The Southwestern Power Administration (SWPA), operates as a marketing agent to dispose of hydroelectric power and energy produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,660 miles of high voltage transmission lines, 30 sub-and switching stations, and 20 radio and microwave stations and sells its power at wholesale primarily to publicly- and cooperatively-owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Southwestern Power Administration is also responsible for scheduling and dispatching power, negotiation of power sales contracts, and construction of facilities required to upgrade the established system to meet changing customer load requirements.

1. *System operation and maintenance.*—Provision is made for investigation and planning of proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Provision is also made for maintaining the power transmission system and related facilities in accordance with acceptable standards to assure reliable service to the interconnected customers. Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Estimated proprietary receipts which are deposited in the Treasury are \$62,378,000 in 1982 and are estimated to be \$77,309,000 in 1983, and \$91,008,000 in 1984.

2. *Purchase power and wheeling.*—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

3. *Construction.*—The construction program provides transmission, substation and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place at the time these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the gross expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly net expendi-

The Western Area Power Administration (Western) markets power in 15 western States from generating projects of the Bureau of Reclamation, Corps of Engineers and the International Boundary and Water Commission's powerplant in Texas. Western operates and maintains about 16,000 miles of high-voltage transmission lines and over 200 associated substation/switchyards and constructs transmission facilities including new transmission lines, substations and essential additions and modifications to existing facilities.

Western sells power at wholesale to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

1. *Systems operation and maintenance.*—A total of 13 power systems will be operated and maintained to market power produced principally by the Bureau of Reclamation and Corps of Engineers. Additionally, revenue will be available from Boulder Canyon project operations in Navajo generating plant for payment of Western's power marketing and transmission expenses.

Western will continue to participate in conservation and renewable resources programs in 1984.

Commercial power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal government agencies, and private utilities. Receipts are deposited in the Reclamation fund, the General fund, the Colorado River Dam fund, and the Lower Colorado River Basin Development fund.

Energy sales and revenues resulting from these Western power systems operations excluding the Colorado River Storage project, the Navajo generating plant, and the Central Arizona project are as follows:

	1982 actual	1983 est.	1984 est.
Energy sales (millions of kilowatt hours).....	25,749	26,520	28,254
Revenue from energy sales (in thousands of dollars).....	243,793	290,435	374,393

2. Purchase of power and wheeling.—The program includes \$68,000,000 in 1984 for purchase of power, wheeling, and fuel conservation expenses, excluding credits for net billing. The establishment in 1961 of a net billing procedure for certain of these power transactions between Federal Government and non-Federal utilities precludes the need for an additional \$14,402,000 in 1984.

System construction.—Construction of transmission facilities is necessary to maintain system reliability and for marketing of electric power produced from generating plants of others. Funding is provided in 1984 for system interties, joint construction of 345-kV additions in Western Colorado, replacement of deteriorated wood poles and damaged wood or steel structures, reconditioning and upgrading transmission lines to increase system capacity and reliability, construction of operation and maintenance control and dispatch facilities and for system security additions. Engineering studies will continue on Western's transmission systems.

Reimbursable program.—This program involves services provided by Western to others under various types of reimbursable arrangements. In 1984, the reimbursable program primarily provides for construction and operation and maintenance services by Western for the Bureau of Reclamation and Bureau of Indian Affairs.

EMERGENCY FUND, WESTERN AREA POWER ADMINISTRATION

For the "Emergency Fund", as authorized by the Act of June 16, 1948 (43 U.S.C. 502), to remain available until expended for the purposes specified in that Act, \$500,000, on a continuing basis to be recovered from the Reclamation Fund against receipts for the transmission and sale of electric power and energy which are deposited into the Treasury through Western Area Power Administration which shall be available for transfer to the Western Emergency Fund: Provided, That expenditures from the Western Emergency Fund shall be replenished from project power revenues for which funds were expended on an emergency basis.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

This fund is used to insure continuous operation of power systems due to equipment or other physical failure, or damage due to acts of God, flood, drought, strikes, embargoes or other conditions which might cause interruption in service. In 1984, Western will continue replenishment of funding on a continuous basis from power revenues. This allows for more timely, cost-effective emergency repair work of damaged power facilities and ensures continuity of electrical service.

Western's operation and maintenance and power marketing expenses for the Colorado River storage project, the Colorado River Basin project, and the Fort Peck project will be financed from power revenues collected by Western.

Western operates and maintains approximately 3,000 miles of transmission lines and over 40 substations associated with these projects. Wholesale power is provided to utilities over the interconnected high-voltage transmission systems. Long-term contracts provide for periodic rate adjustments to ensure that the Administration recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Following are energy sales and revenues from power operations associated with the Colorado River storage project and the Colorado River Basin project. The revenue from the Fort Peck project is integrated with Pick-Sloan Missouri Basin project revenue and is included in the construction, rehabilitation, operation and maintenance account.

Revenue from energy sales (in thousands of dollars)	148,079	163,120	171,534

1. *Colorado River storage project.*—Western markets power and operates and maintains the power transmission facilities of units of the Colorado River storage project and the Seedskaadee participating project. Provision is made for payment for purchase of electricity and wheeling fees to meet contractual obligations and fuel conservation.

2. *Colorado River Basin project.*—The 1984 program provides for Western's power marketing and operation and maintenance expenses for the Navajo project participation agreement and Central Arizona project. Financing will be from project power revenue.

3. *Fort Peck project.*—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities, and Western operates and maintains the transmission system and performs power marketing functions. Funding is provided in 1984 for continuation of reconstruction and realignment of the Fort Peck-Harve 161-kV transmission line in Montana.

NOTES

Excludes \$28,309 thousand in 1984 for activities transferred to Energy Supply, Research and Development. Comparable amounts for 1982 (\$44,585 thousand) and in 1983 (\$44,585 thousand) are included above.

Excludes \$575 thousand in 1984 for activities transferred to General Science and Research. Comparable amounts for 1982 (\$575 thousand) and in 1983 (\$575 thousand) are included above.

Excludes \$28,123 thousand in 1984 for activities transferred to Atomic Energy Defense Activities. Comparable amounts for 1982 (\$23,602 thousand) and in 1983 (\$23,602 thousand) are included above.

Departmental administration.—This account includes funds for a wide array of policy development and analysis activities, institutional and public liaison functions, and other program support requirements necessary to insure effective operation and management. Specific activities provided for are:

1. **Policy, planning and analysis.**—The Office of Policy, Planning and Analysis identifies major energy policy issues and develops an agenda for their resolution. It creates a foundation for better energy policy and programs through improved analysis and evaluation, and institutionalizes the process of policy guidance and program development and review.

2. **International affairs.**—This program supports the formulation of international energy policy, analyses and assessments of the current world energy situation, and international cooperation in energy matters.

3. **Management and administration.**—Salaries, travel, contracts, capital equipment, and other costs associated with the management and support functions are carried under this activity.

4. **Congressional, intergovernmental and public affairs.**—This office manages and ensures coordination of relations with the Congress, news media, State, territorial, tribal and local government officials, other Federal agencies, consumer/citizen and business organizations, and the general public. It supports program offices and provides policy and guidance to ensure consistency in program activities with the constituent groups mentioned above. They also provide oversight on relations between Federal energy activities and all external groups and entities, excluding international.

5. **Operations offices.**—The operations offices perform a wide variety of functions in support of energy activities throughout the country. Among these functions are field procurement, engineering and construction management, health and safety monitoring, property management, labor relations and maintenance of personnel and financial systems.

6. **General Counsel.**—This office is responsible for providing adequate legal opinions, advice and services with respect to all energy activities except for those functions belonging exclusively to the Federal Energy Regulatory Commission, which is served by its own General Counsel. Its responsibilities more specifically entail the provision of legal opinion, advice and services to administrative and program offices, and the conduct of both administrative and judicial litigation, as well as legal advice and support for enforcement activities. Further, the General Counsel appears before State and Federal agencies in defense of national energy policies and activities. The office is responsible for the coordination and clearance of proposed legislation affecting energy activities and testimony before Congress. The General Counsel is also responsible for oversight of intelligence

activities; assuring consistency and legal sufficiency of all energy regulations; administering and monitoring standards of conduct requirements; and conducting the Patents program.

7. **Inspector General.**—The responsibilities of this office are to supervise, coordinate, and provide policy direction for audit and investigative activities relating to the promotion of economy and efficiency in the administration or the prevention or detection of fraud or abuse in programs and operations.

8. **Office of the Secretary.**—This office directs and supervises the staff and provides policy guidance to line and staff organizations in the accomplishment of agency objectives.

9. **Board of Contract Appeals.**—This office hears and resolves contractual disputes arising from the Administration's financial assistance programs, including guaranteed loans, loan agreements, grants and cooperative agreements.

10. **Office of Minority Economic Impact.**—The Office is responsible for: (1) determining the effects of energy programs, policies and regulations on minorities; (2) providing management and technical assistance to minority educational institutions and minority business enterprises to enable them to participate in research, development, demonstration and contract activities; (3) providing financial loan assistance to minority business enterprises; (4) advising the Secretary of the effects of energy activities on minorities. The Office also is responsible for the White House Initiatives on Historically Black Colleges and Universities and for the Minority Bank deposit program.

11. **Other departmental administration.**—This activity covers cost of work for others and miscellaneous revenues. Cost of work for others is work performed under orders placed with the agency by other organizations. Revenues derived under this activity offset the requested appropriation.

12. **Power marketing coordination.**—Salaries and expenses necessary to provide headquarters administrative support to the power marketing administrations.

GENERAL PROVISIONS [DEPARTMENT OF ENERGY] ENERGY ACTIVITIES

Sec. 101. Appropriations for energy activities presently funded in the Department of Energy under this title for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms;

and reimbursement to the General Services Administration for security guard services. From these appropriations, transfers of sums may be made to other agencies of the United States Government for the performance of work for which this appropriation is made. None of the funds made available to Energy Activities presently funded in the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriation Act. The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign.

SEC. 102. Not to exceed 10 per centum of any appropriations made available for the current fiscal year for the Department of Energy activities funded in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 10 per centum by any such transfers, and any such proposed transfers shall be submitted promptly to the Committees on Appropriations of the House and Senate.

SEC. 103. The unexpended balances of prior appropriations provided for activities covered in this title may be transferred to appropriation accounts for such activities established pursuant to this title. Balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 104. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 105. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 106. Any statutory provisions requiring the maintenance of a specified number of full-time permanent Federal employees, or prohibiting actions to reduce employment levels, or otherwise establishing requirements for personnel levels of Energy Activities presently funded in the Department of Energy or any of its offices or programs or activities, are repealed.

SEC. 107. None of the funds in Energy Activities shall be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in Energy Activities.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

Includes \$118 thousand in 1984 for activities previously financed from Veterans Administration, Supply fund. Amounts for 1982 (\$118 thousand) and 1983 (\$118 thousand) are excluded above.

Includes \$3,450 thousand for 1984 for activities previously financed from Department of Health and Human Services, Food and Drug Administration, Buildings and facilities.

The activities financed in Standard level user charges in 1983 are presented in these schedules and are proposed to be financed in this account in 1984. Budget authority and outlays are distributed by account above.

The Food and Drug Administration (FDA) is charged with the administration and enforcement of laws concerning dangerous, misbranded, and adulterated foods, drugs, human biologics, medical devices, cosmetics, and manmade sources of radiation.

1. *Foods.*—FDA reviews industry petitions and publishes tolerances for the safe use of food additives, conducts research, develops analytical methods to detect and prevent food and cosmetic adulteration, sets standards for classes of food and defines good manufacturing and sanitary practices. FDA also inspects food and cosmetic processing plants and marketing establishments, analyzes collected samples to verify that these products are safe and properly labeled and—when necessary—takes regulatory action to obtain compliance with the law.

2. *Drugs and devices.*—FDA reviews research and manufacturing data to support the safety and efficacy of drugs and devices prior to marketing, evaluates literature and experience reports submitted by industry and the medical profession, and conducts research. FDA also inspects manufacturing firms, reviews labeling, analyzes samples, and—when necessary—takes regulatory action to enforce the legal requirements.

3. *Radiological products.*—FDA is responsible for eliminating unnecessary exposure to electronic product radiation through research, surveillance, and performance standards.

4. *National Center for Toxicological Research.*—FDA conducts research programs to study the biological effects of potentially toxic chemical substances found in man's environment.

5. *Program management.*—This activity supports executive and administrative functions.

6. *Buildings and facilities.*—This activity provides for construction and renovation of facilities.

ADMINISTRATIVE PROVISIONS, INDIAN HEALTH [SERVICES
ADMINISTRATION]

Appropriations in this Act for Indian Health [to the Health Services Administration, available for salaries and expenses,] shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities: *Provided*, That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriations Acts: *Provided further*, That non-Indian patients may be extended health care at the Talihina Hospital in Talihina, Oklahoma, and the Zuni-Ramah Indian Health Service Unit in Zuni, New Mexico, if such care can be extended without impairing the ability of the Indian Health Service to fulfill its responsibility to provide health care to Indians served by such facilities and subject to such reasonable charges as the Secretary of Health and Human Services shall prescribe, the proceeds of which shall be deposited in the fund established by sections 401 and 402 of the Indian Health Care Improvement Act: *Provided further*, That funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation: *Provided further*, That notwithstanding current regulations, eligibility for Indian Health Services shall be extended to non-Indians in only two situations: (1) a non-Indian woman pregnant with an eligible Indian's child for the duration of her pregnancy through postpartum, and (2) non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard. 2299 U.S. contingent liability for guaranteed loans outstanding, end of year 1,041,508 1,011,408 980,508

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and guaranteed loans for private, nonprofit facilities.

Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

Funding of \$32 million is requested for this account to cover interest subsidy obligations in 1984. About \$1.2 billion in direct and guaranteed loans will be outstanding in 1984.

Public enterprise funds—Continued

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE
FUND—Continued

This is a public enterprise revolving fund. Direct loans will be sold to the Federal Financing Bank to provide funds for new loans and loans thus sold will be guaranteed. In 1975, \$35 million was appropriated to the Health Services Administration as capital for the revolving fund.

In 1983, 8 new loans will be awarded requiring disbursements of \$8.0 million. Previous loan commitments will require disbursements of \$16.5 million in 1983. In 1984 no new loans will be made—only previous loan commitments of \$12.4 million will require disbursements.

GRANTS TO STATES FOR MEDICAID

For carrying out, except as otherwise provided, title XIX of the Social Security Act, **[\$19,361,845,000] \$15,631,978,000** (in addition to the \$5,105,600,000 previously appropriated), to remain available until expended **[.]**: *Provided, That (except in the case of inpatients in skilled nursing and intermediate care facilities and mental hospitals) section 1902(a)(14) State plans are required to require charges for services described in paragraph (1) of section 1905(a) of that Act of \$1 per day for all individuals receiving medical assistance under the State plan pursuant to section 1902(a)(10)(A) of that Act, and \$2 per day for all other individuals receiving medical assistance under the State plan, and for services described in paragraphs (2), (5), and (9) of section 1905(a) of that Act for individuals in those two groups of \$1 per visit and \$1.50 per visit respectively.*

For making, after **[June 30] May 31** [of the current fiscal year], 1984, payments to States under title XIX of the Social Security Act, for the last **[three months of the current fiscal year] quarter of fiscal year 1984** for unanticipated costs, incurred for the current fiscal year, **[such sums as may be necessary,] not to exceed \$3,000,000,000**, the obligations **[incurred]** and the expenditures **[made thereunder for payments under such title]** to be charged to the subsequent appropriations **[therefor]** for the current or succeeding fiscal year.

[In the administration of title XIX of the Social Security Act, payments to a State under such title for any quarter in the period beginning July 1 of the prior year and ending September 30 of the current year may be made with respect to a State plan approved under such title prior to or during such period. After a plan or plan amendment is approved, payment may be made with respect to it for the quarter in which it was submitted or any subsequent quarter in which it remains in effect.] Payment under that title may be made for any quarter beginning after June 30, 1983, and before October 1, 1984, with respect to any State plan or plan amendment in effect during any such quarter, if submitted in, or prior to, such quarter and approved in that or any such subsequent quarter.

[Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year.]

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year **[1984] 1985**, **[\$5,105,600,000] \$5,552,000,000** to remain available until expended. (Public Law 97-377, making further continuing appropriations for the fiscal year 1983; Legislative action required.)

1. *Medicaid vendor payments.*—The purpose of the medicaid program, which became effective January 1966, is to assist States in providing medical care to their low-income population. Federal matching payments for medical assistance under title XIX of the Social Security Act (medicaid) are authorized for States having plans approved by the Department of Health and Human Services. The 1984 appropriation request reflects the impact of legislative proposals to be effective October 1, 1983. These proposals, such as mandatory copayments and the impact of medicare and AFDC proposals, will save \$293.3 million in 1984.

2. *State and local administration.*—Federal matching funds are provided for personnel and related costs for the State and local administration of the medicaid program. Efforts to assist States to improve administration are a major thrust of the Department of Health and Human Services.

Payments of \$207 million to the Federal Hospital Insurance Trust Fund are requested as reimbursement for benefits based on noncontributory military service credits of veterans of World War II and certain veterans of the post-World War II period.

An estimated \$16.3 billion will be required in 1984 to finance the Government's subsidy to the Supplementary Medical Insurance Trust Fund.

A Federal subsidy of \$750 million covers the costs of hospital and related care for individuals aged 65 and over who meet certain transitional insured status requirements.

Public Law 97-248 covers civil service employees and annuitants who had worked before 1983 and who are employed during January 1983. A payment of \$42 million covers the cost of services to these individuals.

There are a number of legislative proposals that affect the Federal hospital insurance trust fund outlays. These proposals would:

1. Protect against catastrophic hospital costs and restructure daily copayments for hospital expenses. Reduce copayments for skilled nursing care days;
2. Establish copayments for durable medical equipment purchased through a home health agency;
3. Delay entitlement to benefits to the first month following attainment of age 65;
4. Tighten hospital reimbursement;
5. Eliminate waiver of liability;
6. Eliminate mandatory hospital utilization review;
7. Modify current administrative practices, including changing the basis for processing Medicare hospital claims from the order in which services are provided to the order in which the bills are received, increasing competition in the selection of Medicare contractors, and elimination of ESRD networks.

The supplementary medical insurance program (SMI) affords protection against the costs of physician services and certain other medical services. The program also covers treatment of end-stage renal disease for eligible people who elect to enroll.

SMI costs are financed by premium payments from enrollees and with contributions from the general revenues of the Treasury. The Secretary of Health and Human Services promulgates the standard monthly premium rate to be paid by enrollees. Public Law 97-248 requires the SMI premium for the benefit years beginning July 1, 1983, and 1984, to be set at 25 percent of estimated incurred aged program costs.

The following table shows comparative data for 1982 through 1984 (in thousands) on SMI beneficiaries and benefit payments, classified by type of coverage.

There are a number of legislative proposals which affect the Federal supplementary medical insurance trust fund. These proposals would:

1. Index the Part B deductible to the Medicare economic index.
2. Delay entitlement to benefits to the first day of the first month following attainment of age 65.
3. Establish competitive bidding for laboratory services and durable medical equipment.
4. Freeze physician reimbursements to 1983 rates.
5. Increase competition in the selection of medicare contractors, eliminate ESRD networks, and eliminate the separate carrier for the Railroad Retirement Board.

In addition, the Part B premium would be increased to 25% of program costs on January 1, 1984. It would then increase by two and one-half percentage points per year to reach 35% of program costs by 1988.

SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out the Supplemental Security Income Program under title XVI of the Social Security Act, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the social security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, **[\$8,543,616,000] \$7,851,518,000 to remain available until expended: [Provided, That after July 31, such amounts for benefit payments as may be necessary may be charged to the subsequent year appropriation:] Provided [further], That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury. For making, after July 31 of the current fiscal year, benefit payments to individuals under Title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, not to exceed \$350,000,000, the obligations and expenditures therefor to be charged to the subsequent appropriations for the current or succeeding fiscal year.**

[Sec. 128. No funds provided under this joint resolution shall be used to deny or reduce supplemental security income or aid to families with dependent children benefits because of home energy assistance provided by a private nonprofit organization, or any entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental body, if the appropriate State agency has certified that such assistance was based on need as determined by such organization or entity.]

[Sec. 147. Section 1618 of the Social Security Act is amended by adding the following new subsection:]

["(c) The Secretary shall not find that a State has failed to meet the requirements imposed by paragraph (4) of subsection (a) with respect to the levels of its supplementary payments for any portion of the period July 1, 1980 through June 30, 1981, if the State's expenditures for such payments in that twelve-month period were not less than its expenditures for such payments for the period July 1, 1976 through June 30, 1977 (or, if the State made no supplementary payments in the period July 1, 1976 through June 30, 1977, the expenditures for the first twelve-month period extending from July 1 through June 30 in which the State made such payments)."] (Public Law 97-377, making further continuing appropriations for the fiscal year 1983; Legislative action required.)

Note.—1983 totals reflect 13 months of benefit payments in the Federal benefits activity (Public Law 95-216) for accelerated checks.

Title XVI of the Social Security Act established the Federal supplemental security income (SSI) program for the aged, blind, and disabled. In 1983, the supplemental security income program provided a minimum income of \$284.30 per month for an eligible individual and \$426.40 per month for an eligible couple.

Legislation is proposed for 1984 to improve SSI program administration. As part of the proposed social security reform legislation, SSI benefits would be adjusted for cost-of-living increases when adjustments are made to social security benefits in January 1984. An income disregard of \$30 for social security benefits would be added to the existing income disregards in the SSI program.

ASSISTANCE PAYMENTS PROGRAM—Continued

For making, after May 31 of the current fiscal year, payments to States under titles I, IV—A and —D, X, XIV, and XVI of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, [such sums as may be necessary] not to exceed \$1,000,000,000, the obligations and expenditures to be charged to the subsequent appropriations [therefor] for the current or succeeding fiscal year.

For making payments to States under titles I, IV—A and —D, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year [1984] 1985, [\$1,718,000,000,] \$1,758,454,000 to remain available until expended[.]: *Provided, That States shall require all employable applicants for aid to families with dependent children to engage in the activities specified in section 402(a)(35) of the Social Security Act, and shall require all employable recipients to engage in employment activities such as those described in section 409 of the Act or section 20 of the Food Stamp Act of 1977, as a condition of receiving assistance: Provided further, That States shall specify a portion of any standard applicable to a household as an allowance for shelter and utilities costs and prorate the allowance when determining eligibility and making payments with respect to a household that includes nonrecipients: Provided further, That in calculating the eligibility of and benefits for a family, States shall include the needs and income of all parents and minor children (except those receiving supplemental security income) living with the dependent child, and shall exclude the needs of an employable caretaker relative with no dependent child under age sixteen: Provided further, That no State shall be entitled, for fiscal year 1984, to reimbursement, from amounts appropriated under this or any other Act, in excess of the amount resulting from applying the rate prescribed by section 403(a)(3)(C) of that Act with respect to expenditures under section 402(a)(19) or 445(f) of that Act: Provided further, That the Secretary of Health and Human Services shall transfer to the Secretary of Agriculture for payment to States for administrative costs in connection with certification of AFDC households under the Food Stamp Act of 1977, such amounts as may be agreed upon between them. (Public Law 97-377, making further continuing appropriations for the fiscal year 1983; legislative action required.)*

This appropriation makes grants to States for the Federal share of State expenditures for aid to families with dependent children (AFDC) and related activities.

1. *Maintenance assistance.*—Aid to families with dependent children and related programs provide funds for needy persons. Selected program statistics are shown below.

2. *Research and evaluation.*—Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the assistance payments, old age, survivors and disability insurance and supplemental security income programs.

3. *Administrative expenses.*—The administrative costs budgeted for the assistance payments program provide for Federal direction of the various grant programs that provide maintenance assistance to the needy.

The budget estimates for 1984 include savings from legislation that will be proposed to continue to reform AFDC as a temporary assistance for those who are unable to provide for themselves and create new opportunities for work and work experience. These reforms are estimated to save Federal funds totaling \$.7 billion in 1984.

CHILD SUPPORT ENFORCEMENT

For carrying out, except as otherwise provided, titles IV-D and XI of the Social Security Act, **[\$347,500,000]** **\$298,463,000** (in addition to the **\$118,000,000** already appropriated) to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under title IV-D of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, [such sums as may be necessary] not to exceed **\$100,000,000**, the obligations and the expenditures to be charged to the subsequent appropriations [therefor] for the current or succeeding fiscal year.

For making payments to States under title IV-D of the Social Security Act for the first quarter of fiscal year 1984 **5**, **[\$118,000,000]** **\$102,750,000** to remain available until expended **1**. Provided, That each State's total entitlement under title IV-D of the Social Security Act shall be the amount obtained by multiplying the percentage used to determine the Federal share of aid to families with dependent children under title IV-A of the Act by the net amount, if any, by which the State's total administrative costs under title IV-D exceed the portion of collections on behalf of AFDC recipients not paid to the family, and that portion shall be applied by the State to meet its administrative costs, or if that portion of AFDC collections not paid to the family exceeds total administrative costs, the State shall apply that portion to meet its administrative costs and share the excess with the Federal Government in the same proportion as it shares the cost of aid to families with dependent children: Provided further, That the Secretary shall pay appropriate bonuses, from the Federal share of net collections as well as from this appropriation, to States which he determines operate exemplary programs: Provide further, That for fiscal year 1984 each State shall be entitled to not less than three quarters of the amount that would be payable under section 455, 457, and 458 of the Act, as in effect for September 1982: Provided further, That as a condition of an approved State plan under title IV-D of the Act, a State shall seek medical support for children for whom it is seeking financial support when available at a reasonable cost through employer-subsidized health insurance, and shall utilize the following effective collection techniques: mandatory wage assignment and liens against property and estates when child support payments are delinquent, offsets against State income tax funds, and quasijudicial or administrative procedures to establish and enforce support orders. (Public Law 97-377, making further continuing appropriations for the fiscal year 1983; legislative action required.)

proving paternity, establishing child support obligations and enforcing their collection.

Child support payments made by absent parents on behalf of recipients of Aid to Families with Dependent Children (AFDC) go to the State or local child support enforcement agency for distribution. The Federal share of the child support collections is deducted from Federal payments to States for AFDC. These collections appear as an offset in the Assistance Payments appropriation.

1. *State and local administrative costs.*—Federal grants for State and local administration of the program are made to States having approved plans.

2. *Research and evaluation.*—Projects are supported to improve State and local program administration.

3. *Federal administrative costs.*—The Federal Office of Child Support Enforcement provides services to State and local governments designed to increase collections.

4. *Reimbursable administrative costs.*—The Office of Child Support Enforcement operates the Federal Parent Locator Service. The Kidnapping Prevention Act of 1980 (Public Law 96-611) authorizes States to use the service to locate parents who have taken their children from the custody of the other parent without court permission.

The budget estimate for 1984 includes savings from proposed legislation to restructure the Child Support Enforcement program to improve cost effectiveness and efficiency of State operations. Total Federal savings from this proposal are estimated to be \$10 million. An additional \$56 million in savings from other proposed improvements in child support operations are reflected in the Assistance Payments appropriation as increased collections from absent parents.

This program makes grants to States and Indian tribes to aid low-income households with high energy costs through payments to eligible households, energy suppliers, and building operators. In an effort to more precisely direct these grants to low-income heating needs, legislation is being proposed to direct funds to States with severe climates and large low-income population.

1. *Refugee assistance.*—This program helps refugees become independent, self sufficient members of American society. Services include cash and medical assistance, English and vocational training, educational assistance, and health screening. States are reimbursed for administering the refugee assistance program.

2. *Cuban/Haitian entrant assistance.*—This program reimburses States for cash/medical assistance and social services to entrants. The reception and processing component has been transferred to the Department of Justice.

3. *Refugee and entrant assistance.*—The 1984 budget consolidates assistance to refugees and entrants not categorically eligible for AFDC, Medicaid, and General Assistance into a per capita grant to States. Categorical assistance will be continued in its current form.

¹Under current law, including \$17,518,600 borrowed from the D1 and H1 trust funds through December 31, 1982, projected obligations will exceed available resources by \$8,681,075 thousand in 1983 and \$28,398,042 thousand in 1984. Legislation based on recommendations of the National Commission on Social Security Reform is proposed to solve this problem and is reflected in the succeeding schedules.

Direct program.—The old-age and survivors insurance (OASI) program provides income to retired workers, their dependents, and survivors. The program is financed by payroll taxes paid by employers, employees, and self-employed individuals.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was \$29,700 in 1981, \$32,400 in 1982, \$35,700 in 1983, and is expected to increase to \$37,800 in 1984.

1. **Benefit payments.**—Benefits are based on average taxable earnings, indexed for inflation.

2. **Administration.**—This activity reflects the costs of administering this program.

3. **Payment to railroad retirement account.**—Since 1951, \$18 billion in annual payments from the OASI trust fund have helped finance the rail industry pension fund. The annual OASI payment includes funds for some benefits which are not, in turn, paid to railroad workers and their families.

Reimbursable program.—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs and certain other services administered by SSA with full reimbursement to the trust fund (including interest when appropriate).

The National Commission on Social Security Reform has recommended the bipartisan legislative package reflected above to ensure the current and long-term financial solvency of the Old Age and Survivors Insurance, and Disability Insurance Trust Funds. The bipartisan solution, which has the support of the president, the speaker of the House, and the Senate majority leader, would provide sufficient budgetary resources to assure timely payment of all OASI benefits.

The disability insurance (DI) program protects individuals and families by providing income to insured disabled workers (and their dependents). This program is financed by payroll taxes paid by workers, employers, and self-employed individuals.

1. *Benefit payments.*—Disability insurance benefits are made to certain disabled individuals and their dependents:

Automatic cost-of-living benefit increases are the same as for the OASI program.

2. *Administration.*—This activity reflects administrative and other nonbenefit expenses attributable to the DI program.

3. *Payment to railroad retirement account.*—Annual adjustments are made between the DI trust fund and the railroad retirement fund. This adjustment is computed on the same basis as the payment from the OASI trust fund which is described in the preceding section.

The work incentive (WIN) program was designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program of employment, training, and support services. Training was administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures have been federally matched at the rate of 90%. In 1984, separate WIN funding will be unnecessary. Under the President's 1984 budget proposals, AFDC applicants and recipients will be required to participate in job search and other employment-related activity as a condition of AFDC eligibility. Funding for administrative costs will be provided by the Department of Health and Human Services under the AFDC program's regular 50 percent matching rules. In addition, States can use Social Services Block Grant re-

SEC. [207] 206. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed \$2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. 207. *No funds appropriated for the fiscal year ending September 30, 1984, by this or any other Act, may be used to pay basic pay, special pays, basic allowance for subsistence and basic allowances for quarters of the commissioned corps of the Public Health Service described in section 204 of title 42, United States Code at a level that exceeds 110% of the Executive Level I annual rate of basic pay. (Public Law 97-377, making further continuing appropriations for the fiscal year 1983.)*

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and thrift insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the Department's activities, as set forth below:

1. *Housing programs* cover the Department's major housing subsidy programs. The mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities, are also included under this heading. Other activities included under this heading are community disposal operations and liquidating programs, the Office of Interstate Land Sales Registration and manufactured home inspection and monitoring.

