For carrying out titles III, V, and XIX of the Public Health Service Act, the Act of August 8, 1946 (5 U.S.C. 7901), section 1 of the Act of July 19, 1963 (42 U.S.C. 253a), and title V of the Social Security Act, \$1,587,732,000; of which \$416,760,000 shall be available for making payments under the Primary Care Block Grant program and \$1,000,000,000 shall be available for making payments under the Services for Women, Infants and Children Block Grant program (for activities previously authorized under the Maternal and Child Health Block Grant and the Women, Infants and Children programs), and of the amounts provided for the above block grant programs, \$166,440,000 for the Primary Care Block Grant and \$650,000,000 for the Services for Women, Infants and Children Block Grant shall become available upon the enactment of authorizing legislation; and of which \$1,732,000 shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with Hansen's disease; and of which \$3,292,000; to be available until expended, shall be used to renovate the National Hansen's Disease Center: Provided, That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: Provided further, That when the Health Services Administration operates an employee health program for any Federal department or agency, payment for the estimated cost shall be made by way of reimbursement or in advances to this appropriation. During 1983, and within the resources and authority available under section 338, Public Health Service Act, gross obligations for the principal amount of direct loans shall not exceed \$1,000,000: Provided further, That, notwithstanding any other provision of law, a commissioned medical officer in the Regular or Reserve Corps of the Public Health Service may not receive additional special pay under paragraph (4) of 37 U.S.C. 302(a) for any period during which the officer is providing obligated service under section 338B (or under former sections 225(e) or 752) of the Public Health Service Act; such an officer serving during any other period may be provided additional special pay under that paragraph at the discretion of the Secretary up to the amounts described in that paragraph; the Secretary, in exercising his discretion under this proviso, shall take into consideration the recruitment and retention problems of the Public Health Service, the level of performance of the officer concerned, and provisions of law relating to additional pay for Government physicians not in the uniformed services; and this proviso does not apply to any period of service covered by an agreement entered into by an officer under 37 U.S.C. 302(c)(1) before the date of enactment of this Act. (Legislative action required.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

This appropriation includes activities that provide health services, primarily to low-income people and their families through block grant and direct health services programs. For 1983, the primary care block grant includes black lung clinics, migrant health and family planning, and the services for women, infants, and children block grant include the former material and child health block grant, as well as the women, infants, and children nutrition program from the Department of Agriculture. This budget proposes a reduction of 304 positions, 237 FTE, and \$11.7 million in program support, contingent upon the passage of authorizing legislation to expand the primary care and services for women, infants, and children block grants.

ADMINISTRATIVE PROVISIONS, HEALTH SERVICES ADMINISTRATION

Appropriations in this Act to the Health Services Administration, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or

activities: *Provided*, That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriations Acts: *Provided further*, That non-Indian patients may be extended health care at the Talihina Hospital in Talihina, Oklahoma, and the Zuni-Ramah Indian Health Service Unit in Zuni, New Mexico, if such care can be extended without impairing the ability of the Indian Health Service to fulfill its responsibility to provide health care to Indians served by such facilities and subject to such reasonable charges as the Secretary of Health and Human Services shall prescribe the proceeds of which shall be deposited in the fund established by sections 401 and 402 of the Indian Health Care Improvement Act: *Provided further*, That funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation: *Provided further*, That employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment. (Public Law 97-100, making appropriations for the Department of the Interior and Related Agencies, 1982.)

1. *Diseases of the teeth and supporting tissue—(a) Caries.*—This is a research and development effort to develop methods to eliminate caries.

(b) *Periodontal diseases.*—The periodontal disease program develops knowledge which may lead to prevention and eradication of these diseases.

2. *Disorders of structure, function, and behavior—(a) Restorative materials.*—The restorative materials program aids the development of materials and methods to restore lost oral tissues to normal form and function.

(b) *Craniofacial anomalies.*—The craniofacial anomalies program is focused on improvement of treatment and understanding of the mechanisms to prevent developmental aberrations.

(c) *Pain control and behavioral studies.*—The pain control program supports investigations into the major pain problems associated with the oral facial complex.

General and special funds—Continued

NATIONAL INSTITUTE OF DENTAL RESEARCH—Continued

(d) *Soft tissue, stomatology and nutrition.*—The soft tissue program focuses on developing knowledge in the areas of soft tissue diseases, nutrition, salivary glands, and mineralization that can be applied to research.

3. *Dental research institutes.*—The dental research institutes bring together universities to focus upon the problems of oral health.

4. *Intramural research.*—Intramural laboratory and clinical research are concerned with diseases and disorders of the oral cavity and facial region.

5. *Direct operations.*—This program supports scientific and administrative management of general program activities.

6. *Program management.*—This activity provides support for the overall management and scientific direction of institute programs.

1. *Immunology, allergic and immunologic diseases.*—Research is supported on the immune system, its genetic control, maturation, characteristics and manipulation and also on disorders and derangements of the system that underlie immunologically mediated diseases.

2. *Microbiology and infectious diseases.*—Research is supported on the etiology, epidemiology and pathogenesis of infections and on the causative microbial agents to develop effective means of prevention, diagnosis and treatment.

3. *Intramural research.*—Intramural efforts embracing both basic and applied research in allergic, immunologic, and infectious diseases are supported.

4. *Direct operations.*—Includes such activities as the scientific and administrative management of grants and contracts, program evaluation, and general expense.

5. *Program management.*—Includes support for the overall direction and management for the Institute.

1. *Cellular and molecular basis of disease.*—This program provides support in the search for a deeper understanding of disease through cellular and molecular research.

2. *Genetics.*—The genetics program is directed toward gaining a better understanding of the fundamental processes and mechanisms of inheritance in health and disease.

3. *Pharmacological sciences.*—The pharmacological sciences program embraces all aspects of drug-related research from synthesis and development of new pharmacologically active chemical structures, through elucidation of the mechanisms and sites of action of drugs, to improvement of therapeutic approaches.

4. *Physiology and biomedical engineering.*—The physiology and biomedical engineering program is directed toward broadly based studies in physiology, coordinated basic and clinical investigations, and the application of engineering science to the solution of significant physiological and biomedical problems.

5. *Minority access to research careers (MARC).*—The minority access to research careers program is designed to increase the number of biomedical scientists from minority groups. In addition to strengthening the science teaching at minority colleges by offering fellowships to faculty members, support is provided for pre-graduate training to students intending to go on to graduate study in the biomedical sciences.

tion, normal and abnormal fetal development and problems of pregnancy and birth. Efforts are directed through research to prevent problems in childhood such as smoking, obesity, environmentally induced mental retardation, and learning disorders that contribute to adult disease and disability.

2. *Population.*—Efforts in population research are directed toward assuring the birth of wanted babies through studies on human fertility and infertility, contraceptive development and safety, and the reduction of unwanted pregnancies, particularly among adolescents.

3. *Intramural research.*—The intramural research program carries out both basic and clinical research in population and maternal and child health through individual research projects conducted by the Institute's staff in its own facilities.

4. *Direct operations.*—This activity supports administrative and scientific management of the Center for Research for Mothers and Children and the Center for Population Research, program planning and evaluation, other administrative activities.

5. *Program management.*—The overall administration of the Institute's programs are provided for in this activity.

1. *Retinal and choroidal diseases.*—The retina program supports research to acquire knowledge concerning the function of the normal and the diseased retina.

2. *Corneal diseases.*—Corneal disease research is aimed at reducing the impact of corneal diseases through improved methods of treatment, prevention, and diagnosis.

3. *Cataract.*—Cataract research attempts to identify the causes of cataract and develop methods for its prevention and improved treatment.

4. *Glaucoma.*—Glaucoma research studies the cause, prevention, early detection and improved methods of treatment of glaucomatous disease.

5. *Strabismus, amblyopia, and visual processing.*—This program supports laboratory and clinical studies on the development and function of those activities of the brain and the eye muscles that make vision possible.

6. *Intramural research.*—Laboratory and clinical research is focused on developing new and improved techniques for the prevention, diagnosis, and treatment of vision disorders.

7. *Direct operations.*—This activity provides funds for support of activities relevant to the award of research grants and contracts.

8. *Program management.*—This activity provides support for the overall administrative management and scientific direction of Institute programs.

1. *Characterization of environmental health hazards.*—This program supports research which identifies and measures environmental factors and transformed products that result from interaction with biological processes.

2. *Biological response to environmental hazards.*—This activity supports research to identify and enhance the understanding of biological damage resulting from chemical or physical factor insult.

3. *Applied toxicological research and testing.*—This effort supports research which serves as a link between the study of chemical disruption of fundamental biological processes and the application of this knowledge in toxicological test systems.

4. *Biometry and risk estimation.*—This effort is aimed towards the development of quantitative estimates of human health risks from exposure to environmental factors.

5. *Resources and manpower development.*—This activity provides for the development of research and manpower resources throughout the Nation in the environmental sciences.

Research Resources develops and supports specialized transdisciplinary research resources in the Nation's academic and research institutions.

1. *Clinical research.*—This program develops and supports general clinical research centers which are located in university-affiliated hospitals.

2. *Biotechnology research.*—This program provides support for technological resources such as mass spectroscopy, high voltage electron microscopy, nuclear magnetic resonance technology, bioengineering resources, and many complex state-of-the-art computer applications to biomedical research.

3. *Laboratory animal sciences and primate research.*—This activity supports the seven Primate Research Centers, and other animal and vital research resource activities.

4. *Biomedical research support.*—This program makes grants to institutions for research and research resource activities concerned with the development of new knowledge about fundamental processes related to health and supports the Shared Instrumentation Program.

5. *Minority biomedical support.*—This program's mission is to increase the number of minority faculty, students, and investigators engaged in biomedical research at predominantly ethnic minority institutions.

6. *Direct operations.*—This activity supports staff who manage the Division's grants and contracts.

7. *Program management.*—This activity provides the administrative management and scientific planning, direction and coordination of the Division's programs.

The NIH management fund was established to facilitate the conduct of NIH central operations. Fund activities are financed primarily from advances and reimbursements from the several Institutes.

1. *Computer services* provide a central scientific research and computational resource in support of the NIH programs.

2. *Research services* provide centralized and collaborative engineering, scientific, and technical support for research activities.

3. *Engineering services* provide engineering, architectural, craft, utility and labor services required for all the Institutes.

4. *Clinical services* provide facilities and services, other than physician care, for an integrated operation of a 541-bed facility servicing 9 Institutes; developing and recommending policies and rules for the protection and welfare of patients; and conducting research in methods and techniques of hospital administration.

5. *Grant review and approval* provides staff support services in formulating National Institutes of Health grant award policies and procedures relating to research and training programs and other activities.

6. *Administrative services* include plant and office housekeeping, protection and security services.

7. *Safety Services* include activities to promote and maintain safety and environmental protection in biomedical research.

8. *Standard level user charges* provide for the payment to the General Services Administration for rental space occupied by the National Institutes of Health.

NOTES

Excludes \$432,000 thousand in 1983 for service block grant activities transferred to Health Block Grants in the Office of the Assistant Secretary for Health. Comparable amount for 1982 (\$432,000 thousand) is included above for service block grant and program support.

Excludes \$30 thousand in 1982 and 1983 for activities transferred to the Health Services Administration. Comparable amount for 1981 (\$30 thousand) is included above. Includes \$1,300 thousand in 1982 and 1983 for activities transferred from the Drug Enforcement Administration. Comparable amount for 1981 (\$1,300 thousand) is excluded above.

Includes \$3,400,000 in 1983 for activities previously financed from Federal subsidy for St. Elizabeths Hospital. Comparable amounts for 1981 (\$2,850 thousand) and 1982 (\$3,125 thousand) are excluded above.

This program provides Federal support for research and research training in the areas of alcohol, drug abuse, and mental health. Federal support for clinical training in these areas will be phased out in 1982, and Federal support for services in these areas will be provided through block grants to States starting in 1982.

In 1983, funding for this block grant will be requested through the Office of the Assistant Secretary for Health.

FEDERAL SUBSIDY FOR ST. ELIZABETHS HOSPITAL

For expenses necessary for a portion of the maintenance and operation of St. Elizabeths Hospital in the District of Columbia, \$67,505,000. Notwithstanding any other provision of law, the Secretary of Health and Human Services may set rates for inpatient and outpatient services provided through St. Elizabeths Hospital that in the aggregate do not exceed the estimated total cost of providing such services, and may bill and collect from (prospectively or otherwise) individuals, the District of Columbia, Executive agencies and other entities for any services so provided. Amounts so collected shall be credited to the appropriation for St. Elizabeths Hospital for the year in which the services are provided.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

1. *Health planning.*—This activity supports local and State health planning agencies. The request reflects the Administration's position to eliminate Federal funds to support health planning.

2. *Health facilities.*—Support is provided for interest subsidy payments to meet Federal commitments on long-term guaranteed loans for health professions schools and health facilities and, when necessary, for default payments of federally guaranteed loans. Support is provided for monitoring loan performance on approximately 360 loans totaling \$1.2 billion. This activity also enforces compliance by approximately 7,000 institutions with the assurances for health services that are required with receipt of Federal funds and promotes more efficient use of energy in health care institutions.

3. *Health professions education.*—This activity provides Federal assistance for health professions education and training to remove incentives for unwarranted growth in the aggregate supply of health professionals; promote a sufficient supply of primary care professionals; increase the availability of health professionals in underserved areas; increase minority participation in the health professions; and promote national health care priorities.

4. *Program management.*—This activity supports the staff and operating expenses related to the program direction and extramural management of health resources programs and provides for maintenance of the agency's building and facilities.

¹ 1981 included a large number of prepayments for refinancing (over \$20 million)

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and loan guarantees for private, nonprofit facilities.

Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

Funding of \$32 million is requested for this account to cover interest subsidy obligations in 1983. About \$1.3 billion in direct and guaranteed loans will be outstanding in 1983.

HEALTH CARE FINANCING ADMINISTRATION

Federal Funds

General and special funds:

GRANTS TO STATES FOR MEDICAID*

*See Part III for additional information.

For carrying out, except as otherwise provided, title XIX of the Social Security Act \$17,006,162,000, to remain available until expended.

For making, after June 1 of the current fiscal year, payments to States under title XIX of the Social Security Act, for costs incurred in the last three months of the current fiscal year, not to exceed \$3,000,000,000, to be charged to the subsequent appropriation therefor.

In administration of title XIX of the Social Security Act, payments to a State under such title for any quarter in the period beginning July

1 of the prior year and ending September 30 of the current year may be made with respect to a State plan approved under such title prior to or during such period. After a plan or plan amendment is approved, payment may be made with respect to it for the quarter in which it was submitted or any subsequent quarter in which it remains in effect.

Such amount as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 1 of that year.

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1984, \$4,470,000,000 to remain available until expended.

No amount appropriated for Grants to States for Medicaid shall be available for payment under section 1903(a)(2), 1903(a)(3), or 1903(a)(7) to the fifty States or the District of Columbia for costs incurred after September 30, 1982. (Legislative action required.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

1. *Medicaid vendor payments.*—The purpose of the Medicaid program, which became effective January 1966, is to assist States in providing medical care to their low-income population. Federal matching payments for medical assistance under title XIX of the Social Security Act (Medicaid) are authorized for States having plans approved by the Department of Health and Human Services. The 1983 appropriation request reflects the impact of legislative proposals to be effective in 1983. These proposals, such as mandatory co-payments, reduced match rate by three percentage points for optional services and services to the medically needy, and the elimination of the matching rate for

Medicare Part B premiums, will save \$2,101 million in 1983.

2. *State and local administration.*—Federal matching funds are provided for personnel related to the operation of the nursing home survey and certification program. This appropriation does not include \$810 million for State and local administration and training costs which are included in a separate block grant appropriation.

1. *Military service credits (HI).*—Payments of \$207,000 thousand to the Federal Hospital Insurance Trust Fund is requested as reimbursement for benefits based on noncontributory military service credits of veterans of World War II and certain veterans of the post-World War II period.

2. *Supplementary medical insurance (SMI).*—An estimated \$14,480,000 thousand will be required in 1983 to finance the Government's subsidy to the Federal Supplementary Medical Insurance Trust Fund. Federal payments, combined with premiums from enrollees and interest earned by the Supplementary Medical Insurance Trust Fund, must be sufficient to finance the estimated incurred cost of benefits and administration. The standard monthly premium rate, which is updated every July, will be increased to \$12.20 effective July 1982, and is expected to be \$13.10 effective July 1983.

3. *Hospital insurance for uninsured.*—A Federal subsidy covers the costs of hospital and related care for certain individuals aged 65 and over who are not insured under the social security or railroad retirement systems, but who meet certain transitional insured status requirements for hospital insurance.

4. *Professional standards review organizations (PSRO's) activities.*—Funds were budgeted through 1981 for review of the quality and appropriateness of health care services provided under the medicaid and maternal and child health programs through the payments to Health Care Trust Funds Appropriation. As a result of section 2113 of Public Law 97-35, the Omnibus Reconciliation Act of 1981, hospital review for medicaid is optional and will be financed through the grants to States for medicaid appropriation.

PROGRAM MANAGEMENT*

*See Part III for additional information.

For carrying out, except as otherwise provided, Titles XI, XVIII, and XIX of the Social Security Act, and sections 1526 and 1533(d) of the

Public Health Service Act, \$89,405,000, together with not to exceed \$855,571,000 to be transferred to this appropriation, as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: Provided, That \$20,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates and to meet unanticipated costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: Provided further, That none of these funds shall be used to pay the expenses of Statewide Professional Standards Review Councils: Provided further, That none of the funds appropriated under this paragraph shall be allotted or otherwise awarded to any Professional Standards Review Organization which the Secretary of the Department of Health and Human Services has determined should be terminated from the Professional Standards Review Program because of its inability to effectively or efficiently discharge its responsibilities under the Social Security Act.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The hospital insurance program (HI) affords protection against the cost of hospital and related care to most individuals age 65 and over, and to disabled people under age 65 entitled for at least 24 months to social security or railroad retirement cash benefits. The program also covers treatment of end-stage renal disease for people entitled to monthly social security benefits, for insured workers, and for spouses or dependent children of such insured or entitled individuals.

1. *Benefit payments.*—The hospital insurance program protects against the cost of inpatient hospital services, post-hospital home health services, and post-hospital skilled nursing facility services, with specified deductibles and coinsurance amounts. Benefit payments beginning in 1977 also include funding of the direct review costs for PSRO's. The following table shows comparative data for 1981 through 1983 (in thousands) on hospital insurance beneficiaries and on benefit payments classified by type of coverage:

Beneficiaries: Persons with hospital insurance protection (average):	1981 actual	1982 estimate	1983 estimate

¹ Social security benefits for rail retirees would be directly paid and administered by the Department of Health and Human Services rather than administered by the Railroad Retirement Board, and Health Insurance payroll taxes for rail employees would be directly credited to Medicare rather than transferred on a delayed basis from the Railroad retirement account. These changes are reflected in the proposed legislation schedule for that account contained in the Railroad Retirement section of the Other Independent Agencies chapter

² For the purpose of display in the budget, the exhibits reflect continuation of the interfund borrowing policy recently enacted by the Congress. For simplicity, payments of interest on continued inter-trust fund transfers are not reflected. It is important to note, however, that legislation authorizing continued inter-trust fund borrowing is not being proposed at this time.

There are a number of legislative proposals which affect the Federal hospital insurance trust fund. The proposals that would affect program outlays would:

1. Eliminate the requirement for utilization review for medicare.
2. Begin entitlement to medicare benefits on the first day of the first month following attainment of the age of 65.
3. Modify the section 1122 program to require States rather than the hospital insurance trust fund to pay for the administrative costs of the program.
4. Mandate that employers provide their employees, age 65-70, with the same insurance coverage available to their nonaged employees.

FEDERAL HOSPITAL INSURANCE TRUST FUND—Continued

5. Reduce medicare reimbursement to all hospitals by 2%.

6. Institute coinsurance for home health services under medicare (5% for first 100 visits; 20% for visits thereafter).

7. Deny reimbursement to providers for all noncovered services.

8. Provide Federal administrative costs and savings from proposed legislation.

In addition to the proposals that reduce the trust funds outlays, there is a proposal which would affect income into the trust fund.

Beginning January 1, 1983, Federal employees will be subject to the hospital insurance portion of the FICA tax. The impact of this proposal is to increase trust fund revenues by \$1,238 million in 1983.

The supplementary medical insurance program (SMI) affords protection against the costs of physician services and certain other medical services. The program also covers treatment of end-stage renal disease for eligible people who elect to enroll.

The cost of supplementary medical insurance is financed by premium payments from enrollees together with contributions from the general revenues of the

Treasury. The Secretary of Health and Human Services is required by law to promulgate the standard monthly premium rate to be paid by enrollees. The SMI premium rate can rise by no more than the percentage by which cash benefits increased since the last premium raise. Effective July 1, 1981, the premium rate has been \$11.00. The rate for enrollees included in this budget is \$12.20, effective July 1, 1982, and an estimated \$13.10, effective July 1, 1983.

1. *Benefit payments.*—The supplementary medical insurance program provides protection against the cost of physician services, home health services not covered under the hospital insurance program, outpatient services, and certain other medical costs, with specified deductibles and coinsurance. The following table shows comparative data for 1981 through 1983 (in thousands) on supplementary medical insurance beneficiaries and benefit payments, classified by type of coverage.

There are a number of legislative proposals which affect the Federal supplementary medical insurance trust fund. These proposals that would affect program outlays would:

1. Delay entitlement to benefits for individuals enrolling during the first 3 months of the initial enrollment period to the first day of the first month following attainment of the age at 65.
2. Mandate that employers provide their employees age 65-70 with the same insurance coverage available to their non-aged employees.
3. Reimburse 80% instead of 100% of the reasonable charges for radiological and pathological services furnished to hospital inpatients.
4. Delay the annual revision of customary and prevailing charge screens from July 1 to October 1.
5. Index the deductible to the Consumer Price Index beginning 1983.
6. Eliminate funding for End-Stage Renal Disease Networks.
7. Repeal the following provisions of Public Law 96-499; outpatient rehabilitation facilities coverage (Sec. 933); outpatient physical therapy services (Sec. 935).
8. Limit the increase in the economic index used to determine physician fees on July 1982 to 5%.
9. Provide Federal administration costs and savings arising from proposal legislation.

The budget estimates for 1982 and 1983 include savings from proposed legislation which make technical changes such as rounding benefits and payment standards, prorating the first month's benefit, coordinating SSI and OASDI cost of living adjustments and allowing for cross program recoveries of SSI overpayments. Other changes include: eliminating the \$20 disregard for new recipients; changing the determination of permanent disability to a prognosis of at least 24 months; and basing the definition of permanent disability on a preponderance of medical factors. These reforms are estimated to save a total of \$78 million in 1982 and \$256 million in 1983 for the Federal benefit payments activity.

Note.—As a result of the enactment of Public Law 96-272, all foster care programs have been consolidated under title IV-E of the Social Security Act and, beginning with 1981, the administrative responsibility for title IV-E has been assigned to the Human Development Services.

This appropriation makes grants to States for the Federal share of State expenditures for aid to families with dependent children (AFDC) and related activities. Beginning with 1983, child support enforcement collections are reflected as an offset to AFDC benefits. This change is based on the proposed separate appropriation in 1983 for the costs of the child support enforcement program. Research and training projects are also funded.

1. *Maintenance assistance.*—Aid to families with dependent children and related programs provide needy persons with resources to assist in meeting the costs of daily living. Benefit levels are set by States under broad Federal guidelines. Federal matching rates vary between 50% and 77%. Selected program statistics are shown below.

2. *Research and evaluation.*—Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the assistance payments, old age, survivors and disability insurance and supplemental security income programs.

3. *Administrative expenses.*—The administrative costs budgeted for the assistance payments program provide for Federal direction of the various grant programs that provide maintenance assistance to the needy.

The budget estimates for 1982 and 1983 include savings from proposed legislation to reform AFDC as a temporary assistance for those who are unable to provide for themselves, create new opportunities for work and work experience, and eliminate program overlaps. In addition, the Federal Government will begin a four-year phaseout of Federal matching for erroneous payments made by States. These reforms are estimated to save Federal funds totaling \$0.2 billion in 1982 and \$1.1 billion in 1983.

Beginning in 1983, open-ended Federal matching for State and local administrative and training costs in AFDC will be replaced by a combined welfare administration payment to States for AFDC, medicaid, and food stamps administrative costs. This combined payment excludes the administrative and training costs for Puerto Rico, Guam, and the Virgin Islands, and is discussed elsewhere in the budget.

The Child Support Enforcement program assists States in assuring that absent parents meet their responsibility in providing support for their children. This goal is accomplished through locating absent parents, proving paternity, establishing child support obligations and enforcing their collection. Beginning in 1983, the

Federal share of the costs of administering this program are included in a separate appropriation. Previously, these costs were included in the Assistance Payments appropriation.

Child support payments made by absent parents on behalf of recipients of Aid to Families with Dependent Children (AFDC) go to the State or local child support enforcement agency for distribution. The Federal share of the child support collections is deducted from Federal payments to States for AFDC. These collections appear as an offset in the Assistance Payments appropriation.

1. *State and local administrative costs.*—Federal grants for State and local administration of the program are made to States having plans approved by the Department of Health and Human Services. Federal matching rates vary from 75% to 90%.

2. *Research and evaluation.*—Projects are supported to improve State and local program administration.

3. *Federal administrative costs.*—The Federal Office of Child Support Enforcement provides services to State and local governments designed to increase collections.

4. *Reimbursable administrative costs.*—The Office of Child Support Enforcement operates the Federal Parent Locator Service. The Kidnapping Prevention Act of 1980 (P.L. 96-611) authorizes States to use the service to locate parents who have taken their children from the custody of the other parent without court permission. The States are required to reimburse the Federal Government for these administrative costs which are expected to total \$550,000 in 1983.

The budget estimates for 1982 and 1983 include savings from proposed legislation to restructure the Child Support Enforcement program to improve cost-effectiveness and efficiency of State operations. The budget also proposes that States retain 6% of child support collections to cover administrative costs for non-AFDC cases. Total Federal savings from these proposals are estimated to be \$35 million in 1982 and \$145 million in 1983.

COMBINED WELFARE ADMINISTRATION

For State administrative costs authorized by sections 403(a)(3), 1903(a) (2), (3), and (7) of the Social Security Act and sections 11(e)(19) and 16 (except for State food stamp investigations and prosecutions) of the Food Stamp Act of 1977, \$1,655,000,000 (which shall be the maximum available for these purposes), together with \$526,000,000 available for food stamp administration in the Department of Agriculture. There shall be no requirement that States match the funds provided herein. From this appropriation, the Secretary shall allot to each State, for administrative expenses, an amount which bears the same ratio to the amount available for 1983 as the Secretaries of Health and Human Services and of Agriculture determined States shall receive for such administrative expenses in fiscal year 1982. These provisions shall not apply to administrative costs of Puerto Rico, Guam, and the Virgin Islands. (Legislative action required.)

This appropriation provides payments to States for the costs of administering the Medicaid, Food Stamps, and Aid to Families with Dependent Children (AFDC) programs. It replaces separate open-ended matching funding for the administrative costs of each of these three programs with a single payment to States with no matching requirement. Ongoing administrative costs are being funded at 95% of the 1982 level to take account of the savings achievable by the efficiencies available to the States under this proposal. This appropriation does not include activities designed to control fraud and abuse which currently receive special Federal matching funds. These items continue to be funded separately by the individual programs.

This program makes grants to States to aid low-income households with high energy costs through payments to eligible households, energy suppliers, and building operators, and emergency assistance in crisis situations. Legislation is being proposed in 1983 to simplify program administration and to provide States the additional flexibility to assist families and individuals in emergency or crisis situations.

Cuban and Haitian entrants, domestic assistance, Social Security Administration		\$96,000	\$90,240

Excludes \$43,298 thousand in 1983 for activities transferred to Immigration and Naturalization Service, department of Justice. Comparable amounts for 1981 (\$127,000 thousand) and 1982 (\$48,000 thousand) are included above.

1. *Refugee assistance.*—This program is to help refugees become independent, self sufficient members of American society. Services include cash and medical assistance, English and vocational training, educational assistance, and health screening. States are reimbursed for administering the refugee assistance program.

2. *Cuban/Haitian entrant assistance.*—This program provides for reception and care of Cuban/Haitian Entrants (primarily those who arrived in 1980 and 1981), as well as reimbursement to States for cash/medical assistance and social services to entrants once they are resettled. In 1982 Congress combined the budgets for reception and care, and domestic assistance allowing HHS maximum flexibility to respond to entrant needs (Public Law 97-92).

3. *Refugee and entrant assistance.*—The 1983 budget consolidates the refugee and entrant assistance program into a single appropriation thus recognizing the similarity between activities funded under the entrant and refugee program. HHS will also have needed flexibility in allocating refugee and entrant resources. However, effective in 1983, the Department of Justice will request funds for the care of any newly arriving entrants and those entrants who are ineligible for parole and must remain in Federal custody indefinitely.

* \$5,985,000 represents OASI benefit obligations in excess of available resources.

Direct program.—The old-age and survivors insurance (OASI) program provides income to retired workers, their dependents, and survivors. The program is financed by payroll taxes paid by employers, employees, and self-employed individuals.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was \$25,900 in 1980, \$29,700 in 1981, \$32,400 in 1982, and is expected to increase to \$35,100 in 1983.

1. Benefit payments.—Benefits are based on average taxable earnings, indexed for inflation.

Beneficiaries (millions):	1981 actual	1982 estimate	1983 estimate
Retired workers.....	19.8	20.4	20.9
Dependents of retired workers.....	3.7	3.7	3.6
Survivors.....	7.7	7.6	7.5
Total beneficiaries.....	31.2	31.7	32.0

Benefits rise because: (1) the number of aged persons increases; (2) average monthly benefits are tied to the consumer price index; and (3) new beneficiaries receive higher initial benefits.

Public Law 97-123 enacted December 29, 1981 provides limited interfund borrowing authority between the Social Security trust funds at the discretion of the Managing Trustee to insure continued funding of bene-

fit payments through June 1983. However, there is an additional unfinanced benefit liability (payable in October 1983) at the end of 1983 in the OASI program. The legislative schedule following this section shows the amount that would be required to cover that liability.

2. Administration.—This activity reflects the costs of administering this program.

3. Payment to railroad retirement account.—Since 1951, \$18 billion in annual payments from the OASI trust fund have helped finance the rail industry pension fund. The annual OASI payment includes funds for some benefits which are not, in turn, paid to railroad workers and their families.

4. Vocational rehabilitation services.—Beginning in 1982 State agencies will be reimbursed for successful rehabilitation efforts.

Reimbursable program.—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs and certain other services administered by SSA with full reimbursement to the trust fund (including interest when appropriate).

¹ Under proposed legislation for the Railroad Retirement account, social security benefits would be directly paid and administered by the Department of Health and Human Services, rather than administered by the Railroad Retirement Board but funded by this account. The proposed obligations reflected above reduce Railroad Retirement account obligations as shown in the proposed law schedule for that account in the Railroad Retirement section of the Other Independent Agencies chapter

The recently established National Commission on Social Security Reform will meet and prepare bi-partisan legislative recommendations to ensure the current and long-term financial solvency of the Old Age and Survivors Insurance, Disability Insurance and Hospital Insurance Trust Funds. For the purpose of display in the budget, the exhibits reflect continuation of inter-fund borrowing recently enacted by the Congress. For simplicity, payments of interest on continued inter-trust fund transfers are not reflected. It is important to note, however, that legislation authorizing continued inter-trust fund borrowing is not being proposed at this time.

The disability insurance (DI) program protects individuals and families by providing income to insured disabled workers (and their dependents). This program is financed by payroll taxes paid by workers, employers, and self-employed individuals.

1. *Benefit payments.*—Disability insurance benefits are made to certain disabled individuals and their dependents. The average number of persons receiving payments and the benefit amounts follow:

	1981 actual	1982 estimate	1983 estimate
Beneficiaries (millions):			
Disabled workers.....	2.9	2.7	2.7
Dependents of disabled workers.....	1.8	1.7	1.6
Total beneficiaries.....	4.7	4.4	4.3
Benefit payments (billions):			
Disabled workers.....	\$14.1	\$15.0	\$15.5
Dependents of disabled workers.....	2.8	2.7	2.7
Total benefit payments.....	\$16.9	\$17.7	\$18.2

Automatic cost-of-living benefit increases are the same as for the OASI program.

2. *Administration.*—This activity reflects administrative expenses attributable to the DI program.

3. *Payment to railroad retirement account.*—Annual adjustments are made between the DI trust fund and the railroad retirement fund. This adjustment is computed on the same basis as the payment from the OASI trust fund which is described in the preceding section.

4. *Demonstration projects.*—This activity provides for the development and conduct of experiments and demonstration projects as provided by Section 505 of Public Law 96-265.

5. *Vocational rehabilitation services.*—Beginning in 1982, State agencies will be reimbursed for successful rehabilitation efforts.

¹ Under proposed legislation for the Railroad Retirement account social security benefits would be directly paid and administered by the Department of Health and Human Services, rather than administered by the Railroad Retirement Board but funded by this account. The proposed obligations reflected above reduce Railroad Retirement account obligations as shown in the proposed law schedule for that account in the Railroad Retirement section of the Other Independent Agencies chapter.

The recently established National Commission on Social Security Reform will meet and prepare bipartisan legislative recommendations to ensure the current and long-term financial solvency of the Old Age and Survivors Insurance, Disability Insurance and Hospital Insurance Trust Funds. For the purpose of display in the budget, the exhibits reflect continuation of inter-fund borrowing recently enacted by Congress. For simplicity, payments of interest on continued inter-trust fund borrowings are not reflected. It is important to note, however, that legislation authorizing continued inter-trust fund borrowings is not being proposed at this time.

LIMITATION ON ADMINISTRATIVE EXPENSES*

*See Part III for additional information.

