts are estimated to be 440,000 in 1977.

4. *Claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. Savings of benefit payments of approximately \$1,315 thousand are expected in 1977 from the placement of approximately 3,450 claimants in jobs.

5. *Administration.*—The costs of administration are shared between this and the retirement program on a measured basis.

<sup>1</sup> Includes capital outlay as follows: 1975, \$594 thousand; 1976, \$156 thousand; TQ, \$39 thousand; 1977, \$931 thousand.

The Board administers the Railroad Retirement Act which provides a program for the payment of regular annuities for age and disability and benefits for survivors, financed by taxes paid by employers and employees. The Board also participates in the administration of the hospital and medical insurance programs for persons covered by the Railroad Retirement Act for which it is reimbursed in part by the Social Security Administration.

The Board also administers a program for the payment of supplemental annuities under certain conditions to career railroad workers awarded regular retirement annuities after June 1966, financed by a tax paid by employers based on the number of man-hours for which they pay compensation. The supplemental annuity paid to employees is in addition to the regular railroad retirement annuity.

1. *Maintenance of earnings accounts.*—Eligibility for retirement and the amount of benefits paid are based on individual records of earnings, and the workload fluctuates according to such factors as level of employment, and rate of turnover in the railroad industry. Accounts posted are estimated at 700,000 in 1977. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—This activity includes the work of processing annuity claims and establishing eligibility of persons for health and medical insurance benefits. New

LIMITATION ON SALARIES AND EXPENSES—Continued

applications are estimated to be 141,000 in 1977 and total claims dispositions, including reopened cases, are estimated to be 300,000.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of persons on the rolls receiving monthly benefit payments will decrease from 1,013,000 at the end of 1975 to an estimated 1,012,000 at the end of 1977. The number of persons also receiving supplemental annuities will increase from 141,000 at the end of 1975 to 172,000 at the end of 1977.

4. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

The Board conducts renegotiation proceedings with contractors and subcontractors to determine and eliminate excessive profits on defense and space contracts and related subcontracts. The Renegotiation Act provides that a report must be filed with the Board by every contractor or subcontractor having receipts or accruals in a year which exceed \$1 million.

From the date of its establishment through June 30, 1975, the Board made determinations of excessive profits in the amount of \$1.26 billion, before adjustment for Federal income and excess profits tax credits. Of this total, \$27.6 million was determined during 1975.

1. *General management and support staff.*—The Statutory Board is responsible for final action in all cases, including the screening of contractors' filings and the handling of requests for exemptions. The support staff provides administrative management, legal, and program analysis and planning services to the Statutory Board and to the headquarters and regional boards, staffs

2. *Headquarters operations.*—The headquarters operations staff assists the Board in the formulation of policy, gives technical guidance to, and coordinates the activities of the field organization, and assists the Board in completing certain cases which have been processed in the field. Increases in 1977 will permit a functional reorganization of operations providing for increased efficiency, improved case analysis, and a reduction in the case backlog.

3. *Renegotiation operations (field).*—The regional boards conduct renegotiation proceedings and make recommendations and determinations of excessive profits. Increases in 1977 will be devoted to reducing the current case backlog.

<sup>1</sup> Includes capital outlay as follows: 1975, \$285 thousand; 1976, \$68 thousand; TQ, \$62 thousand; 1977, \$90 thousand.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure.*—Issuers of securities for public sale are required to file a registration statement and related prospectus containing material information about the issuer and the offering with the Commission. This is to assure that investors will be provided with the material facts concerning security offerings. Certain provisions of the Securities Act Amendments enacted August 20, 1964, extend to investors in certain over-the-counter securities the same protections afforded to those in listed securities: namely, registration of classes of securities; annual and periodic company reporting; regulation of proxy solicitation; and restriction upon short-swing "insider" trading.

3. *Supervision and regulation of securities markets.*—National securities exchanges and over-the-counter markets are regulated in the interest of maintaining just and equitable principles of trade for the protection of the public investors. One of the purposes of the Securities Acts Amendments of 1964 is, through Commission regulation, to have nonmembers of the National Association of Securities Dealers (NASD) in the same regulatory position as NASD brokers and dealers. In addition to other responsibilities the Securities Acts Amendments of 1975 expand the Commission's oversight of the self-regulatory organizations, including the Municipal Securities Rule-making Board, by requiring Commission approval or disapproval of proposed rules, authorizing the power to abrogate, add to, or delete from existing rules (other than those of a registered clearing agency), and granting the appropriate regulatory agency the power to review both

<sup>1</sup> Includes capital outlay as follows: 1975, \$54 thousand; 1976, \$146 thousand; TQ, \$510 thousand; 1977, \$5 thousand.

In its deepened standby posture the Selective Service System, during 1977, will retain a capability for rapidly emerging from its approved standby posture and meeting the mobilization manpower requirements of the Department of Defense. This capability will be predicated upon the use of new procedures, incorporated in the Emergency Military Manpower Procurement System, for processing registrants and standby reservists and upon the approval of funds and personnel to accomplish those tasks necessary to support this system. Essential activities for such support will be the maintenance of an organizational capability for rapid mobilization reaction and expansion, to include the necessary organizational entities prescribed as the minimum acceptable during periods of no inductions and standby in accordance with 50 U.S.C. 460(h), and to produce an environment in which the tasks related to EMMPS and other programs may be accomplished.

In addition, the System will continue to meet its responsibilities under the clemency program by accom-

plishing all tasks necessary to secure appropriate jobs for enrollees and monitor their performance, per Executive Order 11804.

1. *Service to registrants.*—In deep standby, this activity includes operational and administrative planning as well as the comprehensive training of the Selective Service Reserve Forces. Plans and training programs and schedules, developed and tested at the National level, will be monitored and supervised through regional offices and implemented at the State level. State mobilization plans will be developed, maintained at all times and examined from the National level. A nucleus of computerized registrant processing equipment plus procedures for its use will be maintained, refined, and tested. Additionally, this activity will include the programs required to maintain contact with the civilian community to insure maximum capability to reestablish local and appeal boards and the personnel, space, and equipment needed to activate them.

2. *Examination services.*—Funds were provided in 1975 for the travel expenses of men classified as conscientious objectors serving in alternate service assignments.

3. *General and administrative.*—Personnel administration, financial management, logistics, and other administrative services are provided to support the operational planning and training programs.

4. *Executive direction.*—This activity includes the top policymaking officials whose positions are prescribed in the Military Selective Service Act; i.e., the National Director, and one State Director or State Director Designate in each State and territory, including the District of Columbia.

5. *Special programs.*—Funds are provided for the continued training and utilization of the Reserve and National Guard mobilization forces during their active duty training sessions and scheduled training drills. These officers comprise the Selective Service Reserve Mobilization Force; their continued presence and comprehensive training are critical to meeting commitments to emerge from this deep level of standby should a national emergency arise.

6. *Reconciliation service.*—Personnel support and travel expenses for persons enrolled in the reconciliation service program are provided by this activity.

The Small Business Administration counsels, assists, and protects the interest of small business, and provides aid to business firms and homeowners who have suffered losses through disasters. These efforts are conducted through the following activities:

1. *Procurement assistance.*—This activity assures small business a fair share of Government procurements. In the minority enterprise business development program, section 8(a), the basic objective is to assist in the establishment or expansion of minority or disadvantaged firms which have the potential of developing into viable competitive businesses in a reasonable period of time.

2. *Management assistance.*—The management assistance activity is structured to aid in the establishment, growth and success of small businesses. Through counseling services, training programs, and publications, small business owner/managers are assisted in their goal of improving the management and efficiency of their businesses.

(a) *Economic opportunity management assistance.*—As authorized by section 7(j) of the Small Business Amendment Act of 1974, SBA will contract for professional management training and support of small business entrepreneurs in areas with high concentrations of unemployed or low income individuals to (1) establish the management training, counseling, and support needs of firms in target areas, (2) identify business opportunities in these areas, and (3) determine the feasibility and profit potential of proposed business development to be located in such areas. As a part of a broader effort to improve the SBA assistance programs for socially and economically disadvantaged individuals, this program will be increased by \$3 million over the 1976 level.

3. *Finance and investment.*—This activity is comprised of:

(a) *Business loans.*—This includes loans and financial counseling to business concerns, businesses displaced because of federally aided construction, businesses eligible under section (i) of the Small Business Act and those loans to the handicapped or nonprofit organizations hiring the handicapped under new section 7(h) of the Small Business Act. The program for 1977 is projected as follows:

	Number	Millions of dollars
7(a) Business loans.....	26,615	2,420.0
7(h) Handicap loans.....	389	48.0
Economic opportunity loans.....	5,515	139.6
Displaced business loans.....	210	32.7

This is an increase of \$513 million over the 1976 level, which will assist an additional 6,120 small businesses.

(b) *Development company loans.*—This covers (a) efforts to encourage private lending institutions to expand their role in the economic development of their respective States and (b) loans to State and local development companies to enable them to provide the long-term capital—equity and loans—to small businesses.

(c) *Investment company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns, the Small Business Administration is authorized to (a) license, regulate, and examine small business investment companies, and (b) provide funds to such companies for financing small business firms. The program level for 1977 is estimated at \$170 million.

(d) *Lease guarantees.*—The Small Business Administration has authority to guarantee the payment of rentals under leases of commercial and industrial property.

This program has been incurring excessive losses and has not been an important form of assistance to small businesses. Therefore the program is being terminated with no new commitments planned for 1977.

(e) *Surety bond guarantees.*—In order to enable small firms to obtain bid, performance, and payment bonds otherwise denied them through asserted lack of financial and other capability, the Small Business Administration is authorized to guarantee sureties against losses resulting from the breaching of such bonds by small contractors who were furnished bonds by the sureties under the provision of this program. SBA guarantees a portion of the loss under contracts not exceeding \$1 million in amount. The program level (contracts insured) for 1977 is estimated at 12,600 for \$833 million.

4. *Operations.*—This activity has the responsibility for the guidance, supervision, and policy planning of all field office operations. Responsibility for the direction and guidance of all disaster operations is also in this activity.

5. *Disaster loan making.*—This provides financial assistance on favorable terms to property owners for rehabilitation of property damaged by natural disasters. Also included under this activity are loans to small firms to enable them to comply with new health and safety standards (involving changes in equipment, facilities, or methods of operation) imposed by a number of Federal statutes or State laws enacted in conformity therewith, such as the Federal Coal Mine Health and Safety Act of 1969, the Occupational Safety and Health Act of 1970, the Egg Products Inspection Act, the Wholesome Poultry Products Act, the Wholesome Meat Act of 1967, and the Federal Water Pollution Control Act. Similar loans are also authorized for any small firm likely to suffer substantial economic injury as the result of any international agreement limiting the development of strategic arms or the installation of strategic arms facilities, base closings and those affected by the energy crisis.

6. *General Counsel.*—The Office of General Counsel is responsible for analyzing and interpreting legislation, regulations and orders relating to the operation of the Small Business Administration, and advising officials as to the legal aspects of the development and execution of policies and programs.

7. *Administration.*—This activity provides the administrative support to the program activities of the Small Business Administration. These activities include audits and investigation, budget and finance, management services, personnel and field administration.

8. *Advocacy, planning, and research.*—The advocacy function conducts activities to insure appropriate representation of the small business interests with all Federal agencies, State and local governments, and appropriate professional and trade organizations. The planning and research function includes analysis of the economic environment and its impact on small business, evaluation of program activities, and the development of new or revised size standards for defining small business in all industries.

