This fund finances the payment of claims on nonparticipating life insurance policies issued and currently is open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. Administrative expenses are paid from the General operating expenses appropriation.

Operating costs—(1) Death claims.—Represents payments to designated beneficiaries.

(2) All other.—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

Capital investment.—A policyholder may borrow up to 94% of the value of his policy.

The trend in the number and amount of policies in force is indicated in the following table (dollars in thousands):

	1982 actual	1983 estimate	1984 estimate
Number of policies	191,517	192,500	192,000
Insurance in force	\$1,735,919	\$1,741,387	\$1,740,288

Financing.—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund.

Operating results and financial condition.—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$196 million by September 30, 1984.

This fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: (1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) nonservice disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other Government insurance.

Budget program—1. Death claims.—Represents payments to designated beneficiaries.

2. Dividends.—Policyholders participate in the distribution of annual dividends.

3. All other.—This represents payments to the General operating expenses appropriation for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

4. Policy loans made.—A policyholder may borrow up to 94% of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	1982 actual	1983 estimate	1984 estimate
Number of policies.....	160,149	154,100	152,300
Insurance in force.....	\$1,093,282	\$1,070,967	\$1,061,056

Financing.—Operations are financed from premiums collected from policyholders and interest on investments. Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the total revenues of the fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

This fund provides loans up to \$564 to veterans enrolled in a program of vocational rehabilitation who are temporarily in need of additional funds to meet expenses.

Budget program.—Interest-free direct loans are granted to veterans in vocational rehabilitation training. The loans are repaid over a period of 10 months by offset from benefit payments.

Financing.—With initial capitalization through an appropriation, the fund is financed solely by repayments. Administrative expenses are borne by the general operating expenses appropriation.

This revolving fund, established pursuant to the Veterans Omnibus Health Care Act of 1976, Public Law 94-581, provides a mechanism for the furnishing of rehabilitative services to certain veteran beneficiaries who are receiving medical care and treatment from the Veterans Administration.

Funds to operate the various rehabilitative activities and provide for the therapeutic work for remuneration for patients and members in Veterans Administration health care facilities are derived from contractual arrangements with private industry or nonprofit entities. This is a self-sustaining fund, and therefore no appropriation is required to support these activities.

Under the provisions of 38 U.S.C. 5021, the Supply fund finances on a reimbursable basis the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support by the Office of Federal Procurement Policy.

Budget program.—The fund provides financial support for: (1) Maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) a publications depot which provides printing services for VA installations on a centralized basis; (4) operation of a service and reclamation program operating out of the supply depots; (5) centralized periodical procurement and library cataloging; and (6) a marketing center or central buying office.

The Supply fund does not finance costs for the operation and administration of supply activities at VA field stations. These costs are charged directly to applicable appropriations.

Financing.—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving goods and services. For 1984 Supply fund sales are estimated to reach \$685 million. Average

inventory needed to support those sales will be \$124 million.

Operating results.—The fund operated at a profit of \$12 million in 1982. The new total of retained earnings is \$40.2 million, which will be used to finance inventory growth. Operating expense as related to sales was 5.3%.

POST-VIETNAM ERA VETERANS EDUCATION ACCOUNT—Continued

This account consists of voluntary contributions by eligible servicepersons and matching contributions provided from the Readjustment benefits account before January 1, 1982 and by the Department of Defense thereafter. The fund serves as a depository for that portion of the contributory matching educational program which provides educational assistance payments to participants who entered the service after December 31, 1976, and are pursuing training under chapter 32, title 38, U.S.C. Public Law 96-342, the "Department of Defense Authorization Act, 1981", included two new educational assistance programs for certain individuals who enlisted or reenlisted in the Army, Navy, Air Force or Marine Corps after September 30, 1980 and before October 1, 1981. Section 901 of that act is a non-contributory program with educational assistance provided by the Department of Defense. Section 903 authorizes the Department of Defense to make the monthly contributions for certain post-Vietnam era participants. The estimated activity in the fund follows:

This fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$10,109 million as of September 30, 1983 to \$10,332 million as of September 30, 1984. The actuarial estimate of policy obligations as of September 30, 1983, totals \$10,036 million, leaving a balance of \$73 million for contingency reserves.

The fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from interest on investments, premiums, and payments from the Veterans insurance and indemnities appropriation. Effective January 1, 1983, premiums were discontinued since reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from \$365 million as of September 30, 1983, to \$330 million as of September 30, 1984, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of September 30, 1983, total \$355 million, leaving a balance of \$10 million for contingency reserves.

This fund finances the payment of claims on life insurance policies issued before January 3, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951. No new policies can be issued. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

Budget program—1. *Death claims*.—Represents payments to designated beneficiaries.

2. *Cash surrenders*.—A policyholder may terminate his or her insurance by cashing in the policy for its cash value.

3. *Dividends*.—Policyholders participate in the distribution of annual dividends.

4. *All other*.—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (in thousands of dollars):

	1982 actual	1983 estimate	1984 estimate
Number of policies	505,410	486,300	441,800
Insurance in force	\$4,389,275	\$4,279,000	\$3,679,600

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the total revenue of the fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for [1983] 1984, for "Compensation [and pensions]", "Pensions", "Burial benefits and miscellaneous assistance", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for **[1983] 1984**, for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

[Not to exceed \$35,000,000 of the foregoing appropriations shall be available for medical automatic data processing services as set forth in the budget justifications without the approval of the Committees on Appropriations.]

The unexpended balance in the appropriation under the heading "Compensation and pensions" may be transferred to and merged with the newly established appropriations for "Compensation," "Pensions," and "Burial benefits and miscellaneous assistance" in amounts determined by the Administrator of Veterans Affairs. (Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1983.)

1. *Volunteers in Service to America.*—The service learning programs will assist secondary and post-secondary educational institutions to establish and maintain service learning activities for both students and their communities. The Young Volunteers in ACTION Program expands the use of student volunteers in poverty-related problem areas. The VISTA program will be terminated during 1984.

2. *Citizen participation and volunteer demonstration programs.*—These programs stimulate and encourage volunteer services and provide community groups with

small grants for project impetus and assistance. In 1984, these grants will aid the expansion of private volunteer activities and programs for drug abuse prevention, illiteracy, and the problems of runaway youth. The Vietnam Veterans Leadership Program will support efforts of Vietnam veterans to help other veterans of the Vietnam war with problems arising from their military service.

3. *Older American volunteer programs.*—These programs provide opportunities for people aged 60 and over to volunteer their services to the community by working with the emotionally disturbed, the mentally retarded and physically handicapped, the infirm, and the isolated elderly. In 1984, approximately 18,100 Foster Grandparent volunteers will serve about 54,000 children. Emphasis will be on preventing institutionalization of children and on returning children to communities. The Retired Senior Volunteer Program will support 359,000 part-time volunteers providing service in the areas of health, nutrition, education, the problems of troubled youth, refugee assistance, crime prevention, and other community services. Approximately 4,800 volunteers in the Senior Companion Program will provide long-term care services to about 17,000 frail and elderly Americans.

4. *Program support.*—Costs of program direction and administration are financed by this activity.

The Conference assists the President, the Congress, and the Federal departments and agencies in improving administrative procedure. It conducts studies of the efficiency, adequacy, and fairness of the procedures that the agencies and departments use to determine the rights, privileges, and obligations of private persons. The Conference issues formal recommendations for improvements and then encourages their implementation.

In addition to its research activities, the Conference also arranges for the interchange among administrative agencies of information useful in improving administrative procedure and, on an ongoing basis, furnishes assistance and advice on matters of administrative procedure to the agencies, Congress, and others.

The Conference receives funds from other Federal agencies for special projects carried out by the Conference pursuant to agreements with these agencies.

The Conference's activities in 1984 will include a study of the regulation of large-scale energy development projects, a study of agency use of regulatory analysis in rulemaking and one or more projects of relevance to federalism initiatives. The Conference also will continue its increased level of activities involving information interchange.

The Advisory Committee on Federal Pay was appointed in accordance with the Federal Pay Comparability Act of 1970. The Committee assists the President in carrying out the policy of comparability in pay between major Federal statutory pay systems and private enterprise. The Committee reviews the annual report of the President's pay agent and considers the recommendations of representatives of Federal employees and other officials of the Federal Government. The Committee then prepares for the President an independent report with its findings and recommendations.

The Committee meets jointly throughout the year with the President's pay agent and the Federal Employees Pay Council in an attempt to reach early resolution of issues between them. It provides advisory opinions on unresolved issues.

The Architectural and Transportation Barriers Compliance Board was established by Section 502 of the Rehabilitation Act of 1973 to ensure compliance with the Architectural Barriers Act of 1968. Its primary role is to effectuate a compliance program to ensure accessibility and usability of most Federal and federally-funded buildings by physically handicapped persons. The Board provides technical assistance to Federal, State, and local government agencies and the private sector in creating a barrier-free environment, develops Federal minimum guidelines and requirements for standards, and undertakes research initiatives necessary for the development of minimum guidelines and requirements. The Board also receives, investigates, and resolves complaints of noncompliance with standards of accessibility and usability promulgated under the Architectural Barriers Act.

The Arms Control and Disarmament Agency (ACDA) advises the President and the Secretary of State on arms control and disarmament activities and participates in negotiations with other countries seeking international agreements to control, reduce, or eliminate arms. Among the activities to which ACDA resources will be devoted in 1984 are support of arms control negotiations with the Soviet Union, the nuclear safeguards program of the International Atomic Energy Agency, the Reduced Enrichment in Research and Test Reactors program, activities relating to arms transfer reviews, and the preparation of arms control impact analyses of weapons systems.

The Board regulates the economic aspects of domestic and international air carrier operations. In 1984, the Board will continue actions designed to move commercial air transportation toward a system governed primarily by competitive market forces. The agency is scheduled to sunset January 1, 1985.

1. *Community assistance, small community air service, and subsidy.*—This program aids in the provision of air service to small communities that have limited traffic potential during the transition to a deregulated domestic air transport system. In 1984, this program will continue efforts to assist communities to obtain or maintain adequate air services by relying primarily on increased competition. When essential air service simply cannot be provided on a profitable basis, subsidy payments may be provided.

2. *International negotiations, operating authority, and pricing.*—In 1984, the Board will continue to implement the U.S. policy designed to permit airlines to operate under fewer constraints and to let the free market largely determine entry and exit, capacity, and price.

The Board participates in international negotiations, approves, and grants antitrust immunity for intercarrier agreements, issues consumer protection and other rules governing airline activity, regulates prices in international markets, and processes applications for operating authority by U.S. and foreign air carriers, including the selection from among competing U.S. carriers for authority to operate entry-restricted international routes.