2. *Government National Mortgage Association (GNMA)* covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

3. *Community planning and development* covers the Community development grant and Urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This organization is responsible for the Urban homesteading program as well as the closeout of projects under the Planning assistance grant (section 701) program, Rehabilitation loan (section 312) program, and other terminated categorical community development programs.

4. *Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Other major divisions within the Department include the New Community Development Corporation; Fair Housing and Equal Opportunity; and Departmental Management.

Day-to-day administration, processing, and funding decisions for programs of the Department of Housing and Urban Development are carried out in field offices located within the geographical boundaries of 10 regional offices.

The subsidized housing programs schedule reflects both budget authority to enter into contracts for subsidized housing and an appropriation for payments required to liquidate contracts under the separate programs as described below.

Total reservations in 1984 are estimated at \$7,965.9 million which will be utilized primarily to fund about 204,441 subsidized housing units along with funds for the comprehensive improvement assistance program and amendments. New budget authority of \$514.7 million combined with the estimated \$4,346.3 million recovery of annual contribution reservations from prior years together with \$23.8 million in permanent authority is sufficient to meet these reservations. The recovery of \$2,395 million of rent supplement budget authority will be sufficient to meet \$20.4 million of rent supplement amendment needs and to allow a rescission of \$2,375 million. An appropriation of \$10,697.0 million is proposed for 1984 to liquidate contractual obligations made under the various subsidized housing programs as follows:

1. *Lower income housing (section 8).*—For 1984, the budget proposes a major reform to the basic section 8 program. All subsidies for new construction or substantial rehabilitation will be discontinued except for 10,000 units financed under the section 202 loan program. All other activity in 1984 will be directed toward existing housing and will make use of a revised, more cost-effective subsidy mechanism. The new subsidy will be based on the concept of providing housing payment certificates to eligible low income households which will permit them to find safe, decent housing in the private market. While the subsidy will be based on the difference between an established rent payment standard for each market and a fixed percentage of family income, tenants will be given much greater freedom to determine how much of their income they actually spend to obtain standard housing.

In addition, program administration will be much less complex under the housing payment certificate approach and the actual subsidy costs will also be lower. A total of 120,340 units are expected to be reserved under the section 8 housing payment certificate program in 1984—including 30,000 units for use in connection with the proposed Rental Rehabilitation Grants program (discussed later in this chapter), 50,000 incremental units and 40,340 units that are currently receiving some other form of HUD subsidy and which will be converted to the program. A total of 204,441 units will receive subsidy commitments under section 8 in 1984.

2. *Public housing.*—Under this program, local housing agencies have engaged in the development and operation of projects designed for occupancy by low-income households. Subsidies were provided under this program to cover the cost of financing the development, acquisition, leasing, and/or modernization of these projects. Additional subsidies are also available to cover

SUBSIDIZED HOUSING PROGRAMS—Continued

HOUSING PAYMENTS—Continued

operating deficits of these projects (see Payments for the Operation of Low-Income Housing Projects discussed below). No new development activity is planned for this program in 1984 because of the development of a more cost-effective substitute, the section 8 housing payment certificate program.

The 1984 Budget also proposes to reform the way in which funds are provided for the modernization and operation of Low-Income Housing Projects. These two programs will ultimately be combined under a unitary funding system. However, in 1984, \$1.4 billion transitional funding will be provided for public housing modernization.

3. *Rent supplement.*—Rent supplement payments are made to owners of certain private housing on behalf of qualified low-income tenants. In 1984, the Department will make reservations to convert 56,100 rent supplement units in insured projects to section 8. Amounts to be recaptured from these conversions will be used to provide amendments for certain rent supplement units in insured projects under contract in 1984. The balance of the amounts recaptured from the conversions, \$2.375 billion in budget authority in 1984, will be rescinded. Budget authority for all conversions will be made available from a deferral of \$3.1 billion of 1983 annual contributions budget authority.

4. *Homeownership and rental housing assistance (sections 235 and 236).*—For 1984, no new activity is planned under the section 235 program, which provides homeownership subsidies for lower income families.

The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 rental housing assistance program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants.

This Act also authorizes additional rental assistance payments to assist low income tenants in projects assisted under section 236. In 1983, the Department will convert 5,000 rental assistance payment units in insured projects to section 8; the remaining 8,000 units in insured projects will be converted in 1984. Amounts to be recaptured from these conversions will be used to provide amendments for certain rental assistance payment units in insured projects under contracts in 1983 and 1984. The balance of the amounts recaptured from the conversions, \$381 million in budget authority in 1983 and \$483 million in budget authority in 1984, will be rescinded.

College housing grants.—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

INDIAN HOUSING GRANTS

For grants to carry out the Indian housing grant program, \$76,000,000, to be available upon the enactment of authorizing legislation and to remain available until September 30, 1985. (Additional authorizing legislation to be proposed.)

Legislation will be proposed in 1984 for a new Indian housing program which will provide for greater Tribal autonomy and flexibility in developing both housing and attendant infrastructure systems such as water and sewer facilities as well as to promote private investment on reservations. The new proposal represents a three-pronged approach to the problem of developing housing on Indian reservations. It involves FHA mortgage insurance mortgage insurance, grants to assist in the development and financing of housing and water and sewer facilities, and housing payment certificates to reduce housing costs for eligible low-income Indian families. The proposed system represents a departure from the present public and Indian housing programs and will supplant the current mode of providing Indian housing which relies on coordinating the efforts of the Departments of Housing and Urban Development, Health and Human Services, and Interior.

The proposed program would provide eligible Indian tribes, as the administering agency, with the flexibility to use funds provided as "front-end write downs" to reduce housing development costs; for 15-year housing payment certificates attached to the unit constructed to assist lower income families in leasing rental units from the Tribe; and for grants to provide water and sewer facilities for the newly constructed housing.

In addition, legislation will be proposed to facilitate private investment in housing on reservations by making FHA insurance available notwithstanding restrictions, such as those on marketability of title.

The program is designed to assist both lower income and higher income Indian families and may complement Indian-related activities under the Community development block grant program.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS*

Payments are provided to assist public housing agencies (PHAs) to meet certain deficits in the operation of PHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD.

For 1984, the operating subsidy estimates reflect increased tenant payments, improvements in the energy efficiency of public housing projects, and the implementation of a new method of determining operating subsidy requirements based on local fair market rents.

TROUBLED PROJECTS OPERATING SUBSIDY

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

Funding is provided for essential repairs to correct deficiencies resulting from deferred maintenance. No appropriation is requested for 1984. However, an estimated carryover balance of \$8 million, together with an estimated \$30 million from the Rental Housing Assistance Fund, will be used to provide \$38 million in financial assistance to approximately 110 projects.

This demonstration program is testing whether contracting directly with local public housing agencies and section 202 housing for the elderly or handicapped sponsors to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social services programs. Congregate services can include meal services and essential supportive services. These three- to five-year contracts commenced in 1980 and will be evaluated over the life of the contracts. No additional resources are requested for 1984 since current funds are sufficient to evaluate the relative efficiency of this HUD approach.

Pursuant to the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, inspections and investigations are conducted to enforce Federal manufactured home construction and performance standards. Manufactured home producers are required to have their building plans approved by an agency acceptable to HUD prior to manufacture. Appropriated funds that were enacted to initiate the Mobile Home Standards Program are estimated to be disbursed fully by the end of 1983.

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Housing and Community Development Amendments of 1979 and the Housing and Community Development Act of 1980, authorizes a program to establish and enforce appropriate construction standards for the construction, design and performance of manufactured homes to assure their quality, durability and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. These fees are deposited in a special fund administered by the Department.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100

or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, not exceeding \$1,000, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and help finance the administrative expenses incurred in program operations. The balance of the administrative expenses is included under the Department's Salaries and expenses account.

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), [\$240,022,000] \$252,974,000, to remain available until expended.

During [1983] 1984, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During [1983] 1984, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed \$39,800,000,000 of loan principal.

During fiscal year [1983] 1984, gross obligations for direct loans of not to exceed [\$45,000,000] \$56,390,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved.

[For an additional amount for commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, \$6,100,000,000: *Provided*, That section 207(c)(3), the second proviso of section 213(b)(2), section 220(d)(3)(B)(iii), section 221(d)(3)(ii), section 221(d)(4)(ii), section 231(c)(2) and section 234(e)(3) of the National Housing Act are each amended by inserting "(by not to exceed 140 per centum where the Secretary determines that a mortgage other than one purchased or to be purchased under section 305 of this Act by the Government National Mortgage Association in implementing its special assistance functions is involved)" after "90 per centum".] (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1983; Public Law 97-377, making further continuing appropriations for the fiscal year 1983.*)

The FHA Fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

The Mutual mortgage insurance fund provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The Cooperative management housing insurance fund, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

The General insurance fund provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The Special risk insurance fund provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged to the appropriate insurance fund by the mortgage insurance program. During 1984, it is estimated that applications for single-family and multifamily mortgage insurance covering 817,000 units will be received and that mortgage insurance will be written covering 640,874 single-family and multifamily units. In addition, it is estimated that approximately 35,636 single-family and multifamily units will be acquired by the Department during 1984 and that 35,854 single-family and multifamily units will be sold. More detailed activity information follows in the "Program Highlights" table shown below.

Insurance reserves from operations reflect the interest earned on multifamily mortgage notes and the income and expenses applicable to acquired properties.

Insurance reserves from operations at the end of 1984 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about \$5.5 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1984 is as follows:

STATUS OF INSURANCE RESERVES FROM OPERATIONS

(In millions of dollars)

	1982 actual	1983 estimate	1984 estimate
Insurance fund:			
Mutual mortgage	3,087	3,372	3,879
Cooperative management housing	34	35	38
General	-2,453	-2,501	-2,533
Special risk	-2,647	-2,808	-2,974
Total FHA Fund	-1,979	-1,902	-1,590

As a result of the continued deficits in the FHA Fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include faster foreclosures of properties in default and faster sales of acquired properties to reduce holding costs.

In 1982, the Department initiated the sale of purchase-money mortgages and assigned mortgage notes. Sales are expected to generate \$245 million of proceeds in 1983 and \$264 million in 1984.

For 1983, a new Temporary mortgage assistance payments program is being implemented that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This new program is viewed as a viable alternative to the home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the FHA Fund.

Budget program.—The budget proposes an appropriation of \$253 million to restore the net realized losses from the sale of property and notes covered by the General insurance and Special risk insurance funds.

Financing.—In 1982, \$16.1 million of debentures were issued and \$113 million were redeemed. There was \$70 million borrowed and \$105 million repaid from the Treasury in 1982. It is estimated that a net of \$230

million will be repaid to the Treasury in 1983 and \$275 million will be repaid in 1984.

Operating expenses.—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA Fund.

The low-rent public housing loan fund provides Federal financing for the construction, acquisition, or modernization of public housing projects owned by public housing agencies (PHAs) until the projects can be financed through the Federal Financing Bank (FFB) or through the sale of long-term tax-exempt bonds to the public. Payments to liquidate the indebtedness of the PHAs are provided from the Housing payments appropriation (in the Subsidized housing programs account) to liquidate contract authority under existing Annual Contributions Contracts. When selling obligations to the FFB, additional payments are required to cover the differential between selling tax-exempt bonds to the public and selling bonds to the FFB at a taxable interest rate. These payments are authorized under section 16 of the Federal Financing Bank Act of 1973 (Public Law 93-224). Additional funding to support financing through the FFB is not being requested. Starting in 1983, taxable bonds will be sold directly to the public. The status of loan approvals, reflecting permanent financing, follows:

(a) *Direct loans.* Direct Federal loans are made to finance the early costs for both the development and

modernization of projects. These loans are made from available working capital in this fund and from up to \$1.5 billion of borrowings from the Treasury.

(b) *Private loans.* When direct Federal loans to a PHA accumulate to an amount that is attractive to private investors, the PHA then sells short-term tax-exempt notes to the public and uses the proceeds to repay the direct Federal loans and to meet needs for additional financing to develop and modernize projects. These temporary notes are issued for short periods and may be revised to provide needed funds to develop and modernize projects. The status of temporary financing follows:

(c) *Bonds.* Prior to 1974, projects were permanently financed through the sale of long-term bonds to the public. No bonds have been sold to the public since 1974. After that date, financing of projects was made through the sale of short-term notes to the public. Beginning in 1980, long-term instruments were sold to the Federal Financing Bank. During 1983, the Department plans to resume the sale of long-term bonds to the public.

Operating results.—The estimated net operating income of \$11.7 million in 1984 will increase retained income to \$117.1 million. Retained income may be required to meet program requirements in future years.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

In [1983, \$453,000,000] 1984, \$476,000,000 of direct loan obligations may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), utilizing the resources of the fund authorized by subsection (a)(4) of such section, in accordance with paragraph (C) of such subsection: *Provided*, That such commitments shall be available only to qualified nonprofit sponsors for the purpose of providing 100 per centum loans for the development of housing for the elderly or handicapped, with any cash equity or other financial commitments imposed as a condition of loan approval to be returned to the sponsor if sustaining occupancy is achieved in a reasonable period of time: *Provided further*, That the full amount shall be available for permanent financing (including construction financing) for housing projects for the elderly or handicapped: *Provided further*, That the Secretary may borrow from the Secretary of the Treasury in such

amounts as are necessary to provide the loans authorized herein: *Provided further*, That, notwithstanding any other provision of law, the receipts and disbursements of the aforesaid fund shall be included in the totals of the Budget of the United States Government. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1983.*)

For an additional amount for direct loan obligations for "Housing for the Elderly or Handicapped Fund" under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), \$181,200,000: *Provided*, That Title I of the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1983 (Public Law 97-272) is amended by striking out the period at the end of the paragraph under the heading "Housing for the Elderly or Handicapped Fund", and inserting in lieu thereof the following: *Provided further*, That, notwithstanding section 202(a)(3) of such Act, loans made in fiscal year 1983 shall bear an interest rate which does not exceed 9.25 per centum, including the allowance adequate in the judgment of the Secretary to cover administrative costs and probable losses under the program." (*Public Law 97-377, making further continuing appropriations for the fiscal year 1983.*)

The Housing for the elderly or handicapped fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. For 1984, a \$476 million loan limitation is proposed which will provide financing for approximately 10,000 units. Starting in 1983, the Department will begin selling portfolio loans with the provision that the outstanding principal balances will be eligible for repurchase at the expiration of the section 8 contract.

Financing.—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, up to 80%, but not to exceed \$50,000, of the start-up costs are funded through these "seed money" loans. Sponsors are required to demonstrate their finan-

cial capacity by providing 20 percent from their own funds which is repaid from the initial proceeds of the section 202 construction loan.

The proposed program level for 1984 will be funded from available balances and loan repayments and will finance 47 direct loans for selected projects that receive permanent financing under the Section 202 Housing for the elderly or handicapped program.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program. Prior to that time, collections were used for the payment of tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

As a result of an agreement reached in October, 1978 in settlement of a lawsuit brought against the Department, funds were set aside for rent refunds. It is expected that about \$8 million of accrued interest from the funds set aside will be available in 1983 for transfer to the Troubled projects operating subsidy account.

¹ Amount shown is not a new loan disbursement; it represents a proposed transfer of outstanding balances from the New communities fund.

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development

programs. The section 312 rehabilitation loan program is proposed for termination in 1984. Assets and liabilities of that fund and the New communities fund are proposed for transfer to the Revolving fund (liquidating programs) in 1984 and have been reflected in this account.

Financing.—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

The fund is authorized to make loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

SPECIAL ASSISTANCE FUNCTIONS FUND

During 1983, within the resources and authority available, gross obligations for the principal amounts of direct loans made pursuant to section 305 of the National Housing Act, as amended (12 U.S.C. 1720), shall not exceed \$500,000,000, which may be financed with collections received in 1983, and additional obligations are authorized in such amounts as are necessary for increases to prior year commitments. *The Secretary shall transfer all assets and liabilities of the fund established pursuant to section 305 of the National Housing Act, as amended (12 U.S.C. 1720), to the management and liquidating functions fund established pursuant to section 306 of the Housing Act of 1954, as amended (12 U.S.C. 1721): Provided, That this transfer shall be made only upon the enactment of legislation repealing section 305. (Public Law 93-377, making further continuing appropriations for the fiscal year 1983.)*

¹ Represents losses on sales of loan assets.

Special assistance functions.—The Association is authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans.

Funds are currently available to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is administered with the use of processing facilities of the Federal National Mortgage Association.

Budget program.—Commitment contracts amounting to \$500 million for section 8 and targeted tandem were provided under the continuing resolution for 1983. Mortgage purchases, representing deliveries from commitment contracts in prior years, are estimated at \$2.1 billion in 1983 and \$2.0 billion in 1984, and sales of these mortgages are estimated at \$2.0 billion in 1983 and \$2.0 billion in 1984. No new commitments are planned for 1984. The Department proposes to request forgiveness of Treasury borrowing in 1984 and future years. The assets and liabilities of the revolving fund will be transferred to the Management and liquidating fund for liquidation.

¹ These transactions will be handled in the Management and liquidating functions fund.

Financing.—Funds for mortgage purchases are obtained from principal liquidations through either repayments on portfolio mortgages or sale of tandem purchases, and borrowing from the Treasury. A portion of the mortgage portfolio was financed by sale of participation certificates. This amounted to \$1.2 billion in prior years and there will be a remaining liability of \$246.4 million offset by \$77.9 million on deposit with the trustee in anticipation of scheduled retirements in 1984. Funds for operating costs, mainly interest expense and discounts required on tandem mortgage sales, are obtained from mortgage earnings and from appropriations for the difference between interest expense on participation certificates and the income from related mortgage investment earnings.

Operating results.—Through September 30, 1982, losses of \$80.9 million for participation sales have been offset by appropriations. Other losses from below-market interest rate loans, tandem costs, interest on Treasury borrowings and asset sales amounted to \$4,955.4 million. Of this amount, \$4,874.4 million is carried as an impairment of capital.

The special assistance functions are expected to result in losses estimated at \$1,395.3 million in 1983.

Appropriations for insufficiencies under the participation sales fund will cover \$1.9 million of 1983 losses.

The following table shows the derivation and financing of the interest insufficiencies on outstanding participation certificates:

Emergency mortgage purchase assistance.—The Emergency Home Purchase Assistance Act of 1974 added Section 313 to the National Housing Act, authorizing standby authority to purchase mortgages. This authorization expired at the end of 1981.

Budget program.—The last release of commitments to purchase mortgages took place in September, 1976, when \$2.0 billion of authority was released for the purchase of multifamily housing project mortgages. Activity since that time has been limited to increases to existing contracts. It is not anticipated that any new commitments will be made through 1984; however, amendments to existing contracts are estimated to total \$1 million in 1983. Outstanding purchase commitments will continue to be honored, and purchases will amount to \$13.8 million in 1983. In 1984, a program of forgiveness of Treasury borrowings will begin in order to retire Treasury borrowings outstanding. The fund will be liquidated by the transfer of all assets and liabilities to the Management and liquidating funds account.

Financing.—Funds are obtained from Treasury borrowings, mortgage principal liquidations, and mortgage interest payments.

Operating results.—Losses are estimated at \$441 million in 1983 primarily from the differences in prices paid to purchase the below-market interest mortgages and the prices that are obtainable when such mortgages are sold at market yields.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand, or purchased under contracts made before November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

Budget program.—Legislation will be proposed to transfer in 1984 the assets and liabilities of the special assistance functions and emergency mortgage purchase assistance funds to the management and liquidating functions fund for liquidation. Treasury debt under these funds is proposed for forgiveness beginning in 1984.

Financing.—These functions are financed principally by Treasury borrowings, portfolio liquidations, and, in the sales of portfolio mortgages and participation certificates in mortgage pools.

Operating results.—Net income of \$9.7 million is estimated for 1983 with a net loss of \$757.3 million for 1984. Cumulative retained earnings reserved for insufficiencies and other losses and contingencies is estimated at \$1,083.8 million for 1984.

Financing.—In addition to an application fee, guarantee fees and other charges are assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee.

In 1983, the commitment fee charged issuers of mortgage-backed securities was revised. The fee was \$500 for each commitment requested. The new fee will be \$500 for commitment amounts up to \$1.5 million and an additional \$200 for each \$1.0 million increment. In addition, all new issuers will be required to pay a one-time fee of \$250 in addition to the commitment fee.

Operating results.—Fee collections and other income are expected to exceed expenses by \$185.7 million in

1984. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title V of the Energy Security Act of 1980 authorized the creation of the Solar Energy and Energy Conservation Bank for the purpose of encouraging energy conservation and the use of solar energy by providing funds to subsidize loans and grants for the installation of energy conservation and solar energy improvements in single and multi-family residences, and agricultural and commercial buildings.

The Bank has invited States to submit innovative proposals for utilization of the funds in conjunction with ongoing State energy conservation or solar energy programs. The administration intends to expend all of the 1982 appropriation, as directed by a court order, as well as a portion of the 1983 appropriation.

The Administration is proposing a supplemental transfer appropriation of unobligated balances, estimated at \$11,000,000, to the Low-income home energy assistance program in the Department of Health and Human Services (HHS). The purpose of the Low-income home energy assistance program is similar to the Solar Bank's program. The Administration believes that the provision of energy conservation assistance can be carried out more effectively through the operation of only the HHS program. Part III of this volume reflects this transfer.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States for the funding of local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between entitlement cities and urban counties and small communities. Legislation is being proposed requiring that States assume responsibility for implementation of grants to small communities in 1984. Presently, State administration is optional.

Guaranteed loans.—Guaranteed loan assistance under section 108 has been provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses. No guarantee commitments are proposed for 1984.

Budget program.—An appropriation of \$3,500 million is proposed for 1984. Outlays are estimated at \$3,525 million in 1983 and \$3,526 million in 1984.

In addition, legislation is being proposed which would authorize new housing construction as an eligible activity under this program. Also, the budget is proposing to increase the level of block grant assistance to Indian tribes. The expanded Indian program may complement assistance under the proposed "Indian Housing" grants program.

URBAN DEVELOPMENT ACTION GRANTS

Title I of the Housing and Community Development Act of 1974, as amended, authorizes grants to distressed cities and distressed urban counties for the funding of economic development projects.

In 1984, the budget proposes an appropriation of \$196.0 million which, together with an estimated \$244.0 million of unobligated funds deferred from 1983 and \$36.0 million of recaptured funds, will result in 1984 obligations of \$476.0 million.

URBAN HOMESTEADING

Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties, without payment, to units of local government for use in an urban homesteading program. In addition, the Act authorizes the Administrator of the Veterans Administration and the Secretary of Agriculture to transfer their unoccupied, single-family properties for use in such programs.

Budget program.—An appropriation of \$12 million is proposed for 1984. Of this amount \$9 million will support an estimated 818 single-family properties, at an average value of \$11,000, that will be conveyed to local governments. Also within this appropriation, \$3 million will be used to support a proposed multifamily homesteading program. The multifamily program was initially proposed in the 1983 budget and will be implemented as soon as authorizing legislation permits. Funds not required for the transfer of multifamily properties

The budget proposes a rental rehabilitation grants program to be implemented in 1984. Under this grant program, assistance will be provided to States and cities to enable the rehabilitation of rental properties. This new program—which will be used in conjunction with the proposed housing payments certificate program—will replace the more costly and less effective section 312 rehabilitation loan and section 8 moderate rehabilitation programs. An appropriation of \$150 million will support the rehabilitation of an estimated 30,000 units.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the Community

development block grant program, authorized by the 1974 act.

No new budget authority is required for the program. However, a permanent indefinite appropriation to liquidate prior unfunded contract authority is available. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

Budget program.—Grants are distributed to new community developers under section 718 to supplement public facility projects in existing new communities. Public Law 96-7, dated April 9, 1979, rescinded all budget authority not administratively committed. Any amounts recovered subsequent to that date will be rescinded automatically. All remaining commitments are estimated to be disbursed by the end of 1983.

¹ Represents cumulative value of bonds redeemed and paid off prior to 1982.

² Amount shown does not represent a repayment; it is the outstanding balance proposed for transfer to the Revolving fund (liquidating programs) in 1984.

The Housing and Urban Development Act of 1968, as amended, and title VII of the Housing and Urban Development Act of 1970, as amended, authorized Federal assistance to private and public new community developers. The program has provided for Federal guarantee of the obligations issued on behalf of new community developers.

The budget proposes termination of title IV of the HUD Act of 1968 and title VII of the HUD Act of 1970 and forgiveness of the New communities fund's debt to the U.S. Treasury in 1984. The assets and liabilities of the New communities fund are proposed for transfer to the Revolving fund (liquidating programs) in 1984.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out internally and through contracts with industry, nonprofit research organizations, educational institutions and through agreements with State and local governments and other Federal agencies.

In 1984 studies to improve the Department's programs continue as the highest priority. Particular areas include:

- Assisted housing programs.
- Tax policies and housing; alternative housing finance mechanisms; financial and institution regulation reform.
- Affordable housing.
- Better means of management of communities and the delivery of local government services.
- Neighborhood preservation.
- Enterprise zones, regulatory and tax relief, public finance grant and tax policy; studies of urban change and the formulation of urban policy.
- Issues of fair and nondiscriminatory housing.

The Joint grants management fund is used for the administration of integrated grant administration projects for which HUD is the lead agency. Obligations are on the basis of project approvals by Federal regional councils and fund commitments by participating agencies. Advance payments from participating agencies are received in the fund and utilized to finance the administration of the projects. The activity in 1983 and 1984 will depend on requests for assistance and the extent to which agreements are reached with other Federal agencies.

This fund is the repository of gifts and bequests which the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. The provision of section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

TITLE IV—GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; or to payments to interagency motor pools where separately set forth in the budget schedules.]

SEC. [402] 401. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development, the *Consumer Product Safety Commission*, and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. [403] 402. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. [404] 403. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [405] 404. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. [406] 405. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under

title 5, United States Code, section 101, is exempted from such limitations.

SEC. [407] 406. *None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the Government: Provided, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.*

SEC. [408] 407. *None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.*

[SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations without the approval of the Committees on Appropriations.]

SEC. [410] 408. *None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).*

SEC. [411] 409. *Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.*

SEC. [412] 410. *Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared*

pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

[SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

[SEC. 414. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.]

SEC. [415] 411. *None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.*

[SEC. 416. (a)(1) Notwithstanding the directive of the Senate Office Building Commission of March 19, 1982, and notwithstanding any other provision of law, the Architect of the Capitol shall cease the obligation, commitment, or expenditure of any unallotted construction contingency funds (identified during the construction of the Hart Senate Office Building) for the purpose of completing the construction of the physical fitness facility in the Hart Senate Office Building.]

[(2) The Architect of the Capitol is authorized to obligate and expend from the construction contingency funds for the Hart Senate Office Building amounts which are prohibited to be obligated, committed, or expended by the first paragraph of this subsection for such other necessary expenses relating to the completion of the Hart Senate Office Building as the Architect of the Capitol deems necessary.]

[(b) No funds may be expended for the operation of the physical fitness facility in the Dirksen Senate Office Building after the date of enactment of this Act.]

DEPARTMENT OF THE INTERIOR

LAND AND WATER RESOURCES

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is currently responsible for the conservation, management and development of 310 million acres of public lands, including 135 million acres in Alaska. Of these, 60 million acres in Alaska will ultimately be conveyed to other parties (Alaska Natives, the State of Alaska, and other agencies). The Bureau also has full responsibility for mineral leasing and supervising of mining on the public lands and on 370 million acres of mineral estate underlying other ownerships.

1. **Energy and minerals management.**—The 1984 program provides for issuing onshore oil and gas leases, including leasing on the National Petroleum Reserve in Alaska, geothermal leases, holding five competitive regional coal lease sales, and implementing a tar sands prototype leasing program and permanent oil shale leasing program. Various nonenergy minerals activities are also administered. By Secretarial Order No. 3087, of December 3, 1982, the Secretary transferred from the Minerals Management Service (MMS) to BLM all responsibilities for mineral resource evaluation, regulation and lease supervision for onshore Federal minerals. This transfer consolidated all onshore minerals management functions previously divided between BLM and MMS (and its predecessor—the Conservation Division of USGS) into one organization. This consolidation will permit the BLM to obtain management efficiencies and improve service to the public by having one organization down to the basic field unit responsible for all pre-lease and post-lease minerals management activities, including permits, inspection and compliance and by integrating multiple-use land management planning for both surface and subsurface resources of the public lands. The 1984 budget includes \$32,220,000 for functions previously conducted by MMS.

2. **Lands and realty management.**—Land and realty actions include processing rights-of-way applications for energy-related development; processing land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act; processing nonenergy-related lands and realty cases; review of public land withdrawals, revocation of withdrawals and new withdrawal processing; and accelerated sale of lands under certain criteria as part of the Administration's Asset Management program.

3. *Renewable resource management.*—Includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, protection, preservation and sustained yield management of the natural resources on the public lands.

4. *Planning and data management.*—Includes such activities as data analysis, development of land use plans, and automated data management.

5. *Cadastral survey.*—Provides for identification of land boundaries and legal property descriptions to facilitate land management programs.

6. *Firefighting and rehabilitation.*—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires.

7. *Technical services.*—Provides for enforcement of laws and regulations governing the management, use, and protection of public lands.

This activity also provides engineering services including survey and design, development of specifications, contract administration, construction cost estimating, maintenance scheduling, transportation system management, facility evaluation, sign shop operation, and maintenance for buildings, roads, and trails.

8. *General administration.*—Includes executive management, equal employment opportunity programs, and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, and dismantlement of temporary structures [insurance on official motor vehicles, aircraft, and boats operated by the Bureau of Land Management in Canada] and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to \$10,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the United States Bureau of Land Management; miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$10,000: *Provided*, That appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed to the General Fund of the Treasury from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund

designated the "Oregon and California land grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended on a reimbursable basis for surveys of Federal lands of the United States and [on a reimbursable basis,] for protection of lands for the State of Alaska: *Provided further*, That the Secretary of the Interior shall develop criteria for extending, on a case-by-case basis, the period allowed for phased livestock reductions on public rangelands administered through the Bureau of Land Management up to five years. Such criteria shall take into account available agricultural assistance programs, the magnitude of projected livestock reductions, alternative pasturage available, and ability of such public rangelands to sustain such phasing in of livestock reductions without damage to rangeland productivity: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within thirty days after receipt of a final grazing allotment decision or ninety days after the effective date of this Act in the case of reductions ordered during 1979, whichever occurs later. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secretary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within two years after the appeal is filed []: *Provided further*, That appropriations herein made shall be available for paying costs incidental to the utilization of services contributed by individuals who serve without compensation as volunteers in aid of work of the Bureau to protect, improve, develop, or manage the public lands, and that within appropriations herein provided, Bureau officials may authorize either direct procurement of or reimbursement for expenses incidental to the effective use of volunteers such as, but not limited to, training, transportation, lodging, subsistence, equipment and supplies: *Provided further*, That provision for such expenses or services is in accord with volunteer or cooperative agreements made with such individuals, private organizations, educational institutions, or State or local governments. (Public Law 97-394, making appropriations for the Department of the Interior and Related Agencies, 1983.)