(a) *Research contracts.*—Research studies designed to reveal matters materially affecting the competitive strength of small business and the effect on small business of Federal laws, programs, and regulations are financed under this activity.

9. *Congressional and public affairs.*—This activity has the principal responsibility for information, communication, and understanding between the Agency and the

small business community, news media, public at large and the executive and legislative branches of the Federal and State Governments, in accordance with relevant legislation and directives.

10. *Minority small business.*—The responsibility for the formulation of policy for SBA's programs which provide assistance to minority small business concerns, and for evaluating agency performance and execution in light of such policy is performed by this activity. Increased responsibility will be provided to the Associate Administrator for Minority Small Business to assure that these programs are focused on common objectives, and that comprehensive assistance is provided to minority small businesses.

11. *Civil rights.*—This office is responsible for the overall planning, administration, and review of the Agency's equal employment opportunity program, title VI and related programs and the contract compliance program.

12. *Executive direction.*—This activity provides policy determination and coordination of all SBA programs by the Administrator, his Deputy, and administrative staffs of the central, regional, district, and branch offices.

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance loan programs and prime contracting activity performed pursuant to sections 7(a), 7(b)(3), 7(e), 7(h), 7(i), and 8(a) of the Small Business Act, as amended, and titles III and V of the Small Business Investment Act of 1958, as amended. Administrative, interest, and other related expenses are also financed from this fund.

While no ceiling on authorized appropriations is specified, a limitation of \$7.25 billion has been placed on the amount of loans and commitments (reservations) which may be outstanding at any time. This ceiling is composed of separate limitations on outstanding amounts as follows (in millions of dollars):

Business loans (including a limitation of \$450 million on economic opportunity loans) <sup>1</sup> .....	6,000
Development company loans.....	525
Investment company loans <sup>1</sup> .....	725

<sup>1</sup> Legislation has been proposed to increase these limitations.

*Capital outlay*—1. *Business loans (sec. 7(a), Small Business Act)*.—Funds may be loaned to business concerns

which are not dominant in their fields. To such small businesses, loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a bank participation is not available and no loan on an immediate participation basis may be made unless it is shown that a guaranteed loan is not available. Under the guaranty plan, the Small Business Administration agrees to purchase the guaranteed portion of the loan only upon default.

The agency's share of an immediate participation or guaranteed loan is limited to 90%. Its maximum outstanding loan and/or commitment to any one borrower is limited by statute to \$350 thousand.

Increased loan assistance will be provided in 1977 amounting to \$488 million over the 1976 level to assist an additional 5,475 small businesses.

*Business loans (sec. 7(h), Small Business Act)*.—The Small Business Investment Act Amendments of 1972, signed into law on October 27, 1972, added a new section to the Small Business Act authorizing loans to handicapped persons operating or establishing small business, and to nonprofit organizations hiring the handicapped.

Funds may be loaned to any one borrower up to a maximum of \$350 thousand for 15 years.

*Business loans (sec. 7(i) Small Business Act)*.—The Small Business Administration administers a program of financial assistance to small business concerns and to qualified persons seeking to establish such concerns. Loans may be on a direct, immediate participation, or guaranteed basis for up to \$50 thousand, for a maximum term of 15 years. The credit and collateral requirements are more flexible than those applicable to 7(a) business loans and provision for management training is made an integral part of the program.

*Displaced business loans*.—Pursuant to authority provided in the Housing Act of 1961, loans are made to small firms that suffer substantial economic injury as a result of being forced to move by federally aided urban renewal, highway, and other construction programs or as a result of being adjacent, or near, a federally aided construction project. The interest rate on the Small Business Administration's share of these loans is determined pursuant to a formula prescribed by legislation.

*Development company loans*.—The Small Business Administration lends funds to State and local development companies pursuant to sections 501 and 502 of the Small Business Investment Act, as amended. Funds are made available to State development companies for general use purposes under section 501 and State and local develop-

ment companies for plant construction, conversion, or expansion, including the acquisition of land, under section 502.

2. *Investment company assistance.*—A primary function of small business investment companies is to provide a source of needed equity capital for small concerns. To encourage the formation and growth of such investment companies, the Small Business Investment Act, as amended, authorizes the Small Business Administration to purchase, or to guarantee the timely payment of all principal and interest as scheduled on, debentures issued by such companies. The Small Business Investment Act Amendments of 1972, approved October 27, 1972 (Public Law 92-595), authorize in addition the purchase of preferred securities (shares of nonvoting stock or other securities having similar characteristics) from small business investment companies operating under authority of new section 301(d) wherein the investment policy of such companies will be to make investments solely in small concerns owned and operated by disadvantaged persons.

Debentures purchased or guaranteed by the Small Business Administration shall be subordinate to any other debenture bonds, promissory notes, or other debts and obligations of such companies, unless the Administration determines otherwise in the exercise of reasonable investment prudence. The amount of debentures which may be purchased or guaranteed, or preferred securities which may be purchased, and outstanding at any one time from a company depends on the amount of combined private paid-in capital and paid-in surplus of such company, but in no event may exceed \$20 million for other than 301(d) companies.

*Operating costs.—Interest expense.*—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund. The interest rate or rates applicable to each year's disbursements are determined at the beginning of the year by the Secretary of the Treasury, taking into consideration of current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. For interest computation purposes, collections of interest and principal on unpledged loans and other receipts to the fund are applied against the earliest year's disbursements still outstanding. The rates set by the Secretary of the Treasury for disbursements in 1976 are  $7\frac{3}{4}\%$  for 7(a) business and economic opportunity loans,  $7\frac{1}{8}\%$  for state development company and SBIC loans and/or debentures and  $8\frac{1}{8}\%$  for displaced business and local development company loans. Interest is also payable to the holders of participation certificates at specified rates set at the time of each sale.

*Administrative expense.*—Expenses for the loan program financed by this revolving fund are financed by transfer of funds to the appropriation, salaries and expenses. Use of these funds for salaries, travel, and related expenses is accordingly reflected in the schedules for that appropriation account.

*Financing.*—This fund was capitalized by transfer of an applicable portion of the assets, liabilities, and unexpended balance of the revolving fund, Small Business Administration on July 1, 1966, and by transfer of the unexpended balance of appropriations previously made for the trade adjustment assistance loans. Appropriations are

authorized to be made to the fund as additional capital to the extent required to carry out the authorized functions.

In lieu of appropriations, additional capital funds required in the several years prior to 1971 were provided by the sale of participations in loan pools. Of the \$1.35 billion of such participation certificates sold, \$1,117.2 million was allocated to this fund, of which \$354.6 million remained outstanding on June 30, 1975. Beginning in 1971, capital funds required have been provided by appropriations.

*Participation sales insufficiencies.*—In respect to participation sales as discussed immediately above, the Participation Sales Act of 1966, authorized appropriations without fiscal year limitation of such sums as may be necessary to permit trustor agency to pay the trustee such insufficiency as the trustee may require on account of outstanding participations.

A permanent appropriation in such amount as may prove necessary each year was provided in the Independent Offices Appropriation Act of 1967, in connection with participation sales of \$850 million as were authorized by the act. However, for each of the years 1968 through 1976, the Congress provided annual appropriations for any insufficiency arising from the \$150 million sales authority provided in the agency's appropriation act.

*Operating results.*—The fund will continue to operate at a deficit. Interest and fee income will not be sufficient to cover interest, administrative, and other expenses, and a provision for estimated direct and guaranteed loan losses. Primarily this reflects the excess of interest expense rates over interest income rates and the cost of servicing an expanding number of widely scattered loans which are relatively small in size.

An additional factor which will further increase the deficit of the fund in 1976 and 1977 is the cost differential on section 8(a) contracts. In expanding the use of the section 8(a) prime contracting authority to bring more minority firms into the Government procurement process, it is anticipated there will be many instances in which the program objectives will justify a payment to the minority subcontractor in excess of an apparent competitive market price to the procuring agency. This differential reflects such things as added startup, labor and/or material costs applicable to the particular firm and circumstances involved. Due to the recent increase in costs of completing 8(a) contracts, the amount for this cost differential will be increased from \$8 million in 1976 to \$12 million in 1977.

## DISASTER LOAN FUND—Continued

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance disaster loans made pursuant to sections 7(b), 7(f), and 7(g) of the Small Business Act, as amended, other than those to displaced businesses made under section 7(b)(3). Administrative, interest, and other related expenses are also financed from this fund.

*Physical disaster loans.*—Under this activity, loans are made at a favorable rate to property owners for rehabilitation of property damaged by natural disasters. The maximum term for a physical disaster loan is 30 years, and the maximum interest rate is 5%. Through June 30, 1975, a total of 520,387 disaster loans for \$3.6 billion had been approved. Estimated approvals for physical disaster loans are \$140 million in 1976 and \$60 million in 1977.

*Nonphysical disaster loans.*—Under this activity, loans are made to small firms which need temporary assistance in complying with certain Federal or State statutes and regulations (that is Clean Air Act of 1970, Occupational Safety and Health Act of 1970, and so forth) or to small businesses which have suffered economic injury as a result of shortages in energy-producing materials. Estimated approvals for nonphysical disaster loans are expected to decrease by \$20 million below the 1976 level to \$80 million in 1977 in anticipation of a lower demand for emergency energy-shortage loans.

*Interest expense.*—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund. The rate set by the Secretary of the Treasury for disbursements in 1976 is 8% for both nonphysical and physical disaster loans. Interest is also payable to the holders of participation certificates at specified rates set at the time of each sale.

*Administrative expenses.*—Administrative expenses for this program are financed by transfer of funds from the revolving fund to the appropriation, "Salaries and Expenses." Use of these funds for salaries, travel, and related expenses is accordingly reflected in the schedule for that appropriation account.

*Financing.*—Appropriations are authorized to be made to the fund as capital to the extent required to carry out the authorized functions. Beginning in 1970, capital funds required have been provided by appropriations. A capital appropriation of \$90 million is requested for 1977.

*Participation sales insufficiencies.*—The Participation Sales Act of 1966 authorized appropriations without fiscal year limitation of such sums as may be necessary to permit any trustor agency to pay the trustee such insufficiency as

the trustee may require on account of outstanding participations. This authority is not applicable to the sales in the predecessor fund.

Public Law 93-386, the Small Business Amendments of 1974, established this fund to finance the lease guarantees program. Administrative and other related expenses are also financed from this fund.

The lease guarantees program is designed to provide prime space for those small business firms which cannot compete with prospective tenants with AAA ratings. This program has been incurring excessive losses and has not been an important form of assistance to small businesses. Therefore, the program is being terminated with no new commitments planned for 1977.

It is estimated that 100 commitments for an aggregate rental guarantee of \$35 million will be made in 1976.

Public Law 93-386, the Small Business Amendment Act of 1974, established this fund to finance the surety bond guarantees program. Administrative and other related expenses are also financed from this fund.

The Small Business Administration will guarantee a portion of the losses sustained by a surety company as a result of the insurance of a bid, payment, and/or performance bond to a small business concern on a contract up to \$1 million.

It is estimated that surety bond guarantees will be made in connection with 12,600 contracts totaling \$833 million in both 1976 and 1977. SBA will undertake improvements in this program to reduce the unexpectedly high loss rates which have occurred in recent years.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology including living animal exhibits; acquires and preserves for reference and study purposes millions of items of scientific, cultural, and historic importance; conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; presents performances of American arts and crafts; supports education programs at all levels; and participates in the exchange of scientific information.