3. *Economic analysis and regulatory information.*—This program includes economic analysis to assist the Board in decisionmaking; gathering and analyzing data for the Report to Congress on January 1, 1984, as required by the Airline Deregulation Act of 1978 (ADA); determining whether major contractions and qualifying dislocations have occurred under the Employee Protection Program; maintaining a financial and statistical information base necessary to manage the transition to a deregulated environment; and providing information and data services necessary to carry out regulatory programs.

4. *Competition maintenance and domestic authority.*—This program includes the last remnants of domestic regulation of scheduled, charter, and special air services, and the full range of antitrust responsibilities for domestic and international aviation. Most of the domestic air transportation system is deregulated, in accordance with the policies and timetables established by the ADA, although licensing on the basis of initial and

continuing fitness will continue through 1984. All antitrust authority will continue at the Board through the budget year.

5. *Consumer protection, assistance, and information.*—The purpose of this program is to protect consumers by ensuring their rights under the law, taking enforcement actions against violators, ensuring that consumer interests are represented before the Board, and continuing to inform, assist and educate consumers in their contacts with the air transportation industry.

On October 2, 1982, Congress legislated an end to the section 406 subsidy program. At the same time, Congress created a special subsidy program limited to \$13.5 million to support service to the few remaining 406 points in the lower 48 States. The Board will continue to administer the section 419 subsidy program, which was added as part of the Airline Deregulation Act of 1978. Compensation under this program is paid to airlines—primarily commuter carriers—selected by the Board to provide a guaranteed level of air service to certain eligible communities. This subsidy is designed to meet the specific service needs of each community, as detailed in its Essential Air Service determination. Hold-in subsidy is paid to incumbent carriers desiring to leave a market but forced to continue providing service for 30-day periods until a replacement carrier is selected. Normal subsidy is the longer-term compensation paid to a replacement carrier chosen by the Board on the basis of the carrier's proposal to provide a community with the level of service specified in the community's Essential Air Service determination.

The Committee for Purchase from the Blind and Other Severely Handicapped was established by the Wagner-O'Day Act of 1938, as amended. Its primary objective is to increase the employment opportunities for the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. In 1984, 44,600 blind and handicapped individuals are projected to be employed in 255 producing workshops. The committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and, makes rules and regulations necessary to carry out the purposes of the Act. The committee proposes to have 1,875 items on its procurement list, for an estimated workshop sale of \$203 million to the Federal Government.

The committee staff supervises the selection and assignment of new commodities and services, assists in establishing prices, reviews and adjusts these prices, verifies the qualifications of workshops, and monitors their performance.

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity, and protecting participants against abusive trade practices, fraud, and deceit. The object of commodity futures trading regulation is to enable the markets to better serve their designated functions of providing a price discovery mechanism and a means of offsetting price risk. By properly serving these functions, the futures markets serve the public interest by contributing toward better planning, more efficient distribution and consumption, and more economical marketing.

1. *Market surveillance.*—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors to insure orderly markets. The longer term activities of surveillance concentrate on the review of contract terms and conditions to insure conformity with current cash marketing conditions and adequate deliverable supplies. In 1984, efforts will be made to ease the burden of increased market activity due to a rapidly diversifying marketplace and a rising number of active contracts.

2. *Research and education.*—The objectives of this program are to systemically investigate the functioning of markets and market users; to develop better tools to assist in detecting and preventing price distortions; and to develop and disseminate educational and statistical materials regarding futures trading. In 1984, in addition to basic analytical support, the program must focus on the commercial utility, pricing efficiency and effect of options markets on futures markets.

3. *Registration, audits, and contract markets.*—In 1984, this program will continue to prevent misuse of customers' funds by futures commission merchants; to assure that the rules and practices of the contract markets are in compliance with the provisions of the Commodity Exchange Act and the rules of the Commission; and to review and approve applications from individuals and firms for registration under the provisions of the act.

4. **Enforcement.**—The enforcement program is responsible for detecting, investigating and litigating violations of the Act or regulations. These violations may include actual and attempted market manipulations, cheating and defrauding customers, and abusive trading practices such as fictitious trading, wash trading and pre-arranged trading. This program may seek redress through the administrative process or by injunctive actions in the Federal Courts. Increases in 1984 will meet the challenge of expanding markets and regulatory requirements as well as broaden investigative and litigative capabilities to allow more complete support of criminal prosecutions. Enforcement will be a high priority in 1984.

The 1974 amendments to the act provide for the handling of customer's reparation claims for damages against persons registered with the Commission.

The appropriation for the Corporation for Public Broadcasting is authorized two years in advance. While Congress appropriated \$130 million for 1985, the Administration is seeking a rescission of \$45 million, resulting in a total appropriation of \$85 million. The Administration is also requesting an appropriation of \$75 million for 1986. These requests underscore the importance of encouraging user and private support for the public broadcasting industry, thus allowing for the continued reduction of Federal support.

Under current authorizing legislation, the Corporation for Public Broadcasting has two major activities: (1) direct payments to public television and radio stations to be used at their discretion for purposes related primarily to program production or acquisition; and (2) support for the production and acquisition of radio and television programs for national distribution. In addition, the Corporation assists in the financing of several system-wide activities, including national satellite interconnection services and the payment of music royalty fees, and provides limited technical assistance, research, and planning services to improve system-wide capacity and performance.

Legislation will be proposed to amend the District of Columbia Self-Government and Governmental Reorganization Act of 1973 (Public Law 93-198), as amended, to authorize \$386.0 million as the 1984 payment by the United States toward defraying expenses of the government of the District of Columbia. This appropriation also includes a payment of \$22.5 million for water, water services, and sanitary sewer services rendered to Federal facilities by the District of Columbia during 1984 (act of May 18, 1954, as amended). This appropriation also includes a contribution of \$52.1 million which represents the Federal share of payments to District of Columbia retirement funds for police officers, fire fighters, teachers and judges (act of November 17, 1979).

The Self-Government Act authorized the District of Columbia to issue tax-exempt general obligation bonds to finance capital improvements projects. To prevent undue disruption during the development of the District's bond issuance program, the Self-Government Act provided interim authority under which the District could borrow from the U.S. Treasury to finance capital projects for which funds had been authorized or appropriated before January 2, 1975, and to finance the District's share of the cost of the adopted regional transportation system specified in the National Capital Transportation Act of 1969.

Because of unanticipated delays in the development of the city's bond issuance program for capital projects, the Self-Government Act was amended several times in the past to extend the interim borrowing authority. The District has agreed to enter the market to issue bonds for capital projects in the near future. Accordingly, one year transitional borrowing authority legislation will be sought to assist the District in its final year of borrowing from the U.S. Treasury.

The District of Columbia is requesting an appropriation of \$115.0 million for capital projects loans from the U.S. Treasury for 1984. This amount is for the general fund and the water and sewer enterprise fund.

The 1984 limitation on direct loan obligations of \$115.0 million will meet part of the cash requirements for capital projects during the year ending September 30, 1984.

The following table shows the status of general fund capital projects loans authorizations on a cumulative basis:

Temporary advances have been made by the U.S. Treasury to the District of Columbia to meet short-term cash requirements, resulting from variations in the rate of disbursements and tax collections during the year (53 Stat. 1118). In the future, the city plans to meet these cash needs in the private market. No future advances will be made by the U.S. Treasury.

The Equal Employment Opportunity Commission (EEOC) is the Federal agency responsible for enforcement of; the Age Discrimination in Employment Act of 1967; title VII of the Civil Rights Act of 1964; the Equal Pay Act of 1963; and, in the Federal sector only, section 501 of the Rehabilitation Act of 1963. These acts prohibit employment discrimination based on race, sex, religion, national origin, age, or handicap status. The Equal Employment Opportunity Commission is also responsible for carrying out Executive Order 12067 which promotes coordination and minimizes conflict and duplication among Federal agencies which administer statutes or regulations involving employment discrimination.

EXPORT-IMPORT BANK OF THE UNITED STATES

Federal Funds

Public enterprise funds:

EXPORT-IMPORT BANK OF THE UNITED STATES

The Export-Import Bank of the United States is authorized to make such expenditures within the limits of funds and borrowing authority available to such corporation, and in accordance with law, and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation. Provided, That none of the funds available during the current fiscal year may be used to make expenditures, contracts, or commitments for the export of nuclear equipment, fuel, or technology to any country other than a nuclear weapon State as defined in Article IX of the Treaty on the Non-Proliferation of Nuclear Weapons eligible to receive economic or military assistance under this Act that has detonated a nuclear explosive after the date of enactment of this Act.

LIMITATION ON PROGRAM ACTIVITY

During fiscal year 1984 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$3,830,000,000. During fiscal year 1984, commitments to guarantee loans may be made only to the extent that the total loan principal any part of which is to be guaranteed, shall not exceed \$10,000,000,000. (The Export-Import Bank Act of 1945, as amended.)

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

The purpose of the Export-Import Bank is to aid in financing and to facilitate U.S. exports.

To accomplish its objectives, the Bank's authority and resources are used to: assume commercial and political risks that exporters or private institutions are unwilling or unable to undertake; overcome maturity and other limitations in private sector export financing; assist U.S. exporters to meet foreign officially sponsored export credit competition; and provide leadership and guidance in export financing to the U.S. exporting and banking communities and to foreign borrowers.

A limitation of \$3.83 billion for direct loans is proposed for 1984. The President will seek a supplemental authorization for direct loans of up to \$2.67 billion for 1984 if necessary to meet subsidized foreign officially supported competition.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Federal Farm Credit Board.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of: 12 Federal land banks; 13 banks for cooperatives; 12 Federal intermediate credit banks; 479 Federal land bank associations; and 421 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. The deposit insurance ceiling protection has been \$100 thousand since March 31, 1980. In order to accomplish its varied functions in the protection of bank depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. The major portion of the Corporation's operations consists of the examination of State banks that are not members of the Federal Reserve System and liquidation activities attendant to insured banks that have closed.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the Treasury of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1983 and 1984.

In order to facilitate deposit assumptions or to assist operating banks, the Corporation is authorized to purchase notes issued by the assuming bank, or in the case of direct assistance, notes issued by the operating bank. The above schedule reflects the outstanding principal amounts of these notes and projected repayments based on the notes agreements.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of September 30, 1982, the deposit insurance fund amounted to \$12.8 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The estimates for 1983 and 1984 in these statements make no provision for losses and expenses which might occur by reason of the closing of any bank after September 30, 1982, because there is no sound basis for predicting which insured banks, if any, will close after that date.

1. *Civil defense*—(a) *State and local emergency management.*—This program provides the foundation for the Federal, State, and local partnership that is essential in achieving integrated emergency management objectives. It supports State and local organizational requirements, and operating costs. It provides FEMA with management processes to be responsive to the field structure and to the various organizations that represent emergency management interests. This program is in support of the President's decision to improve the Nation's response to the consequences of disaster in peace and war.

