(b) *Preschool incentive grants*.—Grants are made to those States which support special education and related services for handicapped children aged 3-5. Approximately 238,000 handicapped children will participate in school year 1981-82 with a Federal share of \$105 per child.

(c) *Deaf-blind centers*.—This program has two major components: the establishment of 16 single and multi-State centers and the support of model programs for deaf-blind children. The centers fund and administer more than 250 subcontracts with institutions which provide direct services to almost 6,000 deaf-blind children. Model projects demonstrate best practices for the education of deaf-blind children, including their social integration and deinstitutionalization, and also develop and validate specialized curricula.

2. *Special population programs*—(a) *Severely handicapped projects*.—Contracts are awarded to establish and promote programs and practices, including models of deinstitutionalization, designed to meet the educational and training needs of severely handicapped children and youth. Projects emphasize skill areas such as vocational, domestic living and community integration. In school year 1981-1982, about 3,342 children will par-

ticipate in 39 projects and about 2,400 teachers and aides associated with those projects will receive inservice training.

(b) *Early childhood education*.—Projects are supported to develop, demonstrate, and disseminate a variety of models incorporating educational, therapeutic and social services for preschool handicapped children and their parents. Other funded activities include research, technical assistance to projects, and assistance to States in developing and implementing statewide plans to serve all preschool handicapped children. In total, 168 awards will be made.

3. *Regional vocational, adult, and postsecondary programs*.—Contracts are awarded to develop and operate special regional programs for deaf and other handicapped persons at institutions of higher education, vocational and technical institutions, and other appropriate agencies. In school year 1981-1982, 23 projects will be supported benefiting 4,000 participants.

4. *Innovation and development*.—Grants and contracts are awarded for model programs, research, and development activities. In school year 1981-1982, 175 projects will be supported, including 70 model programs enrolling about 2,100 children and 105 projects designed to develop and test alternatives to problems specific to the education of the handicapped.

5. *Media and resource services*—(a) *Media services and captioned films*.—Specialized educational materials for handicapped persons are produced and distributed. A major emphasis is the development and operation of a system to caption TV programs that will permit as many as possible of the estimated 14 million hearing impaired persons in this country to learn through television programming. In addition, personnel are trained in the use of educational media for instruction of the handicapped, and recorded books for the blind are produced and distributed.

(c) *Recruitment and information*.—This program funds awards offering information about educational services and resources for the handicapped to interested persons and supports the provision of referral services to parents and teachers. In addition, recruitment information to encourage students and professional personnel to enter the career field of special education is disseminated to institutions of higher education and the media.

6. *Special education personnel development*.—Grants are awarded to support training of teachers, administrators, researchers, and other professional and paraprofessional personnel in fields related to the education of the handicapped. An estimated 95,000 people will receive preservice or inservice training, including approximately 4,400 parents.

7. *Special studies*.—Studies are conducted to provide information on the effectiveness of education programs for handicapped children. These studies measure aspects of State and local compliance with the State grant program and are reported annually to Congress as required by law.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, as amended, and the International Health Research Act of 1960, \$963,875,000, of which \$844,775,000 shall be for activities under section 100(b)(1), \$9,484,000 shall be for activities under section 100(b)(3), and \$18,000,000 shall be for activities under section 711 of the Rehabilitation Act of 1973.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4839, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

	1979	Oct. 1- Mar. 31, 1980
Human development services, Office of Human Development Services, Department of Health and Human Services	926,212	535,135

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Rehabilitation services*—(a) *Basic State grants*.—The Basic State grant program provides 80% Federal matching to State vocational rehabilitation agencies to assist physically and mentally handicapped individuals to become gainfully employed. A wide range of services is provided including counseling, vocational evaluation, work adjustment, medical and physical restoration, vocational training, job placement and post employment services.

In 1981, this program will consolidate activities formerly funded under the Basic State grants and Innovation and Expansion programs. Priority will be given to: (1) serving those with the most severe disabilities; (2) accelerating outreach activities for those who have been unserved or underserved in the past, especially multiple handicapped persons, severely handicapped, poor and minorities; (3) serving those who are homebound and institutionalized; and (4) improving the quality of vocational rehabilitation.

Total	1,171,319	1,265,777	1,302,018

¹ Added resources will be made available to States if individuals meet the special selection criteria of the Social Security Administration.

(b) *Innovation and expansion*.—Grants are provided to State vocational rehabilitation agencies for the purpose of improving the vocational rehabilitation delivery system. Funds for this program have been included in the Basic State grant request in 1981.

(c) *Service projects*.—Funds are provided through project grants for specialized programs, services, studies,

and activities. In 1981, service projects will continue to focus on: (1) expanding services to disability groups who have been underserved in the past; (2) developing new and innovative approaches toward meeting the needs of the severely disabled; (3) developing resources at the community level; and (4) providing special training and placement opportunities for the severely disabled.

(d) *Independent living*.—Project grants are provided for comprehensive services to meet the needs of individuals whose disabilities are so severe that they do not have employment potential but who can utilize rehabilitation services to live and function independently. In 1981, independent living service models will be expanded. The number of grant awards in 1981 will be 90, 15 more than in 1980.

(e) *Training*.—Grants are made to States and public or nonprofit agencies and organizations, including institutions of higher education, to pay part of the cost of projects to increase the number of rehabilitation personnel qualified to provide rehabilitation services to severely handicapped individuals, and to improve and maintain the professional skills of employed rehabilitation personnel.

In 1981, priority will continue to be given to training personnel required by State vocational rehabilitation agencies to serve severely handicapped individuals such as the blind, the deaf, the spinal cord injured, and those with end-stage renal disease. Traineeship awards will be utilized to attract handicapped persons and persons from minority groups into rehabilitation professions. This program funds 375 grants.

2. *National Institute of Handicapped Research*.—Research and demonstration project grants, research and training centers, and rehabilitation engineering centers are supported. Emphasis will be placed on developing, producing and applying new knowledge, equipment, devices, and systems suitable for resolving problems encountered in the rehabilitation process by severely disabled individuals.

The Institute promotes a comprehensive and coordinated approach toward rehabilitation research and acts as a focal point for distribution of rehabilitation information and devices.

3. *National Council on the Handicapped*.—The council, consisting of 15 members appointed by the President, is authorized by the Rehabilitation Comprehensive Services and Developmental Disabilities Amendments of 1978. The council provides advice to the National Institute of Handicapped Research and advises the Secretary on the administration of programs for the handicapped. The council also issues an annual report to the Congress about research and administrative concerns with respect to rehabilitation.

OFFICE OF VOCATIONAL AND ADULT EDUCATION

Federal Funds

General and special funds:

VOCATIONAL AND ADULT EDUCATION

For carrying out, to the extent not otherwise provided, the Vocational Education Act of 1963, as amended, the Adult Education Act, the Career Education Incentive Act, and title III, part E and title VIII, sections 309, 810, and 812 of the Elementary and Secondary Education Act, \$925,635,000 of which \$898,880,000 for the Vocational Education Act and the Adult Education Act shall become available for obligation on July 1, 1981, and shall remain available until September 30, 1982, except that \$34,794,150 for part B, subpart 2 of the Vocational Education Act shall become available for obligation on July 1, 1981, and shall remain available until expended and \$2,000,000 for section 309 of the Adult Education Act shall become available for obligation on October 1, 1980, and shall remain available until September 30, 1982: Provided, That \$6,500,000 for State advisory councils under section 105 of the Vocational Education Act shall be used to provide to each State, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Trust Territory of the Pacific Islands, and Northern Mariana Islands an amount equal to the amount it received in the previous fiscal year.

【OCCUPATIONAL, VOCATIONAL, AND ADULT EDUCATION】

【For carrying out, to the extent not otherwise provided, section 523 of the Education Amendments of 1976, the Vocational Education Act of 1963, as amended, and the Adult Education Act, \$881,880,000 of which \$10,000,000 for part B, subpart 2 of the Vocational Education Act shall remain available until expended and \$6,500,000 for State advisory councils under section 105 of the Vocational Education Act of 1963 shall be used, first, to provide a basic amount to each State equal to the amount it received in the previous fiscal year (\$6,073,000), and secondly, to provide that each State, the District of Columbia, Puerto Rico, and the Virgin Islands shall not receive less than \$94,000, and that American Samoa, Guam, Trust Territory of the Pacific Islands, and Northern Mariana Islands shall each receive not less than \$91,135 (\$427,000): Provided, That the amounts appropriated above shall become available for obligation on July 1, 1980, and shall remain available until September 30, 1981, unless otherwise specified herein: Provided further, That not to exceed \$124,817,000 shall be for carrying out part A, subpart 3 of the Vocational Education Act: Provided further, That \$2,500,000 shall be made available for carrying out section 317 of the Adult Education Act, and that \$2,500,000 shall be made available for carrying out section 318 of the Adult Education Act.】

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

	1979	Oct. 1- Mar. 31, 1980
Special projects and training, Office of Education, Department of Health and Human Services.....	\$26,219	\$19,600

This account includes activities previously funded under the Department of Health and Human Services (formerly, Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Vocational education.*—The 1981 budget will reallocate funds, at the 1980 level, to direct Federal resources to areas and activities of high national priority and where effective program improvement and innovation would be strongest. This reallocation comprises a shift of funds from basic grants to program improvement and supportive services, programs of national significance, and bilingual vocational training. Funds appropriated in 1981 will be used in school year 1981-82.

(a) *State grants and innovative programs*—(1) *Basic grants.*—Grants to States may be used to support, at the discretion of each State, any type of vocational education program. Projected enrollment for school year 1981-82 for this program is estimated to be 14.6 million secondary, postsecondary and adult students, representing a continuation of the school year 1980-81 enrollment which was an increase of 1.4 million students over school year 1979-80 enrollment.

(2) *Program improvement and supportive services.*—States are assisted in improving the quality of their vocational education programs. Activities such as curriculum development, teacher training research, innovation, and conducting of programs for overcoming sex bias in vocational education are supported. For the school year 1981-82, these activities will be increased and expanded.

(3) *Programs of national significance.*—Funds are awarded on a competitive basis to promote innovation in vocational education. Programs supported include a national occupational information coordinating committee and 57 State committees, a national center for research in vocational education, fellowship programs, curriculum coordinating centers, and applied projects, models and demonstrations of national importance. A major purpose of this activity is the provision of leadership and direction to States for their program improvement and innovation efforts. During school year 1981-82, the number of projects will increase and include major areas of national importance such as: (1) education and work; (2) urban/rural programs; (3) expanding opportunities for adult learners; and (4) educational equity.

(b) *Special programs for the disadvantaged.*—Funds are allocated to States to support programs for students who are academically or economically disadvantaged and who require special assistance to enable them to succeed in vocational education programs. Projected enrollment for school year 1981-82 is 146,000 students.

(c) *Consumer and homemaking education.*—Funds are allocated to States to support programs in consumer and homemaking educational areas. Projected enrollment for school year 1981-82 is 3,298,000 students.

(d) *State advisory councils.*—Funds are allocated to States for support of State advisory councils which represent at least 20 distinct interests and are involved in

the development and evaluation of State vocational education plans and programs.

(e) *Bilingual vocational training.*—This activity supports bilingual vocational training, vocational instructor training, and the development of bilingual instructional materials, methods, and techniques. Projected number of people trained is 1,555 for the school year 1981-82, an increase of 313 persons over the previous year. The number of projects supported is 32, an increase of 7.

(f) *State planning.*—Funds are allocated to States to support vocational education program planning activities.

2. *Adult education.*—(a) *Grants to States.*—Formula grants are made to States to eliminate functional illiteracy among the Nation's adults 16 years of age and older who lack 12th grade level of education. The request will fund an expansion of activities to serve an estimated 2,253,000 adults in school year 1981-82. This implements the Adult Education Act Amendments of 1978 which expands the adult basic education delivery system to include nontraditional providers such as non-profit organizations and businesses.

(b) *Demonstration, dissemination and related activities.*—Initiation of this activity will fund projects for improvement of adult education programs nationwide. Projects will focus upon two major problems in adult basic education: outreach and retention.

(c) *Indochina refugee program.*—Basic skills instruction is provided to adult Indochina refugees on a temporary/transitional basis. No funds are requested under this authority in 1981.

(d) *Immigrant program.*—Basic skills instruction is provided to adult immigrants on a temporary/transitional basis. No funds are requested under this authority in 1981.

3. *Career education incentives.*—Formula grants are awarded as incentives for State and local educational agencies to carry out comprehensive career education efforts. In addition, model programs and demonstrations, information dissemination and a national evaluation are supported under this program. 1981 will be the third year of activities funded under this program.

4. *Community schools.*—Projects support the use of public schools as centers operated jointly by a local educational agency and a community agency for the coordinated delivery of educational and social services to meet the needs, interests, and concerns of the community. In 1981 model projects will be supported in 15 local educational agencies; increased activities will be supported through 32 State educational agencies; and training or development materials will be supported through grants to 15 institutions of higher education.

5. *Consumers' education.*—Projects support activities in State and local educational agencies, universities and colleges, and public and private nonprofit organizations to prepare people for participation in the marketplace. Funded projects include materials research and development, pilot projects, and technical assistance activities. In 1981, as in 1980, approximately 69 awards will be funded, including the continuation of the design, testing, and implementation of materials to be used for mass media activities.

This account was previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare), that has been transferred pursuant to the Department of Education Organization Act (Public Law 96-88). The legislative reauthorization proposed for the programs in this account is currently before Congress.

1. *Basic opportunity grants.*—Entitlement grants are made to students to enable them to attend college and to expand their options in selecting an institution. Grants, based on financial need, provide the foundation of student assistance upon which all other aid is packaged. Grants are computed on the basis of expected family and student contributions, are limited to one-half the cost of a student's education and currently range from \$200 to \$1,800. The maximum award is increased to \$1,900 in 1981, consistent with new proposed legislation. Over 2.62 million students will receive grants in academic year 1981-82. The average grant is estimated at \$910. Costs for 1981 reflect anticipated savings from management improvements based upon the findings of a comprehensive quality control study funded in 1979.

Under the proposed authorizing legislation, the treatment of Social Security and Veterans Administration benefits has been changed in the calculation of a Basic grant to insure that a student does not receive an overpayment. A new requirement has been proposed for single independent students without dependents who

must now be above the age of 22 to qualify as an independent.

2. *Supplemental opportunity grants.*—This program provides financial aid to supplement the Basic opportunity grant for students who demonstrate financial need. In academic year 1981-82 under proposed legislation, grants will range from \$200 to a maximum of \$2,000. This compares to a maximum grant of \$1,500 in 1980-81. About 623,000 students will receive grants with an average award of \$570 in school year 1981-82.

3. *Work study.*—Part-time employment is provided to financially needy students to finance a portion of their postsecondary education. Federal funds contribute 80% of the student's wages with 20% paid by the employer. To help students persist in attaining a postsecondary education, emphasis is placed on Work study awards which provide services to the handicapped, which provide tutoring to strengthen academic achievement, and which perform outreach services to inform prospective students of available financial assistance for postsecondary education. Some 990,000 students will receive awards in academic year 1981-82. Awards will average \$610, the same level as in 1980-81.

To help them administer student aid programs, over 7,000 institutions will receive \$10 per enrolled Federal student aid recipient from funds from the Supplemental grant and Work study appropriations.

4. *Direct loans.*—Under pending legislation the Direct loan program would be transferred to a new Government Student Loan Association under the Department of Education to be converted into the new Basic loan program. This has been proposed to insure that financially needy students may obtain a loan for postsecondary expenses regardless of the institution at which they are enrolled.

5. *State student incentive grants.*—This program encourages the expansion of State scholarship programs for financially needy students by matching State grants with Federal funds. Under proposed legislation, to increase State contributions to student grants, a new basis for determining Federal matching funds will be phased in. Dollars in excess of the previous year's effort will be matched 100% with Federal funds, but dollars which are not in excess of the previous year's level will be matched 80% in 1981 and decrease by 20% each subsequent year until 1985 when only funds above the previous year's effort will receive matching Federal funds.

In academic year 1981-82, about 307,000 students will receive average awards of \$500.

6. *Administrative support.*—Funds under this activity are proposed for transfer into the salaries and expenses account to centralize the financing of operational and management functions.

Number of students receiving assistance: *	Academic year			
	1978-79	1979-80	1980-81	1981-82

STUDENT LOAN INSURANCE [FUND]—Continued

tion and training at eligible universities, colleges, and vocational schools. The Federal Government pays up to 7% interest subsidy on behalf of students while they are in school, during a maximum 12 month grace period following graduation or withdrawal from school and during authorized periods of deferment.

In addition to the interest subsidy, a special interest allowance calculated at 3½ percent below the 91-day Treasury bill is paid to lenders on outstanding loans to encourage participation in the program. The Federal Government is also liable for costs associated with defaults, death, disability and bankruptcy of insured student borrowers. Noninterest bearing advances also are made to State agencies' reserve funds to encourage States to expand their lending programs and to establish new State guarantee agencies.

The 1981 request includes a proposal to create the Government Student Loan Association in the Department of Education which would administer the Federal student loan programs. The proposal includes restructuring the Guaranteed student loan program into a Supplemental loan program in partnership with State agencies.

In 1979, total costs for claims and interest subsidies amounted to \$999,343 thousand requiring \$982,503 thousand in budget authority. In 1980, costs for interest subsidy and default costs are estimated to be \$1,741,714 thousand. This amount, when offset by the 1980 appropriation of \$959,621 thousand and other available funds, results in a requirement for a supplemental appropriation request of \$661,798 thousand. The estimates for 1981 include \$1,122,646 thousand for the phase-out of the Guaranteed student loan program, which provides for no new loan guarantees to be made in 1981. Data on loan volume are presented below.

DATA ON FEDERALLY INSURED AND GUARANTEED LOANS DISBURSED

	[In millions of dollars]

Legislation is being proposed to create within the Department of Education a Government Student Loan Association to administer the Basic and Supplemental student loan programs in 1981 and to assume the responsibilities of the Student Loan Marketing Association in 1982. This proposal would:

1. Reconstruct the Direct loan program into a Basic loan program which would serve as the final component in a grant-loan package to assist students in covering costs of attending post-secondary institutions. The program would be phased in with 60% of the student loan need met in 1981. Capital would be borrowed from the Treasury, and the students would be subsidized while in school. Loan data are presented below:

	1981 est.
Loan volume (in thousands)	\$900,000
Number of students.....	1,250,000
Average loan	\$720
Collections on old direct loans (in thousands)	\$415,000

2. Convert the Federal and State guaranteed student loan programs into a Supplemental loan program in partnership with the State guarantee agencies by partially subsidizing private capital for loans to students and parents to meet their required contribution to a student's education. Although the students would pay interest on the loans, the Federal Government would subsidize the students by paying a 2½% special allowance to the lenders on the loan principal. To assist the State guarantee agencies in administering the program, the Federal Government would also provide them a 1% administrative allowance on loan principal guaranteed each year. Loan data are presented below:

	1981 estimate
Loan volume guaranteed (in thousands)	\$2,160,000
Number of students.....	1,350,000
Average loan	\$1,600

3. Assign responsibility for the phase-out of subsidy costs on outstanding Guaranteed student loans under the Student Loan Insurance account, to the newly created Government Student Loan Association.

The proposal assumes that all student loan activities, including the phase-out of the Guaranteed student loan program, will be merged into one account during 1981.

The proposal will also include limitations in the appropriations language for \$900,000 thousand in direct loan principal and \$2,160,000 thousand in commitments to guarantee loan principal.

HIGHER AND CONTINUING EDUCATION

For carrying out titles III, VIII, and IX and sections 417, 420, and 745 of the Higher Education Act; the Mutual Educational and Cultural Exchange Act of 1961; title VI of the National Defense Education Act; the National Science Foundation Act of 1950, section 3(a)(1); and title III, Part G of the Elementary and Secondary Education Act, \$390,539,000: Provided, That \$26,000,000 made available for interest subsidy grants under section 745 shall remain available until expended. Payments made under section 420 shall include those made for disabled or incarcerated veterans. (Additional authorizing legislation has been proposed.)

[HIGHER AND CONTINUING EDUCATION]

[For carrying out titles I-A, III, VII-part E, VIII, IX, and XI and sections 417, 418, 420, 745, and 1203 of the Higher Education Act; the Mutual Educational and Cultural Exchange Act of 1961; section 421 of the General Education Provisions Act; title VI of the National Defense Education Act; and title XV, part B of the Education Amendments of 1978, \$399,730,000 including \$10,000,000 for part A of title I of the Higher Education Act: Provided, That notwithstanding the provisions of section 102(b) of Public Law 92-318, the provisions of sections 103(a) and 106 of the Higher Education Act shall apply to funds appropriated under this Act, but section 103(a) shall apply only to the extent that it provides for the allotment to each State, from the sums appropriated for part A of title I of the Higher Education Act that are not reserved pursuant to section 106(a) of that Act, of an amount which bears the same ratio to such sums as the population of such State bears to the population of all the States.]

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980. Amounts for 1980 for activities transferred from the National Science Foundation were provided by the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.

4900	Outstanding, end of year	1,304,920	1,282,980	1,260,528

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) and the National Science Foundation that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88). The legislative reauthorization proposed for the programs in this account is currently before Congress.

1. *Student services*—(a) *Special programs for the disadvantaged*.—Funds support Talent search, Upward bound, Special services, and Educational opportunity centers programs to encourage and assist low-income youths to enter, continue, or resume postsecondary education. Proposed legislation would combine Talent search and Educational opportunity centers programs to eliminate duplication of activities and increase services to participants. Upward bound and Special services projects designed to facilitate graduation of minorities and disadvantaged from college will be continued. An estimated 419,090 students will be aided by these programs which complement the access efforts of the Federal student assistance programs. Funds also provide training to improve institutional project staff effectiveness.

(b) *Veterans' cost of instruction*.—This program provides grants to postsecondary institutions to encourage recruitment of, and special services to, eligible veterans.

Proposed legislation expands the bonus payment category to include incarcerated and disabled veterans. Overall decline of veteran enrollment reduces the program cost in 1981. In 1981, approximately 276,000 full-time equivalent veteran students will be served.

(c) *Educational information centers*.—This program provides matching grants to States to establish, plan, and operate centers to provide educational information, guidance, counseling, and referral for all residents. Since other programs, such as the Special programs for the disadvantaged and the student assistance programs, offer these same services, no funding for this program is requested in 1981.

2. *Program development*—(a) *Strengthening developing institutions*.—This program provides grants to developing institutions to help them further strengthen their academic and administrative programs. Proposed legislation would target funds on institutions with student populations that are disproportionately financially needy. It would also require each participating institution to prepare a comprehensive development plan to be used to monitor progress under a program grant. Approximately 355 institutions will receive grants in academic year 1981-82. A new challenge grant program is proposed for later transmittal.

(b) *Minority institutions science improvement*.—This program is designed to effect long-range improvement in science education at institutions whose enrollments are predominantly (more than 50%) composed of Alaskan Natives, American Indians, Blacks, Mexican Americans, Puerto Ricans, or other disadvantaged ethnic minorities who are underrepresented in science and engineering. Specific objectives include assisting institutions to improve the quality of preparation of their students for graduate work or careers in science, and increasing the number of minority students graduating with majors in one of the sciences, mathematics, or engineering.

(c) *Cooperative education*.—Funds assist institutions in planning, establishing, and expanding programs in which employers pay students for periods of work alternated with study. In addition, demonstration, research, and training are supported to increase the program's effectiveness. Funds will continue to support new demonstration projects to help large urban institutions plan and initiate comprehensive cooperative education programs. A total of 13 of these large demonstration grants averaging \$1 million will be awarded and 110 administration grants will be supported.

(d) *International education and foreign language studies*.—(1) Funds support centers, fellowships, and research programs. These activities are designed to strengthen American postsecondary educational institutions engaged in teaching, research, and dissemination activities in modern foreign languages, area studies, and to promote increased awareness of international issues in professional and graduate education. In 1981, the research program will be continued, and support for fellowships and graduate centers will be expanded. (2) The Fulbright-Hays program provides grants to improve the capability of U.S. education in those foreign languages and studies relating to world areas that have been inadequately covered. Faculty and doctoral research fellowships and group projects support American

General and special funds—Continued

HIGHER AND CONTINUING EDUCATION—Continued

educators and postsecondary students to conduct research abroad and provide them the opportunity for first-hand experiences in foreign cultures. In addition, the expertise of foreign educators is utilized in developing postsecondary curriculum materials for American students. Support for special bilateral projects fostering international academic exchange and mutual understanding will be expanded.

(e) *University community services and continuing education.*—This program provides formula grants to States for community service and continuing education programs of selected colleges. No funds are requested for this program in 1981.

(f) *State postsecondary education commissions.*—This program provides funds which support a State's postsecondary education planning establishment. No funds are requested for this program in 1981.

(g) *Aid to land-grant colleges.*—This permanent appropriation supports instruction in agriculture, the mechanical arts, the English language, and various branches of the sciences in land-grant institutions.

3. *Graduate support—(a) Graduate/professional educational opportunities.*—Funds support fellowships and institutional grants to assure that members of groups, especially minorities and women, who have traditionally been underrepresented in graduate and professional education, have access to such training and subsequently to postsecondary academic and other professional careers in the national interest. In academic year 1981-82, about 854 new fellows will be supported, over 650 more than in 1980-81. In addition, 20 grants to institutions will provide recruitment, retention, counseling, and placement programs for fellowship recipients under this program.

(b) *Public service grants and fellowships.*—Proposed legislation would repeal the authorization for this program. No funds are requested for this activity in 1981.

(c) *Mining fellowships.*—Proposed legislation would repeal the authorization for this program. No funds are requested for this activity in 1981.

4. *Construction—(a) Interest subsidy grants.*—In 1981, funds will meet mandatory costs of prior year construction loan commitments. The fiscal requirements for this program will begin to decrease in 1981 as loans are retired.

(b) *Continuing education centers.*—Funds are not requested in 1981 for this program which provided funds for the final design and architectural plans for three continuing education centers.

(c) *Architectural barriers removal.*—No funds are requested in 1981 for this program which is designed to help institutions of higher education remove architectural barriers to the physically handicapped.

5. *Special endowments.*—The appropriations for the Wayne Morse Chair of Law and Politics, the Hubert Humphrey Institute, the Everett Dirksen Center, and the Commission for the National Academy of Peace and Conflict Resolution fulfilled all statutory funding requirements.

6. *Law and Education—(a) Legal training for the disadvantaged.*—This program serves those persons who

desire to become lawyers, but are economically disadvantaged and are unable to gain admission to law school under prevailing admissions criteria. In 1981-82, 7 regional summer institutes will provide intensive prelaw training to prepare these students for admittance to law school. In addition, funds will support academic year stipends for 210 new, first-year students and 340 continuing students.

(b) *Law school clinical experience.*—Proposed legislation would repeal the authorization for this program. No funds are requested for this activity in 1981.

(c) *Law enforcement education.*—This program awards grants to accredited institutions of higher education which in turn award grants and loans to criminal justice personnel and students preparing for careers in the justice field. Funds in 1980 represent unobligated balances transferred from the Department of Justice pursuant to the Department of Education Organization Act (Public Law 96-88). No funds were appropriated in 1980 and none are requested in 1981.

(d) *Law-related education.*—Program funds support activities in State and local educational agencies and nonprofit agencies, to provide law-related education program primarily in elementary and secondary schools. Funded projects include technical assistance, training, development and demonstration activities. In 1981, an estimated 30 projects will be supported.

Legislation is proposed to support a new program of challenge grants under the Strengthening developing institutions program. The challenge grant portion of this program authorizes matching grants on a one-for-one basis. The institutional funds may come from any non-Federal source. These grants would increase an institution's self-sufficiency, strengthen its capacity to make a substantial contribution to the higher education resources of the Nation, and encourage other sources of funding. Graduate and professional schools at developing institutions are eligible for this new program.

HIGHER EDUCATION FACILITIES LOAN AND INSURANCE [FUND]

For the payment of such insufficiencies as may be required by the trustee on account of outstanding beneficial interest or participations in assets of the [Office] Department of Education authorized by the Department of Health, Education, and Welfare Appropriation Act, 1968, to be issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(c)), [\$2,189,000] \$1,656,000 to remain available until expended, and the Secretary is hereby authorized to make such expenditures, within the limits of funds available in [the] Higher Education Facilities Loan and Insurance [Fund], and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 849) as may be necessary in carrying out the program set forth in the budget for the current fiscal year [for such fund]. (Additional authorizing legislation has been proposed.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980 that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Act (Public Law 96-88). This account also has been reclassified from a revolving fund to a general fund account and will contain the same activities as were contained in the Department of Health and Human Services.

The Higher education facilities loan program authorizes loans for construction of academic facilities in higher education institutions. Such loans may be made for up to 80% of a project's total development cost and must be repaid within 50 years. No new loans are anticipated in 1981.

Interest is payable to the Treasury on the cumulative amount of appropriations paid out for loans under this title or available as capital to the funds less the average undisbursed cash balance in the fund during the year. The rate certified by Treasury for payment from the fund during 1979 was 8½%.

The participation certificates outstanding held by this fund were \$165,415 thousand at the end of 1979 and are estimated to remain at the same level through 1981.

Insufficiencies appropriations are used to fund the deficit resulting from the interest on participation certificates (sold during 1967 and 1968 to raise capital) and the interest rate received from higher education institutions on facilities loans. The budget authority required for insufficiencies is computed as follows (in thousand of dollars):

	1979 actual	1980 estimate	1981 estimate
Interest accrued on participation certificates.....	9,491	9,491	9,491

COLLEGE [HOUSING—LOANS] HOUSING LOANS [AND OTHER EXPENSES]

The aggregate amount of commitments for loans made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), for the fiscal year [1980] 1981 shall not exceed the total of loan repayments and other income available during such period, less operating costs. For the payment of such insufficiencies as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717), in assets of the College Housing Loan Fund as authorized by the Independent Offices and Department of Housing and Urban Development Appropriation Act, 1968 (81 Stat. 341, 357), \$14,271,000, to remain available until expended. During fiscal year 1981 and within the resources and authority available, gross obligation for the principal amount of direct loans shall not exceed \$110,000,000. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.)

This account includes activities previously funded under the Department of Housing and Urban Development that have been transferred pursuant to the Department of Education Act (Public Law 96-88.)

Title IV of the Housing Act of 1950 authorized loans

at 3% interest to colleges and eligible hospitals for the construction or acquisition of housing and related facilities such as student centers, dining halls, and infirmaries. The HUD Act of 1968 amended the program to provide an alternate source of assistance by authorizing debt service grants which reduced the cost to colleges and hospitals of borrowing in the private market.

Financing.—Funds for the direct loan program have been provided primarily from Treasury borrowing and from the sale of participation certificates which are backed by pools of college housing loans held by the Federal Government. Treasury borrowings totaled \$2,687.3 million as of September 30, 1979.

Sales of participation certificates, as provided in the Participation Sales Act of 1966, totaled \$2.2 billion through 1969, of which \$464.4 million was outstanding as of September 30, 1979. In order to pay the interest on the participation certificates, funds are appropriated annually to match the difference between the interest

Program operations.—The estimated net operating income of \$901 thousand in 1981 will decrease the cumulative deficit to \$168.3 million.

All unobligated balances, as well as all receipts and reimbursements anticipated in future years, will be used to cover operating expenses and repay Treasury borrowing. The budget provides \$8 million to fund loan management, liquidation, and property disposition expenses related to possible loan foreclosure actions in 1981.

		(10,507)

Note.—Includes \$7,795 thousand in 1980 (beginning April 1, 1980) and \$11,793 thousand in 1981 for activities previously financed in the following amounts from (in thousands of dollars):

	1979	Oct. 1— Mar. 31, 1980
Salaries and expenses, Office of the Assistant Secretary for Education, Department of Health and Human Services.....	\$10,561	\$2,152

In 1980 this activity was transferred from the Office of the Assistant Secretary for Education, Department of Health and Human Services (formerly Health, Education, and Welfare) to the Department of Education.

Educational statistics is the primary Federal program responsible for the collection, analysis and dissemination of statistics about education. It maintains a core of education statistics on institutions and individuals to monitor trends and address policy issues and supports a coordinated program of statistical services which provides: (1) assistance to States in developing comparable data bases, (2) analyses which illuminate the meaning of data and (3) dissemination of timely useful information to the public. It is also responsible for coordinating data acquisition of all Federal Agencies in order to eliminate unnecessary or redundant information requests.

During 1981 this program will continue to maintain the data core for elementary-secondary, postsecondary, and vocational education data systems to monitor institutional trends on enrollments, staffs and finances. There also will be the first followup study of the classes of 1980 and 1982 to determine the postsecondary enrollment and work patterns of the class of 1980 and to assess the growth and development from the sophomore to the senior year of the class of 1982. In addition, this program will complete reports to Congress on the disparities in the State's distribution of financial resources for elementary-secondary education, teacher supply and demand, and the condition of education.

The major increases over 1980 will support efforts to reduce data burden, to increase data quality and utility, and to contribute to high priority information needs. Specifically, this activity will increase the Federal Data Acquisition Council's activities to reduce paperwork burden as well as to assist States in instituting a comparable record system to reduce data burden. In the area of quality control, this activity will build its analyses and evaluation capability to improve program planning and direction for the entire statistical program. It will also address issues related to access to higher education for the handicapped, equal education opportunity for language minorities, and the economic needs of museums.

In April 1980, the National Institute of Education and the fund for the improvement of postsecondary education were transferred from the Department of Health and Human Services (formerly Health, Education, and Welfare) to the Department of Education.

1. *Research and development.*—This activity supports research, development, and dissemination activities which will aid students, teachers, administrators, and decisionmakers at all levels of education. The primary goals are furthering educational equity and improving local educational practice and are accomplished through three programs.

The teaching and learning program attempts to enlarge our scientific understanding of human learning and development and our knowledge of effective educational practices. In 1981, a continuing emphasis will be on literacy in the basic skills. Research on cognitive skills, staff development, improved instructional practices, and uses of tests will also be emphasized. The National Assessment of Educational Progress will continue to be supported.

General and special funds—Continued

RESEARCH AND RELATED ACTIVITIES—Continued

The educational policy and organization program supports research on how the governance and organization of education can be made more effective and equitable and assists practitioners who want to take advantage of what is learned. Besides continuing efforts in finance, urban education, and secondary schools and youth services, the program will expand studies of the processes of desegregation, rural education, law, and higher education management.

The dissemination and improvement of practice program aims to help teachers, schools, and administrators obtain and make use of knowledge about education. The program translates educational research into forms that are useful to educational policymakers, administrators, and practitioners, and makes it available through national and regional information systems. The program will work with national, State, regional, and local institutions to aid them in obtaining and using information on relevant educational research and development and on promising educational practices. A special program will increase the participation of minorities and women in educational research.

2. Improvement of postsecondary education.—This activity was established to encourage reform and improvement of postsecondary education through grants and contracts with public and private postsecondary institutions for program development and demonstration. Awards are made through a competitive process for locally designed improvement projects. A recent external evaluation indicates that most projects have continued locally without further Federal support and have stimulated similar improvements elsewhere in the Nation.

During 1981 this program will continue to focus on improving services for previously underserved groups, expanding professional education opportunities for minorities and women, developing more active forms of learning, supporting curricular development and increasing management skills available at the institutional and school system level. In addition, increased efforts will be made to disseminate successful approaches to teaching basic skills and responsive counseling and information approaches for disadvantaged students. The \$3.5 million increase over the 1980 level will allow this program to deal with projects that: (1) help remove barriers to graduate and professional educational opportunities for currently underserved populations, and (2) help a variety of institutions, including traditional black colleges and urban universities, better focus on their mission.

Comparable annual amounts.....	(159,200)	(173,629) (185,682)

Note.—Includes \$157,783 thousand in 1980 (beginning April 1, 1980) and \$210,523 thousand in 1981 for activities previously financed in the following amounts from (in thousands of dollars):

	1979	Oct. 1- Mar. 31, 1980
Special projects and training, Office of Education, Department of Health and Human Services.....	75,514	12,520
Elementary and secondary education, Office of Education, Department of Health and Human Services.....	93,319	11,000
Science education activities, National Science Foundation.....	1,110	1,000
Employment and training assistance, Employment and Training Administration Department of Labor.....	6,848

This account includes activities previously funded under Department of Health and Human Services, the Department of Labor, and National Science Foundation that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Basic skills improvement.*—Projects support a variety of activities designed to improve the capacity of the educational system to provide basic skills instruction as it relates to reading, written and oral communication, and mathematics. In 1981 emphasis will be on the States' role in providing leadership and coordinating basic skills activities. Award mechanisms consist of discretionary grants, State formula grants, and contracts. 1981 funds will support 77 new awards and 276 continuation awards as compared to 284 new awards for 1980.

2. *Follow through.*—This program is designed to generate knowledge about effective early childhood education practices and educational change strategies, and to provide educational, health, and social services to economically disadvantaged children at specific sites. About 78,000 children at 155 sites will be served in 1981.

3. *Special emphases*—(a) *National diffusion program.*—Projects support the systematic dissemination and diffusion of a wide variety of exemplary educational practices and products, which have been validated by the Joint Dissemination Review Panel, to school districts throughout the country. In 1981, the funds requested will support the diffusion of 125 exemplary programs to 2,640 school districts, compared to the 79 exemplary programs disseminated to 1,500 districts in 1980. 58 facilitators, 10 more than in 1980, will work in States and large cities to promote the adoption of exemplary programs by local school districts. The variety of programs available for diffusion to local districts will be expanded.

(b) *Biomedical sciences.*—Projects support institutions of higher education in working with secondary school systems to educate, motivate, and encourage high school students from economically disadvantaged backgrounds to pursue training in the biomedical sciences. In 1981 funds will support two new and 10 ongoing projects. It is estimated that a total of 1,100 students will participate in these projects.

(c) *Gifted and talented.*—Projects support activities in State and local educational agencies to strengthen and improve programs for gifted and talented children. As in 1980, 75% of appropriated funds are awarded by formula to States, 90% of which must flow through to local educational agencies on a discretionary basis. With the remaining 25% of the funds in 1981, 30 discretionary awards will be made to emphasize the develop-

ment and refinement of State plans for gifted and talented children and youth, curriculum development, training of educational personnel, and the development of model programs. A priority concern will be the identification of and service to minority gifted and talented children in the visual and performing arts.

(d) *Alcohol and drug abuse education.*—Funds support five training centers which prepare teams of teachers to deal with alcohol and drug abuse-related problems. The teachers develop programs tailored to the needs of individual school districts. Their basic approach is to relieve the social and psychological pressures which cause students to turn to alcohol or drugs by instituting peer counseling, group counseling, alternative forms of recreation, and changes in the social structure of the school. Teams may also receive technical assistance in implementing their plans, and they are encouraged to pass their newly acquired skills on to other teachers. In 1981, 80 teams will be trained to work in 20 new school districts, and 2,500 days of technical assistance will be provided to previously trained teams.

(e) *Arts in education.*—Projects support activities to encourage and assist State and local educational agencies and other public and private agencies to establish and conduct programs in which the arts are an integral part of elementary and secondary school education. In 1981 as in 1980, funds will support 30 projects that focus on a collaborative effort involving all aspects of the community. Funds also will continue to support efforts of the Kennedy Center and the National Committee/Arts for the Handicapped.

(f) *Metric education.*—Projects support activities at State and local educational agencies, universities and colleges, and public and private nonprofit organizations to prepare individuals to use the metric system. Funded projects include materials and model development and dissemination, and national leadership and technical assistance activities. In 1981, an estimated 50 awards will be made, the same as in 1980.

(g) *Ethnic heritage studies.*—Projects support public and private nonprofit educational agencies, institutions, and organizations in planning, developing, establishing, and operating ethnic heritage studies programs. In 1981, an estimated 75 awards will be supported.

(h) *Telecommunications demonstrations.*—Grants are awarded to public and private nonprofit organizations and institutions for supporting demonstrations of how nonbroadcast facilities and methods can be used both to distribute information on health, education, and social services, and to improve those services. Twelve projects will be supported in 1981.

(i) *Special initiatives.*—These funds are used by the Secretary of Education for innovative activities to meet special needs in critical areas not specifically covered in other educational programs. Included are funds to support studies and surveys relating to the financing of elementary and secondary education as mandated in Section 1203 of the Elementary and Secondary Education Act.

4. *Communities and schools*—(a) *Cities in schools.*—Projects support the development of structures and practices which integrate educational and social services already available in the cities, to serve dropouts, potential dropouts, and low achievers from disadvan-

General and special funds—Continued

SCHOOL IMPROVEMENT PROGRAMS—Continued

tagged backgrounds. Projects will be continued in seven major cities, including the Baltimore project which was funded from another account in 1979 and 1980; and two expansion sites will be added.

(b) *PUSH for excellence*.—Projects support efforts to stimulate excellence in education by mobilizing all the resources within a community—parents, students, educators, clergymen, media, and business—with the objectives of improving basic skills, improving school attendance, decreasing dropout rates, and reducing vandalism and acts of violence by students. Projects will be continued in all nine major cities in which this program was operational in 1980.

5. *Professional development*—(a) *Teacher corps*.—Projects support efforts to improve the educational opportunities of children from low-income families by encouraging broader and improved teacher training programs. In 1981, 167 projects will provide training for some 20,000 educational personnel. Whereas previous projects focused on the elementary school, this secondary school focus will permit continuity for students K-12.

(b) *Teacher centers*.—Projects support the operation of centers which are designed to give elementary and secondary school teachers maximum control over their own inservice training and over the production and modification of school curricula to meet the special needs of their students. In 1981, 95 operational centers and 10 planning grants will provide training for approximately 70,300 teachers.

(c) *Administrators' management training*.—Projects will support training activities designed to increase the effectiveness of Federal and local educational programs by expanding the management capabilities of school administrators. Training will improve school administrators' ability to respond to changes in the environment in which their schools function. In 1981, an estimated 10 to 15 awards will provide training for approximately 2,000-2,500 administrators.

(d) *Precollege science teacher training*.—Projects assist teachers in grades kindergarten through four to strengthen their subject matter competency in science and mathematics. All students, regardless of their subsequent career choices, are provided with the opportunity for gaining a deeper appreciation of the interrelationships among science, society and the environment. Awards are made to colleges and universities for the support of group teacher education activities and projects during the academic year and in summer sessions.

6. *Migrant education*—(a) *High school equivalency program*.—Low-income migrant and seasonal farmworkers are prepared for general education development tests so that they can obtain high school equivalency certificates and go on to higher education, skill training, or better paying jobs.

(b) *College assistance migrant program*.—Grants are made to colleges and universities to offer tuition assistance, tutoring and counseling to low-income migrant and seasonal farmworkers and their families.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

The American Printing House for the Blind, under the act "To Promote the Education of the Blind," provides educational materials to students of less than college grade who attend public schools and classes with sighted children and blind students who attend special schools and classes for the blind.

1. *Educational materials.*—The request for the educational materials will serve an estimated 35,600 eligible blind students, an increase of 1,600 over 1980. The estimated 1981 per capita rate is \$129.

Basic materials provided by the Printing House includes textbooks, and literature in braille, including braille music, large-type texts, recorded materials, and educational aids such as braille writers, talking book machines, cassette recorders, braille and relief maps, etc. Special materials for the multihandicapped and preschool blind children being enrolled in educational programs are produced.

2. *Expenses related to Advisory committees.*—The 1981 request for the advisory committees (Publication Committee, Educational Aids Committee, and Educational Research Committee) will enable these committees to continue to evaluate and recommend annually to the Board of Trustees educational materials and aids to be developed and produced. Printing House representatives will continue to assist teachers throughout the country in the use of aids and materials made available under the Act.

3. *Educational and technical research.*—The request will serve as a base to enable the Printing House to develop needed educational materials in a variety of subject areas such as reading, mathematics, science, and for special groups such as the multihandicapped blind.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For carrying out the National Technical Institute for the Deaf Act (20 U.S.C. 681, et seq.), **[\$17,349,000] \$20,305,000.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Career development.*—The National Technical Institute for the Deaf (NTID) is a national coeducational residential center that provides postsecondary technical education for the Nation's deaf people to prepare them for successful employment. In 1981, NTID will continue to provide direct technical education, communications training, and personal/social development services and instructional support services to a full-time equivalent student population of 1,050 deaf students. The utility of all NTID curriculums will be reviewed on an ongoing basis using the curriculum process model and information on the labor market from the graduate feedback system. About 531 students will be placed in postgraduate and work experience situations.

2. *Research.*—The 1981 request will support research on institutional organization and management, speech, audiology, manual communication, English language, personal/social accommodation, cognitive strategies, career development and decisionmaking, educational support services, and instruction technology as they relate to the technical and general education of a deaf population.

3. *Training.*—The 1981 request for training will provide sign language and interpreter training programs to 2,432 students, faculty and staff, and other professionals who work with the deaf. In addition, 400 people will be trained in conjunction with NTID's educational extension efforts. These efforts provide both onsite and offsite practical application training to professionals in the fields of higher education, deaf education, and clinical speech/audiology using proven methods. Finally, 82 graduate interns from colleges and universities, as well as business and service organizations will come to NTID to complete their training and practical application experience.

General and special funds—Continued

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF—Continued

4. *Information dissemination.*—In addition to producing the Focus magazines, NTID catalog, placement and recruitment modules, alumni newsletters, information-series, radio and television spots, and the Annual Report, scheduled for national distribution are explanatory materials on the responsibilities and use of interpreters, training methods for student notetakers, multimedia technical instruction modules and programmed English grammar and vocabulary texts.

5. *Management.*—In 1981, academic research and dissemination programs will be in operation. The existing organizational administration NTID utilizes a comprehensive planning system which provides for information on program planning and reporting, budgeting and accounting analyses, personnel administration, space utilization, student scheduling, and other data analyses.

GALLAUDET COLLEGE

For carrying out the Model Secondary School for the Deaf Act (80 Stat. 1027) and for the partial support of Gallaudet College authorized by the Act of June 18, 1954 (68 Stat. 265), [\$48,341,000] \$49,768,000, of which [\$10,730,000] \$6,594,000 shall be for construction and shall remain available until expended [: Provided, That if]. If requested by the college, such construction shall be supervised by the General Services Administration.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *College programs.*—Gallaudet College is a private, nonprofit educational institution which provides an undergraduate higher education program for deaf persons, a preparatory program for students who need such training to qualify them for college admission, a gradu-

ate program in fields of study related to deafness, and continuing education and public service programs for the deaf community of the United States. Gallaudet also provides sign language programs for hearing and deaf persons, and an Associate of Arts Degree program in interpreting. Sign language training and instruction includes basic, intermediate, advanced, and interpreter levels of communication.

The 1981 budget request will provide for continuation of ongoing programs, and for selected initiatives which will permit the college to provide a quality program of instruction to about 1,175 undergraduate and 320 graduate students, and continuing education opportunities for approximately 17,025 enrollees. The funds requested will also support: improving the summer school program to make it more responsive to student requirements; continued development toward Gallaudet's long range goals; furthering the aggressive pursuit of private funding sources; extending and expanding continuing education and public service programs; identifying research needs and dissemination of research results to professionals in the field of education of the deaf; and, establishing and supporting the College of Arts and Sciences, the School of Communications, and the School of Education and Human Services.

2. *Model Secondary School for the Deaf.*—The Model Secondary School for the Deaf serves as a laboratory for educational experimentation and development and disseminates working models to programs serving deaf students and educational professionals. The school prepares deaf students for postsecondary academic and/or vocational pursuits.

The 1981 budget request will provide for a continuing comprehensive program of instruction for approximately 410 deaf children, will permit an expansion in enrollments of multiple-handicapped students, and will enable the school to expand its work-study program. Increased dissemination of course guides, professional publications, video tapes and other instructional products, consultative services and training related to compliance by the general public with Public Law 94-142 will be achieved in 1981.

3. *Kendall Demonstration Elementary School.*—The Kendall Demonstration Elementary School provides an educational program for children through the age of 15, a diagnostic center, a parent education program, and research on the learning problems of young deaf children.

The 1981 budget request will continue a comprehensive 12-month program of instruction for approximately 180 deaf children. The request will also support a comprehensive parent education program for the families of primary aged hearing-impaired children and provide for operation and maintenance costs of this facility.

4. *Construction.*—The 1981 request will provide for: selected energy conservation programs; installing smoke detectors in all dormitory rooms; planning the construction of a new dormitory for the college; converting the library to an Information and Visitors Center; planning the renovation of Fowler Hall to meet the program needs of the School of Education and Human Services; improving the athletic fields concurrent with the construction in 1980 of a new field house; upgrading

power systems in selected buildings; and, relocating certain utility systems to better serve the campus.

HOWARD UNIVERSITY

For partial support of Howard University, **[\$121,893,000]** *\$133,933,000* of which **[\$10,000,000]** *\$10,240,000* shall be for construction and shall remain available until expended **[Provided, That if]**. If requested by the University, such construction shall be supervised by the General Services Administration.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Academic program.*—Howard University is a private non-profit educational institution consisting of seventeen (17) schools and colleges. The 1981 request provides instruction costs for each of the schools and colleges. (The School of Religion receives no Federal funding.) It also includes costs for the university libraries, support services and administrative services related directly to classroom instruction and opportunities in undergraduate, graduate and professional training. Federal funds provide 56% of total operating costs for the academic program. Funds from non-Federal sources are realized from tuition and fees, gifts, grants, endowments, dormitory rents, cafeteria and bookstore sales.

The 1981 increase of \$11,850,000 includes \$5,000,000 for program improvements to meet accreditation deficiencies in the following academic areas: university libraries, communications, and pharmacy and dentistry. The remaining \$6,850,000 will meet costs, such as faculty and staff salary increases, and provide partial support of the university's retirement program.

The University's enrollment for 1981 is estimated to be 9,687.

2. *Howard University Hospital.*—The Hospital furnishes inpatient and outpatient care and a facility for

training of physicians and nurses and other professional and technical health personnel. Operation of the hospital is financed by Federal appropriation and patient fees for medical services including medicaid, medicare and contractual services from the D.C. government and other local jurisdictions. Federal funds provide 33% of the total operating costs.

3. *Construction.*—The 1981 request includes funds to complete the seventh annual payment on the Dunbarton note; to continue ongoing renovations of valuable space in Freedmen's Square to meet academic and support service facilities; to continue selected energy conservation programs; to continue with major renovations of student residence halls; and to meet safety and health requirements. This request also provides for space requirements in existing facilities. The Federal appropriation is the main source of support for the construction program.

OFFICE OF CIVIL RIGHTS

Office for Civil Rights, Departmental Management, Department of Health and Human Services.....	42,974	22,618
Architectural and Transportation Barriers Compliance Board, Human Development Services, Department of Health and Human Services.....	1,000	504

This account includes activities previously funded under the Department of Health and Human Services (Health, Education, and Welfare) which have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Office of Civil Rights.*—The Office of Civil Rights is responsible for carrying out the Department's enforcement programs under title VI of the Civil Rights Act of 1964 (racial and ethnic discrimination), title IX of the Education Amendments of 1972 (sex discrimination), Section 504 of the Rehabilitation Act of 1973 (discrimination against the handicapped) and Public Law 638 (Indian Preference Act). These statutes require nondiscrimination in the employment and service delivery systems of every elementary, secondary and postsecondary educational system or institution and State and local education agency throughout the Nation. The statutes require the Department to investigate complaints, conduct periodic reviews, negotiate to secure compliance, conduct appropriate enforcement proceedings, and promote voluntary compliance by all of these recipients of Federal financial assistance.

The Office is also responsible, under Executive Order 11914, for providing guidance to and coordinating the implementation of section 504 of the Rehabilitation Act of 1973 by all Federal departments and agencies empowered to extend Federal financial assistance.

The 1980 estimate reflects the current estimate of transfers to the Department of Education upon its establishment.

The 1981 request of \$46,915,000 includes 1,181 authorized positions for the conduct of education-related civil rights compliance and monitoring functions in the Department of Education.

2. *Architectural and Transportation Barriers Compliance Board.*—The board is required to (1) investigate and insure compliance with standards for public architectural, transportation, and communication barriers, including public conveyances, confronting handicapped individuals; (2) ensure that measures are being taken by Federal, State, and local governments and other public of nonprofit agencies to eliminate such barriers; and (3) make recommendations and prepare policy reports to

the President and Congress it deems necessary to eliminate such barriers. The board is composed of 11 members from the general public appointed by the President and the heads of 10 Federal agencies. The budget of \$2,300 thousand includes 32 positions for the conduct of these functions in 1981.

¹ Includes collections on Federal defaulted loans from the Student loan insurance account for related collection activities in the amount of \$10,000 thousand in 1979, and \$10,500 thousand in 1980, and 1981.
² Transfer of support for the Educational Broadcasting Facilities Program to the Department of Commerce in the amount of \$277 thousand.

NOTES

Excludes \$1,843 thousand in 1980 and 1981 for activities transferred to Student financial assistance. Comparable amount for 1979 (\$1,843 thousand) is included above.
Includes \$33,479,000 in 1980 (beginning April 1, 1980) and \$71,540,000 in 1981 for activities financed in the following amounts from (in thousands of dollars):

	1979 (est.)	Oct. 1-Mar. 31 1980 (est.)
General departmental management, Departmental Management, Department of Health and Human Services	10,750	5,657
Office of the Inspector General, Departmental Management, Department of Health and Human Services	8,531	4,490
Human development services, Human Development Services, Department of Health and Human Services	13,068	7,074

Research and related activities, National Science Foundation	137	55
Salaries and expenses, Management and Administration, Department of Housing and Urban Development	704	382
Special projects and training, Office of Education, Department of Health and Human Services	5,250	1,650

Note.—Excludes \$12 thousand in 1981 for activities transferred to general departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$12 thousand) and Oct. 1-Mar. 31, 1980 (\$6 thousand) are included in the Assistant Secretary for Education, Salaries and expenses account. A comparable amount for Apr. 1-Sept. 30, 1980 (\$6 thousand) is included above.

This account includes activities previously funded under the Department of Health and Human Services (formerly Health, Education, and Welfare) that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Program administration* activities support a wide array of policy and evaluation analyses, special projects, advisory services, and program support requirements necessary to insure effective Department of Education management.

(a) *General administration*.—Funds are provided to enable the Secretary to carry out the administrative duties of the Department of Education and to support special purpose activities. The Department administers grants-in-aid and other direct programs and provides technical assistance to State and local educational and rehabilitation agencies, institutions of higher education, libraries, and other organizations to promote the improvement of education and rehabilitation services throughout the country. In 1981, major efforts will include reduction of waste, fraud, and abuse, the reduction of the paperwork burden, and more timely process-

General and special funds—Continued

SALARIES AND EXPENSES—Continued

ing of grants and contracts. In 1981, this account includes a reduction of 500 full-time equivalent positions as required by the Department of Education Organization Act.

The 1980 estimate reflects the current estimate of transfers to the Department of Education upon its establishment.

(b) *Student assistance administrative support.*—These funds provide support for programs administered by the Assistant Secretary for Postsecondary Education. Funds shown here on a consolidated basis were appropriated under Student financial assistance, the Student loan insurance fund, and the Salaries and expenses accounts. Combining these funds under one account avoids duplication and provides for a clearer presentation of student aid contractual costs. In 1981, management improvements will be undertaken based on the comprehensive quality control study funded in 1979 and collection of funds owed the Government from defaulted loans will be improved. These funds include at least \$2,000,000 to replicate the quality control study for academic year 1980-81.

2. *Advisory committees.*—Funds are provided for the operating expenses of advisory committees. In 1981, fourteen advisory committees will be supported. Of these, twelve are specifically authorized by Federal statute and two are administratively created under the general authority vested with the Secretary of Education by General Education Provisions Act. Each committee issues an annual report to the Congress and the President about the operation and administration of its respective program.

3. *Planning and evaluation.*—Contracts are made with public and private organizations for planning and evaluation studies of programs administered by the Department of Education. In 1981, thirteen studies will be continued and twenty-five new studies, including a series of exploratory evaluations, will be initiated.

4. *Analysis of 1980 census data.*—Funds are provided to allow for such analyses as needed to revise States' formula allocations, to determine more precisely demographic effects of resource allocations, to serve as a basis for developing reauthorization proposals, and for other planning and evaluation purposes.

EDUCATIONAL, RESEARCH, AND TRAINING ACTIVITIES OVERSEAS
(SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States, for necessary expenses of the Department of Education, as authorized by law, \$3,000,000 to remain available until expended. This appropriation shall be available, in addition to other appropriations to such agency.

[EDUCATIONAL ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM)]

[For payments in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States, for necessary expenses of the Office of Education, as authorized by law, \$1,000,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to such office, for payments in the foregoing currencies.]

[RESEARCH AND TRAINING ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM)]

[For payment in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States, for necessary expenses of the Office of Human Development Services and the Social Security Administration as authorized by law, \$2,000,000 to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to such office and administration for payments in foregoing currencies.]

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing

resolution (Public Law 96-123) in effect through September 30, 1980 that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account includes activities previously funded under the Department of Health and Human Services that have been transferred pursuant to the Department of Education Organization Act (Public Law 96-88).

1. *Research and demonstration.*—U.S.-owned foreign currency that the Treasury Department determines to be in excess of normal requirements is used to support overseas research activities which complement, supplement, and strengthen domestic research and service programs. This program enables the United States to benefit from progress that other countries are making in dealing with mutual problems and policy issues affecting the handicapped; children, youth, and families; the elderly; and the economically disadvantaged. Overseas cooperative research and demonstration projects test new approaches and evaluate alternative solutions to these problems.

2. *Grants to American institutions.*—U.S.-owned foreign currency is used to support significant educational activities overseas under the Fulbright-Hays program, discussed under the Higher and continuing education account. The grants funded under this program are awarded to American educational institutions, and will support two intensive foreign language schools in other countries through the group projects abroad program. These projects focus on foreign languages, area studies, world affairs, and intercultural understanding. They are designed to update the professional competencies of American educators, to further foreign language and area studies research, and to develop improved curricula and effective instructional materials. This program provides an opportunity for American educators to gain first-hand knowledge and experience of the language

and cultures of other countries and expands the awareness of the American population in understanding other nations.

1. *Grants to museums.*—The Institute of Museum Services assists museums of all sizes and disciplines to maintain, increase, and improve their activities and services. In 1981, the Institute plans to initiate the Cornerstone grant program, to provide multiyear general operating support grants to museums. Grants will be awarded annually for a 3-year period and will require increasing matching rates from non-Federal sources. During the first year the Institute expects to award 80 grants.

The Institute will continue its 1-year general operating support program, although at a reduced level. About 250 1-year grants will be awarded in 1981.

General and special funds—Continued

INSTITUTE OF MUSEUM SERVICES—Continued

Under the Institute's special projects category, there will be about 400 model projects awarded. Projects emphasizing assessment and long range planning will receive funding priority. The Institute plans to award a total of 730 grants in 1981.

2. *Program administration.*—Costs of operating the Institute as well as funds to support the 20-member National Museum Services Board are included.

GENERAL PROVISIONS—DEPARTMENT OF EDUCATION

Sec. 301. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Sec. 302. Funds appropriated in this Act to the American Printing House of the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

Sec. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct research an amount equal to as much as the entire cost of such research.

Sec. 304. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

Sec. 305. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed, or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

Sec. 306. Funds appropriated to the Department of Education under Title III may not be used to pay the compensation of experts or consultants (other than full-time employees) or organizations thereof, or to procure by contract, the services of experts or consultants, or organizations thereof, in excess of \$40,000,000 during fiscal year 1981. Expenditures for all consultant services in the fourth quarter of fiscal year 1981 may not exceed 30 per centum of the total annual fiscal year 1981 expenditure for such consultant services.

Sec. 307. The total full-time equivalent employment of the Department of Education during fiscal year 1981 shall not exceed 7,500.

Note.—Includes \$2,600,000 in 1981 for activities previously financed from Uranium enrichment, Operating expense.

1. *Inertial confinement fusion.*—The objective of this program is to develop and demonstrate inertial confinement fusion in order to utilize it as an aid in nuclear weapons development, testing, and simulation, and as a potential inexhaustible energy source.

In 1981 the program provides a balance between advanced drivers, target experiments, and support for major facility construction.

2. *Naval reactors development.*—This program provides for the design, development, and testing of improved naval nuclear propulsion plants and reactor cores having longer fuel life, increased reliability, improved performance, and simplified operating and maintenance requirements. These reactors are necessary to meet a variety of military requirements. During 1981 efforts will continue to improve existing submarine and surface ship reactor cores and plant technology, and to develop new advanced reactor concepts and propulsion plants including the completion of propulsion plant testing in the first Trident strategic ballistic missile submarine.

3. *Weapons activities.*—This program provides for the research and development, testing, and manufacturing of all U.S. nuclear weapons, maintenance of reliable weapons for their stockpile life, and disassembly and disposal of nuclear weapons designated for retirement. In 1981 this program will continue to provide new technology to maintain a modern nuclear force, along with the design and development of new weapon systems in response to defense requirements. This program also provides for the certification of safety, reliability, and performance of new weapon systems and surveillance of the existing stockpile. Increases are provided for continued production of weapon systems as well as initiation of production on several new systems.

4. *Verification and control technology.*—This program provides for the conduct of activities directed toward the advancement of verification and control technology related to nuclear treaties, data collection, and processing. The 1981 program provides for continued verification efforts on the limited test ban and proposed comprehensive test ban treaties. The intelligence activities

General and special funds—Continued

ATOMIC ENERGY DEFENSE ACTIVITIES, OPERATING EXPENSES—
Continued

relate to comprehensive test ban and nonproliferation issues.

5. *Materials production.*—This program provides for the production of special nuclear materials to meet weapons production requirements. The 1981 estimate provides for operation of the N-Reactor at Richland and for operation of three production reactors at Savannah River. Chemical processing operations, process development, and supporting services will continue in 1981.

6. *Defense nuclear waste.*—This program provides for the interim storage of nuclear generated waste, and the development and demonstration of technologies to implement long-term waste disposal options. The 1981 program provides for continuation of the waste operations program with expanded effort on waste management research and development and continued transfer of wastes to new tanks.

7. *Nuclear materials security and safeguards.*—The goal of the program is to deter and prevent malevolent acts involving domestic nuclear materials and facilities and to support U.S. nonproliferation initiatives and International Atomic Energy Agency safeguards efforts. The 1981 program will allow continued support of safeguards responsibilities and nonproliferation policy.

1. *Inertial confinement fusion.*—This program will continue the construction of the Antares CO₂ gas laser and target fabrication facilities at the Los Alamos Scientific Laboratory in New Mexico and the NOVA glass laser and target fabrication facilities at the Lawrence Livermore Laboratory in California, and initiate con-

struction of the Particle Beam Fusion Facility at Sandia Laboratories in New Mexico. These facilities will permit the investigation of the fusion physics necessary to determine the technical feasibility of employing the inertial confinement fusion process as an energy source.

2. *Naval reactors development.*—This program continues test facility upgrading and provides equipment for ongoing reactor design and testing activities.

3. *Weapons activities.*—This program provides for facility construction, maintenance and restoration for the weapons research and development, testing and weapons production activities.

4. *Verification and control technology.*—This program provides capital equipment for intelligence and verification needs.

5. *Materials production.*—This program provides for maintenance and restoration of the nuclear materials production physical plant, and for continuation of construction on a facility to process and store a variety of irradiated spent fuels.

6. *Defense nuclear waste.*—This program includes the construction, maintenance, and upgrade of facilities providing interim storage for defense wastes.

7. *Nuclear materials security and safeguards.*—This program provides equipment supporting ongoing safeguards activities.

1. *Life sciences research and nuclear medicine applications.*—This research will support (1) long-term basic biological research which provides fundamental information on the normal structure and function of living organisms at all levels of organization for an understanding of the health and environmental effects of energy-related pollutants and (2) research on the applications and clinical feasibility of radiation, radionuclides and stable isotopes for use in diagnosis and treatment of human diseases in clinical medicine. In 1981, increased efforts will be provided for basic biological research to determine the structure of genetic material and comparison of differences between portions of the chromosome which control different functions. In the nuclear medicine applications program, an effort will be initiated to develop new computer automated tomographic techniques for tests of feasibility in clinical diagnosis of human diseases.

2. *High energy physics.*—In this program studies are conducted of the fundamental building blocks of matter and the fundamental forces of nature in an attempt to understand more fully the relationships and transformations between energy and matter. The method of achieving the program objectives involves the use of large accelerator facilities to provide various types of high-energy particle beams and the use of sophisticated detection and analysis apparatus to study the particle interactions. In 1981 these facilities will be used to search for new physical phenomenon using subnuclear particle interaction.