For necessary expenses, not more than \$3,408,451,000 shall remain available until expended, as authorized by section 201(g)(1), of the Social Security Act, from any one or all of the trust funds referred to therein: Provided, That travel expense payments under section 1631(h) of such Act may be made only when travel of more than seventy-five miles is required: Provided further, That none of the foregoing amount shall be available for the purpose of making the payment provided for in the second sentence of section 223(d)(5) of such Act: Provided further, That amounts authorized herein may be used to provide notices under sections 205(b) and 1631(c)(1) of such Act of the Secretary's decisions involving determinations of disability provided that such notices must contain only that level of information contained in such notices prior to implementation of the amendments made by section 305 of P.L. 96-265: Provided further, That notwithstanding the provisions of sections 206 and 1631(d)(2) of such Act, none of the foregoing amount may be expended for purposes related to the fixing of reasonable attorneys' fees, and no funds from the Federal Old Age and Survivors Insurance Trust Fund nor the Federal Disability Insurance Trust Fund may be certified for payment to any attorney as compensation for representing a claimant in proceedings before the Secretary or any court, except that the foregoing shall not be construed to limit the Secretary's authority under sections 206 and 1631(d)(2) of such Act to promulgate regulations that prescribe the maximum fees which may be charged by attorneys as such compensation; Provided further, That none of the foregoing amount shall be available for the purpose of increasing from 35 percent to 65 percent the percentage of State disability determinations required to be reviewed under section 221(c)(3): Provided further, That \$50,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates, for automation projects, and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The Social Security Administration administers programs of old-age, survivors, and disability insurance, and supplemental security income. In addition, it administers some health insurance activities, as well as annual reporting of earnings and pension reform activities. The principal costs for administration of these programs are financed by this appropriation; however, there are costs of other components of the Department of Health and Human Services and of the Treasury Department which relate to administration of these programs shown elsewhere in the budget.

1. *Old-age and survivors insurance.*—The administrative costs provide for making initial determinations of eligibility, reevaluating initial determinations and maintaining the beneficiary rolls to assure proper benefit payments, and continuing entitlement to benefits.

2. *Disability insurance.*—The administrative costs provide for processing and reviewing initial claims, determining the continuing disability of beneficiaries, and maintaining the beneficiary rolls to assure proper benefit payments.

3. *Health insurance.*—While the Health Care Financing Administration (HCFA) is responsible for medicare administration, the Social Security Administration performs certain administrative functions, such as premium billing and collection, and maintenance of the data base on entitlement and premium information.

4. *Supplemental security income.*—The administrative costs provide for making initial determinations of eligibility, reevaluating the initial determination when requested by the claimant, maintaining the recipient rolls to assure proper payment of benefits, and investigating continuing entitlement to benefits through periodic re-determinations of eligibility.

5. *Annual reporting of earnings.*—A single annual wage reporting system serves the data needs of both the Social Security Administration and the Internal Revenue Service.

6. *Pension reform.*—Under the “Employee Retirement Income Security Act of 1974” (ERISA) the Secretary of HHS maintains files to furnish information regarding deferred vested pension rights to plan participants upon request, or to the participant (and his dependents or survivors) automatically when applying for social security benefits.

7. *Construction.*—Construction of three Program Service Centers and the new Headquarters buildings was financed by the purchase contract method. Budget authority of \$59,685 thousand is requested for purchase contract payments and for the expansion of previously built district offices in 1983.

8. *Reimbursable program.*—Under 42 U.S.C. 1306(b), the Social Security Administration provides information or services to other governmental organizations or private organizations on a reimbursable basis.

1. *Child welfare block grant.*—A level of \$380,120 thousand will support grants to States for child welfare services and training, foster care, and adoption assistance. Services provided will be designed to establish, strengthen and provide a broad range of child welfare and family oriented services focusing on children who are or may become separated from their families. The overall objectives of this program are to strengthen families, prevent family break-up, and enable children to remain in their homes. In cases where children must be placed outside the home, the objective is to return these children home as soon as possible; or, when this is not possible, to secure suitable adoptive homes.

2. *Child welfare services.*—No funds are requested. Similar activities may be carried out under the proposed Child welfare block grant.

3. *Foster care.*—No funds are requested. Similar activities may be carried out under the proposed Child welfare block grant.

4. *Adoption assistance.*—No funds are requested. Similar activities may be carried out under the proposed Child welfare block grant.

5. *Child welfare training.*—No funds are requested. Similar activities may be carried out under the proposed Child welfare block grant.

The work incentive (WIN) program is designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program of employment, training, and support services. Training is administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures are matched by Federal participation at the rate of 90%. In 1983, States will be able to continue the WIN program with resources from the Social Service block grant from the Department of Health and Human Services.

job search, training, follow-up of all employed registrants, and adjudication of the work test. Child care and other services necessary to enable WIN participants to accept training or employment are also provided. In 1982, States have the option of designing and operating their own WIN demonstration program as a replacement to the regular WIN program. Twenty-four States have chosen this option. In 1983, the WIN program will be phased out with unexpended carryover funds.

2. *Program direction and evaluation.*—This activity provides for the administration and evaluation of the WIN program. Resources for administration will be provided through the Department of Labor, Employment and Training Administration in 1983.

1. *Community services block grants.*—The 1983 estimate for the Community Services block grant program continues funding of anti-poverty programs at a reduced level as compared to 1982. Additional assistance to low-income persons is available under the Social Services block grant program in 1983.

2. *Community services discretionary activities.*—Funds are requested in 1982 to provide assistance to priority projects nearing completion and whose completion will represent a beneficial gain in Federal capital investment. Program areas assisted include: community development programs, rural housing programs and the migrant and seasonal farmworkers program. No funds are requested in 1983 since completion of these projects is anticipated in 1982.

3. *Federal administration—block grants.*—The 1983 estimate provides for salaries and benefits for administration of the Community Services block grant program and also for final closeout of activities formerly conducted by the Community Services Administration.

4. *Federal administration—community services closeout.*—Funding in 1983 for 60 staff-years for the purpose of closing out CSA activities is included in the Federal administration—block grant activity.

5. *Community services closeout.*—The 1983 estimate provides Federal closeout assistance to an estimated 295 to 520 community action and limited purpose agencies. These oversight activities will include: property disposition, completing and closing financial accounts and records, dissolving corporate charters, and resolving legal action.

The Grants management fund draws funds from the operating divisions of the Department to provide a single, central source of payments for most of the Department's awards classified as Federal assistance to recipient organizations.

SEC. 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 202. Appropriations in this Act for the Health Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Health Resources Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand two hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding 5 years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country, purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed \$9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

SEC. 203. None of the funds provided by this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term: Provided, That the several States are and shall remain free not to fund abortions to the extent that they in their sole discretion deem appropriate.

SEC. 204. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327(a) of the Public Health Service Act.

SEC. 205. Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed \$5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. 206. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed \$2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. 207. Notwithstanding section 306 of Public Law 96-272 or section 1132 of the Social Security Act, no payment shall be made, in any fiscal year, under this or any other Act to reimburse State or local expenditures made prior to October 1, 1978, under title I, IV, X, XIV, XVI, XIX, or XX of the Social Security Act unless a request for reimbursement had been officially transmitted to the Federal Government by the State within one year after the fiscal year in which the expenditure occurred.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and thrift insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the Department's activities, as set forth below:

1. *Housing programs* cover the Department's major housing subsidy programs including housing counseling assistance. The mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities are also included under this heading. Other activities included under this heading are community disposal operations and liquidating programs, the Office of Interstate Land Sales Registration and manufactured home inspection and monitoring.

2. *Government National Mortgage Association (GNMA)* covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

3. *Community planning and development* covers the community development grant and urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This organization is responsible for the urban homesteading program as well as the closeout of projects under the planning assistance grant (section 701) program, rehabilitation loan (section 312) program, and other terminated categorical community development programs.

4. *Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Other major divisions within the Department include the New Community Development Corporation; Fair Housing and Equal Opportunity; and Departmental Management.

Day-to-day administration, processing, and funding decisions for programs of the Department of Housing and Urban Development are carried out in field offices located within the geographical boundaries of 10 regional offices.

The subsidized housing program schedule reflects both budget authority to enter into contracts for subsidized housing and an appropriation for payments required to liquidate contracts under the separate programs as described below.

Total obligations in 1983 are estimated at \$8,850.7 million which will be utilized primarily to fund about 122,000 subsidized housing units along with funds for the comprehensive improvement assistance program and amendments. However, the estimated \$12,800 million recovery of rent supplement and annual contribution obligations from prior years together with \$24.8 million in permanent authority is sufficient to meet these obligations and permit a rescission of \$5,246 million of budget authority of which \$2.4 billion is in section 8 and Public Housing and \$2.8 billion is in the rent

supplement program. An appropriation of \$9,538.0 million is proposed for 1983 to liquidate contractual obligations made under the various subsidized housing programs as follows:

1. *Lower income housing (section 8).*—The 1982 budget program has been substantially revised as a result of a decision to emphasize use of the existing housing inventory in lieu of costly new construction. The Administration's revised proposal, with its increased utilization of existing housing, would fund 219,607 reservations in 1982, of which 22,502 units would represent new or substantially rehabilitated units and 197,105 would be existing housing.

Within these totals, the budget assumes funding of 16,900 units in connection with section 202 Housing for the Elderly or Handicapped and 5,569 units of other types of new construction or substantial rehabilitation. Under the category of subsidies to existing housing, the budget assumes the conversion of 173,000 units currently being subsidized under Rent Supplement (160,000 units) and section 236 Rental Assistance Payments (13,000 units). Although the actual conversion will require up to 3 years to complete, authority is being administratively committed in 1982 to assure project owners that sufficient funding will be available when the actual conversion occurs.

The Department intends to cancel subsidy commitments on an estimated 39,000 units of section 8 in 1982, primarily as the result of finding projects infeasible because of the lack of available financing. These cancellations (together with an estimated 20,000 units of cancellations under Public Housing) will permit the rescission of \$9.4 billion of annual contributions budget authority in 1982. The conversion of Rent Supplement units in 1982 will permit the rescission of \$2.8 billion of Rent Supplement budget authority (including the \$1,037 million already approved for 1982) for a total rescission of \$12.2 billion of budget authority. Additional information on the rescission proposed for 1982 is included in part III of the Appendix.

For 1983, the budget proposes a major reform to the basic section 8 program. All subsidies for new construction or substantial rehabilitation will be discontinued except for 10,000 units financed under the section 202 loan program. All other activity in 1983 will be directed toward existing housing and will make use of a revised, more cost-effective subsidy mechanism. The new subsidy will be based on the concept of providing housing certificates to eligible low income households which will permit them to find decent housing in the private market. While the subsidy will be based on the difference between an established rent payment standard for each market and a fixed percentage of family income, tenants will be given much greater freedom to determine how much of their income they actually spend to obtain standard housing.

In addition, program administration will be much less complex under the housing certificate approach and the actual subsidy costs will also be lower. A total of 106,615 units are expected to be funded under the modified section 8 certificate program in 1983—including

General and special funds—Continued

ing 30,000 units for use in connection with the new program for Rental Rehabilitation Grants (discussed later in this chapter) and 76,615 units that are currently receiving some other form of HUD subsidy and which will be converted to the housing certificate program. A total of 121,615 units will receive subsidy commitments under section 8 in 1983.

2. *Public housing.*—Under this program, local housing agencies have engaged in the development and operation of projects designed for occupancy by low-income households. Subsidies were provided under this program to cover the cost of financing the development, acquisition, leasing, and/or modernization of these projects. Additional subsidies are also available to cover operating deficits of these projects (see Payments for the Operation of Low-Income Housing Projects discussed below). No new development activity is planned for this program in 1983 because of the development of a more cost-effective substitute, the modified section 8 certificate program.

Beginning in 1982, the Department plans to offer local authorities the option of cancelling outstanding reservations for construction of new Public Housing projects and using a portion of the balance for modernization of existing projects. Modernization activity will be carried out at a level of \$1.8 billion in 1982, utilizing \$1.5 billion of these recaptures and \$300 million of budget authority deferred by the Congress from 1981. A portion of the recaptured authority will also be retained for use by those local agencies which need modernization funding but which do not have any projects in the processing pipeline that can be cancelled. Because of the projected use of these recaptures, no new budget authority is being requested to fund the program in 1983; instead \$1.8 billion of recaptured authority will be utilized for modernization of public housing projects in 1983.

3. *Rent supplement.*—Rent supplement payments are made to owners of certain private housing on behalf of qualified low-income tenants. In 1982, the Department will convert 60,000 rent supplement units to section 8; an additional 60,000 units will be converted in 1983. Amounts to be recaptured from these conversions will be used to provide amendments for certain rent supplement units under contract in 1982 and 1983. The balance of the amounts recaptured from the conversions, \$2.8 billion of budget authority in 1982 and \$2.8 billion of budget authority in 1983, will be rescinded. Funds for all conversions will be administratively committed in 1982. The remaining units in insured projects will be converted in 1983 and succeeding years.

4. *Homeownership and rental housing assistance (sections 235 and 236).*—For 1983, no new activity is planned under the section 235 program, which provides homeownership subsidies for lower income families.

The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 rental housing assistance program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative

project is required to make. This interest subsidy reduces rents for lower income tenants.

Reservation of all previous bona fide commitments made to specific projects or agencies before the termination of the production program in January 1973 was completed in 1981. Contract authority remaining in 1982 will be used for deep subsidies pursuant to the Housing and Community Development Act of 1974, as amended, and for amendments to existing contracts. No additional commitments under this program are planned for 1983.

College housing grants.—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

【PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS—FISCAL YEAR 1981】

【For an additional amount for “Payments for operation of low-income housing projects”, \$148,000,000, to remain available until December 31, 1981.】 (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982.*)

Note.—The amount shown above was made available until September 30, 1982 under section 501 of Public Law 97-101, which appears at the end of this chapter.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

For payments to public housing agencies for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), 【\$1,204,600,000】 \$1,075,000,000. Payments are provided to assist public housing agencies (PHAs) to meet certain deficits in the operation of PHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD.

For 1983, reduced operating subsidy requirements are projected as a result of increased tenant rent payments and improvements in the energy efficiency of public housing projects.

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

Funding is provided for essential repairs to correct deficiencies resulting from deferred maintenance. No appropriation is requested for 1983. However, an estimated carry-over balance of \$8 million together with an estimated \$24 million from the Rental Housing Assistance Fund will be used to provide \$32 million in financial assistance to approximately 98 projects.

This demonstration program is testing whether providing contracts directly with local public housing agencies and section 202 housing for the elderly or handicapped sponsors to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social services programs. Congregate services can include meal services and essential supportive services. These three- to five-year contracts commenced in 1980 and will be evaluated over the life of the contract. No additional resources are requested for 1983 since current funds are sufficient to evaluate the relative efficiency of this HUD approach.

[HOUSING COUNSELING ASSISTANCE]

[For contracts, grants, and other assistance, not otherwise provided for, for providing counseling and advice to tenants and homeowners—both current and prospective—with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership, including provisions for training and for support of voluntary agencies and services as authorized by section 106(a)(1)(iii) and section 106(a)(2) of the Housing and Urban Development Act of 1968, as amended, \$3,520,000.] (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982.)

Note.—The amount shown for 1982 was appropriated under section 501 of Public Law 97-101, which appears at the end of this chapter.

Pursuant to the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, inspections and investigations are conducted to enforce Federal manufactured home construction and performance standards. Manufactured home producers are required to have their building plans approved by an agency acceptable to HUD prior to manufacture. Appropriated funds which were enacted to initiate the Mobile Home Standards Program are estimated to be disbursed fully by the end of 1982.

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Housing and Community Development Amendments of 1979 and the Housing and Community Development Act of 1980, authorizes a program to establish and enforce appropriate construction standards

for the construction, design and performance of manufactured homes to assure their quality, durability, and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

The Housing and Community Development Act of 1980 contained a name change from "mobile home" to "manufactured home". Accordingly, the name of the program has been changed from "Mobile Home Inspection and Monitoring" to "Manufactured Home Inspection and Monitoring".

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. These fees are deposited in a special fund administered by the Department.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, not exceeding \$1,000, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and help finance the administrative expenses incurred in program operations. The balance of the administrative expenses is included under the Department's Salaries and Expenses account.

TITLE III—CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for 【1982】 1983 for such corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or

mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to [the mortgage insurance or guaranty operations of these corporations, or where] loans or mortgage purchases [are] necessary to protect the financial interest of the United States Government. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982.)

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), [\$222,148,000] \$240,022,000, to remain available until expended.

During [1982] 1983, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During [1982] 1983, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed [\$40,000,000,000] \$35,000,000,000 of loan principal.

During fiscal year [1982] 1983, gross obligations for direct loans of not to exceed [\$75,960,000] \$45,000,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982; additional authorizing legislation to be proposed.)

Note.—The language and the amount shown for payments under section 230(a) of the National Housing Act for 1982 were authorized under section 501 of Public Law 97-101, which appears at the end of this chapter.

The FHA fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

The *Mutual mortgage insurance fund* provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The *Cooperative management housing insurance fund*, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

The *General insurance fund* provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The *Special risk insurance fund* provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged to the appropriate insurance fund by the mortgage insurance program. During 1983, it is estimated that applications for single-family and multifamily mortgage insurance covering 660,000 units will be received and that mortgage insurance will be written covering 507,017 single-family and multifamily units. In addition, it is estimated that approximately 32,955 single-family and multifamily units will be acquired by the Department during 1983 and that 51,424 single-family and multifamily units will be sold. More detailed activity

Commencing with 1981, insurance reserves from operations reflect the interest earned on multifamily mortgage notes and the income and expenses applicable to acquired properties as income and expenses. Previously, such income and expenses were capitalized as part of the asset account.

Insurance reserves from operations at the end of 1983 are estimated to be in a surplus position for the Mutual

mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about \$5.4 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1983 is as follows:

STATUS OF INSURANCE RESERVES FROM OPERATIONS

As a result of the continued deficits in the FHA fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include tightened underwriting procedures and faster sales of acquired properties to reduce holding costs. In addition, beginning in 1982, the Department will offer for sale its portfolio of purchase money mortgages. Sales are expected to generate \$81 million of proceeds in 1982 and \$124 million in 1983.

For 1982, a new Temporary mortgage assistance payments program is being implemented that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This new program is viewed as a viable alternative to the home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the FHA fund.

Budget program.—The budget proposes an appropriation of \$240.0 million to restore the net realized losses from the sale of property covered by the General insurance and Special risk insurance funds.

Financing.—In 1981, \$47.4 million of debentures were issued and \$110 million were redeemed. There was \$96 million borrowed from the Treasury in 1981. It is estimated that a net of \$39 million will be repaid to the Treasury in 1982 and \$363 million will be repaid in 1983.

Operating expenses.—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA fund.

LOW-RENT PUBLIC HOUSING—LOANS AND OTHER EXPENSES*

*See Part III for additional information.

During [1982] 1983, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the low-rent public housing loan fund.

During [1982] 1983, total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the low-rent public housing loan fund.

Notwithstanding any other provision of law, unobligated balances of authority in the amount of \$1,400,000,000 to remain available until expended, shall be transferred from the amounts provided in prior appropriation Acts for section 5(c) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437(c)), and shall be available for contracts for periodic payments to the Federal Financing Bank, as authorized by section 16(b) of Federal Financing Bank Act of 1973 (12 U.S.C. 2294(b)), to offset the cost to the Bank of purchasing obligations of Local Public Housing Agencies issued for purposes of financing Public Housing Projects as authorized under Section 5(c); \$1,400,000,000 shall be available until expended for liquidation of obligations incurred pursuant to these contracts. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982; additional authorizing legislation to be proposed.)

The low-rent public housing loan fund provides Federal financing for the construction, acquisition, or modernization of public housing projects owned by public housing agencies (PHA's) until the projects can be financed through the Federal Financing Bank (FFB). Payments to liquidate the indebtedness of the PHA's are provided from the Housing Payments appropriation (in the Subsidized Housing Programs account) to liquidate contract authority under existing Annual Contributions Contracts. Additional payments are required to cover the differential between selling tax-exempt bonds to the public and selling bonds to the FFB at a taxable interest rate. These payments are authorized under Section 16 of the Federal Financing Bank Act of 1973 (Public Law 93-224). However, for 1982, Section 329-E of the Housing and Community Development Amendments of 1981 limits further authorization for these interest differential payments to \$400 million. The Administration is seeking repeal of section 329-E. A supplemental appropriation is being proposed for 1982 for the transfer of \$1.4 from the Subsidized Housing account for necessary interest differential payments. The status of loan approvals, reflecting permanent financing through the FFB, follows:

(a) *Direct loans.* Direct Federal loans are made to finance the early costs for both the development and modernization of projects. These loans are made from available working capital in this fund and from up to \$1.5 billion of borrowings from the Treasury.

(b) *Private loans.* When direct Federal loans to a PHA accumulate to an amount that is attractive to private investors, the PHA then sells short-term tax-exempt notes to the public and uses the proceeds to repay the direct Federal loans and to meet needs for additional financing to develop and modernize projects. These temporary notes are issued for short periods and may be revised to provide needed funds to develop and modernize projects. The status of temporary financing follows:

(c) *Bonds.* Previously, projects were permanently financed through the sale of long-term bonds to the public. No bonds have been sold to the public since 1974. After that date, financing of projects was made through the sale of short-term notes to the public. Beginning in 1980, long-term instruments were sold to the Federal Financing Bank.

Operating results.—The estimated net operating income of \$1.8 million in 1983 will increase retained income to \$80.2 million. Retained income may be required to meet program requirements in future years.

The Housing for the Elderly or Handicapped Fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. Pursuant to the provisions of the 1982 Appropriation Act (Public Law 97-101), budget authority has been reduced by \$29.3 million in 1982. For 1983, a \$453 million loan limitation is proposed which will provide financing for approximately 10,000 units. At least \$40 million of this amount will be used to finance an estimated 945 units designed specifically for nonelderly handicapped persons.

Financing.—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

Repayments and interest income from loans made prior to 1974 continue to be available to finance loan commitments under the revised program. In addition, borrowing authority as may be necessary is available in sufficient amounts to carry out the proposed \$453 million loan program in 1983.

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, up to 80%, but not to exceed \$50,000, of the start-up costs are funded through these "seed money" loans. Sponsors are required to demonstrate their financial capacity by providing 20 percent from their own funds which is repaid from the initial proceeds of the section 202 construction loan.

The proposed program level for 1983 will be funded from available balances and loan repayments and will finance 47 direct loans for selected projects that receive permanent financing under the Section 202 Housing for the elderly or handicapped program.

The community disposition program was established by the Atomic Energy Community Act of 1955 to dispose of federally owned properties.

Budget program.—All sales under the program have been completed. Servicing of the mortgage inventory currently held by the Department will continue.

Operating results.—The deficit in the fund is expected to be about \$14 million at the end of 1983. Funds recovered and transferred to the Treasury are estimated to aggregate \$85.8 million by the end of 1983.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent

collections received after 1978 to the troubled projects operating subsidy program. Prior to that time, collections were used for the payment of tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

As a result of an agreement reached in October 1978 in settlement of a lawsuit brought against the Department, funds were set aside for rent refunds. It is expected that \$15 million of unutilized tax and utility funds from the court settlement, along with about \$8 million of accrued interest, will be available in 1982 for transfer to the Troubled projects operating subsidy account.

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs. The section 312 rehabilitation loan program

is proposed for termination in 1983. Assets and liabilities of that fund will be transferred to the revolving fund (liquidating programs) during 1983 and have been reflected in this account.

Financing.—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

The fund is authorized to make loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

SPECIAL ASSISTANCE FUNCTIONS FUND

During [1982] 1983, within the resources and authority available, gross obligations for the principal amounts of direct loans made pursuant to section 305 of the National Housing Act, as amended (12 U.S.C. 1720), [shall not exceed \$1,973,000,000, which may be financed with collections received in 1982, and additional obligations] are authorized in such amounts as are necessary for increases to prior year commitments. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982.)

Special assistance functions.—The Association is authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans.

Through 1982, funds have been available to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is administered with the use of processing facilities of the Federal National Mortgage Association.

Budget program.—Commitment contracts amounting to \$1.973 billion are planned for 1982 for new commitments under Section 8 and targeted tandem. No new commitments are planned for 1983. Mortgage purchases, representing deliveries from commitment contracts in prior years, are estimated at \$2.0 billion in 1982 and \$2.0 billion in 1983, and sales of these mortgages are estimated at \$1.8 billion in 1982 and \$2.0 billion in 1983.

Financing.—Funds for mortgage purchases are obtained from principal liquidations through either repayments on portfolio mortgages or sale of tandem purchases, and borrowing from the Treasury. A portion of the mortgage portfolio was financed by sale of participation certificates. This amounted to \$1.2 billion in prior years and there will be a remaining liability of \$246.4 million offset by \$80.5 million on deposit with the trustee in anticipation of scheduled retirements in 1983. Funds for operating costs, mainly interest expense and discounts required on tandem mortgage sales, are obtained from mortgage earnings and from appropriations for the difference between interest expense on participation certificates and the income from related mortgage investment earnings.

market interest rate loans, tandem costs, interest on Treasury borrowings and asset sales amounted to \$3,461.1 million. Of this amount, \$3,382.3 million is carried as an impairment of capital.

The special assistance functions are expected to result in losses estimated at \$1,159.7 million in 1982 and \$1,498.2 million in 1983.

Appropriations for insufficiencies under the participation sales fund will cover \$2.1 million of 1982 losses and \$1.9 million of 1983 losses.

The following table shows the derivation and financing of the interest insufficiencies on outstanding participation certificates:

Emergency mortgage purchase assistance.—The Emergency Home Purchase Assistance Act of 1974 added Section 313 to the National Housing Act, authorizing standby authority to purchase mortgages. This authorization expired at the end of 1981.

Budget program.—The last release of commitments to purchase mortgages took place in September, 1976, when \$2.0 billion of authority was released for the purchase of multifamily housing project mortgages. Activity since that time has been limited to increases to existing contracts. It is not anticipated that any new commitments will be made through 1983; however, amendments to existing contracts are estimated to total \$5 million in 1982. Outstanding purchase commitments will continue to be honored, and purchases will amount to \$96.1 million in 1982.

Financing.—Funds are obtained from Treasury borrowings, mortgage principal liquidations, and mortgage interest payments.

Operating results.—Losses are estimated at \$485 million in 1982 and \$437 million in 1983, primarily from the differences in prices paid to purchase the below-market interest mortgages and the prices that are obtainable when such mortgages are sold at market yields.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans, or obligations. Liquidation of the portfolio is ac-

complished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand, or purchased under contracts made before, November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

Budget program.—It is not expected that any purchase of mortgages under these functions will be made during 1982 or 1983.

Financing.—These functions are financed principally by Treasury borrowings, portfolio liquidations, and, in the past, sales of participation certificates in mortgage pools.

Transfers of principal repayments on pooled mortgages to the Participation Sales Fund for repayment of participation certificates are expected to be \$23.5 million in 1982 and \$9.8 million in 1983. Pooled mortgages amounted to \$49.3 million of the total mortgage portfolio of \$123.0 million on hand as of September 30, 1981. As a result of repayments, the pooled mortgage portfolio is estimated to decline to \$25.8 million in 1982 and \$16.0 million in 1983. This program is more fully explained under the Participation Sales Fund.

Operating results.—Net income of \$6.4 million is estimated for 1982 and \$5.9 million for 1983. Cumulative retained earnings reserved for insufficiencies and other losses and contingencies is estimated at \$158.2 million for 1983. No payment to the Treasury out of earnings is projected for 1982 and 1983. The following table shows the financing of the insufficiencies:

¹ A limitation in the amount of \$48,000,000 thousand is proposed for 1982; see Part III for additional information.

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured, FmHA-insured, or VA-guaranteed mortgages.

GNMA guarantees the timely payment of principal and interest on the guaranteed securities. Recent efforts to limit and reduce losses in the pools through programmatic changes have resulted in substantial de-

Single-family pools.....	121	150	150
Project pools.....	82	750	750

Budget program.—For 1982, supplemental language is being proposed to reduce the limitation for commitments issued by \$20.25 billion to a level of \$48 billion. A limitation of \$38.4 billion is being requested for 1983. Program activity is summarized in the following table.

(In thousands of dollars)

	1981 actual	1982 estimate	1983 estimate
Commitments issued.....	42,150,000	48,000,000	38,400,000

Securities outstanding.....	104,636,623	129,600,000	158,300,000

Financing.—In addition to an application fee, guarantee fees and other charges are assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee.

In 1983, the commitment fee charged issuers of mortgage-backed securities will be revised. The current fee is \$500 for each commitment requested. The new fee will be \$500 for commitment amounts up to \$1.5 million and an additional \$200 for each \$1.0 million increment. In addition, all new issuers will be required to pay a one-time fee of \$250 in addition to the commitment fee.

Operating results.—Fee collections and other income are expected to exceed expenses by \$159.2 million in 1983. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of partici-

pation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title V of the Energy Security Act of 1980 authorized the creation of the Solar Energy and Energy Conservation Bank for the purpose of encouraging energy conservation and the use of solar energy by providing funds to lending institutions, utilities, and local governments to subsidize loans and grants for the installation of energy conservation and solar energy improvements in single and multifamily residences, and agricultural and commercial buildings.

The Administration believes that substantial economic incentives already exist for solar and energy conservation improvements. Consequently, a rescission of \$21,850,000 is being proposed in 1982 and no additional resources are requested for 1983.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States for the funding of local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between entitlement cities and urban counties and small communities. In most cases, States are expected to assume responsibility for implementation of grants to small communities.

Loan guarantees.—Loan guarantee assistance under section 108 has been provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses. No guarantee commitments are proposed for 1983. The budget proposes that the 1982 limitation on guarantee commitments be reduced to \$125 million.

Budget program.—The 1982 appropriation of \$3,600 million is being reduced by \$144 million to \$3,456 million pursuant to the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982. For 1983 the total appropriation requested is \$3,456 million.

Outlays are estimated at \$4,005 million in 1982 and \$3,350 million for 1983.

URBAN DEVELOPMENT ACTION GRANTS

Funds heretofore provided in Public Law 95-392, Public Law 96-103, and Public Law 96-526 for grants pursuant to section 103(c) shall remain available for obligation for one year after the date on which the authority to obligate such funds would otherwise expire] 1986. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982.)

Note.—The amount shown for 1982 was appropriated under section 501 of Public Law 97-101, which appears at the end of this chapter.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes grants to distressed cities and distressed urban counties for the funding of economic development projects.

In 1983, the budget proposes an appropriation of \$440.0 million which will support an estimated 324 projects.

URBAN HOMESTEADING

For reimbursement to the Federal Housing Administration Fund for losses incurred under the urban homesteading program (12 U.S.C. 1706e), and for reimbursement to the Administrator of Veterans Affairs and the Secretary of Agriculture for properties conveyed by the Administrator of Veterans Affairs and the Secretary of Agriculture, respectively, for use in connection with an urban homesteading program approved by the Secretary of Housing and Urban Development pursuant to section 810 of the Housing and Community Development Act of 1974, as amended, \$12,000,000, to remain available until expended. Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties, without payment, to units of local government for use in an urban homesteading program. In addition,

General and special funds—Continued

URBAN HOMESTEADING—Continued

the Act also authorizes the Administrator of Veterans Affairs and the Secretary of Agriculture to transfer their unoccupied, single-family properties for use in such programs.

Budget program.— An appropriation of \$12 million is proposed for 1983. This amount will support an estimated 818 single-family properties, at an average value of \$11,000, which will be conveyed to local governments. Also, within this appropriation, \$3 million will be used to support a proposed multifamily homesteading demonstration.

The Budget proposes a rental rehabilitation grants program to be implemented in 1983. Under this grant program assistance will be provided to States and cities to enable the rehabilitation of rental properties. This new program—which will be used in conjunction with the proposed housing certificate program—will replace the more costly and less effective section 312 Rehabilitation Loan and section 8 moderate rehabilitation programs. An appropriation of \$150 million will support the rehabilitation of an estimated 30,000 units.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the community development block grant program, authorized by the 1974 act.

No new budget authority is required for the program. However, a permanent indefinite appropriation to liquidate prior unfunded contract authority is available. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

Budget program.—Grants are distributed to new community developers under section 718 to supplement public facility projects in existing new communities. Public Law 96-7, dated April 9, 1979, rescinded all budget authority not administratively committed. Any amounts recovered subsequent to that date will be rescinded automatically. All remaining commitments are estimated to be disbursed by the end of 1984.

MEMORANDUM

------	---	---------	---------	---------

The Housing and Urban Development Act of 1968, as amended, and title VII of the Housing and Urban Development Act of 1970, as amended, authorized Federal assistance to private and public new community developers. The program provides for Federal guarantee of the obligations issued on behalf of new community developments.

Of the 13 new community projects which received guarantees, nine have been acquired. Of these, five have been fully or partially disposed of, and it is anticipated that two more will be disposed of during 1982 and two in 1983. The disposal process to date has required that the Federal Government retire the outstanding guaranteed debentures and provide funding for certain project operation expenses, as may be necessary to protect the Federal interest, where a project's cash resources are exhausted. In addition, the Department is working toward the goal of ending HUD's involvement in the four ongoing new towns. It is expected this action will be completed during 1983.

1. *Administrative expenses.*—These amounts represent the administrative cost of carrying out this program.

2. *Contract support and services.*—These costs are incurred for analysis and management and technical services, including land appraisals, for the new community projects in the program.

3. *Interest on U.S. Treasury borrowings.*—This represents the interest which will be paid to the U.S. Treasury on the borrowings of the fund. The increase in Treasury borrowings is necessary to fund the proposed budget plan.

Other program costs.—No redemptions of new community debentures are anticipated in 1983. It is anticipated that operating expenses for projects with exhausted cash resources will amount to \$4.5 million in 1982 and \$0.7 million in 1983. Interest payments on guaranteed debentures will decline as a portion of the outstanding debentures is retired. A part of this retirement consists of principal payments for two new towns, in the amount of \$1.3 million which will be due in 1982 and \$1.8 million in 1983, both of which must be paid by HUD if the developers are unable to do so.

Financing.—The budget program in 1982 and 1983 will be financed primarily by Treasury borrowing. In addition, income of \$15.0 million in 1982 and \$15.9 million in 1983 is expected to be received from the sale of assets of acquired projects.