(b) *Radiological defense.*—The mission of Radiological defense (RADEF) is: (1) To provide to individual citizens and officials the skills and knowledge, situation information, and guidance needed to minimize the effects of fallout radiation hazards of a nuclear attack in terms of injury and loss of life, and facilitate recovery efforts in a radiological environment; and (2) to provide support as appropriate for emergency response to peacetime nuclear incidents and other technological defense capabilities at all levels of government.

(c) *Population protection.*—Involves using State planners funded through a Federal contract to develop plans and systems for protecting the population from the consequences of 70 disasters by evacuation and/or in-place protection. The plans would address natural disasters, technological hazards and attack on the United States as part of an integrated emergency management system. Studies are being conducted on essential industry protection and shelter protection for workers of these industries.

(d) *State and local direction, control and warning.*—This program provides Federal technical and operational guidance and financial assistance to State and local governments. The financial assistance consists of a 50% Federal matching grant of allowable applicant costs relative to: the design and construction or modification of the protected facilities; the communications, emergency power, and electromagnetic pulse protective devices needed for sustained operations; improvements to emergency communications and warning systems; and the operational planning, testing and equipment needed to enhance capability and performance under emergency conditions. The program also supports the development of mobile command centers to enhance the survivability of direction and control operations and on-site capability for peacetime disasters.

2. *Comprehensive emergency preparedness planning.*—This program provides for the enhancement of State and local governments' capability to prepare for, respond to and mitigate disasters and emergencies. Program activities include hazard analyses, needs assessments, technical guidance and financial support designed to assist State and local governments in developing a comprehensive approach to preparedness planning. A primary instrument for implementing CEPP is the disaster improvement grant program. These annual grants provide up to \$50,000 to States on a 50/50 match basis for improving or maintaining disaster assistance plans. All but a few States are participants in this program.

3. *Radiological emergency preparedness.*—This program provides assistance to State and local governments through the issuance of guidance, review and approval of plans and evaluation of exercises. The program is focused on improvement of State and local capabilities to cope with radiological accidents at commercial nuclear power plants, other fixed nuclear facilities, nuclear materials license holders and transportation of radioactive materials.

4. *Flood plain management.*—This activity involves the operation of a program that combines mapping, regulatory, and technical-assistance efforts for the purposes of responding to known flood hazards and mitigating their effects through a comprehensive approach to the management of flood plains.

5. *Emergency Information and Coordination Center (EICC).*—The mission of the EICC is to provide FEMA with information, data and facilities for making accurate and timely decisions, including the communications required for rapid and reliable transmission of these decisions under all conditions.

1. *Civil defense.*—This activity includes the plans, capabilities and staff for portions of civil preparedness to help State and local governments prepare for and respond to major emergencies; provides Federal telecommunications and dedicated warning systems; provides assistance at State and local levels for the emergency broadcast system and provides for development of training materials and training programs. Studies, research and development activities in this program, provide the technical basis for items such as population protection, recovery from nuclear attack, and industrial protection.

2. *Federal preparedness.*—The goals of the Federal preparedness activity are to achieve Government readiness to insure that the Nation will be able to respond, manage, and recover from peacetime or wartime national security emergencies and to enable government, at all levels, to cope with the consequences of accidental, natural, and man-caused occurrences.

3. *Training and education.*—This program prepares Federal, State and local officials, and their supporting staffs and constituencies, to meet the responsibilities and challenges of hazard mitigation, emergency preparedness, and disaster response. This activity supports the National Emergency Training Center facility located in Emmitsburg, Md.

4. *Fire prevention and control.*—The goal of this program is to reduce substantially the Nation's loss of life from unwanted fire and to achieve significant reductions in property and nonfatal human injury due to fire by the year 2000. Funding of this program is requested at the same level as 1983.

The National Insurance Development Fund provides the funding source for two programs authorized by the Urban Property Protection and Reinsurance Act of 1968, as amended: (1) The FAIR (Fair Access to Insurance Requirements) Plan/Riot Reinsurance Program, a cooperative effort by insurance companies, State governments, and the Federal Government aimed at providing reasonable access to essential property insurance in urban areas; and (2) the Federal Crime Insurance Program, which provides burglary and robbery insurance at affordable premium rates on properties that meet protective device requirements where such coverage is not available in the private market. The budget estimates assume that both of these programs will be continued beyond May 20, 1983, when the authorizing legislation expires.

Budget program—1. Riot reinsurance claims.—The estimate of claims paid through riot and civil disorder reinsurance is expected to be about \$650 thousand in 1984.

2. *Crime insurance—(a) Insurance claims.*—Claims reflect insurance payments in the program.

(b) *Operating expenses.*—Expenses are incurred by fiscal agents in issuing policies, settling claims, and maintaining accounting and statistical records.

3. *Administrative expenses.*—This represents the administrative cost of operating the programs.

4. *Interest expense.*—This represents interest on Treasury borrowings needed to defray underwriting and loss expenses of the crime insurance program.

Financing.—Claims and expenses are estimated to be paid from premium income, income from holdings of Government securities and Treasury borrowings.

Operating results.—Claims and expenses are expected to exceed premium income resulting in a decrease in the reserves of the fund. The deficits have been reduced, in part, by major rate increases and rating changes which have taken place in both programs.

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities which enact and enforce appropriate flood plain management measures. Communities must participate in the program within 1 year of the time they are identified as flood prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes.

Under the emergency program, structures in identified flood-prone areas are eligible for limited amounts of coverage at subsidized insurance rates. Under the regular program, studies must be made of different flood risks in flood-prone areas to establish actuarial premium rates. These rates are charged for insurance on new construction. Coverage is available on virtually all types of buildings and their contents in amounts up to \$245 thousand for residential and \$550 thousand for other types.

Significant indicators of program size are as follows:

	1982 actual	1983 estimate	1984 estimate
Policies in force	1,845,244	1,956,000	2,053,800
Insurance in force (billions of dollars)	\$102.9	\$110.5	\$119.0

Budget program.—1. Insurance underwriting expense.—Cost of initiating and maintaining flood insurance policies is estimated at \$110,236 thousand in 1984.

2. Loss and adjustment expense.—Insured flood losses and associated loss adjustment expense is estimated at \$431,632 thousand in 1984.

3. Interest expense.—Interest on Treasury borrowings needed to defray underwriting and loss expenses is estimated at \$6,907 thousand in 1984.

Financing.—The Administrator is authorized to borrow up to \$1 billion to carry out the program. Borrowings are estimated to total \$113,732 thousand by the end of 1984. An appropriation of \$37,521 thousand is requested in 1984 to retire agency debt. The program is also financed through premium income, and on January 1, 1981, an expense constant of \$20 was added to shift the administrative expenses from the taxpayer to the beneficiary of the program, the policyholder.

Operating results.—Cumulative expenses are expected to exceed revenue and receipts from Federal and non-Federal sources by approximately \$362 million by the end of 1984. This cumulative deficit is financed through appropriations of \$966 million and by charges against borrowing authority of \$111 million.

The Director of FEMA is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Federal Emergency Management Agency. Property and the proceeds thereof are used as nearly as possible in accordance with the terms of the gift or bequest.

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies for and supervises the operation of the 12 Federal home loan banks, the system of Federal savings and loan associations, the Federal Savings and Loan Insurance Corporation, and the Federal Home Loan Mortgage Corporation. It is also responsible for the examination of Federal savings and loan associations and for the examination and supervision of State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. The Home Owner's Loan Act of 1933, as amended, provides that all expenses of the Office of Examinations and Supervision shall be considered nonadministrative. The administrative expenses of the Federal Home Loan Bank Board, including the home office of the Office of Examinations and Supervision, are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation. The expenses of the field offices of the Office of Examinations and Supervision are paid from fees collected from savings and loan institutions examined and from assessments against the Federal Savings and Loan Insurance Corporation.

Budget program.—The Board's budget program consists of several activities:

1. *Supervision of Federal home loan banks and applications processing.*—The Board supervises the operations of the 12 Federal home loan banks. Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

2. *Examination and supervision of Federal and State-chartered thrift institutions.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal home loan bank system which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively, with the respective State authorities.

3. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

4. *Analysis of operations.*—Analyses are made of the financial condition of member institutions, the flow of

savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

5. *Administrative services.*—These consist of auditing, accounting, budgeting, and financial reporting; internal budget control; and fiscal organization and management. Also included are general housekeeping and operating services, which include printing and reproduction work.

The 12 Federal home loan banks seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Section 11(i) of the Federal Home Loan Bank Act authorizes the banks to borrow from the Treasury up to \$4 billion outstanding at any one time.

The amounts shown in the schedules for the activities discussed above for 1984 include administrative expenses under an annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under a limitation. Administrative expenses are estimated to increase from \$25.0 million in 1983 to \$25.8 million in 1984. Nonadministrative expenses covering examination and supervision of savings and loan associations are discussed separately, below.

The Federal Savings and Loan Insurance Corporation (FSLIC) relies on the Office of Examinations and Supervision to protect its assets against depletion from the financial failure of any insured savings and loan association. The Office's responsibility extends to all institutions insured by the Federal Savings and Loan Insurance Corporation as well as noninsured member institutions of the Federal home loan bank system not subject to State examination.

The Office monitors savings and loan associations through continual analysis of their operating policies and financial reports, regularly scheduled examinations, and occasional special examinations. The purpose

of the monitoring process is to determine compliance with Federal Home Loan Bank Board regulations and to ascertain the quality of management and the financial soundness of the member associations. If the Office detects actual or potentially unsafe or unsound practices in insured associations, supervisory agents from the Federal home loan banks work with the association to prevent or correct poor financial or management performance. The operations of the Office are funded substantially through direct examination charges imposed on savings and loan associations.

The Office also has examination and supervisory responsibilities with respect to savings and loan holding companies and their subsidiaries. In addition, the Office has assumed responsibilities pursuant to legislation in the areas of consumer credit protection, equal opportunity, and security measures.

The following table reflects the work of the Office:

¹ In fiscal year 1982, the Corporation reclassified \$9.5 million of non-performing, foreclosed mortgage loans that had been acquired from liquidated insured institutions. Following foreclosure, these loan assets were properly reclassified as real estate property assets pending sale or disposition.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations, Federal mutual savings banks, and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection, which insures each saver in a member association against financial loss up to a statutory limit of \$100 thousand, may be provided either through the prevention of default or the payment of insurance to savings accounts holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of an association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as a receiver, or co-receiver upon the request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under the direction of the Federal Home Loan Bank Board, which provides administrative services. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

Budget program.—The Insurance Corporation's budget program consists of the following activities:

1. *Administrative expenses subject to limitation.*—This category includes the estimated costs of executive direction and policy formulation.