The Institution is responsible for the operation and maintenance of 10 major exhibition buildings, as well as a zoological park; a preservation and storage facility at Silver Hill, Md.; a conference center at Elkridge, Md.; 2 natural preserves, in Panama and on the Chesapeake Bay; and an observatory on Mt. Hopkins, Arizona. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, totaled more than 20 million in 1975.

In 1977 high priority will be given to completing custodial and protection staffing for the new National Air and Space Museum Building.

Documentation and care of the National Collections will be stressed. Improved collection inventory and data management systems will be developed for research purposes and to answer public inquiries. Objects in the collections will be conserved to avoid deterioration and loss.

General exhibition, education, and outreach programs will be strengthened to keep pace with the rising numbers of visitors to our museums and art galleries and to museums across the Nation. Special attention will be given to such diverse but related activities as the care and exhibition of the animal collection, development of an animal conservation center for use in breeding endangered wildlife species and for associated research and conservation efforts, exhibits demonstration, music and publication programs, school tour and education programs, and the preparation of new exhibits and maintenance and upgrading of older exhibits for the pleasure and education of visitors.

Special research efforts will be undertaken in tropical and temperate zone environmental studies, in astronomy and atomic and molecular physics, and in aspects of American civilization, technology, and culture. In order that the professional research staff can function at the highest level of productivity, attention will be directed toward providing more adequate support in the areas of data processing, library materials, technician support, and laboratory equipment and supplies.

Central administration and supporting services will be strengthened to give program direction, management, and assistance to a complex organization. More adequate protection, preventive maintenance, and custodial care will be given to buildings and facilities in the face of rising public visitation and use.

Note.—Excludes \$19 thousand in 1977 for activities transferred to the Department of State (Salaries and expenses account). Comparable amounts for 1975, \$33 thousand; 1976, \$17 thousand; TQ, \$5 thousand are included above.

The Smithsonian Institution will continue the program of awarding grants to American universities, museums, and other institutions of higher learning. These grants support research in archeology and related disciplines, systematic and environmental biology, astrophysics and earth sciences, and programs in museum sciences in the foreign currency countries. In some cases, funds are administered through a bilateral or international organization of which the United States is a member.

The 1977 budget request also includes \$1,000,000 equivalent in Egyptian pounds for the campaign to save the monuments of Nubia located on the Island of Philae. This would be the third of four equal contributions.

The Exchange collects, indexes, stores, retrieves, and disseminates information about ongoing scientific research supported or conducted by the Federal Government and by segments of the private scientific community. It responds to requests from research investigators, program administrators, and policymakers for information on who is currently working on what project, where, when, and under what source of funding, and it provides numerous directories of ongoing research in response to the requirements of Federal agencies. Its purpose is to assist in the avoidance of unwarranted duplication of research and to enhance scientific communication and creative interaction among members of the national research community.

SSIE is playing an increasingly important role in support of a number of programs of key national interest, such as energy, cancer, and pesticides research. It is doing so at

least partly because it has been able to significantly increase the timeliness and comprehensiveness of its coverage of the national program in recent years.

SSIE has been designated by the National Cancer Institute as a current cancer research project analysis center under the international cancer research data bank program. Costs incurred by SSIE in operating the Center will be reimbursed by the National Cancer Institute.

The National Air and Space Museum will be completed and opened to the public on July 4, 1976. Necessary equipping and additions or changes dictated by moving into an operational status will continue.

Planning for the first phase of development of museum support facilities will begin. These will provide additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators.

The Woodrow Wilson International Center for Scholars (WWICS) serves two fundamental purposes. The first is to find and to support gifted individuals to conduct research on a wide variety of subjects. Many of the Center's activities serve this primary purpose: the process of selection, the scholarly support of fellows in residence, the colloquia given by fellows and the work they publish.

The second purpose seeks to fulfill more directly Congress' mandate that the Center serve as a special link between "the world of learning" and "the world of public affairs". Aspects of the Center's activity that serve this purpose are its luncheon discussions, evening dialogs, conferences, the special program on State and local government, and the establishment of a new national "Quarterly" magazine. These are the principal means through which the results of research reach a wider audience both within Washington and throughout the Nation.

The Joint Federal-State Land Use Planning Commission for Alaska was created by the Alaska Native Claims Settlement Act. The Commission, composed of Federal and State members, will be in existence until December 31, 1976, to conduct land use planning activities, and to advise and make recommendations to the President, the Congress, and the Governor of Alaska concerning disposition and uses of Federal and State lands in Alaska. Under the law, Commission expenses are shared equally by the Federal Government and the State of Alaska. The transition quarter and 1977 program reflects a phasing out of activities prior to termination of the Commission in December 1976.

The National Commission on Electronic Fund Transfers was established by the Depository Institutions Amendments Act of 1974, to conduct a thorough study and investigation and recommend appropriate administrative action and legislation necessary for the possible development of public or private electronic fund transfer systems. The study will take into account the need, among other things, to preserve and promote competition and prevent discriminatory practices among financial institutions and the need to afford maximum user and consumer convenience, confidentiality, and protection of legal rights. The Commission is composed of 12 ex-officio members and 14 others appointed by the President, and has a lifespan of 2 years. The Commission is to make a final report by October 1976, of its recommendations and findings to the Congress and the President. It will cease to exist 60 days after submission of the final report.

*Budget program—1. Regional development program.*—A major objective of the TVA Act is full development and use of all the resources of the Tennessee River basin. The development of these resources is reflected in regional and national gains in the fields of navigation, flood control, water quality, recreation, and wildlife development; in agriculture, waste heat utilization, forest and minerals resources, and strip mine reclamation; in human resources development; and in related economic and industrial development.

(a) *Water resources development* includes continuing development of the all-year 9-foot navigation channel from the mouth of the river at Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles.

Flood control activities are concerned with maintenance and use of storage space in upstream reservoirs for seasonal retention of excessive runoff and the regulation of discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Flood crests are reduced along the Tennessee River and along the tributaries downstream from the reservoirs and along the lower Ohio and Mississippi rivers.

Regional water quality management comprises the determination of basic facts about water quality, planning of ways of maintaining or upgrading the quality of the water resources, and monitoring and surveillance to assure that water quality does not deteriorate. This work is conducted in cooperation with appropriate Federal, State, and local agencies and with industrial users of water.

Recreation, fisheries, and waterfowl resources development activities are designed to promote the optimum development of the water and other scenic resources of the region in a way that will improve the physical and cultural environment, stimulate economic development, and conserve natural and historical resources.

The capital outlay program for water resources development includes a total of \$42,362 thousand for continuing construction of multipurpose projects: (1) \$16,424 thousand for the Duck River project started in 1972; (2) \$16,388 thousand for the Bear Creek project started in 1967; and (3) \$9,550 thousand for the Tellico project also started in 1967.

The program also includes capital outlays of \$5,201 thousand for navigation facilities of which \$4,815 thousand is for continuing the alteration of a railway bridge at Decatur, Ala., and \$386 thousand is for other facilities. A total of \$3,650 thousand provides for continuing flood control improvements on South Chickamauga Creek at Chattanooga, Tenn. and an additional \$891 thousand provides for replenishment of a fund for small flood control projects.

(b) *General resources development.*—Special attention is given to the proper use, conservation, and development of the region's resources. Investigations identify current problems and opportunities for development under conditions of optimum use.

Forest resources development activities include appraisals of the quality and quantity of the existing resources, research and demonstrations concerning improvement of the resources, promotion of sound forest management and wood utilization practices, and development of improved wildlife food and cover plants. Research and demonstrations are conducted to promote the reclamation of land disturbed by surface mining. Research and demonstrations in agriculture have the objectives of assistance to valley farmers in improving their economic situation and attainment of a higher standard of living through efficient use of land resources and improved farm practices and systems. Research activities are conducted to develop technological systems for utilization of the heat in condenser water discharge from powerplants as an energy source for use in the production of food and fiber.

Tributary area development is a comprehensive and cooperative approach to resource development in areas of the Tennessee Valley where specific opportunities exist for further development and where local groups have organized to deal with problems of economic advancement and social improvement.

Activities in human resources development are concerned primarily with improving opportunities in the region to help valley people assume more productive roles as workers and as citizens.

Townlift and community improvement is a technical assistance activity in which TVA helps State and local agencies to improve existing towns to better fit them to changed demands upon them for service and to guide the development of new towns where such may be needed in relationship to water resources development projects.

A capital outlay estimate of \$2.7 million provides for completion of TVA's participation in the Lower Elk Town demonstration project.

(c) *Land Between The Lakes.*—Work will continue on development of the 170,000-acre area in western Kentucky and Tennessee situated between TVA's Kentucky reservoir and the Corps of Engineers' Barkley Lake. Land Between The Lakes is a demonstration of new ideas in public outdoor recreation and conservation education. Work on facilities to serve visitors calls for capital outlays of \$1,833 thousand.

2. *Power program.*—TVA is the sole supplier of electric power in an area of 80,000 square miles of the Tennessee Valley States. Net income from power operations, after interest charges and depreciation, is estimated to be \$247.3 million for 1977.

**Public enterprise funds—Continued**

**PAYMENT TO TENNESSEE VALLEY AUTHORITY FUND—Continued**

Of the \$810,380 thousand estimate for power generating facilities, all to be financed from power proceeds and borrowings, \$1,830 thousand is for completing Browns Ferry nuclear units 1-3; \$66,484 thousand for continuing Sequoyah nuclear units 1-2; \$35,736 thousand for Raccoon Mountain pumped-storage units 1-4; \$119,257 thousand for Watts Bar nuclear units 1-2; \$205,893 thousand for Bellefonte nuclear units 1-2; \$276,486 thousand for Hartsville nuclear units 1-4; \$59,616 thousand for Phipps Bend nuclear units 1-2; \$41,493 thousand for Yellow Creek nuclear units 1-2; and \$3,585 thousand for preliminary work on additional capacity needed for the future. Each increment in this program for power generating capacity additions is essential to meeting expected power needs of the Tennessee Valley region.

Capital outlay for all power supply and use facilities in 1977, including transmission system facilities, is estimated at \$1,206,723 thousand.

3. *Fertilizer development program.*—Chemical facilities at Muscle Shoals, Ala., are maintained and operated as a national fertilizer development center. Program activities are of two general types: fertilizer research and development, and introduction to the American farmer of new fertilizer materials and improved fertilizer uses.

Fertilizer research and development consists of basic chemical and agronomic research and fertilizer products

and processes research and development. TVA works cooperatively with the Department of Agriculture, the land-grant universities, and with industry to maximize effectiveness of research and to avoid undesirable duplication.

Fertilizer introduction is carried on cooperatively with the land-grant universities and the fertilizer industry. It includes carefully controlled small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms, and nationwide educational introduction of fertilizers.

Capital outlay costs of \$8,524 thousand for chemical facilities are chiefly for: (1) Pollution abatement facilities, (2) completing construction of a demonstration-scale unit for production of sulfur-coated urea, (3) continuing the installation of a unit to concentrate wet-process phosphoric acid, (4) completing construction of facilities for clarifying high polyphosphate liquid fertilizer, (5) beginning construction of facilities for storage of liquid and suspension fertilizers, and (6) other additions and replacements.