OREGON AND CALIFORNIA GRANT LANDS

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands; [\$56,963,000] \$49,136,000, to remain available until expended: *Provided*, That the amount provided herein for the purposes of this appropriation on lands administered by the Forest Service shall be transferred to the Forest Service, Department of Agriculture: *Provided further*, That the amount appropriated herein for road construction on lands other than those administered by the Forest Service shall be transferred to the Federal Highway Administration, Department of Transportation: *Provided further*, That twenty-five per centum of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California land grant fund and shall be transferred to the General Fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876). (16 U.S.C. 583, 594; 43 U.S.C. 2, 1181 a-f; 69 Stat. 374; Public Law 97-394, making appropriations for the Department of the Interior and Related Agencies, 1983.)

The Oregon and California Grant lands appropriation provides for management of 2.6 million acres of re-vested railroad and wagon road lands for permanent forest production under the principle of sustained yield. Funds are provided for activities on O. & C. lands managed both by the BLM and the Forest Service in western Oregon.

1. *Construction and acquisition.*—Provides for the acquisition of 30 road easements to commercial timber areas. No construction projects are planned in 1984.

2. *Maintenance.*—Provides for maintenance of access roads, operation and maintenance of recreation facilities, and maintenance of management facilities.

3. *Renewable resource management.*—Provides for reforestation, stand improvement, mortality salvage, commercial thinnings, forest genetics, timber management, protection, and other resource management actions on the O. & C. lands. BLM's planned timber sales in 1984 will be 1.1 billion board feet with an estimated value of \$96 million.

4. *Planning and data management.*—Provides for preparation and updating of Bureau planning system documents and for automated data processing costs.

The appropriation is derived from receipts from grazing of livestock on public lands, and grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive orders. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i, 1701). Under a new policy begun in 1982 and to be phased in over a three-year period, rangeland improvement funds are used exclusively for on-the-ground development and project survey and design. Responsibility for maintenance of existing and future improvements will be shifted to livestock operators.

Payments from proceeds, sale of water.—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229). Beginning in 1984, BLM will be responsible for these revenues which were previously the responsibility of the Minerals Management Service in 1983 and the Geological Survey in 1982.

1. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

2. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

3. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

4. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

5. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

6. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

7. *Payments to States from grazing receipts, etc., public lands within districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

8. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

9. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands. Starting in 1984, distribution of mineral leasing receipts will be the responsibility of the Minerals Management Service (MMS) and amounts appear in their section of the budget.

10. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

11. *Expenses, road maintenance deposits.*—Public Law 94-579 approved October 21, 1976, permanently appropriated certain monies to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and monies collected are available for necessary road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only. (43 U.S.C. 1701 et. seq.)

12. *Payments to Nevada from receipts on land sales.*—Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada; proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (5%) and the county in which the land is located (10%).

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, derived

from the revenue of the Boulder Canyon project. The 1984 estimates are summarized by source as follows (in thousands of dollars):

Federal Funds

General and special funds:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau as follows:

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U.S.C. 421a-421d), and August 6, 1956, as amended (43 U.S.C. 422a-422k), including expenses necessary for carrying out the program, \$41,500,000, to be derived from the reclamation fund and to remain available until expended: Provided, That during 1984 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$40,332,000: Provided further, That any contract under the Act of July 4, 1955 (69 Stat. 244), as amended, not yet executed by the Secretary, which calls for the making of loans beyond the fiscal year in which the contract is entered into shall be made only on the same conditions as those prescribed in section 12 of the Act of August 4, 1939 (53 Stat. 1187, 1197).

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

Under the Small Reclamation Projects Act (43 U.S.C. 422a), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided to continue construction on eleven projects for improving existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and purchasing maintenance equipment.

Under the Distribution Systems Loans Act, loans can be made to organizations for the construction of irrigation and municipal or industrial water distribution systems on authorized Federal reclamation projects. Work will continue on three projects in 1984.

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects, to remain available until expended, \$31,831,000, of which \$31,361,000 shall be derived from the reclamation fund and of which \$470,000 shall be available for the termination of activities conducted pursuant to the Act of October 17, 1978, as amended (42 U.S.C. 7801, et seq). Any costs of an advance planning study of a proposed project shall be considered to be construction costs and to be reimbursable in

accordance with allocation of construction costs upon authorization of construction of such project.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

This appropriation finances studies of potential projects for the conservation and utilization of water and related land resources and includes plan formulation investigations, general engineering and research activities, advance planning work, and water research.

1. *Plan formulation investigations.*—These include 32 project investigations, and 10 special investigations throughout the 17 Western States to formulate resource development plans for river basins or specific projects.

2. *General engineering and research.*—Studies are directed toward developing new construction materials, better planning tools, and design and construction tech-

niques. Included are studies of atmospheric water resources to increase precipitation by cloud seeding.

3. *Advance planning.*—This program provides for detailed studies of 5 projects that are viable for implementation but require additional work toward finalizing a definite plan.

4. *Water research.*—Water research activities formerly conducted by the Office of Water Research and Technology (OWRT) have been transferred to the Bureau of Reclamation. The OWRT was dissolved by Secretarial Order on August 25, 1982.

SPECIAL FUNDS—Continued

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed 17 motor vehicles of which 16 shall be for replacement only; payment of claims for damages to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expenses of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiations and administration of interstate compacts without reimbursement or return under the reclamation laws; for service as authorized by 5 U.S.C. 3109, in total not to exceed \$500,000; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriations Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U.S.C. 461-467); Provided, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf

of specific reclamation projects except "General Administrative Expenses" and amounts provided for appraisal and special investigations, and general engineering and research under the head "General Investigations".

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: Provided, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

1. *Habitat resources.*—The Service conducts investigations, provides technical and planning assistance, and

recommends fish and wildlife conservation measures on land and water resource development projects sponsored, licensed or assisted by the Federal Government. Research is conducted to evaluate long-term effects of environmental contaminants on fish and wildlife resources.

2. *Wildlife resources.*—The Service assists in the enhancement and management of the Nation's wildlife resources to assure that their populations are available for the use and enjoyment of the public. The Service maintains the national wildlife refuge system consisting of 414 units, and 28 wetland management districts containing about 88.7 million acres; directs and coordinates national migratory bird programs; enforces Federal game laws and regulations; conducts research to improve wildlife management capabilities; and provides direct and extension assistance in the reduction of wildlife-caused damages.

3. *Fishery resources.*—The Service assists in the development, management, and protection of interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on service lands.

4. *Endangered species.*—The goal of this program is to prevent species from becoming extinct and, wherever possible, to return them to the point where they are neither endangered nor threatened.

5. *General administration.*—This activity provides overall policy formulation, direction, and administration for all matters related to the effective execution of fish and wildlife programs and operations.

1. *Park management.*—The Service administers 333 park areas comprising about 73.7 million acres of federally owned land located in 49 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam and the Northern Marianas. The program includes: (1) overall management of park areas necessary to accommodate an estimated 261 million recreational visitors in 1984; (2) maintenance of buildings and other facilities required to accommodate visitor use, as well as to protect the Government's investment; (3) interpretive programs to enhance the visitors' park experience; (4) law enforcement to protect the visitors' well-being and reduce vandalism and other destruction to park resources; and (5) resource management necessary for the protection and preservation of the unique natural, cultural, and historical features in the National Park System.

The following tabulation shows the actual and estimated visits, and general and special fund revenues collected and to be collected by the National Park Service, including recreation fee revenues deposited to the Land and Water Conservation Fund.

Year:	Recreational Visits	Revenues

1983 estimate	257,362,239	25,830,000
1984 estimate	260,860,000	60,235,000

2. *Natural recreation and preservation programs.*—These programs include maintenance of the National Register of Historic Places, certifications for investment tax credits, management planning of federally owned historic properties, nationwide outdoor recreation planning and assistance, transfer of surplus Federal real property, identification and designation of natural landmarks, environmental reviews, and grant administration.

3. *Forest fire suppression and rehabilitation of burned areas.*—This activity provides for the suppression and emergency presuppression of fires on or endangering lands administered by the Service, and for the rehabilitation of burned areas to conserve resources, and for the protection of park visitors.

4. *Park, recreation, and wilderness planning.*—This activity provides for studies, investigation, and planning programs to support and direct the overall development and management of park areas and to protect and manage park water resources.

5. *Statutory and contractual aid.*—The Service provides financial or other assistance in the planning, development, or operation of certain natural, historical, or recreation areas not operated by the National Park Service.

6. *General administration.*—This activity covers administrative support functions in the Washington and

regional offices, GSA space rental, executive direction, ADP services, payments to the employees' compensation fund, and unemployment payments for former personnel.

This account covers expenditures of funds appropriated in 1981 and prior years for State grants, Federal land acquisition and administrative expenses for the State grant program. In 1983 all appropriated but unexpended balances are transferred to the new appropriation accounts begun in 1982 for these same programs. Proposed legislation would eliminate the earmarking of receipts from recreation fees and surplus property sales to the land and water conservation fund.

The Geological Survey provides basic scientific data and information concerning water, land, and mineral resources.

1. *National mapping, geography, and surveys.*—The national mapping program produces and makes available cartographic and geographic information, multipurpose maps, and various base and special purpose maps, and basic cartographic and geographic data in printed and digital format.

In 1984 the Geological Survey is again proposing to establish a revolving fund for digital cartography that

will finance the digital cartography program as a separate appropriation.

Redirection of funds is being proposed for the federal mineral land information initiative which will provide a computerized data base to answer questions concerning Federal land surface/subsurface ownership data, mineral occurrence, and restrictions data.

The decrease shown for 1984 is related to reductions in intermediate, small-scale and other special mapping, the airborne profiling of terrain system, and the Earth Resources Observation System (EROS). Reductions in the primary quadrangle mapping and revisions programs are to be partially offset by receipts from the sale of map products.

2. *Geologic and mineral resource surveys and mapping.*—The continuing national program of geologic research and investigations produces: (1) improved methods and instruments for mineral and energy resource assessments; (2) geologic, geophysical, and geochemical maps and analyses; (3) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being continually modified; (4) information on geologic hazards such as earthquakes, volcanoes, landslides, and land subsidence and (5) data and analysis for use by other Federal and State agencies in the management of public lands and in national policy determinations.

The 1984 request provides for a redirection of funds to the strategic and critical minerals program to enhance research primarily in the eastern triassic basins and buried basement rocks of the midcontinent; to expand cooperative projects with State geological surveys; and to update computerized strategic mineral information.

Funding for the Bureau of Land Management (BLM) wilderness mineral surveys is being requested as a direct appropriation in 1984. Provisions have been made for the transfer of the National Uranium Resource Evaluation (NURE) data base from the Department of Energy.

Decreased funding for 1984 is related to reductions in geologic hazards surveys, land resource surveys, wilderness mineral surveys, and energy geologic surveys.

3. *Water resources investigations.*—The continuing national program of water resources investigations has the objective of appraising the Nation's water resources and insuring that the water data necessary to develop and manage them efficiently and effectively are available when needed. The program produces data and information on the inability, suitability, and use of water to support decisions on water planning, water management, energy development and enhancement of the quality of the environment.

The 1984 request redirects funds to provide an increase for cooperatively funded hydrologic data collection and analysis, and an expansion of the ongoing program which studies the effects of acid rain on the water, land, and subsurface environment. The toxic waste ground water contamination program expansion will enable establishment of technical criteria to screen for areas suitable for safe disposal of wastes.

Decreases in lower priority programs will occur in the coal and oil shale hydrology programs, water use,

regional aquifer systems analysis, flood hazards analysis, environmental affairs, and supportive services.

4. *Conservation of lands and minerals.*—The funding and staff resources within this activity were transferred to the Minerals Management Service account at the beginning of 1983.

5. *Earth sciences applications.*—This budget activity has been deleted and the functions and related resources have been transferred to other activities in this account.

6. *General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support to the Bureau as a whole. Reductions in 1984 will be made in the senior advisory staff and in general administrative support services.

7. *Facilities.*—This activity finances the operation and maintenance costs, facilities management needs, and related special support services necessary for the operation of the national center headquarters complex and major field centers.

Reimbursements from non-Federal sources are from States and municipalities for cooperative mapping, geologic surveys, and water resources investigations; proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from friendly countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for special-purpose mapping, investigations, and computer services performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed [18] 9 passenger motor vehicles, for replacement only; reimbursement to the General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for observation wells; expenses of the U.S. National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (31 U.S.C. 638(a) and (b); 43 U.S.C. 31, 36(b); 66 Stat. 453; Public Law 97-394, making appropriations for the Department of the Interior and Related Agencies, 1983.)

This program produces and makes available digital data from existing map series in formats suitable for computer-based analysis. Initial areas of coverage are determined on a priority basis to meet the needs of Federal agencies. This program is currently financed by direct appropriation. Legislation will be proposed again to establish a revolving fund that will facilitate the growth of the data base and the services provided. Amounts charged for digital cartographic products will eventually be the primary revenue source for the fund. It is anticipated that appropriations will be required for several years to provide working capital.

The 1984 request includes redirection of a portion of the Orthophotoquad funding in order to accelerate digitizing of the United States land net.

The Minerals Management Service supervises exploration for and development and production of oil, gas, and other minerals on the Outer Continental Shelf (OCS) lands; performs assessments to ensure compliance with the National Environmental Policy Act (NEPA); and collects royalties, rentals, and bonuses due to the Federal Government and Indian lessors from minerals produced on Federal and Indian lands.

1. *Outer Continental Shelf (OCS) Lands.*—The program provides for: (1) performance of environmental assessments to insure compliance with the National Environmental Policy Act (NEPA) and oil spill trajectory analyses to support the leasing program; (2) conduct of lease sales; (3) classification of OCS lands for resource potential for oil, gas, and nonenergy minerals; (4) evaluation of tracts offered for lease by competitive bidding; (5) assurance that the Federal Government receives fair market value for leased lands; (6) regulation and supervision of mineral prospecting, development, and production operations on the OCS lands; (7) development and maintenance of estimates of OCS oil and gas reserves; and (8) provision of information concerning oil and gas activities to affected State and local governments. In

1982, funds for this activity were included in the budgets of the Geological Survey, the Bureau of Land Management, and the Office of the Secretary.

The decrease in 1984 reflects the revised estimates of the rate of acquisition of geological and geophysical data by industry and the completion in 1983 of the development of a system for providing data to the public. These reductions are partially offset by increased funding for enforcement activities.

2. *Federal and Indian Lands.*—In 1982 funds for this activity were included in the budget of the Geological Survey. In 1984 this function and related funding have been transferred to the Bureau of Land Management.

3. *Royalty Management.*—The Royalty Management Program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses owed the Federal Government from minerals produced on Federal, Indian, and allotted lands. The program includes an automated accounting system which ensures that all royalties are properly collected. The program will also provide comparisons of production reported from leases to sales reports, thereby providing an exception mechanism not previously available. Completion of development and implementation of the new Royalty Management fiscal and production accounting systems that were started in 1981 is scheduled to occur in 1984.

In 1982 funds for Royalty Management activities were included in the budget of the Geological Survey. In 1984 all onshore minerals revenue and royalty management responsibilities are consolidated in the Minerals Management Service.

The decreases in Royalty Management are proposed as a result of the conversion of all payors to the Auditing and Financial System (AFS) and the completion of contract support systems for the development.

States receive at least 50% of the revenues from mineral leases on public lands, but all of the costs of collecting these revenues are borne by the Federal Government. In 1984 it is proposed that the cost of royalty management activities be deducted from Federal onshore mineral leasing revenues before these revenues are distributed. It is also proposed that amounts appropriated for payments in lieu of taxes be deducted in similar fashion.

4. *General Administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support. The offices of the Director and the immediate staff are also provided for in this activity, as are general support services. Most of the expenses shown under General Administration in 1984 were previously provided by direct assessment of program activities.

1. *State regulatory program grants.*—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Act. As of September 30, 1982, 24 States with actual or planned coal mining facilities had approved state programs. By the end of 1984, it is anticipated that Alaska will have attained primacy.

2. *Federal regulatory programs.*—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, for the provision of technical assistance to States and for the administration of the Federal coal program in thirteen States without approved permanent enforcement programs.

3. *General administration.*—This activity includes: the Offices of the Director and Assistant Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, and Regulatory and Issues Management; and the Divisions of Planning and Budget, Financial Management, Personnel, and Management Services. Also financed are certain categories of office-wide expenses most readily accommodated in a single budget line item, including office rent, telephones, and postage. The amount requested for this activity represents only that portion of the total General Administration expenses which are attributable to the Regulation and Technology appropriation. The remainder have been requested from the Abandoned Mine Reclamation Fund.

1. *State reclamation program grants.*—This activity provides for grants to States to reclaim lands damaged from past mining practices. Under the Surface Mining Control and Reclamation Act of 1977, States with approved regulatory (enforcement) programs may also have reclamation programs and annual reclamation project plans approved. Upon approval, a State is entitled to 50% of fund revenue derived from operating mines in the State. The program level for 1984 is based on 23 States having approved reclamation plans.

2. *Federal reclamation programs.*—This activity includes fee collection and assistance to States in developing their reclamation programs as well as abandoned mine lands reclamation projects (including the Rural Abandoned Mine program administered by Soil Conservation Service) undertaken directly by the Office of Surface Mining and other Federal agencies. Also included are the funds for the drainage of anthracite mines program which was transferred in 1982 from the Bureau of Mines. The program level for 1984 will provide for addressing emergency projects, for conducting the fund management responsibilities and for providing to the States technical assistance on reclamation projects.

3. *Small operator assistance payments.*—This activity provides for payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed mining operation and analysis of test borings or core samplings. It is estimated that unobligated balances from prior year appropriations will be sufficient for 1984; however, it is anticipated that favorable consideration will be given to a supplemental request should States demonstrate a need for additional small operator assistance funds in 1984.

4. *General administration.*—This activity includes the same items as described for the General Administration

activity in the Regulation and Technology appropriations. The funds for this activity represent only that portion of general administration expenses which are attributable to the Abandoned Mine Reclamation Fund.

1. *Minerals research*—(a) *Health and safety technology*.—This program provides technology that will reduce occupational illnesses, accidents, and disasters associated with mining. Health research addresses instrumentation and control technology to reduce levels of respirable dust, noise, toxic gas products, and radiation found in mine air, and to develop ventilation systems that provide the proper quality and quantity of air flow in underground mines. Safety hazard reduction research investigates and develops means to help control fires and explosions; methane occurrence and migration; industrial hazards, including electrical problems; ground control, including roof support systems; post disaster survival and rescue; and explosives and blasting agents.

(b) *Conservation and development*.—The program investigates mining techniques which improve domestic mineral recovery. All phases of the mineral production cycle, from exploratory activities through recycling, are considered. Priority research concerns in 1984 are: in investigation of premining conditions, determination of mineralogy and grade of deposits, and the behavior of rock under mining-induced stress; in mineral extraction technology, improvement of shaft design, fragmenting and hauling ore, in situ leaching and borehole mining, and support of backfills; and in conservation of resources, drainage of acid mines, mine subsidence prediction and control, mine waste control techniques, and reclamation.

(c) *Minerals and materials research*.—Research is conducted to develop basic information on fundamental scientific and engineering principles of minerals processing that will support and enhance the mineral industry's efforts to improve productivity, increase energy efficiency and be more environmentally acceptable, and also to investigate new or alternative techniques which increase production of strategic, critical, and other essential minerals from low-grade or complex domestic ores.

2. *Minerals information and analysis*—(a) *Minerals information*.—This program provides a reliable data base, including the automated Minerals Information System, for analysis of national minerals problems by collecting, interpreting, and disseminating worldwide

information relating to the production, consumption, and availability of nonfuel minerals. The program maintains information on the production and consumption of approximately 100 mineral commodities, and also on the minerals and related industries of about 160 countries.

(b) *Mineral data analysis*.—In-depth economic, technical, and policy studies that address the worldwide supply and demand for nonfuel minerals are conducted in this program. The Minerals Availability System, a computerized data base system, develops and utilizes methodologies for evaluation of mineral deposits based on quantifiable technical, economic, and social data. The program also includes mineral land assessments on Forest Service wilderness and RARE II further planning areas studies, carried out jointly with the U.S. Geological Survey.

3. *Mineral institutes*.—As in 1982 and 1983, no funds are requested for this program in 1984 because other sources of public and private support are adequate to meet program objectives.

4. *General administration*.—The general administration program finances executive guidance and administrative services for the Bureau of Mines.

5. *Construction and rehabilitation*.—Construction of the administrative facility at Bruceton, Pennsylvania will be completed in 1985.

Drainage of anthracite mines.—This program was transferred to the Office of Surface Mining in 1982. Program outlays for 1983 and 1984 are included in the Abandoned mine reclamation fund account. The additional transfer of \$991,000 in 1983 to the Bureau of Mines' Mines and minerals account is made pursuant to Public Law 97-257 for the construction of the administrative facility at Bruceton, Pa.

ADMINISTRATIVE PROVISION

The Secretary is authorized to accept lands, buildings equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided*, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treas-

ury as miscellaneous receipts. (*Public Law 97-394, making appropriations for the Department of the Interior and Related Agencies, 1983.*)

The authorized purpose of the Helium Act Amendments of 1960, Public Law 86-777, (50 U.S.C. 167), is to provide for the current and foreseeable future requirements for helium for essential Government activities. The program involves the conservation, production, sale, and distribution of helium and requires significant activities in the following areas:

(a) Acquisition, construction, operation, and management of helium plants, gasfields, helium storage fields, pipelines, and fleets of helium tank cars and semi-trailers.

BUREAU OF MINES—Continued

Public enterprise funds—Continued

HELIUM FUND—Continued

(b) Searching for and evaluating new sources of helium-bearing natural gas and negotiating contracts for supplies of helium-bearing natural gas.

(c) Establishing reserves of helium.

(d) Experimentation and research to discover new helium supplies and to improve methods of helium production, purification, transportation, liquefaction, storage, and utilization.

Income from helium sales, services, and rentals of containers is estimated to provide the required funding for program cash outlay through 1984.

During 1984, the Bureau of Mines will produce and sell about 250 MMcf of Grade-A helium at its Exell Helium Plant in the Texas panhandle to meet the needs projected by DOD, NASA, DOE, and other helium-using Federal agencies. Approximately 100 MMcf, or 40 percent, will be liquefied for shipment. Additionally, the Bureau is expecting to purify about 90 MMcf of stored helium for redelivery to private industry as a contract service. Thus, the total Grade-A helium output is expected to be about 340 MMcf.

All pure helium production and shipping operations have been consolidated in the Exell-Amarillo area to assure that the Bureau's helium production capacity is adequate to meet Federal agencies' current and projected needs for helium at the lowest practicable costs.

* Includes \$913 thousand in 1984 for activities previously financed from: Department of the Interior, U.S. Fish and Wildlife Service, Resources Management, 1982-913; 1983-913.

1. *Education.*—The Bureau of Indian Affairs provides a variety of support for the education of Indian children through direct operation of schools, support of tribally operated schools, and financial assistance to public schools serving Indian children. No funds are included for Concho, Oklahoma, Wahpeton, North Dakota, and Intermountain, Utah off-reservation boarding schools for fiscal year 1984 because of the tentative decisions to close these schools. However, consultation will continue with the affected tribes, and the Bureau will review any new data presented by the Government Accounting Office on Concho, Wahpeton, and Intermountain.

The Budget assumes transfer of the remaining BIA schools in Alaska to the State as part of the continuing cooperative effort between the Bureau and the State to establish a single system of education. The number of children attending Federal, tribal, and public schools is shown below:

Number of pupils:	1982 actual	1983 estimate	1984 estimate
Federal and tribal schools.....	42,594	42,321	41,540
Public schools.....	165,988	168,000	170,000

The Bureau also assists Indian adults by providing financial assistance to students for higher education

studies, by direct support of some tribally operated post-secondary institutions, and by offering continuing education programs in many communities. The number of participants in these programs is indicated in the following table:

Continuing education participants:	1982 actual	1983 estimate	1984 estimate
Higher education scholarships.....	16,800	17,000	17,895
Adult education enrollments.....	13,859	12,891	11,763

2. *Indian services.*—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects, and a new program for small tribes to acquire and maintain needed core-management capability. Also, the activities associated with the Navajo-Hopi settlement are included. Data are presented below on selected aspects of this activity.

Social service caseloads:	1982 actual	1983 estimate	1984 estimate

Family houses started:			
New.....	900	630	640
Rehabilitation.....	5,100	3,580	3,635

3. *Economic development and employment program.*—This activity is designed to stimulate reservation economies, and to help Indian people participate fully in those economies.

Business enterprise development is encouraged and assisted through programs of technical and financial aid, with emphasis on enterprises owned and operated by Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans for resource and business enterprise development, housing, public utility facilities, education, and other purposes. Individual Indians are assisted in qualifying for, finding and occupying jobs on and near reservations consistent with their needs, capabilities, and desires. Roads are maintained to provide for the movement of people and goods as needed for the well-being of the community.

4. *Natural resources development.*—This activity is designed to provide for the conservation, development and utilization of Indian land, water, and related resources. Resources are surveyed and inventoried, and agriculture and forestry development is assisted.

5. *Trust responsibilities.*—This activity entails the protection of Indian rights and property, particularly those related to land and natural resources, and the management of assets held in trust for Indian tribes and individuals.

6. *Facilities management.*—This activity provides for the maintenance and operation of Bureau facilities and the provision for GSA owned or leased facilities.

7. *General administration.*—These functions include executive direction; administrative services; safety management; employee compensation payments; construction management; road construction management; and education program management.

Reimbursable programs are provided primarily for operation, maintenance and repair of federally owned quarters financed by payroll deductions from employees occupying such quarters; programs funded by other Federal agencies; operation of the North Star III ship-ping operation in Alaska (operated in the Miscellaneous

Trust account prior to 1981); and for miscellaneous goods and services provided to others.

The planned distribution of budget authority requested in 1984 as compared to funds for 1982 and 1983 follows, (in thousands of dollars):

	1982 actual	1983 estimate	1984 estimate
Direct program:			
1. Tribe/agency operations.....	238,393	270,190	277,224
2. Area office operations.....	52,174	32,503	26,604
3. Central office staff operations.....	29,342	29,101	26,258
4. Field program operations.....	508,663	519,183	511,429
Total direct program.....	828,572	850,977	841,515
Reimbursable program (total revenues).....	47,875	47,000	47,000
Total available.....	876,447	897,977	888,515

Tribe/agency operations are primarily programs in which tribes formally participate in setting funding priorities. Tribe/agency programs include housing, law enforcement, economic and natural resources development, and other activities similar to those conducted by a State or local government.

Central and area office staff operations represent funding for program management, executive direction and administrative services.

Field program operations support those national programs, such as education, facilities management, rights protection and welfare, which are the unique responsibility of the Bureau because of its special relationship to Indians and Indian tribes.

ADMINISTRATIVE PROVISIONS—Continued

July 18, 1966, which have at any time been identified by or submitted to the Secretary under the "Statute of Limitation Project" undertaken by the Department of the Interior and which, but for the provisions of this Act, would be barred by the provisions of section 2415 of title 28, United States Code: *Provided*, That the Secretary shall have the discretion to exclude from such list any matter which was erroneously identified as a claim and which has no legal merit whatsoever.】

【(b) Such list shall group the claims on a reservation-by-reservation, tribe-by-tribe, or State-by-State basis, as appropriate, and shall state the nature and geographic location of each claim and only such other additional information as may be needed to identify specifically such claims.】

【(c) Within thirty days after the publication of this list, the Secretary shall provide a copy of the Indian Claims Limitation Act of 1982 and a copy of the Federal Register containing this list, or such parts as may be pertinent, to each Indian tribe, band or group whose rights or the rights of whose members could be affected by the provisions of section 2415 of title 28, United States Code.】

【SEC. 4. (a) Any tribe, band or group of Indians or any individual Indian shall have one hundred and eighty days after the date of the publication in the Federal Register of the list provided for in section 3 of this Act to submit to the Secretary any additional specific claim or claims which such tribe, band or group of Indians or individual Indian believes may be affected by section 2415 of title 28, United States Code, and desires to have considered for litigation or legislation by the United States.】

【(b) Any such claim submitted to the Secretary shall be accompanied by a statement identifying the nature of the claim, the date when the right of action allegedly accrued, the names of the potential plaintiffs and defendants, if known, and such other information needed to identify and evaluate such claim.】

【(c) Not more than thirty days after the expiration of the one hundred and eighty day period provided for in subsection (a) of this section, the Secretary shall publish in the Federal Register a list containing the additional claims submitted during such period: *Provided*, That the Secretary shall have the discretion to exclude from such list any matter which has not been sufficiently identified as a claim.】

【SEC. 5. (a) Any right of action shall be barred sixty days after the date of the publication of the list required by section 4(c) of this Act for those pre-1966 claims which, but for the provisions of this Act, would have been barred by section 2415 of title 28, United States Code, unless such claims are included on either of the lists required by section 3 or 4(c) of this Act.】

【(b) If the Secretary decides to reject for litigation any of the claims or groups or categories of claims contained on either of the lists required by section 3 or 4(c) of this Act, he shall send a report to the appropriate tribe, band, or group of Indians, whose rights or the rights of whose members could be affected by such rejection, advising them of his decision. The report shall identify the nature and geographic location of each rejected claim and the name of the potential plaintiffs and defendants if they are known or can be reasonably ascertained and shall, briefly, state the reasons why such claim or claims were rejected for litigation. Where the Secretary knows or can reasonably ascertain the identity of any of the potential individual Indian plaintiffs and their present addresses, he shall provide them with written notice of such rejection. Upon the request of any Indian claimant, the Secretary shall, without undue delay, provide to such claimant any nonprivileged research materials or evidence gathered by the United States in the documentation of such claim.】

【(c) The Secretary, as soon as possible after providing the report required by subsection (b) of this section, shall publish a notice in the Federal Register identifying the claims covered in such report. With respect to any claim covered by such report, any right of action shall be barred unless the complaint is filed within one year after the date of publication in the Federal Register.】

【SEC. 6. (a) If the Secretary determines that any claim or claims contained in either of the lists as provided in sections 3 or 4(c) of this Act is not appropriate for litigation, but determines that such claims may be appropriately resolved by legislation, he shall submit to the Congress legislation to resolve such claims or shall submit to Congress a report setting out options for legislative resolution of such claims.】

【(b) Any right of action on claims covered by such legislation or report shall be barred unless the complaint is filed within 3 years after the date of submission of such legislation or legislative report to Congress.】. This fund, established by the Indian Financing Act of 1974, provides a source of financing for Indians who cannot borrow from other Government credit agencies or from ordinary commercial lenders because of their low economic status, isolated geographic location, lack of bankable security, or other reasons. Loans are made to tribes and other Indian organizations for relending to individual members and groups of members, and to finance tribal business enterprises. Loans are also made to tribes for use by them in obtaining expert assistance to prepare and argue claims pending before the Court of Claims. Direct loans are made for any purpose that will promote the economic development of the borrower, including loans for educational purposes.