3. *Nuclear physics.*—This program is concerned with attaining a deeper understanding of the interactions, structure, and properties of nuclei through experimental medium energy and heavy ion nuclear research and theoretical investigations. Plans for 1981 include: exploitation of research opportunities at the new Holifield Heavy Ion Research Facility and at other nuclear phys-

1. *Life sciences research and nuclear medicine applications.*—Laboratory research equipment will be provided in 1981 including a proposed beam-line at the national synchrotron light source.

2. *High energy physics.*—Funds are requested in 1981 to continue the intersecting storage accelerator Isabelle at Brookhaven National Laboratory and the Energy Saver project at the Fermi National Laboratory. In addition, funds are requested to start the Tevatron, Phase I, project at Fermilab. These facilities will be used to continue efforts to exploit recent major theoretical and experimental advances.

3. *Nuclear physics.*—In 1981, construction of the National Superconducting Cyclotron Laboratory at Michigan State University will continue; construction will be initiated on the Argonne Tandem Linac Accelerator System project at Argonne National Laboratory; and improvements to scientific research equipment will be made at the Clinton P. Anderson Meson Physics Facility and the William H. Bates Linear Accelerator.

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES,
OPERATING EXPENSES*

*See Part III for additional information.

For operating expenses of the Department of Energy necessary for energy supply, research and development activities and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), [\$2,048,523,000] \$2,349,904,000, to remain available until expended: *Provided, That during fiscal year 1981 and within the resources and authority available, gross obligations for the principal amount of direct loans for the Hydropower Feasibility Studies Loan Program shall not exceed \$10,000,000. (Energy and Water Development Appropriation Act, 1980; additional authorizing legislation to be proposed.)*

[Such amounts as may be necessary for fiscal year 1980 for Department of Energy, Operating Expenses, Energy Supply, Research and Development Activities, to carry out the breeder reactor demonstration project or project alternative approved by Congress in authorizing legislation, and for no other purpose, at the current rate of operations notwithstanding the provisions of sections 102 and 106 of this joint resolution.] (Public Law 96-86, making continuing appropriations for the fiscal year 1980.)

72.40 Obligated balance, start of year	1,210,589	1,163,947	1,152,037
74.40 Obligated balance, end of year	-1,163,947	-1,152,037	-1,259,276
90.00 Outlays, excluding pay raise supplemental	2,295,837	2,279,148	2,242,582
91.20 Outlays from civilian pay raise supplemental	1,587	83
Distribution of outlays by account:			
Energy supply, research and develop- ment, operating expenses	2,280,735	2,242,665
Energy, science, and defense activities, operating expenses	1,618,047
Energy	677,790

Note.—Excludes \$891 thousand in 1981 for activities transferred to Uranium enrichment activities—operating expenses.

Status of Direct Loans (in thousands of dollars)			
Identification code 89-0224-0-1-271	1979 actual	1980 est.	1981 est.
Position with respect to limitation on direct loans:			
1110 Limitation on obligations: Appropriation	10,000
1200 Obligations incurred, gross	-20,000	-10,000

Cumulative balance of direct loans out- standing:			
2100 Outstanding, start of year	20,000
2200 Disbursements	20,000	10,000
2900 Outstanding, end of year	20,000	30,000

The purpose of energy supply research and development is to develop new energy technologies and improve the efficiency of existing energy technologies. Included in this mission are efforts associated with basic research, technology development, engineering development, and demonstration.

1. *Solar applications.*—For solar applications in 1981 principal objectives are to stimulate market acceptance and demand for solar products for residential, commercial, industrial, and agricultural applications. This will include efforts in passive heating and cooling, active heating and cooling, agricultural and industrial process heat, photovoltaics, wood and wind.

2. *Solar technology.*—The photovoltaics program will continue advanced R. & D. in thin films, novel concentrators, advanced materials and the high risk innovative concepts grant program. Wind systems will emphasize development and testing of small scale systems and initiate fabrication of advanced intermediate and large scale experimental systems. Ocean systems will continue operational testing of OTEC-1. The emphasis in solar thermal will be on evaluating concentrators and receivers for large and small systems, and continuing development and testing of collector designs and materials. The biomass program will continue to pursue technology and engineering development of near-term combustion systems, fermentation, gasification and liquefaction systems, fermentable crops, anaerobic digestors, and on-farm systems. The first tree crop will be planted in the 1,200 acre silviculture test farm and design of an aquatic biomass facility will begin. Basic and advanced research on biomass will be conducted. International solar projects will be continued.

3. *Geothermal and Hydrothermal Commercialization.*—The major objectives of these programs are to encourage and stimulate the commercial development of geothermal resources for electrical generation, direct heat applications, and methane recovery (from geopressured resources). In 1981, program emphasis is aimed at reducing present resource uncertainties and removing technological, environmental, economic, and institutional impediments inhibiting private sector development of geothermal energy. The 5 megawatt Raft River pilot plant will begin operations. The number of on-going direct heat demonstrations will be expanded as will the number of geopressured wells. The 50 megawatt loop at Fenton Hill will continue and development will be initiated on an additional hot dry rock extraction site. The preliminary evaluation of the national hot dry rock resources will be completed. The Hydrothermal Commercialization program will continue site specific development planning, conduct national progress monitoring, continue economic analyses, and conduct market analyses.

4. *Nuclear fission.*—Nuclear fission includes the commercial nuclear waste, spent nuclear fuel, converter reactor systems, breeder reactor systems and the advanced nuclear systems program.

General and special funds—Continued

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES,
OPERATING EXPENSES—Continued

The commercial nuclear waste terminal isolation activities continue the evaluation of the following geologies for their suitability as nuclear waste disposal sites: basalt at the Hanford site; tuff at the Nevada test site; and domed and bedded salt geologies in the South and Southwest. In addition, new nonsalt geologies will be identified for evaluation as suitable repository sites. An initial operational disposal facility for commercial waste is anticipated in the 1990's. The remedial actions activity includes significantly increased efforts in the decontamination and decommissioning of formerly used government and commercial sites with radioactive contamination, including uranium mill tailings sites. Initiation of preliminary work on the cleanup of the nuclear facility at West Valley, N.Y., is also planned.

This program provides for conceptual studies in support of a future government-provided facility storing a limited amount of commercial spent fuel. The Administration has submitted legislation to permit government acquisition and ownership of such a facility.

A significant increase in the converter reactor program is associated with new efforts in occupational radiation dose reduction, productivity improvements, and light water reactor safety. Efforts will continue in the area of increasing uranium utilization 15% by 1988, and reducing occupational radiation exposures in operating plants. Efforts continue in advanced reactor systems to develop and demonstrate the technology for reducing uranium enrichment in research and test reactor fuels so as to reduce the associated proliferation risks. The breeder reactor program includes three subprograms: the liquid metal fast breeder reactor, water cooled breeder reactor, and the fuel cycle R. & D. program. The liquid metal fast breeder reactor and fuel cycle programs show major reductions consistent with current information on the timing and need for a breeder reactor. Activities are being focused on the operation of the fast flux test facility, at Richmond, Wash., its supporting facilities and associated test program. The water cooled breeder reactor activity includes continued operation of the light water breeder reactor core, proof-of-breeding effort and testing of fuel rod bundle concepts. The effort on the gas cooled breeder reactor is being brought to an orderly closeout in 1981.

The advanced nuclear systems program continues development work on the space power systems for the solar polar and Galileo space missions scheduled for launch in 1982 and 1983.

5. *Magnetic fusion.*—The 1981 budget will enhance the program's ability to assure that the important engineering decisions are made from the strongest and most optimal data base. Specifically, the increase in the 1981 budget includes work on the operation and upgrade of tokamak and mirror experimental devices; continuation of major device fabrication efforts; continuation of efforts on alternate concepts as well as providing the underlying theory and experimental support.

6. *Electric energy systems and storage.*—The primary objectives are to develop the framework for effective integration of new technologies and provide technical

options for increased power transmission and storage. The electric energy systems program will promote the integration of new electrical generation technologies (such as photovoltaics, wind and solar thermal) into the national system, the development of ac superconducting cables and associated materials, testing of compressed gas insulated cable and dc cable prototypes, and continued experimentation to determine electric field effects on the environment and living organisms. The energy storage program will continue development of advanced batteries for solar applications and electric hybrid vehicles, provide increased funding for zinc-nickel and aluminum-air batteries, and continue design and construction of the spe electrolyzer for hydrogen production.

7. *Hydropower.*—This program is designed to establish a small-scale hydroelectric development industry in the United States based on both the rehabilitation and retrofitting of existing dams and the development of new small power dams. In 1981, activities designed to stimulate private sector development include: Federal financial incentives to improve the economics of such projects (cost-shared demonstrations); simplifying and shortening the development process; and support for identification and verification of feasible retrofit sites.

8. *Environment.*—The goals of this program are to assure that national environmental protection goals are incorporated in formulation of energy policies, implementation of energy programs, and operation of DOE facilities in order to restore, protect, and enhance environmental quality, and to support a comprehensive research program to obtain scientific data for determination of health and environmental effects associated with energy technology. Major initiatives planned 1981 include strengthening compliance with the National Environmental Policy Act; increased research on fossil energy technologies; research to predict and determine effects of increased levels of carbon dioxide in the atmosphere; and quantification of the health and environmental risks of alternative energy development.

9. *Supporting research.*—The supporting research programs are focused on areas of fundamental science that have the greatest potential both for near-term and long-term impact on energy production; on the assessment of technologies that have potentially high payoff in the future; and on the training of future energy professionals.

Basic energy sciences.—The objective of this program is to develop the knowledge base in science and engineering for all energy production and conservation technologies. Basic energy sciences provide fundamental input to problems underlying other energy programs and attempt to identify knowledge that crosscuts the various energy technologies. In 1981, work will continue in the materials sciences; the chemical sciences; engineering, mathematical, and geosciences; nuclear science; biological energy research; and advanced energy projects. Research involving chemistry of coal, combustion, catalysis, novel approaches to the use of solar energy and nuclear waste isolation will be increasingly emphasized.

University research support.—The goal of the University research support program is to fund special university-based research activities on long-range energy problems, including long-range implications of increased uti-

lization of coal, and to aid in the preparation and training of future energy professionals through research participation by advanced graduate students. Emphasis will be given to developing closer working relationships between universities, the national laboratories, and private industry. The program also is aimed at increasing the involvement in the national energy program of researchers at small minority institutions, and includes the support at selected universities of specialized research facilities which are not duplicated elsewhere in national laboratories or private industry.

Technical assessment projects.—This activity involves the independent assessment of existing or proposed technological initiatives in the Department, including examination of the base of research that underlies energy supply and utilization technologies. Also included are efforts undertaken in order to provide a complete evaluation of the satellite power system (SPS) concept, including studies of its environmental, economic, and societal impact, as well as its merits relative to other future energy options.

This account provides funds for capital equipment and construction projects necessary for the research and technology development and demonstration of the various energy technologies under examination in the energy supply research and development mission.

1. **Solar applications.**—Funding is for capital equipment for systems development and for market test and applications (demonstration) work.

2. **Solar technology.**—Construction of the Shenandoah total energy project, 10 megawatt Central Solar Receiver, small community solar thermal power experiment,

General and special funds—Continued

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES, PLANT
AND CAPITAL EQUIPMENT—Continued

and the Solar Energy Research Institute will continue. Construction of a solar industrial cogeneration project will be initiated. In the biomass program, architect/engineering work and long-lead procurements for the thermochemical gasification experimental facility will continue, and the ethanol from biomass production conversion system will be initiated in 1981.

3. *Electric energy systems and storage.*—Funding will be provided for miscellaneous capital equipment necessary to support the electric energy and storage systems, such as battery cycling and control equipment, test equipment and measuring devices.

4. *Geothermal.*—Construction will continue on the 50 megawatt geothermal demonstration plant in Valles Caldera, N. Mex. Funding will also provide for miscellaneous capital equipment to support the geopressured resources and geothermal technology development programs.

5. *Nuclear fission.*—The nuclear fission program includes the commercial nuclear waste, spent nuclear fuel, converter reactor systems, breeder reactor systems, and advanced nuclear systems programs.

The commercial nuclear waste construction provides for the continuation of the near surface test facility—phase II, and the initiation of design and construction of a salt test facility. Capital equipment funds provide support for the terminal isolation and waste treatment technology R. & D. efforts.

Capital equipment for the converter program will be utilized in the light water reactor safety program.

Construction funds in the breeder reactor program are primarily in support of the development of the liquid metal fast breeder reactor. The fuel and materials examination facility will continue as the program refocuses on the Fast Flux Test Facility.

6. *Magnetic fusion.*—Construction funds provide for the continuation of construction on all major devices and projects consisting of: large coil test facility, mirror fusion test facility, fusion materials irradiation test facility, and the Tokamak fusion test reactor. Capital equipment funds provide support to the basic research and technology development efforts in the confinement systems, applied plasma physics, development and technology and planning and projects subactivities.

7. *Environment.*—Laboratory research equipment will be provided for continuation of environmental research activities. Modifications and additions to research facilities include a biomedical laboratory addition at Lawrence Berkeley Laboratory, California and modernization of laboratories for study of environmental pollutants, Oak Ridge National Laboratory, Tennessee.

8. *Supporting research.*—Under basic energy sciences in 1981, the final increment of funding for the Chemical and Materials Sciences Laboratory at Lawrence Berkeley Laboratory is provided.

9. *General purpose facilities.*—Construction funds will provide for new common-use projects at multi-program laboratories. These Projects will serve purposes common to several programs, typically utilities or general office and laboratory space.

1. *Uranium resource assessment.*—The 1981 uranium resource assessment program continues efforts to provide data for use in assessing the nuclear fuel resources of the United States, to reduce the uncertainties surrounding the estimates, and to assess the availability and economics of domestic nuclear fuel resources.

The major program activities in 1981 will provide for completion of 116 priority quadrangles; continue support of the International Uranium Resource Evaluation program; and support application of advanced technology work.

2. *Uranium enrichment activities.*—This program provides for the enrichment of uranium and uranium compounds in the isotope U-235. Activities include the operations of the Department's three gaseous diffusion plants located at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio; production of feed, recovery of enriched uranium, process and long-range technical support, and other supporting activities.

The gas centrifuge operations and support program provides for those activities related to the development and operation of the gas centrifuge process for the enriching of uranium compounds in the isotope U-235. Specific activities include the operation and maintenance of pilot and demonstration facilities, process development, technology transfer, and other activities.

3. *Advanced isotope separation technology.*—The 1981 funding level will permit the accelerated development of two selected uranium separation processes. Risk analysis and cost projections will be performed and detailed engineering designs will begin on two development modules.

1. *Uranium resource assessment.*—This program provides support for the assessment of nuclear fuel resources of the United States. Specific activities include improvements to the Grand Junction, Colo., office and lab facility and procurement of exploration and assessment related capital equipment.

2. *Uranium enrichment activities.*—This program provides for the enrichment of uranium and uranium com-

General and special funds—Continued

URANIUM ENRICHMENT, PLANT AND CAPITAL EQUIPMENT—Continued

pounds in the isotope U-235. Activities include the continuation of the program to improve and update the existing gaseous diffusion cascades to both increase the capacity and improve plant efficiency. This activity is scheduled for completion in 1982. The Department's three gaseous diffusion plants are located at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio.

The gas centrifuge operations and support program provides for those activities related to the development of the gas centrifuge process for the enriching of uranium compounds in the isotope U-235. Specific activities include the procurement of centrifuge hardware and the construction of the gas centrifuge enrichment plant at Portsmouth, Ohio.

3. *Advanced isotope separation technology.*—Capital equipment funds support an accelerated technology development program. Construction funds provide for initiation of an isotope research and development laboratory providing office and laboratory space at Los Alamos, N. Mex., and an advanced isotope separation laboratory at Livermore, Calif., to house two isotope separation development modules.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT*

* See Part III for additional information.

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), **[\$746,627,000]** \$691,650,000, to remain available until expended [Provided, That no part of the sum herein appropriated shall be used for the field testing of nuclear explosives in the recovery of oil and gas]. (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980; additional authorizing legislation to be proposed.)

1. *Coal.*—The principal objectives of this program are to accelerate the development of environmentally acceptable technologies for converting coal to liquid and gaseous fuels; to foster development of advanced energy conversion systems, including magnetohydrodynamics and fuel cells; to stimulate adoption of new methods for the direct combustion of coal; to develop improved coal mining systems and increase coal use through improved coal preparation and environmental control technologies.

Funds are provided in 1981 to complete the donor solvent and the H-coal pilot plants and continue the solvent refined coal liquefaction plants. Increases in coal gasification will provide for accelerated development of in situ gasification technology, completion of the catalytic gasification pilot plant and operation of the hydrogasification pilot plant.

2. *Petroleum.*—This program will develop improved technologies for the exploration, development and production of petroleum resources including research and demonstration projects to increase the ultimate recovery of oil using enhanced recovery techniques. The program also includes activities to develop a commercial oil shale recovery technology which will assure production of this resource within acceptable economic and environmental costs. In 1981 budgetary resources are provided to develop modified in situ oil shale technology by 1982 and to initiate a micellar polymer test and field test down hole steam generators.

3. *Gas.*—This program provides for the assessment of natural gas resources and the development of advanced technologies to produce marginal gas resources using enhanced gas recovery techniques. The program is focused on research and development of technologies to recover Western tight gas sands, coal bed methane and Appalachian Basin shales. Funding in 1981 will allow completion of Eastern gas shales characterization and continue research and demonstration of production technology.

Status of Loan Guarantees (in thousands of dollars)

Position with respect to limitation on loan guarantees:				
3110	Limitation on commitments: Appropriation.....
3200	Commitments, gross.....	-854	-48,746
Cumulative balance of guarantees outstanding:				
4100	Outstanding, start of year.....	24,854
4200	New loan guarantees.....	24,854	24,746
4400	Repayments or prepayments.....	-1,200
4900	Outstanding, end of year.....	24,854	48,400

1. **Coal.**—This effort includes the coal loan guarantee program designed to increase low-sulfur coal production by guaranteeing loans to small coal producers. Other program activities include increasing coal production, including anthracite, through elimination of institutional barriers, continuation of coal production ombudsman activities, and accelerating introduction of new coal technologies including production of synthetic fuels and direct coal combustion.

2. **Naval petroleum reserves.**—This program includes those activities necessary to operate, explore, conserve, develop, and produce the naval petroleum reserves at the maximum efficient rate. This will include routine operation and maintenance, drilling, and equipping oil and gas wells for production, installation of on-reserve facilities and related pipeline systems to handle produced petroleum and related products.

General and special funds—Continued

ENERGY PRODUCTION, DEMONSTRATION, AND DISTRIBUTION—
Continued

3. *Oil shale development.*—The program's major objective is to coordinate the Federal commitment to develop our oil shale resources, including the naval oil shale reserves, in an environmentally acceptable manner. Long-range goals are to achieve commercial production of 400,000 barrels of oil from shale by 1990 and to provide a basis for a broad based industry to meet national needs. In 1981, funding provides for the development and implementation of Federal plans which address constraints to oil shale development.

4. *Oil and gas development.*—Major program objectives are to promote unconventional gas recovery (UGR) and enhanced oil recovery (EOR) techniques by accelerating exploration and development of oil and gas in high potential areas (including Federal lands), insure that adequate transportation and refining infrastructure exists, and eliminate institutional constraints on increased oil and gas production.

5. *Solar.*—The solar activity in this appropriation provides for the collection and analysis of market data to establish cost and performance goals for systems development in all solar technologies, provides support for the use of solar technology on Federal buildings, and plans for orderly early transfer of federally assisted solar technologies to the private sector.

6. *Leasing.*—The Federal leasing objectives are to establish and develop leasing programs and policies for all Federal leasable energy resources and to assess institutional barriers which constrain development and production.

1. *Buildings and community systems.*—Major focus will continue to be on improvements in the energy effi-

ciency of new and existing buildings. Other efforts will include energy efficiency from planned community systems, energy from urban waste, appliance standards, development of more efficient consumer products, energy conservation information dissemination and a Federal energy management program.

2. *Industrial.*—The industrial energy conservation program is designed to decrease industrial use of scarce fuels by substituting abundant resources and to increase end-use efficiency. Over 100 projects are focused on the primary areas of waste energy reduction, industrial process efficiency, and cogeneration.

3. *Transportation.*—Transportation uses more petroleum-derived fuel than all other energy-consuming sectors combined. The transportation energy conservation program's goals are improved energy efficiency in transportation to reduce the energy consumed by the transportation sector and to reduce, to the maximum extent practicable, transportation's nearly complete dependence on petroleum. Major efforts will continue in heat engine development and in electric and hybrid vehicles.

4. *State and local.*—The proposed Energy Management Partnership Act (EMPA) will provide financial and technical assistance to States to develop and broaden their energy planning and management capabilities and to develop a State energy strategy as well as plan and implement energy conservation programs. It will restructure several existing grant programs and consolidate grant administration procedures for other State energy conservation programs administered by DOE. EMPA proposes to expand current State conservation efforts into comprehensive energy programs to include supply and demand forecasting; emergency, facility and production impact planning; and coordination with local and interstate regional energy plans. The legislative proposal now pending in the Congress will be amended to include grants to support local government energy activities.

Other State and local grant programs in 1981 are designed to reduce energy consumption in school and health care facilities, and weatherize the homes of the poor.

5. *Energy information campaign.*—The goal of this program is to achieve significant energy savings by providing information to consumers. A large scale advertising campaign will be conducted using television, radio, magazines and newspapers. This campaign will present energy information, tell consumers how to use energy efficiently, and explain tax credits and other conservation incentives.

6. *Multi-sector.*—The Appropriate Technology program is designed to support and encourage individuals, small business, local nonprofit groups and Indian tribes to develop and demonstrate energy-related appropriate technologies that match community energy requirements with community energy resources. The program's emphasis is on small scale, low-cost technologies. DOE provides funds to groups or individuals who ordinarily would not have access to such support. In addition, the Energy-Related Inventions program provides for invention evaluation by the National Bureau of Standards. Promising inventions are then recommended to DOE for support.

7. *Energy impact assistance.*—This program provides assistance to States experiencing significantly higher employment as a result of energy supply development. In 1981, funding will be increased to \$150 million to provide grants for State and local planning and implementation grants so States can establish mechanisms to help their local communities. The increased funding depends upon enactment of legislation authorizing the State revolving funds and loan guarantees and extending coverage of the assistance to a broader range of energy projects. Assistance is provided by the Department of Energy to States through the Farmers' Home Administration. This assistance covers inland energy impacts; a separate Department of Commerce program provides assistance for coastal energy impacts.

The objective of this program is to decrease the vulnerability of the United States to disruptions in world petroleum markets by creating an effective stockpile to be used in the event such disruptions occur.

The administration continues to believe that the level of protection provided by a billion barrel reserve is needed. The 1981 budget includes funds for continued development of the petroleum reserve on a schedule to complete 750 million barrels (MMB) of Government storage by the late 1980's, depending on the availability of oil supplies.

Specifically, \$82,834,000 is provided for completion of facilities for phase I of the petroleum reserve (the first 248 MMB), continued facility development of phase II (an additional 290 MMB), and detailed planning for phase III facilities (an additional 200 MMB).

Oil acquisition for the SPR could resume in 1980, depending on the availability of oil in world oil markets. No additional budget authority is requested for oil purchases at this time because over \$4 billion is currently available for this purpose.

Note.—Includes \$4,100 thousand in 1979 for activities transferred from the Economic Regulatory Administration.

This program supports the ongoing activities of the Energy Information Administration. It provides for: (1) the development of short-, mid-, and long-term econometric, statistical and structural process models of energy supply, demand, price, transportation, and fuel conversion; (2) substantive information on electric and natural gas supply and consumption for analyses of supply, costs, consumption patterns, problems, trends, technology, and long-range industry plans and outlook—industry data is essential for effective and equitable regulation under the Federal Power Act and Natural Gas Act; (3) the analysis of the impacts of national and international energy policies, actions, and developments on the national economy, the major economic sectors, the regions, and specific socioeconomic groups; (4) develop-

ment and implementation of a detailed financial information reporting system to assess industry performance in the area of energy resource production and distribution; (5) collection of oil and gas production and reserves data; (6) development and implementation of the Emergency Management Information System; (7) validation of Federal energy data systems; (8) a national energy information system (NEIS) to collect and provide energy information to all users; and (9) making available the Department's energy information resources to other Federal agencies, the Congress and the public.

Note.—Excludes \$4,100 thousand in 1979 for activities transferred to the Energy Information Administration.

The Economic Regulatory Administration (ERA) has responsibility for programs which support national energy objectives by controlling petroleum and certain petroleum product prices, supplies, and distribution, by promoting conservation in usage and end-use alternatives, and by providing response mechanisms for energy emergencies.

1. *Fuels conversion.*—The objective of reducing consumption of petroleum and natural gas in the industrial and utility sectors through increased use of coal and other fuels is accomplished through prohibitions on the use of oil and gas in new facilities, individual prohibitions orders given to selected existing facilities, and further limitations on the use of gas in existing facilities. Exemptions from the prohibitions can be granted based on administrative review.

2. *Utility programs and regulatory intervention.*—The ERA encourages State public utility commissions and nonregulated utilities to adopt utility rate reforms through financial and technical assistance and through presentation of testimony and other evidence in support of such reforms at hearings of State regulatory agencies. The ERA seeks to assure continued reliability and adequacy of the Nation's electric power supply through strategic planning, investigation of outages, and encouragement of power pooling, interconnections, and wheeling.

3. *Compliance.*—To assure industry compliance with petroleum and coal regulations, ERA conducts audits of targeted firms. As civil or criminal violations are identified, ERA initiates necessary enforcement actions through administrative and/or judicial proceedings. Remedial action and recovery of petroleum industry overcharges result in returns of millions of dollars to consumers or to the U.S. Treasury. As of September 30, 1979 some \$5 billion in alleged oil industry overcharges had been identified.

4. *Regulation development.*—ERA is responsible for developing price and allocation regulations for crude oil and refined petroleum products. ERA is also developing regulations to encourage industries and utilities to burn coal instead of oil or natural gas. To reduce the regulatory burden on the public and on industry, ERA is reviewing, simplifying, and, where possible, eliminating

General and special funds—Continued

ECONOMIC [REGULATORY ADMINISTRATION] REGULATION—
Continued

several pricing and allocation programs to encourage competition in the petroleum industry.

5. *Emergency preparedness.*—The ERA will continue to maintain appropriate contingency measures for use in the event of a severe energy supply interruption. These include plans for dealing with national or regional energy emergencies, coordination of Federal and State emergency plans, and activities to ready a national plan for rationing motor gasoline.

6. *Fuels regulation.*—The ERA uses its crude oil supply, allocation and pricing programs to promote increased domestic production and equitable distribution of crude oil. It administers allocation programs for motor gasoline, synthetic natural gas (SNG) feedstocks, and propane. ERA is also responsible for issuing liquified natural gas (LNG) import/export orders and for conducting market and pricing analyses on decontrolled petroleum products.

7. *Hearings and appeals.*—The Office of Hearings and Appeals is located in the Office of the Secretary. It reviews and issues all final DOE orders of an adjudicatory nature other than those over which the Federal Energy Regulatory Commission has jurisdiction. It considers and issues decisions on appeals of DOE orders and examines exceptions.

The Federal Energy Regulatory Commission (FERC) is charged with regulating certain interstate aspects of the electric power, natural gas, and oil industries.

1. *Hydro regulation.*—The Commission issues permits and licenses for hydroelectric projects, enforces the terms and conditions of the licenses, and inspects all licensed dams or dams for which license applications are pending. The Commission has over 550 hydroelectric projects under license with ultimate generating capacity of over 52 million kilowatts. The Commission also makes in excess of 1,000 dam safety inspections annually. The Commission also performs studies, appraisals, and assessments of water resources, performs headwater benefits investigations, and encourages the development of small hydro sites as sources of energy.

2. *Multiresource regulation.*—The Commission is responsible for determining rates for the interstate sale or transmission of wholesale electric energy for 215 electric utilities and for overseeing electric utility corporate transactions and interlocking directorates. The Commission's rulemaking and jurisdictional responsibilities include review of Department of Energy actions and proposed rulemakings that affect FERC functions and adjudication of appeals from DOE remedial orders and denials of adjustments.

3. *Gas regulation.*—The Commission regulates 128 natural gas pipeline companies and approximately 20,000 producers that either transport or produce natural gas for sale in interstate or intrastate commerce and companies transporting natural gas in interstate commerce. The Federal Energy Regulatory Commission, in accordance with its assigned pipeline and producer regulation responsibilities, issues certificates of public convenience and necessity for the sale of gas by producers. Construction of new transportation facilities and extensions by interstate natural gas companies is simi-

larly regulated. Producer regulation requires the establishment and enforcement of appropriate wellhead prices for natural gas sold to pipelines or end users and acceptable wholesale rates to be charged by the pipeline firms for all natural gas sold in interstate commerce for resale.

4. *Oil regulation.*—The Commission provides enforcement and compliance with its rules, regulations, and orders for oil pipeline regulation. Responsibilities include the establishment of economical and reasonable transportation rates to provide incentives for increasing domestic oil supplies and insuring that consumers are not adversely affected by unjustifiably high tariffs. About 130 oil pipeline companies are under the jurisdiction of the FERC, with a basic valuation of more than \$17 billion. The Commission is reviewing the Trans-Alaska Oil Pipeline System to determine the reasonableness of cost overruns, rate schedules, and valuation of the system. The Commission seeks to encourage fair competition among the oil companies and to foster the development of future oil supplies in the Prudhoe Bay and North Slope by establishing prudent rate tariffs.

GEOTHERMAL RESOURCES DEVELOPMENT FUND
GEOTHERMAL LOAN GUARANTEE [AND INTEREST ASSISTANCE]
PROGRAM

For carrying out the Loan Guarantee [and Interest Assistance] Program as authorized by the Geothermal Energy Research, Development and Demonstration Act of 1974, as amended, [“\$181,000” \$43,266,000, to remain available until expended: *Provided*, That [the indebtedness guaranteed or committed to be guaranteed shall not exceed the aggregate of \$350,000,000: *Provided further*, That after September 2, 1984, no part of this or any other appropriation for the purpose of the Loan Guarantee and Interest Assistance Program shall be available for obligation] during fiscal year 1981, total commitments to guarantee loans shall not exceed \$206,000,000 of contingent liability for loan principal: *Provided further*, That in order to enable the obligation of funds for any payment of any valid claims against

the Geothermal Loan Guarantee Program for those loans still in force after September 2, 1984, appropriation acts for the Geothermal Resources Development Fund for fiscal years 1977, 1978, and 1980, are amended by deleting the last proviso contained therein. (Energy and Water Development Appropriation Act, 1980; additional authorizing legislation to be proposed.)

To make available the financial resources needed for commercial development of geothermal energy, DOE is administering a Federal loan guarantee program. The objectives of the loan guarantee program are: (1) to encourage and assist the private sector to accelerate development of geothermal resources by minimizing lenders' financial risk associated with the introduction of new technology; and (2) to develop normal borrower-lender relationships that will in time encourage the flow of credit without the need for Federal assistance.

Previous appropriations acts have provided that funds will not be available for obligation after September 2, 1984. A reappropriation is sought in 1981 to remove this limitation.

[ALTERNATIVE FUELS PRODUCTION]

ENERGY SECURITY RESERVE

[In order to expedite the domestic development and production of alternative fuels and to reduce dependence on foreign supplies of energy resources by establishing such domestic production at maximum levels at the earliest time practicable, there is hereby established in the Treasury of the United States a special fund to be designated the "Energy Security Reserve", to which is appropriated \$19,000,000,000, to remain available until expended: *Provided*, That these funds shall be available for obligation only to stimulate domestic commercial production of alternative fuels and only to the extent provided in advance in appropriations Acts: *Provided further*, That of these funds \$1,500,000,000 shall be available immediately to the Secretary of Energy to carry out the provisions of the Federal Nonnuclear Energy Research and Development Act of 1974, as amended (42 U.S.C. 5901, et seq.), to remain available until expended, for the purchase or production by way of purchase commitments or price guarantees of alternative fuels: *Provided further*, That the Secretary shall immediately begin the contract process for purchases of, or commitments to purchase, or to resell alternative fuels to the extent of appropriations provided herein: *Provided further*, That of these funds an additional \$708,000,000 shall be available immediately to the Secretary of Energy, to remain available until expended, to support preliminary alternative fuels commercialization activities under the Federal Nonnuclear Energy Research and Development Act of 1974, as amended, of which (1) not to exceed \$100,000,000 shall be available for project development feasibility studies, such individual awards not to exceed \$4,000,000; *Provided*, That the Secretary may require repayment of such funds where studies determine that such project proposals have economic or technical feasibility; (2) not to exceed \$100,000,000 shall be available for cooperative agreements with non-Federal entities, such individual agreements not to exceed \$25,000,000 to support commercial scale development of alternative fuels facilities; (3) not to exceed \$500,000,000 shall be available for a reserve to cover any defaults from loan guarantees issued to finance the construction of alternative fuels production facilities as authorized by the Federal Nonnuclear Energy Research and Development Act of 1974, as amended: *Provided*, That the indebtedness guaranteed or committed to be guaranteed under this appropriation shall not exceed the aggregate of \$1,500,000,000; and (4) not to exceed \$8,000,000 shall be available for program management.

This Act shall be deemed to satisfy the requirements for congressional action pursuant to sections 7(c) and 19 of said Act with respect to any purchase commitment, price guarantee, or loan guarantee for which funds appropriated hereby are utilized or obligated.

For the purposes of this appropriation the term "alternative fuels", means gaseous, liquid, or solid fuels and chemical feedstocks derived

from coal, shale, tar sands, lignite, peat, biomass, solid waste, unconventional natural gas, and other minerals or organic materials other than crude oil or any derivative thereof.

Within ninety days following enactment of this Act, the Secretary of Energy in his sole discretion shall issue a solicitation for applications which shall include criteria for project development feasibility studies described in this account.

Loan guarantees for oil shale facilities issued under this appropriation may be used to finance construction of full-sized commercial facilities without regard to the proviso in section 19(b)(1) of said Act requiring the prior demonstration of a modular facility.

In any case in which the Government, under the provisions of this appropriation, accepts delivery of and does not resell any alternative fuels, such fuels shall be used by an appropriate Federal agency. Such Federal agency shall pay into the reserve the market price, as determined by the Secretary, for such fuels from sums appropriated to such Federal agency for the purchase of fuels. The Secretary shall pay the contractor, from sums appropriated herein, the contract price for such fuels.

All amounts received by the Secretary under this appropriation, including fees, any other monies, property, or assets derived by the Secretary from operations under this appropriation shall be deposited in the reserve.

All payments for obligations and appropriate expenses (including reimbursements to other Government accounts), pursuant to operations of the Secretary under this appropriation shall be paid from the reserve subject to appropriations.] (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

An "Energy Security Reserve" was established in the 1980 Appropriation Act for the Department of the Interior and related agencies (Public Law 96-126) for the purpose of expediting the development and production of alternative fuels. Of the \$19,000,000,000 set aside in this reserve, \$2,208,000,000 was made available immediately by appropriation to carry out preliminary alternative fuels commercialization activities under the Federal Nonnuclear Energy Research and Development Act of 1974, as amended (42 USC 5901, et seq.). The Administration is proposing legislation to appropriate the balance of the Energy Security Reserve directly to the Secretary of the Treasury for loans to the proposed Energy Security Corporation.

1. *Cooperative agreements.*—This provides support for the development of commercial scale alternative fuel facilities. Individual agreements with non-Federal entities may not exceed \$25,000,000.

2. *Project feasibility studies.*—This provides for the development of feasibility studies of alternative fuel production facilities so that project sponsors are able to assess the technical needs and economic potential of such projects. Individual awards cannot exceed \$4,000,000.

3. *Price guarantee contracts.*—This provides for the purchase or production of alternative fuels through purchase commitments or product price guarantees and the financing of alternative fuel facilities through loan guarantees.

SOLAR AND CONSERVATION RESERVE

A "Solar and Conservation Reserve" was established in the 1980 Appropriation Act for the Department of the Interior and related agencies (Public Law 96-126) for the stimulation of solar energy use and conservation. Availability of amounts in the reserve is subject to additional authorization and appropriation action. Until effective projects are developed, the Administration will withhold requests for appropriations.

Legislation has been proposed to establish a revolving fund to finance the acquisition and use of facilities to store spent nuclear fuel. This radioactive material would be turned over to the Government by the operators of public utility nuclear power plants. The utilities would pay a fee for this service that would completely cover the cost of acquisition and operation of the storage facilities. Borrowing authority is included to provide additional flexibility in managing the program—particularly in the earlier years.

1. *Conservation, evaluation, and development of energy resources.*—The funds contributed by foreign countries, States, counties, municipalities, and private sources are used to conduct research and investigations to promote the conservation, evaluation, and development of energy resources.

2. *Washington Public Power Supply System.*—Funds are advanced by the Washington Public Power Supply System (WPPSS) to pay for services furnished in connection with the operation of WPPSS electric generating facilities at the Richland, Wash., new production reactor. The services provided by DOE contractors include lease of land, fire protection, utilities, maintenance of equipment, engineering support and estimated reactor costs chargeable to WPPSS.

3. *Construction, operation, and maintenance, Western Area Power Administration.*—When requested, the WAPA performs investigations or construction work with the funding provided by non-Federal entities under the Contributed Funds Act (43 U.S.C. 395, 396).

1. *Operations and maintenance.*—The Alaska Power Administration operates, maintains, and markets hydroelectric power from two Federal hydroelectric projects in Alaska—Eklutna and Snettisham. The 30,000-kilowatt Eklutna project is located near Anchorage and the 47,000-kilowatt Snettisham project near Juneau. Each project has over 40 miles of transmission facilities and associated switchyard and substation facilities. Project power is marketed at wholesale to the utilities serving the two market areas with the revenues returned to the U.S. Treasury. Its long-term contracts provide for periodic electric rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

2. *General investigations.*—The Alaska Power Administration participates along with State, private, and other Federal agencies in conducting general investigations involving engineering, economic, and environmental studies for water and power development potentials and for power marketing and transmission system analysis.

2900	Outstanding, end of year.....	2,400	4,800

The Bonneville Power Administration constructs, operates, and maintains transmission and related facilities and markets electric power produced at 30 Federal hydroelectric generating plants and obtained by purchase and exchange from 2 thermal plants. Customers include public and private utilities, Federal and industrial customers in the Pacific Northwest. It also sells and exchanges power with utilities in California and British Columbia, Canada, and wheels power from non-Federal hydroelectric and thermal generating plants.

The estimated amounts of peak hydroelectric generating capacity on the Federal system and of other power to be transmitted on the system are as follows (in thousands of kilowatts):

	Oct. 1, 1980	Oct. 1, 1981
Federal projects.....	20,927	22,319
Power wheeled and exchanged for non-Federal utilities and Federal purchases.....	9,857	20,245
Total.....	30,784	42,564

The transmission facilities will integrate new generating facilities into the system. Additional generating units being installed in conformance with National Environmental Policy Act requirements at new and existing Federal projects, will bring the total Federal installed capacity from 20.9 million kilowatts to 22.3 million kilowatts.

Budget program.—BPA's 1981 program will be financed from revenues and proceeds from the sale of revenue bonds or notes to the U.S. Treasury which will be repaid from future revenues.

BPA fund activities include:

1. **System operation and maintenance.**—Provides for load forecasting and generation planning, energy conservation, the scheduling and dispatch of power, operation and maintenance of the system, and the negotiation of power sales and wheeling contracts, billing and servicing these contracts, energy conservation pilot projects and the review and establishment of wholesale power and wheeling rates.

2. **Purchase power and wheeling.**—Provides for acquisition of power from other entities by purchase and exchange, and use of transmission facilities of others.

3. **Interest on borrowings.**—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's construction program under \$1,250,000,000 borrowing authority provided by Public Law 93-454.

4. **Associated project costs.**—Provides for repayment of the operation and maintenance costs of the U.S. Corps of Engineers and U.S. Bureau of Reclamation power generating projects; interest and amortization on the U.S. Bureau of Reclamation capital investment in power generating facilities; and coordination agreement payments to the Federal Energy Regulatory Commission.

1. **Transmission system construction.**—Provides for continuation of construction work on transmission lines, substations, and related facilities initiated in prior years, and initiation of construction on system additions.

2. **Reserve for contingencies.**—Provides for the purchase of power in low water years; repair and/or replacement of facilities affected by natural and man-made emergencies including the resulting additional costs for contracting, construction, and operation and maintenance work, unavoidable increased costs for the planned program due to necessary but unforeseen adjustments including engineering and design changes, contractor and other claims and relocations.

Reimbursable programs.—Provides for the acquisition of energy and other services provided by BPA under various types of reimbursable arrangements.

1. **Energy purchase trust agreements.**—Provides for the purchase of replacement energy from other sources for BPA industrial and utility customers during periods when nonfirm energy is not available from the Federal system, with BPA acting as an agent in acquiring nonfirm energy in their behalf for which each customer provides funds in advance.

2. **Other.**—BPA constructs, operates, and maintains transmission facilities which are not provided by BPA under its customer service policy when requested and financed by other entities. Also, BPA facilities are relocated as required for highway construction and other purposes under similar arrangements.

Financing.—Public Law 93-454, the Federal Columbia River Transmission System Act, provides for the use by the Bonneville Power Administration of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of the Bonneville Power Administration. These receipts result primarily from the sale of power and wheeling. Public Law 93-454 also provides for the availability of \$1,250,000,000 in authority to borrow from the U.S. Treasury at rates comparable to borrow-

ings at open market rates for similar issues. Operating revenues are expected to amount to approximately \$677,500,000 in 1981. Its long-term contracts provide for periodic electric rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Operating results.—Estimated cumulative retained earnings at the close of the budget year are \$122,338,000 a net increase of \$38,500,000 from 1980.

The Administration markets power generated at Corps of Engineers Hydroelectric generating plants in a 10-state area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 21 projects now in operation. A schedule of kilowatt capacity of projects in operation or under construction follows:

	Installed capacity
Projects in operation	2,712,375
Project under construction: Richard B. Russell (initial operation beginning 1984)	300,000
Total	3,012,375

The Administration sells power at wholesale primarily to publicly—and cooperatively—owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. Southeastern Power Administration does not own or operate any transmission facilities. Its long-term contracts provide for periodic electric rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements. The SEPA program includes the following activities:

1. *System operation and maintenance.*—Provision is made for investigation and planning of proposed water

resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts to be deposited in the Treasury are \$54,223,000 for 1979, and are estimated to be \$54,510,000 for 1980, and \$55,110,000 for 1981.

The Southwestern Power Administration operates as a marketing agent to dispose of hydroelectric power and energy produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,680 miles of high voltage transmission lines, 32 sub and switching stations, and 20 radio and microwave stations and sells its power at wholesale primarily to publicly—and cooperatively-owned electric distribution utilities.

Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Southwestern Power Administration is also responsible for scheduling and dispatching power, negotiation of power sales contracts, and construction of facilities required to upgrade the established system to meet changing customer load requirements.

1. *System operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Provision is also made for maintaining the power transmission system and related facilities in accordance with acceptable standards to assure reliable service to the interconnected customers. Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Estimated proprietary receipts which are deposited in the treasury are \$45,428,000 for 1979, and are estimated to be \$59,256,000 in 1980, and \$62,704,000 in 1981.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

3. *Construction.*—The construction program provides transmission, substation and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place at the time these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the gross expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly net expenditures for the thermal power and energy and transmission service provided to SWPA.

The Western Area Power Administration is responsible for marketing electric power in 15 western States from generating projects of the Water and Power Resources Service (formerly Bureau of Reclamation), Corps of Engineers and the International Boundary and Water Commission's powerplant in Texas. Western operates and maintains 16,000 miles of high-voltage trans-

mission lines and over 200 associated substations/switchyards and constructs transmission facilities including new transmission lines, substations and essential additions and modifications to existing facilities.

Western sells power at wholesale to publicly and co-operatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

1. *Systems operation and maintenance.*—A total of 11 systems will be operated and maintained to market power produced by others. In 1981, revenue will be available from Boulder Canyon project operations for payment of Western's power marketing transmission expenses previously covered by reimbursements.

Commercial power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal government agencies, and private utilities. Receipts are deposited in the Reclamation fund, the General fund, the Colorado River Dam fund, and the Lower Colorado River Basin Development fund.

Energy sales and revenues resulting from these Western power systems operations excluding the Upper Colorado River Storage project, the Fort Peck project, the Navajo generating plant, and the Central Arizona project are as follows:

	1979 actual	1980 est.	1981 est.
Energy sales (millions of kilowatt hours)	25,287	24,812	24,056
Revenue from energy sales (in thousands of dollars)	205,966	199,167	195,283

2. *Purchase power and wheeling.*—The program includes \$60,700,000 in 1981 for purchase of power and wheeling and fuel conservation excluding credits for net billing. The establishment in 1961 of a net billings procedure for certain of these power transactions between Federal Government and non-Federal utilities precludes the need for an additional \$15,297,000 in 1981.

System construction.—Construction and engineering studies will continue in 1981 on Western's transmission systems. Construction of transmission facilities is necessary to maintain system reliability and for marketing of electric power produced from generating plants of others. Funding is provided for replacement of deteriorated wood poles, replacement of damaged wood or steel structures, reconditioning, and upgrading transmission lines to increase system capacity and reliability and for construction operation and maintenance control and dispatch facilities.

Western's operation and maintenance and power marketing expenses for the Upper Colorado River storage project, the Colorado River Basin project and the Fort Peck project will be financed from revenues collected by the Department of Energy. Appropriations are required for transmission system construction on the Upper Colorado River storage project. Revenues may not be used to finance construction activities for this project.

Western operates and maintains approximately 3,000 miles of transmission lines and over 40 substations associated with these projects. Wholesale power is provided to utilities over the interconnected high-voltage transmission systems. Long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Energy sales and revenues from power operations associated with these projects are as follows:

	1979 actual	1980 estimate	1981 estimate
Energy sales (millions of kilowatt hours).....	10,842	11,100	11,949
Revenue from energy sales (in thousands of dollars).....	112,699	120,580	148,118

1. *Upper Colorado River storage project.*—Western markets power and operates and maintains the power transmission facilities of units of the Upper Colorado River storage project and the Seedskadee participating project. Provision is made for payment for purchase of electricity and wheeling fees to meet contractual obligations and fuel conservation.

2. *Colorado River Basin project.*—The 1981 program provides for Western's power marketing and operation and maintenance costs for the Navajo project participation agreement and Central Arizona project. Financing will be from revenue.

3. *Fort Peck project.*—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities and the Department of Energy operations and maintains the transmission system and performs power marketing functions. Funding is provided for reconstruction of the Fort Peck-Harve transmission line.

Construction.—Construction and engineering studies will continue on power transmission facilities of the Upper Colorado River storage project including purchase of capital electrical equipment used for upgrading the existing power system to maintain system reliability.

DEPARTMENTAL ADMINISTRATION

Federal Funds

General and special funds:

DEPARTMENTAL ADMINISTRATION*

* See Part III for additional information.

For salaries and expenses of the Department of Energy necessary for departmental administration and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction or expansion or for the purchase, construction or acquisition of capital

equipment and other expenses incidental thereto, the hire of passenger motor vehicles; official entertainment expenses (not to exceed \$35,000); and any moneys received as authorized by section 201 of Public Law 95-238, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), \$361,168,000 to remain available until expended.

[DEPARTMENTAL ADMINISTRATION, OPERATING EXPENSES]

[For salaries and expenses of the Department of Energy necessary for departmental administration and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the hire of passenger motor vehicles; official entertainment expenses (not to exceed \$35,000); \$228,279,000, of which \$6,165,000 shall be for the Office of Inspector General and any moneys received as authorized by section 201 of Public Law 95-238, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended.]

[DEPARTMENTAL ADMINISTRATION, PLANT AND CAPITAL EQUIPMENT]

[For expenses of the Department of Energy necessary for departmental administration and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, or for the purchase, construction or acquisition of capital equipment and other expenses incidental thereto \$36,015,000, to remain available until expended.] (Energy and Water Development Appropriation Act 1980; additional authorizing legislation to be proposed.)

DEPARTMENTAL ADMINISTRATION—Continued

Note—Excludes \$3,884 thousand in 1981 for activities transferred to:

	1981
Energy supply-operating expenses.....	\$2,871
Federal Energy Regulatory Commission.....	580
Fossil Energy Research and Development.....	433

Departmental administration.—This account includes funds for a wide array of policy development and analysis activities, institutional and public liaison functions, and other program support requirements necessary to insure effective DOE operation and management. Specific activities provided for are:

1. **Policy analysis and systems studies.**—Resources are dedicated to the development of the National Energy Plan, as mandated by Public Law 95-91; analysis and development of basic energy policies and program strategies; energy supply disruption contingency planning; promotion of competition among energy industries; improvement of departmental planning and management through the planning, programming and budgeting system; and analysis of topics of Congressional and Presidential concern.

2. **International affairs.**—This program supports the formulation of international energy policy; analyses and assessments of the current world energy situation, and international cooperation in energy matters.

3. **Management and support.**—Salaries, travel, contracts, capital equipment, and other costs associated with the management and support functions are carried under this activity.

4. **Intergovernmental and institutional relations.**—These activities include consumer, public and intergovernmental affairs, technical assistance for Indian tribes considering energy development, manpower, assessments of developing energy industries, a technical information clearinghouse, and evaluation and support for energy-related inventories.

5. **In-house energy management.**—This program funds energy conservation surveys of existing facilities to determine conservation investment opportunities and central plant fuel conversion studies to develop fuel conversion requirements. These studies identify cost-effective energy saving projects and determine the most economical fuel conversion alternatives. This program also funds energy conservation retrofit projects selected in order to achieve a 20% reduction in DOE energy consumption by 1985 as mandated by Executive Order No. 12003, and fuel conversion projects to eliminate the use of scarce oil or natural gas and substitute coal and other renewable energy resources. Both efforts are designed to improve DOE energy management and set an example for other Federal agencies.

6. **Security investigations.**—This activity covers the costs related to performance of security investigations for persons with access to restricted data.

7. **Other departmental administration.**—This activity includes cost of work for others, inventories, plant engineering and design, and miscellaneous revenues. Cost of work for others is work performed under orders placed with Department of Energy by other organizations. Revenues derived under this activity offset the requested appropriations. Inventories are general purpose items maintained in field organizations. Plant engineer-

ing and design furnishes architectural and engineering services for planning and design of major construction projects under consideration for future authorization. Miscellaneous revenues are derived from the sale of Department of Energy products and services (including Cost of work for others). These revenues directly offset the funds appropriated to this account.

Special foreign currency funds are used for foreign in-country activities and travel to support international cooperation in nonnuclear technologies (country energy assessment program). These cooperative efforts are designed to improve the economic and social development

of selected less developed countries by providing alternative energy options.

ADMINISTRATIVE PROVISIONS

Appropriations to the Department of Energy under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

From this appropriation, transfers of sums may be made to other agencies of the government for the performance of work for which this appropriation is made.

None of the funds made available to the Department of Energy under this act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs [in this or future appropriations Acts.] in an appropriation act.

The Secretary is authorized to accept lands, buildings, equipment and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: [Provided, That revenues received from the sale of any products produced in facilities operated as part of Department of Energy programs appropriated under this Act shall be covered into the Treasury as miscellaneous receipts.] (Public Law 96-126, making appropriations for the Department of the Interior and Related Agencies, 1980.)

GENERAL PROVISIONS, DEPARTMENT OF ENERGY

SEC. 101. Appropriations to the Department of Energy under this title for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services. From these appropriations, transfers of sums may be made to other agencies of the United States Government for the performance of work for which this appropriation is made. None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in [this] an appropriation Act. The Secretary is authorized to accept lands, buildings, equipment and other contributions from public and private

sources and to prosecute projects in cooperation with other agencies, Federal, State or private.

[SEC. 102. None of the funds appropriated for Department of Energy activities by this Act shall be available for any purpose related to the obtaining or issuing of a license to operate the Waste Isolation Pilot Plant, Delaware Basin, Southeast New Mexico (Project 77-13-f), or for any purpose related to the storage at such plant of radioactive waste not resulting from the national defense activities of the Department of Energy.]

SEC. 102. The Secretary is authorized, in any fiscal year, to transfer funds from any appropriation available for the Department of Energy to the account under the heading "Strategic Petroleum Reserve," to the extent needed to withdraw oil from the Strategic petroleum reserve.

SEC. 103. None of the funds appropriated for Department of Energy activities by this Act shall be used to pay expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 104. Not to exceed 5 per centum of any appropriations made available for the current fiscal year for Energy Supply, Research and Development Activities; Uranium Supply and Enrichment Activities; General Science and Research Activities; Atomic Energy Defense Activities; and Departmental Administration Activities may be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and any such proposed transfers shall be submitted promptly to the committees on Appropriations and the appropriate authorizing committees of the House and Senate for approval. (Energy and Water Development Appropriation Act, 1980.)

TITLE V—GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

[SEC. 502. There is appropriated, out of any money in the Treasury not otherwise appropriated, for an additional amount for "Construction of an Extension to the New Senate Office Building" \$52,583,400 toward finishing such building and to remain available until expended: Provided, That the amount of \$137,730,400 shall constitute a ceiling on the total cost for construction of the Extension to the New Senate Office Building.

It is further provided that such building and office space therein upon completion shall meet all needs for personnel presently supplied by the Carroll Arms, the Senate Courts, the Plaza Hotel, the Capitol Hill Apartments and such building shall be vacated.] (Energy and Water Development Appropriation Act, 1980.)

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the Food and Drug Administration; for payment of salaries and expenses for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; for rental of special purpose space in the District of Columbia or elsewhere; for miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on [his] the Secretary's certificate, not to exceed \$10,000; [\$312,796,000] \$332,779,000. (Public Law 96-108, making appropriations for Agriculture, Rural Development, and related agencies, 1980.)

¹ Includes capital investment as follows: 1979, \$14,340 thousand; 1980, \$14,340 thousand; 1981, \$14,340 thousand.

NOTES

Excludes \$53 thousand in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$41 thousand) and 1980 (\$48 thousand) are included above.

Excludes \$144 thousand in 1981 for activities transferred to Health services, Health Services Administration. Comparable amounts for 1979 (\$90 thousand) and 1980 (\$144 thousand) are included above.

The Food and Drug Administration (FDA) is charged with the administration and enforcement of laws concerning dangerous, misbranded, and adulterated foods, drugs, human biologics, medical devices, cosmetics, and manmade sources of radiation.

1. *Foods.*—FDA is responsible for insuring the safety and quality of a major segment of the Nation's food supply and the safety of the Nation's cosmetic supply. FDA reviews industry petitions and publishes tolerances for the safe use of food additives, conducts research, develops analytical methods to detect and prevent food and cosmetic adulteration, sets standards for classes of food and defines good manufacturing and sanitary practices. To insure cooperation and compliance with the foregoing, FDA inspects food and cosmetic processing plants and marketing establishments, analyzes collected samples to verify that these products are safe and properly labeled and—when necessary—takes regulatory action to obtain compliance with the law.

2. *Drugs and devices.*—FDA is charged with insuring that human and animal drugs, human biologics, and medical devices are safe, effective, and properly labeled. FDA reviews research and manufacturing data to support the safety and efficacy of these products prior to marketing, evaluates literature and experience reports submitted by industry and the medical profession, and conducts research. FDA also inspects manufacturing firms, reviews labeling, analyzes samples, and—when necessary—takes regulatory action to enforce the legal requirements.

3. *Radiological products.*—FDA is responsible for eliminating unnecessary exposure to electronic product radiation through research, surveillance, and performance standards.

4. *National Center for Toxicological Research.*—FDA conducts research programs to study the biological effects of potentially toxic chemical substances found in man's environment.

5. *Program management.*—This activity includes FDA's executive and administrative functions.

The Buildings and facilities appropriation provides funds for projects related to the repair, alteration, and improvement of all buildings and facilities of FDA. In addition, the appropriation for 1981 includes funding to initiate construction of new FDA Headquarters labora-

tories, which are essential for the effective conduct of research to support regulatory decisions.

FDA certifies batches of antibiotics, insulin, and color additives for use in foods, drugs, and cosmetics. It also lists color additives for use in foods, drugs, and cosmetics (21 U.S.C. 346a, 356, 357, 376). These services are financed wholly by fees paid by the industries affected.

HEALTH SERVICES ADMINISTRATION

Federal Funds

General and special funds:

HEALTH SERVICES*

*See Part III for additional information.

For carrying out titles III, V, VII, X, [and] XI, and XII of the Public Health Service Act, the Act of August 8, 1946 (5 U.S.C. 7901), section 1 of the Act of July 19, 1963 (42 U.S.C. 253a), section 108 of Public Law 93-353, section 427(a) of the Federal Coal Mine Health and Safety Act as amended, and titles V and XI of the Social Security Act, [\$1,325,278,000] \$1,437,280,000, of which \$1,800,000 shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with Hansen's disease and [\$3,000,000] \$6,969,000 to be available until expended, shall be [for the renovation of the National Hansen's Disease Center] used to renovate the Public Health Service hospitals and the National Hansen's Disease Center; Provided, That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health, Education, and Welfare] and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: Provided further, That when the Health Services Administration operates an employee health program for any Federal department or agency, payment for the estimated cost shall be made by way of reimbursement or in advances to this appropriation: [Provided further, That none of the funds appropriated under section 314(d) of the Public Health Service Act may be used for the payment of salaries or expenses for any State-level administrative employee:] Provided further, That when the Health Services Administration provides health care services to active duty Department of Defense uniformed services personnel and their dependents, to retired uniformed services personnel and their dependents, and to the dependents of deceased uniformed services personnel in a Public Health Service medical facility, payment for the estimated cost shall be made by way of reimbursement to this appropriation. During 1981 and within the resources and authority available, (section 335, Public Health Service Act) gross obligations for the principal amount of direct loans shall not exceed \$1,000,000. (Additional authorizing legislation to be proposed for \$133,832,000.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980. For those activities or portions of activities of this account that were deferred from regular appropriation consideration, Public Law 96-123 provides funding at the current rate. For all other activities or portions of activities of this account, Public Law 96-123 provides funding at a rate consistent with amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This appropriation includes activities that provide health services primarily to low income people and their families through categorical project and formula grant programs. Emphasis will be placed on ambulatory health care projects in urban and rural areas currently underserved by health professionals. In addition, services are provided directly to certain Federal beneficiaries through the Public Health Service hospital system. These health services program are:

1. *Community health services*—(a) *Community health centers*.—The request supports 886 Community Health Centers serving 5.2 million medically underserved urban and rural users; 132 black lung clinics serving 69,000 urban and rural users; and 52 primary care research and demonstration projects.

(c) *Comprehensive health grants to States*.—Transferred to the Center for Disease Control.

(d) *Hypertension*.—The request supports 57 State and territorial programs serving 7,800,000 persons with hypertension screening, referral, and follow-up services when necessary.

(e) *Maternal and child health*.—The request supports formula allocations to States and discretionary project grants to State agencies and institutions of higher learning promoting the health of medically underserved mothers and children and crippled children. A total of

397,000 women will receive physician maternity services; 75,000 infants will receive intensive care services; and 2,789,000 children will be provided physician services. Maternal and Child Health Research and Training funds will support 52 research projects and 54 training grants to train 7,369 health professionals and provide services to 88,000 persons.

(f) *Sudden infant death syndrome (SIDS) counseling program*.—32 SIDS projects will provide counseling to 3,800 families.

(g) *Genetic services*.—Screening, education, and counseling, and referral services will be provided to 1,263,000 persons at risk or who are victims of genetic disease.

(h) *Hemophilia*.—24 diagnosis and treatment centers will serve 2,400 patients.

(i) *Family planning*.—This request will support 235 family planning grants funding 5,125 family planning clinics serving 4,088,800 adults and adolescents; 19 training projects to train 13,740 professional clinic staff members; 15 services delivery improvement projects; and 10 information and education projects.

(j) *Migrant health*.—The request will support 112 centers providing comprehensive primary health services to 223,296 migrants and 367,704 seasonal farmworkers. In addition, 4,200 persons will receive inpatient hospitalization services.

(k) *National Health Service Corps*.—The request supports the placement of 4,528 NHSC assignees in 1,498 sites in Health Manpower Shortage Areas. The assignees will provide health care services to 2,836,900 persons. Loans are made to community organizations to meet the initial costs of establishing National Health Service Corps health care delivery sites.

2. *Direct delivery of medical services and emergency medical services systems development*—(a) *PHS hospitals and clinics*.—The request will support the operation of a national system of health service comprising eight general hospitals, the National Hansen's Disease Center, 27 free-standing clinics, and nearly 400 contract health care providers. The system is designed to make services accessible to 450,000 statutory beneficiaries.

(d) *Emergency medical services systems development demonstration*.—This request will support 51 operational emergency medical services systems serving a population of 35,700,000 persons. After providing grant assistance to 292 EMS regional systems, the Administration proposes phasing out the EMS program by 1982.

INDIAN HEALTH SERVICES

For expenses necessary to carry out the Act of August 5, 1954 (68 Stat. 674), the Indian Self-Determination Act, the Indian Health Care Improvement Act, and titles III and V and section 757 of the Public Health Service Act, including hire of passenger motor vehicles and aircraft; purchase of reprints; payments for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, **[\$538,874,000] \$601,819,000. Provided,** That funds made available to tribes and tribal organizations through grants and contracts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2203; 25 U.S.C. 450) shall remain available until September 30, **[1981] 1982. Funds provided in this Act, and those provided in fiscal year 1980, for the Indian Health Service, may be used for one-year contracts and grants which are to be performed in two fiscal years, so long as the total obligation is recorded in the year for which the funds are appropriated. (Department of the Interior and Related Agencies Appropriation Act, 1980.)**

¹ Includes capital investment as follows: 1979, \$4,500 thousand; 1980, \$4,220 thousand; 1981, \$8,031 thousand.

NOTES

Excludes \$47 thousand in 1981 for activities transferred to General Departmental Management, Department of Health and Human Services. Comparable amounts for 1979 (\$47 thousand) and 1980 (\$47 thousand) are included above.

Excludes \$225 thousand in 1981 for activities transferred to Health Services, Health Services Administration. Comparable amounts for 1979 (\$117 thousand) and 1980 (\$171 thousand) are included above.

This program provides medical care and public health services for American Indians and Alaska Native people.

1. *Clinical services.*—This activity provides a wide range of comprehensive health care services to over 750,000 American Indians and Alaska Natives, including: inpatient and outpatient health services through 50 hospitals and their outpatient departments, 103 health centers (including 19 school health centers) and several hundred small health stations and satellite clinics; contracts with non-Federal hospitals, clinics, private physicians and dentists; and contractual arrangements with state and local health organizations. It is expected that 449,730 inpatient days and 3,411,000 outpatient visits will be provided. An increase in the quality and quantity of health services provided in IHS hospitals will be experienced in 1981 as a result of increased resources to newly constructed facilities completed in 1980 at Ada, Okla.; Cherokee, N.C.; Bethel, Alaska; and Red Lake, Minn. In 1981, new federally recognized Tribes (Pascua Yaqui of Arizona; Modoc, Wyandotte, Ottawa, and Peoria Tribes of Oklahoma) will receive health services through increased funds contained in the 1981 request.

2. *Preventive health.*—This includes programs in sanitation, health education, nutrition, maternal and child health, school health, tuberculosis and other communicable disease control, medical social services, public health nursing, and family planning.

3. *Urban health projects.*—This activity contains the resources to fund contracts with 41 urban Indian health organizations located in various cities throughout the United States. These organizations make health services more accessible to the urban Indian population.

4. *Indian health manpower.*—This activity provides primarily for the training of scholarship recipients in health care fields. It also provides for identification and recruitment of scholarship recipients, and experimental summer employment. Approximately 2,000 students will receive assistance in 1981.

5. *Tribal management.*—This activity is the primary source of resources for strengthening Tribal capacity to man and manage their own health care delivery systems.

General and special funds—Continued

INDIAN HEALTH SERVICES—Continued

6. *Program management.*—This activity includes headquarters and area office staffs required for program direction and support.

* Includes capital investment as follows: 1979, \$4,928 thousand; 1980, \$13,989 thousand; 1981, \$9,300 thousand.
* Selected resources as of September 30 are as follows: Stores: 1978, \$143,645 thousand; 1979, \$120,091 thousand; 1980, \$116,213 thousand; 1981, \$97,033 thousand.

1. **Hospitals—(a) New and replacement.**—A request of \$14,180,000 will provide for completing the construction of the comprehensive health facility at Chinle, Ariz., and provide for the purchase of movable groups II and III equipment. In addition, \$10,000,000 is proposed for continued construction of the Tahlequah, Okla. hospital.

