96-9921-0-2-999			
Maintenance and operation of dams and other improvements of navigable waters.....	1,357	7,237	1,350
Payments to States .....	4,656	6,134	5,202

1. *Hydraulic mining in California, debris fund.*—Fees paid by mine operators in the Sacramento and San Joaquin basins for depositing mine debris in restraining works, are used for their maintenance.

2. *Maintenance and operation of dams and other improvements of navigable waters.*—License fees are levied by the Federal Power Commission for private construction, operation, and maintenance of dams, conduits, and reservoirs. Half of the fees collected are used for maintenance and operation of Federal dams and other navigation structures, and for improvement of navigable waters.

3. *Payments to States.*—Three-fourths of the money received from lease of Federal lands acquired for flood control, navigation, and allied purposes is paid to the State in which such property is situated for public schools, roads, or other expenses of county government.

The Alaska Hydroelectric Power Development Fund was established by the Alaska Hydroelectric Power Development Act (sec. 203, Public Law 94-587) to develop hydroelectric power generation projects in Alaska. The fund consists of Federal and non-Federal moneys deposited in the fund.

The act permits the use of funds for the Phase I stage of engineering and design of projects that meet the

environmental, benefit output, and financial requirements set forth in section 203 (a)(2) and (e) of the act. Institutional arrangements that would permit use of the fund have not been developed.

**Intragovernmental funds:**

**REVOLVING FUND**

For the design and construction of hopper dredges, [and the purchase of one aircraft for replacement only, \$46,000,000] \$50,000,000, to remain available until expended.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

Intragovernmental funds—Continued

REVOLVING FUND—Continued

The fund provides for the acquisition, operation, and maintenance of plant and equipment used in civil works functions, for temporary financing of services chargeable to civil appropriations and for furnishing facilities and services for military functions of the Department of the Army, other governmental and private persons (33 U.S.C. 576).

**Budget program—Operating costs.**—Operating costs include plant operations, warehousing, shops and facilities performing common services, and general administrative services including payrolls. Operating costs will increase about 10% in 1980.

1. **Land and structures.**—The 1980 program includes \$8.48 million for the design, rehabilitation, and construction of structures for use by Rock Island and Norfolk district headquarters, Waterways Experiment Station, and design of the Water Resources Building, Fort Belvoir.

2. **Dredges.**—The 1980 program includes \$70.13 million for the design, construction, and rehabilitation of the Corps of Engineers hopper dredges as follows: \$67.3 million for the construction of the large, medium, and small class hopper dredges; \$2.06 million for rehabilitation of the quarters on the dredge *Biddle*; \$0.52 million for direct pumpout for the dredge *Hyde*.

3. **Other floating plant.**—The 1980 program includes

\$12.58 million for design, rehabilitation, and construction of major items of floating plant for use by various Corps of Engineers districts.

4. **Land-based equipment.**—The 1980 program includes \$4.5 million to purchase ADP equipment.

5. **Tools, office furniture, and equipment.**—The 1980 program includes \$1.71 million for a variety of relatively small tools, office furniture, and equipment.

**Financial condition.**—Capital (Government equity) of the fund amounted to \$334.4 million on September 30, 1978, and was limited to \$351.6 million by the Public Works for Water and Power Development and Energy Research Appropriation Act, 1978. Effective with 1979 the capital limitation was replaced by a limitation on total accrued expenditure of the capital investment program. The limitation for 1980 is estimated at \$115.0 million. Capital was increased by net earnings of \$29.7 million in 1978. Increases are principally due to earnings reserved for plant replacement which are wholly reinvested in assets. Capital of the fund is expected to reach \$412.5 million at the end of 1979 and \$498.6 million at the end of 1980.

**Consolidated summary of personnel.**—The revolving fund is used to initially finance all payrolls of the Corps of Engineers—Civil.

The table which follows shows the distribution of personnel and salary costs to appropriations of the Corps of Engineers and to other accounts:

CONSOLIDATED SUMMARY OF PERSONNEL

The U.S. Soldiers' and Airmen's Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain retired soldiers of the Regular Army and airmen of the Air Force. Funds for operation and maintenance of the Home are appropriated from the Soldiers' and Airmen's home permanent fund (trust fund) and not from the general funds of the Treasury.

The daily average number of members receiving domiciliary and hospital care are shown below:

The Panama Canal Treaty of 1977 defines a new agency, the Panama Canal Commission, as the successor agency to the existing Panama Canal Company—Canal Zone Government organization. The Panama Canal Commission will operate and maintain the waterway. Many functions now performed by the present organization will either be discontinued or transferred to private or governmental agencies in the Republic of Panama or to other U.S. Government agencies. Legislation is being proposed to implement the new treaty on the anticipated effective date of October 1, 1979. Accordingly, no appropriations are requested for the Canal Zone Government for 1980. However, remaining balances in the account will be outlaid in 1980 under the administration of the Panama Canal Commission.

The program activities listed in the above schedule will continue through September 30, 1979, at which time the agency known as the Canal Zone Government will cease to exist. All regular operating expenses of the Canal Zone Government incurred through September 30, 1979, including depreciation and other nonfund expenses, will be recovered from individuals and agencies served and from the Panama Canal Company. The following paragraphs summarize the disposition of Canal Zone Government activities under the treaty.

1. *Civil functions—Postal service.*—The Canal Zone postal system, which now serves the entire Canal Zone and operates under policies and regulations generally similar to those of the U.S. Postal Service, will cease to function on September 30, 1979. Postal service to the Panama Canal Commission and its eligible employees and their dependents will be provided by the Department of Defense.

*Police protection.*—For a 30-month period beginning October 1, 1979, jurisdiction will be limited to U.S. citizen employees of the Panama Canal Commission and their dependents, and members of the U.S. Armed Forces, their civilian components and their dependents, for criminal offenses committed within Canal operating and housing areas, defense sites, areas of military coordination, and the ports of Cristobal and Balboa.

**Fire protection.**—Through 1979, all firefighting facilities, except for certain aircraft crash fires, will remain under the Canal Zone Government. Fire protection under the new treaty will be generally limited to Panama Canal Commission and U.S. military areas.

**Judicial system.**—For a 30-month period after entry into force of the new treaty, jurisdiction will be limited to U.S. citizen employees of the Panama Canal Commission and their dependents, and members of the U.S. Armed Forces, their civilian components and their dependents, for criminal offenses committed within Canal operating and housing areas, defense sites, areas of military coordination, and the ports of Cristobal and Balboa.

**Education, libraries.**—This activity, with the exception of public libraries, is scheduled to be transferred to the Department of Defense on October 1, 1979.

**Public areas and facilities.**—The scope of operations for this activity will be significantly reduced and performed by the Panama Canal Commission as of October 1, 1979.

**Internal security.**—This activity, which provides for loyalty investigations and security services, will continue, but at a reduced scope to serve the Panama Canal Commission under the new treaty.

**2. Health and sanitation—Hospitals and clinics.**—Upon entry into force of the treaty, the hospitals and clinics, except the leprosarium, will be operated by the Department of Defense. The leprosarium will be the responsibility of Panama.

**Other public health services.**—For the newly established Panama Canal Commission, sanitation and industrial health operations will continue in the Canal operating and housing areas.

**3. General government expenses—Office of the Governor.**—The office of the Governor will be discontinued along with the Canal Zone Government on October 1, 1979. Certain expenses which will continue in 1980 will be borne by the Panama Canal Commission.

**Other general government expenses.**—For the Canal Zone Government, this includes the costs of recruitment, repatriation, and employees' home leave travel, aid to indigents, payments to certain former employees, and other general charges. Such expenses that do pertain in 1980 will be borne by the Panama Canal Commission.

Panama Canal Commission fund .....	145

This appropriation provides for the acquisition by purchase, construction, or otherwise of capital assets required by the Canal Zone Government. In 1979, the appropriation includes: (1) improvements and replacements to educational facilities and municipal systems; (2) improvements to roads and streets; (3) improvements and rehabilitation of health facilities that provide for the correction of structural deficiencies at Gorgas Hospital; (4) improvements and replacements to police and fire facilities; and (5) the addition and replacement of obsolete and worn-out equipment. Under the terms of the new treaty, certain of these programs will be assumed by the Panama Canal Commission, others by the Department of Defense. Related fund balances at year end 1979, if any, will transfer to the receiving agency.

Operation and maintenance, Army.....	3,389
Panama Canal Commission.....	315,402

The Panama Canal Treaty of 1977 designates the Panama Canal Commission as the successor agency in 1980 to the Panama Canal Company and Canal Zone Government. Legislation is being proposed to establish the Panama Canal Commission as a wholly owned U.S. Government corporation which will operate generally as the Company has operated since its inception in 1950. The primary purpose of the Panama Canal Commission will be to operate and maintain the inter-oceanic waterway. The Commission is expected to be financially self-sufficient in its operation and to make payments to the Republic of Panama as specified in the Treaty of 1977. The net operating result for the Panama Canal Company for 1979 is estimated to be a margin of \$8.3 million. Fund balances, other assets, and remaining liabilities of the Company will be transferred to the Commission.

Note.—The amounts shown for transfers are based upon the June 30, 1977, net book values of fixed assets assumed to be transferred. The amounts are subject to change due to retirements, additions, and depreciation since that date and possible deletions and additions to the fixed assets scheduled for transfer.

The Company accounts for 1978 are under examination by the U.S. General Accounting Office, and this statement of financial condition is subject to revision pursuant to the auditor's findings.

Contingent liabilities and commitments.—The estimated maximum liability, in addition to liabilities taken into the accounts, which could result from pending claims and lawsuits was \$6.9 million at September 30, 1978. In the opinion of management and Company counsel, these pending claims and lawsuits will be resolved with no material adverse effect on the financial condition of the corporation.

Commitments under uncompleted construction contracts and unfilled purchase orders amounted to \$21.6 million at September 30, 1978. Of this amount, \$0.7 million in unfilled purchase orders were prepaid. In addition, the Panama Canal Company is liable for an indeterminate amount with respect to death and disability payments under the Federal Employees' Compensation Act.

The Company held as custodian negotiable Government securities in the face amount of \$7.2 million at September 30, 1978, to guarantee payment by third parties of their obligations.

Effective May 9, 1969, the Company entered into a 25-year contract with the Instituto de Recursos Hidraulicos y Electrificación, an autonomous agency of the Republic of Panama, for the purchase of electric power to be produced by that agency effective September 1, 1972 through December 31, 1976, by mutual agreement, the contract was suspended for a period of 4 years and 4 months. As of September 30, 1978, the Company's minimum liability over the remaining period of the contract amounted to approximately \$66.5 million.

On September 7, 1977, the President of the United States and the Chief of Government of the Republic of Panama signed the Panama Canal Treaty of 1977 and a Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal. The

Public enterprise funds—Continued

**[PANAMA CANAL COMPANY]—Continued**  
CORPORATION—Continued

Treaties have been ratified in accordance with the constitutional procedures of the United States and the Republic of Panama and will enter into force six calendar months from the date of the exchange of the instruments of ratification which shall not be effective earlier than March 31, 1979, unless legislation necessary to implement the provisions of the Panama Canal Treaty shall have been enacted by the Congress of the United States of America before March 31, 1979. These treaties will terminate all existing treaties between the two countries pertaining to the Panama Canal and produce major changes in the civil authority and the organization, scope of activities, and ownership of property of the Panama Canal enterprise. The impact of legislation to be passed, as well as various administrative decisions to be made relative to these treaties, is still unknown.

Until the treaties enter into force, the Panama Canal Company will continue to operate without material changes in the scope of its activities. These financial statements, therefore, do not purport to reflect the effect of the treaties or related legislation and administrative decisions on the assets, liabilities, investment of the United States Government, or the operating results of the Panama Canal Company.

**[MISCELLANEOUS ACCOUNTS]**

**WILDLIFE CONSERVATION, MILITARY RESERVATIONS**

These appropriations provide for a program of development and conservation of fish and wildlife and the development of recreational facilities on military reservations. The proceeds from the sale of fishing and hunting permits have been and will continue to be used for these programs on the 35 Army, 19 Navy, and 27 Air Force bases charging such fees. An appropriation of \$1.5 million is also being requested in 1980. These programs are carried out through cooperative plans agreed upon by the local representatives of the Secretary of Defense, the Secretary of the Interior, and the appropriate agency of the State in which the reservation is located.

Federal Funds

General and special funds:

WILDLIFE CONSERVATION, ARMY

For expenses necessary to carry out a program of development and conservation of fish and wildlife, and the development of recreational facilities on military reservations, pursuant to sections 670a-670f of title 16, United States Code; \$700,000.

1. *Inertial confinement fusion.*—The objective of this program is to develop and demonstrate inertial confinement fusion in order to utilize it as an aid in nuclear weapons development, testing, and simulation, and as a potential inexhaustible energy source.

In 1980 the program will maintain the basic theoretical and experimental fusion program. The pace will be maintained toward demonstrating significant weapons technology applications and includes a limited effort on advanced technology.

2. *Naval reactor development.*—This program provides for the design, development, and testing of improved naval nuclear propulsion plants and reactor cores having longer fuel life, increased reliability, improved performance, and simplified operating and maintenance requirements. These reactors are necessary to meet a variety of military requirements. During 1980 efforts will continue on improving existing submarine and surface ship reactor cores and plant technology, and on developing new advanced reactor concepts and propulsion plants including the completion of the acceptance test for the Trident land prototype reactor plant.

3. *Weapons activities.*—This program provides for the development, testing, and manufacturing of all U.S. nuclear weapons, maintenance of reliable weapons for their stockpile life, and disassembly and disposal of nuclear weapons designated for retirement. In 1980 the research, development, and testing program will continue to provide new technology to maintain a modern nuclear force, design and development of new weapon systems in response to defense requirements, certification of safety, reliability, and performance of new weapon systems and surveillance of the existing stockpile. Increases are provided for continued production of weapon systems as well as initiation of production on several new systems.

4. *Verification and control technology.*—This program provides for the conduct of activities directed toward

General and special funds—Continued

ATOMIC ENERGY DEFENSE ACTIVITIES, OPERATING EXPENSES—Continued

the advancement of verification and control technology related to nuclear treaties, data collection, and processing. The 1980 program provides for continued verification efforts on the comprehensive test ban and limited test ban treaties. The intelligence activities relate to comprehensive test ban and nonproliferation issues.

5. *Materials production.*—This program provides for the production of special nuclear materials to meet weapons production requirements. The 1980 estimate provides for operation of N reactor at Richland and for operation of three production reactors at Savannah River at reduced levels. Chemical reprocessing operations, process development, and supporting services will continue at a minimum level in 1980.

6. *Defense nuclear waste.*—This program provides for the interim storage of nuclear generated waste, and the development and demonstration of technologies to implement long-term waste disposal options. The 1980 program provides for continuation of the waste operations program with expanded effort on waste management research and development and continued transfer of wastes to new tanks.

7. *Nuclear materials security and safeguards.*—The goal of the program is to deter and prevent malevolent acts involving domestic nuclear materials and facilities and to support U.S. nonproliferation initiatives and International Atomic Energy Agency safeguards efforts. The 1980 program will allow continued support of safeguards responsibilities and nonproliferation policy supports.

ATOMIC ENERGY DEFENSE ACTIVITIES, PLANT AND CAPITAL EQUIPMENT\*

\*See Part III for additional information.

For expenses of the Department of Energy in connection with the purchase, construction and acquisition of plant and capital equipment and other expenses incidental thereto necessary for atomic energy defense activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 264 of which 254 are for replacement only) including 3 police type vehicles; \$627,924,000, to remain available until expended.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928); additional authorizing legislation to be proposed.

1. *Inertial confinement fusion.* This program will continue the construction of the Antares CO2 gas laser facility at the Los Alamos Scientific Laboratory in New

Mexico and the NOVA glass laser facility at the Lawrence Livermore Laboratory in California. These facilities will permit the investigation of the fusion physics necessary to determine the technical feasibility of employing the ICF process as an energy source.

2. *Naval reactor development.* This program continues test facility upgrading and provides equipment for ongoing reactor design and testing activities.

3. *Weapons activities.* This program provides for facility and equipment maintenance and restoration for the weapons R. & D. and weapons production activities.

4. *Verification and control technology.* This program provides capital equipment for intelligence and verification needs.

5. *Materials production.* This program provides for maintenance and restoration of the nuclear materials production physical plant, and for continuation of construction on a facility to process a variety of irradiated defense fuels.

6. *Defense nuclear waste.* This program includes the construction, maintenance, and upgrade of facilities providing interim storage for defense wastes. In addition, partial funding is provided for design of an underground facility in southeastern New Mexico for the permanent storage of defense transuranic wastes and high level waste experiments.

7. *Nuclear materials security and safeguards.* This program provides equipment supporting ongoing safeguards operations.

1. *Life sciences research and biomedical applications.*—This program includes two major activities: General life science research and biomedical applications research. Research in this program provides: (1) The fundamental basis for understanding the normal structure and functions of living organisms at all levels of biological organization; (2) the biological mechanism involved in pollutant damage and repair; and (3) new information on novel uses of radiation, radioactive and high priority stable isotopes for diagnosis and treatment of human disease.

2. *High energy physics.*—In this program studies are conducted of the fundamental building blocks of matter and the fundamental forces of nature in an attempt to understand more fully the relationships and transformations between energy and matter. The method of achieving the program objectives involves the use of large accelerator facilities to provide various types of high-energy particle beams and the use of sophisticated detection and analysis apparatus to study the particle interactions. In 1980 these facilities will be used to continue efforts to exploit recent major theoretical and experimental advances.

3. *Nuclear physics.*—This program is concerned with attaining a deeper understanding of the interactions, structure, and properties of nuclei through experimental medium energy and heavy ion nuclear research and theoretical investigations. Plans for 1980 include: investigations of charge and momentum distribution of nucleons bound in nuclei; the role of nucleon resonances in the structure and interactions of nuclei; the fundamental nucleon-nucleon interaction; and nuclear matter (including possible abnormal density states) under extreme conditions of excitation.

1. *Life sciences research and biomedical applications.*—Equipment will be provided in 1980 for radioisotope studies.

2. *High energy physics.*—In order to attain the objectives of this program, funds are requested in 1980 to continue the intersecting storage accelerator Isabelle at Brookhaven National Laboratory and the energy saver project at the Fermi National Laboratory. These facilities will be used to continue efforts to exploit recent major theoretical and experimental advances.

3. *Nuclear physics.*—In 1980 new equipment will be provided for two new experimental areas—one at the Holifield Heavy Ion Facility and one at Bates Linear Accelerator. Three new construction projects—at Bates, at the Clinton P. Anderson Meson Physics Facility, and at the Michigan State University Heavy Ion Accelerator—will be initiated.

The purpose of energy supply—research and technology development is to develop new energy technologies and improve the efficiency of existing energy technologies. Included in this mission are efforts associated with basic research, technology development, engineering development, and demonstration.

The overall goal of these solar programs is to help develop solar systems that are economically attractive and environmentally acceptable.

1. *Solar applications.*—For solar applications in 1980 principal objectives are to help accelerate the use of solar energy for cooling, passive solar for buildings, industrial processes, and agricultural purposes.

2. *Solar technology.*—For solar technology development in 1980, major emphasis will be placed on conducting R. & D. on technologies which collect and convert solar energy to electrical energy including solar thermal, photovoltaics, and wind systems for dispersed and central power generation.

3. *Biomass and other.*—Technology development is underway to develop clean fuels from biomass. Specific areas of concentration include fermentation, anaerobic

digestion and thermochemical conversion, including direct combustion. Production, collection and harvesting technologies are also being developed in cooperation with other related Federal agricultural activities.

Additional Department of Energy solar and biomass efforts are funded in the basic energy sciences, and technical assessment project's activities in this appropriation; in the energy supply—plant and capital equipment appropriation, and in the energy production appropriation.

4. *Nuclear fission.*—Nuclear fission includes the fission converter commercial waste management, spent fuel disposition, advanced nuclear systems, and the fission breeder programs.

The fission converter program includes four subprograms: light water reactor technology, fuel cycle R. & D. development of proliferation resistant fuels, and an international high temperature gas-cooled reactor.

Research and development will continue on: improving the efficiency and safety of light water reactors by increasing uranium utilization, reducing occupational radiation exposure and developing improved safety systems: increasing the energy economically recoverable from uranium through advanced methods of isotope separation, making efficient use of natural resources and protecting the environment; and determining the technical feasibility and economic potential of several advanced reactor and fuel cycle systems based on the results of the nonproliferation alternative systems assessment program.

The commercial waste management program is directed toward providing the facilities and technology necessary to meet all applicable safety and environmental requirements for the long-term management of nuclear waste from commercial sources. The 1980 budget increases significantly development of technology on various geologic media suitable for use as long term disposal sites. Efforts will also be conducted to identify the site for the first deep geologic disposal facility.

The spent fuel disposition program supports the President's spent fuel storage policy announced in October 1977 to accept and take title to U.S. commercial spent nuclear fuel and a limited amount of foreign fuel in support of the Government's nonproliferation policy. The 1980 efforts in domestic spent fuel storage are aimed at providing adequate storage capacity by 1983, assuming passage of the necessary legislation to enable DOE to contract for storage services and collect revenues sufficient to cover storage and disposal expenses. The 1980 international efforts are directed toward studies, assessments, and development of technology to assist other countries in spent fuel storage as a credible alternative to reprocessing.

The advanced nuclear systems program is directed toward assessing and developing technologies which can create nuclear energy choices and enhance the favorable impact of nuclear energy on our national needs. In the advanced systems evaluation activity, studies are being conducted as part of the nonproliferation alternative systems assessment program (NASAP) and the international nuclear fuel cycle evaluation (INFCE) program, which examine the economic, technical, environmental, and nonproliferation impacts of the various fis-

## General and special funds—Continued

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT—OPERATING  
EXPENSES—Continued

sion options. In space applications, efforts will continue to improve the design and development of nuclear power systems for space applications in support of future NASA and DOD missions.

The fission breeder program includes liquid metal, water-cooled, and gas-cooled breeders along with test facilities. The goal of the liquid metal breeder reactor program is to maintain the option for greatly improved uranium and/or thorium resources utilization for electricity production. This will be accomplished by establishing the technical and engineering basis for selection, if necessary, of a breeder system consistent with U.S. nonproliferation objectives and anticipated national electrical energy requirements. Technical support for the administration's foreign policy initiatives on nuclear nonproliferation will be continued. The program is centered around a conceptual design study which will focus the base program research and development efforts, nonproliferation concerns and safety research into an integrated program. Specific accomplishments anticipated are the beginning of operations of the fast flux test facility (FFTF) and continuation of support facilities for the FFTF. This includes continued construction of the fuel storage facility and of the fuels and materials examination facility as well as work on the maintenance and storage facility. Work will continue in the base technology program on safety, physics, materials, fuels, fuel processing, and reactor components. The breeder program will continue to provide and maintain facility operations and safeguards at three national laboratories.

Work will continue in the water cooled breeder reactor (WCBR) program on the pressurized water reactor, advanced water breeder applications, and the light water breeder reactor allowing for orderly progress on the WCBR program and additional development of testing fuel rod bundle concepts.

The gas-cooled fast breeder program (GCFR) will concentrate on the development of this technology to a state of readiness consistent with nonproliferation alternative system assessment program and the international fuel cycle evaluation program results permitting a decision on the next phase of GCFR development by 1983.

5. *Magnetic fusion.*—The primary goal of the magnetic fusion program is to develop and demonstrate fusion central power generation in a manner which will meet environmental, economic, health, and safety requirements. The near-term objective is to assess and demonstrate the overall feasibility of controlled fusion. In 1980 major emphasis will be continued toward the development and demonstration of reactor-like conditions of hydrogen plasmas in present generation mainline and advanced concept experimental devices. The 1980 budget includes work which identifies and evaluates the technical and economic feasibility of fusion power applications which can substantially contribute to meeting the Nation's requirements for inexhaustible energy needs.

6. *Geothermal.*—The major objectives of the geothermal program are to stimulate development of hydrothermal resources for both electric and nonelectric applications, to stimulate development of geopressured resources and to perform the advanced technological R. & D. required for development of the very large hot dry rock resource base.

In 1980, emphasis will be on improved resource definition and on developing advanced technology to exploit geopressured and hot dry rock resources. Also, construction will be initiated on a 50 MWe project to demonstrate the readiness of hydrothermal technology for commercial application. The economic, environmental, institutional, legal and regulatory barriers to geothermal energy commercialization will continue to be addressed.

7. *Hydropower.*—The program is designed to assess the economic potential of small hydropower sites and to assess environmental and institutional barriers to small hydropower development. In 1980, activities will include: resource identification; environmental and safety assessments; legal, economic and institutional studies, and completion of on-going small-scale demonstrations.

8. *Environment.*—The primary goal of this program is to assure the environmental, health, and safety acceptability of energy technologies being developed. This program is comprised of three subprograms; environmental overview and assessment, biomedical and environmental research and nuclear decontamination and decommissioning. The overview and assessment program insures that proper emphasis is placed on environmental, health, and safety considerations in formulating and implementing energy technology plans, programs and decisions through oversight and coordination with energy programs. The biomedical and environmental research program performs health and ecological effects research needed to address health and environmental problems associated with energy technology development and energy production. The nuclear decontamination and decommissioning program assures the safe management and disposition of facilities and sites contaminated by radioactivity.

9. *Supporting research.*—The supporting research programs are focused on areas of fundamental science that have the greatest potential for near-term impact on energy production; on the assessment of technologies that have potentially high payoff in the future; and on the training of future energy professionals.

*Basic energy sciences.*—The objective of this program is to develop the knowledge base in science and engineering for all energy production and conservation technologies. Basic energy sciences provide fundamental input to problems underlying other energy programs and attempt to identify knowledge that crosscuts the various energy technologies. In 1980, work will continue in the materials sciences; the chemical sciences; engineering, mathematical, and geosciences; nuclear science; biological energy research; and advanced energy projects.

A common thrust among several of the above activities in 1980 will be the conduct of solar-related research.

**University research support.**—The goal of the University research support program is to fund special university-based research activities on long-range energy problems, including long-range implications of increased utilization of coal, and to aid in the preparation and training of future energy professionals through research participation by advanced graduate students. It also is aimed at increasing the involvement in the national energy program of researchers at small minority institutions, and includes the support at selected universities of specialized research facilities which are not duplicated elsewhere in national laboratories or private industry.

**Technical assessment projects.**—This activity involves the independent assessment of existing or proposed technological initiatives in the Department, including examination of the base of research that underlies a variety of energy technologies. Also included are efforts undertaken in order to provide a complete evaluation of the solar-powered satellite (SPS) concept, including studies of its environmental, economic, and societal impact, as well as its merits relative to other future energy options, in order to provide a recommendation as to whether it should proceed to the exploratory research stage.

**10. Multi-sector technology.**—The principal objectives of the multisector program are: to help address technical barriers to development of reliable and inexpensive storage systems for cross-sectoral energy conservation technologies.

For electric energy systems in 1980 the principal objectives are to foster the integration of dispersed electric generation systems and to help resolve the growing electric transmission corridor crisis by investigating load management concepts and electric grid related problems such as electric field effects on living organisms.

For energy storage systems, major program activities in 1980 include development of a prototype thermochemical storage system for use in solar thermal power generation, development of advanced batteries for electric vehicles and utility applications, and development of other thermal and mechanical energy storage technologies.

**ENERGY SUPPLY, RESEARCH AND DEVELOPMENT, PLANT AND CAPITAL EQUIPMENT\***

\*See Part III for additional information.

For expenses of the Department of Energy in connection with the purchase, construction and acquisition of plant and capital equipment and other expenses incidental thereto necessary for energy supply, research and development activities and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 113 of which 104 are for replacement only) including 10 police-type vehicles; \$408,521,000, to remain available until expended.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928); additional authorizing legislation to be proposed.

The purpose of energy supply—research and technology development is to develop new energy technologies and improve the efficiency of existing energy technologies. Included in this supporting appropriation for plant and capital equipment are funds for energy construction projects and miscellaneous equipment needs of energy technology programs other than fossil energy, for which funds are provided separately.

1. *Solar applications, (2) solar technology, and (3) biomass.*—In 1980, activity in this appropriation will include: construction of the solar thermal electric pilot plant, Barstow, Calif., with modifications to allow use of advanced technology; and construction of a new, 300-acre solar research facility at the Solar Energy Research Institute, Golden, Colo.

Also, construction of the first ocean thermal facility will continue and equipment needs will be met for the major solar and biomass programs.

4. *Geothermal*—Funding will be provided for miscellaneous capital equipment to support the Federal geothermal technology development program.

5. *Nuclear*—The construction items in the nuclear fission area are mainly needed to support the development of the liquid metal fast breeder reactor (LMFBR) program. The projects will take place at the national laboratories, principally at the Idaho National Engineering Laboratory (INEL) and the Hanford Engineering Development Laboratory (HEDL). Prior year projects, such as the fuels storage facility and the fuels and materials examination facility, both at HEDL, will continue on their previously approved construction schedule. Several new projects are proposed that will enable the laboratories to upgrade their facilities for the purposes of increased security and safeguards. Increased safety continues to be a concern at the laboratories. A new laundry facility is proposed at INEL for clothing of personnel working near radioactive substances.

*Commercial waste management.*—This program provides equipment and facilities supporting the commercial waste R. & D. program.

6. *Magnetic fusion.*—The primary goal of the magnetic fusion program is to develop and demonstrate purification central power generation in a manner which will meet environmental, economic, health, and safety requirements. The near-term objective is the completion of the Tokamak fusion test reactor now under construction at Princeton University and the magnetic mirror machine now under construction at the Lawrence Livermore Laboratory in California. These devices will demonstrate the overall feasibility of controlled fusion.

7. *Multisector.*—Funding will be provided for miscellaneous capital equipment needed to support the Federal development programs for energy storage and electric utility transmission and distribution technology.

8. *Environment.*—Modifications to existing facilities at several of the biomedical and environmental laboratories are proposed in 1980. Examples include, at Oak Ridge National Laboratory, Tenn., an environmental waste management complex and an upgrading of laboratories to handle hazardous materials; at Pacific Northwest Laboratory, Wash., a biophysics and environmental oil shale research facility; at University of California, Davis, Calif., a toxic pollutant health research laboratory.

9. *Supporting research.*—In 1980, construction of a new addition to the chemical sciences building at Lawrence Berkeley Laboratory will be started. This addition will also serve to house the atomic resolution microscopes facility, for which additional construction funds are provided. The final increment of funding for the national synchrotron light source at Brookhaven National Laboratory is also provided, as are funds for an upgrade of the Intense Pulsed Neutron Source-I at Argonne National Laboratory.

1. *Uranium resource assessment.*—The 1980 uranium resource assessment program continues efforts to provide data for use in assessing the nuclear fuel resources of the United States, to reduce the uncertainties surrounding the estimates, and to assess the availability and economics of domestic nuclear fuel resources.

The major program activities in 1980 will be to complete the assessment of uranium resources in the highest priority areas, to complete geologic examinations of selected major environments favorable for uranium deposits similar to those known elsewhere in the world, and to continue data collection for the comprehensive assessment of the conterminous United States and Alaska by the end of calendar year 1985. Some efforts will also address foreign uranium resources.

2. *Gaseous diffusion operations and support.*—This program provides for the enrichment of uranium and uranium compounds in the isotope U-235. Activities include the operations of the Department's three gaseous diffusion plants located at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio; production of feed, recovery of enriched uranium, process and long-range technical support, and other supporting activities.

3. *Gas centrifuge operations and support.*—This program provides for those activities related to the devel-

opment and operation of the gas centrifuge process for the enriching of uranium compounds in the isotope U-235. Specific activities include the operation and maintenance of pilot and demonstration facilities, process development, technology transfer, and other activities.

1. *Uranium resource assessment.*—The 1980 uranium resource assessment program continues efforts to provide data for use in assessing the nuclear fuel resources of the United States, to reduce the uncertainties surrounding the estimates, and to assess the availability and economics of domestic nuclear fuel resources.

2. *Gaseous diffusion operations and support.*—This program provides for the enrichment of uranium and uranium compounds in the isotope U-235. Activities include the continuation of the program to improve and update the existing gaseous diffusion cascades to both increase the capacity and improve plant efficiency. This activity is scheduled for completion in 1981. The Department's three gaseous diffusion plants are located at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio.

3. *Gas centrifuge operations and support.*—This program provides for those activities related to the development of the gas centrifuge process for the enriching of uranium compounds in the isotope U-235. Specific activities include the procurement of centrifuge hardware and the construction of the gas centrifuge enrichment plant at Portsmouth, Ohio.

【FOSSIL ENERGY RESEARCH AND DEVELOPMENT】  
FOSSIL FUEL—OPERATING EXPENSES

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), 【\$576,888,000】 \$670,592,000, to remain available until expended【: Provided, That no part of the sum herein appropriated shall be used for the field testing of nuclear explosives in the recovery of oil and gas】. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979; additional authorizing legislation to be proposed.)

<sup>1</sup> Includes capital investment as follows: 1978, \$3,900 thousand; 1979, \$4,780 thousand; 1980, \$5,460 thousand.

1. *Coal.*—The principal objectives of this program are to accelerate the development of environmentally acceptable technologies for converting coal to liquid and gaseous fuels; to foster the rapid development of advanced energy conversion systems, including magnetohydrodynamics and fuel cells; to stimulate adoption of improved methods for the direct combustion of coal; to develop more efficient means of energy conversion; to validate second generation coal processes by designing, building, and operating near-commercial scale modules; to develop systems to increase the productivity and efficiency of coal mining operations; and to increase the utilization of coal through improved coal preparation technologies and environmental control technologies.

2. *Petroleum.*—The principal objectives of this program are to develop and demonstrate by 1985, in cooperation with industry, enhanced oil recovery technology including advanced laboratory research to increase production flow rates and ultimate recovery of oil; and to develop the technology required to insure that the Nation's oil shale resources are developed at acceptable economic, social, and environmental costs.

3. *Gas.*—The principal objectives of this program are to encourage commercial development of the potentially

large resources of natural gas located within the United States; and to support shale gas production research targeted to both eastern and western shales.

**Coal.**—This program provides for the construction of commercial-module demonstration plants for converting coal to high Btu pipeline gas and to a synthetic fuel

using the solvent refined coal technology. Construction of industry cost-shared pilot plants for coal conversion and modifications to existing research facilities are also included.

ENERGY PRODUCTION, DEMONSTRATION, AND DISTRIBUTION\*

\*See Part III for additional information.

For necessary expenses in carrying out energy production, demonstration, and distribution activities, [\$169,181,000, of which \$151,862,000] \$122,299,000, which shall remain available until expended: Provided, That not to exceed \$5,000,000 shall be available for financial assistance as provided by section 20 of the Federal Non-Nuclear Research and Development Act of 1974 for feasibility and design studies for municipally owned and/or operated waste reprocessing demonstration facilities. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979; additional authorizing legislation to be proposed.)

Status of Loan Guarantees (in thousands of dollars)—Continued

	1978 actual	1979 est.	1980 est.
Cumulative balance of guarantees outstanding:			
Loan guarantees outstanding, start of year.....			62,000
Loan guarantees.....		62,000	
Loan guarantees repaid or prepaid.....			-2,000
Loan guarantees outstanding, end of year ..		62,000	60,000

1. *Coal.*—This effort includes the coal loan guarantee program designed to increase annual low-sulfur production by guaranteeing loans to small coal producers. Other 1980 program objectives include increasing coal production through a reduction in institutional obstacles, and accelerating introduction of new coal technologies.

2. *Naval petroleum reserves.*—This program includes those activities necessary to operate, explore, conserve, develop, and produce the naval petroleum reserves at the maximum efficient rate. This will include routine operation and maintenance, drilling, and equipping oil and gas wells for production, installation of on-reserve facilities and related pipeline systems to handle produced petroleum and related products.

3. *Oil shale development.*—The program's major objective is to establish and coordinate a Federal commitment to development of our oil shale resources, including the naval oil shale reserves, in an environmentally acceptable manner. Long-range goals are for development of an industry capable of producing 300,000 barrels of oil per day by 1985 and 2 million barrels per day by 2000. 1980 funding provides for the development of Federal plans which address certain constraints to oil shale development.

4. *Oil and gas development.*—Major program objectives are to promote enhanced oil recovery (EOR) techniques through pilot projects, accelerate the exploration and development of oil and gas in high potential areas (including Federal lands), insure that transportation and refining infrastructure exists, and develop recovery capability of natural gas from unconventional sources.

5. *Solar.*—The solar activity in this appropriation provides support for the use of solar technology in Federal buildings and supports efforts to promote awareness of solar technology and to plan for orderly early transfer of federally assisted solar technologies to the private sector. (For other Federal solar efforts see the Energy Supply—Research and Technology Development appropriation narrative).

6. *Multiresource energy supply.*—Objectives are to establish and develop leasing programs and policies for all Federal leasable energy minerals.

1. *Buildings and community systems.*—The major emphasis in 1980 will be to conduct research, development, and demonstration activities related to efficient use of energy in residential and commercial buildings. Planned efforts will include research, development, and implementation support of new buildings standards for optimal energy use, and minimum energy efficiency standards for major home appliances. Also included will be a program of initial technical assistance to aid electric and gas utilities in developing an insulation program for their residential customers as required by the National Energy Conservation Policy Act of 1978.

2. *Industrial.*—The principal objective of the industrial program is to undertake activities to accelerate and complement private sector activities in industrial energy conservation.

Major 1980 program activities include development of waste energy technology, industrial process research, and support of the legislative requirements of the National Energy Act Legislation.

3. *Transportation.*—The principal objectives of the transportation program are to help improve energy efficiency in transportation in order to achieve a 25% reduction in the current transportation energy projections for the year 2000; and to reduce transportation's almost complete dependence on petroleum.

Major program activities in 1980 will include research, development, and demonstration activities in advanced heat engines and electric and hybrid vehicles (EHV).

4. *State energy management and planning (SEMP).*—The State energy management and planning (SEMP) program provides financial and technical assistance to States to develop and broaden their energy planning and management capabilities, develop a state energy strategy as well as plan and implement energy conservation programs. The program restructures several existing grant programs and consolidates grant administration procedures for other state energy conservation programs administered by DOE. SEMP proposes to expand the parameters of the current state conservation efforts into comprehensive energy programs to include supply and demand forecasting; emergency, facility and production impact planning; coordination with

local and interstate regional energy plans. Additional funds are provided for innovative competitive grants.

5. *Other State and local.*—The principal objectives of the state and local grant programs in 1980 are to reduce energy consumption in school and health care facilities and the homes of low-income persons. This activity includes costs for grant programs that received appropriations in 1978 and 1979 and precede the new state energy management and planning program.

6. *Multi-sector.*—The Appropriate Technology Program is designed to support and encourage individuals, small businesses, local non-profit groups and Indian tribes to develop and demonstrate energy related appropriate technologies that match community energy requirements with community energy resources. The program's emphasis is on small scale low-cost technologies. DOE provides funds to groups or individuals who ordinarily would not have access to such support.

*Strategic petroleum reserve.*—The objective of this program is to decrease the vulnerability of the United States to disruptions in world petroleum markets by creating an effective petroleum stockpile to be used in the event such disruptions occur.

The Administration continues to believe that the level of protection afforded by a billion barrel reserve is needed. The 1980 budget includes funds for continued development of the petroleum reserve on a revised schedule. A reprogramming of \$745 million in 1979 of funds appropriated for oil is being requested. Of this amount \$12 million is for planning and \$733 million is to start the expansion of existing sites and acquisition of new sites, bringing the storage capacity of sites on which work is underway or completed through 1980 to 608 million barrels (mmb). Also included in the Government-wide allowance for contingencies is an amount for commencing development of an additional 142 mmb of facilities for a total of 750 mmb. Depending on progress made by DOE, funding could be requested later this year for the 142 mmb. Funds for the purchase of oil have been previously appropriated and new budget authority for 1980 is not needed (other than BA for management expenses).

Note.—Includes \$4,100 thousand in 1979 and 1980 for activities transferred from the Economic Regulatory Administration. No funds were provided in 1978 for this activity in the Economic Regulatory Administration.

*Energy information.*—This program provides for: (1) the development and purchase of near and far-term econometric, statistical and structural process models of

energy supply, demand, price, transportation, and fuel conversion; (2) substantive information on electric and natural gas supply and consumption for analyses of supply, costs, consumption patterns, problems, trends, technology, and long-range industry plans and outlook—industry data is essential for effective and equitable regulation under the Federal Power Act and Natural Gas Act; (3) the analysis of the impacts of national and international energy policies, actions, and developments on the national economy, the major economic sectors, the regions, and specific socioeconomic groups; (4) development and implementation of a detailed financial information reporting system to assess industry performance in the area of energy resource production and distribution; (5) collection of oil and gas production and reserves data; (6) development and implementation of the Emergency Management Information System; (7) validation of Federal energy data systems; (8) a national energy information system (NEIS) to collect and provide energy information to all users; and (9) making available the Department's energy information resources to other Federal agencies, the Congress and the public.

Note.—Excludes \$4,100 thousand in 1979 and 1980 for activities transferred to the Energy Information Administration. No funds were provided in 1978 for this activity.

The Economic Regulatory Administration (ERA) has responsibility for programs which support national energy objectives by controlling energy price, supplies, and distribution, by promoting conservation in fuel usage and end-use alternatives, and by providing response mechanisms for energy emergencies.

1. *Coal utilization.*—The ERA's efforts in this area are mandated by the Energy Supply and Environmental Coordination Act (ESECA) of 1974 and the Powerplant and Industrial Fuel Use Act of 1978. The objective of reducing consumption of petroleum and natural gas in the industrial and utility sectors through increased use of coal and other fuels is accomplished through the implementation of statutory prohibitions on the use of oil and gas in new facilities and by individual prohibition orders in existing facilities. Requests for exemption and appeals of prohibitions are given further administrative and judicial review.

2. *Utility programs and regulatory intervention.*—To accomplish the conservation and regulatory policy goals of the Public Utility Regulatory Policies Act of 1978, the ERA encourages State public utility commissions and nonregulated utilities to adopt utility rate reforms through financial and technical assistance and through presentation of testimony and other evidence in support of such reforms at hearings of State regulatory agencies. The ERA seeks to assure continued reliability and

General and special funds—Continued

ECONOMIC REGULATORY ADMINISTRATION—Continued

adequacy of the Nation's electric power supply through strategic planning, investigation of outages, and encouragement of power pooling, interconnections, and wheeling.

3. *Compliance.*—To assure industry compliance with petroleum and coal regulations, ERA conducts audits of target firms. As civil or criminal violations are identified, ERA initiates necessary enforcement actions through administrative and/or judicial proceedings. Remedial action and recovery of refiner overcharges result in returns of millions of dollars to consumers or to the U.S. Treasury.

4. *Regulation development.*—ERA is responsible for developing price and allocation regulations for crude oil and refined petroleum products. ERA is also developing regulations to implement its mandate, by the Powerplant and Industrial Fuel Use Act of 1978, to encourage industries and utilities to burn coal instead of oil or natural gas. In keeping with the President's Executive Order 12044 to reduce the regulatory burden on the public and on industry, ERA is reviewing, simplifying, and, where possible, eliminating several pricing and allocation programs to allow enhanced competition in the petroleum industry.

5. *Emergency preparedness.*—The ERA will continue to maintain appropriate contingency measures for use in the event of a severe energy supply interruption. These include plans for dealing with national or regional energy emergencies, coordination of Federal and State emergency plans, and activities to ready a national plan for rationing motor gasoline.

6. *Fuels regulation.*—In accordance with the 1973 Emergency Petroleum Allocation Act (EPAA), the ERA has established crude oil supply, allocation and pricing programs to promote increased domestic production and equitable distribution of crude oil. To accomplish the EPAA objective of an equitable distribution of petroleum products, ERA administers allocation programs for synthetic natural gas (SNG) feedstocks and propane gas. ERA is also responsible for issuing liquified natural gas (LNG) import/export orders and for conducting market analyses on decontrol of petroleum products.

7. *Hearings and appeals.*—The Office of Hearings and Appeals is located in the Office of the Secretary. It reviews and issues all final DOE orders of an adjudicatory nature other than those over which FERC has jurisdiction. It considers and issues decisions on appeals of DOE orders and examines exceptions and exemptions.

The Federal Energy Regulatory Commission (FERC) is charged with regulating certain interstate aspects of the electric power, natural gas, and oil industries. With

the exception of some areas that are strictly intrastate in nature, virtually all facets of electric power, gas, and oil production, transmission and sale are affected by Commission regulation, through direct or indirect jurisdiction. The Commission's major objective is to insure that the Nation's consumers have adequate energy supplies at just and reasonable rates while insuring that energy producers have adequate rates of return which will provide sufficient incentives for increased production.

1. *Hydro regulation.*—The Commission issues permits and licenses for hydroelectric projects, enforces the terms and conditions of the licenses, and inspects all licensed dams or dams for which license applications are pending. The Commission also performs studies, appraisals, and assessments of water resources, performs headwater benefits investigations, and encourages the development of small hydro sites as sources of energy.

2. *Multiresource regulation.*—The Commission is responsible for determining rates for the interstate sale or transmission of wholesale electric energy and for overseeing electric utility corporate transactions and interlocking directorates. The Commission's rulemaking and jurisdictional responsibilities include review of Department of Energy actions and proposed rulemakings that affect FERC functions and adjudication of appeals from DOE remedial orders and denials of adjustments.

3. *Gas regulation.*—Pipeline and producer regulation is mandated by the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978 and affects natural gas companies that either transport or produce natural gas for sale in interstate or intrastate commerce and companies transporting natural gas in interstate commerce. The Federal Energy Regulatory Commission, in accordance with its assigned pipeline and producer regulation responsibilities, issues certificates of public convenience and necessity for the sale of gas by producers. Construction of new transportation facilities and extensions by interstate natural gas companies is similarly regulated. Producer regulation requires the establishment and enforcement of appropriate wellhead prices for natural gas sold to pipelines or end users and acceptable wholesale rates to be charged by the pipeline firms for all natural gas sold in interstate commerce for resale.

4. *Oil regulation.*—By authority of the Interstate Commerce Act, the Commission provides enforcement and compliance with its rules, regulations, and orders for oil pipeline regulation. Responsibilities include the establishment of economical and reasonable transportation rates to provide incentives for increasing domestic oil supplies and insuring that consumers are not adversely affected by unjustifiably high tariffs. The Commission is reviewing the Trans-Alaska Oil Pipeline System to determine the reasonableness of cost overruns, rate schedules, and valuation of the system. The Commission seeks to encourage fair competition among the oil companies and to foster the development of future oil supplies in the Prudhoe Bay and North Slope by establishing prudent rate tariffs.

To make available the financial resources needed for commercial development of geothermal energy, DOE is administering a Federal loan guarantee program. The objectives of the loan guarantee program are: (1) to encourage and assist the private sector to accelerate development of geothermal resources by minimizing lender's financial risk associated with the introduction of new technology; and (2) to develop normal borrower-lender relationships that will in time encourage the flow of credit without the need for Federal assistance. Implementation of the loan guarantee program is coordinated closely with the Department of the Interior's geothermal leasing program and with DOE's research and development effort.

1. *Petroleum, natural gas, and oil shale.*—The funds contributed by States, counties, municipalities, and private sources are used to conduct research and investigations to promote the conservation, evaluation, and development of energy resources.

2. *Washington Public Power Supply System.*—Funds are advanced by the Washington Public Power Supply System (WPPSS) to pay for services furnished in connection with the operation of WPPSS electric generating facilities at the Richland, Wash., new production reactor. The services provided by DOE contractors include lease of land, fire protection, utilities, maintenance of equipment, engineering support and estimated reactor costs chargeable to WPPSS.

3. *Construction, operation, and maintenance, Western Area Power Administration.*—When requested, the WAPA performs investigations or construction work with the funding provided by non-Federal entities under the Contributed Funds Act (43 U.S.C. 395, 396).

【ENERGY, SCIENCE AND DEFENSE ACTIVITIES】

【OPERATING EXPENSES】

【For operating expenses of the Department of Energy necessary for energy, general science and basic research, atomic energy defense related activities, and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair and cleaning of uniforms; official entertainment expenses (not to exceed \$35,000); reimbursement to the General Services Administration for security guard services; \$4,818,431,000 and any moneys received, including revenues from the enrichment of uranium, as authorized by section 111(h) of Public Law 93-438, as amended, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended: *Provided*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made.】

【PLANT AND CAPITAL EQUIPMENT】

【For expenses of the Department of Energy in connection with the purchase and construction of plant and the acquisition of capital equipment and other expenses incidental thereto necessary for energy, general science and basic research, atomic energy defense related activities, and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 445 of which 411 are for replacement only) including 22 police-type vehicles, and hire of passenger motor vehicles; purchase of (not to exceed one) and hire, maintenance, and operation of aircraft; \$1,067,971,000 and moneys received from the enrichment of uranium, as authorized by section 111(h) of Public Law 93-438, as amended, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended.】

POWER MARKETING ADMINISTRATIONS

Federal Funds

General and special funds:

OPERATION AND MAINTENANCE, ALASKA POWER ADMINISTRATION

For engineering and economic investigations to promote the development and utilization of the water, power, and related resources of Alaska, and for necessary expenses of operation and maintenance of projects in Alaska and of marketing electric power and energy, \$2,660,000 to remain available until expended: *Provided*, That \$20,000

of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565).

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928), additional authorizing legislation to be proposed.

1. *Operations and maintenance.*—The Alaska Power Administration operates, maintains, and markets hydroelectric power from two Federal hydroelectric projects in Alaska—Eklutna and Snettisham. The 30,000-kilowatt Eklutna project is located near Anchorage and the 47,000-kilowatt Snettisham project near Juneau. Each project has over 40 miles of transmission facilities and associated switchyard and substation facilities. Project power is marketed at wholesale to the utilities serving the two market areas with the revenues returned to the U.S. Treasury.

2. *General investigations.*—The Alaska Power Administration participates along with State, private, and Federal agencies in conducting general investigations involving engineering, economic, and environmental studies for water and power development potentials and for power marketing and transmission system analysis. The Administration also pays the U.S. Fish and Wildlife Service for studies of the fish and wildlife aspects of the general investigations program.

The Bonneville Power Administration constructs, operates, and maintains facilities to market electric power produced at Federal hydroelectric generating projects over its high-voltage transmission grid system to public and private utilities and industrial customers in the Pacific Northwest. It also wheels, exchanges, and purchases power from non-Federal hydroelectric and thermal generating plants.

The estimated amounts of peak generating capacity on the Federal transmission system are as follows (in thousands of kilowatts):

	Oct. 1, 1979	Oct. 1, 1988
Federal projects.....	20,927	22,274
Power wheeled and exchanged for non-Federal utilities.....	9,524	19,125
Total.....	30,451	41,399

The transmission facilities will integrate new generating facilities into the system. Thirty Federal hydroelectric generating plants are currently in operation on the system. These plants, along with additional generating units being installed at new and existing Federal projects, will bring the total Federal installed capacity from 20.9 million kilowatts to 22.3 million kilowatts.

BPA's 1980 program will be financed from revenues and proceeds from the sale of revenue bonds or notes to the U.S. Treasury which will be repaid from future revenues.

BPA fund activities include:

1. *System operation and maintenance.*—Provides for the scheduling and dispatch of power, operation, maintenance, planning of the system, and the negotiation of power sales and wheeling contracts, billing and servicing these contracts, and the review and establishment of wholesale rates.

2. *Purchase power and wheeling.*—Provides for the acquisition of power from other entities by purchase and exchange, and the use of transmission facilities.

3. *Interest expense from borrowings.*—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's construction program under \$1.25 billion borrowing authority provided by Public Law 93-454.

4. *Associated project costs.*—Provides for repayment of the operation and maintenance costs of the U.S. Corps of Engineers and U.S. Bureau of Reclamation power generating projects; interest and amortization on the U.S. Bureau of Reclamation capital investment in power generating facilities; and coordination agreement payments to the Federal Energy Regulatory Commission.

1. *Transmission system construction.*—Provides for continuation of construction work on transmission lines, substations, and related facilities initiated in prior years, and initiation of construction on system additions.

5. *Reserve for contingencies.*—Provides for the purchase of power in low-water years; repair and/or replacement of facilities affected by natural and man-made emergencies including the resulting additional costs for contracting, construction, and operation and maintenance work; unavoidable increased costs for the planned program due to necessary but unforeseen adjustments including engineering and design changes, contractor and other claims and relocations.

*Reimbursable programs.*—Provides for the acquisition of energy and other services provided by BPA under various types of trust and reimbursable arrangements.

1. *Energy purchase agreements.*—Provides for the purchase of replacement energy from other sources for BPA industrial and utility customers during periods when nonfirm energy is not available from the Federal system, with BPA acting as an agent in acquiring nonfirm energy in their behalf for which each customer provides funds in advance.

2. *Other.*—BPA constructs, operates, and maintains transmission facilities which are not provided by the administration under its customer service policy when requested and financed by other entities. Also, BPA facilities are relocated as required for highway construction and other purposes under similar arrangements.

*Financing.*—Public Law 93-454, the Federal Columbia River Transmission System Act, provides for the use by the Bonneville Power Administration of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of the Bonneville Power Administration. These receipts result primarily from the sale of power and wheeling. Public Law 93-454 also provides for the availability of \$1.25 billion in authority to borrow from the U.S. Treasury, at rates comparable to borrowings at open market rates for similar issues. Operating revenues are expected to amount to approximately \$578 million in 1980.

*Operating results.*—Estimated cumulative retained earnings at the close of the budget year are \$193,778 thousand, a net increase of almost \$177,940 thousand, from 1979. The large increase is primarily caused by BPA's projected rate increase which is due to take effect December 20, 1979.

The Administration markets power generated at Corps of Engineers hydroelectric generating plants in a ten State area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 21 projects now in operation. A schedule of capacity of projects in operation or under construction follows:

Projects in operation.....	Initial year operation	Installed capacity (1,000 kilowatts nameplate rating)
Project under construction: Richard B. Russell.....	1983	300
<b>Total.....</b>		<b>3,012</b>

The administration sells power at wholesale primarily to publicly—and cooperatively—owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. Southeastern Power Administration does not own or operate any transmission facilities. Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest. The SEPA program includes the following activities:

1. *System operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts deposited in the Treasury in 1978 were \$48,429 thousand and are estimated at \$51,000 thousand for 1979 and \$53,700 thousand for 1980.

4. *General Administration.*—Provision is made for the Administration's executive direction and administrative services.

expenses necessary to insure continuity of service (16 U.S. Code 825s-2).

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

*For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, and for construction and acquisition of transmission lines, substations and appurtenant facilities, and for administrative expenses connected therewith, in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southwestern power area, including purchase of not to exceed one passenger motor vehicle for replacement only, \$32,180,000 to remain available until expended.*

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928) additional authorizing legislation to be proposed.

The Southwestern Power Administration operates as a marketing agent to dispose of hydroelectric power and energy produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,702 miles of high voltage transmission lines, 32 sub and

General and special funds—Continued

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER  
ADMINISTRATION—Continued

switching stations, and 19 radio and microwave stations and sells its power at wholesale primarily to publicly—and cooperatively—owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest.

Southwestern Power is also responsible for scheduling and dispatching power, negotiation of power sales contracts, construction of facilities required to upgrade the established system to meet changing customer load requirements.

1. *System operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Estimated receipts are \$50,225 thousand in 1978, \$36,129 thousand in 1979, and \$52,032 thousand in 1980.

The construction program provides transmission, substation and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place at the time these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly expenditures in excess of monthly receipts for the thermal power and energy and transmission service provided to SPA.

CONSTRUCTION, REHABILITATION, OPERATION AND  
MAINTENANCE, WESTERN AREA POWER ADMINISTRATION

For carrying out the functions authorized by Title III, Section 302(a)(1)(E) of the Act of August 4, 1977 (Public Law 95-91), and for operation and maintenance of electric power transmission facilities, and power marketing including purchase power and wheeling, as authorized by law, including the purchase of seven passenger motor vehicles (of which five are for replacement purposes only); including the purchase of three helicopters (of which two are for replacement only), \$122,800,000 to remain available until expended, of which

\$107,400,000 shall be derived from The Department of Interior Reclamation Fund.

NOTE.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928); additional authorizing legislation to be proposed.

The Western Area Power Administration is responsible for marketing electric power in 15 western States from hydroelectric generating projects of the Bureau of Reclamation and Corps of Engineers, the International Boundary and Water Commission's powerplant in Texas, the Boulder Canyon Project in Arizona and the Central Arizona Project. WAPA operates and maintains 16,000 miles of high-voltage transmission lines and 208 associated substations/switchyards and constructs selected transmission facilities including new transmission lines, substations and essential additions and modifications to existing facilities.

WAPA sells power at wholesale primarily to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest.

1. *Systems operation and maintenance.*—In 1980, a total of 16 projects, project areas or divisions of projects, will be operated and maintained to market power produced by others.

Energy sales resulting from the WAPA power operations excluding the Colorado River storage project and the Fort Peck project are as follows: Energy sales (millions of kilowatt hours): 1978 actual, 29,493; 1979 estimate, 26,967; 1980 estimate, 26,629.

Commercial power is sold to wholesale customers such as municipalities, Rural Electrification Administration cooperatives, irrigation districts, public utility districts, State and Federal Government agencies, and private utilities. These revenues are deposited in the Reclamation fund, the Colorado River Dam fund, the General fund, and the Fort Peck continuing fund.

2. *Purchase power and wheeling.*—The program includes \$75,431 thousand in 1980 for the purchase of power and wheeling excluding credits for net billing. The establishment in 1961 of a net billings procedure for certain of these power transactions between the Federal Government and non-Federal utilities precludes the need for an additional \$16,821 thousand in 1980.

*System construction.*—Construction activities will be underway in 1980 involving four multipurpose water resource projects. The construction of transmission facilities will be necessary for marketing of electric power produced from generating plants of others.

Emergency fund, Western Area Power Administration.....		200	200
Power marketing administration, operations and maintenance.....		200	

This fund is used to assure continuous operation of power systems in the event of droughts, damage to transmission facilities, or other emergencies.

Public enterprise funds:

COLORADO RIVER BASINS POWER MARKETING FUND, WESTERN AREA POWER ADMINISTRATION

For carrying out with respect to those functions authorized by Title III, section 302(a)(1)(E) of the Act of August 4, 1977, the Upper Colorado River Storage Project, as authorized by the Act of April 11, 1956, as amended (43 U.S.C. 620d), \$5,152,000 to remain available until expended.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928); additional authorizing legislation to be proposed.

The Colorado River Basin fund is one segment of the marketing program of the Western Area Power Administration (WAPA). Operation and maintenance is maintained on approximately 3,087 miles of transmission lines and 47 substations. Wholesale power is provided to publicly and cooperatively owned distribution utilities in a six-State area over the Administration's own high-voltage transmission system.

Energy sales resulting from the Colorado River storage project financed from this fund are as follows:

Energy sales (millions of kilowatt hours): 1978 actual, 5,636; 1979 estimate, 5,800; 1980 estimate, 5,800.

Its long-term contracts provide for periodic rate adjustments to insure that Western Area Power Administration recovers all costs of operation and all capital invested in power with interest.