2. *Payments to Federal Home Loan Bank Board for services and facilities.*—The Corporation will pay 21% of the total administrative expenses of the Federal Home Loan Bank Board plus 49% of the remaining 79% in 1984 in return for services and facilities from the Board.

3. *Contributions and provision for contributions to insured thrift institutions.*—This item is the estimated amount needed in 1984 to prevent the default of insured institutions.

4. *Refund of additional premium prepayments.*—A 1962 amendment of the National Housing Act required that each insured institution pay an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year, less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The amendment also provided for the crediting of a return on the accumulated prepayment of each insured association at a rate equal to the average rate realized by the Corporation on its own investment portfolio.

Another amendment to the National Housing Act provides for a phaseout of the secondary reserve over the first 10 minimum net reduction years occurring after December 31, 1973. In May of each year, the Corporation will reduce the amount of each insured institution's pro rata share of the secondary reserve as of the preceding December 31 by a cash refund of the difference between the pro rata share and the percentage of its beginning balance on a percentage basis prescribed in the law.

The Garn-St Germain Depository Institutions Act of 1982 permits the FSLIC to terminate the payback of the secondary reserve when it determines that extraordinary financial conditions exist which increase the risk to the insurance fund. The payback can continue thereafter if otherwise authorized by law.

5. *Liquidation and other expenses.*—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agreements, the disposition of assets purchased from, and loans to insured institutions to prevent default.

6. *Interest on notes payable.*—This is interest paid on promissory notes issued by the Corporation for the purchase of either Income Capital Certificates or Net Worth Certificates. The certificates are issued by qualifying insured institutions with low net worth in order to improve or maintain their capital position.

Financing.—The original capital of \$100 million has been completely repaid to Treasury, together with an additional \$43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of \$750 million outstanding at any one time. No borrowing under this authorization has ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured savers.

Operating results.—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of \$7,504.4 million as of September 30, 1982. Total revenues and other receipts since 1934 of \$9,681.6 million have been applied as follows:

The purpose of the Authority is to serve as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations Statute, and decide major policy issues, prescribe regulations, and disseminate information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the Federal Labor Relations Authority gives full recognition to the role of the Federal Government as an employer.

1. *Adjudication.*—The Authority adjudicates labor-management disputes in the Federal sector including: appeals on negotiability issues; exceptions to arbitration awards; appropriate units for the purposes of exclusive recognition; eligibility of labor organizations for national consultation rights and unfair labor practice complaints.

The workloads for the activity are reflected in the following table:

CASE DISPOSITIONS

	1982 actual	1983 estimate	1984 estimate
Arbitration appeals	147	153	158
Negotiability appeals	201	209	215
Representation appeals/requests for review	88	92	95
Unfair labor practice appeals	200	208	214
Court cases	38	58	72
Major advice requests	30	32	28

2. *Hearings.*—This activity provides for holding hearings on unfair labor practice complaints, issuing reports, and making recommendations to the Authority on each case to allow timely settlement of disputes arising between agencies and unions. Workloads are reflected in the following table:

CASE DISPOSITIONS

	1982 actual	1983 estimate	1984 estimate
Decisions	194	211	220
Settlements	807	844	923

3. *Office of the General Counsel.*—The functions of this Office include the investigation of all allegations of unfair labor practices filed and the processing of all representation petitions received; the exercise of final authority over the issuance and prosecution of all complaints; the supervision and conducting of elections concerning the exclusive recognition of labor organizations, and the certification of the results of elections; the conducting of all hearings to resolve disputed issues in representation cases; and the direction and supervision of all employees of the Regional Offices. Workloads are reflected in the following table:

4. *Federal Service Impasses Panel.*—The functions of the Panel involve the resolution of labor negotiation impasses between Federal agencies and labor organizations which arise under the Civil Service Reform Act of 1978, the Panama Canal Act of 1979 and other statutes. The Panel uses a variety of procedures including fact-finding and arbitration.

	1982 actual	1983 estimate	1984 estimate
Impasse resolutions	155	168	188

5. *Office of Administration.*—The Office of Administration provides a complete range of administrative support to all components of the Federal Labor Relations Authority. These activities involve financial management, which includes budget, accounting and payroll support; personnel management, which includes position management and classification; and office services, which includes space management, procurement, contracting, printing support, supply and property management, records management and other administrative services.

The Federal Maritime Commission administers the shipping statutes which require regulation of the domestic offshore and international waterborne commerce of the United States. In addition, the Commission has responsibility for the licensing of ocean freight forwarders; and for insuring that vessel owners or operators establish financial responsibility for water pollution, death or injury to passengers or other persons on voyages to and from U.S. ports, and indemnification of passengers for the nonperformance of transportation. Major program areas for 1984 will concentrate on undertaking regulatory reform activities; developing plans for major deregulation of the domestic offshore trades; and developing a program to computerize the filing of tariffs utilizing private sector resources.

The Service assists parties to disputes in industries affecting commerce to settle their disputes through conciliation and mediation.

1. *Dispute mediation.*—The Service assists labor and management in mediation and prevention of disputes, other than those involving rail and air transportation, whenever such disputes threaten to cause a substantial interruption of interstate commerce or a major impairment of the national defense. The Service also makes mediation and conciliation services available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service provides mandatory mediation and, where necessary, impartial boards of inquiry to assist in resolving labor disputes involving private nonprofit health care institutions. The workload shown below includes assignments closed in both the private and public sectors.

MEDIATION WORKLOAD DATA

Technical assistance/public information and educational activities.—Through its technical assistance program, the Service initiates and develops labor-management committees, training programs, conferences, and specialized workshops dealing with issues in collective bargaining. Mediators also participate in public information and educational activities such as lectures, seminars, and conferences.

2. *Arbitration services.*—The Service assists parties in disputes in utilizing the arbitration process for the resolution of disputes arising under or in the negotiation of collective bargaining agreements in the private and public sectors. This activity also includes the appointment of boards of inquiry to look into the facts of a dispute in the health care industry.

ARBITRATION SERVICES WORKLOAD DATA

	1980 act.	1981 act.	1982 act.	1983 est.	1984 est.

Number of arbitrators appointed	13,911	13,219	12,317	13,500	14,000

3. *Management and administrative support.*—This activity provides for overall management and administration, policy planning, research and evaluation, and employee development.

4. *Boards and panels.*—Provision is made for ad hoc use of labor relations experts, individually or in panels, in support of the mediation function, for boards of inquiry appointed by the President in emergency disputes, and for boards of inquiry which the Director of FMCS may appoint in a contract dispute involving health care institutions.

5. *Labor-management cooperation project.*—The Labor Management Cooperation Act of 1978 (29 U.S.C. 125a) authorizes the Service to carry out this program of contracts and grants to support the establishment and operation of plant, area, and industry labor-management committees. No funds are requested for this program in 1984.

6. *Age discrimination mediation project.*—Under this demonstration project, the Service mediates settlements of complaints filed under the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.) alleging discrimination on the basis of age in federally funded activities. The demonstration is expected to be evaluated and completed by the end of 1983.

The Federal Trade Commission is charged by law with insuring that competition in the marketplace is vigorous, free, and fair. This is accomplished by elimi-

nating threats to fair and honest competition from all sources, both public and private.

1. *Maintaining competition.*—The Commission's efforts to enforce the antitrust laws are aimed at reducing prices to consumers, limiting the effects of inflation, and fostering and preserving competition and the free enterprise system. The Commission examines competitive restraints imposed by the private sector or by regulatory actions that unduly restrict or limit the competitive process and adversely affect consumers, and takes action, where appropriate, to eliminate such restraints. In 1984, the Commission will be able to pursue this mandate with fewer resources due to productivity improvements and cost reduction efforts by management.

2. *Consumer protection.*—The Commission is charged with eliminating unfair or deceptive acts or practices affecting commerce. The goal of the Consumer Protective Mission is to improve market performance so that consumers can make informed choices when exercising their purchasing power. To accomplish this goal, the Commission will remove private and public restrictions on market structure; encourage business to provide consumers with accurate and useful information; and, reinforce market forces that enhance consumer welfare.

3. *Economic activities.*—This mission has four major functions: conducting research on the performance of the industrial economy; providing economic support to Commission's antitrust and consumer protection efforts; advising the Commission on the impact of governmental regulation on competition in various industries; and, developing economic reports on industrial structure and performance.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments (standard level user charges—SLUC) which approximate commercial rates for comparable space and services. SLUC income was \$1,797 million in 1982 and is estimated at \$1,762 million for 1983 and \$2,170 million for 1984.

The following table details the financing for the Federal Buildings Fund in 1983 and 1984.

The Federal Buildings Fund direct program consists of the following activities:

1. *Construction and acquisition of facilities.*—Space is acquired through direct federally financed construction of facilities, extensions estimated to cost \$500,000 and over to existing buildings, and direct purchasing of existing facilities. All costs directly attributable to Federal Buildings Fund construction projects for site acquisition, design, management and inspection, and construction are financed under this activity. The total cost of new commitments for direct federally financed construction and acquisition of facilities is estimated at \$71.4 million in 1983 and \$132.5 million in 1984.

2. *Repairs and alterations.*—Repairs and alterations of public buildings are funded under this activity. Cost effectiveness, overall appearance, state of repair, and operating efficiency are the principal criteria used in establishing priorities of work required with primary consideration given to repairs to prevent deterioration and damage to the buildings, their support systems, and necessary operating equipment. This activity also provides for conversions of existing facilities, extensions estimated to cost less than \$500,000, or a combination thereof.

3. *Purchase contract payments.*—Payments are made for liabilities incurred for facilities acquired under purchase contract authority. Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975. The periodic payments on the purchase contracts cover principal, interest, taxes, and other requirements.

4. *Rental of space.*—Space is acquired through the leasing of either existing buildings, including space occupied by Federal agencies in U.S. Postal Service facilities, or facilities to be built with private capital for lease to the Government.

5. *Real property operations.*—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, other miscellaneous services such as moving as a result of space adjustments, moving of agencies into newly acquired space, evaluation of new materials and equipment, and field supervision of the foregoing services. The 1984 direct program compares with the 1983 program as follows (estimated square feet and expenses in millions):

	1983	1984	1983	1984
	Square feet	Expenses	Square feet	Expenses
Cleaning.....	188.1	190.4	188.7	195.3

Protection.....	220.3	49.6	220.3	51.8
Contracting.....	11.4	10.6
Total.....	626.3	686.5

6. *Program direction.*—Overall general management including long- and short-range planning and administration of all programs which is the responsibility of the Public Buildings Service. In addition, this activity finances the costs of management and administration of each of the individual direct activities of the Federal Buildings Fund.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the standard level user charge.