MEMORANDUM

2299 U.S. contingent liability for guaranteed loans outstanding, end of year	70,034	71,906	84,033
------------------------------------------------------------------------------------	--------	--------	--------

¹ Amount shown is based on the full principal amounts of loans that are partially guaranteed by the U.S. Government. The comparable amounts of limitations enacted on the basis of contingent liability is \$27,630 thousand in 1982.

² Guaranteed certificates canceled.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

Under the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The United States seeks to terminate the trusteeship and, to accomplish this, has initialed a compact of free association with the governments of the Marshalls, Palau, and the Federated States of Micronesia.

² Reflects 1982 amounts to be transferred under authority of Reorganization Plan No. 3 of 1950, for Minerals Policy and Research Analysis to the Bureau of Mines and for Ethics Function from "Salaries and Expenses", Office of the Inspector General to "Departmental Management".

1. *Departmental direction.*—The Office of the Secretary and the Office of Public Affairs provide top departmental direction and contact with the public. The Office for Equal Opportunity administers the Department's responsibilities in equal opportunity programs. Other secretarial offices provide coordination of correspondence, legislation, congressional liaison and minority procurement programs.

2. *Program direction and coordination.*—Six assistant secretaries advise and assist the Secretary on matters of policy for promoting the domestic welfare and the

conservation and development of the country's resources, Indian affairs, and responsibilities with regard to the territories of the United States and the Department's international activities, and all phases of Departmental policy, budget and administrative activities.

3. *Policy, budget, and administration.*—This activity provides for implementation of program and budget policy, economic analysis, environmental review, financial management, personnel, administrative services, library and information services, and security operations. The Outer Continental Shelf Program Coordination Office, included under this activity in prior years, has been transferred to the Minerals Management Service in 1982 and is included under the Service's budget request for 1983 and 1984.

4. *Hearings and appeals.*—Provides the quasi-judicial and appellate responsibilities of the Department of the Interior. Administrative law judges and formal boards of appeals render decisions in cases pertaining to: (a) contract disputes; (b) Indian probate matters; (c) public and acquired lands and their resources; (d) submerged offshore lands of the Outer Continental Shelf; (e) surface mining; (f) personnel grievances; (g) environmental impacts; (h) enforcement of the importation and transportation of rare and endangered species; (i) environmental quality; (j) uniform relocation assistance and real property appeals; and (k) Alaska Native claims appeals.

5. *Central services.*—This activity provides for general administrative expenses including space, postage, FTS, employee workmen's compensation and unemployment compensation payments, etc., for the offices financed by this appropriation.

6. *Alaska subsistence grant.*—This activity addresses the Secretary's responsibilities pursuant to the provisions of section 805 of the Alaska National Interest Lands Conservation Act, Public Law 96-487. This activity reimburses the State for reasonable costs relating to the establishment and operation of the regional advisory councils established by the State and the operation of the State Fish and Game Advisory Committee in accordance with the provisions of the Act.

7. *Office of water policy.*—This function, included under this activity in 1982, appears as a separate appropriation in 1983 and 1984.

¹Amounts for 1982 for water policy planning and coordination are reflected under the parent account "Departmental Management"

The Office of Water Policy, funded in the Office of the Secretary's "Departmental Management" account in 1982 and established as a separate appropriation in 1983, provides for representation of the Department's interests with the States for planning and coordinating water related issues. This office serves as a Secretarial policy office which functions as a focal point for Interior related water issues, proceeding from the premise that the States have primary rights in water allocation, planning and coordination.

Amounts appropriated for 1983 include \$6 million to be transferred to the Bureau of Reclamation to continue research consistent with programs identified in 42 U.S.C. 7816 and to administer projects transferred from the Office of Water Research and Technology.

In addition \$6.35 million was made available in 1983 for State Water Research and Development Institutes to carry out the provisions of the Water Research and Development Act of 1978 (Public Law 95-467). No funds are requested for this purpose in 1984.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any [no year] appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior and for the emergency rehabilitation of burned-over lands under its jurisdiction and for emergency actions related to potential or actual earthquakes or volcanoes, and for emergency reclamation projects under section 410 of Public Law 95-87, and shall transfer, from any [no year] funds available, to the Office of Surface Mining such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act, such funds to be replenished by a supplemental appropriation which must be requested as promptly as possible: *Provided*, That appropriations made in this title for fire

suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That no appropriations made in this title shall be available for acquisition of automatic data processing equipment, software, or services in excess of \$1,000,000 systems life cost, without prior approval of the Secretary.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs and supplies, materials, equipment and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; [with not more than \$7,500 to be paid to any one company or individual;] hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N816 and the row of blocks numbered N817 of the Universal Transverse Mercator Grid System.

[SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of the following tracts within the Block, Hudson, Toms, Carteret, Lindenkohl, Spencer, Wilmington, Blatimore, Washington, or Norfolk Canyons of Outer Continental Shelf Lease Sale Numbered 76: Block Canyon, NK 19-10: 945, 946, 989, 990; Hudson Canyon, NJ 18-3: 290, 291, 334, 335, 336, 379, 380, 423-427, 467-471, 513-515, 558, 559; Toms Canyon, NJ 18-3: 815, 859; Lindenkohl Canyon, NJ 18-6: 193-194; Wilmington Canyon, NJ 18-6: 491, 492, 535, 536, 579, 580, 624; Baltimore Canyon, NJ 18-6: 750, 751, 794, 838, 882, 883; Washington Canyon, NJ 18-8: 515, 516, 559, 560, 604; and Norfolk Canyon, NJ 18-8: 907, 908, 909, 951, 952, 953, 997.]

SEC. [109] 108. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.

SEC. [110] 109. Notwithstanding any other provision of law, section 1002 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) (16 U.S.C. 3142(e)(2)(C)) is amended as follows: Insert before the period: "and: *Provided*, That the Secretary shall prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information. The Secretary shall require that any permittee shall make available such data to any person at fair cost."

SEC. 110. Notwithstanding any other provision of law, appropriations in this title shall be available to provide insurance on official motor vehicles, aircraft, and boats operated by the Department of the Interior in Canada and Mexico.

SEC. 111. Appropriations in this title shall be available to enter into contracts with any person or organization for collection services to

recover indebtedness owed the United States, and to pay for the reasonable cost of such collection services from the amounts collected.

TITLE III—GENERAL PROVISIONS

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

[SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.]

SEC. [304] 303. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. [305] 304. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.

SEC. [306] 305. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [307] 306. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. [308] 307. Except for lands described by section 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312 and section 603 of Public Law 94-579, and except for land in the State of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits of leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditures of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning or within any lands designated by Congress as wilderness study areas, under valid existing right or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary

of the Interior to issue under their existing authority in any area of national forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray diffraction analysis; and satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments in inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further*, That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of national forest or public land wilderness areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or other nonsurface disturbing methods.

[Sec. 309. None of the funds provided in this Act or by Public Law 97-100 shall be used to evaluate, consider, process or award oil, gas or geothermal leases on Federal lands in the Mount Baker-Snoqualmie National Forest, State of Washington, within the hydrographic boundaries of the Cedar River municipal watershed upstream of river mile 21.6, the Green River municipal watershed upstream of river mile 61.0, the North Fork of the Tolt River proposed municipal watershed upstream of river mile 11.7 and the South Fork Tolt River municipal watershed upstream of river mile 8.4.]

[Sec. 310. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless such assessments and the basis therefor are presented to the Committees on Appropriations and are approved by such committees.]

[Sec. 311. Employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment except as provided by law.]

[Sec. 312. Funds provided for land acquisition in this Act may not be used to acquire lands for more than the approved appraised value (as addressed in section 301(3) of Public Law 91-646) except for condemnations and declaration of taking, without the written approval of the Committees on Appropriations.]

Sec. [313] 308. Notwithstanding any other provisions of law, the Secretary of the Interior and Secretary of Agriculture are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the pre-suppression, detection, and suppression of fires on any units within their jurisdiction. In addition, any contracts or agreements with the jurisdiction for fire management services listed above which are previously executed shall remain valid.

[Sec. 314. Any interest earned by a political subdivision of a State on sums paid to such political subdivision by such State between October 1, 1979 and September 30, 1982, from amounts paid to such State under the provisions of the last paragraph under the head "FOREST SERVICE," of the Act of May 23, 1908 (16 U.S.C. 500), and of section 13 of the Act of March 1, 1911 (16 U.S.C. 500), may be expended for any public purpose as such political subdivision prescribes.]

SEC. [315] 309. The titles conveyed by and the easements and restrictions heretofore reserved and imposed by the Secretary of the Interior pursuant to section 506(c) of Public Law 96-487 are hereby confirmed in all respects: *Provided*, That nothing herein shall be deemed to amend the Alaska National Interest Lands Conservation Act or the Alaska Native Claims Settlement Act.

[Sec. 316. Except as expressly provided for by law, none of the funds appropriated by this Act shall be obligated to dispose, except by exchange, of any Federal land tract until such time as the agency responsible for administering the disposal of the tract has specifically identified the tract as no longer being needed by the Federal Government; inventoried the tract as to its public benefit values; provided opportunity for public review and discussion of the tract proposed for disposal; and provided 30 days advance notice of the tract proposed for disposal and of the plans for carrying out such disposal to the congressional delegation of the State or States in which the tract proposed for sale is located and to the appropriate congressional committees for immediate printing in the Congressional Record: *Provided*, That neither the Act of July 31, 1958, as amended (72 Stat. 428, as amended; 7 U.S.C. 1012a; 16 U.S.C. 478a) nor the Act of June 14, 1926, as amended (49 U.S.C. 869 et seq.) shall be subject to the provisions of this section.]

[Sec. 317. In the case of any new electric power plant located in Alaska for which a petition is accepted after the date of enactment of this Act, but before December 31, 1985, pursuant to section 212(f) of the Powerplant and Industrial Fuel Use Act of 1978, to use natural gas (as that term is defined in such Act), as a primary energy source in such power plant, the petitioner shall be deemed to have made the demonstrations required by clauses (1) and (2) of such section and such exemption, subject to the other applicable provisions of such Act, shall be granted by the Secretary of Energy. Nothing in this section shall apply to any new electric power plant using natural gas produced from the Prudhoe Bay Unit of Alaska.]

[Sec. 318. Section 21 of the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain", approved February 25, 1920 (41 Stat. 437, as amended: 30 U.S.C. 241), is further amended by adding the following new subsections.]

["(c)(1) The Secretary may within the State of Colorado lease to the holder of the Federal oil shale lease known as Federal Prototype Tract C-a additional lands necessary for the disposal of oil shale wastes and the materials removed from mined lands, and for the building of plants, reduction works, and other facilities connected with oil shale operations (which lease shall be referred to hereinafter as an 'offsite lease'). The Secretary may only issue one offsite lease not to exceed six thousand four hundred acres. An offsite lease may not serve more than one Federal oil shale lease and may not be transferred except in conjunction with the transfer of the Federal oil shale lease that it serves.]

["(2) The Secretary may issue one offsite lease of not more than three hundred and twenty acres to any person, association or corporation which has the right to develop oil shale on non-Federal lands. An offsite lease serving non-Federal oil shale land may not serve more than one oil shale operation and may not be transferred except in conjunction with the transfer of the non-Federal oil shale land that it serves. Not more than two offsite leases may be issued under this paragraph.]

["(3) An offsite lease shall include no rights to any mineral deposits.]

["(4) The Secretary may issue offsite leases after consideration of the need for such lands, impacts on the environment and other resource values, and upon a determination that the public interest will be served thereby.]

["(5) An offsite lease for lands the surface of which is under the jurisdiction of a Federal agency other than the Department of the Interior shall be issued only with the consent of that other Federal agency and shall be subject to such terms and conditions as it may prescribe.]

["(6) An offsite lease shall be for such periods of time and shall include such lands, subject to the acreage limitations contained in this subsection, as the Secretary determines to be necessary to achieve the purposes for which the lease is issued, and shall contain such provisions as he determines are needed for protection of environmental and other resource values.]

["(7) An offsite lease shall provide for the payment of an annual rental which shall reflect the fair market value of the rights granted and which shall be subject to such revisions as the Secretary, in his

discretion, determines may be needed from time to time to continue to reflect the fair market value.】

【“(8) An offsite lease may, at the option of the lessee, include provisions for payments in any year which payments shall be credited against any portion of the annual rental for a subsequent year to the extent that such payment is payable by the Secretary of the Treasury under section 35 of this Act to the State within the boundaries of which the leased lands are located. Such funds shall be paid by the Secretary of the Treasury to the appropriate State in accordance with section 35, and such funds shall be distributed by the State only to those counties, municipalities, or jurisdictional subdivisions impacted by oil shale development and/or where the lease is sited.”; and】

【“(9) An offsite lease shall remain subject to leasing under the other provisions of this Act where such leasing would not be incompatible with the offsite lease.】

【“(d) In recognition of the unique character of oil shale development:】

【“(1) In determining whether to offer or issue an offsite lease under subsection (c), the Secretary shall consult with the Governor and appropriate State, local, and tribal officials of the State where the lands to be leased are located, and of any additional State likely to be affected significantly by the social, economic, or environmental effects

of development under such lease, in order to coordinate Federal and State planning processes, minimize duplication of permits, avoid delays, and anticipate and mitigate likely impacts of development.】

【“(2) The Secretary may issue an offsite lease under subsection (d) after consideration of (A) the need for leasing, (B) impacts on the environment and other resource values, (C) socioeconomic factors, and (D) information from consultations with the Governors of the affected States.】

【“(3) Before determining whether to offer an offsite lease under subsection (c), the Secretary shall seek the recommendation of the Governor of the State in which the lands to be leased are located as to whether or not to lease such lands, what alternative actions are available, and what special conditions could be added to the proposed lease to mitigate impacts. The Secretary shall accept the recommendations of the Governor if he determines that they provide for a reasonable balance between the national interest and the State's interests. The Secretary shall communicate to the Governor, in writing, and publish in the Federal Register the reasons for his determination to accept or reject such Governor's recommendations.”.】

1. *Program direction and policy coordination.*—The Attorney General, aided by the Deputy Attorney General, Associate Attorney General, and other Department policy-level officials directs and supervises the programs and activities of the Department. Increased resources for 1984 will enable the Department to strengthen and update many of its automated administrative systems.

2. *Administrative review and appeals.*—This activity includes the Office of the Pardon Attorney and the Executive Office of Immigration Review. The Pardon Attorney receives and reviews all petitions for clemency. The Executive Office of Immigration Review contains the Immigration Judge function formerly in the Immigration and Naturalization Service and the Board of Immigration Appeals. This new office was established January 1, 1983 to improve the immigration hearing

and appeal process. The request anticipates that the office will be fully operational by 1984. Workload for the activity follows:

The United States Parole Commission makes decisions to grant or deny parole to Federal prisoners serving sentences of one year or more, sets conditions of parole, supervises parolees and mandatory releasees, re-commits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976. A major Parole Commission program is the establishment and application of guidelines and rules for parole decisionmaking so that the duration of terms of imprisonment throughout the Federal system will be equitable.

In 1984, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the Commission conducts ongoing research programs, and administers its responsibilities under the labor and pension laws.

Enforcement of antitrust, consumer protection and kindred laws.—This division administers and enforces the antitrust and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act, which prohibits combinations and conspiracies among competitors to set prices collusively or otherwise to restrain trade; (2) section 2 of the Sherman Act, which prohibits combinations and attempts to monopolize interstate trade; (3) section 7 of the Clayton Act, which prohibits corporate mergers and acquisitions that tend to lessen competition substantially or tend to monopolize; and (4) various statutory provisions that require regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts and the maintenance of competitive conditions.

The War Claims Act of 1948, as amended, authorizes payments to American military prisoners of war and American civilians captured by hostile forces in Southeast Asia during the Vietnam conflict. The Defense Department intends to make final status determinations on all military personnel in 1983, after which the

Commission can certify valid claims to the Treasury Department for payments.

The Government is represented in each of the 94 judicial districts by a U.S. attorney and a U.S. marshal.

1. *U.S. attorneys.*—The U.S. attorney is responsible for the prosecution of criminal offenses against the United States, the representation of the Government in civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The estimates provide for expanded debt collection activities, a vigorous criminal prosecution program aimed at stopping illegal drug trafficking, and a growing civil litigation workload.

2. *Bankruptcy matters.*—The estimates reflect the administration's proposal to discontinue the pilot U.S. Trustees program at the end of 1983 unless specific action is taken by Congress to continue it. The administration supports a proposal to transfer this function to the Judiciary under the Administrative Office of the U.S. Courts.

3. *U.S. marshals.*—The U.S. marshal has custody of all unsentenced Federal offenders until released by the courts or confined in prison, acts as agent of the courts in the service of process and execution of warrants, and provides protective services to the courts and to key Government witnesses. The 1984 estimates include a program decrease in private process.

Reimbursable program.—Federal funds are derived primarily from the Administrative Office for United States Courts for judicial facility security services and from the U.S. Air Force for ICB missile transportation security services provided by the United States Marshals Service. In addition, the United States Attorneys' and the United States Marshals' participation in the efforts of the Organized Crime Drug Enforcement Task Forces (OCDE) will be funded on a reimbursable basis by the OCDE appropriation. The primary source of non-Federal funds is derived from State and local agencies for witness protection services and for the transportation of prisoners pursuant to State writs.

1. *Care of U.S. prisoners in non-Federal institutions.*—Under this program, the U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Approximately 51,500 prisoners will be boarded in approximately 680 jails at an average cost of \$39.38 per offender day in 1984.

2. *Cooperative agreement program.*—Agreements are negotiated with State and local governments for renovating, constructing, and equipping facilities that detain Federal prisoners.

3. *Reimbursable program.*—Within this program, additional resources necessary for the Cooperative Agreement Program will be acquired from the Organized Crime Drug Enforcement Task Force appropriation.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice exercises little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

1. *Fact witnesses.*—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

2. *Protection of witnesses.*—The U.S. Marshals Service is responsible for the protection of witnesses and their dependents; subsistence costs of protected witnesses and their families are paid from this fund. This program is designed to assure the safety of Government witnesses whose testimony on behalf of the Government places them or their families in jeopardy.

3. *Expert witnesses.*—Provides for the payment of fees and expenses associated with the preparation and pres-

entation of testimony by technical and scientific experts in legal proceedings involving the United States.

4. *Mental competency examinations.*—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States. Reports and court testimony relating to the examinations are included in these fees.

Reimbursable program.—Non-federal funds are derived by reimbursement from State and localities to cover the costs, in whole or in part, of maintaining those State or local organized crime witnesses and their families who have been accepted into the witness protection program. Federal funds will be derived on a reimbursable basis from the Organized Crime Drug Enforcement (OCDE) appropriation for witnesses accepted into the witness protection program as a result of OCDE cases.

The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices based on race, color, or national origin which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1984 request will provide CRS with resources to continue to focus on racial disputes in two major program areas: police/minority confrontation cases, particularly those related to allegations of police use of excessive force; and education conflicts generated in the aftermath of desegregation. In 1984, CRS also anticipates response to conflicts involving Indo-Chinese refugees as well as the Ku Klux Klan. CRS will continue to monitor and will help communities to forestall threats of urban civil disorder.

This program includes a coordinated interagency task force enforcement effort to combat organized crime and drug trafficking, as well as a special Presidential commission and a project to enlist the 50 State governors in a united campaign against the drug trade. The administration is creating 12 new Regional Task Forces (in addition to the South Florida Task Force) that will cover the United States.

1. *Law enforcement.*—This activity includes the resources for direct investigative and support activities of the Task Forces. Activities conducted within this function are focused on the interdiction and disruption of drug trafficking controlled by various organized crime enterprises. Also included are resources required to provide and maintain those equipment items, automation and intelligence gathering capabilities and other support systems necessary for the effective conduct of complex investigations.

2. *Prosecution.*—This activity includes the resources for the prosecution of cases generated through the investigative efforts of Task Force agents. Litigative efforts are selectively targeted on the criminal leadership involved in drug trafficking and are intended to dissolve organized illicit enterprises. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises under available statutory authority.

3. *Corrections.*—This activity includes the resources required to provide additional prison and jail bedspace, both to relieve current conditions of overcrowding and to accommodate the anticipated increase in the number of sentenced and unsentenced prisoners. Funds are provided for the construction and renovation of state and local facilities through cooperative agreement programs guaranteeing the Federal Government bedspace in local jails.

4. *Policy and management.*—This activity includes the resources for the provision of guidance and general con-

trol of all Task Force efforts by means of an interdepartmental committee of policy officials who assist in the allocation and management of resources among established Task Force regions and among participating agencies. A principal function within this activity is the continual reassessment of the national effort against organized crime and drug trafficking.

As the chief investigative arm of the Department of Justice, the mission of the Federal Bureau of Investigation (FBI) is a multifaceted one, requiring the investigation of violations of over 200 categories of Federal statutes.

The overall objectives of the FBI are to have a significant impact on criminal activity, to investigate civil matters in which the Federal Government has an interest, and to provide information to the executive branch relating to national security.

These objectives result in the FBI's being actively involved in a wide range of investigations, including

General and special funds—Continued

SALARIES AND EXPENSES—Continued

traditional law enforcement investigations (bank robbery, kidnapping, fugitive, bank embezzlement, etc.), investigations involving more modern phenomena (organized crime, white-collar crime, civil rights violations, antitrust violations, etc.), and investigations of hostile intelligence activities within the United States. In addition, on January 28, 1982, the Attorney General ordered that the Drug Enforcement Administration (DEA) report to the Director of the FBI and that the FBI be given concurrent jurisdiction with DEA over Federal drug violations.

Substantial increases are requested in 1984 that will enable the FBI not only to address these expanding responsibilities, but also to properly equip and modernize its agent workforce.

The activities through which the mission is accomplished and workload data are as follows:

1. *Criminal, security, and other investigations.*—This activity includes all field investigations of the Federal Bureau of Investigation. These investigations are conducted by FBI Special Agents in 59 field offices and more than 417 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar, organized crime, terrorism and foreign counterintelligence. Other investigative areas are civil rights, fugitive, general government crimes, personal crimes, civil and general property crimes, applicant and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as preemployment background inquiries and name checks. In addition, the FBI in 1984 will continue to play an integral role in support of the Attorney General's aggressive effort to disrupt drug trafficking controlled by various organized crime enterprises through reimbursement by the Organized Crime Drug Enforcement program.

This activity also includes resources devoted to national program supervision, coordination, and management of FBI investigations.

	1982 actual	1983 estimate	1984 estimate
Investigative matters	375,081	384,000	393,000
Arrests	6,325	6,645	6,945
Convictions	9,479	9,745	10,045

2. *Investigative support.*—Investigative support consists of training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment. In addition, the FBI is reimbursed for the assistance it provides in support of the Organized Crime Drug Enforcement program. Major capital investments are planned to upgrade the FBI's inventory of investigative equipment and to continue the implementation of its long-range ADP plan. For example, a funding increase of approximately \$48 million is requested for critical equipment purchases, the highest priority of which is the accelerated procurement of voice privacy radio systems for field agent personnel. Regarding ADP-related investments, an increase of \$22 million is planned which will improve through automation the management of case informa-

tion, agent time and other investigative resources, primarily through implementation of the Field Office Information Management System.

Federal training—FBI Academy:	1982 actual	1983 estimate	1984 estimate

Investigative support systems: Clusters installed	16	27	19
Name checks processed	1,901,907	2,100,000	2,250,000

3. *State and local assistance.*—The FBI supports State and local law enforcement by providing training, laboratory, identification, and informational services. Emphasis is being placed on the training of State and local police instructors to enable their agencies to become more self-sufficient and, thereby, allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations within the United States but most courses are conducted at the FBI National Academy in Quantico, Va.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal justice information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over six million records relating to wanted and missing persons, stolen property, and criminal histories. The UCR program collects data from more than 13,000 law enforcement agencies and provides this information to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1984, approximately 7.5 million fingerprint cards will be processed. Processing of noncriminal fingerprint checks for State and local agencies and banking institutions is on a reimbursable basis. Major investments of approximately \$37 million are planned which will permit the eventual full automation of fingerprint identification services. The increased funds requested will complete the third phase of the long-planned Automated Identification Division System (AIDS-III) program.

4. *Program direction.*—This activity includes the management, administrative support, legal, planning, evaluation, inspection, and financial functions of the FBI. Some workload measures include press releases, assistance to media, FBI publications disseminated, title III applications, undercover operations proposals, civil actions, field office audits and position classification matters.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs through drug law enforcement at the Federal level as lead agency; coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities;

General and special funds—Continued

SALARIES AND EXPENSES—Continued

and enforcement coordination and intelligence-gathering activities with foreign government agencies.

In support of the objective to integrate Federal, State and local agencies and organizations involved in the fight against drug abuse, DEA restructured its field operations into 20 major field divisions including the El Paso Intelligence Center and implemented a system of direct field office reporting to Headquarters.

Cooperation among Federal law enforcement agencies as well as military assistance has led to increased opportunities to expand investigative efforts. To pursue these opportunities forcefully will require a further investment of resources.

In 1984, significant resources will be devoted to the President's task force program on organized crime. As in 1983, DEA's involvement is integral to this nationwide coordinated enforcement strategy. When coupled with the expansion of DEA/FBI cooperative efforts, overall drug enforcement capabilities will be significantly strengthened in 1984.

Program increases totaling \$11,515,000 are proposed to provide necessary funding for anticipated cost increases associated with the purchase of replacement motor vehicles for the base motor vehicle procurement program, and to strengthen the foreign program, the DEA laboratory services program, the ADP program, and the radio program.

The means by which DEA performs its mission are summarized by the following activities;

1. *Enforcement of Federal law and investigations—(a) Domestic enforcement.*—This activity aims to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs. The measures below indicate the level of activity performed by this program.

	1982 actual	1983 estimate	1984 estimate
DEA initiated arrests.....	7,417	7,800	8,300

Drug related assets seized (\$ millions)	\$191	\$225	\$275
Clandestine labs seized.....	193	190	190

(b) *Foreign cooperative investigations.*—This activity encompasses: efforts to reduce at the source, illicit opium production, heroin, illicitly produced and diverted legitimate dangerous drugs, cocaine and marihuana destined for the United States and the collection and dissemination of intelligence.

5. *Program direction.*—This program encompasses the overall management and direction of DEA.

Reimbursable program.—A reimbursable program providing primarily for the training of foreign drug law enforcement officials is conducted by DEA and funded by the Department of State. Schools are held each year, both in the United States and host countries. The Organized Crime Drug Enforcement program will operate through reimbursable funding. DEA will be an active participant in these operations.

The Immigration and Naturalization Service is responsible for administering laws relating to the admis-

sion, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

1. *Enforcement.*—This activity contains most of the resources dedicated to both preventing illegal entry into the United States and facilitating the entry of qualified persons. This includes inspection of applicants for admission, patrol of the border, and the location of undocumented aliens who are in the United States following illegal entry or violation of status after legal entry. Apprehensions are made through inspection of farms and ranches by investigation of information about the location of undocumented aliens and through investigative case work. Also included are the resources for the Service's nationwide anti-smuggling program, as well as the processing of undocumented aliens who have been located. Also included in this activity is the prompt removal of those aliens.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

4. *Program direction.*—This activity provides resources for the overall administration and management of the Service.

5. *Reception/processing/care.*—This activity will be administered by the Immigration and Naturalization Service and provides for the reception of Cuban and Haitian entrants; their transportation to initial holding centers; and processing and care while they undergo medical and security screening and await resettlement or deportation. Also included are funds for medical services and care for the entrants, both within the centers and in the community for those who are resettled. Approximately \$4.5 million in carry-forward funds has been transferred from the Department of Health and Human Services to the Immigration and Naturalization Service in 1983. The responsibility for administering this activity is now consolidated under the Immigration and Naturalization Service.

This appropriation will provide for the custody and care of an average of 30,000 offenders and for the maintenance and operation of 44 penal institutions, 5 regional offices and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other units for short periods of time. An average of 3,105 sentenced prisoners will be in contract facilities in 1984.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced for Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

1. *Inmate care and custody.*—This activity covers the direct care costs, excluding psychological services, of all offenders in Federal institutions. This includes the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff

salaries, including salaries of Health Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of confining sentenced Federal offenders in contract State and local facilities. In 1984, resources are requested to expand medical coverage at 12 institutions, to activate a 105-bed hospital unit at the Medical Center for Federal Prisoners, Springfield, Missouri and to provide for an anticipated increase in the average daily population.

2. *Inmate programs.*—This activity finances the costs of academic, social, and occupational education courses, institutional programs for the treatment of drug addiction, and psychological services. During 1984, major programs will operate at current services levels.

3. *Institution administration and maintenance.*—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions. During 1984, major programs will operate at current services levels.

4. *Community corrections.*—This activity provides for the care of Federal prisoners in contract community residential centers. In 1984, funds are requested to increase the number, as well as the length of stay, of Federal offenders in contract community centers.

5. *Program direction.*—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel. During 1984, major programs will operate at current services levels.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations.

The National Corrections Academy will offer training to local correctional personnel working in prisons, community corrections and jails. The Academy will train over 3,500 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

1. *Planning and site acquisition.*—This activity reflects the costs of efforts to obtain suitable sites for approved construction projects, including site purchase and development and facility design. In 1984, funds are requested for the planning and site acquisition of two Federal Correctional Institutions to be located in the northeastern United States.

2. *New construction.*—This activity represents costs associated with the construction of new facilities in order to reduce overcrowding, close large and antiquated institutions, and provide a safe and humane environment for staff and inmates. In 1984, construction will begin on a Metropolitan Correctional Center in Los Angeles, Calif., and a Federal Correctional Institution in the northeastern United States.