*Operation and maintenance*—This fund defrays the expense of operating the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to insure continuous operation. The continuing fund, Fort Peck project, is managed by WAPA, Department of Energy. The Corps of Engineers operates and maintains the power generating facilities and the Department of Energy operates and maintains the transmission lines and attendant facilities and performs the power marketing func-

tions. Expenses for these programs are funded by revenues collected by the Department of Energy and deposited to this fund.

The Colorado River Basin is authorized to operate on a revolving fund basis to offset operating and maintenance costs. Appropriations can only be used for construction purposes. Revenues may not be used for construction type activities.

Excludes \$4,420 thousand in 1979 and \$5,045 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$4,066 thousand) is included above. In addition, excludes \$80 thousand in 1979 and \$86 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$74 thousand) is included above.

**Departmental administration.**—This program supports a wide array of policy analysis and program support requirements necessary to insure effective DOE management. The program provides for: (1) development and analysis of alternative energy policy proposals, legislation, and evaluation of DOE programs; (2) the salaries, travel and other costs associated with the management and support of DOE; (3) the institutional relations program that provides information services and outreach activities focusing on the industrial, academic, and public communities, evaluation of energy-related inventions and support for energy training and education; (4) the performance of security investigations for persons with access to restricted atomic energy data; (5) development of international energy policy and international cooperation in energy matters; (6) the inhouse energy management program to reduce DOE energy consumption; (7) engineering and architectural services for planning and design of complex construction projects presently under consideration for possible future authorization; and (8) general purpose stores inventories, revenues from the sale of DOE products and services and their related direct costs.

Legislation will be proposed to establish a revolving fund to finance the acquisition and use of facilities to store spent nuclear fuel. This radioactive material would be turned over to the Government by the operators of public utility nuclear power plants. The utilities would pay a fee for this service that would completely cover the cost of acquisition and operation of the storage facilities.

GENERAL PROVISIONS, DEPARTMENT OF ENERGY

SEC. 101. [Appropriations to the] Any appropriation for Department of Energy [under this Act] activities for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms; and reimbursement to the GSA for security guard services. From these appropriations, transfers of sums may be made to other agencies of the United States Government for the performance of work for which this appropriation is made. None of the funds made available to the Department of Energy under this or any other Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in this or future appropriation acts. The Secretary is authorized to accept lands, buildings, equipment and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State or [private: *Provided, That* private. However, revenues received from the sale of any products produced in facilities operated as part of Department of Energy programs [appropriated under this Act] shall be covered into the Treasury as miscellaneous receipts unless expressly provided for credit by appropriations action.

SEC. [101] 102. None of the funds appropriated [by this title] for Department of Energy activities shall be available for any purpose related to the obtaining or issuing of a license to operate the waste isolation pilot plant, Delaware Basin, Southeast New Mexico (Project 77-13-f), or for any purpose related to the storage at such plant of radioactive waste not resulting from the national defense activities of the Department of Energy.

SEC. [501] 103. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 104. Not to exceed 5 per centum of any appropriations made available for the current fiscal year for Department of Energy activities may be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

SEC. 105. The unexpended balances of any appropriations provided for the same purpose may be transferred to any new appropriation account established pursuant to this or any other Act. Balances so transferred may be merged with funds in the applicable newly established account and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 106. Funds appropriated for Department of Energy activities may be used for the hire of passenger motor vehicles; hire, operation and maintenance of aircraft; purchase, repair and cleaning of uniforms and for reimbursement to the GSA for security guard services.

SEC. 107. Funds appropriated for Department of Energy activities unless otherwise specified, may be transferred to other agencies of the United States Government for the performance of the work for the respective purpose for which these appropriations are made. (Public Law 95-465, making appropriations for the Department of Interior and related agencies, 1979; Public Law 95-482, making continuing appropriations for the fiscal year 1979.)

<sup>1</sup> Includes capital investment as follows: 1978, \$12,769 thousand; 1979, \$10,133 thousand; 1980, \$10,303 thousand. Note.—Excludes \$60 thousand in 1980 transferred to the National Institute of Environmental Health Sciences. Comparable amounts for 1978 (\$60 thousand) and 1979 (\$60 thousand) are included above.

The Food and Drug Administration (FDA) is charged with the administration and enforcement of laws concerning dangerous, misbranded, and adulterated foods, drugs, human biologics, medical devices, cosmetics, and manmade sources of radiation.

1. *Foods.*—FDA is responsible for insuring the safety and quality of a major segment of the Nation's food supply and the safety of the Nation's cosmetic supply. FDA reviews industry petitions and publishes tolerances for the safe use of food additives, conducts research, develops analytical methods to detect and prevent food and cosmetic adulteration, sets standards for classes of food and defines good manufacturing and sanitary practices. To insure cooperation and compliance with the foregoing, FDA inspects food and cosmetic processing plants and marketing establishments, analyzes collected samples to verify that these products are safe and properly labeled and—when necessary—takes regulatory action to obtain compliance with the law.

2. *Drugs and devices.*—FDA is charged with insuring that human and animal drugs, human biologics, and medical devices are safe, effective, and properly labeled. FDA reviews research and manufacturing data to support the safety and efficacy of these products prior to marketing, evaluates literature and experience reports submitted by industry and the medical profession, and conducts research. FDA also inspects manufacturing firms, reviews labeling, analyzes samples, and—when necessary—takes regulatory action to enforce the legal requirements.

3. *Radiological products.*—FDA is responsible for eliminating unnecessary exposure to electronic product radiation through research, surveillance, and performance standards.

4. *National Center for Toxicological Research.*—FDA conducts research programs to study the biological effects of potentially toxic chemical substances found in man's environment.

5. *Program management.*—This activity includes FDA's executive and administrative functions.

FDA certifies batches of antibiotics, insulin, and color additives for use in foods, drugs, and cosmetics. It also lists color additives for use in foods, drugs, and cosmetics (21 U.S.C. 346a, 356, 357, 376). These services are financed wholly by fees paid by the industries affected.

HEALTH SERVICES ADMINISTRATION

Federal Funds

General and special funds:

HEALTH SERVICES\*

\*See Part III for additional information.

For carrying out titles III, V, X, XI, and XII of the Public Health Service Act, the Act of August 8, 1946 (5 U.S.C. 7901), section 1 of the Act of July 19, 1963 (42 U.S.C. 253a), section 108 of Public Law 93-353, section 427(a) of the Federal Coal Mine Health and Safety Act as amended, and titles V and XI of the Social Security Act, \$712,115,000, including 9,258 full-time permanent positions, \$1,370,897,000, of which \$1,600,000 shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with [Leprosy] Hansen's disease and \$3,000,000 to be available, until expended, shall be for the renovation of the National Hansen's Disease Center: Provided, That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses, hereafter incurred, by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health, Education, and Welfare, and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: Provided further, That when the Health Services Administration operates an employee health program for any Federal department or agency, payment for the estimated cost shall be made by way of reimbursement or in [advance] advances to this appropriation. (Department of Health, Education, and Welfare Appropriation Act, 1979; additional authorizing legislation to be proposed for \$51,450,000.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through September 30, 1979, that provides funding at the current rate.

<sup>1</sup> Includes capital investment as follows: 1978, \$36,487 thousand; 1979, \$25,590 thousand; 1980, \$16,722 thousand.

NOTES

Includes \$3,750 thousand in 1980 for activities previously financed from: National Heart, Lung, and Blood Institute, 1978, \$3,750 thousand.

Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows: Salaries and expenses, Bureau of Prisons; Appalachian regional development programs; Supplemental security income program, Health Care Financing Administration.

This appropriation includes activities that provide health services primarily to low income people and their families through categorical project and formula grant programs. Emphasis will be placed on ambulatory health care projects in urban and rural areas currently underserved by health professionals. In addition, services are provided directly to certain Federal beneficiaries through the Public Health Service hospital system. These health service programs are:

1. *Community health services*—(a) *Community health centers*.—Grants develop and support ambulatory health care projects in rural and urban areas where health resources are scarce.

General and special funds—Continued

HEALTH SERVICES—Continued

(b) *Home health services.*—Grants are awarded to develop and support home health projects in areas which have a high percentage of elderly, medically indigent, or both. The home health industry is no longer in the infant stage; 2,537 home health agencies have been established. Under this proposal, the grant program will phase out in 1980.

(c) *Comprehensive health grants to States.*—Grants are provided to States on a formula basis for a wide range of health services primarily determined by the States.

(d) *Hypertension.*—Formula grants to States are provided for hypertension screening and followup treatment.

(e) *Maternal and child health.*—Grants to States finance services for promoting the health of medically underserved mothers and children and for crippled children.

(f) *Genetic services.*—Grants are provided for screening for and treatment of hemophilia, sickle cell anemia, and other genetic disorders.

(g) *Family planning.*—Grants develop and maintain comprehensive voluntary family planning projects in areas of greatest need.

(h) *Migrant health.*—Grants provide primary health care services to migrants, seasonal farmworkers, and their families.

(i) *National health service corps.*—This activity provides health care personnel for health manpower shortage areas.

2. *Health care services and systems*—(a) *Patient care and special health services.*—This program provides direct and contract health care to the legal beneficiaries of the Public Health Service through a system of 8 general hospitals, 27 outpatient clinics, contract physicians, and the National Hansen's Disease Center at Carville, La. Consultation to Federal agencies on the establishment of occupational health programs is also provided under this activity.

(b) *Emergency medical services.*—Grants are awarded to encourage the development of a network of self-supporting regional emergency medical services systems. The network is rapidly nearing completion and the Federal program will begin an orderly phaseout beginning in 1980.

\* Includes capital investment as follows: 1978, \$4,943 thousand; 1979, \$4,040 thousand; 1980, \$4,040 thousand.

This program provides medical care and public health services for Indians and Alaska Native people.

1. *Patient care.*—This activity consists of the operation of 52 hospitals and the provision of medical care by contracting with non-Federal hospitals, clinics, private physicians and dentists, as well as contractual arrangements with State and local health organizations.

2. *Indian health manpower.*—This activity provides for the training of scholarship recipients in health care fields.

3. *Ambulatory care.*—This activity provides the full range of outpatient health services through 52 hospital outpatient departments, 102 health centers (including 21 school health centers) and several hundred small health stations and satellite clinics.

4. *Preventive health.*—This includes programs in sanitation, dental hygiene, health education, nutrition, maternal and child health, school health, tuberculosis and other communicable disease control, medical-social services, public health nursing, family planning and mental health. The services are provided through hospital outpatient clinics, health centers, and other field health units.

<sup>1</sup>Includes capital investment as follows: 1978, \$7,417 thousand; 1979, \$6,801 thousand; 1980, \$13,367 thousand.

**NOTES**

Excludes \$2,500 thousand in 1979 and 1980 for activities transferred to "Assistant Secretary for Health Salaries and Expenses." Comparable amount for 1978, (\$900 thousand) is included above.

Excludes \$30 thousand in 1980 for activities transferred to "National Institute of Environmental Health Sciences." Comparable amounts for 1978 and 1979 (\$30 thousand), are included above.

The Center for Disease Control conducts activities and assists State and local health authorities in the prevention and control of communicable and occupational diseases.

1. *Disease control.*—CDC awards project grants to State and local governments and other organizations for: (1) the prevention and control of venereal diseases; (2) the support of programs aimed at immunizing 90% of all children under 15; (3) the control of rats in urban areas; and (4) the prevention of lead poisoning in children. In addition, CDC conducts technical assistance, epidemiologic activities, laboratory improvement efforts, and health education activities to reduce smoking. A new formula grant program will be initiated in 1980.

2. *Occupational safety and health.*—The National Institute for Occupational Safety and Health supports in-

General and special funds—Continued

PREVENTIVE HEALTH SERVICES—Continued

tramural and extramural research to assure healthful and safe working conditions.

3. *Buildings and facilities.*—This activity funds repairs, improvements, and alterations of CDC-owned and CDC-operated facilities.

4. *Program management.*—This activity supports overall executive direction, planning, evaluation, and staff functions for CDC.

NATIONAL INSTITUTES OF HEALTH

Federal Funds

General and special funds:

NATIONAL CANCER INSTITUTE

For carrying out, to the extent not otherwise provided, [section 301] Title IV of the Public Health Service Act with respect to cancer, [\$917,000,000, including 2,062 full-time permanent positions]

\$936,958,000. (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through September 30, 1979, that provides funding at the current rate.

<sup>1</sup> Includes capital investment as follows: 1978, \$6,020 thousand; 1979, \$6,500 thousand; 1980, \$6,500 thousand. Note.—Excludes \$60 thousand in 1980 for activities transferred to National Institute of Environmental Health Sciences. Comparable amount for 1979 (\$60 thousand), and 1978 (\$60 thousand) are included above.

1. *Research*—(a) *Cause and prevention research.*—To prevent the occurrence or reduce the incidence of human cancer by developing the means to prevent the initial development of cancer, or halt or reverse the progression of the disease, through research in carcinogenesis, epidemiology, immunology, viral oncology, and nutrition.

(b) *Detection and diagnostic research.*—To develop better ways of finding cancer at an early stage when treatment methods have a better chance of success by improving methods for determining the presence, nature, location, and extent of a patient's disease and

by identifying risk factors and high-risk groups through research in epidemiology, immunology, and detection and diagnosis.

(c) *Treatment research.*—To develop the means to cure cancer patients, maintain control of cancer in patients who are not cured and improve the rehabilitation of cancer patients through the conduct of preclinical treatment, clinical treatment, and rehabilitation research.

(d) *Cancer biology.*—To provide a better understanding of basic biological mechanisms involved in control of normal and malignant cell growth and behavior. This knowledge is important to develop effective approaches to the prevention, detection, diagnosis, and treatment of cancer.

2. *Resource development*—(a) *Cancer centers support.*—To develop and maintain cancer centers as a national resource for the conduct of multidisciplinary cancer research, control, public and professional education, and training; and to serve as a focal point for reaching out and responding to community needs in cancer.

(b) *Research manpower development.*—To assist in providing education and training on a continuing basis to individuals and institutions to insure an adequate supply of highly specialized professional personnel for both basic and clinical cancer research.

(c) *Construction.*—To assist in providing the biomedical facilities needed to safely implement the cancer research and cancer control activities necessary to achieve the objectives and goals of the national cancer program.

3. *Cancer control.*—To facilitate the widespread application of available new, proven, and practical cancer knowledge and technology into the general practice of medicine through the conduct of identification, field test, demonstration, evaluation, and promotion efforts in the intervention areas of: (1) prevention; (2) detection, diagnosis, and pretreatment evaluation; and (3) treatment, rehabilitation, and continuing care.

<sup>1</sup> Includes capital investment as follows: 1978, \$970 thousand; 1979, \$1,048 thousand; and 1980, \$1,132 thousand.

1. *Heart and vascular diseases.*—Grant, contract, and training programs in heart and vascular diseases encompass basic and targeted research, clinical trials and demonstrations, cardiovascular centers, technological development, and application of research findings.

2. *Lung diseases.*—Grant, contract, and training programs in lung diseases, encompass basic and targeted

General and special funds—Continued

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE—Continued

research, clinical trials and demonstrations, pulmonary centers, technological development, and application of research findings.

3. *Blood diseases and resources.*—Grant, contract, and training programs in blood diseases and resources include sickle cell disease, Cooley's anemia, hemophilia, and activities to improve national systems of blood procurement, management, and distribution.

4. *Intramural research.*—Conducts a program of laboratory and clinical research in heart, blood vessel, lung, and kidney diseases, certain blood diseases, and technology related to cardiovascular and pulmonary diseases.

5. *Direct operations.*—Provides support for overall administrative management; including grant and contract administration, payments to NIH for management fund and program evaluation assessments.

6. *Program management.*—This activity provides support for the Institute's Office of the Director, and centralized planning and administrative functions.

<sup>1</sup> Includes capital investments as follows: 1978, \$1,196 thousand; 1979, \$900 thousand; 1980, \$900 thousand.

1. *Caries.*—The national caries program is an organized research and development effort to develop methods to eliminate caries as a major health problem.

2. *Periodontal diseases.*—The periodontal diseases program develops new knowledge which may lead to the prevention and eradication of these diseases.

3. *Restorative materials.*—The restorative materials program aids the development of improved materials and methods to restore lost oral tissues to normal form and function.

4. *Craniofacial anomalies.*—The craniofacial anomalies program is focused on improvement of treatment and understanding of the basic mechanisms, to prevent such developmental aberrations.

5. *Pain control and behavioral studies.*—The pain control program supports investigations into the nature, etiology, pathophysiology, and treatment of the major pain problems associated with the oral-facial complex.

6. *Soft tissue stomatology and nutrition.*—The soft tissue program focuses on developing knowledge in the areas of soft tissue diseases, nutrition, salivary glands and mineralization that can be applied to research.

7. *Dental research institutes.*—The dental research institutes bring together universities to focus upon the problems of oral health.

8. *Intramural research.*—Intramural laboratory and clinical research is concerned with the causes, treatment, control, and prevention of diseases and disorders of the oral cavity and facial region.

9. *Direct operations.*—This program supports scientific and administrative management of grants and contracts, program evaluation and HEW general expense.

10. *Program management.*—This activity provides support for the overall administrative management and scientific direction of institute programs.

<sup>1</sup> Includes capital investment as follows: 1978, \$1,261 thousand; 1979, \$1,510 thousand; 1980, \$1,510 thousand.

1-4. *Categorical research programs.*—These programs, groups of interrelated diseases and disciplines, support biomedical research and training projects in over 400 non-Federal institutions through the use of grants and contracts. The vast majority of these awards are made to universities and medical schools.

5. *Intramural research.*—The Institute's intramural research programs include basic and applied laboratory and clinical research and epidemiological studies of the fundamental biological processes underlying the major diseases within the Institute's purview.

6. *Direct operations.*—This activity provides support for the review, approval and management of the Institute's grant and contract programs.

7. *Program management.*—This activity provides support for overall administrative management and scientific direction of Institute programs.

77.00 Adjustments in expired accounts.....	-740		
90.00 Outlays.....	175,092	183,577	210,118

<sup>1</sup> Includes capital investment as follows: 1978, \$3,170 thousand; 1979, \$4,174 thousand; 1980, \$3,600 thousand.

1. *Communicative disorders.*—This program supports research on improving the diagnosis, treatment, and prevention of diseases and disorders which affect hearing, language, and speech.

2. *Neurological disorders.*—Research is directed toward neurological diseases; including epilepsy, muscular disorders, multiple sclerosis, Huntington's disease, minimal brain dysfunction, neurological aspects of learning and behavior, slow virus infections of the central nervous system, Parkinson's disease, and genetic and developmental disorders.

3. *Stroke, nervous system trauma.*—Research is directed toward cerebrovascular disease and stroke, head

injury, spinal cord injury, nerve growth and regeneration, and brain tumors.

4. *Fundamental neurosciences.*—Support of research in the fundamental neurosciences explores the mechanisms responsible for normal functioning of the human nervous system and the nature of its diseases and disorders.

5. *Intramural research.*—Research efforts of this program embrace the entire range of neurological and communicative disorders. The scientific staff will pursue the most promising lines of research in neurochemistry, neuropharmacology, immunology, and virology.

6. *Direct operations.*—This activity supports the scientific direction, administration, and review and approval functions of the Institute's research programs.

7. *Program management.*—This activity supports the immediate Office of the Director and those staff units which assist the Director in management and direction of the total program.

<sup>1</sup> Includes capital investment as follows: 1978, \$1,685 thousand; 1979, \$960 thousand; 1980, \$840 thousand.

1. *Immunology, allergic and immunologic diseases.*—Research is supported pertaining to the causes, characteristics, mechanisms of disease production, prevention, control and treatment of a wide variety of diseases believed to result from abnormalities, malfunctions, or inappropriate responses of the body's complicated immune mechanisms.

2. *Microbiology and infectious diseases.*—Research is supported pertaining to the causes, characteristics, mechanisms of disease production, and prevention and control in three major areas—bacterial and fungal diseases, viral diseases, and parasitic diseases.

3. *Intramural research.*—Intramural efforts embracing both basic and applied research in allergic, immunologic, and infectious diseases are supported.

4. *Direct operations.*—Includes such activities as the scientific and administrative management of grants and contracts, program evaluation, and general expense.

5. *Program management.*—Includes funds and positions to provide overall direction and management for the Institute.

<sup>1</sup> Includes capital investment as follows: 1978, \$52 thousand; 1979, \$70 thousand; 1980, \$70 thousand.

1. *Cellular and molecular basis of disease program.*—The cellular and molecular basis of disease program provides a central point within NIH to which scientists conducting cellular and molecular research can turn for program support in the search for a deeper understanding of disease.

2. *Genetics.*—The genetics program is directed toward gaining a better understanding of the fundamental processes and mechanisms of inheritance in health and disease. Its ultimate objectives are the prevention, therapy, and cure of genetic ills in man, including those multifactorial diseases with a strong hereditary component, such as diabetes, atherosclerosis, hypertension, and schizophrenia.

3. *Pharmacology-toxicology.*—The pharmacology-toxicology program embraces all aspects of drug-related research from synthesis and development of new pharmacologically active chemical structures, through elucidation of the mechanisms and sites of action of drugs, to improvement of therapeutic approaches. The multidisciplinary nature of drug research calls for the participation of chemists, basic and clinical pharmacologists and toxicologists, and computer scientists, as well as clinical specialists in diverse areas.

4. *Physiology and biomedical engineering.*—The physiology and biomedical engineering program is directed toward broadly based studies in physiology; coordinated basic and clinical investigations relating to burns, trauma, and anesthesiology; and the application of engineering science to the solution of significant physiological and biomedical problems.

5. *Minority access to research careers (MARC).*—The minority access to research careers program is designed

to increase the number of biomedical scientists from minority groups. In addition to strengthening the science teaching at minority colleges by offering fellowships to faculty members who wish to expand their background, support is provided for pregraduate training to students intending to go on to graduate study in the biomedical sciences.

## NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

To carry out, except as otherwise provided, title IV and title X of the Public Health Service Act with respect to child health and human development, [\$114,305,000, including 400 full-time permanent positions] \$204,381,000. (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through Sept. 30, 1979, that provides funding at the current rate.

## Program and Financing (in thousands of dollars)

77.00	Adjustments in expired accounts .....	170		
90.00	Outlays .....	166,715	156,696	191,090

<sup>1</sup> Includes capital investment as follows: 1978, \$944 thousand; 1979, \$600 thousand; 1980, \$600 thousand.

1. *Research for mothers and children.*—The goal of research for mothers and children is to provide for a healthy adult population by improving the health and well-being of mothers, infants, and families. The programs for mothers and children encompass research on the problems of pregnancy, infancy, mental retardation and developmental disabilities, human learning and behavior, and developmental biology and nutrition. Particular emphasis will be placed on high priority initiatives related to research for the healthy infant. Included is research on high risk pregnancy, with special attention on adolescent pregnancy and diabetes in pregnancy, congenital malformations, Sudden Infant Death Syndrome and mental retardation. Continued emphasis will also be placed on developmental dyslexia and other learning disorders and nutrition.

2. *Population.*—Population and reproduction research includes contraceptive development and evaluation, the behavioral aspects which lead to decision-making processes involving reproduction and population dynamics, and fundamental research in reproductive biology. Special concern will be given to research on the reproductive processes. Included will be continuing effort to develop new drugs, devices, and other methods for fertility regulation that are safe, effective, inexpensive, reversible, and acceptable to various population groups; as well as research on the alleviation, amelioration, or cure of infertility and reproductive diseases and disorders; and concern with adolescent pregnancies.

3. *Intramural research.*—The intramural research program, which includes biometry and epidemiology, comprises the Institute's own staff and facilities for conducting research in maternal and child health, and population and reproductive biology.

4. *Direct operations.*—This activity supports administrative and scientific management of the Center for Research for Mothers and Children and the Center for Population Research, program planning and evaluation, research conferences, and scientific and administrative review and management of grants and contracts.

5. *Program management.*—The overall administration, direction, and coordination of the Institute's programs are provided for in this activity.

\* Includes capital investment as follows: 1978, \$938 thousand; 1979, \$1,332 thousand; 1980, \$1,080 thousand.

1. *Aging.*—This program supports grants, contracts, and training awards which have as their goal the development of knowledge about the aging process and the improvement of the health status of the elderly.

2. *Intramural research.*—This program supports the work of approximately 100 government scientists and distinguished visiting researchers. The primary goal of this research is to improve the quality of life for older persons through development of methods to reduce or prevent physiological and psychological disabilities.

3. *Direct operations.*—This activity provides for the review, approval, monitoring and evaluation of grants and contracts; the coordination of related aging research within other Federal agencies; the conduct of contract supported information dissemination and public education functions; and other essential services such as the NIH accounting system.

4. *Program management.*—This activity provides the resources necessary to carry out the overall management and scientific direction of the Institute. Among the functions performed are financial, personnel and administrative management, program planning, coordination of the Institute's activities, and the review of current and proposed programs.

<sup>1</sup> Includes capital investment as follows: 1978, \$614 thousand; 1979, \$644 thousand; 1980, \$733 thousand.

1. *Retinal and choroidal diseases.*—The retina program supports research to acquire knowledge of how both the retina functions normally and how the retina is damaged by disease; applied studies to develop methods of prevention, early detection, and treatment of retinal disease; and development of animal models of various retinal diseases to facilitate research.

2. *Corneal diseases.*—Corneal disease research is aimed at reducing the impact of corneal diseases through improved methods of treatment, prevention, and diagnosis.

3. *Cataract.*—Cataract research attempts to identify the causes of cataract and develop methods for its prevention and improved treatment.

4. *Glaucoma.*—Glaucoma research studies the cause of glaucoma, development of techniques for prevention and early detection of glaucomatous disease and improved methods of treatment.

5. *Sensory-motor disorders and rehabilitation.*—This program supports laboratory and clinical studies on the development and function of those activities of the brain and the eye muscles that make vision possible. The goal of these efforts is a better understanding of the causes of low vision and blindness which cannot be traced to specific dysfunctions of the eye itself.

6. *Intramural research.*—Laboratory and clinical research is focused on developing new and improved techniques for the prevention, diagnosis, and treatment of vision disorders. Also included here is the Office of Biometry and Epidemiology which conducts studies in conjunction with collaborative investigations and other Institute programs.

7. *Direct operations.*—This activity provides funds for salaries and other expenses connected with personnel engaged in activities relevant to the award of research grants and contracts.

8. *Program management.*—This activity provides support for the overall administrative management and scientific direction of Institute programs.

Food and Drug Administration.....	60

1. *Prediction, detection, and assessment of environmentally caused diseases and disorders.*—This activity supports research which will lead to improved ability to predict, detect, and assess the health effects of various levels and kinds of environmental pollutants and toxic agents present in the environment.

2. *Mechanisms of environmental diseases and disorders.*—This activity supports research by grants and contracts which will improve medicine's ability to prevent and treat diseases and disorders resulting from exposure to toxic environmental agents. Research will improve understanding of mechanisms of toxicity and metabolism and, therefore, allow development and assessment of preventive and therapeutic measures.

3. *Environmental health research and manpower development resources.*—This activity provides for the development of research and manpower resources

General and special funds—Continued

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES—  
Continued

throughout the Nation in order to improve and expand efforts on environmental health problems. Supported under this authority are the environmental health sciences centers, marine biomedical research centers, and postdoctoral training in environmental sciences.

4. *Intramural research.*—This effort consists of a range of complex investigations and studies with major emphases in toxicology, genetics, pharmacology, physiology, biophysics, and biostatistics.

5. *Direct operations.*—This activity supports the scientific and administrative management of the Institute's grants program and the Institute's assessment for program evaluation and general expense.

6. *Program management.*—This activity provides for the overall administration, coordination, and direction of the varied programs and activities of the Institute.

Average salary, grades established by act of July 1, 1944 (42 U.S.C. 207).....	\$23,459	\$25,139	\$25,803
Average salary, grades established under section 208(g) of the PHS Act (42 U.S.C. 210(g)).....	\$47,171	\$47,500	\$47,500
Average salary of ungraded positions.....	\$16,292	\$17,622	\$18,348

RESEARCH RESOURCES

To carry out, except as otherwise provided, [section] sections 301 and 472 of the Public Health Service Act with respect to research resources and general research support grants, [\$153,649,000, including 80 full-time permanent positions] \$154,199,000. Provided, That none of these funds, with the exception of funds for the Minority Biomedical Support program, shall be used to pay recipients of the general research support grants programs any amount for indirect expenses in connection with such grants. (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through Sept. 30, 1979, that provides funding at the current rate.

Program and Financing (in thousands of dollars)

40.00 Budget authority (appropriation).....	145,095	154,164	154,199
<b>Relation of obligations to outlays:</b>			
71.00 Obligations incurred, net.....	144,839	154,164	154,199
72.40 Obligated balance, start of year.....	83,823	97,689	107,303
74.40 Obligated balance, end of year.....	-97,689	-107,303	-109,677
77.00 Adjustments in expired accounts.....	-1,090		
90.00 Outlays.....	129,883	144,550	151,825

<sup>1</sup> Includes capital investment as follows: 1978, \$57 thousand; 1979, \$52 thousand; 1980, \$35 thousand.

The Division of Research Resources develops and supports specialized transdisciplinary research resources in the Nation's academic and research institutions. These resources are used by Public Health Service grantees and contractors in their biomedical and behavioral research efforts, in basic, applied, and developmental research projects.

1. *Clinical research.*—This program develops and supports general clinical research centers which are located in university-affiliated hospitals. These funds provide the unique settings required for the performance of controlled studies by clinical investigators. Specially trained research nurses, dietitians, and support personnel, and special information handling systems are just two important characteristics of the centers.

2. *Biotechnology research.*—This program provides, develops, and supports unique technological resources such as mass spectroscopy, high voltage electron microscopy, nuclear magnetic resonance technology, bioengineering resources, and many complex state-of-the-art

computer applications to biomedical research. These one-of-a-kind resources offer investigators opportunities to collaborate with resource personnel to discover new and more effective applications of these technologies to their research problems.

3. *Laboratory animal sciences and primate research.*—This activity supports the seven Primate Research Centers. It develops and supports animal diagnostic laboratories, new animal models of human disease, special unique colonies of research animals, primate breeding initiatives, specifically trained animal directors, and other vital research resources.

4. *Biomedical research support.*—This program makes grants to health professional schools, hospitals, universities and research institutions for research and research resource activities concerned with the development of new knowledge about fundamental processes related to health. The program's flexible support funding is used to improve the quality of biomedical research, increase its productivity, reduce its cost, provide critical research support on short notice without costly delays, and support young investigators. The biomedical research development grant program helps to establish the institutional research capability necessary for significant involvement in biomedical and/or behavioral research in new, small, and developing institutions.

5. *Minority biomedical support.*—This program's mission is to increase the number of minority faculty, students, and investigators engaged in biomedical research. Institutional grants provide support for biomedical and behavioral research projects carried out by faculty and investigators. Student research participants receive invaluable training and experience through direct research involvement.

6. *Direct operations.*—This activity supports scientific and administrative staff who manage the Division's research resource grants and contracts.

7. *Program management.*—This program provides the administrative management and scientific planning, direction and coordination of the Division's programs.

<sup>1</sup> Includes capital investment as follows: 1978, \$2,505 thousand; 1979, \$2,130 thousand; 1980, \$2,130 thousand.

1. *Medical library assistance.*—This activity funds six grant and contract programs which are designed to support the performance of the Nation's medical libraries by providing fiscal and other assistance in developing better health information services.

2. *Direct operations.*—This includes the following activities:

(a) *The Lister Hill National Center for Biomedical Communications.*—This research and development component of the Library is responsible for exploring the application of advances made in the fields of computer and communications technology to health information handling, processing and transfer problems.

(b) *The National Medical Audiovisual Center.*—The Center is responsible for stimulating the development and use of nonprint media in furtherance of national health goals.

(c) *Library operations.*—This component acquires, organizes and maintains the Library's archival and reference collection of biomedical literature. It also provides access to that collection through the provision of several services including operation of a nationwide on-line computerized bibliographical retrieval service.

(d) *Toxicology information program.*—This activity operates specialized data bases on drugs and chemicals toxic to man. It collects and organizes toxicology data from the files of collaborating organizations and prepares and publishes bibliographies and reports, operates on-line files, and has the responsibility of coordinating toxicology activities for HEW.

(e) *Program management.*—This activity provides the overall executive direction and administrative management necessary for the effective operation of all NLM activities. It also coordinates the NLM's international programs and provides funds for NLM's payment to the NIH management fund.

<sup>1</sup> Includes capital investment as follows: 1978, \$4,889 thousand; 1979, \$4,471 thousand; 1980, \$6,890 thousand.

The NIH management fund was established to facilitate the conduct of NIH central operations. Fund activities are financed primarily from advances and reimbursements from the several institutes. Formulas for determining each institute's contribution reflect usage of services provided by the fund.

1. *Computer services* provide a central scientific research and computational resource in support of the NIH programs.

2. *Research services* provide centralized and collaborative engineering, scientific, and technical support for research activities.

3. *Engineering services* provide engineering, architectural, craft, and labor services required for all of the Institutes.

4. *Clinical services* provide facilities and services, other than physician care, for an integrated operation of its 541-bed facility servicing nine institutes; developing and recommending policies and rules for the protection and welfare of patients; and conducting research in methods and techniques of hospital administration.

5. *Grant review and approval* provides staff support services in formulating National Institutes of Health grant and award policies and procedures relating to research and training programs; serves as a staff resource for central receipt and referral of all applications for Public Health Service research and training grant support; provides for the initial scientific review of NIH research and training grant applications; and collects, analyzes, and evaluates management and program data needed in the management of the extramural programs.

6. *Administrative services* include plant and office housekeeping and protection and security services.

7. *Standard level user charges* provide for the payment to the General Services Administration for rental space occupied by the National Institutes of Health.

The NIH Service and supply fund provides a single means for consolidated financing and accounting of business-type operations involving the sale of services and commodities to customers.

1. *Administrative services.*—These services include the sale of commodities from inventory, printing and reproduction services, and other similar services.

2. *Data processing services.*—This central facility is expected to provide data systems design and consultation, key punching, computer programing, and computer processing services to NIH research components.

3. *Instrumentation.*—The biomedical instrumentation and engineering branch maintains, repairs, and fabricates scientific laboratory apparatus and equipment for use in the research laboratories at NIH.

4. *Research animals.*—The NIH animal facilities provide small and large research animals to the research laboratories.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

Federal Funds

General and special funds:

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH\*

\*See "Legislative Program" (end of this chapter) and Part III of this Appendix for additional information.

For carrying out the Public Health Service Act with respect to mental health, the Community Mental Health Centers Act, as amended (42 U.S.C. 2681, et seq.), [and] the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, as amended, [\$741,022,000] and the Drug Abuse Office and Treatment Act of 1972, as amended, \$916,510,000. (Department of Health, Education, and Welfare Appropriation Act, 1979; additional authorizing legislation to be proposed for \$301,104,000.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through September 30, 1979, that provides funding at the current rate.

Program and Financing (in thousands of dollars)

Identification code 75-1361-0-1-550	1978 actual	1979 est.	1980 est.
<b>Program by activities:</b>			
<b>Direct program:</b>			
1. Mental health:			
(a) Research.....	106,433	131,223	160,168
(b) Training.....	80,783	90,400	89,354

Note.—Includes capital investment as follows: 1978, \$2,252 thousand; 1979, \$2,107 thousand; 1980, \$1,953 thousand.

1. *Mental health*—(a) *Research*.—This activity supports extramural mental health research through grants and contracts and intramural research on the campus of the National Institutes of Health and at Saint Elizabeths Hospital.

(b) *Training*.—This activity supports individuals and institutions engaged in mental health training through grants and fellowships.

(c) *Services*.—This activity supports community mental health services and State mental health activities. New mental health services legislation will be proposed in 1979. In 1979, \$30,489 thousand will be spent under these authorities on new community mental health services. In 1980, additional funds are being requested under these authorities for State and community activities, as shown in proposed legislation.

(d) *Management and information*.—This activity supports the staff and related costs to administer all of the Institute's grants and contracts programs. This activity also supports the Institute's national mental health information programs, as well as statistical and biometric studies.

2. *Drug abuse*—(a) *Research*.—This activity supports extramural drug abuse research through grants and contracts and an intramural research program.

(b) *Training*.—This activity supports individuals and institutions engaged in drug abuse training through contracts, grants, demonstration, and fellowships.

(c) *Services*.—This activity supports community-based drug abuse treatment, demonstration, and prevention activities through grants and contracts.

(d) *Management and information*.—This activity supports the staff and related costs to administer the Institute's grants and contracts programs. This activity also supports the National Clearinghouse on Drug Abuse Information and related statistical and data gathering efforts.

3. *Alcohol abuse*—(a) *Research*.—This activity supports extramural alcohol abuse research through grants and contracts and an intramural research program.

(b) *Training*.—This activity supports individuals and institutions engaged in alcohol abuse training through grants and fellowships.

(c) *Services*.—This activity supports community-based alcohol abuse treatment, demonstration, and prevention activities through grants and contracts. It also supports implementation of the Uniform Alcoholism and Intoxication Treatment Act.

(d) *Management and information*.—This activity supports the staff and related costs to administer the Institute's grants and contracts programs. This activity also supports the National Clearinghouse for Alcohol Information and related statistical and data gathering efforts.

4. *Program management*.—This activity provides staff and related support for the overall direction and management of the agency.

Object Classification (in thousands of dollars)

Note.—Includes capital investment as follows: 1978, \$1,906 thousand; 1979, \$1,562 thousand; 1980, \$1,718 thousand.

Saint Elizabeths Hospital provides treatment and care for the mentally ill who are either beneficiaries of the Federal Government or residents of the District of Columbia. Programs are financed by Federal appropriations covering treatment and care of Federal beneficiaries and by reimbursements made to the hospital for services rendered other patient groups, principally residents of the District of Columbia.

The Federal Government intends to develop with the District of Columbia a long-term financial plan for the hospital and to transfer an accredited facility to the District by 1982.

<sup>1</sup> Includes capital investment as follows: 1978, \$781 thousand; 1979, \$828 thousand; 1980, \$499 thousand.

<sup>2</sup> District of Columbia civil court action 74-52 dictates reappropriation of \$260 thousand in 1978; Public Law 95-355 provides for reappropriation of \$39,940 thousand from 1978 to 1979.

**Status of Loan Guarantees (in thousands of dollars)**

	1978 actual	1979 est.	1980 est.
Cumulative balance of guarantees outstanding:			
Loan guarantees outstanding, start of year.....	67,460	67,460	67,460
Loan guarantees outstanding end of year ...	67,460	67,460	67,460

1. **Health planning.**—This activity provides Federal funds to support local and State health planning agencies. These agencies are charged with improving the quality and delivery of health services, containing health costs, and preventing the duplication of health services.

2. **Health professions education.**—This activity provides institutional support grants and service-connected student assistance designed to improve the specialty and geographic distribution of health professionals. Capitation grants for health professions schools will be

terminated in 1980 due to the current and projected improved supply of health professionals.

3. *Health facilities.*—This program provides interest subsidy payments to meet previous commitments on long-term guaranteed loans to medical facilities and health professions schools and default payments on federally guaranteed loans.

4. *Program management.*—This activity supports the staff and operating expenses related to the program direction and extramural management of health resources programs.

Title VII, part C of Public Health Service Act established a revolving fund from which health professions schools could borrow in order to provide loans to their students. Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

In 1980, provisions are made for the following Federal payments: \$110 thousand to GNMA, which represents the difference between the 5.25% interest rate earned by the student loan paper (promissory notes) and the 6.38% rate paid by GNMA on the \$9,729 thousand worth of paper (participation certificates) held by the public; \$511 thousand to GNMA which represents the 5.25% interest due on \$9,729 thousand worth of pledged notes (school promissory notes) held as collateral; \$874 thousand to the U.S. Treasury on the difference between the U.S. Treasury interest rate and that paid by the schools on \$16,829 thousand loaned to the schools.

The new budget authority required for insufficiencies is computed as follows (in thousands):

	1978 actual	1979 estimate	1980 estimate
Interest accrued on participation certificates .....	687	617	621
Interest accrued on an equal number of loans in the pool.....	-602	-507	-511
Insufficiency.....	85	110	110
Financed by: Budget authority: Sales authorized in 1968 Appropriation Act (definite appropriation) ..	85	110	110

Title VIII, part B, of the Public Health Service Act established a revolving fund from which schools of nursing could borrow in order to provide loans to their

students. Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

In 1980, provision is made for the following Federal payment: \$505 thousand to U.S. Treasury on the difference between U.S. Treasury interest rate and that paid by the schools on \$5,944 thousand loaned to the schools.

Title VI of the Public Health Service Act established a loan guarantee and loan fund for medical facilities in the Treasury, without fiscal year limitation, to discharge responsibilities under guarantees; for payment of interest on the loans to nonprofit sponsors which are guaranteed; for direct loans to public agencies which are sold and guaranteed; for payment of interest on

**Public enterprise funds—Continued**

**MEDICAL FACILITIES GUARANTEE AND LOAN FUND—Continued**

direct loans which are sold and guaranteed; and for repurchase of direct loans which have been sold and guaranteed.

The National Health Planning and Resources Development Act, Public Law 93-641, also established a loan guarantee and loan fund which is being consolidated with the aforementioned fund. This fund authorizes direct loans to nonprofit sponsors as well as public agencies with guaranteed loans to nonprofit sponsors.

The fund consists of \$50 million restricted for use in fulfilling guarantees in event of default; \$30 million serves as a revolving amount from which direct loans are made; and funds required to provide for interest subsidy payments on both direct and guaranteed loans.

The request for \$45 million for interest subsidies in 1980 is required to honor the interest subsidies for loan commitments made under title VI.

About \$1.3 billion in direct and guaranteed loans will be outstanding in 1980.

\* Funds for these activities in the amount of \$2,459 thousand in 1979 and \$5,929 thousand in 1980 are included in subactivity 1(d).

\* Includes capital investment as follows: 1978, \$737 thousand; 1979, \$762 thousand; 1980, \$929,000.

1. *Program operations*—(a) *Health statistics*.—This activity develops and maintains general purpose health data programs and the cooperative health statistics system.

(b) *Health services research*.—This activity supports research on problems in the delivery of health services. Activities are carried out through intramural and extramural research.

(c) *Health maintenance organizations*.—This program administers grants, contracts, and loans to support the

development of prepaid group practices and includes HMO qualification and compliance activities.

(d) *Special health programs*.—This activity provides support for the physical fitness and sports program, the health information and health promotion program and the smoking and health program.

(h) *Adolescent health*.—This activity provides for an adolescent pregnancy initiative to help prevent unwanted initial and repeat pregnancies among teenagers, and to provide support services to pregnant adolescents and adolescent parents to help them become productive, independent contributors to family and community life.

(i) *Health care technology*.—This activity provides a central focus for the evaluation of the benefits, risks, cost effectiveness, and societal side effects of new health care technologies.

2. *Public Health Service management*—(a) *Regional management*.—This activity provides the overall management capability to administer the decentralized health programs of the Public Health Service.

(b) *Program direction and support services*.—This activity provides staff support for the Assistant Secretary for Health.

Scientific activities overseas (special foreign currency program) are supported entirely by foreign currencies owned by the United States abroad. These currencies are available for the Department's use in those countries where the supply of U.S.-owned currency exceeds normal U.S. Government needs for at least 2 years.

The general objective of this program is to support health research and related activities which will contribute to U.S. health programs, while being of mutual interest to the host country, its institutions, and scientists.

The 1980 request of \$6,520 thousand is required to meet expected requirements in Egypt, Pakistan, and India.

Loan guarantees repaid or prepaid.....	-1,213		
Loan guarantees outstanding, end of year.....	2,282	7,282	57,282

<sup>1</sup> Loan guarantees include new construction authority, Public Law 95-559.

This is a public enterprise revolving fund. Direct loans will be sold to the Federal Financing Bank to provide funds for new loans, and loans thus sold will be guaranteed. In 1975, \$35,000 thousand was appropriated to the Health Services Administration as capital for the revolving fund.

It is anticipated that 36 loans averaging \$2,500 thousand per loan will be made during 1979 and 45 loans averaging the same amount will be made during 1980 for the regular loan program. In addition, to implement the new authority to provide loans and loan guarantees for acquisition and construction of ambulatory health care facilities, about 25 loans averaging \$2,500 thousand per loan will be made during 1980.

This fund finances common user supply and service operations of PHS. It is reimbursed from the appropriations supporting the programs benefited (42 U.S.C. 231).

1. *Supply distribution sales.*—This activity maintains inventories of medical stock and supplies to meet, in part, the requirements of PHS and other Government agencies.

2. *Data management services.*—This activity provides data processing services for PHS and other Federal agencies.

3. *Fiscal services.*—This activity provides accounting services for three of the PHS agencies and the Office of the Assistant Secretary for Health.

4. *Parklawn services.*—This activity provides centralized services to occupants of the Parklawn complex consisting of procurement, motorpool, Parklawn Library, tort claims, printing and reproduction, mail and messenger, and building and space management.

5. *Central personnel services.*—This activity provides centralized training and education services for PHS employees housed in the Parklawn complex.

6. *Commissioned officer personnel.*—This activity represents the personnel management program for the PHS Commissioned Corps.

HEALTH CARE FINANCING ADMINISTRATION

Federal Funds

General and special funds:

GRANTS TO STATES FOR MEDICAID\*

\*See "Legislative Program" (end of this chapter) and Part III of this Appendix for additional information.

For carrying out, except as otherwise provided, title XIX of the Social Security Act, **[\$11,250,000,000] \$12,616,799,000.**

For making, after June 30 of the current fiscal year, payments to States under title XIX of the Social Security Act, for the last three months of the current fiscal year; and for making after July 31 of the current fiscal year, payments for the first quarter of the succeeding fiscal year; such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title to be charged to the subsequent appropriation therefor for the current or succeeding fiscal year.

In the administration of title XIX of the Social Security Act, payments to a State under such title for any quarter in the period beginning July 1 of the prior year and ending September 30 of the current year may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which a subsequently approved plan was submitted.

Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year. (*Department of Health, Education, and Welfare Appropriation Act, 1979.*)

**Medicaid vendor payments.**—The purpose of the medicaid program, which became effective January 1966, is to assist States in providing medical care to their low-income population. Federal matching payments for medical assistance under title XIX of the Social Security Act (medicaid) are authorized for States having plans approved by the Department of Health, Education, and Welfare.

All AFDC recipients are eligible for medicaid benefits. In addition, of the 53 States, territories, and the Commonwealth of Puerto Rico with medicaid programs, 36 jurisdictions provide coverage to all persons receiving supplemental security income (SSI) payments. In 17 jurisdictions medical coverage of SSI recipients is limited to those who can meet additional eligibility criteria, although those persons may deduct their medical expenses from their incomes to establish eligibility. Also, 32 jurisdictions have elected to cover medically needy persons.

**2. State and local administration.**—Efforts to assist States to improve administration of the medicaid program is a major thrust of HEW. Assistance to States in the establishment of more effective management systems is expected to help curtail provider fraud and abuse. The 1980 outlay figures include a one-time savings of \$243 million as a result of a change in the way States are reimbursed for medicaid expenses.

The following data include the proposed supplemental appropriation for 1979.

This appropriation provides for payments from Federal funds to the health care trust funds for certain types of benefits and related administrative costs not financed by contributions from workers and employers. Part of the cost of utilization reviews by professional standards review organizations and delegated hospitals will be paid to the trust funds by this appropriation. The 1980 request is for \$7,969,906 thousand and covers the following payments:

1. **Military services credits (HI).**—A payment of \$141,000 thousand to the Federal hospital insurance trust fund is requested as reimbursement for benefits based on noncontributory military service credits of veterans of World War II and certain veterans of the post-World War II period. Sections 217(g) and 229(b) of the Social Security Act authorize such payments, including reimbursement for administrative expenses and interest lost to the trust funds.

2. **Supplementary medical insurance (SMI).**—An estimated \$7,097,000 thousand will be required in 1980 to finance the Government's contribution to the Federal Supplementary Medical Insurance Trust Fund. Federal payments, combined with premiums from enrollees and interest earned by the Supplementary medical insurance trust fund, must be sufficient to finance the estimated incurred cost of benefits and administration. The standard monthly premium rate, which is updated every July, will be increased to \$8.70 effective July 1979, and is expected to be \$9.50 effective July 1980.

3. **Hospital insurance for uninsured.**—A payment of \$696,906 thousand to the Federal hospital insurance trust fund is budgeted for 1980 to cover the costs of hospital and related care for certain individuals aged 65 and over who are not insured under the social security or railroad retirement systems, but who meet certain transitional insured status requirements for hospital insurance.

4. **Professional standards review organizations (PSRO's) activities.**—Funds are budgeted for review of the quality and appropriateness of health care services provided under the medicaid and maternal and child health programs. Appropriated funds are required to

General and special funds—Continued

**[QUALITY CARE MANAGEMENT, RESEARCH AND ADMINISTRATION] PROGRAM MANAGEMENT\***

\*See "Legislative Program" (end of this chapter) for additional information.

For carrying out, except as otherwise provided, titles XI, XVIII, and XIX of the Social Security Act, and sections 1526 and 1533(d) of the Public Health Service Act, **[\$106,612,000] \$132,195,000**, together with not to exceed **[\$802,899,000] \$836,819,000**, to be transferred to this appropriation as authorized by section 201(g)(1) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: *Provided*, That such amounts as are required shall be available to pay travel expenses either on an actual cost or commuted basis, to an individual for travel incident to medical examinations, and to parties, their representatives and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands to reconsideration interviews and to proceedings before administrative law judges under title XVIII of the Social Security Act: *Provided further*, That \$20,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved. (*Department of Health, Education, and Welfare Appropriation Act, 1979.*)

The hospital insurance program affords protection against the high costs of hospital and related care to most individuals age 65 and over, and to disabled people under age 65 entitled for at least 24 months to social security or railroad retirement cash benefits. The program also covers treatment of end-stage renal disease

for people entitled to monthly social security benefits, for insured workers, and for spouses or dependent children of such insured or entitled individuals.

For persons on the social security and railroad retirement rolls, the hospital insurance program is financed by contributions based on earnings from workers, employers, and self-employed individuals. The maximum taxable earnings base is the same for the hospital insurance program as for the social security old-age, survivors, and disability insurance programs. Under present law, the rate applied to earnings up to this maximum was 1.0% through calendar year 1978. Beginning January 1, 1979, the rate increased to 1.05%. Costs for uninsured persons 65 or older in 1974, who met certain transition insured status requirements, are financed from general revenues of the Treasury. Uninsured persons reaching age 65 who cannot be covered under this provision of the law can enroll in the program on a voluntary basis, but must pay the full cost of the protection. The monthly rate was \$63 for the year beginning July 1, 1978. Effective July 1, 1979, the rate is expected to increase to \$69; and on July 1, 1980, to \$78.

1. *Benefit payments.*—The hospital insurance program provides protection against the cost of inpatient hospital services, posthospital home health services, and posthospital skilled nursing facility services, with specified deductibles and coinsurance amounts. Benefit payments beginning in 1978 also include funding of the direct review costs for PSRO's. The following table shows comparative data for 1978 through 1980 (in thousands) on hospital insurance beneficiaries and on benefit payments classified by type of coverage:

	1978 actual	1979 estimate	1980 estimate
Beneficiaries: Persons with hospital insurance protection (average):			
Aged .....	23,457	23,896	24,337
Disabled .....	2,787	2,967	3,127
Beneficiaries receiving reimbursed services:			
Aged .....	5,325	5,460	5,590
Disabled .....	700	750	800
Benefit payments: For inpatient hospital services:			
Aged .....	14,696,132	16,964,600	19,344,000
Disabled .....	1,935,000	2,325,000	2,744,000
For skilled nursing facility services:			
Aged .....	380,000	434,000	468,000
Disabled .....	15,000	18,000	20,000
For home health services:			
Aged .....	361,000	460,000	548,000
Disabled .....	28,000	37,000	47,000
Total benefit payments:			
Aged .....	15,437,132	17,858,600	20,360,000
Disabled .....	1,978,000	2,380,000	2,811,000
Total .....	17,415,132	20,238,600	23,171,000

The growth in benefit payments from 1978 to 1980 results primarily from increases in the cost of medical services and in the size of the covered population.

2. *Administration.*—This activity reflects administrative expenses attributable to the hospital insurance program by the Health Care Financing Administration, the Social Security Administration, other components of the Department of Health, Education, and Welfare, and by the Treasury Department.

3. *Experiments and demonstrations.*—The Health Care Financing Administration supports experiments

The supplementary medical insurance program affords protection against the costs of physician services and certain other medical services. Most individuals age 65 and over are eligible for this protection, and about 95% of those eligible have elected coverage. Disabled people under age 65 entitled for at least 24 months to monthly social security or railroad retirement cash benefits also are eligible for this protection. The program also covers treatment of end-stage renal disease for eligible people who elect to enroll.

The cost of supplementary medical insurance is financed by premium payments from enrollees together with contributions from the general revenues of the Treasury. The Secretary of Health, Education, and Welfare is required by law to promulgate the standard monthly premium rate to be paid by enrollees. The SMI premium rate can rise by no more than the percentage

by which cash benefits increased since the last premium raise. Effective July 1, 1978, the premium rate has been \$8.20. The rate for enrollees included in this budget is \$8.70, effective July 1, 1979, and an estimated \$9.50, effective July 1, 1980.

1. *Benefit payments.*—The supplementary medical insurance program provides protection against the cost of physician services, home health services not covered under the hospital insurance program, outpatient services, and certain other medical costs, with specified deductibles and coinsurance. The following table shows comparative data for 1978 through 1980 (in thousands) on supplementary medical insurance beneficiaries and benefit payments, classified by type of coverage.

Beneficiaries:	1978 actual	1979 estimate	1980 estimate
Persons enrolled (average):			
Aged.....	23,312	23,870	24,417
Disabled.....	2,510	2,671	2,825
Beneficiaries receiving reimbursed services:			
Aged.....	14,076	14,866	15,622
Disabled.....	1,527	1,676	1,822
Benefit payments:			
For physician services:			
Aged.....	\$4,479,252	\$5,142,000	\$5,909,000
Disabled.....	546,000	656,000	779,000
For home health services:			
Aged.....	147,000	198,000	235,000
Disabled.....	12,000	16,000	19,000
For outpatient services:			
Aged.....	665,000	916,000	1,105,000
Disabled.....	456,000	637,000	756,000
For other medical and health services:			
Aged.....	498,000	604,000	711,000
Disabled.....	49,000	59,000	75,000
Total benefit payments:			
Aged.....	5,789,252	6,860,000	7,960,000
Disabled.....	1,063,000	1,368,000	1,629,000
Total	6,852,252	8,228,000	9,589,000

The growth in benefit payments from 1978 to 1980 results primarily from increases in the cost and utilization of covered services and in the size of the covered population.

2. *Administration.*—This activity reflects administrative expenses attributable to the supplementary medical insurance program by the Health Care Financing Administration, the Social Security Administration, other components of the Department of Health, Education, and Welfare, the Treasury Department, the Railroad Retirement Board, and the Civil Service Commission.

3. *Experiments and demonstrations.*—The Health Care Financing Administration supports experiments and demonstration projects to improve the efficiency of the medicare program.

Health Care Financing Administration is responsible for administering the health insurance program for the aged and disabled. The principal costs for administration are financed by this appropriation for 1978 and will be financed by the Quality Care Management, Research and Administration appropriation in 1979 and 1980; however, there are certain costs of other components of the Department of Health, Education, and Welfare and other Federal agencies which relate to administration of this program and are shown elsewhere in the budget.

The administrative costs budgeted for this program cover the claims payment functions performed by the contractors, services performed by the State agencies in certifying and consulting with providers of services, and all work performed by the Health Care Financing Administration in directing the program.

ELEMENTARY AND SECONDARY EDUCATION\*

\*See Part III for additional information.

For carrying out, to the extent not otherwise provided, title I, [part] parts A [(\$3,077,132,000)] and B (\$3,477,132,000), title II, title III, part H, title IV, part C, title V, part B, title VII and [title IX] section 922 of the Elementary and Secondary Education Act; [title VII of the Education Amendments of 1974;] the Communications Act

of 1934, as amended; the Alcohol and Drug Abuse Education Act; Part B of the Headstart-Follow Through Act; and the General Education Provisions Act; [and Public Law 92-506, \$3,448,382,000] \$3,952,882,000: Provided, That of the amounts appropriated above the following amounts shall become available for obligation on July 1, [1979] 1980, and shall remain available until September 30, [1980] 1981: title I, [part A (\$3,077,132,000)] parts A and B (\$3,477,132,000 of which \$400,000,000 shall be for the purpose of section 117) title IV, part C [(\$190,000,000)] (\$146,400,000), title V, part B (\$51,000,000) of the Elementary and Secondary Education Act and section 417(a)(2) of the General Education Provisions Act [(\$1,250,000). For carrying out title IV, part C of the Elementary and Secondary Education Act an additional \$7,400,000 to become available for obligation on July 1, 1979 and to remain available until September 30, 1980: Provided, That none of such funds may be paid to any State for which the allocation for fiscal year 1980 exceeds the allocation for comparable purposes for fiscal year 1979] (\$1,250,000): Provided further, That, notwithstanding the provisions of section 193 of title I of the Elementary and Secondary Education Act, no amount shall be obligated under the fiscal year 1980 appropriation under part B, for each of subparts 1, 2, and 3, in excess of what was obligated under the fiscal year 1979 appropriation for each of these subparts and reductions required shall be proportionate among the States: Provided further, That for title IV, part C, of the Elementary and Secondary Education Act, no amount shall be allocated to a State in excess of what was allocated to it for fiscal year 1980, less what was allocated to it for title V of that Act under formula for fiscal year 1973, unless and until an amount has been allocated to every State equal to what was allocated to it for fiscal year 1980, less what was allocated to it for title V of that Act under formula for fiscal year 1973. (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through Sept. 30, 1979, that provides funding at the current rate.

NOTES

Fiscal year 1979 appropriation for the title I concentration provision is being requested in Part III of this volume, supplementals and rescissions.

Includes \$9,350 thousand in 1980 for activities previously financed from "Emergency School Aid." Comparable amounts for 1978 (\$9,350 thousand), and for 1979 (\$9,350 thousand) are excluded above.

Excludes \$18,000 thousand in 1979 and \$23,705 thousand in 1980 transferred to the Department of Commerce for educational broadcasting facilities. Amount shown for 1979 represents obligation of previous years' appropriations. Comparable amount for 1978 (\$14,000 thousand) is included above.

\$923 thousand for telecommunications demonstrations is included in obligations for educational broadcasting facilities in 1978, since it was not appropriated as a separate line item that year. Amount shown for 1979 includes obligation of previous years' appropriations.

1. *Grants for disadvantaged.*—Grants are made on a formula basis to local educational agencies to help improve their educational programs in order to meet the special educational needs of educationally deprived children. In 1980, grants will continue to be made to all eligible title I school districts. Additional grants will be made to school districts with high concentrations of disadvantaged students, as authorized by the Education Amendments of 1978.

In addition, grants made to State agencies for the education of handicapped children, dependent and neglected children, and orphans and juvenile delinquents in State institutions, and for children of migratory workers will be at the previous year's level.

It is estimated that from 7 to 7.5 million children in about 14,000 local school districts and from over 300 State agencies will participate in school year 1980-81. This includes an estimated 225,000 in nonpublic schools. Contracts are also awarded to support program evaluation and other studies.