4. *General service activities.*—Operating costs for general service activities include mapping and remote sensing, bridge maintenance, fallout shelter maintenance, Bicentennial activities, and reimbursable services furnished at the request and expense of other agencies. Capital outlay for 1977 is estimated at \$7,045 thousand for additions and replacements of office, transportation, electronic computing, and other facilities used jointly in conducting TVA programs.

**Financing.**—Amounts estimated to become available in 1977 are to be derived from (1) the requested appropriation of \$121,185 thousand; (2) nonpower revenues and receipts of \$62,558 thousand; and (3) power revenues and receipts of \$1,984,721 thousand. In addition, the budget program anticipates financing from borrowings of \$1 billion backed by future revenues. A summary of the application of appropriations follows.

**Operating results and financial condition.**—Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payments to the Treasury from power proceeds in 1977 are estimated at \$88 million—\$68 million as a dividend (return on the appropriation investment in the power program) and \$20 million as a reduction in the appropriation investment in the power program. Borrowings for the power program are expected to increase by \$1 billion during 1977.

Total assets are estimated to increase by \$1,142,380 thousand during 1977. The increase is mainly in real property and equipment, reflecting expenditures for construction of facilities; \$1,087,403 thousand of the increase in assets is in the power program and \$54,977 thousand is in nonpower programs. The estimate of liabilities at September 30, 1977, is \$917,413 thousand more than the estimate at September 30, 1976. This increase reflects the

proposed borrowings in 1977 and a reduction in accounts payable. Total Government equity at September 30, 1977, is estimated to be \$224,967 thousand greater than that at September 30, 1976. This change includes the requested appropriation for 1977 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

Note.—Includes \$475 thousand in 1977 for activities previously financed from: Salaries and expenses (special foreign currency program). Comparable amounts in other years: 1975, \$386 thousand; 1976, \$461 thousand; and TQ, \$119 thousand. Excludes \$19,989 thousand in 1977 for administrative support activities transferred to the Department of State: Salaries and expenses, \$19,139 thousand; Acquisition, operation, and maintenance of buildings abroad, \$794 thousand; and Missions to international organizations, \$56 thousand. Comparable amounts funded under USA prior to the transfer (1975, \$14,246 thousand; 1976, \$16,581 thousand; and TQ, \$4,636 thousand) are included above.

The United States Information Agency seeks, by means of communication techniques, to influence public attitudes abroad to achieve U.S. foreign policy objectives. The Agency also advises those responsible for formulating and implementing foreign policies and programs of the probable impact of those policies on foreign opinion.

Agency operations, which are largely financed from this appropriation and from the related special foreign currency appropriation, are composed of the following major elements:

1. *Overseas missions.*—The program is operative in 111 countries. The Agency operates through 192 posts and supports 103 binational centers. The overseas missions carry out country programs designed to influence local attitudes and actions in support of U.S. foreign policy. Overseas missions prepare materials using local facilities, and use materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(a) *Press and publications service* maintains communication facilities for the transmission of editorial, news, and feature materials for adaptation by overseas missions. It produces pamphlets and periodicals in English and foreign language editions for worldwide and special-area distribution, including magazines titled, "America Illustrated," for distribution in the Soviet Union; "Topic," in French and English, for the African area; "Al Majal," in Arabic, for distribution in the Arab world; and "Horizons, USA," in English, Spanish, Polish and 13 other languages for circulation worldwide. The service also operates three regional printing centers and provides overseas missions with printing supplies and equipment.

(b) *Motion picture and television service* produces and acquires motion picture and television programs which are then translated into as many as 40 foreign languages. It adapts these programs for specific country or area use, and supports the foreign production, use, and distribution of films and television programs.

(c) *Information center service* supports U.S.-operated libraries, reading rooms, and binational centers, providing them with collections of American publications, both in English and in translation, and with English language teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to

## SALARIES AND EXPENSES—Continued

overseas missions for local display, and provides books and periodicals for presentation to selected individuals and groups.

(d) *Broadcasting service* produces radio broadcasts in English and in 35 foreign languages. Programs are broadcast from transmitters at 5 domestic and 10 overseas locations. The service also supplies the overseas missions with recorded radio programs and scripts for placement on foreign stations.

3. *Program direction and other services*.—This activity encompasses Agency managerial staffs and centralized servicing functions. Included are the Office of the Director, the Office of Policy and Plans, research, physical and personnel security, legal counsel, and central administrative services.

4. *Administrative support*.—This activity covers payments to the Department of State for administrative services for the Agency's overseas operations and certain special support services at headquarters and to the General Services Administration for rental of space and related costs at domestic locations. Beginning in 1977, it also covers payments to the Department of Defense for worldwide postal services.

<sup>1</sup> Contributions from private sources per Executive Order 11380.

The purpose of this program is to increase mutual understanding between the people of the United States and those of other lands through suitable U.S. exhibitions in international fairs and other demonstrations of American economic, social, industrial, scientific, and cultural attainments.

1. *Labor missions.*—Missions are sent to selected fairs and exhibitions abroad. There were 5 labor missions in 1975; 11 are programmed in 1976; 4 are programmed in the transition quarter; and 15 are requested for 1977.

2. *Fairs and exhibitions.*—Exhibits are shown at major international trade fairs and at special purpose exhibition programs. In 1975, six exhibits were mounted at international fairs; three exchange exhibits were reshown in Czechoslovakia, Romania, and Yugoslavia; a special bicentennial exhibit was shown in Poland; and the first exhibit under the eighth series of exchange exhibits was shown in two cities in the Soviet Union. In 1976, four exhibits will be mounted at international fairs; the first exhibit under the eighth series of exchange exhibits will complete its schedule in the Soviet Union; the second exhibit under the eighth series will be shown in three Soviet

cities; five exchange exhibits will be shown in four East European countries; development of the second exhibit under the ninth series of exchange exhibits will be started; and two special bicentennial exhibits will be shown. In the transition quarter a special bicentennial exhibit and two exchange exhibits will be shown in East Europe. The 1977 estimate provides for six trade fair exhibits; showings of exchange exhibits in five East European countries; showing of the first exhibit under the ninth series of exchange exhibits in the Soviet Union; and a special bicentennial exhibit in two East European countries.

3. *Okinawa world's fair.*—Funds were provided at \$5,600,000 in the Second Supplemental Appropriation Act of 1974 for U.S. participation in the International Ocean Exposition to be held in Okinawa, Japan, in 1976. The appropriation was increased \$20,000 by the 1975 supplemental appropriation for costs of the October 1974 Federal pay raise over the duration of the project. The fair has run from July 20, 1975, to January 18, 1976, and fiscal activities related to the project are expected to extend beyond that showing schedule for approximately 1 year.

The Regional Rail Reorganization Act of 1973 assigned to the United States Railway Association the task of preparing and implementing a system plan for restructuring and rehabilitating the bankrupt railroads of the Northeast and Midwest. The Act authorized \$40 million for the Association's administrative expenses. Legislation to remove this limitation has been proposed so that the Association can continue the implementation of the Final System Plan.

The Association submitted a final system plan to the Congress July 26, 1975, which became effective on November 9, 1975. On February 7, 1976 the Association is required to certify this plan to the special court provided in the legislation and to describe the properties being conveyed as well as the compensation proposed.

As part of the system plan, the Association proposed a new operating entity called the Consolidated Rail Corporation. This corporation will start operating the facilities designated to be conveyed to it on February 27, 1976. The Association will be responsible for providing funds to the new carrier to carry out an extensive program of rehabilitation and modernization of facilities. It will undertake a defense of the plan against legal challenges filed by the estates of the railroads in reorganization.

The Water Resources Council was established to encourage conservation, development and utilization of water and related land resources on a comprehensive and coordinated basis.

1. *Administration and coordination.*—The Council's activities include directing and coordinating comprehensive regional and river basin planning; recommending to the President needed changes in Federal policies and programs; establishing, for the approval of the President, principles, standards, and procedures for Federal water and related land resources planning; and submitting Council reports on completed plans to the President and the Congress.

2. *River basin commissions.*—River basin commissions have been established under title II of the act to coordinate Federal, State, and local plans for development of water and related land resources; to prepare comprehensive, coordinated, joint plans to make optimum use of such resources; and to recommend long-range schedules of priorities.

3. *Planning grants to States.*—Financial assistance on a matching basis has been provided to the States to stimulate their participation in water and related land resources planning.

4. *Comprehensive planning.*—The second assessment of national and regional water supplies and requirements is being accomplished through the cooperation of Federal and State agencies.

Regional or river basin plans are prepared under the direction of the Council or of appropriate river basin commissions. Participation of Federal and State agencies in these studies is coordinated through the Council.

PART II

SCHEDULES OF PERMANENT POSITIONS

---

---

## EXPLANATION OF SCHEDULES

Part II contains detailed schedules of permanent positions, which are furnished to the Congress pursuant to the Budget and Accounting Act of 1921, as amended, excluding waivers thereunder granted by Appropriations Committees.

Most civilian employees in the Federal Government are included in one of the following pay systems: Executive level, general schedule, or Foreign Service. The salary ranges for the grades in each of these systems are shown in the following tables. Pay rates for wage board positions included in the "ungraded" positions are established on the basis of prevailing rates which vary from area to area. Salary ranges shown for executive levels, general schedule (GS), and Foreign Service (FO, FR or FS) are those that became effective in October 1975, pursuant to Executive Order 11883 of October 6, 1975.

FS-10.....	7,976 to 10,370

*Note.*—In the general schedule grades and certain other positions, the pay scales shown in the schedules may be exceeded when pay rates in the private sector for comparable occupations in one or more areas or locations are substantially above the statutory rates. In such cases, the Civil Service Commission has authority to permit a higher

entrance level (not to exceed the maximum pay step prescribed by statute) and add a corresponding number of steps above the stated pay range.

The following pages display schedules of permanent positions for each of the three branches of Government. The schedules relate to positions established for full-time employment without time limit, and to any others occupied for a year or more. Authorized positions as of the end of the year are counted, whether filled or unfilled at that time; positions abolished during the year are not counted. Each schedule contains a listing of the grades of authorized positions and the total number in each grade as illustrated below:

Grades are reflected in the stub column; the most commonly used grade series, general schedule, is abbreviated "GS-...." Salary ranges are shown only when the grades are unique to a single agency or bureau (e.g., physicians and nurses schedules within the Department of Medicine and Surgery, Veterans Administration) or where a grade is identified only by title. In the latter case, the title of each grade and the basic salary range is listed. Classification systems with the same salary ranges as the general schedule are so noted. A subtotal line is shown for executive level positions as well as for each separate series of positions, whenever more than one position is shown in these categories. Two additional lines provide for deducting the number of unfilled positions to arrive at the total employment in permanent positions at the end of the year.

PART III

SUPPLEMENTALS, AMENDMENTS,  
AND RESCISSIONS

---

---

## EXPLANATION OF REQUESTS

This part contains supplemental and amended 1976 and transition quarter requests for consideration by the Congress. Also included are requests pending before the Congress to rescind enacted budget authority.

### PROPOSED AND PENDING SUPPLEMENTAL REQUESTS

Requests for supplemental appropriations are made after the regular appropriation for an account has been enacted. Supplemental requests for various program purposes, for 1976 increased pay costs, for transition quarter increased pay costs, and for general provisions are shown as separate titles, following the usual form of supplemental appropriations acts.