(b) **Modernization and repair.**—The request of \$2,250,000 will provide for alterations to the Winnebago health facility (\$650,000) and miscellaneous alterations to the Sells health facility (\$1,600,000).

4. **Sanitation facilities.**—The 1981 request of \$50,240,000 will provide sanitation facilities projects to serve 6,200 new and improved Indian homes.

6. **Indian health facilities improvement fund.**—During 1981 the IHS will maintain accreditation of 32 hospitals that were accredited at the end of 1979 and will seek to attain accreditation of 4 additional hospitals. Laboratory services will continue to receive emphasis to maintain the College of American Pathologists accreditation that was attained during 1980. The emergency services department of each hospital will be assessed and deficiencies corrected. The IHS will continue to maintain all of its facilities (hospitals and clinics) as providers under Medicare and Medicaid. Billing procedures will continue to maximize the collections for services rendered to Title XVIII and XIX eligible Indian patients treated in IHS facilities.

ADMINISTRATIVE PROVISIONS, HEALTH SERVICES ADMINISTRATION

Appropriations in this Act to the Health Services Administration, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities: *Provided*, That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriations Acts. (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

CENTER FOR DISEASE CONTROL

Federal Funds

General and special funds:

PREVENTIVE HEALTH SERVICES

To carry out [title] titles III and XVII of the Public Health Service Act, title IV of the Health Services and Centers Amendments of 1978, the Federal Mine Safety and Health Act of 1977, and the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and purchase, hire, maintenance, and operation of aircraft, [\$282,415,000] \$391,036,000 of which [\$11,436,000] \$30,951,000 shall remain available until expended and shall be for construction and equipment of facilities of or used by the Center for Disease Control (\$29,951,000) and for providing assistance in health emergencies (\$1,000,000): Provided, That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training: Provided further, That none of the funds appropriated under Section 314(d) of the Public Health Service Act may be used for the payment of salaries or expenses for any State-level administrative employee. (Additional authorizing legislation to be proposed for \$3,000,000.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980. For those activities or portions of activities of this account that were deferred from regular appropriation consideration, Public Law 96-123 provides funding at the current rate. For all other activities or portions of activities of this account, Public Law 96-123 provides funding at a rate consistent with amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$7,624 thousand; 1980, \$13,308 thousand; 1981, \$35,681 thousand.

NOTES

Includes \$52,000 thousand in 1981 for activities previously financed from "Health Services Administration". Comparable amounts for 1979 (\$90,000 thousand) and 1980 (\$68,000 thousand) are excluded above.

Excludes \$53 thousand in 1981 for activities transferred to General Departmental Management, Department of Health and Human Services. Comparable amounts for 1979 (\$41 thousand) and 1980 (\$53 thousand) are included above.

Excludes \$117 thousand in 1981 for activities transferred to Health services, Health Services Administration. Comparable amounts for 1979 (\$90 thousand) and 1980 (\$117 thousand) are included above.

The Center for Disease Control conducts activities to assist State and local health authorities and other health related organizations in stemming the spread of communicable diseases, protecting against other diseases or conditions amenable to reduction, providing protection from certain environmental hazards, occupational safety and health in the workplace, and preventing unnecessary illness and death through improved health education and health promotion.

1. *Basic preventive health*—(a) *Prevention formula grants*.—This program provides grants to States for targeting preventive health services on the leading causes of morbidity and mortality.

(b) *Health incentive grants*.—This program makes grants to provide a Federal sharing in the costs of those broad areas of public health for which State and local health agencies have the primary responsibility.

(c) *Risk reduction and health education*.—This activity builds capability for improved health education in Federal, State, and local programs and in the private sector.

2. *Disease prevention*—(a) *Venereal diseases*.—Efforts supported in this activity are directed toward reducing morbidity and mortality from venereal diseases by preventing cases and complications. In 1981 the Center's objectives are to prevent about 5,500 cases of syphilis and 255,100 cases of gonorrhea through disease monitoring, screening, and contact referral services focused on high-risk populations.

(b) *Immunization*.—The long range goal is to eliminate poliomyelitis, rubella, mumps, diphtheria, pertussis, and tetanus as significant public health problems and eliminate indigenous measles from the United States.

(c) *Fluoridation.*—This activity is directed toward the goal of near-universal fluoridation of community and independent rural school water supplies which will reduce the incidence of dental caries in children by 65 percent and reduce the cost of dental treatment in children by 50 percent.

3. *Control of chronic conditions*—(a) *Chronic diseases.*—Efforts in this activity are directed toward reducing or preventing the burden of illness associated with certain chronic diseases and other conditions. In 1981 technical and financial assistance would be provided to 20 States for the purpose of planning, organizing, conducting, and evaluating community based control programs aimed at reducing excessive morbidity and mortality from the complications of diabetes. The nutrition surveillance system will be expanded and technical assistance in the area of nutrition will be provided to 5 additional States.

(b) *Environmental hazards.*—This activity supports project grants for urban rat control and the prevention of lead-based paint poisoning in children, and carries out activities to deal with the human health aspects of exposure to toxic chemicals.

4. *Occupational safety and health*—(a) *Research.*—These research activities are directed toward the elimination or control of factors in the work environment which are harmful to the health and safety of workers by (1) developing criteria documents for standard settings, (2) conducting health hazard evaluations, (3) publishing an annual list of toxic substances, (4) conducting industry-wide epidemiological studies, and (5) certifying personal protective devices and industrial hygiene instruments.

(b) *Training.*—This activity directs efforts to maintain an adequate supply of occupational safety and health professionals. In 1981, 13 educational resource centers will be supported.

5. *Epidemic services.*—This activity supports efforts to prevent and control infectious and vector-borne diseases, and to prevent the importation of diseases from foreign countries.

6. *Technology development and application.*—Efforts supported in this activity are directed toward working with States, communities, hospitals, and other parts of the Nation's health system to bring about more speedy and general application of current prevention technology.

7. *Buildings and facilities.*—This activity is directed to the protection of the Center's facility investment and to assure that the facilities and equipment are adequate. The funding level requested in 1981 would provide repairs and improvement of existing facilities, design of a laboratory complex that conforms to the latest concepts in maximum biological containment, bring the Center's facilities into conformance with life safety requirements and make them more accessible or "barrier free" to the physically handicapped, design and construction of a new modern animal facility, and construction of a new laboratory in Morgantown, W. Va.

8. *Program management.*—This activity provides the

leadership and administrative management for all programs of the Center.

National Eye Institute.....	34,000

Comparable amounts for 1979: (\$710 thousand) and 1980 (\$710 thousand) are included above.
Excludes \$36 thousand in 1981 for activities transferred to Health Services, Health Services Administration. Comparable amounts for 1979 (\$36 thousand), and 1980 (\$36 thousand) are included above.

1. *Research*—(a) *Cause and prevention research*.—To prevent the occurrence or reduce the incidence of

human cancer by developing the means to prevent the initial development of cancer, identifying cancer causing agents through bioassay testing, or halt or reverse the progression of the disease, through research in physical and chemical carcinogenesis, epidemiology, biological carcinogenesis, and nutrition.

(b) *Detection and diagnostic research*.—To develop better ways of finding cancer at an early stage when treatment methods have a better chance of success by improving methods for determining the presence, nature, location, and extent of a patient's disease and by identifying risk factors and high-risk groups through research in epidemiology, immunology, and detection and diagnosis.

(c) *Treatment research*.—To develop the means to cure cancer patients, maintain control of cancer in patients who are not cured and improve the rehabilitation of cancer patients through the conduct of preclinical treatment, clinical treatment, and rehabilitation research.

(d) *Cancer biology*.—To provide a better understanding of basic biological mechanisms involved in control of normal and malignant cell growth and behavior. This knowledge is important to develop effective approaches to the prevention, detection, diagnosis, and treatment of cancer.

2. *Resource development*—(a) *Cancer centers support*.—To develop and maintain cancer centers as a national resource for the conduct of multidisciplinary cancer research, control, public and professional education, and training; and to serve as a focal point for reaching out and responding to community needs in cancer.

(b) *Research manpower development*.—To assist in providing education and training on a continuing basis to individuals and institutions to insure an adequate supply of highly specialized professional personnel for both basic and clinical cancer research.

(c) *Construction*.—To assist in providing the biomedical facilities needed to safely implement the activities necessary to achieve the objectives and goals of the national cancer program.

3. *Cancer control*.—To facilitate the widespread application of available new, proven, and practical cancer knowledge and technology into the general practice of medicine through the conduct of identification, field test, demonstration, evaluation, and promotion efforts in the intervention areas of: (1) prevention; (2) detection, diagnosis, and pretreatment evaluation; and (3) treatment, rehabilitation, and continuing care.

¹ Includes capital investment as follows: 1979, \$2,000 thousand; 1980, \$1,500 thousand; 1981, \$2,750 thousand.

NOTES

Includes \$165 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

Excludes \$27 thousand in 1981 for activities transferred to Health services, Health Services Administration. Comparable amounts for 1979 (\$27 thousand), and 1980 (\$27 thousand) are included above.

1. *Heart and vascular diseases.*—Grant, contract, and training programs in heart and vascular diseases encompass basic and targeted research, clinical trials and demonstrations, cardiovascular centers, technological development, and application of research findings.

2. *Lung diseases.*—Grant, contract, and training programs in lung diseases encompass basic and targeted research, clinical trials and demonstrations, pulmonary centers, technological development, and application of research findings.

3. *Blood diseases and resources.*—Grant, contract, and training programs in blood diseases and resources include sickle cell disease, Cooley's anemia, hemophilia, and activities to improve national systems of blood procurement, management, and distribution.

4. *Intramural research.*—Conducts a program of laboratory and clinical research in heart, blood vessel, lung, and kidney diseases, certain blood diseases, and technology related to cardiovascular and pulmonary diseases.

5. *Direct operations.*—Provides support for overall administrative management, including grant and contract administration.

6. *Program management.*—Provides support for the Institute's Office of the Director, and centralized planning and administrative functions.

¹ Includes capital investments as follows: 1979, \$615 thousand; 1980, \$900 thousand; 1981, \$900 thousand.

Note.—Includes \$50 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

1. *Caries.*—The National Caries Program is an organized research and development effort to develop methods to eliminate caries as a major health problem.

2. *Periodontal diseases.*—The periodontal disease program develops new knowledge which may lead to a prevention and eradication of these diseases.

3. *Restorative materials.*—The restorative materials program aids the development of improved materials and methods to restore lost oral tissues to normal form and function.

4. *Craniofacial anomalies.*—The craniofacial anomalies program is focused on improvement of treatment and understanding of the basic mechanisms to prevent such developmental aberrations.

5. *Pain control and behavioral studies.*—The pain control program supports investigations into the nature, etiology, pathophysiology, and treatment of the major pain problems associated with the oral facial complex.

6. *Soft tissue, stomatology and nutrition.*—The soft tissue program focuses on developing knowledge in the areas of soft tissue diseases, nutrition, salivary glands and mineralization that can be applied to research.

7. *Dental research institutes.*—The dental research institutes bring together universities to focus upon the problems of oral health.

8. *Intramural research.*—Intramural laboratory and clinical research is concerned with the causes, treatment, control, and prevention of diseases and disorders of the oral cavity and facial region.

9. *Direct operations.*—This program supports scientific and administrative management of grants and contracts, program evaluation and general expense.

10. *Program management.*—This activity provides support for the overall administrative management and scientific direction of institute programs.

¹ Includes capital investment as follows: 1979, \$838 thousand; 1980, \$1,510 thousand; 1981, \$1,620 thousand.

NOTES

Includes \$148 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

Excludes \$27 thousand in 1981 for activities transferred to Health services, Health Services Administration. Comparable amounts for 1979 (\$27 thousand), and 1980 (\$27 thousand) are included above.

1-4. *Categorical research programs.*—These programs, groups of interrelated diseases and disciplines will support biomedical research and training projects in over 400 non-federal institutions. The vast majority of these awards are made to universities and medical schools.

5. *Intramural research.*—The Institute's intramural research programs, conducted at the National Institutes of Health and field stations in Arizona, include basic and applied laboratory and clinical research and epidemiological studies of the fundamental biological processes underlying the major diseases within the Institute's purview. Research is conducted in the fields of arthritis, rheumatism, digestive diseases, nutrition, diabetes, and other metabolic disorders, as well as studies in the major disciplines including pharmacology, physiology, biochemistry, chemistry, pathology, endocrinology, physical biology, molecular biology, chemical biology, hematology, and biomathematics.

6. *Direct operations.*—This activity provides support for the review, approval and management of the Institute's grant and contract programs.

7. *Program management.*—This activity provides support for overall administrative management and scientific direction of Institute programs.

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE
DISORDERS AND STROKE*

*See Part III for additional information.

For expenses necessary to carry out, to the extent not otherwise provided, title IV of the Public Health Service Act with respect to neurological and communicative disorders and stroke, [\$242,000,000] \$249,807,000.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$3,558 thousand; 1980, \$5,130 thousand; 1981, \$3,701 thousand.

NOTES

Includes \$121 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

Excludes \$27 thousand in 1981 for activities transferred to Health Services Administration. Comparable amounts for 1979 (\$27 thousand), and 1980 (\$27 thousand) are included above.

1. *Communicative disorders.*—This program supports research on improving the diagnosis, treatment, and prevention of diseases and disorders which affect hearing, language, and speech.

2. *Neurological disorders.*—Research is directed toward neurological diseases including epilepsy, muscular disorders, multiple sclerosis, Huntington's disease, minimal brain dysfunction, neurological aspects of learning and behavior, slow virus infections of the central nervous system, Parkinson's disease, and genetic and developmental disorders.

3. *Stroke, nervous system trauma.*—Research is directed toward cerebrovascular disease and stroke, head injury, spinal cord injury, nerve growth and regeneration, and brain tumors.

4. *Fundamental neurosciences.*—Support of research in the fundamental neurosciences explores the mechanisms responsible for normal functioning of the human nervous system and the nature of its diseases and disorders.

5. *Intramural research.*—Research efforts of this program embrace the entire range of neurological and communicative disorders. The scientific staff will pursue the most promising lines of research in neurochemistry, neuropharmacology, immunology, and virology.

6. *Direct operations.*—This activity supports the scientific direction, administration, and review and approval functions of the Institute's research programs.

7. *Program management.*—This activity supports the immediate Office of the Director and those staff units which assist the Director in management and direction of the total program.

¹ Includes capital investment as follows: 1979, \$40 thousand; 1980, \$50 thousand; 1981, \$50 thousand.

1. *Cellular and molecular basis of disease.*—The cellular and molecular basis of disease program provides a central point within NIH to which scientists conducting cellular and molecular research can turn for program support in the search for a deeper understanding of disease.

2. *Genetics.*—The genetics program is directed toward gaining a better understanding of the fundamental processes and mechanisms of inheritance in health and disease. Its ultimate objectives are the prevention, therapy, and cure of genetic ills in man, including those multifactorial diseases with a strong hereditary component, such as diabetes, atherosclerosis, hypertension, and schizophrenia.

3. *Pharmacological sciences.*—The pharmacological sciences program embraces all aspects of drug-related research from synthesis and development of new pharmacologically active chemical structures, through elucidation of the mechanisms and sites of action of drugs, to improvement of therapeutic approaches. The multidisciplinary nature of drug research calls for the participation of chemists, basic and clinical pharmacologists and toxicologists, and computer scientists, as well as clinical specialists in diverse areas.

4. *Physiology and biomedical engineering.*—The physiology and biomedical engineering program is directed toward broadly based studies in physiology; coordinated basic and clinical investigations relating to burns, trauma, and anesthesiology; and the application of engineering science to the solution of significant physiological and biomedical problems.

5. *Minority access to research careers (MARC).*—The minority access to research careers program is designed to increase the number of biomedical scientists from minority groups. In addition to strengthening the science teaching at minority colleges by offering fellowships to faculty members who wish to expand their background, support is provided for pregraduate training to students intending to go on to graduate study in the biomedical sciences.

91.30	Outlays from military pay raise supplemental	97	

* Includes capital investment as follows: 1979, \$287 thousand; 1980, \$400 thousand; 1981, \$400 thousand.

NOTES

Includes \$80 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

Excludes \$27 thousand in 1981 for activities transferred to Health services, Health Services Administration, a comparable amount for 1980 (\$27 thousand) is included above.

1. *Research for mothers and children.*—The objective of research for mothers and children is to assure the birth of healthy babies through investigations on nutrition, normal and abnormal fetal development and problems of pregnancy and birth. Efforts are also directed toward providing all children the opportunity for productive and healthful adulthood through research to prevent problems in childhood such as smoking, obesity, environmentally induced mental retardation, and learning disorders that contribute to adult disease and disability. Specific attention will be placed on prevention of prematurity and low birth weight, multidisciplinary research on the impact of maternal smoking on embryonic and fetal development, or the effects of oxygen deprivation on brain development. A research effort will be initiated on aspects of weight gain during pregnancy and cerebral control of food intake. In the area of learning, emphasis will focus on studies of maternal-infant relationships and family life styles. Studies in mental retardation and basic studies on the underlying gene-controlled cellular and molecular processes that contribute to congenital defects will be expanded.

2. *Population.*—Efforts in population research are directed toward assuring the birth of wanted babies through studies on human fertility and infertility, contraceptive development and safety, and the reduction of unwanted pregnancies, particularly among adolescents. Areas to be emphasized include the role of hormones in fertilization and implantation, immunological approaches to fertility regulation, and processes of male and female reproduction. Special studies will concern the fertilization of the egg by the sperm and its subsequent development and transport to the uterus. Studies will be expanded on the relation of nutritional factors to fertility, and a substantial effort will also focus on research on changes in the structure of the American family as these affect patterns of fertility and the well-being of children.

3. *Intramural research.*—The intramural research program carries out both basic and clinical research in population and maternal and child health through individual research projects conducted by National Institute of Child Health and Human Development's staff in the Institute's own facilities. Emphasis will be placed on research studies on methods for monitoring the progress of pregnancies, including development of indices for evaluating fetal growth, placental function, and uterine competence. Research plans also include the development and implementation of studies in the field of mental retardation and related aspects of human development. The epidemiology and biometry program within this activity will continue its research on the epidemiology of disorders of mothers and children, of

General and special funds—Continued

DEVELOPMENT—Continued

perinatal mortality and morbidity and of abnormalities of human growth and development.

4. *Direct operations.*—This activity supports administrative and scientific management of the Center for Research for Mothers and Children and the Center for Population Research, program planning and evaluation, research conferences, and scientific and administrative review and management of grants and contracts.

5. *Program management.*—The overall administration, direction and coordination of the Institute's programs are provided for in this activity.

¹ Includes capital investment as follows: 1979, \$306 thousand; 1980, \$733 thousand; 1981, \$740 thousand.

Note.—Includes \$34 thousand in 1981 transferred from the National Cancer Institute for subsequent reimbursement to the NIH management fund for the new Division of Safety.

1. *Retinal and choroidal diseases.*—The retina program supports research to acquire knowledge of how both the retina functions normally and how the retina is damaged by disease; applied studies to develop methods of prevention, early detection, and treatment of retinal disease; and development of animal models of various retinal diseases to facilitate research.

2. *Corneal diseases.*—Corneal disease research is aimed at reducing the impact of corneal diseases through improved methods of treatment, prevention, and diagnosis.

3. *Cataract.*—Cataract research attempts to identify the causes of cataract and develop methods for its prevention and improved treatment.

4. *Glaucoma.*—Glaucoma research studies the cause of glaucoma, development of techniques for prevention and early detection of glaucomatous disease and improved methods of treatment.

5. *Sensory motor disorders and rehabilitation.*—This program supports laboratory and clinical studies on the development and function of those activities of the brain and the eye muscles that make vision possible.

The goal of these efforts is a better understanding of the causes of low vision and blindness which cannot be traced to specific dysfunctions of the eye itself.

6. *Intramural research.*—Laboratory and clinical research is focused on developing new and improved techniques for the prevention, diagnosis, and treatment of vision disorders. Included here is the Office of Biometry and Epidemiology which conducts studies in conjunction with collaborative investigations and other Institute programs.

7. *Direct operations.*—This activity provides funds for salaries and other expenses connected with personnel engaged in activities relevant to the award of research grants and contracts.

8. *Program management.*—This activity provides support for the overall administrative management and scientific direction of Institute programs.

* Includes capital investment as follows: 1979, \$4,377 thousand; 1980, \$4,700 thousand; 1981, \$4,800 thousand.

1. *Prediction, detection, and assessment of environmentally caused diseases and disorders.*—This activity supports research which will lead to improved ability to predict, detect, and assess the health effects of various levels and kinds of environmental pollutants and toxic agents present in the environment.

2. *Mechanisms of environmental disease and disorders.*—This activity supports research by grants and contracts which will improve medicine's ability to prevent and treat diseases and disorders resulting from exposure to toxic environmental agents. Research will improve understanding of mechanisms of toxicity and metabolism and, therefore, allow development and assessment of preventive and therapeutic measures.

3. *Environmental health research and manpower development resources.*—This activity provides for the development of research and manpower resources throughout the Nation in order to improve and expand efforts on environmental health sciences centers, marine biomedical research centers, and postdoctoral training in environmental sciences.

4. *Intramural research.*—This effort consists of a range of complex investigations and studies with major

General and special funds—Continued

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES—

¹ Includes capital investment as follows: 1979, \$1,101 thousand; 1980, \$1,863 thousand; 1981, \$1,593 thousand.

1. *Aging.*—This activity supports grants, contracts, and training awards which have as their goal the development of knowledge on the aging process and the health of the elderly. Particular emphasis will be placed on research on or related to the dementias of aging.

2. *Intramural research.*—This activity supports the work of approximately 100 government scientists and distinguished visiting researchers. Approximately 55 projects are supported at the Baltimore Gerontology Research Center in an interdisciplinary environment. The Baltimore Longitudinal Study of Aging, which currently has 180 women and 650 men enrolled, is a major part of this research effort.

3. *Direct operations.*—This activity supports the review, approval, and monitoring of grant awards; the printing and dissemination of public information pamphlets; and the development of consensus development statements when and where appropriate.

4. *Program management.*—This activity supports the overall direction and coordination of the institute's research programs. In addition, staff in this area fre

quently collaborate with approximately 20 other Federal organizations with an interest in aging research.

RESEARCH RESOURCES

To carry out, except as otherwise provided, sections 301 and 472 of the Public Health Service Act with respect to research resources and general research support grants, **[\$169,199,000] \$184,439,000: Provided,** That none of these funds, with the exception of funds for the Minority Biomedical Support program, shall be used to pay recipients of the general research support grants programs any amount for indirect expenses in connection with such grants.

Note.—The regular appropriation for this account for 1980, had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$21 thousand; 1980, \$25 thousand; 1981, \$25 thousand.

The Division of Research Resources develops and supports specialized transdisciplinary research resources in the Nation's academic and research institutions. These resources are used by Public Health Service grantees and contractors in their biomedical and behavioral research efforts, in basic, applied, and developmental research projects.

1. *Clinical research.*—This program develops and supports general clinical research centers which are located in university-affiliated hospitals. These funds provide the unique settings required for the performance of controlled studies by clinical investigators. Specially trained research nurses, dietitians, and support personnel, and special information handling systems are just two important characteristics of the centers.

2. *Biotechnology research.*—This program provides, develops, and supports unique technological resources such as mass spectroscopy, high voltage electron microscopy, nuclear magnetic resonance technology, bioengineering resources, and many complex state-of-the-art computer applications to biomedical research. These one-of-a-kind resources offer investigators opportunities to collaborate with resource personnel to discover new and more effective applications of these technologies to their research problems.

3. *Laboratory animal sciences and primate research.*—This activity supports the seven Primate Research Centers. It develops and supports animal diagnostic laboratories, new animal models of human disease, special unique colonies of research animals, primate breeding initiatives, specifically trained animal directors, and other vital research resources.

4. *Biomedical research support.*—This program makes grants to health professional schools, hospitals, universities and research institutions for research and re-

General and special funds—Continued

RESEARCH RESOURCES—Continued

search resource activities concerned with the development of new knowledge about fundamental processes related to health. The program's flexible support funding is used to meet such research needs as support of pilot research projects, shared research equipment, centralized research services, and start-up costs for young investigators. The biomedical research development grant program helps to establish the institutional research capability necessary for significant involvement in biomedical and/or behavioral research in new, small, and developing institutions.

5. *Minority biomedical support.*—This program's mission is to increase the number of minority faculty, students, and investigators engaged in biomedical research. Institutional grants provide support for biomedical and behavioral research projects carried out by faculty and investigators. Student research participants receive invaluable training and experience through direct research involvement.

6. *Direct operations.*—This activity supports scientific and administrative staff who manage the Division's research resource grants and contracts.

7. *Program management.*—This program provides the administrative management and scientific planning, direction and coordination of the Division's programs.

¹ Includes capital investment as follows: 1979, \$32 thousand; 1980, \$30 thousand; 1981, \$30 thousand.

The Fogarty International Center administers programs of advanced study and related international activities.

1. *Gorgas Memorial Institute.*—Provides funds for core support of the Gorgas Memorial Laboratory which operates research programs in tropical medicine in Panama.

2. *Direct operations.*—Provides support for approximately 159 international scholars and fellows in both 1980 and 1981. Conducts international seminars and conferences, the special foreign currency program, a program for over 800 visiting scientists and bilateral scientific exchange programs with selected foreign countries.

3. *Program management.*—Provides for program direction and administration of the Center.

¹ Includes capital investment as follows: 1979, \$3,166 thousand; 1980, \$2,130 thousand; 1981, \$2,020 thousand.

1. *Medical library assistance.*—This activity funds six grant and contract programs which are designed to support the performance of the Nation's medical libraries by providing fiscal and other assistance in developing better health information services.

2. *Intramural programs.*—This includes the following activities:

(a) *Lister Hill National Center for Biomedical Communications.*—This research and development component of the Library is responsible for exploring the application of advances made in the fields of computer and communications technology to health information handling, processing and transfer problems.

(b) *National Medical Audiovisual Center.*—The Center is responsible for stimulating the development and use of non-print media in furtherance of national health goals with particular emphasis on applying audiovisual technology to the instructional needs of the health community.

(c) *Library operations.*—This component acquires, organizes, and maintains the Library's archival and reference collection of biomedical literature. It also provides access to that collection through the provision of several services including operation of a nationwide online computerized bibliographic retrieval service.

(d) *Toxicology information.*—This activity operates specialized data bases on drugs and chemicals toxic to man. It collects and organizes toxicology data from the files of collaborating organizations and prepares and publishes bibliographies and reports, operates online files, and has the responsibility of coordinating toxicology activities for DHHS.

3. *Direct operations.*—This activity is responsible for the administrative management, including review and approval, of the medical library assistance program.

4. *Program management.*—This activity provides the overall executive direction and administrative management necessary for the effective operation of all NLM

General and special funds—Continued

¹ Includes capital investment as follows: 1979, \$287 thousand; 1980, \$547 thousand; 1981, \$347 thousand.

Note.—Excludes \$84 thousand in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$98 thousand) and 1980 (\$67 thousand) are included above.

1. *Direct operations.*—Provides for accounting and personnel services, payments for other centrally furnished services, and payments for standard level user charges.

2. *Program management.*—Provides overall leadership, direction, and administration of the programs and activities of the National Institutes of Health and supporting services.

Average salary of ungraded positions	\$18,007	\$19,066	\$19,917

BUILDINGS AND FACILITIES*

*See Part III for additional information.

For construction of, and acquisition of sites and equipment for, facilities of or used by the National Institutes of Health, where not otherwise provided, **[\$3,250,000]** **\$11,750,000** to remain available until expended.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$5,756 thousand; 1980, \$8,235 thousand; 1981, \$7,974 thousand.

The NIH management fund was established to facilitate the conduct of NIH central operations. Fund activities are financed primarily from advances and reimbursements from the several Institutes. Formulas for determining each Institutes' contribution reflect usage of services provided by the fund.

1. *Computer services* provide a central scientific research and computational resource in support of the NIH programs.

2. *Research services* provide centralized and collaborative engineering, scientific, and technical support for research activities.

3. *Engineering services* provide engineering, architectural, craft, utility and labor services required for all the Institutes. In the budget year, services will be extended to the Ambulatory Care Research Facility, a structure covering 689,000 square feet with 399 diagnostic units.

4. *Clinical services* provide facilities and services, other than physician care, for an integrated operation of its 541 bed facility servicing nine Institutes; developing and recommending policies and rules for the protection and welfare of patients; and conducting research in methods and techniques of hospital administration. Budget year plans include the opening of the Ambulatory Care Research Facility (ACRF), providing a full range of diagnostic facilities and services on an out-patient basis.

5. *Grant review and approval* provides staff support services in formulating National Institutes of Health grant award policies and procedures relating to research and training programs; serves as a staff resource for central receipt and referral of all applications for

Public Health Service research and training grant support; provides for the initial scientific review of NIH research and training grant applications; and collects, analyzes, and evaluates management and program data needed in the management of extramural programs. 1981 plans include the automation of several steps in the initial grant application review process.

6. *Administrative services* include plant and office housekeeping, protection and security services. Budget year plans include an extension of services to the ACRF and the implementation of parking management services.

7. *Standard level user charges* provide for the payment to the General Services Administration for rental space occupied by the National Institutes of Health.

The Consolidated working fund supports research under interagency agreements between the National Institute of Environmental Health Sciences and the Environmental Protection Agency and between the National Institute of Allergy and Infectious Diseases and the Center for Disease Control.

Research on health effects of pollutants.—Studies under this agreement are currently being conducted by the National Institute of Environmental Health Sciences. They are designed to explain and predict the health effects of pollutants and other potentially hazardous byproducts associated with the various energy technologies and conservation proposals being developed in response to the nation's drive toward energy self-sufficiency.

National influenza immunization program.—Under this agreement, the National Institute of Allergy and Infectious Diseases supports research related to the national influenza immunization program.

The National Institutes of Health Service and supply fund provides a single means for consolidated financing and accounting of business-type operations involving the sale of services and commodities to customers.

1. *Administrative services.*—These services include the sale of commodities from inventory, printing and reproduction services, and other similar services.

2. *Data processing services.*—This central facility is expected to provide data systems design and consultation, key punching, computer programming, and computer processing services to National Institutes of Health research components.

3. *Instrumentation.*—The biomedical instrumentation and engineering branch maintains, repairs, and fabricates scientific laboratory apparatus and equipment for use in the research laboratories at National Institutes of Health.

4. *Research animals.*—The National Institutes of Health animal facilities provide small and large research animals to the research laboratories.

ALCOHOL, DRUG ABUSE, AND MENTAL
HEALTH ADMINISTRATION

Federal Funds

General and special funds:

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH*

*See Part III for additional information.

For carrying out the Public Health Service Act with respect to [mental health and drug abuse, and the Community Mental Health Centers Act, as amended (42 U.S.C. 2681, et seq.), \$630,148,000] mental health, drug abuse, and alcoholism; the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970, as amended; the Drug Abuse Prevention, Treatment, and Rehabilitation Act; and the Community Mental Health Centers Act as amended (42 U.S.C. 2681, et seq.); \$1,163,396,000 of which \$5,425,000 for design and modernization and improvement of government owned or leased intramural facilities shall remain available until expended. (Additional authorizing legislation has been proposed for \$367,755,000.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980. For those activities or portions of activities of this account that were deferred from regular appropriation consideration, Public Law 96-123 provides funding at the current rate. For all other activities or portions of activities of this account, Public Law 96-123 provides funding at a rate consistent with amounts that would be provided by the conference version of H.R. 4389, the Department of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

^a Includes capital investment as follows: 1979, \$3,056 thousand; 1980, \$4,120 thousand; 1981, \$4,280 thousand.

NOTES

Excludes \$21 thousand in 1981 for activities transferred to General Departmental Management, Department of Health and Human Services. Comparable amounts for 1979 (\$37 thousand) and 1980 (\$21 thousand) are included above.
Excludes \$117 thousand in 1981 for activities transferred to Health Services, Health Services Administration. Comparable amounts for 1979 (\$90 thousand) and 1980 (\$117 thousand) are included above.

1. *Mental health*—(a) *Research*.—Through grants and contracts and through intramural laboratories, research is conducted to advance knowledge of the major mental disorders, maladaptive behavior and the associated basic biological and biochemical processes. The 1981 budget supports expanding research in the neurosciences, treatment assessment, epidemiology, health services, prevention, and special population needs.

(b) *Training*.—Awards are made to improve the pool of mental health researchers and health service personnel in priority service areas; to develop and evaluate training and personnel development models; and to work with States in meeting their personnel needs.

(c) *Services*.—This activity supports project grants for the provision of mental health services and awards to States to assist them in developing support systems for

chronically mentally ill adults and children, prevention programs, and data collection and management systems. Support is also included for formula grants to States to support mental health activities.

(d) *Program support*.—This activity supports the regional and central office staff and related costs for the planning, development and administration of the Institute's grants and contracts programs.

2. *Drug abuse*.—(a) *Research*.—Through grants and contracts and through intramural laboratories, research is conducted to develop the knowledge which will result in effective methods of treating and preventing drug abuse and related addictive behavior. The 1981 budget will allow expanded studies on the health effects of marijuana, biomedical factors predisposing individuals to drug abuse, special problems of women and drug abuse, and basic and clinical research on dependence and tolerance.

(b) *Training*.—Awards are made to encourage the development of skilled manpower to enhance the delivery of drug abuse services within the national health care delivery system and to assure the production of skilled researchers in priority areas relating to drug abuse.

(c) *Services*.—Project grants and contracts are awarded to support an effective drug abuse prevention and treatment network responsive to national and community needs. Formula grants to States support a variety of drug abuse treatment programs and other drug abuse activities.

(d) *Program support*.—This activity provides funding for Institute staff who are responsible for the planning, coordination, analysis, evaluation, and general administrative management of Institute activities, as well as funding for information programs for the prevention and control of drug abuse.

3. *Alcohol abuse*—(a) *Research*.—Research is conducted through grants and contracts and intramural laboratories to support and stimulate the development of new knowledge on the causes and consequences of harmful alcohol use as a means of reducing the incidence and prevalence of alcohol abuse and alcoholism.

(b) *Training*.—Awards are made to improve the ability of health and social service personnel to deal effectively with the problems of alcohol abuse and alcoholism and to assure an adequate supply of skilled researchers in alcoholism and related areas.

(c) *Services*.—Project grants and contracts are awarded in order to reduce the prevalence of alcohol related problems by increasing the availability and utilization of treatment and by improving the quality and cost effectiveness of such treatment. A variety of alcoholism treatment, prevention, and related activities are also supported through a program of formula grants to States.

(d) *Program support*.—This activity provides funding for the overall planning, direction, and coordination of Institute programs, as well as funding for information programs for the prevention and control of alcoholism and alcohol abuse.

4. *Buildings and facilities*.—Funds for maintenance and improvements to existing agency research facilities are included in this activity. In 1981 new funds are requested for design and renovation of space for the alcoholism and mental health intramural facilities at

General and special funds—Continued

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH—Continued

the National Institutes of Health, as well as renovations necessary to house the drug abuse Addiction Research Center at Baltimore City Hospital.

5. *Program management.*—This activity provides overall direction and management of the agency including development, analysis, and coordination of national policies and programs across the three Institutes in the areas of research, training, services and prevention.

This activity supports construction, maintenance, and upgrading of buildings and facilities housing the patients of St. Elizabeths Hospital. Using funds appropriated in prior years, the hospital has made sufficient progress in major renovation and facility improvement programs to regain a 1-year accreditation from the Joint Commission on Accreditation of Hospitals. In 1981, new funds will be used to make routine repairs and improvements to existing hospital facilities to prevent plant deterioration.

SAINT ELIZABETHS HOSPITAL

For expenses necessary for the maintenance and operation of the hospital, including clothing for patients, and cooperation with organizations or individuals in scientific research into the nature, causes, prevention, and treatment of mental illness, [\$85,119,000] the lesser of \$96,206,000 or such amounts as may be necessary to provide a total appropriation equal to the difference between the amount of the reimbursements received during the current fiscal year on account of patient care provided by the hospital during such year and [\$108,260,000] \$120,528,000.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$916 thousand; 1980, \$1,718 thousand; 1981, \$1,718 thousand. Note.—Excludes \$35 thousand in 1981 for activities transferred to General Departmental Management, Department of Health and Human Services. Comparable amounts for 1979 (\$13 thousand) and 1980 (\$35 thousand) are included above.

1. **Inpatient care.**—The hospital provides for the treatment of inpatients who are either beneficiaries of the Federal Government or residents of the District of Columbia. Included are costs for direct treatment, dietary and general medical services, operation of a forensic treatment facility, and special services for the elderly, children and youth, the deaf, and patients with drug or alcohol problems. The average daily inpatient load was 2,182 in 1979, and is expected to decrease to 1,967 in 1980 and 1,860 in 1981. These reductions represent the combined result of outplacement efforts, and further shortening of the average length of stay.

2. **Outpatient care.**—A major function of the hospital is the treatment of outpatients. The dollar levels reflect direct treatment costs for an average of 3,407 outpatients in 1979, 3,800 in 1980, and 4,100 in 1981. The increase reflects implementation of court-ordered efforts to place patients in the least restrictive treatment facilities commensurate with their mental condition.

3. **Day care.**—The hospital operates a transitional treatment program which has many of the structured features of inpatient care, but which permits participants to live outside of the hospital. The program will treat 117 patients in 1980 and 156 in 1981.

4. **Outplacement.**—This program provides for cost of the social service, direct treatment, and administrative staff whose mission is to prepare patients currently in the hospital for placement in the community or into less restrictive treatment settings. Emphasis is placed upon long-term, institutionalized patients, who have been identified by a special survey on level-of-care needs. The hospital will outplace 200 patients in 1980 and an additional 200 in 1981.

5. **Research.**—This activity supports the cost of clinical research programs, utilizing the varied clinical base of the hospital and concentrating on studies which will enhance the quality of treatment at Saint Elizabeths. Also included are support services for the William A. White Division which houses patients who are the subject of studies conducted by the National Institute of Mental Health.

6. **Training.**—Included in this activity are programs which (a) provide accredited multidisciplinary mental health and related training for interns, residents, hospital staff, students, community groups, and volunteers; (b) offer annual and periodic staff development activities and educational programs on contemporary mental health issues for members of the hospital staff, interested citizens, public officials, and mental health professionals from outside the hospital; and (c) provide professional mental health consultation to other Federal departments and agencies. In 1979, there were 135 multidisciplinary trainees. The trainee level is expected to remain stable in 1980 and 1981.

7. **Administration.**—This activity includes all program support costs not directly related to patient care. The functions supported include personnel and financial management, engineering and maintenance, program planning, industrial and environmental activities, logistical support, and information services.

Management of Saint Elizabeths Hospital is proposed to be transferred by the end of 1981 from the Federal Government to a public corporation, accountable to the Secretary of the Department of Health and Human Services and the Mayor of the District of Columbia.

1. *Health planning*.—This activity provides Federal funds to support local and State health planning agencies. These agencies are charged with improving the quality and delivery of health services, containing health costs, and preventing the duplication of health services.

2. *Health professions education*.—This activity provides institutional support grants, service-connected student assistance, and special project programs to alleviate the geographic and specialty maldistribution of health professionals. Special project programs include area health education centers, family medicine/primary care residencies, family medicine departments, nurse practitioners and physician assistants. Other student assistance programs will be supported to enable those who are in exceptional financial need to pursue a health career. Capitation grants for health professions schools will be terminated in 1981 due to the current and projected improved supply of health professionals.

3. *Health facilities.*—This program carries out activities to support programs that are concerned with modernization, utilization, construction and conversion or closure of health facilities. Support is provided for interest subsidy payments to meet previous commitments on long-term guarantees to medical facilities and health professions schools and default payments on federally guaranteed loans. This activity also enforces compliance by institutions with the assurances that are required for receipt of Federal funds and promotes more efficient use of energy in health institutions.

4. *Program management.*—This activity supports the staff and operating expenses related to the program direction and extramural management of health resources programs.

PAYMENT OF SALES INSUFFICIENCIES AND INTEREST LOSSES

【For the payment of such insufficiencies as may be required by the trustee on account of outstanding beneficial interest of participations in the Health Professions Education Fund assets or Nurse Training Fund assets, authorized by the Department of Health Education, and Welfare Appropriation Act, 1968, to be issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, \$110,000, and for payment of amounts pursuant to 42 U.S.C. 294(q) or 42 U.S.C. 297(f) to schools which borrow any sums from the Health Professions Education Fund or Nurse Training Fund, \$1,890,000: *Provided*, That the amounts appropriated herein shall remain available until expended.】

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

In 1980, a plan has been implemented to eliminate the need for an appropriation for the payment of sales insufficiencies and interest losses. This plan involves terminating interest payments by the Department of Health and Human Services to the Treasury Department and depositing sufficient funds to the Government National Mortgage Association to cover the amount of outstanding participation certificates. As a result of this arrangement, it will no longer be necessary to request an appropriation for this activity.

Public enterprise funds:

HEALTH EDUCATION LOANS

【The Secretary is hereby authorized to make such expenditures, within the limits of funds available in the Health Professions Education Fund and the Nurse Training Fund, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year.】

Public enterprise funds—Continued

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and loan guarantees for private, nonprofit facilities.

Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

No additional funds are requested because the revolving fund and interest subsidy fund will have sufficient carryover to cover 1981 obligations.

Public enterprise funds—Continued

MEDICAL FACILITIES GUARANTEE AND LOAN FUND—Continued

About \$1.3 billion in direct and guaranteed loans will be outstanding in 1981.

The health education assistance loan program enables students to borrow from private lenders to help pay for the cost of their health professions training at over 300 universities. Although the principal amount of the loans will be insured by the Federal Government, the students will be required to pay up to 12% interest per year. Loans will be made primarily by commercial lenders, State agencies, and educational institutions.

In case of default, death or total and permanent disability the Federal Government pays the outstanding amount of the loan. The Federal Government also pays bankruptcy claims if the discharge is granted 5 years after the first date repayment was required.

It is anticipated that 328 eligible universities will participate in the program and that loans totaling \$48,000 thousand will be made to 6,000 students, averaging \$8 thousand each, in 1981. During 1980, loans totaling \$40,000 thousand will be made to 5,000 students, averaging \$8 thousand each. No more than 50% of the students in each class in schools of medicine, osteopathy, or dentistry may receive loans.

No appropriation is requested for 1981 since receipts of \$312 thousand and \$28 thousand in funds from 1980 will be sufficient to cover required payments of \$340 thousand.

The activities included in this account have been transferred to the Health Resources Administration from the Department of Education pursuant to the Department of Education Organization Act (Public Law 96-88).

DATA ON LOANS

ASSISTANT SECRETARY FOR HEALTH

Federal Funds

General and special funds:

ASSISTANT SECRETARY FOR HEALTH

SALARIES AND EXPENSES

For expenses necessary for the Office of the Assistant Secretary for Health and for carrying out titles [III and XIII] III, XII, XIII, and XVII of the Public Health Service Act, titles IV, VI, VII, and VIII of the Health Services and Centers Amendments of 1978, [and section 222 of the Social Security Amendments of 1972, \$188,695,000, including \$1,500,000 for projects authorized under section 1317 of the Public Health Service Act] \$214,781,000: Provided, That funds contained herein for carrying out sections 1303(i) and 1304(k) of the Public Health Service Act which are unobligated on September 30, [1980] 1981, shall remain available through September 30, [1981] 1982.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980. For those activities or portions of activities of this account that were deferred from regular appropriation consideration, Public Law 96-123 provides funding at the current rate. For all other activities or portions of activities of this account, Public Law 96-123 provides funding at a rate consistent with amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

* Funds for this activity in the amount of \$652 thousand in 1979 are included in subactivity B. 2.

NOTES

Excludes \$47 thousand in 1981 for activities transferred to General Departmental Management, Department of Health and Human Services. Comparable amounts for 1979 (\$35 thousand) and 1980 (\$47 thousand) are included above.

Includes \$250 thousand in 1981 for activities previously financed from the Health Resources Administration. Comparable amounts for 1979 (\$250 thousand) and 1980 (\$250 thousand) are excluded above.

Includes \$3,000 thousand in 1981 for Emergency Medical Services. Comparable amounts in 1979 (\$3,000 thousand) and 1980 (\$3,000 thousand) financed from the Health Services Administration are excluded above.

A. Program operations—1. (a) Health services research.—This activity supports research on problems in the delivery of health services. New areas of research include disease prevention and health promotion, man-

power modeling, hospital productivity, and ethical issues in health services delivery.

(b) *Health statistics.*—This activity develops and maintains general purpose health data programs and the cooperative health statistics system. Studies of environmental effects on health will be expanded in 1981.

(c) *Health care technology.*—This activity provides a central focus for the evaluation of the benefits, risks, cost effectiveness, and societal side effects of health care technologies.

2. *Health maintenance organizations.*—This program administers grants, contracts, and loans to support the development of prepaid group practices and includes qualification and compliance monitoring.

3. (a) *Adolescent health.*—This activity provides grant funding to approximately 48 comprehensive adolescent health centers to help prevent initial and repeat adolescent pregnancies and provide care to the already pregnant adolescent.

(b) *Smoking and health.*—This activity is the focal point of efforts to coordinate a national smoking and health program.

(c) *Health promotion.*—This activity directs and supports programs in health promotion and disease prevention, including an information clearinghouse.

(d) *Physical fitness and sports.*—This program provides staff support for the President's Council on Physical Fitness and Sports.

(e) *International health.*—This program coordinates the development of international health policy.

B. Public Health Service management—1. Regional management.—This activity provides the overall management capability to administer the decentralized health programs of the Public Health Service.

2. *Program direction and support services.*—This activity provides staff support for the Assistant Secretary for Health.

Scientific activities overseas (special foreign currency program) are supported entirely by foreign currencies owned by the United States abroad. These currencies are available for the Department's use in those countries where the supply of U.S.-owned currency exceeds normal U.S. Government needs for at least 2 years.

The general objective of this program is to support health research and related activities which will contribute to U.S. health programs, while being of mutual interest to the host country, its institutions, and scientists.

The 1981 program will be carried out from appropriated, but unused funds from prior years.

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE FUND

Any amounts received by the Secretary in connection with loans and loan guarantees under title XIII of the Public Health Service Act and any other property or assets derived [by him] from [his] operations respecting such loans and loan guarantees, including any money derived from the sale of assets, shall be available to the Secretary without fiscal year limitation for direct loans and loan guarantees as authorized by said title XIII, in addition to funds specifically appropriated for that purpose. *During 1981, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$155,000,000, and total commitments to guarantee loans shall not exceed \$210,000,000 of contingent liability for loan principal.*

Note.—The regular appropriation language for this account for 1980 had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 96-123) in effect through September 30, 1980 provides for this account in a manner consistent with the provisions that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

4900 Outstanding, end of year	83,635	247,878	456,241

* Loan guarantees include new construction authority, Public Law 95-559.

This is a public enterprise revolving fund. Direct loans will be sold to the Federal Financing Bank to provide funds for new loans and loans thus sold will be guaranteed. In 1975, \$35,000 thousand was appropriated to the Health Services Administration as capital for the revolving fund.

It is anticipated that 23 loans averaging \$2,500 thousand per loan will be made during 1980. In addition, to implement the new authority to provide loans and loan guarantees for acquisition and construction of ambulatory health care facilities, about 25 loans averaging \$2,000 thousand per loan will be made in 1980.

In 1981, it is anticipated that 35 initial operating loans and loan guarantees will be made at \$3,000 thousand per loan. In addition, to implement the new authority to provide loans and loan guarantees for acquisition and construction of ambulatory health care facilities, about 25 loans averaging \$2,000 thousand per loan will be made in 1981.

This fund finances common user supply and service operations of PHS. It is reimbursed from the appropriations supporting the programs benefited (42 U.S.C. 231).

1. *Supply distribution sales.*—This activity maintains inventories of medical stock and supplies to meet, in part, the requirements of PHS and other Government agencies.

2. *Data management services.*—This activity provides data processing services for PHS and other Federal agencies.

3. *Fiscal services.*—This activity provides accounting services for three of the PHS agencies and the Office of the Assistant Secretary for Health.

4. *Parklawn services.*—This activity provides centralized services to occupants of the Parklawn complex consisting of procurement, motorpool, Parklawn Library, tort claims, printing and reproduction, mail and messenger, and building and space management.

5. *Central personnel services.*—This activity provides centralized training and education services for PHS employees housed in the Parklawn complex.

6. *Commissioned officer personnel.*—This activity represents the personnel management program for the PHS Commissioned Corps.

HEALTH CARE FINANCING ADMINISTRATION

Federal Funds

General and special funds:

GRANTS TO STATES FOR MEDICAID*

*See Part III for additional information.

For carrying out, except as otherwise provided, title XIX of the Social Security Act, **[\$12,616,799,000] \$15,739,557,000** to remain available until expended.

For making, after June 30 of the current fiscal year, payments to States under title XIX of the Social Security Act, for the last three months of the current fiscal year; and for making after July 31 of the current fiscal year, payments for the first quarter of the succeeding fiscal year; such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title to be charged to the subsequent appropriation therefor for the current or succeeding fiscal year.

In the administration of title XIX of the Social Security Act, payments to a State under such title for any quarter in the period beginning July 1 of the prior year and ending September 30 of the current year may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which a subsequently approved plan was submitted.

Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year. No payment shall be made from this appropriation to reimburse State or local expenditures made prior to **[September 30, 1978.] October 1, 1978; except that payment shall not be denied with respect to court-ordered retroactive payments or audit exceptions or as otherwise provided in authorizing legislation.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

Note.—The 1980 budget authority for this account has been reduced by \$150 million pursuant to Public Law 96-123.

1. *Medicaid vendor payments.*—The purpose of the medicaid program, which became effective January 1966, is to assist States in providing medical care to their low-income population. Federal matching payments for medical assistance under title XIX of the Social Security Act (medicaid) are authorized for States having plans approved by the Department of Health and Human Services.

All AFDC recipients are eligible for medicaid benefits. In addition, of the 53 States, territories, and the Commonwealth of Puerto Rico with medicaid programs, 36 jurisdictions provide coverage to all persons receiving supplemental security income (SSI) payments. In 17 jurisdictions medical coverage of SSI recipients is limited to those who can meet additional eligibility criteria, although those persons may deduct their medical expenses from their incomes to establish eligibility. Also, 32 jurisdictions have elected to cover medically needy persons.

2. *State and local administration.*—Efforts to assist States to improve administration of the medicaid program is a major thrust of the Department of Health and Human Services. Assistance is being provided to States in the establishment of more effective management systems in such areas as claims processing, eligibility, and third party liability.

The following data include the proposed supplemental appropriation for 1980:

MEDICAL ASSISTANCE PROGRAM COSTS

(In thousands of dollars)

	1979 actual	1980 estimate	1981 estimate
Vendor payments:

90.00	Outlays.....		34,000	295,500

Legislation will be proposed to improve the Medicaid program. This legislation would:

1. Curb the rate of inflation in hospital costs by limiting the annual increase in acute hospital inpatient revenues.

2. Expand the availability and improve the quality of health care for financially needy children by extending medicaid coverage to over two million low-income children in intact families and by improving the delivery of health care to children currently eligible. Expand the availability and improve the quality of health care for low-income pregnant women by providing prenatal medicaid coverage for an additional 100,000 women.

3. Require the use of medicare audit findings in the administration of the medicaid and maternal and child health programs.

4. Permit the Secretary to release social security wage information to States for use in determining medicaid eligibility, and permit State unemployment agencies to release wage information to the State medicaid agencies.

5. Authorize the Secretary to assess a civil money penalty against any person who she determines, after notice and opportunity for a hearing, has filed a fraudulent claim under the medicaid program.

6. Eliminate the excessive reimbursement to hospital-based radiologists, anesthesiologists, and pathologists

that has resulted from existing reimbursement practices.

7. Improve work incentives in the SSI disability program by eliminating the abrupt and complete cutoff of medicaid benefits which occurs when recipients exceed the substantial gainful activity (SGA) level (\$240 per month).

8. Assure that reimbursement under the medicaid program is made only for services which are medically helpful to beneficiaries by eliminating reimbursement for chiropractic services.

9. Increase the medicaid ceiling of Puerto Rico, Guam, and the Virgin Islands. Also establish a ceiling for the Northern Mariana Islands.

10. Correct an oversight in current law which causes certain otherwise eligible newborns to be denied medicaid coverage for pediatric services received in the first few weeks of life.

11. Increase the availability of primary care services to medicaid beneficiaries by requiring that States cover the services of comprehensive care clinics under their medicaid plans and that reimbursement rates and methods for such services be subject to review and approval by the Secretary.

12. Correct a technicality in current law which does not permit State medicaid programs to use fee schedules to reimburse physicians.

13. Make improvements in the standards for eligibility and benefits, and improve administration.

14. Allow medicare and State medicaid programs to take advantage of the savings from bulk purchasing by permitting HCFA programs to employ competitive procurement procedures for the bulk purchase of laboratory services, durable medical equipment, and other medical services and supplies.

15. Create equity among medicaid recipients by covering a class of individuals who are eligible for medicaid if they receive care in a nursing home, but who are not eligible if they receive care in the community.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under section 217(g), 229(b), 1168 and 1844 of the Social Security Act, and sections 103(c) and 111(d) of the Social Security Amendments of 1965, **[\$7,968,156,000] \$9,589,120,000.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

90.00	Outlays.....	7,747,968	7,968,156	9,589,120

This appropriation provides for payments from Federal funds to the health care trust funds for certain types of benefits and related administrative costs not financed by contributions from workers and employers. Part of the cost of utilization reviews by professional standards review organizations and delegated hospitals will be paid to the trust funds by this appropriation. The 1981 request is for \$9,589,120 thousand and covers the following payments:

1. *Military service credits (HI).*—A payment of \$141,000 thousand to the Federal Hospital Insurance Trust Fund is requested as reimbursement for benefits based on noncontributory military service credits of veterans of World War II and certain veterans of the post-World War II period. Sections 217(g) and 229(b) of the Social Security Act authorize such payments, including reimbursement for administrative expenses and interest lost to the trust funds.

2. *Supplementary medical insurance (SMI).*—An estimated \$8,737,000 thousand will be required in 1981 to finance the Government's contribution to the Federal Supplementary Medical Insurance Trust Fund. Federal payments, combined with premiums from enrollees and interest earned by the Supplementary Medical Insurance Trust Fund, must be sufficient to finance the estimated incurred cost of benefits and administration. The standard monthly premium rate, which is updated every July, will be increased to \$9.60 effective July 1980, and is expected to be \$10.60 effective July 1981.

3. *Hospital insurance for uninsured.*—A payment of \$659,000 thousand to the Federal Hospital Insurance Trust Fund is budgeted for 1981 to cover the costs of hospital and related care for certain individuals aged 65 and over who are not insured under the social security or railroad retirement systems, but who meet certain transitional insured status requirements for hospital insurance.

4. *Professional standards review organizations (PSRO's) activities.*—Funds are budgeted for review of the quality and appropriateness of health care services provided under the medicaid and maternal and child health programs. Appropriated funds are required to restore to the trust funds the share of costs related to the number of admissions reviewed by PSRO's.

PROGRAM MANAGEMENT

For carrying out, except as otherwise provided, titles XI, XVIII, and XIX of the Social Security Act, and sections 1526 and 1533(d) of the Public Health Service Act, [\$126,195,000] \$142,560,000, together with not to exceed [\$835,319,000] \$925,054,000, to be transferred to this appropriation as authorized by section 201(g)(1) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: *Provided*, That such amounts as are required shall be available to pay travel expenses either on an actual cost or commuted basis, to an individual for travel incident to medical examinations, and to parties, their representatives and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands to reconsideration interviews and to proceedings before administrative law judges under title XVIII of the Social Security Act: *Provided further*, That \$20,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

The hospital insurance program affords protection against the high costs of hospital and related care to most individuals age 65 and over, and to disabled people under age 65 entitled for at least 24 months to social security or railroad retirement cash benefits. The program also covers treatment of end-stage renal disease for people entitled to monthly social security benefits, for insured workers, and for spouses or dependent children of such insured or entitled individuals.

For persons on the social security and railroad retirement rolls, the hospital insurance program is financed by contributions based on earnings from workers, employers, and self-employed individuals. The maximum taxable earnings base is the same for the hospital insurance program as for the social security old-age, survi-

FEDERAL HOSPITAL INSURANCE TRUST FUND—Continued

vors, and disability insurance programs. Under present law, the rate applied to earnings up to this maximum was 1.05% through calendar year 1980. Beginning January 1, 1981, the rate increases to 1.30%. Costs for uninsured persons 65 or older in 1974, who met certain transition insured status requirements, are financed from general revenues of the Treasury. Uninsured persons reaching age 65 who cannot be covered under this provision of the law can enroll in the program on a voluntary basis, but must pay the full cost of the protection. The monthly rate was \$69 for the year beginning July 1, 1979. Effective July 1, 1980, the rate is expected to increase to \$78, and on July 1, 1981, to \$89.

1. *Benefit payments.*—The hospital insurance program provides protection against the cost of inpatient hospital services, posthospital home health services, and posthospital skilled nursing facility services, with specified deductibles and coinsurance amounts. Benefit payments beginning in 1977 also include funding of the direct review costs for PSRO's. The following table shows comparative data for 1979 through 1981 (in thousands) on hospital insurance beneficiaries and on benefit payments classified by type of coverage:

Beneficiaries: Persons with hospital insurance protection (average):	1979 actual	1980 estimate	1981 estimate
Aged.....	23,814	24,301	24,779
Disabled.....	2,882	2,972	3,047
Beneficiaries receiving reimbursed services:			
Aged.....	5,490	5,750	5,930
Disabled.....	750	800	850
Benefit payments: For inpatient hospital services:			
Aged.....	16,735,459	19,104,600	21,634,000
Disabled.....	2,351,000	2,746,000	3,170,000
For skilled nursing facility services:			
Aged.....	355,000	365,000	378,000
Disabled.....	13,000	14,000	15,000
For home health services:			
Aged.....	411,000	492,000	588,000
Disabled.....	33,000	41,000	49,000
Total benefit payments:			
Aged.....	17,501,459	19,961,600	22,600,000
Disabled.....	2,397,000	2,801,000	3,234,000
Total.....	19,898,459	22,762,600	25,834,000

The growth in benefit payments from 1979 to 1981 results primarily from increases in the cost of medical services and in the size of the covered population.

2. *Administration.*—This activity reflects administrative expenses attributable to the hospital insurance program by the Health Care Financing Administration, the Social Security Administration, other components of the Department of Health and Human Services, and by the Treasury Department.

3. *Experiments and demonstrations.*—The Health Care Financing Administration supports experiments and demonstration projects to improve the efficiency of the medicare program.

Proposed legislative items that affect the Federal hospital insurance trust fund would:

1. Curb the excessive rate of inflation in hospital costs by limiting the annual increase in acute hospital inpatient revenues.
2. Eliminate the additional 24-month waiting period for medicare coverage for reentitled disabled individuals.
3. Restructure medicare coverage for the working aged to reduce the costs of medicare benefits.
4. Require the use of medicare audit findings in the administration of the medicaid and maternal and child health programs.
5. Extend medicare coverage for disabled workers who return to work but are not medically recovered.
6. Bring the method of paying qualified HMO's under medicare into conformance with the customary HMO payment.
7. Reduce medicare expenditures by reimbursing hospitals only for the reasonable cost of providing long-term care in an acute care setting to patients awaiting placement in a long-term facility.
8. Eliminate the routine nursing salary cost differential in determining medicare reimbursement until evidence is produced which supports its use.
9. Amend the medicare program to make home health benefits available without co-insurance or deductible under Part A, and to eliminate the requirement that a patient be hospitalized for three days before being eligible for home health benefits.
10. Provide Federal administration costs associated with the above proposals.

The supplementary medical insurance program affords protection against the costs of physician services and certain other medical services. Most individuals age 65 and over are eligible for this protection, and about 95% of those eligible have elected coverage. Disabled people under age 65 entitled for at least 24 months to monthly social security or railroad retirement cash benefits also are eligible for this protection. The program also covers treatment of end-stage renal disease for eligible people who elect to enroll.

The cost of supplementary medical insurance is financed by premium payments from enrollees together with contributions from the general revenues of the Treasury. The Secretary of Health and Human Services is required by law to promulgate the standard monthly premium rate to be paid by enrollees. The SMI premium rate can rise by no more than the percentage by which cash benefits increased since the last premium raise. Effective July 1, 1979, the premium rate has been \$8.70. The rate for enrollees included in this budget is \$9.60, effective July 1, 1980, and an estimated \$10.60, effective July 1, 1981.

1. *Benefit payments.*—The supplementary medical insurance program provides protection against the cost of physician services, home health services not covered under the hospital insurance program, outpatient services, and certain other medical costs, with specified deductibles and coinsurance. The following table shows

FEDERAL SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND—
Continued

comparative data for 1979 through 1981 (in thousands)
on supplementary medical insurance beneficiaries and
benefit payments, classified by type of coverage.

Beneficiaries:	1979 actual	1980 estimate	1981 estimate
Persons enrolled (average):			
Aged	23,839	24,452	25,041
Disabled	2,650	2,748	2,820
Beneficiaries receiving reimbursed services:			
Aged	14,399	15,111	15,901
Disabled	1,618	1,717	1,811
Benefit payments:			
For physician services:			
Aged	5,161,077	5,940,000	7,018,000
Disabled	680,000	800,000	946,000
For home health services:			
Aged	175,000	197,000	233,000
Disabled	15,000	18,000	20,000
For outpatient services:			
Aged	950,000	1,149,000	1,370,000
Disabled	605,000	740,000	882,000
For other medical and health services:			
Aged	607,000	739,000	851,000
Disabled	66,000	80,000	93,000
Total benefit payments:			
Aged	6,893,077	8,025,000	9,472,000
Disabled	1,366,000	1,638,000	1,941,000
Total	8,259,077	9,663,000	11,413,000

The growth in benefit payments from 1979 to 1981 results primarily from increases in the cost and utilization of covered services and in the size of the covered population.

2. *Administration.*—This activity reflects administrative expenses attributable to the supplementary medical insurance program by the Health Care Financing Administration, the Social Security Administration, other components of the Department of Health and Human Services, the Treasury Department, the Railroad Retirement Board, and the Office of Personnel Management.

3. *Experiments and demonstrations.*—The Health Care Financing Administration supports experiments and demonstration projects to improve the efficiency of the medicare program.

There are a number of legislative proposals which affect the Federal supplementary medical insurance trust fund. These proposals would:

1. Eliminate or shorten the 24-month waiting period for medicare coverage for re-entitled disabled individuals.

2. Provide for medicare reimbursement on the basis of reasonable costs in cases where providers who are normally reimbursed on the basis of costs have been reimbursed on the basis of charges.

3. Increase the rate of medicare program payment for outpatient psychiatric services from 50% to 80% of reasonable charges and increase the maximum amount payable in a calendar year from \$250 to \$750.

4. Authorize the Secretary to assess a civil money penalty against any person who she determines, after notice and the opportunity for a hearing, has filed a fraudulent claim under the medicare program.

5. Eliminate the excessive reimbursement to hospital-based radiologists, anesthesiologists, and pathologists that has resulted from existing reimbursement practices.

6. Extend medicare coverage for disabled workers who return to work but are not medically recovered.

7. Assure that reimbursement under the medicare program is made only for services which are medically helpful to beneficiaries by eliminating reimbursement for chiropractic services.

8. Delete wart removal as one of the routine foot care exclusions.

9. Bring the method of paying qualified Health Maintenance Organizations (HMO's) under medicare into conformance with the customary method of HMO payment.

10. Permit medicare reimbursement of freestanding ambulatory surgery centers for surgical procedures specified by the Secretary.

11. Provides the Secretary authority to employ competitive procurement procedures for the bulk purchase of laboratory services, durable medical equipment, and other medical services and supplies.

12. Amend the medicare program to make home health benefits available without coinsurance or deductible under part A, and to eliminate the requirement that a patient be hospitalized for 3 days before being eligible for home health benefits.

13. Provide Federal administration costs for implementing the civil money penalty proposal and the medicare contractors initiative.

[EDUCATION FOR THE HANDICAPPED]

Note.—The activities formerly included in this account, in the amount of \$976,637,000 for 1979 and \$1,049,025,000 for 1980, will be transferred to the Department of Education, Office of Special Education and Rehabilitative Services, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Education for the handicapped.

[OCCUPATIONAL, VOCATIONAL, AND ADULT EDUCATION]

Note.—The activities formerly included in this account, in the amount of \$781,614,000 for 1979 and \$889,041,000 for 1980, will be transferred to the Department of Education, Office of Vocational and Adult Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Vocational and adult education.