Since 1975, funds under this program have been appropriated a year in advance of their use by State and local organizations. The present request will be used for school year 1980-81 and will become available on July 1, 1980, and remain available through September 30, 1981.

2. *Support and innovation grants.*—Formula grants are made available to the States to provide support for strengthening State departments of education, supplementary education services, nutrition and health programs, and dropout prevention. In 1980, funds for these activities are requested under two separate authorities included in the Education Amendments of 1978: Improving local educational practices and Strengthening State educational agency management.

(a) *Improving local educational practices.*—Formula grants are made available to the States to provide support for projects for the development and demonstration of educational practices addressing a variety of serious educational problems and program needs. State education agencies award grants for these projects, on a discretionary basis, to their local education agencies.

This program was previously funded as part of support and innovation grants and has been separately authorized in the Education Amendments of 1978. Since 1975, funds under support and innovation, the previous authority for this program, have been appropriated a year in advance of their use by school districts. The present request will be used for school year 1980-81 to become available on July 1, 1980, and remain available through September 30, 1981.

(b) *Strengthening State educational agency management.*—This program supports State education agency efforts to strengthen their leadership resources and to provide statewide services to local educational agencies dealing with the improvement of educational administration at the local level. In previous years, funding for this activity has been provided under the Support and innovation grants activity. In 1980, funds are provided under a new separate authority included in the Education Amendments of 1978. Funds are provided on an advance funded basis.

3. *Bilingual education.*—This program supports local bilingual education classroom instructional projects and assists in developing State, local, and university capabilities for training bilingual personnel and in providing resources for the development, assessment, and dissemination of training resources and bilingual instructional material. Studies and evaluations also are supported.

For 1980, school year 1980-81, the funds requested will support an estimated 625 classroom projects enrolling 340,000 children; provide inservice training for 29,000 teachers, paraprofessionals and administrators; sponsor traineeships and fellowships to approximately 1,100 potential teachers and teacher trainers in the area of bilingual education; and support the development of college level courses in the field of bilingual education at about 120 institutions of higher education. New initiatives will include management development for project directors, short term training institutes, support for training programs at community colleges and bilingual desegregation projects previously funded under the Emergency School Aid Act. In addition, 46 State education agencies will receive awards for technical assistance and Statewide coordination of bilingual education activities.

4. *Basic skills improvement.*—This new program supports a variety of activities designed to improve the capacity of the educational system to provide basic skills instruction. As authorized under the Education Amendments of 1978, it represents a major transformation of the Right-to-read program with the expansion of activities to include mastery of all basic skills. Award mechanisms consist of discretionary grants and a new State portion.

5. *Achievement testing assistance.*—Funds for this new program, authorized by the Education Amendments of 1978, provide aid to States and school districts seeking to implement testing programs, improve tests, incorporate them into the educational process, and learn how to use tests effectively.

6. *Follow through.*—This program is designed to test various models of primary education programs in order to determine their effectiveness in educating children

General and special funds—Continued

ELEMENTARY AND SECONDARY EDUCATION—Continued

from low-income families. The 1980 request will fund new and continuing activities.

7. *Alcohol and drug abuse education.*—Grants are made to develop alcohol and drug abuse education leadership teams at the State and local level through a variety of training programs, and to provide technical assistance to such teams to aid them in assessing local alcohol and drug problems, develop programs and skilled leadership to combat their causes, and evaluate existing alcohol and drug problems. In 1980, five training centers and 60 school teams will be supported, with additional technical assistance being provided to another 462 previously trained teams.

8. *Environmental education.*—Grants are awarded to both public and private nonprofit organizations and agencies to assist in the development of programs at all levels of formal education and for nonformal adult education. In 1980, 14 awards will be funded with greatly increased size and scope, as comprehensive projects, focusing primarily on the secondary education level.

9. *Educational broadcasting facilities.*—Matching grants are made for acquisition and installation of electronic equipment to be used in noncommercial public broadcasting stations to serve the educational, cultural, and informational needs of Americans at home and school. Beginning in 1979, the program was transferred to the Department of Commerce.

10. *Telecommunications demonstrations.*—Grants are awarded to public and private nonprofit organizations and institutions for supporting demonstrations of how nonbroadcast facilities and methods can be used both to distribute information on health, education, and social services, and to improve those services.

11. *Ellender fellowships.*—A grant is awarded to the Close Up Foundation to support approximately 2,500 fellowships per year to students and their teachers to familiarize them with the operations of the Federal Government. These funds are a small portion of this type of effort supported by local public and private organizations, institutions, and foundations. No funds are requested in 1980.

12. *Ethnic heritage studies.*—Grants and contracts are awarded to public and private nonprofit educational agencies, institutions, and organizations to assist them in planning, developing, establishing, and operating ethnic heritage studies programs. No funds are included in the 1980 budget request. Projects in this general area are eligible for funding under a broad range of programs administered by the National Endowment for the Humanities.

INDIAN EDUCATION

For carrying out, to the extent not otherwise provided, part A [(\$48,000,000),] (\$52,000,000), [part] parts B [(\$15,500,000),] and [part] C [(\$5,930,000)] of the Indian Education Act, and the General Education Provisions Act, [\$71,735,000] \$76,875,000. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

1. *Payments to local educational agencies (LEA's) and non-LEA's.*—Grants are made on an entitlement basis to applicant local educational agencies for supplemental elementary and secondary programs to meet the special educational needs of Indian children. In addition, 10% of the amount available for LEA's is reserved for grants to Indian-controlled schools on or near reservations which are not LEA's. It is anticipated that approximately 1,280 awards will be made in 1980.

2. *Special programs for Indian students.*—Grants are made on a competitive basis to State and local educational agencies, federally supported elementary and secondary schools for Indian children, and to Indian tribes, organizations, and institutions, as well as to institutions of higher education, and private nonprofit elementary and secondary schools to improve the educational opportunities of Indian students. It is estimated that in 1980 approximately 78 awards will be made, including 6 awards to establish resource and evaluation centers. In addition, 238 fellowships will be awarded in 1980 to individuals for professional study in the areas of medicine, law, education, and related fields; and undergraduate or graduate study in engineering, business administration, natural resources, and related fields.

3. *Special programs for Indian adults.*—Grants are made on a competitive basis to Indian tribes and organizations and to State and local educational agencies to support projects designed to improve the employment and educational opportunities of Indian adults. Approximately 52 grant awards will be made in 1980 in the following areas: basic literacy, high school equivalency, skill training, counseling, and social services coordination. In addition, six awards will be made to share costs of the new resource and evaluation centers.

90.00	<b>Outlays.....</b>	<b>766,349</b>	<b>799,584</b>	<b>619,456</b>

1. *Maintenance and operations.*—Payments are made directly to school districts to assist in the operation of schools where enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. A three-tier payment system establishes the order for funding priorities. For 1980, payments will support 3(a) category children (those whose parents live and work on Federal property) through payment tier 2. Payments will also be made for special provisions and to other Federal agencies. Funds have not been requested for 3(b) category children (those whose parents live or work on Federal property) or for hold harmless provisions. It is estimated that payments will be made to over 2,000 school districts in 1980. No funds have been requested for pinpoint disasters.

The 1979 appropriation provided full funding for 3(a) category children through payment tier 2, for special provisions and for payments to other Federal agencies. An amount not to exceed the total amount paid in 1978 for 3(b) category children was provided for those children in 1979 with the provision that payments applied for be proportionately reduced under this section. In 1979, payments were made to over 4,000 school districts based on 2.5 million federally connected children.

2. *Construction.*—Payments are made to provide assistance in construction of school facilities in areas where enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. In 1980, funds will be allocated for construction of permanent facilities in local educational agencies impacted by Federal activities (section 5); for

General and special funds—Continued

SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS—Continued

schools constructed on Federal property (section 10); and for schools serving children who reside on Indian lands (section 14). Significant emphasis will be placed on the construction of school facilities for children residing on Indian lands and on school construction on military installations where local educational agencies cannot provide free public education for children residing thereon.

Note.—Excludes \$9,350 thousand in 1980 for activities transferred to "Elementary and Secondary Education." Comparable amounts for 1979 (\$9,350 thousand) and 1978 (\$9,350 thousand) are included above.

Under this account, support is provided to local educational agencies, State educational agencies, and nonprofit organizations for the purpose of meeting problems incident to school desegregation. This assistance is provided under the Emergency School Aid Act (ESAA) as amended and under title IV of the Civil Rights Act of 1964.

1. *Emergency School Aid Act.*—Funds are available under this program through State apportioned projects providing grants to local educational agencies requiring

continuing desegregation assistance. In addition, special programs and projects are funded to meet the emergency needs of desegregating districts and for activities not otherwise funded under the act. In 1980, some funds may be available to very needy districts throughout the year, rather than after a single closing date. This will provide maximum flexibility to respond immediately to emergency needs for financial assistance.

Other activities include magnet schools, pairing with business and universities, development of plans for neutral site schools, and educational television and radio projects. State educational agencies are funded to encourage State activities related to planning, technical assistance, and training for LEA's involved in developing or carrying out voluntary desegregation plans.

Funding for grants to nonprofit organizations, in accord with the Education Amendments of 1978, will be part of the national competition under special programs and projects rather than part of the State apportionment activity. Districts experiencing bilingual education problems previously funded under this activity may apply for assistance under ESEA title VII, and valid pilot activities may be included in a district's application for grants to LEA's under the apportionment part of ESAA. Separate funding for these activities is not included in 1980 under this appropriation.

Estimated number of grants

	1979	1980
General grants to LEA's.....	445	445
Special programs and projects.....	116	125
Magnet schools, pairing, and neutral site schools.....	42	57
Grants to nonprofit organizations.....	200	200
Educational television and radio.....	8	16
Evaluation.....	6	6
Pilot projects.....	165	
Bilingual education.....	32	

2. *Training and advisory services.*—Awards are made for assistance in three areas: (1) the preparation, adoption, and implementation of desegregation plans for public schools; (2) the preparation and implementation of bilingual programs for children of limited English proficiency, and (3) finding means to eliminate sexual discrimination in educational institutions. For these purposes, funds are made available to desegregation assistance centers, State educational agencies, local educational agencies, and training institutes. In addition to regular grants to LEA's for sex desegregation, a discretionary account funding LEA's on an as-need basis throughout the year for race and national origin desegregation is continued in 1980. This account is designed to provide immediate financial assistance for training and advisory services to districts correcting conditions of racial separation resulting from State or local law or official action.

1. *State assistance.*—(a) *State grant program.*—This advance funded program supports the efforts of the States in providing handicapped children education and related services that are free, appropriate, individualized, and available to all children aged 3–21 by September 1, 1980. Formula grants are made to States to assist in the initiation, expansion, and improvement of programs and projects for education of handicapped children at the preschool, elementary, and secondary levels. The current request will provide 12% of the excess costs for school year 1980–81.

(b) *Preschool incentive grants.*—Grants to States support special education and related services to children aged 3–5. Funds under this advance funded program will be used to increase and improve State and local programs for handicapped preschool children during school year 1980–81.

(c) *Deaf-blind centers.*—This forward-funded program awards contracts to 17 regional centers to provide appropriate educational, diagnostic, and related services to deaf-blind children and their families through a series of subcontracts. The centers also provide ancillary services necessary to assist these children to achieve their full potential for useful participation in society. In addition, model projects will be funded to demonstrate best practices for education of deaf-blind children.

2. *Special population programs.*—(a) *Severely handicapped projects.*—Contracts are awarded to establish and expand programs and practices to meet the educational training needs of severely handicapped children and youth. An estimated 3,100 handicapped children will participate in 39 projects during the 1980–81 school year.

(b) *Early childhood education.*—Demonstrations, technical assistance, and dissemination activities are supported to provide educational, diagnostic, and consultative services for preschool handicapped children and their parents. In 1980, an estimated 185 projects will be supported.

3. *Regional vocational, adult, and postsecondary programs.*—Contracts are awarded to develop and operate regional programs for deaf and other handicapped persons in the area of vocational, technical, postsecondary, or adult education, building on existing resources and facilities currently serving regional needs. With this request, an estimated 11 projects will be supported benefiting 3,500 participants.

4. *Innovation and development.*—Grants and contracts are awarded for the preparation of curriculum and related materials, research in personnel preparation, and other research and development projects, including those in the field of physical education and recreation research for handicapped children.

5. *Media and resource services.*—(a) *Media services and captioned films.*—Contracts and grants are made for the acquisition, captioning, production, and distribution of films and other educational media, and the training of persons in the use of such materials for the handicapped.

(b) *Regional resource centers.*—Contracts are awarded for the operation of 16 regional resource centers to develop and apply methods of appraisal and special educational programming practices for handicapped children, including referral, placement, and followup services.

(c) *Recruitment and information.*—This program is designed to encourage people to enter the career field of special education, and to provide information and referral services to parents of handicapped children. In 1980, 13 continuation projects will be supported.

6. *Special education personnel development.*—Grants are awarded to support training of teachers, supervisors, speech correctionists, researchers, and other professionals and paraprofessionals in fields related to the education of the handicapped in regular and special classrooms. An estimated 91,989 people will receive training in 1,000 projects in 1980.

7. *Special studies.*—Contracts are awarded for the development of validated evaluation procedures designed to measure the effectiveness of education programs for

General and special funds—Continued

EDUCATION FOR THE HANDICAPPED—Continued

handicapped children so that compliance with provisions of the State grant program may be monitored.

1. *Vocational education.*—Formula grants are made to the States to provide for and improve vocational education opportunities for 20,000,000 secondary, post-secondary, and adult students. Basic grants to States may be used to support, at the discretion of each State, any type of vocational education program. Program improvement and supportive service activities are funded to assist States in improving the quality of their vocational education programs. Separate funds are allocated to States to support special programs for disadvantaged students; that is, those having academic or economic handicaps requiring special assistance to enable them to succeed in vocational education programs and to support State advisory councils, State planning and consumer and homemaking programs.

In addition to the State formula grant programs, several national programs are supported under programs of national significance. Under this activity is a national center for research in vocational education; fellowship programs; curriculum coordination centers; applied projects and demonstrations and national occupational information coordinating committee and 57 State committees. Also there is a bilingual vocational education activity which supports bilingual vocational training, vocational instructor training, and the development of bilingual instructional materials, methods and techniques.

2. *Adult education.*—Formula grants are made to the States and territories for the purpose of eliminating functional illiteracy among the Nation's adults 16 years of age and older who lack a 12th grade level of education. Ten percent of each State's allotment is reserved for special projects and teacher training. The request includes \$90,750 thousand to fund school year 1980-81. It is estimated that 1,992,000 adults will be enrolled in adult education classes at an average cost of \$41 per student.

1. **Basic opportunity grants.**—This program is the principal source of Federal student assistance. Eligibility for the program is based on a uniform Federal needs test which is approved annually by the Congress. The size of the grant is determined on the basis of expected family and student contributions and can cover up to one-half of the student's cost of attendance.

The recently enacted Middle Income Student Assistance Act extended the Basic Grants program beginning in 1979 to about 1.5 million eligible middle-income students. Major features of the legislation include a reduction in the amount that families are expected to contribute to the cost of education, and more equitable treatment of independent students.

In 1979, 2.7 million students will receive grants of up to \$1,800, compared with maximum awards of up to \$1,600 for 1.8 million students in 1978. In 1980, the maximum award will be maintained at \$1,800 with an estimated 2.6 million students receiving grants. The reduction in the number of grants is the result of rising incomes eliminating some students previously eligible to participate in the program.

The 1980 budget assumes the availability of \$726 million in funds from prior year appropriations for reappropriation. These funds will support a total program cost of \$2,444 million in 1980. This compares with costs of \$2,435 million in 1979.

2. **Supplemental opportunity grants.**—This program makes awards to qualified financially needy postsecondary students. Grant size ranges from \$200 to \$1,500, or up to one-half of the total of financial aid provided to the student through the institution, whichever is the lesser amount. Funds are allocated to States according to a statutory formula and distributed to institutions on the basis of student need. An estimated 573,000 students will benefit from this program with awards averaging \$570.

3. **Work study.**—This program provides part-time employment to financially needy students as a means of financing their postsecondary education. Federal funds contribute 80% of the student's wages with 20% paid by the employer. A statutory formula determines the allo-

General and special funds—Continued

STUDENT ASSISTANCE—Continued

cation of funds to States. Within States, funds are distributed to institutions on the basis of student need. An estimated 990,000 students will benefit from this program with awards averaging \$610.

4. *Direct loans.*—This program provides long-term, low-interest loans to financially needy students to enable them to pursue postsecondary education. Approximately 902,000 students will obtain loans averaging \$710 using funds made available from institutional revolving funds as the result of collections on prior year loans which augment the Federal capital contribution.

Approximately \$20 million will be used to insure that students from institutions in financial distress are not denied access to loan funds.

No additional teacher cancellations will be funded in 1980. However, the budget includes \$14.8 million to fund prior year commitments.

5. *State student incentive grants.*—This program encourages the expansion of scholarship support to financially needy students by States through the award of matching grants. Federal contributions to these programs must be matched by an equal amount by the State. All States and territories now participate in the program and over 300,000 students will receive grants during the 1980-81 academic year.

6. *Administrative support.*—These funds provide contractual support for programs administered by the Bureau of Student Financial Assistance. Funds shown here on a consolidated basis were appropriated under basic grant administration, the Student loan insurance fund, and the Salaries and expenses account. Combining these funds under one account avoids duplication and provides for a clearer presentation of student aid contractual costs.

1. *Student services.*—(a) *Special programs for the disadvantaged.*—Funds are requested for talent search, upward bound, special services, and educational opportunity centers programs which are designed to encourage and assist low-income youths who have the potential to enter, continue or resume postsecondary educational activities. In addition, the request will support new upward bound projects that emphasize the preparation of students for careers in the sciences and for new expanded special services projects. These programs, which focus on outreach and retention activities, support the access efforts of the Federal student assistance programs. An estimated 486,000 students will be aided. Funds also will support training of institutional staff to help personnel administer these programs more effectively.

(b) *Veterans' cost of instruction.*—This program provides grants to postsecondary institutions to encourage recruitment of, and special services to, eligible veterans. The reduction in the overall cost of the program in 1980 is due to a declining population to be served. In 1980, approximately 280,000 veterans will be served.

(c) *Educational information centers.*—This program provides matching grants to States to establish, plan, and operate centers to provide educational information, guidance, counseling, and referral for all individuals including residents of rural areas. Since other programs, such as Special programs for the disadvantaged and the campus-based student assistance programs, offer these same services, no funding for this program is requested in 1980.

2. *Program development.*—(a) *Strengthening developing institutions.*—Funds are requested for this program which provides grants of up to 5 years duration to

institutions with high percentages of minority students and students from low-income families so that these institutions might enter the mainstream of academic life. In 1980, grants will concentrate on assisting institutions to improve administration, the quality of faculty, the extent and effectiveness of student services, and the quality and scope of the curriculum. Approximately 300 institutions will receive grants.

(b) *Cooperative education.*—This program assists postsecondary institutions to plan, establish, or expand cooperative education programs and supports demonstration, research, and training to increase the effectiveness of these programs in which employers pay students for periods of work alternated with study. In 1980, as part of the strategy to bring closer together the worlds of education and work, 7 demonstration grants will be funded for the first time to develop institution-wide cooperative education programs at large urban institutions. In addition the size and scope of 24 administration grants to newly participating institutions will be increased. A total of 90,000 students are expected to participate in these programs.

(c) *International education and foreign language studies.*—(1) *Centers, fellowships, and research.*—Funds are requested for the NDEA VI programs which are designed to strengthen the Nation's capacity for research, teaching, and dissemination in modern foreign languages, area studies, and international education and to increase the awareness of American citizens about international affairs. In 1980, funds will support expanded programs in international centers, fellowships, and research projects with a focus on issues of interdependence. Projects also will be funded which provide the American public, in general, and students, in particular, with an increased understanding of international issues.

(2) *Fellowships, groups projects and research abroad.*—Funds are requested for the Fulbright-Hays programs which support faculty and students to conduct research abroad, to provide American educators with professional experiences in another culture and to utilize the expertise of foreign educators in the development of curriculum materials for American students. Funds will also support bilateral projects which foster international academic exchange and mutual understanding.

(d) *University community services and continuing education.*—This program provides formula grants to States so that they may award grants to strengthen the community service and continuing education programs of selected colleges for the purpose of assisting in the solution of community problems. This function is considered a State and local responsibility and funding is not requested in 1980.

(e) *State postsecondary education commissions.*—This program, which supports State initiatives in postsecondary education planning and administration of Federal programs at the State level, is considered a State responsibility. Therefore, no funds are requested for these commissions in 1980.

(f) *Aid to land-grant colleges.*—This permanent appropriation supports instruction in agriculture, the me-

General and special funds—Continued

HIGHER AND CONTINUING EDUCATION—Continued

chanical arts, the English language, and various branches of the sciences in land-grant institutions.

3. *Graduate support*—(a) *Graduate/professional educational opportunities*.—Funds are requested to attract and assist 1,700 able students from underrepresented groups to pursue academic and professional careers of national priority and to provide grants to approximately 50 institutions to have a specific program of recruitment, retention, and placement services for the fellowship recipients in this program. In 1980, this program has been significantly increased to expand graduate and professional opportunities for qualified women and minorities.

(b) *Legal training for the disadvantaged*.—In 1980, funds are requested for this program which supports fellowships to 550 persons of ability from disadvantaged backgrounds to undertake legal training. Funds also support six regional summer institutes which provide recipients with intensive pre-law preparation prior to entering law school.

(c) *Public service grants and fellowships*.—This program is designed to strengthen public service education programs at institutions of higher education and to support the preparation of graduate and professional students in those programs. No funds are requested for this program in 1980.

(d) *Mining fellowships*.—This program assists graduate students of exceptional ability and demonstrated financial need to undertake advanced study in domestic mining and mineral fuel conservation. No funds are requested for this program in 1980.

(e) *Law school clinical experience*.—This program provides training grants or contracts to law schools to help establish or expand programs which provide clinical experience to students in the practice of law. No funds are requested for this program in 1980 since demonstrations of this aspect of law education have been accomplished.

4. *Construction*—(a) *Interest subsidy grants*.—Funds are requested in 1980 to meet mandatory costs of prior year commitments.

(b) *Model intercultural centers*.—Further funding for the construction needs of the two model intercultural centers is not requested in 1980.

(c) *Continuing education centers*.—No funds are requested in 1980 for this program which provided funds for the final design and architectural plans for three continuing education centers.

5. *Special endowments*—(a) *Wayne Morse Chair of Law and Politics*.—In 1978, the appropriation for the Wayne Morse Chair of Law and Politics at the University of Oregon fulfilled all the statutory funding requirements. Therefore, additional funding is unnecessary.

(b) *Hubert Humphrey Institute*.—Further funding is unnecessary since the 1979 appropriation fulfilled all the statutory funding requirements.

(c) *Everett Dirksen Center*.—The 1979 appropriation fulfilled all statutory funding requirements for the Everett McKinley Dirksen Congressional Research Center. Additional funding is unnecessary.

1. *Public libraries*.—Grants are made to States to encourage and assist them in the development of public library services that can fulfill the educational and informational needs of the American people. Also, grants are made to States to encourage cooperative networking among all types of libraries. The number of disadvantaged persons served is estimated to be about 29 million. About 130 cooperative library projects would be funded.

2. *School libraries and instructional resources*.—This activity is a consolidation of school library resources and instructional equipment. Funding of this program is requested on an advance funded basis for use in the subsequent year. These funds would provide services to about 46 million public and private school children.

The Education Amendments of 1978 removed the guidance, counseling, and testing portion of this program and gave it a separate authorization. The 1980

request includes this activity as a separate line item below, and supplemental language is proposed to accomplish this in 1979.

3. *Guidance, counseling and testing.*—Under this program, grants are awarded to States for leadership and supervisory services in the field of guidance, counseling and testing, and for comprehensive programs in elementary and secondary schools for which funds will be awarded by State educational agencies to their local educational agencies. In previous years, funds for this activity were provided in school libraries and instructional resources. In 1980, funds are requested for the separate authority included in the Education Amendments of 1978.

4. *College library resources.*—Basic grants, not to exceed \$5 thousand, are awarded to eligible institutions of higher education and other public and private non-profit library institutions for the acquisition of library resources. No funds are requested for 1980.

5. *Training and demonstrations.*—Grants are awarded to support the training of paraprofessionals and professionals in library and information science for services to all types of libraries, through fellowships, traineeships, and training institutes. Also, grants are awarded to improve the Nation's libraries and improve training in librarianship through support of exemplary demonstration projects, and to disseminate the results. No funds are requested in 1980.

6. *Strengthening research libraries.*—Grants are awarded to assist major research libraries in maintaining and strengthening their collections (constituting a national resource essential to research and scholarship) and to assist these libraries in making their holdings available to other libraries whose users have need for research materials.

7. *College instructional equipment.*—Grants are awarded for the acquisition of audiovisual and laboratory equipment, closed-circuit television equipment and materials, and for related minor remodeling on a matching basis to accredited public and nonprofit, private postsecondary institutions, including trade and vocational schools, as well as combinations of such institutions. No funds are requested for 1980.

1. *Special projects.*—Under Title III—Special Projects—of the Elementary and Secondary Education Act, as established by the Education Amendments of 1978, grants and contracts are awarded to experiment with new educational and administrative methods, techniques, and practices; to meet special or unique educational needs or problems; and to place special emphasis on national education priorities. Some of the activities are specifically authorized in the law. The remaining funds are for activities carried out at the discretion of the Commissioner of Education.

(a) *School health.*—Projects support local educational agency demonstration projects and State educational agency implementation activities designed to improve the health quality of children in K-12 through the establishment of school health programs and services. Emphasis will be placed on anti-smoking activities.

(b) *Youth employment.*—Projects support efforts to link Education Division activities related to education and work, coordinate these activities with the Department of Labor's youth employment programs and support technical assistance and information dissemination to State and local education personnel.

(c) *Biomedical sciences.*—Projects support institutions of higher education in working with secondary school systems to educate, motivate, and encourage high school students from economically disadvantaged backgrounds to pursue training in the biomedical sciences at the undergraduate and graduate levels. Special consid-

General and special funds—Continued

SPECIAL PROJECTS AND TRAINING\*—Continued

eration is given to projects proposed for rural areas or areas having a health personnel shortage.

(d) *Arts in education.*—Projects support activities to encourage and assist State and local educational agencies and other public and private agencies to establish and conduct programs in which the arts are an integral part of elementary and secondary school education. Projects will focus on a comprehensive collaborative effort involving all aspects of the community.

(e) *Metric education.*—Projects support activities in State and local educational agencies, universities and colleges, and public and private nonprofit organizations to prepare individuals to use the metric system.

(f) *Consumers' education.*—Projects fund activities at the elementary and secondary, postsecondary, and adult education levels to promote consumer education through research, demonstration, and pilot projects.

(g) *Gifted and talented.*—Projects support activities in State and local educational agencies to strengthen leadership and programming for gifted and talented children. In addition, models of exemplary practices are developed which are designed to meet the special needs of gifted students. Informational products are developed for dissemination to the field.

(h) *National diffusion program.*—Projects support the systematic dissemination and diffusion of educational practices and products originally developed in Office of Education supported programs and validated by the Joint Dissemination Review Panel of the Education Division to school districts throughout the country.

(i) *Educational television programming.*—Projects provide assistance to support the development, production, installation, and utilization of innovative educational television programs for use by children and adults in their home and school environments.

(j) *Cities in schools.*—Projects support the development of prototypes of service integration coordinating educational and social services already available in the cities. This experiment seeks to serve dropouts, potential dropouts, and low achievers from disadvantaged backgrounds.

(k) *Push for excellence.*—Projects support efforts to stimulate excellence in education by mobilizing all the resources within a community—parents, students, educators, clergymen, media, and business—with the objectives of improving basic skills, improving school attendance, decreasing dropout rates, and reducing vandalism and acts of violence by students.

(l) *Career education.*—Projects develop information about the needs for career education, develop State and local plans for implementing career education, provide for the training and retraining of persons for conducting career education programs, promote a national dialogue on career education, and demonstrate the best of current career education programs and practices.

2. *Career education incentives.*—Formula grants are awarded as an incentive for State and local educational agencies to carry out comprehensive career education efforts using their own financial resources. In addition, discretionary grants support projects to demonstrate

the best methods and procedures in career education at the postsecondary level. No funds are requested in 1980.

3. *Women's educational equity.*—Projects support activities to stimulate institutional change and to otherwise promote educational equity for women at all levels of education through the improvement and expansion of innovative programs.

4. *Community schools.*—Projects support the use of public schools as centers operated jointly by a local educational agency and a community agency for the coordinated delivery of social services to meet the needs, interests, and concerns of the community.

5. *Educational personnel training.*—(a) *Teacher corps.*—Projects support efforts to improve the educational opportunities of children from low-income families by encouraging broader and improved teacher training programs. In 1980, funds will support 121 projects providing training for 26,200 educational personnel. In addition, four contracts will be awarded to institutions of higher education, State and local educational agencies for technical assistance and for dissemination, demonstration, and evaluation activities.

(b) *Teacher centers.*—Projects support the establishment of centers which are designed to give elementary and secondary school teachers maximum feasible control over their own inservice training and over the production and modification of school curricula to meet the special needs of their students. In 1980, funds will support 90 centers providing training for 64,000 teachers.

6. *Planning and evaluation.*—Contracts are made with public and private organizations for planning and evaluation studies of programs administered by the Office of Education. Four studies will be continued in 1980 and awards will be granted for approximately 10 new studies.

7. *Information clearinghouses.*—Projects support the establishment of clearinghouses to provide referral, linkage, coordination, and dissemination services in adult and community education programs to agencies, organizations, and the general public. No funds are requested for this activity in 1980.

EDUCATIONAL ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM) \*

\*See Part III for additional information.

For payments in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States, for necessary expenses of the Office of Education, as authorized by law, \$2,000,000, to remain available until expended: Provided, That this appropriation shall be available, in addition to other appropriations to such office, for payments in the foregoing currencies.

U.S.-owned foreign currency that the Treasury Department determines to be in excess of normal requirements is used to support significant educational activities overseas under the Fulbright-Hays program, discussed under the Higher and Continuing Education account. The grants funded under this program will support two intensive foreign language schools in Egypt and India, and also individual and group projects abroad. These projects focus on foreign languages, area studies, world affairs, and intercultural understanding. They are designed to update the professional competencies of American educators, to further foreign language and area studies research, and to develop improved curricula and effective instructional materials. This program provides an opportunity for American educators to gain first-hand knowledge and experience of the language and cultures of two important areas of the world—the Asian subcontinent and the Middle East, and expands the awareness of the American population in understanding other nations.

<sup>1</sup> Includes collections on Federal defaulted loans from the Student loan insurance fund for related collection activities in the amount of \$10,000 thousand in 1979 and \$10,500 thousand in 1980.

<sup>2</sup> Transfer of support for the Educational Broadcasting Facilities program to the Department of Commerce. Comparable amount of \$292 thousand for 1978 is included above.

Note.—Excludes \$1,843 thousand in 1980 for activities transferred to Student Assistance. Comparable amounts for 1978 (\$11,910 thousand, of which \$10,500 thousand was for Guaranteed Student Loan computer services), and 1979 (\$1,843 thousand) are included above.

1. *Program administration.*—Funds are provided to enable the Commissioner to carry out the administrative duties of the Office of Education and to support special purpose activities. The Office administers grants-in-aid and other direct programs and provides technical assistance to State and local educational agencies, institutions of higher education, libraries, and other organizations to promote the improvement of education throughout the country.

2. *Advisory committees.*—Funds are provided for the operating expenses of advisory committees specifically authorized by Federal statute or by general authority vested with the Commissioner of Education. In 1980, it is estimated that six Presidential committees authorized by the General Education Provisions Act and eight ongoing administratively created committees will be supported.

Under the Higher Education Act, the Guaranteed student loan program enables students to borrow from private lenders to help pay for the cost of education and training at over 8,120 eligible universities, colleges, and vocational schools. Loans are either guaranteed by State or private nonprofit agencies or insured by the Federal Government. Guaranteed loans are made to eligible students primarily by commercial lenders, educational institutions, and State agencies. The Federal Government pays up to a 7% interest subsidy on behalf of students while they are in school, during a maximum 12-month grace period following graduation or withdrawal from school and during authorized periods of deferment. The recently enacted Middle Income Student Assistance Act eliminated the income ceiling making all families, regardless of income, eligible for interest payments on guaranteed student loans.

In addition to interest subsidies, a special allowance is paid to lenders to encourage participation in the program. The special allowance rate varies with money market conditions and cannot exceed 5% per annum on the quarterly balance of outstanding loans. In case of the borrower's death or total and permanent disability, the Federal Government pays the principal and interest on loans outstanding. The Federal Government is also liable for bankruptcy claims which are filed 5 years after the borrower terminates his course of study.

Incentives to State agencies to participate in the program are also provided. Non-interest-bearing advances are made to State agencies' reserve funds to encourage States to expand their lending programs and/or to establish new State guarantee agencies. The Education Amendments of 1976 authorize the payment to guarantee agencies of one-half of 1% of the total of all loans guaranteed by that agency to help offset the cost of administering the guaranteed student loan program. An additional one-half of 1% is offered to guarantee agencies which enter into supplemental guaranty agreements with the Federal Government and restructure their programs so that they are comparable to the Federal insurance program.

A Student loan insurance fund is established from which defaults are paid and into which appropriations related to defaults and other receipts are deposited. The fund enables the Commissioner of Education to make payments on unpaid principal and interest amounts defaulted by student borrowers under the federally insured student loan program and to reinsure loans guaranteed by State and nonprofit agencies to the extent of 80% to 100% of the principal and interest amount of defaults paid by the agencies. The actual rate of rein-

sureance for each agency depends on whether or not the agency has entered into the supplemental guaranty agreement with the Federal Government and the agency's rate of default at the end of the year.

Section 431(b)(1) of the Higher Education Act authorizes the Commissioner, with respect to legal power and responsibilities under the guaranteed student loan program, to prepare annually and submit a budget program as provided for wholly owned Government corporations by the Government Corporation Control Act. For that purpose, all expenses associated with subsidies and default activities are reported under the Student loan insurance fund.

## DATA ON FEDERALLY INSURED AND GUARANTEED LOANS DISBURSED

## DATA ON DEFAULTED LOANS

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
Federal insurance:			
Defaulted loans.....	536,445	626,445	708,844
Defaulted interest.....	11,282	16,362	21,407
Subtotal.....	547,727	642,807	730,251
Federal reinsurance: Defaulted loans.....	468,056	598,056	748,056
Cumulative defaulted loans.....	1,015,783	1,240,863	1,478,307

*Program operations.*—The fund takes over loans on which it pays insurance claims and seeks to collect on them. Claims which are deemed uncollectable are written off as "loss on insured loans." Loans deemed collectable, after allowing for possible loss, are as follows: 1978, \$357,102 thousand; 1979, \$431,527 thousand; and 1980, \$491,858 thousand.

*Program costs.*—In 1978, defaults and other claims totaling \$212,834 thousand were submitted to the fund for payment. In 1979, total costs for claims and interest subsidies are estimated at \$1,036,241 thousand. This amount, when offset by the 1979 appropriation of \$714,314 thousand and other available funds results in a requirement for a supplemental appropriation request of \$243,189 thousand. The estimate for 1980 cost of \$1,037,127 thousand will require an appropriation of \$959,621 thousand. These funds will provide for interest subsidies and loan guarantees on \$2.5 billion in loan capital made available by private lenders in 1980.

The default rate in the Federal program is projected to remain level at 13.7% from 1978 through 1980. In the reinsurance program the default rate is expected to increase from 9.0% in 1978 to 10.2% in 1980. The expected increase in default claims and rates are primarily based on an estimate of loans that will mature and therefore have the probability of defaulting.

*Receipts and reimbursements.*—Deposits to the fund are derived from insurance premiums earned from direct Federal insurance, which is not to exceed one-fourth of 1% per annum of the unpaid principal amount (excluding interest added to principal), and repayment of collectable loans. Additional accrued income on collectable loans is available when converted to cash.

Public enterprise funds—Continued

STUDENT LOAN INSURANCE FUND—Continued

Total deposits to the fund, are as follows: 1978, \$30,871 thousand; 1979, \$48,581 thousand; and 1980, \$77,506 thousand.

Collections on defaulted loans in the Federal program amounted to \$16,190 thousand in 1978 and an additional \$34,950 thousand is expected to be collected in 1979. The target amount for collection in 1980 is \$62,156 thousand which includes \$12,156 thousand in contract collections. In the reinsurance program, \$10,902 thousand was recovered on defaulted loans in 1978. It is expected that \$12,509 thousand will be recovered in 1979 and \$14,250 thousand will be recovered in 1980.

**Estimated future loss.**—Future loss on guaranteed loans represents those outstanding loans that will default and not be collected by the Office of Education. Attempts are currently being made to reduce these amounts (the estimates follow in thousands of dollars).

The higher education facilities loan program authorizes loans for construction of academic facilities in higher education institutions. Such loans may be made for up to 80% of a project's total development cost and must be repaid within 50 years.

**Operating costs.**—Interest is payable to the Treasury on the cumulative amount of appropriations paid out for loans under this title or available as capital to the fund less the average undisbursed cash balance in the fund during the year. The rate certified by Treasury for payment from the fund during 1978 was 8½%.

**Appropriations.**—Insufficiencies appropriations are used to fund the deficit resulting from the interest rate required to sell the participation and the interest rate paid by higher education institutions on facilities loans. The budget authority required for insufficiencies is computed as follows (in thousands of dollars):

	1978 actual	1979 estimate	1980 estimate
Interest accrued on participation certificates .....	9,965	9,491	9,491
Interest accrued on an equal amount of loans in the pool .....	-4,876	-4,528	-4,373
Participation certificates expenses .....	7	4	4
Insufficiency .....	5,096	4,967	5,122
Financed by:			
Investment income from: Participation sales trust fund .....	-1,861	-1,800	-2,100
Carried forward to subsequent period .....	-187	-98	
Brought forward from prior year adjusted .....	-230	187	98

The Health education assistance loan program enables students to borrow from private lenders to help pay for the cost of their medical education and training at over 300 universities. Although the principal amount of the loans will be insured by the Federal Government, the students will be required to pay up to 12% interest

per year. Loans will be made primarily by commercial lenders, State agencies, and educational institutions.

In case of default, death or total and permanent disability the Federal Government pays the outstanding amount of the loan. The Federal Government also pays bankruptcy claims if the discharge is granted 5 years after the first date repayment was required.

It is anticipated that 323 eligible universities will participate in the program and that 17,000 students will receive loans averaging \$8 thousand in 1980. No more than 50% of the students in each class in schools of medicine, osteopathy, or dentistry may receive loans.

No appropriation is requested for 1980 since receipts and funds from 1979 will be sufficient to cover required payments.

The National Institute of Education supports research, development, and dissemination activities which will aid students, teachers, administrators, and decision-makers at all levels of education. The primary goals of

General and special funds—Continued

NATIONAL INSTITUTE OF EDUCATION—Continued

the Institute's work are furthering equal educational opportunity and improving local educational practice.

The *teaching and learning* program attempts to enlarge our scientific understanding of human learning and development and our knowledge of effective educational practices. In 1980, a major emphasis will be on literacy in the basic skills. Research on functional competencies and the use of tests for bilingual students will also be emphasized.

The *educational policy and organization* program supports research on how the governance and organization of education can be made more effective and equitable and assists practitioners who want to take advantage of what is learned. Besides continuing efforts in finance, urban education, law, and secondary schools and youth services, the program will expand studies of the processes of desegregation, rural education, higher education management, and the educational impact of television.

The *dissemination and improvement of practice* program aims to help teachers, schools, and administrators obtain and make use of knowledge about education. The program translates educational research into forms that are useful to educational policymakers, administrators, and practitioners, and makes it available through national and regional information systems. The program will work with National, State, regional, and local institutions to aid them in obtaining and using information on relevant educational research and development and on promising educational practices. A special program will increase the participation of minorities and women in educational research.

Funds are also included to carry out the National Assessment of Educational Progress as required by the Education Amendments of 1978 and to support the administration, coordination, and direction of the programs and activities of the Institute.

Note.—Excludes \$3,985 thousand in 1980 for activities transferred to the National Institute of Education. Comparable amounts for 1978 (\$4,853 thousand) and 1979 (\$4,314 thousand) are included above.

The Office of the Assistant Secretary for Education is responsible for both the direction and supervision of the Education Division and also for coordination and general supervision of educational activities performed elsewhere in the Department. In addition, the Office has responsibility for administering three operational programs:

1. *Fund for the improvement of postsecondary education.*—The Fund has been established to encourage the reform and improvement of postsecondary education through grants to and contracts with public and private postsecondary institutions for program development and demonstration.

The Fund supports projects on the basis of priority needs expressed by the university community. Priorities include emphasis on education and work, information for student choice, and improving the cost effectiveness of postsecondary education.

2. *National Center for Education Statistics.*—The Center collects statistics on the condition of education in the United States and abroad, conducts and reports on statistical analyses, and provides assistance to States and local educational agencies in their statistical activities. The two components of the Center's program are:

(a) *Education statistics.*—The Center collects and reports information from institutions and individuals which provides a comprehensive and flexible data base describing education and its effects. The base includes both a consistent core of data which delineates the essential features of the education enterprise and those who participate in it and also a varied, detailed flow of information which bears on changing policy issues. Information is gathered on such topics as trends in ele-

mentary and secondary education, the changing nature of postsecondary education, financing educational institutions, the educational attainments of persons, the status of educational personnel, libraries, and educational activities in foreign countries.

(b) *Statistical services.*—The Center provides statistical services to users including activities in the areas of assistance, analysis, and dissemination. Assistance is provided to State and local educational agencies to develop and implement compatible education data systems. The Center also conducts analyses of the meaning and significance of education statistics and disseminates data through a variety of modes acknowledging the differing needs of users. In addition, the Center supports Federal Education Data Acquisition activities which coordinate the collection of information and data acquisition activities of all Federal agencies.

3. *Program direction and support services.*—This activity provides funds for administrative expenses associated with the development and communication of education policy, supervision of the Division, and administration of the three operational programs. In addition, this activity provides continued contractual support of policy analysis activities relevant to the Office's role in developing educational policy. In 1980, the Office is requesting a staffing level of 262, one position less than its 1979 level.

1. *Grants to museums.*—The Institute received its first appropriation in 1977. These funds were used for the administrative costs of starting up the Institute.

In 1978, the major portion of the budget included support of a program of grants to museums. It is estimated that more than 7,000 museums and related organizations throughout the country would be eligible for these funds.

Grants will be made available to encourage and assist museums in their educational role. Specifically in 1980, funds are requested for program and staff development, installation of displays, conservation of collections, as well as general administration. In 1980, it is estimated that about 700 grants will be awarded.

2. *Program administration.*—Funds are provided in this activity to cover the costs of operating the Institute. The Institute of Museum Services consists of a Director, staff, and the 20-member National Museum Services Board. The Director is responsible for managing the overall activities of the Institute as well as providing information and advice to the Board, which is the policymaking body of the Institute. The Board consists of representatives from the museum community and officials from government agencies concerned with arts, sciences, and education.

In 1978, the salaries to support the Institute were charged to the Office of the Assistant Secretary for Education.

The Administrator for the National Center for Education Statistics is authorized, under section 406(f) of the General Education Provisions Act, to furnish transcripts or copies of tables and other records of the National Center for Education Statistics and to make special statistical compilations and surveys for State or local officials, private organizations, or individuals. Such statistical compilations and surveys shall be made subject to the payment of the actual or estimated cost of such work. In the case of nonprofit organizations or agencies, the Administrator may engage in joint statistical projects, the cost of which shall be shared equitably as determined by the Administrator, provided that the purposes are otherwise authorized by law.

All moneys received in payment for work or services are deposited in a trust account which may be used to pay directly the costs of such work or services, to repay appropriations which initially bore all or part of such costs, or to refund excess sums when necessary.

On March 8, 1977, the Secretary of Health, Education, and Welfare under the authority of section 6 of the reorganization plan No. 1 of 1953, abolished the Social and Rehabilitation Service (SRS). The public assistance and program administration activities previously administered by SRS were transferred to the Health Care Financing Administration, a new agency, Social Security Administration, and the Office of Human Development. The total SRS appropriation for 1978 of \$19,600,150 thousand for public assistance and \$73,000 thousand for program administration was transferred to these receiving agencies in accordance with the following budgeted program requirements.

<b>Public assistance:</b>

This appropriation provides for payments from Federal funds to the Federal old-age and survivors and disability insurance trust funds for certain types of benefits and related administrative costs not financed by contributions from workers and employers. This appropriation also includes reimbursement to the Federal old-age and survivors insurance trust fund for the Federal fund share of the administrative cost for pension reform. The 1980 request is for \$676,933 thousand and covers the following payments:

1. *Military service credits.*—A payment of \$510,795 thousand to the Federal old-age and survivors and disability insurance trust funds is requested as reimbursement for benefits which were based on noncontributory military service credits for veterans of the World War II and post-World War II periods. Payment is prescribed in sections 217(g) and 229(b) of the Social Security Act and includes reimbursement for administrative expenses and interest lost to the trust funds.

The payment to each trust fund is (in thousands of dollars):

General and special funds—Continued

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS—Continued

Old-age and survivors insurance.....	392,968
Disability insurance .....	117,827
Total .....	510,795

2. *Special payments for certain uninsured persons.*—A payment of \$164,069 thousand is requested to reimburse the Federal old-age and survivors insurance trust fund for benefits paid in 1978 to certain uninsured individuals aged 72 and over, related administrative expenses, interest lost to the trust fund, and adjustments for prior years' costs. These benefits were established to afford some protection for certain persons, or their surviving dependents, who retired before the enactment of social security legislation or before their occupations were covered by social security.

Individuals who had less than three-quarters of coverage and who attained age 72 before 1968 were eligible for benefits under this provision in 1978. The benefits were reduced if the recipient also received another governmental pension. The amount of the reduction depended upon the amount of the other governmental pension. In addition, the benefits were withheld if an individual was receiving payments under a federally aided public assistance program.

3. *Pension reform.*—A payment of \$2,069 thousand is requested to reimburse the Federal old-age and survivors insurance trust fund for those pension reform administrative expenses which are chargeable to Federal funds as specified in section 1131(b)(2) of the Social Security Act. The Federal fund is charged with the cost incurred by the Social Security Administration in furnishing information to individuals who have left a pension fund, of their vested rights in those funds, either upon request or automatically upon application for retirement, survivors, or disability insurance benefits.

1. *Benefit payments.*—Title IV of the Federal Mine Safety and Health Act of 1977 provides monthly benefits to living coal miners who are totally disabled from pneumoconiosis resulting from employment in coal mines and to surviving widows. The law provides benefit payments to miners and surviving widows which are increased for dependents, and in certain circumstances, to totally dependent surviving parents, brothers, and sisters.

After 1973, the jurisdiction for payment of claims and most survivor claims shifted to the Department of Labor. However, HEW will continue to pay benefits for many years into the future to individuals who filed before 1974.

BENEFITS AND BENEFICIARIES, END OF FISCAL YEAR

	1978 actual	1979 estimate	1981 estimate
Benefit payments (in thousands) .....	\$974,519	\$986,500	\$997,000
Beneficiaries .....	453,000	432,000	410,000

An automatic benefit increase will become effective in October 1979, and is prescribed by law at 50% of the minimum monthly benefit under the Federal employees compensation system for a totally disabled employee in step 1, grade GS-2.

2. *Administration.*—Administrative costs in 1980 are for monitoring and making changes to the beneficiary rolls and authorizing payments to entitled beneficiaries monthly. The reduction from the 1978 and 1979 levels of cost is due to a decline in the size of the beneficiary roll as well as the completion in 1978 of almost all of the appellate workloads.

The district offices of the Department of Health, Education, and Welfare will continue to take claims for benefits, mostly on behalf of the Department of Labor. HEW is reimbursed for these costs, estimated at \$766 thousand for 1980, from funds appropriated to the Department of Labor.

Title XVI of the Social Security Act established the Federal supplemental security income (SSI) program for the aged, blind, and disabled. This program, effective January 1, 1974, replaced State-administered programs of assistance to the aged, blind, and disabled. In 1979, the supplemental security income program provides a minimum income of \$189.40 per month for an eligible individual and \$284.10 per month for an eligible couple. Public Law 93-368 requires that when social security benefits (title II of the Social Security Act) are automatically increased based on a cost-of-living computation, SSI benefit levels will be increased by the same percentage. This appropriation request assumes that cost-of-living increases will be effective in July 1979 and in July 1980.

SSI is administered by the Federal Government under national uniform eligibility requirements and payment support levels. However, to be eligible for Federal matching funds for medicaid, States are required to supplement the Federal benefit to assure that recipients of benefits under the former State-administered programs suffered no loss of income under SSI. States may make additional supplementary payments, and may enter into agreements with the Federal Government to administer their supplementary payments. Under such an agreement, the cost of administering the State's supplementary payment is financed from Federal funds.

This appropriation request includes: (1) \$5,635 million in Federal payments to 3.8 million aged, blind, and disabled recipients at the end of 1980; (2) \$50 million in Federal hold harmless subsidy payments to three States; (3) \$56.2 million to reimburse State agencies for providing services to and planning and monitoring for treatment of disabled SSI recipients; (4) \$586.6 million to reimburse the social security trust funds for costs of administering the program; and (5) \$14 million for Federal fiscal liability (FFL) settlements with States which result from erroneous payments of federally administered State supplementation. State supplementation payments financed by the States and administered by

ASSISTANCE PAYMENTS PROGRAM\*

\*See "Legislative Program" (end of this chapter) and Part III of this Appendix for additional information.

For carrying out, except as otherwise provided, titles I, IV, X, [XI and XIV] XI, XIV, and XVI of the Social Security Act, and the Act of July 5, 1960 (24 U.S.C., Ch. 9), [\$6,663,000,000] \$7,079,210,000.

For making, after June 30 of the current fiscal year, payments to States under titles I, IV, X, XIV, and XVI, respectively, of the Social Security Act for the last three months of the current fiscal year; and for making after July 31 of the current fiscal year, payments for the first quarter of the succeeding fiscal year; such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the subsequent appropriations therefor for the current or succeeding fiscal year.

[Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year.] (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Grants to States for assistance payments are made for the Federal share of State expenditures for maintenance assistance and child support enforcement. Research and training projects are also supported.

Estimates of requirements are based on an evaluation of the States' latest estimates together with national trends of historic data adjusted by socioeconomic variables which will impact upon these trends.

1. *Maintenance assistance.*—Maintenance payments provide needy persons with resources to assist in meeting the costs of daily living.

Federal matching for Aid to families with dependent children (AFDC), the major portion of the maintenance assistance activity, averages 54.3%. The Federal matching for State and local administration is 50% and the matching share for State and local training is 75%.

The SSA has initiated efforts to improve administration of the AFDC program through technical assistance to States and closer Federal monitoring of States' performance, including claims for Federal financial participation.

<b>Total.....</b>	<b>10,737,250</b>	<b>10,608,275</b>	<b>10,689,275</b>

2. *Child support enforcement.*—The purpose of the child support enforcement program, in effect since August 1, 1975, is to assist States in enforcing the support obligations owed by absent parents to their children, locating absent parents, establishing paternity, and obtaining child support. Federal grants for State and local administration of the program are made to States having plans approved by the Department of Health, Education, and Welfare—Federal matching is 75%.

Costs and collections are expanding as State and local governments increase the number of absent parents who are providing child support. The Federal Office of Child Support Enforcement has begun a major effort to increase the level of collections, including the following: Training for Federal, State, and local staffs; technical assistance to States; and model computer systems for the use of the States. In addition, State and local governments along with Federal staff of the Office of Child Support Enforcement are responsible for carrying out the provisions of Public Law 95-142, which requires assignment of rights to medical support as a condition of medicaid eligibility. The State and local governments provide for the enforcement of rights due from or through an absent parent to pay for medical care in cases where dependents of that absent parent are receiving medical benefits under title XIX of the Social Security Act.

**CHILD SUPPORT ENFORCEMENT COLLECTIONS AND COSTS**

[In thousands of dollars]

	1978	1979	1980

1. *Cuban refugee assistance.*—The Migration and Refugee Assistance Act of 1962, the current legislative basis for the Cuban refugee program, was enacted June 28, 1962, following action of the President to establish a temporary program in February 1961 to meet emergency needs of Cuban refugees entering the United States.

Of the almost 700,000 Cubans who entered the United States since 1959, approximately 200,000 have become naturalized citizens, and another 319,000 have achieved permanent resident status, the last step before citizenship. In addition to seeking the privileges and accepting the responsibilities of citizenship, Cubans have become substantially integrated into the Nation's economic and social mainstream. The Cuban refugee population is ceasing to present a special burden for State and local government resources and can increasingly be served appropriately by the regular Federal/State assistance programs now serving non-Cubans.

With the passing of the need for a special program serving only Cuban refugees, a gradual phasing out of the Cuban refugee assistance program was initiated in 1978 that provides needed services and assistance to the refugees through regular Federal and State programs serving the entire population, and thereby further enhances the integration of the Cuban population into American society. The phasing out of the Cuban refugee assistance program will continue through 1983, and throughout this period the Federal Government will make payments to States to offset the special costs that

may be associated with the Cuban refugee population.

*Welfare assistance and services.*—Since 1978 Cuban refugee cases eligible for AFDC and medicaid have been included under those programs with Federal public assistance funds providing the regular Federal matching. Cuban refugee program funds are authorized to offset the non-Federal share for those cases. Cuban refugee program funds are also used to offset the cost of general assistance type cases.

*Education.*—Federal assistance will be provided to meet the diminishing special needs of the Dade County, Fla., public school system, with assistance also provided for English education and vocational training.

2. *Indochinese refugee assistance.*—Special assistance to refugees from Vietnam, Cambodia, and Laos has been provided under the authority of the Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23, as amended by Public Law 94-313) and further amended by Public Law 95-145, and Public Law 95-549. Public Law 95-549 provides for the termination of the Indochinese refugee assistance activity at the end of 1979. Legislation is being proposed to extend the special Federal program of assistance for Indochinese refugees to provide for welfare needs for the first 3 years from date of entry into the United States. This will enable refugees to become integrated into American society and to achieve independence and self-sufficiency without unduly burdening States and localities.

3. *Other refugee assistance.*—The Migration and Refugee Assistance Act of 1962 provides the legislative basis for the "Other refugee assistance" activity. This activity provides assistance for the resettlement in the United States of Soviet and other refugees not currently covered by existing Federal refugee programs. Funds were appropriated for this purpose for the first time under the Foreign Assistance and Related Programs Appropriations Act for 1979 (Public Law 95-481). This act provided that these funds were to be expended only by HEW.

Funds are provided to voluntary resettlement agencies on a dollar-for-dollar matching basis for the purpose of assisting refugees in resettlement. A wide range of activities are covered, including training, professional recertification, social services, maintenance assistance, and health care. The principle objective is to enable the refugees to become self-supporting and independent members of American society.

4. *Federal administrative expenses.*—This activity provides for Federal management of the refugee assistance program. This activity includes provision for the reception, registration, feeding, and lodging of newly arriving refugees when necessary. In addition, vocational training, employment counseling, and resettlement services are provided to refugees.

**Direct program.**—The old-age and survivors insurance (OASI) program protects individuals and families from the risk of economic loss resulting from old age and death by providing income to retired workers, their dependents, and their dependent survivors. The program is financed by contributions to the trust fund which are made by workers, employers, and self-employed individuals based on earnings. In calendar year 1977, the contribution rates were 4.375% of taxable earnings each for employees and employers, and 6.185% for self-employed persons. Public Law 95-216 enacted December 20, 1977, changed the contribution rate for employees and employers to 4.275% for 1978 and 4.330% for 1979 and 1980. The rate for self-employed persons also changed to 6.010% for 1978 through 1980.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was \$16,500 in 1977 and \$17,700 in 1978. The maximum will increase to \$22,900 in 1979 and will increase to \$25,900

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND—  
Continued

in 1980. Workers who pay more in social security contributions because of increases in the taxable maximum will receive the benefit of more social security protection because the benefit payments are based on average taxable earnings.

1. *Benefit payments.*—The Social Security Act provides for payment of benefits to retired workers, their dependents, and their survivors. The average number of persons receiving payments and the benefit amounts classified by major types of beneficiaries for 1978–80 follow:

Beneficiaries (millions):	1978 actual	1979 estimate	1980 estimate
Retired workers .....	18.1	18.7	19.4
Dependents of retired workers .....	3.6	3.7	3.7
Survivors .....	7.6	7.6	7.6
<b>Total beneficiaries .....</b>	<b>29.3</b>	<b>30.0</b>	<b>30.7</b>
<b>Benefit payments (billions):</b>			
Retired workers .....	52.1	58.6	67.0
Dependents of retired workers .....	5.8	6.3	7.1
Survivors .....	20.6	22.2	24.7
<b>Total benefit payments.....</b>	<b>78.5</b>	<b>87.1</b>	<b>98.9</b>

Normal growth in benefit payments will continue because: (1) the number of beneficiaries will increase as the number of aged persons in the population and the proportion of the aged who are insured rise; (2) average monthly benefits will be adjusted automatically as price levels continue to rise; and (3) newly entitled beneficiaries will have higher initial benefits reflecting the growth in general wages during their careers.

Automatic cost-of-living benefit increases are determined annually and are effective for June of each year. Benefit payments were increased 6.5% effective for June 1978, and are projected to increase to 9.1% in June 1979 and 7.1% in June 1980. The benefit increases are triggered automatically by increases in the cost-of-living as measured by the Consumer Price Index.

In calendar year 1977, the annual exempt amount of earnings under the retirement test was \$3,000. Public Law 95-216 raises the exempt amount for beneficiaries age 65 and over to \$4,000 in 1978, \$4,500 in 1979 and \$5,000 in 1980. For beneficiaries under age 65 this amount increased over the 1977 amount of \$3,000 as average wages increased, generating an exempt amount of \$3,240 in 1978 and \$3,480 in 1979. In 1980 the exempt amount is expected to be \$3,720.

2. *Administration.*—This activity reflects administrative expenses including the costs of site acquisition, design and construction of certain office facilities attributable to the retirement and survivors' insurance program by the Social Security Administration, other components of the Department of Health, Education, and Welfare, and by the Department of the Treasury.

3. *Payment to railroad retirement account.*—Annual payments are made from the OASI trust fund to the railroad retirement fund so as to place the funds in the same position they would have been in if railroad employment after 1936 had been included in social security coverage (45 U.S.C. 228g). Estimates are made of

the yearly amounts of additional contributions SSA would have collected, the additional benefits it would have paid, and the additional administrative costs it would have incurred if railroad employees had been covered under social security. Each year's payment is a settlement for the prior year. It represents the amount by which the estimated benefit payments and administrative costs exceed the estimated contributions, and includes interest through the date of transfer. The payment for the transition quarter was included in the 1978 transfer. The components of the net transfers in 1978–80 follow (in millions of dollars):

	1978 actual	1979 estimate	1980 estimate
Benefit payments.....	2,320.7	2,055	2,192
Administrative costs.....	19.4	21	23
Interest.....	186.4	108	115
Less contributions.....	—937.8	—793	—875
<b>Net transfer.....</b>	<b>1,588.7</b>	<b>1,391</b>	<b>1,455</b>

4. *Vocational rehabilitation services.*—The Social Security Act provides that specified payments may be made from the OASI and the Disability Insurance (DI) trust funds for the purpose of making rehabilitation services available to individuals who are entitled to social security cash benefits because of a disability. The payments are made in expectation that savings will accrue to the trust funds as a result of rehabilitating disabled beneficiaries into productive activity. The OASI trust fund bears the cost of rehabilitation services provided to disabled retirement and survivors insurance beneficiaries, and the DI trust fund bears the cost of such services provided to disability insurance beneficiaries.