*Title I.*—Supplementals for various purposes other than increased pay costs are presented in full—suggested appropriation language, program and financing schedules, and the reasons for the requests—in this title when the requests are being made for the first time in this budget. For requests made prior to this budget and still pending before the Congress, the presentation included in this title does not repeat the suggested appropriation language, but does include a program and financing schedule and references to the earlier transmittal to the Congress.

*Titles II and III.*—Requests for pay supplementals in these titles include suggested appropriation language for 1976 and the transition quarter. The amounts contained

in the appropriation language also appear as separate line entries in the regular program and financing schedules in Part I.

### AMENDMENTS TO PENDING BUDGET REQUESTS

When the Congress has not completed its consideration of appropriations requested earlier—generally in the preceding budget—the amounts requested may be amended. The information on amendments included in this part—a history of the request being amended, any revisions to the suggested appropriation language, and the reasons for the amendments—explains the “Amendment transmitted herein” lines in corresponding Part I program and financing schedules.

### RECAPITULATION OF PENDING RESCISSION PROPOSALS

Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. Included in this part—for rescission proposals sent to the Congress earlier and on which action by the Congress is still pending—are program and financing schedules and references to the appropriate special messages.

These supplemental appropriations will enable the two institutions to finance nonteaching employee pay raises. These requests are in accordance with instructions from the Appropriations Committee of the U.S. House of Representatives to divorce the pay scales for nonteaching employees of these institutions from the pay scales of Federal employees.

**Department of Housing and Urban Development**

**HOUSING PROGRAMS**

**MOBILE HOME STANDARDS PROGRAM**

(Supplemental now requested, existing legislation)

For necessary expenses, not otherwise provided for, to carry out the National Mobile Home Construction and Safety Standards Act of 1974 (42 U.S.C. 5401-5426), to remain available until September 30, 1976, \$1,000,000.

This supplemental appropriation would fund contracts with private firms to enforce mobile home standards where States are currently unable to enforce these standards. The National Mobile Home Construction and Safety Standards Act of 1974 authorizes State governments to ultimately carry out the enforcement function including inspections and investigations.

**FEDERAL HOUSING ADMINISTRATION FUND**

(Supplemental now requested, existing legislation)

For reimbursement to the Federal Housing Administration Fund for losses incurred under the urban homesteading demonstration, \$5,000,000, as authorized by Section 810 of the Housing and Community Development Act of 1974 (12 U.S.C. 1706e), to remain available until expended.

This supplemental would reimburse the Federal Housing Administration fund for losses on property transferred to local governments under the urban homesteading demonstration. The Housing and Community Development Act of 1974 authorizes \$5 million in 1976 for this demonstration. The appropriation would reduce the Treasury borrowing that would otherwise be needed to support the operations of the mortgage insurance programs. Thus, the supplemental would not increase budget authority or outlays.

The Commission was established to study policies and procedures relating to the records and documents of Federal officials. Public Law 93-526 requires that its fundings and recommendations be submitted to the Congress and the President by March 31, 1976. The requested appropriation will fund the expenses of the Commission, including reimbursement to the General Services Administration, now advancing funds to the Commission.

**UNITED STATES RAILWAY ASSOCIATION**

**ADMINISTRATIVE EXPENSES**

(Supplemental pending, additional authorizing legislation required)

90 Outlays	-----	3, 900	2, 100	100

This supplemental appropriation request was transmitted to the Congress on November 13, 1975, and printed as Senate Document 94-128.

Supplemental funds are needed to finance final planning of the new rail system, documentation and other preparations associated with conveyance of bankrupt railroad assets. Funds are also needed to prepare a defense against legal challenges to the conveyance of properties and to the compensation that the Association proposes. The workload in each of these areas has turned out to be greater than originally anticipated.

**PAYMENTS FOR PURCHASE OF CONRAIL SECURITIES**

(Supplemental pending, additional authorizing legislation required)

This supplemental appropriation request was transmitted to the Congress on November 13, 1975, and printed as Senate Document 94-128.

These funds would permit the U.S. Railway Association to purchase securities of the Consolidated Rail Corporation (ConRail) on an orderly basis over a period of 5 years. ConRail, a private for-profit corporation, would in turn use these funds to cover initial operating losses and for rehabilitation of physical properties.

**TITLE IV—GENERAL PROVISIONS**

SEC. 1. Except where specifically increased or decreased elsewhere in this Act, the restrictions contained within appropriations, or provisions affecting appropriations or other funds, available during the fiscal year 1976 and the period July 1, 1976, through September 30, 1976, limiting the amounts which may be expended for personal services, or for purposes involving personal services, or amounts which may be transferred between appropriations or authorizations available for or involving such services, are hereby increased to the extent necessary to meet increased pay costs authorized by or pursuant to law.

This general provision, traditionally included in appropriation acts containing funds for increased pay costs, permits the necessary adjustments to various restrictions on the use of appropriated funds. These adjustments are limited to carrying out the increased funding approved for pay costs.

SEC. 2. None of the funds provided in Public Law 94-134 shall be available for administrative expenses in connection with obligations for interstate substitutions under 23 U.S.C. 103(e)(4) aggregating more than \$632,000,000 in fiscal year 1976 and the period ending September 30, 1976, of which not more than \$475,000,000 shall be for obligations for the Washington Metropolitan Area Transit Authority.

This general provision will be administered by the Department of Transportation and will limit the amount of obligations that may be incurred for interstate substitutions under 23 U.S.C. 103(e)(4), including amounts for the Washington, D.C. Metro system.

Amendment.....	-104, 851, 000
Revised request.....	488, 636, 000

(Delete the first paragraph under this heading and insert in lieu thereof the following:)

*For carrying out to the extent not otherwise provided, section 225, titles III, VII, VIII, and XV of the Public Health Service Act, section 1122 of the Social Security Act and section 222 of the Social Security Amendments of 1972, \$488,636,000, of which \$2,000,000 shall be available for loan guarantees and interest subsidies under Part B of title VII and shall remain available until expended: Provided, That, in addition, \$42,000 may be transferred to this appropriation, as authorized by section 201(g) of the Social Security Act, from any one or all of the trust funds referred to therein.*

This amendment eliminates the request for funds for medical facilities construction and requests lower levels for activity in health teaching facilities construction interest subsidies and overall agency management.

**MEDICAL FACILITIES GUARANTEE AND LOAN FUND**

Request pending: 1976 Budget Appendix, page 408.....	\$10, 000, 000
Amendment.....	(appropriation language)
Revised request.....	10, 000, 000

(Delete the first paragraph under this heading and insert in lieu thereof the following:)

*For carrying out Title XVI of the Public Health Service Act, \$10,000,000 shall be available without fiscal year limitation for the payment of interest subsidies. Further, the principal which may be guaranteed or which may be directly made pursuant to titles VI and XVI of the Act shall not exceed a total cumulative amount of \$1,500,000,000.*

This amendment requests a limitation on the total amount of loans which may receive Federal interest subsidies for construction of medical facilities. A nationwide excess of hospital beds exists. Ample financing from medicare, medicaid and other-third-party depreciation payors, as well as loan financing from private sources, eliminates the need for a further Federal role.

Amendment.....	-1, 092, 000
Revised request.....	5, 210, 000

## ASSISTANT SECRETARY FOR HEALTH—Continued

The conference report on H.R. 8069, the Departments of Labor and Health, Education, and Welfare and Related Agencies Appropriation Act for 1976, reduced the amount requested for the activities of the Assistant Secretary for Health. This amendment concurs with the action of Congress in reducing the appropriation levels, reflecting the ability of the Office of the Assistant Secretary to function at the lower levels.

## SOCIAL AND REHABILITATION SERVICE

## PUBLIC ASSISTANCE

1976 request pending: 1976 Budget Appendix, page 433	\$14,999,085,000
Amendment	1,979,882,000
Revised request	16,978,967,000
Transition quarter request pending: 1976 budget Appendix, page 434	3,964,682,000
Amendment	439,818,000
Revised request	4,404,500,000

These amendments provide for increased estimates of public assistance costs based on revised States' estimates for maintenance assistance, medical assistance, and social services. Increased costs are also expected because grant awards to States are no longer adjusted in advance. These adjustments were based on the assumption that State maintenance assistance programs would meet the error rate tolerance levels established under the quality control program for maintenance assistance. In addition, \$531 million in 1976 funds is needed to replace amounts used to complete 1975 requirements.

## SALARIES AND EXPENSES

1976 request pending:	
1976 Budget Appendix, page 437	\$72,775,000
S. Doc. No. 94-71	-9,414,000
Total, pending request	63,361,000
Amendment	-8,106,000
Revised request	55,255,000
Transition quarter request pending:	
1976 Budget Appendix, page 437	18,194,000
S. Doc. No. 94-71	-1,929,000
Total, pending request	16,265,000
Amendment	-1,315,000
Revised request	14,950,000

These amendments reduce this program's requested funding for 1976 and the transition quarter to take account of current staffing levels and anticipated requirements through September 30, 1976.

## ASSISTANCE TO REFUGEES IN THE UNITED STATES

1976 request pending: 1976 Budget Appendix, page 437	\$40,300,000
Amendment	44,700,000
Revised request	85,000,000
Transition quarter request pending: 1976 Budget Appendix, page 437	9,000,000
Amendment	10,000,000
Revised request	19,000,000

These amendments request funds for the continuation of this program as it currently operates. This program was originally scheduled to be phased out, beginning in 1976.

## SOCIAL SECURITY ADMINISTRATION

## PAYMENTS TO THE SOCIAL SECURITY TRUST AND OTHER FUNDS

1976 request pending: 1976 Budget Appendix, page 439	\$4,175,255,000
Amendment	-51,892,000
Revised request	4,123,363,000
Transition quarter request pending: 1976 Budget Appendix, page 439	892,000,000
Amendment	-11,060,000
Revised request	880,940,000

These amendments reflect the exclusion of the Social Security trust funds from the requirement to pay standard level user charges for space financed by the trust funds.

## SUPPLEMENTAL SECURITY INCOME PROGRAM

1976 request pending: 1976 Budget Appendix, page 441	\$5,538,523,000
Amendment	-20,000,000
Revised request	5,518,523,000
Transition quarter request pending: 1976 Budget Appendix, page 441	1,508,541,000
Amendment	-5,000,000
Revised request	1,503,541,000

These amendments reflect the need for less funds due to lower requirements for benefit payments than previously estimated.

Transition quarter request pending: Budget Appendix, page 462-----	7, 315, 000
Amendment-----	-740, 000
Revised request-----	6, 575, 000

These three amendments reflect actions taken by the Congress on the Departments of Labor and Health, Education, and Welfare, and Related Agencies Appropriation Act.

**Department of Labor**

**MANPOWER ADMINISTRATION**

PROGRAM ADMINISTRATION

1976 request pending: 1976 Budget Appendix, page 615-----	\$66, 438, 000
Amendment-----	690, 000
Amendment (increase in the limitation on ex- penditure from the Employment Security Administration account, Unemployment trust fund)-----	(120, 000)
Revised request-----	67, 128, 000

(In the first paragraph under this heading, delete "\$29,866,000" and insert in lieu thereof "\$29,986,000".)

Transition quarter request pending: 1976 Budget appendix, page 615-----	\$16, 195, 000
Amendment-----	475, 000
Amendment (increase in the limitation on ex- penditure from the Employment Security Adminis- tration account, Unemployment trust fund)---	(245, 000)
Revised request-----	16, 670, 000

(In the second paragraph under this heading, delete "\$7,377,000" and insert in lieu thereof "\$7,622,000".)