[STUDENT ASSISTANCE]

Note.—The activities formerly included in this account, in the amount of \$3,753,650,000 for 1979 and \$3,056,935,000 for 1980, will be transferred to the Department of Education, Office of Postsecondary Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Student financial assistance.

[HIGHER AND CONTINUING EDUCATION]

Note.—The activities formerly included in this account, in the amount of \$395,700,000 for 1979 and \$408,430,000 for 1980, will be transferred to the Department of Education, Office of Postsecondary Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Higher and continuing education.

[EDUCATIONAL ACTIVITIES OVERSEAS (Special Foreign Currency Program)]

Note.—The activities formerly included in this account, in the amount of \$500,000 for 1979 and \$1,000,000 for 1980, will be transferred to the Department of Education, Departmental Management, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Educational, research, and training activities overseas (Special foreign currency program).

[SALARIES AND EXPENSES]

Note.—The activities formerly included in this account, in the amount of \$126,553,000 for 1979 and \$127,756,000 for 1980, will be transferred to the Department of Education, Departmental Management, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Salaries and expenses.

[EDUCATIONAL DEVELOPMENT]

Note.—The activities formerly included in this account will be transferred to the Department of Education, Office of Educational Research and Improvement, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Educational development.

[STUDENT LOAN INSURANCE FUND]

Note.—The activities formerly included in this account, in the amount of \$982,503,000 for 1979 and \$959,621,000 for 1980, will be transferred to the Department of Education, Office of Postsecondary Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Student loan insurance.

[HIGHER EDUCATION FACILITIES LOAN AND INSURANCE FUND]

Note.—The activities formerly included in this account, in the amount of \$3,075,000 for 1979 and \$3,021,000 for 1980, will be transferred to the Department of Education, Office of Postsecondary Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Higher education facilities loan and insurance.

[HEALTH PROFESSIONS GRADUATE STUDENT LOAN INSURANCE FUND]

Note.—Schedules for this account formerly shown in this place are included in the Health Resources Administration by this Department.

[CONSOLIDATED WORKING FUND]

Note.—The activities formerly included in this account will be transferred to the Department of Education, Office of Vocational and Adult Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are credited to the account Vocational and adult education.

[NATIONAL INSTITUTE OF EDUCATION]**[CONSOLIDATED WORKING FUND]**

Note.—The activities formerly included in this account will be transferred to the Department of Education, Office of Vocational and Adult Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are credited to the account Vocational and adult education.

[OFFICE OF THE ASSISTANT SECRETARY FOR EDUCATION]**[INSTITUTE OF MUSEUM SERVICES]**

Note.—The activities formerly included in this account, in the amount of \$7,852,000 for 1979 and \$10,913,000 for 1980, will be transferred to the Department of Education, Departmental Management, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account Institute of Museum Services.

SOCIAL SECURITY ADMINISTRATION*Federal Funds***General and special funds:****PAYMENTS TO SOCIAL SECURITY TRUST FUNDS**

For payment to the Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Funds, as provided under sections 201(g)(1), 217(g), 223(g), 229(b), 702, and 1131(b)(2) of the Social Security Act, **[\$676,933,000] \$675,790,000.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980 that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

Program and Financing (in thousands of dollars)

90.00	Outlays.....	756,892	676,995	675,790

This appropriation provides for payments from Federal funds to the Federal old-age and survivors and disability insurance trust funds for certain types of benefits and related administrative costs not financed by contributions from workers and employers. The 1981 request is for \$675,790 thousand and covers the following payments.

1. *Military service credits.*—\$520,516 thousand for benefits based on noncontributory military service credits for veterans of the World War II and post-World War II periods. Payment is prescribed in sections 217(g) and 229(b) of the Social Security Act and includes reimbursement for administrative expenses and interest lost to the trust funds.

The payment to each trust fund is (in thousands of dollars):

Old-age and survivors insurance.....	390,127
Disability insurance	130,389
Total	520,516

2. *Special payments for certain uninsured persons.*—\$149,809 thousand for benefits paid in 1979 to certain uninsured individuals aged 72 and over, related administrative expenses, interest lost to the trust fund, and adjustments for prior years' costs. The benefits were established to afford some protection for certain persons, or their surviving dependents, who retired before the enactment of social security legislation or before their occupations were covered by social security.

3. *Pension reform.*—\$1,900 thousand for the cost incurred by the Social Security Administration in furnishing information to individuals who have left a pension fund, of their vested rights in those funds.

4. *Survey of income and program participation.*—A payment of \$3,565 thousand is requested to reimburse the Federal old-age and survivors insurance trust fund for research expenses incurred by this study and chargeable to Federal funds.

Note.—Excludes \$953 thousand in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$953 thousand) and 1980 (\$953 thousand) are included above.

1. **Benefit payments.**—Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to living coal miners who are totally disabled from pneumoconiosis resulting from employment in coal mines and to surviving widows. Benefit payments to miners and surviving widows are increased for dependents and others in certain circumstances.

After 1973, the jurisdiction for payment of claims and most survivor claims shifted to the Department of Labor. However, Health and Human Services pays benefits to individuals who filed before 1974.

BENEFITS AND BENEFICIARIES, AVERAGE FOR FISCAL YEAR

	1979 actual	1980 estimate	1981 estimate
Benefit payments (in thousands).....	985,288	1,035,000	1,054,000
Beneficiaries.....	440,000	416,000	391,000

The law prescribes an October 1980 automatic benefit increase, with benefits 50% of the amount for a totally disabled GS-2 Step 1 Federal employee.

2. **Administration.**—Administrative costs in 1981 are for monitoring and making changes to the beneficiary rolls and authorizing payments to entitled beneficiaries monthly. The reduction from the 1979 and 1980 levels of cost is due to a decline in the size of the beneficiary roll.

The district offices of the Department of Health and Human Services will continue to take claims for benefits, mostly on behalf of the Department of Labor. In addition, the Department of Health and Human Services will complete the search of its records of coal mine employment for the Department of Labor. This results from the Black Lung Benefits Reform Act of 1977. The Department of Health and Human Services is reimbursed for these costs, estimated to total \$905 thousand for 1981, from funds appropriated to the Department of Labor.

Title XVI of the Social Security Act established the Federal supplemental security income (SSI) program for the aged, blind, and disabled. In 1980, the supplemental security income program provides a minimum income of \$208.20 per month for an eligible individual and \$312.30 per month for an eligible couple. Public Law

93-368 requires that SSI benefit levels be increased each July by the same cost-of-living percentage as social security benefits.

SSI is administered by the Federal Government under national uniform eligibility requirements and payment support levels. States are required to supplement the Federal benefit to assure that recipients of benefits under the former State-administered programs suffered no loss of income under SSI. States may make additional supplementary payments, and may enter into agreements with the Federal Government to administer their supplementary payments. The Federal cost of administering the State's supplementary payment is financed from Federal funds.

This appropriation request includes: (1) \$6,085 million in Federal payments to 3.7 million aged, blind, and disabled recipients; (2) \$45 million in Federal hold harmless subsidy payments to three States; (3) \$56.2 million to reimburse State agencies for providing services to and planning and monitoring for treatment of disabled SSI recipients; (4) \$713 million to reimburse the social security trust funds for costs of administration; and (5) \$4 million for Federal fiscal liability (FFL) settlements with States which result from erroneous payments of federally administered State supplements. State supplements financed by the States and administered by the Federal Government as a reimbursable program are estimated to cost \$1.64 billion in 1981.

ASSISTANCE PAYMENTS PROGRAM*

*See Part III for additional information.

For carrying out, except as otherwise provided, titles I, IV, X, XI, XIV, and XVI of the Social Security Act, and the Act of July 5, 1960 (24 U.S.C., ch. 9), [\$7,072,210,000] \$8,145,689,000, to remain available until expended.

For making, after June 30 of the current fiscal year, payments to States under titles I, IV, X, XIV, and XVI, respectively, of the Social Security Act for the last three months of the current fiscal year and for making after July 31 of the current fiscal year payments for the first quarter of the succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the subsequent appropriations therefor for the current or succeeding fiscal year. No payment shall be made from this appropriation to reimburse State or local expenditures made prior to [September 30, 1978] October 1, 1978; except that payment shall not be denied with respect to court-ordered retroactive payments or audit exceptions, or as otherwise provided in authorizing legislation.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. Note.—The 1980 budget authority for this account has been reduced by \$350 million pursuant to Public Law 96-123.

Grants to States for assistance payments are made for the Federal share of State expenditures for maintenance assistance and child support enforcement. Research and training projects are also supported.

Estimates of requirements are based on an evaluation of the States' latest estimates together with national trends of historic data adjusted by socioeconomic factors which will have an impact upon these trends.

1. *Maintenance assistance.*—Maintenance payments provide needy persons with resources to assist in meeting the costs of daily living.

Federal matching for Aid to Families With Dependent Children (AFDC), the major portion of the maintenance assistance activity, averages 53.8%. The Federal matching for State and local administration is 50% and the matching share for State and local training is 75%.

The SSA has initiated efforts to improve administration of the AFDC program through technical assistance to States and closer Federal monitoring of States' performance, including claims for Federal financial participation.

2. *Child support enforcement.*—The purpose of the child support enforcement program, in effect since August 1, 1975, is to assist States in enforcing the support obligations owed by absent parents to their children, locating absent parents, establishing paternity, and obtaining child support. Federal grants for State and local administration of the program are made to States having plans approved by the Department of Health and Human Services; at a Federal matching rate of 75%.

Costs and collections are expanding as State and local governments increase the number of absent parents who are providing child support under this program. The Federal Office of Child Support Enforcement has begun a major effort to increase the level of collections, by means of the following steps: Training for Federal, State, and local staffs; technical assistance to States; and model computer systems for the use of the States.

CHILD SUPPORT ENFORCEMENT COLLECTIONS AND COSTS

3. *Research and evaluation.*—The public assistance research and evaluation program is authorized by the Social Security Act under sections 1110 and 1115. Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes.

Research and evaluation (costs in thousands of dollars).....	2,650	3,500	3,500
--	-------	-------	-------

4. *Administrative expenses.*—The administrative costs budgeted for the assistance payments programs provide for Federal direction of the various grant programs that provide maintenance assistance to the needy. Activities include grants for management and consultative services to State and local governments and other grantees. Related activities are: monitoring and reviewing to

insure effective and prudent use of Federal funds by grantees; the conduct of research; the collection, processing, and dissemination of statistical data; and the review of accomplishments of program activities.

90.00 Outlays.....		—79,000	—249,000

Many of the following items are included in and integral to the Administration's welfare reform proposal, which is substantially embodied in the House bill, H.R. 4904. They are being requested as part of that larger proposal.

1. Standardize work expenses, revise treatment of the earned income tax credit, and adjust earnings disregards. These changes would simplify the administration of the AFDC program, reduce State costs in determining benefits, reduce the amount of benefit payments in error, and aid in further reform of the welfare system. (Outlay reduction of \$141 million in 1981.)

2. Require that the earnings disregard not be applied to any earned income which is reported late. Timely

reporting of income will enhance the administrative capability to make correct payments and thereby reduce possible sources of error. (Outlay reduction of \$26 million in 1981.)

3. Permit States to prorate shelter, utilities and similar expenses in the case of an AFDC child living with a nonlegally responsible relative. Benefits would more accurately reflect the need and the relative burden of the AFDC beneficiary on the household. Also, permit States to count stepparent income in determining AFDC eligibility and benefit amount. This provision will permit consideration of the full resources of a family with which an AFDC child resides and forms an integral part. (Outlay reduction of \$31 million in 1981.)

4. Improve the child support enforcement program by a series of proposals, including: States would become eligible for intrastate incentive payments, AFDC families would receive an extra 3 months of AFDC entitlement following the time such families would otherwise become ineligible due to child support payments in order to ensure that such support remains regular, alimony payments would be enforced and collected for AFDC cases, States would be able to receive wage information from the Social Security Administration, the requirement for incentive payments to States in interstate child support cases would be eliminated, and Federal matching would be made permanent for non-AFDC cases if a fee equal to 10% of collections were charged. These changes are designed to enhance the effectiveness of making collections and increasing the provision of legally required support, simplify and improve the administration of the program, and reduce the public welfare burden. (Outlay reduction of \$65 million in 1981.)

5. As a result of the above changes, State and local administrative costs will decrease. (Outlay reduction of \$16 million in 1981.)

6. Double the ceiling (to \$52 million) on Federal matching funds in Guam, Puerto Rico, and the Virgin Islands and increase match from 50% to 75%, and require the territories to maintain their contributions under this program so that the increase in Federal support may be passed through to the poor. (Outlay increase of \$26 million in 1981.)

A provision in the Administration's disability bill which revises benefits for families of title II disabled workers will increase benefits for certain AFDC recipients. (Outlay increase of \$2 million in 1980 and \$4 million in 1981.)

REFUGEE ASSISTANCE*

*See Part III for additional information.

For expenses necessary to carry out the provisions of the Migration and Refugee Assistance Act of 1962 (Public Law 87-510), as amended relating to aid to Cuban Refugees within the United States and other domestic refugee assistance, **[\$75,540,000] \$87,300,000.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980. For those activities or portions of activities of this account that were deferred from regular appropriation consideration, Public Law 96-123 provides funding at the current rate. For all other activities or portions of activities of this account, Public Law 96-123 provides funding at a rate consistent with amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This appropriation provides assistance for resettlement of certain refugees in the United States based on the Migration and Refugee Assistance Act of 1962, as amended, and the Indochina Migration and Refugee Assistance Act of 1975, as amended. The assistance provided includes cash assistance, medical assistance, education (including vocational training), social services, and employment services. The principal objective of the program is to help refugees become independent, self-sufficient members of American society without unduly burdening States and localities. The appropriation also includes funds for administration of the program at the Federal, State and local levels.

1. *State-administered programs.*—Aid to Indochinese refugees expired at the end of 1979. Congress has extended it through 1981. Funds are provided to State agencies to pay costs for cash assistance, medical assistance, English language training, vocational training, employment counseling, and a variety of other social services. All State administrative costs are reimbursed from this activity.

Legislation has been proposed by the Administration to change the Indochinese program to provide welfare assistance for 2 years after a refugee's entry into the United States. This coverage would be extended to all refugees for whom voluntary agencies cannot provide matching funds. After the 2 years of special Federal funding, refugees still in need of assistance could be served under the regular Federal and State domestic assistance programs. The Administration will request

General and special funds—Continued

REFUGEE ASSISTANCE—Continued

funds for State-administered programs in 1981 when this legislation is enacted.

2. *Voluntary agency programs.*—This activity provides assistance for the resettlement of Soviet and other refugees. Funds are provided to voluntary resettlement agencies on a dollar-for-dollar matching basis for the purpose of assisting refugees in resettlement. A wide range of activities are covered, including training, professional recertification, social services, maintenance assistance, and health care. Funds were appropriated for this purpose for the first time under the Foreign Assistance and Related Programs Appropriations Act for 1979 (Public Law 95-481). This Act provided that these funds were to be expended only by the Department of Health, Education, and Welfare.

3. *Cuban program phasedown.*—Under this program the Federal Government reimburses the States for Cuban refugee cash assistance, medical assistance and administrative costs not covered by Federal funding under the public assistance titles of the Social Security Act. Dade County (Miami, Fla.) is also reimbursed to offset the cost of educating refugee school children. Beginning in 1978, the Federal share of these activities will decline until it is terminated in 1983. The only part of the program not being phased down is reimbursement of Medicaid costs for those refugees eligible for SSI; however, this will also be terminated in 1983.

4. *Educational assistance for children.*—Special project grants are provided to selected school districts with large numbers of refugee children. Grants are intended to offset costs of training and hiring bilingual teachers and of acquiring bilingual teaching materials. This activity is managed jointly by the Social Security Administration and the Department of Education. Funds requested in a 1980 supplemental will support the 1980-81 school year; 1981 funds requested under proposed legislation will support the 1981-82 school year.

5. *Preventive health.*—This activity provides for the Public Health Service to conduct health screenings of Indochinese refugees both abroad and in the United States. These health screenings have two basic purposes: (1) To ensure detection and treatment of communicable diseases which could otherwise pose a public health threat; (2) to provide basic health assessments for all refugees to identify other health problems which would adversely impact the individual although they do not pose a significant public health threat. These latter problems include such things as anemia, malnutrition, dental disease, and intestinal parasites.

6. *Federal administrative costs.*—This activity provides for Federal administrative expenses of the Social Security Administration. It includes direction and technical assistance provided to State employment training programs and social service agencies. In addition, negotiations are conducted to ensure adherence to Federal law and regulations through the review of State plans, grant requests and onsite review of procedures. Finally, it includes information and referral services and informational publications provided directly by the Federal Government.

Legislation has been proposed to provide a comprehensive refugee program to provide welfare assistance for the first two years after a refugee's entry into the United States and to provide social services and training which will help the refugee to become independent and self-sufficient. This will enable refugees to become integrated into American society without unduly burdening States and localities.

Direct program.—The old-age and survivors insurance (OASI) program protects individuals and families from the risk of economic loss resulting from old age and death by providing income to retired workers, their dependents, and their dependent survivors. The program is financed by contributions to the trust fund which are made by employers, employees, and self-employed individuals based on earnings. The contribution rate on taxable earnings for employers and employees was 4.275% in calendar year 1978, 4.330% in 1979 and 1980, and will be 4.525% in 1981. The rate for self-employed persons was 6.0100% for calendar years 1978 through 1980 and becomes 6.7625% in 1981.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was \$17,700 in 1978, \$22,900 in 1979 and will increase to \$25,900 in 1980 and \$29,700 in 1981. The benefit payments are based on average taxable earnings.

1. **Benefit payments.**—Benefits are paid to retired workers, their dependents, and their survivors. The average number of persons receiving payments and the benefit amounts classified by major types of beneficiaries for 1979-81 follow:

Beneficiaries (millions):	1979 actual	1980 estimate	1981 estimate
Retired workers.....	18.7	19.2	19.8
Dependents of retired workers.....	3.6	3.7	3.7
Survivors.....	7.6	7.6	7.7
Total beneficiaries.....	29.9	30.5	31.2
Benefit payments (billions):			
Retired workers.....	58.5	69.0	81.3
Dependents of retired workers.....	6.4	7.1	8.1
Survivors.....	22.7	25.3	29.0
Total benefit payments.....	87.6	101.3	118.3

Benefit outlays continue to rise because: (1) the number of aged persons in the population and the proportion of the aged who are insured rise; (2) average monthly benefits are adjusted automatically as price levels rise; and (3) newly entitled beneficiaries have higher initial benefits reflecting the growth in general wages during their careers.

Automatic cost-of-living benefit increases are triggered annually by increases in the consumer price index and are effective for June of each year. Benefit payments were increased 6.5% in June 1978, and to 9.9% in June 1979, and are projected to increase to 13.0% in June 1980 and 9.9% in June 1981.

In calendar year 1978, the annual exempt amount of earnings under the retirement test for beneficiaries age

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND—
Continued

65 and over was \$4,000 and for 1979, \$4,500. This amount will increase to \$5,000 for 1980 and \$5,500 for 1981. For beneficiaries under age 65 this amount was \$3,240 for 1978 and increased to \$3,480 for 1979. For 1980, this amount is projected to increase to \$3,720 and to \$4,080 for 1981.

2. *Administration.*—This activity reflects administrative expenses attributable to the retirement and survivors' insurance program by the Department of Health and Human Services, and by the Department of the Treasury.

3. *Payment to railroad retirement account.*—Annual payments averaging \$1.5 billion are made from the OASI trust fund to the railroad industry pension fund. The annual OASI payment to the railroad industry pension fund places the funds in the same position they would have been in if railroad employment were treated like other private sector employment and covered under social security (45 U.S.C. 228g). Estimates are made of the yearly amounts of additional contributions SSA would have collected, the additional benefits it would have paid, and the additional administrative costs it would have incurred if railroad employees were covered under social security. Each year's payment is a settlement for the prior year, representing the amount by which the estimated benefit payments and administrative costs exceed the estimated contributions, and includes interest through the date of transfer. The annual OASI payment to the railroad industry pension includes funds for some benefits which are not, in turn, paid to railroad workers and their families. The components of the net transfers in 1979–81 follow (in millions of dollars):

	1979 actual	1980 estimate	1981 estimate
Benefit payments	2,057.0	2,216	2,448
Administrative costs	16.3	18	19
Interest	145.7	116	125
Less contributions	-771.5	-882	-1,041
Net transfer	1,447.5	1,468	1,551

4. *Vocational rehabilitation services.*—Payments may be made from the OASI and the Disability Insurance (DI) trust funds for rehabilitation services available to individuals who are entitled to social security cash benefits because of a disability. The payments are made in expectation that savings will accrue to the trust funds as a result of rehabilitating disabled beneficiaries into productive activity. The OASI trust fund bears the cost of rehabilitation services provided to disabled retirement and survivors insurance beneficiaries, and the DI trust fund bears the cost of such services provided to disability insurance beneficiaries.

Reimbursable program.—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs administered by SSA with full reimbursement to the trust fund (including interest when appropriate). Under 42 U.S.C. 1306(b), SSA is authorized (within limits set by the Privacy and Freedom of Information Acts) to provide information or services to other governmental organizations or private organizations on a reimbursable basis. Reimbursable work in-

cludes providing information from our records such as data relating to earnings, periods of employment, addresses of reporting employers, and employment data for pension funds and unions. Services provided on a reimbursable basis include printing and reproduction, processing data, and use of data processing equipment.

A number of legislative proposals would affect the old age and survivors insurance and disability insurance trust funds. Most of these are technical in nature, have little or no budgetary impact and are designed to facilitate routine operation of the program or improve equity. Below are the proposals which have budgetary consequences:

1. Provide 1 month's retroactivity for a widow(er) who files an application for reduced benefits after the month the spouse died. This would allow an exception from the general bar against retroactive payment of reduced benefits. It would allow a reasonable period of time for the widow(er) to file for benefits.

2. Change the rules for reduction of social security disability benefits when the worker also received worker's compensation by: (a) applying the reduction in the month the worker receives both kinds of benefits instead of the month after the worker notifies the Department of Health and Human Services of receipt of worker's compensation as under present law and (b) apply-

ing the reduction to those over age 62 instead of ending the reduction at age 62 as under present law.

3. Require that employers pay the full employer share of FICA contributions on all tips earned by their employees.

4. Require a flat rate tax of 10% be withheld from compensation for services paid to certain independent contractors, in order to prevent tax noncompliance.

Among the other proposals without major budgetary impact are changes to: (a) Reimburse the trust funds for providing private pension plan information; (b) modify penalties for failure to make a timely report of post-retirement earnings; (c) eliminate several gender based distinctions from the social security law; and (d) modify the retirement test provisions to apply the retirement test on a monthly basis in certain circumstances and make the application for medicare independent of the application for retirement benefits.

90.00	Outlays	13,944,024	15,364,926	17,398,994

The disability insurance (DI) program protects individuals and families against the risk of economic loss resulting from disability by providing income to insured workers (and their dependents) who are unable to engage in substantial gainful activity by reason of medical impairment. This program is financed by contributions to the trust fund made by workers, employers, and self-employed individuals based on earnings. In calendar year 1978, the contribution rate was 0.775% each for employers and employees. The rate was 0.750% in 1979 and is the same for 1980. In 1981 it will be 0.825%.

FEDERAL DISABILITY INSURANCE TRUST FUND—Continued

For self-employed persons the contribution rate was 1.090% in 1978 and decreased to 1.040% for 1979 and 1980. In 1981 it will increase to 1.2375%. The contribution rates are applied to earnings up to a maximum level which is the same for this program as for the old-age and survivors insurance (OASI) program.

1. *Benefit payments.*—Disability insurance benefits are made to certain disabled individuals and their dependents. The average number of persons receiving payments and the benefit amounts, classified by major types of beneficiaries for 1979–81 follows:

Beneficiaries (millions):	1979 actual	1980 estimate	1981 estimate
Disabled workers	2.9	2.9	2.9
Dependents of disabled workers	2.0	1.9	1.8
Total beneficiaries	4.9	4.8	4.7
Benefit payments (billions):			
Disabled workers	11.1	12.3	14.0
Dependents of disabled workers	2.3	2.5	2.9
Total benefit payments	13.4	14.8	16.9

Benefit payments will continue to increase because: (1) the population insured for disability benefits continues to rise, especially at ages 50 to 64 where disability incidence rates are highest; and (2) the average monthly benefits will increase as general earnings levels rise. Automatic cost-of-living benefit increases are the same as for the OASI program.

2. *Administration.*—This activity reflects similar administrative expenses, as for the OASI program attributable to the DI program.

3. *Payment to railroad retirement account.*—Annual payments are made from the DI trust fund to the railroad retirement fund. This payment is computed on the same basis as the payment from the OASI trust fund.

	[In millions of dollars]		
	1979 actual	1980 estimate	1981 estimate
Benefit payments	154.7	150	168
Administrative costs	2.3	3	3
Interest	4.0		
Less contributions	-131.1	-154	-180
Net transfer	29.9	-1	-9

4. *Vocational rehabilitation services.*—Payments may be made from the DI insurance trust fund for the purpose of making rehabilitation services available to individuals who are entitled to social security cash benefits because of a disability. The payments are made in the same way as those made from the OASI trust fund.

90.00	Outlays		-16,000	-133,000

This proposal would reform the disability program by setting a new limit on the amount of monthly benefits; scaling to the worker's age the number of earnings years that can be disregarded when computing benefits; increasing work incentives for those on the disability rolls and improving the administration of the program. These proposals are currently pending in Congress.

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses, not more than **[\$2,354,100,000]** **\$2,671,650,000** may be expended as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: *Provided*, That such amounts as are required shall be available to pay travel expenses either on an actual cost or commuted basis, to an individual for travel incident to medical examinations, and to parties, their representatives and all reasonably necessary witnesses for travel within the United States, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands, to reconsideration interviews and to proceedings before administrative law judges under titles II, XVI, and XVIII of the Social Security Act: *Provided further*, That **[\$30,000,000]** **\$50,000,000** of the foregoing amount shall be apportioned for use pursuant to section 8679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further*, That **[\$27,792,000]** **\$13,500,000** authorized herein shall be available only for acquisition of sites, construction, renovation, and equipment of facilities and for payments of principal, interest, taxes and any other obligations under contracts entered into pursuant to the Public Buildings Purchase Contract Act of 1954 and the Public Building Amendments of 1972, and shall remain available until expended.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980 that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

Note.—Excludes \$2,061 thousand in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$2,061 thousand) and 1980 (\$2,061 thousand) are included above.

The Social Security Administration administers programs of old-age, survivors, and disability insurance, and supplemental security income. In addition, it administers some health insurance activities, as well as annual reporting of earnings and pension reform activities. The principal costs for administration of these programs are financed by this appropriation; however, there are costs of other components of the Department of Health and Human Services and of the Treasury Department which relate to administration of these programs shown elsewhere in the budget.

Administrative costs are related to workloads generated by the statutory provisions of social security programs. These workloads depend upon factors not subject to administrative control, such as population growth, level of employment, economic conditions, income levels, incidence of illness, and mortality rates.

1. *Old-age and survivors insurance.*—The administrative costs provide for making initial determinations of eligibility, reevaluating initial determinations and maintaining the beneficiary rolls to assure proper benefit payments, and continuing entitlement to benefits.

2. *Disability insurance.*—The administrative costs provide for processing and reviewing initial claims, determining the continuing disability of beneficiaries, and maintaining the beneficiary rolls to assure proper benefit payments. Determinations regarding the existence or continuation of a disability are made by State agencies under contract with the Social Security Administration, and these costs are included in the budget.

3. *Health insurance.*—While the Health Care Financing Administration (HCFA) is responsible for medicare administration, the Social Security Administration performs certain administrative functions, such as premi-

LIMITATION ON ADMINISTRATIVE EXPENSES—Continued

um billing and collection, and maintenance of the data base on entitlement and premium information.

4. *Supplemental security income.*—The administrative costs provide for making initial determinations of eligibility, reevaluating the initial determination when requested by the claimant, maintaining the recipient rolls to assure proper payment of benefits, and investigating continuing entitlement to benefits through periodic re-determinations of eligibility. Determinations of the existence or continuation of a disability are made by State agencies under contract with the Social Security Administration, and these costs are included in the budget.

5. *Annual reporting of earnings.*—Public Law 94-202, enacted January 2, 1976, authorized a single annual wage reporting system to serve the data needs for both the Social Security Administration and the Internal Revenue Service. It gave the Secretaries of Treasury and HHS authority to use form W-2, "Statement of Earnings," as an annual report of wages for both social security and income tax purposes. The new system went into effect in 1978.

The administrative costs budgeted for the system include the following activities: receiving source documents; examining them for adequacy; microfilming them; converting data from documents to magnetic tape by optical scanners or through key-to-tape data conversion; and balancing processed data to assure accuracy.

Funding for all annual reporting activities will be shared by the trust funds and general revenues.

6. *Pension reform.*—Public Law 93-406, the "Employee Retirement Income Security Act of 1974" (ERISA) requires the Secretary of HHS to maintain files to furnish information regarding deferred vested pension rights to plan participants upon request, or to the participant (and his dependents or survivors) automatically when applying for social security benefits.

The administrative costs budgeted for work related to pension reform include: (1) Establishing an automated record system for pension fund administrators identifying information on individuals who leave the jurisdiction of a pension fund; (2) responding to earnings information requests from the pension funds; (3) providing individual earnings histories from SSA records as requested by the pension funds. Costs incurred by the Department of Health and Human Services for providing information to the pension funds are recouped, within limits set by the Privacy and Freedom of Information Acts, on a reimbursable basis. Unrecouped costs are absorbed by this limitation account.

7. *Construction.*—Construction of three Program Service Centers and the new Headquarters buildings was financed by the purchase contract method. Budget authority of \$11,000 thousand is requested for purchase contract payments in 1981 and \$2,500 thousand for other building renovations with the funds for these payments reflected as a transfer to GSA.

8. *Reimbursable program.*—Under 42 U.S.C. 1306(b), the Social Security Administration is authorized (within limits set by the Privacy and Freedom of Information Acts) to provide information for services to other gov-

ernmental organizations or private organizations on a reimbursable basis. The major reimbursable activities include providing data related to earnings, periods of employment, and addresses of reporting employers; and taking applications for food stamps from supplemental security income applicants and recipients.

LIMITATION ON RESEARCH AND STATISTICS
(Survey of Income and Program Participation)

For necessary expenses, not more than \$16,000,000 to be available until expended as authorized by sections 201(g)(1) and 702 of the Social Security Act, from any one or all of the trust funds referred to therein, and as authorized herein, from payments by way of advancements or reimbursements to the Social Security Trust Funds for the Survey of Income and Program Participation as it relates to titles I, II, IV (Parts A and D), X, XI, XIV, XVIII and XIX of the Social Security Act. Provided, that each of the Social Security Trust Funds and the general fund of the Treasury bear its proper share of the costs in a manner consistent with the provisions of section 201(g)(1) of the Social Security Act.

Survey of income and program participation.—The request will provide funds to conduct the first multi-year panel of this continuing national longitudinal household survey of income, net worth, and program eligibility and participation. The survey will provide an ongoing social research data gathering mechanism, designed to be flexible so that data on new programs or other new areas of interest can be collected. Each panel will repeatedly survey the same sample of individuals at regular intervals over a period of several (probably 4) years. A new survey panel will begin each year. In the first year of operation, 15,000 households will be surveyed twice. The survey will provide information on program participation rates, multiple program participation, and statistics on economic circumstances of the population. These data will be used to support policy analysis, estimate future program costs and coverage, and assess the effects of alternative policy decisions for the Department's income security programs. In addition, these data will benefit the planning arms of the Office of the Secretary and the Departments of Commerce, Labor, Education, Agriculture, and others.

General and special funds:

GRANTS TO STATES FOR SOCIAL AND CHILD WELFARE SERVICES*

* See Part III for additional information.

For carrying out activities authorized by sections 420, 1110, and 2001 of the Social Security Act, [\$2,606,500,000] \$2,675,000,000, to remain available until expended, of which \$56,500,000 shall be for child welfare services authorized by section 420, and of which not to exceed [\$75,000,000] \$116,000,000 may be used for training authorized by section 2001.

For making, after June 30 of the current fiscal year, payments to States authorized by section 2001 of the Social Security Act, for the last three months of the current fiscal year, and for making after July 31 of the current fiscal year, payments for the first quarter of the succeeding fiscal year; such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the subsequent appropriations therefor for the current or succeeding fiscal year. No payment shall be made from this appropriation to reimburse State or local expenditures made prior to [September 30, 1978] October 1, 1978; except that payment shall not be denied with respect to court-ordered retroactive payments or audit exceptions, or as otherwise provided in authorizing legislation.

General and special funds—Continued

GRANTS TO STATES FOR SOCIAL AND CHILD WELFARE SERVICES—
Continued

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

1. *Grants to States for social services.*—The basic title XX program had a \$2.7 billion ceiling limitation in 1979, but returned to \$2.5 billion in 1980 and subsequent years. An authorization is requested for 1980 which would raise the ceiling to \$2.7 billion, exclusive of the special child day care authorization, and create a separate authorization for the territories of \$16.1 million. Currently the territories can participate in the program only when States relinquish a portion of the authority to fund under their own individual ceilings.

Grants to States for social services assist eligible persons to become or remain economically self-supporting and self-sufficient; protect children and adults who cannot protect themselves from abuse, neglect, and exploitation, and help families stay together; prevent or reduce inappropriate institutional care by providing community-based care, home-based care, or other forms of less intensive care; and arrange institutional placement, when appropriate and services to individuals in institutions.

Within the basic program, grants are made to States based on Federal matching rates of 75% for all services except family planning services which are matched at 90%.

A supplemental appropriation of \$200 million is also requested in 1980 to compensate for 1980 budget authority used in 1979 to complete 1979 requirements and

to provide for unanticipated growth in States' programs in 1980.

SOCIAL SERVICES COSTS (INCLUDING CHILD DAY CARE)

Health-related.....	401	411	426
Residential care and treatment.....	101	110	115
Family planning.....	344	359	405

2. *Child day care.*—From 1977 to 1979 an additional \$200 million has been authorized each year above the basic title XX ceiling for the purpose of providing 100% Federal funding of child day care services. An authorization is requested to extend this funding in 1980 and 1981. A supplemental appropriation of \$22 million is also requested in 1980 to compensate for 1980 budget authority utilized in 1979 and 1980 to complete 1979 requirements.

3. *State and local training.*—The 1974 social services amendments to the Social Security Act authorized 75% Federal financial participation in costs associated with providing training to staff of title XX agencies, service delivery personnel of provider agencies, persons preparing for employment in title XX agencies, and individual providers. The 1980 appropriation limits funding for this training to \$75 million. The 1981 budget request increases this limitation to \$116 million. An authorization is requested which would provide that any State could become entitled to 4% of its allotment limitation for social services. The estimated cost of this proposal in 1981 is \$116 million. The 4% limitation represents an additional 1% over an earlier proposal to limit funding to 3% of each State's ceiling. This 1% is to enable States to finance training associated with the implementation of Federal child day care standards. A 1980 supplemental of \$14 million is requested in order to offset prior year claims and provide a 1980 operating level of \$75 million.

STATE AND LOCAL TRAINING COSTS

	[Dollars in thousands]		
	1979	1980	1981
Total cost.....	\$120,043	\$118,667	\$154,667
Federal share.....	\$90,032	\$89,000	\$116,000
Number of persons trained.....	397,500	389,500	349,400

4. *Child welfare services.*—Under title IV-B of the Social Security Act, grants are made to States to help establish, extend, and strengthen services to support and strengthen parental care of children in their own homes, to return foster children to their homes, and to facilitate adoption when such return is not feasible. Child welfare services are available to all children who need such services without regard to the economic circumstances of their families.

Federal financial participation represents about 7% of total program costs. States are encouraged to coordinate child welfare services with the social services program. Legislation is proposed for 1980 that would modify the present program to provide for the development of State systems for tracking, case review, and due process protections for children in foster care. The legislation will also provide preventive or restorative services for children and aid the adoption of children with special needs.

CHILD WELFARE SERVICES, CURRENT LEGISLATION

	(Dollars in thousands)

90.00	Outlays		437,850	523,150

Legislation is proposed for 1980 which will increase the ceiling for social services to \$2.9 billion. Of this amount, \$2.7 billion would be available at a 75% Federal matching rate for all services except family planning services which are matched at 90%. Child day care activities would receive 100% Federal funding up to \$200 million. A separate funding authorization of \$16.1 million would also be provided for Guam, Puerto Rico,

the Virgin Islands, and the Northern Mariana Islands.

The 1980 appropriation limits obligations for the rapidly growing State and local training program to a maximum of \$75 million, without specifying the criteria for distributing funds. Legislation is proposed which will permit greater control, better utilization, and improved management of funds in the program. This proposal would more closely and appropriately tie the level of training funds to the level of the title XX social services program to which training is supposed to be linked. The amount of State and local training funds available to any State would be a percentage of the amount available under the State's ceiling for services. The original proposal for this level was based on 3% of the amount available for services. Since that proposal was made, the percentage has been increased to 4% for such training of staff as may be desired by the States to enhance effective implementation of child day care regulations.

Additional funds are also to be requested for the child welfare services activity for the implementation of proposed legislation which will broaden the scope of child welfare services in general, protect and enhance the status of children in foster care, safeguard their parents' rights, reunite families where feasible, provide permanent placement of foster care children as soon as possible if reuniting them with their families is not feasible, and provide assistance for adoption. Encouragement will be provided to the States to improve legal procedures and systems to care for and monitor the status of foster care children.

HUMAN DEVELOPMENT SERVICES

For carrying out except as otherwise provided, sections 426, 1110, and 1115 of the Social Security Act, the Older Americans Act of 1965, as amended, the Child Abuse Prevention and Treatment Act, title II of Public Law 95-266 (Adoption Opportunities), the Runaway Youth Act, the Community Services Act of 1974, as amended, sections 106, 107, and 306 of the Comprehensive Employment and Training Act of 1973, [the Rehabilitation Act of 1973, as amended, the International Health Research Act of 1960,] and the Developmental Disabilities Services and Facilities Construction Act, as amended, [\$2,557,981,000] \$1,778,511,000, of which \$6,000,000 shall be available for title VI of the Older Americans Act of 1965 as amended; [of which \$808,000,000 shall be for activities under section 100(b)(1) of the Rehabilitation Act of 1973; \$9,484,000 shall be for activities under section 110(b)(3) and \$15,000,000 shall be for activities under section 711 of such Act; \$3,000,000 to remain available until expended shall be for a White House Conference for Children and Youth; and \$43,180,000] \$43,181,000 shall be for grants under part C of the Developmental Disabilities Services and Facilities Construction Act, [as amended; together with not to exceed \$600,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein;] and \$7,500,000 shall be for section 113 of [the Developmental Disabilities Services and Facilities Construction Act, as amended] such Act; and \$3,000,000 to remain available until expended shall be for the White House Conference on Aging. (Additional authorizing legislation to be proposed for \$11,000,000.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

NOTES

Excludes \$27 thousand in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$27 thousand) and 1980 (\$27 thousand) are included above.

Excludes \$403,086 thousand in 1980 (beginning April 1, 1980) and \$978,050 thousand in 1981 for activities transferred to (in thousand of dollars):

	April 1 to Sept. 30, 1980	1981
Rehabilitation services and handicapped research, Office of Special Education and Rehabilitative Services, Department of Education.....	395,984	963,875
Salaries and expenses, Departmental Management, Department of Education.....	6,598	13,167
Salaries and expenses, Office of Civil Rights, Department of Education.....	504	1,008

Comparable amounts for these activities for 1979, \$940,280 thousand and 1980 through March 31, 1980, \$542,436 thousand, are included above.

1. *Administration for Children, Youth, and Families.*—The programs supported by the Administration for Children, Youth, and Families are designed to provide services to enhance the development and well being of children and youth, and to strengthen family stability. In 1981, the Head Start program will continue to emphasize improving the delivery of services which are cost effective and responsive to children's needs and improving local capacity to plan and manage these services.

A level of \$825,000 thousand will provide comprehensive Head Start services to 386,300 children, at least 10% of whom are handicapped. A level of \$17,978 thousand will continue support for research and demonstration projects in the areas of child welfare, day care, and child, youth, and family development. Included in this amount is \$5,750 thousand for implementation of Federal day care Standards. A level of \$22,928 thousand will support programs designed to prevent and treat child abuse and neglect. A level of \$11,000 thousand will support 165 runaway youth projects providing temporary shelter, counseling, and aftercare services to 42,500 youth and their families.

A level of \$7,000 thousand will provide traineeships, teaching grants and training center grants to train 15,000 people for work in the field of child welfare. A level of \$5,000 thousand will continue support for adoption opportunity activities designed to eliminate barriers to adoption and to facilitate the adoption of particularly hard to place children.

2. *Administration on Aging.*—A level of \$714,056 thousand will support programs to continue the development and operation of a system of community-based services to meet the needs of older persons, with emphasis on assisting those elderly with the greatest economic and social needs. A level of \$22,675 thousand will support State agency activities which provide leadership and technical assistance to area agencies in their efforts to develop more comprehensive and coordinated service delivery systems and to increase the generation of additional resources. A level of \$280,000 thousand

will support 700 area agencies and over 2,100 senior centers. A level of \$350,000 thousand will provide approximately 410,000 meals per day, 5 days per week. Approximately 57,000 of these meals will be delivered to home-bound elderly. A level of \$6,000 thousand will provide grants to Indian tribes. A level of \$52,800 thousand will support training, research, discretionary programs, and multidisciplinary centers of gerontology. These programs are designed: to assure an adequate number of trained personnel in the field of gerontology; to increase the knowledge base of the service needs of the elderly; and to test and demonstrate systems to improve the quality of services for the elderly, with particular emphasis on assessing and addressing the needs of long-term care patients. A level of \$2,581 thousand will continue support for the National Clearinghouse on Aging and the Federal Council on Aging.

TITLE III—NUTRITION PROGRAM

	[In thousands of dollars]		
	1979 actual	1980 estimate	1981 estimate
HHS nutrition program funding ¹	251,535	289,872	317,047
Department of Agriculture commodity support.....	47,000	55,000	60,500
Non-Federal support.....	30,000	33,000	36,000
Program funding.....	328,535	377,872	413,547

¹ Of the amounts appropriated for nutrition up to 8½% may be used to support administration of area plans, and up to 1% may be used for evaluation.

3. *Rehabilitation Services Administration.*—Rehabilitation services and facilities activities are transferred to the Department of Education, Office of Special Education and Rehabilitative Services, Rehabilitation Services and Handicapped Research account effective April 1, 1980.

4. *Grants for the Developmentally Disabled.*—Grants for the developmentally disabled were formerly administered by the Rehabilitation Services Administration along with rehabilitation services and facilities activities. The rehabilitation services and facilities activities are transferred to the Department of Education while the developmental disabilities activities will remain within the Office of Human Development Services. Programs for the developmentally disabled focus on increasing the provision of quality services to the developmentally disabled through State grants, special projects, and university-affiliated facilities. Efforts to develop Community-based programs for care, habilitation, and deinstitutionalization will be continued to foster the independence of those served.

5. *National Institute of Handicapped Research.*—The National Institute of Handicapped Research will be transferred to the Department of Education, Office of Special Education and Rehabilitative Services, Rehabilitation Services and Handicapped Research account starting April 1, 1980.

6. *Administration for Public Services.*—A level of \$5,000 thousand will support research activities under title XX of the Social Security Act and cross-cutting research related to all Human Development Services programs. A level of \$2,500 thousand will support a new innovation and expansion program which will address social services issues of national significance.

7. *Administration for Native Americans.*—A level of \$33,800 thousand will support community projects

which serve American Indians, Hawaiian natives and Alaskan natives to promote the goal of social and economic self-sufficiency. Related research, evaluation, technical assistance, and training activities will also be supported. A priority emphasis will be on assisting native American groups establish and maintain the structures and mechanisms needed for planning and coordinating categorical Federal resources and other non-Federal resources. The efforts relating to Indian and Alaskan native groups are directed toward supporting the Federal policy of Indian self-determination.

8. *White House conferences.*—In 1981 the White House Conference on Children and Youth will be convened in Washington, D.C. Following the conference, a final report will be prepared which will make recommendations affecting Federal, State, and local programs which are concerned with the development and well-being of children and youth.

The budget request includes an additional \$3,000 thousand for the White House Conference on Aging. During 1981 conference delegates will be selected; extensive analysis of State and local conferences will be made for incorporation into the National conference agenda; and final logistical arrangements will be made for the Washington conference to be held in the late fall of 1981.

9. *Salaries and expenses.*—The level requested for salaries and expenses will support administrative expenses to carry out all Office of Human Development Services programs. Administrative support for programs transferred to the Department of Education is included through April 1, 1980. A level of \$1,398 thousand and 60 new positions is requested to provide for effective administrative support for congressionally mandated program changes. A level of \$2,000 thousand is included to assist States in the development of management information systems to improve the quality, scope and consistency of information for Office of Human Development Services programs. An increase of \$1,250 thousand and 40 positions is included to support implementation of the Federal day care standards.

Program and Financing (in thousands of dollars)

Identification code 75-1636-2-1-500	1979 actual	1980 est.	1981 est.
Program by activities:			
10.00 Administration for Children, Youth and Families; Domestic Violence (costs—obligations) (object class 41.0)			10,000
Financing:			
40.00 Budget authority (appropriation)			10,000
Relation of obligations to outlays:			
71.00 Obligations incurred, net			10,000
74.40 Obligated balance, end of year.....			-8,000
90.00 Outlays.....			2,000

Legislation is proposed to create a program to increase the participation by States, local public agencies, private nonprofit organizations and individual citizens in preventing domestic violence and providing shelter and other services to its victims and their families. Funds will be allocated to States for project grants and for administrative purposes. In addition, funds will support training, technical assistance, information gathering and reporting programs, and the creation of a Federal Interagency Council on Domestic Violence.

WORK INCENTIVES

For carrying out a work incentive program, as authorized by part C of title IV of the Social Security Act, including registration of individuals for such program, and for related child care and other supportive services, as authorized by section 402(a)(19)(G) of the Act, including transfer to the Secretary of Labor, as authorized by section 431 of the Act, **[\$365,000,000] \$385,000,000**, which shall be the maximum amount available for transfer to the Secretary of Labor and to which the States may become entitled pursuant to section 403(d) of such Act, for these purposes and of which **\$10,885,000 shall be available only to the extent necessary to meet increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant was based, which cannot be provided for by normal budgetary adjustments: Provided, That any portion of the funds granted to a State in the budget year and not obligated by the State in that year shall be returned to the Treasury.**

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

The work incentive (WIN) program is designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program for employment, work experience, training, and support services. Employment, work experience, and training are administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures are matched by Federal participation at the rate of 90%.

Funding provided to the States allows them maximum flexibility to design the program mix most suitable to their population and priorities.

1. *Grants to States.*—The program includes registration, callup for appraisal and employability planning, counseling and development, direct placement, follow-up of all employed registrants, and adjudication of the work test. Individuals are prepared for self-supporting employment through on-the-job training, public service employment, work experience, and institutional training. Child care and other services necessary to enable WIN participants to accept training or employment are also provided. In 1981, approximately one million new applicants for AFDC will register with the WIN program. During the course of the year, about 280,000 registrants will be placed in jobs. The program objectives to be accomplished during 1981 are to enter 280,000 registrants into full- or part-time employment expected to last 30 days or more, achieve an employment retention rate of 80 percent or more, enter 32,000 participants into employment resulting from labor market exposure, and reduce welfare payments by saving \$560 million through annualized welfare grant reductions.

2. *Program direction and evaluation.*—This activity provides for the administration and evaluation of the WIN program.

NOTES

Excludes \$5,657 thousand in 1980 (beginning April 1, 1980) and \$12,202 thousand in 1981, and 339 positions in each year, for activities transferred to Salaries and expenses, Departmental Management, Department of Education. Comparable amounts for these activities for 1979 (\$11,540 thousand) and 1980 through March 31, 1980 (\$5,942 thousand) are included above.

Excludes \$54 thousand and 3 positions in 1980 and 1981 for functions transferred to the Department of Commerce and the Department of Labor.

Includes \$3,602 thousand and 104 positions in 1981 for functions previously financed from:

1. *Departmental direction* activities provide policy or administrative guidance to HHS components:
 (a) *Executive direction* provides leadership and policy direction for HHS programs; coordinates depart-

General and special funds—Continued

GENERAL DEPARTMENTAL MANAGEMENT—Continued

mentwide planning and evaluation activities, including welfare reform and national health insurance; develops the Department's legislative program. The budget reflects a reduction of 10 term positions related to welfare reform activities which have been completed. An additional 24 term positions are planned for elimination in 1982.

(b) *Public affairs* gives overall guidance to HHS public relations and provides information to the press, public and private groups, and individuals.

(c) *Management and budget* formulates policy for budget, finance, grants and procurement, and management information systems. The budget includes \$1 million in additional funds to continue implementation of checks-paid letters of credit and delay-of-drawdown letters of credit. Together with \$1 million appropriated in 1980, this would permit implementation of delay-of-drawdown letters of credit in all 50 states, an increase of 40 States over the 1980 level. Total 1980-81 outlay savings are estimated at \$495 million. An additional \$500 thousand is included to prepare the regional accounting, central registry, and financial assistance reporting systems for inclusion in the new departmental management accounting system.

(d) *Personnel administration* plans and implements policy for personnel management, training, career development, and equal employment opportunity.

(e) *Field management* supports the 10 principal regional officials who represent the Secretary, serve congressional district offices, coordinate media and inter-governmental relations, assess service delivery for HHS programs, and help resolve problems involving Department components.

(f) *General counsel* acts as legal adviser to the Secretary and provides legal services related to management of the Department.

2. *Departmental operations* activities provide services to HHS components and perform work related directly to the public:

(a) *Facilities engineering* coordinates construction support services and facilities policies and procedures; supervises design, construction, and use of funds for special purpose projects; oversees payments to the General Services Administration for standard level user charges and reimbursable service costs. An additional 43 term positions are included in the reimbursable portion of this account to perform on-site supervision of \$400 million of construction directly funded by HHS.

(b) *Administrative services* provides HHS headquarters with the following services: mail and messenger; congressional materials; purchasing, supply, and laboring; reproduction services including offset printing, photography, visual exhibits, and collating; procurement of printing from the Government Printing Office and other sources; and inventory management.

(c) *Grants payment system* centrally pays most HHS grants, contracts, and loans which are classified as Federal assistance.

(d) *Regional services* provides common administrative services including personnel, finance, indirect cost negotiation, and general office services.

(e) *Employee systems center* provides central payroll services for HHS employees and automated personnel data services for HHS components.

(f) *Legal services* performs legal workloads associated with HHS program operations. This budget provides an additional \$569 thousand for increased use of equipment and technology which will allow reductions in clerical positions and the hiring of about 70 new attorneys.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, **[\$39,868,000] \$32,275,000**, together with not to exceed \$6,000,000 to be transferred and expended as authorized by Section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein. For making payments to States for Medicaid State fraud control units under Sections 1903(a)(6) and 1903(a)(7) of the Social Security Act for fiscal year 1981 \$22,310,000; and for the fourth quarter of fiscal year 1980 and, after June 30, 1981, for the first quarter of fiscal year 1982, such sums as may be necessary, to be charged to the subsequent appropriation therefor for fiscal year 1981 or 1982. Funds provided for making payments for the first quarter of fiscal year 1981, shall be available for payments during the last quarter of fiscal year 1980.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

NOTES

Excludes \$4,490 thousand in 1980 (beginning April 1, 1980) and \$9,442 thousand in 1981, and 275 positions in each year, for activities transferred to Salaries and expenses, Departmental Management, Department of Education. Comparable amounts for these activities for 1979 (\$8,531 thousand) and 1980 through March 31, 1980 (\$4,689 thousand) are included above.

Excludes \$14 thousand in 1980 and 1981 for functions transferred to the Department of Commerce.

The Office of the Inspector General, created by Public Law 94-505, includes the Executive Management Office, the Office of Health Care and Systems Review, the Audit Agency, and the Office of Investigations.

1. *Executive management* oversees the audit, investigations, and systems review staffs of the Inspector General and provides a wide range of administrative services. An increase of \$1,000 thousand is provided for special projects designed to finance special cooperative Federal, State and local projects targeted against fraud and abuse in departmental programs.

2. *Health care and systems review* provides an oversight capability to identify and correct inefficiencies, waste and fraud in all the Department's operations, including those health programs specifically cited in Public Law 94-505; coordinates activities in HHS principal operating components designed to promote efficient program operations and to eliminate fraud and abuse; coordinates relationships with Federal, State, and local governments and nongovernmental entities.

3. *Audit agency* provides policy guidance for all HHS audit activities and coordinates audits within HHS, and with the Defense Contract Audit Agency and other agencies, through a central office in Washington, D.C.; regional offices perform internal and external audits of all Department activities to assure that Federal funds are used for intended purposes. The 1981 Budget provides 25 new positions to strengthen audit efforts in Medicaid and Public assistance programs.

4. *Office of Investigations* investigates fraud and abuse in the management of HHS programs and in the utilization of Federal assistance funds provided by the Department; serves as the HHS liaison with the Department of Justice and U.S. attorneys on criminal investigation matters; directs and coordinates criminal investigations task forces involving HHS programs; coordinates Federal-State investigative efforts involving HHS-funded programs. The Office of Investigations is administered from headquarters in Washington, D.C., with investigations directed by regional field staff.

5. *State medicaid fraud control units* are funded from the Office of the Inspector General. The Federal Government pays 90% of the cost of units (up to specified dollar limits) during their first 3 years of operations. These units investigate health care provider fraud and patient abuse cases and make recommendations to state medicaid agencies for improvements in their programs.

OFFICE OF THE INSPECTOR GENERAL

(Proposed for later transmittal, proposed legislation)

Program and Financing (in thousands of dollars)

Identification code	75-0128-2-1-604	1979 actual	1980 est.	1981 est.
Program by activities:				
10.00	State Medicaid fraud control units (costs—obligations) (object class 41.0)		4,300	18,140
Financing:				
Budget authority				
				18,140
Budget authority:				
40.00	Appropriation			21,580
40.20	Appropriation available from subsequent year		4,300	860
40.30	Appropriation available in prior year			-4,300
Relation of obligations to outlays:				
71.00	Obligations incurred, net		4,300	18,140
72.40	Obligated balance, start of year			4,300
74.40	Obligated balance, end of year		-4,300	-860
90.00	Outlays			21,580

Legislation will be proposed to extend for 2 years (through 1982) the authority in section 1903(a) of the Social Security Act to provide 90% Federal funding for establishing and operating State Medicaid fraud control units. The 90% rate is designed to encourage States to develop such units and to compensate for the greater costs incurred during the first years of operation. Au-

thorization for the 90% Federal match expires at the end of 1980.

State fraud control units have exceptional potential for detecting, prosecuting, and deterring fraud and abuse in the Medicaid program. As of June 30, 1979, there were 25 certified State units comprised of 750 attorneys, investigators, and auditors. As many as 16 additional States are expected to establish fraud control units if 90% funding is available.

The proposal would allow for 90% Federal funding of each State fraud control unit up to a maximum of 3 years.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights [\$65,092,000] \$21,931,000, together with not to exceed \$2,350,000, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

NOTES

Excludes \$30 thousand and 1 position in 1981 for activities transferred to General departmental management, Department of Health and Human Services. Comparable amounts for 1979 (\$30 thousand) and 1980 (\$30 thousand) are included above.

Excludes \$22,618 thousand in 1980 (beginning April 1, 1980) and \$45,135 thousand in 1981 and 1,181 positions in each year for activities transferred to Salaries and expenses, Office of Civil Rights, Department of Education. Comparable amounts for these activities for 1979 (\$42,974 thousand) and 1980 through March 31, 1980, (\$22,618 thousand) are included above.

The Office for Civil Rights is responsible for carrying out the Department's enforcement programs under title VI of the Civil Rights Act of 1964 (racial and ethnic discrimination), Section 504 of the Rehabilitation Act of 1973 (discrimination against the physically and mentally handicapped), Public Law 93-638 (Indian Preference Act), sections 704 and 855 of the Public Health Service Act of 1972 (sex discrimination in medical education and nurse training programs), section 407 of the Drug Abuse Office and Treatment Act of 1972 (discrimination in the admission of drug addicts to hospitals), section 321 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (discrimination in the admission of alcoholics to hospitals), and certain provisions of the Age Discrimina-

tion Act of 1975 (discrimination because of age). These statutes require nondiscrimination in the employment and service delivery systems of virtually every hospital, nursing home, child care or other medical institution, and every State and local health, welfare social service agency throughout the Nation. The statutes require the Department to investigate complaints, conduct periodic reviews, negotiate to secure compliance, conduct appropriate enforcement proceedings, and promote voluntary compliance by all of these recipients of Federal financial assistance.

The Office is also responsible, under Executive Order 11914, for providing guidance to and coordinating the implementation of section 504 of the Rehabilitation Act of 1973 by all Federal departments and agencies empowered to extend Federal financial assistance.

The Director, Office for Civil Rights, also serves as a special assistant to advise the Secretary on all civil rights-related policies and programs. The 1981 budget includes 100 new positions to increase compliance review activities in health and human services programs.

The staff of the United States Office of Consumer Affairs advocates consumer needs and viewpoints in the Federal Government, fosters consideration of the consumer viewpoint by other Government agencies, voluntary groups and business, and seeks to inform and educate individual citizens to deal more effectively in the marketplace. The Director is also Special Assistant to the President for Consumer Affairs.

The 1981 Budget includes 7 new positions to implement Executive Order No. 12160 of September 26, 1979, providing for enhancement and coordination of Federal consumer programs, and \$177 thousand for new activities involving consumers.

POLICY RESEARCH

For carrying out, to the extent not otherwise provided, research studies under section 1110 of the Social Security Act, [[\$24,000,000]] \$24,000,000.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980 that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This activity supports research into the causes and cures of poverty. The research includes studies of income maintenance and work incentives, alternative health insurance plans, varieties of human resource delivery systems, income reporting methods, and other poverty related research.

In 1981, the income maintenance research and income repairing survey development activities will approach completion, and funding will be reduced. Increased activity will be supported in the areas of work patterns and retirement needs of the aged, long term care financing and services research, and disability issues.

¹ Operating costs in 1979 represent the liquidation of 1977 and prior year obligations for activities being transferred from the Working capital fund.

Note.—Excludes obligational authority of \$189 thousand in 1980 (beginning April 1, 1980) and \$378 thousand in 1981, and 14 positions in each year, for activities transferred to Salaries and expenses, Departmental Management, Department of Education. Comparable amounts for these activities for 1979 (\$180 thousand) and 1980 through March 31, 1980 (\$189 thousand) are included above.

The HHS Working capital fund, originally authorized by Public Law 82-452 (66 Stat. 369) to finance central departmental services, provides a single means for consolidated financing and accounting of business-type operations involving the sale of services to customers.

The fund operates two activities:

1. *Data management* provides data systems design and consultation, key punching, and computer processing to HHS components. A fully competitive procurement of the data management center computer is planned for 1981-82.

2. *Printing and reproduction* provides offset printing, photography, visual exhibits, collating and addressograph services, and procurement of printing from the Government Printing Office and other sources.

GENERAL PROVISIONS

Note.—The regular appropriation for this agency had not been enacted at the time this budget was prepared. The 1980 language shown below is based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for language consist-

ent with that which would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980, except for section 205 below where the language shown is that which is contained in section 109 of the continuing resolution.

[Sec. 201. Notwithstanding any other provision in this Act, the total amount of budget authority provided in this Act for the Department of Health, Education, and Welfare is hereby reduced in the amount of \$500,000,000: *Provided*, That this reduction shall be achieved by the reduction of fraud, abuse, and waste as defined and cited in the annual report, dated March 31, 1978, of the Inspector General of the Department of Health, Education, and Welfare: *Provided further*, That this section shall not be construed to change any law authorizing appropriations or other budget authority in this Act: *Provided further*, That the requirements pertaining to AFDC and Medicaid error rates, as specified in the conference report on the fiscal 1979 Supplemental Appropriations Act (Public Law 96-38), shall be carried out except where the Secretary determines, in certain limited cases, that States are unable to reach the required reduction in a given year despite a good faith effort.]

SEC. [202] 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

[SEC. 203. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be awarded to these institutions in the form of lump-sum grants and expenditures made therefrom shall be subject to audit by the Secretary of Health, Education, and Welfare.]

SEC. [204] 202. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of [a] research [project] an amount equal to as much as the entire cost of such [project] research.

SEC. [205] 203. None of the funds contained in this title shall be available for additional permanent positions in the Washington area if the total authorized positions in the Washington area is allowed to exceed the proportion existing at the close of fiscal year 1966.

SEC. [206] 204. Appropriations in this Act for the Health Services Administration, the National Institutes of Health, the Center for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Health Resources Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand eight hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law: expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding 5 years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country, purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to

section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed **[\$9,500] \$12,500** for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

[Sec. 207. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.]

[Sec. 208. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed, or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used or the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.]

[Sec. 209. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing, or clustering. The prohibition described in this section does not include the establishment of magnet schools.]

Sec. [210] 205. [Notwithstanding any other provision of this joint resolution except section 102, none] None of the funds provided by this [joint resolution] Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest when such rape or incest has been reported promptly to a law enforcement agency or public health service;

Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

SEC. [211] 206. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 328 of the Public Health Service Act.

[Sec. 212. None of the funds appropriated or otherwise made available in this title shall be used to implement section 15(d) and (e) of the Small Business Act, as amended, or Executive Order number 12073, dated August 16, 1978, in regard to requests for proposals for research, rehabilitation, training, or other highly professional health, education and social services which will not substantially affect employment levels.]

Sec. [213] 207. Funds appropriated to the Department of Health [Education, and Welfare] and Human Services under title II may not be used to pay the compensation of experts or consultants (other than full-time employees) or organizations thereof, or to procure by contract the services of experts or consultants or organizations thereof, in excess of **[\$170,000,000] \$110,000,000** during fiscal year **[1980.] 1981.** Expenditures for all consultant services in the fourth quarter of fiscal year **[1980] 1981** may not exceed 30 per centum of the total annual fiscal year **[1980] 1981** expenditure for such consultant services.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and thrift insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the Department's activities, as set forth below:

1. *Housing programs* cover the Department's major housing subsidy programs as well as the mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities. Other activities included under this heading are community disposal operations and liquidating programs.

2. *Government National Mortgage Association (GNMA)* covers the Department's programs to increase the availability of mortgage credit and stabilize the financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

3. *Community planning and development* covers the community development grant and urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This heading also covers the comprehensive planning grant (section 701) program, rehabilitation loans (section 312), and the urban homesteading program as well as the closeout of projects under terminated categorical community development programs.

4. *Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Other major divisions within the Department include the New Community Development Corporation; Neighborhoods, Voluntary Associations and Consumer Protection, including the Office of Interstate Land Sales Registration; Fair Housing and Equal Opportunity; and Departmental Management.

Day-to-day administration, processing, and funding decisions for programs of the Department of Housing and Urban Development are carried out in field offices located within the geographical boundaries of 10 regional offices.

HOUSING PROGRAMS

Federal Funds

General and special funds:

*SUBSIDIZED HOUSING PROGRAMS**

*See Part III for additional information.

[ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING]

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in annual appropriations acts, is increased by **[\$1,140,661,000 of which not less than nor more than \$50,000,000 shall be for the modernization of existing low-income housing projects] \$1,553,661,000: Provided**, That budget authority obligated under such contracts shall be increased above amounts heretofore provided in annual appropriations acts by **[\$26,680,128,000] \$33,196,631,000: Provided further**, That any balances of authorities remaining at the end of fiscal year **[1979] 1980** shall be added to and merged with the authority provided herein and made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year **[1980] 1981**.

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), is reduced in fiscal year 1981 by not more than \$30,000,000 in uncommitted balances of authorizations provided for this purpose in Appropriation Acts.

In addition, for the payment of annual contributions, not otherwise provided for, in accordance with section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c); for payments authorized by title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749 et seq.); for rent supplement payments authorized by section 101 of the Housing and Urban Development Act of 1965, as amended (12 U.S.C. 1701s); and for payments as authorized by sections 235 and 236 of the National Housing Act, as amended (12 U.S.C. 1715z, 1715z-1), \$7,127,000,000 to remain available until expended.

[RENT SUPPLEMENT]

[The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), is reduced in fiscal year 1980 by the uncommitted balances of authorizations provided for this purpose in Appropriation Acts.]