*Reimbursable program.*—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs administered by SSA with full reimbursement to the trust fund (including interest when appropriate). Under 42 U.S.C. 1306(b), SSA is authorized (within limits set by the Privacy and Freedom of Information Acts) to provide information or services to other governmental organizations or private organizations on a reimbursable basis. Reimbursable work includes providing information from our records such as data relating to earnings, periods of employment, addresses of reporting employers, and employment data for pension funds and unions. Services provided on a reimbursable basis include printing and reproduction, processing data, and use of data processing equipment.

The disability insurance (DI) program protects individuals and families against the risk of economic loss resulting from disability by providing income to insured workers (and their dependents) who are unable to engage in substantial gainful activity by reason of medical impairment. This program is financed by contributions to the trust fund made by workers, employers, and self-employed individuals based on earnings. In calendar year 1977, the contribution rates were 0.575% of taxable earnings each for employers and employees and 0.815% for self-employed persons. The contribution rates scheduled by Public Law 95-216 enacted December 20, 1977, changed the rate to 0.775% for employees and for employers and to 1.090% for self-employed persons in 1978 and to 0.750% and 1.040% respectively through 1980. The contribution rates are applied to earnings up to a maximum level which is the same for this program as for the old-age and survivors insurance (OASI) program.

1. *Benefit payments.*—The Social Security Act provides for payment of disability insurance benefits to certain disabled individuals and their dependents. The average number of persons receiving payments and the

FEDERAL DISABILITY INSURANCE TRUST FUND—Continued

benefit amounts, classified by major types of beneficiaries for 1978–80 follows:

	1978 actual	1979 estimate	1980 estimate
Beneficiaries (millions):			
Disabled workers.....	2.8	2.9	3.0
Dependents of disabled workers.....	2.1	2.0	2.0
Total beneficiaries.....	4.9	4.9	5.0
Benefit payments (billions):			
Disabled workers.....	10.1	11.2	12.7
Dependents of disabled workers.....	2.2	2.4	2.6
Total benefit payments.....	12.2	13.6	15.3

Normal growth in benefit payments will continue because: (1) the number of beneficiaries will increase as the population insured for disability benefits rises, especially at ages 50 to 64 where disability incidence rates are highest; and (2) the average monthly benefits will increase as general earnings levels rise. Automatic cost-of-living benefit increases are the same as for the OASI program.

2. *Administration.*—This activity reflects administrative expenses, including the cost of site acquisition, design and construction of certain office facilities attributable to the DI program by the Social Security Administration, other components of the Department of Health, Education, and Welfare, and by the Department of the Treasury.

3. *Payment to railroad retirement account.*—Annual payments are made from the DI trust fund to the railroad retirement fund so as to place the funds in the same position they would have been in if railroad employment after 1936 had been included under social security coverage (45 U.S.C. 228g). This payment is computed on the same basis as the payment from the OASI trust fund. Payments are made each year for the prior year. The payment for the transition quarter was included in the 1978 transfer. The components of the net transfers for 1978 to 1980 follow (in millions of dollars):

	1978 actual	1979 estimate	1980 estimate
Benefit payments.....	147.3	127	136
Administrative costs.....	2.3	3	3
Interest.....	3.4	.....	—1
Less contributions.....	—123.2	—135	—153
Net transfer.....	29.8	—5	—15

4. *Vocational rehabilitation services.*—The Social Security Act provides that specified payments may be made from the OASI and DI insurance trust funds for the purpose of making rehabilitation services available to individuals who are entitled to social security cash benefits because of a disability. The payments are made in expectation that savings will accrue to the trust funds as a result of rehabilitating disabled beneficiaries into productive activity. The DI trust fund bears the cost of such services provided to disability insurance beneficiaries.

The Social Security Administration is responsible for administering national programs of old-age, survivors, and disability insurance, and the supplemental security income program for the needy aged, blind, and disabled. In addition, it administers some health insurance activities, as well as annual reporting of earnings and pension reform activities. The principal costs for administration of these programs are financed by this appropriation; however, there are certain costs of other components of the Department of Health, Education, and Welfare and of the Treasury Department which relate to administration of these programs and are shown elsewhere in the budget.

Administrative costs are related to workloads generated by the statutory provisions of social security programs. These workloads depend upon factors not subject to administrative control, such as population growth, level of employment, economic conditions, income levels, incidence of illness, and mortality rates.

1. *Old-age and survivors insurance.*—The administrative costs budgeted for the old-age and survivors insurance program provide for making initial determinations of eligibility, reevaluating initial determinations and maintaining the beneficiary rolls to assure proper benefit payments, and continuing entitlement to benefits.

2. *Disability insurance.*—The administrative costs budgeted for the disability insurance program provide for processing and reviewing initial claims, determining the continuing disability of beneficiaries, and maintaining the beneficiary rolls to assure proper benefit payments. Determinations regarding the existence or continuation of a disability are made by State agencies under contract with the Social Security Administration, and these costs are included in the budget.

3. *Health insurance.*—While the Health Care Financing Administration (HCFA) is responsible for medicare administration, the Social Security Administration performs certain administrative functions for HCFA, such as premium billing and collection, and maintenance of the data base on entitlement and premium information.

4. *Supplemental security income.*—The administrative costs budgeted for the supplemental security income program provide for making initial determinations of eligibility, reevaluating the initial determination when requested by the claimant, maintaining the recipient rolls to assure proper payment of benefits, and investigating continuing entitlement to benefits through periodic redeterminations of eligibility. Determinations regarding the existence or continuation of a disability are made by State agencies under contract with the Social Security Administration, and these costs are included in the budget.

5. *Annual reporting of earnings.*—Public Law 94-202, enacted January 2, 1976, authorized a single annual

## LIMITATION ON ADMINISTRATIVE EXPENSES—Continued

wage reporting system to serve the data needs for both the Social Security Administration and the Internal Revenue Service. It gave the Secretaries of Treasury and HEW authority to use form W-2, "Statement of Earnings," as an annual report of wages for both social security and income tax purposes. The new system went into effect in 1978, with the first annual reports to be received by the Social Security Administration in early 1979.

The administrative costs budgeted for the system include the following activities: receiving source documents; examining them for adequacy; microfilming them; converting data from documents to magnetic tape by optical scanners or through key-to-tape data conversion; and balancing processed data to assure accuracy.

Funding for all annual reporting activities will be shared by the trust funds and general revenues.

6. *Pension reform.*—Public Law 93-406, the "Employee Retirement Income Security Act of 1974" (ERISA) requires the Secretary of HEW to maintain files to furnish information regarding deferred vested pension rights to plan participants upon request, or to the participant (and his dependents or survivors) automatically when applying for social security benefits. SSA estimates it will furnish 4 million work histories, under reimbursable agreements, over a 7-year period to plan administrators if they are to meet their responsibilities.

The administrative costs budgeted for work related to pension reform include: (1) Establishing an automated record system for pension fund administrators identifying information on individuals who leave the jurisdiction of a pension fund; (2) responding to earnings information requests from the pension funds; (3) providing individual earnings histories from SSA records as requested by the pension funds. Costs incurred by the Department of Health, Education, and Welfare for providing information to the pension funds are recouped, within limits set by the Privacy and Freedom of Information Acts, on a reimbursable basis. Unrecouped costs are absorbed by this limitation account.

7. *Construction.*—(a) *Headquarters.*—The Social Security Administration is constructing two buildings, one in downtown Baltimore and the other in Woodlawn, Md., which are scheduled for completion in 1979. Budget authority of \$3,060 thousand is requested to pay for General Services Administration project management costs in 1980, for replacing roofs of two existing buildings, and for purchase of additional land at the headquarters site.

(b) *District offices.*—Where the General Services Administration determines that construction is more feasible or economical than rental of commercial space or occupancy of existing Federal structures, budget authority of \$3,790 thousand is requested for use with funds from prior years' appropriations to expand 20 overcrowded offices.

(c) *Purchase contract payments.*—Construction of three program service centers and the new headquarters buildings was financed by the purchase contract method, using funds obtained through certificates of participation. Budget authority of \$20,942 thousand is requested for purchase contract payments in 1980, with

the funds for these payments reflected as a transfer to GSA.

*Reimbursable program.*—Under 42 U.S.C. 1306(b), the Social Security Administration is authorized (within limits set by the Privacy and Freedom of Information Acts) to provide to other governmental organizations or private organizations on a reimbursable basis information or services, including information from records such as data relating to earnings, periods of employment, addresses of reporting employers, and employment data for pension funds and unions, printing or reproduction, processing data, or use of data processing equipment, and taking applications for food stamps from SSI applicants and recipients with costs reimbursed by the Department of Agriculture.

The American Printing House for the Blind, under the act "To Promote the Education of the Blind," provides educational materials to students of less than college grade who attend public schools and classes with sighted children and blind students who attend special schools and classes for the blind.

1. *Educational materials.*—The request for the educational materials will serve an estimated 34,000 eligible blind students, an increase of 1,600 over 1979. The estimated 1980 per capita rate of \$118.35 will serve eligible blind children at about the same level of service provided during the past year.

Basic materials provided by the Printing House includes textbooks and literature in braille, including braille music, large-type texts, recorded materials, and many educational aids such as braille writers, talking

book machines, cassette recorders, braille, and relief maps, etc. It is also necessary to produce special materials for the multihandicapped and preschool blind children being enrolled in educational programs.

2. *Expenses related to advisory committees.*—The Printing House has three committees: Publication Committee, Educational Aids Committee, and Educational Research Committee. The 1980 funds will make it possible for the Printing House field representatives to continue to work in educational settings throughout the country to assist and train teachers in the use of the aids and materials available under the act.

3. *Educational and technical research.*—The 1980 budget request provides a base of funding to maintain continuity and flexibility in educational materials development and associated research. Continuing development of needed educational materials is necessary if the Printing House is to meet its responsibility as defined under the act.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For carrying out the National Technical Institute for the Deaf Act (20 U.S.C. 681, et seq.), **[\$16,625,000]** \$17,349,000. (Department of Health, Education, and Welfare Appropriation Act, 1979.)

1. *Career development.*—The National Technical Institute for the Deaf (NTID) is a national coeducational residential center that provides postsecondary technical education for the Nation's young deaf people to prepare them for successful employment. In 1980, NTID will continue to provide a full spectrum of direct technical education, communications training, and personal/social development services and the requisite instructional support services to a full-time equivalent student population of 1,040 deaf students. The validity of all NTID curriculums will be reviewed on an ongoing basis using the curriculum process model and information on the labor market from the graduate feedback system. A total of 275 students will be placed in postgraduate and work experience situations.

## General and special funds—Continued

## NATIONAL TECHNICAL INSTITUTE FOR THE DEAF—Continued

2. *Research.*—The 1980 request will continue to provide ongoing applied research in the general areas of institutional organization and management, speech, audiology, manual communication, English language, personal/social accommodation, cognitive strategies, career development and decisionmaking, educational support services, and instructional technology as they relate to the technical and general education of a deaf population.

3. *Training.*—The request for training will provide a variety of sign language and interpreter training programs offered to 1,680 students, faculty and staff, and other professionals who work with the deaf. In addition, 400 people from external sources, or 18% of NTID's total training efforts, will be served as a part of a national effort in conjunction with NTID's educational extension efforts. The intent of these efforts is to provide both onsite and offsite, practical application training to professionals in the fields of higher education, deaf education, and clinical speech/audiology using NTID developed or otherwise proven methods. Finally, 82 graduate interns from colleges and universities, as well as business and service organizations across the country, will come to NTID to complete their training and practical application experience in areas such as speech, audiology, et cetera.

4. *Information dissemination.*—In addition to maintenance of the existing production system for Focus magazines, NTID catalog, placement and recruitment modules, alumni newsletters, info-series, radio and television spots, and the Annual Report, 1980 will see the culmination of NTID's major educational extension developmental effort. Scheduled for distribution on a national basis are such items as the explanatory materials on the responsibilities and use of interpreters; training methods for student notetakers; multimedia technical instruction modules in such areas as photoprocessing, electromechanical technology, and office practice; and programmed English grammar and vocabulary texts.

5. *Management.*—In 1980, the necessary academic research and dissemination programs will be in operation. The existing organizational administration utilizes NTID's comprehensive planning system which provides for multilevel information on program planning and reporting, budgeting and accounting analyses, personnel administration, space utilization, student scheduling, and data analysis.

## GALLAUDET COLLEGE

For carrying out the Model Secondary School for the Deaf Act (80 Stat. 1027) and for the partial support of Gallaudet College authorized by the Act of June 18, 1954 (68 Stat. 265), **[\$44,833,000]** \$48,341,000, of which **[\$11,105,000]** \$10,730,000 shall be for construction and shall remain available until expended: *Provided*, That if requested by the college, such construction shall be supervised by the General Services Administration. 1. *Liberal arts college.*—Gallaudet College is a private, nonprofit educational institution providing an undergraduate higher education program for deaf students, a preparatory program for those students who need such training to qualify for college admission, a graduate school program in fields related to deafness, and a continuing education program for deaf adults. In addition, Gallaudet provides a sign language program as a public service to the Washington Metropolitan area. Instruction includes basic, intermediate, advanced, and interpreter-level communication. The 1980 budget estimate will provide for continuation of necessary programs at current levels, expansion of operations and maintenance services associated with new facilities and for improvement of academic and non-academic services to students through a 12-month program of instruction. Support will be provided to accommodate an aggressive pursuit of private funding sources, to provide for campus-wide coordination of research efforts and to respond to the public service requirements of the institution's nationwide constituency.

2. *Model Secondary School for the Deaf.*—As provided under Public Law 89-694, the Model Secondary School for the Deaf: (a) serves as a laboratory for educational experimentation and development; (b) disseminates working models throughout the field of education of the deaf to programs serving deaf students and educational professionals; (c) prepares deaf adolescents for postsecondary academic and/or vocational pursuits; and (d) provides deaf adolescents with the skills necessary to become well adjusted, contributing, and effective members of the society. The 1980 budget estimate will provide for continuation of essential programs at current levels, and will permit program expansion to accommodate a modest growth in residential students.

3. *Kendall Demonstration Elementary School.*—By an act of Congress, Public Law 91-587, the college is authorized to operate Kendall School as a national demonstration elementary school for the deaf. The school will provide: (a) an exemplary educational program for children from the age of onset of deafness through the age of 15; (b) a diagnostic center; (c) a parent education

program; and (d) a source of important research on learning problems of young deaf children. The 1980 budget estimate will provide for continuation of essential programs at current levels, will permit an increase in summer school programs and the pursuit of educational technology advances, and will provide for an orderly expansion of service that the new Kendall School facility can accommodate when it is opened in January 1980.

4. *Construction.*—The 1980 budget estimate will provide for additional equipment and furnishings for the Kendall Demonstration Elementary School, construction of a new field house, continuation of a long term program to upgrade the environment on Kendall Green and to create a barrier free campus, and to initiate a program for the upgrading of electrical systems on campus.

In 1980, the college will directly serve an enrollment of approximately 1,450 graduate and undergraduate students; the MSSD anticipates an enrollment of about 340 students in its programs; and Kendall School anticipates an enrollment of 155. In addition, the college will directly serve approximately 8,540 persons through enrollment in continuing education programs. Gallaudet indirectly serves many tens of thousands of deaf persons both in the United States and abroad and also serves more than 10,000 teachers and administrators in deaf education.

HOWARD UNIVERSITY

For the partial support of Howard University, **[\$113,393,000]** \$121,893,000, of which \$10,000,000 shall be for construction and shall remain available until expended: *Provided*, That if requested by the University, such construction shall be supervised by the General Services Administration. (*Department of Health, Education, and Welfare Appropriation Act, 1979.*)

1. *Academic program.*—Howard University is a private nonprofit educational institution consisting of an undergraduate college, a graduate school offering the master's degree and the degree of doctor of philosophy (in African studies, anatomy, biochemistry, chemistry, economics, English, genetics and human genetics, history, mathematics, pharmacology, physics, physiology,

political science, psychology, sociology/anthropology, speech and zoology) and 15 professional schools. Federal funds provide 56% of the total operating costs for the academic program. Funds from non-Federal sources are realized from tuition and fees, gifts, grants, endowments, dormitory rents, cafeteria, bookstore sales, and hospital patient fees.

The request for 1980 includes funds for built-in increases such as faculty and staff increases and for partial support of the university's retirement program. In addition, funds are also provided for program improvements in the University library system and in the colleges of medicine and dentistry.

The university enrollment for 1980 is estimated at 9,497: 2,500 for undergraduate, 6,790 for graduate and professionals schools, and 207 for the Howard University Hospital.

2. *Howard University Hospital.*—The hospital furnishes inpatient and outpatient care and a facility for training of physicians and nurses and other professional and technical health personnel. Operation of the hospital is financed by Federal appropriation and patient revenue for medical services including medicare and contractual services from the D.C. government and other local jurisdictions. Federal funds provide 42% of the total operating costs.

Patient statistics:

Emergency visits .....	58,000	58,000	58,000
Total patients .....	130,000	130,000	130,000

3. *Construction.*—The 1980 request includes funds for several construction projects such as payment on Dunbarton College, powerplant improvements, energy conservation measures, removal of architectural barriers, renovations of residence halls, Fine Arts and Freedmen's Hospital buildings and the feasibility study for additional campus building renovations. The construction programs at Howard University is largely financed by the Federal appropriation.

HUMAN DEVELOPMENT SERVICES

Federal Funds

General and special funds:

GRANTS TO STATES FOR SOCIAL AND CHILD WELFARE SERVICES\*

\*See "Legislative Program" (end of this chapter) and Part III of this appendix for additional information.

For carrying out activities authorized by sections 420 and 2001 of the Social Security Act, **[\$2,578,052,000]** \$2,632,325,000, of which \$56,500,000 shall be for child welfare services authorized by section 420.

For making, after June 30 of the current fiscal year, payments to States authorized by section 2001 of the Social Security Act, for the last three months of the current fiscal year, and for making after July 31 of the current fiscal year, payments for the first quarter of the succeeding fiscal year; such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the subsequent appropriations therefor for the current or succeeding fiscal year.

## General and special funds—Continued

## GRANTS TO STATES FOR SOCIAL AND CHILD WELFARE SERVICES—Continued

[Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year.] (*Department of Health, Education, and Welfare Appropriation Act, 1979.*)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through Sept. 30, 1979, that provides funding at the current rate.

1. *Grants to States for social services.*—The basic title XX program had a \$2.5 billion ceiling limitation in 1978, which was raised to \$2.7 billion for 1979 but returns to \$2.5 billion in 1980. In 1980, an authorization is requested which would raise the ceiling to \$2.9 billion. This increase in the ceiling will accommodate the amounts which had previously been made available for child day care, and also will focus on assistance to areas of special need as emphasized in the President's urban initiatives. Grants assist eligible persons to become or remain economically self-supporting and self-sufficient; to protect children and adults who cannot protect themselves from abuse, neglect, and exploitation, and to help families stay together; to prevent or reduce inappropriate institutional care by providing for community-based care, home-based care, or other forms of less intensive care; and to arrange for institutional placement, when appropriate, and for services to individuals in institutions.

Within the basic program, grants are made to States based on Federal matching rates of 75% for all services except family planning services which are matched at 90%.

## SOCIAL SERVICES COSTS

	[In millions of dollars]		
	1978	1979	1980
Total costs.....	3,719	3,937	4,160
Federal share:			
Day care-children.....	537	582	596
Homemaker/chore.....	302	329	332
Education, training, and employment.....	264	289	291
Protective services.....	279	305	307
Foster care-children.....	127	139	140
Counseling services.....	391	428	431
Health-related.....	127	139	140
Residential care and treatment.....	83	91	92
Family planning.....	44	48	49
Other.....	463	468	472
Total Federal share.....	2,617	2,818	2,850

## AVERAGE NUMBER OF PRIMARY RECIPIENTS PER QUARTER

	[In thousands]		
	1978	1979	1980
Selected services (nonadditive: recipients may receive more than one service):			
Day care-children.....	383	385	388
Homemaker/chore.....	339	341	343
Education, training, and employment.....	375	377	379
Protective services.....	564	567	570
Foster care-children.....	163	164	165
Counseling services.....	476	479	481
Health-related.....	524	527	530
Residential care and treatment.....	93	93	94
Family planning.....	229	230	232

2. *Child day care.*—In 1978 and 1979 an additional \$200 million per year has been authorized above the basic title XX ceiling for the purpose of providing 100% Federal funding of child day care services and, in 1978, for grants to hire welfare recipients in jobs related to the provision of child day care services. No separate funding is requested for 1980. All day care will be included under the "Grants to States for social services" activity at the regular 75% matching rate.

3. *State and local training.*—The 1974 social services amendments to the Social Security Act authorized 75% Federal financial participation in costs associated with providing training to staff of title XX agencies, service delivery personnel of provider agencies, persons preparing for employment in title XX agencies, and individual providers. In 1980, an authorization is to be requested which would limit the amount to which any State could become entitled to 3% of its allotment limitation for social services. A separate transmittal will propose a reduction in budget authority to \$75 million in accordance with this proposal, and in consideration of vigorous management improvement efforts being undertaken to control the unprecedented growth of spending and to focus on activities of high priority.

## STATE AND LOCAL TRAINING COSTS

	[Dollars in thousands]		
	1978	1979	1980
Total cost.....	\$95,576	\$95,402	\$100,000
Federal share.....	\$72,432	\$71,552	\$75,000
Number of persons trained.....	342,000	342,000	316,000

4. *Child welfare services.*—Under title IV-B of the Social Security Act, grants are made to States to help establish, extend, and strengthen services to support and strengthen parental care of children in their own homes, to return foster children to their homes, and to facilitate adoption when such return is not feasible.

Child welfare services are available to all children who need such services without regard to the economic circumstances of their families.

Federal financial participation represents about 7% of total program costs. States are encouraged to coordinate child welfare services with the social services program. Legislation is proposed for 1980 that would modify the present program to provide for the development of State systems for tracking, case review, due process protections for children in foster care, and to provide preventive or restorative services for children.

(Dollars in thousands)

	1978	1979	1980
Total costs.....	\$800,000	\$800,000	\$800,000
Federal share.....	\$56,500	\$56,500	\$56,500
Average number of children served.....	202,100	202,100	202,100

**HUMAN DEVELOPMENT SERVICES**

For carrying out, in fiscal year 1980, except as otherwise provided, sections 426, 1110, and 1115 of the Social Security Act, the Older Americans Act of 1965, as amended, the Child Abuse Prevention and Treatment Act, Title II of Public Law 95-266 (Adoption Opportunities), the Runaway Youth Act, the Community Services Act of 1974, as amended, sections 106, 107, and 306 of the Comprehensive Employment and Training Act of 1973, the Rehabilitation Act of 1973, as amended, the International Health Research Act of 1960, and the Developmental Disabilities Services and Facilities Construction Act, as amended, \$2,408,898,000, of which \$808,000,000 shall be for activities under section 100(b)(1) of the Rehabilitation Act of 1973; \$9,484,000 shall be for activities under section 110(b)(3) and \$10,000,000 shall be for activities under section 711 of such Act; \$3,000,000 to remain available until expended shall be for a White House Conference for Children and Youth; and \$46,880,000 shall be for grants under part C of the Developmental Disabilities Services and Facilities Construction Act, as amended; together with not to exceed \$600,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

**[ADOPTIONS OPPORTUNITIES]**

[To carry out title II of the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978 (title II of Public Law 95-266), \$5,000,000.] (Department of Health, Education, and Welfare Appropriation Act, 1979.)

Note.—The 1979 appropriation for some activities or portions of activities within this account had not been enacted at the time this budget was prepared. The 1979 amounts shown below for these activities or portions of activities are based on a continuing resolution (Public Law 95-482) in effect through Sept. 30, 1979, that provides funding at the current rate.

Note: Includes \$70 thousand in 1980 for activity previously financed from: General departmental management: 1978, \$35 thousand; 1979, \$70 thousand. Excludes \$1 thousand in 1980 for activity transferred to "General departmental management." Comparable amounts for 1978 (\$1 thousand) and 1979 (\$1 thousand) are included above.

1. **Administration for Children, Youth, and Families.**—The programs supported by the Administration for Children, Youth, and Families provide services and activities designed to improve the well-being of young children, adolescents, children and youth with special needs, and their families. In 1980, the Head Start program will continue to focus its efforts on improving the

## General and special funds—Continued

## HUMAN DEVELOPMENT SERVICES—Continued

delivery of services that are both cost effective and responsive to the needs of children, and on improving local capacity to plan and manage services to children. A level of \$700,000 thousand will provide comprehensive Head Start services to approximately 414,000 children, at least 10% of whom are handicapped. A level of \$14,700 thousand for research and demonstration will support continuation projects in the areas of child welfare, day care, youth development, and child and family development. A level of \$18,928 thousand for the child abuse and prevention program will support the planning, strengthening, and operation of programs designed to reduce the incidence of child abuse and neglect and to treat abused and neglected children. A level of \$11,000 thousand will support about 160 runaway youth projects providing temporary shelter, counseling, and aftercare services to about 40,000 youth and their families. These projects are designed to address the immediate needs of youth who have run away, as well as to resolve intrafamily problems and to strengthen family relationships. A level of \$5,000 thousand for child welfare training will provide continued support to institutions of higher learning to train personnel for work in the field of child welfare. An appropriation of \$5,000 thousand is requested for adoption opportunity activities to provide permanent homes for children, who would benefit from adoption, particularly children with special needs.

2. *Administration on Aging.*—The Administration on Aging, through the investment of funds and program development at Federal, State, and local levels, seeks to build services systems designed to meet the needs of older persons. Programs for the aging will continue to serve the needs of the elderly at the Federal, State, and local level and to provide leadership and support for the development, operation, and management of State-administered, community-operated services programs. Services are designed to remove barriers to economic and personal independence for older persons. Particular emphasis will be placed on providing and ensuring a more narrow focusing of attention and services on those elderly who have the greatest economic and social need. A level of \$22,500 thousand will support State agency activities designed to provide leadership and technical assistance to area agencies in their efforts to achieve more comprehensive and coordinated service delivery systems and to improve coordination and increase the generation of all available resources to strengthen existing services or inaugurate new services. A level of \$196,970 thousand will support 560 area agencies and over 2,000 multipurpose senior centers. A level of \$277,546 thousand will support the nutrition program which will provide approximately 580,000 meals per day, 5 days per week. Over 15% of these meals will be delivered to home-bound elderly. A level of \$59,300 thousand will support research and training activities, gerontology centers, and special projects. Of this amount, \$8,500 thousand will support research activities designed to increase knowledge of needs and services developments for all elderly, particularly for the vulnerable elderly living in the community. Projects

will also focus on aging policy areas including income, health, and housing; \$17,000 thousand will support activities for career training, inservice training, and manpower development to assure an adequate number of trained personnel in the field of aging, including special attention to the needs of minority older persons; \$3,800 thousand will provide support for centers of gerontology, and \$30,000 thousand will support special projects designed to meet the special needs of, and improve the delivery of services to, low-income, minority, rural, and disabled older persons, including long-term care services demonstrations. A level of \$2,000 thousand will support the National Clearing House on Aging.

## TITLE III—NUTRITION PROGRAM

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
HEW nutrition program funding .....	\$250,000	\$250,000	\$277,546
Department of Agriculture commodity support .....	30,000	45,000	50,500
Program funding .....	<u>\$280,000</u>	<u>\$295,000</u>	<u>\$328,046</u>

3. *Rehabilitation services administration.*—The rehabilitation program provides services to mentally and physically handicapped people primarily to enable them to prepare for and engage in gainful employment. A wide range of services may be provided including counseling, vocational evaluation, work adjustment, medical and physical restoration, vocational training, job placement and post employment services.

A priority goal of the basic State-Federal program will be to serve and place into gainful employment as many handicapped individuals as is possible, with heavy emphasis placed on serving and rehabilitating greater numbers of the severely handicapped.

The innovation and expansion grants program will provide State vocational rehabilitation agencies with funds to be used in planning, testing, and evaluating alternative approaches to improving the capacity, quality or cost effectiveness of discrete service delivery components in the vocational rehabilitation delivery system, particularly those serving handicapped individuals who are poor.

Special projects provide funds for specialized programs, services, studies, and activities which are not fulfilled through the basic State-Federal program. These projects have been targeted primarily toward providing services for the most severely handicapped who have been underserved in the past or who have not yet been accepted into the vocational rehabilitation system. Funding for special projects in 1980 will focus on projects with industry and the provision of assistance to communities. Independent living grants will provide comprehensive services to meet the needs of individuals whose disabilities are so severe that they do not have employment potential but who can utilize rehabilitation services to live and function independently.

In 1980, rehabilitation research activities will focus on developing and applying knowledge that will enable vocational rehabilitation agencies to improve their operations and program and resource management, and to develop, produce and apply techniques that will restore physical and mental functions to enhance employment potential of the severely handicapped.

In rehabilitation training, priority emphasis will be given to training personnel required by State VR agencies to serve severely handicapped individuals such as the blind, the deaf, the spinal cord injured, and those with end-stage renal disease.

#### REHABILITATION RESOURCES

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
Basic State grants.....	\$760,225	\$760,472	\$817,484
Other Federal programs <sup>1</sup> .....	149,853	158,725	168,268
Subtotal.....	910,078	919,197	985,752
State resources (est.).....	190,056	260,000	280,000
Total.....	\$1,100,134	\$1,179,197	\$1,265,752

<sup>1</sup> Added resources will be made available to States if individuals meet the special selection criteria of the Social Security Administration.

Under programs for the developmentally disabled the State grant program enables States to increase the provision of quality services to the developmentally disabled through the design and implementation of a comprehensive State plan and the implementation of a system for the protection and advocacy of the rights of those being served. Special project grants will support demonstration projects, training, and technical assistance to promote adequate community-based programs for care, habilitation and deinstitutionalization efforts. Support will also continue for the university affiliated facilities programs, at a reduced level.

4. *Administration for Public Services.*—In 1980 \$5,975 thousand is requested to support research and evaluation activities authorized under sections 1110, 1115, and 426 of the Social Security Act. Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the area of social service. Increased funding in 1980 will be used for research which cuts across several program areas within the Office of Human Development Services.

5. *Administration for Native Americans.*—The Native American program promotes the social and economic self-sufficiency of Native Americans within the framework of the Federal policy on self-determination. Grant-fee funding requested will be allocated to approximately 304 tribes or rural Indian groups, 15 Alaskan villages, 3 Native Hawaiian projects, and 59 urban organizations.

Approximately 12% to 15% of the eligible population will be directly served. Project grants made in 1980 will support high priority activities designed to assist Native American communities develop the economic and social foundations for self-sufficiency and to strengthen the capability of tribal governments and community governing bodies to assume the vital functions of integrating the diverse services into a continuum of care.

6. *White House Conference on Families.*—In 1980, State and National interest group conferences are being held in preparation for the national conference which will take place in 1981.

7. *White House Conference on Children and Youth.*—Activities will include the establishment of a national advisory committee and forums at the State and regional levels. The conference will be held in 1982.

8. *Salaries and expenses.*—Funds are requested for administrative expenses to carry out programs within the Office of Human Development Services which provide services to the aged, children and youth, the handicapped, and native Americans. In addition to these special populations, expenses are required to administer services provided under title XX of the Social Security Act to enable eligible populations to remain or become self-supporting and self-sufficient. Funds also support the President's Committee on Mental Retardation, the Office of Information and Resources for the Handicapped, and the Architectural and Transportation Barriers Compliance Board. In 1980, work will continue on the development of a comprehensive management information system for social statistics.

The work incentive (WIN) program is designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program for employment, work experience, training, and support services. Employment, work experience, and training are administered by the Department of Labor; supportive services by the Department of Health, Education, and Welfare. State expenditures are matched by Federal participation at the rate of 90%.

Funding provided to the States allows them maximum flexibility to design the program mix most suitable to their population and priorities.

1. *Grants to States.*—The program includes registration, callup for appraisal and employability planning, counseling and development, direct placement, follow-up of all employed registrants, and adjudication of the work test. Individuals are prepared for self-supporting employment through on-the-job training, public service employment, work experience, and institutional training. Child care and other services necessary to enable WIN participants to accept training or employment are also provided. In 1980, approximately one million new applicants for AFDC will register with the WIN program. During the course of the year, about 286,000 registrants will be placed in jobs.

Beginning in 1979, resources are to be provided for planning and implementing special initiatives in some States, including some welfare reform models, and for expanding experimental/demonstration projects, which are designed to enhance the developmental aspects of the program without diminishing the program's emphasis on employment.

2. *Program direction and evaluation.*—This activity provides for the administration and evaluation of the WIN program.

The 1980 estimate proposes an appropriation of \$4,440 thousand for the purchase of foreign currencies in excess currency countries to support research activities which complement, supplement, and strengthen domestic research and service programs. This program enables the United States to benefit from progress that other countries are making in dealing with rehabilitation, social services, and social security problems, and to utilize the talents of foreign scientists working in these fields.

Research and demonstration projects are planned in several areas of vocational rehabilitation services. Projects are also proposed for 1980 dealing with social services and social security problems. These projects will provide analysis of the experience of other nations in dealing with comparable social insurance, social welfare, and social services problems.

There will be U.S. consultants and international scientists or fellows participating in the program during 1980. This interchange of experts program supplements the research and demonstration international program and provides direct technical assistance and information among scientists.

Total.....	170	170

Excludes \$40 thousand in 1979 and \$45 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$34 thousand) is included above.

1. *Departmental direction* activities provide policy or administrative guidance to HEW components:

(a) *Executive direction* provides leadership and policy direction for HEW programs; coordinates departmentwide planning and evaluation activities, including welfare reform and national health insurance; develops the Department's legislative program.

(b) *Public affairs* gives overall guidance to HEW public relations and provides information to the press, public and private groups, and individuals.

(c) *Management and budget* formulates policy for budget, finance, grants and procurement, and management information systems. The budget provides 6 new positions and \$170 thousand to improve grants and procurement policy, and 15 new positions and \$1,500 thousand to implement a check-paid letter of credit proposal which will have 1980 outlay savings of about \$400 million in public assistance programs. Additional savings are anticipated in future years.

(d) *Personnel administration* plans and implements policy for personnel management, training, career development, and equal employment opportunity.

(e) *Field management* supports the 10 principal regional officials who represent the Secretary, serve congressional district offices, coordinate media and intergovernmental relations, assess service delivery for HEW programs, and help resolve problems involving Department components.

(f) *General counsel* acts as legal adviser to the Secretary and provides legal services related to management of the Department.

2. *Departmental operations* activities provide services to HEW components and perform work related directly to the public:

(a) *Facilities engineering* coordinates construction support services and facilities policies and procedures; supervises design, construction, and use of funds for special purpose projects; oversees payments to the General Services Administration for standard level user charges and reimbursable service costs.

(b) *Administrative services* provides HEW headquarters with the following services: mail and messenger; congressional materials; purchasing, supply, and laboring; reproduction services including offset printing, photography, visual exhibits, and collating; procurement of printing from the Government Printing Office and other sources; and inventory management.

(c) *Grants payment system* centrally pays most HEW grants, contracts, and loans which are classified as Federal assistance. Five new positions and \$629 thousand

are provided to increase HEW cash management practices; the new resources will save about \$3,500 thousand annually.

(d) *Regional services* provides common administrative services including personnel, finance, indirect cost negotiation, and general office services. Fifteen new positions and \$400 thousand are included to provide more intensive reviews of State and local welfare cost allocation plans and university computer cost proposals, with expected annual savings of about \$40 million.

(e) *Employee systems center* provides central payroll services for HEW employees and automated personnel data services for HEW components.

(f) *Legal services* performs legal workloads associated with HEW program operations.

The budget reflects savings of 108 positions and \$2,481 thousand identified in a zero-based review of these activities.

Note.—Includes \$620 thousand in 1980 for functions transferred to Office of the Inspector General previously financed by Program management, Health Care Financing Administration. Comparable amounts for 1978 (\$620 thousand) and 1979 (\$620 thousand) are excluded above.

The Office of the Inspector General, created by Public Law 94-505, includes the Immediate Office of the Inspector General, the Office of Health Care and Systems Review, the Audit Agency, and the Office of Investigations.

(a) *Immediate office* oversees the audit, investigations, and systems staffs of the Inspector General.

(b) *Health care and systems review* provides an oversight capability to identify and correct inefficiencies, waste and fraud in all the Department's operations, including those health programs specifically cited in Public Law 94-505; coordinates activities in HEW principal operating components designed to promote efficient program operations and to eliminate fraud and abuse; coordinates relationships with Federal, State, and local governments and nongovernmental entities.

(c) *Audit agency* provides policy guidance for all HEW audit activities and coordinates audits within HEW, and with the Defense Contract Audit Agency and other agencies, through a central office in Washington, D.C.; regional offices perform internal and external audits of

all Department activities to assure that Federal funds are used for intended purposes. An increase of \$1,000 thousand is provided for contract audits.

(d) *Office of Investigations* investigates fraud and abuse in the management of HEW programs and in the utilization of Federal assistance funds provided by the Department; serves as the HEW liaison with the Department of Justice and U.S. attorneys on criminal investigation matters; directs and coordinates criminal investigations task forces involving HEW programs; coordinates Federal-State investigative efforts involving HEW-funded programs. The Office of Investigations is administered from headquarters in Washington, D.C., with investigations directed by regional field staff.

NOTES

Note.—Excludes \$330 thousand in 1980 for functions transferred to General Departmental Management. Comparable amounts for 1978 (\$330 thousand) and 1979 (\$330 thousand) are included above.  
Excludes \$2,839 thousand in 1979 and \$3,243 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$2,612 thousand) is included above. In addition, excludes \$90 thousand in 1979 and \$95 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$86 thousand) is included above.

The Office for Civil Rights is responsible for carrying out the Department's enforcement programs under title VI of the Civil Rights Act of 1964 (racial and ethnic discrimination), title IX of the Education Amendments of 1972 (sex discrimination), Section 504 of the Rehabilitation Act of 1973 (discrimination against the physically and mentally handicapped), Public Law 93-638 (Indian Preference Act), sections 704 and 855 of the Public Health Service Act of 1972 (sex discrimination in medical education and nurse training programs), section 407 of the Drug Abuse Office and Treatment Act of 1972 (discrimination in the admission of drug addicts to hospitals), and section 321 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (discrimination in the admission of alcoholics to hospitals). These statutes require nondiscrimination in the employment and service delivery systems of virtually every elementary, secondary and postsecondary educational system or institution; every hospital, nursing home, child care or other medical institution; and every State and local health, welfare, social service and education agency throughout the Nation. The statutes require the Department to investigate complaints, conduct periodic reviews, negotiate to secure compliance, conduct appropriate enforcement proceedings, and promote voluntary compliance by all of these recipients of Federal financial assistance.

The Office is also responsible, under Executive Order 11914, for providing guidance to and coordinating the implementation of section 504 of the Rehabilitation Act

of 1973 by all Federal departments and agencies empowered to extend Federal financial assistance.

The Director, Office for Civil Rights, also serves as a special assistant to advise the Secretary on all civil rights-related policies and programs.

The budget reflects savings of 121 positions and \$3,771 thousand due to management efficiencies and improved productivity in complaint investigations.

Note.—Operating costs in 1978 and 1979 represent the liquidation of 1977 and prior year obligations for activities being transferred from the Working capital fund.

The HEW Working capital fund, originally authorized by Public Law 82-452 (66 Stat. 369) to finance central departmental services, provides a single means for consolidated financing and accounting of business-type operations involving the sale of services to customers.

The fund operates two activities:

1. *Data management* provides data systems design and consultation, key punching, and computer processing to HEW components.

2. *Printing and reproduction* provides offset printing, photography, visual exhibits, collating and addressograph services, and procurement of printing from the Government Printing Office and other sources.

*Operating results.*—The fund continued to operate on a sound financial basis in 1978. Retained earnings in excess of current needs are returned to Working capital fund customers in proportion to their contribution to the surplus.

90.00	Outlays .....			33,681

Legislation will be proposed in 1979 to restructure Federal support for State and community mental health services. This program will assist States and communities in developing mental health treatment and prevention resources and services that are appropriate to the unserved and underserved—especially minorities, children, the elderly, and persons with chronic mental illness. Legislation will also be proposed for a new State formula grant program for mental health, alcohol and drug abuse activities.

**HEALTH CARE FINANCING ADMINISTRATION**

**GRANTS TO STATES FOR MEDICAID**

(Proposed for later transmittal, proposed legislation)

GRANTS TO STATES FOR MEDICAID—Continued

Program and Financing (in thousands of dollars)—Continued

Identification code	75-0512-2-1-551	1978 actual	1979 est.	1980 est.
Relation of obligations to outlays:				
71.00	Obligations incurred, net .....		-53,000	-19,300
90.00	Outlays .....		-53,000	-19,300

Legislation will be proposed to improve and expand the medicaid program while reducing Federal costs. This legislation would:

1. Curb the rate of inflation in hospital costs by limiting the annual increase in acute hospital inpatient revenues.

2. Expand the availability and improve the quality of health care for financially needy children by extending medicaid coverage to over two million low-income children in intact families and by improving the delivery of health care to children currently eligible.

3. Expand the availability and improve the quality of health care for low-income pregnant women by providing prenatal medicaid coverage for an additional 100,000 women.

4. Assure that medicaid funds are not expended for individuals who have resources to pay for some portion of their long-term care.

5. Require the use of medicare audit findings in the administration of the medicaid and maternal and child health programs.

6. Permit the Secretary to release social security wage information to States for use in determining medicaid eligibility, and to permit State unemployment agencies to release wage information to the State medicaid agencies.

7. Authorize the Secretary to assess a civil money penalty against any person who he determines, after notice and opportunity for a hearing, has filed a fraudulent claim under the medicaid program.

8. Amend the medicaid law to clarify the Secretary's authority to define "residence" for purposes of medicaid eligibility in order to insure care for eligible migrant workers.

9. Eliminate the excessive reimbursement to hospital-based radiologists, anesthesiologists, and pathologists that has resulted from existing reimbursement practices.

10. Provide for taking into consideration stepparent income in determining eligibility for medicaid benefits.

11. Improve work incentives in the SSI disability program by eliminating the abrupt and complete cutoff of medicaid benefits which occurs when recipients exceed the substantial gainful activity (SGA) level (\$240 per month).

12. Provide for the impact on medicaid from the proposal to standardize the AFDC work expense disregard.

13. Assure that reimbursement under the medicaid program is made only for services which are medically helpful to beneficiaries by eliminating reimbursement for chiropractic services.

PAYMENT TO HEALTH CARE TRUST FUNDS

(Proposed for later transmittal, proposed legislation)

Program and Financing (in thousands of dollars)

90.00	Outlays.....		-350,000	-1,680,885

Proposed legislative items that affect the Federal hospital insurance trust fund would:

1. Curb the excessive rate of inflation in hospital costs by limiting the annual increase in acute hospital inpatient revenues.
2. Require the use of medicare audit findings in the administration of the medicaid and maternal and child health programs.
3. Restructure medicare coverage for the working aged to reduce the costs of medicare benefits.
4. Eliminate the additional 24-month waiting period for medicare coverage for reentitled disabled individuals.
5. Extend medicare coverage for disabled workers who return to work but are not medically recovered.
6. Provide for Federal administrative costs to implement hospital cost containment.

**FEDERAL SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND**

(Proposed for later transmittal, proposed legislation)

Relation of obligations to outlays:				
71.00	Obligations incurred, net .....			-62,300
90.00	Outlays.....			-62,300

There are a number of legislative proposals which affect the Federal supplementary medical insurance trust fund. These proposals would:

1. Provide for medicare reimbursement on the basis of reasonable costs in cases where providers who are normally reimbursed on the basis of costs have been reimbursed on the basis of charges.
2. Increase the rate of medicare program payment for outpatient psychiatric services from 50% to 80% of reasonable charges and increase the maximum amount payable in a calendar year from \$250 to \$750.
3. Authorize the Secretary to assess a civil money penalty against any person who he determines, after notice and the opportunity for a hearing, has filed a fraudulent claim under the medicare program.
4. Eliminate the excessive reimbursement to hospital-based radiologists, anesthesiologists, and pathologists that has resulted from existing reimbursement practices.
5. Assure that reimbursement under the medicare program is made only for services which are medically helpful to beneficiaries by eliminating reimbursement for chiropractic services.
6. Eliminate or shorten the 24-month waiting period for medicare coverage for re-entitled disabled individuals.
7. Extend medicare coverage for disabled workers who return to work but are not medically recovered.
8. Provide Federal administration costs for implementing the civil money penalty proposal.

**SOCIAL SECURITY ADMINISTRATION**

**SUPPLEMENTAL SECURITY INCOME PROGRAM**

(Proposed for later transmittal, proposed legislation)

**Program and Financing (in thousands of dollars)**

Identification code	75-0406-2-1-604	1978 actual	1979 est.	1980 est.
<b>Program by activities:</b>

Relation of obligations to outlays:				
71.00	Obligations incurred, net .....			
90.00	Outlays.....			

**Intragovernmental funds—Continued**

**SUPPLEMENTAL SECURITY INCOME PROGRAM—Continued**

There are several legislative proposals which affect the supplemental security income program:

1. Restrict SSI eligibility for persons who dispose of assets in order to qualify for benefits. (Outlay reduction of \$6 million in 1980.)
2. Offset windfall SSI benefit payments when there is a retroactive title II payment in certain dual entitlement situations. (Outlay reduction of \$19 million in 1980.)
3. Phase in a system to determine SSI eligibility and payment amount based on a retrospective monthly accounting method. This proposal, which is intended to improve management of the SSI program, will be fully effective approximately 18 months after enactment.
4. Provide that "affidavits of support" for legal aliens are enforceable contracts, with sponsors responsible for the support of legal aliens during the first 5 years of residence. This provision also applies to AFDC. (Outlay reduction of \$2 million in 1980.)
5. A group of proposals aimed at improving equity or simplifying the SSI program. (Outlay increase of \$7 million in 1980.)
6. Round benefits to the nearer dollar versus the higher dime as under present law (no outlay impact in 1980.)
7. Several of the OASDI proposals which reduce OASDI costs will increase SSI costs. (Outlay increase of \$20 million in 1980.)

ments in error, and aid in the further reform of the welfare system. (Outlay reduction of \$81 million in 1980.)

3. Increase the Federal matching rates and the total reimbursement ceilings for public assistance in Guam, Puerto Rico, and the Virgin Islands, and require the territories to maintain their contributions under these programs so that the increase in Federal support may be passed through to the poor. (Outlay increase for public assistance of \$29 million in 1980.)

4. Require the States to determine AFDC eligibility and the payment amount on a retrospective monthly accounting method. This proposal to improve management of the AFDC program will be effective in October 1981

5. Improve the child support enforcement program by a series of proposals, including: States would become eligible for intrastate incentive payments, AFDC families would receive an extra 3 months of AFDC entitlement following the time such families would otherwise become ineligible due to child support payments in order to ensure that such support remains regular, alimony payments would be enforced and collected for AFDC cases, States would be able to receive wage information from the Social Security Administration, the requirement for incentive payments to States in interstate child support cases would be eliminated, and Federal matching would be made permanent for non-AFDC cases if a fee equal to 10% of collections were charged. These changes are designed to enhance the effectiveness of making collections and increasing the provision of legally required support, simplify and improve the administration of the program, and reduce the public welfare burden. (Outlay reduction of \$60 million in 1980.)

**ASSISTANCE PAYMENTS PROGRAM**

(Proposed for later transmittal, proposed legislation)

<b>Relation of obligations to outlays:</b>			
71.00 Obligations incurred, net			-212,000
90.00 Outlays			-212,000

There are several legislative proposals which affect the assistance payments program:

1. Count stepparent income in determining AFDC eligibility and benefit amount. This provision will permit consideration of the full resources of the family with which an AFDC child resides and forms an integral part. (Outlay reduction of \$100 million in 1980.)
2. Standardize the AFDC work expense disregard so that, except for child care expenses, the disregard would be computed as a fixed percentage of earned income rather than based on an itemization of work-related expenses. This would simplify the administration of the AFDC program, reduce State costs in determining the disregard, reduce the amount of benefit pay-

**REFUGEE ASSISTANCE**

(Proposed for later transmittal, proposed legislation)

**Program and Financing (in thousands of dollars)**

A number of changes in the old-age and survivors and disability insurance (OASDI) programs will be proposed. These include:

1. Proposals to improve the disability program by setting a new limit on the amount of monthly family benefits; scaling to the worker's age the number of low earning years that can be excluded when computing benefits; and increasing work incentives for those on the disability rolls.
2. Proposals affecting inappropriate features of a pension program such as selected student benefits and the requirement for insured status for survivors.
3. Proposals to adapt benefits to current social and economic conditions which deal with parent's benefits; lump sum death benefit payments; and the minimum benefit for new beneficiaries.
4. Proposals to make other program improvements such as scaling back the number of low earning years that can be excluded when computing benefits for survivors of young deceased workers and offsetting OASDI benefits for pensions from noncovered Federal employment.
5. Technical proposals to reimburse the trust funds for certain administrative expenses incurred in providing information to pension plans; modify penalties for failure to make a timely report of excess earnings; eliminate several gender-based distinctions from the social security law; modify the retirement test and permit

workers to acquire medicare entitlement without filing for cash benefits; and round benefit checks to the nearer dollar instead of the higher dime.

OFFICE OF HUMAN DEVELOPMENT SERVICES

GRANTS TO STATES FOR SOCIAL AND CHILD WELFARE SERVICES

(Proposed for later transmittal, proposed legislation)

Program and Financing (in thousands of dollars)

Legislation will be proposed which would increase the ceiling for social services under title XX of the Social Security Act from \$2.5 billion to \$2.9 billion. A separate funding authorization of \$16,100 thousand would also be provided for Guam, Puerto Rico, the Virgin Islands, and the Northern Mariana Islands, so that they may more adequately plan for their social services programs in an orderly fashion.

Legislation will also be proposed which will permit greater control, better utilization, and improved management of funds in the unprecedentedly rapidly growing State and local training program. This proposal would more closely and appropriately tie the level of training funds to the level for the title XX social services program, to which training is supposed to be carefully linked, by limiting the amount of State and local training funds which would be available to any State to 3% of the amount available under the State's ceiling for services. This limitation would be phased in over a 3-year period starting in 1980 to enable States to easily adjust their training programs. The allocation for States currently over their limits would be reduced by one-third of the amount over in 1980 and two-thirds in 1981, until in 1982 when no State would be over its allocation.

Legislation will be proposed to broaden the scope of child welfare services, to protect and enhance the status of children in foster care, to safeguard their parents' rights, to reunite families where feasible, to provide for the permanent placement of foster care children as soon as possible, if reuniting them with their families is infeasible, and to provide assistance for adoption. Encouragement will be provided to the States to improve legal procedures and systems to care for and monitor the status of foster care children.

## GENERAL PROVISIONS

【SEC. 201. Notwithstanding any other provision in this Act, the total amount of budget authority provided in this Act for the Department of Health, Education, and Welfare is hereby reduced in the amount of \$1,000,000,000: *Provided*, That this reduction shall be achieved by the reduction of fraud, abuse, and waste as defined and cited in the annual report, dated March 31, 1978, of the Inspector General of the Department of Health, Education, and Welfare: *Provided further*, That this section shall not be construed to change any law authorizing appropriations or other budget authority in this Act.】

SEC. 【202】 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 【203】 202. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be awarded to these institutions in the form of lump-sum grants and expenditures made therefrom shall be subject to audit by the Secretary of Health, Education and Welfare.

SEC. 【204】 203. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount equal to as much as the entire cost of such project.

SEC. 【205】 204. None of the funds contained in this title shall be available for additional permanent positions in the Washington area if the total authorized positions in the Washington area is allowed to exceed the proportion existing at the close of fiscal year 1966.

SEC. 【206】 205. Appropriations in this Act for the Health Services Administration, the National Institutes of Health, the Center for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, 【and】 the Health Resources Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand eight hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; *expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide*; rental or lease of living quarters (for periods not exceeding 5 years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country, purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed \$9,500 for official reception and representation expenses related to any health agency of

the Department when specifically approved by the Assistant Secretary for Health.

SEC. 【207】 206. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed, or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 【208】 207. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed, or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

【SEC. 209. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing, or clustering. The prohibition described in this section does not include the establishment of magnet schools.】

SEC. 【210】 208. None of the funds provided for in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service; or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term when so determined by two physicians.

Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

SEC. 【211】 209. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 328 of the Public Health Service Act.

【SEC. 212. Funds appropriated under this title may not be used to pay the compensation of experts or consultants (other than full-time employees) or organizations thereof, or to procure by contract the services of experts or consultants or organizations thereof, in excess of \$194,000,000 during fiscal year 1979.

For the purposes of this section, consultant costs are defined by chapter 815 of the General Administration Manual of the Department of Health, Education, and Welfare.】 (*Department of Health, Education, and Welfare Appropriation Act, 1979.*)

## TITLE IV—GENERAL PROVISIONS

SEC. 401. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 402. Appropriations contained in this Act, available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 403. Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meet-

ings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 404. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.]

SEC. 405. The Secretary of Labor and the Secretary of Health, Education, and Welfare are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 406. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 407. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication,

radio, television or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient or agent acting for such recipient to engage in any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 408. The Secretary of Labor and the Secretary of Health, Education, and Welfare are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I and II, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, Federal Mediation and Conciliation Service".

SEC. 409. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or his parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section. (*Department of Labor and Health, Education, and Welfare Appropriations Act, 1979.*)

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in part V of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and thrift insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the Department's functions, as set forth below:

1. *Housing programs* cover the Department's major housing subsidy programs as well as the mortgage insurance activities funded from the Federal Housing Administration fund, including loan management and property disposition activities. Other functions included under this heading are community disposal operations and liquidating programs.

2. *Government National Mortgage Association (GNMA)* covers the Department's programs to increase the availability of mortgage credit and stabilize the financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

3. *Community planning and development* covers the community development grant and urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This heading also covers the comprehensive planning grant (section 701) program, rehabilitation loans (section 312), and the urban homesteading program as well as the closeout of projects under terminated categorical community development programs.

4. *Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Other major divisions within the Department include the New Communities Development Corporation; Neighborhoods, Voluntary Associations and Consumer Protection, including the Office of Interstate Land Sales Registration; Fair Housing and Equal Opportunity; and Departmental Management.

Day-to-day administration, processing, and funding decisions for programs of the Department of Housing and Urban Development are carried out in area and insuring offices located within the geographical boundaries of 10 regional offices.

### HOUSING PROGRAMS

#### *Federal Funds*

**General and special funds:**

#### *SUBSIDIZED HOUSING PROGRAMS\**

\* See Part III for additional information.

#### [ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING]

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in annual appropriations acts, is increased by **[\$1,322,297,000]** \$1,140,661,275 of which not more than **[\$50,000,000]** \$37,500,000 shall be for the modernization of existing low-income housing projects: *Provided*, That budget authority obligated under such contracts shall be increased above amounts heretofore provided in annual appropriations acts by **[\$24,395,848,000]** \$26,680,127,750: *Provided further*, That any balances of authorities remaining at the end of fiscal year **[1978]** 1979 shall be added to and merged with the authority provided herein and made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year **[1979]** 1980.

#### [HOUSING PAYMENTS]

For the payment of annual contributions, not otherwise provided for, in accordance with section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c); for payments authorized by title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749 et seq.); for rent supplement payments authorized by section 101 of the Housing and Urban Development Act of 1965, as amended (12 U.S.C. 1701s); for payments as authorized by sections 235 and 236, of the National Housing Act, as amended (12 U.S.C. 1715z, 1715z-1); and for payments as authorized by section 802 of the Housing and Community Development Act of 1974 (42 U.S.C. 1440), **[\$4,460,000,000]** \$5,529,000,000. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979; additional authorizing legislation to be proposed.*)

#### RENT SUPPLEMENT

*The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under Section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), is reduced in fiscal year 1980 by the uncommitted balances of authorizations provided for this purpose in Appropriation Acts.*

The subsidized housing program schedule reflects both budget authority to enter into additional contracts for subsidized housing and an appropriation for payments required to liquidate such contracts under seven separate programs as described below. This budget consolidates these separate programs to simplify the budget presentation for subsidized housing activity. The proposed appropriation language would continue the practice of making budget authority available pursuant to specific authorizations. Housing assistance contracts obligate the Federal Government to make annual payments up to the contract amount over the life of the project or mortgage. Since payments usually commence near or upon completion of the dwelling, payments often are not required until 1 to 4 years after execution of the contract. The term of the contract also varies among the respective programs.

Total obligations in 1980 are estimated at \$27,589.2 million which will be utilized primarily to fund up to 300,000 additional subsidized housing units. However, estimated unobligated balances available of \$869 million, including \$238.4 million in annual contributions balance, plus the proposed \$200 million reductions from recaptured rent supplement balances, would reduce the requirement for net budget authority to \$26,480.1 million in current authority and \$39.7 million in permanent authority. In addition, an appropriation of \$5,529.0 million is proposed for 1980 to liquidate contractual obligations made under the various subsidized housing

programs. The following subsidized housing programs are included in the consolidated schedule:

1. *Lower income housing (section 8).*—For 1980, almost \$20 billion in new budget authority will be required for this program of assistance to lower income families commonly referred to as the section 8 program. Assistance may be provided to eligible families on the basis of contracts with either public housing agencies (PHA's) or contracts made directly with private owners who wish to participate in the program. Depending on community housing needs as expressed in local housing assistance plans, the program can be used with existing housing stock, to stimulate rehabilitation of deteriorated and substandard housing units, or to provide subsidies to tenants in newly constructed projects. Participating families pay rents equal to at least 15% and no more than 25% of income.

For 1980, this budget estimates reservations of up to 250,000 units for lower income households. The proposed distribution of units includes up to 102,600 existing housing units and up to 147,400 newly constructed or substantially rehabilitated units. Of the existing housing units, 40,000 are expected to require moderate rehabilitation. Reservation estimates may be adjusted depending upon amendment requirements in 1980.

2. *Public housing.*—This is a locally operated low-income public housing program in which public housing agencies engage in or assist in the development and operation of public housing projects which may be newly constructed, existing, rehabilitated, or leased. HUD makes annual contributions to PHA's for the PHA-owned or leased housing. Financial assistance is also provided to Indian housing authorities to plan, build, own, and operate low-income public housing projects. Initial occupancy of public housing projects is limited to low-income families and rents are established by PHA's subject to HUD approval.

This budget proposes that \$6.1 billion in budget authority be used to approve applications for up to 50,000 newly constructed and rehabilitated units. Reservation estimates may be adjusted depending upon amendment requirements in 1980.

Also included is budget authority of \$750 million for modernization of public housing to make capital improvements and major repairs to public housing projects owned and operated by PHA's.