This appropriation provides for Government-wide direction and coordination of a worldwide supply distribution system; management of supplies and personal property; transportation and travel management; vehicle fleet management; and property management activities for utilization, rehabilitation and donation of Federal personal property. Separate legislation will be proposed to authorize the application of industrial funding to the General Services Administrations' personal property program. This legislation provides for accountability and total cost recovery from the users of the system. Under industrial funding, the payment and recovery of operating costs would be accomplished through the General Supply Fund. Passage of this legislation would impact the personal property accounts as follows:

[In thousands of dollars]

Obligations:	1984
Operating expenses, personal property	-124,100
General Supply Fund	+124,100

1. *Supply.*—This activity provides for the operation of a worldwide supply system to contract for and distribute supplies and property to Federal agencies.

These activities include:

(a) A national supply distribution system of wholesale facilities through which commercial-type commodities are received, stored, and issued on a worldwide basis to customer agencies from GSA supply distribution facilities located in each of the 11 GSA regions and the fuel yard located in Washington, D.C. Self-service retail facilities provide administrative, office, and maintenance supplies, and standard forms to Federal agencies. This includes operation of programs for: processing and control of agency requisitions; liaison with customers to increase the scope of supply and support rendered to the Federal agencies; management of personal property validation of agency requirements; and proper inventory control and accountability systems. This program also operates the civil agency catalog activity and pro-

vides programs for commodity management and logistics data management.

(b) Contracting for commercial-type items required by Federal agencies and other authorized users. In addition to contracting and purchasing, this program selects commodities for inclusion in the stores, nonstores, and Federal supply schedules programs by determining the method of supply that is most economical and effective.

(c) Contract management to assure that vendors fully meet all terms and conditions of contracts, and that the quality of materials purchased complies with requirements of those contracts. Timely delivery of commodities of specified quality is assured by inspection and surveillance at contractors' plants or GSA supply facilities, by laboratory tests and analyses prior to acceptance, and by contract administration assistance.

(d) Commodity centers responsible for nationwide management of their respective commodities including contracting, inventory management, engineering and contract management. These centers are tools, furniture, automotive, and general products.

2. *Transportation.*—This activity provides a comprehensive Government-wide program for transportation and travel management, operation and maintenance of motor equipment to meet the requirements of Federal agencies, development and execution of the automotive procurement function of the Government. Vehicle procurement functions and oversight responsibilities in direct support of the interagency motor pool system are financed through the General Supply Fund.

3. *Property management.*—This activity plans, directs, and coordinates on a worldwide basis programs and activities relating to maximum utilization of excess personal property; rehabilitation and reclamation of personal property; the transfer of surplus personal property for donation to the States and local organizations for public purposes and other purposes, and the disposal of excess Federal personal property (except DOD property) by sale.

Reimbursable operations.—Various services are provided to other Government agencies on a fully reimbursable basis. The primary services provided involve packing and packaging of items for shipment to overseas destinations. Other services include support for CENPRO (Centralized Procurement) under the U.S./Saudi Arabian Joint Economic Corporation.

This fund finances, on a reimbursable basis, (1) a national supply depot system and a system of ordering supplies for direct delivery to agencies; (2) a system of interagency motor vehicle pools and (3) the purchase of administrative equipment for using activities. This estimate provides for supplies and services to both military and civilian agencies.

Separate legislation will be proposed to authorize introduction of industrial funding to the General supply fund.

1. *Supply operations*—(a) *Stores, regular*.—Stock of common-use commodities are purchased in volume and stored in supply depots for sale to Government agencies. Sales were \$916.9 million in 1982, and are estimated to be \$979 million in 1983, and \$1,132.0 million in 1984.

(b) *Stores, direct delivery*.—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$180.1 million in 1982, and are estimated to be \$183.7 million in 1983 and \$362.0 million in 1984.

(c) *Special order*.—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to using agencies. Sales were \$321.9 million in 1982, and are estimated to be \$328.3 million in 1983 and \$409.0 million in 1984.

(d) *Export operations*.—Stores and nonstores items are shipped to overseas customers. Receipts to the fund

cover packing, transportation costs, and other reimbursable services. Sales were \$29.0 million in 1982, and are estimated to be \$29.0 million in 1983, and \$31.0 million in 1984.

2. *Property management and disposal operations*.—Receipts for rehabilitation and disposal services were \$0.2 million in 1982. This program has been discontinued due to increased level of contracting through commercial sources.

3. *Motor pools*.—Services are provided through a system of interagency motor pools. Sales were \$243.4 million in 1982, and are estimated to be \$251.3 million in 1983, and \$274.1 million in 1984. Vehicle mileage in interagency motor pools was 978 million in 1982 and is estimated to be 988 million in 1983 and 1 billion for 1984.

4. *Administrative equipment*.—Administrative equipment is purchased and charged on an accrual basis to the using activities. Receipts were \$3.3 million in 1982, and are estimated to be \$3.5 million in 1983 and \$3.9 million in 1984.

Other revenue and expense.—Gains or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1984 is estimated at \$853.0 million consisting of \$442.8 million direct appropriations, \$203.0 million donated assets, \$98.9 million provision for equipment, \$110.8 capitalized surplus, with \$2.5 million deducted for long-term leave liability.

The Consumer Information Center helps major Federal agencies and departments share with the public consumer information of general interest collected as a by-product of the Government's research, development, and procurement activities.

In addition, the Center promotes greater public awareness of existing Federal publications through wide dissemination to the general public of the *Consumer Information Catalog* and free publications, which are financed from using Federal agencies reimbursements to this appropriation for GPO distribution costs.

This fund finances, on a reimbursable basis, a telecommunications system for the Federal Government which is a major operating component of the national communications system.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from appropriations and funds of any agency or organization for telecommunications services and facilities made available to them.

The initial capital of \$9 million appropriated in 1963 was increased by \$20 million appropriated in 1977, \$5 million appropriated in 1980 and \$2.5 million appropriated in 1981. This capital may be increased by donation of supplies and equipment.

The estimate for 1984 provides for a continued increase in the volume and quality of communications services provided to executive agencies of the Government. Total sales for 1982 were \$641.3 million and are estimated at \$679.7 million in 1983, and \$702.2 million in 1984.

1. *Voice program.*—Provides for a telephonic system which enables personnel in each Federal agency to communicate directly with any other agency in the Nation. The system provides day-to-day services and incorporates features which would be necessary in emergency

situations. In addition, this program finances reimbursable services in support of other agencies dedicated requirements. Total sales for 1982 were \$595.1 million and are estimated at \$624.6 million in 1983 and \$654.8 million in 1984. Intercity Federal Telecommunications System calls were 240 million in 1982 and are estimated at 255 million in 1983, and 270 million in 1984.

2. *Data program.*—Provides a common unified communications system to satisfy record communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. Total sales for this program are projected to increase from \$35.5 million in 1982 to \$43.7 million in 1983 and decrease to \$35.5 million in 1984. The \$8.2 million decrease for 1984 is expected to result largely from replacement of the circuit switching network and further reduction of the communication centers, operations.

3. *Circuit procurement program.*—Provides for centralized procurement of dedicated circuits and related equipment for civil agencies to obtain the benefits of multiple tariff offerings of commercial carriers, while at the same time permitting each agency to maintain operational control over its own circuits. Sales were \$2.3 million in 1982, and are projected at \$2.4 million for 1983 and \$2.1 million for 1984.

4. *Special programs.*—Provides for an effective communications security program for civil agencies, including GSA, in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Emergency Management Agency in the emergency and major disaster programs. Total sales for 1982 were \$8.4 million and are estimated at \$9.0 million in 1983 and \$9.8 million in 1984.

5. *Capital outlays.*—Provides for the purchase of telecommunications equipment for the Voice, Data, Circuit Procurement and Special Programs. These purchases of equipment are made when the results to Federal user agencies will be the most efficient and cost-effective operation. Capital outlays were \$12.1 million in 1982 and are estimated to be \$8.8 million for 1983 and \$11.0 million for 1984.

Operating results and financial condition.—At the end of 1981, the net investment in the fund is \$36.8 million, composed of \$36.5 million appropriated, \$0.3 million donated assets capitalized. Following the close of each year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

The Automatic Data Processing Fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer, or otherwise of ADP equipment, maintenance of equipment, procurement and/or development of software programs with Government-wide application, and operation of service centers and related functions.

The estimate provides for an increase in revenue during 1983 and 1984. Sales are estimated to increase from \$148.0 million in 1982 to \$183.8 million in 1983 and \$208.7 million in 1984.

1. *Teleprocessing services program.*—This program provides the mandatory means by which Federal agencies acquire teleprocessing services from private sector vendors who participate in the multiple award schedule contracts.

2. *Federal Data Processing Centers program.*—FDPC's are operated either by GSA or by other agencies under delegation of authority from GSA. They provide a full range of ADP services to all Federal agencies, including interactive time sharing; computer systems conversion support; general purpose software; language and software validation requirements; and a system for data collection.

3. *Contract services program.*—Provides ADP services to Federal agencies through regional contracts with private sector vendors for systems analysis and programming, computer-output-microfilm (COM) production, hardware maintenance and data conversion. The contracts are tailored to local market conditions and needs, while the overall effort has central program and policy direction.

4. *Manpower services program.*—Provides, on a reimbursable basis, project manager and ADP consulting services which complements the Office of Information Resources Management's commercial contracting program. This program was terminated at the end of 1982 and resources reprogramed to other programs that give a higher return on the U.S. Government's investment.

5. *Lease program.*—This program is used to economically procure ADP equipment by either entering into firm term multiyear lease contracts with vendors or by providing for the transfer of ADP equipment from one agency to another when equipment is excess to one agency's needs and fits another agency's requirements for equipment.

6. *Opportunity buy program.*—This program is used to make purchases of ADP equipment for other agencies when special discounts with time limitations and other arrangements become available and agencies are unable to take advantage of these cost reduction opportunities due to budget cycle limitations. These opportunities must offer a high rate of return on the Government's investment.

Operating results and financial condition.—At the end of 1982, the net investment of the fund is \$43.3 million, composed of \$30.0 million appropriated, \$11.1 million donated assets capitalized, \$1.7 million revaluation of equipment capitalized at fair market value, \$0.4 million reserve for unanticipated discontinuance of equipment. Following the close of each year any surplus earnings after making provision for prior year losses are deposited in miscellaneous receipts of the Treasury.

This appropriation provides for basic operations dealing with management of the Government's archives and records, operation of Presidential libraries, and for the review for declassification of security classified information.