[HOUSING PAYMENTS]

[For the payment of annual contributions, not otherwise provided for, in accordance with section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c); for payments authorized by title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749 et seq.); for rent supplement payments authorized by section 101 of the Housing and Urban Development Act of 1965, as amended (12 U.S.C. 1701s); and for payments as authorized by sections 235 and 236 of the National Housing Act, as amended (12 U.S.C. 1715z, 1715z-1), \$5,529,000,000.] (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

The subsidized housing programs schedule reflects both budget authority to enter into contracts for subsidized housing and an appropriation for payments required to liquidate contracts under the separate programs as described below. Housing assistance contracts obligate the Federal Government to make annual payments up to the contract amount over the life of the project or mortgage. Since payments usually commence near or upon completion of the dwelling, payments often not required until 1 to 4 years after execution of the contract. The term of the contract also varies among the respective programs.

Total obligations in 1981 are estimated at \$33,173.5 million which will be utilized primarily to fund about 325,000 additional subsidized rental and homeownership housing units. However, estimated unobligated balances

available of \$419 million, plus the proposed \$1,050 million reduction from recovered rent supplement balances, would reduce the requirement for net budget authority to \$32,146.6 million in current authority and \$32.5 million in permanent authority. This budget includes a proposed 1980 supplemental appropriation for \$745.0 million to meet unfunded requirements for contractual payments incurred in 1979 and estimated for 1980. Payments for these cash deficits currently are being funded by utilizing the 1980 appropriation as authorized by section 5(c) of the Housing Act of 1937, as amended. In addition, an appropriation of \$7,127.0 million is proposed for 1981 to liquidate contractual obligations made under the various subsidized housing programs. The budget also includes a proposed 1980 transfer of \$1,995.3 million in unobligated balances to the low-rent public housing—loans and other expenses account. These balances will be used to assist in financing the sale of public housing obligations to the Federal Financing Bank (FFB). The following subsidized housing programs are included in the schedule:

1. *Lower income housing (section 8).*—For 1981, over \$24 billion in new budget authority will be provided for this program of assistance to lower income families commonly referred to as the section 8 program. Assistance may be provided to eligible families on the basis of contracts with either public housing agencies (PHA's) or contracts made directly with private owners who wish to participate in the program. Participating families pay rents equal to at least 15 percent and no more than 25 percent of income.

For 1981, this budget estimates reservations of 258,000 rental units for lower income households. The proposed distribution of units includes 120,000 existing housing units and 138,000 newly constructed or substantially rehabilitated units. Of the existing housing units, 40,000 are expected to require moderate rehabilitation.

2. *Public housing.*—This is a locally operated low-income public housing program in which public housing agencies engage or assist in the development and operation of public housing projects which may be newly constructed, existing, rehabilitated, or leased. HUD makes annual contributions to PHA's for the PHA-owned or leased housing. Financial assistance is also provided to Indian housing authorities to plan, build, own, and operate low-income public housing projects. Initial occupancy of public housing projects is limited to low-income families and rents are established, subject to HUD approval, by PHA's.

This budget proposes that \$8.8 billion in budget authority be used to approve applications for 42,000 newly constructed and rehabilitated units. Beginning in 1981, public housing construction, acquisition, rehabilitation and modernization activity will be reserved on the basis of taxable, rather than federally tax-exempt, financing.

Also included is budget authority of \$1 billion for modernization of public housing to make capital improvements and major repairs to public housing projects owned and operated by PHA's. This budget proposes allowing local PHA's to reallocate up to 50% of these public housing production funds to supplement their modernization program. This comprehensive modernization program is intended to reduce the incidence

of substandard units in the current public housing inventory.

In addition, \$32.5 million of permanent budget authority is provided for adjustments to existing public housing section 23 leased housing contracts to fund unavoidable increases in operating and maintenance costs.

3. *Rent supplement.*—Rent supplement payments are made to owners of certain private housing on behalf of qualified low-income tenants. Beginning in 1981, the Department will initiate the gradual conversion of all Rent Supplement units to Section 8. Appropriation language is proposed to rescind a portion of the contract authority recovered as a result of unit conversions.

4. *Homeownership and rental housing assistance (sections 235 and 236).*—The Housing and Urban Development Act of 1968, as amended, authorizes a homeownership subsidy for lower income families under section 235 of the National Housing Act. Under this program, mortgage interest costs are subsidized down to 4 percent. The homeowner must contribute at least 20 percent of adjusted gross income toward monthly mortgage insurance and tax payments on the house.

For 1981, reservations are estimated for 25,000 new, substantially rehabilitated, and existing units. These reservations will be made out of \$7.9 billion of budget authority obligated in 1976 pursuant to court order. The long-term obligations resulting from reservations made in 1981 are expected to be approximately \$2,753.2 million based on maximum contract terms of 30 years.

The Housing and Urban Development Act of 1968, as amended, authorized the section 236 rental housing assistance program to subsidize the monthly mortgage payment which the owner of a rental or cooperative project is required to make. This interest subsidy is intended to reduce rents for lower income tenants.

Reservation of all previous bona fide commitments made to specific projects or agencies before the termination of the production program in January 1973 will be completed in 1980 and no new units will be reserved in 1981. Contract authority remaining in 1981 will be used for deep subsidies pursuant to the Housing and Community Development Act of 1974, as amended, and for amendments to existing contracts.

College housing grants.—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS*

*See Part III for additional information.

For payments to public housing agencies for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), [\$741,500,000] \$862,000,000. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

74.40	Obligated balance, end of year	-433,074	-454,574	-505,574
77.00	Adjustments in expired accounts	-2,141		
90.00	Outlays	653,584	720,000	811,000

Payments are provided to assist public housing agencies (PHA's) to meet certain deficits in the operation of PHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD. Operating subsidies provided to PHA's are based on a performance funding system (PFS) formula which sets subsidy payments at what it would cost a well-managed PHA to operate comparable projects.

【CONGREGATE SERVICES PROGRAM】

【For contracts with and payments to public housing agencies and nonprofit corporations for congregate services programs as authorized by the Congregate Housing Services Act of 1978, \$10,000,000 to remain available until September 30, 1984.】 (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.)

A limited pilot demonstration will test whether providing contracts directly with local public housing agencies to supply congregate services is more effective than alternative HEW and other social services programs. Congregate services can include meal services and essential supportive services. These 3- to 5-year contracts will commence in 1980 and be evaluated over the life of the contract. No additional resources are requested for 1981, since current resources are sufficient to evaluate the relative efficiency of this HUD approach.

TROUBLED PROJECTS OPERATING SUBSIDY

For assistance payments to owners of eligible multifamily housing projects insured, or formerly insured, under the National Housing Act, as amended, in the program of operating subsidies for troubled multifamily housing projects under the Housing and Community Development Amendments of 1978, [\$79,500,000] \$41,100,000, together with [any] all unobligated balances of excess rental charges [collected after September 30, 1977] and with any collections after September 30, 1980, to remain available until September 30, [1981] 1982: Provided, That assistance payments to an owner of a multifamily housing project assisted, but not insured, under the National Housing Act may be made if the project owner and the mortgagee have provided or agreed to provide assistance to the project in a manner as determined by the Secretary of Housing and Urban Development. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

These subsidies fund the difference between HUD-approved project operating expenses and projected rents, and help defray additional rent increases for low-income tenants. Funding is also provided for essential repairs to correct deficiencies resulting from deferred maintenance. During 1981, the estimated carryover balance from 1980 of \$55.9 million, an estimated \$12 million to be transferred from the Rental Housing Assistance Fund, and an appropriation of \$41.1 million will be sufficient to provide \$109.0 million of financial assistance to approximately 2,797 eligible projects.

Public enterprise funds:

TITLE III—CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation or agency except as hereinafter provided: Provided, That collections of these corporations and agencies may be used for new

loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.*)

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and the General Insurance Fund, [\$194,850,000] \$268,640,000, to remain available until expended, as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)).

During 1981 and within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary, to carry out the purposes of the National Housing Act, as amended.

During 1981, total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.*)

The FHA fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

The *Mutual mortgage insurance fund* provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The *Cooperative management housing insurance fund*, also a mutual fund, provides mortgage insurance for

Public enterprise funds—Continued

FEDERAL HOUSING ADMINISTRATION FUND—Continued

management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

The *General insurance fund* provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The *Special risk insurance fund* provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged to the appropriate insurance fund by mortgage insurance program. During 1981, it is estimated that applications for single-family and multifamily mortgage insurance covering 849,000 units will be received and that mortgage insurance will be written covering 566,448 single-family and multifamily units. In addition, it is estimated that approximately 46,800 single-family and multifamily units will be acquired by the Department during 1981 and that almost 53,500 single-family and multifamily units will be sold. More detailed activity information follows in the "Program Highlights" table shown below.

PROGRAM HIGHLIGHTS

	[Dollars in millions]		
	1979 actual	1980 estimate	1981 estimate
Insurance initiation: Mortgage insurance applications (units).....	941,804	861,000	849,000

Defaulted title I property improvement loans:			
Number.....	13,742	17,000	19,000
Amount.....	30.8	44.2	53.2

Insurance reserves from operations at the end of 1981 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about \$5.9 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1981 is as follows:

STATUS OF INSURANCE RESERVES FROM OPERATIONS

[In millions of dollars]

	1979 actual	1980 estimate	1981 estimate
Insurance fund:			
Mutual mortgage.....	2,388	2,551	2,796
Cooperative management housing.....	21	21	21
General.....	-2,612	-2,870	-3,099
Special risk.....	-2,311	-2,563	-2,803
Total FHA fund.....	-2,514	-2,861	-3,085

As a result of the continued deficits in the FHA fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include tightened underwriting procedures and faster sales of acquired properties to reduce holding costs. In addition, section 8 subsidies and Troubled projects operating subsidies are being used to enhance the viability of projects with HUD-insured or HUD-held mortgages. The latter also will result in fewer mortgage assignments and property acquisitions.

During 1979, a major sales effort was undertaken in order to reduce the inventory of multifamily properties. Section 8 assistance was utilized to protect low-income tenants from displacement and, where necessary, finance the repair or rehabilitation of these units by the private sector. The new section 8 moderate rehabilitation program is being substituted for the use of FHA fund resources to carry out needed repairs in connection with property disposition. The FHA fund is being used to maintain HUD properties in a safe and sanitary condition. It is estimated that a total of 48,000 multifamily units will be sold in 1980 and 1981.

For 1981, a new Temporary mortgage assistance payments program is being proposed that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This proposed program is viewed as a viable alternative to the home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the fund.

Budget program.—The budget proposes an appropriation of \$268.6 million to restore the net realized losses from the sale of property covered by the General insurance and Special risk insurance funds.

Financing.—In 1979, \$38.7 million of debentures were issued and \$88.1 million were redeemed. There were no Treasury borrowings in 1979. In 1980, it is estimated that \$40 million will be borrowed from the Treasury. In 1981, \$60 million will be repaid to the Treasury from appropriations.

Operating expenses.—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA fund.

Section 202 of the Housing Act of 1959 established a program of housing assistance for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. For 1981, a \$895 million loan limitation is proposed which will provide financing for approximately 18,800 units. At least \$50 million of this amount will be used to finance an estimated 1,132 units designed specifically for nonelderly handicapped persons.

Financing.—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

PARTICIPATION INSUFFICIENCIES

[In thousands of dollars]			
	1979 actual	1980 estimate	1981 estimate
Interest expense on participation certificates.....	6,077	6,077	6,077

【COLLEGE HOUSING—LOANS AND OTHER EXPENSES】

Note.—The activities formerly included in this account, in the amount of \$13,338,000 for 1979 and \$12,251,000 for 1980 will be transferred to the Department of Education, Office of Postsecondary Education, pursuant to the Department of Education Organization Act (Public Law 96-88) and are included in the account College Housing Loans.

LOW-RENT PUBLIC HOUSING—LOANS AND OTHER EXPENSES*

* See Part III for additional information.

During 1981 and within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the low-rent public housing loan fund.

During 1981, total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the low-rent public housing loan fund.

The low-rent public housing loan fund provides Federal financing for the construction, acquisition, or modernization of public housing projects owned by public housing agencies (PHA's) until the projects can be financed in the private market. Payments to liquidate the indebtedness of the PHA's are provided from the housing payments appropriation to liquidate contract authority. The status of loan approvals follows:

STATUS OF LOAN APPROVALS

	[In thousands of dollars]		
	1979 actual	1980 estimate	1981 estimate
Outstanding loan approvals, start of year.....	12,196,067	15,147,658	16,263,719
New approvals in year:			
Development.....	3,083,989	2,393,561	3,274,362
Management.....	546,088	547,500	547,500
Loan approvals canceled due to permanent financing, liquidations, and adjustments in year, net.....	-678,486	-1,825,000	-250,000
Outstanding loan approvals, end of year.....	15,147,658	16,263,719	19,835,581
Outstanding Federal loans to Public Housing Agencies.....	-56,172	-56,172	-56,172
Outstanding guaranteed non-Federal temporary notes.....	-7,224,008	-6,199,008	-8,599,008
Unutilized loan approvals, end of year.....	7,867,478	10,008,539	11,180,401

(a) *Direct loans.* Direct Federal loans are made to finance the early costs for both the development and modernization of projects. These loans are made from available working capital in this fund and from up to \$1.5 billion of borrowings from the Treasury.

(b) *Private loans.* When direct Federal loans to a PHA accumulate to an amount that is attractive to private investors, the PHA then sells short-term tax-exempt notes to the public and uses the proceeds to repay the direct federal loans and to meet needs for additional financing to develop and modernize projects. These temporary notes are issued for short periods and may be revised to provide needed funds to develop and modernize projects. The status of temporary financing follows:

STATUS OF TEMPORARY FINANCING

(In millions of dollars)

	1979 actual	1980 estimate	1981 estimate
Direct Federal loans to PHA's:			
Balance at start of year.....	47	56	56
Loans made during year.....	277	300	300
Loans repaid during year.....	-268	-300	-300
Balance at end of year.....	56	56	56
Loans by private investors:			
Balance at start of year.....	6,423	7,224	6,199
Loans made during year.....	9,451	8,425	10,825
Loans repaid during year.....	-8,650	-9,450	-8,425
Balance at end of year.....	7,224	6,199	8,599

(c) *Bonds.* Previously, projects were permanently financed through the sale of long-term bonds to the public. Beginning in 1980, long-term bonds will be sold to the Federal Financing Bank. A 1980 supplemental appropriation and transfer of budget authority from the Subsidized housing programs account is being requested for the necessary interest differential payment.

Operating results.—The estimated net operating income of \$5.7 million in 1981 will increase retained income to \$91.9 million. Retained income may be required to meet program requirements in future years.

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, up to 80 percent, but not to exceed \$50,000, of the start-up costs are funded through these "seed money" loans. Sponsors are required to demonstrate their financial capacity by providing 20 percent from their own funds which is repaid from the initial proceeds of the section 202 construction loan.

The proposed program level for 1981 will be funded from available balances and loan repayments and will finance 71 direct loans for selected projects that receive permanent financing under the Section 202 Housing for the elderly or handicapped program.

The community disposition program was established by the Atomic Energy Community Act of 1955 to dispose of federally owned properties.

Budget program.—All sales under the program have been completed. Servicing of the mortgage inventory currently held by the Secretary will continue.

Operating results.—The deficit in the fund is expected to be \$14 million at the end of 1981. Funds recovered and transferred to the Treasury are estimated to aggregate \$85.1 million by the end of 1981.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund

into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program. Prior to that time, collections were used for the payment of tax and utility increases in section 236 projects. The Housing and Community Development Amendments of 1979 authorized the transfer of the unobligated balances remaining in the fund as of October 31, 1978.

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs.

Financing.—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

Public enterprise funds—Continued

The Department will introduce a demonstration program that represents an experimental shift from the current mode of financing targeted tandem projects—a tandem program involving the purchase and sale of mortgages—to an interest rate reduction approach. The yield on below-market-interest-rate mortgages would

not be maintained through a sales "discount," but a grant would be given to the lender as compensation for making a below-market interest-rate mortgage loan. Tandem financing makes projects feasible by reducing the debt service payments and thus total annual project expenses. The capital grant may accomplish the same purpose, without ever having to purchase, hold, and subsequently sell the mortgage.

Public enterprise funds:

The fund is authorized to make loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

SPECIAL ASSISTANCE FUNCTIONS FUND

【The aggregate amount of purchases and commitments authorized to be made pursuant to section 305 of the National Housing Act as amended (12 U.S.C. 1720), is further increased by \$2,000,000,000, which shall be out of recaptured Special Assistance Purchase authority.】 During 1981 and within the resources and authority available, gross obligations for the principal amounts of direct loans shall not exceed \$1,800,000,000, which may be financed with collections received in 1981, and additional obligations are authorized in such amounts as are necessary for increases to prior year commitments. (Department of Housing and Urban Development—Independent Agencies Appropriations Act, 1980.)

Special assistance functions.—The Association is authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans. Funds are currently available to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is administered with the use of processing facilities of the Federal National Mortgage Association.

Budget program.—Commitment contracts amounting to \$2.0 billion are planned for 1980 for new commitments under section 8 and targeted tandem and \$1.8 billion in 1981. Increases to outstanding commitment contracts expected in future years under these programs are included in this level. Mortgage purchases, representing deliveries from commitment contracts in prior years, are estimated at \$763 million in 1980 and \$1.222 billion in 1981. Sales of these mortgages are estimated at \$185 million in 1980 and \$1,340 billion in 1981.

Commitments outstanding, end of year.....	3,765,709	4,807,109	5,186,709

Financing.—Funds for mortgage purchases are obtained from principal liquidations through either repayments on portfolio mortgages or sale of tandem purchases, and borrowing from the Treasury. A portion of the mortgage portfolio was financed by sale of participation certificates. This amounted to \$1.2 billion in prior years and there is a remaining liability of \$370.8 million offset by \$115.6 million on deposit with the trustee in anticipation of scheduled retirements. Funds for operating costs, mainly interest expense and discounts required on tandem mortgage sales, are obtained from mortgage earnings and from appropriations for the difference between interest expense on participation certificates and the income from related mortgage investment earnings.

STATUS OF MORTGAGE PURCHASE STATUTORY AUTHORITY

	1979 actual	1980 est.	1981 est.
Authority available, start of year.....	3,402,981	2,463,647	992,319
New statutory authority.....	500,000		
Authority canceled.....	571,776	532,672	1,667,700

Authority used in year	-2,011,110	-2,004,000	-1,802,000
Statutory authority available for release	2,463,647	992,319	888,019

Note.—Includes availability of both Presidential and Congressional Authorization.

Operating results.—Through September 30, 1979, losses of \$73.4 million for participation sales have been offset by appropriations. Other losses from below-market interest rate loans, tandem costs, interest on Treasury borrowings and asset sales amounted to \$2,272.9 million. Of this amount, \$2,199.5 million is carried as an impairment of capital.

The special assistance functions are expected to result in losses estimated at \$302.7 million in 1980 and \$526.2 million in 1981.

Appropriations for insufficiencies under the participation sales fund will cover \$6.5 million of 1980 losses and \$6.4 million of 1981 losses.

The following table shows the derivation and financing of the interest insufficiencies on outstanding participation certificates:

PARTICIPATION INSUFFICIENCIES

(In thousands of dollars)

	1979 actual	1980 estimate	1981 estimate

Emergency Mortgage Purchase Assistance.—The Emergency Home Purchase Assistance Act of 1974 added Section 313 to the National Housing Act, authorizing standby authority to purchase mortgages. The program may be activated whenever the Secretary finds that economic factors, including inflation, are having a severely disproportionate effect on the housing industry. The mortgage purchase authority must be released in appropriation acts, however.

Budget Program.—The last release of commitments to purchase mortgages took place in September, 1976, when \$2.0 billion of authority was released for the purchase of multifamily mortgages. Activity since that time has been limited to increases to existing contracts. It is not anticipated that any new commitments will be made through 1981; however, amendments to existing contracts are estimated to total \$60 million in 1980 and \$24 million in 1981. Outstanding purchase commit-

ments will continue to be honored, and purchases will amount to \$1.2 billion and \$537 million in 1980 and 1981, respectively.

Financing.—Funds are obtained from Treasury borrowings, mortgage principal liquidations, and mortgage interest payments.

Operating results.—Losses are estimated at \$216.6 million in 1980 and \$315.0 million in 1981, primarily from the differences in prices paid to purchase the below-market interest mortgages and the prices that are obtainable when such mortgages are sold at market yields.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans, or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand on, or purchased under contracts made before, November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

Budget program.—It is not expected that any purchase of mortgages under these functions will be made during 1980 or 1981.

Financing.—These functions are financed principally by Treasury borrowings, portfolio liquidations, and, in the past, sales of participation certificates in mortgage pools.

Transfers of principal repayments on pooled mortgages to the Participation sales fund for repayment of participation certificates are expected to be \$17.2 million in 1980 and \$19.5 million in 1981. Pooled mortgages amounted to \$82.5 million of the total mortgage portfolio of \$167.1 million on hand as of September 30, 1979. As a result of repayments, the pooled mortgage portfolio is estimated to decline to \$65.4 million in 1980 and \$45.9 million in 1981. This program is more fully explained under the Participation sales fund.

Operating results.—Net income of \$8.6 million is estimated for 1980 and \$8.9 million for 1981. Cumulative retained earnings reserved for insufficiencies and other losses and contingencies is estimated at \$138.8 million for 1981. No payment to the Treasury out of earnings is projected for 1980 and 1981. The following table shows the financing of the insufficiencies:

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured, FmHA-insured, or VA-guaranteed mortgages.

GNMA guarantees the timely payment of principal and interest on the guaranteed securities. Recent efforts to limit and reduce losses in the mobile home pools through programmatic changes have resulted in substantial decreases over previous estimates. Estimated losses for 1979-81 are presented below.

(In thousands of dollars)

	1979 actual	1980 estimate	1981 estimate
Mobile home pools.....	155	500	500
Single-family pools.....	43	100	100
Project pools.....	195	500	500
Total.....	393	1,100	1,100

Budget program.—Program activity is summarized in the following table:

(In thousands of dollars)

	1979 actual	1980 estimate	1981 estimate
Commitments issued.....	41,750,000	47,200,000	53,000,000
Guarantees issued.....	22,175,900	20,500,000	25,000,000
Securities outstanding.....	70,558,400	85,475,800	104,375,800

Financing.—In addition to an application fee, guarantee fees and other charges are assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee.

Operating results.—Fee collections and other income are expected to exceed expenses by \$86.8 million in 1981. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations, together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States for the funding of local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between communities in metropolitan areas and those in nonmetropolitan areas.

Loan guarantees.—Loan guarantee assistance under Section 108 is provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses.

Budget program.—The total appropriation requested for 1981 is \$3,950 million. No funding for the financial settlement fund is requested in 1981.

Outlays are estimated at \$3,500 million in 1980 and \$3,805 million for 1981.

URBAN DEVELOPMENT ACTION GRANTS

For grants pursuant to section 103(c) of title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), \$675,000,000, to remain available until September 30, [1982] 1983. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

90.00	Outlays	73,167	180,000	365,000

Title I of the Housing and Community Development Act of 1974, as amended, authorizes grants to distressed cities and distressed urban counties for the funding of economic development and neighborhood revitalization projects.

This assistance is in addition to assistance available under the Community development block grants program and will help to provide a catalyst for State and local governmental assistance and private investment in such communities. The commitment of these other resources is a precondition for the execution of a firm contractual obligation between a recipient and HUD.

The 1981 budget proposes \$675 million for the Urban development action grants program. This level will provide funding for 350 projects, will help meet an increasing program demand, and will maintain a consistent funding level for distressed communities.

The 1981 request will continue to produce high rates of private leveraging, estimated at \$4.2 billion in 1980 and 1981, and result in a projected creation or retention of 405 jobs, including 164 permanent jobs, per million dollars of Federal funds.

COMPREHENSIVE PLANNING GRANTS

For grants as authorized by section 701 of the Housing Act of 1954, as amended (40 U.S.C. 461), [\$42,500,000] \$40,000,000, to remain available until expended. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

Section 701 of the Housing Act of 1954, as amended, authorizes Federal support of planning and management programs. Eligible recipients have included States, areawide planning organizations, municipalities and counties, and Indian tribes. For 1981, the Department is proposing legislative changes to enhance the State role in planning efforts and to better coordinate planning and implementation of resultant plans.

Budget program.—The 1981 program level of \$40 million will provide funding to eligible recipients to develop State and regional strategies that are supportive of and responsive to the needs of urban and rural areas. The funds will assist recipients to undertake planning strategies which further the national policy objectives of conserving urban areas, expanding housing and employment opportunities, and promoting orderly growth.

The 1981 program level of \$40 million will assist 1,217 grant recipients and provide for 450 grant approvals by HUD and 925 grant approvals by States to develop comprehensive development plans.

URBAN HOMESTEADING

Funds provided for Urban Homesteading in the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1979, may be used for reimbursement to the Administrator of Veterans Affairs and the Secretary of Agriculture for properties conveyed by the Administrator and the Secretary for use in connection with a HUD-approved urban homesteading program as authorized by Section 810 of the Housing and Community Development Act of 1974, as amended.

Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties, without payment, to units of local government for use in an urban homesteading program. In addition, the Act also authorizes the Administrator of Veterans Affairs and the Secretary of Agriculture to transfer their unoccupied, single-family properties for use in such programs.

Budget program.—No appropriation is requested for 1981 since prior year funds will remain available in 1981. Appropriation language is proposed to permit the use of 1979 appropriated funds in conjunction with Veterans Administration and Farmers Home Administration properties. The amount available in 1981, including a carryover from the 1979 appropriation and amounts previously appropriated to the FHA Fund for homesteading reimbursements, will support an estimated 1,500 properties at an average value of \$8,400 to be conveyed to local governments.

MISCELLANEOUS APPROPRIATIONS

90.00	Outlays	14,535	14,582	

The budget schedule for Miscellaneous appropriations contains the model cities program and the community development training and urban fellowship program.

The model cities program was terminated on January 1, 1975, pursuant to title I of the Housing and Community Development Act of 1974 (Public Law 93-383). The community development training and urban fellowship program was discontinued on June 30, 1973.

Public enterprise funds:

REHABILITATION LOAN FUND

For the revolving fund established pursuant to section 312 of the Housing Act of 1964, as amended (42 U.S.C. 1452b), [\$135,000,000] \$188,000,000, together with collections, unexpended balances of prior appropriations, and all other amounts in the revolving fund which will be available on or after September 30, [1979] 1980, to remain available until expended, for commitments for loans and operating costs [for fiscal year 1980]. During 1981 and within the resources and authority available, gross amounts administratively committed for the principal amounts of direct loans shall not exceed \$240,000,000 in new commitments, in addition to which up to \$15,000,000 may also be committed from cancelled prior year commitments. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

2400	Repayments, prepayments, loan sales	-31,634	-32,749	-41,354
2500	Write-offs for default	-170		
2900	Outstanding, end of year	504,139	681,174	881,820

Section 312 of the Housing Act of 1964, as amended, authorizes loans for the rehabilitation of residential and commercial properties. Approximately 19,200 dwelling units will be rehabilitated in 1981, including 13,200

single family and 6,000 multifamily units. This program will also be used in conjunction with the urban homesteading program to rehabilitate properties in homesteading areas.

Budget program.—The \$188 million appropriation requested for 1981 plus loan repayments and other income becoming available during the year will provide for net loan reservations of \$240 million. A total loan limitation of \$255,000 thousand is requested to provide for up to \$15,000 thousand of prior year commitments estimated to be recovered and reused in 1981. These funds will be used to provide loans in certain federally assisted areas such as urban renewal, code enforcement, community development block grant, and section 810 urban homesteading areas.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the Community development block grants program, authorized by the 1974 act.

No new budget authority is required for the program. However, a permanent indefinite appropriation to liquidate prior unfunded contract authority is available. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

Budget program.—Grants are distributed to new community developers under section 718 to supplement public facility projects in existing new communities. Public Law 96-7, dated April 9, 1979, rescinded all budget authority not administratively committed. Any amounts recovered subsequent to that date will be rescinded automatically. The Department estimates that \$1.4 million will be rescinded in 1981. All remaining commitments are estimated to be disbursed by the end of 1983.

Public enterprise funds:

NEW COMMUNITIES FUND

For the redemption of new community debentures and related expenses, authorized by section 713, Housing and Urban Development Act of 1970, as amended (42 U.S.C. 4514), and section 403, Housing and Urban Development Act of 1968, as amended (42 U.S.C. 3903), such sums as may be necessary, to be financed as provided by section 717, Housing and Urban Development Act of 1970, as amended (42 U.S.C. 4518).

The Housing and Urban Development Act of 1968, as amended, and title VII of the Housing and Urban Development Act of 1970, as amended, authorize Federal assistance to private and public new community developers. The program provides for Federal guarantee of the bonds, debentures, notes, and other obligations issued by, or on behalf of, private and public new community developers. Federal guarantees of obligations issued by developers may not exceed \$50 million for each new community project.

Of the 13 new community projects with guarantees, 4 have been, or are being, liquidated. This requires that the Federal Government retire the outstanding guaranteed debentures and provide funding for certain project operation expenses, where a project's cash resources are exhausted, as may be necessary to protect the Federal interest. Four projects have been, or are being, acquired for subsequent transfer to new developers for continued new community development; if this is not feasible, these projects will be liquidated. Additional resources will be made available to the five remaining projects to enhance their chances for continued successful development. This will include debt restructuring and the infusion of additional housing assistance and community development funds. In addition to the 13 loan guarantee projects, three projects which received certificates of eligibility, but no guarantees, are expected to continue with housing and community development program assistance.

1. **Administrative expenses.**—These amounts represent the administrative cost of carrying out this program.

2. **Contract support and services.**—These costs are incurred for analysis and management and technical services, including land appraisals, for the new community projects in the program.

3. **Interest on U.S. Treasury borrowings.**—This represents the interest which will be paid to the U.S. Treasury on the borrowings of the fund. The increase in Treasury borrowings is necessary to fund the proposed budget plan.

Other program costs.—The budget provides for the redemption of new community debentures and the payment of accrued interest on such debentures for one project in 1980; no redemptions are anticipated in 1981. It is anticipated that operating expenses for projects with exhausted cash resources will amount to \$3.4 million in 1980 and \$2.6 million in 1981. Interest payments

Public enterprise funds—Continued

NEW COMMUNITIES FUND—Continued

on guaranteed debentures will decline as a portion of the outstanding debentures is retired.

Financing.—The budget program in 1980 and 1981 will be financed primarily by Treasury borrowing. In addition, income of \$13.5 million in 1980 and \$1.2 million in 1981 is expected to be received from the sale of assets of acquired projects and fees and repayments from continuing projects.

Operating results.—Through September 30, 1979, cumulative net loss in the fund amounted to \$210.8 million. It is estimated that the fund will accrue an estimated deficit amounting to \$263.2 million by the end of 1981. This net loss is the result of payments of claims under loan guarantees and other expenses and liabilities incident to the protection of the Government's interest in projects which have received loan guarantees.

The housing counseling assistance program will continue to assist eligible homeowners to prevent and reduce defaults and to reduce foreclosures on single-family homes and the resulting loss to FHA insurance funds. In 1981, \$10 million will be available for a comprehensive counseling program, including homeowners in default, home buyers, and renters.

NEIGHBORHOOD SELF-HELP DEVELOPMENT PROGRAM

For contracts, grants, and other assistance, not otherwise provided for, to neighborhood organizations as authorized by the Neighborhood Self-Help Development Act of 1978 (42 U.S.C. 8121-8124), [\$10,000,000] \$15,000,000, to remain available until September 30, [1981] 1982. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

Program and Financing (in thousands of dollars)

90.00	Outlays		9,000	10,000

The Neighborhood Self-Help Development Act of 1978 authorizes the Secretary to provide grants and other forms of assistance to neighborhood organizations to enable such organizations to undertake housing, economic development, and community development projects in deteriorated low- and moderate-income neighborhoods.

These neighborhood projects should include a self-help component, involve the local residents directly, and maximize use of non-Federal resources.

The 1981 funding would provide approximately 120 grants to neighborhood development organizations for program development activities.

MOBILE HOME STANDARDS PROGRAM

Program and Financing (in thousands of dollars)

Identification code	86-0167-0-1-376	1979 actual	1980 est.	1981 est.
Program by activities:				
	Enforcement program	209	731	
	Change in selected resources	-209	-731

90.00	Outlays	209	731	

Pursuant to the National Mobile Home Construction and Safety Standards Act of 1974, Federal mobile home construction and performance standards were published in the Federal Register.

The act directs that inspections and investigations be conducted to enforce the Federal standards. Mobile home producers are required to have their building plans approved by an agency acceptable to HUD prior to manufacture. Appropriated funds which were enacted to initiate the Mobile home standards program are estimated to be disbursed fully by the end of 1980.

MOBILE HOME INSPECTION AND MONITORING

Program and Financing (in thousands of dollars)

Identification code	86-5271-0-2-376	1979 actual	1980 est.	1981 est.
Program by activities:				
10.00	Inspection and monitoring program (costs—obligations) (object class 25.0)		8,300	7,000
Financing:				
21.40	Unobligated balance available, start of year			-1,535
24.40	Unobligated balance available, end of year..		1,535	235

Relation of obligations to outlays:				
71.00	Obligations incurred, net		8,300	7,000
90.00	Outlays		8,300	7,000

Section 620 of the National Mobile Home Construction and Safety Standards Act of 1974, as amended by the Housing and Community Development Amendments of 1979, authorizes a program to establish and enforce appropriate construction standards for the construction, design and performance of mobile homes to assure their quality, durability, and safety. All mobile homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by the Secretary.

A \$19 fee is charged to the manufacturers for each mobile home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. Beginning in 1980, such fees are being deposited in a special fund administered by the Secretary. Previously, fees were retained in the custody of the National Conference of States on Building Codes and Standards which carried out monitoring and enforcement activities on behalf of the Department.

INTERSTATE LAND SALES

Program and Financing (in thousands of dollars)

Identification code	86-5270-0-2-376	1979 actual	1980 est.	1981 est.
Program by activities:				
10.00	Administrative expenses (payment to Salaries and expenses) (costs—obligations) (object class 25.0)		271	350
			350	350
Financing:				
21.40	Unobligated balance available, start of year	-1		
60.00	Budget authority (appropriation) (permanent, indefinite) (special fund)		270	350
			350	350
Relation of obligations to outlays:				
71.00	Obligations incurred, net		271	350
72.40	Obligated balance, start of year	365		
90.00	Outlays	636	350	350

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, not exceeding \$1,000, to be paid by the developer when filing a statement of record. During 1979, the Department revised the existing fee structure. Under the new fee structure, a typical development in excess of 500 lots is charged the maximum fee of \$1,000. The fee receipts are permanently appropriated and help finance the administrative expenses incurred in program operations.

General and special funds—Continued

INTERSTATE LAND SALES—Continued

The balance of the administrative expenses is included under the Department's Salaries and expenses account.

POLICY DEVELOPMENT AND RESEARCH

Federal Funds

General and special funds:

RESEARCH AND TECHNOLOGY

For contracts, grants, and necessary expenses of programs of research and studies relating to housing and urban problems, not otherwise provided for, as authorized by title V of the Housing and Urban Development Act of 1970, as amended (12 U.S.C. 1701z-1 et seq.), including carrying out the functions of the Secretary under section 1(a)(1)(i) of Reorganization Plan No. 2 of 1968, [\$49,650,000] \$54,000,000, to remain available until September 30, [1981] 1982. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

* Transferred to Federal Emergency Management Agency.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out through contracts with industry, nonprofit research organizations and educational institutions, and through agreements with State and local governments and other Federal agencies.

In 1981, funds requested will support HUD efforts in the following areas:

Research. (1) Urban economic development, public finance, and tax policy; (2) housing needs and services for special users, such as the elderly and handicapped; (3) neighborhood reinvestment and revitalization; (4) economic and racial freedom of choice in housing; (5) alternative housing finance mechanisms; (6) reducing the

component costs of housing as well as helping lower-income people afford housing through subsidy programs; (7) conservation of energy resources in the construction and operation of housing; and (8) use of technology in urban systems to improve and maintain the vitality of communities at affordable levels of taxation. By 1981, a comprehensive series of evaluations reviewing key elements of every operating program in the Department will have been completed.

Key evaluations. (1) Community development strategies evaluation; (2) Brookings' community development block grant monitoring study; and (3) the section 8 evaluation.

Capacity building. The program to help local government officials improve their financial management capacity will be continued.

Other major activities to be continued in 1981 are: (1) collection and analysis of economic and financial data essential to HUD policy and program development, with the largest single project in this area being the Annual Housing Survey undertaken to measure changes in housing inventory and to compile data on the physical conditions of housing units and the characteristics of the occupants in both urban and rural areas; (2) completion of Experimental Housing Allowance Research; (3) programs aimed at attracting minorities and women to urban public service; and (4) development of plans and programs to encourage the utilization of HUD-sponsored research results.

FAIR HOUSING AND EQUAL OPPORTUNITY

Federal Funds

General and special funds:

FAIR HOUSING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, as authorized by title VIII of the Civil Rights Act of 1968, as amended, [\$3,700,000] \$5,700,000, to remain available until expended. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.)

Program and Financing (in thousands of dollars)

Identification code	1979 actual	1980 est.	1981 est.
86-0144-0-1-751			
Program by activities:			
1. State and local agency assistance grants	1,295	4,995
2. Community housing resource boards assistance	1,000
Change in selected resources	2,405	-295
10.00 Total obligations (object class 41.0)	3,700	5,700
Financing:

74.40 Obligated balance, end of year	-2,405	-2,110
90.00 Outlays	1,295	5,995

The fair housing assistance program, implemented in 1980, initially provided financial assistance to 31 State and local agencies to aid in eliminating housing discrimination. Beginning in 1981, the Department proposes to expand the program to include a new compo-

ment which will provide assistance to community housing resource boards.

The budget proposes financial assistance of \$3.7 million for 57 agencies to assure prompt and effective processing of title VIII (Civil Rights Act of 1968) complaints. The budget also proposes financial assistance of \$2 million for community housing resource boards which assist HUD, realtors and builders in designing, implementing, and monitoring affirmative fair housing agreements and programs.

MANAGEMENT AND ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES (INCLUDING TRANSFER OF FUNDS)

For necessary administrative and nonadministrative expenses of the Department of Housing and Urban Development, not otherwise provided for, including not to exceed \$3,000 for official reception and representation expenses, **[\$539,307,000] \$593,104,000**, of which **[\$255,118,000] \$252,222,000** shall be provided from the various funds of the Federal Housing Administration. The Working capital fund, authorized by the Department of Housing and Urban Development Act of 1965, finances administrative services which can be performed more efficiently on a centralized basis. The fund is financed from fees charged for services performed. (Beginning in 1980, the central supply and communication services were no longer provided by the Working capital fund, but rather by the Salaries and expenses fund.)

The Joint grants management fund is used for the administration of integrated grant administration projects for which HUD is the lead agency. Obligations are on the basis of project approvals by Federal regional councils and fund commitments by participating agencies. Advance payments from participating agencies are received in the fund and utilized to finance the administration of the projects. The activity in 1981 will depend on requests for assistance and the extent to which agreements can be reached with other Federal agencies.

GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; or to payments to interagency motor pools where separately set forth in the budget schedules: *Provided further*, That the limitations may be increased by the Secretary when necessary to allow for travel performed by employees of the Department of Housing and Urban Development as a result of increased Federal Housing Administration inspection and appraisal workload.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—
(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such an audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or

employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitations.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals [for projects] not specifically solicited by the Government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

SEC. 409. No part of any appropriation for the fiscal year ending September 30, [1980] 1981, contained in this or any other Act shall be used to contract with private firms to provide plant care or watering services. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1980.*)

DEPARTMENT OF THE INTERIOR

LAND AND WATER RESOURCES

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management is responsible for the conservation, management and development of 417 million acres of national resource lands, including 243 million acres in Alaska.

The Bureau also administers mining and mineral leasing on 370 million acres of mineral estate underlying other ownerships, and approximately 1.1 billion acres of the Outer Continental Shelf.

The work of the Bureau produces revenues from various sources. These revenues are distributed as follows (in millions of dollars):

	1979 actual	1980 estimate	1981 estimate
Total receipts.....	4,055	5,735	7,046
Payments to States and counties.....	-300	-362	-428
Deposited in the Treasury.....	3,755	5,373	6,618

Federal Funds

General and special funds:

MANAGEMENT OF LANDS AND RESOURCES*

*See Part III for additional information.

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, **[\$301,896,000]** \$357,550,000. (5 U.S.C. 583, 594; 43 U.S.C. 2, 54, 72, 129, 315, 1181a-f, 1701; 78 Stat. 986; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

¹ Includes capital investment as follows: 1979, \$18,191 thousand; 1980, \$29,800 thousand; 1981, \$46,000 thousand.

1. *Energy and minerals management.*—Includes such activities as energy and nonenergy minerals management (onshore and offshore) in response to national demand. The program will provide for sale of coal, oil and gas, geothermal resources, and nonenergy minerals as well as administration of existing leases. The environmental impact of proposed energy and minerals development activities will be assessed. Lease stipulations and other environmental protection measures will mitigate adverse effects. Specifically, the program will provide for issuing onshore oil and gas leases including management responsibilities for the Naval Petroleum Reserve in Alaska, geothermal leases, holding three competitive regional coal lease sales, holding seven competitive sales on the Outer Continental Shelf, and administering the various nonenergy minerals activities.

2. *Lands and realty management.*—Includes such activities as use authorization in support of energy and other programs, maintenance of official land records, and land classification. These activities provide for maintenance of public land status records, and issuance of information about public realty and mineral laws. It further provides for the processing of applications for

BUREAU OF LAND MANAGEMENT—Continued
General and special funds—Continued
MANAGEMENT OF LANDS AND RESOURCES—Continued

transfer of use of the public lands for other Federal agencies, State and local governments, and private individuals. The program is directed toward retaining public land in Federal ownership unless, as a result of land use planning, it is determined that disposal of a particular parcel will best serve the national interest. Land and realty actions will provide for processing rights-of-way applications for energy-related development, processing land selections under the Alaska Native Claims Settlement Act, the Alaska Statehood Act, and processing non-energy-related cases.

3. *Renewable resource management.*—This includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, and sustained yield management of the natural resources on the public lands.

The public domain forest management program provides for the management, development, protection, and sustained yield of timber products on more than 2.1 million acres of commercial forest land. The 1981 objective is 110 million board feet with an estimated sale value of \$9.0 million.

The range management program in 1981 will continue resource inventories and environment assessments at the accelerated 1980 level to provide the basis for developing and implementing range management plans. Substantial increases in on-the-ground investments will also occur.

Recreation management in 1981 will provide for management, protection, and visitor use assistance on public lands. Six plans and studies for trails will be developed. In 1980 the wilderness inventory will be completed for 174 million acres. In 1981, 40 wilderness studies will be completed through the Bureau planning system. In addition, off-road vehicle designation will be completed on an estimated 14 million acres in 1981.

The wildlife habitat management program in 1981 provides for improvement of 6.7 million acres of habitat through the implementation of 52 habitat management plans. \$8.6 million is provided for cooperative management with other Federal agencies and State wildlife agencies under authority of the Sikes Act and the Federal Land Policy and Management Act.

Fire management provides for developing fire techniques as a tool for resource management and developing fire prevention and suppression methods.

The soil, water, and air management program provides support to other resource programs through data collection and development and implementation of resource protection plans.

4. *Planning and data management.*—Includes such activities as data analysis, development of land use plans, and automated data management. These activities provide for developing multiple use plans on 174 million acres of public land. Data management supports Bureau programs through development and operation

of automated systems for acquiring, storing, using, and disseminating data required for all aspects of agency and resource management.

5. *Cadastral survey.*—This activity provides for identification of land boundaries and legal property descriptions to facilitate land management programs. During 1981, 9,020,000 acres will be surveyed in Alaska and the lower 48 States.

In Alaska, surveys are performed on lands selected by the State for transfer under the Alaska Statehood Act and for Native townsites, Native allotments, claims resulting from the Alaska Native Claims Act, and for other special purposes.

Surveys in the lower 48 States are performed to identify land boundaries as a prerequisite to resource management. This involves both new surveys and resurveys to reestablish obliterated boundary markers.

6. *Firefighting and rehabilitation.*—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires. Based on a 10-year annual average of 1.2 million acres, fires result in resource damages averaging \$17.2 million each year. Firefighting and rehabilitation costs are anticipated to exceed the amount appropriated for this function in 1980; a supplemental appropriation request appears in Part III of this Appendix. Emphasis, in 1981, will be directed toward holding a higher number of fires to 10 acres or less in higher value classes.

7. *Administration and enforcement.*—Provides for general administration and law enforcement on the public lands. Administration includes executive management and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities. Law enforcement provides for enforcement of laws and regulations governing the management, use, and protection of public lands through cooperative agreements with local and Federal law enforcement agencies, Federal special agents, and a uniformed ranger force in the California desert.

¹ Includes capital investment as follows: 1979, \$7,861 thousand; 1980, \$5,998 thousand; 1981, \$4,965 thousand.

1. **Construction and acquisition—(a) Buildings.**—Buildings for offices, warehouses, mechanical shops, communications, and related facilities are constructed to carry out Bureau programs. The 1981 program provides for construction of, or addition to, office complexes in Escalante, Utah; Miles City, Mont.; and Farming-

ton, N. Mex. It also provides for a warehouse for the Surprise Resource Area in California and the completion of the Burns Junction Fire Center in Oregon.

(b) **Recreation facilities.**—The 1981 program includes the construction of three overlooks in the Red Rocks Recreation Area in Nevada, 20 family units, two group

BUREAU OF LAND MANAGEMENT—Continued

ACQUISITION, CONSTRUCTION, AND MAINTENANCE—Continued

units and a water distribution system in the Organ Mountain Recreation Area in New Mexico; a water system in the Chukar Park Recreation Area in Oregon and for survey and design of future facilities.

(c) *Transportation facilities.*—The 1981 program provides for the survey and design of 90 miles, grading of 24 miles, and surfacing of 8 miles of timber-support roads in New Mexico and Wyoming; operation of sign shops in Kingman, Ariz., and Rawlins, Wyo.; and for survey and design of future facilities.

(d) *Acquisition.*—The 1981 program provides for the acquisition of 118 easements.

2. *Maintenance*—(a) *Buildings.*—The 1981 program will assist the Bureau in meeting building maintenance and energy-conservation standards through a corrective maintenance program to repair and replace leaking roofs, worn or warped floors, and inadequate plumbing; and to install insulation and storm windows and doors.

(b) *Recreation facility operation and maintenance.*—Provides for the operation and maintenance of developed recreation facilities and the cleanup of litter and trash from undeveloped recreation sites, roadsides, and waterways.

(c) *Road maintenance.*—Provides for preventive and corrective maintenance of roads, trails, and bridges under Bureau jurisdiction.

Public Law 94-565 (31 U.S.C. 1601) as amended by Public Law 95-469 provides for payments in lieu of taxes to counties and other units of local government for Bureau of Land Management, Forest Service, National Park Service, Fish and Wildlife Service and certain other agency administered land (entitlement land payments).

In addition, the act provides for payments for lands acquired after December 31, 1970, for inclusion in the National Park or National Forest Wilderness Systems. These payments are not to exceed 1% of the fair

market value of the acquired land per year for a 5-year period.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, and dismantlement of temporary structures, insurance on official motor vehicles, aircraft, and boats operated by the Bureau of Land Management in Canada; and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; \$10,000 for payment, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the United States Bureau of Land Management; miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$10,000: *Provided*, That appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed to the general fund of the Treasury from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended on a reimbursable basis for (1) surveys of lands other than those under the jurisdiction of the Bureau of Land Management and (2) protection of lands for the State of Alaska: *Provided further*, That the Secretary of the Interior and Secretary of Agriculture shall (a) review Federal agricultural financial assistance programs to determine to what extent such programs provide opportunities to assist livestock operators adversely affected by reductions in grazing allotments on public rangelands, as defined in the section 3 of the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1902); and (b) submit the results of this review to the Committees on Appropriations of the House of Representatives and the Senate within ninety days of the effective date of this Act, together with details on available programs, opportunities for more effective use of such programs, additional budget requirements needed to augment such programs, and any legislation needed to improve opportunities for assistance: *Provided further*, That the Secretary of the Interior shall develop criteria for extending, on a case-by-case basis, the period allowed for phased livestock reductions on public rangelands administered through the Bureau of Land Management up to five years. Such criteria shall take into account available agricultural assistance programs, the magnitude of projected livestock reductions, alternative pasturage available and ability of such public rangelands to sustain such phasing in of livestock reductions without damage to rangeland productivity: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within 30 days after receipt of a final grazing allotment decision or 90

days after the effective date of this Act in the case of reductions ordered during 1979, whichever occurs later. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secretary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within 2 years after the appeal is filed]. (*Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

OREGON AND CALIFORNIA GRANT LANDS

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands; an amount equivalent to 25 per centum of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands, to remain available until expended: *Provided*, That the amount appropriated herein for the purposes of this appropriation on lands administered by the Forest Service shall be transferred to the Forest Service, Department of Agriculture: *Provided further*, That the amount appropriated herein for road construction on lands other than those administered by the Forest Service shall be transferred to the Federal Highway Administration, Department of Transportation: *Provided further*, That the amount appropriated herein is hereby made a reimbursable charge against the Oregon and California land grant fund and shall be reimbursed to the general fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876): *Provided further*, That not less than \$62,700,000 available from receipts shall be obligated in fiscal year 1980 for Oregon and California grant lands]. (*16 U.S.C. 583, 594; 43 U.S.C. 2, 1181a-f; 69 Stat. 374; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

OREGON AND CALIFORNIA GRANT LANDS—Continued

other Federal lands in the Oregon and California land grant counties of western Oregon:

1. *Construction and acquisition.*—Provides for the expansion of the Roseburg warehouse and seedling storage area; grading and surfacing 15 miles of access roads; construction of additional facilities at two developed recreation sites; and acquisition of easements for roads in commercial timber areas.

2. *Maintenance.*—Provides for maintenance of access roads, operation and maintenance of recreation facilities, and maintenance of management facilities.

3. *Renewable resource management.*—Provides for reforestation, stand improvement, mortality salvage, commercial thinnings, forest genetics, timber management, protection, and other resource management actions on the O. & C. lands. Planned timber sales in 1981 will be 1,120 million board feet. The completion of new allowable cut calculations on two sustained yield units have resulted in a net planned reduction of 52 million board feet.

4. *Planning and data management.*—Provides for preparation and updating of Bureau planning system documents and for automated data processing costs.

¹ Includes capital investment as follows: 1979, \$40 thousand; 1980, \$40 thousand; 1981 \$40 thousand.

This appropriation is derived from receipts from user fees, special recreation permits, and fees paid by concessionaires at recreation facilities administered by the Bureau of Land Management. Amounts received from such sources are utilized to manage, operate, and maintain recreation facilities and to finance improvements at those facilities.

Payments to counties, national grasslands.....	451	454	500
Expenses, Public Land Administration Act.....	380		
Expenses, road maintenance deposits.....	2,152	2,800	2,400

1. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

2. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

3. *Payments to Coos and Douglas Counties, Oreg., from receipts Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

4. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

5. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

6. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

7. *Payments to States from grazing receipts, etc., public lands within districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

8. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

9. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands.

10. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

11. *Expenses, Public Land Administration Act.*—Public Law 86-649 approved July 14, 1960, permanently appropriated certain moneys to the Secretary of the Interior. Timber purchasers or permittees provide bond or deposit to assure fulfillment of contracts. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes. Moneys received in forfeiture of such bonds or for road maintenance are available for necessary forest improvement, protection, and rehabilitation and for road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only and amounts in excess of the cost of doing the work are transferred to miscellaneous receipts (74 Stat. 507-508). The applicable provisions of Public Law 86-649 were repealed by Public Law 94-579, approved October 21, 1976. New deposits for road maintenance will become available in the "Expenses, road maintenance" appropriation below. Collections for rehabilitation of damages will be available beginning in 1978 in the "Service charges, deposits, and forfeitures" appropriation (43 U.S.C. 1701 et. seq.).

12. *Expenses, road maintenance deposits.*—Public Law 94-579 approved October 21, 1976, permanently appropriated certain moneys to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and moneys collected are available for necessary road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only. (43 U.S.C. 1701 et. seq.)

1. *Land and resource management trust fund.*—Applicants for conveyance of lands omitted in original surveys pay the cost of surveys and the administrative costs of conveyance. Advances are made by individuals to pay the costs of other types of surveys requested by them. Users of the Federal range and others contribute funds or make gifts for conservation practices, acquisition, protection, and other purposes (43 U.S.C. 315h, 315i, 775, 74 Stat. 506; 31 U.S.C. 711; 43 U.S.C. 759, 761, and 887; 48 Stat. 1224-1236; 90 Stat. 2758 (43 U.S.C. 1701)).

2. *Trustee funds, Alaska townsites.*—Amounts received from sale of Alaska town lots are available for expenses incident to the maintenance and sale of townsites (31 U.S.C. 725s; Comp. Gen. Dec. of Nov. 18, 1935).

[BUREAU OF RECLAMATION] WATER AND POWER RESOURCES SERVICE

The Bureau of Reclamation has been renamed the Water and Power Resources Service. The Service plans,

constructs, and operates facilities to irrigate lands, furnish municipal and industrial or other water supplies, and develop related hydroelectric power and flood control in the 17 Western States and Hawaii.

Appropriations to the Service are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, derived from the revenue of the Boulder Canyon project. The 1981 estimates are summarized by source as follows (in thousands of dollars):

Appropriation title	Estimate of appropriation	General fund	Reclamation fund	Colorado River Dam fund	Other
Loan program	26,128	26,128			
Construction program	590,532	427,930	162,602		
General investigations.....	37,825	50	37,775		
Operation and maintenance	114,117	38,861	62,398	12,858	
General administrative expenses.....	38,150		38,150		
Permanent appropriations.....	2,700		670	2,000	30
Total	809,452	492,969	301,595	14,858	30

Federal Funds

General and special funds:

For carrying out the functions of the [Bureau of Reclamation] Water and Power Resources Service as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that [Bureau] Service as follows:

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U.S.C. 421a-421d), and August 6, 1956, as amended (43 U.S.C. 422a-422k), including expenses necessary for carrying out the program, [\$29,603,000] \$26,128,000, to remain available until expended: *Provided, That during 1981, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$38,000,000: Provided further, That any contract under the Act of July 4, 1955, (69 Stat. 244), as amended, not yet executed by the Secretary, which calls for the making of loans beyond the fiscal year in which the contract is entered into shall be made only on the same conditions as those prescribed in section 12 of the Act of August 4, 1939 (53 Stat. 1187, 1197). (Energy and Water Development Appropriation Act, 1980.)*

Under the Small Reclamation Projects Act (43 U.S.C. 422a), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided in 1981 to continue construction on thirteen projects for improving existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and purchasing maintenance equipment. Completed construction for on-going projects will provide irrigation service to 525,200 acres and annually provide 113,400 acre-feet of municipal and industrial water.

CONSTRUCTION PROGRAM*

*See Part III for additional information.

For construction and rehabilitation of projects and parts thereof (including power transmission facilities for Water and Power Resources Service use) and for other related activities as authorized by law, to remain available until expended, \$590,532,000, of which \$118,392,000 shall be available for advances to the Upper Colorado River Basin Fund authorized by Section 5 of the Act of April 11, 1956, and \$135,235,000 shall be available for advances to the Lower Colorado River Basin Fund authorized by Section 403 of the Act of September 30, 1968: Provided, That of the total appropriated \$162,602,000 shall be derived from the Reclamation Fund: Provided further, That advances to the Upper Colorado River Basin Fund and Lower Colorado River Basin Development Fund may be increased or decreased by transfers within the overall appropriation to this heading: Provided further, That the unexpended balances of the appropriation accounts for "Construction and Rehabilitation", "Colorado River Basin Salinity Control Projects", and "Recreational and Fish and Wildlife" shall be merged into one and made available for the same purposes as appropriations under this heading: Provided further, That the final point of discharge for the interceptor drain for the San Luis Unit shall not be determined until development by the Secretary of the Interior and the State of California of a plan, which shall conform with the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters.

[CONSTRUCTION AND REHABILITATION]

[For construction and rehabilitation of authorized reclamation projects or parts thereof (including power transmission facilities for reclamation use) and for other related activities, as authorized by law to remain available until expended, \$213,053,000, of which \$60,000,000 shall be derived from the reclamation fund: Provided, That no part of this appropriation shall be used to initiate the construction of transmission facilities within those areas covered by power wheeling service contracts which include provision for service to Federal establishments and preferred customers, except those transmission facilities for which construction funds have been heretofore appropriated, those facilities which are necessary to carry out the terms of such contracts or those facilities for which the Secretary of the Interior finds the wheeling agency is unable or unwilling to provide for the integration of Federal projects or for service to a Federal establishment or preferred customer: Provided further, That the final point of discharge for the interceptor drain for the San Luis Unit shall not be determined until development by the Secretary of the Interior and the State of California of a plan, which shall conform with the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters: Provided further, That of the amount herein appropriated not to exceed \$344,000 for the Central Oregon Irrigation District shall be available for construction on a rehabilitation and betterment program under the Act of October 7, 1949 (63 Stat. 724), as amended, to be repaid in full under conditions satisfactory to the Secretary of the Interior: Provided further, That currently unobligated funds from appropriations made under this heading for payment of Teton Dam disaster claims shall be available to pay costs to irrigation spaceholder contracting entities for American Falls Dam pursuant to section 7, Reclamation Safety of Dams Act (Public Law 95-578), and shall be nonreimbursable in accordance with the terms of that Act.]

[COLORADO RIVER BASIN PROJECT]

[For advances to the Lower Colorado River Basin Development Fund, as authorized by section 403 of the Act of September 30, 1968 (82 Stat. 894), for the construction, operation, and maintenance of

projects authorized by title III of said Act, to remain available until expended, \$94,217,000.]

[COLORADO RIVER BASIN SALINITY CONTROL PROJECTS]

[For construction of projects authorized by the Act of June 24, 1974 (Public Law 93-320), to remain available until expended, \$34,761,000.]

[UPPER COLORADO RIVER STORAGE PROJECT]

[For the Upper Colorado River Storage Project, as authorized by the Act of April 11, 1956, as amended (43 U.S.C. 620d), to remain

available until expended, \$73,203,000, of which \$61,177,000, shall be available for the "Upper Colorado River Basin Fund" authorized by section 5 of said Act of April 11, 1956, and \$12,026,000 shall be available for construction of recreational and fish and wildlife facilities authorized by section 8 thereof, and may be expended by bureaus of the Department through or in cooperation with State or other Federal agencies, and advances to such Federal agencies are hereby authorized: *Provided*, That no part of the funds herein approved shall be available for construction, or operation of facilities to prevent waters of Lake Powell from entering any national monument.] (*Energy and Water Development Appropriation Act, 1980.*)

WATER AND POWER RESOURCES SERVICE—Continued

General and special funds—Continued

CONSTRUCTION PROGRAM—Continued

For 1981, the five formerly identified construction appropriations entitled "Construction and Rehabilitation," "Upper Colorado River Basin Fund," "Recreational and Fish and Wildlife Facilities," "Colorado River Basin Project," and "Colorado River Basin Salinity Control Projects" have been combined into a single construction appropriation account and titled "Construction Program." Language has been proposed in the appropriation request to maintain the integrities of the Upper Colorado River Basin fund and the Lower Colorado River Basin development fund, since these two were authorized separately and identified as continuing funds. Appropriations for the Upper Colorado River Basin fund and Colorado River Basin project construction are requested and paid to these funds for the construction of projects. The reason for the consolidation is to bring together like activities into a single account and to simplify the financial management process.

In 1981 construction will continue on 71 projects, and advance planning will be underway on 3 projects. The construction completed through 1980 will provide full irrigation service to 4,858,000 acres, a supplemental water supply to 6,096,000 acres, annually provide 3,787,000 acre-feet of municipal and industrial water, 11,682,000 kilowatts of hydroelectric power, and 546,800 kilowatts of fossil fueled capacity at Navajo Generating Station. During 1981, facilities will be completed to furnish a water supply to 22,000 acres and facilities to furnish 250,000 kilowatts of hydroelectric power and 169,000 acre-feet of municipal and industrial water.

Delays are anticipated in construction of the Auburn Dam in California because of a current review of geologic conditions at the Auburn damsite and on the Garrison diversion unit, North Dakota, because of unresolved legal and international questions. Should the problems on either or both of these projects be resolved satisfactorily, any additional funds that may be required will be requested later.

A supplemental appropriation for 1980 is proposed under proposed legislation for hydropower initiatives to increase electric capacity at existing facilities.

¹ Includes capital investment as follows: 1979, \$122 thousand; 1980, \$1,401 thousand; 1981, \$2,025 thousand.

This appropriation provides for the planning of potential developments for the conservation and utilization of water and related land resources and includes plan formulation investigations including geothermal investigations, and general engineering and research activities. Investigations and surveys are made to determine the feasibility of potential reclamation projects and the need for rehabilitation of existing Federal Reclamation projects.

1. *Plan formulation investigations.*—These include 19 appraisal investigations, 22 feasibility investigations, and 29 special investigations throughout the 17 Western States to formulate resource development plans for basins and specific projects leading to authorization, including studies relating to the rehabilitation, financial adjustment, or water conservation on existing Federal reclamation projects.

2. *General engineering and research.*—Studies directed toward improvements in procedures and in engineering methods and materials. Included are studies of atmospheric water resources; of alternative uses and reuse of water and continuing activities in waste water reclamation opportunities in the Western States and electrical energy research and development.

OPERATION AND MAINTENANCE

For operation and maintenance of reclamation projects or parts thereof and other facilities, as authorized by law; and for a soil and moisture conservation program on lands under the jurisdiction of the [Bureau of Reclamation] *Water and Power Resources Service* pursuant to law, to remain available until expended, [\$100,653,000] \$114,117,000 of which [\$78,000,000] \$62,398,000 shall be derived from the reclamation fund and [\$8,448,000] \$12,858,000 shall be derived from the Colorado River Dam fund: *Provided*, That funds advanced by water users for operation and maintenance of reclamation projects or parts thereof shall be deposited to the credit of this appropriation and may be expended for the same objects and in the same manner as sums appropriated herein may be expended, and such advances shall remain available until expended. (*Energy and Water Development Appropriation Act, 1980.*)

In 1981, a total of 31 projects, project areas, or divisions of projects will be operated and maintained for power, municipal, and industrial water supplies, irrigation, and other benefits with funds made available under this appropriation.

Provision is also made for flood control operations on certain projects, soil and moisture conservation operations on public lands under jurisdiction of the Service, irrigation management services, the Colorado River front work and levee system program, negotiation and administration of water marketing contracts on Corps of Engineers projects, and examination of existing structures and administration of acreage limitation provisions.

In addition, operation and maintenance costs of the Upper Colorado River storage project, and Colorado River Basin project are included in 1981.

In 1981, the Service will operate and maintain the facilities of the San Juan-Chama project, four units of the Upper Colorado River storage project, and the power facility of the Seedskadee participating project, which altogether include 35,601,000 acre-feet of storage space and 1,276,000 kilowatts of power generation capacity. Financing will be from project revenue. Quality of water and consumptive use studies for the Upper Colorado River Basin, flood control studies of the Florida and Paonia participating projects and the nonreimbursable operation and maintenance will be financed from operating revenues and repayable debt of the storage project, and participating projects will be reduced by this amount.

The 1981 program under the Colorado River Basin project provides for the Service's share of operation and maintenance costs of the Navajo project participation agreement. Financing will be from project revenue (82 Stat. 894).

This appropriation finances the general administrative and technical direction of the reclamation program as performed by the departmental, Denver Engineering and Research Center, regional, and other subordinate offices. Administrative costs incurred for the direct benefit of specific projects or activities are covered under other appropriations. The Denver Engineering and Research Center and regional offices charge projects or activities for direct beneficial services.

Payments to local units, Klamath reclamation area (indefinite special fund).....	189	150	160
Refunds and returns (indefinite special fund).....	564	412	502

1. *Colorado River Dam fund, Boulder Canyon project*—(a) *Payment of interest on advances from the Treasury*.—Interest is paid to the Treasury on moneys advanced for construction (43 U.S.C. 618a(b)).

(b) *Payments to States of Arizona and Nevada*.—Annual payments of \$300 thousand each are made to Arizona and Nevada, from operation of the Boulder Canyon project (43 U.S.C. 618a(c)).

2. *Operation, maintenance, and replacement of project works, North Platte project*.—Payments are made for replacement of project works operated and maintained by the United States and to supplement funds advanced by the water users to meet annual costs of operation and maintenance of such works (66 Stat. 755).