Operating results.—Through September 30, 1981, cumulative net loss in the fund amounted to \$308.0 million. It is estimated that the fund will accrue an esti-

mated deficit amounting to \$372.5 million by the end of 1983. This net loss is the result of payments of claims under loan guarantees and other expenses and liabilities incident to the protection of the Government's interest in projects which have received loan guarantees.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out through contracts with industry, nonprofit research organizations and educational institutions, and through agreements with State and local governments and other Federal agencies. Additional analysis and evaluation is currently being performed by in-house staff as well.

In 1983 studies on ways to improve the Department's programs continue as the highest priority.

Particular areas of study include the following:

- Strategies for increasing the efficiency and effectiveness of assisted housing programs through reforms of existing program and evaluation of alternative programs.
- Analysis of the relationship between tax policies and housing; assessment of alternative housing finance mechanisms (such as mortgage instruments), financial institution regulation reform, and alternative tax and other financial incentives for housing.
- Ways to reduce the component costs of housing (costs of development, building, financing, and operating).
- Development of better means of managing communities and delivering of local government services, to

gether with disseminating and sharing those concepts among local officials.

- Identification of strategies successfully used by neighborhood organizations and local governments to preserve neighborhoods.
- Analyses of new or improved alternatives for urban economic development, including enterprise zones, regulatory and tax relief, and public finance grant and tax policy; studies of urban change; and the formulation of urban policy.
- Issues of fair and nondiscriminatory housing.

Additionally, the Department plans to continue such activities as: collection and analysis of economic and financial data essential to HUD policy and program development.

The Working Capital Fund, authorized by the Department of Housing and Urban Development Act of 1965, finances administrative services which can be performed more efficiently on a centralized basis. The fund is financed from fees charged for services performed. An appropriation of \$528 thousand was provided in 1982 to provide funding for data processing equipment.

The Joint grants management fund is used for the administration of integrated grant administration projects for which HUD is the lead agency. Obligations are on the basis of project approvals by Federal regional

councils and fund commitments by participating agencies. Advance payments from participating agencies are received in the fund and utilized to finance the administration of the projects. The activity in 1982 and 1983 will depend on requests for assistance and the extent to which agreements are reached with other Federal agencies.

This fund is the repository of gifts and bequests which the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. The provision of section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

TITLE IV—GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, that this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; or to payments to interagency motor pools where separately set forth in the budget scheduled.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—
(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such an audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitations.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the Government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

[SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations without the approval of the Committees on Appropriations.]

SEC. [410] 409. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. [411] 410. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. [412] 411. Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

[SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

[SEC. 414. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other

DEPARTMENT OF THE INTERIOR

LAND AND WATER RESOURCES

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management is currently responsible for the conservation, management and development of 325 million acres of public lands, including 150 million acres in Alaska. Of these, 75 million acres in Alaska will ultimately be conveyed to other parties (Alaska Natives, the State of Alaska, and other agencies).

The Bureau also administers mining and mineral leasing on 370 million acres of mineral estate underlying other ownerships, and approximately 1.1 billion acres of the Outer Continental Shelf.

1. **Energy and minerals management.**—Includes such activities as energy and nonenergy minerals management (onshore and offshore) in response to national demand. The program provides for sale of coal, oil and gas, geothermal resources, and nonenergy minerals as well as administration of existing leases. The environmental impact of proposed energy and minerals development activities is assessed. Lease stipulations and other environmental protection measures are developed to mitigate adverse effects. The program provides for issuing onshore oil and gas leases including management responsibilities for the National Petroleum Reserve in Alaska, geothermal leases, holding two competitive regional coal lease sales, holding nine competitive sales on the Outer Continental Shelf, and implementing a tar sands, prototype, and permanent oil shale leasing programs. Various nonenergy minerals activities are also administered.

2. **Lands and realty management.**—Includes such activities as use authorization in support of energy and other programs, maintenance of official land records, and land classification. These activities provide for maintenance of public land status records, and issuance of information about public realty and mineral laws. It further provides for the processing of applications for transfer of use of the public lands for other Federal agencies, State and local governments, and private individuals. Land and realty actions include processing rights-of-way applications for energy-related development; processing land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act; processing non-energy-related cases; and review of public land withdrawals, revocation of withdrawals and new withdrawal processing.

MANAGEMENT OF LANDS AND RESOURCES—Continued

3. *Renewable resource management.*—Includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, protection, preservation and sustained yield management of the natural resources on the public lands.

The public domain forest management program provides for the management, development, protection, and sustained yield of timber products on more than 2.1 million acres of commercial forest land. The 1983 sales objective is 97 million board feet with an estimated sale value of \$19.7 million.

The range management program in 1983 will place greater emphasis on use supervision and multi-year monitoring of range condition rather than on intensive, single-year inventories before deciding if livestock adjustments are needed. The program will continue to emphasize compliance with the court-ordered schedule for environmental impact statements. Costs for maintenance of range improvements will be shifted to livestock operators, consistent with a new policy on the use of range improvement funds. A new policy provides for the distribution of available appropriated funds in a manner which will achieve the most cost-efficient use of funds by concentrating their expenditure in those areas where grazing management action is needed to protect the basic resources, resolve resource conflicts, and produce maximum economic return on funds invested.

Recreation management in 1983 will provide for management, protection, and visitor use assistance on public lands. Five plans and studies on wild and scenic rivers will be initiated. In 1983, 22 wilderness studies will be completed through the Bureau planning system and 10 additional planning studies will be initiated. In addition, off-road vehicle management implementation will be completed on an estimated 18 million acres in 1983, with additional designations occurring on 500,000 acres.

The wildlife habitat management program provides for protection and management of terrestrial, aquatic, wetland, and threatened and endangered species habitats on public lands. Wildlife habitat inventory, planning, environmental assessment, on-the-ground actions, and monitoring are included. The Bureau coordinates habitat management and development closely with State and Federal agencies such as the Forest Service and the Fish and Wildlife Service to improve cost effectiveness and ensure that common objectives are met.

Fire management provides for developing fire techniques as a tool for resource management and developing fire prevention and suppression methods.

The soil, water, and air management program includes such activities as stabilizing soils; improving water and air quality through land treatment or development of facilities; maintaining structures and facilities; identifying and protecting water rights for public land uses; and gathering soil/vegetative data necessary to make management decisions on grazing, timber, and energy development.

4. *Planning and data management.*—Includes such activities as data analysis, development of land use plans, and automated data management. These activities provide for developing multiple use plans on 174 million acres of public land; these plans are the required basis of all subsequent land use decisions. Data management supports Bureau programs through development and operation of automated systems for acquiring, storing, using, and disseminating data required for all aspects of agency and resource management.

5. *Cadastral survey.*—Provides for identification of land boundaries and legal property descriptions to facilitate land management programs.

In Alaska, surveys are performed on lands selected by the State for transfer under the Alaska Statehood Act and for Native townsites, Native allotments, claims resulting from the Alaska Native Claims Act and the Alaska National Interest Lands Conservation Act, and for other special purposes.

Surveys in the lower 48 States are performed to identify land boundaries as a prerequisite to resource management. This involves both new surveys and resurveys to reestablish obliterated boundary markers.

6. *Firefighting and rehabilitation.*—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires. Based on a 10-year annual average of 1.2 million acres, fires result in resource damages averaging \$17.2 million each year. Firefighting and rehabilitation costs are anticipated to exceed the amount appropriated for this function in 1982; a supplemental appropriation request appears in Part III of this Appendix. Emphasis, in 1983, will be directed toward holding a higher number of fires to 10 acres or less in higher value classes.

7. *Technical services.*—Provides for enforcement of laws and regulations governing the management, use, and protection of public lands through cooperative agreements with local and Federal law enforcement agencies, Federal special agents, and a uniformed ranger force in the California desert.

This activity also provides engineering expertise to all Bureau programs. Services include survey and design, development of specifications, contract administration, construction cost estimating, maintenance scheduling, transportation system management, facility evaluation, sign shop operation, and maintenance. Maintenance includes activities for the care and upkeep of Bureau of Land Management facilities, which include buildings, roads, trails, developed and undeveloped recreation sites, and other management facilities. The primary objectives are to protect the public's investment in capital improvements, to prevent unnecessary and higher expenditures in the future, to correct actual and potential health and safety hazards, and to improve services to the public.

8. *General administration.*—Includes executive management and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities. Bureau-wide fixed costs such as lease of office space, telecommunications, utilities, and household moves of employees are also included.

The Oregon and California Grant lands appropriation provides for management of revested railroad and wagon road lands for permanent forest production under the principal of sustained yield.

1. *Construction and acquisition.*—Provides for the acquisition of 40 road easements to commercial timber areas. No construction projects are planned in 1983.

2. *Maintenance.*—Provides for maintenance of access roads, operation and maintenance of recreation facilities, and maintenance of management facilities.

3. *Renewable resource management.*—Provides for reforestation, stand improvement, mortality salvage, commercial thinnings, forest genetics, timber management, protection, and other resource management actions on the O. & C. lands. Planned timber sales in 1983 will be 1.1 billion board feet with an estimated value of \$232 million.

4. *Planning and data management.*—Provides for preparation and updating of Bureau planning system documents and for automated data processing costs.

The appropriation is derived from receipts from grazing of livestock on public lands, and grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive orders. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i, 1701). Under a new policy beginning in 1982 and to be phased in over a three-year period, rangeland improvement funds will be used exclusively for on-the-ground development and project survey and design. Responsibility for maintenance of existing and future improvements will be shifted to livestock operators.

1. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

2. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

3. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

4. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

BUREAU OF LAND MANAGEMENT—Continued

General and special funds—Continued

MISCELLANEOUS PERMANENT APPROPRIATIONS—Continued

5. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

6. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

7. *Payments to States from grazing receipts, etc., public lands within districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

8. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

9. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands.

10. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

11. *Expenses, road maintenance deposits.*—Public Law 94-579 approved October 21, 1976, permanently appropriated certain monies to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and monies collected are available for necessary road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only. (43 U.S.C. 1701 et. seq.)

1. *Land and resource management trust fund.*—Applicants for conveyance of lands omitted in original surveys pay the cost of surveys and the administrative costs of conveyance. Advances are made by individuals to pay the costs of other types of surveys requested by them. Users of the Federal range and others contribute funds or make gifts for conservation practices, acquisition, protection, and other purposes (43 U.S.C. 315h, 315i, 775, 74 Stat. 506; 31 U.S.C. 711; 43 U.S.C. 759, 761, and 887; 48 Stat. 1224-1236; 90 Stat. 2758 (43 U.S.C. 1701)).

2. *Trustee funds, Alaska townsites.*—Amounts received from sale of Alaska town lots are available for expenses incident to the maintenance and sale of townsites (31 U.S.C. 725s; Comp. Gen. Dec. of Nov. 18, 1935).

BUREAU OF RECLAMATION

The Bureau of Reclamation plans, constructs, and operates facilities to irrigate lands, furnish municipal and industrial or other water supplies, and develop related hydroelectric power and flood control in the 17 western States and Hawaii.

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, derived from the revenue of the Boulder Canyon project. The 1983 estimates are summarized by source as follows (in thousands of dollars):

Appropriation title	Estimate of appropriation	General fund	Reclamation fund	Colorado River Dam fund	Other
Loan program	39,600	39,600			
Construction program	666,585	331,585	335,000

Federal Funds

General and special funds:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau as follows:

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U.S.C. 421a-421d), and August 6, 1956, as amended (43 U.S.C. 422a-422k), including expenses necessary for carrying out the program, **[\$22,614,000] \$39,600,000**, to remain available until expended: *Provided*, That during **[1982] 1983**, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed **[\$26,922,000] \$38,839,000**. *Provided further*, That any contract under the Act of July 4, 1955 (69 Stat. 244), as amended, not yet executed by the Secretary, which calls for the making of loans beyond the fiscal year in which the contract is entered into shall be made only on the same conditions as those prescribed in section 12 of the Act of August 4, 1939 (53 Stat. 1187, 1197). (*Energy and Water Development Appropriation Act, 1982*.)

Under the Small Reclamation Projects Act (43 U.S.C. 422a), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided to continue construction on nine projects for improving existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and purchasing maintenance equipment. Completed construction for ongoing projects will improve irrigation service to 592 thousand acres and annually provide 84 thousand acre-feet of municipal and industrial water.

Under the Distribution Systems Loans Act, loans can be made to organizations for the construction of irrigation and municipal or industrial water distribution systems on authorized Federal reclamation projects. Work will continue on one project in 1983 which will provide irrigation service to 48 thousand acres in the Central Valley project, California.

^a Includes \$2,750 thousand from the State of California for construction on the San Luis unit of the Central Valley Project.
Note.—Excludes \$2 million in 1983 for activities transferred to the Bureau of Reclamation's General Investigations appropriation. Comparable amounts for 1981 (\$625 thousand) and 1982 (\$950 thousand) are shown above.

In 1983 construction will continue on 70 projects, and preconstruction planning will be underway on two projects. Prior to 1983, all advance planning was budgeted in the Construction Program. Starting in 1983, new advance planning activities will be funded in the General Investigations appropriation. The construction completed through 1982 will provide full irrigation service to 5,098,800 acres, a supplemental water supply to 5,748,200 acres, annually provide 4,037,749 acre-feet of municipal and industrial water, and 12,813,000 kilowatts of hydroelectric power. During 1983, facilities will be completed to furnish a water supply to 30,300 acres, and facilities to furnish 100,000 kilowatts of hydroelectric power and 20,100 acre-feet of municipal and industrial water.

After consultation with local project sponsors, the administration will request appropriation of funds to initiate construction of new water resource projects that meet the administration's criteria for non-Federal financing and cost sharing and are economically and environmentally sound.

Beginning in 1983, the reimbursable foreign activities program formerly carried out by the Office of Water Research and Technology will be administered by the Bureau.

Note.—Includes \$2 million in 1983 for advance planning activities previously funded from the Bureau of Reclamation's Construction Program appropriation in 1981 (\$625 thousand) and 1982 (\$950 thousand)

This appropriation finances studies of potential projects for the conservation and utilization of water and related land resources and includes plan formulation investigations, general engineering and research activities, and advance planning work.

Investigations are made to evaluate resource development potential and measures to improve resource utilization and conservation, and include applied research.

1. *Plan formulation investigations.*—These include 9 appraisal investigations, 31 feasibility investigations, and 18 special investigations throughout the 17 Western States to formulate resource development plans for river basins or specific projects. Studies may lead to proposals for the construction of new projects or for better water conservation and management on existing Federal reclamation projects.

2. *General engineering and research.*—Studies are directed toward developing new construction materials, better planning tools, and design and construction techniques. Included are studies of atmospheric water resources to increase precipitation by cloud seeding.

3. *Advance planning.*—This program provides for detailed studies to refine findings of feasibility reports and evolve definite plans for construction of proposed projects.

In 1983, a total of 32 projects, project areas, or divisions of projects will be operated and maintained for power, municipal, and industrial water supplies, irrigation, and other benefits with funds made available under this appropriation.

Provision is also made for flood control operations on certain projects, soil and moisture conservation operations on public lands under jurisdiction of the Bureau, the land resources management program, Cultural Resource Activities, irrigation management services, negotiation and administration of water marketing contracts on Corps of Engineers projects, and examination of existing structures and administration of acreage limitation provisions.

In addition, operation and maintenance costs of the Upper Colorado River storage project, and Colorado River Basin project are included.

In 1983, the Bureau will operate and maintain the facilities of the San Juan-Chama project, four units of the Upper Colorado River storage project, and the power facility of the Seedskaadee participating project, which altogether include 32,218,000 acre-feet of storage space and 1,435,000 kilowatts of power generation capacity. Financing will be from project revenue. Quality of water and consumptive studies for the Upper Color-

do River Basin, flood control studies of the Florida and Paonia participating projects and the nonreimbursable operation and maintenance will be financed from operating revenues and repayable debt of the storage project, and participating projects will be reduced by this amount.

The 1983 program under the Colorado River Basin project provides for the Bureau's share of operation and maintenance costs of the Navajo project participating agreement. Financing will be from project revenue (82 Stat. 894).

1. *Habitat preservation.*—The Service conducts investigations, provides technical and planning assistance, and recommends fish and wildlife conservation measures on land and water resource development projects sponsored, licensed or assisted by the Federal Government. Research is conducted to predict and evaluate both acute and long-term effects of exposure to a broad range of environmental contaminants and other impacts on fish and wildlife resources. Ecological information is distributed to public and private land and water resource development organizations and training is provided to fish and wildlife professionals.

2. *Wildlife resources.*—The Service assists in the enhancement and management of the Nation's wildlife resources to assure that their populations are available for the use and enjoyment of the public. The Service maintains an extensive national wildlife refuge system consisting of 410 units, including new and expanded refuges in Alaska and 28 wetland management districts containing about 88.7 million acres managed for migratory birds and other wildlife for which the Federal Government has responsibility; conducts comprehensive refuge management plans for the 16 new or expanded areas in Alaska; directs and coordinates national migratory bird programs; administers certain aspects of the Marine Mammal Protection Act; enforces Federal game laws and regulations; provides technical assistance in the management of wildlife on Indian and other Federal lands; conducts research to improve wildlife management capabilities; and provides direct and extension assistance in the reduction of wildlife-caused damages.

An interpretation, education, and recreation program is provided at its refuges, fish hatcheries, and research laboratories.

WILDLIFE RESOURCES RESULTS

Service lands administered primarily for:	1981 actual	1982 estimate	1983 estimate
Migratory birds:			
Number of areas	391	393	396
Millions of acres	41.00	41.05	41.10
Other wildlife:			
Number of areas	19	20	20
Millions of acres	45.70	45.70	45.80
Wetland management districts:

Millions of waterfowl produced	2.70	3.20	3.40
Game law violations (cases)	19,300	18,700	18,100

3. *Fishery resources.*—The Service assists in the development, management, and protection of interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on service lands. Included is the operation of 58 national fish hatcheries and 5 fish cultural development centers and a training academy. Research is carried out at 1 national center, 11 major laboratories, and 25 field stations to determine status of fish populations, to improve sport fish productivity, increase hatchery efficiency, and develop methods of controlling undesirable fish. Service biologists provide assistance to Indian tribes in the management of Indian fisheries.

FISHERY RESOURCES RESULTS

	1981 actual	1982 estimate	1983 estimate
Production, number	163,000,000	165,000,000	119,400,000
Production, pounds	6,300,000	6,500,000	5,500,000

4. *Endangered species.*—The goal of this program is to prevent species from becoming extinct and, wherever possible, to return them to the point where they are neither endangered nor threatened. The strategy consists of: Identification and listing of species that are endangered or threatened; providing protection from taking, harassment, trade, and adverse alteration of its critical habitat by a Federal action, increased emphasis on the development and implementation of recovery programs for all listed species.

5. *General administration.*—This activity provides overall policy formulation, direction, and administration for all matters related to the effective execution of fish and wildlife programs and operations. The two components of this activity are: (1) executive direction—providing Service-wide management, ensuring the effective performance in achieving Service goals and objectives, and (2) administration support services—providing essential staff and support services including personnel, accounting, fiscal and financial activities as well as management of contracts, telecommunications, space, central services related to payroll, supply, and mail.

1. *Park management.*—The Service administers 333 park areas comprising about 73.7 million acres of federally owned land located in 49 States, the District of Columbia, Puerto Rico, the Virgin Islands and the Trust Territory of the Pacific Islands. The program includes: (1) Overall management of park areas necessary to accommodate an estimated 362 million visitors in 1983; (2) maintenance of buildings and other facilities required to accommodate visitor use, as well as to protect the Government's investment; (3) interpretive programs to enhance the visitors' park experience; (4) law enforcement to protect the visitors' well-being and reduce vandalism and other destruction to park resources; and (5) resource management necessary for the protection and preservation of the unique natural, cultural, and historical features in the National Park System.

The following tabulation shows the actual and estimated visits, and general and special fund revenues collected and to be collected by the National Park Service. The 1983 estimate is based on proposed recreation fee increases.

Year:	Visits	Revenues
1979 actual	279,210,110	21,063,000
1980 actual	294,582,280	21,088,119

1982 estimate.....	346,813,000	30,618,000
1983 estimate.....	362,165,000	58,957,000

This activity comprises: Management of park areas; concessions management; interpretation and visitor services; informational publications; visitor protection and safety; maintenance; and resources management.

2. *Forest fire suppression and rehabilitation of burned areas.*—This activity provides for the suppression and emergency presuppression of fires on or endangering lands administered by the Service, and for the rehabilitation of burned areas to conserve resources, and for the protection of park visitors.

4. *Park, recreation, and wilderness planning.*—This activity provides for studies, investigation, and planning programs to support and direct the overall development and management of park areas and to protect and manage park water resources. Specific programs in-

clude: Water resource studies; general management plans.

5. *Statutory and contractual aid.*—The Service provides financial or other assistance in the planning, development, or operation of natural, historical, or recreation areas not operated by the National Park Service. This assistance is provided for the following sites as authorized by law or pursuant to agreements between the National Park Service and other Federal agencies, States, or private institutions: (a) Roosevelt Campobello International Park Commission, New Brunswick, Canada; (b) Ice Age National Scientific Reserve, Wisconsin; and (c) Lowell Historic Preservation Commission, Massachusetts.

6. *General administration.*—This activity, established in fiscal 1982, includes the functions previously identified under the Executive direction activity as well as administrative support functions in the Washington and Regional offices, employee compensation, General Services Administration space rental, postal and telephone services, and automatic data processing.

to Federal agencies, States, local governments, and the private sector on a variety of outdoor recreation proposals, problems, and studies; and coordination of the Service's programs with programs and policies of other agencies, particularly in areas of urban recreation concern.

2. *Natural programs.*—Funds are provided for: Development of administrative and technical services to promote the identification and protection of resources representing the Nation's natural heritage, including: (a) technical assistance to States to establish State natural area programs; (b) development and coordination of procedures for use by Federal agencies, States, and local governments to identify, select, and consider natural areas in their planning processes; (c) encouraging and promoting the involvement of the private sector and individuals in natural area identification and protection; (d) conducting required and special studies of resource protection issues and techniques; (e) reviewing and monitoring of Federal agency activities that affect natural resources; (f) analyses of potential wild and scenic rivers, national trails, and wilderness; and (g) identification of surplus Federal lands suitable for recreation purposes and assistance in the transfer of such lands for public use. This program also finances the conduct of natural landmark studies to locate and identify natural areas of national significance. Natural areas are recognized by placing them on the national registry of natural landmarks. The condition of national landmarks is monitored and an annual report is made to Congress on those which are endangered.

3. *Cultural programs.*—Funds are provided for: (a) maintenance of the National Register of Historic Places, the official schedule and protective inventory of the Nation's historic and cultural heritage; (b) assistance on preservation, improvement, restoration, and maintenance of cultural properties; (c) Historic American Buildings Survey for documenting the Nation's architectural heritage; (d) Historic American Engineering Record for identifying and documenting the engineering heritage of the Nation; (e) archeological investigation and salvage for conducting such programs primarily in areas threatened by federally sponsored construction programs; and (f) cultural policy planning and evaluation for establishing priorities, maintaining consistency and providing policy guidance in the historic preservation programs.

4. *Environmental and compliance review.*—Coordination of diverse Federal outdoor recreation and related programs is promoted. Reviews are made of transportation and environmental impact statements for projects which affect major public recreation resources.

1. **Construction.**—Physical, real property facilities, including buildings, structures, roads, trails, utility systems, and other facilities, are needed in National Park System areas to meet the objectives of resource preservation and visitor use programs. The construction activity provides for: (1) Rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and maintenance facilities, roads, bridges, trails, and utility systems; and (3) construction of new visitor use and operational facilities where the need exists.

2. **Emergency and unscheduled projects.**—Minor emergency and unscheduled construction needs emerge during the fiscal year because of storms, utility system breakdown, and other unforeseen circumstances. To continue visitor services and preserve resources, minor emergency reconstruction and repair projects are performed.

3. **Planning.**—Under this activity, the National Park Service conducts environmental, architectural and engineering studies, as well as planning and design activities to: (1) Acquire archeological, historical, environmental, and other information necessary to design facilities; (2) provide architectural and engineering design drawings and specifications for the purpose of constructing buildings, roads, trails, utility systems, and other facilities.

1. *Educational expenses, children of employees, Yellowstone National Park.*—Revenues received from the collection of short-term recreation fees to the park are used to provide educational facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

2. *Payment for tax losses on land acquired for Grand Teton National Park.*—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

3. *Operation, management, maintenance, and demolition of federally acquired properties, Independence National Historical Park.*—Moneys collected from rental operations of the Irwin Building were used for the operation, management, and maintenance of this building and its subsequent demolition, as authorized in the act approved October 26, 1951 (65 Stat. 664).

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park System (16 U.S.C. 6). Donations amounting to \$0.8 million were received from contributions during 1981. The Service estimates that donations of \$1.7 million will be received in both fiscal 1982 and 1983.

2. *Preservation, Birthplace of Abraham Lincoln, National Park Service.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest therefrom is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Ky. (16 U.S.C. 211, 212). The amount of \$8,000 was received in 1981.

3. *Jefferson National Expansion Memorial, contributions.*—Pursuant to the act of May 17, 1954 (68 Stat. 98-100), as amended, the Secretary of the Interior was authorized to construct upon the Jefferson National Expansion Memorial National Historic Site, St. Louis, Mo., an appropriate national memorial to those persons who made possible the territorial expansion of the United States. Contributions are accepted from the city of St. Louis or other non-Federal sources in the ratio of \$1 to each \$3 of Federal appropriations.

The Geological Survey provides basic scientific data and information concerning water, land, and mineral resources, and supervises the prospecting, development, and production of energy and mineral commodities on leased Federal, Indian, and other Outer Continental Shelf lands.

1. *National mapping, geography, and surveys.*—The national mapping program produces and makes available cartographic and geographic information, multipur-

pose maps, and various base and special purpose maps, and basic cartographic and geographic data in printed and digital format.

Increased funding is provided for the revision of primary quadrangle maps. The decrease shown for 1983 is related to reductions in new primary quadrangle mapping, land-use/land-cover mapping, and the operational testing of the Airborne Profiling of Terrain System (APTS).

In 1983 the Geological Survey is again proposing to establish a revolving fund for digital cartography that will finance the digital cartography program as a separate appropriation.

2. *Geologic and mineral resource surveys and mapping.*—The national program of geologic research and investigations proposed for 1983 provides for an increase to the strategic and critical minerals program and an increase to make the National Coal Resource Data System operational. Additional increases are for the Alaska and conterminous U.S. mineral surveys, geological framework, offshore oil and gas resources, and energy-related hazards programs. These increases are offset by decreases in oil shale, geothermal, uranium/thorium, earthquake hazards reduction, volcano hazards, and world energy resource assessment programs.

3. *Water resources investigations.*—The continuing national program of water resources investigations has the objective of appraising the Nation's water resources and insuring that the water data necessary to develop and manage them efficiently and effectively are available when needed. The 1983 request provides an increase for hydrologic data collection and analysis; and for expanding the program initiated in 1982 to determine the processes to reduce or remove contamination in ground water, and to develop information important to improving hydrologic and geologic guidelines for the selection, design, and operation of toxic waste disposal sites. In addition, the program initiated in 1982 to study the effects of acid rain on water, land, and the subsurface environment will be expanded to include additional research and monitoring to provide information needed to establish the basis for future policy decisions by the Government. The 1983 request also provides for a reduction in the coal hydrology program which shifts a share of responsibility for the collection of hydrologic information and assessment data to industry and State government.

4. *Conservation of lands and minerals.*—The program provides for: (1) classification of federally owned lands for the existence and workability of leasable mineral deposits and for sites for development of water resources, offered for lease by competitive bidding; and (2) regulation and supervision of mineral prospecting, development, and production operations on leased Federal, Indian, and Outer Continental Shelf (OCS) lands.

In 1983, increased funding is provided to continue the implementation of the Improved Royalty Management System. The proposed increase is designed to complete the implementation of the Production Auditing and Accounting System, to guide industry through the period of systems conversion, and to begin a program of auditing production records to validate sales and production

data supplied by industry. Lease sale evaluation activities will be significantly altered due to the streamlining of the OCS lease sale process, which will make it possible to handle larger OCS lease sales during the year. Funding has been increased for OCS resource evaluation to provide for CDP seismic data acquisition in support of fair market value resource determinations. OCS regulation of operations funding is increased to provide added support to offshore inspection and accident investigation capabilities. Increased funding in Reserve Inventory will be used to enhance the maintenance of current reserve estimates as they are reduced by production and increased by the addition of reserves through reservoir extensions, discovery of new field reservoirs, and new fields. Continued emphasis will be placed on the requirements of the onshore oil and gas regulation program in 1983 by increased funding and adding 50 additional inspectors. This field staff increase will come primarily from a reduction of overhead staff made possible by administrative efficiencies.

The proposed decrease in the Federal and Indian lands coal program would reduce close-spaced government drilling to delineate lease tracts for competitive coal lease sales and place increased reliance on data acquired by industry under exploration licenses or data which is available from other sources to determine fair market value.

5. *Earth sciences applications.*—The principal mission of this activity is to improve the planning, coordination, and implementation of land-resources programs of the Geological Survey. Decreases shown for 1983 reflect the following major changes within this activity: (1) Landsat data production and distribution will be performed through reimbursable funding provided by the National Oceanic and Atmospheric Administration, Department of Commerce; and (2) studies and research addressing user assistance and training in Earth science technology transfer will be reduced, with a greater share of those activities directly supported by the users.

6. *General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support to the Bureau as a whole.

7. *Facilities.*—The funds included in this activity finance the operation and maintenance costs, facilities management needs, and related special support services necessary for the operation of the National Center Headquarters Complex and major field centers.

Reimbursements from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigation (43 U.S.C. 48); proceeds from sale to the public of copies of photographs and records (43 U.S.C. 450); proceeds from sale of personal property (40 U.S.C. 481(c)); reimbursements from permittees and licensees of the Federal Energy Regulatory Commission (16 U.S.C. 797); and reimbursements from friendly countries and international organizations for technical assistance (22 U.S.C. 2357). Reimbursements from other Federal agencies (31 U.S.C. 686) are for special-purpose mapping, investigations, and computer services performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

	1981	1982
Department of the Interior—Exploration of National Petroleum Reserve in Alaska	2,861,000	6,975,000

Barrow area gas operation exploration and development.—The requested funding is for carrying out the provisions of section 104(e) of Public Law 94-258. Funds are used for the operation and maintenance of natural gas fields to supply gas to the native village of Barrow, as well as to other native communities and Federal installations at or near Point Barrow, Alaska. 1983 will be the first year during which the Geological Survey will be required to fund the full cost of providing a stand-alone base camp for operation and maintenance of the Barrow gas fields. During prior years, the Office of Naval Research operated the gas fields for the Geological Survey under an Interservice support agreement. The actual operation of the gas fields was accomplished through the contractor whom the Office of Naval Research had selected to operate the Naval Arctic Research Laboratory. Under the Interservice support agreement, the Geological Survey was assessed a proportionate share of the base camp costs. Because the Navy is expected to close the Naval Arctic Research Laboratory during 1982, the Geological Survey must provide its own operating base in 1983.

Payments from proceeds, sale of water.—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229).

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed 18 passenger motor vehicles, for replacement only; reimbursement to the General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for observation wells; expenses of the U.S. National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (31 U.S.C. 638a (a) and (b); 43 U.S.C. 31, 36(b); 66 Stat. 453; Public Law 97-100, making appropriations for the Department of the Interior and Related Agencies, 1982.)

Legislation is pending to establish a revolving fund that will finance a digital cartographic data program. The program would produce and make available digital data from existing map series in formats suitable for computer-based analysis. Initial areas of coverage will be determined on a priority basis to meet the needs of Federal agencies. This program is currently financed by direct appropriation. The revolving fund would facilitate the growth of the data base and the services provided. Amounts charged for digital cartographic products will eventually be the primary revenue source for the fund. It is anticipated that appropriations will be required to provide working capital until the fund reaches a self-sustaining level.

¹Excludes \$9,244,000 in 1982 for Mineral Institutes activities transferred to Department of Interior, Bureau of Mines. Comparable amount for 1981 (\$9,629,000) is included above.

1. *State regulatory program grants.*—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Act. As of August 31, 1981, 16 of the 27 States with actual or planned coal mining facilities had approved State programs. Ten of the remaining States are expected to attain primacy and begin implementation of their programs in 1982. It is anticipated that favorable consideration will be given to a supplemental request should States demonstrate a need for and capability to administer additional grant funds in 1983.

2. *Federal regulatory programs.*—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, and for the provision of technical assistance to States and the administration of the Federal coal program.

3. *Mineral institutes.*—This activity is funded under the Bureau of Mines, Mines and Minerals account in 1982.

5. *General administration.*—This activity includes: the Offices of the Director and Assistant Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, and Regula-

tory and Issues Management; and the Divisions of Financial Management and Planning, Personnel, and Management Services. Also financed are certain categories of Office-wide expenses most readily accommodated in a single budget line item. Examples of the latter include: office rent, telephones, postage, and Departmental assessments for services such as building guards and the employee health unit. The amount of \$3,960,000 will be reimbursed to the general fund from the Abandoned Mine Reclamation Fund.

1. *State reclamation program grants.*—This activity provides for grants to States to reclaim lands damaged from past mining practices. Under the Surface Mining Control and Reclamation Act of 1977, States with approved regulatory (enforcement) programs may also have reclamation programs and annual reclamation project plans approved. Upon approval, a State is entitled to a minimum of 50% of fund revenue derived from operating mines in the State. The program level for 1983 is based on an estimated 26 States having reclamation programs approved by mid-1982. It assumed that due to startup delays a carryover balance will supplement the request for \$78.5 million in new budget authority. It is anticipated that favorable consideration will be given to a supplemental request should States demonstrate a need for and capability to administer additional grant funds in 1983.

2. *Federal reclamation program.*—This activity includes fee collection and assistance to States in developing their reclamation programs as well as abandoned mine lands reclamation projects (including the Rural Abandoned Mine program administered by Soil Conservation Service) undertaken directly by the Office of Surface Mining and other Federal agencies. The program level for 1983 will provide for addressing emergency projects, for conducting the fund management responsibilities and for providing to the States technical assistance on reclamation projects.