In 1984 records in the National Archives and Federal records centers will total approximately 16.7 million cubic feet. The number of reference services expected to be provided will total 25.7 million.

1. *Records management and centers.*—In 1984, agencies will transfer 1,162 thousand cubic feet of inactive records to the records centers. Records disposal from the records centers will total 1,044 thousand cubic feet in 1984, and the number of reference services expected to be provided will total 22.3 million.

2. *Archives and related services.*—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies and the public and the number of documents sent by Federal agencies to be published in the Federal Register. In 1984 the number of reference services is estimated at 3.1 million and the number of Federal Register pages to be processed will be 245,000.

The records declassification program makes available to the public historically valuable information in the records of the Federal Government and in donated historical materials by declassifying as much information as possible without endangering the national security. In 1984, 2.8 million pages will be reviewed for declassification.

3. *National Historical Publications and Records Commission.*—This Commission coordinates and provides technical assistance to archival planning and assessment projects in many States and also offers a specialized reference service to Federal, State and local and nongovernment institutions that are publishing significant portions of records from official government files. The Commission also lends its endorsement and support to those specific projects that further the basic objectives stated in its legislation.

4. *Information security oversight office.*—To make available to the public as much information as possible regarding the affairs of Government while, at the same time, providing maximum security protection for the national security information that warrants such protection. In 1984, 100 inspections of information security programs will be conducted; a total of 200 reviews of agency regulations, systematic review guidelines and classification guides will be performed; implementing directives will be prepared and promulgated and seminars and symposia will be conducted to promote better understanding of the program.

This appropriation funds staff for the acquisition, administration and disposal of National Defense Stockpile inventories; administration and disposal of the Defense Production Act inventory; utilization and disposal of excess and surplus real property in 1984.

The estimate for 1984 provides for storage, maintenance and inspection of stockpile materials, disposal of those stockpile materials excess to objectives and the acquisition of materials needed to meet objectives, the appraisal of real property, and continuing emphasis on reuse of existing real property to extend its useful life.

1. *Stockpile management.*—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations.

2. *Stockpile transactions.*—This activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specifications, and quality; these activities support the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market.

3. *Real property.*—This activity promotes maximum utilization of real property by Federal agencies, and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, necessary environmental and cultural analyses, disposition and predisposition reuse planning, and real property utilization surveys.

4. *Personal property.*—This activity was transferred to the Operating expenses, personal property appropriation effective in 1983.

ed unless otherwise provided in appropriation acts (3) a limitation on the fund balance, and (4) requirements for certain plans and reports to be submitted to Congress.

The purpose of this fund is to provide for the acquisition of certain strategic and critical materials to preclude the dependency of the United States upon foreign sources for supplies of such materials in times of a national emergency. Related operating expenses are provided under the appropriation Federal Property Resources Service, operating expenses.

The Government-owned William Langer Jewel Bearing Plant at Rolla, N. Dak., is the only facility of its kind in the United States which has the capability to produce all types of jewel bearings in quantity.

In 1983, operations for the manufacture of dosimeters will commence. It is estimated that 200,000 dosimeters will be produced by 1984. The 1984 estimate provides for operation of the jewel bearing plant on a break even

basis. In 1984 it is estimated that 2,500,000 jewel bearings and related components will be produced and sold.

This appropriation provides for policy direction and coordination of all GSA programs by the Administrator, his Deputy, 11 Regional Administrators and Congressional and External Affairs; agencywide acquisition policy, planning and coordination; and financing of administrative services on a centralized and integrated basis for all GSA programs.

1. *Executive direction.*—Directs the execution of all functions assigned GSA by the Federal Property and Administrative Services Act of 1949 as amended, and the reorganization plans of the President. Maintains close coordination with Small Business Administration on national minority business proposals and contracts, assuring they receive a fair share of department's business. Formulates agency policy regarding management matters and pursues large scale management improvement initiatives.

2. *Comptroller, organization and personnel, and oversight.*—Provides centralized budgeting, financial management, accounting and planning for GSA. Plans, directs, and implements all activities related to personnel management, including labor-management relations, training, position management and personnel documentation; conducts management and analytical studies of GSA organizations; directs the GSA mobilization, emergency relocation, and national civil defense planning program, including coordination of support services to other agencies. Oversees implementation of audit reports from the Office of Inspector General and GAO; and coordinates all activities related to administrative management. This activity is also responsible for the postpayment audit of Government transportation bills, including payments to commercial audit firms, and for settling transportation claims by and against the Government. Also provides accounting services to the Department of Justice in defense of Indian Tribal claims against the Government.

3. *Board of Contract Appeals.*—In accordance with the Contract Disputes Act of 1978, the Board has jurisdiction over any dispute relating to a contract for the provision of goods and services to the Government, inclusive of, but not limited to, disputes clause cases concerning contract performance; appeals of disappointed bidders; and proposed debarment or suspension actions.

4. *Legal services.*—Covers the fields of real property, personal property, archives and records, automated data and telecommunications, transportation and public utilities, stockpile acquisition and disposal and finance and administration.

5. *Acquisition policy.*—Oversees the implementation of GSA-wide acquisition, supply, and storage management policies, and insures implementation through surveillance and performance of acquisition management reviews. This office is the primary point of contact with the Office of Federal Procurement Policy; administers the Federal Procurement Regulations; and prepares legislation for the agency acquisition program. In 1984, this Office will be assuming the functions of the Federal Acquisition Institute.

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Renegotiation Act of 1951. Funds in this account are used to pay contractors engaged in business with the Federal Government who have prepaid excess profits in the amount determined by the Renegotiation Board. Subsequently, the Court of Claims judged a refund was due.

The activity in this account is for contractor claims presently in the U.S. Court of Claims since the Renegotiation Board no longer exists.

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS

SEC. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); and (2) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may be so transferred, with the approval of the Office of Management and Budget.

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

Intragovernmental fund—Continued

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS—
Continued

SEC. 3. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 4. Not to exceed 3 per centum of the personnel compensation made available in appropriations for operating expenses and salaries and expenses, excluding the Federal Buildings Fund, during the current fiscal year, may be transferred between such appropriations for mandatory program requirements. Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate for approval.

SEC. 5. Funds in the Federal Buildings Fund made available for fiscal year 1983 for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary for mandatory program requirements. Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate for approval.

SEC. 6. Funds made available by this or any other Act for the payment of rent shall be available hereafter for the purpose of leasing space without regard to section 322 of the Act of June 30, 1932, as amended (40 U.S.C. 278a).

Public Law 93-642 established the Harry S Truman Scholarship Foundation to operate the scholarship program that is the permanent Federal memorial to the

33rd President of the United States. The Foundation awards college scholarships of up to \$5 thousand annually for up to four years to qualified persons who demonstrate outstanding potential for and interest in careers in public service at the local, State, or Federal level.

In 1984, the Foundation will conduct its eighth annual competition to select 105 new Truman scholars and will continue to assist in the placement of graduating Truman scholars in public service positions.

1. *Scholarship awards.*—This activity is comprised of scholarship funds. About 30% of each year's funds are spent on award costs for the school year ending during that fiscal year, with the remaining 70% spent on awards for the next school year.

2. *Program administration.*—This activity covers all costs of operating the program, including annual program announcement, interview and selection of Truman scholars, calculation and disbursement of scholarship awards, monitoring of student progress, and placement assistance.

3. *Investment transactions.*—This activity represents Treasury investment transactions conducted at either a discount or a premium.

The Advisory Commission on Intergovernmental Relations (ACIR) is an independent, bipartisan body which identifies and analyzes the causes of intergovernmental conflicts and recommends ways of strengthening and improving the American Federal system. The 26-member Commission includes elected and appointed officials from Federal, State, and local governments, as well as representatives of the general public.

The Commission and its staff examine Federal, State, and local trends, events, and programs having an intergovernmental impact. Proposed legislation and executive actions are reviewed to determine their overall effect on the Federal system. The Commission also identifies emerging problems of Federal-State-local relations and assists States and localities in anticipating and meeting problems caused by various intergovernmental overlaps and conflicts.

The Commission makes recommendations concerning the workings and structural arrangements of governmental units and allocation of responsibilities and revenues among the various levels of government. The recommendations and published reports growing out of the Commission's work are submitted to the executive and legislative branches of Federal, State, and local governments for appropriate action.

Continuing and annual projects of the Commission include assessing the changing public attitudes on government and taxes, surveying and identifying trends in State and local finances, monitoring key intergovernmental legislation of Federal, State, and local governments, cataloging Federal grants-in-aid, and providing educational and technical assistance to Federal, State, and local governments with regard to Commission recommendations.

Nonrecurring projects currently under Commission study include development of summary information on State aid to distressed communities an analysis of State taxes and fees imposed on the production of natural resources such as coal and natural gas the role of the State in the federal system effects of Federal regulation on State and local governments and State taxation of multinational corporations.

Appropriations finance the personnel and personnel-related expenses incurred in the basic day-to-day operation of the Commission.

The Commission receives funds from other Federal agencies for special projects carried out by the Commission pursuant to contracts with these agencies. Each contract is charged for a share of the Commission's overhead.

Current research being conducted under interagency contracts with the National Institute of Corrections involves reviewing the status of the Nation's local correctional facilities and examining structural and nonstructural State, local, and Federal strategies aimed at alleviating the problems of local jails. Under contract with

the Urban Mass Transportation Agency, ACIR is investigating alternative methods of financing urban mass transportation. Juvenile Justice is the subject being researched under a contract from the Department of Justice.

Contributions from State and local governments and nonprofit organizations are used to strengthen the Commission's clearinghouse, information, and policy education services to State and local governments and to improve intergovernmental coordination and relations. Specific items financed by this account include the Commission's quarterly publication, Intergovernmental Perspective; summaries of full Commission reports making up the In Brief series of ACIR publications; and reprints of popular out-of-print, but timely, Commission reports.

In 1977, the Commission returned to seeking contributions from State and local governments. The States are responding positively and a goal of \$120,000 has been established for 1984.

The Delaware River Basin Commission was created by compact (Public Law 87-328) among the States of Delaware, New Jersey, New York, the Commonwealth of Pennsylvania and the Federal Government.

The Susquehanna River Basin Commission was created by compact (Public Law 91-575) among the States of Maryland and New York, the Commonwealth of Pennsylvania, and the Federal Government.

The Compacts enable the Commissions to participate jointly in the development of water and related resources of the regions drained by the respective rivers and their tributaries.

This appropriation provides for the expenses of the U.S. Commissioner and his staff.

INTEREST PAYMENTS—Continued

The Washington Metropolitan Area Transit Authority (WMATA) is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and construct the Metro-rail rapid transit system and to operate the bus/rail transit system in the National Capital area. The rail system extends from the District of Columbia into the participating jurisdictions of Maryland and Virginia.