These amendments request continued funding for Federal staff activities related to emergency jobs and unemployment compensation programs. They also request increased staffing for activities related to the trade program which authorizes benefits and services to displaced workers affected as a result of trade agreements.

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND  
EMPLOYMENT SERVICES

Request pending:	
1976 Budget Appendix, page 619-----	\$74, 000, 000
H. Doc. No. 94-276 (increase in the limitation on expenditure from the Employment Security Administration account, Unemployment trust fund)-----	(364, 100, 000)
Portion of request considered in action on Public Law 94-157-----	(-364, 100, 000)
<b>Total pending request-----</b>	<b>74, 000, 000</b>
Amendment-----	2, 800, 000
Amendment (increase in the limitation on expenditure from the Employment Security Administration account, Unemployment trust fund)-----	(16, 000, 000)
Revised request-----	76, 800, 000

(In the paragraph under this heading, delete "\$995,000,000" and insert in lieu thereof "\$1,011,000,000".)

The additional amount requested provides for the continuation of current staff levels through March 31, 1976, and for an orderly phase-down of staff to the level requested for the transition quarter. This request recognizes that the proposed reduction of these staff levels and an anticipated \$21.5 million in savings resulting from productivity increases during 1976 has not been realized due to constraints imposed by the continuing resolution.

**EMPLOYMENT STANDARDS ADMINISTRATION**

**SALARIES AND EXPENSES**

<b>Total pending request.....</b>	<b>19, 929, 000</b>
Amendment.....	715, 000
<b>Revised request.....</b>	<b>20, 644, 000</b>

(In the second paragraph under this heading add a period after "Longshoremen's and Harbor Workers' Act" and delete the remainder of the paragraph.)

These proposals provide for the continued funding of the administration of the Longshoremen's and Harbor Workers' Compensation Act. Congress did not approve the proposal to fund this act by user charges assessed against the longshore industry.

**BUREAU OF LABOR STATISTICS**

**SALARIES AND EXPENSES**

1976 request pending: 1976 Budget Appendix, page 629.....	
Amendment.....	\$61, 683, 000
	3, 163, 000

<b>Total pending request.....</b>	<b>7, 781, 000</b>
Amendment.....	589, 000
<b>Revised request.....</b>	<b>8, 370, 000</b>

These amendments reflect the continued full Federal funding of the Longshoremen's and Harbor Workers' Compensation Act and the effect of congressional action on the administration of the Trade Adjustment Assistance Act.

\*Requested under Labor-Management Services Administration; acted on under Departmental Management.

**SPECIAL FOREIGN CURRENCY PROGRAM**

Request pending: 1976 Budget Appendix, page 632.....	
Amendment.....	\$200, 000
	-130, 000
<b>Revised request.....</b>	<b>70, 000</b>

This reduction is possible because of the availability of an unobligated balance from the previous fiscal year.

**Other Independent Agencies**

**COMMUNITY SERVICES ADMINISTRATION**

**COMMUNITY SERVICES PROGRAM**

1976 request pending: 1976 Budget Appendix, page 864.....	
Amendment.....	\$363, 000, 000
	60, 950, 000
<b>Revised request.....</b>	<b>423, 950, 000</b>
Transition quarter request pending: 1976 Budget Appendix, page 864.....	
Amendment.....	90, 750, 000
	2, 500, 000
<b>Revised request.....</b>	<b>93, 250, 000</b>

These amendments are necessary to conform to the obligations expected under the continuing resolution for 1976 (Public Law 94-159) through March 31, 1976. After this date, the Federal contributions for the local initiative program would be reduced to reflect the increase in the non-Federal matching rate required by Public Law 93-644. The amendments would also continue the senior opportunities and services program through September 30, 1976.

**CORPORATION FOR PUBLIC BROADCASTING**

Amendment.....	17, 500, 000
	(revised language)
<b>Revised request.....</b>	<b>17, 500, 000</b>

(Delete the heading for this account and the two following paragraphs and insert in lieu thereof:)

**PUBLIC BROADCASTING FUND**

*For payment to the Corporation for Public Broadcasting, as authorized by the Public Broadcasting Financing Act of 1975, an amount which shall be available within limitations specified by the Act, for the fiscal year 1976, \$70,000,000.*

*For payment to the Corporation for Public Broadcasting for the period July 1, 1976, through September 30, 1976, \$17,500,000.*

The proposed appropriation language replaces the prior request, transmitted in the 1976 budget, consideration of which was deferred by the Congress for lack of authorizing legislation. Authorizing legislation was enacted in December 1975.

**NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE**

**SALARIES AND EXPENSES**

1976 request pending: 1976 Budget Appendix, page 907 .....	\$502, 000

Transition quarter request pending: 1976 Budget Appendix, page 913 .....	\$775, 000
Amendment .....	75, 000
Revised request .....	850, 000

(In the paragraph immediately under this heading change the colon following "3,105,000" to a period and delete the remainder of the paragraph.)

(In the second paragraph following this heading change the colon following "775,000" to a period and delete the remainder of the paragraph.)

(In the second paragraph following this heading change the colon following "775,000" to a period and delete the remainder of the paragraph.)

These amendments reflect 100% Federal funding of the costs of arbitration of railroad grievances under section 3 of the Railway Labor Act. Congress did not act on a proposal to limit Federal funding to 75%.

**RAILROAD RETIREMENT BOARD**

**REGIONAL RAIL TRANSPORTATION PROTECTIVE ACCOUNT**

Request pending: 1976 Budget Appendix, page 924 .....	\$55, 100, 000
Amendment .....	- 17, 500, 000
Revised request .....	37, 600, 000

Due to delays in implementing this program, 1976 funding requirements have been reduced.

**Annexed Budgets**

**EXPORT-IMPORT BANK OF THE UNITED STATES**

**LIMITATION ON PROGRAM ACTIVITY**

1976 request pending: 1976 Budget Appendix, page 1059 .....	(\$6, 572, 787, 000)
Amendment (decrease in limitation) .....	(- 952, 842, 000)
Revised request .....	(5, 619, 945, 000)
<hr/>	
(In the first paragraph under this heading delete "\$3,850,000,000" and insert "\$3,000,000,000" in lieu thereof.)	
Transition quarter request pending: 1976 Budget Appendix, page 1059 .....	(1, 710, 271, 000)
Amendment (decrease in limitation) .....	(- 273, 458, 000)

<hr/>	
(In the second paragraph under this heading delete "\$976,300,000" and insert "\$737,500,000" in lieu thereof.)	

These amendments request reduced program limitations for 1976 and the transition quarter in order to conform to lower estimates of the direct loan authorizations which will be made during these periods.

**RECAPITULATION OF PENDING RESCISSION PROPOSALS**

The proposed rescissions shown below were transmitted to the Congress as four special messages from the President. As required by the Impoundment Control Act of 1974 (Public Law 93-344), each special message contained information on the reasons for and estimated effect of each proposed rescission. All special messages and their accompanying reports have been published in the Federal Register. Specific references to the appropriate volume of the Federal Register are shown below—following the program and financing schedule—for each pending rescission.

PART IV

ANNEXED BUDGETS

---

---

## EXPLANATION OF ANNEXED BUDGETS

Part IV contains detailed budgets and explanatory statements of certain activities which are not part of the budget totals, but which are made available as auxiliary information.

### ANNEXED BUDGETS OF GOVERNMENT-OWNED ACTIVITIES

Public Law 93-32 removed from the budget totals the governmental financing of rural electric and telephone systems administered by the Department of Agriculture.

The Housing and Community Development Act of 1974 removed another account from the budget totals—Housing for the elderly or handicapped—administered by the Department of Housing and Urban Development.

A wholly owned Government corporation, the Pension Benefit Guaranty Corporation, was established by the Employee Retirement Income Security Act of 1974, within the Department of Labor but outside the budget totals.

The Department of the Treasury administers three activities outside the budget totals:

The Environmental Financing Authority, created by the Federal Water Pollution Control Act Amendments of 1972; this authority expired in 1975.

The Exchange stabilization fund was established by the Gold Reserve Act of 1934 for the purpose of stabilizing the exchange value of the dollar. Since it is not practicable to forecast the transactions of the fund in gold, foreign currencies, and foreign investments, no estimates are provided for 1976 and 1977.

The Federal Financing Bank was created by the Federal Financing Bank Act of 1973 to: (1) assure coordination of Federal and federally assisted borrowing programs with the overall economic and fiscal policies of the Government, (2) reduce the cost of Federal and federally assisted borrowing from the public, and (3) assure that such borrowings are financed in a manner least disruptive to private financial markets and institutions. The bank is authorized to make commitments to purchase and sell, and to purchase and sell on terms and conditions deter-

mined by the bank, any obligation which is issued, sold, or guaranteed by a Federal agency.

The Export-Import Bank, a wholly owned Government corporation, was removed from the budget totals by the Export Expansion Act of 1971. This provision was repealed, effective in 1977, by the Export-Import amendments of 1974. Estimates for 1977 are included in Part I.

The Board of Governors of the Federal Reserve System provides its administrative budget for inclusion without further review. In conformance with its accounting system, the figures for the Board are on a calendar year basis.

The budget presentation of the Postal Service reflects its conversion to independent status consistent with the Postal Reorganization Act of 1970. The activities of the Postal Service, but not the Federal subsidy, are excluded from the budget totals and presented here.

The U.S. Railway Association, established by the Regional Rail Reorganization Act of 1973, is a Government corporation which is preparing a final Midwest and Northwest rail system plan. The loan guarantee and other financing activities of the Association are presented here, while the administrative expenses of the Association are reflected in Part I.

A new Government corporation, the Energy Independence Authority, was proposed by the President in legislation transmitted to Congress on October 10, 1975. This corporation will provide financial assistance to the private sector in development of new energy sources to make the United States independent of foreign energy sources.

### ANNEXED BUDGETS OF GOVERNMENT-SPONSORED CREDIT ENTERPRISES

This section includes a corporation to assist in financing college student loans, four systems of privately owned banks, and two privately owned corporations in the field of mortgage finance, all of which are chartered by the Federal Government and supervised by a Government agency. These budgets are not reviewed by the President, and are presented as submitted by the agencies.

### DEPARTMENT OF AGRICULTURE

#### Public enterprise funds:

##### RURAL ELECTRIFICATION ADMINISTRATION

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), as follows:

##### RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND LOAN AUTHORIZATIONS

Insured loans pursuant to the authority of section 305 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 935), shall be made as follows: rural electrification loans, [not less than] \$750,000,000, [nor more than \$900,000,000] and rural telephone loans, [not less than] \$250,000,000, to remain available until expended: *Provided*, That loans made pursuant to section 306 of that Act are in addition to these amounts, *but the additional amount of loans guaranteed in 1977 pursuant to section 306 shall not exceed \$1,506,000,000.*

【For "Rural Electrification and Telephone Revolving Fund Loan Authorizations" loans for the period July 1, 1976, through September 30, 1976, pursuant to the authority of section 305 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 935), shall be made as follows: rural electrification loans, not less than \$187,500,000 nor more than \$225,000,000, and rural telephone loans, not less than \$62,500,000, to remain available until expended: *Provided*, That loans made pursuant to section 306 of that Act are in addition to these amounts.】 (*Agriculture and Related Agencies Appropriation Act, 1976.*)

The Rural Electrification Administration conducts two capital investment programs: (1) The rural electrification program, to provide electric service to farms and other rural establishments, and (2) the rural telephone program, to furnish and improve telephone service in rural areas.