3. *Payments to the Farmers' irrigation district (North Platte project, Nebraska-Wyoming)*.—Payments are made to the Farmers' irrigation district on behalf of the Northport irrigation district for water carriage (62 Stat. 273, as amended).

4. *Payments to local units, Klamath reclamation area*.—Certain revenues collected from the leasing of Klamath project reserved Federal lands within the boundaries of certain national wildlife refuges shall be used: (a) To credit or pay to the Tule Lake irrigation district amounts already committed; and (b) to make annual payments to the counties in which such refuges are located (78 Stat. 850).

5. *Refunds and returns*.—Overcollections are refunded and unapplied deposits are returned (64 Stat. 689).

Unappropriated balance, end of year.....		716	748

Revenue from Boulder Canyon project operations is placed in this fund. The fund is available for annual appropriation for payment of expense of operation and maintenance of the project. It is available without further appropriation for payment of interest on amounts advanced from the Treasury, for annual payments of \$300 thousand each to Arizona and Nevada and for repayment of advances from the Treasury for construction or other purposes (43 U.S.C. 617a).

Amounts Available for Appropriation (in thousands of dollars)

	1979 actual	1980 est.	1981 est.
Receipts.....	500	500	500
Reimbursement to Upper Colorado River Basin fund...	500	500	500

This fund is derived from revenue of the Boulder Canyon project, and is available for reimbursement to the Upper Colorado River Basin fund for Hoover Dam deficiencies (82 Stat. 899).

SPECIAL FUNDS

Sums herein referred to as being derived from the Reclamation fund, the Colorado River Dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391), the Act of December 21, 1928 (43 U.S.C. 617a), and the Act of July 19, 1940 (43 U.S.C. 618a) respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (*Energy and Water Development Appropriation Act, 1980.*)

ADMINISTRATIVE PROVISIONS

Appropriations for the [Bureau of Reclamation] *Water and Power Resources Service* shall be available for purchase of not to exceed [16] 30 passenger motor vehicles of which [13] 26 shall be for replacement only [including one for law enforcement use]; payment of claims for damages to or loss of property, personal injury, or death arising out of activities of the [Bureau of Reclamation] *Water and Power Resources Service*; payment, except as otherwise provided for, of compensation and expenses of persons on the rolls of the [Bureau of Reclamation] *Water and Power Resources Service* appointed as authorized by law to represent the United States in the negotiations and administration of interstate compacts without reimbursement or return under the reclamation laws; for services as authorized by 5 U.S.C. 3109, in total not to exceed \$300,000; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the [Bureau of Reclamation] *Water and Power Resources Service*; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U.S.C. 461-467): *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations".

Sums appropriated herein which are expended in the performance of reimbursable functions of the [Bureau of Reclamation] *Water and Power Resources Service* shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the [Bureau of Reclamation] *Water and Power Resources Service*, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665).

No funds appropriated to the [Bureau of Reclamation] *Water and Power Resources Service* for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the [Bureau of Reclamation] *Water and Power Resources Service*. [Not to exceed \$225,000 may be expended from the appropriation "Construction and Rehabilitation Program" for work by force account on any one project or Pick-Sloan Missouri Basin Program unit and then only when such work is unsuitable for contract or no acceptable

WATER AND POWER RESOURCES SERVICE—Continued
General and special funds—Continued

ADMINISTRATIVE PROVISIONS—Continued

bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and Rehabilitation Program" contained in this Act, shall be available for construction work by

1. *Water resources research and development.*—This activity provides annual grants for each of the 50 States and for Puerto Rico, the District of Columbia, the Virgin Islands, and Guam, to assist them in carrying on the work of a competent and qualified water resources research and development institute at one college or university. Costs are funded on a 2 Federal to 1 State basis.

Matching grants to institutes.—This activity provides for grants to match on a dollar-for-dollar basis, funds made available to the State water research and development institutes to meet the necessary expenses of specific water resources research and development projects which could not otherwise be undertaken.

Water resources research and development.—This activity provides for grants to and contracts and matching or other arrangements with educational institutions, private foundations or other institutions, private firms and individuals, and with local, State, and Federal Government agencies, to undertake research directed toward finding solutions to, and mitigating, the most urgent water-related problems of concern to the Department of the Interior and the Nation.

2. *Saline water research.*—This activity provides for grants and contracts to develop processes, systems and equipment for efficient and cost-effective conversion of impaired water to water of sufficiently good quality for beneficial uses.

Saline water development.—This activity provides for grants and contracts to undertake technology development actions, directed toward assuring that the findings of original and innovative research are interpreted and developed to the stage where they can be used for practical application in resolving the most urgent and highest priority water and water-related problems. Funds for construction of two demonstration plants are included under proposed legislation.

3. *Technology transfer and information dissemination.*—This activity provides for grants and contracts to carry out an aggressive technology transfer program. The program is directed toward the transfer of all available and useful technology to user communities and maintaining a national center for collection, processing, and dissemination of information on water resources research development and demonstration. This activity also provides for the operation of a National Water Resources Scientific Information Center.

Reimbursable program.—The Office of Water Research and Technology has been requested to provide technical assistance to the State Department (AID) in

their program to assist Israel in the construction of a desalting plant. OWRT has also been requested to participate with the Joint Commission in the Middle East to provide technical assistance to Saudi Arabia. Three permanent positions have been allocated for the Israel project and five for the Joint Commission work. The work of these positions and other associated expenses are fully reimbursable.

1. *Planning and research.*—Funds are provided for: Nationwide outdoor recreation planning to assess the current supply of outdoor recreation resources and relative priorities for allocating available public resources; assistance to water quality and coastal management agencies; analyses of potential wild and scenic rivers, national trails, and wilderness; and the review and dissemination of research on factors which influence outdoor recreation demands.

2. *Federal coordination.*—Coordination of diverse Federal outdoor recreation and related programs is promoted. Reviews are made of transportation and environmental impact statements for projects which affect major public recreation resources.

3. *Technical assistance.*—Information, training, and other technical assistance is provided to Federal agencies, States, local governments, and the private sector on a variety of recreation concerns including energy conservation, handicapped access, urban opportunities, and management. Surplus Federal lands suitable for recreation purposes are identified and help is provided in the transfer of such lands for public use.

5. *Natural landmark program.*—This program finances the conduct of natural landmark studies to locate and identify natural areas of national significance: Natural areas are protected by placing them on

the national register of natural areas as national natural landmarks. The condition of national landmarks is monitored and an annual report is made to the Congress on those which are endangered.

6. *Historic preservation.*—Funds are provided for: (a) maintenance of the National Register for maintaining the official schedule and protective inventory of the Nation's historic and cultural structural heritage; (b) historic architectural and archeological services to provide technical assistance on preservation, improvement, restoration, and maintenance of cultural properties; (c) historic sites survey for thematic studies undertaken to identify nationally significant historic properties; (d) historic American buildings survey for documenting the Nation's architectural heritage; (e) historic American engineering record for identifying and documenting the engineering heritage of the Nation; and (f) archeological investigation and salvage for conducting such programs primarily in areas threatened by federally sponsored construction programs.

RESOURCE MANAGEMENT*

*See Part III for additional information.

For expenses necessary for scientific and economic studies, conservation, management, investigations, protection, and utilization of sport fishery and wildlife resources, except whales, seals, and sea lions, and for the performance of other authorized functions related to such resources; and maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge, [\$206,641,000] \$229,766,000, of which not to exceed [\$5,000,000] \$4,000,000 shall remain available until expended: *Provided*, That funds in this appropriation may be used to issue regulations that will permit modification to the habitat of a threatened or endangered species when the net effect of the modification is equal to, favorable to, and not adverse to the protection of the species. (7 U.S.C. 426, 442-5, 447-9; 16 U.S.C. 460k-460k-4, 460L4, 460L-12, 17-18, 581d, 590a-590f, 590-p-1, 661-667e, 668a-d, 668dd-ee-gg, 669-669i, 670a-b, f, 671-697a, 701-711, 715-715s, 718-718h, 721-731, 744-757, 760-760-12, 760a-760c, 777-778c, 811, 851-856, 931-939, 1008, 1051-1058, 1131-1136, 1171-2, 1182, 1221-1226, 1380, 1531-1543; 18 U.S.C. 41-44, 3054; 33 U.S.C. 610, 1155; 42 U.S.C. 1900; 43 U.S.C. 422h, 620g, 1601-1624; 87 Stat. 884; 88 Stat. 803; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

91.20	Outlays from civilian pay raise supplemental		5,307	95

* Includes capital investment as follows: 1979, \$12,547 thousand; 1980, \$10,474 thousand; 1981, \$12,800 thousand.

1. *Habitat preservation.*—The Service conducts investigations, provides technical and planning assistance, and recommends fish and wildlife conservation measures on land and water resource development projects sponsored, licensed or assisted by the Federal Government. Emphasis is on early involvement and anticipatory strategies for actions which could affect fish and wildlife resources. By avoiding ecological damage before it occurs, this activity provides a potentially cost-effective alternative to the acquisition of wetlands as new refuges to compensate for ecological damage. Research is conducted to predict and evaluate both acute and long-term effects of exposure to a broad range of environmental contaminants and other impacts on fish and wildlife resources. Recommendations based on the most environmentally acceptable means of developing land and water resources and managing multiple use conflicts are provided to decisionmakers, and specific fish and wildlife conservation needs are identified. Approaches, tools, and methodologies for evaluating habitat, assessing environmental impacts, predicting sites for development and conservation, and application of information systems are developed. Ecological information is distributed to public and private land and water resource development organizations and training is provided to fish and wildlife professionals to assist in effective resource decisionmaking.

UNITED STATES FISH AND WILDLIFE SERVICE—Continued
General and special funds—Continued

RESOURCE MANAGEMENT—Continued

HABITAT PRESERVATION RESULTS

	1979 actual	1980 estimate	1981 estimate
National pesticide monitoring sites	260	260	260
Research study plans on contaminant effects	190	190	220
Permits and license applications received	79,120	79,000	79,000
Land and water resource development investigations (permits and projects)	35,070	38,000	41,000
Environment statements and assessments reviewed	1,400	1,800	1,800
Technical assistance provided to DOI on energy-related issues	103	139	145

2. *Wildlife resources.*—The Service assists in the enhancement and management of the Nation's wildlife resources to assure that their populations are available for the use and enjoyment of the public and to minimize damage by wildlife without adversely affecting the natural resource. To carry out these responsibilities, the Service maintains an extensive national wildlife refuge and national monument system consisting of 419 units and 11 wetland management districts containing about 46.34 million acres managed for migratory birds and other wildlife for which the Federal Government has responsibility; directs and coordinates national migratory bird programs; administers certain aspects of the Marine Mammal Protection Act; enforces Federal game laws and regulations; provides technical assistance in the management of wildlife on Indian and other Federal lands; conducts research to improve wildlife management capabilities; and provides direct and extension assistance to Federal, State, Indian, and other public or private entities in the reduction of wildlife-caused damages. The Service also administers an interpretation, education, and recreation program at its refuges, fish hatcheries, and research laboratories to expand public understanding and appreciation of fish and wildlife resources. Four hundred thousand dollars is provided for Marine Mammal grants to States.

WILDLIFE RESOURCES RESULTS

Description	1979 actual	1980 estimate	1981 estimate
Service lands administered primarily for:			
Migratory birds:			
Number of areas	376	390	405
Millions of waterfowl use days	1,580	1,500	2,360
Millions of acres	15.68	15.73	15.78
Other wildlife:			
Number of areas	19	30	36
Millions of acres	28.89	28.91	28.93
Wetland management districts:			
Millions of acres	1.57	1.60	1.63
Millions of waterfowl produced	3.00	3.20	3.30
Game law violations (cases)	28,573	30,000	31,000
Wildlife refuge and fish hatchery hours of visitor use:			
Wildlife related (millions of hours)	58.3	59.7	64.3
Nonwildlife related (millions of hours)	15.3	15.0	15.0

3. *Fishery resources.*—The Service assists in the development, management, and protection of interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on Federal lands such as national forests, parks, refuges, and Indian reservations. Fish are produced at 89 hatcheries and 2 fish facilities. Five development centers and two training schools are operated to improve fish cultural technology and practices.

Research is carried out at one center, 12 major laboratories and 25 stations to improve sport fish productivity, increase hatchery efficiency, determine effects of environmental contaminants on fish, and develop methods of controlling undesirable fish. Service biologists provide Federal assistance to Indian tribes and to Federal, State and other landowners in the management of sport fisheries.

FISHERY RESOURCES RESULTS

	1979 actual	1980 estimate	1981 estimate
Production, number	175,000,000	175,300,000	175,500,000
Production, pounds	6,100,000	6,000,000	6,300,000
Angler-days	63,300,000	63,300,000	63,500,000
Research projects	280	280	320

4. *Endangered species.*—The goal of this program is to prevent species from becoming extinct and, wherever possible, to return them to the point where they are neither endangered nor threatened. The strategy consists of: (1) identification and listing of species that are endangered or threatened, (2) providing protection from taking, harassment, trade, importation and exportation, and adverse alteration of its critical habitat by a Federal action, and (3) development and implementation of recovery programs for individual species. Four million dollars is provided for the endangered species grants to States. New emphases will be provided to law enforcement and the endangered species listing processes.

5. *Administration.*—Executive direction, coordinated resource planning, and professional administrative services, including financial, personnel, and property management, are funded through this activity.

¹ Includes capital investment as follows: 1979, \$14,333 thousand; 1980, \$43,836 thousand; 1981, \$9,597 thousand.

1. **Construction and rehabilitation.**—Projects proposed for 1981 include: construction and repair of dikes and water control structures, fencing, roads, and administrative service, and public use facilities, wildlife habitat improvements within the National Wildlife Refuge System; renovation of the National Wildlife Health Laboratory building in Madison, Wis.; and pond rehabilitation and development at the National Fisheries Center, Leetown, W. Va.

2. **Anadromous fish.**—State and other non-Federal co-operators are reimbursed up to 66⅔% of the cost of projects to conserve, develop, and enhance the anadromous fishery resources of the Nation. The second year of a 3-year striped bass study will be conducted.

* Includes capital investment as follows: 1979, \$20,942 thousand; 1980, \$22,508 thousand; 1981, \$19,102 thousand.

Receipts from the sale of Federal hunting and conservation stamps are set aside in the migratory bird conservation account. Pursuant to Public Law 95-552, the price of the stamp is expected to be \$7.50 in 1981, the same amount as in 1980 and \$2.50 more than the 1979 price.

1. *Printing and sale of hunting stamps.*—The Postal Service is paid the cost of printing, selling, and accounting for migratory bird hunting and conservation stamps.

2. *Acquisition of refuges and other areas.*—Receipts in excess of Postal Service expenses are available for the costs of locating and acquiring migratory bird refuges and waterfowl production areas (WPA's).

National wildlife refuge fund.—The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the distribution of revenues from the sale of products from the Fish and Wildlife Service facilities to be allocated to counties in which the refuges are located as payments in lieu of taxes. Additionally, it provides for direct appropriations to assure that each county receives its full share under various statutory formulae.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed [209] one hundred and sixty passenger motor vehicles, of which [188] one hundred and thirty-seven are for replacement only (including [124] seventy-one for police-type use); purchase of [2] one aircraft for replacement only; not to exceed \$100,000 for payment, at the discretion of the Secretary, for information, rewards, or evidence concerning violations of laws administered by the United States Fish and Wildlife Service; miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$75,000; publication and distribution of bulletins as authorized by law (7 U.S.C. 417); insurance on official motor vehicles, aircraft and boats operated by the United States Fish and Wildlife Service in Mexico and Canada; repair of damage to public roads within and adjacent to reservation areas caused by operations of the United States Fish and Wildlife Service; options for the purchase of land at not to exceed \$1 for each option; facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purpose, and the maintenance and improvement of aquaria, buildings and other facilities under the jurisdiction of the United States Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources. (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Agriculture: Forest Service: "Forest management, protection and utilization."
Interior: Heritage Conservation and Recreation Service: "Land and Water Conservation Fund."
Energy: Power Marketing Administrations: "Operation and Maintenance, Alaska Power Administration."

1. *Federal aid in fish restoration and management.*—Assistance is given to States, Puerto Rico, Guam, the Virgin Islands, and American Samoa by the appropriation of funds equal to the revenue of the 10% excise tax on certain sport fishing tackle. States are reimbursed up to 75% of the cost of approved fish restoration and management projects, including research into fish culture, formulation of restocking plans, and acquisition and improvement of fish habitat (16 U.S.C. 777a-k).

2. *Federal aid in wildlife restoration.*—Assistance is given to States, Puerto Rico, Guam, and the Virgin Islands by the appropriation of funds equal to the 11% excise tax on sporting arms and ammunition, the 10% excise tax on handguns, and the 11% tax on certain archery equipment. States are reimbursed up to 75% of the cost of approved wildlife restoration projects, including acquisition and development of land and water areas, for wildlife management research and approved hunter education programs (16 U.S.C. 669-669i).

3. *Proceeds from sales, water resources development projects.*—Receipts collected from the sale of products from refuges on which other agencies have primary jurisdiction are used to cover expenses of producing these products and for managing wildlife habitat.

91.10 Outlays from wage-board pay raise supplemental.....	2,879	59
91.20 Outlays from civilian pay raise supplemental.....	7,369	150

^a Includes capital investment as follows: 1979, \$17,067 thousand; 1980, \$16,402 thousand; 1981, \$20,393 thousand.

1. *Park management.*—The Service administers 323 park areas comprising about 72 million acres of federally owned land located in 49 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands and the Trust Territory of the Pacific Islands. The program includes: (1) Overall management of park areas necessary to accommodate an estimated 256 million visitors in 1981; (2) maintenance of buildings and other facilities required to accommodate visitor use, as well as to protect the Government's investment; (3) interpretive programs to enhance the visitors' park experience; (4) law enforcement to protect the visitors' well-being and reduce vandalism and other destruction to park resources; and (5) resource management necessary for the

protection and preservation of the unique natural, cultural, and historical features in the National Park System.

The following tabulation shows the actual and estimated visits, and general and special fund revenues collected and to be collected by the National Park Service, including recreation fee revenues deposited to the Land and water conservation fund.

Year:	Visits	Revenues
1977 actual.....	260,120,000	\$21,251,061
1978 actual.....	271,000,000	21,507,000
1979 estimate.....	253,000,000	21,467,000
1980 estimate.....	254,450,000	21,500,000
1981 estimate.....	255,900,000	22,000,000

The major program elements comprising this activity are: Management of park areas; concessions management; interpretive services; informational publications; visitor protection and safety; maintenance; and resources management.

2. *Forest fire suppression and rehabilitation of burned areas.*—This activity provides for the suppression and emergency presuppression of fires on or endangering lands administered by the Service, and for the rehabilitation of burned areas to conserve resources, and for the protection of park visitors. The Service administers approximately 17 million acres of forest, grasslands, tundra, and desert shrub.

3. *Executive direction.*—Provides executive direction of Service programs in the Service's headquarters in Washington, D.C., and nine regional offices located throughout the Nation.

4. *Park, recreation, and wilderness planning.*—This activity provides for studies, investigation, and planning programs to support the overall direction and management of park activities. Specific programs include: New area studies; land cost studies; water resource studies; general management planning; and rivers, trails, and water resources.

6. *Statutory and contractual aid.*—The Service provides financial or other assistance in the planning, development, or operation of natural, historical, or recreation areas not operated by the National Park Service. This assistance is provided for the following sites as authorized by law or pursuant to agreements between the National Park Service and other Federal agencies, States, or private institutions: (a) Roosevelt Campobello International Park Commission, New Brunswick, Canada; (b) Ice Age National Scientific Reserve, Wisconsin; and (c) Lowell Historic Preservation Commission, Massachusetts.

¹ Includes capital investment as follows: 1979, \$52,966 thousand; 1980, \$129,086 thousand; 1981, \$46,063 thousand.

3. Construction.—Physical, real property facilities, including buildings, structures, roads, trails, utility systems, and other facilities, are needed in National Park System areas to meet the objectives of resource preservation and visitor use programs. The construction activity provides for: (1) Rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and maintenance facilities, roads, bridges, trails, and utility systems; and (3) construction of new visitor use and operational facilities where the need exists.

4. Emergency and unscheduled projects.—Minor emergency and unscheduled construction needs emerge during the fiscal year because of storms, utility system breakdown, and other unforeseen circumstances. To continue visitor services and preserve resources, minor emergency reconstruction and repair projects are performed.

5. Planning.—Under this activity, the National Park Service conducts environmental, architectural and engineering studies, as well as planning and design activities to: (1) Acquire archeological, historical, environmental, and other information necessary to design facilities; (2) provide architectural and engineering design drawings and specifications for the purpose of constructing buildings, roads, trails, utility systems, and other facilities.

Public Law 93-179 provided that the American Revolution Bicentennial Administration terminate no later than June 30, 1977. Executive Order No. 12001 transferred certain of the American Revolution Bicentennial Administration's functions and funds to the National Park Service. This account received these transfers, and now provides for continuing commemoration by the National Park Service of the events of the American Revolution.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed [216] 179 passenger motor vehicles, of which [172] 128 shall be for replacement only, including not to exceed 105 for police-type use; and to provide, notwithstanding any other provision of law, at a cost not exceeding \$100,000, transportation for children in nearby communities to and from any unit of the National Park System used in connection with organized recreation and interpretive programs of the National Park Service: *Provided*, That any funds available to the National Park Service may be used, with the approval of the Secretary, to maintain law and order in emergency and other unforeseen law enforcement situations in the National Park System; and to provide insurance on official motor vehicles and aircraft operated by the National Park Service in Mexico and Canada. (*Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

- Department of Agriculture, Forest Service: "Forest Management, Protection and Utilization."
- Department of the Interior, Heritage Conservation and Recreation Service: "Land and Water Conservation Fund."
- Department of Commerce, Regional Action Planning Commissions: "Regional Development Program."
- "Regional Action Planning Commission."
- Department of Transportation: Federal-Aid Highways "Trust Fund".

Public Law 93-87 authorized the relocation of U.S. Route 25E from its existing location through the Cumberland Gap National Historic Park to another alignment involving a 4,100 foot tunnel. This project will provide adequate traffic capacity and safety as an interstate transportation link for the States of Kentucky, Tennessee and Virginia while preserving the environmental and historical values of the park.

ENERGY AND MINERALS

GEOLOGICAL SURVEY

Federal Funds

General and special funds:

SURVEYS, INVESTIGATIONS, AND RESEARCH*

*See Part III for additional information.

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions, and other areas as authorized by law (43 U.S.C. 31, 1332, and 1340); classify lands as to mineral character and water and power resources; give engineering supervision to power permittees and Federal Energy Regulatory Commission licensees; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; control the interstate shipment of contraband oil as required by law (15 U.S.C. 715); administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate data relative to the foregoing activities; [\$452,055,000] \$481,411,000, of which [\$39,027,000] \$41,824,000 shall be available only for cooperation with States or municipalities for water resources investigations: *Provided*, That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality. (43 U.S.C. 31 a, b, 50, 1340; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

The Geological Survey provides basic scientific data concerning water, land, and mineral resources, and supervises the prospecting, development, and production

GEOLOGICAL SURVEY—Continued

General and special funds—Continued

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

of energy and mineral commodities on leased Federal, Indian, and Outer Continental Shelf lands.

2. *Topographic surveys and mapping.*—The objectives of the national mapping program are to produce and make available multipurpose maps, such as topographic, land use/land cover, and various base and special purpose maps, and basic cartographic data in printed and digital form to meet the continuing and expanding mapping needs of the Nation, to develop and maintain a modern production capability and distribution system, to coordinate the mapping activities of other Federal agencies, and to engage in research and development activities for the advancement and improved efficiency of surveying and mapping operations. In doing so, it is the goal of the Geological Survey to provide the leadership and capability in the Federal Government to satisfy the cartographic needs of the Nation for maps and related map data required as basic decisionmaking and management tools.

New standard 7.5-minute topographic mapping will be accomplished at either 1:24,000 scale or 1:25,000 scale in areas of high national priority such as public lands, energy areas, coastal zone, and coal areas. By the end of 1980, published 7.5-minute topographic maps will be available for about 75 percent of the conterminous United States, Hawaii, and outlying areas. During 1981, about 67,000 square miles of new standard quadrangle mapping will be completed over unmapped areas in the lower 48 States and Alaska. The 7.5-minute series inspection/revision program in 1980 and 1981 will total about 3200 maps each year.

Annual outputs for digitizing basic cartographic data in 1980 and 1981 will be about 3,000 DCU's. A DCU is a digital cartographic unit equal to one category of data such as terrain or boundaries on one equivalent 7.5-minute map. During 1980, a high-altitude photography (HAP) program will be initiated with 10 Federal agencies initially participating. In 1981, the program will continue with efforts to include additional Federal and State agencies which have expressed requirements for the information derived from the program.

For 1980, intermediate-scale mapping at 1:50,000 and 1:100,000 scales will be accomplished for about 135 maps in county format and about 300 maps in quadrangle format. Other small-scale and special maps will be produced for 1981 at the same level to meet the highest priority user requirements.

The National Cartographic Information Center will continue to acquire, index, and catalog information on cartographic data available from Federal, State, and private organizations and to serve as a focal point to the user public for their requests for information about those data.

3. *Geologic and mineral resource surveys and mapping.*—The continuing national program of geologic research and investigations produces: (a) New and improved methods, techniques, and instruments for mineral and energy resource assessments on land and on the submerged continental margins; (b) geologic, geophysical, and geochemical maps and analyses that show the

distribution, age, composition, structure, and physical properties of the rocks and mineral deposits at and beneath the surface of the Earth, including the Nation's continental shelves and slopes; (c) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being continually modified; (d) information on geologic hazards which affect human safety, urban development, and the engineering design of sensitive structures including nuclear reactors, offshore oil and gas platforms as well as public facilities in urban areas; and (e) data and analysis for use by other Federal and State agencies in the management of Federal lands including Federal coal leasing, wilderness studies, and multiple-use planning, and in national policy determinations including energy development and mineral resource availability. The 1981 program provides for increased coal resource investigations in support of the recent announcement to resume competitive leasing and for a decrease in geothermal investigations.

4. *Water resources investigations.*—The continuing national program of water resources investigations has the objective of seeing that the Nation's water resources are appraised and that the necessary water data to develop and manage them efficiently are available when needed. The program produces data and information relevant to the flow and sediment discharge of rivers, location and quantity of underground water, chemical quality and temperature of water, changes caused by nature and by man, availability and suitability of water for present and future demands—all of which are essential to water planning, water management, energy development, and improvement of the environment. Included in the program is research needed to increase our understanding of fundamental principles of water occurrence, movement, and interaction with its environment, and also to improve the accuracy and usefulness of water data through improvements in technology and methodology.

The 1981 program provides for increasing data collection, aquifer testing, and research on the effects of mining wastes on local water conditions in the oil shale hydrology program in support of the Nation's synfuels effort; increasing support for development of standards for the high level nuclear waste program; expanding the water-use data program in the participating 44 States and the addition of 4 States, for a total of 48 that will be providing information important for water utilization and management; determining regional quantity and quality of water supplies and water use, and assessing the national water supply and demand; and strengthening the National Water Data Exchange.

5. *Conservation of lands and minerals.*—The 1981 program provides for: (a) Classification of federally owned lands for the existence and workability of leasable mineral deposits and for sites for development of water resources, (b) evaluation, to determine the fair market value of mineral resources offered for lease by competitive bidding; and (c) regulation and supervision of mineral prospecting, development, and production operations on leased Federal, Indian, and Outer Continental Shelf (OCS) lands. In 1981, funding is provided to support the accelerated schedule of future Outer Continental Shelf sales as announced in the President's April

1979 Energy Message and for inspections and a research and development program consistent with the recent Outer Continental Shelf Lands Act amendments. Funding is increased for improved royalty collection and inspection efforts in support of onshore oil and gas leasing; for coal lease sales preparations; and for regulation of nonenergy minerals all on Federal and Indian lands. The 1981 program reflects decreases for the coal reserve inventory and Outer Continental Shelf reservoir shut in/diligence programs.

6. *Land information and analysis.*—The principal mission of this activity is to more effectively meet the Nation's rapidly increasing need for information required to facilitate land resource planning and decision-making, and to evaluate the environmental consequences of alternative land resources activities.

The specific objectives are: (a) Development and application of multidisciplinary Earth sciences and other natural science in support of land-use planning and decisionmaking, (b) preparing environmental impact statements (EIS's) and reviewing those of other agencies, to achieve NEPA compliance, and (c) collecting, processing, and distributing remotely sensed data, and to apply other aspects of space technology in support of land resources and environmental analysis; to provide training and assistance to users of these data; to perform and sponsor research projects leading to new and effective data applications; and to coordinate the activities of the Department of the Interior's activities in using and developing space related technology. The department's activities involving land-remote sensed data from space will be managed under an integrated plan, involving all Federal agencies, which is being prepared under the leadership of the Department of Commerce.

Additional funds are being provided in 1981 to contribute to the establishment and operation of an inter-agency remote sensing applications assistance facility in Anchorage, Alaska.

7. *General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support to the Bureau as a whole. This includes such essential functions as budget, program formulation and evaluation, finance, personnel, contract negotiation and administration, property management, organization and methods and management analysis. General administrative expenses of the Geological Survey are financed in part by the line item and in part by assessments on direct program funds and on funds from other Federal agencies and sundry non-Federal sources.

8. *Facilities.*—The funds included in this activity will finance the operation and maintenance costs, facilities management needs, and related special support services necessary for the operation of the National Center Headquarters Complex and major field centers.

Reimbursements from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigations (43 U.S.C. 48), proceeds from sale to the public of copies of photographs and records (43 U.S.C. 45); proceeds from sale of personal property (40 U.S.C. 481(c)); reimbursements from permittees and licensees of the Federal Energy Regulatory Commission (16 U.S.C. 797); and reimbursements from friendly coun-

tries and international organizations for technical assistance (22 U.S.C. 2357). Reimbursements from other Federal agencies (31 U.S.C. 686) are for special-purpose mapping, investigations, and computer services performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

National Petroleum Reserve in Alaska (NPRA).—The Naval Petroleum Reserves Production Act of 1976 (Public Law 94-258) transferred jurisdiction of the National Petroleum Reserve in Alaska from the Department of the Navy to the Department of the Interior on June 1, 1977. The Secretary of the Interior charged the Geological Survey with the responsibility for continuing the petroleum exploration program on the Reserve which includes the following specific tasks:

1. Explore and evaluate the petroleum resources of NPRA by means of drilling and geological and geophysical investigations in order to build an information base to assist Congress in determining the best use of the land within the Reserve.

2. Continue to develop and produce natural gas from the South Barrow gasfield or other fields as may be necessary to supply gas to the native village of Barrow and other communities and installations of the Federal Government in the vicinity of Barrow.

3. Continue environmental rehabilitation of certain areas of the reserve disturbed by previous exploration and construction activities.

The Office of National Petroleum Reserve in Alaska was established with headquarters and an operations staff in Anchorage, Alaska, an exploration strategy group located in Menlo Park, Calif., and a liaison office in Reston, Va. A total of nine exploratory wells are scheduled for completion in 1980 and one in 1981 after which the federal funded exploration program will be terminated. Funding in 1981 is for contract close-out costs. The information gathered by this program was the primary input to the resource simulation model developed by the Department of the Interior to estimate the petroleum resources of the Reserve. This resource appraisal was included in the Presidential study concerning the best overall procedures to be used in the development, production, transportation, and distribution of the petroleum resources of the Reserve. The President has recommended new legislation to open NPRA for private exploration and development of oil and gas resources. During 1980 three additional devel-

opment wells will be drilled in the East Barrow gasfield and an access road will be constructed to connect the East Barrow gasfield to the South Barrow gasfield. Natural gas will continue to be supplied to the native village of Barrow and other native communities and Federal installations at or near Point Barrow, Alaska. The environmental rehabilitation of areas within the Reserve, identified prior to 1979, that have been disturbed by previous construction and drilling activities will be completed in 1980.

Payments from proceeds, sale of water.—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229). No obligations are anticipated in 1981.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed [23] 22 passenger motor vehicles, of which [18] 19 shall be for replacement only; reimbursement to the

General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for observation wells; expenses of the U.S. National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (31 U.S.C. 638a (a) and (b); 43 U.S.C. 31, 36(b); 66 Stat. 453; P.L. 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

1. *State regulatory program grants.*—This activity includes 100% grants to the States for their incremental expenses of enforcing the interim Federal standards under the Surface Mining Control and Reclamation Act of 1977. Also includes matching grants to States for development and operation of permanent enforcement programs under the Act. The interim regulatory program and associated grants are expected to continue in effect in all of the 26 coal-producing States through the first 6 to 9 months of 1980. By early 1981, 23 States are expected to have permanent programs approved and to have received initial permanent program operations

matching grants. Approximately 6 permanent program development grants are expected to be awarded.

2. *Federal regulatory programs.*—This activity includes Federal expenses for developing and overseeing permanent regulatory programs, Federal coal mine inspection and enforcement activities, and technical assistance functions. In 1981, program emphasis will be on oversight of approved State programs, implementation of permanent Federal programs in States which do not achieve regulatory primacy, and implementation of Federal lands programs.

3. *Mineral institutes.*—This activity provides for matching general grants, research project grants, and scholarship grants to 31 designated institutes of higher education. The primary objectives of the program are to increase the national manpower pool of trained specialists in mining and minerals technologies and mined land reclamation, and to provide for solutions to technological and environmental problems encountered in mining operations through research and studies.

4. *Small operator assistance payments.*—This activity provides resources to help eligible small mine operators to offset the incremental costs of mining permit applications as required under the Surface Mining Control and Reclamation Act of 1977. The required hydrologic information and core sample analysis data may be provided for eligible operators through available Federal data banks, other Federal agencies, or by payments to laboratories performing the analysis.

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out the provisions of title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-

87, including the purchase of not more than 34 passenger motor vehicles for replacement only, to remain available until expended, [\$94,916,000] \$87,485,000 to be derived from receipts of the Abandoned Mine Reclamation Fund. (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

1. *State reclamation program grants.* —Provides for grants to States to reclaim lands damaged from past mining practices. Under the Surface Mining Control and Reclamation Act of 1977, States with approved regulatory (enforcement) programs may also have reclamation programs and annual reclamation project plans approved. Upon approval, a State is entitled to a minimum of 50% of fund revenue derived from operating mines in the State. The 1981 request is the estimated amount which States will be able to spend during the fiscal year and it assumes that 23 States will have reclamation programs approved by the end of the year.

2. *Federal reclamation program.* —This activity includes fee collection and assistance to States in developing their reclamation programs as well as abandoned lands reclamation projects undertaken by the Office of Surface Mining Reclamation and Enforcement, the Bureau of Mines, and the Soil Conservation Service (SCS). The SCS rural lands program will have reclaimed an estimated 3,500 acres by the end of 1981. The Interior program will be aimed at correcting immediate hazards to public health and safety from past mining practices. Included will be repair of impoundments, correction of subsidence problems, extinguishing waste bank fires, and sealing shafts and tunnels.

3. *Small operator assistance payments.* —The Surface Mining Control and Reclamation Act provides for financial assistance in the form of payments to qualified

laboratories to secure certain information needed by small mine operators in filing for a permit under the act. Small operators are defined as those firms or individuals engaged in the mining of coal who produce less than 100,000 tons annually from all mining locations. The 1981 program will provide assistance to approximately 454 small operators.

MINES AND MINERALS

For expenses necessary for conducting inquiries, technological investigations and research concerning the extraction, processing, use and disposal of mineral substances without objectionable social and environmental costs; to foster and encourage private enterprise in the development of mineral resources and the prevention of waste in the mining, minerals, metal and mineral reclamation industries; to inquire into the economic conditions affecting those industries; to promote health and safety in mines and the mineral industry through research; and for other related purposes as authorized by law, [\$132,753,000] \$141,538,000, of which [\$106,151,000] \$109,876,000 shall remain available until expended. (30 U.S.C. 1-11, 21a, 551-558, 571, 951; 42 U.S.C. 3251-3259; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

91.20	Outlays from civilian pay raise supplemental.....		1,983	86

Note.—Excludes \$31 thousand in 1979 for activities transferred to Salaries and expenses, Employment Standards Administration, Department of Labor.

1. *Minerals research*— (a) *Minerals health and safety technology*.— Research is conducted in all of the areas specified by the Federal Mine and Safety Health Amendments Act of 1977 (Public Law 95-164). The act authorized a research and development program that would give first priority to the health and safety of the miner through research to lower the probability of mine accidents and occupational illnesses. To meet these requirements, research is focused on a broad range of safety and engineering-related health problems in coal, metal and nonmetal mines, including respirable dust, fires and explosion prevention, industrial hygiene, radiation hazards, postdisaster survival and rescue, ground control, ventilation, noise, and systems engineering. Research develops hardware and systems to solve safety and health problems and provides basic scientific and engineering data to support the regulatory and standards setting activities of the Mine Safety and Health Administration.

An active technology-transfer program has been established to cut the 10- to 20-year "technology lag" between development and actual use of new equipment and practices. Bureau-developed technology is transferred to the minerals sector of the economy through technical publications, seminars, and meetings and through technical assistance, demonstrations, and cooperative agreements.

(b) *Minerals environmental technology*.— Research is conducted to develop the techniques and technology needed to reduce, and ultimately eliminate, the adverse environmental effects associated with mining and minerals processing activities. Environmental assessments and baseline studies include premining investigations, monitoring active mines and related waste disposal sites, developing abandoned land reclamation requirements, and investigating the extraction and processing systems which eliminate the causes of environmental problems. Research related to the environmental aspects of mining and mineral processing is conducted, including research on mine subsidence and control, waste disposal and utilization, water pollution abatement, air quality and noise control, and control of ground vibration due to mine blasting. Additional research is performed on environmental problems that occur after mining has taken place, including revegetation of land, alternative uses of land, control of water

pollution from abandoned mines, and safe mine closure methods.

(c) *Mineral resources technology*—Research is directed toward providing solutions to technological problems encountered in the development of domestic resources necessary in reducing the Nation's requirements for critical and strategic minerals. Investigations are conducted to advance mineral science and technology through the development of more economical engineering materials and techniques for beneficiation, recovery and purification of minerals and metals, and the provision of fundamental scientific data required for a comprehensive knowledge base. Research to conserve and develop domestic mineral resources includes the development of technologies that will maximize the recovery of all mineral and metal values from primary and secondary resources, and minimize the requirements for mineral materials through substitution for essential minerals, the recovery and reuse of scraps and wastes, and the recovery of mineral products from large untapped domestic resources.

2. *Minerals information*—(a) *Data collection and analysis*.—This program provides a comprehensive base of mineral information and the capability to analyze policy options and problems involving domestic and international production and consumption of minerals. Information on nonfuel minerals is collected, analyzed, and disseminated for approximately 100 commodities. This information serves as a current information base for policy decisionmakers to use in formulating national mineral policies; to assist Federal, State, and local governments in coping with mineral supply problems; and to assist the private sector in making rational mineral production, consumption, and investment decisions.

(b) *Land assessments*.—Mineral assessments are made on wilderness lands, wilderness study areas, and other public lands to provide data on mineral occurrences and potential for use in considering public land use decisions. Evaluations are being conducted on public lands that have been designated as wilderness study areas at a rate of 2.2 million acres per year in order to meet the established legislative deadlines. In addition, mineral assessments of the Forest Service's Roadless Area Review and Evaluation Study (RARE II) are jointly carried out by the Bureau and Geological Survey. Lands designated by the Forest Service in the "further planning" category are being assessed at the rate of 3 million acres per year to determine their mineral potential before final recommendations are made for wilderness or nonwilderness in 1983. Environmental and engineering investigations also are undertaken in areas affected by water resource development and other commitments of lands to single purpose use.

Drainage of anthracite mines.—Funds appropriated in 1956 (69 Stat. 460) are expended on a matched-fund basis with the Commonwealth of Pennsylvania. The funds are provided for the conservation of anthracite coal resources and the prevention of flooding and damage to surface lands or structures through flood control and anthracite mine drainage. The act of July 15, 1955, was amended by the act of October 15, 1962 (76 Stat. 934), to further provide for the filling of voids in abandoned coal mines in the interest of public health and safety.

ADMINISTRATIVE PROVISION

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided*, That the Bureau of Mines is authorized during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts. (*Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of parent appropriations as follows:
Funds appropriated to the President, "Appalachian Regional Development Program."

Public enterprise funds:

HELIUM FUND

[Contract authority for "Development and Operation of Helium Properties" provided by Public Law 87-122 for the fiscal year 1980 is rescinded in the amount of \$47,500,000.] (*50 U.S.C. 167; 74 Stat. 918; Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

The authorized purpose of the Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), is to provide for the current and foreseeable future requirements for helium for essential Government activities. The program involves the production, conservation, sale, and distribution of helium and requires significant activities in the following areas:

(a) Acquisition, construction, operation, and management of helium plants, gasfields, helium storage fields, pipelines, and fleets of helium tank cars and semi-trailers.

(b) Searching for and evaluating new sources of helium-bearing natural gas and negotiating contracts for supplies of helium-bearing natural gas.

(c) Establishing reserves of helium.

(d) Experimentation and research to discover new helium supplies and to improve methods of helium production, purification, transportation, liquefaction, storage, and utilization.

Income from helium sales, services, and rentals of containers is estimated to provide the needed funding for program needs through 1981. Revenue from helium sales, storage fees, and other income in 1981 is \$16.2 million, while expenses are \$14.7 million, leaving a net operating income of \$1.5 million.

As of September 30, 1979, the total assets of the Helium fund were \$689.6 million, \$653.4 million of which represents helium inventories. The total assets include 1.2% cash and accounts receivable, 3.0% plants and equipment, and 95.6% helium stored underground. Liabilities total \$540.1 million, of which \$521.7 million is owed to the U.S. Treasury (largely principal and accumulated interest). Legislation to cancel this debt was proposed in 1979. The Government's equity as of September 30, 1979, is \$149.0 million.

On September 30, 1981, the total assets of the Helium fund are estimated to be \$740.6 million, with \$702.0 million representing helium inventories. Total liabilities will be \$586.7 million, with \$569.3 million owed to the U.S. Treasury. The increase of \$47.6 million in the amount owed to the Treasury is accrued interest on borrowings and net worth during 1980 and 1981. The Government's equity on September 30, 1981, is estimated to be \$153.9 million.

During 1981, the Bureau of Mines will produce about 260 million cubic feet (MMcf) of high-purity helium from the Bureau's Exell and Keyes helium plants located in the Texas and Oklahoma Panhandles to meet Federal agencies' demands. This is about 20 MMcf more than projected sales for 1980. Additionally, the Bureau produces about 160 MMcf of high-purity helium for re-delivery to private companies. Privately owned helium is stored under contracts between the Bureau and 11 companies. Thus the total high-purity helium output is expected to be 420 MMcf.

Helium shipments for Bureau sales are delivered in cylinders, dewars, helium semitrailers, and in helium tank cars.

Federal agencies and their contractors will purchase approximately 182 MMcf of the Bureau-produced high-purity helium directly from the Bureau, 40 MMcf through eligible commercial distributors, and 38 MMcf through Bureau-contracted regional helium redistribution centers.

Equipment is being installed at the Exell helium plant to allow production of helium at Exell as production at the Keyes plant declines due to depletion of the Keyes gasfield. Consolidation of all gas-processing operations at the Amarillo-Exell complex is part of the planning to assure the Bureau's helium production capacity

remains sufficient to meet Federal agencies demands for helium.

The Bureau will continue its exploration and evaluation of helium-bearing gasfields of the United States during 1981. Studies of fields containing nondepleting helium reserves (which are not being produced due to low heating value) will receive priority. Nondepleting helium reserves are a vital part of the Bureau's helium resources planning because much of the larger known nondepleting helium reserves are located on Federal lands, and the Mineral Lands Leasing Act of 1920 reserves to the Government the right to extract this helium. Some fields formerly classified as nondepleting reserves are now being produced, and others, including Tip Top Field in Wyoming, are being investigated for production. Tip Top Field is estimated to contain about 45 billion cubic feet (Bcf) of helium which exceeds the 43.8 Bcf of helium now contained in the Bureau's helium conservation and storage system. The Bureau will also continue to update and to improve its technical capabilities with regard to helium extraction, purification, and distribution.

Legislation has been transmitted to the Congress to cancel the Helium Fund debt, to terminate the fund, and to authorize direct appropriations for program operations. Because elimination of the fund debt recognizes the fact that the helium program cannot achieve self-financing status, it is inappropriate to continue to fund the program through the mechanism of a public enterprise revolving fund. The legislation also cancels \$47.5 million in contract authority which becomes available annually for the purchase of helium, because Government purchases of helium have been terminated and no resumption of purchasing is currently planned.

Operation of Indian programs.....	691,553	699,061	728,502

¹ Includes capital investment as follows: 1979, \$24,893 thousand; 1980, \$18,500 thousand; 1981, \$18,500 thousand.

1. **Education.**—The Bureau of Indian Affairs provides a variety of support for the education of Indian children through direct operation of schools, support of tribally operated schools, and financial assistance to public schools serving Indian children. The number of children attending Federal, tribal, and public schools is shown below:

Number of pupils:	1979 actual	1980 estimate	1981 estimate
Federal and tribal schools.....	43,784	45,777	45,777
Public schools.....	180,000	182,000	182,000

The Bureau also assists Indian adults by providing financial assistance to students for higher education studies, by direct support of some tribally operated post-secondary institutions, and by offering continuing education programs in many communities. The number of participants in these programs is indicated in the following table:

Continuing education participants:	1979 actual	1980 estimate	1981 estimate
Higher education scholarships.....	21,000	22,000	23,430
Adult education enrollments.....	18,350	18,500	18,500

2. **Indian services.**—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects. Also, the activities associated with the Navajo-Hopi settlement are included. Data are presented below on selected aspects of this activity.

Social service caseloads:	1979 actual	1980 estimate	1981 estimate
General assistance.....	61,500	58,100	58,100
Child welfare.....	3,300	3,300	3,300
Families receiving services.....	15,775	15,775	15,775
Family houses started:			
New.....	530	445	395
Rehabilitation.....	2,890	2,360	2,600
HUD-assisted.....	4,600	5,000	5,000

3. **Economic development and employment program.**—This activity is designed to stimulate reservation economies, and to help Indian people participate fully in those economies.

Business enterprise development is encouraged and assisted through programs of technical and financial aid, with emphasis on enterprises owned and operated by Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans for resource and business enterprise development, housing, public utility facilities, education, and other purposes. Individual Indians are assisted in qualifying for, finding and occupying jobs on and near reservations consistent with their needs, capabilities, and desires. Roads are maintained to provide for the movement of people and goods as needed for the well-being of the community.

4. **Natural resources development.**—This activity is designed to provide for the conservation, development and utilization of Indian land, water, and related resources. Resources are surveyed and inventoried, and agriculture and forestry development is assisted.

5. **Trust responsibilities.**—Under this activity the Bureau's trust responsibilities toward the Indian people are carried out. This entails the protection of Indian rights and property, particularly those related to land and natural resources, and the management of assets held in trust for Indian tribes and individuals.

6. **General management and facilities operation.**—This program provides for the general management functions and for the maintenance and operation of facilities which support the Bureau's programs. These functions include executive direction; administrative services; safety management; operation and maintenance of Bureau facilities; and provision for GSA owned or leased facilities.

The planned distribution of program costs requested in 1981 as compared to funds for 1979 and 1980 follows, (in thousands of dollars):

Direct program:	1979 actual	1980 estimate	1981 estimate
1. Tribe/agency operations.....	215,236	258,481	274,088
2. Area office operations.....	36,149	44,376	43,680
3. Central office staff operations.....	22,901	24,611	25,010
4. Field program operations.....	408,417	474,427	480,512
Total direct program.....	682,703	801,895	823,290

BUREAU OF INDIAN AFFAIRS—Continued
General and special funds—Continued
OPERATION OF INDIAN PROGRAMS—Continued

	1979 actual	1980 estimate	1981 estimate
Reimbursable program (total)	12,698	36,220	36,220
Total program.....	695,401	838,115	859,510

Tribe/agency operations are primarily programs in which tribes formally participate in setting funding priorities. Tribe/agency programs include housing, law enforcement, economic and natural resources development, and other activities similar to those conducted by a State or local government.

Central and area office staff operations represent funding for program management and executive direction.

Field program operations support those national programs, such as education, facilities management, rights protection and welfare, which are the unique responsibility of the Bureau because of its special relationship to Indians and Indian Tribes.

1. *Buildings and utilities.*—This activity consists of construction and additions to Bureau facilities including: funds for construction of new schools at Turtle Mountain, N. Dak., Red Rock, Ariz., and Torreon, N. Mex., totaling \$19,477,000; continued funding for a major initiative begun in 1979 to improve management of existing facilities through a more effective rehabilitation program which includes major repair and alterations of existing buildings and utilities as well as improvement of sewer and water systems; funds for preparation of plans, engineering supervision, and surveys; and contracting with any State education agency or school district to provide facilities in school districts on or adjacent to any Indian reservation or other lands held in trust by the United States if such facilities are necessary for the education of Indians residing on any such reservation or lands.

2. *Irrigation systems.*—This activity provides for the construction, extension, and rehabilitation of irrigation projects and related power systems on Indian reservations. For 1981, funding is included for the Navajo

Indian Irrigation Project (New Mexico); the Fallon Irrigation Project (Nevada) as authorized by Public Law 95-337; the Ak Chin Irrigation Project (Arizona) as authorized by Public Law 95-328; and \$14,000,000 for construction of other irrigation projects on selected Indian reservations.

Indian road system.—The proposed program is designed to serve the Indian people and to assist the social and economic development of Indian communities through more efficient movement of people and goods. The demand for roads is derived from present and prospective needs of the community.

Under this activity, the Bureau is responsible for construction and improvement of about 26,000 miles of roads and 730 bridges. The proposed program in 1981 will provide for: investigations and planning, 395 miles; roads to be constructed, 349 miles; and bridge construction and replacement, 1,780 linear feet.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans) shall be available for expenses of exhibits; purchase of not to exceed [225] 115 passenger carrying motor vehicles of which [122] 75 shall be for replacement only, which may be used for the transportation of Indians; advance payments for services (including services which may extend beyond the current fiscal year) under contracts executed pursuant to the Act of June 4, 1936 (25 U.S.C. 452), the Act of August 3, 1956 (25 U.S.C. 309), and legislation terminating Federal supervision over certain Indian tribes; and expenses required by continuing or permanent treaty provisions[: *Provided*, That no part of any appropriations to the Bureau of Indian Affairs shall be available to continue academic and residential programs of the Chilocco and Seneca boarding schools, Oklahoma beyond June 15, 1980]. *Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*

MISCELLANEOUS PERMANENT APPROPRIATIONS

ALASKA NATIVE FUND

For transfer to the Alaska Native Fund, in the fourth quarter of fiscal year [1980] 1981, to provide for settlement of certain land claims by Natives and Native groups of Alaska, and for other purposes, based on aboriginal land claims, as authorized by the Act of December 18, 1971 (Public Law 92-203), \$30,000,000: *Provided*, That for purposes of meeting its obligation under section 6(a)(3) and section 9 of the Alaska Native Claims Settlement Act in connection with the requirement that \$500,000,000 be paid into the Alaska Native Fund, any and all revenues paid into such fund by the State of Alaska from sources other than those specified in section 9 of such Act shall, notwithstanding any other provision of law, be construed as payments by the State of Alaska to the Fund within the meaning of sections 6(a)(3) and 9 of the Alaska Native Claims Settlement Act and credited toward the \$500,000,000 to be deposited in the Alaska Native Fund under such sections. *(Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)*

1. *Alaska Native fund.*—Payments are made to Natives and Native groups of Alaska for settlement of certain land claims and for other purposes, as authorized by Public Law 92-203, December 18, 1971. This is the final payment authorized to be appropriated under section 6(a)(1) of Public Law 92-203 (\$462,500,000).

2. *Claims and treaty obligations.*—Payments are made to fulfill treaty obligations with the Senecas of New York (act of February 19, 1831), the Six Nations of New York (act of November 11, 1794), and the Pawnees of Oklahoma (the treaty of September 24, 1857); and benefit claims to the Sioux Indians (acts of March 2, 1889, June 10, 1896, and June 21, 1906).

3. *Operation and maintenance, Indian irrigation systems.*—Revenues derived from charges for operation and maintenance of Indian irrigation projects are used to defray in part the cost of operating and maintaining these projects (60 Stat. 895).

4. *Power systems, Indian irrigation projects.*—Revenues collected from the sale of electric power by the Colorado River, Flathead, and San Carlos power systems are used to operate and maintain these systems (60 Stat. 895; 65 Stat. 254).

This fund, established by the Indian Financing Act of 1974, provides a source of financing for Indians who cannot borrow from other Government credit agencies or from ordinary commercial lenders because of their low economic status, isolated geographic location, lack

of bankable security, or other reasons. Loans are made to tribes and other Indian organizations for relending to individual members and groups of members, and to finance tribal business enterprises. Loans are also made to tribes for use by them in obtaining expert assistance to prepare and argue claims pending before the Court of Claims. Direct loans are made for any purpose that will promote the economic development of the borrower, including loans for educational purposes.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

2900 Outstanding, end of year.....			5,000

Funds would be provided to begin capitalization of a proposed \$15,000,000 revolving loan fund for the Indian Fisheries Development program, which is part of the Administration's Northwest Fisheries proposal. This revolving loan fund would help treaty tribe fishermen gear up to catch a fair share of the salmon and steelhead resources in the State of Washington.

LIQUIDATION OF HOONAH HOUSING PROJECT REVOLVING FUND

2900	Outstanding, end of year	110	90	90

This fund was transferred from the Housing and Home Finance Agency to the Secretary of the Interior under the provisions of Public Law 85-806. The Secretary will use the funds transferred from the Housing and Home Finance Agency, along with any other revenues that may be received from the Hoonah housing project, for the purpose of liquidating this project in accordance with the provisions of the law. All outstanding loans are expected to be liquidated in 1980.

Funding for these programs in 1980 and 1981 is included under the "Operation of Indian Programs" appropriation as reimbursable items.

The Bureau operates some programs in Indian communities which are funded by other Federal agencies, programs which are similar to those operated by State and local governments from Federal grants-in-aid. This account is used as the mechanism for receiving and disbursing such Federal funding.

TERRITORIAL AFFAIRS

OFFICE OF TERRITORIAL AFFAIRS

The Secretary of the Interior is charged with the responsibility of promoting the economic and political development of those territories and the Trust Territory which are under U.S. jurisdiction and within the responsibility of the Interior Department. He originates and implements Federal policy, guides and coordinates certain operating programs, provides information and services, and participates in foreign policy and defense matters concerning the territories and the Trust Territory.

Federal Funds

General and special funds:

ADMINISTRATION OF TERRITORIES*

*See Part III for additional information.

For expenses necessary for the administration of Territories under the jurisdiction of the Department of the Interior, [\$86,661,000] \$81,384,000, of which (1) not to exceed [\$82,589,000] \$77,100,000 shall be available for grants to the judiciary in American Samoa for compensation and expenses, as authorized by law (48 U.S.C. 1661(c)); grants to American Samoa, in addition to current local revenues, for support of governmental functions; grants to Guam, as authorized by law (48 U.S.C. 1428-1428e; Public Law 95-134; 91 Stat. 1161, 1162, 1163; Public Law 95-348; 92 Stat. 487, 488); grants to the Government of the Virgin Islands as authorized by law (Public Law 95-348, 92 Stat. 490); expenses of the Northern Mariana Islands Federal Laws Commission as authorized by law (Public Law 94-241, 90 Stat. 268); direct grants to the Government of the Northern Mariana Islands as authorized by law (Public Law 94-241, 90 Stat. 272), to remain available until expended; and (2) not to exceed [\$4,072,000] \$4,284,000 shall be available for expenses of the offices of the Government Comptroller for the Virgin Islands, the Government Comptroller of Guam, Trust Territory of the Pacific Islands, and the Northern Mariana Islands as authorized by law (Public Law 95-134; 91 Stat. 1161, 1162), and the Government Comptroller for American Samoa, and for salaries and expenses of the Office of Territorial Affairs: *Provided*, That the Territorial and local governments herein provided for are authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the administration of Territories may be expended for the purchase, charter, maintenance, and operation of surface vessels for official purposes and for commercial transportation purposes found by the Secretary to be necessary: *Provided further*, That all financial transactions of the Territorial and local governments herein provided for, including such transactions of all agencies or instrumentalities established or utilized by such governments, shall be audited by the General Accounting Office, in accordance with the provisions of the Budget and Accounting Act, 1921 (42 Stat. 23) as amended, and the Accounting and Auditing Act of 1950 (64 Stat. 834): *Provided further*, That of the grants to the Government of the Virgin Islands appropriated herein, \$10,000,000 shall become available for obligation only in such amounts as may be equal to funds provided by the Government of the Virgin Islands when the Government Comptroller of the Virgin Islands shall certify that such funds are revenues of the Government of the Virgin Islands from new taxes or increased tax rates enacted subsequent to June 12, 1979]. (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

4900	57,558	66,558	29,058	Outstanding, end of year.....

In an effort to reduce territorial dependence on the Federal Government, and encourage the territories to prioritize their construction requests, the 1981 budget proposes a 90%/10% Federal-territorial cost-sharing for capital projects in the U.S. territories funded by the Office of Territorial Affairs. In the past these projects were generally 100% federally funded.

Specifically, the 1981 budget request for the U.S. territories includes a request for grant funds in the amount of \$17.6 million for the operations of the government of American Samoa. The most significant programs in 1981 include those for education, medical services, and public works. Also requested is \$7.7 million in grants for construction projects, and \$0.5 million in grants for the economic development loan fund in American Samoa.

The appropriation request also includes \$0.5 million for economic development for Guam as authorized in Public Law 95-134. The Guam construction request of \$12.0 million would provide for the construction of various public works projects.

The request funds operations of the Federal Comptroller's Offices in Guam, the Trust Territory and the Northern Mariana Islands, the Virgin Islands, and American Samoa as provided for in Public Law 95-134 and Secretarial Order 3009.

Included in the request is \$18.4 million for the construction of health facilities in the Virgin Islands.

Under the provisions of the Covenant to Establish a Commonwealth of the Northern Mariana Islands direct grants funds of \$20.4 million are requested for governmental operations, construction, and economic development.

In addition, the request provides for the salaries and expenses of the Office of Territorial Affairs.

ADMINISTRATION OF TERRITORIES

(Proposed for later transmittal, proposed legislation)

Program and Financing (on thousands of dollars)

Identification code	14-0412-2-1-806	1979 actual	1980 est.	1981 est.
Program by activities:				
10.00	Federal match of local tax increases by territorial governments (costs—obligations) (object class 41.0).....			22,000
Financing:				
40.00	Budget authority (appropriation).....			22,000
Relation of obligations to outlays:				
71.00	Obligations incurred, net.....			22,000
90.00	Outlays.....			22,000

Funds provided would be used as a 50% match of increased local territorial tax collections over a specified base. The proposed matching provision is intended to provide a necessary incentive for the territorial governments to increase local taxes, thereby more fully supporting local governmental services through local contributions. Authorizing legislation is proposed for this program.

TRUST TERRITORY OF THE PACIFIC ISLANDS*

*See Part III for additional information.

For expenses necessary for the Department of the Interior in administration of the Trust Territory of the Pacific Islands pursuant to the Trusteeship Agreement approved by joint resolution of July 18, 1947 (61 Stat. 397), and the Act of June 30, 1954 (68 Stat. 330), as amended (90 Stat. 299; 91 Stat. 1159; 92 Stat. 495), grants for the expenses of the High Commissioner of the Trust Territory of the Pacific Islands; grants for the compensation and expenses of the Judiciary of the Trust Territory of the Pacific Islands; grants to the Trust Territory of the Pacific Islands in addition to local revenues, for support of governmental functions; [\$113,785,000, and of the amount appropriated under this head in Public Law 95-355, \$1,400,000 shall be for an ex gratia payment to the people of Bikini Atoll, to remain available until expended] \$79,459,000: *Provided*, That all financial transactions of the Trust Territory, including such transactions of all agencies or instrumentalities established or utilized by such Trust Territory, shall be audited by the General Accounting Office in accordance with the provisions of the Budget and Accounting Act, 1921 (42 Stat. 23), as amended, and the Accounting and Auditing Act of 1950 (64 Stat. 834): *Provided further*, That the government of the Trust Territory of the Pacific Islands is authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the administration of the Trust Territory of the Pacific Islands may be expended for the purchase, charter, maintenance, and operation of surface vessels for official purposes and for commercial transportation purposes found by the Secretary to be necessary in carrying out the provisions of article 6(2) of the Trusteeship Agreement approved by Congress. (*Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.*)

Under the terms of the Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The Trust Territory, with a population of about 120,000 persons, comprises 2,125 islands scattered over 3 million square miles of ocean in two major archipelagos: the Caroline and Marshall Islands. The land area totals 516 square miles.

Secretarial Order 3039 of April 1979 provided recognition of governmental entities under locally ratified constitutions in the Trust Territory. The purpose of the order is to provide the maximum permissible amount of self-government, consistent with the responsibilities of the Secretary under Executive Order 11021, for the Federated States of Micronesia, the Marshall Islands, and Palau, pursuant to their respective constitutions as and when framed, adopted and ratified, pending termination of the Trusteeship Agreement.

4. *Grants.*—The cost of operating the new governments of the Trust Territory is provided by Federal grant appropriations and local revenue. The main activities funded will be (1) grants for capital improvements projects, which complete a 5-year CIP initiative, and (2) operational grants for the Trust Territory headquarters and for the governments of the Marshalls, Palau, and the Federated States.

10. *Rongelap and Utirik compensation.*—This request will provide additional funds as authorized in Public Law 95-134 to compensate the residents of Rongelap and Utirik Atolls who have sustained certain radiation-related illnesses as a result of radiation exposure from a thermonuclear detonation at Bikini Atoll in March 1954.

12. *Kwajalein Atoll development.*—This request will provide construction funding for development and rehabilitation of the Kwajalein Atoll in the Marshall Islands.

13. *Transition funding.*—These funds will provide for the transition of Trust Territory government functions to the three new government entities.

14. *Communications upgrade.*—These funds will provide necessary equipment for outer island areas—the second and final increment of an overall communication system upgrading in the Trust Territory.

Budget authority for 1980 and 1981 is distributed as follows (in thousands of dollars):

Grants:	1980 estimate	1981 estimate
(a) Operations:		
Trust Territory, headquarters	14,859	6,328
Marshall Islands government	6,726	8,596
Palau Islands government	6,142	7,606
Federated States of Micronesia	19,686	25,645

Public Law 95-348 changed the way in which certain revenues collected by the Internal Revenue Service are made available to Guam and the Virgin Islands. Funds previously collected and paid on a quarterly basis are now to be paid prior to the start of the fiscal year of collection. Transactions involving these funds, which consist of income taxes withheld and excise taxes, have previously been displayed in the special fund accounts, "Internal Revenue collections for Guam," and "Internal Revenue Collections for the Virgin Islands." Beginning in fiscal year 1980 these advance payments will be presented in this new general fund account. A double payment is necessary in 1980 to cover both the 1980 and 1981 prepayments. The 1981 funding is for the 1982 prepayment.

Note.—1980 and 1981 reimbursable program includes amounts for reimbursable work funded through the Consolidated Working Fund.

1. *Departmental direction.*—The Office of the Secretary and the Office of Public Affairs provide top departmental direction and contact with the public. The Office for Equal Opportunity administers the Department's responsibilities in equal opportunity programs. Other secretarial offices provide coordination of correspondence, legislation, congressional liaison, and minority procurement programs.

2. *Program direction and coordination.*—Four Assistant Secretaries advise and assist the Secretary on matters of policy for promoting the domestic welfare and the conservation and development of the country's resources, and Indian affairs.

3. *Policy, budget and administration.*—Under the direction of the Assistant Secretary, implementation of program and budget policy, economic analysis, environmental review, Outer Continental Shelf liaison, financial management, management improvement, property management, personnel, administrative services, and security operations are carried on.

4. *Hearings and appeals.*—Provides the quasi-judicial and appellate responsibilities of the Department of the Interior. Administrative law judges and formal boards of appeals render decisions in cases pertaining to: (a) contract disputes; (b) Indian probate matters; (c) public and acquired lands and their resources; (d) submerged offshore lands of the Outer Continental Shelf; (e) surface mining; (f) personnel grievances; (g) environmental impacts; (h) enforcement of the importation and transportation of rare and endangered species; (i) environ-

OFFICE OF THE SECRETARY—Continued

General and special funds—Continued

mental quality; (j) uniform relocation assistance and real property appeals; and (k) Alaska Native claims appeals.