In addition, \$39.7 million of permanent budget authority is provided for adjustments to existing public housing section 23 leased housing contracts to fund unavoidable increases in operating and maintenance costs.

3. *Rent supplement.*—Rent supplement payments are made to owners of certain private housing on behalf of qualified low-income tenants. Beginning in 1979, the troubled projects operating subsidy program will be used to assist qualifying projects with rent supplement units. Language will be proposed to rescind contract authority that is recaptured under the Rent Supplement program starting in 1980.

4. *Homeownership and rental housing assistance (sections 235 and 236).*—The Housing and Urban Development Act of 1968, as amended, authorizes a homeownership subsidy for lower income families under section 235 of the National Housing Act. Under this program,

mortgage interest costs are subsidized down to 4%. The homeowner must contribute at least 20% of adjusted gross income toward monthly mortgage insurance and tax payments on the house.

For 1980, reservations are estimated for 25,000 new and substantially rehabilitated units. These reservations will be made out of \$7.9 billion of budget authority obligated in 1976 pursuant to court order. The long-term obligations resulting from reservations made in 1980 are expected to be approximately \$919.6 million based on maximum contract terms of 30 years.

The Housing and Urban Development Act of 1968, as amended, authorized the section 236 rental housing assistance program to subsidize the monthly mortgage payment which the owner of a rental or cooperative project is required to make. This interest subsidy is intended to reduce rents for lower income tenants.

Reservation of all previous bona fide commitments made to specific projects or agencies before the termination of the production program in January 1973 will be completed in 1979 and no new units will be reserved in 1980. Contract authority remaining in 1980 will be used for deep subsidies pursuant to the Housing and Community Development Act of 1974, as amended, and for amendments to existing contracts.

*College housing grants.*—This activity provides for the payment of debt service grants to colleges and eligible hospitals for the construction of student housing and related facilities. No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

*Section 802 grants.*—Grants are authorized to be made to or on behalf of State housing finance and development agencies. Such grants may not exceed 33⅓% of the interest payable on bonds, debentures, notes, and other obligations issued by such agencies to finance housing related facilities. Because the demand for such grants has disappeared with the improvement of the bond market from its 1976 level, a rescission of \$600 million in unobligated balances is being proposed for 1979.

#### PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

For payments to public housing agencies for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), **[\$727,000,000] \$741,500,000.** (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979; additional authorization to be proposed.*)

90.00	Outlays.....	691,329	652,000	720,000

Payments for the operation of low-income housing projects are provided to assist public housing agencies (PHA's) to meet certain deficits in the operation of PHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD to cover the development, acquisition, or modernization costs of the projects. Operating subsidies provided to PHA's are based on a performance funding system (PFS) formula which sets subsidy payments at what it would cost a well-managed PHA to operate comparable projects. Surpluses previously obligated to authorities' reserves will be used to finance part of the 1980 program.

CONGREGATE SERVICES PROGRAM

For contracts with and payments to public housing agencies and nonprofit corporations for congregate services programs as authorized by the Congregate Housing Services Act of 1978, \$10,000,000, to remain available until September 30, 1984. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.)

Program and Financing (in thousands of dollars)

74.40	Obligated balance, end of year.....		-8,200	-6,200
90.00	Outlays.....		1,800	2,000

The Congregate services program was established to provide 3- to 5-year contracts to fund services for eligible residents of Public Housing and Section 202, Housing for the Elderly or Handicapped projects.

In 1979, a limited pilot demonstration will test whether this HUD approach of providing contracts directly with local public housing authorities to supply these congregate services is more effective than alternative HEW social services programs. Congregate services can include meal services and essential supportive services. These 3- to 5-year contracts would be commenced in 1979 and evaluated over the life of the contract. No additional resources are requested for 1980 since these contracts will continue through 1981. Should the dem-

onstration prove successful, additional resources will be requested in future years.

TROUBLED PROJECTS OPERATING SUBSIDY

For assistance payments to owners of eligible multifamily housing projects, in the program of operating subsidies for troubled multifamily housing projects under the Housing and Community Development Amendments of 1978, [\$74,000,000] \$82,000,000, together with any excess rental charges collected after September 30, 1977, to remain available until September 30, [1980]1981. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979; additional authorizing legislation to be proposed.)

Program and Financing (in thousands of dollars)

74.40	Obligated balance, end of year.....		-44,000	-48,000
90.00	Outlays.....		30,000	78,000

Operating assistance will be provided to financially troubled subsidized projects with HUD-insured or HUD-held mortgages. Eligible projects include those developed under section 221(d)(3) (below market interest rate) and section 236 of the National Housing Act as well as rent supplement units. A HUD-insured project is eligible if it is in serious default. HUD-owned projects also are eligible if they will be sold to purchasers who agree to maintain the low or moderate income character of the projects.

The subsidies are intended to prevent potential losses to the FHA Fund resulting from project insolvency and to preserve these projects as a viable source of housing for low and moderate income tenants.

The operating subsidies will fund the difference between HUD-approved project operating expenses and projected rents and will help defray additional rent increases for low-income tenants. The actual amount of assistance will be reviewed each year following HUD examination of the project operating budget and management improvements instituted by the project owner. Subsidies will be provided on an annual basis subject to the availability of funds.

Public enterprise funds:

TITLE III—CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such

corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.*)

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and the General Insurance Fund, [\$352,290,000] \$194,850,000, to remain available until expended, as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)). (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979; additional authorizing legislation to be proposed.*)

The Federal Housing Administration (FHA) fund was established as a noncorporate business type fund. A system of mortgage and loan insurance programs was created to help finance the production, purchase, repair, and improvement of residential properties. The FHA fund was brought under the Government Corporation Control Act by the Housing Act of 1948.

The FHA fund consists of four separate funds. Activity for each individual housing program is shown by fund for financial control and reporting purposes.

The *Mutual mortgage insurance fund* provides the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The *Cooperative management housing insurance fund*, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213.

The *General insurance fund* provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The *Special risk insurance fund* provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged

## Public enterprise funds—Continued

## FEDERAL HOUSING ADMINISTRATION FUND—Continued

to the appropriate insurance fund by mortgage insurance program. The combined reserves of all four funds reached a deficit position for the first time in 1975. The deficits do not reflect the actual cash position of the funds, but do reflect the financial status of the long-term insurance reserves. During 1978, expenses exceeded income by \$302 million resulting in a reserve deficit from program operations of \$2.212 billion. An appropriation of \$352.3 million has been provided for 1979 to reimburse the FHA fund for a portion of the losses sustained in the special risk and general insurance funds from the sale of acquired properties and assigned mortgages. For 1980, an additional appropriation of \$194.9 million is proposed.

Insurance reserves from operations at the end of 1980 are estimated to be in a surplus position for the mutual mortgage insurance and cooperative management housing insurance funds, but in a deficit status of about \$5.3 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1980 is as follows:

## STATUS OF INSURANCE RESERVES FROM OPERATIONS

	(In millions of dollars)		
	1978 actual	1979 estimate	1980 estimate
Insurance fund:			
Mutual mortgage.....	2,238	2,373	2,546
Cooperative management housing.....	24	24	25
General.....	-2,391	-2,601	-2,781
Special risk.....	-2,083	-2,320	-2,537
Total FHA fund.....	-2,212	-2,524	-2,747

As a result of the continued deficits in the FHA fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include tightened underwriting procedures and faster sales of acquired properties to reduce holding costs. In addition, section 8 subsidies and Troubled Projects Operating Subsidies are being used to enhance the viability of projects with HUD-insured and HUD-held mortgages. The latter will also result in fewer mortgage assignments and property acquisitions.

Beginning in 1979, a major sales effort will be undertaken in order to reduce the inventory of multifamily properties. Section 8 assistance will be utilized to protect low-income tenants from displacement and, where necessary, finance the repair or rehabilitation of these units by the private sector. As the new section 8 moderate rehabilitation program becomes operational in 1979, it will substitute for the use of FHA fund resources to carry out needed repairs in connection with property disposition. FHA funds will continue to be used to maintain FHA properties in a safe and sanitary condition. It is estimated that a total of 50,000 multifamily units will be sold in 1979 and 1980.

For 1980, a new protective insurance payments program is being proposed that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This program is viewed as a viable alternative in many cases to the home mortgage assignment program cur-

rently being carried out by the Department and will assist in this effort to minimize insurance claims against the fund.

*Budget program.*—The budget proposes an appropriation of \$194.9 million to restore the net realized losses on sale of property in the General insurance and Special risk insurance funds.

Amount.....	30.2	38.3	50.0

*Financing.*—In 1978, \$97 million of debentures were issued and \$75 million were redeemed. The Housing and Urban Development Act of 1965 authorized the

payment of claims in cash and borrowing from the Treasury as necessary to do so. All home mortgage claims and multifamily housing claims under sections 220, 221, 223, 233, 235(j), and 236 are paid in cash. Treasury borrowings amounted to \$440 million in 1978. In 1979, it is estimated that \$100.0 million of borrowings will be repaid to the Treasury. Treasury borrowing will not be necessary in 1980.

**Insurance authority.**—The authority for insurance operations for all programs was extended to September 30, 1979, by the Housing and Community Development Amendments of 1978. In general, these authorizations are without dollar limitation, except for the credit assistance program.

**Operating expenses.**—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA fund.

## Public enterprise funds—Continued

## HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

The limitation on the aggregate loans that may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), from the fund authorized by subsection (a)(4) of such section, is increased by \$800,000,000, together with any portion of loan limitations established for fiscal years beginning after June 30, 1975 which was not administratively committed or which becomes uncommitted, in accordance with paragraph (C) of such subsection, which funds shall be available only to qualified nonprofit sponsors for the purpose of providing 100 per centum loans for the development of housing for the elderly or handicapped, with any cash equity or other financial

commitments imposed as a condition of loan approval to be returned to the sponsor if sustaining occupancy is achieved in a reasonable period of time: *Provided*, That the full amount shall be available for permanent financing (including construction financing) for housing projects for the elderly or handicapped: *Provided further*, That the Secretary may borrow from the Secretary of the Treasury in such amounts as are necessary to provide the loans authorized herein: *Provided further*, That, notwithstanding any other provision of law, the receipts and disbursements of the aforesaid fund shall be included in the totals of the Budget of the United States Government. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.*)

Section 202 of the Housing Act of 1959 established a program of housing assistance for lower income persons who are elderly or handicapped. Although the Housing and Community Development Act of 1974 (section 210(d)) provided that the receipts and disbursements of the fund shall not be included in the budget, the 1978 and 1979 HUD Appropriation Acts returned the program "on-budget."

This program provides housing assistance in the form of direct Federal loans to lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. For 1980, a \$800 million loan limitation is proposed which will provide financing for approximately 19,700 units. At least \$50 million of this amount will be used to finance an estimated 1,300 units designed specifically for nonelderly handicapped persons.

**Financing.**—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

**PARTICIPATION INSUFFICIENCIES**

[In thousands of dollars]

	1978 actual	1979 estimate	1980 estimate
Interest expense on participation certificates.....	5,998	6,077	6,077
Other expenses.....	119	115	115
Total.....	6,117	6,192	6,192
Interest earned on pledged bonds.....	-2,982	-2,850	-2,850
Insufficiency.....	3,135	3,342	3,342
Financed by:			
Retained earnings reserved to meet insufficiency.	-2,766	-3,042	-3,042
Investment income from participation sales fund.	-369	-300	-300
Budget authority.....			

Repayments and interest income from loans made prior to 1974 continue to be available for use under the revised program. In addition, the Housing and Community Development Act of 1974 authorized Treasury borrowing up to \$800 million. The Housing Authorization Act of 1976 raised cumulative outstanding Treasury borrowings in 1979 to \$3,300 million, subject to release in appropriations acts. Release of such amounts of borrowing authority as may be necessary to carry out the proposed \$800 million loan program in 1980 is proposed.

Title IV of the Housing Act of 1950 authorized loans at 3% interest to colleges and eligible hospitals for the construction or acquisition of housing and related facilities such as student centers, dining halls, and infirmaries. The HUD Act of 1968 amended the program to provide an alternate source of assistance by authorizing debt service grants which reduced the cost to colleges and hospitals of borrowing in the private market.

**Budget program.**—New reservations for this program were discontinued effective January 5, 1973. A limited direct loan program was conducted in 1977 and 1978 and also is being conducted in 1979 using repayments of loans and other income. Eligibility is limited to certain new construction, modernization and rehabilitation of existing facilities, including rehabilitation to reduce fuel consumption and/or other operating costs. It is proposed to transfer all assets and liabilities of the college housing loan fund to the revolving fund (liquidating programs) in 1980 for liquidation.

**Financing.**—Funds for the direct loan program have been provided primarily from Treasury borrowing and from the sale of participation certificates which are backed by pools of college housing loans held by the Federal Government. Treasury borrowings totaled \$2,811 million as of September 30, 1978.

Sales of participation certificates, as provided in the Participation Sales Act of 1966, totaled \$2.2 billion through 1969, of which \$464.4 million was outstanding as of September 30, 1978. In order to pay the interest on the participation certificates, funds are appropriated annually to match the difference between the interest due on the participation certificates and the interest collections on the college housing bonds underlying the certificates.

Budget authority required for estimated insufficiencies and unfinanced deficits is shown in the following table:

**PARTICIPATION INSUFFICIENCIES**

[In thousands of dollars]

	1978 actual	1979 estimate	1980 estimate
Interest expense on participation certificates .....	28,476	28,810	.....
Interest earned on pledged bonds .....	—14,175	—14,341	.....
Net interest costs .....	14,301	14,469	.....
Servicing expenses .....	53	50	.....

Sales authorized in 1967 Appropriation Act (indefinite appropriation) .....	285	287	.....
Sales authorized in 1968 Appropriation Act (definite appropriation) .....	10,299	14,619	.....

**Operating results.**—The estimated net operating income of \$1.6 million in 1979 will decrease the cumulative deficit to \$167.1 million.

All unobligated balances, as well as all receipts and reimbursements anticipated in future years, will be used to cover operating expenses and repay Treasury borrowing. The budget provides \$15.0 million to fund loan management, liquidation, and property disposition expenses related to possible loan foreclosure actions in 1979.

The low-rent public housing loan fund provides Federal financing for the construction, acquisition, or modernization of public housing projects owned by public housing agencies (PHA's) until the projects can be financed in the private market. Federal loans are not available for the financing the construction of leased housing under section 8 of the U.S. Housing Act of 1937, as amended. Payments to liquidate the indebtedness of the PHA's pursuant to annual contribution contracts are provided out of the appropriation to liquidate contract authority in the subsidized housing account.

**Budget program.**—The Department may contract with PHA's to make loans covering up to 100% of total construction, acquisition, or modernization costs. Experience indicates, however, that the volume of direct Federal loans outstanding at any one time will be only a small percentage of Federal loan approvals because private financing is relied upon as a major source of funds. The status of loan approvals follows:

**STATUS OF LOAN APPROVALS**

[In thousands of dollars]

	1978 actual	1979 estimate	1980 estimate

Loan approvals canceled due to permanent financing, liquidations, and adjustments in year, net.....	-238,100	-450,000	-1,250,000
Outstanding loan approvals, end of year.....	12,196,067	14,983,467	16,315,867
Outstanding Federal loans to Public Housing Agencies.....	-47,406	-47,406	-47,406
Outstanding guaranteed non-Federal temporary notes.....	-6,423,166	-8,033,400	-10,126,000
Utilized loan approvals, end of year.....	5,725,495	6,902,661	6,142,461

(a) *Direct loans.*—Direct Federal loans are made to finance the early costs of PHA-owned project development as well as the modernization of existing PHA-owned projects. Direct loans are made with available working funds and with funds borrowed from the Treasury when necessary. Borrowings outstanding at any one time from the Treasury may not exceed \$1.5 billion. Pursuant to the U.S. Housing Act of 1937, as amended, the ceiling on Treasury borrowing is applied only to Federal loans which are estimated to be disbursed rather than to total approvals which are not expected to result in outlays. The Secretary has set the maximum Federal loan exposure factor (that is, the maximum demand for Federal loans at any one time) at 7.5% of loan approvals outstanding. Only minimal outstanding Treasury borrowings are anticipated on September 30, 1979, or September 30, 1980.

(b) *Private loans.*—When Federal direct loans to a PHA accumulate to an amount that is attractive to private investors, the PHA sells short-term tax-exempt notes to the public and utilizes the proceeds to repay the Federal loans and to meet current needs for additional working capital. These notes are secured by the Federal Government's pledge to make Federal loans, if necessary, covering up to 100% of the development, acquisition or modernization cost of the project. The notes sold at an average interest rate of 3.53% in 1978.

In 1978, \$175 million in direct Federal loans were repaid using funds raised in the private market with a Federal guarantee. Repayments are estimated at about \$200 million in 1979 and 1980, respectively. The temporary notes sold to private investors are issued for short periods, averaging 8.7 months in 1978, and may be re-issued several times and in increasing amounts before the development, acquisition or modernization costs are permanently financed. As a result, a considerable turnover of short-term notes takes place and the volume of loan activity conducted under the program during any fiscal year greatly exceeds the amount of loans outstanding at the end of that fiscal year.

The status of temporary financing and refinancing of production and management loans during 1978 and estimated transactions during 1979 and 1980 follow:

**STATUS OF TEMPORARY FINANCING**

(In millions of dollars)

	1978 actual	1979 estimate	1980 estimate
<b>Direct Federal loans to PHA's:</b>			
Balance at start of year.....	32	47	47
Loans made during year.....	190	200	200
Loans repaid during year.....	-175	-200	-200
Balance at end of year.....	47	47	47
<b>Loans by private investors:</b>			
Balance at start of year.....	5,868	6,423	8,033
Loans made during year.....	9,448	11,110	13,193
Loans repaid during year.....	-8,893	-9,500	-11,100
Balance at end of year.....	6,423	8,033	10,126

(c) *Bonds.*—Normally, PHA-owned dwellings are permanently financed at or near completion of development or acquisition through the sale of long-term bonds to the public. These usually are 40-year serial bonds and are secured by the Federal Government's pledge to pay annual contributions in sufficient amounts to meet

principal and interest requirements. No bond offerings have been made since 1974.

*Operating results.*—The estimated net operating income of \$5.7 million in 1980 will increase retained income to \$82.8 million. Retained income may be required to meet program requirements in future years.

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the section 202 housing for the elderly or handicapped program. To insure a sufficient commitment by the sponsor to the proposed project, up to 80%, but not to exceed \$50,000, of the startup costs are funded through these "seed money" loans. Sponsors are required to demonstrate their financial capacity by providing 20% from their own funds which is repaid from the initial proceeds of the section 202 construction loan.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

Section 212 of the Housing and Community Development Act of 1974 provided that fund balances may be used, subject to prior commitment of contract authority, for the payment of tax and utility increases in section 236 projects. The use of the fund balances for this purpose, beginning in 1976, reflected court orders directing the Department to use the funds for this purpose in certain specific cases. However, section 206 of the Housing and Community Development Act of 1977 (Public Law 95-128) amended the authorization to require the Secretary to use the fund balances for the payment of tax and utility increases without the need for commitment of contract authority.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the troubled projects program. The \$2.5 million obligated in 1979 represents additional tax and utility payments made prior to the enactment of the 1978 amendments. Legislation is proposed to dispose of the unobligated balances remaining in the fund.

The Revolving fund (Liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs. In 1971, the public works planning advances, grants to aid advance acquisition of land and Alaska housing programs were transferred to the fund for liquidation. In 1975, the assets and liabilities of grants for basic water and sewer facilities, grants for neighborhood facilities, grants for open space land and public facility loans also were transferred to this fund for liquidation in accordance with the Housing and Community Development Act of 1974. This budget assumes the transfer of all assets and liabilities of the college housing loan program to this fund for liquidation effective October 1, 1979.

**Financing.**—In the past, certificates of participation in pools of public facility loans and college housing loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving Fund (Liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans and college housing loans is shown in the following table:

Under the Disaster Relief Acts of 1970 and 1974, the Department is authorized to use its own funds and resources to respond to Federal Disaster Assistance Administration (FDAA) mission assignments in Presidentially declared disasters. Such mission assignments normally are to provide, finance, and manage temporary housing for persons displaced by disasters.

Section 406 of the HUD Appropriation Act of 1973 (Public Law 92-383) authorized the Secretary to establish a fund to initially finance the costs of providing and managing temporary housing. This fund has provided interim financing pending reimbursement from Funds appropriated to the President for disaster relief.

After the fund is reimbursed, the contributing HUD accounts are repaid. However, sufficient balances have been retained in the fund to enable the Department to provide prompt emergency housing.

In 1979, responsibility for disaster mission assignments will be transferred to the Federal Emergency Management Agency. Funds which have been borrowed for this account from the Revolving fund (liquidating

Intragovernmental funds—Continued

DISASTER ASSISTANCE FUND—Continued

programs) will be repaid and the Disaster assistance fund will be liquidated.

The Housing Act of 1964, as amended by the Participation Sales Act of 1966, authorizes the pooling of mortgages or other types of obligations of certain Government departments or agencies and the sale by the Government National Mortgage Association, as trustee, of beneficial interest, or participations in such pools. The Participation Sales Act of 1966 also authorized the establishment of appropriations to cover the excess of interest payments to holders of participation certificates over the interest payments received from the pooled mortgages or other obligations. A permanent, indefinite appropriation is available to cover insufficiencies for sales authorized in 1967 while those authorized in 1968 require annual appropriations.

Through September 30, 1968, this fund purchased and sold preferred stock in the secondary market operations of the Federal National Mortgage Association and made loans to it as needed to support its operations involving the purchase of federally insured or guaranteed mortgages. On that date, the Association redeemed all preferred stock and became a private corporation owned by its common stockholders. All authority for investment in preferred stock of the corporation lapsed.

The fund is still authorized to make loans to the Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

SPECIAL ASSISTANCE FUNCTIONS FUND

The aggregate amount of purchases and commitments authorized to be made pursuant to section 305 of the National Housing Act, as amended (12 U.S.C. 1720), is further increased by \$2,000,000,000, **[of]** which **[\$1,500,000,000]** may be out of recaptured Special Assistance Purchase authority. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.)

**Special assistance functions.**—The Association is authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans. Funds are currently available to the President to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is administered with the use of processing facilities of the Federal National Mortgage Association.

**Budget program.**—Commitment contracts amounting to \$2.0 billion are planned for 1979 and 1980 for new commitments under section 8 and targeted tandem. Increases to outstanding commitment contracts expected in future years under these programs are included in

these levels. Mortgage purchases, representing deliveries from commitment contracts in prior years, are estimated at \$465 million in 1979 and \$1.22 billion in 1980. Sales of these mortgages are estimated at \$430 million in 1979 and \$980 million in 1980.

## STATUS OF MORTGAGE PURCHASE COMMITMENTS OUTSTANDING

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
Commitments outstanding, start of year.....	45,728	2,167,536	3,578,536
1. New commitments—tandem plan for unassisted mortgages: Targeted tandem.....	577,899	500,000	500,000
2. New commitments—tandem plan for assisted mortgages: Section 8 tandem.....	1,422,101	1,500,000	1,500,000
3. Reserves for future increases.....	(272,891)	(200,000)	(200,000)

6. Commitments presented for purchase.....	-164,460	-465,000	-1,217,200
Commitments outstanding, end of year.....	2,167,536	3,578,536	4,208,736

Budget authority which has been recaptured mainly through portfolio sales, liquidations, and foreclosures, will be used to fund the \$2.3 billion program for 1980.

**Financing.**—Funds for mortgage purchases are obtained from principal liquidations through either repayments on portfolio mortgages or sale of tandem purchases, and borrowing from the Treasury. A portion of the mortgage portfolio was financed by sale of participation certificates. This amounted to \$1.2 billion in prior years and there is a remaining liability of \$394.0 million offset by \$105.0 million on deposit with the trustee in anticipation of scheduled retirements. Funds for operating costs, mainly interest expense and discounts required on tandem mortgage sales, are obtained from mortgage earnings and from appropriations for the difference between interest expense on participation certificates and the income from related mortgage investment earnings.

## STATUS OF MORTGAGE PURCHASE AUTHORITY

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
Authority available, start of year.....	5,153,156	3,402,981	2,525,081
New budget authority.....	.....	500,000	.....
Authority recaptured or canceled.....	296,914	678,200	1,374,900
Authority used in year.....	-2,047,089	-2,056,100	-2,176,800
Authority available for release.....	3,402,981	2,525,081	1,723,181

Note.—Includes availability of both Presidential and Congressional Authorization.

**Operating results.**—Through September 30, 1978, losses of \$66.6 million for participation sales have been offset by appropriations. Other losses from below-market interest rate loans, tandem costs, interest on Treasury borrowings and asset sales amounted to \$2,018.2 million. Of this amount, \$1,951.6 million is carried as an impairment of capital.

The special assistance functions are expected to result in losses estimated at \$249.9 million in 1979 and \$188.3 million in 1980.

Appropriations for insufficiencies under the participation sales fund will cover \$6.8 million of 1979 losses and \$6.5 million of 1980 losses.

Public enterprise funds—Continued

SPECIAL ASSISTANCE FUNCTIONS FUND—Continued

The following table shows the derivation and financing of the interest insufficiencies on outstanding participation certificates:

**Emergency mortgage purchase assistance.**—Section 313 of the National Housing Act provides standby authority to purchase below-market-rate mortgages when the Secretary finds that economic conditions are having a severely disproportionate effect upon the housing industry which seriously threatens to affect the economy. This authority was released in 1975 and 1976 to issue purchase commitments for a total of \$7.750 billion of home mortgages and \$3 billion of project mortgages. An additional \$2 billion was released for the purchase of project mortgages on September 21, 1976, and, by September 2, 1977, the funds were fully committed. No new commitments will be issued through 1980 but amendments to existing commitment contracts amounting to \$300 million are expected for 1979 and \$150 million in 1980. Mortgage purchases are estimated at \$1.950 billion in 1979 and \$970 million in 1980. Sales of purchased mortgages are planned for both 1979 and 1980. These sales will be scheduled to minimize the loss to the Government. Sales are estimated at \$2.025 billion in 1979 and \$970 million in 1980.

**Financing.**—Funds are obtained from Treasury borrowings, mortgage principal liquidations, and mortgage interest payments.

**Operating results.**—Losses are estimated at \$265.6 million in 1979 and \$145.9 million in 1980, primarily from the differences in prices paid to purchase the below-market interest mortgages and the prices that are obtainable when such mortgages are sold at market yields.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans, or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand on, or purchased under contracts made before, November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

**Budget program.**—It is not expected that any purchase of mortgages under these functions will be made during 1979 or 1980.

**Financing.**—These functions are financed principally by Treasury borrowings, portfolio liquidations, and sales of participation certificates in mortgage pools.

Transfers of principal repayments on pooled mortgages to the Participation sales fund for repayment of participation certificates are expected to be \$27.0 million in 1979 and \$26.0 million in 1980. This program is more fully explained under the Participation sales fund.

**Operating results.**—Net income of \$4.2 million is estimated for 1979 and \$4.1 million for 1980. Cumulative retained earnings reserved for insufficiencies and other losses and contingencies is estimated at \$121.4 million

for 1980. No payment to the Treasury out of earnings is projected for 1979 and 1980. The following table shows the financing of the insufficiencies:

## PARTICIPATION INSUFFICIENCIES

	[In thousands of dollars]		
	1978 actual	1979 estimate	1980 estimate
Interest accrued on participation certificates .....	21,327	16,292	16,292

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Associ-

ation (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured or VA-guaranteed mortgages.

GNMA must make good on loans resulting from defaults of mortgages included in pools backing guaranteed securities. Claims and other expenses represent losses sustained and projected on the mortgage pools. Recent efforts to limit and reduce losses in the mobile home pools through programmatic changes have resulted in substantial decreases over previous estimates. Estimated losses for 1978-80 are presented below.

[In thousands of dollars]

	1978 actual	1979 estimate	1980 estimate
Mobile homes pools .....	470	600	500
Single-family pools .....	117	100	120
Project pools .....	613	400	500
Total .....	1,200	1,100	1,120

**Budget program.**—Program activity is summarized in the following table:

[In thousands of dollars]

	1978 actual	1979 estimate	1980 estimate
Applications received.....	16,500,000	15,500,000	17,000,000
Guarantees issued .....	15,194,100	15,000,000	16,500,000
Securities outstanding.....	52,964,200	62,800,000	73,300,000

**Financing.**—In addition to an application fee, guarantee fees and other charges will be assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee.

**Operating results.**—Fee collections and other income are expected to exceed expenses by \$53.5 million in 1980. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participa-

tions in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations, together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States for the funding of local community development programs.

Funds are distributed to eligible applicants using the higher of two objective formulas. Funds must be allocated between communities in metropolitan areas and those in nonmetropolitan areas. Within metropolitan areas, "metropolitan cities" and "urban counties" are eligible for entitlement funding based on the criteria of the formulas. In addition, a categorical program financial settlement fund is available to assist communities for the financial settlement of their prior categorical programs.

*Budget program.*—The total requested for 1980 is \$3,900 million. This includes \$3,800 million for the basic grant program, and \$100 million for the categorical program financial settlement fund.

Outlays are estimated at \$2,875 million in 1979 and \$3,272 million for 1980. However, actual outlays will be governed by the rate at which communities expend the funds which have been made available to them.

**URBAN DEVELOPMENT ACTION GRANTS**

For grants pursuant to section 103(c) of title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), \$400,000,000, to remain available until September 30, **[1981]** 1982. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.*)

Title I of the Housing and Community Development Act of 1974, as amended, authorizes grants to distressed cities and distressed urban counties for the funding of economic development and neighborhood revitalization projects.

This assistance is in addition to assistance available under the community development block grant program and will help to provide a catalyst for State and local governmental assistance and private investment in such communities. The commitment of these other resources is a precondition for the execution of a firm contractual obligation between a recipient and HUD. In 1978, announcements of 154 application approvals were made for a total of \$323 million with actual obligations amounting to \$119.4 million.

The 1980 budget proposes \$400 million for the urban development action grant program.

COMPREHENSIVE PLANNING GRANTS

For grants as authorized by section 701 of the Housing Act of 1954, as amended (40 U.S.C. 461), **[\$53,000,000]** \$40,000,000, to remain available until expended. Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties without payment to units of local government for use in an urban homesteading program.

*Budget program.*—No appropriation is requested for 1980. Prior year funds available in 1980 will be used to reimburse the Federal Housing Administration Fund for the value of transferred properties. The amount available in 1980, including a carryover from the 1979 appropriation and amounts previously appropriated to the FHA fund for homesteading reimbursements, will support an estimated 3,200 properties at an average value of \$7,400 to be conveyed to local governments.

Section 312 of the Housing Act of 1964, as amended, authorizes loans for the rehabilitation of residential and commercial properties. Approximately 17,300 dwelling units will be rehabilitated in 1980, including 12,800 single family and 4,500 multifamily units. This program will also be used in conjunction with the urban home-steading program to rehabilitate properties in home-steading areas.

**Budget program.**—The \$130 million appropriation requested for 1980 plus loan repayments and other income becoming available during the year will provide for a program level of \$185 million. These funds will be used to provide loans in certain federally assisted areas such as urban renewal, code enforcement, community development block grant, and section 810 urban home-steading areas.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the community development block grant program, authorized by the 1974 act.

No new budget authority is required for the program. However, a permanent indefinite appropriation to liquidate prior unfunded contract authority is available. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

*Budget program.*—Grants are distributed to new community developers under section 718 to supplement public facility projects in existing new communities. No new grant reservations will be incurred with the balance of the unreserved appropriations proposed for rescission in 1979. All existing commitments are estimated to be disbursed by the end of 1980.

The Housing and Urban Development Act of 1968, as amended, and title VII of the Housing and Urban Development Act of 1970, as amended, authorize Federal assistance to private and public new community developers. The program provides for Federal guarantee of the bonds, debentures, notes, and other obligations issued by, or on behalf of, private and public new community developers. Federal guarantees of obligations issued by developers may not exceed \$50 million for each new community project.

Of the 13 new community projects with guarantees, 4 are being liquidated. This requires that the Federal Government retire the outstanding guaranteed debentures and provide funding for certain project operation expenses where a project's cash resources are exhausted. These actions are necessary to protect the Federal interest. Additional resources will be made available to the remaining projects to enhance their chances for continued successful development. This will include debt restructuring and the infusion of additional housing assistance and community development funds.

**Administrative expenses.**—These amounts represent the administrative cost of carrying out this program.

**Contract support and services.**—These costs are incurred for analysis and management and technical services, including land appraisals, for the new community projects in the program.

**Interest on U.S. Treasury borrowings.**—This represents the interest which will be paid to the U.S. Treasury on the borrowings of the fund. The increase in Treasury borrowings is necessary to fund the proposed budget plan.

**Other program costs.**—The budget reflects that four projects required an acceleration of principal payments on outstanding guaranteed debentures in 1978 involving \$79 million. No debenture retirements are scheduled for 1979 or 1980. It is anticipated that operating expenses for projects with exhausted cash resources will amount to \$6.5 million in 1979 and \$5.8 million in 1980. Interest payments on guaranteed debentures will decline as a portion of the outstanding debentures is retired.

**Financing.**—The budget program in 1979 and 1980 will be financed primarily by Treasury borrowing. In addition, developers receiving guarantees are charged fees which will continue to be collected through 1980. The amounts advanced to developers to meet certain project expenses will be paid by the developers once the projects are in a financial position to make the repayments. Repayments of \$8.3 million and \$6.0 million are estimated in 1979 and 1980, respectively.

**Operating results.**—Through September 30, 1978, cumulative net loss in the fund amounted to \$24.9 million. It is estimated that the fund will accrue an estimated deficit amounting to \$91.0 million by the end of 1980. This net loss is due to the financial restructuring of the new communities which requires Federal expenditures until repayments can be made by the developers or until recoveries from security can be accomplished. No restoration of capital will be necessary during the period covered by this budget.

**[FEDERAL INSURANCE ADMINISTRATION]**

Note.—The Federal Insurance Administration will be abolished effective March 25, 1979, pursuant to Reorganization Plan No. 3 of 1978. All functions will be transferred to the Federal Emergency Management Agency. The related appropriation language and amounts formerly included in this organization are reflected with the successor accounts in the Federal Emergency Management Agency.

**NEIGHBORHOODS, VOLUNTARY ASSOCIATIONS, AND CONSUMER PROTECTION**

*Federal Funds*

**General and special funds:**

**HOUSING COUNSELING ASSISTANCE**

For contracts, grants, and other assistance, not otherwise provided for, for providing counseling and advice to tenants and homeowners—both current and prospective—with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership, including provisions for training and for support of voluntary agencies and services as authorized by section 106(a)(1)(iii) and section 106(a)(2) of the Housing and Urban Development Act of 1968, as amended, \$9,000,000. (*Department of Housing and Urban Development—Independent Agencies Appropriations Act, 1979.*)

**Program and Financing** (in thousands of dollars)

90.00 Outlays.....	4,219	7,356	9,000

The housing counseling assistance program will continue to assist eligible homeowners to prevent and reduce defaults and to reduce foreclosures on single-family homes and the resulting loss to FHA insurance funds. In 1980, \$8 million will be available for counseling homeowners in default and \$1 million will be available to continue a prepurchase counseling demonstration program.

**NEIGHBORHOOD SELF-HELP DEVELOPMENT PROGRAM\***

\* See Part III for additional information.

For contracts, grants, and other assistance, not otherwise provided for, to neighborhood organizations as authorized by the Neighborhood Self-Help Development Act of 1978 (Title VII, Housing and Community Development Amendments of 1978, Public Law 95-557), \$15,000,000 to remain available until expended.

**Program and Financing** (in thousands of dollars)

Identification code	1978 actual	1979 est.	1980 est.
86-0175-0-1-451			
<b>Program by activities:</b>			
10.00 Neighborhood self-help development program (costs—obligations) (object class 41.0).....	.....	.....	15,000

74.40 Obligated balance, end of year.....	.....	.....	—10,000
90.00 Outlays.....	.....	.....	5,000

The Neighborhood Self-Help Development Act of 1978 authorizes the Secretary to provide grants and other forms of assistance to neighborhood organizations to enable such organizations to undertake housing, economic development, and community development projects in deteriorated low and moderate income neighborhoods. These neighborhood projects should include a self-help component, involve the local residents directly, and maximize use of non-Federal resources.

The 1980 funding would provide approximately 120 grants to neighborhood development organizations for program development activities.

**LIVABLE CITIES\***

\* See Part III for additional information.

For contracts, grants, and other assistance, not otherwise provided for, as authorized by the Livable Cities Act of 1978 (Title VIII, Housing and Community Development Amendments of 1978, Public Law 95-557), \$5,000,000, to remain available until expended.

74.40	Obligated balance, end of year.....			—3,000
90.00	Outlays.....			2,000

The Livable Cities Act of 1978 authorizes the Secretary to provide grants or enter into contracts with non-profit organizations to enable them to undertake or support projects which have substantial artistic, cultural, historical or design merit and contribute to neighborhood revitalization. The Secretary determines those projects which qualify in consultation with the Chairman of the National Endowment for the Arts.

This appropriation would provide funding for approximately 100 grants in 1980.

## MOBILE HOME STANDARDS PROGRAM

## Program and Financing (in thousands of dollars)

Identification code	86-0167-0-1-376	1978 actual	1979 est.	1980 est.

90.00	Outlays.....	495	940	

Pursuant to the National Mobile Home Construction and Safety Standards Act of 1974, Federal mobile home construction and performance standards were published in the Federal Register.

The act directs that inspections and investigations be conducted to enforce the Federal standards. Mobile home producers are required to have their building plans approved by an agency acceptable to HUD prior to manufacture.

Appropriated funds are estimated to be disbursed fully by the end of 1979. No appropriation is requested for either 1979 or 1980. A \$19 fee is charged to the manufacturers for each mobile home shipped to cover the costs of the monitoring and enforcement activities of HUD contract agents.

## INTERSTATE LAND SALES

90.00	Outlays.....	405	789	423

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 50 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, not exceeding \$1 thousand, to be paid by the developer when filing a statement of record. Effective during 1979, the Department is projecting an increase in the fee receipts. Under a new fee structure, a typical development in excess of 500 lots will be charged the maximum fee of \$1,000. The fee receipts are permanent appropriations that offset the administrative expenses incurred in program operations. The balance of the administrative expenses is included under Salaries and expenses, Department of Housing and Urban Development.

## POLICY DEVELOPMENT AND RESEARCH

## Federal Funds

## General and special funds:

## RESEARCH AND TECHNOLOGY

For contracts, grants, and necessary expenses of programs of research and studies relating to housing and urban problems, not otherwise provided for, as authorized by title V of the Housing and Urban Development Act of 1970, as amended (12 U.S.C. 1701z-1 et seq.), including carrying out the functions of the Secretary under section 1(a)(1)(i) of Reorganization Plan No. 2 of 1968, [\$57,500,000] \$53,000,000, to remain available until September 30, [1980] 1981. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979; additional authorizing legislation to be proposed.)

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out through grants to and contracts with industry, nonprofit research organizations, educational institutions, and through agreements with State and local governments and other Federal agencies. For 1979, \$8.5 million will be made available to the Neighborhood Reinvestment Corporation. The corporation is requesting separate funding for 1980.

In 1980, funds requested will support HUD research efforts in the following areas: (1) the development of techniques to stabilize housing costs, especially for subsidized housing; (2) alternative housing finance mechanisms; (3) housing and related needs of the elderly and handicapped; (4) a comprehensive series of evaluations reviewing the key elements of operating programs in HUD; (5) improving compliance with equal opportunity statutes, executive orders, and Department regulations; (6) studies to support neighborhood revitalization and reinvestment; (7) attracting minorities and women to urban public service; (8) improving fiscal management of State and local governments; and (9) the dissemination and transfer of research results to users.

Other major activities to be continued in 1980 are: (1) collection and analysis of economic and financial data essential to HUD policy and program development, with the largest single project in this area being the Annual Housing Survey undertaken to measure changes in the housing inventory and to compile data on the physical conditions of housing units and the characteristics of the occupants in both urban and rural areas; (2) experimental housing allowance research; and (3) activities aimed at improving the environment and conserving energy.

## NOTES

Excludes the following amounts for activities transferred to Disaster Assistance and Relief, Federal Emergency Management Agency:

	1978	1979	1980
Budget authority .....	13,947	14,352	
Outlays .....	13,325	13,347	

Excludes \$4,125 thousand in 1979 and \$4,709 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$3,795 thousand) is included above. In addition, excludes \$56 thousand in 1979 and \$61 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$52 thousand) is included above.

This appropriation finances salaries and related costs associated with administering the programs of the Department of Housing and Urban Development. Pursuant to 12 U.S.C. 1701(b)(3) all administrative expense funds of the Department may be consolidated within a single fund including an appropriation as well as funds otherwise provided. The individual budget activities are as follows:

1. *Housing and mortgage credit programs.*—This activity includes staff salaries and related expenses associated with administering housing programs and the Government National Mortgage Association (GNMA). This includes public housing, the lower income housing assistance program (section 8), programs for the elderly and handicapped as well as other production programs to further homeownership, provide mortgage insurance, and extend the availability of mortgage credit.

2. *Community planning and development programs.*—Funds in this activity are for staff salaries and related expenses required for administering community planning and development programs and new community assistance programs. The programs provide grants for community development, urban development action grants, comprehensive planning, and the closeout of former categorical grant programs such as urban renewal.

3. *Equal opportunity, research, regulatory, and insurance programs.*—This activity includes the salaries and related expenses associated with implementing equal opportunity programs in housing and employment as required by law and executive orders; the administration of research programs and demonstrations; the administration of counseling and neighborhood programs, and the administration of consumer protection activi-

ties, primarily in the areas of interstate land sales, mobile home construction, and safety and real estate settlement procedures.

4. *Departmental management, legal and audit services.*—This activity includes a variety of general functions required for the Department's overall administration and management. These include the Office of the Secretary, Office of General Counsel, and Office of Inspector General, as well as administrative support in such areas as accounting, personnel management, contracting and procurement, and office services. Legal services funded under this activity include the field legal staff as well as the Office of General Counsel at headquarters. Additionally, certain overall departmental costs, such as the headquarters' portion of payments for office space rental, utilities, communications, and postal services, are budgeted under this activity.

5. *Field direction and administration.*—This activity includes the salaries and related expenses for the regional administrators, area office managers, and their immediate staffs who are responsible for the direction, supervision, and performance of the Department's field offices. Also included are the functions of directors, Office of Regional Administration and their management divisions. The functions of this staff include such duties as personnel management and general administrative services for the field offices. This activity also includes the field offices' portion of overall costs such as payments for office space rental, utilities, communications, and postal services.

The Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601), authorizes grants in support of research, development, and demonstration projects focusing on the relationship of urban transportation systems to the comprehensively planned development of urban areas. Reorganization Plan No. 2 of 1968 transferred all but sections 6, 9, and 11 of the 1964 Act from the Department of Housing and Urban Development (HUD) to the Department of Transportation (DOT). Subsequent to this, both agencies agreed that DOT shall have the responsibility for administering sections 6, 9, and 11 as well. Pursuant to this agreement, the unobligated balances of the 1969 appropriation were allocated to DOT.

The Working capital fund, authorized by the Department of Housing and Urban Development Act of 1965,

## Intragovernmental funds—Continued

## WORKING CAPITAL FUND—Continued

finances administrative services which can be performed more efficiently on a centralized basis. The fund is financed from fees charged for services performed.

1. *Printing and reproduction services* provides centralized services for all departmental printing, reproduction, and distribution.

2. *Visual arts services* provides photographic and design services along with preparation of visual presentations, displays, exhibits, and administrative graphics.

3. *Central supply services* handles all procurement, develops programs for storage of supplies and equipment, maintains teleticketing travel services for all central office personnel, and maintains in-house capability for limited office machine servicing and furniture and equipment repair. Beginning in 1980 this service will no longer be provided through the Working capital fund.

4. *Communication services* includes the cost of the Federal Telecommunications System and mail and messenger functions. Beginning in 1980 this service will no longer be provided through the Working capital fund.

5. *Data processing services* includes complete ADP service to program operations and to such administrative functions as departmental payroll, personnel, finance and accounting, budgeting, nonexpendable property inventories, and related common services.

The Joint grants management fund is used for the administration of integrated grant administration projects for which HUD is the lead agency. Obligations are on the basis of project approvals by Federal regional councils and fund commitments by participating agencies. Advance payments from participating agencies are received in the fund and utilized to finance the administration of the projects. The activity in 1980 will depend on requests for assistance and the extent to which agreements can be reached with other Federal agencies.

TITLE IV—GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; or to payments to interagency motor pools where separately set forth in the budget schedules: *Provided further*, That the limitations may be increased by the Secretary when necessary to allow for travel performed by employees of the Department of Housing and Urban Development as a

result of increased Federal Housing Administration inspection and appraisal workload.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—  
(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such an audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitations.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals for projects not specifically solicited by the Government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979.*)

# DEPARTMENT OF THE INTERIOR

## LAND AND WATER RESOURCES

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management is responsible for the conservation, management and development of 417 million acres of national resource lands, including 243 million acres in Alaska.

The Bureau also administers mining and mineral leasing on 370 million acres of mineral estate underlying other ownerships, and approximately 1.1 billion acres of the Outer Continental Shelf.

The work of the Bureau produces revenues from various sources. These revenues are distributed as follows (in millions of dollars):

	1978 actual	1979 estimate	1980 estimate
Total receipts.....	3,148	4,323	3,437
Payments to States and counties.....	-287	-309	-356
Deposited in the Treasury.....	2,861	4,014	3,081

### Federal Funds

#### General and special funds:

#### MANAGEMENT OF LANDS AND RESOURCES\*

\*See Part III for additional information.

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, **[\$286,853,000]** \$287,931,000. (5 U.S.C. 583, 594; 43 U.S.C. 2, 54, 72, 129, 315, 1181a-f, 1701; 78 Stat. 986; Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

<sup>1</sup> Includes capital investment as follows: 1978, 7,989 thousand; 1979, \$10,411 thousand; 1980, \$9,550 thousand.  
<sup>2</sup> Returned to the Land and water conservation fund to repay funds borrowed by BLM to cover firefighting obligations in excess of available appropriation in 1977.

Note.—Excludes \$61 thousand in 1979 and \$69 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$56 thousand) is included above.

1. *Energy and minerals management.*—Includes such activities as energy and nonenergy minerals management (onshore and offshore) in response to national demand. The program will provide for sale of coal, oil and gas, oil shale, uranium, geothermal resources, and nonenergy minerals. The environmental impact of proposed energy and minerals development activities will be assessed. Lease stipulations and other environmental protection measures will mitigate adverse effects. Specifically, the program will provide for issuing onshore leases, 4 competitive sales on the Outer Continental Shelf and processing 1,050 operation plans required under the new surface management regulations.

2. *Lands and realty management.*—Includes such activities as use authorization in support of energy and other programs, maintenance of official land records, and land classification. These activities provide for maintenance of public land status records, and issuance of information about public realty and mineral laws. It further provides for the processing of applications for transfer of use of the public lands for other Federal agencies, State and local governments, and private individuals. The program is directed toward retaining public land in Federal ownership unless, as a result of land use planning, it is determined that disposal of a particular parcel will best serve the national interest. Land and realty actions will provide for processing rights-of-way applications for energy-related development, processing native land selections under the

## General and special funds—Continued

## BUREAU OF LAND MANAGEMENT—Continued

## MANAGEMENT OF LANDS AND RESOURCES—Continued

Alaska Native Claims Settlement Act, in Alaska, and processing non-energy-related cases.

3. *Renewable resource management.*—This includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, and sustained yield management of the natural resources on the public lands.

The public domain forest management program provides for the management, development, protection, and sustained yield of timber products on more than 2.1 million acres of commercial forest land. The 1980 objective is 93 million board feet with an estimated sale value of \$7.5 million.

The range management program in 1980 will continue resource inventories and environment assessments at the accelerated 1979 level to provide the basis for developing and implementing range management plans.

Recreation management in 1980 will provide for management, protection, and visitor use assistance on public lands. Thirty-five plans and studies for rivers, trails, and cultural areas will be developed. In 1980 the wilderness inventory and review will continue at the accelerated 1979 level and by the end of 1980, the Bureau will have reviewed 55 natural and primitive areas and 174 million acres of public land for wilderness characteristics.

The wildlife habitat management program in 1980 provides for improvement of 2 million acres of habitat and 290 miles of commercial and sport fisheries stream. \$2.4 million is provided for cooperative management with other Federal agencies and State wildlife agencies under authority of the Sikes Act and the Federal Land Policy and Management Act.

Fire management provides for developing fire techniques as a tool for resource management and developing fire prevention and suppression methods.

The soil, water, and air management program provides support to other resource programs through data collection and development and implementation of resource protection plans.

4. *Planning and data management.*—Includes such activities as data analysis, development of land use plans, and automated data management. These activities provide for developing multiple use plans on 174 million acres of public land. Data management supports Bureau programs through development and operation of automated systems for acquiring, storing, using, and disseminating data required for all aspects of agency and resource management.

5. *Cadastral survey.*—This activity provides for identification of land boundaries and legal property descriptions to facilitate land management programs. During 1980, 7,350,000 acres will be surveyed in Alaska and the lower 48 States.

In Alaska, surveys are performed on lands selected by the State for transfer under the Alaska Statehood Act and for Native townsites, Native allotments, claims re-

sulting from the Alaska Native Claims Act, and for other special purposes.

Surveys in the lower 48 States are performed to identify land boundaries as a prerequisite to resource management. This involves both new surveys and resurveys to reestablish obliterated boundary markers.

6. *Firefighting and rehabilitation.*—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires. Based on a 10-year annual average of 1.2 million acres, fires result in resource damages averaging \$17.2 million each year. Firefighting and rehabilitation costs are anticipated to exceed the amount appropriated for this function in 1979; a supplemental appropriation request appears in Part III of this Appendix. Emphasis, in 1980, will be directed toward holding a higher number of fires to 10 acres or less in higher value classes.

7. *Administration and enforcement.*—Provides for general administration and law enforcement on the public lands. Administration includes executive management and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities. Law enforcement provides for enforcement of laws and regulations governing the management, use, and protection of public lands through cooperative agreements with local and Federal law enforcement agencies, Federal special agents, and a uniformed ranger force in the California desert.

1. *Construction and acquisition—(a) Buildings.*—Buildings for offices, warehouses, mechanical shops, communications, and related facilities are constructed to carry out Bureau programs. The 1980 program provides for construction of a district office at Elko, Nev.; utilities for three (3) fire stations in the Anchorage district, Alaska; a warehouse at Craig, Colo.; and survey and design for future facilities.

(b) *Recreation facilities.*—The 1980 program includes the construction of an electrical system at the Senator Wash Recreational Area in Arizona; 80 family recreation units at the White Sands/Little Sahara recreation complex in Utah; and for survey and design of future facilities.

(c) *Transportation facilities.*—The 1980 program provides for the survey and design of 48 miles, grading of 9 miles, and surfacing of 6 miles of timber-support roads in Colorado, California, Idaho, and Wyoming; operation of sign shops in Kingman, Ariz., and Rawlins, Wyo.; and for survey and design of future facilities.

(d) *Acquisition.*—The 1980 program provides for the acquisition of 217 easements, and purchase of 900 acres in the Birds of Prey Natural Area.

2. *Maintenance—(a) Buildings.*—The 1980 program will assist the Bureau in meeting building maintenance and energy-conservation standards through a corrective maintenance program to repair and replace leaking roofs, worn or warped floors, and inadequate plumbing; and to install insulation and storm windows and doors.

(b) *Recreation facility operation and maintenance.*—Provides for the operation and maintenance of developed recreation facilities and the cleanup of litter and trash from undeveloped recreation sites, roadsides, and waterways.

(c) *Road maintenance.*—Provides for preventive and corrective maintenance of roads, trails, and bridges under Bureau jurisdiction.

Public Law 94-565 (31 U.S.C. 1601) as amended by Public Law 95-469 provides for payments in lieu of taxes to counties and other units of local government for Bureau of Land Management, Forest Service, National Park Service, Fish and Wildlife Service and certain other agency administered land (entitlement land payments).

In addition, the act provides for payments for lands acquired after December 31, 1970, for inclusion in the

National Park or National Forest Wilderness Systems. These payments are not to exceed 1% of the fair market value of the acquired land per year for a 5-year period.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, and dismantlement of temporary structures, insurance on official motor vehicles, aircraft, and boats operated by the Bureau of Land Management in Canada; and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; \$10,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the United States Bureau of Land Management; miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$10,000: *Provided*, That appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed to the general fund of the Treasury from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended on a reimbursable basis for (1) surveys of lands other than those under the jurisdiction of the Bureau of Land Management and (2) protection of lands for the State of Alaska. (*Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

OREGON AND CALIFORNIA GRANT LANDS

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands; an amount equivalent to 25 per centum of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands, to remain available until expended: *Provided*, That the amount appropriated herein for the purposes of

this appropriation on lands administered by the Forest Service shall be transferred to the Forest Service, Department of Agriculture: *Provided further*, That the amount appropriated herein for road construction on lands other than those administered by the Forest Service shall be transferred to the Federal Highway Administration, Department of Transportation: *Provided further*, That the amount appropriated herein is hereby made a reimbursable charge against the Oregon and California land grant fund and shall be reimbursed to the general fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876): *Provided further*, That not less than \$60,119,000 \$54,200,000 available from receipts shall be obligated in fiscal year [1979] 1980 for Oregon and California grant lands. (16 U.S.C. 583, 594; 43 U.S.C. 2, 1181 a-f; 69 Stat. 374; Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

<sup>1</sup> Includes capital investment as follows: 1978, \$16,330 thousand; 1979, \$21,372 thousand; 1980, \$11,781 thousand.

Twenty-five percent of the revenue from the revested Oregon and California grant lands is made available for four principal activities on the revested lands, and on other Federal lands in the Oregon and California land grant counties of western Oregon:

1. *Construction and acquisition.*—Provides for construction of road maintenance shops at Sawyer Creek and Glide, Ore.; Loon Lake recreation facilities, and upgrading facilities at four other recreation sites; grading and surface of 35 miles of access roads; and acquisition of easements for roads in commercial timber areas.

2. *Maintenance.*—Provides for maintenance of access roads, operation and maintenance of recreation facilities, and maintenance of management facilities.

3. *Renewable resource management.*—Provides for reforestation, stand improvement, mortality salvage, commercial thinnings, forest genetics, timber management, protection, and other resource management actions on the O. & C. lands. Planned timber sales in 1980 will continue the allowable cut offerings (1,172 million board feet).

4. *Planning and data management.*—Provides for preparation and updating of Bureau planning system documents and for automated data processing costs.

<sup>1</sup> Includes capital investment as follows: 1978, \$1,956 thousand; 1979, \$1,750 thousand; 1980, \$1,750 thousand.

The appropriation is derived from receipts from grazing of livestock on public lands, and grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive orders. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i, 1701). Funds are used for rangeland improvement and maintenance of range facilities.

RECREATION DEVELOPMENT AND OPERATION OF RECREATION FACILITIES

For recreation management activities and for construction, operation, and maintenance of outdoor recreation facilities, including collection of special recreation use fees, to remain available until expended, \$300,000, to be derived from the special receipt accounts established by section 4(f) of the Land and Water Conservation Fund Act (16 U.S.C. 4601-6a(f)), as amended. (*Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

Expenses, road maintenance deposits.....	2,806	1,958	2,201

1. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

2. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

3. *Payments to Coos and Douglas Counties, Oregon, from receipts Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and

Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

4. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

5. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

6. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

7. *Payments to States from grazing receipts, etc., public lands within grazing districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

8. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

9. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands.

10. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

11. *Expenses, Public Land Administration Act.*—Public Law 86-649 approved July 14, 1960, permanently appropriated certain moneys to the Secretary of the Interior. Timber purchasers or permittees provide bond or deposit to assure fulfillment of contracts. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes. Moneys received in forfeiture of such bonds or for road maintenance are available for necessary forest improvement, protection, and rehabilitation and for road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only and amounts in excess of the cost of doing the work are transferred to miscellaneous receipts (74 Stat. 507-508). The applicable provisions of Public Law 86-649 were repealed by Public Law 94-579, approved October 21, 1976. New deposits for road maintenance will become available in the "Expenses, road maintenance" appropriation below. Collections for rehabilitation of damages will be available beginning in 1978 in the "Service charges, deposits, and forfeitures" appropriation (43 U.S.C. 1701 et. seq.).

12. *Expenses, road maintenance.*—Public Law 94-579 approved October 21, 1976, permanently appropriated certain moneys to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and moneys collected are available for necessary road maintenance. Moneys collected on Oregon and Califor-

nia grant lands are available for those lands only. (43 U.S.C. 1701 et. seq.)

Land and resource management trust fund.....	756	699	699
Trustee funds, Alaska townsites.....	1	1	1

1. Land and resource management trust fund.—Applicants for conveyance of lands omitted in original surveys pay the cost of surveys and the administrative

costs of conveyance. Advances are made by individuals to pay the costs of other types of surveys requested by them. Users of the Federal range and others contribute funds or make gifts for conservation practices, acquisition, protection, and other purposes (43 U.S.C. 315h, 315i, 775, 74 Stat. 506; 31 U.S.C. 711; 43 U.S.C. 759, 761, and 887; 48 Stat. 1224-1236; 90 Stat. 2758 (43 U.S.C. 1701).

2. *Trustee funds, Alaska townsites.*—Amounts received from sale of Alaska town lots are available for expenses incident to the maintenance and sale of townsites (31 U.S.C. 725s; Comp. Gen. Dec. of Nov. 18, 1935).

BUREAU OF RECLAMATION

The Bureau plans, constructs, and operates facilities to irrigate lands, furnish municipal and industrial or other water supplies, and develop related hydroelectric power and flood control in the 17 Western States and Hawaii.

Appropriations to the Bureau are made from the general fund and special funds. The special funds are (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, derived from the revenue of the Boulder Canyon project. The 1980 estimates are summarized by source as follows (in thousands of dollars):

Appropriation title	Estimate of appropriation	General fund	Reclamation fund	Colorado River Dam fund	Other
General investigations.....	34,320		34,320		
Loan program.....	76,221	76,221			
Recreational and fish and wildlife facilities.....	12,026	12,026			
Colorado River basin salinity control projects.....	38,194	38,194			
Emergency fund.....	1,000		1,000

Federal Funds

General and special funds:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems and authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Act of July 4, 1955, as amended (43 U.S.C. 421a-421d), and August 6, 1956, as amended (43 U.S.C. 422a-422k), including expenses necessary for carrying out the program, **[\$36,366,000] \$76,221,000**, to remain available until expended: *Provided*, That any contract under the Act of July 4, 1955 (69 Stat. 244), as amended, not yet executed by the Secretary, which calls for the making of loans beyond the fiscal year in which the contract is entered into shall be made only on the same conditions as those prescribed in section 12 of the Act of August 4, 1939 (53 Stat. 1187, 1197).

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

This appropriation provides for the construction of certain works directed toward the enhancement and protection of the quality of water in the Colorado River for use in the United States and Mexico.

The 1980 appropriation provides for the continued construction of features downstream from Imperial Dam consisting of the desalting plant and appurtenant works, including protective and regulatory pumping unit, and replacement of the first 49 miles of the Coachella Canal. The 1980 appropriation also provides for continued construction activity on three salinity control units of the initial stage of the Colorado River Basin salinity program under title II of the authorizing legislation.