3. *Small operator assistance payments.*—This activity provides for payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed

1. *Minerals research*—(a) *Minerals health and safety technology*.—The 1983 research program in this area continues to give first priority to the health and safety of the miner through research to lower the probability of mine accidents and occupational illnesses. Research is focused on a broad range of safety and engineering-related health problems in coal, metal and nonmetal mines, including respirable dust, fires and explosion prevention, industrial hygiene, radiation hazards, post disaster survival and rescue, ground control, ventilation, noise, and systems engineering. Research develops hardware and systems to solve safety and health problems and provides basic scientific and engineering data to support the regulatory and standard setting activities of the Mine Safety and Health Administration. The decrease in this program reflects the administration's policy to limit federally supported research and development to high-risk projects with long-term payoff and to rely on industry for support of research and development in other areas.

(b) *Minerals environmental technology*.—Research is conducted to develop the techniques and technology needed to reduce the adverse environmental effects associated with mining and minerals processing activities. All commodities, metal, nonmetallic minerals and fuels, are considered in this program, as are all phases of the mineral cycle from exploratory activities through recycling. The 1983 program addresses problems in surface and underground waste disposal and utilization, water management, subsidence prevention and control, reclamation, mine closure and surface stability. The recommended program level will accommodate the priority research needs of the Office of Surface Mining.

(c) *Mineral resources technology*.—Investigations are conducted to advance mineral science and technology through the development of more economical engineering materials and techniques for beneficiation, recovery and purification of minerals and metals, and the provision of fundamental scientific data required for a comprehensive knowledge base. Research efforts seek to provide solutions to technological problems to reduce requirements for critical and strategic minerals through conservation, substitution, and maximum recovery of minerals and metals from domestic resources.

2. *Minerals information*—(a) *Data collection and analysis*.—This program provides a comprehensive base of minerals information involving domestic and international production and consumption of approximately 100 nonfuel minerals. The program also supports implementation of provisions in the National Materials and Minerals Policy, Research and Development Act of 1980

through improved capability to analyze potential supply/demand problems of minerals.

(b) *Land assessments*.—Mineral assessments are made on wilderness lands, wilderness study areas, and other public lands to provide data on mineral occurrences and potential for use in considering public land use decisions. In addition, mineral assessments of the Forest Service's Roadless Area Review and Evaluation Study (RARE II) are jointly carried out by the Bureau and Geological Survey. Environmental and engineering investigations also are undertaken in areas affected by water resource development and other commitments of lands to single purpose use. The request for this program will allow 1983 deadlines for studies of Forest Service RARE II further planning areas to be met within a context of limiting mineral assessments to highest priority areas.

3. *Mineral institutes*.—As in 1982, no funds are requested for this program in 1983 because other sources of public and private support are adequate to meet program objectives.

4. *General administration*.—The general administration program finances executive guidance and administrative services for the Bureau of Mines.

5. *Construction and rehabilitation*.—Funds will be expended in 1982 to perform the engineering and design work related to the construction of the research facility near Bruceton, Pennsylvania. A supplemental for the construction has been requested for 1982. No funding is proposed for this program in 1983.

Drainage of anthracite mines.—Funds appropriated in 1956 (69 Stat. 460) are expended on a matched-fund basis with the Commonwealth of Pennsylvania. The funds are provided for the conservation of anthracite

coal resources and the prevention of flooding and damage to surface lands or structures through flood control and anthracite mine drainage. The act of July 15, 1955, was amended by the act of October 15, 1962 (76 Stat. 934), to further provide for the filling of voids in abandoned coal mines in the interest of public health and safety.

ADMINISTRATIVE PROVISION

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided*, That the Bureau of Mines is authorized during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of parent appropriations as follows:
Funds appropriated to the President, "Appalachian Regional Development Program."
Funds appropriated to the Department of the Interior, Office of Surface Mining Reclamation and Enforcement, "Abandoned Mine Reclamation Fund."

The authorized purpose of the Helium Act Amendments of 1960, Public Law 86-777, (50 U.S.C. 167), is to provide for the current and foreseeable future requirements for helium for essential Government activities. The program involves the conservation, production, sale, and distribution of helium and requires significant activities in the following areas:

- (a) Acquisition, construction, operation, and management of helium plants, gasfields, helium storage fields, pipelines, and fleets of helium tank cars and semi-trailers.
- (b) Searching for and evaluating new sources of helium-bearing natural gas and negotiating contracts for supplies of helium-bearing natural gas.
- (c) Establishing reserves of helium.
- (d) Experimentation and research to discover new helium supplies and to improve methods of helium production, purification, transportation, liquefaction, storage, and utilization.

Income from helium sales, services, and rentals of containers is estimated to provide the required funding for program cash outlay through 1983.

During 1983, the Bureau of Mines will produce and sell about 240 MMcf of Grade-A helium at its Exell Helium Plant in the Texas panhandle to meet the needs projected by DOD, NASA, DOE, and other helium-using Federal agencies. Approximately 100 MMcf, or 42 percent, will be liquefied for shipment. Additionally, the Bureau is expecting to purify about 80 MMcf of stored helium for redelivery to private industry as a contract service. Thus, the total Grade-A helium output is expected to be about 320 MMcf.

All pure helium production and shipping operations have been consolidated in the Exell-Amarillo area to assure that the Bureau's helium production capacity is adequate to meet Federal agencies' current and projected needs for helium at the lowest practicable costs.

1. **Education.**—The Bureau of Indian Affairs provides a variety of support for the education of Indian children through direct operation of schools, support of tribally operated schools, and financial assistance to public schools serving Indian children. Intermountain and Mt. Edgecumbe off-reservation boarding schools will be closed at the end of the 1982-1983 school year. They will receive funding for education, excluding the freshman class; closeout costs; and transition to other uses. While Intermountain's closure is due to the increasing excess capacity in the Bureau's boarding school system, Mt. Edgecumbe's closure is part of a continuing cooperative effort between the Bureau and the State of Alaska to establish a single system of education. Distribution of \$5 million for school operations and \$4 million for operation and maintenance funding among all Bureau schools in Alaska will be worked out in mutual agreement with the State. The number of children attending Federal, tribal, and public schools is shown below:

Number of pupils:	1981 actual	1982 estimate	1983 estimate
Federal and tribal schools.....	42,321	41,000	39,000
Public schools.....	177,822	179,500	181,000

The Bureau also assists Indian adults by providing financial assistance to students for higher education studies, by direct support of some tribally operated post-secondary institutions, and by offering continuing education programs in many communities. The number of participants in these programs is indicated in the following table:

Continuing education participants:	1981 actual	1982 estimate	1983 estimate
Higher education scholarships.....	16,574	17,000	17,000
Adult education enrollments.....	18,500	17,500	16,500

2. *Indian services.*—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects, and a new initiative for small tribes to acquire and maintain needed core-management capability. Also, the activities associated with the Navajo-Hopi settlement are included. Data are presented below on selected aspects of this activity.

Social service caseloads:	1981 actual	1982 estimate	1983 estimate
General assistance.....	55,642	57,750	63,932
Child welfare.....	3,164	3,500	3,386

Rehabilitation.....	4,074	5,100	3,900
HUD-assisted.....	4,126	2,500

3. *Economic development and employment program.*—This activity is designed to stimulate reservation economies, and to help Indian people participate fully in those economies.

Business enterprise development is encouraged and assisted through programs of technical and financial aid, with emphasis on enterprises owned and operated by Indian individuals and organizations. An economic development initiative will provide conditional grants to Indian tribes for the purposes of (1) initiating business development of natural resources; (2) encouraging non-Federal investment; and (3) promoting sound business principles. Indian tribal organizations and individuals are assisted with securing and managing loans for resource and business enterprise development, housing, public utility facilities, education, and other purposes. Individual Indians are assisted in qualifying for, finding and occupying jobs on and near reservations consistent with their needs, capabilities, and desires. Roads are maintained to provide for the movement of people and goods as needed for the well-being of the community.

4. *Natural resources development.*—This activity is designed to provide for the conservation, development and utilization of Indian land, water, and related resources. Resources are surveyed and inventoried, and agriculture and forestry development is assisted.

5. *Trust responsibilities.*—Under this activity the Bureau's trust responsibilities toward the Indian people are carried out. This entails the protection of Indian rights and property, particularly those related to land and natural resources, and the management of assets held in trust for Indian tribes and individuals.

6. *Facilities management.*—This activity provides for the maintenance and operation of Bureau facilities and the provision for GSA owned or leased facilities.

7. *General administration.*—Provides overall direction and management of Bureau programs. These functions include executive direction; administrative services; safety management; employee compensation payments; construction management; road construction management; and education program management.

Reimbursable programs are provided primarily for operation, maintenance and repair of federally owned quarters financed by payroll deductions from employees occupying such quarters; programs funded by other Federal agencies; operation of the North Star III shipping operation in Alaska (operated in the Miscellaneous Trust account prior to 1981); and for miscellaneous goods and services provided to others.

The planned distribution of program costs requested in 1983 as compared to funds for 1981 and 1982 follows, (in thousands of dollars):

Direct program:	1981 actual	1982 estimate	1983 estimate
1. Tribe/agency operations.....	241,311	240,727	260,759
2. Area office operations.....	53,870	51,937	42,844
3. Central office staff operations.....	24,217	28,145	26,136
4. Field program operations.....	494,810	484,177	519,511
Total direct program.....	814,208	804,986	849,250
Reimbursable program (total).....	14,549	41,000	41,000
Total program.....	828,757	845,986	890,250

Tribe/agency operations are primarily programs in which tribes formally participate in setting funding priorities. Tribe/agency programs include housing, law enforcement, economic and natural resources development, and other activities similar to those conducted by a State or local government.

Central and area office staff operations represent funding for program management, executive direction and administrative services.

Field program operations support those national programs, such as education, facilities management, rights protection and welfare, which are the unique responsibility of the Bureau because of its special relationship to Indians and Indian tribes.

Note.—In 1981 and 1982, these activities were financed in the Education Department, Office of Elementary and Secondary Education, Indian Education.

1. *Payments to local educational agencies (LEAs) and non-LEAs.*—Formula grants are made to local educational agencies and tribal schools for supplemental elementary and secondary programs to meet the special educational and culturally related academic needs of Indian children. About 1,100 grants will be made to LEAs and certain tribal schools serving 310,000 Indian students, with a per pupil expenditure of \$105.

In addition, an amount equal to 10% of the formula grant program is reserved for discretionary awards for Indian-controlled schools (non-LEAs). Grants may be used for supplementary programs to enrich educational experiences for Indian children or to assist in the establishment of such schools. About 19 awards serving some 6,500 children will be made.

2. *Special programs for Indian students.*—Funds support planning, pilot and demonstration projects; educational service projects; education personnel training; resource and evaluation centers; fellowships; and evaluation projects.

Competitive awards are made to Indian tribes, organizations, institutions of higher education or individuals. About 34 awards will be made in 1983. Approximately 2,000 children will be served and 458 education personnel trained. In addition, approximately 135 fellowship awards will be made for study in the areas of medicine, law, education, engineering, business administration, natural resources, and related fields. In addition, five awards will be made to Resource and Evaluation Centers to provide technical assistance and evaluation services to grantees and applicants.

3. *Special programs for Indian adults.*—Competitive grants are made to Indian tribes and organizations for programs to improve educational opportunities for Indian adults. Objectives are to decrease illiteracy among Indian adults, to increase the number of Indian adults who earn high school equivalency diplomas, and to encourage the development of programs and curriculum materials relevant to Indian culture and heritage. About 25 awards in 1983 will benefit some 8,000 adults.

4. *Program administration.*—Funds support the administrative expenses of the Office of Indian Education and the National Advisory Council on Indian Educa-

1. *School construction—Indian lands.*—Grants are made to school districts, composed of mainly Indian lands or which provide a free public education to children who reside on Indian lands, for construction of school facilities when enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. In 1983, no funds are requested for such construction assistance to districts.

2. *Program administration.*—Funding provides salaries and related overhead for administration of school construction grants affecting Indian lands, and of Indian education assistance.

This fund, established by the Indian Financing Act of 1974, provides a source of financing for Indians who cannot borrow from other Government credit agencies or from ordinary commercial lenders because of their low economic status, isolated geographic location, lack of bankable security, or other reasons. Loans are made to tribes and other Indian organizations for relending to individual members and groups of members, and to finance tribal business enterprises. Loans are also made to tribes for use by them in obtaining expert assistance to prepare and argue claims pending before the Court of Claims. Direct loans are made for any purpose that will promote the economic development of the borrower, including loans for educational purposes.

MEMORANDUM

2299	U.S. contingent liability for guaranteed loans outstanding, end of year	48,024	71,622	77,562
------	---	--------	--------	--------

¹ Amounts shown are based on the full principal amounts of loans that are partially guaranteed by the U.S. Government. The comparable amounts of limitations enacted on the basis of contingent liability are \$2,250 thousand in 1981 and \$27,630 thousand in 1982.

² Guaranteed certificates canceled.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

The Bureau operates some programs in Indian communities which are funded by other Federal agencies, programs which are similar to those operated by State and local governments from Federal grants-in-aid. This account has been used as the mechanism for receiving and disbursing such Federal funding. Beginning in 1982, funding for these programs will be included under the "Operation of Indian Programs" appropriation.

MISCELLANEOUS TRUST FUNDS

TRIBAL TRUST FUNDS

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated not to exceed \$3,000,000 from tribal funds not otherwise available for expenditure for the benefit of Indians and Indian tribes, including pay and travel expenses of employees; care, tuition, and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel, and other expenses of tribal officers, councils, and committees thereof, or other tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; relief of Indians, without regard to section 7 of the Act of May 27, 1930 (46 Stat. 391), including cash grants: *Provided*, That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes during the current fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary: *Provided further*, That (except in the case of funds held in trust for Indian tribes or individuals) the funds available for expenditure under the "Indian moneys, proceeds of labor" accounts authorized by the Act of May 17, 1926 (Chap. 309, 44 Stat. 560; 25 U.S.C. 155); the Act of March 3, 1883 (22 Stat. 582) in the fifth paragraph under the heading "INDIAN AFFAIRS" (22 Stat. 590; 25 U.S.C. 155); and the Act of March 2, 1887 (24 Stat. 449) in the first paragraph under the heading "MISCELLANEOUS" (24 Stat. 463; 25 U.S.C. 155) may be expended until September 30, 1982 for any purpose for which funds are appropriated under the subheading "Operation of Indian Programs". On September 30, 1982, the balance of such accounts (except for the funds held in trust for Indian tribes or individuals, and not to exceed \$10,000,000 which shall be available until expended by eligible tribes for purposes approved by the Bureau of Indian Affairs) shall be deposited into miscellaneous receipts of the Treasury to offset outlays of the Bureau of Indian Affairs and thereafter no funds shall be deposited in such accounts other than funds held in trust for Indian tribes or individuals. (25 U.S.C. 123; Public Law 97-100, making appropriations for the Department of the Interior and Related Agencies, 1982.)

The 1983 budget continues support of basic Government operations for those territories still requiring such support, capital infrastructure improvements with Federal/territorial cost-sharing, economic development assistance, and increased oversight and technical assistance.

Specifically, the 1983 budget request for administration of territories includes grant funds totaling \$20.4 million for American Samoa. Of this amount, \$18.9 million covers the operation of the territorial government including education, medical services, and public works, and \$1.5 million is used for construction projects.

The request also includes \$0.5 million for Guam's Economic Development Loan Fund, and \$3.2 million for capital improvement projects on Guam.

For the Commonwealth of the Northern Marianas, the 1983 request provides Covenant funding in the amount of \$24.1 million, as authorized in Public Law 94-241. This amount comprises \$14.2 million for the operation of the territorial government, \$6.9 million for capital improvements, and \$3.0 million for economic development loans. \$4.0 million is also requested for new health facilities.

The request provides \$3.3 million for the operations of the U.S. Government Comptrollers and the Financial Management Technical Assistance staffs in the territories and the Trust Territory.

The request provides \$2.6 million for the operations of the Office of the Assistant Secretary—Territorial and International Affairs and for increased technical assistance to the territorial and Trust Territory governments.

Capital improvements are generally proposed to be funded by a 75% Federal/25% local matching formula.

Under the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The Trust Territory, with a population of about 120,000 persons, comprises 2,125 islands scattered over 3 million square miles of ocean in two major archipelagos: the Caroline and Marshall Islands. The land area totals 516 square miles.

Secretarial Order 3039 of April 1979 provided recognition of governmental entities under locally ratified constitutions in the Trust Territory. The purpose of the order was to provide the maximum permissible amount of self-government, consistent with the responsibilities of the Secretary under Executive Order 11021, for the Federated States of Micronesia, the Marshall Islands, and Palau, pursuant to their respective constitutions as adopted and ratified, pending termination of the Trusteeship Agreement.

The United States seeks to terminate the Trusteeship Agreement and, to accomplish this, has initialed a com-

pact of free association with the governments of the Marshalls, Palau, and the Federated States.

1. *Grants.*—The cost of operating the new governments of the Trust Territory is provided by Federal grant appropriations and local revenue. The main activities funded will be (1) operational grants for the Trust Territory headquarters and for the governments of the Marshalls, Palau, and the Federated States; and (2) construction grants to the three political entities as part of the United States contribution for building new capitols.

2. and 4. *Enewetak/Bikini support programs.*—These funds will provide for supplemental food and other support required to meet the special needs of the Enewetak and Bikini peoples.

¹ Includes \$1,900,000 in budget authority for Rural Water Treatment and Distribution system which was deferred pursuant to the provisions of Public Law 97-12 and lapsed in 1981 in accordance with section 306 of Public Law 96-514.
² Reflects 1982 amounts to be transferred under authority of Reorganization Plan No. 3 of 1950, for Minerals Policy and Research Analysis to the Bureau of Mines and for Ethics Function from "Salaries and Expenses", Office of the Inspector General to "Departmental Management"

Note.—1982 and 1983 reimbursable program includes amounts previously reflected under the consolidated working fund.

1. *Departmental direction.*—The Office of the Secretary and the Office of Public Affairs provide top departmental direction and contact with the public. The Office for Equal Opportunity administers the Department's responsibilities in equal opportunity and minority procurement programs. Other secretarial offices provide coordination of correspondence, legislation, and congressional liaison.

2. *Program direction and coordination.*—Three Assistant Secretaries advise and assist the Secretary on matters of policy for promoting the domestic welfare and the conservation and development of the country's resources. The Office of the Assistant Secretary for Indian Affairs, included under this activity in prior years, is proposed for transfer to the Bureau of Indian Affairs in 1982 and is included under the bureau budget request for 1983. Resources to provide for the Assistant Secretary for Territorial and International Affairs are in-

cluded under this activity in 1982 and in the "Administration of Territories" request for 1983.

3. *Policy, budget, and administration.*—Under the direction of the Assistant Secretary, this activity provides for implementation of program and budget policy, economic analysis, environmental review, Outer Continental Shelf liaison, financial management, personnel, administrative services, library and information services, and security operations.

4. *Hearings and appeals.*—Provides the quasi-judicial and appellate responsibilities of the Department of the Interior. Administrative law judges and formal boards of appeals render decisions in cases pertaining to: (a) contract disputes; (b) Indian probate matters; (c) public and acquired lands and their resources; (d) submerged offshore lands of the Outer Continental Shelf; (e) surface mining; (f) personnel grievances; (g) environmental impacts; (h) enforcement of the importation and transportation of rare and endangered species; (i) environmental quality; (j) uniform relocation assistance and real property appeals; and (k) Alaska Native claims appeals.

5. *Minerals policy and research analysis.*—Provides a focal point for the Federal minerals policy development program. The Office has responsibility for minerals policy analysis, conservation, and related research and development program planning. This function is transferred to the Bureau of Mines in 1982. Resources to provide for this function in 1982 and 1983 are included in the bureau's budget request.

6. *Aircraft services.*—Provides Departmental policy and procedures governing aviation program, aviation safety, contracting, and technical services. Activity transferred to the working capital fund in 1982.

7. *Central services.*—This activity provides for general administrative expenses including space, postage, FTS, employee workmen's compensation and unemployment compensation payments, etc., for the offices financed by this appropriation, and includes Senior Executive Service bonuses for the Department.

8. *Alaska subsistence grant.*—This activity addresses the Secretary's responsibilities pursuant to the provisions of section 805 of the Alaska National Interest Lands Conservation Act, Public Law 96-487. This activity reimburses the State for reasonable costs relating to the establishment and operation of the regional advisory councils established by the State and the operation of the State Fish and Game Advisory Committee in accordance with the provisions of the Act.

9. *Office of water policy.*—Provides for representation of the Department's interests with the States for planning and coordinating water related issues. This office serves as a Secretarial policy office which functions as a focal point for Interior related water issues, proceeding from the premise that the States have primary rights in water allocation, planning and coordination.

¹ Reflects transfer of Ethics function to "Departmental management."

Public Law 95-452 established the Office of the Inspector General. The mission of the office includes the auditing and investigation of departmental activities, providing leadership and recommending policies to promote economy and efficiency, the prevention and detection of fraud and abuse and keeping the Secretary informed of problems and deficiencies of departmental programs and operations. A recent vulnerability analysis of Interior's major programs highlighted specific areas susceptible to fraud, waste and abuse. The increased resources would be used to conduct audits and investigations in those high priority areas.

Note.—In 1981 and 1982, these activities were financed by the Department of Energy, Energy Programs, in the account Strategic petroleum reserve.

The objective of this program is to decrease the vulnerability of the United States to disruptions in world petroleum markets by creating an effective stockpile to be used in the event such disruptions occur.

The 1983 budget includes funds for continued development of the petroleum reserve on a schedule to complete 750 million barrels of Government storage by 1990, depending on the availability of oil supplies.

Specifically, \$222,528,000 is provided for continued facilities development activities, \$8,000,000 for planning studies pertinent to issues concerning the use and development of the reserve, and \$11,590,000 for program management.

In 1983, petroleum acquisition and transportation is funded from the off-budget SPR petroleum account. This change was mandated by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35).

This fund was established pursuant to Title VIII of the Energy Security Act, which appropriated amounts for 1981. The purpose of this program was to provide the Strategic Petroleum Reserve program the benefits of domestic price-controlled lower tier oil through participation in the Crude Oil Entitlements program. As a result, the Government paid lower tier prices for oil to fill the Strategic Petroleum Reserve. The Strategic Petroleum Reserve Entitlements program expired on January 28, 1981, subsequent to Executive Order 12287 which removed price and allocation controls on crude oil and refined petroleum products.

in accordance with the authorizing legislation for each project. The program objectives include:

Operate and maintain the two Federal projects to optimize production of power and energy in a manner that ensures integrity of the investment, maximizes reliability and energy production, and minimizes long-term costs. Major objective is scheduling and installing necessary replacements and improvements to project facilities.

Market power in accordance with authorizing legislation to achieve widespread benefits at lowest rates consistent with sound business principles and requirements for repayment of Federal investment.

Maximize public benefits from other uses of project land and water, including visitation, reservoir recreation, and fish and wildlife uses.

The 1983 budget request will permit continuation of all normal operation and maintenance activities plus satisfactory progress on the multiyear program of replacements and project improvements, thus ensuring continued productivity of the investment in the projects.

Expected 1983 revenues are \$4,344,000 on energy sales of 303 million kilowatt-hours, representing approximately 9% of the statewide electric utility requirements in Alaska.

The 1983 budget request would discontinue funding of the APA investigations program in future water and power projects, but provide adequate resources to carry out the operation, maintenance, and marketing work in 1983.

Note.—In 1981 and 1982, these activities were financed by the Department of Energy, Power Marketing Administrations, in the account Operation and maintenance, Southeastern Power Administration.

The Administration markets power generated at Corps of Engineers Hydroelectric generating plants in a ten-state area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 21 projects now in operation. A schedule of kilowatt capacity of projects in operation or under construction follows:

	Installed capacity
Projects in operation.....	2,712,375
Project under construction: Richard B. Russell (initial operation beginning 1984).....	600,000
Additional unit at Hartwell (initial operation beginning 1983).....	80,000
Total.....	3,392,375

The Administration sells power at wholesale primarily to publicly—and cooperatively—owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. Southeastern Power Administration (SEPA) does not own or operate any transmission facilities. Its long-term contracts provide for periodic electric rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements. The SEPA program includes the following activities:

1. *Systems operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and de-

termining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Miscellaneous receipts to be deposited in the Treasury were \$52,364,044 for 1981, and are estimated to be \$56,060,000 for 1982, and \$62,712,000 for 1983.

Note.—In 1981 and 1982 these activities were financed by the Department of Energy, Power Marketing Administrations, in the account Operation and maintenance, Southwestern Power Administration.

The Southwestern Power Administration (SWPA) operates as a marketing agent to dispose of hydroelectric power and energy produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,666 miles of high voltage transmission lines, 33 sub and switching stations, and 20 radio and microwave stations and sells its power at wholesale primarily to publicly—and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Southwestern Power Administration is also responsible for scheduling and dispatching power, negotiation of power sales contracts, and construction of facilities re-

quired to upgrade the established system to meet changing customer load requirements.

1. *Systems operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Provision is also made for maintaining the power transmission system and related facilities in accordance with acceptable standards to assure reliable service to the interconnected customers. Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Estimated proprietary receipts which are deposited in the Treasury are \$50,357,000 for 1981, and are estimated to be \$60,500,000 in 1982, and \$61,000,000 in 1983.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

3. *Construction.*—The construction program provides transmission, substation, and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place at the time these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the gross expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly net expenditures for the thermal power and energy and transmission service provided to SWPA.

Note.—In 1981 and 1982, these activities were financed by the Department of Energy, Power Marketing Administrations, in the account Construction, rehabilitation, operation and maintenance, Western Area Power Administration.

The Western Area Power Administration is responsible for marketing electric power in 15 western States from generating projects of the Bureau of Reclamation, Corps of Engineers and the International Boundary and Water Commission's powerplant in Texas. Western operates and maintains about 16,000 miles of high-voltage transmission lines and over 200 associated substations/switchyards and constructs transmission facilities including new transmission lines, substations and essential additions and modifications to existing facilities.

Western sells power at wholesale to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

1. *Systems operation and maintenance.*—A total of 13 power systems will be operated and maintained to market power produced principally by the Bureau of Reclamation and the Corps of Engineers. Additionally, revenue will be available from the Boulder Canyon project operations and Navajo generating plant for payment of Western's power marketing and transmission expenses. Western will continue participation in conservation and renewable resources programs in 1983.

Commercial power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal government agencies, and private utilities. Receipts are deposited in the Reclamation fund, the General fund, the Colorado River Dam fund, and the Lower Colorado River Basin Development fund.

Energy sales and revenues resulting from these Western power systems operations excluding the Colorado River Storage project, the Navajo generating plant, and the Central Arizona project are as follows:

	1981 actual	1982 est.	1983 est.
Energy sales (millions of kilowatt hours).....	27,384	26,619	27,672
Revenue from energy sales (in thousands of dollars)	247,944	227,172	248,474

2. *Purchase power and wheeling.*—The program includes \$46,000,000 in 1983 for purchase of power, wheeling and fuel conservation expenses excluding credits for net billing. The establishment in 1961 of a net billings procedure for certain of these power transactions between Federal Government and non-Federal utilities precludes the need for an additional \$12,277,000 in 1983.

System construction.—Construction of transmission facilities is necessary to maintain system reliability and for marketing of electric power produced from generating plants of others. Funding is provided in 1983 for system interties, joint construction of 345-kV additions in Western Colorado, replacement of deteriorated wood poles, replacement of damaged wood or steel structures, reconditioning, and upgrading transmission lines to increase system capacity and reliability and for construction operation and maintenance control and dispatch facilities, and for system security additions. Engineering studies will continue on Western's transmission systems.

Reimbursable program.—This program involves services provided by Western to others under various types of reimbursable arrangements. In 1983, the reimbursable program primarily provides for construction and operation and maintenance services by Western for the Bureau of Reclamation and Bureau of Indian Affairs.

Note.—In 1981 and 1982, these activities were financed by the Department of Energy, Power Marketing Administrations, in the account Emergency fund, Western Area Power Administration.

This fund is used to assure continuous operations of power systems due to equipment or other physical failure, or damage due to acts of God, flood, drought, strikes, embargoes or other conditions which might cause interruption in service. In 1983, Western proposes

a change in the method of financing from annual appropriations to replenishment of funding on a continuous basis from power revenues. This will allow for more timely, cost-effective emergency repair work of damaged power facilities and ensure continuity of electrical service.

Note—In 1981 and 1982, these activities were financed by the Department of Energy, Power Marketing Administrations, in the account Colorado River basins power marketing fund, Western Area Power Administration.

Western's operation and maintenance and power marketing expenses for the Colorado River storage project, the Colorado River Basin project and the Fort Peck project will be financed from power revenues collected by the Western Area Power Administration.

Western operates and maintains approximately 3,000 miles of transmission lines and over 40 substations associated with these projects. Wholesale power is provided to utilities over the interconnected high-voltage transmission systems. Long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Following are energy sales and revenues from power operations associated with the Colorado River storage project and the Colorado River Basin project. The revenue from the Fort Peck project is integrated with Pick-Sloan Missouri Basin project revenue and is included in the construction, rehabilitation, operation and maintenance account.

1. *Colorado River storage project.*—Western markets power and operates and maintains the power transmission facilities of units of the Colorado River storage project and the Seedskadee participating project. Provision is made for payment for purchase of electricity and wheeling fees to meet contractual obligations and fuel conservation.

2. *Colorado River Basin project.*—The 1983 program provides for Western's power marketing and operation and maintenance expenses for the Navajo project participation agreement and Central Arizona project. Financing will be from project power revenue.

3. *Fort Peck project.*—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities, and the Western Area Power Administration operates and maintains the transmission system and performs power marketing functions. Funding is provided in 1983 for continuation of reconstruction and realignment of the Fort Peck-Harve 161-kV transmission line in Montana.

Bonneville Power Administration (BPA) is the Federal electric power marketing agency in the Pacific Northwest. BPA markets hydroelectric power from 21 multipurpose water resource projects of the U.S. Army Corps of Engineers and 9 projects of the U.S. Bureau of Reclamation, plus some energy from non-Federal generating projects in the region. These generating resources and BPA's transmission system, consisting of 13,744 circuit miles of high-voltage transmission lines and 377 substations in 1983, are operated as an integrated power system with operating and financial results combined and reported as the Federal Columbia River Power System (FCRPS). BPA markets about one-half of

the electric energy produced in the Northwest and provides about four-fifths of the region's electric power transmission capacity.

BPA is responsible for meeting the net firm load growth of the region through power exchanges with utilities, and BPA has authority to invest in regionwide energy conservation and to acquire nonrenewable resources as principal energy sources to meet these requirements.

BPA will continue its operations on the basis of its self-financing authority and the new borrowing authority provided by the Regional Act for energy conservation and renewable energy resources. BPA requires no appropriations.

1. *Operation and maintenance.*—Provides for operation and maintenance of 13,744 miles of line and 377 substations of the BPA transmission system in 1983 and the scheduling and dispatch of power.

2. *Power management.*—Provides for forecasting regional demand, negotiating power sales and wheeling, billing and servicing these contracts, reviewing and establishing wholesale power and wheeling rates, and encouraging public participation in the formation of BPA policies and programs.

3. *Energy conservation/resource acquisitions.*—Provides for planning and funding to meet electric power needs identified in load forecasts prepared by BPA, the Pacific Northwest Electric Power and Conservation Planning Council (Planning Council), and other sources. BPA supports and funds conservation measures and at-site renewable resources, including home energy efficiency, commercial energy efficiency, street lighting, utility distribution system loss reduction, industrial technological transfers, passive solar energy applications, and conservation measures for new home construction. Resource acquisition includes both renewable resources, such as hydro, wind, biomass, and geothermal, and nonrenewable resources, including cogeneration, high-efficiency resources, and conventional thermal resources. For both conservation measures and resource acquisitions, the program includes activities to ensure that budgeted costs and schedules are met, and that due regard is given to safety and the environment, so that energy resources are available when the forecasts indicate the need.

4. *Fish and wildlife.*—Provides for protection, mitigation, and enhancement of fish and wildlife of the Columbia River and its tributaries, including related spawning grounds and habitat in accordance with the Regional Act.

5. *Planning Council.*—Provides for activities of the Pacific Northwest Electric Power and Conservation Planning Council to perform various tasks as required by the Regional Act, including preparation and adoption of a regional plan and adoption of a fish and wildlife protection program.

6. *Construction.*—Provides for continuation of construction work on transmission lines, substations, and related facilities initiated in prior years, initiation of construction on system additions, and planning for a reliable, efficient, and cost-effective regional transmission system. During 1983 BPA plans to construct approximately 350 miles of line and 9 substations.

7. *Purchase power, wheeling, and exchange.*—Provides for acquisition of power from other entities by purchase and exchange and for use of transmission facilities of others. Also provides for purchase of replacement energy from other sources for BPA industrial and utility customers when nonfirm energy is not available from the Federal system, with BPA acting as an agent in acquiring nonfirm energy in their behalf for which each customer provides funds in advance.

8. *Interest on borrowings.*—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's construction program under \$1.25 billion borrowing authority provided by the Federal Columbia River Transmission System Act and to finance energy conservation and renewable resources under \$1.25 billion borrowing authority provided by the Regional Act. Debt service on borrowings not financed through the U.S. Treasury is also included here.

9. *Associated project costs.*—Provides for repayment of the operation and maintenance costs of the 30 U.S. Corps of Engineers and U.S. Water and Power Resources Service power generating projects; interest and amortization on the U.S. Water and Power Resources Service capital investment in power generating facilities; and coordination agreement payments to the Federal Energy Regulatory Commission.

Financing.—The Federal Columbia River Transmission System Act (FCRTSA) provides for the use by the Bonneville Power Administration of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of the Bonneville Power Administration. These receipts result primarily from the sale of power and wheeling. The FCRTSA also provides for authority to borrow from the U.S. Treasury at rates comparable to borrowings at open market rates for similar issues. It allows for \$1,250,000,000 of borrowing to be outstanding at any time. \$950,870,000 of this is expected to be outstanding at the end of 1983. In addition, the Regional Act provides for another \$1,250,000,000 of borrowing authority to be outstanding at any time for the purpose of providing funds for conservation and renewable resource loans and grants. At the end of 1983, \$394,500,000 of this borrowing authority is expected to be outstanding.