5. *Library and information services.*—Provides library services and information necessary to the Department, and includes the Washington headquarters and over 400 field libraries.

6. *Minerals policy and research analysis.*—Provides a focal point for the Federal minerals policy development program. The Office has responsibility for minerals policy analysis, conservation, and related research and development program planning.

7. *Aircraft services.*—Provides Departmental policy and procedures governing aviation program, aviation safety, contracting, and technical services.

8. *National Mine Health and Safety Academy.*—The Academy was transferred to the Department of Labor on July 25, 1979 pursuant to Public Law 96-38.

9. *Endangered Species Review Committee.*—The Endangered Species Act Amendments of 1978 (Public Law 95-632) established an Endangered Species Committee to review those cases that would not be settled through the section 7 consultation process, and determine whether or not to grant an exemption to the act. The Committee is composed of seven members with the Secretary of the Interior as Chairman.

The act also provides for the establishment of a review board for each application for exemption. The review board examines the request for exemption and submits a report to the Committee.

10. *Inspector General.*—Public Law 95-452, dated October 12, 1978, established the Office of the Inspector General. The mission of the office includes the auditing and investigating of departmental activities, providing leadership and recommending policies to promote economy and efficiency, the prevention and detection of fraud and abuse, and keeping the Secretary informed of problems and deficiencies of departmental programs and operations. The 1981 request includes amounts previously funded through the reimbursable program for departmental audits that are now proposed for direct appropriation.

11. *Construction management.*—The Facility Construction and Operation Improvement Office assists the bureaus and offices of the Department in improving their performance in planning, designing, constructing and operating facilities.

12. *Central services.*—This activity provides general administrative expenses; space, postage, employee compensation payments, etc. to the offices financed by this appropriation and Senior Executive Service bonuses for the Department.

Under this program, the Department provides leadership and support in the conduct of selected research projects carried out by foreign nations. Payments are made in foreign currencies which the Treasury determines to be excess to normal requirements of the United States. Programs conducted are primarily of benefit to foreign national parks and endangered species programs. The Department is not requesting funding for this program in 1981 due to unexpected delays in the obligation of funds by the foreign countries during the past years. Every effort will be made in 1980 and 1981 to obligate all funds currently available.

ADMINISTRATIVE PROVISIONS

There is hereby authorized for acquisition, from available resources within the Working Capital Fund, two aircraft for replacement only, both of which shall be from surplus.

Intragovernmental funds:

WORKING CAPITAL FUND

This fund finances central reproduction, communication, supplies, health services, ADP, and other such services which may be performed advantageously on a reimbursable basis (43 U.S.C. 1467). Activities conducted are those which can be performed by the Office of the Secretary and which benefit all Bureaus within the Department. The Bureaus are billed for the cost of these centrally performed services. Amounts for 1980 and 1981 exclude funds and positions for the Washington Computer Center, which was transferred to the U.S. Geological Survey on November 4, 1979. The capital

consists of \$300 thousand appropriated, donated assets of \$169 thousand, and retained earnings of \$2,972 thousand.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Department of Agriculture, Forest Service:

"Forest Management, Protection and Utilization"; "Youth Conservation Corps."

Department of Labor:

Employment and Training Administration, "Employment and training and assistance."

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

Sec. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

Sec. 102. The Secretary may authorize the expenditure or transfer of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior and for the emergency rehabilitation of burned-over lands under its jurisdiction, and for emergency reclamation projects under section 410 of Public Law 95-87: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That no appropriations made in this title shall be available for acquisition of automatic data processing equipment, software, or services in excess of \$1,000,000 systems life cost, without prior approval of the Secretary.

Sec. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered

to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

Sec. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

Sec. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

[Sec. 106. In addition to the aircraft specifically authorized under this Act there is hereby authorized for acquisition 2 aircraft for replacement only, both of which shall be from surplus.]

Sec. [107] 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

Sec. 107. *The Secretary's authority to enter into contracts and agreements in any fiscal year pursuant to the Department of the Interior and Related Agencies Appropriations Act of 1962 for the development and operation of helium properties is terminated.*

Sec. 108. [No appropriations made in this title shall be available for implementation of any decision with regard to any lease, administrative transfer, or withdrawal not now existing of lands and waters comprising Wild Horse Reservoir, Nevada, or any lands immediately adjacent thereto: *Provided*, That this limitation is not applicable to water necessary for current or future irrigation practices.] *Appropriations made in this title shall be available for expenditure or transfer, with the approval of the Secretary, for funding the Merit Pay System, as authorized by the Civil Service Reform Act of 1978, Public Law 95-454, (5 U.S.C. 5401).*

Sec. 109. [No appropriations made in this title shall be available for the identification of lands not now so identified or acquisition (by withdrawal, transfer or purchase) of lands for or associated with the Unique Wildlife Ecosystem Program as now defined by the United States Fish and Wildlife Service not authorized by law under an existing program.] *The Secretary may transfer funds provided by appropriation in this title to the "Regulation and Technology" appropriation of the Office of Surface Mining Reclamation and Enforcement to the extent necessary for the implementation of Federal regulatory programs in States which do not achieve regulatory primacy under provisions of the Surface Mining Control and Reclamation Act of 1977.*

TITLE III—GENERAL PROVISIONS

Sec. 301. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

Sec. 302. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.

[Sec. 303. None of the funds appropriated under this Act shall be available to implement any amendment to, or provision of, the regulation under section 4(a) of the Emergency Petroleum Allocation Act of 1973 providing for an increase or decrease in any month beginning after the date of the enactment of this Act in the ratio of the number

of entitlements issued any firm with respect to any imported refined petroleum product to the number of barrels of such product imported by such firm in such month above the ratio in effect on April 30, 1979 unless the President has transmitted such, amendment or provision to the Congress as an "energy action" under section 551 of the Energy Policy and Conservation Act (Public Law 94-163) and neither House of Congress has disapproved (or both Houses have approved) such request in accordance with the procedures specified in such section 551 of such Act.]

SEC. [304] 303. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete, in accordance with 18 U.S.C. 1913.

[SEC. 305. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.]

SEC. [306] 304. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [307] 305. Notwithstanding the provisions of any other law, appropriations in this Act or any other Act may be used to contract with private firms to provide plant care or watering services except for indoor office plants.

[SEC. 308. Notwithstanding the provisions of any other law, the State of Alaska is exempted from application of the provisions of section 7(i) of the Export Administration Act of 1979 (Public Law 96-72).]

[SEC. 309. No funds appropriated by this Act in excess of \$240,000 shall be available for the legal representation of the Pueblos of Nambe, Tesuque, San Ildefonso, and Pojoaque, as plaintiffs-in-intervention, in connection with the suit State of New Mexico v. Aamodt, U.S. District Court No. 6639.] (Public Law 96-126, making appropriations for the Department of the Interior and related agencies, 1980.)

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 301. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of

the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 302. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 303. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency, or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 304. Appropriations in this title shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

[SEC. 305. Notwithstanding the provisions of the Act of October 1, 1962 (76 Stat. 677), the Secretary of the Interior, in the development of the irrigation lands located in block 26 of the Columbia Basin project, Washington, shall take such action as may be necessary to assure that the per acre repayment obligation shall be the same as those set forth in repayment contract 11 R 1444, dated October 9, 1945, as amended, between the United States of America and the South Columbia Basin Irrigation District, but in no case shall such per acre repayment obligation exceed \$131.60.]

SEC. 305. Appropriations made in this title shall be available for expenditure or transfer, with the approval of the Secretary, for funding the Merit Pay System, as authorized by the Civil Service Reform Act of 1978, Public Law 95-454 (5 U.S.C. 5401). (Energy and Water Development Appropriation Act, 1980.)

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the administration of the Department of Justice, **[\$32,500,000]** *\$32,152,000*, of which **[\$1,700,000]** *\$2,190,000*, to remain available until expended, is for the Federal justice research program; *Provided*, That the Attorney General has the authority to make such provisions as are necessary and appropriate for the efficient and effective administration of funds included herein for State and local drug strike forces]. (5 U.S.C. 3101; 8 U.S.C. 1103 (a); 28 U.S.C. 503, 504, 507-526, 1929; Department of Justice Appropriation Act, 1980.)

¹ Includes capital investment as follows: 1979, \$364 thousand; 1980, \$287 thousand; 1981, \$468 thousand.

1. Program direction and policy coordination.—The Attorney General, aided by the Deputy Attorney General and Associate Attorney General, directs and supervises the programs and activities of the Department. Included in this activity are the Offices of the Attorney General, the Deputy Attorney General, the Associate Attorney General, Intelligence Policy and Review, Professional Responsibility, Improvements in the Administration of Justice, Public Information, Legislative Af-

fairs, Information Law and Policy, and the Justice Management Division.

2. U.S. Parole Commission.—Beginning in 1980, the U.S. Parole Commission was funded under a separate appropriation.

3. Administrative review and appeals.—This activity includes the Office of the Pardon Attorney and the Board of Immigration Appeals. The Pardon Attorney receives and reviews all petitions for clemency. The Board of Immigration Appeals reviews appeals from certain Immigration and Naturalization Service decisions in a variety of proceedings involving aliens, citizens, or business firms. Workload for the activity follows:

PARDON ATTORNEY

Cases:	1978 actual	1979 actual	1980 estimate	1981 estimate

The United States Parole Commission makes decisions relative to the grant or denial of parole, sets conditions of parole, supervises parolees and mandatory releasees, recommitts parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976. A major Parole Commission program is the establishment and application of guidelines and rules for parole decisionmaking so that the duration of terms of imprisonment throughout the Federal system will be equitable.

In 1981, this program is expected to meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the conduct of an ongoing research program, the administration of the Commission's responsibilities under the labor and pension laws and response to Freedom of Information and Privacy Act requests is to be carried out under this program.

Workload for this appropriation is as follows:

91.20	Outlays from civilian pay raise supplemental		97	7

Distribution of outlays, by account:

Salaries and expenses, general legal activities	91,274	108,578	153,390
Salaries and expenses, Antitrust Division	42,098	45,019	5,633

*Includes capital investment as follows: 1979, \$1,577 thousand; 1980, \$2,279 thousand; 1981, \$1,861 thousand.

The following legal activities of the Department are financed from this appropriation:

1. *Conduct of Supreme Court proceedings and review of appellate matters.*—This program consists of supervising and controlling all appellate matters and representing the Government before the U.S. Supreme Court.

Pending, end of year.....	26,453	22,077	23,809	26,731

¹ Excludes customs cases.

* Adjustment in case inventory.

5. *Land, natural resources, and Indian matters.*—Under this program all civil suits and matters relating to title, possession, and use of Federal land and natural resources are handled, as well as civil litigation involving Indians and Indian affairs in which the United States is interested. Criminal and civil prosecutions for Federal air and water pollution violations are also included. In 1981 program increases are requested for improved litigation management and the implementation of a case management system.

WORKLOAD

Pending, end of year.....	18,435	21,187	20,287	17,487

6. *Legal opinions.*—Opinions are prepared for the President and executive agencies, and proposed Executive orders and proclamations are reviewed as to form and legality. In 1981 program increases are requested to automate all legal opinions.

WORKLOAD

	1978 actual	1979 actual	1980 estimate	1981 estimate
Executive orders and proclamations.....	150	150	155	155
Opinions.....	410	444	484	500
Intradepartmental opinions.....	750	810	891	900
Special assignments.....	2,650	2,700	2,750	2,750

7. *Civil rights matters.*—Within this program, cases and matters involving the civil rights of persons within the jurisdiction of the United States are handled. In 1981 program increases are requested to expand guidance provided to Federal agencies subject to title VI of the Civil Rights Act of 1964 and Executive Order 11764;

for increased investigation and prosecution of violations of criminal civil rights statutes and for administrative services.

WORKLOAD

	1978 actual	1979 actual	1980 estimate	1981 estimate
Cases:				
Pending, beginning of year.....	926	981	1,011	1,033

Pending, end of year.....	3,486	4,864	5,926	6,762

8. *Enforcement of antitrust, consumer protection and kindred laws.*—This division administers and enforces the antitrust, consumer protection, and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act, which prohibits combinations and conspiracies among competitors to set prices collusively or otherwise to restrain trade; (2) section 2 of the Sherman Act, which prohibits combinations and attempts to monopolize interstate trade; (3) section 7 of the Clayton Act, which prohibits corporate mergers and acquisitions that tend to lessen competition substantially or tend to monopolize; and (4) various statutory provisions that require regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts and the maintenance of competitive conditions. In 1981 program increases are requested for document processing and consolidation of division personnel in a central location. In 1980 this activity was appropriated separately under "Salaries and expenses, Antitrust Division."

¹ Includes capital investment as follows: 1979, \$2,160 thousand; 1980, \$3,697 thousand; 1981, \$3,432 thousand.

The Government is represented in each of the 95 judicial districts by a U.S. attorney and a U.S. marshal.

1. *U.S. attorneys.*—The U.S. attorney is responsible for the prosecution of criminal offenses against the United States, the representation of the Government in all civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The 1981 program increase provides resources for reduction in lapse, instruction of departmental attorneys in advocacy skills and ADP systems and personnel to support improved litigation management.

2. *Bankruptcy matters.*—The Bankruptcy Reform Act of 1978, Public Law 95-598, established trustees to perform the supervisory and appointing functions now handled by bankruptcy judges, and to monitor private trustee performance. The 1981 request will provide additional resources to aid the trustees in the 18 judicial districts.

3. *U.S. marshals.*—The U.S. marshal has custody of all unsentenced Federal offenders until released by the courts or confined in prison, acts as agent of the courts in the service of process and execution of warrants, and provides protective services to the courts and to key Government witnesses in his district. The 1981 program increase will provide resources for the witness security program and the execution of Federal warrants.

The following table shows actual and estimated workloads:

The U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. An average of 4,500 prisoners will be boarded in approximately 850 jails at an average cost of \$18.78 per offender day in 1981.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice has little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

1. *Fact witnesses.*—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

2. *Protection of witnesses.*—The U.S. Marshals Service is responsible for the protection of witnesses and their dependents; subsistence costs of protected witnesses and their families are paid from this fund. This program is designed to assure the safety of Government witnesses whose testimony on behalf of the Government places them or their families in jeopardy.

3. *Expert witnesses.*—Technical and scientific experts are paid for their testimony as Government witnesses in legal proceedings involving the United States.

4. *Mental competency examinations.*—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States. Reports and court testimony relating to the examinations are included in these fees.

The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1981 request will provide CRS with resources to continue to focus on racial disputes in two major pro-

gram areas: police/minority confrontation cases, particularly those related to allegations of police use of excessive force; and education cases, with focus shifting from desegregation preparation to problems generated in the aftermath of desegregation. In 1981, CRS anticipates that these two program areas will produce about 560 out of a total 885 anticipated cases.

¹ Includes capital investment as follows: 1979, \$29,679 thousand; 1980, \$26,845 thousand; 1981, \$33,799 thousand.

1. *Criminal, security, and other investigations.*—This activity includes all field operations of the Federal Bureau of Investigation. These operations are conducted out of 59 field offices and more than 435 resident agencies located throughout the United States and Puerto Rico. Field offices are responsible for all investigations related to the national priority law enforcement areas of white-collar and organized crime and foreign counterintelligence. Staff increases are requested to increase efforts in these national priority areas. Other broadly defined responsibilities can be defined as civil rights, fugitives, terrorism, general government crimes, personal crimes, civil and general property crimes, applicant and other investigations.

The FBI is reimbursed for certain investigative activities such as preemployment background inquiries, name checks, and certain other activities for other Federal agencies.

2. *Coordination of investigations.*—This activity represents resources devoted to national program supervision, coordination, and management of FBI investigative matters. Additional work-years are requested for coordination of white collar crime, organized crime, and foreign counterintelligence field investigative activities.

3. *Investigative support.*—Investigative support is provided through training, forensic laboratories, attachés

in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment. An increase in funding is requested in the forensic laboratories, ADP and telecommunications, and technical field support and equipment to maintain and improve support as related to the national priority programs.

4. *State and local assistance.*—The FBI supports state and local law enforcement by providing training and furnishing laboratory, identification, and informational services. Emphasis is being placed on the training of police instructors with state and local agencies to permit them to become more self-sufficient and to allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations around the Nation, but most courses are given at the FBI National Academy in Quantico, Va.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over six million records relating to wanted and missing persons, stolen property, and criminal histories. The UCR program collects data from more than 13,000 law enforcement agencies and makes this information available to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1981, approximately 6.5 million sets of fingerprints will be processed. A project to automate fingerprint processing was initiated in 1971; the project is currently being evaluated by the Jet Propulsion Laboratory.

5. *Program direction.*—This activity includes the management, administrative support, legal, planning, evaluation, inspection, and financial functions of the FBI. During 1979, the executive organizational structure was modified to more efficiently address current problems and improve overall operations.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

1. *Border enforcement.*—This activity contains most of the resources dedicated to both preventing illegal entry

General and special funds—Continued

SALARIES AND EXPENSES—Continued

into the United States and facilitating the entry of qualified persons. Also included are the resources for the alien documentation program (ADIT) and the Service's nationwide anti-smuggling of aliens program.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

	WORKLOAD		
	1979 actual	1980 estimate	1981 estimate
Total persons inspected.....	274,201,485	283,828,000	293,870,000
Total citizens inspected.....	105,216,585	109,094,000	113,115,000
Total aliens inspected.....	168,984,900	174,734,000	180,755,000
Aliens admitted.....	168,011,275	173,704,000	179,655,000
Aliens withdrawing at entry.....	973,625	1,030,000	1,100,000
Deportable aliens apprehended.....	785,911	852,000	963,000
Smuggled aliens apprehended.....	132,722	144,000	163,000
Smugglers apprehended.....	14,928	16,000	17,000
ADIT cards issued.....	600,000	700,000	800,000

2. *Interior enforcement.*—Resources in this activity are focused upon locating undocumented aliens who are within the United States following successful illegal entry or violation of status after legal entry. Apprehensions are made through inspection of farms and ranches, by investigation of information about the location of undocumented aliens, and through investigative casework.

	WORKLOAD		
	1979 actual	1980 estimate	1981 estimate
Deportable aliens apprehended (border patrol).....	102,818	93,000	91,000
Smuggled aliens apprehended.....	39,966	36,000	35,000
Smuggled aliens apprehended (investigations).....	39,284	31,000	31,000
Smugglers apprehended (border patrol).....	352	300	300
Smugglers apprehended (investigations).....	3,216	3,400	4,000
Deportable aliens apprehended (investigations).....	147,361	132,000	132,000
Non-Dual action cases completed.....	64,202	55,000	55,000
Deportable aliens apprehended (other investigative efforts).....	18,700	18,000	18,000
Convictions of smugglers (total).....	5,818	6,000	6,400

3. *Detention and deportation.*—This activity provides the necessary resources for processing and detaining undocumented aliens who have been located and for promptly effecting their removal from the United States. Resources are also provided for the conduct of administrative hearings on immigration matters and government representation at those hearings.

	WORKLOAD		
	1979 actual	1980 estimate	1981 estimate
Average number of aliens held in detention per day.....	2,371	2,400	2,400
Detentions.....	340,600	339,700	364,800
Aliens expelled.....	1,009,100	1,014,600	1,081,200
Appearances at hearings by trial attorney.....	51,143	61,750	61,700
Deportation hearings completed.....	55,886	60,394	67,000
Exclusion hearings completed.....	2,912	4,054	5,300
Bond redetermination cases completed.....	6,424	6,600	7,200

4. *Intelligence.*—Intelligence information for Service operations is collected, analyzed, and disseminated by personnel assigned to this activity. The resources requested will provide a predictive and analytical intelligence capability. These resources also provide a capability

to scientifically examine and analyze documents to assist in the identification, investigation, and prosecution of major conspiracies which promote fraudulent documents and smuggle aliens.

	WORKLOAD		
	1979 actual	1980 estimate	1981 estimate
Scientific examination and analysis of fraudulent documents conducted.....	1,000	4,400	4,400
New I&NS data inputs at El Paso Intelligence Center (EPIC) processed.....	181,000	182,000	182,000
Queries researched at EPIC.....	19,980	21,400	21,900
Positive I&NS responses to queries received by EPIC provided.....	9,500	9,900	9,900

5. *Service to public.*—The resources necessary to provide the benefits of the Immigration and Nationality Act are provided in this activity. Included are the adjudication of applications and petitions submitted for benefits, the processing of naturalization and citizenship petitions and applications, and the provision of information and forms to clients at Service offices. All operations conducted overseas except preinspection are within this activity.

	WORKLOAD		
	1979 actual	1980 estimate	1981 estimate
Applications and petitions: Completed by adjudications.....	1,720,000	1,768,000	1,835,000
Naturalization applications completed.....	232,826	235,000	250,000
Dual action cases completed.....	16,828	15,000	15,000
Inquiries and callers at information counters.....	9,802,000	10,402,000	10,502,000
Refugees processed.....	136,005	225,000	223,000
Adjudications completed (overseas).....	51,756	53,000	63,000

6. *Support operations.*—This activity includes the resources for construction, communications, records management, automatic data processing, and training of personnel.

	WORKLOAD

¹ Includes capital investment as follows: 1979, \$5,688 thousand; 1980, \$3,650 thousand; 1981, \$5,134 thousand.

Note.—Excludes \$624 thousand in 1981 for activities transferred to: "Acquisition, operation and maintenance of buildings abroad," Department of State. Comparable amounts for 1979, \$480 thousand and 1980, \$547 thousand are included above.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs through drug law enforcement at the Federal level as lead agency; coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities; and coordination and intelligence-gathering activities with foreign government agencies.

This appropriation finances the operation of five domestic regions, with offices in all 50 States, foreign operations in 40 countries, eight field forensic laboratories, and 19 State and local task forces.

Efforts in the heroin area have produced a reduction in the national retail heroin purity from a high of 6.6 percent in the first quarter of calendar year 1976 to the current low of 3.5 percent. In 1981, DEA will continue

General and special funds—Continued

SALARIES AND EXPENSES—Continued

the enforcement pressure on heroin traffic, with accelerated efforts against trafficking in cocaine, PCP, multi-ton shipments of marihuana, and licit drugs diverted at the retail level.

The means by which DEA performs its mission are summarized by the following activities:

1. *Enforcement of Federal law and investigations—(a) Domestic enforcement.*—This activity encompasses the enforcement of Federal laws regarding narcotics and dangerous drugs. Specifically, the activity aims to reduce the domestic supply of illicit drugs of abuse to a level with which our society and institutions can reasonably cope.

The 1981 increase would allow DEA to increase its investigative activity in the areas of conspiracy, financial, and organized crime cases.

	1979 actual	1980 estimate	1981 estimate
DEA initiated arrests.....	4,750	4,900	4,915
Other Federal referral arrests.....	1,550	1,400	1,400

(b) *Foreign cooperative investigations.*—This activity encompasses efforts to reduce illicit opium production and the supply of heroin destined for the United States; efforts to curtail the supply of illicitly produced dangerous drugs, marihuana, and cocaine entering the United States; and the collection and dissemination of tactical operational and strategic intelligence.

The 1981 request includes the relocation of 15 positions from regional offices overseas and a program reduction of 5 positions. The DEA will continue to maintain foreign regional operations commensurate with potential drug problems confronting host countries, and remain responsive to the trafficking situations affecting the United States.

The 1981 increase would allow DEA to implement the DEA automated teleprocessing system (DATS) to DEA's foreign offices on a selected basis.

	1979 actual	1980 estimate	1981 estimate
Foreign cooperative arrests.....	1,000	1,000	1,000
Trafficking networks developed.....	28	32	32
Trafficker profiles completed.....	152	265	300
Enforcement targets identified.....	1,627	2,000	3,000

(c) *Compliance and regulation.*—This activity encompasses the regulation of the legal trade in narcotics and dangerous drugs. By authority of the Controlled Substances Act this activity includes the scheduling and classifying of controlled drugs; establishing import, export, and manufacturing quotas for controlled drugs; registering manufacturers, handlers, and dispensers of controlled drugs; and investigating and determining points of diversion into the illicit market.

Investigations:	1979 actual	1980 estimate	1981 estimate
Regulatory.....	1,120	1,120	1,270
Complaint.....	300	300	150
Preregistrant (nonpractitioners).....	1,300	1,320	1,350

(d) *State and local assistance.*—This activity encompasses cooperative law enforcement activities with State, county, and local authorities. Included are training programs for law enforcement officers and forensic chemists; laboratory support for law enforcement agencies (including analysis of evidence and professional tes-

timony in State prosecutive cases); guidance to regulatory agencies; and drug traffic prevention programs.

The 1981 level of funding in this activity will result in an increase in the assistance to State regulatory agencies for investigation of retail diversion, and reduced resource levels for laboratory support and for cooperative law enforcement activities. The program level will provide for the conduct of enforcement operations in a reduced number of task force areas, and participation in cooperative investigations and provision of laboratory services on a selective basis.

	1979 actual	1980 estimate	1981 estimate
State and local initiated arrests.....	1,650	1,650	1,600
Federal initiated arrests.....	2,150	2,150	1,750
Laboratory exhibits analyzed.....	10,989	10,600	10,000
Trainee-days.....	44,647	45,000	45,000

2. *Intelligence.*—This activity encompasses the collection, analysis, and dissemination of drug intelligence in support of DEA, other Federal, State and local efforts to interdict or suppress the illicit movement of drugs. The intelligence activity provides a systematic approach for attacking the drug traffic by assessing the vulnerabilities of traffickers. It supplies information for policy determination and enforcement strategy.

	1979 actual	1980 estimate	1981 estimate
Trafficking networks developed.....	200	185	160
Trafficker profiles completed.....	2,285	2,305	2,350
Enforcement targets identified.....	23,641	27,187	33,000
El Paso Intelligence Center (EPIC) watch transactions.....	120,000	140,000	160,000

3. *Research and development.*—This activity encompasses research programs directly related to the DEA law enforcement, regulatory, and intelligence functions. It supports these programs through development of specialized covert equipment, operational engineering support, and analysis of operational and strategic systems.

4. *Support operations.*—This activity encompasses laboratory analysis of evidence in support of investigation and prosecution of drug traffickers; training programs for all levels of DEA operational personnel; and maintenance of an effective technical equipment program to support increasingly complex high level investigations.

	1979 actual	1980 estimate	1981 estimate
Laboratory exhibits analyzed.....	18,416	18,400	18,400
Trainee-days.....	18,258	18,000	18,000

5. *Program direction.*—This program encompasses the overall management and direction of DEA. It includes the development of coordinated and definitive policy; program analysis and planning; security of DEA; legal counsel; and coordination and performance of administrative functions.

The 1981 increase will provide an additional capability for responding to an increase in the number and complexity of requests under the Freedom of Information Act.

Reimbursable program.—A reimbursable program providing primarily for the training of foreign drug law enforcement officials is conducted by DEA and funded by the Department of State. More than 50 classes are held each year, both in the United States and host countries.

	1979 actual	1980 estimate	1981 estimate
Trainee-days.....	13,667	14,000	14,000

This appropriation will provide for the custody and care of an average of 25,000 offenders and for the maintenance and operation of 43 penal institutions, 9 community treatment centers, 5 regional offices and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other units for short periods of time. An average of 4,000 sentenced prisoners will be in contract facilities in 1981.

The Bureau receives reimbursements from others for daily care and maintenance of unsentenced offenders and State and local offenders, for utilities produced for Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

1. *Inmate care and custody.*—This activity covers the direct care costs, excluding psychology services, of all offenders in Federal institutions. This includes the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of confining sentenced Federal offenders in contract State and local facilities.

Major program thrusts will be to activate and operate a Federal correctional institution at Lake Placid, N.Y.; to activate, operate and expand a Federal prison camp at Madera, Calif.; to expand the Federal prison camp at Boron, Calif.; to expand medical services and unit management at existing institutions, and to maintain the hospital accreditation at the Springfield, Mo., Medical Center.

2. *Inmate programs.*—This activity finances the costs of academic, social, and occupational education courses and institutional programs for the treatment of drug addiction and psychology services. In addition to the activation/expansion projects mentioned above, the major program objectives will be to continue the transfer of the Vocational Training program from Federal Prison Industries, Inc.; and to expand leisure and religious programs at existing institutions.

3. *Institution administration and maintenance.*—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions. Funds are requested in

1981 for the activation and expansion projects mentioned above and to improve institution maintenance.

4. *Community corrections.*—This activity provides for the care of Federal prisoners in Federal and contract community residential centers.

5. *Program direction.*—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel.

¹ Includes capital investment as follows: 1979, \$15 thousand; 1980, \$15 thousand; 1981, \$15 thousand.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants for the conduct of research and evaluation of a wide variety of correctional activities; provides for technical assistance to requesting correctional organizations; maintains an information service to provide information on the latest developments, research results, et cetera, in the field of corrections and provides training to the correctional community to improve systems and skills. During 1981, these activities will continue at the

same level as 1980 with increased emphasis on technical assistance.

In 1981, NIC grant activities emphasize the further development of classification systems and technologies for the purpose of: (1) promoting the use of alternatives to incarceration, (2) improving the existing classification processes and (3) assisting correctional agencies in understanding and providing for the needs of special groups of offenders. In addition, grants will be made to encourage the expanded use of community correctional alternatives by all criminal justice system components.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations. These efforts will involve training sessions at the Center, technical assistance in the field and the use of 12 regional resource centers. The NIC training program will provide classroom and field experiences for over 1,000 students in the areas of management theory, current legal issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources.

NIC provides technical assistance to State and local correctional agencies to focus on improving their capabilities to deal with organizational needs and improve the services, operation, and management of the agency. During 1981, resources will be used to extend NIC capacity to respond with appropriate services to the increasing requests for assistance; develop State agency capability to provide training and technical services to all correctional units within the State and provide increased direct assistance to requesting agencies in response to more comprehensive system needs and problems.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

90.00 Outlays			42,454	23,843	20,446				

1. *Planning and site acquisition.*—This activity reflects the costs of efforts to obtain suitable sites for approved construction projects, including site purchase and development and facility design.

2. *New construction.*—This activity represents costs associated with the construction of new facilities in order to reduce overcrowding, close large and antiquated institutions, and provide a safe and humane environ-

ment for staff and inmates. In 1981, construction will be completed on the Federal Correctional Institution for young offenders at Lake Placid, N.Y. Construction will continue on the Phoenix, Ariz., Federal Correctional Institution for youths and young adults. Construction of a Federal Correctional Institution in Camarillo, Calif., and a Metropolitan Correctional Center in Detroit, Mich., has been canceled.

3. Modernization and repair of existing facilities.— This activity includes rehabilitation and renovation of buildings, necessary modifications to accommodate new correctional programs, rehabilitation or replacement of utilities systems, and repair projects at existing facilities. In 1981, obligations of \$7,785 thousand will be incurred for projects such as major plant renovation, air and water pollution control and electric systems rehabilitation. An additional obligation of \$1.5 million will be incurred for the Oxford, Wis., lease/purchase agreement.

Intragovernmental funds:

FEDERAL PRISON INDUSTRIES, INCORPORATED

The Federal Prison Industries, Incorporated, is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available, and in accord with the law, and to make such contracts and commitments, without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation, including purchase of not to exceed five (for replacement only) and hire of passenger motor vehicles, except as hereinafter provided. (18 U.S.C. 4121-28; Reorganization Plan No. 11, pt. 1, sec. 3a, approved April 3, 1939; Department of Justice Appropriation Act, 1980.)

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide industrial employment opportunities for the populations at existing institutions and for the populations at new institutions. This expansion includes the establishment of 4 new industrial operations at 4 institutions in 1979. Current plans for 1980 are to open 3 new enterprises at 3 institutions.

At the same time, the overall reduction in population within the Federal Prison System, the planned closing of the McNeill Island Penitentiary, and significant reductions at Atlanta and Leavenworth have resulted in the movement of several factories to locations with inmate industrial employment needs.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

Intragovernmental funds—Continued

FEDERAL PRISON INDUSTRIES, INCORPORATED—Continued

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

Budget program.—The commissary fund consists of the operation of commissaries for the inmates as an earned privilege.

Financing.—Profits are derived from the sale of goods to inmates. Sales for 1981 are estimated to be \$12.0 million. Adequate working capital is assured from retained earnings.

Operating results.—Profits received are used for general welfare and recreational items for all inmates.

The Justice System Improvement Act of 1979 and the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, place within the Law Enforcement Assistance Administration (LEAA) responsibility to provide assistance to States and local units of government to reduce crime and juvenile delinquency, improve and strengthen the quality of the criminal justice system—police, courts, and corrections—and provide resources and leadership for the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. The Office of Justice Assistance, Research, and Statistics provides staff support and coordinates the activities of LEAA, the National Institute of Justice, and the Bureau of Justice Statistics.

1. *Juvenile justice formula grants.*—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency.

2. *Criminal justice formula grants.*—Funds under this activity will assist States and units of local government in carrying out programs to improve and strengthen the functioning of the criminal justice system. Emphasis will be on establishing or expanding community and neighborhood-based programs; developing programs to improve and strengthen law enforcement agencies, court administration, prosecution and defense, correctional services; and devising effective alternatives to the criminal justice system, including pretrial diversion to reduce congestion in the courts.

3. *National priority grants program.*—Funds for this program will be utilized to encourage States and units of local government to carry out programs which, on the basis of research, demonstration, or evaluation, have been shown to be effective in improving and strengthening the administration of justice.

4. *General criminal justice grants program.*—Funds will be utilized to encourage States, units of local government and private nonprofit organizations to undertake programs and projects to improve and strengthen the criminal justice system; improve the comprehensive planning and the coordination of criminal justice activities; modernization of State court operations; and community anticrime programs.

5. *Training.*—This activity provides for and encourages training, manpower development, and new personnel practices for the purpose of improving the criminal justice system.

6. *Crime prevention programs.*—The purposes of this activity are to encourage neighborhood and community participation in crime prevention and public safety efforts through grants and technical assistance. Programs

will be coordinated with other Federal agencies involved in citizen criminal justice activities.

7. *Juvenile justice programs.*—This program supports the development and implementation of new approaches, techniques, and methods with respect to juvenile delinquency programs, including effective means of diverting juveniles from the traditional correctional system; developing and maintaining community-based alternatives to traditional forms of institutionalization; programs stressing advocacy activities aimed at improving services to youth; collection and dissemination of data regarding juvenile justice; and the coordination of Federal efforts in juvenile delinquency programs.

8. *Public safety officers' benefits program.*—Funds will be used to pay \$50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty. In 1981, it is estimated that approximately 250 officers will die in the line of duty.

9. *Crime control programs.*—This activity provides for expenditures from programs which were authorized by the Omnibus Crime Control and Safe Streets Act of 1968, as amended. Included are planning formula grants, corrections formula grants, criminal justice formula grants, criminal justice programs, correctional programs, technical assistance, national institute of law enforcement and criminal justice grants, and data systems and statistical assistance grants.

10. *Executive direction and control, OJARS.*—Funds provide for management, direction, and coordination of the OJARS program to assure the continuity of leadership and assistance to States, units of local governments, and public and private organizations engaged in criminal justice activities.

11. *Administrative services, OJARS.*—Funds will provide administrative support required for internal operations of the Agency.

12. *Executive direction and control, LEAA.*—Funds provide for the direction and control, administration, and operation of the executive office and program offices in the Law Enforcement Assistance Administration.

The planned distribution of budget authority by fiscal year is as follows (in thousands of dollars):

	1979 actual	1980 estimate	1981 estimate

The Justice System Improvement Act of 1979 established the National Institute of Justice and the Bureau of Justice Statistics to encourage basic and applied research, to gather and disseminate accurate and compre-

General and special funds—Continued

RESEARCH AND STATISTICS—Continued

hensive justice statistics, and to evaluate methods of preventing and reducing crime. In 1979 these activities were supported with funds appropriated for the Law Enforcement Assistance Administration.

1. *Research, evaluation and demonstration programs.*—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and to disseminate the results of such research efforts.

2. *Justice statistical programs.*—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decision making about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for state and local criminal justice systems; and assurance of conformance with privacy and security regulations.

The planned distribution of budget authority by fiscal year is as follows (in thousands of dollars):

	1979 actual	1980 estimate	1981 estimate

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. Appropriations for "Salaries and expenses, general administration", "Salaries and expenses, United States attorneys and marshals", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Bureau of Prisons", shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 202. A total of not to exceed **[\$25,000]** \$35,000 from funds appropriated to the Department of Justice shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General. (*Department of Justice Appropriation Act, 1980.*)

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

Federal Funds

General and special funds:

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, **[\$86,260,000]** \$90,262,000, together with not to exceed **[\$33,791,000]** \$35,875,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund, and of which **[\$6,125,000]** \$7,337,000 shall be for carrying into effect the provisions of 38 U.S.C. 2001-2003. (7 U.S.C. 2041-2053; 8 U.S.C. 1184; 29 U.S.C. 49-49k, 50, 801 et seq.; 42 U.S.C. 2000-2000d-4.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$492 thousand; 1980, \$551 thousand; 1981, \$500 thousand.

Note.—Excludes \$15 thousand in 1980 (beginning April 1, 1980) and \$30 thousand in 1981 for activities transferred to Salaries and expenses, Departmental Management, Department of Education. Comparable amounts for these activities in 1979 (\$27 thousand) and 1980 through March 31, 1980 (\$13 thousand) are included above.

1. *Planning, evaluation, and research.*—Provides direction and staff support in long-range planning, policy analysis, legislative support, and international activities; directs a nationwide labor market information system; administers a research and development program; and conducts program evaluation studies.

Emphasis in 1981 will be on restoring specialized capability and expertise in the research program, improving the operations of the procurement activity, and achieving more contract and grant closeouts than in the previous fiscal year.

2. *Comprehensive employment development.*—Develops and administers, through a national and regional office network, a program of job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons. Operates through a flexible, decentralized system of prime sponsors (generally States and units of general local government).

During the budget year, emphasis will be on significantly increasing levels of monitoring, assessment and technical assistance to prime sponsors. Additional onsite monitoring and technical assistance visits to program sponsors will be conducted.

In 1980, Federal staff administering two migrant education programs were transferred to the Department of Education pursuant to Public Law 96-88.

3. *Apprenticeship services.*—Establishes apprenticeship as a basic and major method of skill acquisition across a broad range of occupations and industries; and establishes a comprehensive Federal-State apprenticeship administrative structure to provide a more uniform and systematic means of developing skilled workers.

More than 250,000 apprentices in federally approved programs are in training in registered apprenticeship programs, including 60,000 minorities and women. Approximately 30% of the apprentices are veterans. Each year, 40,000 to 50,000 apprentices complete training programs averaging 3 to 4 years and become journeymen.

Over a 2-year period, contracts were executed with national organizations to develop more than 50,000 apprentice opportunities in industries in which apprenticeship had been underutilized. Organizations to provide administrative support to apprenticeship sponsors at the local level have been established in 10 selected cities. Model projects linking schools to apprenticeship have been established in seven school districts.

General and special funds—Continued

PROGRAM ADMINISTRATION—Continued

4. *U.S. employment services.*—Provides leadership and policy direction for the administration of the nationwide public employment service system. The goal of this activity in 1981 is to develop a program which identifies labor shortages in the economy and to develop a program design for a labor exchange service.

5. *Veterans employment service.*—The Veterans Employment Service identifies policies and programs to serve and meet employment, unemployment assistance, and training needs of veterans. It assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services.

Accomplishments include: Local Employment Service (ES) office evaluations—2,600; other onsite monitoring visits to local ES offices—4,400; prime sponsor evaluations—460; other onsite monitoring visits to prime sponsors—2,000; significant increase in development of outreach efforts to contact veterans and deliver assistance.

6. *Unemployment insurance services.*—Provides leadership, policy direction, and technical assistance required by State employment security agencies in order to insure that workers are protected against the loss of wages when they are involuntarily unemployed and to insure that eligible individuals enrolled in CETA training programs receive training allowances.

7. *Equal opportunity and special review.*—Insures adherence to Federal laws and regulations, such as Title VI of the Civil Rights Act of 1964 and section 504 of the Rehabilitation Act of 1973, in the operation of the State employment security agencies and the prime sponsors of the Comprehensive Employment and Training Act programs throughout the country.

In the budget year, the major objectives will be to (1) set targets for minority business and minority banking sponsor activity; (2) improve the equal employment opportunity management information system; (3) train Employment and Training Administration (ETA) personnel to develop equal employment opportunity (EEO) and affirmative action plan programs and to monitor grantee compliance; (4) improve performance of ETA and grantee staff in investigation of EEO complaints; (5) establish in-depth assessment of prime sponsors' practices, covering a minimum of 50 prime sponsors per year; and (6) assure that programs and services are made accessible and available to the handicapped in compliance with sections 502 and 504 of the Rehabilitation Act of 1973.

8. *Executive direction and management.*—Provides overall supervision and direction of employment and training administration activities; provides administrative and management services and property management; provides budgetary, fiscal management, audit, and contract services; and is responsible for data systems relating to program performance.

¹ Includes capital investment as follows: 1979, \$85,156 thousand; 1980, \$85,500 thousand; 1981, \$34,000 thousand.

NOTES

Excludes \$7,333 thousand in 1980 (beginning April 1, 1980) and \$7,553 thousand in 1981 for activities transferred to School Improvement programs, Office of Educational Research and Improvement, Department of Education. A comparable amount for these activities for 1979 (\$6,848 thousand) is included above.

Includes \$15,200 thousand in 1981 for activities previously financed from:

	1979	1980
Food and Nutrition Service, child nutrition programs	7,153	12,000

This account provides for a flexible and decentralized system of Federal, State, and local programs of training and other services for economically disadvantaged, un-

employed, and underemployed persons, designed to lead to permanent gains in employment and earnings and enhanced self-sufficiency.

1. *Comprehensive employment and training programs.*—Provides financial assistance primarily by formula to over 470 State and local prime sponsors to design and operate comprehensive employment and training assistance programs to help meet the employment and training needs of their areas. Services include institutional and on-the-job training, work experience, vocational education and counseling, remedial education, and job placement services, as authorized by title II, parts A, B, and C of the Comprehensive Employment and Training Act, and public service employment under part D of title II.

In 1981, an estimated 375,000 to 400,000 years of service will be provided under parts A, B, and C.

Under part D, an average of 250,000 transitional public service employment jobs for the economically disadvantaged will be provided.

2. *Special programs for youth.*—Provides employment and training assistance for unemployed youths, particularly economically disadvantaged and out-of-school youths, through the young adult conservation corps (YACC), summer youth employment program (SYEP), and the job corps.

YACC enrollees participate in outdoor work activities such as flood control and relief, park maintenance, and forestry. SYEP provides jobs for economically disadvantaged youth during the summer months. The job corps provides severely disadvantaged youth with a comprehensive program of basic education, vocational training, job placement, medical support, and other services in a residential setting.

Authority for three youth programs—youth community conservation and improvement projects; youth employment and training programs; youth incentive entitlement pilot projects—expires in 1980. For 1981, legislation will be sought for a replacement program that provides a consolidated grant authority to States and localities to develop locally tailored programs for economically disadvantaged youth. (See following schedule.)

3. *Other national programs.*—Provides additional employment and training assistance to special segments of the population which have particular disadvantages in the labor market. Among groups served are Indians and other native Americans, veterans, older workers, displaced homemakers, migrant and seasonal farmworkers, criminal offenders, and persons of limited English-speaking ability. This activity also provides for technical assistance and training for Federal, State, and local personnel involved in the planning and administration of employment and training programs; for a comprehensive system to develop labor market information; and for research, development, and evaluation. This activity also includes demonstration and experimental projects begun in 1979 to develop better information in the special issues involved in employment and training programs for low-income individuals who might otherwise be in need of public assistance. Beginning April 1, 1980, migrant education programs will be transferred to the Department of Education under Public Law 96-88.

General and special funds—Continued

EMPLOYMENT AND TRAINING ASSISTANCE—Continued

4. *Private sector programs.*—Provides funding to develop ways to make private sector unsubsidized jobs available for greater numbers of unemployed and underemployed persons who are economically disadvantaged. These programs involve local industry in training and placement activity to increase the number and quality of job placements in the private sector and improve private sector job development for all employment and training programs. Included in this activity is the administration of the Targeted Jobs Tax Credit program created by the Revenue Act of 1978 to increase opportunities for private sector employment of the disadvantaged.

A consolidated grant approach will be proposed that provides States and localities with resources to develop, in cooperation with local schools, tailored programs for economically disadvantaged youth to improve their ability to obtain and retain permanent unsubsidized employment. Emphasis will be placed on use of objective standard to measure individual and program operator performance.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

To carry out activities under title V of the Older Americans Act of 1965, as amended, ["\$266,900,000"] \$267,100,000. (42 U.S.C. 3001 et seq.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

Program and Financing (in thousands of dollars)

This program provides temporary employment assistance grants to State and local prime sponsors and Indian tribes during periods of high unemployment. It will provide an average of 200,000 jobs in 1981. As required by section 602 of Public Law 95-524, the following information is provided for 1981:

The unemployment rate is estimated to be 7.4%.

The number of unemployed in excess of 4% of the labor force is estimated to be 3.62 million.

The average cost per year of title VI public service employment opportunities is estimated to be \$10,194.

The amount that would be needed to be appropriated to provide public service jobs for 25% of the unemployed in excess of 4% is \$9,950 million.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and allowances to unemployed Federal employees and ex-servicemen, as authorized by title 5, chapter 85 of the United States Code, of benefits and payments as authorized by title II of Public Law 95-250, of trade adjustment benefit payments and allowances, as provided by law (19 U.S.C. 1941-1944 and 1952; part I, subchapter B, chapter 2, title II of the Trade Act of 1974), and for reimbursement to States for unemployment benefits paid on the basis of public service employment as authorized by title II of the Emergency Jobs and Unemployment Assistance Act of 1974, as amended, and for reimbursements as authorized by section 121 of Public Law 94-566, **[\$950,000,000]** *\$1,260,000,000*, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: *Provided*, That, in addition, there shall be transferred from the Postal Service Fund to this appropriation such sums as the Secretary of Labor determines to be the cost of benefits for ex-Postal Service employees: *Provided further*, That amounts received during the current fiscal year from the Postal Service or recovered from the States pursuant to 5 U.S.C. 8505(d) shall be available for such payments during the year: *Provided further*, That amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

1. *Payments to former Federal personnel.*—Funds are provided to the States for payment of unemployment compensation to eligible former Federal employees, ex-Postal Service employees, and ex-servicemen.

2. *Trade adjustment assistance.*—Adjustment assistance allowances are paid to workers as authorized by

General and special funds—Continued

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES—Continued

the Trade Expansion Act of 1962 and the Trade Act of 1974.

3. *Unemployment assistance and payments under other Federal unemployment programs.*—States are reimbursed for unemployment benefits paid on the basis of public service employment, as authorized by title II of the Emergency Jobs and Unemployment Assistance Act of 1974, as amended. In 1979, States were reimbursed for benefits paid during a transitional period to workers newly covered under the Unemployment Compensation Amendments of 1976. Benefits are paid to workers under Public Law 95-250, which expanded Redwood National Park. The reimbursable program provides Federal Disaster Unemployment Assistance.

1. *Unemployment insurance services.*—Grants are made to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel as well as trade adjustment assistance to eligible individuals.

PROGRAM STATISTICS

	1978 actual	1979 estimate	1980 estimate*	1981 estimate*
Staff years.....	49,878	45,457	55,687	58,944
Basic workload (in thousands):				
Employer tax accounts.....	4,363	4,568	5,040	5,200
Employee wage items recorded.....	242,000	282,377	283,200	292,200
Initial claims taken.....	21,173	19,113	23,940	24,153
Eligibility interviews.....	11,020	11,203	16,000	17,272
Weeks claimed.....	152,501	133,182	183,445	210,150
Nonmonetary determinations.....	12,854	10,146	13,051	13,345
Appeals.....	1,052	947	1,149	1,163
Covered employment.....	84,500	90,900	91,100	91,700

* 1980 and 1981 estimates include workload which can be financed from contingency funds.

2. *Employment services.*—A nationwide network of more than 2,400 local employment offices financed by Federal grants provide services to assist workers in obtaining suitable employment and to assist employers in resolving their employment problems. General services include interviewing, testing, counseling and referral for placement, appropriate training, or other services involved in readying individuals for employment. As-

sistance to employers includes analyzing their employment requirements, solving problems of recruitment and turnover, and developing labor market information. Special emphasis is placed on providing services to veterans and disadvantaged applicants. It is estimated that not less than \$85 million will be available for services to veterans. It has been determined in accordance with section 901(c)(4) of the Social Security Act as amended that 97% of the necessary expenses of the Employment Service is an appropriate charge to the employment security administration account of the Unemployment trust fund.

1 Each group consists of 10 States and excludes the District of Columbia, the Virgin Islands, Puerto Rico, and Guam.

3. *Contingency.*—This fund assures that funds will be available to meet increases in the costs of administration resulting from changes in State law, increases in the number of claims filed and claims paid, or increased salary costs resulting from changes in State salary compensation plans.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS*

*See Part III for additional information

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, as amended, and to the Black Lung Disability Trust Fund as authorized by subsection b(2) of section 3 of the Black Lung Benefits Revenue Act of 1977, and for non-repayable advances to the "Federal unemployment benefits and allowances" account, to remain available until September 30, [1981, \$300,000,000] 1982, \$670,000,000.

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. All advances made to the Federal unemployment account and advances made to the Extended unemployment compensation account for Federal supplemental benefits paid prior to April 1, 1977, and for the Federal share of extended benefits are repaid, without interest, to the general fund of the Treasury. Advances made to the Extended unemployment compensation account for Federal supplemental benefits paid after April 1, 1977, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
Department of Health and Human Services:
"Human Development Services."
"Work Incentives."

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment trust fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits. State payroll taxes pay for all regular State benefits. During periods of high State or national unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax are also paid. The Federal tax pays the costs of Federal and State administration of unemployment insurance and 97% of the costs of the employment service.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

* Includes capital investment as follows: 1979, \$180 thousand; 1980, \$162 thousand, 1981, \$207 thousand.

1. Labor-management relations, policy and services.—Provides assistance to unions, employers, employees, and State and local governments, including special studies and analyses and technical assistance in planning for work force adjustments as they will affect labor-management relations; coordinates Federal action in particular labor-management disputes; carries out the Department's responsibilities under the Urban Mass Transportation Act of 1964, the Airline Deregulation Act of 1978, the Surface Transportation Assistance Act of 1978, the Health Planning and Resources Development Act of 1979, and develops policies, procedures, and regulations relating to the continuation of employee benefits under the provisions of the Redwood National Park Act of 1968, as amended. Develops recommendations on labor-management relations matters, and conducts studies of collective bargaining and programs pertaining to the Labor-Management Reporting and Disclosure Act (LMRDA). Among areas for research in 1981 will be the construction industry, collective bargaining, and minimizing causes of labor-management disputes.

2. Labor-management standards enforcement.—Covers the administration and enforcement of the LMRDA and section 7120 of the Civil Service Reform Act of 1978, which governs relations between employees and their unions in the Federal service.

WORKLOAD STATISTICS

	1979 actual	1980 estimate	1981 estimate
Reports received.....	84,950	80,000	75,000
Investigations, field audits, and supervised elections conducted.....	8,467	9,752	10,501

3. Veterans' reemployment rights.—Provides assistance to veterans, reservists, and National guardsmen on training duty, to secure reinstatement with their preservice employers and other employment advantages to which they may be entitled based on seniority accrued while in military service. Compliance is advanced by informing employers and potential claimants of their

responsibilities under the law and by assisting eligible claimants in determining and exercising their rights.

*Includes capital investment as follows: 1979, \$1,790 thousand; 1980, \$740 thousand; 1981, \$771 thousand.

1. *Improving and protecting wages.*—This activity obtains compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act and enforces the labor standards provisions under various Federal procurement acts, the Farm Labor Contractor Registration Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Regulations and interpretive materials are developed for the compliance program and special minimum wage standards are set. About 900,000 workers are expected to be directly aided each year by these efforts. This activity also includes determinations of prevailing wage rates and fringe benefits for all Federal and federally assisted contracts for construction subject to the Davis-Bacon and related acts. Prevailing wage rates and fringe benefits determinations are also made under the Service Contract Act. This activity also includes enforcement of the Fair Labor Standards Act and the Farm Labor Contractor Registration Act with regard to employers of undocumented alien workers.

2. *Elimination of discrimination in employment.*—The Employment Standards Administration (ESA) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, to hire and promote physically and mentally handicapped individuals, is under this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1981, about 8,000 compliance actions will be taken with respect to contractor employment practices.

3. *Workers' compensation.*—Under this income-maintenance activity the ESA administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled

General and special funds—Continued

SALARIES AND EXPENSES—Continued

and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

4. *Program development and administration.*—This activity provides for the direction and coordination of employment standards programs. Program planning, research, evaluation, budget, and other administrative functions are carried out to accomplish objectives. Major goals in 1981 will include broadening the knowledge base of the research and evaluation program in each major program area; continuing to develop effective Federal-State cooperation; strengthening programs for training ESA employees; and providing technical assistance to ESA's clientele.

SPECIAL BENEFITS

For the payment of compensation, benefits, and expenses (except administrative expenses) accruing during the current or any prior fiscal year authorized by title V, chapter 81 of the United States Code; continuation of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the Employees' Compensation Commission Appropriation Act, 1944; and sections 4(c) and 5(f) of the War Claims Act of 1948 (50 U.S.C. App. 2012); and fifty per centum of the additional compensation and benefits required by section 10(h) of the Longshoremen's and Harbor Workers' Compensation Act, as amended, [282,386,000] \$384,193,000, together with such [amount] amounts as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to September 15 of the current year: *Provided*, That in addition there shall be transferred from the Postal Service fund to this appropriation such sums as the Secretary of Labor determines to be the cost of administration for Postal Service employees through September 30, [1980] 1981. (5 U.S.C. 8147, 8191-8193; 42 U.S.C. 1701; 50 U.S.C. 2001-3013; 5 U.S.C. 755.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

1. *Federal Employees' Compensation Act benefits.*—Currently, more than 45,300 claimants are receiving long-term compensation benefits for job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes

loss of job time. Workers suffering noncontroverted traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

FEDERAL EMPLOYEES' COMPENSATION WORKLOAD

	1979 actual	1980 estimate	1981 estimate
Long-term cases	45,348	47,800	48,200
Compensation and medical payments.....	1,057,399	1,200,000	1,200,000
New cases reported	208,373	212,000	214,000
New claims received.....	30,846	33,000	34,000

2. *Longshore and harbor workers' compensation benefits.*—Under the Longshoremen's and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

Trust Funds

BLACK LUNG DISABILITY TRUST FUND*

*See Part III for additional information.

For payments from the Black Lung Disability Trust Fund, \$466,667,000 \$932,244,000, of which \$434,072,000 \$902,731,000 shall be available until September 30, 1982, for payment of all benefits and interest on advances under subsection (b)(2) of section 3 of the Black Lung Benefits Revenue Act of 1977, as authorized by section 424(a) (1), (2), and (4) of the Black Lung Benefits Act, as amended, and of which \$21,628,000 \$20,970,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses and \$10,967,000 \$10,543,000 for transfer to Departmental Management, Salaries and Expenses for expenses of operation and administration of the Black Lung Benefits program as authorized by section 424(a)(5) of the Black Lung Benefits Act, as amended: *Provided*, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to June 15 of the current year: *Provided further*, That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 424(a)(5) of the Black Lung Benefits Act, as amended. (30 U.S.C. 934, 934a; 30 U.S.C. 901.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act, in the form of an excise tax on mined coal tonnage and reimbursements into the fund from identified responsible mine operators. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1974 or where no mine operator can be assigned liability, in addition to all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health, Education, and Welfare. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1979, \$420 million; 1980, \$1,095 million; and 1981, \$1,900 million.

Longshoremen's and Harbor Workers' Compensa- tion Act	6,097	7,079	8,164
District of Columbia Compensation Act	1,694	1,954	2,443

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and, pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act (33 U.S.C. 944; 31 U.S.C. 725).

These trust funds are available for payments of additional compensation for second injuries. When a second injury results in a permanent partial disability which, combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled longshore and harbor workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

OCCUPATIONAL SAFETY AND HEALTH
ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, [\$183,164,000: *Provided*, That none of the funds appropriated under this paragraph shall be obligated or expended for the assessment of civil penalties issued for first instance violations of any standard, rule, or regulation promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful, or repeated violations under section 17 of the Act) resulting from the inspection of any establishment or workplace subject to the Act, unless such establishment or workplace is cited, on the basis of such inspection, for 10 or more violations: *Provided further*, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs 10 or fewer employees: *Provided further*, That no funds appropriated under this paragraph shall be obligated or expended to administer or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 with respect to any employer of ten (10) or fewer employees who is included within a category having an occupational illness and injury incidence rate less than seven per one hundred employees as published in the 1977 Bureau of Labor Statistics survey of three-digit (or if unavailable, two-digit or one-digit) Standard Industrial Classification Code industries, except:

(1) to take any action authorized by such Act with respect to any employer or group of employers within such category whom the Secretary determines to be engaged in an activity involving very substantial occupational hazards;

(2) to provide requested consultation, technical assistance, educational and training services, and to conduct surveys and studies;
(3) to conduct an inspection or investigation in response to an employee complaint, to issue a citation for violations found during such inspection, and to assess a penalty for violations which are not corrected within a reasonable abatement period and for any willful violations found;

(4) to take any action authorized by such Act with respect to imminent dangers;

(5) to take any action authorized by such Act with respect to health hazards;

(6) to investigate an employment accident which is fatal or results in hospitalization of one or more employees, and take any action pursuant to such investigation authorized by such Act;

(7) to take any action authorized by such Act with respect to complaints of discrimination against employees for exercising rights under such Act. This proviso shall not apply to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs 10 or fewer employees: *Provided further*, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing] \$211,900,000: *Provided [further]*, That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of 10 or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such, which was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained from such consultants[: *Provided further*, That none of the funds appropriated under this paragraph may be obligated or expended for any State plan monitoring visit by the Secretary of Labor under section 18 of the Occupational Safety and Health Act of 1970, of any factory, plant, establishment, construction site, or other area, workplace or environment where such a workplace or environment has been inspected by an employee of a State acting pursuant to section 18 of such Act within the 6 months preceding such inspection: *Provided further*, That this limitation does not prohibit the Secretary of Labor from conducting such monitoring visit at the time and place of an inspection by an employee of a State acting pursuant to section 18 of such Act, or in order to investigate a complaint about State program administration including a failure to respond to a worker complaint regarding a violation of such Act, or in order to investigate a discrimination complaint under section 11(c) of such Act, or as part of a special study monitoring program, or to investigate a fatality or catastrophe: *Provided further*, That none of the funds appropriated under this paragraph may be obligated or expended for the inspection, investigation, or enforcement of any activity occurring on the Outer Continental Shelf which exceeds the authority granted to OSHA by any provision of the Outer Continental Shelf Lands Act, or the Outer Continental Shelf Lands Act Amendments of 1978]. (29 U.S.C. 651 et seq.; 33 U.S.C. 941 et seq.; 41 U.S.C. 35 et seq.; 351 et seq.; 40 U.S.C. 333 et seq.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$300 thousand; 1980, \$300 thousand; 1981, \$300 thousand.

1. *Safety and health standards.*—New and revised mandatory standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment.

2. *Enforcement.*—The Occupational Safety and Health Act of 1970 provides for direct enforcement of Federal standards in States declining to assert jurisdiction, and for grants to States to assist them in administering and enforcing programs for occupational safety and health which have been approved by the Secretary. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities. Both State and Federal enforcement personnel may cite employers for violations and propose penalties. Programs are targeted to the investigation of fatal and catastrophic accidents, the investigation of claims of imminent danger and employee complaints, inspections of establishments in high-risk industries, and inspections for serious health and safety hazards. Professional training for compliance personnel is conducted at the OSHA Training Institute near Chicago, Ill.

3. *Technical support.*—Laboratory support is provided to compliance officers. Technical assistance is provided on all aspects of standards setting, compliance assistance, and enforcement programs, particularly with regard to the feasibility of engineering controls necessary for compliance. Comprehensive scientific and technical information services are provided, and analyses are made of possible economic consequences and environmental impact of proposed standards. Applications

General and special funds—Continued

SALARIES AND EXPENSES—Continued

for variances or exemptions from standards are evaluated.

4. *Compliance assistance.*—Grants are awarded to assist organizations develop their capacity to provide occupational safety and health training for workers and employers. Under cooperative agreements with State agencies, Federal funds are made available to cover 90% of the costs of providing free onsite consultation to employers upon request. This activity also provides evaluative, consultative, and promotional programs to assist Federal agencies in implementing job safety and health programs to protect Federal workers.

5. *Safety and health statistics.*—Statistics on occupational fatalities, injuries, and illnesses are collected and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

6. *Executive direction and administration.*—These activities include planning, evaluation, management support, legislative liaison, interagency coordination, and public information.

¹ Includes capital investments as follows: 1979, \$2,100 thousand; 1980, \$2,975 thousand; 1981, \$8,175 thousand.

1. **Enforcement.**—Enforcement of the Federal Mine Safety and Health Amendments Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, and recommendations to reduce working hazards. In 1981, MSHA will continue to concentrate on mandatory inspections with a reduction in other inspections.

2. **Assessments.**—This activity provides for the assessment of civil monetary penalties for violations of the Federal Mine Safety and Health Amendments Act of 1977.

3. **National Mine Health and Safety Academy.**—Public Law 96-38 transferred the Academy from the Department of the Interior to the Department of Labor on July 25, 1979. The Academy trains MSHA safety and health inspectors, technical support personnel, other government personnel, and mining industry personnel.

4. **Education and training.**—Examines plans and monitors performance of operator programs to train miners in work safety and health. Develops training materials and certifies and monitors instructors. Advises industry on compliance with training regulations.

States are encouraged to develop training programs through grants and technical assistance.

5. **Technical support.**—This activity provides onsite technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or effect improvements in mining practices. It also provides analytical data relative to the cause, frequency, and manner of accidents and the events or the practices that contribute to their causes.

6. **Program administration.**—Provides for the Office of the Assistant Secretary and the key management staff that supports the general administrative functions.

BUREAU OF LABOR STATISTICS

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses for the Bureau of Labor Statistics, including advances or reimbursements to State, Federal, and local agencies and their employees for services rendered, **[\$102,028,000] \$107,399,000.** (20 U.S.C. 2, 7, 181.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

¹ Includes capital investment as follows: 1979, \$809 thousand; 1980, \$454 thousand; 1981, \$508 thousand.

1. **Labor force statistics.**—Monthly estimates are made of the U.S. labor force, employment, and unemployment. Studies are made of selected characteristics of the labor force. Monthly data are prepared and published on employment, hours of work, and earnings by industry for the United States and for each State. Projections are prepared of employment requirements and supply, including detailed studies of the outlook for specific occupations.

WORKLOAD STATISTICS (MAJOR ITEMS)

	1979 actual	1980 estimate	1981 estimate
Labor force statistics:			
Insured employment and wages (monthly series)	2,028	2,028	2,028
Employment, hours and earnings (monthly series)	22,918	23,070	23,470
Monthly employment and unemployment estimates for States and local areas	6,000	6,000	6,000
Occupational statements (annual)	300	225	225
Technical memoranda prepared for occupational employment estimates	15	15	15
Survey questionnaires prepared for occupational employment estimates	54	54	54
Public service employment (PSE) wage indexes for States and localities	6,900	6,900	6,900
Labor turnover series	11,054	11,054	11,054

2. **Prices and cost of living.**—The Consumer Price Index and the Producer Price Index are compiled and published monthly. Revision of the Producer Price Index will continue in 1981. Special analytical studies of price changes are undertaken and family budget studies are prepared and published.

WORKLOAD STATISTICS (MAJOR ITEMS)

	1979 actual	1980 estimate	1981 estimate
Prices and cost of living:			
Consumer prices:			
(a) Outlet contacts (monthly)	22,800	22,800	22,800

(b) Price quotations collected/processed (monthly).....	125,000	125,000	125,000
(c) Indexes published (monthly).....	4,845	4,845	4,845
(d) Outlet initiations (annually).....	8,800	8,800	8,800
Producer prices:			
(a) Commodity indexes.....	2,800	2,800	2,800
(b) Industry sector price indexes (ISPI).....	169	169	138
(c) Mining and manufacturing.....	35	75	75
International price program: major U.S. exporting and importing companies interviewed for price information: ¹			
Export price indexes.....	65	76	76
Import price indexes.....	65	71	71

¹ Percent of value of imports or exports covered by indexes.