Rail capital construction grants and operating assistance grants to the WMATA are funded through the budget for the Department of Transportation. This WMATA account provides the annual Federal share of interest payments on outstanding WMATA bonds sold in support of the rail construction program. The WMATA bonds, totaling \$997 million, are guaranteed by the Federal government. In August, 1982, the WMATA and the Department of Transportation approved a supplemental Bond Participation Agreement providing for an overall two-thirds Federal and one-third local sharing of the interest and principal costs of the bonds. The Agreement requires the WMATA to establish a sinking fund and bond interest payment fund and develop other appropriate funding arrangements to meet fully and expeditiously its obligations under the terms of the Agreement. The first payments into the sinking fund will be in 1983. The terms of the Agreement also include the provision of stable and reliable sources of revenues by the State and local jurisdictions which constitute WMATA to cover their obligations to that Authority. The Secretary of Transportation has certified that the jurisdictions have complied with this provision. The 1984 request represents the Federal share under the terms of the Agreement (\$51,663,569).

The U.S. International Trade Commission is an independent agency created by act of Congress. The Commission's current powers and duties are provided for by the Tariff Act of 1930; the Trade Act of 1974; the Trade Agreements Act of 1979; the Agricultural Adjustment Act; and, section 1911 of the Financial Institution Regulatory and Interest Rate Control Act of 1978, 12 U.S.C. 635a-2.

The Commission conducts investigations and, where appropriate, makes determinations and recommendations, or takes action, in cases where (1) serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; (2) imports of goods sold at less than fair value may injure an industry; (3) foreign governments, organizations, or individuals, may have subsidized imports into the United States; (4) unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry or restrain and monopolize trade and commerce in the United States; or (5) imports of agricultural products may materially interfere with certain programs of the Department of Agriculture.

The Commission advises the President as to the probable economic effect on the domestic industry and consumers, of modification of duties and other barriers to trade which may be considered for inclusion in any proposed trade agreement with foreign countries. Further, the Commission, at the request of the President, the Congress, or on the Commission's own motion, undertakes comprehensive studies and provides reports on key issues relating to international trade and economic policy matters.

The Commission, in cooperation with the Secretary of the Treasury and the Secretary of Commerce, establishes for statistical purposes an enumeration of articles imported into the United States and exported from the United States, and seeks to establish comparability of such statistics with statistical programs for domestic production.

The Commission also issues a publication containing U.S. tariff schedules and related matters and considers questions concerning the arrangements of such schedules and the classification of articles.

Pursuant to section 175 of the Trade Act of 1974, the budget estimates for the Commission are included without revision by the President.

The Interstate Commerce Commission is responsible for regulating interstate surface transportation. During 1984, the Commission will assess the deregulatory changes that have occurred in the surface transportation industry since the passage of the Motor Carrier Act of 1980, the Staggers Rail Act of 1980, the Household Goods Transportation Act of 1980, and the Bus Regulatory Reform Act of 1982. Consistent with these legislative acts, the Commission is reducing staffing in 1983 and 1984.

1. *Proceedings.*—This program includes the regulation of rates, the granting of operating authorities, and the regulation of mergers, acquisitions, and abandonments. After an initial flurry of regulatory activity due to the implementation of deregulation legislation, the volume of casework continues to decline. The one exception is in the bus area, where the Bus Regulatory Reform Act of 1982 will require new rulemaking activity in 1983.

2. *Policy and analysis.*—This program encompasses all of the Commission's planning, analysis, and policy development activities. The program's emphasis has shifted from policy development and implementation of the new laws to monitoring and analyzing their impact on the industry and the public. Using information obtained through these efforts, the Commission will prepare testimony for oversight hearings, identify the need for any further legislation, and refine its policies and procedures.

3. *Compliance and consumer assistance.*—This program responds to the needs and concerns of individual consumers and businesses, as well as to the broader spectrum of public interests. The Commission's compliance efforts will focus on specialized compliance activities designed to complement enforcement efforts.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

4. *Enforcement.*—This program includes the investigation and prosecution of alleged violations of the Interstate Commerce Act, related statutes, and Commission regulations. The Commission will devote particular attention to protecting the public interest when the dynamics of a competitive marketplace are insufficient to do so.

The Commission is authorized, if a railroad ceases operations due to a cash shortage or a court order, to direct other railroads to operate the services of the railroad which ceased its operations. The directed carriers are reimbursed for the losses incurred and are paid a 6% profit on the operations performed. This authority is limited to a 240-day period, consisting of a 60-day authority and the ability to extend the order for an additional 180 days. No additional directed rail service is anticipated for 1984.

JAPAN-UNITED STATES FRIENDSHIP COMMISSION

Trust Funds

JAPAN-UNITED STATES FRIENDSHIP TRUST FUND

For expenses of the Japan-United States Friendship Commission as authorized by Public Law 94-118, as amended, from the interest earned on the Japan-United States Friendship Trust Fund, \$1,700,000, to remain available until expended; and an amount of Japanese currency not to exceed the equivalent of \$1,200,000 based on exchange rates at the time of payment of such amounts to remain available until expended: Provided, That not to exceed a total of \$2,500 of such amounts shall be available for official reception and representation expenses.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

The Japan-United States Friendship Act of 1975 established the Japan-United States Friendship Trust Fund, and created the Japan-United States Friendship Commission to make grants from the Fund for the promotion of scholarly, cultural, and artistic activities between Japan and the United States. The Commission is authorized to make expenditures from the appropriated income of the fund and, in an amount not to exceed 5% annually of the principal of the fund, to pay the expenses of the Commission and to make grants in support of studies, fellowships, scholarships, book collections, art programs, and other cultural and educational activities, primarily in the United States. The Commission received a contribution in May 1981 of \$2 million from the Government of Japan to be used for the purposes of the act during the next 4 to 5 years.

The Legal Services Corporation (LSC) funds State and local agencies which provide free civil legal assistance to the poor. LSC is a private, non-profit corporation which is outside the Federal Government and acts independently of related social and community services programs. Grantees are involved both in cases for individual clients and in broader "law reform" activities.

The administration proposes that the Corporation not be reauthorized and that no further Federal funding be provided.

The Commission provides marine mammal policy overview; reviews marine population conditions and makes conservation recommendations; recommends to the Secretaries of Commerce, Interior, and State steps to conserve marine mammals domestically and internationally; and manages a research program.

A continued decrease in research support is proposed as the Commission transfers research responsibilities to the Departments of Commerce and Interior.

The Merit Systems Protection Board performs the adjudicatory functions necessary to maintain the civil service merit system. These include hearing appeals on adverse actions, reduction in force actions, and retirement. The Board will report to the President on whether merit systems are sufficiently free from prohibited personnel practices to protect the public interest.

During its first 3 years, 96% of the cases appealed to the Board were processed to completion within 120 days. Board workloads are reflected in the following table:

The Special Counsel is empowered to investigate prohibited personnel practices in Federal agencies and political activities prohibited by the Hatch Act, and to administratively prosecute offending employees and agencies before the Merit Systems Protection Board. The Special Counsel may also transmit "whistleblower" allegations to the agency head concerned and require an agency investigation and a report to the Congress and the President when found appropriate.

Many cases that are referred to the Office are resolved without recourse to formal proceedings before the Board. Efforts to obtain such informal resolutions will continue in 1984.

The National Capital Planning Commission is the central planning agency for the Federal Government in the National Capital Region. The National Capital Region consists of the District of Columbia; Montgomery and Prince Georges counties in Maryland; Arlington, Fairfax, Loudoun and Prince William counties in Virginia; and all cities in Maryland and Virginia within the outer limits of such counties.

During 1984, the Commission will continue its efforts to closely work with other Federal agencies, the District of Columbia government, and other local governments and jurisdictions in the National Capital Region, including the Metropolitan Washington Council of Governments (COG). Major emphasis will again be placed on the continued preparation of Federal elements to the Comprehensive Plan for the National Capital, the five-year Federal Capital Improvements Program, and the review of Federal land acquisition and development proposals in the region. The Commission will continue to perform Federal interest reviews of the impact of proposed local, State and regional planning efforts on the Federal Establishment, as well as perform increased numbers of reviews of Federal grant applications dealing with land and water use in the National Capital Region.

¹ The activities of the Office of Self-Help and Technical Assistance and its loans become the responsibility of a nonprofit corporation. (The Consumer Cooperative Development Corporation.)

Public Law 97-35, approved on August 13, 1981, authorized the establishment of a nonprofit corporation (section 501(c)(3) of the Internal Revenue Code of 1954) to assume the duties and responsibilities of the Self-Help Fund. This organization (The Consumer Cooperative Development Corporation) has taken over the duties of the Office of Self-Help Development and Technical Assistance. Its duties consist of capital investment advances and interest supplements to eligible cooperatives that do not qualify for loans from the National Consumer Cooperative Bank, as well as technical assistance to cooperatives, to conduct research into matters relating to cooperatives, and to undertake investigations of new types of services which can be provided through cooperative not-for-profit organizations.

The new nonprofit corporation carries out these activities without additional appropriated funds.

The National Consumer Cooperative Bank was created and chartered by Public Law 95-351 to make loans and provide services to consumer cooperatives and other types of cooperatives. The bank is governed by fifteen directors, three of which are appointed by the President.

Public Law 97-35 provides for the orderly conversion, over time, of the bank to a private financial institution.

The first step in this process was the conversion, on December 31, 1981, of class A stock owned by the United States to class A notes. The process of privatization will be complete on redemption of these notes.

The capital of the bank consists of capital borrowed from the United States (class A notes), as well as equity purchased by borrowers from the bank (class B stock), and by borrowers or organizations eligible to borrow (class C stock). The bank is authorized to raise capital through the sale of its bonds, debentures, notes, and other evidences of indebtedness. Public Law 95-351 provides that the United States is not responsible for any obligation of the bank.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

Budget program.—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions.

The extent of the program is estimated as follows:

Item	1982 actual	1983 estimate	1984 estimate
Number of insured credit unions.....	16,835	17,070	17,350
Shares of insured member institutions as of Dec. 31 of the previous calendar year (in millions of dollars).....	\$56,823	\$61,779	\$67,666

It is estimated that approximately 5,600 State-chartered credit unions will be enrolled in the program by the end of 1984.

Financing.—Each insured credit union is required to pay a normal premium of one-twelfth of 1% of the total amount of its member accounts. The insurance fund is structured to be self-supporting through the insurance premiums which are paid by member credit unions. The premiums assessed are expected to cover all insurance claims and provide for an increase in the fund balance. This will be held in Government interest-bearing securities as an insurance reserve. The fund has \$100 million in borrowing authority from the Treasury for use in unforeseen emergencies. The authority to borrow from the Treasury has never been used and probably will not be exercised in 1983 or 1984.