Direct loans.—The limitation on direct loans is being increased from \$2,400,000 in 1981 to \$40,000,000 in 1982 and \$62,000,000 in 1983. In 1981 these loans were only for energy conservation pilot programs, whereas in 1982 and 1983 the loans are for energy conservation programs throughout the region.

Operating results.—Total revenues and receipts are expected to amount to approximately \$2,396,100,000 in 1983. Estimated cumulative retained earnings at the close of the budget year are -\$68,600,000, a net decrease of \$82,650,000 from 1982.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or

equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior and for the emergency rehabilitation of burned-over lands under its jurisdiction, and for emergency reclamation projects under section 410 of Public Law 95-87; *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That no appropriations made in this title shall be available for acquisition of automatic data processing equipment, software, or services in excess of \$1,000,000 system life cost, without prior approval of the Secretary.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs and supplies, materials, equipment and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

SEC. 107. No appropriations made in this title shall be available for the identification of lands not now so identified or acquisition (by withdrawal, transfer, or purchase) of lands for or associated with the Unique Wildlife Ecosystem Program as now defined by the United States Fish and Wildlife Service not authorized by law under an existing program.

SEC. 108. Except as specifically provided otherwise in this Act, no funds appropriated in this title shall be available to fulfill the requirements of section 8 of Public Law 94-458 as they apply to reporting to Congress on potential new areas of the National Park System.

SEC. 109. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of the Point Arena, Bodega, Santa Cruz or Eel River basins of Outer Continental Shelf Lease Sale numbered 53.]

SEC. [110] 109. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.

SEC. 111. None of the funds provided in this title may be used for administrative expenses of a program that does not include operation of the Office of Aircraft Services.]

SEC. 112. Notwithstanding the provisions of section 6 of the Act of May 25, 1948 (62 Stat. 269,273), appropriations of power revenues of the Flathead Irrigation Project on the Flathead Reservation, Montana, made pursuant to section 3 of the Act of August 7, 1946 (60 Stat. 895), shall hereafter be available in an amount not exceeding 20 percent of the gross power revenues of said project for the preceding fiscal year, or \$750,000, whichever is greater, for improvements and

extensions to the power system: *Provided*, That no appropriations shall be made in excess of the Flathead Irrigation power revenues on deposit with the Federal Government: *Provided further*, That notwithstanding any other provision of this Act, budget authority provided by this Act is hereby reduced by the following amounts: Department of the Interior, \$145,955,000; Forest Service, \$59,581,000; Department of Energy, \$56,947,000; Indian Health Service, \$26,950,000; Indian Education, \$3,244,000; Navajo and Hopi Indian Relocation Commission, \$419,000; Smithsonian Institution, \$5,939,000; National Gallery of Art, \$1,242,000; National Endowment for the Arts, \$5,960,000; National Endowment for the Humanities, \$5,440,000; Institute of Museum Services, \$480,000; Commission of Fine Arts, \$12,000; Advisory Council on Historic Preservation, \$65,000; National Capital Planning Commission, \$94,000; Franklin Delano Roosevelt Memorial Commission, \$1,000; Pennsylvania Avenue Development Corporation, \$762,000; Federal Inspector for the Alaska Gas Pipeline, \$1,143,000; and Holocaust Memorial Council, \$32,000: *Provided further*, That such reductions shall be ratably applied to each account, program, activity and project.]

TITLE III—GENERAL PROVISIONS

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record, and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.

SEC. 304. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete, in accordance with 18 U.S.C. 1913.

SEC. 305. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.

SEC. 306. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 307. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. 308. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.]

SEC. 309. None of the funds provided in this Act to any department or agency shall be obligated or expended to purchase passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated m.p.g. average of less than 22 miles per gallon.] (*Public Law 97-100, making appropriations for the Department of the Interior and Related Agencies, 1982.*)

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 202. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 203. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency, or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 204. Appropriations in this title shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchases of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 205. Appropriations in this title shall be available for acquisition of land for the McGee Creek project, Oklahoma: *Provided*, That land required for the dam, dike, and any other authorized permanent feature shall be acquired in fee title (surface and minerals): *Provided further*, That mineral and subsurface interests shall be acquired by subordination in the conservation pool area of the reservoir, natural scenic recreation area and the wildlife management area in such a manner as to allow the present mineral owners, their successors and assignees the right to explore for and extract minerals under restriction required to protect the project: *Provided further*, That only the surface estate be acquired for any other land required for the McGee Creek project. (*Public Law 97-88, making appropriations for Energy and Water Development, 1982.*)

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT

[ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY] ENERGY PROGRAMS, DEPARTMENT OF THE INTERIOR AND ENERGY PROGRAMS, DEPARTMENT OF COMMERCE (INCLUDING ENERGY RESEARCH AND TECHNOLOGY ADMINISTRATION)

SEC. 401. Appropriations **[to the Department of Energy]** to *Energy Programs, Department of the Interior, and appropriations for Fossil Energy Research and Development, Energy Conservation Research, Energy Research and Technology Administration, Department of Commerce, and Energy Conservation Grants, Energy Information Activities and Emergency Preparedness and Energy Regulation, Energy Programs, Department of Commerce*, under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

SEC. 402. From this appropriation, transfers of sums may be made to other agencies of the Government for the performance of work for which the appropriation is made.

SEC. 403. None of the funds made available **[to the Department of Energy]** to *Energy Programs, Department of the Interior and for*

Fossil Energy Research and Development, Energy Conservation Research, Energy Research and Technology Administration, Department of Commerce, and Energy Conservation Grants, Energy Information Activities and Emergency Preparedness and Energy Regulation, Energy Programs, Department of Commerce, under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

SEC. 404. *Not to exceed 5 per centum of any appropriation made available for the current fiscal year for Fossil Energy Research and Development, Energy Conservation Research, Energy Research and Technology Administration, Department of Commerce and Energy Conservation Grants, Energy Information Activities and Emergency Preparedness and Energy Regulation, Energy Programs, Department of Commerce*, may be transferred between such appropriations but no appropriation, except as otherwise provided, shall be transferred or decreased by more than 5 per centum by any such transfers.

Not to exceed 5 per centum of any appropriation made available for the current fiscal year for Naval Petroleum and Oil Shale Reserves and Strategic Petroleum Reserve, Department of the Interior, may be transferred between such appropriations, but no appropriation, except as otherwise provided, shall be transferred or decreased by more than 5 per centum by any such transfers.

[The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign: *Provided*, That (1) revenues received from the sale of any products produced in facilities other than demonstration plants operated as part of Department of Energy programs appropriated under this Act shall be covered into the Treasury as miscellaneous receipts; and (2) revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with demonstration plant projects of the Department appropriated under this Act may be retained by the Secretary of Energy, to be available until expended, and used only for plant construction, operation costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements: *Provided further*, That the remainder of revenues after the making of such payments shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That any contract, agreement or provision thereof entered into by the Secretary pursuant to this authority shall be submitted to the Senate Committee on Appropriations and the House Committee on Appropriations and a period of thirty days shall elapse while Congress is in session (in computing the thirty days, there shall be excluded the days on which either the Senate or the House is not in session because of adjournment for more than three days) before the contract, agreement or provision thereof shall become effective, except that such committees, after having received the proposed contract, agreement or provision thereof, may, by separate resolutions in writing, waive the condition of all or any portion of such thirty-day period.]

[Where the Secretary has the legal authority under other provisions of law, including other provisions of this Act, to undertake projects for the design, construction, or operation of Government-owned facilities for developing or demonstrating the conversion of coal into gaseous, liquid, or solid hydrocarbon products, the Secretary may use the authority contained in Public Law 85-804 (50 U.S.C. 1431-1435), with respect to such contracts or agreements for or related to such projects: *Provided*, That any contract, agreement, or provision thereof entered into by the Secretary using the authority of Public Law 85-804 shall be submitted to the Senate Committee on Appropriations and the House Committee on Appropriations and a period of thirty days shall elapse while Congress is in session (in computing the thirty days, there shall be excluded the days on which either the Senate or the House is not in session because of adjournment for more than three days) before the contract, agreement or provision thereof shall become effective, except that such committees, after having received the proposed contract, agreement or provision thereof, may, by separate resolutions in writing, waive the condition of all or any portion of such thirty-day period. The notification required herein shall be in lieu of the notification requirements of Public Law 85-804.]

The United States Parole Commission makes decisions relative to the grant or denial of parole, sets conditions of parole, supervises parolees and mandatory releasees, recommits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976. A major Parole Commission program is the establishment and application of guidelines and rules for parole decisionmaking so that the duration of terms of imprisonment throughout the Federal system will be equitable.

In 1983, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the conduct of an ongoing research program, the administration of the Commission's responsibilities under the labor and pension laws and response to Freedom of Information and Privacy Act requests are to be carried out under this program.

Enforcement of antitrust, consumer protection and kindred laws.—This division administers and enforces

the antitrust, consumer protection, and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act, which prohibits combinations and conspiracies among competitors to set prices collusively or otherwise to restrain trade; (2) section 2 of the Sherman Act, which prohibits combinations and attempts to monopolize interstate trade; (3) section 7 of the Clayton Act, which prohibits corporate mergers and acquisitions that tend to lessen competition substantially or tend to monopolize; and (4) various statutory provisions that require regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts and the maintenance of competitive conditions.

The War Claims Act of 1948, as amended, authorizes payments to American military prisoners of war and American civilians captured by hostile forces in Southeast Asia during the Vietnam conflict. The Defense Department intends to make final status determinations on all military personnel in 1982, after which the Commission can certify valid claims to the Treasury Department for payments.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS AND MARSHALS*

* See Part III for additional information.

For necessary expenses of the offices of the United States attorneys and marshals, including acquisition, lease, maintenance, and operation of aircraft, \$320,945,000.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The Government is represented in each of the 95 judicial districts by a U.S. attorney and a U.S. marshal.

1. *U.S. attorneys.*—The U.S. attorney is responsible for the prosecution of criminal offenses against the United States, the representation of the Government in all civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The 1983 estimates provide for the continuation of existing programs

2. *Bankruptcy matters.*—The pilot U.S. Trustees program will be discontinued during 1982.

3. *U.S. marshals.*—The U.S. marshal has custody of all unsentenced Federal offenders until released by the courts or confined in prison, acts as agent of the courts in the service of process and execution of warrants, and provides protective services to the courts and to key Government witnesses. The 1983 estimates include a program decrease in private process.

The U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Approximately 54,500 prisoners will be boarded in approximately 620 jails at an average cost of \$30.32 per offender day in 1983. Cooperative agreements will be negotiated with State and local governments for the renovation and the equipping of facilities that detain Federal prisoners.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice exercises little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

1. *Fact witnesses.*—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

2. *Protection of witnesses.*—The U.S. Marshals Service is responsible for the protection of witnesses and their dependents; subsistence costs of protected witnesses and their families are paid from this fund. This program is designed to assure the safety of Government witnesses whose testimony on behalf of the Government places them or their families in jeopardy.

3. *Expert witnesses.*—Technical and scientific experts are paid for their testimony as Government witnesses in legal proceedings involving the United States.

4. *Mental competency examinations.*—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States.

Reports and court testimony relating to the examinations are included in these fees.

The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1983 request will provide CRS with resources to continue to focus on racial disputes in two major program areas: police/minority confrontation cases, particularly those related to allegations of police use of excessive force; and education cases, with emphasis shifting from desegregation preparation to problems generated in the aftermath of desegregation. In 1983, CRS also anticipates response to conflicts involving Indo-Chinese refugees as well as the Ku Klux Klan; threats of urban civil disorder; and referrals from Federal courts.

1. *Criminal, security, and other investigations.*—This activity includes all field investigations of the Federal Bureau of Investigation. These investigations are conducted by FBI Special Agents in 59 field offices and more than 435 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar and organized crime and foreign counterintelligence. Other investigative areas are civil rights, fugitives, terrorism, general government crimes, personal crimes, civil and general property crimes, applicant and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as preemployment background inquiries and name checks.

2. *Coordination of investigations.*—This activity includes resources devoted to national program supervision, coordination, and management of FBI investigations.

3. *Investigative support.*—Investigative support consists of training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment.

4. *State and local assistance.*—The FBI supports State and local law enforcement by providing training, laboratory, identification, and informational services. Emphasis is being placed on the training of State and local police instructors to enable their agencies to become more self-sufficient and, thereby, allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations within the United States but most courses are conducted at the FBI National Academy in Quantico, Va.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal justice information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over six million records relating to wanted and missing persons, stolen property, and criminal histories. The UCR program collects data from more than 13,000 law enforcement agencies and provides this information to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1983, approximately 5.9 million sets of fingerprints will be processed. Processing of noncriminal fingerprint checks for State and local agencies and banking institutions will be reinstated in 1983, on a reimbursable basis.

5. *Program direction.*—This activity includes the management, administrative support, legal, planning, evaluation, inspection, and financial functions of the FBI.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

1. *Border enforcement.*—This activity contains most of the resources dedicated to both preventing illegal entry into the United States and facilitating the entry of qualified persons. Also included are the resources for the alien documentation program (ADIT) and the Service's nationwide anti-smuggling of aliens program.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs through drug law enforcement at the Federal level as lead agency; coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities; and enforcement coordination and intelligence-gathering activities with foreign government agencies.

This appropriation finances a nationwide operation with field offices in 50 States, foreign operations in 43 countries, 8 field forensic laboratories, and Federal/State and local task forces in 18 selected areas.

While heroin remains DEA's principal target, the traffic in dangerous drugs, bulk marihuana, cocaine, and counterfeit methaqualone continues to undermine

the economic and social fabric of both the United States and many foreign countries.

Narcotics trafficking frequently involves violent crime; it invariably breeds violence; it unquestionably causes acute misery and, in many instances, death. It also generates huge profits that can be used to avoid detection and finance further organized crime enterprises.

Heroin availability and subsequent abuse have increased somewhat in 1981. However, as of the third quarter of calendar year 1981, the heroin purity increased to 4.3% from a low of 3.8% in 1980. Furthermore, emergency room mentions of heroin/morphine abuse increased by 26% in 1981. DEA accurately predicted increased supply and trafficking in Southwest Asian heroin, which allowed time for adequate planning and shifting of resources to prevent the influx from seriously afflicting the U.S. population up to this point. DEA was successful in penetrating drug trafficking networks and disabling their conversion laboratories at overseas locations in Italy and the Middle East and thus reducing the amount of converted heroin that reached the U.S. population.

DEA will continue to pursue asset seizures on a broad scale as part of its three-dimensional approach to arrest the traffickers, remove the drugs, and seize trafficker drug related assets.

In order to provide for more effective control and efficient utilization of DEA resources, field elements will be directly responsible for the execution of resource and policy decisions made at Headquarters. Management of DEA and FBI investigative activities will be coordinated to insure that FBI capabilities will be utilized to the fullest extent in drug enforcement activities.

The 1983 request will provide funding for the ongoing level of operations for DEA programs.

The means by which DEA performs its mission are summarized by the following activities;

1. *Enforcement of Federal law and investigations—(a) Domestic enforcement.*—This activity encompasses the enforcement of Federal laws regarding narcotics and dangerous drugs. Specifically, the activity aims to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs of abuse to a level with which our society and institutions can reasonably cope.

DEA initiated arrests.....	7,390	7,300	7,430
Other Federal referral arrests.....	1,430	1,400	1,480

(b) *Foreign cooperative investigations.*—This activity encompasses: efforts to reduce at the source illicit opium production and the supply of heroin destined for the United States particularly from Southwest Asia; efforts to curtail the supply of illicitly produced dangerous drugs, cocaine, and marihuana entering the United States; and the collection and dissemination of tactical operational and strategic intelligence.

(c) *Compliance and regulation.*—This activity encompasses the investigation of, and prevention of, diversion of narcotics and dangerous drugs from illicit channels. By authority of the Controlled Substances Act this activity includes: (a) registering (authorizing) legitimate manufacturers, distributors, and practitioners of controlled drugs; (b) determining points of diversion into the illicit market; (c) conducting targeted investigations of high level violators; (d) conducting periodic investigations of manufacturers, wholesalers, importers/exporters, and methadone clinics; (e) investigating pre-registrants; (f) scheduling and classifying of controlled drugs; (g) authorizing imports and exports; (h) establishing manufacturing quotas; and (i) providing assistance and guidance to States.

(d) *State and local assistance.*—This activity encompasses cooperative law enforcement activities with State, county, and local authorities which benefit the Federal drug enforcement program. Included are training programs for law enforcement officers and forensic chemists; laboratory support for law enforcement agencies (including analysis of evidence and professional testimony in State prosecution cases); and support for enforcement activities of the Federal/State and local task forces.

For 1983 the program level will provide for the operation of 18 Federal/State and local task forces, provision of laboratory services on a selective basis, and training of 5,360 State and local law enforcement officers.

2. *Intelligence.*—This activity encompasses the collection, analysis, and dissemination of drug intelligence in support of DEA, other Federal, State and local efforts to interdict or suppress the illicit movement of drugs. The intelligence activity provides a systematic approach for attacking the drug traffic by assessing the vulnerabilities of traffickers. It supplies information for policy determination and enforcement strategy.

3. *Research and development.*—This activity encompasses research programs directly related to the DEA law enforcement and intelligence functions. It supports these programs through development of specialized covert equipment, operational engineering, and scientific support.

4. *Support operations.*—This activity encompasses laboratory analysis of evidence in support of investigation and prosecution of drug traffickers; training programs for all levels of DEA operational personnel; and maintenance of an effective technical equipment program, including aircraft operations, to support increasingly complex high level investigations.

5. *Program direction.*—This program encompasses the overall management and direction of DEA. It includes the development of coordinated and definitive policy; program analysis and planning; security of DEA; legal counsel; and coordination and performance of administrative functions.

Reimbursable program.—A reimbursable program providing primarily for the training of foreign drug law enforcement officials is conducted by DEA and funded by the Department of State. Schools are held each year, both in the United States and host countries.

This appropriation will provide for the custody and care of an average of 27,000 offenders and for the maintenance and operation of 43 penal institutions, 5 regional offices and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other units for short periods of time. An average of 2,000 sentenced prisoners will be in contract facilities in 1983.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced for Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

During 1983, major programs will operate at current services levels.

1. *Inmate care and custody.*—This activity covers the direct care costs, excluding psychology services, of all offenders in Federal institutions. This includes the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of confining sentenced Federal offenders in contract State and local facilities.

2. *Inmate programs.*—This activity finances the costs of academic, social, and occupational education courses and institutional programs for the treatment of drug addiction and psychology services.

3. *Institution administration and maintenance.*—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions.

4. *Community corrections.*—This activity provides for the care of Federal prisoners in contract community residential centers.

5. *Program direction.*—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

In 1983, NIC grant activities emphasize the further development of classification systems and technologies for the purpose of: (1) promoting the use of alternatives to incarceration, (2) improving the existing classification processes and (3) assisting correctional agencies in understanding and providing for the needs of special groups of offenders. In addition, grants will be made to encourage the expanded use of community correctional alternatives by all criminal justice system components.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations. Similar services will be provided to local corrections by the Community Division, and the Prisons Division. These programs will continue to emphasize improved classification systems in addition to alternatives to incarceration.

The National Corrections Academy will offer training to local correctional personnel working in prisons, community corrections and jails. The Academy will train over 3,500 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources.

NIC provides technical assistance to State and local correctional agencies to focus on improving their capabilities to deal with organizational needs and improve the services, operation, and management of the agency. During 1983, resources will continue to be used to the extent possible to respond with appropriate services to the increasing requests for assistance; develop State agency capability to provide training and technical services to all correctional units within the State and provide increased direct assistance to requesting agencies in response to more comprehensive system needs and problems.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide industrial employment opportunities for the populations at existing institutions and for the populations at new institutions.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$86 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Justice System Improvement Act of 1979 provides authority for limited financial and technical assistance to States and local units of government to reduce crime and juvenile delinquency, and improve and strengthen the quality of the criminal justice system. The Juvenile Justice and Delinquency Prevention Act of 1974, as amended, places within the Office of Juvenile Justice and Delinquency Prevention responsibility for the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. These programs, however, are being terminated because improvements in criminal and juvenile justice are primarily State and local responsibilities. The Office of Justice Assistance, Research, and Statistics provides staff support and coordinates the activities of the Office of Juvenile Justice and Delinquency Prevention (OJJDP), the National Institute of Justice (NIJ), and the Bureau of Justice Statistics (BJS).

1. *Juvenile justice formula grants.*—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency. No new budget authority will be provided in 1983.

2. *Juvenile justice programs.*—This program supports the development and implementation of new approaches, techniques, and methods with respect to juve-

nile delinquency programs, including effective means of diverting juveniles from the traditional correctional system; developing and maintaining community-based alternatives to traditional forms of institutionalization; programs stressing advocacy activities aimed at improving services to youth; collection and dissemination of data regarding juvenile justice; and the coordination of Federal efforts in juvenile delinquency programs. No new budget authority will be provided in 1983.

3. *Public safety officers' benefits program.*—Funds are used to pay \$50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty.

4. *Crime control programs.*—Except for a treatment alternatives to street crime (TASC) program in 1982, this activity provides for expenditures from past LEAA programs which were not authorized by the Justice System Improvement Act of 1979: planning formula grants, corrections formula grants, criminal justice formula grants, criminal justice programs, correctional programs, technical assistance, national institute of law enforcement and criminal justice grants, and data systems and statistical assistance grants. Also included are programs which are authorized by the Act but are being terminated: criminal justice formula grants program, national priority grants program, general criminal justice grants program, training, and crime prevention programs.

5. *Administrative services, OJARS/LEAA.*—Funds will provide administrative support required for internal operations of NIJ and BJS, administering the public safety officer's benefits program, and phaseout of the LEAA and OJJDP programs.

6. *Executive direction and control, OJJDP.*—Funds provide for the direction and control and operation of OJJDP programs. In 1983 staff for the phaseout of OJJDP will be funded through the administrative services program.

The Justice System Improvement Act of 1979 established the National Institute of Justice and the Bureau of Justice Statistics to encourage basic and applied research, to gather and disseminate accurate and compre-

hensive justice statistics, and to evaluate methods of preventing and reducing crime.

1. *Research, evaluation and demonstration programs.*—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and to disseminate the results of such research efforts.

2. *Justice statistical programs.*—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations.

NOTES

Includes \$7,990 thousand in 1983 for activities previously financed from:

	1981	1982
Department of Labor, Departmental Management, Salaries and expenses	5,815	5,037
Department of Health and Human Services, Human Development Services, Work incentives	10,412	9,744

Excludes \$8,535 thousand in 1983 for activities transferred to Department of Labor, Departmental Management, Salaries and expenses. Comparable amounts for 1981 (\$7,612 thousand) and 1982 (\$7,137 thousand) are included above.

1. *Planning, evaluation, and research.*—Provides direction and staff support in long-range planning, policy analysis, legislative support, and international activities; directs a nationwide labor market information system; administers a research and development program; and conducts program evaluation studies.

2. *Comprehensive employment development.*—Develops and administers, through a national and regional office network, a program of job training and employment opportunities. In 1983 these programs will include a flexible decentralized system of block grants to States, the Job Corps youth training program, and services to special target groups such as dislocated workers, older Americans, migrants, Indians, and other groups.

3. *Apprenticeship services.*—Promotes the establishment of apprenticeship as a basic and major method of skill acquisition across a broad range of occupations and industries through a comprehensive Federal-State apprenticeship administrative structure to provide a more uniform and systematic means of developing skilled workers.

4. *U.S. employment services.*—Provides leadership and policy direction for the administration of the nationwide public employment service system.

5. *Veterans employment service.*—The Veterans Employment Service identifies policies and programs to serve and meet employment, unemployment assistance, and training needs of veterans. It assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services. In 1983 this activity will be under the direction of a new Assistant Secretary for Veterans Employment and financed from the Departmental Management appropriation.

6. *Unemployment insurance services.*—Provides leadership, policy direction, and technical assistance required by State employment security agencies in order to ensure that workers are protected against the loss of wages when they are involuntarily unemployed.

7. *Executive direction and management.*—Provides overall supervision and direction of employment and training administration activities; provides administrative and management services, including property management; provides budgetary, fiscal management, audit, and contract services; and is responsible for data systems relating to program performance.

8. *Work Incentive (WIN) program.*—Provides for the administration of the WIN program, previously financed by an allocation of funds appropriated to the

This account provides for a decentralized system of Federal, State, and local programs of training and other services for economically disadvantaged, unemployed, and underemployed persons, primarily under the Comprehensive Employment and Training Act (CETA). The authorization for appropriations for CETA expires at the end of 1982. Legislation is being proposed for a replacement program in 1983. (See following schedule.) Discontinued programs funded by this account in 1982 will be phased down during 1983 by using resources obligated in prior years to effect necessary closeout procedures.

The authority for appropriations for programs funded under the Comprehensive Employment and Training Act (CETA) expires on September 30, 1982. For 1983, legislation will be proposed to consolidate current training and employment programs into a block grant to States that will replace the categorical grants to local governments provided for by CETA.

1. *Training grants to States.*—Provides financial assistance to States and territories to design and operate training programs to help these jurisdictions meet their training and employment needs. The proposed legislation will contain provisions for increasing coordination with vocational education and other related programs. Services may include institutional and on-the-job training, vocational and remedial education, and job placement services.

2. *Job Corps.*—Provides basic literacy and arithmetic skills and vocational skills training for youth age 16-21 with severe educational and economic disadvantages primarily through a national network of residential centers. In 1983 about 55 centers operated by States and localities and private profit and non-profit contractors would serve about 60,000 economically disadvantaged, unemployed, and out-of-school youth.

3. *Special targeted program.*—Provides additional training assistance through a nationally administered program to special segments of the population that have particular disadvantages in the labor market. Among groups that may be served are Indians and other native Americans, older workers, migrant and seasonal farmworkers, veterans, displaced homemakers, offenders, and dislocated workers.

This program provides part-time work opportunities in community service activities for unemployed low-income persons age 55 and over. The 1981 appropriation financed this program through June 1982. The 1982 appropriation finances it through September 30, 1982. In 1983, this program will be incorporated into proposed new legislation aimed at serving special targeted groups, as described under proposed for later transmittal in the Employment and training assistance account.

This program provided grants to State and local prime sponsors and Indian tribes for federally funded

public service jobs during periods of high unemployment. The program was terminated on September 30, 1981. Close-out operations will be completed in 1982.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and allowances to ex-servicemen, as authorized by title 5, chapter 85 of the United States Code, as amended, of benefits and payments as authorized by title II of Public Law 95-250, as amended, of trade adjustment benefit payments and allowances, as provided by law (part I, subchapter B, chapter 2, title II of the Trade Act of 1974, as amended), \$35,000,000, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: Provided, That amounts recovered from the States during the current fiscal year pursuant to 5 U.S.C. 8505(d) shall be available for such payments during the year. Amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments. (Legislative action required.)

1. Payments to former Federal personnel.—Funds are provided to the States for payment of unemployment compensation to eligible ex-servicemen. This re-

quest reflects proposed legislation which would provide such benefits only to those involuntarily discharged under honorable conditions because of demobilization, reduction in force, or disability incurred while in the service.

2. *Trade adjustment assistance.*—Adjustment assistance allowances are paid to workers as authorized by the Trade Act of 1974, as amended. This request reflects proposed legislation which would eliminate weekly cash benefits, effective July 1, 1982, for workers other than those who have already begun approved training.

3. *Unemployment assistance and payments under other Federal unemployment programs.*—Benefits are paid to workers under Public Law 95-250, which expanded Redwood National Park. This request reflects proposed legislation to limit eligibility for benefits, beginning July 1, 1982, to those workers who were directly affected by the Redwood Park land-taking and who became unemployed by December 31, 1978. Reimbursements from the Federal Emergency Management Agency provide Federal disaster unemployment assistance. The Omnibus Reconciliation Act of 1980 eliminated reimbursements for benefits based on public service employment under the Comprehensive Employment and Training Act after December 6, 1980.

4. *Payments to the Unemployment Trust Fund for former Federal personnel.*—The Omnibus Reconciliation Act of 1980 provided for the transfer of appropriations available for payment of unemployment compensation to former Federal personnel and Postal Service employees to a newly established Federal employees compensation account in the Unemployment Trust Fund. The new account reimburses States for all benefits paid after December 31, 1980, to such claimants based on Federal service.

2. *Employment services.*—A nationwide network of local employment offices financed by Federal grants provide services to assist workers in obtaining suitable employment and to assist employers in resolving their employment problems. General services include interviewing, testing, counseling, and referral for placement, appropriate training, or other services involved in readying individuals for employment. Assistance to employers includes analyzing their employment requirements, solving problems of recruitment and developing labor market information. Special emphasis is placed on providing services to unemployment insurance claimants and veteran applicants. It is estimated that not less than \$99.4 million will be available for services to veterans. It has been determined in accordance with section 901(c)(4) of the Social Security Act as amended that 97 percent of the necessary expenses of the Employment Service is an appropriate charge to the employment security administration account of the Unemployment trust fund.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. All advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, without interest, to the general fund of the Treasury. Advances made to the Federal employees compensation account in the Unemployment trust fund, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable.

This account also provides advances, which are repayable with interest, to the Black lung disability trust fund for making payments from that fund whenever its balances prove insufficient.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax are also paid. The Federal tax pays the costs of Federal and State administration of unemployment insurance and 97% of the costs of the employment service. In 1981, the schedules reflect a deappropriation of \$366.3 million to correct for credits previously made in error.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel and Postal Service employees based on Federal and Postal Service employment after December 31, 1980. Benefits paid are reimbursed to the Federal Employees Compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the unemployment trust funds and other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

Title IV of the Employee Retirement Income Security Act of 1974 (Public Law 93-406), as amended, provides for the establishment of a wholly owned Government corporation, the Pension Benefit Guaranty Corporation. This Corporation is administered by a board of directors, the chairman being the Secretary of Labor. The Corporation's mission is to administer insurance programs to prevent the loss of pension benefits to participants if pension plans terminate and are not able to pay the insured benefits.

1. *Administration.*—Expenses associated with this activity include the costs of executive direction, legal support, financial controls, program development and operation, and associated management and information services.

2. *Benefit payments.*—Terminated single employer plans are taken over by the Corporation and a trust fund established for plans taken into trusteeship. The Corporation assumes control of the plan assets and takes responsibility for the expected plan liability. The trust pays the share of benefit payments actuarially funded by plan assets and employer liability. The balance is paid by the revolving fund.

3. *Financial assistance.*—The Corporation guarantees benefits under multiemployer plans by providing financial assistance (in the form of loans) to insolvent multiemployer plans. Financial assistance to an insolvent plan is made only after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

Financing.—The Corporation is required by law to be self-supporting. Sources of financing are insurance premiums from on-going defined benefit pension plans, assets from terminated plans, investment income, and employer liability. Any change in the Corporation's insurance premium rate for single employer pension plans must be approved by a joint resolution of Congress. The Corporation may increase the premium rate for multiemployer plans up to certain limits imposed by law.

The following informational table details the status of the Corporation's trust funds.

1. *Improving and protecting wages.*—This activity obtains compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act and enforces the labor standards provisions under various Federal procurement acts, the Farm Labor Contractor Registration Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Regulations and interpretive materials are developed for the compliance program and special minimum wage standards are set.

Approximately 760,000 persons are expected to be aided, under the Fair Labor Standards Act, through assessing employers for underpayments and securing agreements to pay the workers. Through the special minimum wage program, 600,000 persons will be aided by certificates issued and employment authorized. In Government contracts, 55,000 persons will be aided through assessing employers for underpayments and securing agreements to pay the workers. Under the Farm Labor Contractor Registration Act program, approximately 550,000 persons will be aided through registration and enforcement. This activity also includes determinations of prevailing wage rates and fringe benefits for all Federal and federally assisted contracts for construction subject to the Davis-Bacon and related acts. Prevailing wage rates and fringe benefits determinations are also made under the Service Contract Act. This activity also includes enforcement of the Fair Labor Standards Act and the Farm Labor Contractor Registration Act with regard to employers of undocumented alien workers.

2. *Elimination of discrimination in employment.*—The Office of Federal Contract Compliance Programs (OFCCP) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, relating to the hiring and promotion of physically and mentally handicapped individuals, is included in this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1983, about 9,900 compliance actions will be taken with respect to contractor employment practices.

3. *Workers' compensation.*—Under this income-maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

4. *Executive direction and support services.*—This activity includes planning review and analysis, research and evaluation, budget and finance, Federal-State coordination, personnel management, employee development, management systems implementation, and data processing operations. Major goals in 1983 will include continuing to build meaningful Federal-State cooperation; strengthening training and employee utilization functions of the Employment Standards Administration, and improving the management systems essential to effective Employment Standards Administration operations.

1. *Federal Employees' Compensation Act benefits.*—Currently, more than 48,680 claimants are receiving long-term compensation benefits for job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes loss of job time. Workers suffering noncontroverted traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

The request reflects legislation proposed to make a number of changes in the Federal employee compensation program. These include:

(a) Altering the compensation rate for disability from a flat percentage of gross Federal pay to a formula based on 80% of spendable income.

(b) Eliminating the 45-day continuation pay while claim is being examined; extending the waiting period from 3 to 7 days before compensation can be paid; per-

mitting agencies to advance compensation in clear cases while claim is being examined.

(c) Transferring long-term disabled employees to civil service retirement rolls at age 65.

(d) Providing survivors of employees who die as the result of work related injury the same benefit as provided to disabled workers.

(e) Providing all employees same benefits for loss of a body member regardless of grade level.

(f) Limiting annual cost-of-living adjustments to the lesser of annual increase in the Federal GS pay schedule or the Consumer-Price Index (CPI).