3. *Modernization and repair of existing facilities.*—This activity includes rehabilitation and renovation of buildings, necessary modifications to accommodate new correctional programs, rehabilitation or replacement of utilities systems, and repair projects at existing facilities. In 1984, funds in the amount of \$5.6 million will be available for approximately 400 minor repair projects at existing institutions. An additional obligation of \$1.5 million will be incurred for the Oxford, Wis., lease/

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide additional industrial employment opportunities at existing and planned institutions.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing oper-

ations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Justice Assistance Improvement Act of 1979 provided authority for limited financial and technical assistance to States and local units of government to reduce crime and juvenile delinquency, and to improve the quality of the criminal justice system. The Act also provided funds, through the National Institute of Justice and the Bureau of Justice Statistics, to encourage basic and applied research and to gather and disseminate accurate and comprehensive justice statistics. The Juvenile Justice and Delinquency Prevention Act of 1974, as amended, places within the Office of Juvenile Justice and Delinquency Prevention responsibility for

the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. The juvenile justice program is being terminated because the principal objectives of the program have been achieved to the extent which is practicable. The Office of Justice Assistance Research and Statistics provides staff support and coordinates the activities of the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, and the Bureau of Justice Statistics as well as administering the Public Safety Officer Benefits program.

1. *Juvenile justice formula grants.*—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency. No new budget authority will be provided in 1984 since the majority of the Administration's goals have been met in this area.

2. *Juvenile justice programs.*—This program supports the development and implementation of new approaches, techniques, and methods with respect to juvenile delinquency programs. No new budget authority will be provided in 1984 since the majority of the Administration's goals have been met in this area.

3. *Public safety officers' benefits program.*—Funds are used to pay \$50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty.

4. *Crime control programs.*—This activity provides for expenditures from past Law Enforcement Assistance Administration programs which were not authorized by the Justice System Improvement Act of 1979. Also included are programs which were authorized by the Justice System Improvement Act of 1979 and are being terminated: criminal justice formula grants program, national priority grants program, general criminal justice grants program, training, and crime prevention programs.

5. *Research, evaluation, and demonstration programs.*—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and the dissemination of the results of such research efforts.

6. *Justice statistical programs.*—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations.

7. *Management and administration.*—Funds provide for the direction, operation, and administrative support.

This account provides for a flexible and decentralized system of Federal and local programs of training and other services for economically disadvantaged persons, designed to lead to permanent gains in employment. Such programs are authorized by the Job Training Partnership Act.

1. *Grants to States.*—Includes block grants to provide financial assistance to States and territories to design and operate training programs to meet their training and employment needs, grants to operate the summer youth employment and training program, and grants for programs to meet the needs of workers displaced from their jobs due to technological and other changes in the economy. Seventy percent of block grant funding will be used for training, including remedial education and basic skills, institutional training, and on-the-job training.

2. *Federally administered programs.*—Provides program support for Job Training Partnership Act activities, administration of the targeted jobs tax credit, and additional training assistance through nationally administered programs for special segments of the population that have particular disadvantages in the labor market. Among groups to be served are Indians and other native Americans, migrant and seasonal farmworkers, and veterans. Also included is the Job Corps which provides basic literacy and arithmetic skills and vocational skills training for youth aged 14–21 with severe educational and economic disadvantages, primarily through a national network of residential centers. In 1984 about 107 centers operated by States and localities and private profit and non-profit contractors will serve about 80,000 economically disadvantaged, unemployed, and out-of-school youth.

This program provides part-time work opportunities in community service activities for unemployed, low-income persons aged 55 and over. The 1983 appropriation finances this program through June 30, 1984. After this, the program will be incorporated into a proposal to consolidate social service programs for older Americans under the provisions of title III of the Older Americans Act, administered by the Department of Health and Human Services.

1. *Payments to former Federal personnel.*—Funds are provided to the States for payment of unemployment compensation to eligible ex-servicemen. The Miscellaneous Revenue Act of 1982 (Public Law 97-362) transferred, effective October 1, 1983, the payment of unemployment compensation benefits to eligible ex-servicemen to the Federal Employees' Compensation Account in the Unemployment Trust Fund.

2. *Trade adjustment assistance.*—Adjustment assistance allowances are paid to workers as authorized by the Trade Act of 1974, as amended. The authorization for this program expires September 30, 1983. Obligations in 1984 are for benefits for weeks of unemployment that occurred prior to the expiration.

3. *Unemployment assistance and payments under other Federal unemployment programs.*—Benefits are paid to workers under Public Law 95-250, which ex-

panded Redwood National Park. Reimbursements from the Federal Emergency Management Agency provide Federal disaster unemployment assistance.

This proposal for later transmittal would finance additional weeks of unemployment benefits under proposed legislation for workers with demonstrated attachment to the labor force who lost their jobs through no fault of their own. The benefits would be available from April 1, 1983, until September 30, 1983. Workers could choose to have the dollar value of the benefits for which they qualify applied instead to offset their wages in new jobs. Employers will thus have an incentive to hire them and their employment should increase.

1. *Unemployment compensation.*—Administrative grants are made to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel as well as trade adjustment assistance to eligible individuals. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies. Contingency funds are available only to meet increases in the costs of administration resulting from changes in State law, increases in the number of claims filed and claims paid, or increased salary costs resulting from changes in State compensation plans.

2. *Employment service.*—Public employment offices across the Nation financed by allotments to States under the Wagner-Peyser Act provide no-fee employment services to workers seeking jobs and employers seeking workers. Activities serving national needs, including interstate clearance of job listings and labor certification of aliens, are conducted through specific agreements between the States and the Federal Government. Collection of general-purpose labor market information to meet national needs will also be covered by specific State-Federal agreements.

In 1982, amendments to the Wagner-Peyser Act provided States with greater flexibility in the planning and operation of their basic employment services. Beginning in 1984, each State's allotment will be determined by formula. The amount requested in 1984 is equivalent to the 1983 appropriation, adjusted for expected cost increases.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. Advances made to the Federal employees compensation account in the Unemployment trust fund, advances made to the extended unemployment account in the Unemployment trust fund to finance Federal supplemental compensation benefits, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable. All other advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, without interest, to the general fund of the Treasury.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient. The request reflects legislative action that would reduce the need for advances to the Black Lung Disability Trust Fund as indicated under that account.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax, are also paid. Temporary Federal Supplemental Compensation

tion benefits authorized by the Miscellaneous Revenue Act of 1982 and the Surface Transportation Assistance Act of 1982 are financed with Federal general revenues. The Federal tax pays the costs of Federal and State administration of unemployment insurance and 97% of the costs of the employment service.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel and Postal Service employees based on Federal and Postal Service employment after December 31, 1980. Effective October 1, 1983, unemployment compensation to eligible ex-servicemembers will also be made from this account as provided by the Miscellaneous Revenue Act of 1982. Benefits paid are reimbursed to the Federal Employees Compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the unemployment trust fund and other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

This wholly-owned government corporation administers programs of mandatory termination insurance to prevent loss of pension benefits under covered private, defined-benefit pension plans if plans terminate or if multiemployer plans are unable to pay benefits. Terminated plans are taken over by the Corporation. The Corporation assumes control of their assets, administers them in a trust fund held in a private bank, and takes responsibility for paying benefits. The Corporation also provides repayable assistance to insolvent multiemployer plans when necessary to pay benefits and to forestall termination and subsequent Corporation responsibility to pay benefits.

Regulations issued.....	12	22	9

1. *Administration.*—Provides executive direction, financial planning and control, legal support, program development and operations and other support functions.

2. *Benefit payments.*—Checks are issued when due to pay status participants and other beneficiaries in plans which have terminated.

Checks issued.....	28,353	44,253	52,758
	318,933	458,781	700,611

3. *Financial assistance.*—If multiemployer-sponsored plans become insolvent the Corporation gives repayable loans to enable the plans to continue paying benefits. Financial assistance to an insolvent plan is made only after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

Financing.—Sources of financing are per capita annual premiums from ongoing covered plans, assets from terminated plans, investment income, and amounts due the Corporation from the sponsors of terminating plans (employer liability). Also, the Corporation is authorized to borrow up to \$100 million from the U.S. Treasury. No borrowing is anticipated for the budget year. Terminations of single employer plans have exceeded expectations. The budget contains a request to Congress to increase the premium single employer plans must pay on each covered participant in order to eliminate the deficit.

1. *Enforcement of wage and hour standards.*—This activity works to obtain compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act, the Farm Labor Contractor Registration Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Prevailing wages are determined and employment standards enforced under various Federal procurement acts. In 1984, approximately 465,000 persons are expected to be aided under the Fair Labor Standards Act, through assessing employers for underpayments and securing agreements to pay the workers. Through the special minimum wage program, 460,000 persons will be aided by certificates issued and employment authorized. In Government contracts, 42,000 persons will be aided through assessing employers for underpayments and securing agreements to pay the workers. Under the Farm Labor Contractor Registration Act program, approximately 712,000 persons will be aided through registration and enforcement.

2. *Federal contractor EEO standards enforcement.*—The Office of Federal Contract Compliance Programs (OFCCP) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, relating to the hiring and promotion of physically and mentally handicapped individuals, is included in this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1984, about 11,900 compliance actions will be taken with respect to contractor employment practices.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

3. *Federal programs for workers' compensation.*—Under this income maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

4. *Executive direction and support services.*—This activity includes planning, review and analysis, research and evaluation, budget and finance, Federal-State coordination, personnel management, employee development, management systems implementation, and data processing operations. Major goals in 1984 will include continued efforts to eliminate internal fraud, waste, and abuse; the improvement of management information and automated data processing systems, and closer coordination and cooperation with State governments.

1. *Federal Employees' Compensation Act benefits.*—Currently, more than 47,750 claimants are receiving long-term compensation benefits for job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes loss of job time. Workers suffering noncontroverted, traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical

costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency. The request reflects proposed legislative action to eliminate the cost-of-living increase now scheduled to be effective in 1984.

2. Longshore and harbor workers' compensation benefits.—Under the Longshoremen's and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, in the form of an excise tax on mined coal tonnage. These monies are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. The request reflects proposed legislative action to eliminate increases in 1984 Federal pay, to which these compensation payments are indexed. In addition the fund pays all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, the Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1981, \$1,510 million; 1982, \$1,793 million; 1983, \$1,948 million; and 1984, \$2,047 million.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act (33 U.S.C. 944; 31 U.S.C. 725).

These trust funds are available for payments of additional compensation for second injuries. When a second injury results in a permanent partial disability which, combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

1. *Safety and health standards.*—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or employee health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically sound; and (4) the standard is cost-effective when compared with alternative regulatory proposals providing equal levels of protection.

2. *Enforcement.*—The Occupational Safety and Health Act of 1970 provides for enforcement of Federal standards in States declining to assert jurisdiction and for grants to assist States in administering and enforcing State standards. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities and by encouraging

the cooperative protection efforts of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, the investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and inspections for serious health and safety hazards.

3. *Technical support.*—Technical assistance is provided on all aspects of standards setting, variances, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. The economic and environmental impacts of proposed standards are analyzed.

4. *Compliance assistance.*—This activity contributes to the balanced use of the authority provided by the Act through a variety of employer and employee assistance activities. Under cooperative agreements, State agencies are reimbursed for 90% of the costs of providing free onsite consultation to employers upon request. Grants are awarded to assist organizations develop their capacity to provide occupational safety and health training for workers and employers. Employers are encouraged to establish voluntary labor-management and self-inspection protection programs. This activity also provides leadership and assists agencies in implementing job safety and health programs to protect Federal workers. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

5. *Safety and health statistics.*—Statistics on occupational fatalities, injuries, and illnesses are collected and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

6. *Executive direction and administration.*—These activities include executive direction, planning and evaluation, management support, legislative liaison, intragovernmental affairs, and administrative services.

1. **Enforcement.**—Enforcement of the Federal Mine Safety and Health Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, recommendations to reduce working hazards, and on-site education and training assistance. The request includes proposed amendments to the 1977 Act which would enable the Secretary of Labor to target enforcement resources where they will be most effective in protecting miner safety and health.

2. **Assessments.**—This activity assesses civil monetary penalties for violations of safety and health standards.

3. **Educational policy and development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies and provides classroom instruction at the National Academy for MSHA personnel, other Government personnel, and the mining industry. States are encouraged to develop training programs through grants and technical assistance.

4. **Technical support.**—This activity provides technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or improve mining practices. It also collects and analyzes data relative to the cause, frequency, and circumstances of accidents.

5. **Program administration.**—This activity provides for general administrative functions and collection of civil monetary penalties.

1. *Executive direction.*—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

2. *Legal services.*—Includes enforcement of Federal labor statutes and legal advisory, legislative, and litigation services related to the statutes administered by the Department.

3. *International labor affairs.*—Integrates all international labor programs and foreign economic policy within the Department; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

4. *Administration and management.*—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment and provides for consistent and constructive internal labor-management relations throughout the Department.

5. *Adjudication.*—Conducts formal hearings and renders timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices, and other labor-related areas.

6. *Promoting employment of the handicapped.*—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically and mentally handicapped persons.

7. *Women's bureau.*—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

9. *Veterans employment service.*—Identifies policies and programs to serve and meet employment, unemployment assistance, and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services.

10. *Civil rights.*—Ensures full compliance with title VI of the Civil Rights Act of 1964 and other regulatory nondiscrimination provisions in programs receiving financial assistance from the Department of Labor and promotes equal opportunity in these programs and activities.

Comparable amounts for 1982 (\$678 thousand), and 1983 (\$707 thousand) are included above.

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (29 U.S.C. 563):

1. *Administrative management services.*—Provides a broad range of administrative services, including procurement, contracting, printing, mailing, messengers, motor pool, photographing, visual exhibits, accounting, payroll and voucher payments, and supply and property management.

2. *Field services.*—Provides centralized services from the Department's 10 regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services.

3. *Facilities management.*—Beginning in 1983, manages the Frances Perkins Building, which is the Department's headquarters, under the terms of an agreement with the General Services Administration.

4. *Penalty mail and telecommunications.*—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

Financing.—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Operating results.—The fund ended 1982 with a net operating income of \$808 thousand. These funds were collected for the automation of financial processes and management information. Unneeded balances of \$2.2 million accumulated in prior years from charges designed to finance the phaseout of the Department's computer center are being transferred to the general fund in 1983. The phaseout has been completed.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

This title may be cited as the "Department of Labor Appropriation Act, [1983] 1984".

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.]

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.]

SEC. [503] 501. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. [504] 502. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. [505] 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which we contribute to improve conduct, supervision, or management of those functions or activities.

SEC. [506] 504. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. [507] 505. The Secretaries of Labor, Education, and Health and Human Services are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. [508] 506. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [509] 507. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. [510] 508. The Secretaries of Labor, Education, and Health and Human services are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Serv-

ice", and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. [511] 509. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

[SEC. 512. Section 104 of Public Law 97-276 is deemed to charge no amount appropriated by section 132, 134, 137, 141, or 142 of that joint resolution to any appropriation, fund, or authorization contained in this or any other measure whenever enacted.]

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, [1983] 1984".

Note.—The activities financed in "Reopening consulates" in 1983 are presented in these schedules and are proposed to be financed in this account in 1984. Budget authority and outlays are distributed by account above.

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State.

1. *Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional and regional bureaus of the Department. Public affairs, congressional affairs, and inspection, audit, and investigation activities are included.

2. *Diplomatic relations with foreign countries.*—This includes representation of the United States and its citizens abroad, primarily for political and economic negotiations and for reporting and analysis.

3. *Diplomatic relations through international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities. Included are resources to support U.S. missions to international organizations abroad, as well as domestically-located missions to the United Nations and the Organization of American States.

4. *Conduct of consular affairs.*—Activities included are overseas and domestic visa and American citizen services. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance

General and special funds—Continued

SALARIES AND EXPENSES—Continued

[REOPENING CONSULATES]—Continued

of passports, emergency assistance to American citizens abroad, and passport fraud detection and investigation.

5. *Technical support programs.*—These encompass data processing efforts, personnel and physical security, training and development programs, worldwide telecommunications and courier services, and medical services.

6. *Administrative and staff activities.*—These include normal domestic and overseas administrative services such as personnel, budgeting, accounting, and procurement.

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for the interest on the unfunded liability and disbursements attributable to military and naval services: a full 100% in each year.

These funds are used for payment of the U.S. share of the expenses of eleven international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Pacific Salmon Commissions regulate their respective fisheries, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control, and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments.

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Title 23 U.S.C. ("Highways") and other supporting legislation provide authority for the various programs of the Federal Highway Administration designed to improve highways throughout the Nation. The 1982 Surface Transportation Assistance Act (STA Act) provides authorizations from 1983 through 1986 in general, and makes several significant changes to the Federal-aid highways program.

In summary, the 1984 budget contemplates \$13,932.5 million in budget authority and \$12,041.1 million in outlays. The following table compares 1984 program level (obligations) with those of prior years.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway transportation by regulation of motor carriers engaged in interstate commerce. For 1984, the Motor Carrier Safety program consists of three major activities: operations, contract research and development, and administrative support.

Under the 1973 Highway Act, States and localities may withdraw previously approved Interstate segments and apply the authorized funds to substitute transit or highway projects. Legislation enacted for 1982 and 1983 provided funding for highway substitute projects from general funds. The 1982 STA Act provides contract authority out of the Highway Trust Fund for 1983 through 1986. The contract authority for this program will be part of the Federal-aid highways account.

Financial assistance is made available to States for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs. The 1982 STA Act provides 1983 and 1984 contract authority at significantly higher levels than those provided for 1982. A new 85% minimum allocation is available for use on any major Federal-aid program.

1. *Interstate construction.*—Of the 42,500-mile system, 40,739 miles were open to traffic as of September 30, 1982. Emphasis will be on completing the Interstate by the early 1990's.

2. *Interstate 4R.*—To preserve the Nation's investment in the Interstate highway system, a major expansion of the Interstate program of resurfacing, restoring, rehabilitation, and reconstruction has been undertaken.

3. *Interstate transfer grants.*—Provides financial assistance to States and localities which withdraw previously approved Interstate segments and apply authorized funds to substitute highway projects.

4. *Primary system.*—Provides financial assistance to States for highway construction, reconstruction and related planning for the primary highway system.

5. *Rural and small urban transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the secondary and urban systems in rural and small urban areas (with populations of 50,000 or less). Assistance is also provided for forest and public lands highways.

6. *Urbanized area transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the urban system in urbanized areas (with populations of more than 50,000). In addition funds can be used for capital expenditures for buses and other public transportation facilities.

7. *Bridge program.*—Provides financial assistance to States for projects designed to replace or rehabilitate bridges with deficiencies that are hazardous to the safety of motorists.

8. *Consolidated safety programs.*—Provides financial assistance to States for safety improvements to the

highway systems, including hazard elimination, pavement marking, and rail highway crossings.

9. *Administration and research.*—Provides for executive and general administrative and research expenses of Federal-aid highways. These funds are expended under the limitation on general operating expenses.

10. *Other.*—Provides for emergency relief, Federal lands and other miscellaneous programs.

The improvements in the Federal-aid highway program highlighted above are designed to focus Federal involvement and funding generally on the programs of highest Federal interest (e.g., Interstate), and to increase flexibility to the States to use Federal-aid program funds to address their particular needs and priorities. The preeminent Federal interest in completing and preserving the Interstate is reflected in the program and funding changes enacted in the 1982 STA Act for this highway system.

Federal aid obligation limitations of \$12.6 billion will be proposed for 1984.

HIGHWAY SAFETY RESEARCH AND DEVELOPMENT—Continued

This appropriation, established in 1975, seeks to identify, correct, and evaluate those critical elements that contribute to loss of life, disabling injuries, and property damage on American highways. The emphasis of research is to provide workable and timely solutions to a set of critical safety problems. This program will attempt to meet the increasing demands for solutions to urgent safety problems such as traffic management in construction and maintenance zones, and new longer range initiatives in safety hardware, driver aids, and measuring system performance.

Funds appropriated for this account are transferred to the General operating expenses limitation where the program is administered in conjunction with other research and development programs of the Federal Highway Administration.

MOTOR CARRIER SAFETY GRANTS

For necessary expenses to carry out the provisions of section 402 of Public Law 97-424, \$10,000,000 to be derived from the Highway Trust Fund to remain available until September 30, 1987.

The motor carrier safety grant program authorized by the 1982 STA Act is designed to enhance enforcement by utilizing the State enforcement personnel already in place and available to enforce violations by intrastate operators subject to the Secretary's jurisdiction as "affecting" interstate commerce, as well as violations by interstate carriers operating in a particular State. Recent State efforts to improve motor carrier safety have shown that State enforcement can be effective. The motor carrier safety inspection and weighing demonstration program has also demonstrated the effectiveness of federally funded, State-operated inspectional activity.

Federal grants for enforcement of commercial motor vehicle safety standards may not be used to maintain efforts already undertaken by State governments. The purpose of the grant program is to raise the level of enforcement, not to substitute Federal for State and local dollars.

The Appalachian Development Highway System is designed to improve the accessibility of Appalachia, to reduce highway transportation costs to and within Appalachia, and to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. The 1984 budget provides \$80 million for highway construction and program administration. Legislation to be proposed will transfer the responsibility for this program from the Appalachian Regional Commission to the Secretary of Transportation and fund the program out of the Highway Trust Fund. The program will provide, over a 3-year period starting in 1984, for the completion of ongoing highway construction projects, repayment to States for prefinanced projects, and maintenance of a program in all States as the program is being phased out.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General fund to the Highway trust fund of revenue from the gasoline tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law.

The budget reflects an increase in the taxes supporting the highway trust fund equivalent to an increase in the gasoline tax of 5¢ per gallon. Of this increase, 4¢ is designated for use on the various Federal-aid highway programs while 1¢ will be utilized to fund a capital grant program for mass transit systems. In addition to an increase in the gasoline tax from 4¢ to 9¢ per gallon, other taxes have been restructured to: eliminate some smaller taxes on inner tubes and lubricating oil; reduce the tax collection burden; and improve the equity between costs imposed on the highway system by various types of vehicles and their tax burden.

The status of the fund is as follows (in thousands of dollars):

Unexpended balance brought forward:	1982 actual	1983 estimate	1984 estimate

1. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways.

2. *Technical assistance, U.S. dollars advanced from foreign governments.*—The Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. Currently, these services are being rendered in Costa Rica, Saudi Arabia, and Kuwait.

3. *Contributions for highway research programs.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment.

4. *Advances from State cooperating agencies.*—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Federal Highway Administration.

The Federal-Aid Highway Act of 1968 authorized \$300 million for the establishment of a right-of-way revolving fund. This fund is utilized to make cash advances to the States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from causing a significant increase in construction costs.

The initial legislation for this program required the States to construct the highway and reimburse the revolving fund within seven years from the date of the advance. The 1973 Highway Act extended the required time limit on construction to 10 years and the 1976 Highway Act extended the time limit indefinitely, if deemed necessary by the Secretary.

In 1984, gross obligations will be limited to \$30.0 million with increased funds for Federal-aid highways provided in the STA Act and greater emphasis on rehabilitation rather than new construction. The proposed limitation should be sufficient to fund all worthwhile projects.

1. *Rulemaking programs.*—Covers rulemaking activity relative to the promulgation of Federal motor vehicle safety standards for new and used motor vehicles, tires, and equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; international harmonization of standards; and regulatory reform.

2. *Enforcement programs.*—Provides for the enforcement of programs described under the rulemaking activity, including manufacturer compliance with motor vehicle safety and automotive fuel economy standards, investigation of safety-related motor vehicle defects, and surveillance of odometer tampering.

3. *Highway safety programs.*—Provides for technical assistance to the States in the conduct of their highway

safety programs; demonstration programs emphasizing alcohol countermeasures and safety belt usage to reduce highway fatalities and injuries; and operation and improvement of the national driver register. The involvement of the private sector, including corporate groups, associations and citizen groups, is being stimulated and encouraged. In this manner, the impact of federal funds and efforts are increased through leveraging. The program also supports the Presidential Commission on Drunk Driving.

4. *Research and analysis.*—Provides motor vehicle safety and highway safety research and development in support of all NHTSA programs, including the collection and analysis of data to identify safety problems, develop alternative solutions, and assess costs, benefits, and effectiveness. Research will continue to improve vehicle crashworthiness performance, accident avoidance characteristics of cars, trucks and motorcycles, and support for increasing safety belt usage and alcohol control. The budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, cooperative research, and program evaluation activities.

5. *Social research and development.*—Provides for programs to develop information for consumers including crashworthiness and maintainability information for motor vehicles, and to evaluate federal motor vehicle safety standards and program effectiveness.

6. *Office of the administrator.*—Provides for overall executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

7. *General administration.*—Provides for planning, program evaluation, and basic administrative and supporting services for programs of this administration.

HIGHWAY SAFETY RESEARCH AND DEVELOPMENT—Continued

This account represents portions of the operations and research account authorized under 23 U.S.C. 403 and paid from the Highway Trust Fund for the following activities:

1. *Highway safety programs.*—Provides for headquarters and field staff to assist the States in the conduct of their highway safety and demonstration programs.

2. *Research and analysis.*—Provides for highway safety research in support of NHTSA programs, including the collection and analysis of data to determine the relationship between driver performance characteristics and crashes causing death or personal injury. Research is also undertaken to improve safety belt usage and alcohol control. The 1984 budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

3. *Office of the Administrator.*—Provides for the pro rata contribution to the cost of executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

4. *General administration.*—Provides for the pro rata contribution to the cost of planning, program evaluation, and basic administrative and supporting services for programs of this administration.

Note.—The activities financed under the State and Community Highway Safety (Liquidation of Contract Authorization) account in 1982 and 1983 are presented in these schedules and are proposed to be financed in this account in 1984. Budget authority and outlays are distributed by account above.

1.a. *Safety formula grants.*—Grant allocations are determined on the basis of a statutory formula established under 23 U.S.C. 402. Individual States use this funding in areas which have the greatest potential for achieving safety improvements and reducing traffic fatalities and accidents. Activities are centered predominantly on efforts to control the drinking driver; increase traffic law enforcement; improve the quality of emergency medical services, principally through additional training of State and local personnel; and improve the collection and analysis of traffic accident data.

1.b. *Safety formula grant administration.*—Under 23 U.S.C. 402, up to 5% of amounts authorized for safety formula grants are permitted to be used for reimbursement to the operations and research account for grant administration. Funds of \$3.99 million are required to

cover the expenses of administering Federal grant activity in 1984.

2. *School bus driver training.*—Grant allocations are determined on the basis of a statutory formula established under 23 U.S.C. 406. Funds are distributed to States for school bus driver training.

3. *Alcohol safety incentive grants.*—Grant allocations will be made under 23 U.S.C. 408, to those States which adopt and implement effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol. These grants will be made in accordance with established criteria and will only be used to implement and enforce such programs. Public Law 97-364 establishes a two tier grant system. The first tier, i.e., basic grant, amounts to 30 percent of each State's apportionment under the above safety formula grant program if the State meets specified minimum criteria. The second tier is a supplemental grant of up to 20 percent of the State's apportionment if it qualifies for the base grant and implements additional specified alcohol traffic safety measures.

4. *Safety education and information.*—Pursuant to the Surface Transportation Assistance Act of 1978 as amended, pilot projects were initiated in 1983 to demonstrate and evaluate programs to achieve maximum measurable effectiveness through the use of television and radio in reducing traffic accidents, injuries and deaths.

1. *Salaries and expenses.*—In 1984, with the exception of Railroad safety, all staff and administrative expenses for the Federal Railroad Administration will be financed under this new appropriation. Previously these expenses were appropriated to the Office of the administrator, Railroad research and development, Rail service assistance, and Northeast Corridor improvement program. The offices within this appropriation are responsible for setting and fulfilling FRA goals and objectives related to resolution of national problems confronting the railroad industry and for support of day-to-day FRA operations.

2. *Contractual support.*—Policy Support, R&D Support and Special Projects are the three subprograms under this activity. Major components of these subprograms include: (1) Economic, Industry and System Analyses, (2) Northeast Rail Studies, (3) Rail Passenger Analysis, (4) Equipment and Track Safety Testing, and (5) Washington Union Station rent and maintenance. The first three items are for developing policies to address current and future issues facing railroads, labor

and shippers. Equipment and track safety testing directly supports the Federal Railroad Administration's safety regulatory functions. Public Law 97-125 allowed for the transfer of Washington Union Station from the Department of Interior to the Department of Transportation.

Reimbursable program.—Other Government agencies provide reimbursements for information on research and development testing, evaluation and analyses.

3. Minority Business Resource Center.—The Minority Business Resource Center was funded through an allocation to the Office of the Secretary in 1982. In 1983 and 1984 the program is funded directly by the Office of the Secretary.

4. Local rail service assistance.—This program has provided financial assistance to States for operating subsidies or lines scheduled for abandonment and for track rehabilitation of nonabandoned lines. The program terminated in 1983.

5. Loan guarantee defaults.—In 1983 and 1984 interest will become due to the Department of the Treasury on rollover of promissory notes issued in prior years.

1. Federal enforcement.—This program provides salaries and related expenses of field staff. Safety field operations are designed to motivate the railroads to comply with Federal safety laws and regulations to reduce the number of railroad related accidents/incidents. Federal inspectors monitor railroads emphasizing passenger and hazardous material routes. Budgeted field positions for 1984 will remain at the 1983 level of 379.

2. Automated track inspection program.—Two of FRA's automated track geometry vehicles have been transferred to Conrail and Amtrak under licensing agreements. Conrail and Amtrak will make the data from automated track inspections available to FRA. No funds are requested for this program in 1984.

3. Safety regulation and program administration.—This program includes salaries and related expenses of safety headquarters personnel together with data gathering and dissemination, planning and evaluation activities. The ongoing responsibility of this program is to develop and subsequently issue new or revised standards, procedures, and regulations to provide a safer railroad operating and working environment. The 1984 budget will fund these activities and the implementation of the System Safety Plan.

4. Grants-in-aid for railroad safety.—This program assists States in paying salaries and expenses incurred for State safety inspectors authorized under section 206 of the Railroad Safety Act of 1970. No funds are requested in 1984 for this program.

1. *Conrail labor protection.* In 1984, \$20 million is requested to provide protection to Conrail employees who are deprived of employment as a result of the actions taken under authority of the Regional Rail Reorganization Act, as amended, and the Northeast Rail Service Act of 1981.

2. *Conrail workforce reduction.*—The Conrail workforce reduction program was authorized by the Northeast Rail Service Act of 1981. In 1982, \$100 million was provided to eliminate unnecessary positions in Conrail. No funds are requested in 1984.

3. *Conrail title V labor benefits.*—The Northeast Rail Service Act of 1981 terminated labor protection benefits under title V of the Regional Rail Reorganization Act and authorized a new Conrail labor protection program by reimbursing Conrail and other carriers for protection costs incurred prior to October 1, 1981, the effective date of the repeal. No funds are requested in 1984.