Insured electric and telephone loans are financed from the Rural Electrification and telephone revolving fund (RETRF), under the authority of the Rural Electrification Act of 1936, as amended. Insured loans bear either 2% or 5% interest in accordance with criteria as specified in the act, and must be repaid within a period not to exceed 35 years. REA also guarantees loans made by the Federal Financing Bank (FFB) and other qualified lenders at rates agreed upon by the lender and the borrower.

1. *Rural electrification.*—This capital investment program is financed through REA insured loans and guarantees of loans made by other qualified lenders for the construction and operation of generating plants, electric transmission and distribution lines or systems in rural areas.

The 1977 budget request reflects the availability of supplemental financing from the National Rural Utilities Cooperative Finance Corporation (CFC) and other sources to satisfy a part of the capital requirements of the rural electric systems. Legislation has been proposed which would correct unintended inequities in the Rural Electrification Act and allow a larger portion of electric distribution borrowers' needs to be met through supplemental sources, such as CFC.

The Rural Telephone Bank (RTB) was established by Public Law 92-12, approved May 7, 1971, which amended the Rural Electrification Act of 1936, as amended. The RTB provides a supplemental source of financing for the REA telephone program. The act, as further amended, permits the Secretary of the Treasury to purchase the Bank's debentures. This has minimized the Bank's borrowing costs. The Bank charges an interest rate based on the average cost of money to the Bank, but not less than 5% per annum. The interest rate was 6.5% for loans made in the first quarter of 1974, and 7.0% for loans made in the remainder of that year. During the first half of 1976, loans were made at 7.5% interest.

Equity capital of the Bank consists of class A stock purchased by the United States, class B and C stock purchased by Bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers, and retained earnings. The maximum budget authority of the Bank is related to its borrowing authority which by law is limited to 20 times its paid-in capital and retained earnings. 1976 total budget authority of the Bank is estimated at \$3.6 billion and for 1977, it is estimated at \$4.7 billion, comprised of \$1.1 billion in new budget authority and \$3.6 billion in unobligated authority brought forward.

Bank loans totaled \$160 million in 1974 and after 3½ years in operation, 411 loans to 323 borrowers have been approved totaling over \$557 million. Telephone Bank loans are estimated at \$180 million for 1976 and \$180 million for 1977.

Administrative support for the general operations of the Bank are provided on a part-time basis by REA employees and the Office of the General Counsel, without cost to the Bank, as provided for in the enabling legislation. Certain administrative expenses, such as expenses of the elected members of the Board of Directors, postage fees and the audit by the General Accounting Office, must be borne by the Bank. These expenses amounted to \$41 thousand in 1975 and are estimated at \$75 thousand for 1976 and 1977.

Legislation has been proposed which will eliminate the gross revenue per mile as a criteria for qualifying for 2% insured loans. The effect of this legislation would be to increase the 5% insured loans and thus increase the supplemental financing provided by the Rural Telephone Bank by about \$10 million in 1977. In addition, the legislation would allow the Bank Board to make downward, as well as upward, adjustments in the times interest earned ratio requirements of the act, thereby making it possible to more equitably use the RTB in funding total telephone loan needs.

Section 202 of the Housing Act of 1959 established a program of housing assistance to lower income persons who are elderly or handicapped. Amendments in the Housing and Community Development Act of 1974 removed these transactions from the budget after August 1974. The act also provided that the amount of loans which could be made in any given period of time would be limited to the amounts authorized in appropriation acts.

This program will provide assistance through Federal financing of housing for the elderly or handicapped. The program is limited to private nonprofit sponsors of new construction or substantially rehabilitated housing. It is anticipated that the units in these projects will receive additional assistance under the section 8 lower income housing assistance program.

Construction advances can be drawn down against the funds reserved for the long-term mortgage loan. Long-term mortgage loans will be for a maximum period of 40 years with interest rates comparable to rates on U.S. obligations. A 1% per annum allowance to cover administrative costs and probable losses will be added to this rate.

The \$375 million released for loans in 1976 and the transition period will provide financing for 16,000 units. An additional \$375 million is requested to be released for loans in 1977 to provide financing for another 16,000 units.

Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of the insufficiencies:

Financing for the revised program may be from unobligated balances carried into 1976 as well as from authorized Treasury borrowings. Treasury borrowings will not be required through 1977 since unobligated fund balances and repayments will be sufficient to fund loan disbursements and operating expenses.

## PENSION BENEFIT GUARANTY CORPORATION—Continued

Title IV of the Employee Retirement Income Security Act of 1974 (Public Law 93-406) provides for the establishment of a wholly owned Government Corporation, the Pension Benefit Guaranty Corporation. This Corporation is administered by a board of directors, the chairman being the Secretary of Labor. The Corporation's mission is to administer insurance programs to prevent the loss of pension benefits to participants if pension plans terminate without sufficient assets to pay the insured benefits, and to provide portability assistance.

*Budget program.*—The act further provides that the Corporation's budget not be included in the totals of the U.S. budget, however, it is subject to the budget and related provisions of the Government Corporation Control Act.

1. *Administration.*—To administer the basic benefits, employer's contingent liability and nonbasic benefit programs covering single and multiemployer plans, including executive direction, program development, program operations, legal support, communications, financial and management controls, and administrative support.

2. *Benefit payments.*—To pay benefits under the basic benefits, employer's contingent liability, and nonbasic benefit insurance programs.

*Financing.*—To carry out its programs, the Corporation will be self-financing and is authorized to borrow up to \$100 million from the U.S. Treasury.

*Operating results.*—The Corporation's main sources of revenue will be insurance premiums from the three programs which it collects, recoveries from employers for liabilities imposed by the act (which are credited to trust accounts), and earnings on assets of the Corporation.

The borrowings together with the sources of revenues will be used to pay the administrative costs and benefit payments.

For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury is authorized to enter into stabilization agreements, and to deal in gold and foreign exchange and other instruments of credit and securities. An exchange stabilization fund, with a capital of \$200 million (derived from the increment resulting from the reduction in the weight of the gold dollar which took place in 1934) is authorized by law for this purpose (31

U.S.C. 822a). All earnings and interest accruing are paid into this fund and are available for the purposes thereof, including expenses. Transactions in special drawing rights and U.S. holdings of SDR's are administered by this fund.

The principal sources of the fund's income have been the handling charge imposed on purchases and sales of gold for the account of the fund, profits on foreign exchange transactions, and interest on investments held by the fund. The cumulative income of the fund from the time it began operations has been \$600 million and its administrative expenses \$125 million, resulting in a net income as of June 30, 1975, of \$475 million.

It is not practicable to forecast the transactions of the fund in gold, foreign currencies, foreign investments, and the like. Therefore, no estimates have been furnished for 1976 and 1977.

The Federal financing bank (FFB) was created December 29, 1973, to assure the coordination of Federal and federally assisted borrowings from the public and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions.

The bank has become the vehicle through which most Federal agencies finance their programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and the sale of assets. The major exceptions to date are the title XI ship mortgage bonds, the federally guaranteed tax-exempt Housing and Urban Renewal notes and bonds, and the Government National Mortgage Association asset sales.

During 1975, the FFB made approximately 150 loans and advances totaling \$15.8 billion to Federal agencies and federally guaranteed borrowers. In the absence of the bank, the majority of borrowers would have issued their

**Intragovernmental funds—Continued**

**FEDERAL FINANCING BANK—Continued**

obligations in the market at a cost significantly higher than that charged by the FFB.

At the first meeting of the Board of Directors of the bank on May 23, 1974, the Board approved a policy of borrowing from the Treasury Department on an interim basis. These borrowings were to be periodically repaid by the sale of FFB securities in the market. On July 23, 1974, the Bank auctioned \$1.5 billion of 244-day Federal financing bank bills dated July 30, which matured on March 31, 1975. The cost of this borrowing by the FFB was somewhat greater than the cost to the Treasury of similar borrowings. Therefore it was decided by the Board of Directors on June 5, 1975, that rather than using the Treasury as an interim lender and the market as a permanent source of funds, the bank would borrow all funds from the Treasury Department matching the terms and conditions of its borrowings from the Treasury with the terms and conditions of its loans. The bank is currently lending funds at a rate  $\frac{1}{8}$  of 1% above the new issue rate of marketable U.S. Treasury securities of similar terms and conditions.

The Export-Import Bank of the United States was organized in 1934. Its programs are authorized under the Export-Import Bank Act of 1945, as amended. The purpose of the Bank is to aid in financing and to facilitate U.S. exports and imports.

The schedules presented herewith reflect the outlays for 1975 and through September 30, 1976, which would have been included in the budget totals if the Bank's activities had not been excluded by statute as of August 17, 1971. Beginning October 1, 1976, the Bank's receipts and disbursements will again be included in the budget totals.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

*Program.*—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

*Construction program.*—(a) *Annex office building.*—This building has essentially been completed and occupied. The proposed budget reflects some interior finishing work, exterior landscaping and certain mechanical modifications to permit more intensive use of this facility consistent with long-range space planning at the Board. An estimated \$4.3 million share of the cost of the north garage will be recovered from the Department of the Interior over the next 40 years under a 1968 agreement.

(b) *Renovation of Board building.*—A study to determine the feasibility of renovating the existing Board building has been completed. The study was directed toward an upgrade of the mechanical and electrical utility systems and more efficient utilization of interior space. The Board has approved the concept of the plan and has authorized selection of the architects to develop the plan of the work. Actual renovation would not be undertaken until mid-1976. Therefore, the costs shown above are staff estimates only, subject to review and approval by the Board. During any renovation period outside office space may be required to house dislocated employees.

*Financing.*—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The Postal Reorganization Act of 1970, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch.

The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decision of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

**Programs.**—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

**Financing.**—The activities of the U.S. Postal Service are financed from the following sources: (1) Mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital, and investment in obligations and securities.

The 1977 program for the U.S. Postal Service is based on an anticipated mail volume of 88.4 billion pieces compared to 88.0 billion estimated for 1976 and 89.3 billion for 1975.

Since 1973, transactions of the Postal Service fund and the assets and liabilities of the U.S. Postal Service no longer appear within the totals of the U.S. budget. The schedules presented here reflect summary data on postal operations.

Section 2005 of the Postal Reorganization Act authorizes borrowing authority of \$10 billion with a yearly limitation of \$2 billion, of which not more than \$500 million may be used to cover operating expenses. As of September 30, 1977, it is expected that debts outstanding pursuant to this borrowing authority will amount to \$4.9 billion.

**Operating.**—Estimated receipts will total \$14.4 billion in 1977. This includes \$12.9 billion from mail and service revenue, \$47.8 million from investment income, \$1.5 billion from appropriations including \$54.1 million to cover unfunded liabilities of the Post Office Department, and miscellaneous other income of \$20.6 million.

The 1977 projected revenue and operating receipts will not cover the estimated expense of processing 88.4 billion pieces of mail, resulting in a deficit of \$1,055.6 million. Recovery of accumulated (1972 through 1977) prior year losses will require an additional \$666.6 million in future annual revenues when amortized over a 7-year period.