2. *Longshore and harbor workers' compensation benefits.*—Under the Longshoremen's and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

Trust Funds

BLACK LUNG DISABILITY TRUST FUND

For payments from the Black Lung Disability Trust Fund, \$673,544,000, of which \$639,255,000 shall be available until September 30, 1984, for payment of all benefits and interest on advances under subsection (c)(2) of section 9501 of the Internal Revenue Code of 1954, as amended as authorized by section 9501(d)(1), (2), (4), and (7) of that Act and of which \$21,192,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses and \$13,097,000 for transfer to Departmental Management, Salaries and Expenses, for expenses of operation and administration of the Black Lung Benefits program as authorized by section 9501(d)(5)(A) of that Act: Provided, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to June 15 of the current year: Provided further, That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 9501(d)(5)(B) of that Act. (30 U.S.C. 901.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, in the form of an excise tax on mined coal tonnage. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability, in addition to all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1979, \$420 million; 1980, \$956 million; 1981, \$1,510 million; 1982, \$1,745 million; and 1983, \$1,807 million.

Legislation was enacted on December 29, 1981, to increase the excise tax on coal and to adjust eligibility criteria and benefits for miners filing disability claims after the date of enactment. The legislation will eliminate the need for general fund advances by 1985.

ment of the industry, for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act (33 U.S.C. 944; 31 U.S.C. 725).

These trust funds are available for payments of additional compensation for second injuries. When a second injury results in a permanent partial disability which, combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

1. *Safety and health standards.*—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment.

2. *Enforcement.*—The Occupational Safety and Health Act of 1970 provides for direct enforcement of Federal standards in States declining to assert jurisdiction and for grants to assist States in administering and enforcing programs for occupational safety and health which have been approved by the Secretary. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities and by encouraging the cooperative efforts of employers and employees. Both State and Federal enforcement personnel may cite employers for violations and propose penalties. Programs are targeted to the investigation of fatal and catastrophic accidents, the investigation of claims of imminent danger and employee complaints,

inspections of firms with job-related injury-illness rates that are above the national average, and inspections for serious health and safety hazards.

3. *Technical support.*—Technical assistance is provided on all aspects of standards setting, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. Possible economic consequences and environmental impact of proposed standards are analyzed. Applications for variances or exemptions from standards are evaluated.

4. *Compliance assistance.*—Under cooperative agreements with State agencies, Federal funds are made available to cover 90% of the costs of providing free onsite consultation to employers upon request. Grants are awarded to assist organizations develop their capacity to provide occupational safety and health training for workers and employers. This activity also provides leadership and guidance to the heads of Federal agencies, to assist agencies in implementing job safety and health programs to protect Federal workers. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

5. *Safety and health statistics.*—Statistics on occupational fatalities, injuries, and illnesses are collected and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

6. *Executive direction and administration.*—These activities include planning, evaluation, management support, legislative liaison, and interagency coordination.

1. *Enforcement.*— Enforcement of the Federal Mine Safety and Health Amendments Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, recommendations to reduce working hazards, and on-site education and training assistance in reducing work hazards.

2. *Assessments.*—This activity provides for the assessment of civil monetary penalties for violations of the Federal Mine Safety and Health Amendments Act of 1977.

3. *Educational policy and development.*—This activity plans, develops, and coordinates MSHA's mine safety and health education and training policies. Formal instruction is provided at the National Academy for MSHA personnel, other Government personnel, and the mining industry. States are encouraged to develop training programs through grants and technical assistance.

4. *Technical support.*—This activity provides onsite technical services and advice to field managers, mine inspectors, State program employees, and industry

management to assist enforcement or effect improvements in mining practices. It also provides analytical data relative to the cause, frequency, and manner of accidents and the events or the practices that contribute to their causes.

5. *Program administration.*—This activity provides for the Office of the Assistant Secretary and the key management staff that supports the general administrative functions and collection of civil monetary penalties.

1. *Labor force statistics.*—Monthly estimates are made of the labor force, employment, and unemployment for the Nation, States, and local areas. Studies are made of selected characteristics of the labor force. Monthly data are prepared and published on employment, hours of work, earnings, and labor turnover by industry for the United States, each State, and selected sub-State areas. Quarterly data are prepared and published on insured employment, wages, and contributions by industry for the Nation, all States, and many sub-State areas. Annual data are prepared on occupational employment by industry for the United States and 49 States. A major revision of the establishment employment and earnings survey began in 1982 and will be continued in 1983. Data on labor turnover were discontinued in 1982.

2. *Prices and cost of living.*—The Consumer Price Index and the Producer Price Index are compiled and published monthly. Revision of the Producer Price Index will continue in 1983. Development of a rent sample for a rental equivalence measure of owner-occupied housing costs in the Consumer Price Index was undertaken in 1982 and will be continued in 1983. Development and publication of export and import price indexes will continue. Special analytical studies of price changes are undertaken and family budget studies are prepared and published. Work on family budgets has been reduced to minimal levels.

4. *Productivity and technology.*—Labor, capital, and multi-factor productivity and costs are measured for major sectors of the United States economy and for many industries. Sources of productivity change such as capital formation, energy costs, cyclical movements, and inter-industry shifts are studied. Studies are conducted on automation and other technological changes. Analyses and international comparisons are made of prices, wages, employment, unemployment, and unit-labor costs. Research is conducted on the effects of international trade on U.S. employment.

Excludes \$5,133 thousand in 1983 for activities transferred to Employment and Training Administration, Program Administration. Comparable amounts for 1981 (\$5,815 thousand) and 1982 (\$5,037 thousand) are included above.

1. *Executive direction.*—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote

the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

2. *Legal services.*—Includes enforcement of Federal labor statutes and legal services related to the statutes administered by the Department. Provides legal advisory, legislative, and litigation services under the Labor-Management Reporting and Disclosure Act, the Employee Retirement Income Security Act, the Occupational Safety and Health Act, the Federal Mine Safety and Health Amendments Act, Executive Orders 11246 and 11491, and title VI of the Civil Rights Act of 1964.

3. *International labor affairs.*—Integrates all international labor programs and foreign economic policy within the Department; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

4. *Administration and management.*—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment and provides for consistent and constructive internal labor-management relations throughout the Department.

5. *Adjudication.*—Operates an adjudication program for conducting formal hearings and rendering timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices, and other labor-related areas.

6. *Promoting employment of the handicapped.*—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically handicapped, mentally retarded, and mentally restored persons.

7. *Women's bureau.*—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

8. *Inspector general.*—Detects and investigates fraud, program abuse, collusion, and other statutory violations in departmental programs. Investigates organized crime activities connected with departmental programs. Reviews and audits DOL programs and funds for fiscal integrity, regulatory compliance, efficient operations, and program results.

9. *Minimum wage study commission.*—Completed in 1981 an independent study of the Fair Labor Standards Act (FLSA) of 1938 and the social, political, and economic ramifications of that act and exemptions from that act.

10. *Civil rights.*—Ensures full compliance with title VI of the Civil Rights Act of 1964 and other regulatory

nondiscrimination provisions in programs receiving financial assistance from the Department of Labor and promotes equal opportunity in these programs and activities.

11. *Veterans employment service.*—Identifies policies and programs to serve and meet employment, unemployment assistance, and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law, \$200,000, to remain available until expended. This appropriation shall be available in addition to other appropriations to such agency for payments in foreign currencies (7 U.S.C. 1704).

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

Note.—Excludes \$44 thousand in 1983 for activities transferred to Department of Labor, Departmental Management, Salaries and expenses. Comparable amounts for 1981 (\$42 thousand), and 1982 (\$44 thousand) are included above.

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (29 U.S.C. 563):

1. *Administrative management services.*—Provides a broad range of administrative services, including procurement, contracting, printing, mailing, messengers, motor pool, photographing, visual exhibits, accounting, payroll and voucher payments, and supply and property management.

2. *Field services.*—Provides centralized services from the Department's 10 regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services.

3. *Data processing services.*—Functions previously performed by the Denver Computer Center have been transferred from Departmental Management to Mine Safety and Health Administration.

4. *Penalty mail and telecommunications.*—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

Financing.—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Operating results.—The fund ended 1981 with a net operating income of \$1.1 million. These funds were collected for the phaseout of the Department's computer facilities and for the automation of financial processes and management information.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

TITLE V—GENERAL PROVISIONS

SEC. 501. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate of GS-18.

SEC. 502. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-02).

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improve conduct, supervision, or management of those functions or activities.

SEC. 504. The Secretaries of Labor and Health and Human Services and the Director of the Foundation for Education Assistance are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: Provided, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 505. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 506. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distributions, or use of any kit, pamphlet, booklet, publication, radio, television or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 507. The Secretaries of Labor and Health and Human Services are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I and II, respectively, for official reception and representation expenses; and the Director of the Federal Mediation and Conciliation Services is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and Expenses", Federal Mediation and Conciliation Service; and the Director of the Foundation for Education Assistance is authorized to make available for official reception and representation expenses not to exceed \$3,000 from funds available for "Salaries and expenses, Foundation for Education Assistance".

SEC. 508. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 509. No part of any appropriation in this Act shall be available for expenses incurred for provision of arbitration services and other services involved in the adjustment of grievances under collective bargaining agreements to which the agency is not a party except to the extent fees are collected from the users of such services and credited to such appropriation, and the heads of agencies provided funds under this Appropriation Act and providing such services shall prescribe fees (which shall be credited to such appropriation) to recover the total expenses of such services, except for any compensation, subsistence, or travel costs of arbitrators or neutral referees which shall be borne by the parties to the collective bargaining agreements.

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State and from non-Federal sources.

1. *Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional and regional bureaus of the Department. Public affairs, congressional affairs, and inspection, audit, and investigation activities are included.

2. *Diplomatic relations with foreign countries.*—This includes representation of the United States and its citizens abroad, primarily for political and economic negotiations and overseas reporting. Major items of increase are for rising prices, local employee wage rates in other countries, and continuation of efforts to improve reporting and analysis of overseas political and economic developments and trends.

3. *Diplomatic relations through international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities. Included are resources to support U.S. missions to international organizations abroad, as well as domestically-located missions to the United Nations and the Organization of American States.

4. *Conduct of consular affairs.*—Activities included are overseas and domestic visa and American citizen services. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports, emergency assistance to American citizens abroad, and passport fraud detection and investigation. Major items of increase are the increasing visa and passport workload, and strengthened automated consular systems to cope with this workload.

5. *Technical support programs.*—These encompass data processing efforts, personnel and physical security,

training and development programs, worldwide telecommunications and courier services, and medical services. Major items of increase are for strengthening professional development of mid-career employees and replacement of worn-out data processing and communications equipment.

6. *Administrative and staff activities.*—These include normal domestic and overseas administrative services such as personnel, budgeting, accounting, and procurement.

The Foreign Service buildings program provides consolidated office space for the Foreign Service and other Government agencies abroad and living quarters for American employees. This program also finances real property leases of 10 years or more (shorter term leases are included in the account Salaries and expenses); procurement of initial furniture and furnishings; and repair, maintenance, and operating costs of these facilities.

The table below shows present and estimated property holdings (including acquisitions under the special foreign currency program) by type and structure and geographic area (in thousands of dollars):

BUYING POWER MAINTENANCE

For transfer by the Secretary of State to appropriations available for the overseas operations of the Department of State for any fiscal year when necessary to maintain the approved level of operations and to eliminate substantial losses to appropriations caused by fluctuation in foreign currency exchange rates or overseas wage and price changes: \$15,000,000, to be available without fiscal year limitation. In order to eliminate substantial gains to approved levels of overseas operations, the Secretary is authorized to transfer to this account amounts in other accounts which are determined by the Secretary to be excessive to the needs of an approved level of operations due to foreign currency exchange rates or overseas wage and price changes. Funds transferred from this account shall be merged with and be available for the same purpose, and for the same time period, as the appropriation to which transferred, and funds transferred to this account shall be merged with and available for the purpose of this appropriation until expended. Restrictions contained within appropriations or other provisions of law limiting the amounts that may be obligated or expended are hereby adjusted to the extent necessary to offset the net effect of fluctuations in foreign currency exchange rates or overseas wage and price changes in order to maintain approved levels. (Additional authorizing legislation has been proposed.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

This appropriation will offset losses due to exchange rate and overseas wage price fluctuations unanticipated in the budget. Any gains due to fluctuations will be merged with this appropriation to be available to offset future losses.

Management of the Department would be enhanced by the ready availability of funds to meet unbudgeted inflation and exchange rate losses. Under present arrangements, the uncertain timing and amounts of supplementals require management to revise and often to delay the execution of budget plans.

PAYMENT TO THE AMERICAN INSTITUTE IN TAIWAN

For necessary expenses to carry out the Taiwan Relations Act, Public Law 96-8 (93 Stat. 14), \$8,744,000. (Additional authorizing legislation has been proposed.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The Taiwan Relations Act (Public Law 96-8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan and authorizes funds to be appropriated to the Secretary of State to carry out the provisions of the act.

This appropriation will enable the Department to contract with the Institute to conduct commercial, cultural, and other relations with the people of Taiwan.

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND*

*See Part III for additional information.

For payment to the Foreign Service Retirement and Disability Fund, as authorized by law, \$91,312,000. (Additional authorizing legislation has been proposed.)

As a member of the above listed organizations, the United States contributes its assessed share of the budgets of those organizations. The 1983 estimates reflect approved budgets of most organizations. The United States supports only increases needed to maintain the prior year's level of operations in most organizations and will continue to encourage the organizations to meet new and expanded needs from reductions in low priority activities.

These funds are used for payment of the U.S. share of the expenses of:

1. *International Boundary Commission.*—The Commission, in accordance with existing treaties, maintains the physical boundary between the United States and Canada by surveying, inspecting, and clearing the boundary and repairing or replacing markers as necessary. In 1983, the Commission will clear 188 kilometers of forested boundary along the 141st meridian in the Yukon Territory, Alaska.

2. *International Joint Commission.*—Pursuant to the Boundary Waters Treaty of 1909, the Commission approves, regulates, and monitors structures in boundary waters and transboundary streams; investigates matters referred to it by the Governments of the United States and Canada that principally include transboundary water quality; and, continues ongoing surveillance at the request of the two Governments. The most important mission is permanent surveillance for compliance with the 1978 Great Lakes Water Quality Agreement.

These funds are used for payment of the U.S. share of the expenses of eleven international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Pacific Salmon Commissions regulate their respective fisheries, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control, and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments.

1. *U.S. refugee admissions program.*—The 1983 estimate provides for the care and maintenance of refugees in Europe and assumes the resettlement of 72,000 Asian and 31,500 Soviet and other refugees in the United States.

2. *Indochinese refugee program.*—The United States funds the care and maintenance of Indochinese refugees through the U.N. High Commissioner for Refugees (UNHCR). In addition, funds are provided for refugee relief programs for Kampuchians along the Thai border.

3. *Resettlement assistance program.*—In 1983, the United States will fund various international programs to encourage voluntary repatriation and resettlement of refugees in countries other than the United States. These programs will help to reduce the number of refugees requiring resettlement in the United States.

5. *African refugee program.*—The U.S. contributions to the programs of various international organizations assist in the care of refugees and displaced persons throughout the African continent.

6. *Near East refugee program.*—U.S. contributions to the UNHCR help finance essential assistance to Afghan refugees who have fled into Pakistan. In addition, contributions to the United Nations Relief and Works Agency provide food, health, and educational assistance to Palestinian refugees in the Middle East.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway safety transportation by regulation of motor carriers engaged in interstate commerce. For 1983, the Motor Carrier Safety (MCS) program consists of three major activities: MCS operations, contract research and development, and administrative support. The demonstration program will be concluded at the end of 1982.

Financial assistance is made available to States for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs.

1. *Interstate construction.*—Of the 42,500-mile system, 40,443 miles were open to traffic as of September 30, 1981. The definition of completion of the Interstate has been revised to delete certain nonessential categories of work, to reduce cost while bringing all Interstate highways up to a minimum level of service. This change will significantly accelerate completion of the Interstate construction program while turning attention to preserving this most important transportation system.

2. *Interstate 4R.*—To preserve the Nation's investment in the Interstate highway system, a major expansion of the Interstate program of resurfacing, restoring and rehabilitation has been undertaken. In addition, a

fourth R, reconstruction, has been added to provide States with greater flexibility to meet their particular Interstate needs.

3. *Primary system.*—Provides financial assistance to States for highway construction, reconstruction and related planning for the primary highway system. At the States' discretion, a portion of this financial assistance can be used to resurface, restore, or rehabilitate the primary highway system.

4. *Rural and small urban transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the secondary and urban systems in rural and small urban areas (with populations of 50,000 or less). Assistance is also provided for forest and public lands highways.

5. *Urbanized area transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the urban system in urbanized areas (with populations of more than 50,000). In addition funds can be used for capital expenditures for buses and other public transportation facilities.

6. *Bridge program.*—Provides financial assistance to States for projects designed to replace or rehabilitate bridges with deficiencies that are hazardous to the safety of motorists.

7. *Construction safety programs.*—Provides financial assistance to States for safety improvements to the highway systems, including hazard elimination, pavement marking, and rail highway crossings.

8. *Administration and research.*—Provides for executive and general administrative and research expenses of Federal-aid highways. These funds are expended under the limitation on general operating expenses.

9. *Other.*—Provides for emergency relief. The improvements in the Federal-aid highway program highlighted above are designed to focus Federal involvement and funding generally on the programs of highest Federal interest (e.g., Interstate), and to increase flexibility to the States to use Federal-aid program funds to address their particular needs and priorities. The preeminent Federal interest in completing and preserving the Interstate is reflected in the program and funding changes proposed for this highway system. To increase State flexibility, many of the existing Federal-aid program categories will be consolidated and made eligible within the major programs.

Under the 1973 Highway Act, States and localities may withdraw previously approved Interstate segments and apply the authorized funds to substitute transit or highway projects. Proposed legislation calls for the funding of highway Interstate substitution projects out of the Highway Trust Fund beginning in 1983. The transit substitution projects will continue to be funded in the Urban Mass Transportation Administration budget. The Administration's proposal is predicated on a policy to fund highway construction projects out of the Highway Trust Fund.

This appropriation, established in 1975, seeks to identify, correct, and evaluate those critical elements that contribute to loss of life, disabling injuries, and property damage on American highways. The emphasis of research is to provide workable and timely solutions to a set of critical safety problems. This program will attempt to meet the increasing demands for solutions to urgent safety problems such as traffic management in construction and maintenance zones, and new longer range initiatives in safety hardware, driver aids, and measuring system performance.

Funds appropriated for this account are transferred to the General operating expenses limitation where the program is administered in conjunction with other research and development programs of the Federal Highway Administration.

The Appalachian Development Highway System is designed to improve the accessibility of Appalachia, to reduce highway transportation costs to and within Appalachia, and to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. The 1983 budget provides \$80 million for highway construction and program administration. Legislation to be proposed will transfer the responsibility for this program from the Appalachian Regional Commission to the Secretary of Transportation and fund the program out of the Highway Trust Fund. The program will provide, over a 4-year period, for the completion of ongoing highway construction projects, repayment to States for prefinanced projects, and maintenance of a program in all States as the program is being phased out.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General fund to the Highway trust fund of revenue from the gasoline tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law.

For 1983, the budget assumes no increase in the motor fuels and other highway user excise taxes.

The Federal-Aid Highway Act of 1968 authorized \$300 million for the establishment of a right-of-way revolving fund. This fund is utilized to make cash advances to the States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from causing a significant increase in construction costs.

The initial legislation for this program required the States to construct the highway and reimburse the revolving fund within seven years from the date of the advance. The 1973 Highway Act extended the required time limit on construction to 10 years and the 1976

Highway Act extended the time limit indefinitely, if deemed necessary by the Secretary.

In 1983, obligations will be made to the extent of States' reimbursements to the revolving fund.

OPERATIONS AND RESEARCH—Continued

1. *Rulemaking programs.*—Covers rulemaking activity relative to the promulgation of Federal motor vehicle safety standards for new and used motor vehicles, tires, and equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; and programs requiring economic bumpers capable of withstanding low-speed collisions, and the development and issuance of comparative ratings with respect to safety, damageability and maintainability of automobiles.

2. *Enforcement programs.*—Provides for the enforcement of programs described under the rulemaking activity, including manufacturer compliance with motor vehicle safety and automotive fuel economy standards, investigation of safety related motor vehicle defects, and surveillance of odometer tampering.

3. *Highway safety programs.*—This activity provides for headquarters and field staff to assist the States in the conduct of their highway safety programs through program guidance, technical assistance and evaluation. Training courses and materials are developed for use in the States.

4. *Research and analysis.*—This activity provides for research and development in support of all NHTSA programs, including the collection and analysis of data to determine the relationship between motor vehicle and driver performance characteristics and crashes causing death or personal injury. Provision is also made for facilities required to furnish scientific and technical bases for regulatory reform, and to do limited compliance testing and defects investigation. The 1983 budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

5. *General administration.*—This activity provides for overall executive direction, coordination, and implementation of agency programs, except for mission-oriented support activities which are included in the respective program areas. Basic administrative and support requirements for all safety programs are also provided in this category.

Under the State and Community Highway Safety Program, Federal grants are provided to assist the States and their political subdivisions in the establishment and improvement of highway safety programs. A total program of \$78.5 million is planned in 1983, compared to \$97.5 million for 1982, for programs under 23 U.S.C. 402 and 406.

1. *Entitlement grant programs.*—Grant allocations are determined on the basis of statutory formula established under sections 402 and 406 of title 23, U.S.C. Individual States are utilizing this funding in areas which have shown the greatest potential for achieving safety improvements and for reducing traffic fatalities and accidents at the State and local level. Activities are centered predominantly in efforts that will: control the drinking driver; increase the intensity of traffic law enforcement; improve the quality of emergency medical services, principally through additional training of State and local personnel; and improving the collection and analysis of traffic accident data. Legislation requires that 20% of grant authorizations for 1982

through 1984 be obligated for enforcing the fifty-five mile per hour national speed limit. Total obligations for all encompassed activities are estimated at \$74.65 million for 1983.

4. *Grant administration.*—Funds of \$3.85 million are required to cover the expenses of administering Federal grant activity in 1983.

¹ Policy support funded under research and development appropriation in 1981 and 1982.

1. *Executive direction and administration.*—This program consists of two subcategories. The first, executive direction, provides for the salaries and related expenses of the Office of the Administrator, Chief Counsel, Planning and Budget, Civil Rights and Public Affairs. Together with the Office of Policy, this activity focuses on resolving national problems confronting the railroad industry and provides top level direction necessary to accomplish the Federal Railroad Administration's goals and objectives. The second subcategory is the Office of Administration, consisting of salaries and related expenses and contractual support necessary for the day-to-day operations. Included in the Administration category are the Office of Personnel and Training, Management Systems, Procurement, and Financial Services.

2. *Policy support.*—This office is responsible for developing effective policies for addressing current and future issues facing railroads, labor and shippers. Funding of this program before 1983 was accomplished under the Railroad Research and Development appropriation. In 1983 the emphasis will be on implementing the Federal Railroad Administration's mandate to promote railroad transportation.

1. *Federal enforcement.*—Provides for salaries and related expenses of safety field operations which are designed to motivate the railroads to comply with Federal safety laws and regulations, in order to reduce the number of railroad related accidents. Monitoring of the railroads is accomplished through the use of Federal

inspectors. The level of effort in this program for 1983 will increase over that of 1982 with the addition of 24 field inspectors, but the emphasis will shift to passenger and hazardous material routes reflecting the findings of the system safety plan.

2. *Automated track inspection program.*—Provides for inspection of track and associated components through the use of automated track inspection vehicles. The 1983 request is for the operation and maintenance of two full-sized geometry cars. This reduces the number of geometry cars by one and eliminates the highway-rail car. This program is now being reevaluated for its priority among all safety resources.

3. *Safety regulation and program administration.*—Includes salaries and related expenses of safety headquarters personnel, together with data gathering and dissemination, planning and evaluation activities and administration of grants-in-aid for safety. The ongoing responsibility of this program is to develop and subsequently issue new or revised standards, procedures, and regulations as necessary to provide a safer railroad operating and working environment. The 1983 budget will fund these activities and the implementation of the system safety plan.

Reimbursable program.—Other Federal agencies provide reimbursement for special data collection and processing on rapid rail accidents.

4. *Grants-in-aid for railroad safety.*—Assists States in paying salaries and expenses incurred for State safety inspectors authorized under section 206 of the Railroad Safety Act of 1970. The 1982 program will support approximately 140 State inspectors. Federal assistance for this program will terminate at the end of 1982. In a time of Federal budgetary restraint, these costs can and should be borne by the States.

¹ The Labor and Management Practices program is funded under the Rail Service Assistance appropriation in 1983.

² The Policy Support program is funded under the Office of the Administrator appropriation in 1983.

1. *Railroad technology research.*—The objective of this program is to plan and conduct research that will ultimately improve the safety of train operations. This program directly supports the Federal Railroad Administration's safety regulatory functions. In 1983 funding to improve the railroad industry's operations and productivity is not requested because these activities can best be supported by the railroad industry which is the primary beneficiary. The Labor/Management Practices area which in past years was funded under this heading, is now funded under the Rail Service Assistance appropriation in the Administrative and Special Projects program.

General and special funds—Continued

RAILROAD RESEARCH AND DEVELOPMENT—Continued

Reimbursable program.—Other Government agencies provide reimbursements for information on Research and Development testing, evaluation and analysis.

2. Transportation test center.—Operation of the Transportation Test Center is expected to be transferred to the private sector. Therefore, no funding is requested for 1983.

3. Policy support.—Effective with the 1983 budget, this program will be funded under the Office of the Administrator appropriation.

RAIL SERVICE ASSISTANCE*

*See Part III for additional information.

【(INCLUDING DISAPPROVAL OF DEFERRAL)】

For necessary expenses for rail service assistance authorized by section 5 of the Department of Transportation Act, as amended, for Washington Union Station, as authorized by Public Law 97-125, and for necessary administrative expenses in connection with Federal rail assistance programs not otherwise provided for, **[\$7,500,000 together with \$7,000,000 for the Minority Business Resource Center, as authorized by title IX of Public Law 94-210] \$31,675,000 to remain available until expended:** Provided, That none of the funds provided under this Act shall be available for the planning or execution of a program making commitments to guarantee new loans under the Emergency Rail Services Act of 1970, as amended, **[in excess of \$2,600,000 of contingent liability for loan principal in fiscal year 1982,]** and that no commitments to guarantee new loans, or to refinance outstanding loans under section 211(a) or 211(h) of the Regional Rail Reorganization Act of 1973, as amended, shall be made.

【The Congress disapproves \$35,000,000 of the proposed deferral D81-91 relating to the Federal Railroad Administration, Rail Service Assistance, as set forth in the message of March 10, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon the enactment into law of this bill and the amount of the proposed deferral disapproved herein shall be made available for obligation immediately, and shall not be subject to deferral or rescission for the balance of fiscal year 1982.】 (Department of Transportation and Related Agencies Appropriation Act, 1982.)

Note.—The amount shown for 1982 was the amount appropriated as a result of section 401 of Public Law 97-102, which appears at the end of this chapter.

1. *Local rail service assistance.*—This program was originally designed to provide financial assistance to States for rail planning and for: (1) rail service continuation payments; (2) the cost of purchasing a rail line or other rail properties for future rail service; (3) rehabilitating rail properties, and (4) providing substitute or alternate mode service in a manner less expensive than continuing rail service. In 1982 the program will be funded entirely with prior year unobligated funds. The program will end in 1983 with a final appropriation of \$20 million.

2. *Minority business liaison.*—The Minority Business Resource Center is operated at the secretarial level and is funded through an allocation to the Office of the Secretary in 1982. In 1983 the program will be funded directly by the Office of the Secretary.

3. *Administration and special projects.*—This program provides for the salaries and related expenses of the Federal Railroad Administration in support of Federal assistance programs in this account as well as in the railroad rehabilitation and improvement financing fund, grants to the National Railroad Passenger Corporation and the Conrail labor protection program. In 1983 a subcategory for labor/management practices will be included in this program. Prior funding for labor/management practices was accomplished in the Railroad Research and Development appropriation.

4. *Railroad restructuring assistance.*—Railroad restructuring assistance (redeemable preference shares) was appropriated in this account for 1981; however, these funds will not be obligated until 1982. 1982 funds were appropriated in the railroad rehabilitation and improvement financing funds appropriation.

5. *Washington Union Station.*—Public Law 97-125 allows for the transfer of Washington Union Station from the Department of the Interior to the Department of Transportation. In 1983 funds will be used for rental or purchase and for maintenance of that facility.

1. *Conrail labor protection.*—The Northeast Rail Service Act of 1981 authorized a new Conrail Labor Protection program. In 1982 \$85 million will provide employee protection to Conrail employees who are deprived of employment as a result of the actions taken under authority of the Regional Rail Reorganization Act and the Northeast Rail Service Act. In 1982 funds will be derived from the United States Railway Association's (USRA) "Payments for Purchase of Conrail Securities" appropriation. In 1983 budget authority is requested for \$20 million to continue protection of employees deprived of employment.

2. *Conrail workforce reduction.*—The Conrail workforce reduction program is authorized by the Northeast Rail Service Act of 1981. In 1982 \$100 million will be provided to eliminate unnecessary positions in Conrail. These funds will be provided through the transfer of unobligated balances from the "Payments for Purchase of Conrail Securities" appropriation.

3. *Conrail title V labor benefits.*—The Northeast Rail Service Act of 1981 terminated labor protection benefits under the Regional Rail Reorganization Act (3R Act) and authorized a new Conrail labor protection program. Under the new program, \$25 million is needed to close out Title V labor protection by reimbursing Conrail and other carriers for protection costs incurred prior to October 1, 1981, the effective date of the repeal. The \$25 million in 1982 is funded through the transfer of unobligated balances from the "Payments for Purchase of Conrail Securities" appropriation.

[COMMUTER RAIL SERVICE]

[For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, \$15,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, \$45,000,000, to remain available until expended.] (Department of Transportation and Related Agencies Appropriation Act, 1982.)

As authorized by section 1139(b) of Public Law 97-35, \$45 million has been appropriated for transition funding to facilitate the transfer of rail commuter service from Conrail to other operators. These funds will help to defray the one-time—only start-up costs of commuter service and meet other transition expenses connected with the operation of commuter services. Fifteen (\$15) million will be provided to the Chicago Regional Transit

Authority, as authorized by section 601(d) of the Rail Passenger Service Act, as amended. These funds will be used in connection with the cost of commuter service and capital improvements. The Department will be working with the Chicago Regional Transit Authority in the application of these funds.

In 1981, the Government reached a settlement with the Penn Central and its subsidiaries and affiliates on the value of properties transferred to Conrail in 1976. The settlement totaled \$2,126 million in principal and interest. In 1982, \$551 million (principal and interest) is currently estimated associated with settlements with the Erie Lackawanna and Reading estates. Additionally, \$252 million of interest is owed Treasury based on prior DOT borrowings to liquidate the 1981 settlement with the Penn Central. Additional 1982-83 settlements may be reached with the other major litigants in 1982 (the Ann Arbor, Central Jersey Industries and the Lehigh Valley). The issue of the payment of interest to Treasury in 1983 is under review. Interest due in 1983 is not yet reflected in the schedules.

1. *Construction.*—This appropriation provides for the upgrading of rail passenger service between Boston, Mass., and Washington, D.C. Pursuant to amendments to the 4R Act made in 1980, the major improvement work has been redirected toward emphasis on the most heavily traveled segments of the Corridor and on safety and reliability rather than trip time improvements. Major construction projects beginning or continuing in 1982 include: track improvements and bridge rehabilitations throughout the Corridor; tunnel repairs at Baltimore; station improvements at New Carrollton, Baltimore, Wilmington, Philadelphia, Trenton, Metropark, Newark, New York, Stamford, New Haven, New London, and Boston; maintenance-of-way base construction in Maryland and New Jersey; equipment service facilities built or improved at Washington, Wilmington, and Boston; and repair of the electrification and signaling systems. Design will continue in 1982. Major construction scheduled to begin in 1983 includes: electrification repair in the New York City vicinity; improvement of the Providence station; and rehabilitation of the Portal (N.J.) and Susquehanna River (Md.) bridges. Amtrak does much of the Northeast Corridor Program's track repair and is assuming increasing responsibility for management of other construction projects.

Reimbursable program.—Collections are made from Federal and non-Federal agencies in connection with cost-sharing improvement projects, such as stations.

2. *System engineering/program management and administration.*—This program includes system modeling, standards, design, and requirements criteria; and program management and administration which provides overall program planning, scheduling, monitoring, supervision, inspection, and evaluation including the salaries of FRA and Federal Highway Administration personnel assigned to the project. Efforts in 1983 will focus on completion of most engineering management responsibilities and on a close-out of design contracts.

3. *Public grade crossing elimination.*—No funds are requested for this program in 1983; however, outlays will continue from prior year obligations.

The National Railroad Passenger Corporation (Amtrak) is a private corporation. Federal assistance is provided through the Department of Transportation in the following manner:

1. *Operating grants.*—In 1983, funds will permit operation of most of the basic system currently being operated. The funding level assumes savings in labor costs and increased State funding of State and federally funded service. Interest will continue to be deferred on Amtrak's loan guarantee debt, as required by Congress. In keeping with the Amtrak Improvement Act of 1981, the ratio of revenues to costs, excluding capital costs, must be at least 50%.

2. *Labor protection and capital grants.*—In 1983, funds will permit right-of-way improvements and continue a modest upgrading of rolling stock.

In 1982, in the absence of an acceptable collectively bargained agreement, legislation will be submitted in support of Amtrak's efforts to improve productivity, to limit its labor protection obligations, and to increase State funding of jointly funded service.

The Emergency Rail Facilities Restoration Act authorized the Secretary of Transportation to make loans for the purpose of restoring or replacing railroad facilities, equipment, or services damaged or destroyed as a result of the natural disasters that occurred during June 1972 and provided that no loan application could be approved later than June 27, 1973. The program was terminated in 1974. On October 1, 1978, the unexpended balance was returned to the general fund of the Treasury.

The Alaska Railroad is operated by the Federal Government under the act of March 12, 1914 (38 Stat. 305). To the extent possible, programs are financed by revenues earned from freight and passenger services and other services incidental thereto.

The Administration supports legislation which authorizes transfer of the Alaska Railroad to the State by the end of 1982. Therefore, no new appropriation is requested in 1983.

This fund was established to finance all capital and operating assistance grants, contracts, and loan activities authorized by the Urban Mass Transportation Act

of 1964, as amended. This fund was extended until 1983 by the Surface Transportation Assistance Act of 1978.