As authorized by section 1139(b) of Public Law 97-35, funds have been appropriated to facilitate the transfer of rail commuter service from Conrail to other operators. These funds helped to defray the one-time only

start-up costs of commuter service and meet other transition expenses connected with the operation of commuter services. Funds were also provided to the Chicago Regional Transit Authority, as authorized by section 601(d) of the Rail Passenger Service Act, as amended, to be used in connection with the cost of commuter service and capital improvements. No funds are requested in 1984.

In 1981, the Government began valuation settlements with railroads for properties transferred to Conrail in 1976. Total settlements made through October 1982, amount to \$2.8 billion. One major settlement remains to be made with Central Jersey Industries and several minor settlements with smaller railroads. The obligations shown in 1983 and 1984 reflect interest payments DOT will owe to Treasury on unliquidated borrowings.

1. *Construction.*—This final \$100 million appropriation provides for the completion of upgrading of rail passenger service between Boston, Massachusetts and Washington, D.C. Major improvement work emphasizes the most heavily travelled segments of the corridor with primary emphasis on safety and reliability rather than trip time improvements. Major construction projects that will begin or continue in 1984 include track improvements to the right-of-way between Forest Hills and Back Bay Station, section improvements from South Cove to Boston South Station, signal system installation and rehabilitation from Washington to Boston and rehabilitation of the Wilmington service facility.

Reimbursable program.—Collections are made from Federal and non-Federal agencies in connection with cost-sharing improvement projects, such as stations.

2. *System engineering/program management and administration.*—System engineering involves system modeling, standards, design, and requirements criteria. Program management provides construction management including monitoring, supervising, inspecting and evaluating. In 1984 construction management will be performed by FHWA and contract personnel.

3. *Public grade crossing elimination.*—No funds are requested for this program in 1984.

The National Railroad Passenger Corporation (Amtrak) is a private corporation. Federal assistance is provided through the Department of Transportation in the following manner:

1. *Operating grants.*—In 1984, funds will permit operation of the system currently being operated with the exception of the Cardinal route which is not projected to meet the Congressional criteria for continued operation. The funding level assumes increased labor productivity and new legislation requiring full State funding of joint State and federally funded service under sections 403 (b) and (d) of the Rail Passenger Service Act. In keeping with the Amtrak Improvement Act of 1981, the ratio of revenues to costs, excluding capital costs, must be at least 50 percent.

2. *Labor protection and capital grants.*—In 1984, funds will permit right-of-way and station improvements and continue upgrading of rolling stock. In 1984, legislation will be submitted to limit Amtrak's potential labor protection obligations.

The Emergency Rail Facilities Restoration Act authorized the Secretary of Transportation to make loans for the purpose of restoring or replacing railroad facilities, equipment, or services damaged or destroyed as a result of the natural disasters that occurred during June 1972 and provided that no loan application could be approved later than June 27, 1973. The program was terminated in 1974. On October 1, 1978, the unexpended balance was returned to the general fund of the Treasury. 1982 and 1983 activity reflects deferred interest on outstanding loans.

This fund was established to finance capital and operating assistance grants, contracts, and loan activities authorized by the Urban Mass Transportation Act of 1964, as amended. Authorizations were extended to 1986 by the Surface Transportation Assistance Act of 1982.

1. *Urban discretionary grants.*—Funding for this program, in 1984, will be provided by the Mass Transit Account of the Highway Trust Fund (see Mass Transportation Capital Fund following).

2. *Urban formula grants.*—Provides for grants to urbanized areas or parts thereof on the basis of a formula for the payment of operating expenses and for the construction, acquisition, modernization, and improvement of facilities and equipment. No funds are requested for 1984 because this program is replaced by the formula grant program.

3. *Nonurban formula grants.*—Provides transit operating and capital grants on the basis of a formula to areas with populations below 50,000. In 1984, funds for this program are provided within the new formula grant program.

4. *Formula grants.*—Provides grants on the basis of a formula to State and local agencies for mass transportation operating and capital expenses. 97.07% of the funds are provided to cities over fifty thousand in population—2.93% to cities under fifty thousand. Total operating assistance available to cities of over fifty thousand population will not exceed \$275,000,000, and for cities of under fifty thousand population, will not exceed \$18,500,000. Capital expenses include construction, acquisition, modernization, and improvement of existing facilities and equipment, deployment of new technology, and technical planning assistance.

5. *Interstate transfer grants.*—Grants under this activity are authorized by the Federal-Aid Highway Act of 1973, whereby States and localities may withdraw previously approved interstate segments and apply the authorized funds to other transit or highway capital projects. (Highway substitute projects are included in the budget of the Federal Highway Administration.)

6. *Washington Metro.*—Grants under this activity are authorized by the 1979 Amendments (Public Law 96-184) to the National Capital Transportation Act whereby the Washington Metropolitan Area Transit Authority is authorized Federal funds for construction of the Metrorail system. The Administration has committed to fund construction of 75 miles of this system.

7. *Research and training.*—Provides for grants and contracts for the purpose of developing, testing, and demonstrating new facilities, equipment, techniques, and methods (analytical, operational, and managerial), and improving mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants to public and private, nonprofit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation.

8. *Administrative expenses.*—Provides for administration of transit programs.

9. *Social research.*—Provides for transit related training and development and testing of techniques and methods to improve efficiency and service.

10. *Waterborne demonstration.*—Further funding is not necessary; the project has been fully funded from prior year appropriations.

11. *Commuter rail operating subsidies.*—No funds are requested for this program.

General and special funds—Continued

WASHINGTON METRO—Continued

FORMULA GRANTS—Continued

12. *Direct loans and loan guarantees.*—These program activities provided direct loans for advance land acquisition and guarantees rail system construction bonds issued by the Washington Metropolitan Area Transit Authority. No change in the status of these activities is planned for 1984. No additional commitments will be made.

The Surface Transportation Assistance Act of 1982 provides for transfer, from the general fund to a new Mass transit account in the highway trust fund, the equivalent of one cent per gallon of motor fuels taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations for liquidating cash are authorized from this fund to meet expenditures for the mass transportation capital fund.

The status of the fund is as follows (in thousands of dollars):

	1982 actual	1983 est.	1984 est.
Unexpended balance brought forward, start of year			481,500
Cash income during the year, Governmental receipts:			
Motor fuel taxes.....		536,000	1,086,000

Unexpended balance carried forward, end of year		481,000	1,375,500

This appropriation provides financial assistance from the Mass transit account of the highway trust fund which was established by the Surface Transportation Assistance Act of 1982.

Formula grants.—Funding authorized in 1983, from the Mass transit account of the highway trust fund will provide grants on the basis of a formula to State and local agencies for mass transportation capital activities in urban and non-urban areas. An obligation limitation of \$550 million is proposed for 1983. Funding for these

activities in subsequent years will be derived from the general fund (see Urban Mass transportation fund).

Discretionary grants.—In 1984, funding from the Mass transit account of the highway trust fund will provide discretionary grants for purposes such as rehabilitation, construction, and modernization of transit facilities and equipment, deployment of new technology, innovative transit demonstration projects, and technical planning assistance. An obligation limitation of \$1.1 billion is proposed in 1984. Through 1983, funding for these activities was derived from the general fund.

Note.—Beginning in 1984, the inactive Safety Regulation and Civil Supersonic Aircraft Development Termination appropriations are consolidated under the Operations appropriation.

1. *Operations*—(a) *Operation of traffic control system*.—This activity covers the operation of a national system of air traffic management in the United States, its territories and possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 25 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at major civil airports to guide traffic movements at and in the vicinity of the

airports. A system of domestic and international flight service stations provide weather and other information to pilots and relay traffic control data between ground controllers and pilots.

(b) *Installation and materiel services*.—This activity covers procurement, contracting and materiel management programs; administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leased space for which payment is made to General Services Administration (GSA); and other logistics support functions.

(c) *Maintenance of traffic control system*.—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; operational leased communications; and technical operation and maintenance of a national network of air navigation aids and traffic control facilities in the United States, and its territories and possessions.

(d) *Administration of aviation standards program*.—This activity exists to promote flight safety of civil aviation by assuring: the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards. In addition, this activity covers the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program, and to ensure the medical fitness of personnel in the national airspace system.

(e) *Development direction*.—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development appropriation.

(f) *Administration of airports program*.—This activity includes the following work programs: (1) administration of an airport grant program for airport planning and development; (2) maintenance of the national plan of integrated airport systems; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; and (5) safety certification of airports serving air carriers utilizing aircraft with a seating capacity of more than 30 passengers.

(g) *Headquarters administration*.—This activity was funded as a separate appropriation in 1983, but is being proposed as an activity within this appropriation in 1984. It provides administrative services at the headquarters location of the Federal Aviation Administration including procurement, executive direction, communications control, public affairs, legal, planning/policy, accounting, budget, civil rights, international aviation, personnel management, labor relations, management/data systems, and centralized training.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Dulles International Airports which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

Combined revenues are expected to exceed the 1984 appropriation by \$12.9 million. Washington National is expected to produce an operating profit of \$14,985 thousand and Dulles International an operating profit of \$10 thousand, resulting in a combined operating profit of \$14,995 thousand. The deduction of \$7,164 thousand in depreciation and interest for the two airports results in a net profit of \$7,831 thousand.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

The following table reflects activity at the airports:

This appropriation finances construction of major improvements and expansion of facilities at Washington National Airport and Dulles International Airport. Projects are undertaken whenever necessary to ensure the capability of these airports to adequately, safely, and efficiently meet air travel needs of the public and

to promote development of aviation activities in general.

At Washington National Airport, funds are requested to rehabilitate airfield facilities, airport buildings, and utility systems; construct utility systems; and provide needed facility alterations and improvements.

At Dulles International Airport, funds are included to rehabilitate airport buildings and airport roads, and provide needed facility alterations and improvements.

In addition to the premium program, binders are also issued to cover aircraft, persons, and property. These binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exists indemnity agreements under which the DOD and DOS agree to reimburse the Department of Transportation for all losses paid to air carriers sustaining damage to their aircraft by an insured peril while said aircraft is operating under a contract to the interested Department.

Administration costs are out of fee receipts (49 U.S.C. 1531, as amended 75 Stat. 210) and interests earned through authorized investments.

¹ Includes \$7,450 thousand transfer from Grants-in-aid for airports.

The Tax Equity and Fiscal Responsibility Act of 1982 (26 U.S.C. 9502) provides for the revenues received in the Treasury from passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet obligations for airport planning and development and noise compatibility planning and programs; facilities and equipment; research, engineering and development; and a portion of operations.

¹Reappropriated in accordance with provisions of Public Law 97-248.

The Airport and Airway Improvement Act of 1982 (Public Law 97-248, as amended) authorizes the Secretary of Transportation to incur obligations for airport planning, noise abatement planning and development grants through 1987. Obligations in 1984 are proposed to be \$700 million.

Note.—Includes \$800 thousand for activities previously financed from facilities, engineering and development, Federal Aviation Administration 1982; \$1,292 thousand; 1983, \$3,500 thousand.

This appropriation finances the installation of new equipment, construction and modernization of facilities, procurement of aircraft for flight inspection of facilities, and procurement of experimental facilities for the engineering and development program. Operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

The 1984 funding level is necessary to modernize and expand the existing Federal airway system to meet forecast aviation growth through the 1990's. The current system is technologically outmoded as well as labor and energy intensive, thus making it expensive and inefficient to operate and maintain. The budget activities include:

1. *Air route traffic control centers.*—Long-range radar, communications and automation equipment provide air traffic controllers information on aircraft positions at distances up to 185 miles.

2. *Airport traffic control towers.*—Terminal area radar, communications and automation equipment aid air traffic controllers in handling air traffic at distances up to 60 miles.

3. *Flight service facilities.*—Flight service stations and associated facilities provide flight assistance to pilots, particularly general aviation pilots.

4. *Air navigation facilities.*—Very high, medium and low frequency facilities are used to define airways and air routes and provide distance, direction and weather information to pilots. Precision landing systems, distance measuring equipment and visual lighting aids assist pilots in making final approaches to airport runways.

5. *Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations.

6. *Aircraft and related equipment.*—This activity includes the procurement, modification and/or replacement of aircraft and equipment to inspect the accuracy and other characteristics of navigation and traffic control aids from the air.

7. *Development, test and evaluation facilities.*—This activity provides for leasing and improvements of the plant and facilities at the Federal Aviation Administration Technical Center in Atlantic City, N.J.

The FAA conducts engineering and development programs to improve the national air traffic control system

and to increase its productivity and capacity to meet the expected air traffic demands of the future. These efforts are based upon exploiting current technology and applying system engineering techniques to the development and integration of new equipment into the total system. The agency also administers aviation medical research aimed at increasing the personal effectiveness of air traffic controllers.

These programs are conducted under the direction of the agency's technical personnel, through contracts with qualified private firms, universities, individuals and other Government agencies.

1. *Air traffic control.*—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the surveillance of aircraft by tracking radars and control center processing of flight information received from pilots, airline dispatchers, flight service stations and the surveillance system through a national communications network. The high-speed or real-time, computerized processing of this data for the direct use of air traffic controllers is a key to increasing system productivity.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

2. *Advanced computer.*—This activity modernizes the Air Traffic Control System by providing for an advanced automation system to accommodate air traffic services forecasted demands in the post-1990's. This system will increase automation system capacity, reliability, functional capability, and productivity. Program efforts include design, development, and testing of the Host Computer and advanced automation system.

3. *Navigation.*—This activity provides for modernization, expansion, and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation. The requested 1984 funds will support research and development activities for enroute navigation to assess candidate navigation systems for use in the post-1995 period. Continued research in precision landing aids, flight deck information management and Head-Up Display (HUD) is also planned.

4. *Aviation weather.*—This activity provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of systems for the detection and avoidance of wind shears is also included in this activity.

5. *Aviation medicine.*—This activity provides for conducting aeromedical research directed toward identifying and eliminating those physiological and psychological factors harmful to personnel engaged in operating the traffic control system or which may jeopardize flight safety.

RESEARCH, ENGINEERING AND DEVELOPMENT (AIRPORT AND AIRWAY
TRUST FUND)—Continued

6. *Aircraft safety.*—This activity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft by assuring the design, flight performance, and airworthiness of aircraft and development of systems and devices to prevent and deter sabotage in the civil air transportation system. Funds requested for 1984 will continue research in fire safety, including cabin fires, and development and testing of anti-misting fuels; research in transport and general aviation safety; and flight safety.

7. *Environment.*—Principal efforts provided for under this activity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system. In 1984, research will continue in air pollution and noise control, primarily associated with certification and enforcement requirements.

Certain costs of operating and maintaining air navigation and air traffic control facilities, formerly financed from the general fund, are reimbursed to the Operations appropriation from the airport and airway trust fund. The expected level of 1984 trust fund receipts together with the uncommitted balance will permit an increase in the payment of operations and maintenance expenses as well as the costs of airport development, airway facilities investment, and research programs. For 1984, the reimbursement for operations proposed from the trust fund is calculated by applying a factor of 1.57 to the proposed airport grant obligation limitation.

The Airport and Airway Improvement Act of 1982 (49 U.S.C. 2205) authorizes use of the airport and airway trust fund as the source of financing the Aviation Weather Services Program administered by the National Oceanic and Atmospheric Administration (NOAA) of the Department of Commerce. The 1984 estimate includes \$26.7 million for these services, which will be provided by NOAA on a reimbursable basis. NOAA provides meteorological observations, forecasts, warnings, and advisories and the Federal Aviation Administration is responsible for the dissemination of aviation weather information (including pilot briefings) used to support the National Airspace System. The new financing arrangement will fairly allocate costs of the aviation weather services program to the beneficiaries of the services provided.

AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM

[In carrying out the program for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), during fiscal year 1983 new commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a

maximum passenger capacity of sixty seats or less or a maximum cargo payload of eighteen thousand pounds or less, and when combined with the aggregate of all guarantees made during fiscal year 1982 shall not exceed in the aggregate \$100,000,000 in principal amount. During fiscal year 1984, no commitments for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), shall be made. (Department of Transportation and Related Agencies Appropriation Act, 1983.)

MEMORANDUM

2299	U.S. contingent liability for guaranteed loans outstanding, end of year	659,818	630,605	567,428
------	-------------------------------------------------------------------------------	---------	---------	---------

¹Amount shown is based on the full principal amount of loans that are partially guaranteed by the U.S. Government. The comparable amount of limitation enacted on the basis of contingent liability is \$100,000 thousand in 1982.

²The 1983 appropriation act imposes a limitation of \$100 million (of full principal) for 1982 and 1983 combined. The amount shown as a limitation in 1983 represents the residual available under this two-year limitation.

³This amount includes guaranteed loans executed during the previous fiscal year but with no cash drawdown until the next fiscal year, as follows: 1982, \$184,344 thousand and 1983, \$2,806 thousand.

The program for guarantee of aircraft purchase loans under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), expires on October 23, 1983. No new loan commitments will be made during 1984.

Funds for operating expenses represent 64% of the total Coast Guard program level. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas.

1. *Search and rescue.*—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert capable of responding to notice of a distress incident.

WORKLOAD DATA

Responses to search and rescue cases:	1982 actual	1983 estimate	1984 estimate
—by Coast Guard regular forces	57,100	57,000	54,000
—by Coast Guard (auxiliary)	17,770	18,000	21,000

Property loss prevented (in thousands)	\$1,200,000	\$1,100,000	\$1,100,000

2. *Aids to navigation.*—A network of 47,250 manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. Administrative control is exercised over the construction, maintenance, and operation of bridges across navigable waters of the United States.

3. *Marine safety.*—The Coast Guard reviews plans and specifications for the construction or alteration of merchant vessels; conducts periodic inspections; investigates casualties; and sets standards, procedures, and

practices under which merchant marine personnel are licensed and regulated. The Coast Guard operates a boat safety standards program and provides boater information and support of the Coast Guard Auxiliary and the individual State boating safety programs. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways.

5. *Enforcement of laws and treaties.*—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction. Fisheries enforcement involves living marine resources, while general law enforcement concerns drug smuggling, illegal immigration, hijacking/theft of vessels and other unlawful activities.

6. *Ice operations.*—Polar ice operations are performed by icebreakers and ice-strengthened cutters which operate in support of Coast Guard programs, and the requirements of other agencies on a fully reimbursable basis. Domestic ice operations are performed on the navigable waters of the United States. Also included are certain marine science activities.

7. *Military readiness.*—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating Expenses appropriation where estimated costs of a project are \$125 thousand or less, or where renewals and replacements involve less than 75% of the original facility. Although most of the facilities listed below are multimission in nature, they are for this presentation highlighted only under their primary mission areas.

1. *Search and rescue.*—In 1984 the medium-range surveillance aircraft procurement program will be completed. The short-range recovery helicopter procurement program will continue. Construction, replacement, and/or renovation programs at selected shore sites and facilities are also provided for.

2. *Aids to navigation.*—This activity will finance renovation of existing buoy tenders or construction of a new prototype tender pending the outcome of studies completed in 1983. Improvements to existing and the establishment of new waterway aids to navigation, the continuation of the lighthouse automation and modern-

ization program and the construction, replacement, and renovation programs at selected shore sites and facilities will contribute to this mission.

3. *Marine safety.*—Efforts to facilitate the marine safety mission will center on the acquisition, rehabilitation, renovation, and improvement of selected vessels, aircraft, and shore facilities.

4. *Marine environmental protection.*—For 1984 this activity is enhanced by the procurement of the AIREYE sensor package for the medium-range surveillance aircraft, procurement of the short-range recovery helicopters, and the relocation of the Gulf Strike Team to Mobile, AL.

5. *Enforcement of laws and treaties.*—Funding in this activity is primarily associated with the acquisition of the 270-foot cutters, the fleet renovation and modernization of the 378-foot high endurance cutter, the mid-life maintenance availability of the 210-foot medium endurance cutter, and phase II of the long-range search aircraft upgrade.

6. *Ice operations.*—Procurement of the short-range recovery helicopters and phase II of the aircraft upgrade are the principal efforts in this activity.

7. *Military readiness.*—Major emphasis in this activity relates to the 378-foot WHEC fleet renovation and modernization program.

The Coast Guard Reserve Forces provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested will provide a Ready Reserve of 18,500, including a Selected Reserve of 12,000.

1. *Initial training.*—This activity encompasses direct costs of initial training for three categories of nonprior service trainees.

2. *Continuing training.*—Direct costs of officer and enlisted drills and annual active duty for training are programed under this activity.

3. *Operation and maintenance of training facilities.*—All costs for the operation and maintenance of Reserve training facilities are programed under this activity.

4. *Administration.*—This activity encompasses all administrative costs of the Reserve Forces program.

5. *Miscellaneous services for other accounts.*—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

1. *Search and rescue.*—Ship/helicopter interface projects will be continued and/or completed. Improved probability of detection methodology projects and the Search and Rescue Satellite Demonstration project will be continued.

2. *Aids to navigation.*—Continuing projects include applied research to develop loran-C for use in precision navigation in restricted waters and to assess the effect of the global positioning navigation system on the maritime community.

3. *Marine safety.*—Commercial vessel safety research will provide a knowledge base to support various maritime regulations and standards. Emphasis will be directed toward crew/passenger safety and exposure to hazardous cargo vapors in the marine environment.

4. *Marine environmental protection.*—Emphasis is directed toward enhancing detection, identification, and quantification of pollutant spills, and development of new systems and procedures for the control and cleanup of those spills.

5. *Enforcement of laws and treaties.*—This activity encompasses programs for multimission command, control and surveillance systems, advanced marine vehicles, and development of techniques to support the law enforcement efforts.

6. *Ice operations.*—This program will benefit from work in the broad programs, energy, and multimission project areas.

7. *Military readiness.*—This program will be enhanced by work in the broad programs, energy, and multimission project areas.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, onshore facility, or offshore facility do not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators.

MARITIME ADMINISTRATION

The programs administered by the Maritime Administration (MarAd) are authorized by the Merchant Marine Act, 1936, and other related acts. The Agency

promotes the development and maintenance of an American merchant marine for commercial and defense needs; grants subsidy aid for operation of vessels by American flag operators; conducts maritime research and development; insures construction loans and mortgages for construction or conversion of vessels; maintains in a stand-by condition Government-owned fleets; and trains cadets to become licensed merchant ship officers.

The following table shows the funding for the MarAd programs for which detail is furnished in the budget schedules:

Funds were appropriated in 1983 which are being used for acquisition of three vessels for the National Defense Reserve Fleet. No funds are requested in 1984, since the Administration proposes further extension of authority for U.S.-flag operators to construct, reconstruct or acquire vessels outside of the United States under section 615 of the Act. Costs associated with acquisition of vessels for the reserve fleet and the provisions of national defense features which would enhance sealift capability are proposed to be funded in Navy appropriations.

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORITY)

For the payment of obligations incurred for operating-differential subsidies as authorized by the Merchant Marine Act, 1936, as amended, \$401,294,000, to remain available until expended. (46 U.S.C. 1119, 1171-85, additional authorizing legislation to be proposed.)

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

The Merchant Marine Act of 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing essential ocean-shipping services. A strong U.S. Merchant Marine is important to the national security and to the development of its foreign commerce. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs. The 1984 request provides funds for existing operating-differential subsidy contracts. No new contracts are included.

RESEARCH AND DEVELOPMENT

For necessary expenses for research and development activities, as authorized by law, \$11,500,000, to remain available until expended. (46 U.S.C. 1119, 1121, 1122, 1205; additional authorizing legislation to be proposed.)

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

The major objective of the research and development program is to develop methods, equipment, and systems to make the U.S. shipbuilding and ship operating industries more efficient, competitive, and productive.

In 1984, the research and development program will focus on research projects in four major program areas as follows:

1. *Advanced ship development.*—This program involves projects to achieve greater productivity in the building of ships and projects directed toward the development of new and improved ship machinery.

2. *Advanced ship operations.*—This program supports improving the efficiency, competitiveness, and safety of U.S.-flag ship operations through the development of

advanced management operating techniques using computerized systems, improving fleet control by means of advanced navigation/communication systems, improving cargo handling methods and equipment, and improving intermodal cargo movement.

3. *Research facilities.*—This program provides for research facilities operations, and investigation and simulation of new problems related to ship operations, safety, and design.

4. *Advanced maritime technology.*—This program investigates advanced technological concepts and requirements, and formulates and conducts specific systems analysis and systems development projects.

5. *Arctic shipping.*—This program supports navigation research in the U.S. Arctic in coordination with the U.S. Coast Guard. The 1983 estimate includes funds for operation of Coast Guard ice breaking vessels. No funds are requested in 1984.

1. *Maritime education and training*—(a) *Merchant Marine Academy.*—This activity provides for operating the Merchant Marine Academy at Kings Point, N.Y. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Approximately 260 officers will graduate in 1984.

(b) *State marine schools.*—Assistance is provided to States in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers. This assistance involves direct payments to the State schools, student incentive payments to cadets, and maintenance of vessels provided for use as training ships. An estimated 732 officers will graduate from these schools in 1984.

(c) *Additional training.*—This activity provides for costs of administration of the Merchant Marine Academy and State marine school programs at the bureau level, and for the conduct of supplementary training courses required for merchant marine personnel.

2. *National security support capability.*—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and national emergency and for emergency preparedness activities.

3. *Operating programs*—(a) *Development of waterborne transportation systems.*—This activity provides for direct technical and administrative costs of programs for development and construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives.

(b) *Use of waterborne transportation systems.*—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation.

(c) *General administration.*—This activity provides for overall executive direction and general administrative functions of the Maritime Administration.

¹ This amount is available if needed in the interest of national security.

The Merchant Marine Act of 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. merchant marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) established a limitation on MarAd obligations guaranteed and outstanding at any time under Title XI of the Merchant Marine Act amounting to \$9.5 billion. For 1984, appropriation language is proposed to impose an annual limitation of \$900 million on new guaranteed loan commitments. Of that amount, \$300 million will be held in reserve, to be used only if needed in the interest of national security.

The estimated level of new commitments and guaranteed construction loans and mortgages, and the estimated aggregate level of guarantees in force and commitments outstanding are shown in the following table:

Budget program.—Administrative expenses incurred in the operation of the Federal ship financing fund are paid from income to the fund. Reimbursements to the Operations and training appropriation are anticipated at \$6,000 thousand in 1983 and \$6,300 thousand in 1984. Direct loans in the form of advances to operators to forestall possible defaults and to satisfy claims on defaulted mortgages are estimated at \$25 million in 1983 and in 1984.

Financing.—The fund receives income from insurance premiums on construction loans and mortgages, fees, and interest on U.S. Government securities and mortgages held directly. The payment of administrative expenses is made from this income, while payments for advances to operators and redemption of defaulted loans and mortgages are paid from income, equity, and borrowing from the Treasury Department. No borrowings are anticipated in 1983 or 1984.

of the Secretary of Transportation. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States; and to process advances received from Federal agencies.

Budget program.—The 1984 program anticipates continued maintenance of the Ready Reserve Fleet and activation and operation of one or more ships as directed by the Navy.

Financing.—Expenses are principally financed by reimbursements from Federal agencies.

The Maritime Administration is authorized to insure against loss or damage from marine war risks until commercial insurance can be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program. Authority to underwrite insurance has been extended until September 30, 1984.

Budget program.—It is estimated that during 1984 insurance coverage will be provided for approximately 610 U.S.-flag ships, 1,950 Lighter Aboard Ship (LASH) and Seabee barges, and 145 foreign-flag ships owned by U.S. citizens. The program also includes provision for second seamen's war risk insurance covering the crews of 18 vessels under contract with the Military Sealift Command.

Financing.—The War risk insurance revolving fund was established under 46 U.S.C. 1288. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income.

The Saint Lawrence Seaway Development Corporation is a wholly owned Government Corporation responsible for the operation, maintenance, and development of the U.S. portion of the St. Lawrence Seaway between

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION—Continued

Montreal and Lake Erie. Corporation objectives are to continue to operate the system in a safe, reliable and efficient manner from funds received from user charges, while continuing to interface with a multitude of diverse U.S. and Canadian interests that share the common goal of expanding commerce on the Great Lakes/Seaway system. The Corporation will continue its extensive structural repair and maintenance programs during the winter down time period to ensure continuity of operations during the navigation season. The Corporation's 1984 budget reflects the activities to accomplish these objectives as follows:

1. *Administrative expenses (limitation).*—This program provides for management and administration of the Corporation, and includes finance, legal, civil rights, procurement, personnel administration, and other related support services.

2. *Operations.*—This program provides for operation of all facilities and for planning and development activities. Operations are conducted on a 24-hour day, 7-day week basis throughout the navigation season with maintenance functions being performed throughout the year. Some essential maintenance items are necessarily deferred to the non-navigation season when both operations and maintenance forces are utilized for their accomplishment. Development efforts are directed toward increased usage of the system.

3. *Replacements and improvements.*—This program provides for necessary replacement of aging equipment, machinery, and tools in addition to continuing work on improvements. The Corporation also expects to continue a cooperative program with the Canadian Seaway Authority and the U.S. and Canadian Coast Guards to develop an all-weather navigation system for the St. Lawrence River.

On the basis of the toll levels which will take effect with the opening of the 1983 navigation season and traffic projections agreed to by the U.S. and Canadian entities in October 1982, the Corporation estimates its revenues for 1984 will be \$12.5 million.

During the fiscal year, the Corporation proposes to apply \$11.1 million for operations and \$1.4 million for replacements and improvements. Of the \$11.1 million to be applied to operations, \$9.3 million will be used for operations and maintenance (including \$1.0 million for extraordinary repairs to Eisenhower Lock) and \$1.8 million for administrative expenses.

The mission of the Research and Special Programs Administration is to serve as a research, analytical, and technical development arm of the Department for long-range and multimodal research and development, as well as, to conduct special programs. Particular empha-

sis is given to pipeline safety, transportation of hazardous cargo by all modes of transportation, safety, security, facilitation of domestic and international commerce, and intermodal research and development activities, including programs within the university community. Responsibilities of the Administration are carried out under the following activities:

1. *Operations.*—Provides for salaries and expenses as well as for central supervisory and management functions, including a management information system necessary for overall planning and direction; for management and execution of transportation programs involving passenger and cargo security, facilitation services, national emergency plans/preparedness, and management of the Transportation Safety Institute; and for the conduct of hazardous materials and pipeline safety regulatory and enforcement programs.

2. *Research and development.*—Provides for research and development to complement research programs of other operating administrations, to stimulate industry efforts to advance transportation technology, to develop multimodal and intermodal systems and technology, and to support the hazardous materials and pipeline safety regulatory programs.

3. *Social research and development.*—Provides for research and development of multimodal and long-range transportation problems, particularly through the involvement of the university community. The University Research program is funded under this activity.