BUREAU OF RECLAMATION—Continued  
DROUGHT EMERGENCY ASSISTANCE—Continued

This supplemental appropriation provided temporary assistance to mitigate the effects of the 1976-77 severe drought condition in the Western and Plains States. This assistance included studies, construction, management, conservation activities, assistance to buyers within Federal reclamation projects and Indian irrigation projects in the purchase of available water supplies from willing sellers, and loans to project irrigators for construction, conservation, water purchase, and similar purposes.

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects, to remain available until expended, **[\$30,870,000]** \$34,320,000, to be derived from the reclamation fund: *Provided*, That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

This appropriation provides for the planning of potential developments for the conservation and utilization of water and related land resources and includes plan formulation investigations, geothermal investigations, and general engineering and research activities.

Investigations and surveys are made to determine the feasibility of potential reclamation projects and the need for rehabilitation of existing Federal Reclamation projects.

1. *Plan formulation investigations.*—These include 22 appraisal investigations, 32 feasibility investigations, and 25 special investigations throughout the 17 Western States to formulate resource development plans for basins and specific projects leading to authorization, including studies relating to the rehabilitation, financial adjustment, or water conservation on existing Federal reclamation projects.

2. *Geothermal investigations.*—The studies are directed toward determination of the feasibility of developing geothermal resources as a usable water source. Initial efforts have been centered in the Imperial Valley of California.

3. *General engineering and research.*—Studies directed toward improvements in procedures and in engineering methods and materials. Included are studies of atmospheric water resources; of alternative uses and reuse of water and continuing activities in waste water reclamation opportunities in the Western States and electrical energy research and development.

**CONSTRUCTION AND REHABILITATION**

For construction and rehabilitation of authorized reclamation projects or parts thereof (including power transmission facilities for reclamation use) and for other related activities, as authorized by law to remain available until expended, **[\$221,572,000]** *\$313,153,000*, of which **[\$60,000,000]** *\$60,000,000* shall be derived from the reclamation fund: *Provided*, That no part of this appropriation shall be used to initiate the construction of transmission facilities within those areas covered by power wheeling service contracts which include provision for service to Federal establishments and preferred customers, except those transmission facilities for which construction funds have been heretofore appropriated, those facilities which are necessary to carry out the terms of such contracts or those facilities for which the Secretary of the Interior finds the wheeling agency is unable or unwilling to provide for the integration of Federal projects or for service to a Federal establishment or preferred customer: *Provided further*, That the final point of discharge for the interceptor drain for the San Luis Unit shall not be determined until development by the Secretary of the Interior and the State of California of a plan, which shall conform with the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters: *Provided further*, That of the amount herein appropriated not to exceed **[\$1,189,000]** *\$344,000* for the Central Oregon Irrigation District shall be available for construction on a rehabilitation and betterment program under the Act of October 7, 1949 (63 Stat. 724), as amended, to be repaid in full under conditions satisfactory to the Secretary of the Interior.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

\* Includes capital investment as follows: 1978, \$315,080 thousand; 1979, \$449,405 thousand; 1980, \$286,393 thousand.

Construction will be underway in 1980 on 31 projects and on 11 units and divisions of the Pick-Sloan Missouri Basin program. Full funding is provided for the start of 1 new project, and advance planning will be underway on 4 projects. The construction completed through 1979 will provide full irrigation service to 4,842,000 acres, a supplemental water supply to 5,878,000 acres, annually provide 3,329,000 acre-feet of municipal and industrial water, and 10,406,000 kilowatts of hydroelectric power. During 1980, facilities will be completed to furnish a full water supply to 600 acres, supplemental water supply to 27,000 acres, and facilities to furnish 100,000 kilowatts of hydroelectric power and 75,000 acre-feet of municipal and industrial water.

Delays are anticipated in construction of the Auburn dam in California because of a current review of geologic conditions at the Auburn damsite and on the Garrison diversion unit, North Dakota, because of unresolved legal and international questions. Should the problems on either or both of these projects be resolved satisfactorily, any additional funds that may be required will be requested later.

**OPERATION AND MAINTENANCE**

For operation and maintenance of reclamation projects or parts thereof and other facilities, as authorized by law; and for a soil and moisture conservation program on lands under the jurisdiction of the Bureau of Reclamation, pursuant to law, [ \$86,373,000 ] \$100,653,000, of which [ \$69,000,000 ] \$78,000,000 shall be derived from the reclamation fund and [ \$9,047,000 ] \$8,448,000 shall be derived from the Colorado River Dam fund: *Provided*, That funds advanced by water users for operation and maintenance of reclamation projects or parts thereof shall be deposited to the credit of this appropriation and may be expended for the same objects and in the same manner as sums appropriated herein may be expended, and such advances shall remain available until expended.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

This appropriation finances the general administrative and technical direction of the reclamation program as performed by the departmental, Denver Engineering and Research Center, regional, and other subordinate offices. Administrative costs incurred for the direct benefit of specific projects or activities are covered under other appropriations. The Denver Engineering and Research Center and regional offices charge projects or activities for direct beneficial services.

1. *Colorado River Dam fund, Boulder Canyon project*—(a) *Payment of interest on advances from the Treasury.*—Interest is paid to the Treasury on moneys advanced for construction (43 U.S.C. 618a(b)).

(b) *Payments to States of Arizona and Nevada.*—Annual payments of \$300 thousand each are made to Arizona and Nevada, from operation of the Boulder Canyon project (43 U.S.C. 618a(c)).

2. *Operation, maintenance, and replacement of project works, North Platte project.*—Payments are made for replacement of project works operated and maintained by the United States and to supplement funds advanced by the water users to meet annual costs of operation and maintenance of such works (66 Stat. 755).

3. *Payments to the Farmers' irrigation district (North Platte project, Nebraska-Wyoming).*—Payments are made to the Farmers' irrigation district on behalf of the Northport irrigation district for water carriage (62 Stat. 273, as amended).

4. *Payments to local units, Klamath reclamation area.*—Certain revenues collected from the leasing of Klamath project reserved Federal lands within the boundaries of certain national wildlife refuges shall be used: (a) To credit or pay to the Tule Lake irrigation district amounts already committed; and (b) to make annual payments to the counties in which such refuges are located (78 Stat. 850).

5. *Refunds and returns.*—Overcollections are refunded and unapplied deposits are returned (64 Stat. 689).

Reimbursement to Upper Colorado River Basin fund ..	500	500	500

This fund is derived from revenue of the Boulder Canyon project, and is available for reimbursement to

the Upper Colorado River Basin fund for Hoover Dam deficiencies (82 Stat. 899).

## SPECIAL FUNDS

Sums herein referred to as being derived from the Reclamation fund, the Colorado River Dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391), the Act of December 21, 1928 (43 U.S.C. 617a), and the Act of July 19, 1940 (43 U.S.C. 618a) respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

## ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed [thirty] sixteen passenger motor vehicles of which [sixteen] thirteen shall be for replacement only; payment of claims for damages to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expenses of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiations and administration of interstate compacts without reimbursement or return under the reclamation laws; for services as authorized by 5 U.S.C. 3109, in total not to exceed \$300,000; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U.S.C. 461-467): *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations".

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Not to exceed \$225,000 may be expended from the appropriation "Construction and Rehabilitation" for work by force account on any one project or Pick-Sloan Missouri Basin Program unit and then only when such work is unsuitable for contract or no acceptable bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and Rehabilitation" contained in this

Act, shall be available for construction work by force account: *Provided*, That this paragraph shall not apply to work performed under the Rehabilitation and Betterment Act of 1949 (63 Stat. 724).

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriations, as follows:

- Interior: Bureau of Indian Affairs, "Construction."
- Labor: "Manpower administration."
- State: "Development grants, economic assistance, AID."

Public enterprise funds:

COLORADO RIVER BASIN PROJECT

For advances to the Lower Colorado River Basin Development Fund, as authorized by section 403 of the Act of September 30, 1968 (82 Stat. 894), for the construction, operation, and maintenance of projects authorized by title III of said Act, to remain available until expended, **[\$74,770,000] \$89,217,000.**

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

Construction costs of the Central Arizona project, including the Navajo project participation agreement, are financed through appropriations to the Lower Colorado River basin development fund. Project revenues and certain other revenues as provided by the act will be credited to the fund and be available without further appropriation for defraying the cost of operation, maintenance, replacements, and emergency expenditures for all facilities of the projects, within such separate limitations as may be included in annual appropriations acts. Revenue in excess of these costs will be utilized to make annual payments to the general fund to return project costs allocated to irrigation, power and municipal and industrial water (82 Stat. 894).

**Construction.**—The 1980 program provides for continuing construction on the central Arizona project.

**Operation and maintenance.**—The 1980 program provides for reclamation's share of operation and maintenance costs of the Navajo project participation agreement. Financing will be from project revenue (82 Stat. 894).

Energy sales and revenues resulting from the Bureau's portion of power generated at the Navajo generating station are as follows:

## UPPER COLORADO RIVER STORAGE PROJECT

For the Upper Colorado River Storage Project, as authorized by the Act of April 11, 1956, as amended (43 U.S.C. 620d), to remain available until expended, [\$87,399,000] \$69,303,000 of which [\$76,799,000] \$57,277,000, shall be available for the "Upper Colorado River Basin Fund" authorized by section 5 of said Act of April 11, 1956, and [\$10,600,000] \$12,026,000 shall be available for construction of recre-

ational and fish and wildlife facilities authorized by section 8 thereof, and may be expended by bureaus of the Department through or in cooperation with State or other Federal agencies, and advances to such Federal agencies are hereby authorized: *Provided*, That no part of the funds herein approved shall be available for construction or

operation of facilities to prevent waters of Lake Powell from entering any national monument.

Note.—The 1979 appropriation for this account was provided in a continuing resolution (Public Law 95-482), which references the Energy and Water Development Appropriation Act, 1979 (H.R. 12928).

## Program and Financing (in thousands of dollars)

90.00 Outlays .....			45,493	76,000	58,806				

<sup>1</sup> Excludes revenues transferred to Western Area Power Administration to cover operation and maintenance expense in 1978, \$31,713 thousand, in 1979, \$31,464 thousand, and in 1980, \$33,400 thousand. Remaining revenues are applied to Bureau of Reclamation operation and maintenance, interest payment, and repayment of investment.

**Upper Colorado River Basin fund.**—Construction will continue on eight participating projects of the Upper Colorado River storage project and advance planning will be underway on two projects. The construction completed through 1979 will provide full irrigation service to 16,200 acres, a supplemental water supply to 218,600 acres, annually provide 390,400 acre-feet of municipal and industrial water, and 1,276,000 kilowatts of hydroelectric power. The impact of the 1980 construction upon reclamation goals will be felt in subsequent years as facilities are completed and irrigation service provided, municipal and industrial water furnished, and hydroelectric power is generated.

**Operation and maintenance program.**—In 1980, the Bureau of Reclamation will operate and maintain the facilities of the San Juan-Chama project, four units of the Upper Colorado River storage project, and the power facility of the Seedskaadee participating project, which altogether include 35,601,000 acre-feet of storage space and 1,276,000 kilowatts of power generation capacity. Financing will be from project revenue. Quality of water and consumptive use studies for the Upper Colorado River Basin, flood control studies of the Florida and Paonia participating projects and the nonreimbursable operation and maintenance will be financed from operating revenues and repayable debt of the storage project, and participating projects will be reduced by this amount.

Energy sales and revenues resulting from the Bureau of Reclamation power operations financed from the Upper Colorado River Basin fund are as follows:

Note.—Excludes \$6 thousand in 1979 and \$7 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978. (\$5 thousand) is included above.

1. *Water resources research and development institutes.*—This activity provides annual grants for each of the 50 States and for Puerto Rico, the District of Columbia, the Virgin Islands, and Guam, to assist them in carrying on the work of a competent and qualified water resources research and development institute at one college or university. Costs are funded on a two Federal to one State basis.

(a) *Matching grants to institutes.*—This activity provides for grants to match, on a dollar-for-dollar basis, funds made available to the State water research and development institutes by States or other non-Federal sources to meet the necessary expenses of specific water resources research and development projects which could not otherwise be undertaken.

(b) *Water resources research and development.*—This activity provides for grants to and contracts and matching or other arrangements with educational institutions, private foundations or other institutions, private firms and individuals, and with local, State, and Federal Government agencies, to undertake research directed toward finding solutions to, and mitigating, the most urgent water-related problems of concern to the Department of the Interior and the Nation.

2. *Saline water research.*—This activity provides for grants and contracts to develop processes, systems and equipment for efficient and cost-effective conversion of

impaired water to water of sufficiently good quality for beneficial uses.

(a) *Saline water development.*—This activity provides for grants and contracts to undertake technology development actions, directed toward assuring that the findings of original and innovative research are interpreted and developed to the stage where they can be used for practical application in resolving the most urgent and highest priority water and water-related problems.

3. *Technology transfer and information dissemination.*—This activity provides for grants and contracts to carry out an aggressive technology transfer program. The program is directed toward the transfer of all available and useful technology to user communities and maintaining a national center for collection, processing, and dissemination of information of water resources research development and demonstration. This activity also provides for the operation of a national water resources scientific information center.

4. *Reimbursable program.*—The Office of Water Research and Technology has been requested to provide technical assistance to the State Department (AID) in their program to assist Israel in the construction of a desalting plant. OWRT has also been requested to participate with the joint commission in the Middle East to provide technical assistance to Saudi Arabia. Three permanent positions have been allocated for the Israel project and five for the joint commission work. The cost of these positions and other associated expenses are fully reimbursable.

Note.—Excludes \$3 thousand in 1979 and \$3 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$3 thousand) is included above.

1. *Planning and research.*—Funds are provided for: Nationwide outdoor recreation planning to assess the current supply of outdoor recreation resources and relative priorities for allocating available public resources, assistance to water quality and coastal management agencies, and analyses of potential wild and scenic rivers, national trails, and wilderness; and the review and dissemination of research on factors which influence outdoor recreation demands.

2. *Federal coordination.*—Coordination of diverse Federal outdoor recreation and related programs is promoted. Reviews are made of transportation and environ-

mental impact statements for projects which affect major public recreation resources.

3. *Technical assistance.*—Assistance is provided to Federal agencies, States, local governments, and the private sector on a variety of outdoor recreation proposals, problems, and studies. Surplus Federal lands suitable for recreation purposes are identified and help is provided in the transfer of such lands for public use. Amounts for 1980 include \$350 thousand for Sikes Act activities.

4. *Railways conversion.*—Financial, educational, and technical assistance is provided to local, State, and Federal governmental agencies regarding the conversion of abandoned railroad rights-of-way for recreational purposes.

5. *Natural landmark program.*—This program finances the conduct of natural landmark studies to locate and identify natural areas of national significance. Natural areas are protected by placing them on the national register of natural areas as national heritage landmarks. The condition of national landmarks is monitored and an annual report is made to the Congress on those which are endangered.

6. *Historic preservation.*—Funds are provided for: (a) maintenance of the National Register for maintaining the official schedule and protective inventory of the Nation's historic and cultural structural heritage; (b) historic architectural and archeological services to provide technical assistance on preservation, improvement, restoration, and maintenance of cultural properties; (c) historic sites survey for thematic studies undertaken to identify nationally significant historic properties; (d) historic American buildings survey for documenting the Nation's architectural heritage; (e) historic American engineering record for identifying and documenting the engineering heritage of the Nation; and (f) archeological investigation and salvage for conducting such programs primarily in areas threatened by federally sponsored construction programs.

1. *Assistance to States.*—Funds are provided for assisting States in financing up to 50 percent of the cost of preparing recreation plans, acquiring land and water areas, and developing areas for public outdoor recreation purposes.

2. *Federal programs.*—Funds are provided to the National Park Service, Forest Service, U.S. Fish and Wildlife Service, and the Bureau of Land Management to acquire certain areas for recreation use and to preserve nationally important natural and historic areas.

3. *Administrative expenses.*—Funds are provided to coordinate and administer the State and Federal programs, and to review State recreation plans, State project proposals, and Federal land acquisition proposals.

<sup>1</sup> Includes capital investment as follows: 1978, \$3,005 thousand; 1979, \$3,000 thousand; 1980, \$3,000 thousand.  
Note.—Excludes \$42 thousand in 1979 and \$48 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$39 thousand) is included above.

1. *Habitat preservation.*—The Service conducts investigations, provides technical and planning assistance, and recommends fish and wildlife conservation measures on land and water resource development projects, sponsored, licensed, or assisted by the Federal Government. Emphasis is on early involvement and anticipatory strategies for actions which could affect fish and wildlife resources. Research is conducted to evaluate both acute and long-term effects of exposure to a broad range of environmental contaminants and other impacts on fish and wildlife resources. Ecosystems under stress from resource development are identified and analyzed and specific impacts on fish and wildlife resulting from development are defined. Approaches, tools, and methodologies for evaluating habitat and assessing environmental impacts as well as information systems are developed. Ecological information is distributed to public and private land and water resource development organizations and training is provided to fish and wildlife professionals to assist in effective resource decisionmaking.

HABITAT PRESERVATION RESULTS

	1978 actual	1979 estimate	1980 estimate
National pesticide monitoring sites .....	260	260	260
Research study plans on contaminant effects .....	180	190	190
Permits and license applications received .....	85,000	90,000	95,000
Major land and water resource development investigations .....	870	925	955
Environment statements and assessments reviewed .....	2,100	3,000	3,500
Technical assistance-coastal zone management studies .....	35	35	35

2. *Wildlife resources.*—The Service assists in the enhancement and management of the Nation's wildlife resources to assure that their populations are available for the use and enjoyment of the public and to mini-

mize damage by wildlife without adversely affecting the natural resource. To carry out these responsibilities, the Service maintains an extensive wildlife refuge and national monument system consisting of 406 units and 7 wetland management districts containing about 46 million acres managed for migratory birds and other wildlife for which the Federal Government has responsibility; directs and coordinates national migratory bird programs; administers certain aspects of the Marine Mammal Protection Act; enforces Federal game laws and regulations; provides technical assistance in the management of wildlife on Indian and other Federal lands; conducts research to improve wildlife management capabilities; and provides direct and extension assistance to Federal, State, Indian, and other public or private entities in the reduction of wildlife-caused damages. The Service also administers an interpretation, education, and recreation program at its refuges, fish hatcheries, and research laboratories to expand public understanding and appreciation of fish and wildlife resources.

WILDLIFE RESOURCES RESULTS

Description	1978 actual	1979 estimate	1980 estimate
Service lands administered primarily for:			
Migratory birds:			
Number of areas .....	364	369	374
Millions of waterfowl use days .....	1,610	1,881	1,945
Millions of acres .....	8.64	19.34	19.49
Other wildlife:			
Number of areas .....	26	37	40
Millions of acres .....	23.96	25.21	25.26
Wetland management districts:			
Millions of acres .....	1.57	1.59	1.61
Millions of waterfowl produced .....	3.05	3.17	3.34
Game law violations (cases) .....	27,699	30,000	31,500
Wildlife refuge and fish hatchery hours of visitor use:			
Wildlife related (millions of hours) .....	62.3	72.1	72.8
Nonwildlife related (millions of hours) .....	18.1	17.8	18.1

3. *Fishery resources.*—The Service assists in the development, management, and protection of interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on Federal lands such as national forests, parks, refuges, and Indian reservations. Fish are produced at 89 hatcheries and 2 fish facilities. Five development centers and two training schools are operated to improve fish cultural technology and practices. Research is carried out at 12 laboratories and 19 biological stations to improve sport fish productivity, increase hatchery efficiency, determine effects of environmental contaminants on fish, and develop methods of controlling undesirable fish. Service biologists provide Federal assistance to Indian tribes and to Federal, State and other landowners in the management of sport fisheries. Proposed activities authorized by the Sikes Act total \$750 thousand.

FISHERY RESOURCES RESULTS

	1978 actual	1979 estimate	1980 estimate
Production, number .....	186,000,000	185,340,000	175,340,000
Production, pounds .....	6,500,000	6,200,000	6,000,000
Angler-days .....	60,700,000	61,000,000	61,000,000
Research projects .....	63	85	88

4. *Endangered species.*—The goal of this program is to prevent species from becoming extinct and, wherever

General and special funds—Continued

UNITED STATES FISH AND WILDLIFE SERVICE—Continued  
RESOURCE MANAGEMENT—Continued

possible, to return them to the point where they are neither endangered nor threatened. The strategy consists of: (1) identification and listing of species that are endangered or threatened, (2) providing protection from taking, harassment, trade, importation and exportation, and adverse alteration of its critical habitat by a Federal action, and (3) development and implementation of recovery programs for individual species.

5. *Administration.*—Executive direction, coordinated resource planning, and professional administrative services, including financial, personnel, and property management, are funded through this activity.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed [244] two hundred and nine passenger motor vehicles, of which [203] one hundred and eighty-eight are for replacement only (including [128] one hundred and twenty-four for police-type use); purchase of [2 aircraft,] three aircraft, of which two are for replacement only; not to exceed \$100,000 for payment, in the discretion of the Secretary, for information, rewards, or evidence concerning violations of laws administered by the United States Fish and Wildlife Service; miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$75,000; publication and distribution of bulletins as authorized by law (7 U.S.C. 417); insurance on official motor vehicles, aircraft and boats operated by the United States Fish and Wildlife Service in Mexico and Canada; repair of damage to public roads within and adjacent to reservation areas caused by operations of the United States Fish and Wildlife Service; [options for the purchase of land at not to exceed \$1 for each option;] facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purpose, and the maintenance and improvement of aquaria, buildings and other facilities under the jurisdiction of the United States Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:  
Agriculture: Forest Service: "Forest protection management, and utilization."  
Interior: Heritage Conservation and Recreation Service: "Land and Water Conservation Fund."  
Energy:  
Power Marketing Administrations: "Operation and Maintenance, Alaska Power Administration."  
Alaska Power Administration: "General investigations."

1. *Federal aid in fish restoration and management.*—Assistance is given to States, Puerto Rico, Guam, the Virgin Islands, and American Samoa by the appropriation of funds equal to the revenue of the 10% excise tax on certain sport fishing tackle. States are reimbursed up to 75% of the cost of approved fish restoration and management projects, including research into fish culture, formulation of restocking plans, and acquisition and improvement of fish habitat (16 U.S.C. 777a-k).

2. *Federal aid in wildlife restoration.*—Assistance is given to States, Puerto Rico, Guam, and the Virgin Islands by the appropriation of funds equal to the 11% excise tax on sporting arms and ammunition, the 10% excise tax on handguns, and the 11% tax on certain archery equipment. States are reimbursed up to 75% of the cost of approved wildlife restoration projects, including acquisition and development of land and water areas, for wildlife management research and approved hunter education programs (16 U.S.C. 669-669i).

3. *National wildlife refuge fund.*—The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the distribution of revenues from the sale of products from the National Wildlife Refuge System to be allocated to counties in which the refuges are located. Undistributed funds are available for land acquisition.

4. *Proceeds from sales, water resources development projects.*—Receipts collected from the sale of products from refuges on which other agencies have primary jurisdiction are used to cover expenses of producing these products and for managing wildlife habitat.

\* Includes capital investment as follows: 1978, \$13,603 thousand; 1979, \$21,994 thousand; 1980, \$22,973 thousand.  
Note.—Excludes \$80 thousand in 1979 and \$91 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$74 thousand) is included above.

1. *Park management.*—The Service administers 327 park areas comprising about 72 million acres of federally owned land located in 47 States, the District of Columbia, Puerto Rico, and the Virgin Islands. The program includes: (1) Overall management of park areas necessary to accommodate an estimated 294 million visitors in 1980; (2) maintenance of buildings and other facilities required to accommodate visitor use, as well as to protect the Government's investment; (3) interpretive programs to enhance the visitors' park experience; (4) law enforcement to protect the visitors' well-being and reduce vandalism and other destruction to park resources; and (5) resource management necessary for the protection and preservation of the unique natural, cultural, and historical features in the National Park System.

The following tabulation shows the actual and estimated visits, and general and special fund revenues collected and to be collected by the National Park Service, including recreation fee revenues deposited to the Land and water conservation fund.

Year:	Visits	Revenues
1976 actual.....	255,822,000	\$19,564,013
1977 actual.....	260,000,000	21,251,061
1978 actual.....	271,000,000	21,507,000
1979 estimate.....	282,500,000	25,007,000
1980 estimate.....	294,000,000	33,657,000

The major program elements comprising this activity are: Management of park areas; concessions management; interpretive services; informational publications; visitor protection and safety; maintenance; and resources management.

2. *Forest fire suppression and rehabilitation of burned areas.*—This activity provides for the suppression and emergency presuppression of fires on or endangering

lands administered by the Service, and for the rehabilitation of burned areas to conserve resources, and for the protection of park visitors. The Service administers approximately 31 million acres of forest, grasslands, tundra, and desert shrub.

3. *Executive direction.*—Provides executive direction of Service programs in the Service's headquarters in Washington, D.C., and nine regional offices located throughout the Nation.

4. *Park, recreation, and wilderness planning.*—This activity provides for studies, investigation, and planning programs to support the overall direction and management of park activities. Specific programs include: New area studies; land use studies; water resource studies; general management planning; and rivers, trails, and water resources.

5. *Cooperative programs.*—Under this activity the Service provides assistance to other Federal agencies, States, and private institutions, upon request, in general development planning, site planning, construction, and operational matters, including interpretive planning and guidance in protection and preservation of historical and archeological values. The program elements include: Federal agency, State and private assistance; review of environmental impact statements; Alaska programs and International park affairs.

6. *Statutory and contractual aid.*—The Service provides financial or other assistance in the planning, development, or operation of natural, historical, or recreation areas not operated by the National Park Service. This assistance is provided for the following sites as authorized by law or pursuant to agreements between the National Park Service and other Federal agencies, States, or private institutions: (a) Roosevelt Campobello International Park Commission, New Brunswick, Canada; (b) Ice Age National Scientific Reserve, Wis.; and (c) Grand Canyon School District, Ariz.

<sup>1</sup> Includes capital investment as follows: 1978, \$59,991 thousand; 1979, \$141,481 thousand; 1980, \$43,953 thousand.

1. *Buildings, utilities, and other facilities.*—The Service carries out a program for the planning, construction, and reconstruction of physical facilities in units throughout the National Park System. Objectives of this program are to provide initial facilities at new park areas, to provide added facilities at older park areas to meet increasing visitor demands, and to undertake major repair and reconstruction of existing facilities in order to provide safe, usable, and adequate facilities for visitors and to protect park resources.

2. *Roads, trails, and parkways.*—The 1980 program includes work on authorized parkways and major road projects such as principal park entrance roads or major park roads having high traffic density. These are to be accomplished for the Service by the Federal Highway Administration. Minor park roads, trails and parkways projects, including parking areas, overlooks, campground roads and trails and drainage structures, are carried out by the Service itself. The program provides mainly for the maintenance of existing facilities through such measures as resurfacing and reconstruction and for the development of new roads and trails primarily in recently authorized areas. Program objectives are to prevent a loss of investment in existing road and trail systems, to eliminate unsafe sections, and to meet traffic demands.

<sup>1</sup> Includes capital investment as follows: 1978, \$1,315 thousand; 1979, \$5,139 thousand; 1980, \$1,948 thousand.

**Recreation facilities.**—This appropriation provides for planning, development, and operation of recreational facilities, including a program for visitor transportation systems, and for enhancement of the fee collection system to insure equitable assessment of fee collections in accordance with Public Law 92-347. Funding for this appropriation is derived from fees collected by the Service and deposited into a special account in the Treasury of the United States, to be administered in conjunction with, but separate from the revenues in the Land and water conservation fund. Fee collections will increase substantially over the 1979 and 1980 visitor seasons as park users are asked to pay a higher proportion of park operating costs.

Public Law 93-179 provided that the American Revolution Bicentennial Administration terminate no later than June 30, 1977. Executive Order No. 12001 transferred certain of the American Revolution Bicentennial Administration's functions and funds to the National Park Service. This account received these transfers, and now provides for continuing commemoration by the National Park Service of the events of the American Revolution.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed [158] 216 passenger motor vehicles, of which [137] 172 shall be for replacement only, including not to exceed [110] 105 for police-type use; [purchase of 1 aircraft for replacement only;] and to provide, notwithstanding any other provision of law, at a cost not exceeding \$100,000, transportation for children in nearby communities to and from any unit of the National Park System used in connection with organized recreation and interpretive programs of the National Park Service: *Provided*, That any funds available to the National Park Service may be used, with the approval of the Secretary, to maintain law and order in emergency and other unforeseen law enforcement situations in the National Park System; and to provide insurance on official motor vehicles and aircraft operated by the National Park Service in Mexico and Canada. (5 U.S.C. 78(a), (b); Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:  
Department of Agriculture, Forest Service: "Forest Management, Protection and Utilization."  
Department of the Interior, Heritage Conservation and Recreation Service: "Land and Water Conservation Fund."  
Department of Commerce:  
"Regional Development Program."  
"Regional Action Planning Commission."  
Department of Transportation: Federal-Aid Highways "Trust Fund".

	Payment for tax losses on land acquired for Grand Teton National Park.....	24	25	25
	Operation, management, maintenance, and demolition of federally acquired properties, Independence National Historical Park.....	9		

<sup>1</sup> Includes capital investment as follows: 1978, \$74 thousand; 1979, \$0; 1980, \$0.

1. *Educational expenses, children of employees, Yellowstone National Park.*—Revenues received from the collection of short-term recreation fees to the park are used to provide educational facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

2. *Payment for tax losses on land acquired for Grand Teton National Park.*—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

3. *Operation, management, maintenance, and demolition of federally acquired properties, Independence National Historical Park.*—Moneys collected from rental operations of the Irwin Building were used for the operation, management, and maintenance of this building and its subsequent demolition, as authorized in the act approved October 26, 1951 (65 Stat. 664).

<sup>1</sup> Includes capital investment as follows: 1978, \$170 thousand; 1979, \$838 thousand; 1980, \$838 thousand.

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park System (16 U.S.C. 6). Donations amounting to \$1.5 million were received from contributions during 1978. It is estimated that donations of \$2.2 million will be received during 1979 and 1980.

2. *Preservation, Birthplace of Abraham Lincoln, National Park Service.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest therefrom is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Ky. (16 U.S.C. 211, 212). The amount of \$2,540 was received in 1978.

3. *Jefferson National Expansion Memorial, contributions.*—Pursuant to the act of May 17, 1954 (68 Stat. 98-100), as amended, the Secretary of the Interior was authorized to construct upon the Jefferson National Expansion Memorial National Historic Site, St. Louis, Mo., an appropriate national memorial to those persons who made possible the territorial expansion of the United States. Contributions are accepted from the city of St. Louis or other non-Federal sources in the ratio of \$1 to each \$3 of Federal appropriations.

Note.—Excludes \$87 thousand in 1979 and \$99 thousand in 1980 for activities transferred to "Salaries and expenses", Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$80 thousand) is included above.

The Geological Survey provides basic scientific data concerning water, land, and mineral resources, and supervises the prospecting, development, and production of minerals and mineral fuels on leased Federal, Indian, and Outer Continental Shelf lands.

**2. Topographic surveys and mapping.**—The objectives of the national mapping program are to produce and make available multipurpose maps and basic cartographic data in printed and digital form to meet the new and expanding mapping needs of the Nation, to develop and maintain a modern production capability, to coordinate the mapping activities of other Federal

agencies, and to engage in research and development activities for the advancement and efficiency of surveying and mapping operations. In doing so, it is the goal of the Geological Survey to provide the leadership and capability in the Federal Government to satisfy the mapping needs of the Nation. These maps and related map data are required as basic decisionmaking and management tools necessary to assist in such activities as: The location and development of energy resources; environmental studies; urban and coastal area development; land use planning, economic and industrial studies; location and development of highways; selection of power and communications sites and routes, and dam reservoir sites; flood plain studies and flood and erosion control; and military and civil defense. New standard 7.5-minute topographic mapping will be accomplished at either 1:24,000 scale or 1:25,000 scale in areas of high national interest, such as public lands, energy areas, coastal zone, and coal areas. By the end of 1979, published 7.5-minute topographic maps will be available for about 73% of the conterminous United States, Hawaii, and outlying areas. For Alaska, about 86% of the State's area will be covered with 1:63,360-scale maps at the end of 1979. The program also includes the compilation of 82 maps at 1:50,000 scale for the unmapped area of the National Petroleum Reserve in Alaska. During 1980, about 80,000 square miles of 7.5-minute new mapping and about 112,000 square miles of 7.5-minute revision will be completed. In 1978, seven digital pilot projects were initiated involving about 2,400 7.5-minute quads. These pilot projects are cooperative programs with other Federal agencies and States to meet high priority immediate needs and to validate production procedures and agencies' program requirements. Digital production activities will be initiated in 1979 to meet expanding needs for computer-readable cartographic data. Primary categories of data that will be digitized are terrain, boundaries, hydrography, public land surveys, and transportation nets. Efforts will continue during 1979 and 1980 toward the development of the new map inventory control system. An increase in 1980 will provide for continuing the development of the airborne positioning system in the modernization of mapping technology program.

For 1979, intermediate-scale mapping at 1:50,000 and 1:100,000 scales will be accomplished for about 155 maps in county format and about 300 maps in quadrangle format. Other small-scale and special maps such as the 1:250,000-scale series, National Park maps, and U.S. and State base maps will be produced to meet existing as well as new requirements.

The National Cartographic Information Center will continue to acquire, index, and catalog information on cartographic data available from Federal, State, and private organizations and to serve as a focal point to the user public for their requests for information about those data.

**3. Geologic and mineral resource surveys and mapping.**—The continuing national program of geologic research and investigations produces: (a) New or improved methods, techniques, and instruments for mineral and energy resource assessments on land and on the submerged continental margins; (b) geologic geophysi-

cal, and geochemical maps and analyses that show the distribution, age, composition, structure, and physical properties of the rocks and mineral deposits at and beneath the surface of the Earth including the Nation's continental shelves and slopes; (c) information on the chemistry and physics of the Earth and the geologic processes by which it was formed and is being continually modified; (d) geologic data that are directly applicable to urban development, land utilization, and the solution of land construction problems; (e) information on geologic hazards which affect human safety and the engineering design of sensitive structures including nuclear reactors and offshore oil and gas platforms as well as public facilities in urban areas of high seismic risk. The 1980 program provides for increased efforts in wilderness mineral surveys and the energy lands program aimed at the environmental geologic aspects of Western coal lands; and reductions in the programs for geologic framework, resource information and analysis and geothermal investigations.

**4. Water resources investigations.**—The continuing national program of water resources investigations during 1980 has the objective of seeing that the Nation's water resources are appraised and that the necessary water data to develop and manage them efficiently are available when needed. The program produces data and information relevant to the flow and sediment discharge of rivers, location and quantity of underground water, chemical quality, and temperature of water, changes caused by nature and by man, availability and suitability of water for present and future demands—all of which are essential to water planning, water management, energy development, and improvement of the environment. Included in the program is research needed to increase our understanding of fundamental principles of water occurrence, movement, and interaction with its environment, and also to improve the accuracy and usefulness of water data through improvements in technology. The increase in 1980 will provide for: initiation of water-use data collection in 10 additional States, for a total of 38; expansion of the regional aquifer system analyses program; and, continuation of development of automated equipment and testing of data satellite communication systems for hydrologic data collection and transmission. Additional water quantity, quality, and sediment stations will be installed in all five coal provinces to begin or to upgrade the monitoring of water conditions to provide the data and information required by law for the Office of Surface Mining to make decisions on permit applications for the mining of coal.

**5. Conservation of lands and minerals.**—The 1980 program provides for: (a) classification of federally owned lands for the existence and workability of leasable mineral deposits and for sites for development of water resources, (b) evaluation, to determine the fair market value of mineral resources offered for lease by competitive bidding, (c) regulation and supervision of mineral prospecting, development, and production operations on leased Federal, Indian, and Outer Continental Shelf (OCS) lands; and (d) continuation of a platform verification program to provide nationwide guidelines and standards for enhancing the integrity of OCS structures

General and special funds—Continued

GEOLOGICAL SURVEY—Continued

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

and to insure that platform construction and installation will be conducted in a safe and pollution-free manner. Funds for regulation and supervision will be increased for both the OCS and the Federal and Indian lands oil and gas programs, including implementation of the Natural Gas Policy Act. Other increases include those for the OCS tract selection and evaluation and the coal land classification and evaluation programs. In 1980, a new OCS information program will be initiated.

6. *Land information and analysis.*—The principal mission of this activity is to more effectively meet the Nation's rapidly increasing need for information required to facilitate land resource planning and decision-making, and to evaluate the environmental consequences of alternative land resource activities.

The specific objectives are: (a) development and application of multidisciplinary earth sciences, other natural science and geographic technology in support of land-use planning and decisionmaking; (b) mapping current land use; (c) preparing environmental impact statements (EIS's) and reviewing those of other agencies, to achieve NEPA compliance; (d) collecting, processing, and distributing remotely sensed data and applying other aspects of space technology in support of land resources and environmental analysis. Additional funds will be provided in 1980 to initiate implementation of the Landsat-D thematic mapper processing system at the EROS Data Center.

7. *General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support to the Bureau as a whole. This includes such essential functions as budget, finance, personnel, contract negotiation and administration, property management, organization and methods and management analysis. General administrative expenses of the Geological Survey are financed in part by the line item and in part by assessments on direct program funds and on funds from other Federal agencies and sundry non-Federal sources.

8. *Facilities.*—The funds included in this activity will finance the operation and maintenance costs, facilities management needs, and related special support services necessary for the operation of the national center headquarters complex and major field centers.

*Reimbursements* from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigations (43 U.S.C. 48), proceeds from sale to the public of copies of photographs and records (43 U.S.C. 45); proceeds from sale of personal property (40 U.S.C. 481(c)); reimbursements from permittees and licensees of the Federal Energy Regulatory Commission (16 U.S.C. 797); and reimbursements from friendly countries and international organizations for technical assistance (22 U.S.C. 2357). Reimbursements from other Federal agencies (31 U.S.C. 686) are for special-purpose mapping, investigations, and computer services performed at the request of the financing agency, much of

which contributes to the basic objectives of the Geological Survey.

**National Petroleum Reserve in Alaska (NPR).**—The Naval Petroleum Reserves Production Act of 1976 (Public Law 94-258) transferred jurisdiction of the National Petroleum Reserve in Alaska from the Department of the Navy to the Department of the Interior on June 1, 1977. The Secretary of the Interior charged the Geological Survey with the responsibility for continuing the petroleum exploration program on the Reserve which includes the following specific tasks: (1) Explore and evaluate the petroleum resources of NPRA by means of drilling and geological and geophysical investigations in order to build an information base to assist Congress in determining the best use of the land within the Reserve; (2) continue to develop and produce natural gas from the South Barrow gas field or other fields as may be necessary, to supply gas to the native village of Barrow and other communities and installations of the Federal Government in the vicinity of Barrow; and (3) continue environmental rehabilitation of certain areas of the Reserve disturbed by previous exploration and construction activities.

The Office of National Petroleum Reserve in Alaska was established with headquarters and an operations staff in Anchorage, Alaska, an exploration strategy group located in Menlo Park, Calif., and a liaison office in Reston, Va. In 1980, the two exploratory wells in progress at the end of 1979 will be completed after which the exploration program will be terminated and all facilities, equipment and materials will be demobilized from the North Slope. A total of 19 exploration wells will have been drilled and 11,135 line-miles of

seismic surveys completed. No budget authority is being requested for 1980 to terminate the NPRA exploration program; funds deferred from the 1979 appropriation will be obligated for closeout activities. Natural gas will continue to be supplied to the native village of Barrow and other native communities and Federal installations at or near Point Barrow, Alaska. The Barrow area gas field exploration and development program is being reduced by \$15,382 thousand. All further development and exploration is being delayed until a comprehensive study on alternative fuel supply and distribution systems is completed, to assure that proceeding with the gas field work is the best way of providing utility services to the Barrow Area. The environmental rehabilitation of areas within the Reserve that have been disturbed by previous construction and drilling activities will be completed in 1980 and cleanup and revegetation of the 19 drilling sites in the current exploration program will be continued.

*Payments from proceeds, sale of water.*—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229). No obligations are anticipated in 1980.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed [33] 23 passenger motor vehicles, of which 18 shall be for replacement only; reimbursement to the General Services Administration for security guard services, contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for observation wells; expenses of the U.S. National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (*Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

Note.—Excludes \$5 thousand in 1979 and \$6 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$4 thousand) is included above.

1. *State regulatory program grants.*—Includes 100% grants to States for their incremental expenses of enforcing the interim Federal standards under the Surface Mining Control and Reclamation Act of 1977. Also includes matching grants to States for development and operation of permanent enforcement programs under the act. The interim regulatory program and associated grants are expected to continue in effect in most of the 26 coal-producing States through the first 6 to 9 months of 1980. By the June 1980 statutory deadline all 26 States are expected to have permanent programs approved and to have received initial permanent program operations matching grants. Approximately 10 permanent program development grants are expected to be awarded.

2. *Federal regulatory programs.*—This activity includes Federal expenses for developing permanent regulatory programs, Federal coal mine inspection and enforcement activities, and technical assistance functions. Until State permanent programs are adopted, the Surface Mining Control and Reclamation Act provides for a minimum of two Federal inspections of each mine each year. Provision is made for additional inspections to respond to valid citizen complaints and uncorrected violations identified in two consecutive State inspections.

3. *Mineral institutes.*—This activity provides for matching general grants, research project grants, and fellowship grants to designated institutes of higher education. The primary objectives of the program are to increase the national manpower pool of trained specialists in mining technologies and mined land reclamation, and to provide for solutions to technological and environmental problems encountered in mining operations through research studies.

4. *Small operator assistance payments.*—This activity provides resources to help eligible small mine operators to offset the incremental costs of mining permit applications as required under the Surface Mining Control and Reclamation Act of 1977. The required hydrologic information and core sample analysis data may be provided for eligible operators through available Federal data banks, other Federal agencies, or by payments to laboratories performing the analysis. The 1980 program will provide assistance to approximately 682 small operators.

1. *State reclamation program grants.*—Provides for grants to States to reclaim lands damaged from past mining practices. Under the Surface Mining Control and Reclamation Act of 1977, States with approved regulatory (enforcement) programs may also have reclamation programs and annual reclamation project plans approved. Upon approval, a State is entitled to a minimum of 50% of fund revenue derived from operating mines in the State. The program level for 1980 is based on an estimated 27 States having reclamation programs approved by the end of the year.

2. *Federal reclamation program.*—This activity includes fee collection and assistance to States in developing their reclamation programs as well as abandoned lands reclamation projects undertaken by the Office of Surface Mining Reclamation and Enforcement, the Bureau of Mines, and the Soil Conservation Service (SCS). The SCS rural lands program will have reclaimed an estimated 3,500 acres by the end of 1980. The Interior program will be aimed at correcting immediate hazards to public health and safety from past mining practices. Included will be repair of impoundments, correction of subsidence problems, extinguishing waste bank fires, and sealing shafts and tunnels.

3. *Small operator assistance payments.*—The Surface Mining Control and Reclamation Act provides for financial assistance in the form of payments to qualified laboratories to secure certain information needed by small mine operators in filing for a permit under the act. Small operators are defined as those firms or individuals engaged in the mining of coal who produce less than 100,000 tons annually from all mining locations. The 1980 program will provide assistance to approximately 454 small operators.

<sup>1</sup> Includes capital investments as follows: 1978, \$2,456 thousand; 1979, \$7,042 thousand; 1980, \$7,206 thousand.

Note.—Excludes \$31 thousand in 1979 and \$35 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$28 thousand) is included above.

1. **Metallurgy research.**—Research is directed toward providing the technological base needed to maintain a supply of minerals and metals adequate to meet national economic and strategic needs through efforts to maximize productivity and reduce energy requirements in metallurgical processing, maximize the recovery of minerals and metals from primary and secondary domestic resources, minimize the environmental impacts associated with minerals processing, and minimize the requirements for mineral materials through conservation and substitution. Efforts to advance minerals technology include development of new and improved processes for beneficiation, recovery, and purification of minerals and metals. Other research is directed toward effecting pollution abatement, secondary resource recovery, and minimizing mineral and metal needs. Major accomplishments planned for 1980 include full-scale demonstration of a Bureau developed gas scrubbing technology for removing sulfur oxides from powerplant stack gas; demonstration of the engineering feasibility for a new hydrometallurgical process to produce lead without adverse environmental impacts; pilot plant demonstration of an environmentally acceptable technology for recovering nickel and cobalt from domestic laterite ores; and demonstration of the practicality of using low-rank coals and lignites to fire-harden iron ore pellets, thereby lessening the demand for natural gas.

2. **Mining research.**—Research is conducted to develop solutions to safety and engineering-related health problems which impose a major social cost on mining oper-

ations, to investigate longer term solutions such as inherently safe mining systems where the safety and health hazards are engineered out of the mining system, and to develop systems to increase the productivity and efficiency of metal and nonmetal mining operations. Efforts address a broad range of safety and engineering-related health problems in coal, metal and nonmetal mines, including respirable dust, fire, and explosion prevention, industrial hygiene, radiation hazards, post disaster survival and rescue, ground control, ventilation, noise, and system engineering. Research develops hardware and systems to solve safety and health problems and provides basic scientific and engineering data to support the regulatory and standard setting activities of the Mine Safety and Health Administration. Efforts to advance the technology of metal and nonmetal mining will accelerate research on improved underground mining productivity, develop improved in-situ leaching technology, and evaluate alternative low-grade copper/nickel mining techniques.

3. *Mining environmental research.*—Research is directed to reducing critical mining environmental problems and ultimately to eliminating the adverse environmental effects associated with the extraction of minerals, metals, and fuels which are essential to the economy. Technology which will enable the control of environmental disturbances from current mining operations, the reclamation of mined lands, and the environmentally sound development of the Nation's mineral resources in the future is developed and demonstrated. Increased funds will provide for accelerated efforts to solve the environmental problems associated with development of the Nation's noncoal mineral resources.

4. *Mined land demonstrations.*—The Abandoned Mine Reclamation Fund administered by the Office of Surface Mining Reclamation and Enforcement will finance projects similar to those formerly carried out under the mined-land demonstration program. Bureau of Mines staff will administer a portion of those projects.

5. *Data collection and analysis.*—Technical and economic data on mineral reserves, production, consumption and international trade are compiled, analyzed, forecast, and disseminated for over 100 commodities. This information is used to provide a comprehensive, current information base for policy decisionmakers to use in formulating national mineral policies; to assist Federal, State, and local governments in coping with mineral supply problems; and to assist the private sector in making rational mineral production, consumption, and investment decisions.

6. *Mineral land assessments.*—Mineral assessments are made on wilderness, primitive, and other public lands to provide data on minerals availability or potential, for use in considering public land withdrawal decisions. Some 5.6 million acres of public lands proposed for designation as wilderness areas remain to be assessed by January 1983 under the terms of the Wilderness Act of 1964 and the Eastern Wilderness Act of 1975, as amended (Public Laws 88-577, 93-622, 94-557 and 94-567). In addition, mineral evaluation work begun in 1979 on an estimated 20 million acres of public lands included in the Forest Service's roadless area review and evaluation (RARE II) study will contin-

ue. Engineering investigations of mineral resources are undertaken in areas affected by water development and other public works. Environmental impact statements are developed and reviewed as required by the National Environmental Policy Act of 1969. Increased funds will be used to conduct mineral assessments of over 2 million acres of public land each year beginning in 1980.

*Drainage of anthracite mines.*—Funds appropriated in 1956 (69 Stat. 460) are expended on a matched-fund basis with the Commonwealth of Pennsylvania. The funds are provided for the conservation of anthracite coal resources and the prevention of flooding and damage to surface lands or structures through flood control and anthracite mine drainage. The act of July 15, 1955, was amended by the act of October 15, 1962 (76 Stat. 934), to further provide for the filling of voids in abandoned coal mines in the interest of public health and safety.

ADMINISTRATIVE PROVISION

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided*, That the Bureau of Mines is authorized during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts. (*Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of parent appropriations as follows:  
Funds appropriated to the President, "Appalachian Regional Development Program."

Public enterprise funds:

HELIUM FUND\*

\*See "Legislative Program" (end of this chapter) and Part III of this Appendix for additional information.

Contract authority for "Development and Operation of Helium Properties" provided by Public Law 87-122 for the fiscal year 1979 is rescinded in the amount of \$47,500,000. (*50 U.S.C. 167; 74 Stat. 918; Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

The authorized purposes of the Helium Act Amendments of 1960 (50 U.S.C. 167) are to locate and develop helium reserves; to produce, sell, and distribute supplies of helium; and, within economic limits, provide a sustained supply of helium that will be sufficient to provide for essential Government activities.

During 1980, it is estimated that helium sales by the Bureau of Mines will be about 260 million cubic feet. This is about 20 million cubic feet more than projected sales of 1979. Extraction of helium for sales and conservation will continue at the Keyes, Okla., helium plant and the Exell helium plant near Masterson, Tex. Shipments of gaseous helium in small cylinders and Bureau semitrailers, and liquefaction and shipment of helium in small dewars will be performed at the Amarillo, Tex., helium plant.

Federal agencies and their contractors will purchase approximately 255 million cubic feet of helium directly from the Bureau and from eligible commercial distributors (30 CFR 602). The remainder of the Bureau's sales is to a few commercial companies.

Storage of helium for private firms in the Government's underground storage reservoir will continue, and approximately 950 million cubic feet of helium will be placed into the system in 1980. There are presently 11 storage contracts, 7 of which are active.

Helium purified at the Keyes helium plant will be shipped in railway tank cars to Federal agencies and will be redelivered from storage to private firms for commercial use. Operations at the Exell helium plant will consist of helium production for supplying the pure helium via pipeline to the Amarillo helium plant and for gaseous semitrailer shipments. Helium liquefaction for large users will be performed and shipped in insulated semitrailers. Operations at the Exell helium plant will also consist of processing functions required in connection with the operation and control of the underground helium storage reservoir.

During 1980, the consolidation of functions at the Exell helium plant will be completed, and consolidation at the Amarillo helium plant will be in progress. This consolidation at Exell-Amarillo is necessary at this time as the primary 20-year term of the helium-bearing gas supply contract at the Keyes helium plant expired in April 1978, and the gas supply at Keyes is declining to a level which will not supply Federal needs by 1981. The Keyes contract continues in effect so long as the company produces gas considered by the United States to be suitable for processing; however, as the supply declines, purification operations will be shifted to the Exell and Amarillo helium plants.

During 1980, the Bureau will continue to expand the scope of its exploration and evaluation of helium-bearing

gasfields of the United States. Studies of fields containing nonwasting helium reserves will receive priority. Nonwasting helium reserves are contained in gases having very low heating value and in the past were of little value for fuel; however, some fields with reserves are now being produced, and some are being investigated for production. Some of the larger known nonwasting helium reserves are on Federal lands, and the ownership of this helium has been retained by the Government.

The Bureau will also continue to update and to improve its technical capabilities with regard to helium extraction, purification, and distribution.

The helium program of production, sales, and underground helium storage is financed from the Helium fund. Income from helium sales, services, and rentals of containers is estimated to provide the needed funding. The funded operating costs are increased by about 9% over those for 1979. The increase is due mainly to inflation and to increases in salaries.

Revenues from helium sales, storage fees, and other income are estimated to be \$11.8 million, while expenses are estimated to be \$10.5 million, leaving a net operating income of \$1,278 thousand.

As of September 30, 1978, the total assets of the Helium fund were \$654.2 million, \$619.0 million of which represents helium inventories. The total assets include 1.3% cash and accounts receivable, 4.0% plants and equipment, and 94.7% helium stored underground. Liabilities total \$524.1 million, of which \$493.5 million is owed to the U.S. Treasury (largely principal and accumulated interest). Legislation to cancel this debt, as well as unused contract authority for helium purchases, will be proposed in 1979. Further detail is provided in the "Legislative Program" section at the end of this chapter. The Government's equity as of September 30, 1978, is \$130.1 million.

On September 30, 1980, the total assets of the Helium fund are estimated to be \$721.0 million, with \$686.4 million representing helium inventories. Total liabilities will be \$588.8 million, with \$557.4 million owed to the U.S. Treasury. The increase of \$63.9 million in the amount owed the Treasury is accrued interest on borrowings and net worth during 1979 and 1980. The Government's equity on September 30, 1980, is estimated to be \$132.2 million.

Education and welfare services.....	10		
Resources management.....	65		
General administrative expenses.....	2		
Operation of Indian programs.....	643,866	716,738	695,671

<sup>1</sup>Includes capital investment as follows: 1978, \$9,500 thousand; 1979, \$9,500 thousand; 1980, \$12,500 thousand.

Note.—Excludes \$164 thousand in 1979 and \$187 thousand in 1980 for activities transferred to the Salaries and expenses account, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$151 thousand) is included above.

1. **Education.**—The Bureau of Indian Affairs provides a variety of support for the education of Indian children through direct operation of schools, support of tribally operated schools, and financial assistance to public schools serving Indian children. The number of children attending Federal, tribal, and public schools is shown below:

	1978 actual	1979 estimate	1980 estimate
Number of pupils:			
Federal and tribal schools.....	51,000	51,700	51,700
Public schools.....	163,325	175,000	175,000

The Bureau also assists Indian adults by providing financial assistance to students for higher education studies, by direct support of some tribally operated post-secondary institutions, and by offering continuing education programs in many communities. The number of participants in these programs is indicated in the following table:

	1978 actual	1979 estimate	1980 estimate
Continuing education participants:			
Higher education scholarships.....	20,000	20,000	20,000
Adult education enrollments.....	18,350	18,500	18,500

2. **Indian services.**—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects. Also, the activities associated with the Navajo-Hopi settlement are included. Data are presented below on selected aspects of this activity.

	1978 actual	1979 estimate	1980 estimate
Social service caseloads:			
General assistance.....	61,500	61,500	61,500
Child welfare.....	3,300	3,300	3,300
Families receiving services.....	15,775	15,775	15,775
Family houses started:			
New.....	693	530	395
Rehabilitation.....	3,699	2,890	2,600
HUD-assisted.....	3,059	5,317	5,600

3. **Economic development and employment programs.**—This activity is designed to stimulate reservation economies, and to help Indian people participate fully in those economies.

Business enterprise development is encouraged and assisted through programs of technical and financial aid, with strong emphasis on enterprises owned and operated by Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans for resource and business enterprise development, housing, public utility facilities, education, and other purposes. Individual Indians are assisted in qualifying for, finding, and occupying jobs both on and off the reservation consistent with their needs, capabilities, and desires. Roads are maintained to provide for the movement of people and goods as needed for the well-being of the community.

4. *Natural resources development.*—This activity is designed to provide for the conservation, development, and utilization of Indian land, water, and related resources. Resources are surveyed and inventoried, and agriculture and forestry development is assisted.

5. *Trust responsibilities.*—Under this activity the Bureau's trust responsibilities toward the Indian people are carried out. This entails the protection of Indian rights and property, particularly those related to land and natural resources, and the management of assets held in trust for Indian tribes and individuals.

6. *General management and facilities operation.*—This program provides for the general management functions and for the repair, maintenance, and operation of facilities which support the Bureau's programs. These functions include executive direction; administrative services; safety management; operation and maintenance of the Bureau's physical facilities; and provision of GSA owned or leased facilities. For 1980, funds and positions to operate the Office of the Assistant Secretary—Indian Affairs have been transferred to the Office of the Secretary.

The planned distribution of program costs requested in 1980 as compared to funds for 1978 and 1979 follows, (in thousands of dollars):

Direct program:	1978 actual	1979 estimate	1980 estimate
1. Tribe/agency operations.....	332,196	387,437	397,283
2. Area/field office operations.....	83,961	107,110	99,427
3. Central office staff operations.....	20,319	24,956	21,521
4. Field program operations.....	205,073	270,209	273,789
Total direct program.....	641,549	789,712	792,020
Reimbursable program (total).....	4,632	47,306	40,695
Total program.....	646,181	837,018	832,715

Tribe/agency operations are programs in which tribes formally participate in setting funding priorities. These programs include local school operations, social services, housing, economic development, and other activities similar to those conducted by a State or local government.

Central and area/field office operations represent funding for program management and executive direction. Also included are those programs, such as off-reservation boarding schools, which are the responsibility of the area offices.

Field program operations support those national programs, such as welfare payments, facilities management, and Indian rights protection which are the unique responsibility of the Government as trustee for the management of Indian resources.

Rhode Island Indian claims settlement fund.—Payments are made to the fund as authorized by Public Law 95-395 for settlement of certain Indian land claims in the State of Rhode Island.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans) shall be available for expenses of exhibits; purchase of not to exceed [301] 225 passenger carrying motor vehicles of which [155] 122 shall be for replacement only, which may be used for the transportation of Indians; advance payments for services (including services which may extend beyond the current fiscal year) under contracts executed pursuant to the Act of June 4, 1936 (25 U.S.C. 452), the Act of August 3, 1956 (25 U.S.C. 309), and legislation terminating Federal supervision over certain Indian tribes; and ex-

penses required by continuing or permanent treaty provisions. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

MISCELLANEOUS PERMANENT APPROPRIATIONS

ALASKA NATIVE FUND

For transfer to the Alaska Native Fund, in the fourth quarter of fiscal year [1979] 1980, to provide for settlement of certain land claims by Natives and Native groups of Alaska, and for other purposes, based on aboriginal land claims, as authorized by the Act of December 18, 1971 (Public Law 92-203), \$30,000,000: *Provided*, That for purposes of meeting its obligation under section 6(a)(3) and section 9 of the Alaska Native Claims Settlement Act in connection with the requirement that \$500,000,000 be paid into the Alaska Native Fund, any and all revenues paid into such fund by the State of Alaska from sources other than those specified in section 9 of such Act shall, notwithstanding any other provision of law, be construed as payments by the State of Alaska to the fund within the meaning of section 6(a)(3) and 9 of the Alaska Native Claims Settlement Act and credited toward the \$500,000,000 to be deposited in the Alaska Native Fund under such sections. (Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.)

This fund, established by the Indian Financing Act of 1974, provides a source of financing for Indians who cannot borrow from other Government credit agencies or from ordinary commercial lenders because of their low economic status, isolated geographic location, lack of bankable security, or other reasons. Loans are made to tribes and other Indian organizations for relending to individual members and groups of members, and to finance tribal business enterprises. Loans are also made to tribes for use by them in obtaining expert assistance to prepare and argue claims pending before the Court of Claims. Direct loans are made for any purpose that will promote the economic development of the borrower, including loans for educational purposes.

Loan guarantees outstanding, end of year.....	47,160	77,580	70,200

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

This fund was transferred from the Housing and Home Finance Agency to the Secretary of the Interior under the provisions of Public Law 85-806. The Secretary will use the funds transferred from the Housing and Home Finance Agency, along with any other revenues that may be received from the Hoonah housing project, for the purpose of liquidating this project in accordance with the provisions of the law. The deficit is expected to increase as funds are used for project liquidation.

2. American Samoa:				

The 1980 budget request for administration of territories finances the costs of operating the Office of the Judiciary of American Samoa. Also requested are grant funds in the amount of \$16 million for the operations of the Government of American Samoa. The most significant programs in 1980 include those for education, medical services, and public works.