1. *Urban discretionary grants.*—Provides grants to State and local agencies for mass transportation investments. Such investments may include construction of fixed guideway systems; extensions to existing guideway systems; major bus fleet expansions; capital grants for emergency repairs to transit facilities resulting from natural disasters; deployment of new technology; innovative transit demonstrations projects; and technical planning assistance.

2. *Urban formula grants.*—Provides for grants to urbanized areas or parts thereof on the basis of a formula for the payment of operating expenses; the construction, acquisition, and improvement of facilities and equipment; for routine capital projects such as the replacement of buses; the modernization of existing systems, and for commuter rail and other fixed guideway systems.

3. *Interstate transfer grants.*—Grants under this activity are authorized by the 1973 Highway Act, whereby States and localities may withdraw previously approved interstate segments and apply the authorized funds to substitute transit or highway projects. (Highway substitute projects are funded in the budget of the Federal Highway Administration.) The Washington, D.C., area will receive a portion of its Federal funding for Metro-rail construction in 1983 from this activity.

4. *Nonurban formula grants.*—Provides formula transit grants for nonurbanized areas on the basis of a formula. Both payment of operating expenses and capital expenses are eligible. Although no new funding is requested for 1983, grants of \$43 million (from prior year, unobligated appropriations) are planned.

5. *Research and training.*—Provides for grants and contracts for the purposes of developing, testing, and demonstrating new facilities, equipment, techniques, and methods (operations and managerial), and improving mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants to public and private, nonprofit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation.

6. *Administrative expenses.*—Provides for the administrative costs of the Urban Mass Transportation Administration.

7. *Waterborne demonstration.*—Further funding is not necessary; the project has been fully funded from prior year appropriations.

8. *Washington Metro.*—Grants under this activity are authorized by the 1979 Amendments (Public Law 96-184) to the National Capital Transportation Act whereby the Washington Metropolitan Area Transit Authority is authorized additional Federal funds for construction of the Metrorail system.

Direct loans and loan guarantees.—These program activities provided direct loans for advance land acquisition and guaranteed rail system construction bonds issued by the Washington Metropolitan-Area Transit Authority. No change in the status of these commitments is planned for 1983. No additional commitments will be made.

1. *Operations*—(a) *Operation of traffic control system.*—This activity covers the operation of a national system of air traffic management in the United States, its territories and possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 25 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at major civil airports to guide traffic movements at and in the vicinity of the airports. A system of domestic and international flight service stations provide weather and other information to pilots and relay traffic control data between ground controllers and pilots.

(b) *Installation and materiel services.*—This activity covers procurement, contracting and materiel management programs; administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leased space for which payment is made to General Services Administration (GSA); and other logistics support functions.

(c) *Maintenance of traffic control system.*—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; operational leased communications; and technical oper-

ation and maintenance of a national network of air navigation aids and traffic control facilities in the United States, and its territories and possessions.

(d) *Administration of aviation standards program.*—This activity exists to promote flight safety of civil aviation by assuring: the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards. In addition, this activity covers the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program.

(e) *Administration of medical programs.*—This activity covers the development of regulations governing the physical and mental fitness of pilots and other persons whose health affects safety in flight; the application of these medical standards; the management of over 8,300 designated aviation medical examiners; the medical investigation of fatal general aviation aircraft accidents; the development and supervision of an occupational health program for agency personnel; the administration of an airman medical education program and the administration of an aviation medical research program.

(f) *Development direction.*—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development appropriation.

(g) *Administration of airports program.*—This activity includes the following work programs: (1) administration of an airport grant program for airport planning and development; (2) maintenance of a national airport system plan; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; and (5) safety certification of airports serving Civil Aeronautics Board certificated air carriers.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned

Washington National and Dulles International Airports which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

Combined revenues are expected to exceed the 1983 appropriation by \$13.3 million. Washington National is expected to produce an operating profit of \$12,798 thousand and Dulles International an operating loss of \$10 thousand, resulting in a combined operating profit of \$12,788 thousand. The deduction of \$6,140 thousand in depreciation and interest for the two airports results in a net profit of \$6,648 thousand.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

The following table reflects activity at the airports:

The projects in the construction program for Washington National and Dulles International Airports for 1983 are designed to accomplish the following four objectives:

Airport planning and development.—At Dulles International Airport, funds are included for construction of the connection of the airport access highway to Interstate highway 66.

Upgrade airport facilities and correct deficiencies.—Due to growth in the air industry and changes in technology, existing facilities require expansion or replacement to increase load capacity or to upgrade performance through modernization. At National, funds are

included to construct an extended runway safety area at the north end of runway 18/36.

Rehabilitate existing facilities.—Existing facilities require periodic rehabilitation due to deterioration from age and usage. Funds are programed to rehabilitate fire protection systems at National and rehabilitate escalators at Dulles.

Energy conservation.—Funds are designated at Dulles to implement energy savings projects.

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

In addition to the premium program, binders are also issued to cover aircraft, persons, and property. These binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exists indemnity agreements under which the DOD and DOS agree to reimburse the Department of Transportation for all losses paid to air carriers sustaining damage to their aircraft by an insured peril while said aircraft is operating under a contract to the interested Department.

Administration costs are out of fee receipts (49 U.S.C. 1531, as amended 75 Stat. 210) and interests earned through authorized investments.

The Airport and Airway Revenue Act of 1970 (49 U.S.C. 1742(a)), as amended, provides for the revenues received in the Treasury from passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and Airway Trust Fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid airports; Facilities and equipment; Research, engineering and development; and a portion of Operations. During part of 1982, most of the revenue being collected is assigned to the general fund because authority for the Trust Fund's receipt of revenue was not extended by Congress. This budget projects a reestablishment of that authority on July 1, 1982.

The status of the fund is as follows (in thousands of dollars):

¹ Reappropriated in accordance with provisions of Public Law 97-35.

The Airport and Airway Development Act of 1970 (Public Law 91-258, as amended) authorized the Secretary of Transportation to incur obligations for airport planning and development grants through 1981. Authority to incur obligations for 1982 and beyond requires enactment of legislation.

Legislation will be proposed to increase aviation user fees and authorize deposit of the receipts into the Airport and Airway Trust Fund. These additional resources will make possible reauthorization of the airport grant program in 1982 and 1983.

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)

For necessary expenses, not otherwise provided for, for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities, including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; construction and furnishing of quarters and related accommodations for officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available; to be derived from the Airport and Airway Trust Fund, [\$260,847,000], \$425,000,000 to remain available until September 30, [1986] 1987: *Provided*, [That of the foregoing amount, \$4,000,000 shall be available only for the design, engineering, construction, and equipment for an air traffic control training facility at the University of North Dakota at Grand Forks: *Provided further*,] That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities: *Provided further*, That no part of the foregoing appropriation shall be available for the construction of a new wind tunnel, or to purchase any land for or in connection with the Federal Aviation Administration Technical Center]. (Department of Transportation and Related Agencies Appropriation Act, 1982; additional authorizing legislation to be proposed.)

Note.—The amount shown for 1982 was the amount appropriated as a result of section 401 of Public Law 97-102, which appears at the end of this chapter.

Note.—Includes \$3,500 thousand for activities previously financed from facilities, engineering and development, Federal Aviation Administration. 1981, \$4,950 thousand; 1982, \$1,292 thousand.

This appropriation finances the installation of new equipment, construction and modernization of facilities, procurement of aircraft for flight inspection of facilities, and procurement of experimental facilities for the engineering and development program. Operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

The 1983 funding level is necessary to modernize and expand the existing Federal airway system to meet forecast aviation growth through the 1990's. The current system is technologically outmoded as well as labor and energy intensive, thus making it expensive and inefficient to operate and maintain. The budget activities include:

1. *Air route traffic control centers.*—Long-range radar, communications and automation equipment provide air traffic controllers information on aircraft positions at distances up to 185 miles. Included in the 1983 budget are funds for enhancements to the Direct Access Radar Channel (DARC), which is the backup system for the primary computer, and initial replacement of center air/ground signal (tone) equipment, which provides direct communications between air traffic controllers and pilots.

2. *Airport traffic control towers.*—Terminal area radar, communications and automation equipment aid air traffic controllers in handling air traffic at distances up to 60 miles. The 1983 request includes funds for an ongoing program to replace obsolete towers, a multiyear effort to institute remote maintenance monitoring, and initial replacement of existing TPX-42 Terminal Computer Systems with Automated Radar Terminal System II (ARTS-II).

3. *Flight service facilities.*—Flight service stations and associated facilities provide flight assistance to pilots, particularly general aviation pilots. In 1983, funding will continue a multiyear program to modernize, automate, relocate and consolidate these flight service stations and will provide for replacement of the National Communications Center (NATCOM), which is the hub of FAA's Weather Communications System.

4. *Air navigation facilities.*—Very high, medium and low frequency facilities are used to define airways and air routes and provide distance, direction and weather information to pilots. Instrument landing systems, distance measuring equipment and visual lighting aids assist pilots in making final approaches to airport runways. Programs and projects in the 1983 budget include replacement of very high frequency omnidirectional radio range with tactical navigation equipment and establishment of instrument and visual landing aids.

5. *Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations. The 1983 request includes funds to refurbish structures housing electronic systems and acquire land or easement for facility sites.

6. *Aircraft and related equipment.*—This activity includes the procurement, modification and/or replacement of aircraft and equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air. Procurement of fuel-efficient flight inspection aircraft highlights the 1983 request.

7. *Development, test and evaluation facilities.*—This activity provides for leasing and improvements of the plant and facilities at the Federal Aviation Administration Technical Center in Atlantic City, N.J. The 1983 request includes funds to continue leases and to enhance equipment used in the engineering and development programs.

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase its productivity and capacity to meet the expected air traffic demands of the future. These efforts are based upon exploiting current technology and applying system engineering techniques to the development and integration of new equipment into the

RESEARCH, ENGINEERING AND DEVELOPMENT (AIRPORT AND AIRWAY TRUST FUND)—Continued

total system. The agency also administers aviation medical research aimed at increasing the personal effectiveness of air traffic controllers.

These programs are conducted under the direction of the agency's technical personnel, through contracts with qualified private firms, universities, individuals and other Government agencies.

1. *Air traffic control.*—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the surveillance of aircraft by tracking radars and control center processing of flight information received from pilots, airline dispatchers, flight service stations and the surveillance system through a national communications network. The high-speed or real-time, computerized processing of this data for the direct use of air traffic controllers is a key to increasing system productivity.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

2. *Advanced computer.*—This activity provides for the development of advanced automation systems which will provide the capacity to accommodate the forecast demands for air traffic control services in the post 1990's. In 1983, \$47 million will provide for the first major research contract associated with replacement of the existing 9020 enroute computers and for other supporting research and development programs.

3. *Navigation.*—This activity provides for modernization, expansion, and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation. The requested 1983 funds will support research and development activities for enroute navigation to assess candidate navigation systems such as NAVSTAR GPS, LORAN-C, and OMEGA/VLF systems for use in the post-1995 period. Continued research in precision landing aids, flight deck information management and Head-Up Display (HUD) is also planned.

4. *Aviation weather.*—This activity provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of systems for the detection and avoidance of wind shears is also included in this activity.

5. *Aviation medicine.*—This activity provides for conducting aeromedical research directed toward identifying and eliminating those physiological and psychological factors harmful to personnel engaged in operating the traffic control system or which may jeopardize flight safety.

6. *Aircraft safety.*—This activity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft by assuring the design, flight performance, and airworthiness of aircraft and development of systems and devices to prevent and deter sabotage in the civil air transportation system. Funds requested for 1983 will continue research in fire safety, including cabin fires, and development and testing of anti-misting fuels; research in transport and general aviation safety; and flight safety.

7. *Environment.*—Principal efforts provided for under this activity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system. In 1983, research will continue in air pollution and noise control, primarily associated with certification and enforcement requirements.

Certain costs of operating and maintaining air navigation and air traffic control facilities, formerly financed from the general fund, are to be reimbursed to the Operations appropriation from the airport and airway trust fund. The expected level of 1983 trust fund receipts together with the uncommitted balance will permit an increase in the payment of operations and maintenance expenses as well as the costs of airport development, airway facilities investment, and research programs. Approximately 85% of total FAA expenses will be financed by the users of the system.

Legislation will be proposed to authorize use of the airport and airway trust fund as the source of financing the Aviation Weather Services Program administered by the National Oceanic and Atmospheric Administration (NOAA) of the Department of Commerce. The 1983 estimate includes \$26.7 million for these services, which will be provided by NOAA on a reimbursable basis. NOAA provides meteorological observations, forecasts, warnings, and advisories and the Federal Aviation Administration is responsible for the dissemination of aviation weather information (including pilot briefings) used to support the National Airspace System. The new financing arrangement will fairly allocate costs of the aviation weather services program to the beneficiaries of the services provided.

AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM*

*See Part III for additional information.

[In carrying out the program for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), during fiscal year 1982 new commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a maximum passenger capacity of sixty seats or less or a maximum cargo payload of eighteen thousand pounds or less, and shall not exceed in the aggregate \$100,000,000] During fiscal year 1983, no commitments for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note) shall be made. (Department of Transportation and Related Agencies Appropriation Act, 1982.)

¹ Amounts shown are based on the full principal amounts of loans that are partially guaranteed by the U.S. Government. The comparable amounts of limitations enacted on the basis of contingent liability are \$350,000 thousand in 1981 and \$100,000 thousand in 1982.

² Because of a definition change, the amount shown in line 2210 in 1981 does not include loan guarantees amounting to \$210,566 thousand which were executed at the end of 1980 but with no cash drawn down until 1981. These loan guarantees are included in line 2231.

³ A limitation in the amount of \$50,000 thousand of contingent liability is proposed for 1982; see Part III for additional information.

The program for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), expires on October 23, 1983. No new loan commitments will be made during 1983.

Note.—Includes \$35,953 thousand in 1983 for activities previously financed from health service, Department of Health and Human Services, Health Services Administration.

Funds for operating expenses represent 66% of the total Coast Guard program level. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas. In 1983, certain medical costs of active duty military personnel and the dependents, previously financed by the Department of Health and Human Services, will be funded under this account.

1. *Search and rescue.*—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert capable of responding to notice of a distress incident.

WORKLOAD DATA

	1981 actual	1982 estimate	1983 estimate
Responses to search and rescue cases serviced by Coast Guard regular forces or Coast Guard directed forces (auxiliary)	79,283	81,669	82,160

Property loss prevented (in thousands)	\$1,617,000	\$1,779,000	\$1,840,000

2. *Aids to navigation.*—A network of manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the

armed services and marine and air commerce. Administrative control is exercised over the construction, maintenance, and operation of bridges across navigable waters of the United States. Included in aids to navigation are the Coast Guard's domestic ice operations which are performed by specially constructed icebreakers and cutters.

Aircraft reconnaissance operating hours	621	250	250

3. Marine safety.—The Coast Guard insures compliance with Federal statutes and regulations pertaining to the merchant marine industry by reviewing plans and specifications for the construction or alteration of merchant vessels; by periodic inspections; by investigating casualties; and by setting standards, procedures, and practices under which merchant marine personnel are licensed and regulated. The Coast Guard operates a boat safety standards program and provides boater information, education and compliance programs, support of the Coast Guard Auxiliary, and technical support of the individual State boating safety programs. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways against harm, and thereby improve their economic utilization and assure their availability in time of national emergency.

Oil pollution removal operations	900	900	900
Ocean dumping surveillance missions	600	600	600

5. Enforcement of laws and treaties.—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction. Fisheries enforcement involves living marine resources, while general law enforcement concerns drug smuggling, illegal immigration, hijacking/theft of vessels and other unlawful activities.

WORKLOAD DATA

	1981 actual	1982 estimate	1983 estimate
Cutter operating hours:			
Fisheries enforcement	33,630	27,000	20,000

General law enforcement	7,553	7,500	7,500
Seizures—vessels	234	185	200

6. Marine science and polar operations.—Marine science activities, which include the International Ice Patrol, are carried out on a cooperative basis with other Government agencies. Polar ice operations are performed by specially constructed icebreakers or ice-strengthened cutters which operate in support of Coast Guard programs, the requirements of other agencies on a reimbursable basis, and in the facilitation of commerce.

7. Military readiness.—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; to remain available until September 30, [1986, \$384,000,000: *Provided*, That of the foregoing amount \$175,000,000 shall be available only for assets deployed and dedicated in a manner to maximize their contribution to the Coast Guard's drug interdiction program] 1987, \$19,200,000. (Title 14, United States Code; Department of Transportation and Related Agencies Appropriation Act, 1982; additional authorizing legislation to be proposed.)

Note.—The amount shown for 1982 was the amount appropriated as a result of section 401 of Public Law 97-102, which appears at the end of this chapter.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating Expenses appropriation where estimated costs of a project are \$125 thousand or less, or where renewals and replacements involve less than 75% of the original facility. Although most of the facilities listed below are multimission in nature, they are for this presentation highlighted only under their primary mission areas. The 1983 program consists almost entirely of projects funded in 1982 for which design, engineering, or procurement lead time is insufficient to permit contract award before 1983.

1. *Search and rescue.*—In 1983 the medium-range surveillance (MRS) aircraft procurement program will be continued. The short-range recovery (SRR) helicopter procurement program will continue. Construction, replacement, and/or renovation programs at selected shore sites and facilities are also provided for.

2. *Aids to navigation.*—Improvements to existing and the establishment of new waterway aids to navigation, and the continuation of the lighthouse automation and modernization program are highlighted under this activity. Modification/relocation/construction of vessel traffic service communications at Prince William Sound (Valdez), Alaska will also contribute to this mission.

3. *Marine safety.*—Efforts to facilitate the marine safety mission will center on the acquisition, rehabilitation, renovation and improvement of selected vessels and shore facilities.

4. *Marine environmental protection.*—For 1983 this activity is primarily concerned with the procurement of the medium-range surveillance (MRS) aircraft, and the short-range recovery (SRR) helicopters.

5. *Enforcement of laws and treaties.*—Funding in this activity is primarily associated with the construction of the 270-foot cutters to replace older, less capable cutters. It also includes the fleet renovation and modernization of the 210-foot medium-endurance cutter.

6. *Marine science and polar operations.*—The USCGC *Glacier* major maintenance availability program is the principal effort in this activity for 1983.

7. *Military readiness.*—Major emphasis in this activity relates to the medium-endurance cutter replacement program.

This appropriation provides the Government's share of the costs for altering or removing bridges determined to be obstructions to navigation. Generally, bridges to be altered were built with what are now insufficient vertical and/or horizontal clearances for free navigation on navigable waters of the United States. In 1983 no funding is requested.

RETIRED PAY

For retired pay including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C., ch. 55), 【\$279,000,000】 \$336,000,000. The Coast Guard Reserve Forces program's objective is to provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested will provide a Ready Reserve of 18,500, including a Selected Reserve of 10,700.

1. *Initial training.*—This activity encompasses direct costs of initial training for three categories of nonprior service trainees. The first category involves those who perform approximately 30 weeks initial training comprised of recruit and entry level rate training. The second category involves reservists whose initial training is split between two consecutive summer periods. The first period, 2½ months, consists of recruit training. The second period, 2½ to 4 months, consists of entry level rate training and/or on-the-job training with the length of the period varying with the speciality. The third category involves those who receive only 15 weeks of initial training.

2. *Continuing training.*—Direct costs of officer and enlisted drills and annual active duty for training are programed under this activity.

3. *Operation and maintenance of training facilities.*—All costs for the operation and maintenance of Reserve training facilities are programed under this activity. Included are the prorated share of the cost of joint usage of Coast Guard and other Armed Forces facilities, the cost of providing station-keeper personnel for organized Reserve training units, and the procurement of training aids and facilities (under \$125 thousand).

4. *Administration.*—This activity encompasses all administrative costs of the Reserve Forces program.

5. *Miscellaneous services for other accounts.*—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

1. *Search and rescue.*—Ship/helicopter interface projects will be continued and/or completed for new and existing facilities; improved probability of detection methodology projects will be continued.

2. *Aids to navigation.*—Continuing projects include applied research to develop loran-C for use in precision navigation in restricted waters and to assess the effect of the global positioning navigation system on the maritime community.

3. *Marine safety.*—Commercial vessel safety research will be conducted to provide a knowledge base to support regulations and standards. Emphasis will be directed toward crew safety from exposure to hazardous cargo vapors in the marine environment.

4. *Marine environmental protection.*—Emphasis is directed toward enhancing detection, identification, and quantification of pollutant spills, and development of new systems and procedures for the control and cleanup of those spills. Development and integration of a prototype airborne surveillance system for oil identification and mapping of discharges should be completed.

5. *Enforcement of laws and treaties.*—This activity will be encompassed by research and development programs for multimission command, control and surveillance systems and for advanced marine vehicles.

6. *Marine science and polar operations.*—This program will receive secondary benefit from work in energy conservation, command, control and surveillance, and advanced marine vehicles.

7. *Military readiness.*—This program will be enhanced through work in the broad programs research, energy research and development, and multimission project areas.

This appropriation provided financial assistance for the development and implementation of comprehensive State boating safety programs. As a result of the success of this program in stimulating State boating safety functions, funding for this activity was terminated at the end of 1979. The Coast Guard continues to provide liaison with the States in support of their recreational boating safety activities.

NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND

For financial assistance for State recreational boating safety programs to be derived from the National Recreational Boating Safety and Facilities Improvement Fund, in accordance with the provisions of the Recreational Boating Safety and Facilities Improvement Act of 1980 (Public Law 96-451), \$5,000,000, to remain available until expended.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, onshore facility, or offshore facility do not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators. In addition, full implementation in 1982 of the recently enacted comprehensive environmental response compensation and liability fund should result in the elimination of chemical dumpsite cleanup, and a general decrease in new hazardous substance response cases.

The Coast Guard supply fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing; commissary provisions; general stores; technical material; and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from sale of goods.

Activity of approximately \$141 million in this fund in 1983 is divided as follows: 6% for uniform clothing; 30% for commissary provisions; 11% for general stores and technical material; and 53% for fuel.

Because of better than expected performance of the fund, gained through the promulgation of new rules, regulations, and surcharges, along with certain enhancements in fund management techniques, new authority to increase the capital of the fund is not being requested at this time.

The Coast Guard cadet fund is utilized by the Superintendent of the Coast Guard Academy to receive, plan, control, and expend personal funds of Coast Guard cadets. By use of the fund each cadet is assured funds to meet personal expenses while at the Academy and an adequate balance in his account at graduation for officer outfits, civilian clothing, and graduation leave expenses. The fund also receives and expends funds of the Coast Guard Academy Athletic Association.

The Coast Guard surcharge collections, sales of commissary stores fund is used to finance expenses incurred in connection with the operation of the Coast Guard commissary stores at Coast Guard Base, Governors Island, N.Y.; Coast Guard Training Center, Petaluma, Calif.; and Coast Guard Base, Kodiak, Alaska. Training Center Petaluma Commissary was disestablished in 1981. Revenue is derived from a surcharge placed on sales to authorized store patrons (14 U.S.C. 487).

MARITIME ADMINISTRATION

The Maritime Administration (MarAd) was transferred from the Department of Commerce to the Department of Transportation, effective August 9, 1981. The programs administered by MarAd are authorized by the Merchant Marine Act, 1936, and other related acts. The Agency promotes the development and maintenance of an American merchant marine for commercial and defense needs; grants subsidy aid for construction and operation of vessels by American flag operators; conducts maritime research and development; insures construction loans and mortgages for construction or conversion of ships; maintains in a stand-by condition Government-owned fleets; and trains cadets to become licensed merchant ship officers.

The following table shows the funding for the MarAd programs for which detail is furnished in the budget schedules:

The Merchant Marine Act of 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing essential ocean-shipping services. A strong U.S. Merchant Marine is important to the national security and to the development of its foreign commerce. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs.

The major objective of the research and development program is to develop methods, equipment, and systems to make the U.S. shipbuilding and ship operating industries more efficient, competitive, and productive.

In 1983, the research and development program will be conducted in five major program areas as follows:

1. *Advanced ship development.*—This program involves projects to achieve greater productivity in the building of ships and projects directed toward the development of new and improved ship machinery.

2. *Advanced ship operations.*—This program supports improving the efficiency, competitiveness, and safety of U.S.-flag ship operations through the development of advanced management operating techniques using computerized systems, improving fleet control by means of advanced navigation/communication systems, improving cargo handling methods and equipment, improving port productivity and intermodal cargo movement, and assisting with port planning activities.

3. *Research facilities.*—This program provides for research facilities operations, and investigation and simu-

lation of new problems related to ship operations, safety, and design.

4. *Advanced maritime technology.*—This program investigates advanced technological concepts and requirements, and formulates and conducts specific systems analysis and systems development projects.

5. *Arctic shipping.*—This program supports navigation research in the U.S. Arctic in coordination with the U.S. Coast Guard. The 1983 estimate includes funds for operation of Coast Guard ice breaking vessels.

Note.—Includes \$109 thousand in 1983 for activities previously financed from Salaries and expenses, General Administration, Department of Commerce, pursuant to Public Law 97-31.

1. *Maritime education and training*—(a) *Merchant Marine Academy.*—This activity provides for operating the Merchant Marine Academy at Kings Point, N.Y. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Approximately 261 officers will graduate in 1983.

(b) *State marine schools.*—Assistance is provided to States in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers. This assistance involves direct payments to the State schools, student incentive payments to cadets, and maintenance of vessels provided for use as training ships. An estimated 735 officers will graduate from these schools in 1983.

(c) *Additional training.*—This activity provides for costs of administration of the Merchant Marine Academy and State marine school programs at the bureau level, and for the conduct of supplementary training courses required for licensed and unlicensed merchant marine personnel.

2. *National security support capability.*—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and national emergency and for emergency preparedness activities. The Ready Reserve program to maintain selected National Defense Reserve Fleet ships in an advanced state of readiness will be conducted on a reimbursable basis with the Department of Defense beginning in 1982.

3. *Operating programs*—(a) *Development of waterborne transportation systems.*—This activity provides for direct technical and administrative costs of programs for development and subsidized construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives.

(b) *Use of waterborne transportation systems.*—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems to further the foreign and domestic waterborne commerce of the United States. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation.

¹ A limitation in the amount of \$675,00 thousand is proposed for FY 1982; see Part III for additional information.

The Merchant Marine Act of 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. Merchant Marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) established a limitation on MarAd obligations guaranteed and outstanding at any time under title XI of the Merchant Marine Act amounting to \$9.5 billion. For 1983, appropriation language is proposed to introduce an additional ceiling on this program in the form of an annual limitation on new loan guarantee commitments. This is consistent with the Administration's broader objective of introducing budget controls over Federal credit programs. The amount of the limitation proposed for 1983 of \$600 million is adequate to provide loan guarantee assistance to potential applicants most essential for achieving the Nation's Merchant Marine objectives.

The estimated level of new commitments and guarantee construction loans and mortgages, and the estimated aggregate level of guarantees in force and commitments outstanding is shown in the following table:

COMMITMENTS FOR CONSTRUCTION LOAN AND MORTGAGE GUARANTEES

Budget program.—Administrative expenses incurred in the operation of the Federal ship financing fund are paid from income to the fund. Reimbursements to the Operations and training appropriation are anticipated at \$5,066 thousand in 1982, and \$6,000 thousand in 1983. Direct loans in the form of advances to operators to forestall possible defaults and to satisfy claims on defaulted mortgages are estimated at \$25,000 thousand in 1983.

Financing.—The fund receives income from insurance premiums on construction loans and mortgages, fees, and interest on U.S. Government securities and mortgages held directly. The payment of administrative expenses is made from this income, while payments for advances to operators and redemption of defaulted

loans and mortgages are paid from income, equity, and borrowing from the Treasury Department. No borrowings are anticipated in 1983.

Note.—Includes all 1981 activities transferred from Department of Commerce, Consolidated working fund, Maritime Administration.

The Maritime Administration is authorized to reactivate, operate, deactivate, and charter merchant vessels, and operate experimental vessels under the jurisdiction of the Secretary of Transportation. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States; and to process advances received from Federal agencies.

Budget program.—As of September 30, 1981, there are three claims in process of settlement which resulted from operation of Government-owned ships and general agency agreements in the Vietnam sealift. The 1983 program anticipates testing of three ships in the Ready Reserve Fleet, and maintenance of the Ready Reserve Fleet.

Financing.—Expenses are financed by charter hire revenue, and reimbursements from Federal agencies and insurance underwriters.

The Maritime Administration is authorized to insure against loss or damage by marine war risks upon finding that commercial insurance cannot be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program. Authority to underwrite insurance has been extended until September 30, 1984.

Budget program.—It is estimated that during 1983 insurance coverage will be provided for approximately 610 U.S.-flag ships, 2,100 Lighter Aboard Ship (LASH) and Seabee barges, and 125 foreign-flag ships owned by U.S. citizens. The program also includes provision for second seamen's war risk insurance covering the crews of 18 vessels under contract with the Military Sealift Command.

Financing.—The War risk insurance revolving fund was established under 46 U.S.C. 1288. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income.

The Saint Lawrence Seaway Development Corporation plans to continue to maintain and operate the Seaway System, in cooperation with the Canadian Seaway Authority, as a safe, efficient, low-cost transportation artery, and to develop its potential in order to realize the benefits derived from full use of the facilities. In 1983, the Corporation will again pursue programs to increase the efficiency of the system by continuing efforts to: (1) encourage increased use of the Seaway system; (2) extend the navigation season; (3) maintain and improve our lock facilities and lock approach channels; and (4) work closely with current and potential Seaway shippers, Great Lakes ports, and other organizations. The Corporation will continue its extensive structural repair and maintenance programs during the winter down time period to ensure continuity of operations during the navigation season. The Corporation's 1983 budget reflects these activities:

1. *Administrative expenses (limitation).*—This program provides for management and administration of the Corporation, and includes finance, legal, civil rights, procurement, personnel administration, and other related support services.

2. *Operations.*—This program provides for operation of all facilities and for planning and development activities. Operations are conducted on a 24-hour day, 7-day week basis throughout the navigation season with maintenance functions being performed throughout the year. Some essential maintenance items are necessarily deferred to the nonnavigation season when both operations and maintenance forces are utilized for their accomplishment. Development efforts are directed toward increased usage of the system.

3. *Replacements and improvements.*—This program provides for work on a lock gate assembly tower, and on lock flushing ports. Along with the St. Lawrence Seaway Authority of Canada, the Corporation will evaluate alternative navigation systems combining precise all-weather navigation aids with new or conven-

tional aids. Plans are to continue to refine an existing mathematical model for reaches of the river where improvements are needed to facilitate navigation, to undertake lock machinery control improvements and to replace worn-out machinery, equipment and tools.

On the basis of traffic projections at an increased level of tolls, the Corporation estimates its revenues for 1983 will reach \$15.1 million, which it proposes to apply to the following programs.

(a) \$10.4 million to pay operating expenses consisting of administrative expenses of \$1.7 million (subject to limitation) and \$8.7 million for operations.

(b) \$1.9 million to pay estimated replacement and improvements costs for facility improvements, replacements of equipment, and season extension projects.

(c) \$2.0 million for the scheduled redemption of the Corporation's revenue bonds issued to the U.S. Treasury.

(d) \$0.8 million increase in unobligated reserve.

The mission of the Research and Special Programs Administration is to serve as a research, analytical, and technical development arm of the Department for long-range and multimodal research and development, as well as to conduct special programs. Particular emphasis is given to pipeline safety, transportation of hazardous cargo by all modes of transportation, safety, security, facilitation of domestic and international commerce, and intermodal research and development activities including programs within the university community. Responsibilities of the administration are carried out under the following activities:

1. *Operations.*—This activity provides for the Administration's salaries and expenses as well as for central supervisory and management functions including a management information system necessary for overall planning and direction of the Administration; management and execution of transportation programs involving passenger and cargo security, facilitation services, national emergency plans/preparedness, management of the Transportation Safety Institute; and for the conduct of hazardous materials and pipeline safety regulatory and enforcement programs.

2. *Research and development.*—This activity provides for research and development to complement research programs of the operating administrations, to stimulate industry efforts to advance transportation technology, to develop multimodal and intermodal systems and technology, to encourage university research, and to support the hazardous materials and pipeline safety regulatory programs.

3. *Grants.*—This activity provides for grants-in-aid to State agencies of up to 50% of the actual costs for conducting a gas pipeline safety program as authorized by the Natural Gas Pipeline Safety Act of 1968.

The Working Capital Fund finances research, evaluation and analysis activities undertaken at the Transportation Systems Center (TSC) in Cambridge, MA. TSC performs multidisciplinary research for each of the operating administrations, as well as the Office of the Secretary. As a derived resource, TSC is funded through negotiated agreements which define the programmatic activities to be undertaken at TSC and directed by each of the funding organizations.

Domestic transportation problems of the 1980's are continually changing the emphasis of TSC's work from its original technological focus to include such areas as safety research and analysis, policy analysis, operations research and analysis, cost allocation, and system maintenance methods. The following are among the areas to be addressed in 1983:

Federal Highway Administration.—Analysis of highway design, maintenance and rehabilitation techniques to reduce fuel consumption and Federal investments and cost allocation studies.

National Highway Traffic Safety Administration.—Passenger vehicle safety research, medium and heavy duty vehicle safety research and national motor vehicle accident and safety data statistics analysis.

Federal Railroad Administration.—Rail safety research and operations and rail policy support.

Urban Mass Transportation Administration.—Bus systems improvements and assessment, rail construction and rehabilitation effectiveness, planning, improved management and maintenance techniques, services and methods demonstration evaluations, and technology sharing.

Federal Aviation Administration.—Air traffic control, navigation, aviation weather, ATC computer replacement, aviation safety analysis, standards and certification analysis, policy and planning support, and automation for productivity improvements.

Coast Guard.—Navigation, command and control, operations efficiency studies, maritime communications, hazardous materials and pollution prevention and containment, information management, and energy conservation.

Research and Special Programs Administration.—Transportation information and data management, pipeline safety, navigation and emergency transportation research.

Office of the Secretary.—Regulatory research, modeling and forecasting, safety research, transportation industry analysis, and technology sharing.

NOTES

Includes \$400 thousand in 1983 for activities related to the Maritime Administration, transferred to the Department of Transportation pursuant to Public Law 97-31.