3. Wages and industrial relations.—Data are collected and analyzed by occupation on wages and salaries in major labor markets and industries. Monthly information is compiled on work stoppages and wage developments. Reports and studies are issued on fringe benefits, expenditures, collective bargaining agreements, trade union organization, and private welfare and pension plans.

WORKLOAD STATISTICS (MAJOR ITEMS)

	1979 actual	1980 estimate	1981 estimate
Wages and industrial relations:			
Municipal government wage surveys: establishments reporting annually.....	27	27	27
Occupational wages: establishments reporting annually.....	26,000	27,500	36,500
Union wage scales: unions reporting annually.....	1,100	1,100	1,100
Union wage scales: unions reporting biennially.....	450	400	400
Union wage scales: unions reporting quarterly.....	290	290	290
General wage rate change units studies.....	5,100	2,300	2,400
Studies of provisions of labor management agreements: establishments reporting.....	8,700	4,900	4,900
Work stoppages: employers and unions reporting annually.....	11,500	11,000	10,500
Employment Cost Index: establishments reporting quarterly.....	2,500	3,000	3,000
Employment Cost Index: personal visit initiation.....	400	1,100	400
Level of benefits: summary plans analyzed and coded.....	5,200	5,900	11,300

4. Productivity and technology.—Analyses are prepared on output per work-hour and unit-labor cost trends for both the entire U.S. economy and for specific industries. Studies are conducted on automation and other technological changes and on the adjustments to such changes. Studies are made of labor requirements for selected types of construction. Analyses and international comparisons are made of prices, wages, employment, unemployment, and unit-labor costs. Research is conducted on the effects of international trade on U.S. employment.

5. Economic growth.—Long-range projections of U.S. economic growth are prepared. Special economic and social studies are undertaken and special reports are prepared for the Commissioner, the Secretary, the Council of Economic Advisers, and other Government agencies.

6. Executive direction and staff services.—Provides leadership in developing plans and policies for the Bureau's economic, statistical, and management programs. Statistical and data processing systems are operated and maintained. Research and report activities are coordinated; publications and news releases are planned and edited; and a central inquiry service is maintained.

* Includes capital investment as follows: \$350,000 in 1979; \$97,000 in 1980; \$95,000 in 1981.

1. *Executive direction.*—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

2. *Legal services.*—Includes enforcement of Federal labor statutes and legal services related to the statutes administered by the Department. Provides legal advisory, legislative and litigation services under the Labor-Management Reporting and Disclosure Act, the Employee Retirement Income Security Act, the Occupational Safety and Health Act, the Federal Mine Safety and Health Amendments Act, Executive Orders 11246 and 11491, and title VI of the Civil Rights Act of 1964.

3. *International labor affairs.*—Integrates all international labor programs and foreign economic policy within the Department; administers the program of adjustment assistance to workers covered under the Trade Act of 1974; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

4. *Administration and management.*—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment; and provides for consistent and constructive internal labor-management relations throughout the Department.

5. *Adjudication.*—Operates an adjudication program for conducting formal hearings and rendering timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices and other labor-related areas.

6. *Promoting employment of the handicapped.*—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically handicapped, mentally retarded, and mentally restored persons.

7. *Women's bureau.*—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

8. *Inspector general.*—Detects and investigates fraud, program abuse, collusion, and other statutory violations in departmental programs. Investigates organized crime activities connected with departmental programs. Reviews and audits DOL programs and funds for fiscal integrity, regulatory compliance, efficient operations, and program results.

9. *Minimum wage study commission.*—Conducts an independent study of the Fair Labor Standards Act (FLSA) of 1938 and the social, political, and economic ramifications of that act and exemptions from that act.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law, \$70,000, to remain available until expended: *Provided*, That this appropriation shall be available, in addition to other appropriations to such agency for payments in the foregoing currencies. (7 U.S.C. 1704.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. The 1980 amounts shown below are based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of H.R. 4389, the Departments of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

Program and Financing (in thousands of dollars)

Identification code 16-0151-0-1-505	1979 actual	1980 est.	1981 est.
Program by activities:			
10.00 Foreign service consultations (costs—obligations) (object class 21.0).....	6	174	70
Financing:			
21.40 Unobligated balance available, start of year..	—40	—104
24.40 Unobligated balance available, end of year..	104
40.00 Budget authority (appropriation) ..	70	70	70
Relation of obligations to outlays:			
71.00 Obligations incurred, net.....	5	174	70
72.40 Obligated balance, start of year.....	4
90.00 Outlays.....	9	174	70

This activity utilizes currencies available under title I of the Agricultural Trade Development and Assistance Act of 1954, declared by the Treasury Department to be excess to the normal requirements of the United States.

Foreign service consultations.—Overseas regional conferences and consultations with labor attachés and economic officers are designed to provide a useful forum for discussion of regional problems which influence foreign policy; enable the overseas officers to be currently informed concerning U.S. objectives and developments affecting their work; facilitate development of new methods for implementing U.S. objectives in labor and manpower areas; and enable Washington officials to inform the overseas officers concerning reporting needed to enable the Department of Labor to fulfill its responsibilities.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

- Department of Health and Human Services
- “Human Development Services.”
- “Work Incentives.”
- International Communication Agency, “Salaries and expenses.”

Intragovernmental funds:

90.00 Outlays.....	—1,198

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (29 U.S.C. 563):

1. **Administrative management services.**—Provides a broad range of administrative services, including space management, procurement, contracting, printing management, supply and property management, mail, messenger, motor pool, photographic and visual exhibit, appropriation accounting, cost accounting, property accounting, working capital fund accounting, and payroll and voucher payment services.

2. **Field services.**—Provides centralized services from the Department's 10 regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services.

3. **Data processing services.**—Provides centralized data processing services as requested by agencies of the Department.

4. **Penalty mail and telecommunications.**—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

Financing.—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Operating results.—The fund ended 1979 with a net operating income of \$2.3 million. This was the result of collecting for automatic data processing conversion.

GENERAL PROVISIONS

Note.—The regular appropriation for this agency had not been enacted at the time this budget was prepared. The 1980 language shown below is based upon a continuing resolution (Public Law 96-123) in effect through September 30, 1980, that provides for language consistent with that which would be provided by the conference version of H.R. 4389, the Department of Labor, and Health, Education, and Welfare Appropriations Act, 1980.

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

【SEC. 102. None of the funds appropriated under this title shall be used to pay any prisoner for work performed prior to 12 months before the presumptive release date of such prisoner.】

【SEC. 103. No part of the funds appropriated under this title may be used to carry out any activities for or on behalf of any individual who is an alien in the United States in violation of the Immigration and Nationality Act or any other law of the United States relating to the immigration, exclusion, deportation, or expulsion of aliens.】

TITLE [IV] V—GENERAL PROVISIONS

SEC. [401.] 501. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. [402.] 502. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. [403.] 503. Appropriations contained in this Act, available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. [404.] 504. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. [405.] 505. The [Secretary of Labor and the Secretary of Health, Education, and Welfare] *Secretaries of Labor, Education, and Health and Human Services* are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. [406.] 506. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [407.] 507. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient or agent acting for such recipient to engage in any activity designed to influence legislation or appropriations pending before the Congress.

SEC. [408.] 508. The [Secretary of Labor and the Secretary of Health, Education, and Welfare] *Secretaries of Labor, Education, and Health and Human Services* are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles [I and II] *I, II, and III*, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, Federal Mediation and Conciliation Service."

SEC. [409.] 509. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or his parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

Note.—Includes \$13,027 thousand in 1981 for activities previously financed from:
(In thousands of dollars)

Missions to international organizations.....	1979 actual 12,362	1980 est. 13,508
--	-----------------------	---------------------

Excludes \$11,298 thousand in 1980 (beginning April 1, 1980) and \$24,563 thousand in 1981 for activities transferred to Operations and administration, International Trade Administration, Department of Commerce. Comparable amounts for 1979 (\$19,780 thousand) and 1980 through March 31, 1980 (\$10,882 thousand) are included above.

Excludes \$68 thousand in 1980 (beginning January 2, 1980) and \$91 thousand in 1981 for activities transferred to Salaries and expenses, Office of the United States Trade Representative. Comparable amounts for 1979 (\$88 thousand) and 1980 through January 1, 1980 (\$22 thousand) are included above.

The program described below is financed by this appropriation and by reimbursements from other agencies, which are provided with most of their administrative services overseas by the Department of State, and from non-Federal sources.

1. *Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional bureaus of the Department.

2. *Conduct of diplomatic and consular relations with foreign countries.*—This includes representation of the United States and its citizens abroad, political and economic negotiations and reporting, consular operations, and overseas administrative services. Major items of increase are for rising prices and local employee wage rates in other countries, increased passport and consular services, improved communications services, increases in Foreign Service transfer allowances, and improved reporting and analysis of overseas political and economic developments and trends. Partially offsetting reductions are reflected from the closing of 12 overseas posts in 1980 and the waiver, under legislation to be proposed, of nonimmigrant visas for business and pleasure visits by citizens of low-fraud countries which do not require visas of Americans. Effective April 1, 1980, commercial activities in 65 countries will be transferred to the Department of Commerce.

3. *Conduct of diplomatic relations with international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on

General and special funds—Continued

SALARIES AND EXPENSES—Continued

political and security issues and in such specialized fields as world health, education, and labor activities.

4. *Domestic public information and liaison.*—This program provides for informing the American public on international policies and also keeping the Department informed on American attitudes on foreign policy.

5. *Central program services.*—These provide personnel and physical security measures, operations of the Foreign Service Institute, and the administration of a global communications system for civilian activities of the Government, including services for other agencies on a reimbursable basis.

6. *Administrative and staff activities.*—These include normal domestic administrative activities.

The Foreign Service buildings program provides consolidated office space for the Foreign Service and other Government agencies abroad and living quarters for American employees. This program also finances real property leases of 10 years or more (shorter term leases are included in Salaries and expenses); procurement of initial furniture and furnishings; and repair, maintenance, and operating costs of these facilities. In 1981, building operating expenses, which previously were reimbursed by other agencies, will be financed from this account.

The table below shows present and estimated property holdings (including acquisitions under the special foreign currency program) by type and structure and geographic area (in thousands of dollars):

General and special funds—Continued

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS
ABROAD—Continued

Unsatisfactory Government-owned or leased office space is replaced with structures designed specifically to meet the particular needs of the Foreign Service and other Government civilian operations overseas. Housing is provided for American employees in localities where suitable housing is otherwise unavailable.

Since 1961 a separate appropriation for payments in excess foreign currencies has been enacted annually to supplement the regular appropriation. These currencies are used to acquire or construct real property and to finance operating and maintenance costs to the greatest extent possible. Countries in which the appropriation is expected to be used in 1981 are the Arab Republic of Egypt, Burma, Guinea, India, and Pakistan.

2900 Outstanding, end of year.....	3,325	3,786	4,126

These funds are used for relief and repatriation loans to U.S. citizens abroad and for other emergencies of the Department. Repayments are deposited to miscellaneous receipts. The outstanding balance of the loans subject to collection by the Department of State amounted to \$3,325 thousand on September 30, 1979.

BUYING POWER MAINTENANCE

For transfer by the Secretary of State to appropriations available for the overseas operations of the Department of State for any fiscal year when necessary to maintain the approved level of operations and to eliminate substantial losses to appropriations caused by fluctuations in foreign currency exchange rates or overseas wage and price changes: \$20,000,000, to be available without fiscal year limitation. In order to eliminate substantial gains to approved levels of overseas operations, the Secretary is authorized to transfer to this account amounts in other accounts which are determined by the Secretary to be excessive to the needs of an approved level of operations due to foreign currency exchange rates or overseas wage and price changes. Funds transferred from this account shall be merged with and be available for the same purpose, and for the same time period, as the appropriation to which transferred, and funds transferred to this account shall be merged with and available for the purpose of this appropriation until expended. Restrictions contained within appropriations or other provisions of law limiting the amounts that may be obligated or expended are hereby adjusted to the extent necessary to offset the net effect of fluctuations in foreign currency exchange rates or overseas wage and price changes in order to maintain approved levels. (Additional authorizing legislation to be proposed.)

40.00 Budget authority (appropriation).....			20,000
Relation of obligations to outlays:			
71.00 Obligations incurred, net.....			
90.00 Outlays.....			

This appropriation would offset losses due to exchange rate and overseas wage or price fluctuations unanticipated in the budget. Any gains due to fluctuations would be merged with this appropriation to be available to offset future losses.

Management of the Department would be enhanced by the ready availability of funds to meet unbudgeted inflation and exchange rate losses. Under present arrangements, the uncertain timing and amounts of supplementals require management to revise and often to delay the execution of budget plans.

PAYMENT TO THE AMERICAN INSTITUTE IN TAIWAN

For necessary expenses to carry out the Taiwan Relations Act, Public Law 96-8 (93 Stat. 14) [for fiscal year 1980, \$5,954,000], \$6,582,000. (Department of State Appropriation Act, 1980; additional authorizing legislation to be proposed.)

Program and Financing (in thousand of dollars)			
Identification code	1979 actual	1980 est.	1981 est.
19-0523-0-1-153			
Program by activities:			
10.00 Payment to the American Institute in Taiwan (obligations) (object class 25.0).....		5,954	6,582

90.00 Outlays.....		5,060	6,190

The Taiwan Relations Act (Public Law 96-8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan and authorizes funds to be appropriated to the Secretary of State to carry out the provisions of the act.

This appropriation will enable the Department to contract with the Institute to conduct commercial, cultural and other relations with the people on Taiwan.

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND*

*See Part III for additional information.

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for increasing shares of the interest on the unfunded liability and disbursements attributable to military service: 90% in 1979 and the full 100% in 1980 and each year thereafter.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Funds appropriated to the President:

- "Peacekeeping operations."
- "Development assistance program."
- "International organizations and programs."
- "Operating expenses of the Agency for International Development."
- "Military assistance."

Interior: Bureau of Reclamation: "Colorado River Basin salinity control projects."

Transportation: Federal Highway Administration: "Chamizal Memorial Highway."

International Communication Agency: "Salaries and expenses, special foreign currency program"; "Salaries and expenses."

U.S. Arms Control and Disarmament Agency: "Arms control and disarmament activities."

Intragovernmental funds:

This fund finances on a reimbursable basis certain administrative and medical services and the operation of the West African Consolidated Administrative Support Center (WACASC) at Lagos, Nigeria (22 U.S.C. 2684). The operations of the Kabul Medical Hospital and the West African Consolidated Administrative Support Center at Lagos, Nigeria ceased on September 30, 1979. Therefore, no financing is included for these entities in 1980 and 1981.

The fund is maintained through: (a) contributions by participants, consisting of all Foreign Service officers, Foreign Service information officers, Foreign Service reserve officers with unlimited tenure, and all Foreign Service staff officers and employees with unlimited appointments, amounting to 7% of their basic salaries; (b) matching Government contributions; (c) special Government contributions from Payment to the Foreign Service retirement and disability fund; and (d) interest on investments (22 U.S.C. 1062).

It is estimated that approximately 7,343 annuitants will be paid retirement benefits from this fund September 30, 1981, compared with 6,898 paid September 30, 1980, and 6,398 paid September 30, 1979. Gratuities and refunds represent payments to eligible former participants leaving the retirement system.

The status of the fund is as follows (in thousands of dollars):

As a member of the above listed organizations, the United States contributes its assessed share of the budgets of those organizations. The 1981 estimates reflect approved budgets of only a few organizations; budgets for most others have not yet been adopted. For those, the United States proposes to support only increases needed to maintain the prior year's level of operations in most organizations and minimal program growth in a selected few organizations. The United States will continue to encourage the organizations to meet new and expanded needs from reductions in low priority activities. With only a few exceptions, therefore, the increases reflected in the 1981 estimates are attributable to inflation and foreign currency fluctuation.

Note—Includes \$240 thousand in 1981 for activities previously financed from: Missions to international organizations 1979, \$240 thousand, 1980, \$240 thousand

This appropriation funds official U.S. Government participation in multilateral intergovernmental conferences and bilateral and multilateral interparliamentary entities; certain expenses of international secretariats to meetings, conferences, and related activities held under U.S. auspices; and contributions to organizations with which U.S. relations are new or provisional. Prior to 1981 resources for interparliamentary entities were included in the Missions to international organizations appropriation.

INTERNATIONAL COMMISSIONS

Federal Funds

General and special funds:

For necessary expenses, not otherwise provided for, to meet obligations of the United States arising under treaties, conventions, or specific Acts of Congress, as follows:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES
AND MEXICO

For necessary expenses for the United States Section of the United States and Mexico International Boundary and Water Commission, and to comply with laws applicable to the United States Section; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows: (*Department of State Appropriation Act, 1980.*)

SALARIES AND EXPENSES

For salaries and expenses, not otherwise provided for, including examination, preliminary surveys, and investigations, and operation and maintenance of projects, [\$7,700,000] \$8,123,000: *Provided*, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89): *Provided further*, That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the cost of said dam as shall have been allocated to such purposes by the Secretary of State. (*Department of State Appropriation Act, 1980.*)

1. *Administration.*—Activities comprise negotiations and supervision of joint projects with Mexico to solve international problems, overall control of the operation of the U.S. section of the Commission, formulation of operating policies and procedures, and financial management to carry out international obligations of the United States, pursuant to treaty and congressional authorization.

2. *Engineering.*—This provides for: (a) supervision of measurement and determination of the national ownership of boundary waters, (b) technical engineering guidance and supervision of the planning, construction, and operation and maintenance of international projects, (c) studies relating to international problems of a continuing nature, and (d) preliminary surveys and investigations to determine the need for and feasibility of projects for the solution of international problems arising along the boundary.

3. *Operation and maintenance.*—This appropriation also finances the U.S. part of the operation and maintenance of river channel and levee projects, dams, gaging

stations, water quality control projects, and boundary monuments and markers.

1. *Lower Rio Grande flood control improvement program.*—Work will be completed in 1980 on repairs and improvements of flood control work which protect the cities of Brownsville, Harlingen, Mercedes, Hidalgo, and Weslaco, Tex.

2. *Tijuana River flood control project.*—Construction of U.S. improvements required for flood control in the

Tijuana River Valley in California and Baja, Calif., will be completed in 1980.

3. *1970 boundary treaty projects.*—Work will continue to provide for boundary preservation works, and for protection of the boundary against encroachments.

4. *Rio Grande canalization project.*—Modification of this existing project will be completed in 1980 in order to safeguard from floods the urban development that

General and special funds—Continued

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO—Continued
CONSTRUCTION—Continued

has taken place since construction of the project in 1943.

5. *Amistad Dam powerplant.*—Power facilities are to be built on the U.S. side of the dam, on a self-liquidating basis as required by the act. The recently completed contract for the sale of power from Amistad and the existing Falcon powerplant will retire the U.S. investment allocated to power plus interest over a 50-year period and will cover the annual costs of operation and maintenance and equipment replacement.

6. *Nogales international waste-water treatment plant.*—Improvements to the existing facility are required to meet current EPA standards. The project improvements are to be initiated in 1980 and are scheduled to be completed in 1981.

These funds are used for payment of the U.S. share of the expenses of:

1. *International Boundary Commission.*—The Commission, in accordance with existing treaties, maintains the physical boundary between the United States and Canada by surveying, inspecting and clearing the boundary and repairing or replacing markers as necessary. The 1981 activities will focus on: (1) inspecting and clearing the remaining 38 miles of the 77.6 mile North Line in Maine; (2) inspecting and clearing an additional 33 miles of boundary along the 141st Meridian in the Yukon Territory, Alaska; and (3) completing the computerization of IBC survey data (approximately 7,500 points) for inclusion in the U.S. National Geodetic Survey's 1983 Adjustment Report.

2. *International Joint Commission.*—Pursuant to the Boundary Waters Treaty of 1909 the Commission approves, regulates, and monitors structures in boundary

waters and transboundary streams; investigates matters referred to it by the Governments of the United States and Canada that principally include transboundary water quality; and continues ongoing surveillance at the request of the two Governments. The most important mission is permanent surveillance of Great Lakes Water Quality Agreement compliance. During 1981 the Commission will continue regulation of 13 structures, investigation of approximately six matters referred to it (including in particular those undertaken pursuant to the 1978 Great Lakes Water Quality Agreement and references dealing with the regulation of Great Lakes levels) and ongoing surveillance in approximately seven cases. Completion of two investigations is expected. Annual, special or final reports on several other matters are expected as are new referrals for study.

These funds are used for payment of the U.S. share of the expenses of ten international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Salmon Commissions regulate their respective fisheries, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control, and all the commissions are authorized to recommend conservation measures to the member governments. The

Federal Funds

General and special funds:

MIGRATION AND REFUGEE ASSISTANCE

For expenses, not otherwise provided for, necessary to enable the Secretary of State to provide, as authorized by law, a contribution to the International Committee of the Red Cross and assistance to refugees, including contributions to international organizations; salaries and expenses of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1160); allowances as authorized by 5 U.S.C. 5921-5925; hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109; \$552,298,000: Provided, That these funds shall be administered in a manner that insures equity in the treatment of all refugees receiving Federal assistance: Provided further, That no funds herein appropriated shall be used to assist directly in the migration to the United States of any person not having a security clearance based on reasonable standards to insure against Communist infiltration in the United States. (Additional authorizing legislation to be proposed for \$94,500,000.)

Note.—The regular appropriation for this account for 1980 had not been enacted at the time this budget was prepared. Funding is currently provided by a continuing resolution (Public Law 96-123) in effect through September 30, 1980. The 1980 amounts shown below are based on House and Senate action on H.R. 4473, Foreign Assistance and Related Programs Appropriations Act, 1980.

1. *Indochinese refugee program.*—The 1981 estimate provides for the care and maintenance of refugees in Southeast Asia and assumes the resettlement of 168,000 Indochinese refugees in the United States.

2. *Soviet, Eastern European, and other refugees program.*—The United States funds the care and maintenance of Soviet and Eastern European refugees in Europe through various private American voluntary agencies. The 1981 estimate assumes that 54,000 Soviet and Eastern European refugees will be resettled in the United States.

4. *African refugee program.*—The U.S. contribution to the programs of various international organizations assist in the care of refugees and displaced persons throughout the African continent. In 1981, special projects assistance will be funded through voluntary agencies designed to aid refugees not reached by multilateral programs.

5. *Middle East and other areas refugee program.*—Contributions to the United Nations Relief and Works Agency and other international organizations provide food, health and educational assistance to refugees in the Middle East and other areas.

Property owned by the United States in the northwest section of the District of Columbia bounded by Connecticut Avenue, Van Ness Street, Reno Road, and Tilden Street will be leased to foreign governments for use as embassies (82 Stat. 958). A special appropriation in 1974 is allocated to the General Services Administration as required to cover the first stage of site preparation. The remainder of the site preparation will be financed from proceeds.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 101. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

SEC. 102. Funds appropriated under this title shall be available for expenses of binational arbitrations arising under treaties or other international agreements, including international air transport agreements, and arbitrations arising under contracts authorized by law for the performance of services or acquisition of property abroad.

SEC. 103. Funds appropriated under this title shall be available, except as otherwise provided, for salaries and expenses of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); allowances as authorized by 5 U.S.C. 5921-5925; services as authorized by 5 U.S.C. 3109; expenses as authorized by section 2 (a), (c) and (e) of the Act of August 1, 1956, as amended (22 U.S.C. 2669); and hire of passenger or freight transportation.

SEC. 104. Obligated balances in the account under the heading "Missions to international organizations" may be transferred to and merged with the accounts under the headings "Salaries and expenses", "Representation allowances", and "International conferences and contingencies," in amounts determined by the Director of the Office of Management and Budget (Department of State Appropriation Act, 1980.)

TITLE VI—GENERAL PROVISIONS

SEC. 601. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 602. No part of any appropriation contained in this Act shall be used to administer any program which is funded in whole or in part from foreign currencies or credits for which a specific dollar appropriation therefor has not been made.

SEC. 603. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 604. None of the funds appropriated or otherwise made available by this Act shall be available for the Advisory Committee on the Bureau of the Census or for any other advisory committee to the Department of Commerce which would perform similar duties and responsibilities, other than a committee which has, before July 1, 1978, filed a charter in accordance with section 9 of the Federal Advisory Committee Act. (Department of State Appropriation Act, 1980.)

DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Secretary of Transportation, including not to exceed \$27,000 for allocation within the Department of official reception and representation expenses as the Secretary may determine **[\$34,768,000]** **\$36,800,000.** (*Department of Transportation and Related Agencies Appropriation Act, 1980.*)

90.00 Outlays.....	16,676	16,000	15,000

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

1. *Transportation policy and planning.*—This research provides the foundation for development of transportation policy, for coordination of national level transportation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

3. *Special programs.*—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, technology sharing, and evaluation of departmental programs.

The Working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed in advance by the operating administrations and offices being served.

The activities of the Working capital fund have been consolidated as follows:

1. *Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

2. *Support services activities* include travel services and imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; and facilities management.

3. *Library services* include information retrieval services.

4. *Transportation computer activities* include computer time-sharing services and the transportation computer center.

NOTES

Includes \$7,162 thousand in 1981 for activities previously financed from: Department of Defense: Operation and maintenance, Navy.

Includes \$519 thousand in 1981 for activities previously financed from: Department of Defense: Other procurement, Navy.

Funds for operating expenses represent 61% of the total Coast Guard request. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas.

1. *Search and rescue.*—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, rescue coordination centers and other search and rescue facilities on 24-hour alert. Trained personnel are organized to receive notice of a distress incident, dispatch an appropriate search and rescue resource, and provide appropriate assistance on-scene to minimize loss of lives and property. In addition, the Coast Guard actively cooperates with other agencies and foreign nations to provide more effective search and rescue in the maritime region.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Responses to search and rescue cases serviced by Coast Guard regular forces or Coast Guard directed forces (auxiliary).....	82,770	87,820	93,180
Lives saved.....	4,210	4,520	4,860
Persons otherwise assisted.....	179,000	190,000	201,600
Property loss prevented (in thousands).....	\$280,400	\$284,900	\$289,400

2. *Aids to navigation.*—A network of manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. Administrative control is exercised over the construction, maintenance, and operation of bridges across the navigable waters of the United States to insure that the safe passage of navigation is not unreasonably interfered with. Included in aids to navigation are the Coast Guard's domestic ice operations which are performed by specially constructed icebreakers and cutters.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Loran-A coverage (thousands of square miles).....	2,736	2,736	1,544
Loran-C coverage (thousands of square miles).....	19,800	20,600	20,600
Federal floating aids.....	23,700	23,700	23,700
Federal fixed aids.....	24,300	24,300	24,300
Private aids authorized.....	37,000	37,000	37,000
Bridge permits and regulations issued.....	265	265	265
Domestic icebreaking:			
Operating hours.....	11,653	10,500	11,000
Vessels assisted.....	1,020	1,200	1,200

3. *Marine safety.*—The Coast Guard insures compliance with Federal statutes and regulations pertaining to the merchant marine industry by reviewing plans and specifications for the construction or alteration of merchant vessels; by periodic inspections; by investigating casualties; and by setting standards, procedures,

and practices under which merchant marine personnel are licensed and regulated. The Coast Guard reduces the risk of fatalities, injuries, and property damage associated with the operation of recreational boats through a boat safety standards program, boater information, education and compliance programs, support of the Coast Guard Auxiliary, and technical support of the individual State boating safety programs. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways against harm, and thereby improve their economic utilization and assure their availability in time of national emergency.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Commercial vessel safety:			
U.S. commercial vessels undergoing construction, average monthly totals.....	725	775	800
Seamen's documents.....	47,420	47,259	47,098
Marine incidents reported.....	12,540	12,738	12,935
Seamen's records maintained.....	105,000	100,000	100,000
Admeasurement applications.....	11,146	11,500	11,850
Vessel documentation applications.....	214,604	223,425	232,425
U.S. commercial vessels inspected.....	10,786	11,000	11,194
Foreign flag vessels subject to SOLAS and U.S. safety requirements examined.....	1,450	1,500	2,000
Fixed offshore structures inspected.....	2,300	2,200	2,250
Uninspected vessel operations.....	1,200	1,200	18,677
Boating safety:			
Factory visits/inspections.....	2,128	2,300	2,500
Defect campaigns.....	195	200	200
Potential units affected.....	468,368	510,000	550,000
Classroom instruction (student lessons in millions).....	1.30	1.40	1.45
Courtesy motorboat examinations (auxiliary).....	303,199	325,000	350,000
Assists (auxiliary).....	17,759	19,000	20,000
Boat boardings.....	48,000	49,000	50,000
Port safety:			
Cargo vessels/barges boarded.....	64,500	66,400	68,400
Waterfront facilities inspected.....	59,000	59,000	59,000
Explosive loadings and other dangerous cargo inspections.....	2,300	2,300	2,300
Harbor patrols (operating hours).....	125,000	118,800	122,400

4. *Marine environmental protection.*—Under various laws, international agreements, and conventions, the Coast Guard is charged with the prevention of damage to the marine environment and the enhancement of environmental quality.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Environmental protection:			
Aerial oil pollution patrols (flight hours).....	6,200	6,300	6,300
Oil and hazardous substances spills.....	15,000	16,000	16,000
Number of pollution investigations.....	9,000	9,500	9,500
District hearings.....	1,100	1,200	1,300
Number of civil penalties.....	3,200	3,400	3,400
Cargo transfer operations monitored.....	20,800	21,000	21,000
Oil pollution removal operations.....	6,000	7,000	7,000
Ocean dumping surveillance missions.....	800	600	200

5. *Enforcement of laws and treaties.*—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Cutter operating hours:			
Fisheries enforcement.....	52,470	60,000	60,000

Barrels of fuel (in thousands).....	551	800	800
International Ice Patrol:			
Aircraft hours.....	579	400	400
Ship operating hours.....	432	1,200	1,200

7. *Military readiness.*—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

WORKLOAD DATA

	1979 actual	1980 estimate	1981 estimate
Units trained by Coast Guard training teams.....	340	360	360
Vessels participating in refresher training or shake-down training.....	45	48	48
Ship weeks.....	145	145	160

Note.—Capital Investment: 1979, \$118,199 thousand; 1980, \$170,650 thousand; and 1981, \$150,410 thousand.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating expenses appropriation where estimated costs of a project are \$75 thousand or less, or where renewals and replacements involve less than 75% of the original facility. Although

most of the facilities listed below are multimission in nature, they are for this presentation highlighted only under their primary mission areas.

1. *Search and rescue.*—In 1981, ten 41-foot search and rescue boats will be constructed along with continued improvement and modernization of several 95-foot patrol (WPB) boats. The medium-range surveillance (MRS) aircraft and short-range recovery (SRR) helicopter procurement programs will continue. Construction, replacement, and/or renovation programs at selected shore sites and facilities are also provided for.

2. *Aids to navigation.*—Construction will begin on one new river tender (WLR) and the renovation of two 180-foot seagoing buoy tenders will continue. In addition, improvements to existing and the establishment of new waterway aids to navigation, the continuation of the lighthouse automation and modernization program, the loran-C improvement plan and procurement of two large navigation buoys (LNB's) are highlighted under this activity.

3. *Marine safety.*—Efforts to facilitate the marine safety mission will center on the acquisition, rehabilitation, renovation and improvement to selected vessels and shore facilities, including preconstruction costs for Marine Safety Office, Morgan City.

4. *Marine environmental protection.*—For 1981 this activity is primarily concerned with the procurement of oil pollution recovery systems with the capability to perform in open water areas and the procurement of dive team life support equipment and mobile command posts. The medium-range surveillance (MRS) aircraft and short-range recovery (SRR) helicopters will also be major contributors.

5. *Enforcement of laws and treaties.*—Emphasis in this activity centers on the continuation of the medium-endurance cutter replacement program and renovations and improvements to selected Coast Guard support centers.

6. *Marine science and polar ice operations.*—The 140-foot icebreaking tug (WTGB), medium-range surveillance aircraft, and short-range recovery helicopter procurement programs are the principal efforts of this activity for 1981.

7. *Military readiness.*—Major emphasis in this activity relates to the medium-endurance cutter replacement program.

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges; [\$7,650,000] \$16,200,000, to remain available until expended. (Title 14, United States Code; 33 U.S.C. 494, 511 et seq.; 49 U.S.C. 1,655 (g)(3); Department of Transportation and Related Agencies Appropriation Act, 1980; additional authorizing legislation to be proposed.)

Program and Financing (in thousands of dollars)

90.00 Outlays.....	7,238	12,000	16,200

This appropriation provides the Government's share of the costs for altering or removing bridges determined to be obstructions to navigation. In 1981, funding is

requested to continue alteration of the Pearl River, Mississippi River, Gulf Intracoastal Waterway and Three Mile Creek bridges and begin alteration of the Pt. Pleasant Canal bridge.

RETIRED PAY*

*See Part III for additional information.

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payment under the Retired Serviceman's Family Protection and Survivor Benefit Plans: [\$198,500,000] \$232,000,000. (Title 14, United States Code; 10 U.S.C. 1164, 1166, 1201, 1204, 1205, 1263, 1293, 1305, 1431-55; 33 U.S.C. 763, 763-1, 763-2, 763a-1, 763a-2, 765, 771, 772; Department of Transportation and Related Agencies Appropriation Act, 1980.)

91.30 Outlays from military pay raise supplemental		1,575	

The Coast Guard Reserve Forces program's objective is to provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested will provide a Ready Reserve of 19,900, including a Selected Reserve of 11,700.

1. **Initial training.**—This activity encompasses direct costs of initial training for three categories of nonprior service trainees. The first category involves those who perform approximately 30 weeks initial training comprised of recruit and entry level rate training. The second category involves reservists whose initial training is split between two consecutive summer periods. The first period, 2½ months, consists of recruit training. The second period, 2½ to 4 months, consists of entry level rate training and/or on-the-job training with the length of the period varying with the special-

ity. The third category involves those who receive only 15 weeks of initial training.

2. **Continuing training.**—Direct costs of officer and enlisted drills and annual active duty for training are programed under this activity.

3. **Operation and maintenance of training facilities.**—All costs for the operation and maintenance of Reserve training facilities are programed under this activity. Included are the costs of a training vessel, the prorated share of the cost of joint usage of Coast Guard and other Armed Forces facilities, the cost of providing station-keeper personnel for organized Reserve training units, and the procurement of training aids and facilities (under \$75 thousand).

4. **Administration.**—This activity encompasses all administrative costs of the Reserve Forces program.

5. **Miscellaneous services for other accounts.**—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

DAYS OF TRAINING

	1979 actual	1980 estimate	1981 estimate
Initial training: Initial active duty for training	149,160	160,000	160,000
Continuing training: Selected Reserve (with pay):			
Active duty for training	127,900	132,600	132,600
Drills (12-48 per year)	448,224	482,000	482,000
Other Ready Reserve (without pay):			
Drill training	19,815	14,000	14,000

90.00 Outlays.....	20,454	20,000	22,000

1. *Search and rescue.*—Emphasis will be placed on improving the search and rescue system effectiveness of Coast Guard forces. Ship/helicopter interface projects will be continued and/or completed for new and existing facilities; improved probability of detection methodology projects will be continued. Evaluation of rescue techniques and procedures will continue.

2. *Aids to navigation.*—Activities are designed to reduce the potential for damage to the environment and economic loss by an improved aid to navigation system for the maritime community. Continuing projects include applied research to develop loran-C for use in precision navigation in restricted waters and assess the effect of new technology of the global positioning navigation system on the maritime community. Continued emphasis will be given to the development of the quantitative relationship between visual aids to navigation and the accuracy of navigation and advanced development techniques to improve the accuracy and reliability of buoy positions.

3. *Marine safety.*—Commercial vessel safety research will be conducted to provide a knowledge base to support regulations and standards designed to prevent vessel casualties and to permit analysis of consequences of presently unpreventable accidents. Emphasis will be directed toward bulk hazardous cargo vessels and to human factors as they relate to the operation of vessels, transfer operations in U.S. ports, and the offshore industry operations. Recreational boating safety will emphasize background research for boating safety education, improved program impact measurement, safe loading standards, and personal flotation devices performance evaluation. Port safety and security research will develop vessel traffic management techniques to provide reliable and earlier conflict alerts, to assess impact of conflict resolution, to reduce congestion, and to route vessels of interest.

4. *Marine environmental protection.*—Emphasis is directed toward enhancing detection, identification, and quantification of pollutant spills, and development of new systems and procedures for the control and cleanup of those spills. Development and integration of a prototype airborne surveillance system for oil and hazardous substance identification and mapping of discharges should be completed.

5. *Enforcement of laws and treaties.*—This activity will initiate a limited multimission surveillance research and development program through the establishment of baseline system standards and levels of performance for surveillance of the 200-mile coastal management zone.

6. *Marine science and polar ice operations.*—The focus of this activity centers on ice-breaking and ice-clearing technology, improved effectiveness of the International Ice Patrol and the gathering of ice and ocean current information to facilitate ship movement in the arctic areas.

7. *Military readiness.*—Activity in this program area will be a direct result of work in the broad research programs, energy research and development, and multimission project areas.

STATE BOATING SAFETY ASSISTANCE

Program and Financing (in thousands of dollars)

Identification code 69-0246-0-1-403	1979 actual	1980 est.	1981 est.
Program by activities:			
State boating safety assistance (operating costs, funded)	4,895	2,358	
Change in selected resources (undelivered orders)	115	-2,205	
10.00 Total obligations (object class 41.0)	5,009	163	
Financing:			
21.40 Unobligated balance available, start of year	-173	-163	
24.40 Unobligated balance available, end of year	163		
40.00 Budget authority (appropriation)	5,000		

Relation of obligations to outlays:			
71.00	Obligations incurred, net	5,009	163
72.40	Obligated balance, start of year	1,282	1,923
74.40	Obligated balance, end of year	-1,923	
90.00	Outlays	4,368	2,086

This appropriation provided financial assistance for the development and implementation of comprehensive State boating safety programs. As a result of the success of this program in stimulating State boating safety functions, funding for this activity was terminated at the end of 1979. Additional resources were added to operations in 1979 to expand liaison with the States to support their continuing recreational boating safety activities. All remaining balances previously appropriated to this grant program should be expended by September 30, 1980.

[POLLUTION FUND]*

*See Part III for additional information.

[For carrying out the provisions of subsections (c), (d), (i), and (1) of section 311 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1321, \$10,000,000 to remain available until expended.] (Department of Transportation and Related Agencies Appropriation Act, 1980.)

90.00	Outlays	12,827	20,000

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, of an onshore facility or of an offshore facility does not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators.

74.98	Obligated balance, end of year	—2,054	—1,754	—1,754
90.00	Outlays	1,189	400	1,300

The Coast Guard supply fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing; commissary provisions; general stores; technical material; and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from sale of goods.

Activity of approximately \$81 million in this fund in 1981 is divided as follows: 7% for uniform clothing; 36% for commissary provisions; 14% for general stores and technical material; and 43% for fuel.

Budget authority of \$1.5 million will increase the range and depth of supply items managed in the Supply fund to significantly improve operating effectiveness of Coast Guard units. The budget authority will also help minimize the impact caused by significant increases in the prices of fuel and other commodities carried in the fund.

The Coast Guard cadet fund is utilized by the Superintendent of the Coast Guard Academy to receive, plan, control, and expend personal funds of Coast Guard cadets. By use of the fund each cadet is assured funds to meet personal expenses while at the Academy and an adequate balance in his account at graduation for officer outfits, civilian clothing, and graduation leave expenses. The fund also receives and expends funds of the Coast Guard Academy Athletic Association.

The Coast Guard surcharge collections, sales of commissary stores fund is used to finance expenses incurred in connection with the operation of the Coast Guard commissary stores at Coast Guard Base, Governors Island, N.Y.; Coast Guard Training Center, Petaluma, Calif.; and Coast Guard Base, Kodiak, Alaska. Revenue is derived from a surcharge placed on sales to authorized store patrons (14 U.S.C. 487).

1. *Operations*—(a) *Operation of traffic control system.*—This activity covers the operation of a national system of air traffic management in the United States and its possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 25 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at 445 major civil airports to guide traffic movements at and in the vicinity of the airports. Some 322 domestic and international flight service stations provide weather and other information to pilots and relay traffic control data between ground controllers and pilots.

TRENDS IN VOLUME OF AIR TRAFFIC

Year:	Landings and takeoffs at airports with FAA towers (in millions)	Instrument operations at airports with FAA traffic control service (in millions)	Revenue passenger miles (in billions)
1977 actual.....	66.7	31.5	187.7
1978 actual.....	67.2	33.5	218.9
1979 estimate.....	70.6	34.8	256.1
1980 estimate.....	73.9	40.1	273.7
1981 estimate.....	77.0	41.7	288.2

(b) *Installation and materiel services.*—This activity covers procurement, contracting and materiel management programs; leases communications services for the traffic control system, and administrative communications services provided through the Federal Telecommunications System (FTS); supplies support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leases costs for space for which payment is made to General Services Administration (GSA), and provides other logistics support functions. The increase in 1981 will provide for increased costs primarily related to supply support, leased communications and other services for both existing facilities and new facilities authorized under prior year establishment programs. These costs are partially offset by reduced staffing requirements.

(c) *Maintenance of traffic control system.*—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; and technical operation and maintenance of a national network of air navigation aids and traffic control facilities in the United States and its possessions. The increase in 1981 primarily provides for increased costs related to the operation and maintenance of both existing and new facilities, partially offset by a reduction in staffing requirements.

(d) *Administration of flight standards program.*—This activity exists to promote flight safety of commercial civil aircraft by assuring the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards; and the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program.

(e) *Administration of medical programs.*—This activity covers the development of regulations governing the physical and mental fitness of pilots and other persons whose health affects safety in flight; the application of these medical standards through the physical examination of applicants for new or periodic renewal of airmen medical certification; the management of a corps of over 7,800 designated aviation medical examiners trained in the special requirements of aviation medicine; the medical investigation of fatal general aviation aircraft accidents; the development and supervision of an occupational health program for agency personnel; the administration of an airman medical education pro-

gram and the administration of an aviation medical research program, the costs of which are financed under the Research, engineering and development and Facilities, engineering and development appropriations.

(f) *Development direction.*—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development and Facilities, engineering and development appropriations.

(g) *Administration of airports program.*—This activity includes the following work programs: (1) administration of a grants-in-aid program for airport planning and development; (2) maintenance of a national airport system plan; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; and (5) safety certification of airports serving Civil Aeronautics Board certificated air carriers.

General and special funds—Continued

FACILITIES, ENGINEERING AND DEVELOPMENT—Continued

1. *Engineering and development*—(a) *Aircraft safety*.—

This subactivity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft by assuring the design, flight performance, and airworthiness of aircraft and development of systems and devices to prevent and deter sabotage in the civil air transportation system.

(b) *Aviation medicine*.—This subactivity provides for conducting an aeromedical research and development program to identify and eliminate those physical, physiological, and psychological factors which may jeopardize flight safety.

(c) *Environment*.—Principal efforts provided for under this subactivity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system.

2. *Facilities and equipment*.—This activity provides for the purchase of training equipment used primarily by flight inspectors in keeping abreast of the latest technology in the areas of their responsibility and for the purpose of maintaining proficiency in the performance of their duties. Also included are procurement and modification of nonflight inspection aircraft, improvement and replacement of navigation equipment, and purchase of explosive detection devices for testing and evaluation purposes.

OPERATION AND MAINTENANCE, METROPOLITAN WASHINGTON AIRPORTS*

* See Part III for additional information.

For expenses incident to the care, operation, maintenance, improvement, and protection of the federally owned civil airports in the vicinity of the District of Columbia, including purchase of ten passenger motor vehicles for police or ambulance type use, for replacement only; and purchase of two motor bikes for replacement only; purchase, cleaning, and repair of uniforms; and arms and ammunition; [\$25,465,000] \$28,585,000: Provided, That there may be credited to this appropriation, funds received from air carriers, concessionaires and non-Federal tenants sufficient to cover utility and fuel costs which are in excess of \$5,506,000: Provided further, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, or private sources, for expenses incurred in the maintenance and operation of the federally owned civil airports. (49 U.S.C. 1301 et seq.; 54 Stat. 686, as amended, 1030 and 1039; 64 Stat. 770, as amended; Department of Transportation and Related Agencies Appropriation Act, 1980.)

91.20	Outlays from civilian pay raise supplemental.....		808	30

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Dulles International Airports which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

Combined revenues are expected to exceed the 1981 appropriation by \$15.3 million. The operating profit at Washington National in 1981 is expected to be \$12,193 thousand and \$3,317 thousand at Dulles International for a total operating profit of \$15,510 thousand. However, the deduction of \$6,675 thousand in depreciation and interest for the two airports results in a net profit of \$8,835 thousand.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

For 1981, it is proposed that, to the extent airport utility costs rise above those budgeted, revenues may be used to cover them.

The following table reflects increase in activity at the airports:

	1979 actual	1980 estimate	1981 estimate
Washington National Airport:

The projects in the construction program for Washington National and Dulles International Airports for 1981 are designed to accomplish the following three objectives:

Airport planning and development.—At Dulles International Airport, \$13,000,000 is included for construction of the connection of the airport access highway to interstate highway 66. Additional funding is included for public parking expansion.

Upgrade airport facilities and correct deficiencies.—Due to growth in the air industry and changes in tech-

General and special funds—Continued

CONSTRUCTION, METROPOLITAN WASHINGTON AIRPORTS—Continued

nology, existing facilities require expansion or replacement to increase load capacity or to upgrade performance through modernization. At National, funds are included to conduct a survey for building code compliance and construct projects to correct deficiencies, study and design the modernization/expansion of terminal restrooms, and improve access for the handicapped. At Dulles, funds are requested to improve the baggage handling equipment in the customs area and improve access for the handicapped.

Rehabilitate existing facilities.—Existing facilities require periodic rehabilitation due to deterioration from age and usage. At National, funds are programmed to rehabilitate the ramp at gate No. 2 and replace the main terminal roof. At Dulles, funds are included to replace electrical feeders, replace airfield pavement panels, and reroof service buildings.

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

In addition to the premium program, binders are also issued to cover aircraft, persons, and property. These binders would provide aviation insurance in wartime and under certain situations short of war. Also available are policies which provide similar coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exists indemnity agreements whereunder the DOD and DOS agree to reimburse the Department of Transportation for all losses paid to air carriers sustaining damage to their aircraft by an insured peril while said aircraft is operating under a contract to the interested Department.

Administration costs are out of fee receipts (49 U.S.C. 1531, as amended 75 Stat. 210) and interests earned through authorized investments.

¹ Represents total for Grants-in-aid for airports.

The Airport and Airway Revenue Act of 1970 (49 U.S.C. 1742(a)), as amended, provides for the revenues received in the Treasury from passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid airports and airways.

The status of the fund is as follows (in thousands of dollars):

Unexpended balance brought forward:

The Airport and Airway Development Act of 1970 (Public Law 91-258, as amended) authorizes the Secretary of Transportation to incur obligations for airport planning and development grants for 1976 through 1980. The administration has proposed legislation calling for a \$4 billion airport grants program for the time period 1981-85. Some of the major features of this proposal are an increased funding level for a consolidated airport development and planning grant program, greater involvement of the States on an optional basis in the administration of airport grants, and grant eligibility for certain noise compatibility items and planning of noise abatement actions.

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)

[(INCLUDING TRANSFER OF FUNDS)]

For necessary expenses, not otherwise provided for; for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities, including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; construction and furnishing of quarters and related accommodations for officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available; and purchase of one aircraft; to be derived from the Airport and Airway Trust Fund, [\$293,000,000, of which \$43,000,000 shall be derived by transfer from the Appropriation "Facilities and Equipment (Airport and Airway Trust Fund), 1977,"] \$350,000,000, to remain available until September 30, [1984] 1985: Provided, That there may be credited to this appropriation, funds

received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities[: *Provided further, That no part of the foregoing appropriation shall be available for the construction of a new wind tunnel, or to purchase any land for or in connection with the National Aviation Facilities Experimental Center, or to decommission in excess of five flight service stations*]. (49 U.S.C. 1151-60, 1301 et seq., 1507, 1701 et seq.; Department of Transportation and Related Agencies Appropriation Act, 1980; additional authorizing legislation has been proposed.)

Under this appropriation, the Federal airway system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs such as aircraft for flight inspection of facilities and related training, and experimental facilities for the engineering and development program. Operating costs of facilities procured under this appropriation are financed under the Operations appropriation. The administration has proposed legislation calling for a \$2.1 billion facilities/equipment program for the time period 1981-85.

Funding in the amount of \$51.6 million is contained in the 1981 request to complete the VOR/VORTAC equipment replacement program. When fully implemented, this program will provide annual savings to the Government of 788 employee years and \$27.5 million. Financing is contained in 1981 to modernize and automate the flight service stations. Additionally, this request contains the initial funding increment of a multi-year program to establish discrete address beacon systems. These facilities will provide improved surveillance accuracies, data link transmissions, and an automated traffic advisory and resolution service. The budget activities include the following facilities and functions:

1. *Air route traffic control centers.*—Long range radar provides FAA air traffic controllers with information on aircraft positions at distances up to 185 miles. Automation equipment includes computers and other devices which aid controllers in handling en route air traffic. Other center activities cover the installation of equipment to provide communications and related services.

2. *Airport traffic control towers.*—Terminal area radar aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 60 miles. Terminal area automation includes computers and other devices which aid controllers in handling terminal air traffic. Other tower activities include the establishment, improvement, and relocation of airport traffic control tower facilities.

3. *Flight service facilities.*—Domestic flight service stations and associated facilities provide flight assistance to pilots. International flight service stations provide long-distance communications for transoceanic flights.

4. *Air navigation facilities.*—Very high frequency omnidirectional radio ranges equipped with tactical air navigation capabilities (VORTAC) are standard short-range navigation aids used to define airways and air routes and to provide distance and direction information to pilots. Low and medium frequency facilities include radio beacons and ranges which provide pilots with direction and weather information. Instrument landing systems (which provide pilots with direction, distance, and glide slope information necessary for making safe approaches to runways under poor visibility conditions), distance measuring equipment, and visual lighting aids assist pilots in making final approaches to airport runways, particularly in areas where terrain and other environmental factors pose potential hazards to safe landings.

5. *Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations.

6. *Aircraft and related equipment.*—This activity provides for flight inspection of facilities, including procurement, modification, and/or replacement of aircraft and equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air and flight inspection training equipment.

7. *Development, test, and evaluation facilities.*—This activity provides for leasing and improvement of plant and facilities at the National Aviation Facilities Experimental Center in Atlantic City, N.J. It also includes the procurement, rehabilitation, or replacement of equip-

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase its productivity and capacity to meet the expected air traffic demands of the future. These efforts are based upon exploiting current technology and applying system engineering techniques to the development and integration of new equipment into the total system. The agency also administers aviation medical research aimed at increasing the personal effectiveness of traffic controllers.

These programs are conducted under the direction of the agency's technical personnel, through contracts with qualified private firms, universities, individuals and other Government agencies.

1. *Air traffic control.*—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the surveillance of aircraft by tracking radars and control center processing of flight information received from pilots, airline dispatchers, flight service stations and the surveillance system through a national communications

network. The high-speed or real-time, computerized processing of this data for the direct use of air traffic controllers is a key to increasing system productivity. This traffic control program also provides for increasing the capacity of major airports to handle larger, faster passenger aircraft safely and efficiently. Increases in airport capacity will be achieved by the development of new procedures and equipment/computer programs which will enable more efficient metering and spacing of terminal traffic under all weather conditions.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

2. *Navigation.*—This provides for modernization, expansion, and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation. This capability ranks in importance with the radar surveillance of aircraft in the effort to increase system capacity. It requires the exploitation of all available and planned techniques, as well as the development of new navigation techniques and sophisticated landing systems capable of handling increased air traffic in adverse weather conditions.

3. *Aviation weather.*—This provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of systems for the detection and avoidance of wind shears is also included in this activity.

4. *Aviation medicine.*—This provides for conducting aeromedical research directed toward identifying and eliminating those physiological and psychological factors inimical to personnel engaged in operating the traffic control system.

77.00 Adjustments in expired accounts.....	45		
90.00 Outlays.....	300,024	325,000	1,300,000

Certain costs of maintaining air navigation facilities, formerly 100% financed from the general fund, are to be reimbursed to the Operations appropriation from the Airport and airway trust fund. The expected level of 1981 trust fund receipts will permit a partial payment of operations and maintenance expenses as well as the costs of airport development, airway facilities investment, and research programs.

The administration has proposed legislation to increase significantly the level of trust funds allocated to cover operations and maintenance expenses of the Federal Aviation Administration. During the 1981-85 time period, \$8 billion will be proposed for these operational and maintenance activities.

AIRCRAFT PURCHASE LOAN GUARANTEE

In carrying out the program for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), during fiscal year 1981 total new commitments to guarantee loans shall not exceed \$400,000,000 of contingent liability for loan principal, including \$100,000,000 for which priority shall be given to guarantees of aircraft purchase loans to commuter air carriers serving smaller communities. (Department of Transportation and Related Agencies Appropriation Act, 1980.)

AIRCRAFT PURCHASE LOAN GUARANTEE—Continued

Status of Loan Guarantees (in thousands of dollars)		1979 actual	1980 est.	1981 est.
Position with respect to limitation on loan guarantees:				
3110	Limitation on commitments: Appropriation ..		650,000	400,000
3200	Commitments, gross.....	-10,824	-400,000	-400,000
3900	Unused balance of limitation, expiring.....		250,000	
Cumulative balance of guarantees outstanding:				
4100	Outstanding, start of year.....	187,941	171,052	558,375
4200	New loan guarantees.....	8,018	401,724	400,000
4400	Repayments or prepayments.....	-24,907	-14,401	-39,780
4900	Outstanding, end of year.....	171,052	558,375	918,595

Pursuant to Public Law 85-304, as amended, the Secretary of Transportation was authorized to provide Government guaranty of private loans to certain air carriers for the purchase of modern aircraft and equipment when financing was not otherwise available on reasonable terms. This authority expired September 7, 1977; but on October 24, 1978, a new aircraft loan guarantee program was authorized (Public Law 95-504) primarily to offset any deterioration of service to small communities resulting from the Airline Deregulation Act of 1978. The table above reflects the activity of both programs.

For 1980, new loan guarantees are estimated to be \$400 million. If the demands for loan guarantees are greater than now estimated, new loan commitments up to the \$650 million ceiling will be made. Estimated new loan commitments in 1981 are \$400 million, including at least \$100 million for carriers serving small communities.

FEDERAL HIGHWAY ADMINISTRATION

Title 23 U.S.C. ("Highways") and other supporting legislation provide authority for the various programs of the Federal Highway Administration designed to improve highways throughout the Nation.

In summary, the 1981 budget contemplates \$8,992.5 million in obligations and \$8,218.7 million in outlays. The following table compares 1981 program level (obligations) with those of prior years (in millions of dollars).

Account:	(In millions of dollars)

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway safety transportation by regulation of motor carriers engaged in interstate commerce. In 1981, efforts will be made to implement fully the revised hazardous materials regulatory program, increase noise control, and provide knowledge to improve safety regulation of interstate trucks and buses, consistent with the Government-wide effort of regulatory reform. A \$3 million motor carrier safety

demonstration program will be continued in 1981. This program provides assistance to selected States for upgrading their enforcement efforts.

This program provides grant assistance for projects initiated pursuant to the provisions of the Highway Beautification Act of 1965, together with the Federal-Aid Highway Acts of 1968 and 1970, as amended. Activities funded include junkyard screening and removal, control of commercial advertising along highways, and program administration.

A recent General Accounting Office report indicates that "In light of the problems and limited progress by most States in removing nonconforming signs, it appears that the objectives of the Highway Beautification Act will not be accomplished in the near future." Enactment of the Surface Transportation Assistance Act has created further problems for the beautification program. The requirement for just compensation for billboard removal is extended to signs that are removed pursuant to local ordinances, thus interjecting Federal requirements into an area that is not its proper province. Electronic signs that previously were not permitted will now be allowed. Last, it is the expressed congressional intent that the Department adopt a more compliant attitude to State-requested exemptions from billboard removal policies.

In light of these developments, the Department has undertaken a comprehensive review of the outdoor advertising program to determine how and if the program can be successfully continued.

Grants are authorized by 23 U.S.C. 215(a) and section 104(a)(12) of the Federal-Aid Highway Act of 1978 to assist the territorial governments of the Virgin Islands, Guam, American Samoa and the Commonwealth of the Northern Marianas Islands in the improvement of their highway systems. Assistance is provided for an arterial highway system, and necessary interisland connectors, as designated by each governor and approved by the Secretary of Transportation.

Under the Federal-Aid Highway Act of 1978, the four governments are now also eligible for funding from the hazard elimination and highway-related safety grants programs. A program level of \$6.6 million (including the safety programs) is anticipated in 1981, approximately the same as in 1980, for the territorial highways program.

This program provides for demonstration projects in 19 cities. The planned program levels in 1980 and 1981 will utilize all unobligated balances of appropriated funds and will allow for completion of preliminary engineering on most projects as well as some right-of-way acquisition and construction. Unobligated balances of \$33 million are expected to be available for programing in 1981.

2. *Rail crossings.*—This program provides for demonstration projects along the route of the Northeast corridor rail line between Washington, D.C., and Boston, Mass., and in and around Greenwood, S.C. 1981 funding required for this program is provided under the Northeast corridor improvement program administered by the Federal Railroad Administration.

NATIONAL SCENIC AND RECREATIONAL HIGHWAY (LIQUIDATION OF CONTRACT AUTHORIZATION)

For payment of obligations incurred in carrying out the provisions of 23 U.S.C. 148, [\$25,800,000] \$16,500,000 to remain available until expended, of which [\$19,800,000] \$9,400,000 shall be derived from the Highway Trust Fund. (Department of Transportation and Related Agencies Appropriation Act, 1980.)

The Federal-Aid Highway Act of 1973 authorized the construction and reconstruction of the Great River Road by the 10 States bordering the Mississippi River. A single continuous two-lane route has been tentatively designated which will run from Lake Itasca, Minn., to Venice, La. Program levels for 1980 and 1981 will focus on preliminary engineering, environmental studies, reconstruction and rehabilitation of existing road segments, roadside rest areas, acquisition of areas of archeological, scientific, or historical importance, and necessary easements for scenic purposes. Appropriation to liquidate contract authority to be derived from the Highway trust fund is reflected in the Trust fund share of other highway programs account.

[ALASKA HIGHWAY]

[For necessary expenses to carry out the provisions of section 218 of title 23, United States Code, \$2,500,000, to remain available until expended.] (Department of Transportation and Related Agencies Appropriation Act, 1980.)

The 1973 Federal-Aid Highway Act authorized \$58.67 million for the reconstruction of the Alaska Highway from the Alaskan border to Haines Junction, Canada, and the Haines Cutoff Highway from Haines Junction to the south Alaskan border. No appropriation is being requested for 1981 because the benefits from construction of the highway accrue primarily to one State—Alaska.

The Federal-Aid Highway Amendments of 1974 and the Federal-Aid Highway Act of 1976 authorized three programs for the improvement of roads off the Federal-aid highway system.

1. *Off-system roads.*—The Federal-Aid Highway Amendments of 1974 provided for construction, reconstruction, and improvement of roads not on the Federal-aid highway system. This program was superseded by the Safer off-system roads program.

2. *Safer off-system roads.*—This program is for construction, reconstruction, and improvement of any off-system road, and is to include correction of safety hazards, replacement of bridges, and elimination of high-hazard locations and roadside obstacles.

3. *Off-system railway-highway crossings.*—This program is for the elimination of hazards of railroad-highway crossings on roads other than those on any Federal-aid highway system. Projects include crossing separation, relocation, and/or installation of gates or flashing lights.

No funds are being sought for this account in 1981 for several reasons. First, increased Federal highway funding assistance is provided in other accounts. This is shown by the fact that the total highway program level is proposed to increase from \$8.4 billion in 1980 to \$8.8 billion in 1981, and the Federal matching share for many programs has been increased from 70% to 75%. Second, Federal assistance for construction of off-system roads is included in several other FHWA appropriations. For example, in the Federal-aid highway account, funds for Pavement Marking, Railway-Highway Crossings, and Bridge Replacement and Rehabilitation may be used off-system.

90.00 Outlays	4,497	7,000	8,900

The Federal-Aid Highway Amendments of 1974 authorized a program to construct or reconstruct access highways to public recreation areas on lakes in order to accommodate present and projected traffic density.

The appropriation received for 1980 will fully fund projects authorized by the Congress. Therefore, no new budget authority is requested for 1981. Funds for additional projects of this nature are available in the Federal-aid highways program which is national in scope and available to all States on an equitable basis.

[HIGHWAYS CROSSING FEDERAL PROJECTS]

[For necessary expenses in carrying out the provisions of 23 U.S.C. 156, \$14,000,000, to remain available until September 30, 1982.] (*Department of Transportation and Related Agencies Appropriation Act, 1980.*)

90.00 Outlays	26,606	21,000	16,300

The Federal-Aid Highway Act of 1976 authorized \$100 million for the construction and reconstruction of any public highway bridge across any Federal public works project where there has been a substantial change in the requirements and cost of such highway or bridge since the public works project was authorized, and where such increased costs would work an undue hard-

ship upon any one State. The 1980 appropriation funds fully the authorization provided for this program.

[BICYCLE PROGRAM]

[For necessary expenses in carrying out the provisions of section 141 of Public Law 95-599, \$4,000,000, of which \$2,000,000 shall be derived from the Highway Trust Fund.] (*Department of Transportation and Related Agencies Appropriation Act, 1980.*)

Program and Financing (in thousands of dollars)

The Federal-Aid Highway Act of 1978 authorized grants to States and local subdivisions for (1) construction of bikeways, and (2) nonconstruction projects which can reasonably be expected to enhance the safety and use of bicycles. For 1981, bicycle projects will be eligible for funding from the proposed auto-use management program to be funded out of the Windfall Profits Tax.

SANDHILL CRANE WILDLIFE REFUGE

Program and Financing (in thousands of dollars)

Identification code	1979 actual	1980 est.	1981 est.
69-0509-0-1-302			
Program by activities:			
10.00 Sandhill Crane Wildlife Refuge (costs—obligations) (object class 32.0)	4,000
Financing:			
40.00 Budget authority (appropriation)	4,000
Relation of obligations to outlays:			
71.00 Obligations incurred, net	4,000
90.00 Outlays	4,000

This appropriation provided for the acquisition of land in Jackson County, Miss., to be administered by the Secretary of Interior as a wildlife refuge for the Mississippi Sandhill Crane. The appropriation was transferred to the Department of Interior in 1979.

Financial assistance is made available to States for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs. The Federal Government pays 90% of the costs for interstate projects. The Federal share of most other Federal-aid projects was 70%, but the 1978 Highway Act increased it to 75%. The Federal share of project costs is higher than 75% and 90% in those States with large areas of public domain.

1. *Interstate system.*—Of the 42,500-mile system, 39,706 miles were open to traffic as of September 30, 1979. In addition to assistance for construction and improvement of Interstate segments, provision is made for resurfacing, restoring, and rehabilitating older parts of the system. At State and local option, authorizations for nonessential segments deleted from the system may be utilized for improvements on bus and rail transportation systems or on other highway systems. The Federal-aid Highway Act of 1978 changed the period of fund availability to 2 years at which time unobligated balances will become discretionary for the purpose of accelerating the construction of the Interstate System.

2. *Rural and small urban area transportation programs.*—Provides financial assistance to States for highway construction, reconstruction, and related planning and research on the primary, secondary, and urban systems in rural and small urban areas (with populations of 50,000 or less). A portion of the financial assistance will be for projects to resurface, restore, and rehabilitate primary and secondary highways. Assistance is also provided for forest and public lands highways.

3. *Urbanized area transportation programs.*—Provides financial assistance to States for highway construction, reconstruction, and related planning and research on the urban system in urbanized areas (with populations of more than 50,000). Financial assistance may also be utilized for bus and other mass transportation related facilities.

4. *Bridge program.*—Provides financial assistance to States for projects designed to replace or rehabilitate structurally deficient bridges which are hazardous to the safety of motorists.

5. *Construction safety programs.*—Provides financial assistance to States for safety improvements to the highway systems. Programs that may be pursued include: (1) a safety improvement program (which includes projects for eliminating hazards and roadside obstacles), (2) pavement marking demonstration projects, and (3) rail-highway crossings.

6. *Administration and research.*—Provides for executive and general administrative and research expenses of Federal-aid highways. These funds are expended under the Limitation on general operating expenses.

7. *Other.*—Provides for emergency relief and bridges over Federal dams.