The appropriation request includes \$0.5 million for economic development for Guam as authorized in Public Law 95-134. The Guam construction request of \$2.5 million would provide for the construction of a needed water project.

The request includes funds for the operations of the Federal Comptroller's Offices in Guam, the Trust Territory and the Northern Mariana Islands, the Virgin Is-

ADMINISTRATION OF TERRITORIES—Continued

lands and American Samoa as provided for in Public Law 95-134 and Secretarial Order 3009.

Included in the request is \$2.4 million for architectural and engineering work for health facilities in the Virgin Islands.

Expenses of \$300 thousand for the Northern Mariana Islands Federal Laws Commission is requested to comply with the provisions authorized by Public Law 94-241, section 504.

Under the provisions of the Covenant to Establish a Commonwealth of the Northern Mariana Islands direct grants funds of \$20.7 million are requested for governmental operations, construction, and economic development.

In addition, the request now provides for the salaries and expenses of the Office of Territorial Affairs which had previously been funded under the Office of the Secretary of the Interior.

Note.—Excludes \$16,913 thousand in 1979 and \$20,699 thousand in 1980 for Northern Mariana Islands activities which are now financed in the Administration of Territories account.

Under the terms of the Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The Trust Territory, with a population of about 101,000 persons, comprises 2,125 islands scattered over 3 million square miles of ocean in two major archipelagos: the Caroline and Marshall Islands. The land area totals 516 square miles.

1. *High Commissioner's office.*—This office provides executive direction for the development programs and the administration of all the territory.

2. *Judiciary.*—Provision is made for the high court of the Trust Territory, the court of appeals, and the lesser courts of the territory.

4. *Grants.*—The cost of operating the government of the territory is provided by Federal grant appropriations and local revenue. The main activities funded under the Trust Territory government are operations and capital improvements.

Budget authority for 1979 and 1980 is distributed as follows (in thousands of dollars):

Public Law 95-348 changed the way in which certain revenues collected by the IRS are made available to the Virgin Islands. Funds previously paid on a current basis, as collected, will now be paid prior to the start of the fiscal year of collection—upon enactment by the Virgin Islands of legislation changing its fiscal year to October 1 through September 30. Transactions involving these funds, which consist of excise taxes collected by IRS, have previously been displayed in the special fund, "Internal Revenue collections for the Virgin Islands." Beginning in 1980, these advance payments will be presented in this account.

The Office of the Solicitor in the Department of the Interior provides legal advice and counsel to the Secretary and all constituent bureaus and offices of the Department. All attorneys and auxiliary personnel, with the exception of those in the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Office of Hearings and Appeals, are under the supervision of the Solicitor. The Office is comprised of the headquarters staff, located in Washington, D.C., and 27 regional and field offices.

<sup>1</sup> Includes \$30,147 thousand in 1979 and \$30,849 thousand in 1980 for obligations previously reported under Working capital fund. Comparable figure for 1978 is \$29,642 thousand.

<sup>2</sup> Includes \$123 thousand in unobligated balances previously reflected under the Consolidated working fund that are merged with the parent appropriation in 1979 and 1980.

Note.—Excludes \$1,025 thousand in 1979 and \$1,171 thousand in 1980 for activities transferred to the Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$943 thousand) is included above. In addition, excludes \$80 thousand in 1979 and \$87 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$73 thousand) is included above.

1. **Departmental direction.**—The Office of the Secretary, and the Office of Public Affairs provide top departmental direction and contact with the public. The Office for Equal Opportunity administers the Department's responsibilities in equal opportunity programs. Other secretarial offices provide coordination of correspondence, legislation, and congressional liaison.

## General and special funds—Continued

OFFICE OF THE SECRETARY—Continued  
DEPARTMENTAL MANAGEMENT—Continued

2. *Program direction and coordination.*—Four Assistant Secretaries advise and assist the Secretary on matters of policy for promoting the domestic welfare and the conservation and development of the country's resources, and Indian affairs.

3. *Policy, budget and administration.*—Under the direction of the Assistant Secretary, implementation of program and budget policy, economic analysis, environmental review, Outer Continental Shelf liaison, financial management, management improvement, property management, personnel, administrative services, inspection, investigation and internal audit, and security operations are carried on.

4. *Hearings and appeals.*—Provides the quasi-judicial and appellate responsibilities of the Department of the Interior. Administrative law judges and formal boards of appeals render decisions in cases pertaining to: (a) contract disputes; (b) Indian probate matters; (c) public and acquired lands and their resources; (d) submerged offshore lands of the Outer Continental Shelf; (e) surface mining; (f) personnel grievances; (g) environmental impacts; (h) enforcement of the importation and transportation of rare and endangered species; (i) environmental quality; (j) uniform relocation assistance and real property appeals; and (k) Alaska Native claims appeals.

5. *Library and information services.*—Provides library services and information necessary to the Department, and includes the Washington headquarters and over 400 field libraries.

6. *Minerals policy and research analysis.*—Provides a focal point for the Federal minerals policy development program. The Office has responsibility for minerals policy analysis, conservation, and related research and development program planning.

7. *Aircraft services.*—Provides Departmental policy and procedures governing aviation program, aviation safety, contracting, and technical services.

8. *National mine health and safety academy.*—Public Law 95-164 (1977) provided that the Academy be maintained by the Department of the Interior, and be responsible for the training of mine safety and health inspectors under section 505 of the act, the training of technical support personnel of the Mine Safety and Health Administration, and for any other training programs for mine inspectors, mining personnel, and other persons as the Secretary shall designate. In 1980, \$2 million is requested for the construction of a new wing of the Academy.

9. *Endangered Species Review Committee.*—The Endangered Species Act Amendments of 1978 (Public Law 95-632) established an Endangered Species Committee to review those cases that would not be settled through the section 7 consultation process, and determine whether or not to grant an exemption to the act. The Committee is composed of seven members with the Secretary of the Interior as Chairman.

The act also provides for the establishment of a review board for each application for exemption. The review board examines the request for exemption and submits a report to the Committee.

10. *Central services.*—This activity provides general administrative expenses; space, postage, employee compensation payments, etc. to the offices financed by this appropriation.

Under this program, the Department provides leadership and support in the conduct of selected research projects carried out by foreign nations. Payments are made in foreign currencies which the Treasury determines to be excess to normal requirements of the United States. Programs conducted are primarily of benefit to foreign national parks and endangered species programs.

<sup>1</sup> Excludes \$30,147 thousand in 1979 and \$30,849 thousand in 1980 for obligations included in the "Departmental management" appropriation. Comparable figure for 1978 is \$29,642 thousand.

This fund finances central reproduction, communication, supplies, health services, ADP, and other such services which may be performed advantageously on a reimbursable basis (43 U.S.C. 1467). Activities conducted are those which can be performed by the Office of the Secretary and which benefit all Bureaus within the Department. The Bureaus are billed for the cost of these centrally performed services. The capital consists of \$300 thousand appropriated, donated assets of \$169 thousand, and retained earnings of \$451 thousand.

90.00 Outlays.....			3,459

Funds would be provided for development of administrative and technical services for a new program to promote the preservation of resources representing the Nation's natural heritage, including: (a) technical assistance to States to establish State heritage programs; (b) development and coordination of procedures for use by Federal agencies, States, and local governments to identify, select, and protect natural heritage areas; (c) encouraging and promoting the involvement of the private sector and individuals in heritage protection; (d) establishment and maintenance of a national register of natural heritage areas; (e) conducting required and special studies of heritage protection issues and techniques; and, (f) reviewing and monitoring of Federal agency activities that impact heritage resources. Authorizing legislation is proposed for this program.

**LAND AND WATER CONSERVATION FUND**

(Proposed for later transmittal, proposed legislation)

**Program and Financing (in thousands of dollars)**

Identification code	1978 actual	1979 est.	1980 est.
14-5005-2-2-303			
<b>Program by activities:</b>			
10.00 Land acquisition (cost—obligations).....

74.40	Obligated balance, end of year .....		-5,000
90.00	Outlays .....		7,000

Legislation will be proposed to permit appropriations for acquisition of land at Pinelands National Reserve to be derived from the Land and Water Conservation Fund. Federal acquisition funds will be matched in a ratio of \$1 to each \$3 of Federal appropriations.

**BUREAU OF MINES**

HELIUM FUND

(Proposed for later transmittal, proposed legislation)

Program and Financial (in thousands of dollars)			
Identification code	14-4053-2-3-306	1978 actual	1979 est. 1980 est.
<b>Financing:</b>			
25.00	Unobligated balance restored: Contract authority .....		-47,500
49.10	Contract authority (permanent) (50 U.S.C. 167; 74 Stat. 918) .....		-47,000

Contract authority in the amount of \$47,500,000 becomes available annually to the Bureau of Mines for the purchase of helium. However, Government purchases of helium have been terminated and no resumption of purchasing is currently planned. Legislation to cancel the contract authority for the purchase of helium will be proposed.

**GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR**

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior and for the emergency rehabilitation of burned-over lands under its jurisdiction: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such

reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That no appropriations made in this title shall be available for acquisition of automatic data processing equipment, software, or services in excess of \$1,000,000 systems life cost, without prior approval of the Secretary.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. In addition to the aircraft specifically authorized under this Act there is hereby authorized for acquisition 2 aircraft for replacement only, both of which shall be from surplus.

SEC. 107. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

SEC. 108. Appropriations made in this title shall not be available for processing documents making grants or contracts for water research that have not been reviewed and approved by an organization designated by the Secretary.

SEC. 109. Notwithstanding the provisions of the Act of July 1, 1932 (47 Stat. 564; 25 U.S.C. 386a), any adjustment or elimination by the Secretary of the indebtedness (including interest thereon) of the Hy-daburg Cooperative Association to the United States shall be immediately effective.]

SEC. 110. (a) Notwithstanding any provisions of the National Environmental Policy Act of 1969, Public Law 91-190 (42 U.S.C. 4321 et seq.), construction of any feature of the Upper Colorado River Storage Project as authorized by the Act of April 11, 1956, as amended, shall proceed if a final Environmental Impact Statement has been filed on such feature.

(b) Notwithstanding any provisions of the National Environmental Policy Act of 1969, Public Law 91-190 (42 U.S.C. 4321 et seq.), the Colorado River Basin Salinity Control Projects, as authorized by Public Law 93-320, and construction of any feature of the Central Arizona Project as authorized by Public Law 90-537, September 30, 1968 (43 U.S.C. 1501 et seq.), shall proceed if a final Environmental Impact Statement has been filed on such feature.

(c) Notwithstanding any provisions of the National Environmental Policy Act of 1969, Public Law 91-190 (42 U.S.C. 4321 et seq.), construction of any feature of the Southern Nevada Water Project as authorized by Public Law 89-292 (43 U.S.C. 616ggg), as amended, shall proceed if a final Environmental Impact Statement has been filed on any such feature.]

**TITLE III—GENERAL PROVISIONS**

SEC. 301. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agricul-

ture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.

SEC. 303. No part of any appropriation under this Act shall be made available to the Secretary of the Interior for the leasing of oil and natural gas on publicly owned lands within the boundaries of the Flathead National Forest, Montana, except for such leases which the Forest Service determines will not significantly impact these lands and for which the Forest Service in granting the leases specifically outlines exploration and development guidelines designed to protect these lands from significant adverse environmental impact.

SEC. 304. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete, in accordance with 18 U.S.C. 1913.

【SEC. 305. No funds appropriated by this Act shall be available for use in implementing or otherwise carrying out, in the State of Alaska, the provisions of section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782).】

【SEC. 306. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.】

【SEC. 307. (a) No funds appropriated under this Act may be used to implement the provisions with respect to the allocation of domestic crude oil specified in 10 CFR 211.67 on the date of enactment of this section, unless the President within thirty days after such enactment has amended the regulation under section 4(a) of the Emergency Petroleum Allocation Act of 1973 as provided in this section.

(b)(1) The amendment to the regulation required under subsection (a) shall provide that for the period between the effective date of such amendment and July 1, 1979 the provisions of the regulation specified in 10 CFR 211.67(a)(3) on the date of enactment of this section (relating to the issuance of entitlements to eligible firms importing residual fuel oil) shall be amended by replacing the words "thirty (30%) percent" wherever they appear by the words "fifty (50%) percent", except that for the purposes of this section the State of Michigan will be treated as if it were part of the East Coast market as defined in 10 CFR 211.62.

(2) Such amendment shall provide that on and after July 1, 1979 the provisions of the regulation referred to in paragraph (1) shall revert to those provisions in effect on the date of enactment of this section.

(c) The amendment required under subsection (a) shall amend the provisions of the regulation specified in 10 CFR 211.67(d)(4) on the date of enactment of this section (relating to the reduction in entitlement value for sales into the East Coast market) to delete the provisions exempting the first 5,000 barrels per day of a refiner's crude oil runs to stills from the operation of that subsection and to provide that 10 CFR 211.67(d)(4) is applicable only to domestic refiners that transport residual fuel oil for sale in the East Coast market in foreign flag tankers.

(d) The effective date of the amendment required under subsection (a) shall be July 1, 1978 unless the Secretary finds it impracticable to implement such amendment on such date.

(e) In promulgating the amendment required under subsection (a) and any related implementing or conforming amendments the President shall not be subject to the provisions of section 553 of title 5 or of sections 7174 and 7191 of title 42 of the United States Code.

(f) Except as specifically provided in this section, nothing in this section affects the authority of the President to amend the regulation under section 4(a) of the Emergency Petroleum Allocation Act of 1973.】

SEC. 【308】 305. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. (*Public Law 95-465, making appropriations for the Department of the Interior and related agencies, 1979.*)

## DEPARTMENT OF JUSTICE

### GENERAL ADMINISTRATION

#### Federal Funds

#### General and special funds:

##### SALARIES AND EXPENSES

For expenses necessary for the administration of the Department of Justice, [including hire of passenger motor vehicles; and miscellaneous and emergency expenses authorized or approved by the Attorney General or the Assistant Attorney General for Administration; \$28,474,000] \$25,917,000, of which [\$5,111,000 is for the United States Parole Commission and \$1,700,000] \$2,000,000 is for the Federal justice research program [the latter amount] to remain available until expended. (5 U.S.C. 101, 3101; 8 U.S.C. 1103(a); 28 U.S.C. 501, 503, 504, 507-526, 1929; 31 U.S.C. 638(a); Department of Justice Appropriation Act, 1979.)

<sup>1</sup> Includes capital investment as follows: 1978, \$528 thousand; 1979, \$416 thousand; 1980, \$480 thousand.

Note.—Excludes \$5,555 thousand in 1980 for activities transferred to the U.S. Parole Commission, Salaries and expenses. Comparable amounts for 1978 (\$4,768 thousand) and 1979 (\$5,284 thousand) are included above.

**1. Program direction and policy coordination.**—The Attorney General, aided by the Deputy Attorney General and Associate Attorney General, directs and supervises the programs and activities of the Department.

Included in this activity are the Offices of the Attorney General, the Deputy Attorney General, the Associate Attorney General, Professional Responsibility, Improvements in the Administration of Justice, Public Information, Legislative Affairs, and Management and Finance.

**2. U.S. Parole Commission.**—Beginning in 1980 the U.S. Parole Commission will be transferred to a separate appropriation.

**3. Administrative review and appeals.**—This activity includes the Office of the Pardon Attorney and the Board of Immigration Appeals. The Pardon Attorney receives and reviews all petitions for clemency. The Board of Immigration Appeals reviews appeals from certain Immigration and Naturalization Service decisions in a variety of proceedings involving aliens, citizens, or business firms. Workload for the activity follows:

The Working capital fund, established January 2, 1975 (28 U.S.C. 527), finances on a reimbursable basis those administrative services which can be performed more efficiently on a centralized basis at the Department level.

The fund operated in 1978 with separate activities for employee data, telecommunications, data processing, and publication services. In 1979 and 1980 space and property management are added.

Note.—Estimate for 1980 is for activities previously financed from General Administration, Salaries and expenses. Comparable amounts for 1978 (\$4,768 thousand) and 1979 (\$5,284 thousand) are excluded above.

The U.S. Parole Commission is responsible for the parole, revocation, reparole and conditions of supervision of all Federal prisoners while on parole.

Parole hearings are held at all Federal prisons a minimum of six times a year and at any other facility where Federal prisoners might be held. A research program covers all areas related to the parole decisionmaking process. National parole policies are set, maintained, and reviewed by the full Commission. Formal Commission meetings are held at least quarterly in an effort to stabilize and refine these parole policies.

The 1980 program increase will provide additional resources to: (1) Provide for research leading to reliable measures of parole compliance and provide feedback on consequences of the Commission's policies and regulations, and (2) update the file system and legal library.

Workload for this appropriation is as follows:

<sup>1</sup> Includes capital investment as follows: 1978, \$138 thousand; 1979, \$189 thousand; 1980, \$135 thousand.

1. *Enforcement of antitrust, consumer protection and kindred laws.*—This division administers and enforces the antitrust, consumer protection, and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act which prohibits combinations and conspiracies among competitors to set prices collusively, or otherwise to restrain trade; (2) section 2 of the Sherman Act which prohibits combinations and attempts to monopolize and monopolization of interstate trade; (3) section 7 of the Clayton Act which prohibits corporate mergers and acquisitions which tend substantially to lessen competition or tend to monopolization; and (4) various statutory provisions which require Government regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, and the conduct of civil and criminal proceedings in the Federal courts which are designed to deter and punish violators, and to maintain and restore competitive conditions.

Actual and estimated caseload investigations and miscellaneous proceedings are indicated in the following table:

	1977 actual	1978 actual	1979 estimate	1980 estimate
Cases and investigations:				
Pending, beginning of year .....	2,123	1,952	1,592	1,416

<sup>1</sup> Includes capital investment as follows: 1978, \$1,453 thousand; 1979, \$1,782 thousand; 1980, \$2,434 thousand.

The Government is represented in each of the 95 judicial districts by a U.S. attorney and a U.S. marshal.

1. *U.S. attorneys.*—The U.S. attorney is responsible for the prosecution of criminal offenses against the United States, the representation of the Government in all civil actions, suits, or proceedings in which the United States is concerned, and the initiation of proceedings for the collection of fines and penalties and for forfeitures owed to the United States. The 1980 program increase will provide resources necessary to meet increasing caseload demands resulting from the additional judgeships created by the Omnibus Judgeship Act of 1978 and from increased emphasis on criminal prosecution, particularly in the areas of white collar crime, organized crime, public corruption, and major narcotic trafficking conspiracies.

2. *Bankruptcy matters.*—The Bankruptcy Reform Act of 1978, Public Law 95-598, established trustees to perform the supervisory and appointing functions now handled by bankruptcy judges and to monitor private trustee performance. The 1980 request will provide bankruptcy trustees in 18 judicial districts.

3. *U.S. marshals.*—The U.S. marshal has custody of all unsentenced Federal offenders until released by the courts or confined in prison, acts as agent of the courts in the service of process and execution of warrants, and provides protective services to the courts and to key Government witnesses in his district. The 1980 program increase will provide resources necessary to support the additional judges authorized by the Omnibus Judgeship Act of 1978. A reduction is proposed for the witness security program.

The U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during trial and while awaiting transfer to Federal institutions after conviction. An average of 4,135 prisoners will be boarded in approximately 1,000 jails at an average cost of \$16.63 per offender day in 1980.

Fees and expenses are paid to witnesses who appear on behalf of the Government and to indigent defendants in cases in which the United States is a party.

1. *Fact witnesses.*—These witnesses testify as to events or facts about which they have personal knowledge. The increase for 1980 is requested to pay higher

fees, per diem, and travel allowances to fact witnesses in accordance with Public Law 95-535.

2. *Protection of witnesses.*—The Attorney General provides for the security of witnesses and families who are placed in jeopardy due to their testimony or potential testimony on behalf of the Government. Subsistence costs of protected witnesses are paid from this fund.

3. *Expert witnesses.*—The testimony of these witnesses is used in trials where technical and scientific expertise is required in the prosecution of a case.

4. *Mental competency examinations.*—Fees are paid to physicians and psychiatrists upon order of the court to determine the mental competency of accused persons to stand trial. Reports and court testimony relating to the examinations are included in these fees.

The program of the Community Relations Service during 1980 consists of two general areas. The first, assistance to State and local governments, has the following objectives: (1) reduction in the level of tension and conflict inherent in interracial and interethnic disputes, and offering feasible nonviolent alternatives for resolving these conflicts; (2) technical support to the field operations in the form of materials, information, specialists, and access to consultants and experts; and (3) training of State and local officials and community leaders in the skills and techniques of conflict resolution and the effective identification and use of local resources to settle disputes, thereby relieving staff to devote resources to issues of national concern.

The second area, organization program direction, is concerned with (1) the coordination and systematic management of the 10 regional offices; (2) the measurement of program effectiveness; (3) the preparation of informational materials for the Department, other administrative agencies, congressional members and staffs, and professional administrators; and (4) the presentation of pertinent information in professional journals and speeches.

<sup>1</sup> Includes capital investment as follows: 1978, \$26,006 thousand; 1979, \$29,186 thousand; 1980, \$27,037 thousand.

1. *Criminal, security, and other investigations.*—The Federal Bureau of Investigation is the principal investigative branch of the Department of Justice. The overall objective of the FBI is to have a significant, deterring impact on criminal activity, to investigate civil matters

in which the U.S. Government has a vested interest, and to provide information to the executive branch relating to national security.

In accordance with the overall objective and consistent with the FBI's "Quality-over-quantity" policy, significant achievements were posted in curbing white-collar crime and organized crime in 1978 including the quality of individual convictions. In addition, there are currently numerous multi-office major racketeering investigations underway as well as a number of very selective undercover operations which are proving to be highly productive. Also, there are a number of major white-collar crime matters of significant importance currently receiving specialized attention in terms of staff assignment and support.

The FBI has wide deployment (59 field offices and approximately 500 resident agencies), with each field office responsive in varying degrees to local priorities of Federal interest. The overall national priorities, however, are organized and white-collar crime including public corruption, and foreign counterintelligence investigations.

2. *Coordination of investigations.*—The FBI's coordination of investigations is a single activity representing resources devoted from FBI headquarters for the nationwide coordination and management of all of the FBI's investigative programs.

In 1980, the FBI is requesting increased coordination funding and 15 additional work-years. It is the administration's policy to deemphasize marginal investigations and concentrate on high priority Presidential initiatives against organized and white-collar crime, including public corruption. The increase, which is offset by reductions in other programs, is for white-collar crime, organized crime, and foreign counterintelligence.

3. *Investigative support.*—Investigative support for the FBI is provided through training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment.

In 1980, an increase in funding is requested to increase field investigative support. The cyclical replacement of communications and surveillance equipment and upgrading are necessary for efficient operations of the FBI.

All new FBI agents receive approximately 15 weeks of training at the FBI Academy in Quantico, Va., to provide them with the skills and knowledge essential for their work. Agents currently in the field receive inservice training aimed at refining their skills to deal with the ever-increasing quality of cases arising in areas such as white-collar crime, organized crime, and foreign counterintelligence.

The FBI's forensic crime laboratory provides examinations and expert witness testimony for the FBI as well as other Federal agencies.

The FBI's investigative records and communications activity is dedicated to the effective management of investigative, personnel, applicant, administrative, and general files.

In 1980, the FBI has included two new programs, ADP and telecommunications and technical field sup-

port and equipment in this activity. These are not new initiatives but represent a realignment of resources previously contained in other activities.

4. *State and local assistance.*—The FBI continues to support State and local law enforcement by providing training and furnishing laboratory, identification, and informational services. Emphasis is being placed on the training of police instructors within State and local agencies to permit them to become more self-sufficient and to allow the FBI to concentrate its resources on Presidential initiatives.

In 1980, it is anticipated that 1,000 officers will be trained at the National Academy. The FBI will conduct fewer local police training schools in 1980; however, it expects nearly 180,000 attendees at these sessions.

The FBI's National Crime Information Center (NCIC) and uniform crime reporting (UCR) program provide criminal related information to Federal, State, and local law enforcement agencies without charge. The NCIC system contains over 6 million records relating to wanted and missing persons, stolen property, and criminal histories. Over 91 million transactions occurred in 1978. The UCR program collects data from more than 13,000 law enforcement agencies and makes this information available to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository of identification data based on fingerprints. In 1978, approximately 6 million sets of fingerprints were submitted.

During 1980, the FBI will continue to convert fingerprints to an automated file. This conversion will be instituted on a full-scale basis in 1979. When finished, this automated file will enhance the search capability, and increase the service available to requesters of identification data and yield substantial personnel and dollar savings.

5. *Program direction.*—This activity includes the management, direction, administrative support, legal, planning, inspection, and financial functions of the FBI.

During 1978, efforts to eliminate the backlog of Freedom of Information and Privacy Act (FOIPA) requests continued. In order to address current problems and improve overall operations, a number of organizational changes were effected at FBI headquarters.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

Resource requirements and jurisdictional responsibilities of the border management agencies, of which the Service is an important part, are currently under study by the President's Reorganization Project. Reorganization of these agencies will be proposed in early 1979.

1. *Border enforcement.*—This activity contains most of the resources dedicated to both preventing illegal entry into the United States and facilitating the entry of qualified persons. Also included are the resources for the alien documentation program (ADIT) and the Service's nationwide anti-smuggling of aliens program.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

WORKLOAD

	1978 actual	1979 estimate	1980 estimate
Total persons inspected.....	278,988,330	284,802,000	291,637,000
Total citizens inspected.....	108,760,893	111,371,000	114,044,000
Total aliens inspected .....	170,227,437	173,431,000	177,593,000
Aliens admitted .....	169,366,052	172,549,000	176,653,000
Aliens withdrawing at entry.....	861,385	882,000	940,000

Average number of aliens held in detention per day.....	2,529	2,500	2,500
Detentions.....	340,302	340,600	340,000
Aliens expelled.....	1,003,886	1,009,100	1,008,900
Appearances at hearings by trial attorney.....	55,241	61,600	56,500
Deportation hearings completed.....	51,450	63,000	67,000
Exclusion hearings completed.....	2,689	4,000	4,000
Bond redetermination cases completed.....	5,606	7,400	9,200

4. *Intelligence.*—Intelligence information for Service operations is collected, analyzed, and disseminated by personnel assigned to this activity. The resources requested will provide a predictive and analytical intelligence capability. In addition, a capability will be developed to scientifically examine and analyze documents to assist in the identification, investigation, and prosecution of major fraudulent documents and alien smuggling conspiracies.

	1978 actual	1979 estimate	1980 estimate
Scientific examination and analysis of fraudulent documents conducted.....		4,400	10,000
New I&NS data inputs at El Paso Intelligence Center (EPIC) processed.....	174,796	181,000	183,000
Queries of I&NS data processed at EPIC.....	43,484	45,000	46,000
Positive I&NS responses to queries received by EPIC provided.....	9,075	9,500	9,900

5. *Service to public.*—The resources necessary to provide the benefits of the Immigration and Nationality Act are provided in this activity. Included are the adjudication of applications and petitions submitted for benefits, the processing of naturalization and citizenship petitions and applications, and the provision of information and forms to clients at Service offices. All operations conducted overseas except preinspection are within this activity.

**WORKLOAD**

	1978 actual	1979 estimate	1980 estimate
Applications and petitions: Completed by adjudications.....	1,609,093	1,586,000	1,647,000
Naturalization and citizenship applications and petitions completed.....	266,756	312,800	318,000
Status verification cases completed.....	18,609	14,000	15,000
Inquiries and callers at information counters.....	9,557,587	10,100,000	10,600,000
Refugees processed.....	51,601	47,500	47,500
Adjudications completed (overseas).....	44,540	20,000	20,000
Fraudulent applications/petitions detected.....	172,816	179,420	186,670

6. *Support operations.*—This activity includes the resources for construction, communications, the Service's records program, automatic data processing capabilities, and training of personnel.

<sup>1</sup> Includes capital investment as follows: 1978, \$5,353 thousand; 1979, \$3,853 thousand; 1980, \$2,135 thousand.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs.

The DEA has the lead responsibility in drug abuse related matters for domestic investigation, intelligence, law enforcement, and regulation activities, and coordination and intelligence gathering activities with foreign government agencies.

The 1980 appropriation request will provide resources to continue efforts to encourage the drug eradication efforts of the Mexican Government; focus on the Southeast Asian and Mideast heroin threat and possible resurgence of the heroin trafficking to the United States through Europe; disrupt flow of bulk marihuana and cocaine from Colombia and the Caribbean; stem rapidly increasing clandestine manufacture and trafficking of PCP; and identify, investigate, and prosecute key violators responsible for drug trafficking in the United States.

Efforts in the heroin area have produced a reduction in the national retail heroin purity to 4.2% by the third quarter of calendar year 1978—from a high of 6.6% in the first quarter of calendar year 1976.

The means by which DEA performs its mission are summarized by the following activities:

1. *Enforcement of Federal law and investigations.*—(a) *Domestic enforcement.*—This activity encompasses the enforcement of Federal laws regarding narcotics and dangerous drugs. Specifically, the activity aims to reduce the domestic supply of illicit drugs of abuse to a level with which our society and institutions can reasonably cope.

	1978 actual	1979 estimate	1980 estimate
DEA initiated arrests.....	5,594	5,850	5,850
Other Federal referral arrests.....	1,456	1,700	1,700

(b) *Foreign cooperative investigations.*—This activity encompasses efforts to reduce illicit opium production and the supply of heroin destined for the United States; efforts to curtail the supply of illicitly produced dangerous drugs and cocaine entering the United States; and the collection and dissemination of tactical/operational and strategic intelligence.

	1978 actual	1979 estimate	1980 estimate
Foreign cooperative arrests.....	1,194	1,000	1,000
Trafficking networks developed.....	31	40	35
Trafficker profiles completed.....	215	265	265
Enforcement targets identified.....	2,555	3,000	3,000

(c) *Compliance and regulation.*—This activity encompasses the regulation of the legal trade in narcotics and dangerous drugs. By authority of the Controlled Substances Act this activity includes the scheduling and classification of controlled drugs; establishing import, export, and manufacturing quotas for controlled drugs; registering manufacturers, handlers, and dispensers of controlled drugs; investigating and determining points of diversion into the illicit market; and developing a precursor control program to prevent illicit manufacture of controlled drugs.

	1978 actual	1979 estimate	1980 estimate
Investigations:			
Regulatory.....	929	1,395	1,440
Complaint.....	314	525	525
Preregistrant.....	51,075	70,000	70,000

(d) *State and local assistance.*—This activity encompasses cooperative law enforcement activities with State, county, and local officers; a continuing drug enforcement training program for State, county, and local law enforcement officers; training programs for State and local forensic chemists; laboratory support for State and local law enforcement agencies including analysis of evidence and professional testimony in State prosecutive cases; training programs and guidance to regulatory agencies at the State and local level; and State and local drug traffic prevention programs.

	1978 actual	1979 estimate	1980 estimate
State and local initiated arrests.....	1,661	1,650	1,650
Federal initiated arrests.....	2,373	2,150	2,150
Laboratory exhibits analyzed.....	10,969	14,400	13,550
Trainee-days.....	39,940	38,000	38,000

2. *Intelligence.*—This activity encompasses the collection, analysis, and dissemination of drug intelligence. Intelligence supports DEA, other Federal, State, and local efforts to interdict or suppress the illicit movement of drugs by providing a systematic approach for attacking the drug traffic by assessing the vulnerabilities of traffickers, and by supplying information for policy determination and strategy.

	1978 actual	1979 estimate	1980 estimate
Trafficking networks developed.....	129	150	145
Trafficker profiles completed.....	2,045	2,245	2,145
Enforcement targets identified.....	29,690	34,000	33,000
El Paso Intelligence Center (EPIC) watch transactions.....	120,000	200,000	250,000

3. *Research and development.*—This activity encompasses research programs directly related to the DEA law enforcement and regulatory functions. The research includes, but is not limited to, studies comparing the deterrent effects of various enforcement strategies; assessing and detecting accurately the presence of controlled substances in the human body; evaluating the

nature and sources of supply of dangerous substances; developing more effective methods to prevent diversion of controlled substances into illicit channels; developing and applying systems and technologies for limiting the supply of illicit drugs in the United States; and analyses to insure the most effective utilization of these systems.

4. *Support operations.*—This activity encompasses laboratory analysis of evidence in support of investigation and prosecution of drug traffickers; training programs for all levels of DEA operational personnel; and maintenance of an effective technical equipment program to support increasingly complex high-level investigations.

	1978 actual	1979 estimate	1980 estimate
Laboratory exhibits analyzed.....	16,505	17,400	17,400
Trainee-days.....	17,300	16,500	16,000

5. *Program direction.*—This program encompasses the overall management and direction of DEA and includes the development of coordinated and definitive policy, program analysis and planning, protection of the security of DEA, legal counsel, and coordination and performance of administrative functions to provide timely and effective administrative services.

*Reimbursable program.*—A reimbursable program providing primarily for the training of foreign drug law enforcement officials is conducted by DEA and funded by the Department of State. More than 30 classes are held each year, both in the United States and host countries.

	1978 actual	1979 estimate	1980 estimate
Trainee-days.....	18,650	15,000	18,000

This appropriation will provide for the custody and care of an average of 28,600 offenders and for the maintenance and operation of 43 penal institutions, 11 community treatment centers, 5 regional offices and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other units for short periods of time. An average of 4,300 sentenced prisoners will be in contract facilities at an average cost of \$25.44, per offender day in 1980.

The Bureau receives reimbursements from others for daily care and maintenance of unsentenced offenders and State and local offenders, for utilities produced for Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

1. *Inmate care and custody services.*—This activity covers the direct care costs, excluding psychology services, of all offenders in Federal institutions. This includes the cost of all food, medical supplies, clothing,

welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of confining sentenced Federal offenders in contract State and local facilities.

Major program thrusts will be to expand the Federal prison camp located at Big Spring, Tex.; open two new housing units at the FCI's at Sandstone, Minn., and La Tuna, Tex.; and provide equipment funds for the new Federal Correctional Institution (FCI) located at Lake Placid, N.Y.

2. *Inmate programs.*—This activity finances the costs of academic, social, and occupational education courses and institution programs for the treatment of drug addiction and psychology services. The major program objectives will be to expand the Federal prison camp at Big Spring and provide equipment funds for the Lake Placid FCI. Equipment funds are also requested for two recreational activities facilities located at the FCI Tallahassee, Fla., and the Federal prison camp at Safford, Ariz.

3. *Institution administration and maintenance.*—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions. Funds are requested in 1980 to expand the Federal prison camp at Big Spring and provide equipment funds for the Lake Placid FCI.

4. *Community corrections.*—This activity provides for the care of Federal prisoners in Federal and contract community residential centers.

5. *Program direction.*—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel.

1. *Training and/or education.*—This program supports the development of learning and skills which meet the defined needs of State and local correctional personnel and organizations. During 1980, the Institute plans to award 120 grants and contracts for projects to survey training activities in correctional agencies; assess training and staff development needs of correctional agencies; develop, implement, and evaluate training grants and programs in the NIC priority areas of field service staff development, jails and screening for risk; and develop and identify training models, programs, materials, and expertise to improve correctional practice, to increase agency self-sufficiency; and to meet constitutional requirements.

2. *Technical assistance.*—This program provides assistance to State and local correctional agencies to focus on improving their capabilities to deal with organizational needs and improve the services, operation, and management of the agency. During 1980, resources will be used to extend NIC capacity to respond with appropriate services to the increasing requests for assistance; develop State agency capability to provide training and technical services to all correctional units within the State; provide increased direct assistance to requesting agencies in response to more comprehensive system needs and problems; respond to increasing requests for services from State and local correctional agencies; identify 25 agencies to work with directly to develop constitutional operations, policies, practices, and condi-

tions. Six hundred direct technical assistance responses and 380 technical assistance grants and contracts will be made in 1980.

3. *Research and evaluation.*—The 1980 request will allow NIC to seek to identify relevant research and evaluation studies, and to make those studies available in usable form to operating Federal, State, and local agencies. Prior fiscal year grant activities will be reviewed and analyzed to determine future research and program evaluation thrusts. In addition, NIC will focus on maximizing the utilization of research and evaluation by cycling data into NIC's training, technical assistance, and policy standards functions.

4. *Policy standards.*—This program supports the collection and dissemination of relevant correctional policies, programs, practices, and resource documents. Assistance to jurisdictions attempting to develop and implement standards will be provided. Standards that may have significant impact if implemented will be identified, and the development of materials to assist practitioners and others to evaluate the implementation of standards on correctional practices will be accomplished.

1. *Planning and site acquisition.*—This activity reflects the costs of efforts to obtain suitable sites for approved construction projects, including site purchase and development and facility design. During 1980, advance planning and/or site acquisition will continue for the Tucson, Ariz., Federal Detention Center.

2. *New construction.*—This activity represents costs associated with the construction of new facilities in order to reduce overcrowding, close large and antiquated institutions, and provide a safe and humane environment for staff and inmates. In 1980, construction will be completed on the Federal Correctional Institution for young offenders at Lake Placid, N.Y. Construction will continue on the Western Federal Correctional Institution for young offenders at Camarillo, Calif.; the Detroit Metropolitan Correctional Center; and the Phoenix, Ariz., Federal Correctional Institution for youths/young adults.

3. *Modernization and repair of existing facilities.*—This activity includes rehabilitation and renovation of buildings, necessary modifications to accommodate new correctional programs, rehabilitation or replacement of

utilities systems, and repair projects at existing facilities. In 1980, obligations of \$8,535 thousand will be incurred for projects such as major plant renovation, air and water pollution control, electric systems rehabilitation, and expanded capacity of existing facilities. An additional obligation of \$1.5 million will be incurred for the Oxford, Wis., lease/purchase agreement.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation is currently expanding its operations to provide industrial employment opportunities for the expanding populations at existing institutions and for the populations at new institutions. This expansion includes the establishment of 14 new industrial operations at 12 institutions in 1978. Current plans for 1979 are to open 8 new enterprises at 7 institutions.

In accomplishing its mission, the Corporation produces goods and services, which are provided to other Federal agencies, and in so doing incurs costs for direct labor, overhead, and materials. These costs reflect the Corporation's expanding activities, as well as inflation.

In addition, administrative expenses are incurred for management at the corporate level. These represent approximately 2% of total obligations.

Federal Prison Industries currently funds vocational training programs within the Bureau of Prisons. A planned phase out of these expenses to FPI is in process and is shown by decreased amounts in future years; programs will continue, but will be funded through appropriations to the Bureau.

Other expenses charged to the industrial manufacturing program include inmate accident compensation, meritorious service awards to inmates, cost of miscellaneous sales and other miscellaneous operating expenses.

As a manufacturing concern, the Corporation makes capital investments in buildings and improvements and in machinery and equipment, as necessary, to provide working environments conducive to its legislative mandate to provide realistic inmate training through industrial production. Both types of investments are increasing as a result of corporate expansion.

Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. Revenues are derived entirely from the sale of products and services

to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss.

The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Management of the Corporation is accomplished by a staff of 39 employees located at the corporate headquarters at Washington, D.C.

To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

**Budget program.**—The commissary fund consists of the operation of commissaries for the inmates as an earned privilege.

**Financing.**—Profits are derived from the sale of goods to inmates. Sales for 1980 are estimated to be \$12.9 million. Adequate working capital is assured from retained earnings.

**Operating results.**—Profits received are used for general welfare and recreational items for all inmates.

<sup>1</sup> Includes capital investment as follows: 1978, \$20 thousand; 1979, \$30 thousand; 1980, \$20 thousand.

The Omnibus Crime Control and Safe Streets Act of 1968, as amended, and the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, place within the Law Enforcement Assistance Administration (LEAA) responsibility to provide assistance to States and local units of government to reduce crime and juvenile delinquency, improve and strengthen the quality of the criminal justice system—police, courts, and corrections—and provide resources and leadership for the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. Proposed legislation will restructure the LEAA with special emphasis on research and statistical programs. The budget schedules to achieve this change are presented at the end of the Department of Justice schedules.

1. *Planning formula grants.*—Funds under this activity are used to support State Planning Agencies (SPA's) which prepare and adopt in cooperation with regional planning units (RPU's) and units of local government, an annual State comprehensive law enforcement and criminal justice plan. New funding for this activity will cease after 1979.

2. *Corrections formula grants.*—Funds under this activity provide up to 90% of the cost of correctional programs and projects selected by the States. New funding for this activity will cease after 1979.

3. *Juvenile justice formula grants.*—The funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency.

4. *Criminal justice formula grants.*—Funds under this activity permit States and territories to fund programs and projects according to their own priorities for criminal justice as outlined in the Crime Control Act of 1976. New funding for this activity will cease after 1979.

5. *Criminal justice programs.*—Funds under this activity afford the agency the opportunity to provide leadership by placing emphasis on specific program areas and by listing innovative strategies to resolve continuing problems. New funding for this activity will cease after 1979.

6. *Correctional programs.*—These funds are the means by which national correctional priorities and programs are emphasized. New funding for this activity will cease after 1979.

7. *Training and manpower development.*—This activity provides for and encourages training, manpower development, and new personnel practices for the purpose of improving the criminal justice system.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

8. *Technical assistance.*—This activity provides technical assistance to States and units of local government, and other public and private organizations or international agencies involved in criminal justice activities.

9. *Crime prevention programs.*—The purposes of this activity are to encourage neighborhood and community participation in crime prevention and public safety efforts through grants and technical assistance. Programs will be coordinated with other Federal agencies involved in citizen criminal justice activities.

10. *Juvenile justice programs.*—This program supports the development and implementation of new approaches, techniques, and methods with respect to juvenile delinquency programs. Including effective means of diverting juveniles from the traditional correctional system; developing and maintaining community-based alternatives to traditional forms of institutionalization; programs stressing advocacy activities aimed at improving services to youth; collecting and dissemination of data regarding juvenile justice; and the coordination of Federal efforts in juvenile delinquency programs.

11. *National institute of law enforcement and criminal justice.*—Support is provided for research and development, technology transfer and evaluation of techniques, systems, and equipment and devices for improving, and strengthening the criminal justice system. In 1980, funding to support these efforts will be transferred to a separate appropriation.

12. *Data systems and statistical assistance.*—Provides support to collect, evaluate, publish, and disseminate statistics and other information on crime conditions. In 1980, funding to support these efforts will be transferred to a separate appropriation.

13. *Public safety officers' benefits program.*—Funds will be used to pay \$50 thousand in death benefits to eligible survivors of public safety officers who die in the line of duty.

14. *Executive direction.*—Funds will assure the continuity of leadership and assistance to States, units of local governments, and public and private organizations engaged in criminal justice activities.

15. *Administrative services.*—Funds will provide administrative support required for the internal operations of the agency.

The planned distribution of budget authority requested for 1980 as compared to 1978 and 1979 follows (in thousands of dollars):

<sup>1</sup> Includes capital investment as follows: 1980, \$20 thousand.

Under proposed legislation (the Justice System Improvement Act of 1979), the Office of Justice Assistance, Research, and Statistics (OJARS) would be established. The Office would set broad policy and guidelines for, and coordinate the activities previously performed by the National Institute of Corrections (Federal Prison System) and by the Law Enforcement Assistance Administration.

This account will fund grant and other law enforcement assistance programs directed primarily toward State and local governments.

New activities included in the Law Enforcement Assistance activity are:

2. *State and local administration of programs.*—Funds for this activity are for the purpose of establishing or designating and operating a Criminal Justice Council.

6. *Criminal justice formula grants (part D of the proposed legislation).*—Funds for this activity will assist States and units of local government in carrying out programs to improve and strengthen the functioning of the criminal justice system.

8. *National priority grant program.*—Funds for this activity will be used to encourage States and units of local government to carry out programs that, on the basis of research, demonstration, or evaluations, have proved effective in improving and strengthening the administration of justice.

9. *General criminal justice grant programs.*—Funds for this activity will be used to augment efforts by States, units of local governments, and private nonprofit organizations to improve and strengthen the criminal justice system. Funds will be utilized to improve the comprehensive planning and coordination of criminal justice activities; modernize State court operations; and assist community anti-crime programs.

The planned distribution of budget authority requested for 1980 is as follows (in thousands of dollars):

	1978 actual	1979 estimate	1980 estimate
1. Planning formula grants			
2. State and local administration of programs			15,600
3. Corrections formula grants			
4. Juvenile justice formula grants			30,375
5. Criminal justice formula grants			
6. Criminal justice formula grants (part D)			277,408
7. Criminal justice programs

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

【SEC. 202. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, territory, or the District of Columbia.】

【SEC. 203. Appropriations and authorizations made in this title for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.】

SEC. 【204】 201. Appropriations for “Salaries and expenses, general administration”, “Salaries and expenses, United States attorneys and marshals”, “Salaries and expenses, Federal Bureau of Investigation”, “Salaries and expenses, Immigration and Naturalization Service”, and “Salaries and expenses, Bureau of Prisons”, shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901-5902).

【SEC. 205. Appropriations made in this title shall be available for the purchase of insurance for motor vehicles operated on official Government business in foreign countries.】

【SEC. 206. Funds appropriated under this title shall be available for (1) expenses of primary and secondary schooling for dependents of personnel stationed outside the continental United States at costs not in excess of those authorized by the Department of Defense for the same area, when it is determined by the Attorney General that schools available in the locality are unable to provide adequately for the education of such dependents, and (2) transportation of said dependents between their places of residence and schools serving the area which they would normally attend when the Attorney General, under such regulations as he may prescribe, determines that such schools are not accessible by public means of transportation.】

SEC. 【207】 202. A total of not to exceed 【\$18,500】 \$31,000 from funds appropriated to the Department of Justice shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

【SEC. 208. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General.】 (Department of Justice Appropriation Act, 1979.)

## DEPARTMENT OF LABOR

### EMPLOYMENT AND TRAINING ADMINISTRATION

#### Federal Funds

#### General and special funds:

##### PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, \$86,260,000, together with not to exceed \$33,081,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund, and of which \$6,125,000 shall be for carrying into effect the provisions of 38 U.S.C. 2001-2003. (7 U.S.C. 2041-2053; 8 U.S.C. 1184; 29 U.S.C. 49-49K, 50, 801 et seq.; 42 U.S.C. 2000-2000d-4.)

Note.—The appropriation for this account for 1979 had not been enacted at the time this budget was prepared. The 1979 amounts shown below are based upon a continuing resolution (Public Law 95-482) in effect through September 30, 1979, that provides for this account at its current rate.

<sup>1</sup> Includes capital investment as follows: 1978, \$56,102 thousand; 1979, \$97,061 thousand; 1980, \$31,900 thousand.  
<sup>2</sup> Public Law 95-355 provides for reappropriation of unobligated balances of \$120 million from 1978 to 1979, of which \$7,164 thousand was unobligated at the start of 1979. Public Law 95-524 provides for reappropriation of unobligated balances now estimated at \$122,133 thousand from 1979 to 1980.

Note.—Excludes \$1,500 thousand in 1980 for activities transferred to: Bureau of Labor Statistics, Salaries and expenses. Comparable amounts for 1978 (\$1,500 thousand) and 1979 (\$1,500 thousand) are included above.

This account provides for a flexible and decentralized system of Federal, State, and local programs of training and other services for economically disadvantaged, unemployed, and underemployed persons, designed to lead to permanent gains in employment and earnings and enhanced self-sufficiency.

1. *Comprehensive employment and training programs.*—Provides financial assistance primarily by formula to over 450 State and local prime sponsors to design and operate comprehensive employment and training assistance programs to help meet the employment and training needs of their areas. Services include institutional and on-the-job training, work experience, vocational education and counseling, remedial education, and job placement services, as authorized by title II, parts A, B, and C of the Comprehensive Employment and Training Act, and public service employment under part D of title II.

In 1980, an estimated 423,700 years of service will be provided under parts A, B, and C. An estimated 250,000 individuals will be placed in unsubsidized jobs as a result of training and other services. Another 145,000 individuals will obtain jobs as a result of direct and self referrals to employment.

Under part D, an average of 267,000 transitional public service employment jobs for the economically disadvantaged will be provided.

2. *Special programs for youth.*—Provides employment and training assistance for unemployed youths, particularly economically disadvantaged and out-of-school

youths, through the young adult conservation corps (YACC), youth community conservation and improvement projects (YCCIP), youth employment and training programs (YETP), youth incentive entitlement pilot projects (YIEPP), summer program for economically disadvantaged youth (SPEDY), and job corps.

YACC enrollees participate in outdoor work activities such as flood control and relief, park maintenance, and forestry. YCCIP enrollees work in urban neighborhoods and communities to rehabilitate housing, weatherize low-income houses, and repair and restore public buildings and properties. YETP provides enrollees training, education, employment opportunities, and supportive services designed to enhance job prospects and career opportunities. YIEPP provides enrollees in test sites with full-time or part-time employment, combined with training, to determine effects on school return, retention, and completion. SPEDY provides jobs for economically disadvantaged youth during the summer months. The job corps provides severely disadvantaged youth with a comprehensive program of basic education, vocational training, job placement, medical support, and other services in a residential setting.

3. *Other national programs.*—Provides additional employment and training assistance to special segments of the population which have particular disadvantages in the labor market. Among groups served are Indians and other native Americans, veterans, older workers, displaced homemakers, migrant and seasonal farmworkers, criminal offenders, and persons of limited English-speaking ability. This activity also provides for technical assistance and training for Federal, State, and local personnel involved in the planning and administration of employment and training programs; for a comprehensive system to develop labor market information; and for research, development, and evaluation.

This program authorized by title VI of the Comprehensive Employment and Training Act provides temporary employment assistance grants to State and local prime sponsors and Indian tribes during periods of high unemployment. It will provide an end of year employment level of 358,000 jobs in 1979 and 200,000 in 1980. As required by section 602 of Public Law 95-524, the following information is provided:

The unemployment rate for 1980 is estimated to be 6.2%.

The number of unemployed in excess of 4% of the labor force is estimated to be 2.29 million.

The average cost per year of public service employment opportunities is estimated to be \$9,500.

The amount that would be needed to be appropriated to provide public service jobs for 20% of the unemployed in excess of 4%, taking into account anticipated budgetary resources at the beginning of the year, is \$3,891 million.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and allowances to unemployed Federal employees and ex-servicemen, as authorized by title 5, chapter 85 of the United States Code, of benefits and payments as authorized by title II of Public Law 95-250, of trade adjustment benefit payments and allowances, as provided by law (19 U.S.C. 1941-1944 and 1952; part I, subchapter B, chapter 2, title II of the Trade Act of 1974), and for reimbursement to States for unemployment benefits paid on the basis of public service employment as authorized by title II of the Emergency Jobs and Unemployment Assistance Act of 1974, as amended, and for reimbursements as authorized by Section 121 of P.L. 94-566, \$950,000,000, together with such amounts as may be necessary to be charged to the subsequent

appropriation for payments for any period subsequent to September 15 of the current year: *Provided*, That, in addition, there shall be transferred from the Postal Service Fund to this appropriation such sums as the Secretary of Labor determines to be the cost of benefits for ex-Postal Service employees: *Provided further*, That amounts received during the current fiscal year from the Postal Service or recovered from the States pursuant to 5 U.S.C. 8505(d) shall be available for such payments during the year: *Provided further*, That amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments. (*Department of Labor Appropriation Act, 1979.*)

1. *Payments to former Federal personnel.*—Funds are provided to the States for payment of unemployment compensation to eligible former Federal employees, ex-Postal Service employees, and ex-servicemen.

2. *Trade adjustment assistance.*—Adjustment assistance allowances are paid to workers as authorized by the Trade Expansion Act of 1962 and the Trade Act of 1974.

3. *Unemployment assistance and payments under other Federal unemployment programs.*—States are reimbursed for unemployment benefits paid on the basis of public service employment, as authorized by title II of the Emergency Jobs and Unemployment Assistance Act of 1974, as amended. States were reimbursed during a transitional period for benefits paid to workers newly covered under the Unemployment Compensation Amendments of 1976. Benefits are paid to workers under Public Law 95-250, which expanded Redwood National Park.

Covered employment.....	84,500	87,800	89,200

<sup>1</sup> 1979 and 1980 estimates include workload which can be financed from contingency funds.

2. *Employment services.*—A nationwide network of more than 2,400 local employment offices financed by Federal grants provide services to assist workers in obtaining suitable employment and to assist employers in resolving their employment problems. General services include interviewing, testing, counseling and referral for placement, appropriate training, or other services involved in readying individuals for employment. Assistance to employers includes analyzing their employment requirements, solving problems of recruitment and turnover, and developing labor market information. Special emphasis is placed on providing services to veterans and disadvantaged applicants. It is estimated that not less than \$80 million will be available for services to veterans. It has been determined in accordance with section 901(c)(4) of the Social Security Act as amended that 97 percent of the necessary expenses of the Employment Service is an appropriate charge to the employment security administration account of the Unemployment trust fund.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. All advances made to the Federal unemployment account and advances made to the Extended unemployment compensation account for Federal supplemental benefits paid prior to April 1, 1977, and for the Federal share of extended benefits are repaid, without interest, to the general fund of the Treasury. Advances made to the Extended unemployment compensation account for Federal supplemental benefits paid after April 1, 1977, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:  
Department of Health, Education, and Welfare:  
"Human Development Services."  
"Work Incentives."

Intragovernmental funds:

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment trust fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits. State payroll taxes pay for all regular State benefits. During periods of high State or national unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax are also paid. The Federal tax pays the costs of Federal and State administration of unemployment insurance and 97% of the costs of the employment service.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

<sup>1</sup> Includes capital investment as follows: 1978, \$394 thousand; 1979, \$156 thousand; 1980, \$163 thousand.

NOTES

Excludes \$1,420 thousand in 1980 for activities transferred to: Departmental Management, Salaries and expenses. Comparable amounts for 1978 (\$1,369 thousand) and for 1979 (\$1,420 thousand) are included above. Includes \$185 thousand in 1979 (beginning Dec. 31, 1978) and \$231 thousand in 1980 for activities previously financed from:

(In thousands of dollars)

	1978	Oct. 1-Dec. 30, 1978
Investigations and collections, Internal Revenue Service, Department of the Treasury.....	\$231	\$46

1. *Labor-management relations, policy and services.*— Provides assistance to unions, employers, employees, and State and local governments, including special studies and analyses and technical assistance in planning for work force adjustments as they will affect labor-management relations; coordinates Federal action in particular labor-management disputes; carries out the Department's responsibilities under the Urban Mass Transportation Act of 1964, and develops policies, procedures, and regulations relating to the continuation of employee benefits under the provisions of the Redwood National Park Act of 1968, as amended. Develops recommendations on labor-management relations matters, and conducts studies of collective bargaining and programs pertaining to the Labor-Management Reporting and Disclosure Act (LMRDA). Among areas for research in 1980 will be the construction industry, collec-

tive bargaining, and minimizing causes of labor-management disputes.

**2. Labor-management standards enforcement.**—Covers the administration and enforcement of the LMRDA and section 7120 of the Civil Service Reform Act of 1978, which govern labor-management relations in the Federal service.

**WORKLOAD STATISTICS**

	1978 actual	1979 estimate	1980 estimate
Reports received .....	84,000	84,000	84,000
Investigations, field audits, and supervised elections conducted.....	6,085	6,704	7,023

**3. Veterans' reemployment rights.**—Provides assistance to veterans, reservists, and National guardsmen on training duty, to secure reinstatement with their preservice employers and other employment advantages to which they may be entitled based on seniority accrued while in military service. Compliance is advanced by informing employers and potential claimants of their responsibilities under the law and by assisting eligible claimants in determining and exercising their rights.

**WORKLOAD STATISTICS**

	1978 actual	1979 estimate	1980 estimate
Complaints processed.....	2,229	2,100	2,000
Veterans assisted.....	194,095	163,040	162,000

**4. Pension and welfare benefits program.**—Develops, promulgates, and enforces fiduciary standards, reporting and disclosure requirements, and other provisions of the Employee Retirement Income Security Act of 1974 (ERISA), for which the Secretary of Labor is responsible; provides for the protection of pension and welfare benefit plan participants' rights; and grants variances from provisions of the law and regulations, when such variances are in the interests of the plan and its participants.

**WORKLOAD STATISTICS**

	1978 actual	1979 estimate	1980 estimate
ERISA reports received.....	1,200,000	490,000	250,000

1. *Improving and protecting wages.*—This program obtains compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act and enforces the labor standards provisions under various Federal procurement acts, under the Farm Labor Contractor Registration Act, and under the wage garnishment provisions in title III of the Consumer Credit Protection Act. Regulations

and interpretive materials are developed for the compliance program and special minimum wage standards are set. About 900,000 workers are expected to be directly aided each year by these efforts. This program also includes determinations of prevailing wage rates and fringe benefits for all Federal and federally assisted contracts for construction subject to the Davis-Bacon and related acts. Prevailing wage rates and fringe benefits determinations are also made under the Service Contract Act. This program also includes specific enforcement of the Fair Labor Standards Act and the Farm Labor Contractor Registration Act with regard to employers of undocumented alien workers.

2. *Elimination of discrimination in employment.*—The Employment Standards Administration works to insure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, to hire and promote physically and mentally handicapped individuals, is under this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1980, about 12,000 reviews of contractor employment practices and compliance will be conducted.

3. *Workers' compensation.*—Under this income-maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act (FECA), the Longshoremen's and Harbor Workers' Compensation Act, their various extensions, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

4. *Program development and administration.*—This activity provides for the direction and coordination of employment standards programs. Program planning, research, evaluation, budget, and other administrative activities of the Employment Standards Administration (ESA) are carried out to accomplish predefined objectives. Major goals in 1980 will include broadening the knowledge base of the research and evaluation program in each major program area; continuing to develop effective Federal-State cooperation; strengthening ESA's programs for training its employees; and providing technical assistance to ESA's clientele.

1. *Federal Employees' Compensation Act benefits.*—Currently, more than 46,600 claimants are receiving long-term compensation benefits due to job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes loss of job time. Workers suffering non-controverted traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

New claims received.....	31,637	33,000	35,000

2. *Disabled coal miners' benefits.*—During the first half of 1978, the Special benefits fund financed coal mine workers' benefits and medical care costs, as authorized by title IV of the Federal Coal Mine Health and Safety Act of 1969, as amended. Effective April 1, 1978, the Black lung disability trust fund assumed fiscal responsibility for all benefit and administrative costs incurred in the operation of the black lung program, as authorized by the Black Lung Benefits Revenue Act of 1977.

General and special funds—Continued

SPECIAL BENEFITS—Continued

3. *Longshore and harbor workers' compensation benefits.*—Under the Longshoremen's and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

Trust Funds

BLACK LUNG DISABILITY TRUST FUND

For payments from the Black Lung Disability Trust Fund, **[\$422,265,000] \$466,667,000**, of which **[\$389,400,000] \$437,171,000** shall be available for payments of all benefits and interest on advances under subsection (b)(2) of section 3 of the Black Lung Benefits Revenue Act of 1977, as authorized by section 424(a) (1), (2), and (4) of the Black Lung Benefits Act, as amended, and of which **[\$24,555,000] \$19,529,000** shall be available for transfer to Employment Standards Administration, Salaries and Expenses and **[\$8,310,000] \$10,967,000** for transfer to Departmental Management, Salaries and Expenses for expenses of operation and administration of the Black Lung Benefits program as authorized by section 424(a)(5) of the Black Lung Benefits Act, as amended: *Provided*, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to June 15 of the current [year,] year: *Provided, further, That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 424(a)(5) of the Black Lung Benefits Act, as amended. (Public Law 95-237; Public Law 95-239; Department of Labor Appropriation Act, 1979.)*

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act, in the form of an excise tax on mined coal tonnage and reimbursements into the fund from identified responsible mine opera-

tors. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1974 or where no mine operator can be assigned liability, in addition to all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health, Education, and Welfare. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1978, \$19 million; 1979, \$97 million; and 1980, \$303 million.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act (33 U.S.C. 944; 31 U.S.C. 725).