Includes \$4,220 thousand in 1983 for activities previously financed from the appropriation, "Rail Service Assistance," Federal Railroad Administration: 1981, \$9,423 thousand; 1982, \$7,000 thousand.

1. General administration.—This appropriation finances the costs of policy development and central supervisory and coordinating functions necessary for the overall planning and direction of the Department. It covers the immediate secretarial offices as well as those of the assistant secretaries and the general counsel.

Also covered are staff assistance and supervision of general management and administration in the Department. In addition, the Office of the Secretary provides services on a reimbursable basis for technical assistance to transportation projects, participation in intergovernmental planning groups, and miscellaneous assistance to other accounts.

2. The Minority Business Resource Center is operating in the Office of the Secretary to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of the restructuring of the Nation's railroads and other modes of transportation.

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

1. *Transportation policy and planning.*—This research provides the foundation for development of transportation policy, for coordination of national level transpor-

tation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

2. *Special programs.*—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, technology sharing, and evaluation of departmental programs.

The working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed by the operating administrations and offices being served.

The activities of the working capital fund have been consolidated as follows:

1. *Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

2. *Support services activities* include travel services and imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; and facilities management.

3. *Library services* include information retrieval services.

4. *Transportation computer activities* include computer time-sharing services and the transportation computer center.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. None of the funds provided in this Act shall be available for the planning or execution of programs the commitments for which are in excess of \$450,000,000 in fiscal year [1982] 1983 for grants-in-aid for airport planning, noise compatibility planning and programs, and development.

SEC. 303. None of the funds provided under this Act shall be available for the planning or execution of programs, the obligations for which are in excess of \$10,000,000 in fiscal year [1982] 1983 for "Highway-related safety grants".

SEC. 304. None of the funds provided under this Act shall be available for the planning or execution of programs, the total obligations for which are in excess of [\$92,500,000] \$77,000,000 in fiscal year [1982] 1983 for "State and Community Highway Safety": *Provided*, That none of the funds under State and Community Highway Safety shall be used for construction, rehabilitation or remodeling costs or for office furnishings and fixtures for State, local, or private buildings or structures.

SEC. 305. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 306. Funds appropriated under this Act for expenditure by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 307. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

[SEC. 308. None of the funds provided under this Act shall be made available under section 5 of the Urban Mass Transportation Act of 1964, as amended, to support mass transit facilities, equipment, or operating expenses unless the applicant for such assistance has given satisfactory assurances in such manner and forms as the Secretary may require, and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours shall not exceed one-half of the rates generally applicable to other persons at peak hours: *Provided*, That the Secretary, in prescribing the terms and conditions for the provision of such assistance shall (1) permit applicants to continue the use of preferential fare systems for elderly or handicapped persons where those systems were in effect on or prior to November 26, 1974, (2) allow applicants a reasonable time to expand the coverage of operating preferential fare systems as appropriate, (3) allow applicants to continue to use preferential fare systems incorporating the offering of a free return ride upon payment of the generally applicable full fare where any such applicant's existing fare collection system does not reasonably permit the collection of half fares, and (4) allow applicants to define the eligibility of "handicapped persons" for the purposes of preferential fares in conformity with other Federal laws and regulations governing eligibility for benefits for disabled persons.]

SEC. [309] 308. None of the funds contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [310] 309. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year [1982] 1983 shall not exceed [\$8,000,000,000] \$7,700,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978. [No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.]

(b) For fiscal year [1982] 1983, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid

highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, [1981] 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, [1982] 1983, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses, forest highways and \$15,000,000 for the Bismarck-Mandan Bridge, \$4,000,000 for the Steubenville-Weirton Bridge, and necessary funds required during fiscal year 1982 for the Dickey Road Bridge in East Chicago, Indiana, and the U.S. 12 Bridge over Trail Creek in Michigan City, Indiana] and forest highways.

[SEC. 311. None of the funds provided in this Act shall be used by the Interstate Commerce Commission to approve railroad branchline abandonments in fiscal year [1982] 1983 in any State in excess of 3 per centum of a State's total mileage of railroad lines operated: *Provided*, That this limitation shall not apply to any abandonment of Conrail railroad lines: *Provided further*, That exceptions to this limitation shall be made only upon the specific approval of each of the appropriate committees of Congress.]

SEC. [312] 310. None of the funds provided in this Act shall be available for the implementation or execution of programs the obligations of which are in excess of \$60,000,000 in fiscal year [1982] 1983 for the "Offshore Oil Pollution Compensation Fund".

SEC. [313] 311. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

SEC. [314] 312. None of the funds provided in this Act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

(1) School Street crossing in Groton, Connecticut; and

(2) Broadway Extension crossing in Stonington, Connecticut.

[SEC. 315. None of the funds in this Act shall be used for the planning for execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.]

[SEC. 316. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation.]

[SEC. 317. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within 24 months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.]

[SEC. 318. (a) For fiscal year 1982 and thereafter, a department or establishment—as defined in section 2 of the Budget and Accounting

Act, 1921—shall submit annually to the House and Senate Appropriations Committees, as part of its budget justification, the estimated amount of funds requested for consulting services; the appropriation accounts in which such funds are located; and a brief description of the need for consulting services, including a list of major programs that require consulting services.]

(b) For fiscal year 1982 and thereafter, the Inspector General of such department or establishment, or comparable official, or if there is no Inspector General or comparable official, the agency head or the agency head's designee, shall submit to the Congress along with the budget justification an evaluation of the agency's progress to institute effective management controls and improve the accuracy and completeness of the data provided to the Federal Procurement Data System regarding consultant service contractual arrangements.

[SEC. 319. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. [320] 313. None of the funds provided in this Act shall be available for the implementation or execution of programs, the obligations for which are in excess of \$50,000,000 in fiscal year [1982] 1983 for the "Deepwater Port Liability Funds".

[SEC. 321. The weeks of June 13 through July 4, 1982, are designated as "National Clean-up and Flag-up America's Highways Weeks", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe this period with appropriate ceremonies and activities.]

[SEC. 322. None of the funds provided in the Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency, excluding those positions from this provision which serve dual roles pertaining to a security or law enforcement function.]

[SEC. 323. Except for security mission automobiles, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.]

[SEC. 324. None of the funds appropriated by this Act shall be used to implement, administer, or enforce Order 81-5-27 of the Civil Aeronautics Board or any other order of the Civil Aeronautics Board which prohibits or has the effect of prohibiting any United States air carrier from participating in the International Air Transport Association's North Atlantic Traffic Conference under its existing articles and provisions: *Provided*, That this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee.]

[SEC. 325. Notwithstanding any other provision of law, the Secretary shall, with regard to the Urban Discretionary Grant Program of the Urban Mass Transportation Administration, promptly issue a letter of intent for the Dade County, Florida, Circulator System for \$63,642,666, and, in addition, shall promptly issue a letter of intent for nonrail projects in the Portland, Oregon, Metropolitan region for \$76,800,000 and also issue a letter of intent for the Southeast Michigan Central Automated Transit System for 110 million 1981 dollars.]

[SEC. 326. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its States Roads Commission or the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress) are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transportation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.]

[SEC. 327. (a) Notwithstanding section 16 of the Federal Airport Act (as in effect on November 25, 1947), the Secretary of Transportation is authorized, subject to the provisions of section 13 of the Surplus Property Act of 1944 (50 App. U.S.C. 1622(g)), and the provisions

of subsection (b) of this section, to grant release from any of the terms, conditions, reservations, and restrictions contained in a deed of conveyance dated November 25, 1947, under which the United States conveyed certain property to the Greater Rockford Airport Authority for airport purposes and in deeds of conveyance dated May 28, 1948, and April 21, 1949, under which the United States conveyed certain property of the city of Liberal, Kansas for airport purposes.

(b) Any release granted by the Secretary of Transportation under subsection (a) shall be subject to the following conditions:

(1) the Greater Rockford Airport Authority or the city of Liberal, Kansas, as the case may be, shall agree that in conveying any interest in the property which the United States conveyed pursuant to the deeds described in subsection (a), the Greater Rockford Airport Authority or the city of Liberal, Kansas, as the case may be, will receive an amount which is equal to the fair market value; and

(2) any such amount so received shall be used for the development, improvement, operation, or maintenance of a public airport.】

【SEC. 328. (a) Notwithstanding section 13(g) of the Surplus Property Act of 1944 (50 App. U.S.C. 1622(g)) and section 4 of the Act of October 1, 1949 (50 App. U.S.C. 1622(c)), the Secretary of Transportation, if requested, shall, as to the property described in subsection (f), grant a release to the Parish of East Baton Rouge, Louisiana, from all of the terms, conditions, reservations, and restrictions contained in the deed of conveyance dated August 13, 1948, under which the United States conveyed certain property to the Parish of East Baton Rouge, Louisiana, for airport purposes. This provision does not apply to the portion of the property, conveyed by that deed, that is not specified in subsection (f).

(b) In place of the terms, conditions, reservations, and restrictions release under subsection (a), the following conditions shall apply:

(1) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall submit all proposals, policies, and plans for further construction, other development, or changed operating practices (including, but not limited to, policies affecting the size and kind of the inmate population), at East Baton Rouge Parish Prison, to the Secretary for review of airport safety and security prior to such construction, other development, or changed operating practices.

(2) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall construct, develop, operate, and maintain the East Baton Rouge Parish Prison in accordance with proposals, policies, and plans submitted to, and approved by, the Secretary with respect to airport safety and security.

(3) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall construct, develop, operate and maintain the East Baton Rouge Parish Prison in compliance with applicable Federal, State, and local laws.

(4) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall hold the United States harmless for damage or injury to persons or property, in flight or on the ground, caused by any inmate who has escaped from the East Baton Rouge Parish Prison, or caused by any event occurring at the prison.

(c) Within ninety days after the enactment of this provision, the City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall demonstrate, to the satisfaction of the Secretary, that the current operating conditions at the East Baton Rouge Parish Prison meet acceptable levels of airport safety and security.

(d) Any action determined by the Secretary to be necessary to achieve acceptable levels of airport safety or security at the prison shall be accomplished by the City of Baton Rouge and Parish of East Baton Rouge, Louisiana, as soon as practicable. Such determinations are "orders" for the purpose of judicial review under section 1006 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486).

(e) The opinion of the Secretary concerning the airport safety and security implications of any current or proposed conditions involving the prison shall be conclusive as to those matters.

(f) Subsection (a) applies to the following described area:

One certain lot or parcel of ground together with all the buildings and improvements thereon located in the Parish of East Baton Rouge, State of Louisiana and shown by reference to the following two maps:

1. A map entitled "Airport Boundary Maps showing Ryan Airport Property Owned by the Parish of East Baton Rouge, Louisiana, Compiled from Official Records and Maps" prepared by the Department of Public Works in and for the City of Baton Rouge and the Parish of East Baton Rouge and dated October 13, 1978,

and signed by Mr. Charles W. Hair, Jr., Engineer (said map being hereinafter referred to as Map numbered 1); and

2. A map entitled "Map Showing Boundary and Topographic Survey of East Baton Rouge Parish Prison Site" dated March 6, 1981, and signed by Mr. Henry K. Schott, Engineer (said map being hereinafter referred to as Map numbered 2).

Said property being more particularly described by starting at point "A" on Map numbered 1; thence proceeding north 00 degrees 27 minutes 37 seconds west a distance of 56.44 feet to a point and corner; thence proceeding east 90 degrees 00 minutes 00 seconds east a distance of 60.8 feet to the point of beginning and corner; thence proceed north 0 degrees 27 minutes 37 seconds west a distance of 549.61 feet to a point and corner; thence proceed north 88 degrees 44 minutes 42 seconds east a distance of 185.66 feet to a point and corner; thence proceed north 1 degree 01 minute 51 seconds west a distance of 222.05 feet to a point and corner; thence proceed north 88 degrees 44 minutes 42 seconds east a distance of 1,120.20 feet to a point and corner; thence proceed south 10 degrees 34 minutes 12 seconds west a distance of 816.23 feet to a point and corner; thence proceed south 89 degrees 24 minutes 21 seconds west a distance of 387.66 feet to a point; thence proceed north 70 degrees 37 minutes 59 seconds west a distance of 186.66 feet to a point; thence proceed south 86 degrees 36 minutes 21 seconds west a distance of 712.28 feet to the point of beginning; all of said measurements being more particularly shown on Map numbered 2.】

【SEC. 329. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak Commuter" shall mean, with respect to the period prior to January 1, 1983, "Conrail".】

SEC. 314. *Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: Provided, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.*

SEC. 315. *No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.*

Data for 1981 and 1982 are shown in a merged format to permit comparison of those years with 1983.

1. *Secretarial policy and program development.*—The Secretary has primary responsibility for formulating and recommending domestic and international financial policy, economic policy, and tax policy; managing the public debt; and participating in the formulation of broad fiscal policies that have general significance for the economy.

2. *International affairs.*—The programs conducted within this activity are designed to provide the necessary analysis for and to implement international monetary and development financing policy. Additional staff support is provided in areas concerned with international investment, trade and balance of payments issues.

3. *Departmental policy and administrative services.*—This activity provides central administrative policies and guidance to the entire Department; the direct administrative support required for the Office of the Secretary operations; and computer support and services.

4. *Buildings maintenance and operations.*—This activity provides for maintenance and operation of the main Treasury Building and the Annex, including utilities and custodial and craftsmen services. In addition, this activity provides for all telecommunications facilities and services and the Federal buildings fund payment for all space occupied by the Office of the Secretary outside of the Treasury Building and the Annex.

5. *Repairs and improvements.*—This activity provides the funding for such major repairs and improvements to the Treasury Building and Annex as a fire evacuation/smoke enclosure system and basement floor repairs.

In 1981 and 1982, these activities were funded under the Department of Education.

1. *Maintenance and operations.*—Direct payments are made to school districts when enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. For 1983, the objective is to continue to limit Federal responsibility to districts seriously burdened by nontaxable lands defined as Federal property. Therefore, payments will be made only to districts with children who reside and whose parents work on Federal property or are in the uniformed services (3(a) children). Payments would be made to all such districts at approximately 80% of their 1982 payments. Districts having a partial loss of tax base (section 2) will be funded at \$8.8 million, a level which would require that such payments be prorated.

2. *Disaster assistance.*—Funding is not requested in 1983 for assistance to school districts which have experienced a major disaster since some moneys may still remain available from carryover funds and authority is provided in the basic law to borrow funds from other programs when necessary.

3. *School construction assistance to LEAs.*—Grants are made to school districts for construction of school facilities when enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. No funds are requested in 1983 for these activities.

4. *Program administration.*—This activity provided policy direction and administrative support for the education-related programs in the Department of the Treasury: Impact aid, college housing loans and higher education facilities loans and insurance.

HIGHER EDUCATION FACILITIES LOANS AND INSURANCE*

*See Part III for additional information under the Department of Education.

For the payment of principal and interest on participation certificates as authorized by the Department of Health, Education, and Welfare Appropriation Act, 1968, issued by the Government National

Mortgage Association as trustee on the behalf of the Department of Treasury pursuant to the Federal National Mortgage Association Act (12 U.S.C. 1717(c)), and for the payment of interest expenses to the Department of the Treasury as required by title VII, section 733(b)(2) of the Higher Education Act and for carrying out section 734 of the Higher Education Act, \$45,143,000 to remain available until expended. The Secretary of Treasury is hereby authorized to make such expenditures, within the limits of funds available under this heading, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 849) as may be necessary in carrying out the program set forth in the budget for the current fiscal year. During fiscal year 1983, no new commitments for loans may be made from this account.

Note.—The appropriation for the activities included in this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92 in effect through March 31, 1982).

The Higher education facilities loan program authorizes loans for construction of academic facilities in higher education institutions. Such loans may be made for up to 80% of a project's total development cost and must be repaid within 50 years. In 1983, college construction interest subsidy grants will meet mandatory interest expenses on construction loans approved prior to 1974. No new subsidy grants nor new commitments are anticipated in either 1982 or 1983.

Interest is payable to the Treasury on the cumulative amount of appropriations paid out for loans under this title or available as capital to the funds less the average undisbursed cash balance in the fund during the year. The rate certified by Treasury for payment from the account increased from 11.25% in 1981 to 11.5% in 1982.

The participation certificates outstanding held by this fund were \$165,415,000 at the end of 1981 and are estimated to decrease to \$108,049,000 at the end of 1982 and to remain at that level in 1983.

Insufficiencies appropriations are used to fund the deficit resulting from the interest on participation certificates (sold during 1967 and 1968 to raise capital) and the interest rate received from higher education institutions on facilities loans. The budget authority required for insufficiencies is computed as follows (in thousand of dollars):

1. *Matching funds in primaries.*—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to an amount equal to the contributions each has on or after the beginning of the calendar year immediately preceding the election year.

2. *Nominating conventions of parties.*—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive \$3 million each, plus a cost-of-living increase.

3. *Candidates for general elections.*—The eligible candidates of each major party in a Presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures.

Note.—Amount for 1981 excludes outlays associated with pre-1980 administrative expenses which are shown under the heading "Office of the Secretary, Salaries and Expenses."

The Secretary of the Treasury is authorized to deal in gold and foreign exchange and other instruments of credit and securities as deemed necessary, consistent with U.S. obligations in the International Monetary Fund (IMF), regarding orderly exchange arrangements. An Exchange Stabilization Fund, with a capital of \$200 million is authorized by law for this purpose (31 U.S.C. 822a). All earnings and interest accruing to this fund are available for the purposes thereof. Transactions in

special drawing rights (SDR's) and U.S. holdings of SDR's are administered by the fund. U.S. drawings from the IMF are also advanced to the fund.

The principal sources of the fund's income have been the handling charges imposed on purchases and sales of gold for the account of the fund, profits on foreign exchange transactions, and interest on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

Due to the impracticability of forecasting fund transactions in foreign currency and foreign investment, projections are not provided for those items. However, as an offset to actual data and projections made in the budget for interest paid on U.S. Government securities, data for the interest income on fund holdings of U.S. Government securities is provided for 1981 and projected for 1982 and 1983. Holdings of U.S. Government securities amounted to \$3,130 million on September 30, 1981. The interest earnings on these securities is estimated to increase these holdings to \$3,501 million in 1982 and \$3,912 million in 1983. As required by Public Law 95-612, the fund no longer is used to meet administrative expenses.

¹ Pursuant to the Special Drawing Rights Act of 1968, Special Drawing Rights (SDR) allocated to or otherwise acquired by the United States are resources of the Exchange Stabilization Fund (ESF). SDR, once allocated, are permanent resources unless cancelled (which requires an 85 percent majority decision of the total voting power of the Board of Governors of the International Monetary Fund), the Special Drawing Account is liquidated, the International Monetary Fund is liquidated, or the United States chooses to withdraw from the Fund or terminate its participation in the Special Drawing Account. Except for payment of interest and charges on SDR allocations to the United States, the payment of the Exchange Stabilization Fund

liability related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The Special Drawing Rights Act also authorizes the Secretary of the Treasury to issue Special Drawing Rights certificates to the Federal Reserve Banks in return for dollar deposits in amounts equal to the value of the SDR held. The certificates may be issued to finance the acquisition of SDR from other countries or to provide resources for financing ESF operations.

COLLEGE HOUSING LOANS

Payments of insufficiencies in fiscal year 1983 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), using loan repayments and other income available during fiscal year 1983. No funds from this account shall be used for new loans. During fiscal year 1983, no new commitments for loans may be made from this account.

Note.—The appropriation for the activities included in this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

Note.—In 1981 and 1982, these activities were financed in the Department of Education, Office of Postsecondary Education, College housing loans.

Title IV of the Housing Act of 1950 authorized loans at 3% interest to colleges and eligible hospitals for the construction or acquisition of housing and related facilities such as student centers, dining halls, and infirmaries. No new loans are anticipated in either 1982 or 1983.

Financing.—Funds for the direct loan program have been provided primarily from Treasury borrowing and from the sale of participation certificates which are backed by pools of college housing loans held by the Federal Government. Treasury borrowings totaled \$2,687.3 million as of September 30, 1981.

Sales of participation certificates, as provided in the Participation Sales Act of 1966, totaled \$2.2 billion through 1969, of which \$464.4 million was outstanding as of September 30, 1981. In order to pay the interest on the participation certificates, funds are appropriated annually to match the difference between the interest due on the participation certificates and the interest collections on the college housing bonds underlying the certificates.

Budget authority required for estimated insufficiencies and unfinanced deficits is shown in the following table:

Program operations.—The estimated net operating expense of approximately \$1.6 million in 1983 will increase the cumulative deficit to slightly more than \$170 million.

The excess of income loan repayments over operating expenses will be used to amortize the outstanding debt on participation certificates. The budget provides \$500 thousand to fund loan management, liquidation, and property disposition expenses related to possible loan foreclosure actions in 1982 and 1983.

This trust fund was established by the State and Local Fiscal Assistance Act of 1972 to provide general revenue sharing payments to States and localities to supplement revenue sources. Payments to recipients are made at least quarterly. It is anticipated that the fourth quarter payment for each year will continue to be paid within the first 5 days of the succeeding year, as provided by law.

During 1981, 39,183 units of general purpose government were eligible to receive revenue sharing funds: 3,105 counties, 18,981 municipalities, 16,766 townships, and 331 Indian tribes and Alaskan villages.

In 1982 and 1983 it is anticipated that approximately the same number of units of general-purpose government will be eligible to receive Revenue Sharing funds.

The distribution formulas seek to match payments and local fiscal responsibilities by taking into account each jurisdiction's population, per capita income, and tax effort. Recipients may use the funds for any purposes that are legal purposes for uses of their own locally generated revenues.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Federal Law Enforcement Training Center, including purchase (not to exceed eight for police-type use) and hire of passenger motor vehicles; not to exceed \$60,000 for expenses for student athletic and related activities; participation in firearms matches; repair; and services as authorized by 5 U.S.C. 3109: \$12,913,000.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The Federal Law Enforcement Training Center provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the participating organizations. Center personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center for common and specialized law enforcement training and for research in law enforcement training methods and curriculum content. The 1983 estimate provides for law enforcement training, maintenance and repair of facilities, planning and curricula development for the Center, and operation of living quarters, food service, and travel costs for the students. In addition, the Center has a substantial reimbursable program to accommodate the needs of the participating organizations.

This appropriation provides for the costs of adapting the former Glynco Naval Air Station, near Brunswick, Ga., for the permanent location of the Federal Law Enforcement Training Center. Because of the flexible nature of facilities, the campus-like training center will be able to accommodate in excess of 1,300 resident students. The total estimated cost to this appropriation for the facilities, equipment, and services is \$45.9 million.

1. *Disbursement and claims*—(a) *Payments*.—Payments are made through 11 regional offices for Federal civilian agencies, except the U.S. Postal Service, the U.S. Marshals Service, and certain Government corporations. These disbursing services are provided through the issuance of checks, letters of credit, and electronic funds transfer (EFT) payments. Claims for EFT payments are processed, and Federal Tax Deposit (FTD) forms and envelopes are prepared and mailed.

The total checks, savings bonds, and electronic funds transfer payments, and productivity relating to this function carried out by the Division of Disbursement follow:

WORKLOAD AND PRODUCTIVITY

(In thousands)

	1981 actual	1982 estimate	1983 estimate
Payments	707,104	725,900	737,400
Productivity per employee	638	661	673

(b) *Check claims settlement*.—This function provides for the adjudication and settlement of claims against the United States resulting from situations in which Government checks have been forged, lost, stolen, destroyed, or mutilated. It receives money from banks, endorsers, and other parties having liability to the United States through fraudulent or otherwise improper negotiation of Government checks.

Approximately 50% of the requests for stop payment on Government checks result in actual paid check claims acted upon by the Division of Check Claims.

WORKLOAD AND PRODUCTIVITY

(In thousands)

	1981 actual	1982 estimate	1983 estimate
Claims and related requests processed	1,311	1,393	1,452
Productivity per employee	2.9	3.1	3.9

2. *Governmentwide accounting*.—This activity includes maintaining a system of central accounting and reporting; disclosing the monetary assets and liabilities of the U.S. Treasury; and providing for the integration of Treasury cash and funding operations with the financial operations of disbursing and collecting officers of all Federal agencies. Periodic reports are prepared under this function to show budget results, other financial operations, and the financial status of the Government.

In addition, this function includes the check payment and reconciliation operation with volume and related productivity as follows:

WORKLOAD AND PRODUCTIVITY

(In thousands)

	1981 actual	1982 estimate	1983 estimate
Checks paid and reconciled	656,847	648,500	642,900
Productivity per employee	2,703	2,669	2,646

Under this activity, the Treasury Financial Communications System (TFCS) provides for the management and regulation of Federal funds movement resulting in savings to the Government as a whole as follows:

GOVERNMENT-WIDE USE AND SAVINGS

(In millions of dollars)

	1981 actual	1982 estimate	1983 estimate
Dollar value of messages processed over TFCS	159,000	155,000	170,000
Interest saved by using TFCS	459	467	486

3. *Banking and cash management*—(a) *Cash management*.—This activity segment is involved in the development, implementation, and maintenance of efficient and effective management of the Government's cash resources. It provides guidance to the system for advancing Federal funds under various grant programs and other programs through letters of credit; designates and supervises banks as Government depositaries; controls U.S. foreign currency transactions to afford the best currency availability to the Government; develops applications for the use of electronic funds transfer for Government collections and payments; manages the Direct Deposit Marketing program; and handles claims for the redemption of mutilated currency.

(b) *Federal Reserve bank operations.*—This activity segment provides for reimbursements to the Federal Reserve Banks for maintenance of Treasury tax and loan accounts, and for payment to commercial depositories for the cost of services rendered under the Treasury Tax and Loan Investment Program. Depositories are paid a fair and equitable fee for each unit processed, and the Treasury in turn earns interest on funds held on deposit.

4. *General financial services.*—This activity provides for the payment of international and other claims; administering of loan agreements with those corporations and agencies that have authority to borrow from the Treasury; accounting, billing, and collecting for lend-lease transfers and surplus property sales to foreign governments; administration of the Government Losses in Shipment Act; and fiscal administration of various funds for which the Secretary of the Treasury is responsible.

The Chrysler Corporation Loan Guarantee Act of 1979 authorized the Chrysler Corporation Loan Guarantee Board to guarantee up to \$1.5 billion of Chrysler Corporation debt.

In accordance with the legislation, the board, consisting of the Secretary of the Treasury, the Chairman of the Federal Reserve Board, and the Comptroller General, is responsible for establishing and administering a loan guarantee program for the Chrysler Corporation. These responsibilities include: (1) review of the financing plan to assure its soundness and accuracy, (2) determination of the prospect of repayment of a guaranteed loan, (3) assessment and analysis of the economic merits and implications of the courses of action available under the Act, and (4) preparation of an annual report to Congress on Chrysler's activities.

The Energy Security Act established the U.S. Synthetic Fuels Corporation (SFC) to provide financial assistance for the production of synthetic fuels. Payments are made by the Secretary of the Treasury to the SFC as funds are required to meet the SFC's disbursement needs.

Appropriations are made to the Energy Security Reserve in the Treasury. The authority of the SFC to incur obligations will be limited by the level of appropriations to the Secretary of the Treasury. Of the amounts appropriated in 1980, \$6,212 million will not be available for obligation until June 30, 1982. It is also expected that \$2.4 billion will be transferred from the Department of Energy's alternative fuel program in 1982.

This fund is for use by the U.S. Treasury in making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorsers of the checks through reclamation procedure by this office. Benefits from these early settle-

ments are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

The fishermen's protective fund was created to reimburse owners of vessels for amounts of fines, fees and other direct charges which were paid by owners to a foreign country to secure the release of their vessels and crews.

Public Law 95-194 provided for loans to be made to owners of fishing vessels under certain conditions when it is claimed that fishing gear may have been lost or damaged by actions of foreign nations. This loan function was subsequently cancelled by Public Law 95-376, which provides for direct compensation to owners of vessels in such instances.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency*.—Total deliveries of currency for 1982 and 1983 are estimated to be 4.2 and 4.2 billion notes. During 1981 the Bureau delivered 4.0 billion Federal Reserve notes.

(b) *Stamps*.—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1982 and 1983 are 27.2 and 27.5 billion stamps, respectively. In 1981, the Bureau delivered 36.1 billion stamps.

(c) *Securities*.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

(d) *Commissions, certificates, etc.*—This program represents a small portion of the Bureau's total workload.

2. *Space utilized by other agencies*.—Charges are made to other agencies for services provided for space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services*.—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656 which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 1981 resulted in an accumulated retained earnings of \$20.9 million.

This appropriation provides for overall planning and direction of the Internal Revenue Service, for management of the Service's support programs, for legal counsel and assistance, for development of tax forms, instructions, and guides, and for internal audit and internal security.

1. *Executive direction.*—This activity sets policies and goals, provides the research and planning necessary for sound and effective tax administration, and provides leadership and direction in the execution of all plans.

2. *Internal audit and security.*—This activity independently reviews Service programs to ensure that they are functioning effectively and efficiently, that appropriated funds are spent only for authorized purposes, and that proper controls exist to safeguard tax revenues. It also conducts background and criminal misconduct investigations to maintain public confidence in the integrity of the Internal Revenue Service.

3. *Management services.*—This activity provides servicewide policy guidance for managing the human, logistical, and financial resources needed to fulfill the Service's tax administration mission in a cost-effective manner while complying with relevant public laws and administrative procedures.

4. *Legal services.*—This activity comprises the legal counsel and legal assistance necessary for the Service to administer and enforce the internal revenue laws.

5. *Technical rulings and services.*—This activity develops tax return forms, instructions, and guides; issues

rulings and opinions as to application of the tax laws; and meets with taxpayer groups to review and resolve special tax problems.

This appropriation provides for processing tax returns and related documents, and maintaining accurate, current taxpayer accounts by means of an automated system. It also provides for taxpayer assistance and for statistical reporting responsibilities of the Internal Revenue Service.

1. *Data processing operations.*—This activity provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of those payments, processing and accounting for revenue collections and Federal Tax Deposits (FTD's), and verification through an automated master file system of the accuracy of information provided by the taxpayer. It provides for payment of refunds, offset of refunds against delinquent accounts,

issuance of notices that payments are overdue, identification of possible nonfilers for investigation, and assistance in the selection of tax returns for audit.

2. *Statistical reporting.*—This activity prepares statistical information, based on tax return data, on income and on various features of the tax system, performs other statistical research, and forecasts the number of tax returns to be filed by type, size, and geographical area.

3. *Taxpayer service.*—This activity aids voluntary compliance with Federal tax laws on the part of all taxpayers by informing them of their responsibilities and by providing service which will assist them in meeting their obligations. It also protects the confidentiality of tax returns and return information and the taxpayers' rights to privacy, while administering various disclosure provisions.

This appropriation provides for the examination of tax returns and the administrative settlement of taxpayer appeals of examination findings. Funds are requested for 1983 to continue the Service's ability to assure evenhanded application and adequate enforcement of the tax laws and to maintain a satisfactory rate of voluntary compliance with the internal revenue laws.

1. *Examinations.*—This activity encourages voluntary compliance with the internal revenue laws through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers.

2. *Appeals.*—This activity provides for an independent administrative review of contested assessments or tax adjustments proposed by the examination program.

INVESTIGATIONS AND COLLECTIONS*

*See Part III for additional information.

For necessary expenses of the Internal Revenue Service for investigation and enforcement activities, including purchase (not to exceed one hundred and eighty-nine for replacement only, for police-type use) and hire of passenger motor vehicles (31 U.S.C. 638a(a)), securing unfiled tax returns, collecting unpaid accounts, employee plans, exempt organizations, and services as authorized by 5 U.S.C. 3109, at such rates as may be determined by the Commissioner: \$717,744,000. (Title 26, United States Code.)

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

This appropriation provides for enforcing statutes relating to detection and investigation of criminal violations of the internal revenue laws, collecting unpaid accounts, securing unfiled tax returns and payments, monitoring employee pension plans, determining qualifications of organizations seeking tax exempt status, and examining tax returns of exempt organizations.

1. *Tax fraud investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of internal revenue laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

2. *Collection.*—This activity has the responsibility for collecting unpaid accounts and securing delinquent returns; developing and implementing programs to prevent accounts from becoming delinquent and preventing nonfiling; and determining and analyzing the reasons for and the types of nonfiling.

3. *Employee plans and exempt organizations.*—This activity monitors private pension plans to insure compliance with the Employee Retirement Income Security Act of 1974, determines whether organizations seeking tax-exempt status meet certain tests to qualify, and examines tax returns of those organizations to insure compliance with such an exemption. It also examines the returns of private foundations to insure payment of proper excise taxes.

PAYMENT WHERE ENERGY CREDIT EXCEEDS LIABILITY FOR TAX

For necessary expenses to carry out the energy credit provisions of the Energy Tax Act of 1978 (Public Law 96-618), \$300,000.

Note.—The appropriation for this account for 1982 had not been enacted at the time this budget was prepared. The 1982 amounts shown below are based upon a continuing resolution (Public Law 97-92) in effect through March 31, 1982.

The Energy Tax Act of 1978 authorized a solar-wind business energy credit beginning October 1, 1978. There will be instances where a solar-wind business credit will exceed the amount of tax liability owed on the return resulting in either an offset to another tax liability of the filer or a refund. This account provides for those funds which are required to cover the offsets (to other liabilities) or make payments to businesses when solar-wind credits exceed the tax liabilities owed as provided by Public Law 95-618.

Public Law 96-223 repealed the refundable credit for solar or wind property for taxable years beginning after December 31, 1979. Funds will be required through 1985 to cover offsets or make payments resulting from amended returns filed, the examination of returns filed, and other returns filed for the years covered by the statute.

As provided by law, there will be instances wherein the earned income tax credit will exceed the amount of tax liability owed, resulting in an additional payment to the tax filer. The Earned Income Credit was originally authorized by the Revenue Adjustment Act of 1975 (Public Law 94-164) and made permanent by the Revenue Adjustment Act of 1978 (Public Law 95-600).

Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections which must be refunded. Since enactment of the Economic Recovery Tax Act, the rate of interest changes every other year to reflect the prime interest rate then in effect. A 20% rate will be in effect after February 1, 1982.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.