4. *Grants.*—Provides for grants-in-aid to State agencies of up to 50% of the actual costs of conducting a gas pipeline safety program as authorized by the Natural Gas Pipeline Safety Act of 1968.

The Working Capital Fund finances research, evaluation, and analysis activities undertaken at the Transportation Systems Center (TSC) in Cambridge, MA. TSC performs multidisciplinary research for each of the operating administrations and the Office of the Secretary. Work at TSC is funded through negotiated agreements which define the programmatic activities to be undertaken at TSC as directed by each of the funding organizations.

Changing domestic transportation issues have shifted the emphasis of TSC's work from its original technological focus to include such areas as safety research and analysis, policy analysis support, operations research

and analysis, cost allocation, and system maintenance methods. Areas to be addressed in 1984 include:

Federal Highway Administration.—Analysis of highway design, maintenance and rehabilitation techniques, and federal investment and cost allocation.

National Highway Traffic Safety Administration.—Passenger vehicle safety research, medium and heavy duty vehicle safety research, and national motor vehicle accident and safety data analysis.

Federal Railroad Administration.—Track safety research and operations and rail policy support.

Urban Mass Transportation Administration.—Bus systems improvement and assessment, rail construction and rehabilitation effectiveness, improved management and maintenance techniques, service and management demonstration evaluations, and technology sharing.

Federal Aviation Administration.—Air traffic control, navigation, aviation weather, advanced automation, aviation safety analysis, standards and certification analysis, and policy and planning support.

Coast Guard.—Navigation, command and control, operations efficiency studies, maritime communications, information management, and energy conservation.

Research and Special Programs Administration.—Transportation information and data management, pipeline safety, navigation and emergency transportation research.

Office of the Secretary.—Regulatory research, modeling and forecasting, safety research, transportation industry analysis, technology sharing, and system acquisition technical support.

1. *General administration.*—This appropriation finances the costs of policy development and central supervisory and coordinating functions necessary for the overall planning and direction of the Department. It covers the immediate secretarial offices as well as those of the assistant secretaries and the general counsel. Also covered are staff assistance and supervision of general management and administration in the Department. In addition, the Office of the Secretary provides services on a reimbursable basis for technical assistance to transportation projects, and participation in intergovernmental planning groups.

2. *The Minority Business Resource Center.*—This activity provides contractual support for the Center, which now operates in the Office of the Secretary to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of the restructuring of the Nation's railroads and other modes of transportation.

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

1. *Transportation policy and planning.*—This research provides the foundation for development of transportation policy, for coordination of national level transportation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

2. *Special programs.*—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, technology sharing, and evaluation of departmental programs.

The working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed by the operating administrations and offices being served.

The activities of the working capital fund have been consolidated as follows:

1. *Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

2. *Support services activities* include imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; facilities and space management; and security services.

3. *Library services* include information retrieval and security services.

4. *Transportation computer activities* include computer time-sharing services and the transportation computer center.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. None of the funds provided in this Act shall be available for the planning or execution of programs the commitments for which are in excess of **[\$600,000,000]** \$700,000,000 in fiscal year **[1983]** 1984 for grants-in-aid for airport planning, and development, and noise compatibility planning and programs **[and development.]** notwithstanding section 506(e)(4) of the Airport and Airway Improvement Act of 1982.

SEC. 303. None of the funds provided under this Act shall be available for the planning or execution of programs, the obligations for which are in excess of \$10,000,000 in fiscal year **[1983]** 1984 for "Highway-related safety grants".

SEC. 304. None of the funds provided under this Act shall be available for the planning or execution of programs, the total obligations for which are in excess of **[\$95,000,000]** \$77,000,000 in fiscal year **[1983]** 1984 for **["State and community highway safety"]** "Safety formula grants" authorized under 23 U.S.C. 402: Provided, That none of **[the]** these funds **[under "State and community highway safety"]** shall be used for construction, rehabilitation or remodeling costs or for office furnishings and fixtures for State, local, or private buildings or structures.

SEC. 305. Total obligations for grants under the "Mass transportation capital fund" during 1984 shall not exceed \$1,100,000,000: Pro-

vided, That notwithstanding any other provision of law, total amounts of contract authority authorized for fiscal year 1984 in section 21(a)(2)(b) of the Surface Transportation Assistance Act of 1982 for grants under "Mass Transportation Capital Fund" shall be available for obligation through fiscal year 1987: *Provided further, That obligations from the fund in fiscal year 1984 shall be used only for the purposes of section 21(a)(2)(b) of the Surface Transportation Assistance Act of 1982.*

SEC. [305] 306. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. [306] 307. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. [307] 308. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

SEC. 308. None of the funds provided under this Act for Urban formula grants shall be made available to support mass transit facilities, equipment, or operating expenses unless the applicant for such assistance has given satisfactory assurances in such manner and forms as the Secretary may require, and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours shall not exceed one-half of the rates generally applicable to other persons at peak hours: *Provided, That the Secretary, in prescribing the terms and conditions for the provision of such assistance shall (1) permit applicants to continue the use of preferential fare systems for elderly or handicapped persons where those systems were in effect on or prior to November 26, 1974, (2) allow applicants a reasonable time to expand the coverage of operating preferential fare systems as appropriate, (3) allow applicants to continue to use preferential fare systems incorporating the offering of a free return ride upon payment of the generally applicable full fare where any such applicant's existing fare collection system does not reasonably permit the collection of half fares, and (4) allow applicants to define the eligibility of "handicapped persons" for the purposes of preferential fares in conformity with other Federal laws and regulations governing eligibility for benefits for disabled persons.]*

SEC. 309. None of the funds contained in this Act shall remain available for obligations beyond the current fiscal year unless expressly so provided herein.

SEC. 310. (a) Notwithstanding any other provision of law [except Public Laws 97-125 and 97-216], the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year [1983] 1984 shall not exceed [\$8,100,000,000] \$12,600,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, projects covered under section 147 of the Surface Transportation Assistance Act of 1978, or section 9 of the Federal-Aid Highway Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978, or section 118 of the National Visitors Center Facilities Act of 1968, or section 157 of title 23, United States Code.

(b) For fiscal year [1983] 1984 the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and

highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31, [1982] 1983 no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, [1983], 1984 revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during the fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and [forest highways] the Federal Lands Highway Programs.

SEC. 311. Notwithstanding any other provision of law, any bond issued under section 5 of the Act of May 13, 1954 (68 Stat. 94; 83 U.S.C. 985), is hereby canceled together with the obligation to pay such bond and section 12(b)(5) of such Act is hereby repealed: *Provided, That paragraphs (10), (11), and (12) of section 4 of the Act of May 13, 1954, are hereby redesignated as paragraphs (11), (12), and (13) respectively and a new paragraph (10) is enacted to read as follows:]*

["(10) may retain toll revenues for purposes of eventual reinvestment in the Seaway.".]

SEC. [312] 311. None of the funds provided in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of \$60,000,000 in fiscal year [1983] 1984 for the "Offshore Oil Pollution Compensation Fund".

SEC. [313] 312. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

SEC. [314] 313. None of the funds provided in this Act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

(1) School street crossing in Groton, Connecticut; and

(2) Broadway Extension crossing in Stonington, Connecticut.

SEC. 315. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.]

SEC. 316. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation.]

SEC. 317. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within 24 months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.]

SEC. 318. For fiscal year 1982 and thereafter, the Inspector General of such department or establishment, or comparable official, or if

there is no Inspector General or comparable official, the agency head or the agency head's designee, shall submit to the Congress along with the budget justification an evaluation of the agency's progress to institute effective management controls and improve the accuracy and completeness of the data provided to the Federal Procurement Data System regarding consultant service contractual arrangements.]

[SEC. 319. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. [320.] 311. None of the funds provided in this Act shall be available for the implementation or execution of programs, the obligations for which are in excess of \$50,000,000 in fiscal year [1983] 1984 for the "Deepwater Port Liability Fund".

[SEC. 321. Notwithstanding any other provision of law, no funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall hereafter be apportioned to any State which imposes a vehicle width limitation of more or less than 102 inches on any segment of the National System of Interstate and Defense Highways, or any other qualifying Federal-aid highways as designated by the Secretary of Transportation, with traffic lanes designed to be a width of twelve feet or more: *Provided*, That, notwithstanding any other provision of law, certain safety devices which the Secretary of Transportation determines as necessary for safe and efficient operation of motor vehicles shall not be included in the calculation of width: *Provided further*, That, notwithstanding any other provision of law or of this paragraph, a State may grant special use permits to motor vehicles that exceed 102 inches: *Provided further*, That, notwithstanding any other provision of law, no withholding of apportionment shall be imposed upon a State by virtue of the provisions of this paragraph prior to October 1, 1983.]

[SEC. 322. (a) Any air carrier having a claim for compensation under section 406 or 419(a)(7)(B) of the Federal Aviation Act of 1958, decided by the Civil Aeronautics Board (hereinafter referred to as the "Board") may bring an action directly on the claim in the United States Claims Court as provided in section 10(a) of the Contract Disputes Act of 1978 with respect to claims which have been decided by a contracting officer. Failure by the Board to issue a final decision on a final claim within one year after it was filed with the Board, or by the date of enactment of this section, whichever is later, shall be deemed to be a decision by the Board denying the claim, and will authorize an action on the claim as provided in this section. This section shall apply to any claim decided, or deemed to have been decided, by the Board after January 1, 1981, including any claim remanded to the Board by a United States court of appeals, irrespective of when the claim was filed with the Board. Any action under this section shall be filed within one hundred and twenty days after the claim has been decided or is deemed to have been decided by the Board, or within one hundred and twenty days after the date of enactment of this section, whichever is later. Any petition for review of a decision of the Board with respect to any such claim pending in a United States court of appeals on the date of enactment of this section shall be dismissed without prejudice upon motion of the petitioner.]

[(b) Except as provided herein, the following provisions of the Contract Disputes Act of 1978 shall apply with respect to any claim to which this section applies as if such claim were a claim with respect to a decision of a contracting officer under section 10(a) of such Act and as if the Board were a contracting officer:]

[(1) Section 12, relating to interest, which shall be payable by decision of the Board or the Court of Claims at the rates provided in such section, not to precede the date of enactment of the Contract Disputes Act of 1978.]

[(2) Section 13, relating to the payment of claims and judgments.]

[(3) Section 14(i), relating to the jurisdiction of the United States Claims Court.]

[(c) If an administrative law judge has issued an initial decision after a hearing on the record in the case before the Board, the court may, in its discretion, rely upon the evidence adduced at such hearing and may give such initial decision such weight as it deems appropriate.]

[SEC. 323. None of the funds provided by this Act shall be used by the Civil Aeronautics Board to substitute aircraft of lesser seating capacity or lesser than necessary pressurized altitude capability, for

the type of aircraft now prescribed for essential air transportation to any point in Alaska as set forth in Civil Aeronautics Board Order 80-1-167 without the prior concurrence of the applicable State agency of the State of Alaska.]

[SEC. 324. No funds appropriated under this Act shall be expended to pay for any travel initiated after January 1, 1983, by the Administrator of the Federal Aviation Administration as passenger or crew member aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: *Provided*, That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator within 6 hours local time of the desired time of arrival: *Provided further*, That this limitation shall not apply to costs incurred by any flight which is essentially for the purpose of inspecting, investigating, or testing the operations of any aspect of the Federal Aviation Administration system designed to aid and control air traffic, or to maintain or improve aviation safety: *Provided further*, That this limitation shall not apply to costs incurred by any flight in Department of Transportation aircraft which is necessary in times of emergency or disaster, or for security reasons, or to fulfill official diplomatic representation responsibilities in foreign countries: *Provided further*, That written certifications shall be issued quarterly on all flights initiated in the previous quarter subject to this limitation and shall be made readily available to Congress and the general public.]

SEC. [325.] 312. (a) Neither the Secretary of the department in which the Coast Guard is operating nor any other officer or employee of the United States shall approve any project or take any action which would interfere with the reasonable needs of navigation on the Columbia Slough, Oregon.

(b) For purposes of subsection (a) of this section, any bridge which is to be constructed across the Columbia Slough, Oregon, after the date of enactment of this section shall be deemed to provide for the reasonable needs of navigation on the Columbia Slough, Oregon, if such bridge provides at least thirty feet of vertical clearance Columbia River datum and at least eighty feet of horizontal clearance, as determined by the Secretary of the department in which the Coast Guard is operating.

SEC. 313. Section 322 of Public Law 97-369 is repealed.

[SEC. 326. Notwithstanding any other provision of law or of this Act, the Secretary of Transportation shall approve, upon request of the State of Indiana, \$300,000 to be made available from funds available for redistribution under 23 U.S.C. 118(b) for a project to relocate and encase certain water line facilities crossing under I-80 and I-94 in Hammond, Indiana. Such sums shall remain available until expended and shall be subject to any obligation limitations for Federal-aid highway programs.]

[SEC. 327. Notwithstanding any other provision of law, the Secretary of Transportation shall approve, upon request of the State of Indiana, not to exceed \$4,000,000, to be made available from funds available for redistribution under 23 U.S.C. 118(b) for the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-LaPorte County Line near Michigan City, Indiana. Such amount shall be subject to the obligation limitation enacted for fiscal year 1983 or any fiscal year thereafter on obligations for Federal-aid highways and highway safety construction programs.]

SEC. [328.] 314. Notwithstanding any other provision of this Act, the Secretary of Transportation is authorized to [transfer appropriated funds between] *adjust* the Coast Guard Operating expenses [appropriation and the] *limitation* on Coast Guard Headquarters administration [appropriation] and [between] the Federal Aviation Administration [appropriation for] Operations [and the Federal Aviation Administration appropriation for] *limitation* on Headquarters administration: *Provided*, That the Coast Guard and Federal Aviation Administration Headquarters administration [appropriations] *limitations* shall *not* be [neither] increased [nor decreased] by more than 7.5 per centum [by any such transfers]: *Provided further*, That any such [transfers] *adjustments* shall be reported promptly to the Committees on Appropriations and the appropriate authorizing committees in the House and the Senate.

SEC. 315. *Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: Provided, That rental payments under any such lease, contract, or occupancy on*

account of items other than such utilities, services or repairs shall be covered into the Treasury as miscellaneous receipts.

SEC. 316. No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation act, and all receipts which otherwise would be deposited to the credit of said Fund shall be covered into the Treasury as miscellaneous receipts. (Public

Law 97-377, making further continuing appropriations for the fiscal year 1983.)

SEC. 317. None of the funds provided in this Act shall be available for the planning or execution of programs, the obligations for which are in excess of \$15,000,000 in fiscal year 1984 for recreational boating safety assistance; Provided further, That notwithstanding any other provisions of law, no obligations may be incurred for the improvement of recreational boating facilities. ("Department of Transportation and Related Agencies Appropriations Act, 1983")

Note.—Includes \$2,831 thousand in 1983 for budget authority transferred from the nonenforcement Treasury bureaus to effect the centralization of audit and internal investigation functions within the Office of the Secretary pursuant to Department of the Treasury Reorganization Plan No. 26 of 1950. These functions were previously funded from:

		1982
Bureau of the Mint		\$535,000
Bureau of the Public Debt		917,000
Federal Law Enforcement Training Center		46,300
Bureau of Government Financial Operations		1,214,600
Total		2,712,000

A merger of the Salaries and Expenses and International Affairs Appropriations is proposed for 1984.

Data for 1982 and 1983 are shown in a merged format to permit comparison of those years with 1984.

1. *Secretarial policy and program development.*—The Secretary has primary responsibility for formulating and recommending domestic and international financial policy, economic policy, and tax policy; managing the public debt; and participating in the formulation of broad fiscal policies that have general significance for the economy.

2. *Inspector General.*—This activity is responsible for maintaining a comprehensive audit and internal investigation program. It is organizationally independent and reports directly to the Secretary and the Deputy Secretary.

3. *International affairs.*—The programs conducted within this activity are designed to provide the necessary analysis for and to implement international monetary and development financing policy. Additional staff support is provided in areas concerned with international investment, trade and balance of payments issues.

General and special funds—Continued

【OFFICE OF THE SECRETARY, SALARIES AND EXPENSES】—Continued

4. *Departmental policy and administrative services.*—This activity provides central administrative policies and guidance to the entire Department; the direct administrative support required for the Office of the Secretary operations; and computer support and services.

5. *Buildings maintenance and operations.*—This activity provides for maintenance and operation of the main Treasury Building and the Annex, including utilities and custodial and craftsmen services. In addition, this activity provides for all telecommunications facilities and services and the Federal buildings fund payment for all space occupied by the Office of the Secretary outside of the Treasury Building and the Annex.

6. *Repairs and improvements.*—This activity provides the funding for major repairs and improvements to the Treasury Building and Annex.

1. *Matching funds in primaries.*—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to an amount equal to the contributions each has received on or after the beginning of the calendar year immediately preceding the election year.

2. *Nominating conventions of parties.*—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive \$3 million each, plus a cost-of-living increase.

3. *Candidates for general elections.*—The eligible candidates of each major party in a Presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures.

The Secretary of the Treasury is authorized to deal in gold and foreign exchange and other instruments of credit and securities as deemed necessary, consistent with U.S. obligations in the International Monetary Fund (IMF), regarding orderly exchange arrangements. An Exchange Stabilization Fund, with a capital of \$200 million is authorized by law for this purpose (31 U.S.C. 822a). All earnings and interest accruing to this fund are available for the purposes thereof. Transactions in special drawing rights (SDR's) and U.S. holdings of SDR's are administered by the fund. U.S. drawings from the IMF are also advanced to the fund.

The principal sources of the fund's income have been the handling charges imposed on purchases and sales of gold for the account of the fund, profits on foreign exchange transactions, and interest on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

Due to the impracticability of forecasting fund transactions in foreign currency and foreign investment, projections are not provided for those items. However, as an offset to actual data and projections made in the budget for interest paid on U.S. Government securities, data for the interest income on fund holdings of U.S. Government securities is provided for 1982 and projected for 1983 and 1984. Holdings of U.S. Government securities amounted to \$3,011 million on September 30, 1982. The interest earnings on these securities is estimated to increase these holdings to \$3,171 million in 1983 and \$3,343 million in 1984. As required by Public Law 95-612, the fund no longer is used to meet administrative expenses.

¹ Pursuant to the Special Drawing Rights Act of 1968, Special Drawing Rights (SDR) allocated to or otherwise acquired by the United States are resources of the Exchange Stabilization Fund (ESF). SDR, once allocated, are permanent resources unless cancelled (which requires an 85 percent majority decision of the total voting power of the Board of Governors of the International Monetary Fund), the Special Drawing Account is liquidated, the International Monetary Fund is liquidated, or the United States chooses to withdraw from the Fund or terminate its participation in the Special Drawing Account. Except for payment of interest and charges on SDR allocations to the United States, the payment of the Exchange Stabilization Fund liability related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The Special Drawing Rights Act also authorizes the Secretary of the Treasury to issue Special Drawing Rights certificates to the Federal Reserve Banks in return for dollar deposits in amounts equal to the value of the SDR held. The certificates may be issued to finance the acquisition of SDR from other countries or to provide resources for financing ESF operations.

This trust fund was established by the State and Local Fiscal Assistance Act of 1972 to provide general revenue sharing payments to States and localities to supplement revenue sources. Payments to recipients are made at least quarterly. It is anticipated that the fourth quarter payment for each year will continue to be paid within the first 5 days of the succeeding year, as provided by law.

During 1982, 39,312 units of general purpose government were eligible to receive revenue sharing funds: 3,106 counties, 19,044 municipalities, 16,810 townships, and 352 Indian tribes and Alaskan villages.

In 1983 and 1984 it is anticipated that approximately the same number of units of general-purpose government will be eligible to receive Revenue Sharing funds.

The distribution formulas seek to match payments and local fiscal responsibilities by taking into account each jurisdiction's population, per capita income, and tax effort. Recipients may use the funds for any purposes that are legal purposes for uses of their own locally generated revenues.

The Federal Law Enforcement Training Center provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the participating organizations. Center personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center for common and specialized law enforcement training and for research in law enforcement training methods and curriculum content. The 1984 estimate provides for law enforcement training, maintenance and repair of facilities, planning and curricula development for the Center, and operation of living quarters, food service, and travel costs for the students. In addition, the Center has a

substantial reimbursable program to accommodate the needs of the participating organizations.

This appropriation provides for the costs of adapting the former Glynco Naval Air Station, near Brunswick,

Ga., for the permanent location of the Federal Law Enforcement Training Center. Because of the flexible nature of facilities, the campus-like training center will be able to accommodate in excess of 1,300 resident students. The total estimated cost to this appropriation for the facilities, equipment, and services is \$45.9 million.

1. *Disbursement and claims*—(a) *Payments*.—Payments are made through 8 regional offices for Federal civilian agencies, except the U.S. Postal Service, the U.S. Marshals Service, and certain Government corporations. These disbursing services are provided through the issuance of checks, letters of credit, and electronic funds transfer (EFT) payments. Claims for EFT payments are processed, and Federal Tax Deposit (FTD) forms and envelopes are prepared and mailed. The Federal tax deposit function will be transferred to the Internal Revenue Service as of December, 1983.

The total checks, savings bonds, and electronic funds transfer payments, and productivity relating to this function carried out by the Division of Disbursement follow:

3. *Banking and cash management*—(a) *Cash management*.—This activity is involved in the development, implementation, and maintenance of efficient and effective management of the Government's cash resources. It provides guidance to the system for advancing Federal funds under various grant programs and other programs through letters of credit; designates and supervises banks as Government depositories; controls U.S. foreign currency transactions to afford the best currency availability to the Government; develops applications for the use of electronic funds transfer for Government collections and payments; manages the direct deposit marketing program; and handles claims for the redemption of mutilated currency.

(b) *Federal Reserve bank operations*.—This activity provides for reimbursements to the Federal Reserve banks for maintenance of Treasury tax and loan accounts, Treasury general account processing, Automated Clearing House Services, and the U.S./Iran Claims Tribunal; and to commercial depositories under the treasury tax and investment program.

4. *General financial services*.—This activity provides for the payment of international and other claims; administering of loan agreements with those corporations and agencies that have authority to borrow from the Treasury; accounting, billing, and collecting for lend-lease transfers and surplus property sales to foreign governments; administration of the Government Losses in Shipment Act; and fiscal administration of various funds for which the Secretary of the Treasury is responsible.

The Chrysler Corporation Loan Guarantee Act of 1979 authorized the Chrysler Corporation Loan Guarantee Board to guarantee up to \$1.5 billion of Chrysler Corporation debt. The Board has guaranteed \$1.2 billion to date.

In accordance with the legislation, the board, consisting of the Secretary of the Treasury, the Chairman of the Federal Reserve Board, and the Comptroller General, is responsible for establishing and administering a loan guarantee program for the Chrysler Corporation. These responsibilities include: (1) review of the financing plan to assure its soundness and accuracy, (2) determination of the prospect of repayment of a guaranteed loan, (3) assessment and analysis of the economic merits and implications of the courses of action available under the Act, and (4) preparation of an annual report to Congress on Chrysler's activities.

Legislation will be proposed to eliminate a \$250 thousand trust fund, paying \$10 thousand in interest annually, which was established for the American Printing House for the Blind in 1879. Administration of the annual interest payment, which now amounts to less than 1% of the direct Federal appropriation to this institution is no longer cost-effective. The corpus of the trust fund would be transferred to the general funds of the Treasury.

The Energy Security Act established the U.S. Synthetic Fuels Corporation (SFC) to provide financial assistance for the production of synthetic fuels. Payments are made by the Secretary of the Treasury to the SFC as funds are required to meet the SFC's disbursement needs.

Appropriations are made to the Energy Security Reserve in the Treasury. The authority of the SFC to incur obligations will be limited by the level of appropriations to the Secretary of the Treasury. Of the amounts appropriated in 1980, \$6,212 million was not available for obligation until June 30, 1982.

This fund is for use by the U.S. Treasury in making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorers of the checks through reclamation procedure by this office. Benefits from these early settlements are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evi-

dences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency*.—Total deliveries of currency for 1983 and 1984 are estimated to be 4.5 and 5.0 billion notes. During 1982 the Bureau delivered 4.1 billion Federal Reserve notes.

(b) *Stamps*.—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1983 and 1984 are 30.5 and 30.8 billion stamps, respectively. In 1982, the Bureau delivered 34.0 billion stamps.

(c) *Securities*.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

(d) *Commissions, certificates, etc.*—This program is comprised primarily of Presidential and Department of Defense commissions and certificates, White House invitations, and identification cards for various Government agencies. It represents a small portion of the Bureau's total workload.

2. *Space utilized by other agencies*.—Charges are made to other agencies for services provided for space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services*.—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656, August 4, 1950 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 1982 resulted in an accumulated retained earnings of \$13.5 million.

Note.—Excludes \$1,066 thousand in 1983 transferred to Salaries and expenses, Office of the Secretary, Department of the Treasury for audit and internal investigation activities. A comparable amount for 1982 (\$917 thousand) is included above.

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

1. *Processing and accounting for—(a) Savings and retirement securities.*—This activity is concerned with the issuance, servicing, and retirement of savings bonds and notes and retirement-type securities, including: (1) The maintenance and servicing of individual accounts of owners of series H and HH bonds and the authorization of interest payments, and (2) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. These functions are performed directly by the Bureau of the Public Debt, by the Federal Reserve Banks as fiscal agents of the United States, and by the 40,000 qualified agents which issue and redeem savings bonds and notes.

NOTES

Excludes \$500 thousand in 1984 for activities transferred to the Economic and statistical analysis appropriation in the Department of Commerce.

Comparable amount for 1983 (\$500 thousand) is included above.

Includes \$16,361 thousand in 1984 for activities previously financed from: Salaries and expenses: 1982, \$12,657 thousand; 1983, \$14,233 thousand.

Excludes \$138,038 thousand transferred in 1984 for activities transferred to: Investigation, collection and taxpayer service. Comparable amounts for 1982 (\$109,203 thousand) and 1983 (\$126,528 thousand) are included above.

This appropriation provides for processing tax returns and related documents, and maintaining accurate, current taxpayer accounts by means of an automated system. It also provides for executive direction.

1. *Returns processing and revenue accounting.*—This activity provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of those payments, processing and accounting for revenue collections and Federal Tax Deposits (FTD's), and verification of the accuracy of information provided by the taxpayer. It provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible nonfilers for investigation, and assistance in the selection of tax returns for audit. This activity also prepares statistical information.

2. *Computer services.*—This activity provides ADP support to process tax returns, maintain account records and aid tax enforcement and productivity management.

3. *Executive direction.*—This activity sets policies and goals necessary for effective tax administration and provides leadership and direction in the execution of all plans.

Investigation, collection and tax information	\$56,256,000	\$65,182,000

This appropriation provides for the examination of tax returns and the administrative settlement of taxpayer appeals of examination findings. Funds are requested for 1984 to continue the Service's ability to assure evenhanded application and adequate enforcement of the tax laws and to maintain a satisfactory rate of voluntary compliance with the internal revenue laws. Also provides for monitoring employee pension plans, determining qualifications of organizations seeking tax exempt status, and examining tax returns of exempt organizations.

1. *Examination.*—This activity encourages voluntary compliance with the internal revenue laws through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers.

2. *Appeals and tax litigation.*—This activity provides for an independent administrative review of contested assessments of tax litigation or tax adjustments proposed by the examination program or legal services.

3. *Employee plans and exempt organizations.*—This activity monitors private pension plans to insure compliance with the Employee Retirement Income Security Act of 1974, as amended, determines whether organizations seeking tax-exempt status meet certain tests to qualify, and examines tax returns of those organizations to insure compliance with such an exemption and to insure payment of unrelated business income taxes. It also examines the returns of private foundations to insure payment of proper excise taxes.

General and special funds—Continued

INVESTIGATION, COLLECTION, AND TAXPAYER SERVICE—Continued

This appropriation provides for enforcing statutes relating to detection and investigation of criminal violations of the internal revenue laws, collecting unpaid accounts, securing unfiled tax returns and payments, providing assistance to taxpayers and preparing technical rulings.

1. *Tax fraud investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of internal revenue laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

2. *Collection.*—This activity has the responsibility for collecting unpaid accounts and securing delinquent returns; developing and implementing programs to prevent accounts from becoming delinquent and preventing nonfiling; and determining and analyzing the reasons for and the types of nonfiling.

3. *Taxpayer service.*—This activity aids voluntary compliance with Federal tax laws by informing taxpayers of their responsibilities and by providing service which will assist them in meeting their obligations through various media and provides information about IRS notices and procedures, and resolves inquiries on taxpayer accounts. It also protects the confidentiality of tax returns and return information and the taxpayers' rights to privacy, while administering various disclosure provisions.

4. *Enforcement, litigation and rulings.*—This activity comprises the legal support for court cases to enforce the internal revenue laws, development of tax return forms, instructions and guides, issuance of rulings and opinions as to the application of the tax laws and meeting with taxpayer groups to review and resolve special tax problems.

The salaries and expenses appropriation is proposed for elimination in the 1984 budget request. The change results from a reorganization in IRS that realigns several of the tax enforcement programs. Many of the support functions included in this appropriation have been allocated across the other three appropriations. Those appropriations are set up to reflect the three major program thrusts used by IRS to administer the Internal Revenue Code. The two program related activities in this appropriation (legal services and technical rulings) have been included with the tax enforcement programs that they support.

PAYMENT WHERE ENERGY CREDIT EXCEEDS LIABILITY FOR TAX—
Continued

The Energy Tax Act of 1978 authorized a solar-wind business energy credit beginning October 1, 1978. There will be instances where a solar-wind business credit will exceed the amount of tax liability owed on the return resulting in either an offset to another tax liability of the filer or a refund. This account provides for those funds which are required to cover the offsets (to other liabilities) or make payments to businesses when solar-wind credits exceed the tax liabilities owed as provided by Public Law 95-618.

Public Law 96-223 repealed the refundable credit for solar or wind property for taxable years beginning after December 31, 1979. Funds will be required through 1985 to cover offsets or make payments resulting from amended returns filed, the examination of returns filed, and other returns filed for the years covered by the statute.

As provided by law, there will be instances wherein the earned income tax credit will exceed the amount of tax liability owed, resulting in an additional payment to the tax filer. The Earned Income Credit was originally authorized by the Revenue Adjustment Act of 1975 (Public Law 94-164) and made permanent by the Revenue Adjustment Act of 1978 (Public Law 95-600).

Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections

which must be refunded. Since enactment of the Economic Recovery Tax Act (Public Law 97-34) and the Tax Equity and Fiscal Responsibility Act (Public Law 97-248), the rate of interest changes every six months to reflect the prime interest rate then in effect. A 16% rate will be in effect after January 1, 1983. Public Law 97-248 also provides for daily compounding of interest.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale

under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

until they reach 16 years of age, unless such protection is declined. The Service is also responsible for investigation of counterfeiting of currency, specie, and securities; forgery and altering of Government checks and bonds; thefts and frauds relating to Treasury electronic funds transfers; and other criminal and noncriminal cases.