<sup>1</sup> Cash for 1974 and 1975 has been certified by public auditors as being correct. The Treasury Department's combined statement reflects a preliminary cash balance with a difference of \$9,333,750 from the audited statement.

<sup>2</sup> Workmen's compensation amounts reported for 1974 through 1977 are being funded through the operations process (for post-June 30, 1971, injuries). The amounts reported for workmen's compensation under the other liabilities section of the balance sheet show full accrued costs for injuries in the year in which they occur.

The United States Railway Association was created by the Regional Rail Reorganization Act of 1973 to plan and implement a system for restructuring and rehabilitating rail services in the northeast and midwest regions of the Nation. The act includes two major loan guarantee financing provisions as follows:

1. *Loans for maintenance and improvement of plant.*—Section 215 of the act authorizes \$300 million to assist railroads in reorganization in maintaining and improving railroad facilities and equipment during the planning period. Section 215 funds will all be expended during 1976 and the authority will also expire. The entire amount will be borrowed from the Federal Financing Bank and guaranteed by the Secretary of Transportation. As the final system plan moves into the implementation phase, the major new carrier being created, the Consolidated Rail Corporation (ConRail), will assume obligations amounting to \$64 million. The remaining ConRail obligations would be forgiven as contemplated in the final system plan and the Federal Financing Bank would be repaid by an appropriation to the Secretary of Transportation.

2. *Loans related to implementation of the system plan.*—Section 210 of the act authorizes the Association to issue obligations in amounts that do not exceed \$1,500 million outstanding at any one time, in addition to the section 215 funds mentioned above. These funds are to be used to make loans to the Consolidated Rail Corporation, and other eligible railroads for the purpose of implementing a system plan for restructuring the rail services of the Northeast and Midwest. Only one loan amounting to \$19 million has been approved thus far using this authority and only \$8.9 million has been disbursed. During the current year preconveyance and working capital loans amounting to \$230 million will be made to ConRail but will also be repaid by the end of the fiscal year. Legislation has been proposed to reduce the amount of this authority.

The Energy Independence Authority (EIA) is a proposed new \$100 billion Government corporation to help achieve energy independence for the United States by providing loans, loan guarantees, price guarantees, or other financial assistance to private sector energy projects. The President submitted legislation to the Congress to create EIA on October 10, 1975.

EIA will have authorized capital stock of \$25 billion and the authority to issue and to have outstanding at any one time notes, debentures, bonds or other obligations of \$75 billion. The \$25 billion of equity will be subject to the appropriation process and requested incre-

mentally as needed; the \$75 billion in borrowing authority will be requested initially as a one-time congressional authorization without any further need of congressional appropriations.

In 1977, it is anticipated that EIA will use up to \$10 billion of its financial authority. The bulk of the authority

used will be in the form of loans and loan guarantees. The above schedule shows only those items incurred as obligations by EIA, but does not include loan or price guarantee authority which is treated as a contingent, rather than an incurred, liability for budget purposes.

The EIA will have a legislated life of 10 years, with new financial commitments permitted only in the first 7 years of its existence.

The Student Loan Marketing Association (SLMA), a Government-sponsored, private corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to banks, educational institutions, and other lenders engaged in the guaranteed student loan program.

To date, SLMA has provided liquidity through direct purchase of insured student loans from eligible lenders and by making warehousing advances, secured by insured student loans, to eligible lenders. Proceeds from warehousing advances are required to be invested in additional insured student loans.

**Operations.**—By December 1975, SLMA expected to have outstanding \$237,500 thousand in warehousing advances. It is expected that volume under this program will reach a level of \$238,407 thousand by June 1976, with additional growth in 1977. In 1975, SLMA expanded its

loan purchase program to a level of \$12,374 thousand. SLMA expects to purchase \$150,462 thousand in loans in 1976 and \$331,992 thousand in 1977, to a level of \$494,828 thousand as of September 1977.

**Financing.**—To obtain funds for its programs, SLMA is authorized, with the approval of the Secretary of Health, Education, and Welfare and the Secretary of the Treasury, to issue its own debt obligations. The Secretary of HEW is authorized by the Education Amendments of 1972 to guarantee as to principal and interest such obligations issued prior to July 1, 1982, regardless of maturity date. During 1975, SLMA refinanced its \$100 million in outstanding debt obligations to the Federal Financing Bank as of June 30, 1974, and issued another \$140 million in additional debt obligations for a total outstanding debt obligation to the Federal Financing Bank of \$240 million as of June 30, 1975. SLMA expects to continue selling guaranteed debt obligations to the Federal Financing Bank in the future.

The Corporation is authorized to issue common stock to qualified educational and financial institutions and raised \$24.5 million less issuance costs of \$635,257, or a net of \$23.9 million by June 1974.

**Management.**—In April 1975, the stockholders of SLMA elected a board of directors. The shareholders of SLMA were entitled to elect 14 members to the Board following a statutory determination by the President of the United States in January 1975, that sufficient common stock of the Corporation had been purchased to warrant an election of 14 directors. Pursuant to the Education Amendments of 1972, the President continues to appoint the remaining 7 members of the 21-member Board, as well as designating the Chairman of the Board. The President appointed 7 directors in April 1975.

The forecast data with respect to operations are based on certain specific assumptions by management, including the continued successful development, implementation, and financing of authorized programs. The Board of Directors has not yet reviewed or approved these financial estimates. Accordingly, such data should not be relied upon as an official forecast of the Corporation's future business.

The Federal National Mortgage Association (FNMA) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

To carry out this purpose, FNMA buys mortgages insured by the Federal Housing Administration or guaranteed by the Veterans' Administration, conventional mortgages, and certain mortgages insured by the Farmers Home Administration.

The Emergency Home Finance Act of 1970 empowered FNMA, with the approval of the Secretary of HUD, to purchase, service, lend on the security of, and otherwise invest in conventional mortgages. FNMA acts to minimize the possible additional risk involved in purchasing conventional mortgages by applying strict qualifications to such purchases.

The authorizing statute, the Housing Act of 1954, originally contemplated that FNMA's secondary market operations would ultimately be completely owned and financed by private participants. On September 30, 1968, pursuant to the Housing and Urban Development Act of 1968, FNMA was converted to a Government-sponsored, privately owned corporation whose expenditures and receipts are not reflected in the Federal Budget.

The common stock of the Corporation is owned by the public and is fully transferable and fully traded. The Corporation may accumulate funds for its capital surplus account from private sources by requiring each mortgage seller to make payments of nonrefundable capital contributions, equal to not more than 2% of the unpaid principal amounts of mortgages purchased or to be purchased by the Corporation from such seller.

The Association has three separate authorities to borrow money from private sources. It may issue subordinated capital debentures in an amount not in excess of twice the net equity. It may in addition borrow amounts not in excess of the sum of net equity and subordinated capital debentures outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 25. These borrowings usually take the form of debentures, short-term discount notes, or bank loans. Finally, FNMA may issue securities, guaranteed by the Government National Mortgage Association, which are fully backed by pools of mortgages. This last type of borrowing is limited only by the size of FNMA's loan portfolio.

The banks for cooperatives, of which there are 13, are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds which the banks issue are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971.

The banks for cooperatives will continue to operate in their normal manner during the budget transition period from a June 30 to a September 30 fiscal year.

The Federal intermediate credit banks, of which there are 12, are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to, local financing institutions, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks became mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971.

The Federal intermediate credit banks will continue to operate in their normal manner during the budget transition period from a June 30 to September 30 fiscal year.

The Federal land banks, through the 552 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The Federal land banks presently operate under authorities contained in title I of the Farm Credit Act of 1971.

The Federal land banks will continue to operate in their normal manner during the budget transition period from a July 1-June 30 fiscal year to an October 1-September 30 fiscal year.

The 12 Federal home loan banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings-and-loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board, and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1975, the banks extended credit amounting to \$8.8 billion and received repayments of \$9.6 billion. Advances outstanding on June 30, 1975, totaled \$16.8 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On June 30, 1975, \$19.4 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined by Board policy (with total deposits amounting to \$2.8 billion on June 30, 1975) and funds paid for the purchase of capital stock by member institutions, amounting to \$2.7 billion at the end of 1975. Funds not immediately used for advances to members are invested until needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951.

The operating expenses of the banks are paid from their own income and are not included in the Budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to

The Federal Home Loan Mortgage Corporation (a federally chartered corporation) was organized on July 24, 1970, under the Emergency Home Finance Act of 1970. The act exempts the Corporation from all taxation by the United States or by any State, county, municipality, or local taxing authority, except for real property taxes. The Corporation is under the direction of a Board of Directors composed of the members of the Federal Home Loan Bank Board. The Corporation purchases, sells, and otherwise deals in mortgages on residential properties. The Corporation's capital stock was issued, at par, to the Federal home loan banks; the stock is nonvoting and non-transferable, and its ownership is restricted to the Federal home loan banks.

## EXPLANATION OF OTHER MATERIALS

This section includes the following material required by section 601 of the Congressional Budget Act of 1974:

(a) a list of advance appropriations requested in this budget for 1978, together with a list of all accounts for which 1978 advance appropriations are authorized; and

(b) a statement of amendments and revisions to 1976 budget authority requests which were transmitted to the

Congress after the 1976 budget but prior to the transmittal of the 1977 Budget.

Also included in this section is a table that presents disbursements, repayments, and net outlays for direct loans. Loan disbursements are reported net of loans written off and other noncash adjustments to balances outstanding. Loan repayments are collections of principal only; interest is excluded.

## ADVANCE APPROPRIATIONS FOR 1978

Section 601(h) of the Congressional Budget Act of 1974 (Public Law 93-344) requires inclusion in the budget of: ". . . information with respect to estimates of appropriations for the next succeeding fiscal year for grants, contracts, or other payments under any program for which there is an authorization of appropriations for such succeeding fiscal year and such appropriations are authorized to be included in an appropriation act for the fiscal year preceding the fiscal year in which the appropriation is to be available for obligation."

In fulfillment of this requirement, the following table lists those accounts authorized to receive, in fiscal year 1977, advance appropriations for fiscal year 1978. The listing is in two parts. Section I shows the amounts of advance 1978 appropriations being requested in the 1977 budget. Section II is a listing of accounts for which no advance 1978 appropriations are requested in the 1977 budget, although such advance appropriations are authorized.

## STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR FISCAL YEAR 1976

(Between the Transmittal of the 1976 and 1977 Budgets)

Section 601 of the Congressional Budget Act of 1974 (Public Law 93-344) amends section 201 of the Budget and Accounting Act, 1921, by adding new requirements. One of the new requirements is that the President's annual budget, or the supporting detail transmitted in connection with it, shall include a statement—for the fiscal year in progress and using the preceding annual budget as a base—of . . . "all amendments to or revisions in budget authority requested" . . . that are made before the date the President's annual budget is transmitted to the Congress. (See sec. 601(g).) The listing below is submitted in fulfillment of this new requirement.

Regular 1976 budget authority requests were transmitted in the 1976 Budget. Changes to those requests are included in this 1977 Budget, and other changes were requested earlier—after the transmittal of the 1976

Budget and before transmittal of this budget. Requests for change took three forms. If the Congress had not yet acted on a pending request, the President sent *amendments* to his budget requests. If appropriations had been enacted, the President proposed either *supplemental* budget authority or *rescission* of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are shown in Part A of the following listing. The President's proposals for rescissions are included in his special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the volumes of the Federal Register cited in Part B of the following listing.