These trust funds are available for payments of additional compensation for second injuries. When a second injury results in a permanent partial disability which, combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death; the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled longshore and harbor workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

91.20	Outlays from civilian pay raise supplemental .....		1,740	70

<sup>1</sup> Includes capital investment as follows: 1978, \$320 thousand; 1979, \$320 thousand; 1980, \$320 thousand.

The Occupational Safety and Health Act of 1970 provides for direct enforcement of Federal standards in States declining to assert jurisdiction and for grants to States to assist them in administering and enforcing programs for occupational safety and health which have been approved by the Secretary.

1. *Safety and health standards.*—New and revised mandatory standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment.

2. *Enforcement.*—Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities. States may provide for coverage of occupational safety and health issues under an approved plan. Both State and Federal enforcement personnel may cite employers for violations and propose penalties. In areas of exclusive Federal jurisdiction, citations are issued and penalties proposed subject to appeal to the independent Occupational Safety and Health Review Commission. Program operations are targeted to the investigation of fatal and catastrophic accidents, the investigation of claims of imminent danger and employee complaints, and inspections of establishments in high-risk industries. The Occupational Safety and Health Administration (OSHA) will continue to increase emphasis on inspections for serious health and safety hazards. Professional training for compliance personnel is conducted at the OSHA Training Institute near Chicago, Ill.

3. *Technical support programs.*—Laboratory support is provided to compliance officers. Technical assistance is provided on all aspects of standards setting, compliance assistance, and enforcement programs, particularly with regard to the feasibility of engineering controls necessary for compliance. Comprehensive scientific and technical information services are provided, and analyses are made of possible economic consequences and environmental impact of proposed standards. Applications for variances or exemptions from standards are evaluated.

4. *Compliance assistance.*—Grants are awarded to assist organizations develop capacity to provide occupational safety and health training for workers and employers. Under cooperative agreements with State agencies, Federal funds are made available to cover 90% of

the costs of providing free onsite consultation to employers upon request. This activity also provides evaluative, consultative, and promotional programs to assist Federal agencies in implementing job safety and health programs to protect Federal workers.

5. *Safety and health statistics.*—Statistics on occupational fatalities, injuries, and illnesses are collected and published annually to aid in the identification of occupational safety and health problems and to facilitate administration. Employers with 11 or more employees are required to maintain a record of work-related fatalities, illnesses, and injuries (other than minor first aid cases). This record must be made available for examination by Federal and State enforcement personnel, and provides the source data for the annual nationwide survey of injuries and illnesses.

6. *Executive direction and administration.*—These activities include planning, evaluation, management support, legislative liaison, interagency coordination, and public information.

## PROGRAM STATISTICS

	1978 actual	1979 estimate	1980 estimate
Standards:			
Health .....	6	8	18

Total program costs, funded <sup>1</sup> .....	62,585	128,230	131,710

<sup>1</sup> Includes capital investments as follows: 1978, \$1,068 thousand; 1979, \$1,600 thousand; 1980, \$975 thousand. Note.—1979 and 1980 estimates are for activities previously financed from: Mine Enforcement and Safety Administration, Department of the Interior (Oct. 1, 1977—Mar. 8, 1978, \$48,825 thousand).

1. **Enforcement.**— Enforcement of the Federal Mine Safety and Health Amendments Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, and recommendations to reduce working hazards.

2. **Assessments.**—This activity provides for the assessment of civil monetary penalties for violations of the Federal Mine Safety and Health Amendments Act of 1977.

3. **Education and training.**—Examines plans and monitors performance of operator programs to train miners in work safety and health. Develops training materials and certifies and monitors instructors. Advises industry on compliance with training regulations. States are encouraged to develop training programs through grants and technical assistance.

4. **Technical support.**—This activity provides onsite technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or effect improvements in mining practices. It also provides analytical data relative to the cause, frequency, and manner of accidents and the events or the practices that contribute to their causes.

5. **Program administration.**—Provides for the Office of the Assistant Secretary and the key management staff that supports the general administrative functions.

<sup>1</sup> Includes capital investment as follows: 1978, \$353 thousand; 1979, \$446 thousand; 1980, \$456 thousand.  
Note.—Includes \$1,500 thousand in 1980 for activities previously financed from: Employment and Training Administration, Employment and training assistance. Comparable amounts for 1978 (\$1,500 thousand) and 1979 (\$1,500 thousand) are excluded above.

1. *Labor force statistics.*—Monthly estimates are made of the U.S. labor force, employment, and unemployment. Studies are made of selected characteristics of the labor force. Monthly data are prepared and published on employment, hours of work, and earnings by industry for the United States and for each State. Projections are prepared of manpower requirements and supply, including detailed studies of the outlook for specific occupations.

#### WORKLOAD STATISTICS (MAJOR ITEMS)

Labor force statistics:	1978 actual	1979 estimate	1980 estimate
Monthly labor force survey: households in monthly sample .....	65,000	74,600	74,600
Employment, hours, earnings, and labor turnover: establishments reporting monthly .....	194,000	197,000	200,000
Occupational employment statistics: different establishments reporting during the year .....	155,000	130,000	90,000

2. *Prices and cost of living.*—The Consumer Price Index and the Producer Price Index are compiled and published monthly. Revision of the Producer Price Index will continue in 1980. Special analytical studies of price changes are undertaken, and family budget studies are prepared and published.

#### WORKLOAD STATISTICS (MAJOR ITEMS)

Prices and cost of living:	1978 actual	1979 estimate	1980 estimate
Consumer prices:			
(a) Items reported .....	400	400	400
(b) Stores surveyed (monthly) <sup>1</sup> .....	18,700	19,500	19,300
(c) Households surveyed <sup>2</sup> .....	3,500	3,500	3,500
Industrial prices:			
(a) Producer price indexes (PPI):			
(1) Products and product groupings .....	2,678	2,775	2,852
(2) Respondents/sources .....	9,500	10,000	10,400
(b) Industry output price indexes:			
(1) Industry sector price indexes (ISPI)....	151	171	191
(2) Revision program:			
(a) SIC 4-digit industry indexes .....	16	59	159
(b) Establishments .....	940	4,723	10,723
International price program: major U.S. exporting and importing companies interviewed for price information:			
Personal visit initiation .....	2,400	2,500	2,500
Quarterly mailout .....	2,900	4,000	5,200

<sup>1</sup> Most cities are surveyed on a bimonthly cycle. Estimates for 1978, 1979 and 1980 reflect the introduction of CPI sample rotation.

<sup>2</sup> Each individual household is only surveyed every 6 months, but a sample is surveyed every month.

3. *Wages and industrial relations.*—Data are collected and analyzed on occupational wages and salaries in major labor markets and industries. Monthly information is compiled on work stoppages and wage developments. Reports and studies are issued on fringe benefits, expenditures, collective bargaining agreements, trade union organization, and private welfare and pension plans.

#### WORKLOAD STATISTICS (MAJOR ITEMS)

Wages and industrial relations:	1978 actual	1979 estimate	1980 estimate
Municipal government wage surveys: establishments reporting annually .....	27	27	27
Occupational wages: establishments reporting annually .....	27,500	26,000	30,000
Union wage scales: unions reporting annually .....	1,100	1,100	1,100
Union wage scales: unions reporting biennially .....	400	450	400
Union wage scales: unions reporting quarterly .....	290	290	290
General wage rate change statistics units studies (CWD and WDM) .....	5,000	5,100	2,300
Studies of provisions of labor management agreements: establishments reporting .....	8,500	8,700	4,900

#### WORKLOAD STATISTICS (MAJOR ITEMS)—Continued

Work stoppages: employers and unions reporting annually .....	9,600	11,500	11,000
Employment Cost Index: establishments reporting quarterly .....	2,100	2,500	3,000
Personal visit initiation .....	150	400	1,100
Level of benefits: summary plans analyzed and coded .....	20	8,500	8,500

4. *Productivity and technology.*—Analyses are prepared on output per man-hour and unit-labor cost trends for both the entire U.S. economy and for specific industries. Studies are conducted on automation and other technological changes and the adjustments to such changes. Studies are made of labor requirements for selected types of construction. Analyses and international comparisons are made of prices, wages, employment, unemployment, and unit-labor costs. Research is conducted on the effects of international trade on U.S. employment.

5. *Economic growth.*—Long-range projections of U.S. economic growth are prepared. Special economic and social studies are undertaken and special reports prepared for the Commissioner, the Secretary, the Council of Economic Advisers, and other Government agencies.

6. *Executive direction and staff services.*—Provides leadership in developing plans and policies for the Bureau's economic, statistical, and management programs. Statistical and data processing systems are operated and maintained. Research and report activities are coordinated; publications and news releases are planned and edited; and a central inquiry service is maintained.

7. *Revision of the Consumer Price Index.*—The revision of the Consumer Price Index was completed in 1978.

<sup>1</sup> Includes capital investment as follows: 1978, \$51 thousand; 1979, \$51 thousand; 1980, \$47 thousand.

NOTES

Includes \$3,657 thousand in 1980 for activities previously financed (in thousands of dollars) from:

	1978	1979
Employment Standards Administration, Salaries and expenses.....	1,458	1,519
Employment and Training Administration, Employment and training assistance.....	671	740
Labor Management Services Administration, Salaries and expenses.....	1,347	1,398

Includes \$25 thousand in 1979 (beginning December 31, 1978) and \$36 thousand in 1980 for activities previously financed (in thousands of dollars) from:

	1978	Oct 1- Dec. 30, 1978
Salaries and expenses, Internal Revenue Service, Department of the Treasury.....	\$30	\$5

Includes \$3,423 thousand in 1979 and \$3,721 thousand in 1980 for activities previously financed (in thousands of dollars) from:

	1978
Department of Defense.....	2,590
Department of Energy.....	74
General Services Administration.....	77
Department of Health, Education, and Welfare.....	120
Department of Housing and Urban Development.....	52
Department of the Interior.....	76
Department of Transportation.....	102

Excludes \$413 thousand in 1979 (beginning July 1, 1979) and \$1,651 thousand in 1980 for functions transferred to: Salaries and expenses, Equal Employment Opportunity Commission. Comparable amounts for 1978 (\$1,447 thousand) and for 1979 through June 30, 1979 (\$1,238 thousand) are included above.

1. *Executive direction.*—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

2. *Legal services.*—Includes enforcement of Federal labor statutes and legal services related to the statutes administered by the Department. Provides legal adviso-

ry, legislative and litigation services under the Labor-Management Reporting and Disclosure Act, the Employee Retirement Income Security Act, the Occupational Safety and Health Act, the Federal Mine Safety and Health Amendments Act, Executive Orders 11246 and 11491, and title VI of the Civil Rights Act of 1964.

3. *International labor affairs.*—Integrates all international labor programs and foreign economic policy within the Department; administers the program of adjustment assistance to workers covered under the Trade Act of 1974; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

4. *Administration and management.*—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment; and provides for consistent and constructive internal labor-management relations throughout the Department.

5. *Adjudication.*—Operates an adjudication program for conducting formal hearings and rendering timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices and other labor-related areas. These acts include the Walsh-Healy Public Contract Act, the McNamara-O'Hara Service Contract Act, the Contract Work Hours Standards Act, the Davis-Bacon Act, the Federal Mine Safety and Health Amendments Act, the Farm Labor Contractor Registration Act, the Comprehensive Employment and Training Act, and Executive Orders 11491 and 11246.

6. *Promoting employment of the handicapped.*—The President's Committee on Employment of the Handicapped promotes a climate in America conducive to maximum employment of physically handicapped, mentally retarded, and mentally restored persons. The President's Committee seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for handicapped persons.

7. *Women's bureau.*—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

8. *Inspector general.*—Detects and investigates fraud, program abuse, collusion, and other statutory violations in departmental programs. Investigates organized crime activities connected with departmental programs. Reviews and audits DOL programs and funds for fiscal integrity, regulatory compliance, efficient operations, and program results.

9. *Minimum wage study commission.*—Conducts an independent study of the Fair Labor Standards Act (FLSA) of 1938 and the social, political, and economic ramifications of that act and exemptions from that act.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law, \$70,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to such agency for payments in the foregoing currencies. (*Department of Labor Appropriation Act, 1979.*)

Program and Financing (in thousands of dollars)

This activity utilizes currencies available under title I of the Agricultural Trade Development and Assistance Act of 1954, declared by the Treasury Department to be excess to the normal requirements of the United States.

*Foreign service consultations.*—Overseas regional conferences and consultations with labor attaches and economic officers are designed to provide a useful forum for discussion of regional problems which influence foreign policy; enable the overseas officers to be currently informed concerning U.S. objectives and developments affecting their work; facilitate development of new methods for implementing U.S. objectives in labor and manpower areas; and enable Washington officials to inform the overseas officers concerning reporting needed to enable the Department of Labor to fulfill its responsibilities.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Department of Health, Education, and Welfare:  
"Human Development Services."  
"Work Incentives."

International Communication Agency, "Salaries and expenses."

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (29 U.S.C. 563):

1. *Administrative management services.*—Provides a broad range of administrative services, including space management, procurement, contracting, printing management, supply and property management, mail messenger, motor pool, photographic and visual exhibits, appropriation accounting, cost accounting, property accounting, working capital fund accounting, and payroll and voucher payment services.

2. *Field services.*—Provides centralized services from the Department's 10 regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services.

3. *Data processing services.*—Provides centralized data processing services to all agencies of the Department.

4. *Penalty mail and telecommunications.*—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

*Financing.*—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

*Operating results.*—The fund ended 1978 with a net operating income of \$2.8 million. This was the result of collecting for automatic data processing conversion, the costs of which were delayed until 1979 due to delays in procuring new computer equipment.

**GENERAL PROVISIONS**

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

[SEC. 102. None of the funds appropriated by this title may be used by the Department of Labor to carry out any activities for or on behalf of any individual who is an alien in the United States in violation of the Immigration and Nationality Act or any other law, convention, or treaty of the United States relating to the immigration, exclusion, deportation, or expulsion of aliens.] (*Department of Labor Appropriations Act, 1979.*)

**TITLE IV—GENERAL PROVISIONS**

SEC. 401. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 402. Appropriations contained in this Act available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 403. Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 404. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty,

## TITLE IV—GENERAL PROVISIONS—Continued

administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 405. The Secretary of Labor and the Secretary of Health, Education, and Welfare are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 406. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 407. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses or any grant or contract recipient or agent

acting for such recipient to engage in any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 408. The Secretary of Labor and the Secretary of Health, Education, and Welfare are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I and II, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, Federal Mediation and Conciliation Service".

SEC. 409. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course, which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or his parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section. (*Departments of Labor and Health, Education, and Welfare Appropriations Act, 1979.*)

# DEPARTMENT OF STATE

## ADMINISTRATION OF FOREIGN AFFAIRS

### Federal Funds

#### General and special funds:

#### SALARIES AND EXPENSES\*

\*See Part III for additional information.

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including allowances as authorized by 5 U.S.C. 5921-5925; expenses of binational arbitrations arising under international air transport agreements; expenses necessary to meet the responsibilities and obligations of the United States in Germany (including those arising under the supreme authority assumed by the United States on June 5, 1945, and under contractual arrangements with the Federal Republic of Germany); expenses of the National Commission on Educational, Scientific, and Cultural Cooperation, as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U.S.C. 287o, 287q, 287r); hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; expenses authorized by section 2 of the Act of August 1, 1956 (22 U.S.C. 2669), as amended; refund of fees erroneously charged and paid for passports; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; expenses necessary to provide maximum physical security in Government-owned and leased properties abroad; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, and (3) preparation of special maps, globes, and geographic aids; \$660,945,000: *Provided*, That passenger motor vehicles in possession of the Foreign Service abroad may be replaced in accordance with section 7 of the Act of August 1, 1956 (22 U.S.C. 2674), and the cost, including exchange allowance, of each such replacement shall not exceed \$6,500 in the case of the chief of mission automobile at each diplomatic mission (except that four such vehicles may be purchased at not to exceed \$9,000 each) and such amounts as may be otherwise provided by law for all other such vehicles, except that right-hand drive vehicles may be purchased without regard to any maximum price limitation otherwise established by law: *Provided further*, That in addition, this appropriation shall be available for the purchase (not to exceed thirty-three), replacement, rehabilitation, and modification of passenger motor vehicles for protective purposes without regard to any maximum price limitations otherwise established by law.

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including obligations of the United States abroad pursuant to treaties, international agreements, and binational contracts (including obligations assumed in Germany on or after June, 5, 1945); expenses authorized by section 2 of the Act of August 1, 1956 (22 U.S.C. 2669), as amended; telecommunications; expenses necessary to provide maximum physical security in Government-owned and leased properties and vehicles abroad; acquisition by exchange or purchase of vehicles as authorized by law, except that right-hand drive and security vehicles may be purchased without regard to any price limitation otherwise established by law and except that chief of mission vehicles may be replaced at a cost not to exceed \$6,500; \$717,911,000. (Department of State Appropriation Act, 1979; additional authorizing legislation to be proposed.)

The program described below is financed by this appropriation and by reimbursements from other agencies, which are provided with most of their administrative services overseas by the Department of State, and from non-Federal sources. Mandatory and program increases in 1980 have been offset to a significant extent by reductions in employment during 1979 and 1980 to meet Presidential and legislative requirements.

1. *Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and

General and special funds—Continued

SALARIES AND EXPENSES—Continued

direction of the Department's activities by appropriate staff officers, specialized offices, and functional bureaus of the Department.

2. *Conduct of diplomatic and consular relations with foreign countries.*—This includes representation of the United States and its citizens abroad, political and economic negotiations and reporting, consular operations, and overseas administrative services. Major items of increase are for rising prices and local employee wage rates in other countries, increased passport and consular services, improved communications services, and U.S. export promotion in the Arabian peninsula. During 1979 and 1980, significant offsetting reductions are planned which include the closing of 13 overseas posts and a substantial decrease in the number of foreign national employees.

3. *Conduct of diplomatic relations with international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities.

4. *Domestic public information and liaison.*—This program provides for informing the American public on international policies and also keeping the Department informed on American attitudes on foreign policy.

5. *Central program services.*—These provide personnel and physical security measures, operations of the Foreign Service Institute, and the administration of a global communications system for civilian activities of the Government, including services for other agencies on a reimbursable basis.

6. *Administrative and staff activities.*—These include normal domestic administrative activities. Funds are requested to design an overall financial management system for the Department.

<sup>1</sup> Amounts obligated under this program are appropriated under Acquisition, operation, and maintenance of buildings abroad (special foreign currency program) below.

The Foreign Service buildings program provides consolidated office space for the Foreign Service and other Government agencies abroad and living quarters for American employees. This program also finances real property leases of 10 years or more (shorter term leases are included in Salaries and expenses); procurement of initial furniture and furnishings; and repair, maintenance, and operating costs of these facilities.

The table below shows present and estimated property holdings (including acquisitions under the special foreign currency program) by type and structure and geographic area (in thousands of dollars):

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS

Unsatisfactory Government-owned or leased office space is replaced with structures designed specifically to meet the particular needs of the Foreign Service and other Government civilian operations overseas. Housing is provided for American employees in localities where suitable housing is otherwise unavailable.

Since 1961 a separate appropriation for payments in excess foreign currencies has been enacted annually to supplement the regular appropriation. These currencies are used to acquire or construct real property and to finance operating and maintenance costs to the greatest extent possible. Countries in which the appropriation is expected to be used in 1980 are the Arab Republic of Egypt, Burma, Guinea, India, and Pakistan.

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for increasing shares of the interest on the unfunded liability and disbursements attributable to military service: 80% in 1978, 90% in 1979, and the full 100% in 1980 and each year thereafter.

**ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS**

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Funds appropriated to the President:

- "Peacekeeping operations."
- "Functional development assistance program."
- "International organizations and programs."
- "Military assistance."

Interior: Bureau of Reclamation: "Colorado River Basin salinity control projects."

Transportation: Federal Highway Administration: "Chamizal Memorial Highway."

International Communication Agency: "Salaries and expenses."

U.S. Arms Control and Disarmament Agency: "Arms control and disarmament activities."

90.00 Outlays.....	93,683	113,028	127,927

The fund is maintained through: (a) contributions by participants, consisting of all Foreign Service officers, Foreign Service information officers, Foreign Service reserve officers with unlimited tenure, and all Foreign Service staff officers and employees with unlimited appointments, amounting to 7% of their basic salaries; (b) matching Government contributions; (c) special Government contributions from Payment to the Foreign Service retirement and disability fund; and (d) interest on investments (22 U.S.C. 1062).

It is estimated that approximately 6,370 annuitants will be paid retirement benefits from this fund September 30, 1980, compared with 6,020 paid September 30, 1979, and 5,666 paid September 30, 1978. Gratuities and refunds represent payments to eligible former participants leaving the retirement system.

The status of the fund is as follows (in thousands of dollars):

As a member of the above listed organizations, the United States contributes its assessed share of the budgets of those organizations. The 1980 estimates reflect approved budgets of only a few organizations. Budgets for most organizations have not yet been adopted. For those, the United States proposes to support only increases needed to maintain the prior year's level of operations in most organizations and 2% program growth in a selected few organizations. The United States will encourage the organizations to meet new and expanded needs from reductions in low priority activities.

The decrease in 1980 for the Inter-American Institute of Agricultural Sciences results from the organization's changing in 1979 to a new fiscal year.

INTERNATIONAL CONFERENCES AND CONTINGENCIES

For necessary expenses of participation by the United States, upon approval by the Secretary of State, in international activities which arise from time to time in the conduct of foreign affairs and for which specific appropriations have not been provided pursuant to treaties, conventions, or special Acts of Congress, including personal services without regard to civil service and classification laws; salaries and expenses of personnel and dependents as authorized by the

Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); allowances as authorized by 5 U.S.C. 5921-5925; hire of passenger motor vehicles; contributions for the share of the United States in expenses of international organizations; and expenses authorized by section 2(a) of the Act of August 1, 1956, as amended (22 U.S.C. 2669); \$8,000,000, to remain available until expended, of which not to exceed a total of \$175,000 may be expended for representation allowances as authorized by section 901 of the Act of August 13, 1946, as amended (22 U.S.C. 1131), and for official entertainment.】

*For necessary expenses authorized by section 5 of the Act of August 1, 1956, as amended (22 U.S.C. 2669), contributions for the United States share of general expenses of international organizations, and personal services without regard to civil service and classification laws, \$7,200,000, to remain available until expended, of which not to exceed \$250,000 may be expended for representation and for official entertainment, as authorized by law. (Department of State Appropriation Act, 1979; additional authorizing legislation to be proposed.)*

## INTERNATIONAL COMMISSIONS

## Federal Funds

## General and special funds:

For necessary expenses, not otherwise provided for, to meet obligations of the United States arising under treaties, conventions, or specific Acts of Congress, as follows:

## INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

For expenses necessary to enable the United States to meet its obligations under the treaties of 1889, 1906, 1933, 1944, 1963, and 1970 between the United States and Mexico, and to comply with the other laws applicable to the United States Section, International Boundary and Water Commission, United States and Mexico, including operation and maintenance of the Rio Grande rectification, canalization,

flood control, bank protection, water supply, power, irrigation, boundary demarcation, and sanitation projects; detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); Rio Grande emergency flood protection; expenditures for the purposes set forth in sections 101 through 104 of the Act of September 13, 1950 (22 U.S.C. 277d-1-277d-4); purchase of planographs and lithographs; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows: ]

For necessary expenses for the United States Section of the United States and Mexico International Boundary and Water Commission, and to comply with laws applicable to the United States Section; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows:

## SALARIES AND EXPENSES

For salaries and expenses not otherwise provided for, including examination, preliminary surveys, and investigations, and operation and maintenance of projects or parts thereof, as enumerated above, including gaging stations, \$6,800,000: Provided, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89). ]

For salaries and expenses not otherwise provided for, including examination, preliminary surveys, and investigations, and operation and maintenance of projects, \$7,708,000: Provided, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89). (Treaties of February 2, 1848; December 30, 1853; May 21, 1906; February 1, 1933; February 3, 1944, 22 U.S.C. 277-277e; Act of September 13, 1950, as amended, 22 U.S.C. 277d-1-277d-9; Department of State Appropriation Act, 1979; additional authorizing legislation to be proposed.)

1. *Administration.*—Activities comprise negotiations and supervision of joint projects with Mexico to solve international problems, overall control of the operation of the U.S. section of the Commission, formulation of operating policies and procedures, and financial management to carry out international obligations of the United States, pursuant to treaty and congressional authorization.

2. *Engineering.*—This provides for: (a) supervision of measurement and determination of the national ownership of boundary waters, (b) technical engineering guidance and supervision of the planning, construction, and operation and maintenance of international projects, (c) studies relating to international problems of a continuing nature, and (d) preliminary surveys and investigations to determine the need for and feasibility of projects for the solution of international problems arising along the boundary.

3. *Operation and maintenance.*—This appropriation also finances the U.S. part of the operation and maintenance of river channel and levee projects, dams, gaging stations, water quality control projects, and boundary monuments and markers.

1. *Lower Rio Grande flood control improvement program.*—Work will be completed in 1979 on repairs and improvements of flood control work which protect the cities of Brownsville, Harlingen, Mercedes, Hidalgo, and Weslaco, Tex.

2. *Tijuana River flood control project.*—Construction of U.S. improvements required for flood control in the Tijuana River Valley in California and Baja California will be completed in 1979.

3. *1970 boundary treaty projects.*—Work will continue to provide for boundary preservation works, and for protection of the boundary against encroachments.

4. *Rio Grande canalization project.*—Modification of this existing project will be completed in 1979 in order to safeguard from floods the urban development that has taken place since construction of the project in 1943.

5. *Amistad Dam powerplant.*—Power facilities are to be built on the U.S. side of the dam, on a self-liquidating basis as required by the act. The recently completed contract for the sale of power from Amistad and the existing Falcon powerplant will retire the U.S. investment allocated to power plus interest over a 50-year period and will cover the annual costs of operation and maintenance and equipment replacement.

6. *Nogales international waste-water treatment plant.*—Improvements to the existing facility are required to meet current EPA standards. The project improvements are to be initiated in 1980 and are scheduled to be completed in 1981.

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For expenses necessary to enable the President to perform the obligations of the United States pursuant to treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448), and February 24, 1925 (44 Stat. 2102); and the treaty between the United States and Canada, signed February 27, 1950; including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; \$2,500,000, to be disbursed under the direction of the Secretary of State and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of the Commissioners on the part of the United States who shall serve at the pleasure of the President; salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; not to exceed \$2,000 for representation expenses, in accordance with such regulations as the President may prescribe, and official entertainment; and special and technical investigations in connection with matters falling within the Commission's jurisdiction: *Provided*, That transfers of funds may be made to other agencies of the Government for the performance of work for which this appropriation is made.

International Boundary Commission, United States and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty at not to exceed the authorized prevailing daily rate; hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear.

For necessary expenses, not otherwise provided for, \$3,261,000: for the International Joint Commission, including salaries and expenses of the Commissioners on the part of the United States who shall serve at the pleasure of the President; salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses; not to exceed \$4,000 for representation and official entertainment; and the International Boundary Commission, for necessary expenses, not otherwise provided for, including the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and existing treaties between the United States and Great Britain and Canada. (Department of State Appropriation Act 1979; additional authorizing legislation to be proposed.)

These funds are used for payment of the U.S. share of the expenses of:

1. *International Boundary Commission.*—The Commission keeps the United States-Canadian boundary line marked in accordance with existing treaties. It also maintains boundary vistas by periodic tree cutting and chemical vegetation control.

2. *International Joint Commission.*—The Commission, at the request of the Governments of the United States and Canada, investigates and reports on recommendations relevant to boundary waters and other matters of mutual concern to both countries along the border. A major portion of its current activities is related to transboundary water pollution investigations, surveillance, and research in the Great Lakes Basin, as provided in the United States-Canada Great Lakes Water Quality Agreement dated April 15, 1972. In cooperation with the U.S. Geological Survey, the Commission gathers streamflow data and acts to insure appropriate apportionment of international waters, and, with the U.S. Army Corps of Engineers, regulates the operation of a number of river flow control facilities located in boundary waters.

These funds are used for payment of the U.S. share of the expenses of nine international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Salmon Commissions regulate their respective fisheries, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control, and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments.

90.00	Outlays.....	3,311	6,689

This appropriation provided for the U.S. Government's contribution for expenses associated with the Eighth Pan American Games to be held in San Juan, P.R., in 1979. The funds have been made available by the Secretary of State to the Recreational Development Company of Puerto Rico (a government corporation of the Commonwealth of Puerto Rico).

Property owned by the United States in the northwest section of the District of Columbia bounded by Connecticut Avenue, Van Ness Street, Reno Road, and Tilden Street will be leased to foreign governments for use as embassies (82 Stat. 958). A special appropriation in 1974 is allocated to the General Services Administration as required to cover the first stage of site preparation. The remainder of the site preparation will be financed from proceeds.

These funds will pay the U.S. share of expenses associated with funding selected science and technology projects through a joint fund with Yugoslavia. Projects selected by the managing United States-Yugoslavia Joint Board are usually in the areas of agriculture, energy, ecology, technology, health, and transportation.

**GENERAL PROVISIONS—DEPARTMENT OF STATE**

SEC. 102. Appropriations under this title [for "Salaries and expenses", "International conferences and contingencies", and "Missions to international organizations" are available for reimbursement to the General Services Administration for security guard services for protection of confidential files] are available for security services.

SEC. 103. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the princi-

## GENERAL PROVISIONS—DEPARTMENT OF STATE—Continued

ple or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

*Sec. 104. Funds appropriated under this title shall be available for expenses of binational arbitrations arising under treaties or other international agreements, including international air transport agreements, and arbitrations arising under contracts authorized by law for the performance of services or acquisition of property abroad.*

*Sec. 105. Funds appropriated under this title shall be available, except as otherwise provided, for salaries and expenses of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); allowances as authorized by 5 U.S.C. 5921-5925; services as authorized by 5 U.S.C. 3109; expenses as authorized by section 2 (a), (c) and (e) of the Act of August 1, 1956, as amended (22 U.S.C. 2669); and hire of passenger or freight transportation. (Department of State Appropriation Act, 1979.)*

### TITLE VI—GENERAL PROVISIONS

**SEC. 601.** No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

**SEC. 602.** No part of any appropriation contained in this Act shall be used to administer any program which is funded in whole or in part from foreign currencies or credits for which a specific dollar appropriation therefor has not been made.

**SEC. 603.** No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

**[SEC. 604.** None of the funds appropriated or otherwise made available in this Act shall be obligated or expended to make a commitment to provide any reparations, aid, or credits to Vietnam, Cambodia, or Laos.]

**[SEC. 605.** It is the sense of the Congress that—

(1) the Government of the United States should give special consideration to the plight of refugees from Democratic Kampuchea (Cambodia) in view of the magnitude and severity of the violations of human rights committed by the Government of Democratic Kampuchea (Cambodia); and

(2) the Attorney General should exercise his authority under section 212(d)(5) of the Immigration and Nationality Act to parole into the United States—

(A) for the fiscal year 1979, 7,500 aliens who are nationals or citizens of Democratic Kampuchea (Cambodia) and who are applying for admission to the United States; and

(B) for the fiscal year 1980, 7,500 such aliens.]

**SEC. [606] 604.** None of the funds appropriated or otherwise made available by this Act shall be available for the Advisory Committee on the Bureau of the Census or for any other advisory committee to the Department of Commerce which would perform similar duties and responsibilities, other than a committee which has, before July 1, 1978, filed a charter in accordance with section 9 of the Federal Advisory Committee Act. (*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1979.*)

# DEPARTMENT OF TRANSPORTATION

## OFFICE OF THE SECRETARY

### Federal Funds

#### General and special funds:

#### SALARIES AND EXPENSES

For necessary expenses of the Office of the Secretary of Transportation, including not to exceed \$27,000 for allocation within the Department for official reception and representation expenses as the Secretary may determine, **[\$33,050,000]** \$35,540,000. (Department of Transportation and Related Agencies Appropriation Act, 1979.)

90.00	Outlays.....	14,460	16,000	14,000

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

1. *Transportation policy and planning.*—This research provides the foundation for development of transportation policy, for coordination of national level transportation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

*Special programs.*—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, technology sharing, and evaluation of departmental programs.

<sup>1</sup> Note.—Reflects transfer of \$9,000 thousand for expenses necessary to purchase replacement equipment for the Transportation Computer Center from unobligated balances available in the appropriation, Transportation planning, research, and development.

The Working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed in advance by the operating administrations and offices being served.

The activities of the Working capital fund have been consolidated as follows:

*Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

*Support services activities* include travel services and imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; and facilities management.

*Library services* include information retrieval services.

*Transportation computer activities* include computer time-sharing services and the transportation computer center.

Outlays from military pay raise supplemental.....		20,836	

Note.—Excludes \$227 thousand in 1979 and \$259 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$209 thousand) is included above.

Funds for operating expenses represent 63% of the total Coast Guard request. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas.

1. *Search and rescue.*—Most Coast Guard operating facilities have the capacity for promoting safety on or over the high seas and on waters subject to the jurisdiction of the United States. The Coast Guard performs acts necessary to rescue and aid persons and save property placed in jeopardy due to marine and aircraft accidents, floods, and ice conditions.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Responses to search and rescue cases serviced by Coast Guard regular forces or Coast Guard directed forces (auxiliary).....	85,283	89,704	94,126
Lives saved.....	3,957	4,222	4,487
Deaths prevented.....	5,895	6,281	6,629
Property loss prevented (in thousands).....	\$329,914	\$269,917	\$399,000

2. *Aids to navigation.*—A network of manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. Administrative control is exercised over the construction, maintenance, and operation of bridges across the navigable waters of the United States to insure that the safe passage of navigation is not unreasonably interfered with. Included in aids to navigation are the Coast Guard's domestic ice operations which are performed by specially constructed icebreakers and cutters.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Loran-A coverage (thousands of square miles).....	3,400	2,736	1,152
Loran-C coverage (thousands of square miles).....	18,300	20,400	20,400
Federal floating aids.....	25,244	25,500	25,800
Federal fixed aids.....	22,276	22,500	22,700
Private aids authorized.....	35,000	37,000	37,000
Bridge permits and regulations issued.....	287	290	300
Domestic icebreaking:			
Operating hours.....	11,678	10,500	10,500
Vessels assisted.....	1,630	1,500	1,500
Mission miles.....	39,400	25,000	25,000

3. *Marine safety.*—The Coast Guard insures compliance with Federal statutes and regulations pertaining to the merchant marine industry by reviewing plans and specifications for the construction or alteration of merchant vessels; by periodic inspections; by licensing;

and by setting standards, procedures, and practices under which merchant marine personnel are licensed and regulated. The Coast Guard minimizes the risk of fatalities, injuries, and property damage associated with the operation of recreational boats through a boat safety standards program, boater information, education and compliance programs, support of the Coast Guard Auxiliary, and increasing technical support of the individual State boating safety programs. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways against harm, and thereby improve their economic utilization and assure their availability in time of national emergency.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Commercial vessel safety:			
U.S. commercial vessels undergoing construction, average monthly totals.....	675	725	775
Seamen's documents.....	51,100	52,000	52,500
Marine incidents reported.....	14,800	14,600	14,800
Seamen's records maintained.....	167,000	162,000	162,000
Admeasurement applications.....	10,300	10,500	10,700
Vessel documentation applications.....	188,000	190,000	192,000
U.S. commercial vessels inspected.....	10,690	11,000	11,400
Foreign flag vessels subject to SOLAS and U.S. safety requirements examined.....	4,540	4,500	4,500
Fixed offshore structures inspected.....	2,200	2,300	2,400
Boating safety:			
Factory visits/inspections.....	2,450	2,600	2,600
Defect campaigns.....	145	140	150
Potential units affected.....	390,000	420,000	460,000
Classroom instruction (student lessons in millions).....	1.37	1.42	1.45
Courtesy motorboat examinations (auxiliary).....	352,000	359,000	360,000
Assists (auxiliary).....	19,200	19,900	20,000
Boat boardings.....	30,000	33,000	35,000
Port safety:			
Cargo vessels/barges.....	62,725	63,000	63,500
Waterfront facilities inspected.....	61,275	63,000	65,000
Explosive loadings and other dangerous cargo inspections.....	2,550	2,700	2,800
Harbor patrols (operating hours).....	118,000	120,000	120,000

4. *Marine environmental protection.*—Under various laws, international agreements, and conventions, the Coast Guard is charged with the prevention of damage to the marine environment and the enhancement of environmental quality.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Environmental protection:			
Aerial oil pollution patrols (flight hours).....	6,000	6,100	6,200
Oil and hazardous substances spills.....	15,000	15,500	16,000
Number of pollution investigations.....	7,000	7,500	8,000
District hearings.....	1,000	1,200	1,500
Number of civil penalties.....	3,000	3,200	3,500
Cargo transfer operations monitored.....	19,300	19,300	20,000
Oil pollution removal operations.....	6,000	7,000	8,000
Ocean dumping surveillance missions.....	1,000	1,000	750

5. *Enforcement of laws and treaties.*—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Maritime law enforcement:			
Foreign fishing vessel sightings.....	3,838	3,800	3,800
Boardings (foreign and domestic).....	7,630	10,815	10,900
Cutter operating hours:			
Fisheries enforcement.....	60,000	60,000	60,000

General and special funds—Continued

OPERATING EXPENSES—Continued

WORKLOAD DATA—Continued

General law enforcement.....	65,000	80,000	80,000
Aircraft flight hours:			
Fisheries enforcement.....	5,500	6,300	6,300
General law enforcement.....	4,200	5,000	5,000
Seizures—vessels.....	130	200	250

6. *Marine science and polar operations.*—Marine science activities, which include the International Ice Patrol, are carried out on a cooperative basis with other Government agencies. Polar ice operations are performed by specially constructed icebreakers or ice/strengthened cutters which operate in support of Coast Guard programs, the requirements of other agencies, and in the facilitation of commerce.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Marine science activities:			
Oceanographic observations.....	1,400	1,000	800
Ship operating hours:			
High endurance cutters.....	1,500	1,200	1,000
Polar icebreakers.....	2,330	3,000	3,000
Aircraft hours (airborne radiation thermometer) ..	840	840	600
National Oceanic and Atmospheric Administration Data Buoy Office support:			
Environmental buoys serviced.....	29	32	39
Cutter operating days.....	210	302	461
Polar ice operations: Deliveries by escorted cargo ships:			
Tons of cargo.....	173,334	170,000	170,000
Barrels of fuel (in thousands).....	813	750	750
International Ice Patrol:			
Aircraft hours.....	463	500	500
Ship operating hours.....	1,124	1,800	1,800

7. *Military readiness.*—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

WORKLOAD DATA

	1978 actual	1979 estimate	1980 estimate
Units trained by Coast Guard training teams.....	200	200	200
Vessels participating in refresher training or shake-down training.....	48	48	48
Ship weeks.....	144	144	144
Independent gunnery exercises.....	600	600	600
Other independent exercises.....	20,000	20,000	20,000
Small arms courses fired.....	25,000	33,000	45,000

*Capehart family housing indebtedness.*—The following schedule shows the status of the indebtedness assumed from the Department of Defense for transfer of family housing units for assignment as public quarters.

STATUS OF INDEBTEDNESS

Note.—Capital investment: 1978, \$83,460 thousand; 1979, \$110,128 thousand; and 1980, \$132,998 thousand.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating expenses appropriation where estimated costs of a project are \$75 thou-

sand or less, or where renewals and replacements involve less than 75% of the original facility. Most of these facilities are multimission in nature and are included below under their primary mission area.

1. *Search and rescue.*—In 1980, fifteen 41-foot search and rescue boats, and twenty 30-foot surf rescue boats will be constructed along with continued improvement and modernization of other selected boats and vessels. Three additional medium-range surveillance (MRS) aircraft, a MRS flight training simulator, and 17 short-range recovery helicopters will be procured. Construction, replacement, and/or renovation programs at selected shore sites and facilities are also provided for.

2. *Aids to navigation.*—Renovation and habitability improvements will be made to one aged buoy tender. In addition, improvements to existing and the establishment of new waterways aids to navigation, the continuation of the lighthouse automation and modernization program, the loran-C improvement plan, and phase I implementation of the St. Mary's River loran-C minichain are highlighted under this activity.

3. *Marine safety.*—Efforts to facilitate the marine safety mission will center on the acquisition, rehabilitation, renovation and improvement to selected vessels and shore facilities, including the acquisition of additional closed circuit television coverage of the Houston/Galveston Ship Channel and installation of a radar microwave link for the New Orleans vessel traffic service.

4. *Marine environmental protection.*—For 1980 this activity is primarily concerned with the procurement of oil pollution recovery systems with the capability to perform in open water areas, the procurement of high capacity hazardous substance containers, and the installation of pollution abatement equipment aboard selected Coast Guard vessels.

5. *Enforcement of laws and treaties.*—Emphasis in this activity centers on the continuation of the medium-endurance cutter replacement program and renovations and improvements to selected Coast Guard support centers.

6. *Marine science and polar ice operations.*—The medium-range surveillance aircraft and short-range recovery helicopter procurement programs are the principal efforts of this activity for 1980.

7. *Military readiness.*—Major emphasis in this activity relates to the medium-endurance cutter replacement program.

The Coast Guard Reserve Forces program's objective is to provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested will provide a Ready Reserve of 20,000, including a Selected Reserve of 11,700.

1. *Initial training.*—This activity encompasses direct costs of initial training for two categories of nonprior service trainees. The first category involves those who perform approximately 30 weeks initial training comprised of recruit and entry level rate training. The second category involves reservists whose initial training is split between two consecutive summer periods. The first period, 2½ months, consists of recruit training. The second period, 2½ to 4 months, consists of entry level rate training and/or on-the-job training

with the length of the period varying with the speciality.

2. *Continuing training.*—Direct costs of officer and enlisted drills and annual active duty for training are programed under this activity.

3. *Operation and maintenance of training facilities.*—All costs for the operation and maintenance of Reserve training facilities are programed under this activity. Included are the costs of a training vessel, the prorated share of the cost of joint usage of Coast Guard and other Armed Forces facilities, the cost of providing station-keeper personnel for organized Reserve training units, and the procurement of training aids and facilities (under \$75 thousand).

4. *Administration.*—This activity encompasses all administrative costs of the Reserve Forces program.

5. *Miscellaneous services for other accounts.*—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

DAYS OF TRAINING

	1978 actual	1979 estimate	1980 estimate
Initial training: Initial active duty for training .....	146,157	150,000	150,000

90.00 Outlays.....	20,304	17,000	20,000

1. *Search and rescue.*—Emphasis will be placed on improving the search and rescue system effectiveness of Coast Guard forces. Ship/helicopter interface projects will be continued and/or completed for new and existing facilities; improved probability of detection methodology projects will be continued. New projects will include evaluation of rescue techniques and procedures, and group command, control, and communications projects.

2. *Aids to navigation.*—Activities are designed to reduce the potential for damage to the environment and economic loss by an improved aid to navigation system for the maritime community. Continuing projects include applied research to develop loran-C for use in precision navigation in restricted waters; improve signal stability and investigation of signal augmentation techniques for application requiring very high accuracy; optimize accuracy and stability of wide-area loran-C system; and assess the effect of new technology of the global positioning navigation system on the maritime community. Continued emphasis will be given to the development of the quantitative relationship between visual aids to navigation and the accuracy of navigation; advanced development techniques to improve the accuracy and reliability of buoy positions; and development of a clogged channel clearing device for slush ice accumulation.

3. *Marine safety.*—Commercial vessel safety research will be conducted to provide a knowledge base to support regulations and standards designed to prevent vessel casualties and to permit analysis of consequences of presently unpreventable accidents. Emphasis will be directed toward bulk hazardous cargo and cryogenic vessels and to human factors as they relate to the operation of their vessels, transfer operations in U.S. ports, and the offshore industry operations. Recreational boating safety will emphasize background research for boating safety education, improved program impact measurement, safe loading standards, and personal flotation devices performance evaluation. Port safety and security research will define vessel traffic management techniques to provide reliable and earlier conflict alerts to assess impact of conflict resolution, to reduce congestion and to route vessels of interest.

4. *Marine environmental protection.*—Emphasis is directed toward enhancing detection, identification, and quantification of pollutant spills, and development of new systems and procedures for the control and cleanup of those spills. A prototype airborne surveillance system for oil and hazardous substance identification and mapping of discharges should be completed. Marine sanitation device regulations support will be continued.

5. *Enforcement of laws and treaties.*—This activity will focus on the evaluation of processed radar retransmission devices compatible with Coast Guard radars for use aboard licensed fishing vessels and satellite relayed transmissions, from fishing vessels to a ground station ashore.

6. *Marine science and polar ice operations.*—The focus of this activity centers on ice-breaking and ice-clearing technology, improved effectiveness of the International

Ice Patrol and the gathering of ice and current information to facilitate ship movement in the arctic areas.

7. *Military readiness.*—Activity in this program area will be a direct result of work in the broad programs, energy research and development, and research, development, test, and evaluation administration areas.

This appropriation provides financial assistance for the development and implementation of comprehensive State boating safety programs. As a result of the success of this program in stimulating State boating safety functions, funding for this activity will be terminated at the end of 1979. Additional resources were added to operations in 1979 to expand liaison with the States to support their continuing recreational boating safety activities.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owner or operator of a vessel, of an onshore facility or of an offshore facility does not accomplish immediate cleanup with his own

General and special funds—Continued

POLLUTION FUND—Continued

resources. Expenditures from the fund are later reimbursed by the responsible owner or operator.

OFFSHORE OIL POLLUTION COMPENSATION FUND\*

\*See "Legislative Program" (end of this chapter) and Part III of this Appendix for additional information.

For necessary expenses to carry out the provisions of Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (P.L. 95-372), such sums as may be necessary to be derived from the Offshore Oil Pollution Compensation Fund, to remain available until expended. In addition, the Secretary of Transportation is authorized to issue to the Secretary of the Treasury, to meet the obligations of the Fund, notes or other obligations pursuant to section 302 of the Amendments in such amounts and at such times as may be necessary. (43 U.S.C. 1811, et seq.)

The Coast Guard supply fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing; commissary provisions; general stores; technical material; and fuel for vessels over 180 feet in length. The fund is financed by reimbursements from sale of goods.

Activity of approximately \$71 million in this fund in 1980 is divided 6% for uniform clothing; 40% for commissary provisions; 15% for general stores and technical material; and 39% for fuel.

The Coast Guard cadet fund is utilized by the Superintendent of the Coast Guard Academy to receive, plan, control, and expend personal funds of Coast Guard cadets. By use of the fund each cadet is assured funds to meet personal expenses while at the Academy and an adequate balance in his account at graduation for officer outfits, civilian clothing, and graduation leave

expenses. The fund also receives and expends funds of the Coast Guard Academy Athletic Association.

The Coast Guard surcharge collections, sales of commissary stores fund is used to finance expenses incurred in connection with the operation of the Coast Guard commissary stores at Coast Guard Base, Governors Island, N.Y.; Coast Guard Training Center, Petaluma, Calif.; and Coast Guard Base, Kodiak, Alaska. Revenue is derived from a surcharge placed on sales to authorized store patrons (14 U.S.C. 487).

Note.—Excludes \$705 thousand in 1979 and \$804 thousand in 1980 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor. A comparable amount for 1978 (\$648 thousand) is included above. In addition, excludes \$111 thousand in 1979 and \$120 thousand in 1980 for activities transferred to Salaries and expenses, Departmental Management, Department of Labor. A comparable amount for 1978 (\$102 thousand) is included above.

1. **Operations—(a) Operation of traffic control system.**— This activity covers the operation of a national system of air traffic management in the United States and its possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 25 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Control towers are operated at 427 major civil airports to guide traffic movements on and in the vicinity of the airports. Some 323 domestic and international flight service stations provide weather and other information to pilots and relay traffic control data between ground controllers and pilots.

**TRENDS IN VOLUME OF AIR TRAFFIC**

Year:	Landings and takeoffs at airports with FAA towers (in millions)	Instrument operations at airports with FAA traffic control service (in millions)	Revenue passenger miles (in billions)
1973.....	53.9	22.5	157.9
1974.....	56.8	24.1	165.0

1980 estimate.....	79.9	35.7	223.3

(b) **Installation and materiel services.**—This activity covers procurement, contracting and materiel management programs; leased communications services for the traffic control system, and administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; lease costs for space for which payment is made

General and special funds—Continued

OPERATIONS—Continued

to General Services Administration (GSA), and other logistics support functions such as administrative services, interfunctional and plant maintenance. The increase in 1980 will provide for increased costs primarily related to supply support, space rental, leased communications and other services for both existing facilities and new facilities authorized under prior year establishment programs; these costs are partially offset by reduced staffing requirements.

(c) *Maintenance of traffic control system.*—This activity covers the direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; and the technical operation and maintenance of a national network of air navigation aids and traffic control facilities in the United States and its possessions. The increase in 1980 primarily provides for increased costs related to the operation and maintenance of both existing and new facilities, partially offset by a reduction in staffing requirements.

(d) *Administration of flight standards program.*—This activity exists to promote safety of flight of civil aircraft in the air commerce by assuring the airworthiness of aircraft; the competence of airmen; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards; and the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program.

(e) *Administration of medical programs.*—This activity covers the development of regulations governing the physical and mental fitness of airmen and other persons whose health affects safety in flight; the application of these medical standards through the physical examination of applicants for new or periodic renewal of airmen medical certification; the management of a corps of over 7,800 designated aviation medical examiners trained in the special requirements of aviation medicine; the medical investigation of fatal general aviation aircraft accidents; the development and supervision of an occupational health program for agency personnel; the administration of an airman medical education program and the administration of an aviation medical research program, the costs of which are financed under the Research, engineering and development and Facilities, engineering and development appropriations.

(f) *Development direction.*—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development and Facilities, engineering and development appropriations.

(g) *Administration of airports program.*—This activity includes the following work programs: (1) administration of a grants-in-aid program for airport planning and development; (2) maintenance of a national airport system plan; (3) development and application of airport engineering and safety standards; (4) collection, process-

ing, and dissemination of airport data; and (5) safety certification of airports serving Civil Aeronautics Board certificated air carriers.

1. *Engineering and development*—(a) *Aircraft safety*.—This subactivity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft by assuring the design, flight performance, and airworthiness of aircraft and development of systems and devices to prevent and deter sabotage in the civil air transportation system.

(b) *Aviation medicine*.—This subactivity provides for conducting an aeromedical research and development program to identify and eliminate those physical, physiological, and psychological factors which may jeopardize flight safety.

(c) *Environment*.—Principal efforts provided for under this subactivity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system.

2. *Facilities and equipment*.—This activity provides for the purchase of training equipment used primarily by flight inspectors in keeping abreast of the latest technology in the areas of their responsibility and for the purpose of maintaining proficiency in the performance of their duties. Also included are procurement and modification of nonflight inspection aircraft and improvement and replacement of navigation equipment.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Dulles International Airports which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

Combined revenues are expected to exceed the 1980 appropriation by \$11.9 million. The operating profit at Washington National in 1980 is expected to be \$10,127 thousand and \$2,462 thousand at Dulles International for a total operating profit of \$12,589 thousand. However, the deduction of \$8,212 thousand in depreciation and interest for the two airports results in a net profit of \$4,477 thousand.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on

the Government's investment during the useful life of the airports.

The following table reflects increase in activity at the airports:

The projects in the construction program for Washington National and Dulles International Airports for 1980 are designed to accomplish the following three objectives:

*Airport planning and development.*—At Dulles International Airport, funds are included for an airport/environs compatibility study, construction of an additional general aviation apron, and construction of section 5 of the access highway, phase I.

*Upgrade airport facilities and correct deficiencies.*—Due to the impact of growth in the air industry and changes in technology, existing facilities require expansion or replacement to correct deficiencies in load capacity or to upgrade performance through modernization. At National, funds are programed to rehabilitate the terminal air-conditioning, and replace boilers 3 and 4 in the steam production plant. At Dulles, funds are requested to build new structures for storage of salt and sand.

*Rehabilitate existing facilities.*—Existing facilities require periodic rehabilitation due to deterioration from age and usage. At National, funds are programed to design the rehabilitation of the apron taxiway, paint the main terminal, and replace an 8-inch water line. At Dulles, funds are included to rehabilitate the sewer system, repair sections of the access highway, and reconstruct airfield pavement shoulders.

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

In addition to the premium program, binders are also issued to cover aircraft, persons, and property. These binders would provide aviation insurance in wartime and under certain situations short of war. Also available are policies which provide similar coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exists indemnity agreements whereunder the DOD and DOS agree to reimburse the Department of Transportation for all losses paid to air carriers sustaining damage to their aircraft by an insured peril while said aircraft is operating under a contract to the interested Department.

Administration costs are out of fee receipts (49 U.S.C. 1531, as amended 75 Stat. 210) and interests earned through authorized investments. The authorized staff consists of one aviation insurance program officer and one secretary stenographer.

The Airport and Airway Revenue Act of 1970 (49 U.S.C. 1742(a)) as amended provides for the revenues received in the Treasury from passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid airports and airways.

The status of the fund is as follows (in thousands of dollars):

Unexpended balance brought forward:	1978 actual	1979 estimate	1980 estimate

The Airport and Airway Development Act of 1970 (Public Law 91-258, as amended) authorizes the Secretary of Transportation to incur obligations for airport planning and development grants for 1976 through 1980. The Department of Transportation, through the Federal Aviation Administration, will continue to provide financial assistance to airport sponsors for developing civil airports and bringing existing airports up to standards compatible with the present and future needs of civil aviation. This submission reflects an obligation level of \$560 million, which is \$65 million below the authorized level. All entitlement airport grants will be accommodated within the funding amounts provided in 1980.

The administration will propose legislation calling for a \$4 billion airport grants program for the time period 1981-85.

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)\*

\*See Part III for additional information.

[(INCLUDING TRANSFER OF FUNDS)]

For necessary expenses, not otherwise provided for; for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities, including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; construction and furnishing of quarters and related accommodations for officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available; to be derived from the Airport and Airway Trust Fund, [ "\$336,660,000, of which \$54,363,000 shall be derived by transfer from the appropriation "Facilities and Equipment (Airport and Airway Trust Fund), 1976" ] \$250,000,000, to remain available until September 30, [1981] 1984: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities: *Provided further*, That no part of the foregoing appropriation shall be available for the construction of a new wind tunnel, or to purchase any land for or in connection with the National Aviation Facilities Experimental Center, or to decommission in excess of five flight service stations. (49 U.S.C. 1151-60, 1301 et seq., 1507, 1701; Department of Transportation and Related Agencies Appropriation Act, 1979.)

Under this appropriation, the Federal airway system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs such as aircraft for facility flight inspection and training, and experimental facilities for the engineering and development program. The administration will propose legislation calling for a \$2.1 billion facilities/equipment program for the time period 1981-85. The 1980 estimates will carry forward the program to increase the capacity of the airway system and make its operation safer and more efficient, sufficient to accommodate expected price escalation.

Funding in the amount of \$33.8 million is contained in the 1980 request to finance the third year of the four year VOR/VORTAC equipment replacement program. When fully implemented this program will provide annual savings to the Government of 728 employee-years and \$21 million. This request also contains the initial funding increment of a multi-year program to replace terminal vacuum tube radars. Operating costs of facilities procured under this appropriation are financed under the Operations appropriation. The budget activities include the following facilities and functions:

1. *Air route traffic control centers.*—Long range radar provides FAA air traffic controllers with information on aircraft positions, at distances up to 185 miles. Automation equipment includes computers and other devices which aid controllers in handling en route air traffic. Other center facilities cover the installation of equipment to provide communications and related services.

2. *Airport traffic control towers.*—Terminal area radar aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 60 miles. Terminal area automation includes computers and other devices which aid controllers in handling terminal air traffic. Other tower facilities include the establishment, improvement, and relocation of airport traffic control tower facilities.

3. *Flight service facilities.*—Domestic flight service stations and associated facilities provide flight assistance service to pilots and international flight service stations provide long-distance communications for transoceanic flights.

4. *Air navigation facilities.*—Very high frequency omnidirectional radio ranges equipped with tactical air navigation capabilities (VORTAC) are standard short-range navigation aids used to define airways and air routes and to provide distance and direction information to pilots. Low and medium frequency facilities include radio beacons and ranges which provide pilots with direction and weather information. Instrument landing systems which provide pilots with direction, distance, and glide slope information necessary for

making safe approaches to runways under poor visibility conditions, distance measuring equipment, and visual lighting aids assist pilots in making final approaches to airport runways, particularly in areas where terrain and other environmental factors pose potential hazards to safe landings.

5. *Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations.

6. *Aircraft and related equipment.*—This activity provides for facility flight inspection, including procurement, modification, and/or replacement of aircraft and avionics equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air and flight inspection training equipment.

7. *Development, test, and evaluation facilities.*—This activity provides for leasing and improvement of plant and facilities at the National Aviation Facilities Experimental Center in Atlantic City, N.J. It also includes the procurement, rehabilitation, or replacement of equipment for use in the engineering and development program.

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase progressively its productivity and capacity to meet the expected air traffic demands of the future. These efforts are based upon exploiting current technology and applying system engineering techniques to the development and integration of new equipment

into the total system. The agency also administers aviation medical research aimed at increasing the personal effectiveness of traffic controllers.

In 1979 the administration will propose legislation calling for a \$500 million research engineering and development program for the time period 1981-85.

These programs are conducted under the direction of the agency's technical personnel, through contracts with qualified private firms, universities, individuals and other Government agencies.

1. *Air traffic control.*—This provides for improving the airway system by applying existing technology to air traffic control problems to keep the current system operating safely and by making system improvements to increase the productivity and capacity of the current system. These improvements include the surveillance of aircraft by tracking radars and control center processing of flight information received from pilots, airline dispatchers, flight service stations and the surveillance system through a national communications network. The high-speed or real-time, computerized processing of this data for the direct use of air traffic controllers is a key to increasing system productivity. This traffic control program also provides for increasing the capacity of major airports to handle larger, faster passenger aircraft safely and efficiently. Increases in airport capacity will be achieved by the development of new procedures and equipment/computer programs which will enable more efficient metering and spacing of terminal traffic under all weather conditions.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

2. *Navigation.*—This provides for modernization, expansion, and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation. This capability ranks in importance with the radar surveillance of aircraft in the effort to increase system capacity. It requires the exploitation of all available and planned techniques, as well as the development of new navigation techniques and sophisticated landing systems capable of handling increased air traffic in adverse weather conditions.

3. *Aviation weather.*—This provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of systems for the detection and avoidance of wind shears is also included in this activity.

4. *Aviation medicine.*—This provides for conducting aeromedical research directed toward identifying and eliminating those physiological and psychological factors inimical to personnel engaged in operating the traffic control system.