The Secret Service Uniformed Division protects the Executive Residence and grounds in the District of Columbia; any building in which White House offices are located; the President and members of his immediate family; the temporary official residence of the Vice President and grounds in the District of Columbia; the Vice President and members of his immediate family; foreign diplomatic missions located in the Washington metropolitan area and such other areas as the President may direct on a case-by-case basis.

The Treasury Security Force is responsible for safeguarding paper currency and other Government securities and obligations that are contained in the Main Treasury Building and its Annex in Washington, D.C.

2. *Payments to State and local governments for protection of foreign diplomatic missions under extraordinary circumstances.*—When an extraordinary protective need exists, payments to State and local governments can be provided for protection of permanent and observer foreign diplomatic missions attached to an international organization of which the United States is a member.

The Comptroller of the Currency was created for the purpose of establishing and regulating a national banking system. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665) provided for the chartering and supervising functions in this connection. The income of the bureau is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations.

The Administrator of National Banks charters new banking institutions only after investigation and due consideration. Supervision of existing national banks is aided by the required submission of periodic reports and detailed, onsite examinations, the latter conducted by a staff of approximately 2,100 national bank examiners. At the present time there are approximately 4,500 national banks with more than 21,000 operating branches and total assets of \$1,224 billion.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank, and applications from banks to establish branches. The Comptroller of the Currency promulgates rules and regulations for the guidance of national banks, bank directors.

DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

SEC. 101. Appropriations to the Treasury Department, in this Act shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishings of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

SEC. 102. Not to exceed two per centum of any appropriations in this Act for the Department of the Treasury, may be transferred between such appropriations. However, no such appropriation shall be increased or decreased by more than two per centum and any such proposed transfers shall be reported promptly to the Committees on Appropriations of the House and Senate.

SEC. 103. Section 505 of the Tariff Act of 1930, as amended (19 U.S.C. 1505), is further amended by adding a new subsection (c) to read as follows: "(c) Notwithstanding any other provision of law, duties determined to be due on a liquidation or reliquidation shall be due upon that date, and unless payment is received by the appropriate customs officer within 25 days therefrom, shall be considered delinquent and bear interest from the date of liquidation or reliquidation at a rate determined by the Secretary of the Treasury."

Section 520 of the Tariff Act of 1930, as amended (19 U.S.C. 1520), is further amended by adding a new subsection (d) to read as follows: "(d) Where a determination is made to reliquidate an entry pursuant to a protest filed under section 514 of this Act, an application for relief under subsection (c)(1) of this section, or any order of an appropriate court, interest shall be allowed on any amounts paid as increased or additional duties under section 505(c) of this Act at the annual rate established pursuant to that section and determined as of the date of liquidation or reliquidation. Such interest shall be calculated from the date of payment to the date of refund or the date of filing of a summons under 28 U.S.C. 2632, whichever occurs first."

SEC. 104. Notwithstanding any other provision of law, the capitalization limitation contained in 31 U.S.C. 1033 for the Capital Fund in the Office of the Secretary is hereby repealed.

This appropriation finances research and development through contracts, grants, and intergovernmental agreements. These activities provide the scientific basis for EPA's regulatory actions.

1. *Air*.—Research will provide the data base needed to review the national ambient air quality standards, and establish new source performance standards and emission standards for hazardous air and mobile source pollutants.

2. *Water quality*.—Activities in the municipal wastewater area provide research support to the construction grants program. Research in water quality

supports the implementation of the water quality based approach. These activities include gathering scientific data pertaining to toxic pollutants, developing guidelines for establishing site-specific water quality standards, and assessing the impact of various wastes when dumped into the ocean.

3. *Drinking water*.—Includes research to evaluate the health effects of drinking water contaminants, methods to treat these contaminants in a cost-effective manner, and research to support the Agency's ground water protection activities.

4. *Hazardous waste*.—Research activities include providing hazardous waste measurement methods and protocols, assessing the risk from exposure to hazardous wastes, and developing the necessary data to revise and implement treatment, storage and disposal standards and regulations.

5. *Pesticides*.—Activities provide scientific data to support the pesticides program by means of health and environmental exposure studies, the development of exposure protocols, and the quality assurance program.

6. *Radiation*.—Activities include radiological monitoring and surveillance services for the Department of Energy nuclear testing program at the Nevada Test Site.

7. *Interdisciplinary*.—Activities provide support for the long term research program.

8. *Toxic substances*.—Activities support the development of scientific and technological methods to understand, predict and manage the entry and movement of chemicals into the environment and to determine the effects of these chemicals on both human health and the ecosystem.

9. *Energy*.—Activities support the development of a sound technical energy resource data base. Particular emphasis is placed on understanding and assessing the causes and effects of acid rain.

This appropriation includes funds for contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities.

1. *Air quality.*—The air program performs activities related to the achievement of air quality standards. These objectives are met by providing: (1) financial and technical assistance to State and local governments; and (2) direct Federal action where State or local governments are unable to meet the requirements of Federal law. Emphasis in 1984 will be on alternative approaches to regulations and increased State participation as a way of attaining air quality objectives.

2. *Water quality.*—The water quality regulatory program has as its goal the protection and restoration of the Nation's waters. The program relies on a partnership between EPA and the States to meet the goals of the Act. The program encompasses the following major activities: (1) managing the municipal wastewater facilities construction grants program; (2) issuing National Pollutant Discharge Elimination System (NPDES) per-

mits for industrial and municipal sources; and (3) assuring compliance with regulations.

3. *Drinking water.*—The safe drinking water program protects the Nation's drinking water supplies from contaminants. This involves: (1) setting national drinking water standards that protect human health; (2) initiating enforcement actions for compliance with drinking water and underground injection control regulations; and (3) assisting States in implementing or directly implementing these regulatory programs.

4. *Hazardous waste.*—The hazardous waste program is designed to insure that hazardous wastes are managed in a manner that will protect public health and the environment. The major emphasis of the program will be delegating program authority to the States and implementing hazardous waste regulations. State assumption of hazardous waste authorities will be encouraged through Federal financial assistance, regulations, and guidance.

5. *Pesticides.*—EPA is responsible for protecting the public health and the environment from unreasonable pesticide risks, taking into account the economic, social, and environmental costs and benefits from pesticide use. Major activities include: (1) review and registration of pesticide products; (2) developing and processing registration standards; and (3) enforcement of pesticide use rules, with emphasis on Federal/State cooperation.

6. *Radiation.*—The radiation program endeavors to eliminate adverse health and environmental effects by limiting exposure to radiation. Major activities include development and promulgation of standards, regulations and guidelines to reduce exposure from ionizing and nonionizing radiation sources. In 1984, the program will concentrate its regulatory efforts on standards for airborne radionuclides, high and low level radioactive wastes, and decommissioning of nuclear facilities.

7. *Noise.*—No activities are planned in 1984.

8. *Interdisciplinary.*—The interdisciplinary program is composed of several activities which cut across media programs. This involves: (1) review of environmental impact statements (EIS) to insure that actions undertaken by Federal agencies do not adversely affect the environment, (2) Federal agencies compliance with statutes and regulations for pollution control, and (3) all legal aspects of the Agency's enforcement efforts.

9. *Toxic substances.*—The toxic substances program is responsible for protecting human health and the environment from unreasonable risks posed by chemicals. In 1984 the program will place a balanced emphasis on evaluation and control of new and existing chemicals. Nonregulatory approaches to obtain compliance will be used where appropriate.

Trust Funds**HAZARDOUS SUBSTANCE RESPONSE TRUST FUND**

For necessary expenses to carry out the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, including sections 111 (c)(3), (c)(5), (c)(6), and (e)(4) (42 U.S.C. 9611), **[\$210,000,000]** \$310,000,000, to be derived from the Hazardous Substance Response Trust Fund, to remain available until expended: *Provided*, That not to exceed \$37,380,000 shall be available for administrative expenses. Funds appropriated under this account may be allocated to other Federal agencies in accordance with section 111(a) of Public Law 96-510: *Provided further*, That of the funds appropriated under this head, \$8,000,000 shall be made available to the Department of Health and Human Services, upon enactment, and up to an additional \$2,000,000 may be made available by the Administrator to the Department for the performance of specific activities in accordance with section 111(c)(4) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980: *Provided further*, That management of all funds made available to the Department shall be consistent with the responsibilities of the Trustee of the Fund, as outlined in section 223(b) of the Act: *Provided further*, That the administrative expenses contained in the first proviso are increased by \$4,708,000: *Provided further*, That for purposes of carrying out section 3012 of the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6933), as added by Public Law 96-482, \$10,000,000, from the funds provided under this head, to remain available until September 30, 1984. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1983.*)

This appropriation provides funds for the implementation of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This Act provides authority for responding to and cleaning up hazardous substance emergencies and uncontrolled waste sites.

There are four basic components to the Superfund program: Hazardous Substance Response Actions; Enforcement; Research and Development; and Management and Support. These components will be integrated and coordinated to insure the wisest use of Fund money in order to achieve the greatest possible cleanup.

Financial responsibility for the program will be shared by the Federal and State governments as well as industry. The trust fund established by the Act is financed mainly by industrial taxes with some contribution from the general funds. EPA will allocate funds from its appropriation to other Federal agencies to carry out the act.

This appropriation provides for the following research, development, procurement and operations activities of the National Aeronautics and Space Administration:

1. *Space transportation systems (STS).*—The objectives of this activity are focused on production and operations of the Space Shuttle vehicle and other elements of a Space Transportation System. The elements of the program are described below along with work to be performed during 1984.

(a) *Space transportation capability development.*—The first reusable Earth-to-orbit vehicle is the key element in the Space Transportation System. The Shuttle has

unique capabilities not available with expendable launch vehicles, including retrieval of satellites, experiments and equipment for reuse; maintenance and repair in orbit; and reuse of space laboratories. Cost effective operations of the Shuttle will allow increased versatility and productivity of space operations for all users.

In 1982, the Shuttle successfully completed the final two orbital flight tests of the four scheduled in the development program and was declared operational by the President on July 4, 1982. The Shuttle's actual flight performance fulfilled the hopes and expectations of its designers. In spite of minor technical problems which were to be expected during the developmental phase, the overall system worked extraordinarily well. The first operational flight was successfully flown in November 1982.

The second orbiter, Challenger, was delivered on schedule in July 1982 to the Kennedy Space Center. The fabrication of the third and fourth orbiters—Discovery and Atlantis—is underway, and these orbiters will be delivered in late 1983 and late 1984, respectively. In 1984, the principal activities to be conducted in Shuttle Production and Capability Development, in addition to production of the flight orbiters are: testing of the main engine for continuing operations at full-power level; continuing procurement of the initial orbiter flight spares and crew equipment; initiation of procurement of orbiter structural spares; installation of manufacturing tools for the external tank and solid rocket booster which will enhance their production rate capability; and continuing analyses of flight performance data from operational flights to improve understanding of the vehicle dynamics. In addition, work will continue on the development of a new structural case for the solid rocket motor made of composite materials and the necessary modifications to the orbiter and launch site

facilities for a new, high energy upper stage called Centaur.

The other principal areas of activity in Space Transportation Capability Development include NASA efforts related to the Spacelab, and upper stages to place satellites in higher altitude orbits; the engineering and technical base support at NASA centers; advanced programs study and evaluation efforts; and payload operations and support equipment.

The Spacelab, a joint effort with the European Space Agency (ESA), will be carried in the cargo bay of the Shuttle orbiter and will provide users with a multipurpose, reusable space laboratory. ESA is funding the development, production, and delivery of the first Spacelab and associated ground support equipment; NASA is providing for development of auxiliary flight and ground support equipment and procurement of additional sets of flight hardware and ground support equipment necessary to meet its mission requirements. Also included is funding to continue procurement of a second Spacelab from ESA. The first dedicated Spacelab flight is planned for launch in September 1983, with the second planned for September 1984.

Also continuing is the development, procurement, and integration of the Centaur upper stage in a joint development program with the Department of Defense. This stage will be used with the Shuttle for some planetary missions and for those Earth orbital missions requiring altitudes beyond the basic Shuttle capability and in excess of that provided by the other existing upper stages.

In advanced programs, two significant efforts will be pursued: initiation of development on a tethered satellite system, a new joint program with the Italian government, and continuation of studies related to a possible future Space Station. Other efforts will focus on technical and programmatic data for the definition and evaluation of potential future space missions and systems.

(b) *Space transportation system operations.*—This activity provides for the operation of the Space Shuttle and the expendable launch vehicles.

In 1984, STS operations efforts will continue the procurement, assembly, and checkout of the solid rocket boosters and external tanks, as well as standardized flight plans, avionics software, flight control systems, and crew procedures. The preparations in the preflight and direct mission support elements at Kennedy Space Center, Lyndon B. Johnson Space Center, and Marshall Space Flight Center will continue.

In 1984, missions to be supported include the launch of payloads for the Department of Defense, domestic commercial and foreign communications customers, and NASA payloads. Among the major NASA payloads are the Large Format Camera, Materials Processing Experiments, the Long Duration Exposure Facility, the Earth Radiation Budget Satellite, the Spacelab-3 Mission, and the retrieval/repair of the Solar Maximum Mission Spacecraft.

In expendable launch vehicles, this effort provides engineering, reliability, and launch support for the Delta until the transition to Shuttle operations is completed.

2. *Space science and applications.*—This activity supports systematic study of the Earth and its space environment, the solar system, the galaxy and the universe; and the research and selected technology developments to encourage the practical application of space technologies to needs on Earth.

(a) *Physics and astronomy.*—Research is being conducted to investigate the Earth's environment, the Sun and the interplanetary medium, the galaxy and distant space, as well as the interrelationships among these areas and the processes that control them. Past results include discovery of the Earth's radiation belts and knowledge of phenomena such as pulsars, quasars, and black holes.

Highlights of 1982 include the successful flight of the first space science payload on the Space Shuttle, which gathered solar physics data, evaluated the ambient and induced Shuttle environment, and provided data on payload thermal control technology. In addition, the Cosmic Ray Isotope Experiment was launched on a Department of Defense satellite to carry out galactic cosmic ray research.

Development work is continuing on the Space Telescope, planned to be launched in 1985, which will allow research at the forefront of optical and ultraviolet astronomy for decades. Work is also continuing on the Gamma Ray Observatory (GRO) mission planned for launch in 1988. The GRO will provide the highest sensitivity study of the sky conducted in the gamma ray spectral region.

Development and integration efforts also continue for payloads to be flown on Spacelabs 1 and 2 flights planned for launch in 1983 and 1985, respectively. Development activities for follow-on Spacelab payloads are also underway. Several multiuser payloads to investigate phenomena in the various disciplines are now being defined for future Spacelab missions. Plans for 1984 include the Spacelab payloads for Physics and Astronomy, and the mission management requirements for all agency payloads. Work is also continuing on several Explorer projects to continue research thrusts started in prior years.

(b) *Planetary exploration.*—This activity increases scientific knowledge about the origin and evolution of our solar system and of life processes, and applies the results to a better understanding of the Earth.

Work is continuing on the Galileo mission to Jupiter; the spacecraft is composed of two segments—an orbiter and an atmospheric entry probe. The Galileo orbiter and probe will be launched in 1986 on a Centaur Upper Stage and will achieve Jupiter orbit capture in 1989 to carry out long-term studies of the giant planet, its satellites, and its magnetosphere. The probe will enter the upper atmosphere of Jupiter. Development work is also continuing on U.S. experiments to be flown on the International Solar Polar Mission being developed by the Europeans, to explore the heliosphere, the space around the Sun, and to obtain observations of the Sun (launch in 1986).

Design and development will be initiated on the Venus Radar Mapper (VRM) mission in 1984 which will utilize synthetic aperture radar to map the surface of

General and special funds—Continued

RESEARCH AND DEVELOPMENT—Continued

Venus. The mission is targeted for a 1988 launch on a Centaur class upper stage.

Studies will be continued during 1984 on future candidate missions. Analysis of data from past planetary missions will also continue, including data from the Voyager and Pioneer missions.

(c) *Life sciences*.—This program will continue to provide for the research and technology necessary to meet the goals of ensuring human health, safety, well-being, and effective performance in space flight; utilizing space environment to advance knowledge and applications in Earth medicine and biology; and understanding the origin and distribution of life in the universe.

(d) *Space applications*.—This program category conducts coordinated and logically phased research and development activities to relate space technology to Earth benefits. The 1984 program provides for continued progress in the areas of materials processing in space, remote sensing, and communications. The activities involve active and increasing participation and funding by current and future users of these capabilities, within the Government, industry, and the academic community. The highlight of 1982 was the successful launch of Landsat-4 which will advance technology in remote sensing of the Earth from space.

The Materials Processing in Space program will continue to support fundamental research using the unique environment of space to enhance our basic knowledge of materials processing and to determine if space techniques can be used to control the composition and shape of materials. The research program includes high temperature heat pipes, electrostatic positioning methods, laser holography, acoustic positioning systems, and furnaces for directional solidification with high temperature gradients.

In communications, the 1984 program includes continued development and operation of the search and rescue experiment, further definition of an applications data service, and continuation of advanced communications research activities, including initiation of the Advanced Communications Technology Satellite (ACTS) design and development efforts. This mission will be a joint Government/industry undertaking wherein industry will provide a significant contribution toward the cost of the mission. ACTS is targeted for launch by the Space Shuttle in 1988.

In remote sensing, utilization of data from satellite observations has resulted in an increase in our understanding of the Earth's resources and environment, and in our ability to forecast change. Recent achievements include the successful launch of Landsat-4, a new-generation satellite with a Thematic Mapper which is providing imagery with improved spectral and spatial resolution; development and testing of techniques to predict severe storms; and use of SEASAT satellite experiments to measure ocean surface winds, sea state, major ocean currents, ocean circulation patterns, and sea ice conditions.

A wide range of similar activities will be continued during 1983 and 1984. Mobile laser units are being deployed in the United States, Australia, and the Pacific

to form a global network for observation of tectonic plate motion. Ongoing efforts in the remote sensing area include analysis of data from the Landsat-4 Thematic Mapper and development of ground system capability, the Earth radiation budget experiment to acquire valuable data for climate studies, and the development of upper atmospheric research instruments. This group of instruments will provide the capability to obtain a global data set for studying the interaction between chemistry, radiation, and dynamics of the upper atmosphere.

3. *Technology utilization*.—This program is designed to facilitate the transfer of NASA technology to the nonaerospace industry, as well as State and local governments. During 1984, NASA will continue its efforts to help foster widespread dissemination of new technology developed by the Agency's programs.

4. *Space research and technology*.—The objective is to conduct the activities necessary to increase the efficiency and effectiveness of space systems and operations. The 1984 program provides for continuation of the research and technology base activities necessary for advances in the key discipline areas, and also continued progress in ongoing systems technology and experimental efforts.

5. *Aeronautical research and technology*.—The goal is to help preserve and strengthen long-term U.S. strength in aeronautical research and technology. Consistent with this goal, work will continue in 1984 on fundamental research in all basic aeronautical disciplines and the maintenance of related research facilities.

Activities will continue to provide a strong research and technology base in the aeronautical disciplines of aerodynamics, propulsion, avionics, and flight controls, human-vehicle interaction, materials, and structures; and to conduct generic technology activities relevant to the major classes of aeronautical vehicles such as subsonic aircraft, rotorcraft, and high performance aircraft.

In 1984, an important new effort will be the initiation of development of a numerical aerodynamic simulation capability in computational fluid dynamics which will provide new, powerful analytical techniques for the design of all types of future aerodynamic vehicles. Other new development efforts include an advanced composite structures technology and technology for next generation rotorcraft. In addition, ongoing major systems technology programs will be continued in rotorcraft and high-speed aircraft.

6. *Energy technology*.—In 1984, this program provides reimbursable support to Government agencies engaged in national energy programs.

7. *Supporting activities*.—This program provides tracking and data acquisition support to the entire NASA flight program, including automated missions, manned missions, sounding rockets, and aerodynamic test flights. Lease payments for the new Tracking and Data Relay Satellite System will continue in 1984.

CONSTRUCTION OF FACILITIES—Continued

This appropriation provides for the contractual services for the design, repair, major rehabilitation, and modification of facilities; the construction of new facilities; minor construction; the purchase of land and equipment related to construction and modification; and advanced design related to facilities planned for future authorization. The principal projects in the 1984 program are described below:

1. *Space transportation systems.*—This activity includes funds for Space Shuttle facilities at various locations.

2. *Scientific investigations in space.*—This activity includes the construction of a cargo hazardous service facility, and modifications to a spacecraft assembly and encapsulation facility for cargo processing at the John F. Kennedy Space Center, Fla.

5. *Aeronautical research and technology.*—This activity includes the construction of the fluid mechanics laboratory at the Ames Research Center, Moffett Field, Calif., and modifications and addition for the composite materials laboratory and modifications to the 30- by 60-foot wind tunnel at the Langley Research Center, Hampton, Va.; and modifications for small engine component testing facility and modifications to the icing research tunnel at the Lewis Research Center, Cleveland, Ohio.

7. *Supporting activity.*—The estimates for this activity include the construction of an aeronautical tracking facility at the Hugh L. Dryden Flight Research Facility, Edwards, Calif.; construction of a frequency standards laboratory and modifications to the space flight operations facility at the Jet Propulsion Laboratory, Pasadena, Calif.; and relocation of 26-meter STDN antenna, Spain; repair, rehabilitation and modification of facilities, not in excess of \$500 thousand per project, and minor construction of new facilities and additions to

existing facilities, not in excess of \$250 thousand per project at various NASA installations and at Government-owned plants operated by contractors; and for facility planning and design.

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of NASA installations.

Responsibility for the space transportation systems activity is located at the John F. Kennedy Space Center, Kennedy Space Center, Fla.; Lyndon B. Johnson Space Center, Houston, Tex.; Marshall Space Flight Center, Huntsville, Ala.; and the National Space Technology Laboratories, Bay St. Louis, Miss. The scientific investigations in space and space and terrestrial applications activities are concentrated principally at the Ames Research Center, Moffett Field, Calif.; Goddard Space Flight Center, Greenbelt, Md.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; Lyndon B. Johnson Space Center; Marshall Space Flight Center; and the National Space Technology Laboratories.

The space research and technology activity is conducted at the Ames, Goddard, Langley, Lewis, Johnson, and Marshall Centers.

Aeronautical research and technology work is conducted at the Ames, Langley, and Lewis Research Centers.

Programwide support and management are provided by NASA headquarters, Washington, D.C. Support activities for tracking and data acquisition requirements are performed at the Goddard Space Flight Center.

This appropriation provides for the payment of compensation benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Compensation is payable as either a disability benefit or a survivorship benefit. Criteria for entitlement are based on a veteran's disabilities incurred in or aggravated by active military service, death while on active duty, or death resulting from service-connected disabilities.

The Administrator may pay a clothing allowance to each veteran who wears or uses a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Administrator, tends to wear out or tear the clothing of such veteran.

The "Veterans' Compensation, Education and Employment Amendments of 1982" (Public Law 97-306) increased compensation rates for veterans, Dependency and Indemnity Compensation (DIC) spouses and children, and veteran's clothing allowance by 7.4% effective October 1, 1982.

This appropriation provides for the payment of pension benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Pension benefits may be paid to a veteran or his survivor(s). Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Income support is provided at established benefit levels.

Although the 1984 caseload is decreasing, the average cost is increasing. This is due to the "Veterans and Survivors' Pension Improvement Act of 1978," effective January 1, 1979, which reformed the pension program and provides automatic annual cost-of-living increases comparable to annual social security increases for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. These increases are effective on June 1 by the same percentage as social security benefits are increased.

The caseload and payment tables shown below assume the enactment of a six-month delay in cost-of-

living adjustments, effective for the period beginning June 1, 1983. Consequently, the next cost-of-living adjustment will occur on December 1, 1983, and on December 1 in subsequent years. This delay is part of a government-wide policy affecting social security and other indexed programs. The December 1, 1983 increase is expected to be 5.1%.

This appropriation finances the education, and training of veterans and servicepersons whose service was, at least in part, between February 1, 1955 and December 31, 1976 (post-Korean conflict veterans and Vietnam era veterans). It also finances educational assistance allowances for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicepersons who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation; specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. With fewer eligible people remaining for Vietnam era training, the funding level in 1984 will be \$294.8 million less than in 1983, and reflects the enactment of legislation which will eliminate correspondence training and terminate the advance payment of educational assistance allowances.

1. *Education and training.*—The 1984 decrease in Vietnam era veteran and serviceperson trainees is attributable in part to more veterans reaching their delimiting date and termination of GI bill benefits for persons entering the military after December 31, 1976. These decreases are partially offset by enactment of Public Law 97-72 which granted a 2-year extension of the delimiting period for needy and educationally disadvantaged Vietnam era veterans, effective January 1, 1982, and Public Law 97-306 which added an extra year to this extension.

The following table provides a comparison of trainees and costs for the four types of trainees included in education and training, and reflects the enactment of the legislative initiatives.

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive as-

sistance to cover the costs of subsistence, tuition, books, supplies, and equipment.

Specially adapted housing grants, up to a maximum of \$32,500, are provided to certain severely disabled veterans. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to \$5,000.

An allowance, up to a maximum of \$4,400, is provided to certain disabled veterans and certain persons on active duty toward the purchase price of new automobiles, adaptive equipment, and the maintenance and replacement of such equipment.

The following table shows a caseload and cost comparison for these beneficiaries.

In 1984 increased costs are associated with: (1) workload increases for new VA nursing homes; (2) operational requirements of new facilities; (3) uncontrollable payroll increases; and (4) increased cost and usage of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies and operating supplies.

1. Maintenance and operation of VA facilities—(a) VA hospital care.—Increased cost over 1983 is \$240,048 thousand for operating the medical, surgical, and psychiatric bed sections in 172 VA hospitals.

Estimated operating levels are:

	1982 actual	1983 estimate	1984 estimate
Patients treated	1,242,544	1,250,000	1,248,372

1. *Medical research.*—This program is comprised of institutional and special research. In addition to the broad spectrum of biomedical research projects, priority is given to research on agent orange and conditions that frequently occur among veterans such as aging, alcoholism, schizophrenia, delayed stress disorders, and spinal cord injury and tissue regeneration. Cooperative studies include surgical treatment of angina pectoris, adjunct treatment of diabetes, and relative potency and side-effect liability of new and marketed sedatives.

2. *Rehabilitation research.*—This program is dedicated to the development and application of science and technology to improve the care of the physically disabled veteran through prostheses for the amputee, improved wheelchairs for the paralyzed, and better joint

functions for the arthritic. It also includes care for those with visual, hearing and speech disorders.

3. *Health services research.*—This program provides support for health services projects at VA medical centers for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans.

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits; operation and maintenance of 109 national cemeteries by the Department of Memorial Affairs; and top management direction and administrative support, including data processing, fiscal, personnel, and legal services through agency-level staff offices. Funding requirements for this appropriation have been reduced to reflect savings to be achieved through enactment of legislation that would eliminate advance payment of education benefits and correspondence training benefits.

1. *Veterans benefits.*—Determines eligibility and adjudicates all claims for compensation, pensions, educa-

tional assistance, housing loan assistance, and insurance awards. A summary of program objectives and anticipated workload is included in the following paragraphs:

(b) *Veterans services.*—Provides information, advice, and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors.

Correction of life/safety code deficiencies, including those contained within functional modernization, is emphasized in the requested program. Projects at three stations involve seismic strengthening of existing facilities or replacement of seismically unsound structures which cannot be economically improved. Also included are projects to make fire and safety improvements at two facilities, projects to correct electrical deficiencies at two others, and a project to fund removal of asbestos when encountered during renovation. Additionally, an increase in the Advance Planning Fund is included to continue the identification and development of projects to correct code deficiencies.

In addition to an emphasis on safety improvements, the request continues a program of nursing home con-

struction necessary to attain a level of 13,100 operational nursing home beds by 1987. Further, the request includes funding for construction of a significant modernization project at Biloxi and a replacement/modernization project at Minneapolis.

The VA is on schedule toward meeting the 1985 goal of a 45% reduction in energy consumption in new construction as compared to 1975 consumption levels. A project to fund energy conservation projects is included in the request. Projects funded from that line item include solar systems, heat recovery systems, and various innovative, energy-efficient building systems.

This revolving fund, established pursuant to the Veterans Health Care Amendments of 1979, Public Law 96-22, approved September 30, 1979, provided a mechanism for collecting funds from employees to operate medical employee parking facilities. Since collections have been discontinued, the revolving fund is being dissolved. The maintenance, improvements, and operating expenses of these parking facilities will be funded from the Medical care and construction accounts.

LOAN GUARANTY REVOLVING FUND

During [1983] 1984, the Loan guaranty revolving fund shall be available for expenses for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title): *Provided*, That the unobligated balances, including retained earnings of the Direct loan revolving fund, shall be available, during [1983] 1984, for transfer to the Loan guaranty revolving fund in such amounts as may be necessary to provide for the timely payment of obligations of such fund, and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time for such transfer.

During [1983] 1984, within the resources available, gross obligations for direct loans and total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the "Loan guaranty revolving fund". ¹ Adjustment for removal of discounts on sales of loans.

² Outstanding balances have been adjusted to exclude vendee loans.

The Loan guaranty revolving fund is the financing mechanism for the GI home loan program. The purpose of the fund is to cover the expenses which result when a VA loan goes into foreclosure, to acquire loans to prevent veterans from going into unnecessary foreclosure, and to recover expenses incurred in foreclosures. With the lower volume of loans in 1982 and 1983, the number of property acquisitions and claims in 1984 are projected at slightly lower levels than in 1983 and 1982.

Budget program.—1. Real property acquisitions.—The number of acquisitions is expected to decline while the average cost is expected to increase for 1984.

	1982 actual	1983 estimate	1984 estimate
Number of property acquisitions processed	15,015	12,800	12,200
Average cost per acquisition	\$38,978	\$42,274	\$43,587
Total cost (in thousands)	\$585,251	\$541,107	\$531,761

2. Property improvements.—Fewer properties will be acquired but greater expenditures for capital improvements will be necessary to place properties in salable condition.

Financing.—Vendee loan sales of \$408 million (71% of collections) in 1984 represent the largest source of funding. Repayments account for \$22.2 million (4%) and interest collections account for \$45.7 million (8%) of the total 1984 collections of \$576 million. The other major item of 1984 income for the revolving fund is the \$64.2 million (11%) collections projected to be received from down payments and cash purchases of properties in Veterans Administration inventory. Premiums on loans sales account for \$12.8 million (2%) of the total 1984 collections.