Operating results.—Anticipated net income of \$15,051 thousand will be retained in the fund, raising the balance for unforeseen emergencies to \$233 million by the end of 1984.

The National Credit Union Central Liquidity Facility was established under Public Law 95-630. It began operations on October 1, 1979. The Central Liquidity Facility provides loans to member credit unions for seasonal and emergency needs.

The two primary sources of funds for the Facility are stock subscriptions from credit unions and borrowings

from the Federal Financing Bank. Credit unions, which choose to become members of the Facility, are required to purchase stock equal to one-half of 1% of their assets. One-half of the subscription in stock is forwarded to the Facility and deposited in the fund. The remaining half of the subscription remains on call in the credit union in investments as approved by the NCUA Board.

The Facility may borrow funds from any source to relend to member credit unions. This amount of borrowings is limited to twelve times the amount of capital stock subscriptions by the authorizing statute (Public Law 95-630). The amount has been further limited by the appropriation act to \$600 million in 1983. In 1984, an appropriation limitation on borrowing of \$600 million is proposed, of which \$210.4 million in borrowing is expected to be outstanding at the end of the year.

The Facility estimates that a cumulative total of \$95 million in direct loans will be made to member credit unions to meet liquidity demands during 1984.

The National Endowment for the Humanities funds activities intended to improve the quality of education and teaching in the humanities, to strengthen the scholarly foundation for humanities study and research activity and otherwise support the study of the humanities, and to advance understanding of the humanities among broad general audiences.

Support is provided through outright grants, matching grants, and a combination of the two. Eligible applicants include schools, higher education institutions, libraries, museums, historical organizations, professional associations, other cultural institutions, and individuals.

In 1984, major emphasis is being placed on projects and activities that improve humanities education and teaching in the Nation's schools, advance research and scholarship, and stimulate non-Federal support of the humanities.

In 1982, the Institute of Museum Services (IMS) was transferred from the Department of Education and established as an entity within the National Foundation on the Arts and Humanities.

1. *Grants to museums.*—The Institute of Museum Services assists museums of all sizes and disciplines to maintain, increase and improve their services to the public. The IMS offers three categories of assistance: (1) General Operating Support (GOS) to assist museums in meeting the cost of operations; (2) Special Project support (SP) to increase or improve museum services through exemplary projects which are additional to the operating program; and (3) Museum Assessment Program (MAP) to provide funds to museums for an independent professional assessment of programs and management.

2. *Administration.*—Funding for administration provides for the costs of operating the Institute's grant programs, and supports the salaries and other administrative expenses of the staff of the Institute of Museum Services. Of the unobligated balances carried forward from 1982, up to \$75,000 may be used for relocation expenses, as authorized by Public Law 97-257.

3. *National Museum Services Board.*—The National Museum Services Board has responsibility for determining the policies and programs of the Institute. The 20-member board meets at least four times a year and whenever one-third of its members request a meeting.

The National Institute of Building Sciences is a non-profit, nongovernmental corporation authorized by the Housing and Community Development Act of 1974. The purpose of the Institute is the development and maintenance of nationally recognized building performance criteria for maintenance of life, safety, health, and public welfare. Appropriations for 1978 through 1982 provided start-up capital for the Institute, which is now self-supporting.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1982 was 37,685 unfair labor practice cases and 9,430 representation cases. Estimates for unfair labor practice cases are 39,440 for 1983 and 41,806 for 1984. Representation case estimates are 10,610 for 1983 and 11,247 for 1984.

1. *Field investigation.*—Charges of unfair labor practices and petition for elections to resolve representation disputes are investigated by regional office personnel. Over 90% of the unfair labor practice cases and about 80% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases and the avoidance of litigation.

2. *Administrative law judge hearing.*—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1982 there were 1,066 hearings closed, 1 proceeding adjusted after close of hearing, and 1,122 decisions issued. The estimate for 1983 is for 1,150 hearings to be closed, 5 adjusted after hearing, and 1,175 decisions. The estimate for 1984 is for 1,278 hearings to be closed, 5 adjusted after hearing, and 1,292 decisions.

3. *Board adjudication.*—In an unfair labor practice case a judge's decision becomes a Board order if no exceptions are filed. About 33% of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed requires contested Board decision. In 1982, 1,051 such Board decisions were issued; the estimates for 1983 and 1984 are 1,227 and 1,483 respectively. In representation cases, regional directors initially decide the issues by Board delegation. In 1982 regional directors issued 1,425 such decisions; and the estimate is 1,236 for 1983 and 1,306 in 1984. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1982 the Board issued 93 representation decisions; the estimates for 1983 and 1984 are 110 and 141 respectively. The Board also ruled on 402 objection and challenge questions in election cases in 1982; it is estimated that 464 such rulings will be required in 1983 and 524 in 1984.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order

involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1982 a total of 348 Board decisions of all kinds required such litigation; the estimate for 1983 is 420, and for 1984 it is 568.

1. *Mediatory services.*—The Board mediates disputes over wages, hours, and working conditions for some 650 rail and air carriers and approximately 800,000 employees in the two industries.

The Board also provides technical assistance to enable labor and industry representatives to explore informally the relevant economic and noneconomic problems that condition collective bargaining in the railroad and airline industries.

2. *Voluntary arbitration and emergency disputes.*—When the parties fail to resolve their disputes through mediation, they are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint an emergency board to investigate and report on the disputes under section 10 of the Railway Labor Act (RLA). Such reports usually serve as a basis for resolving the disputes.

The Northeast Rail Service Act of 1981 amended the Railway Labor Act by adding a new emergency dispute procedure covering disputes between a publicly funded and operated commuter carrier and its employees. The act requires the Board to appoint the public members of factfinding panels on Conrail Amtrak Commuter authorities.

The Northeast Rail Service Act of 1981 also provides access to this machinery for Conrail employees with grievances arising

4. *Adjustment of railroad grievances (NRAB).*—Railroad employee grievances resulting from disputes over the interpretation or application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board (NRAB). The divisions of the Board are composed of an equal number of carrier and union representatives compensated by the party or parties they represent. Administrative direction and support are provided by the staff director/grievances and clerical assistants who are compensated by the National Mediation Board. The appropriation also provides for neutral referees to sit with the Board when they are deadlocked. In 1984 the number of cases closed will increase because a reduction in office space and overhead expenses will permit financing increased work by the neutral referees who decide cases.

The major research program activities of the Foundation are:

1. *Mathematical and physical sciences.*—Research in this activity is directed at increasing understanding of natural laws and phenomena. It includes research in mathematics, computer science, physics, chemistry, and materials. Studies deal with significant science areas such as chemical catalysis, ceramics, polymers, synchrotron radiation, experimental computer science, elementary particle, nuclear, and atomic physics, and new mathematical structures and techniques.

2. *Engineering.*—This research is aimed at increasing U.S. engineering capability and strength and, on selected occasions, focusing that capability and strength on areas which are relevant to national problems. Research in electrical, computer, and systems engineering, chemical and process engineering, civil and environmental engineering, and mechanical engineering and applied mechanics is supported. Studies include research on such diverse issues as large scale integrated circuit electronics, basic mechanisms of catalysis and various chemical and biochemical processes, earthquake hazards mitigation, and machine intelligence.

3. *Biological, behavioral, and social sciences.*—This activity supports research in physiology, cellular, and molecular biology; behavioral and neural sciences; environmental biology; social and economic sciences and information sciences. Research covers all aspects of biology and social and economic sciences including the molecular basis for cells, organs, and organisms; freshwater ecosystems; relationships among plants and animals; economic theory and decision sciences.

4. *Astronomical, atmospheric, Earth, and ocean sciences.*—This research advances physical knowledge of the universe and knowledge of the planet Earth. It includes studies of the life cycles of stars; the nature of the Earth and its geologic history; open ocean and coastal dynamics and resources; the influence of the Arctic Basin on the Earth's climate; and the physics and chemistry of the Earth's atmosphere.

5. *U.S. Antarctic program.*—The Foundation provides overall management for the U.S. program in the Ant-

arctic and supports a multidisciplinary research program on global weather and climate, renewable and nonrenewable resources, and the physical and biological characteristics of Antarctica and its surrounding seas. This activity is the sole expression of U.S. interest and presence in Antarctica.

6. *Scientific, technological, and international affairs.*—This activity supports and performs research and analysis to: link producers of research with the users of research; facilitate international scientific cooperation; and provide policy oriented data, information and analysis. It also supports agency-wide activities building the Nation's scientific research base. Programs cover joint research between universities and industry; small business innovation research; cooperative scientific activities between advanced and developing countries; studies on the state of the science and technology enterprise and its socioeconomic impact; and support for special research initiation, improvement and instrumentation activities. A new Presidential initiative for young Ph. D. recipients has been included in the 1984 Budget Request. The Presidential Young Investigators Research Awards will be supported by the research activities. The Foundation will make these awards to insure that young investigators, in fields where demonstrated needs exist, are provided research support to encourage their commitment to an academic career.

7. *Program development and management.*—This activity provides for the operation, support, management, and direction of all NSF programs and activities and includes necessary funds to develop, manage, and coordinate these program activities.

The National Transportation Safety Board, as an independent nonregulatory agency, is charged with promoting transportation safety through the investigation of accidents, the conduct of special studies, the development of recommendations to prevent accidents, the evaluation of the effectiveness of other Government agencies in preventing transportation accidents, and the review of appeals on actions taken against transportation certificates and licenses.

1. *Policy and direction.*—This activity provides Board-wide policy and program guidance, the determination of probable cause of transportation accidents, the issuance of safety recommendations, the approval of accident reports, the final review of appeals involving airman and seaman certificates and licenses, the implementation and direction of policies and programs, liaison with the Congress and other Government agencies, and legal and public affairs advice and services.

2. *Accident investigation.*—This activity provides for the management of accident investigations, the development of their probable cause, the development of recommendations, and the preparation of reports on aviation, railroad, highway, marine, pipeline, and hazardous materials accidents.

3. *Technology.*—This activity provides specialized advice and services for the Board's accident investigation, accident prevention, and safety promotion activities in the areas of human, vehicular, environmental, and operational factors. It develops recommendations,

General and special funds—Continued

SALARIES AND EXPENSES—Continued

provides laboratory support, and conducts special investigations.

4. *Safety programs.*—This activity provides oversight of other transportation agencies through the conduct of evaluations of their safety programs. This activity also provides oversight of transportation systems through the conduct of safety studies. In addition, it manages the follow-up of the Board's safety recommendations and the Board's responses to Notices of Proposed Rule-making. It provides statistical analysis of transportation accident and incident data, and it acts as program manager for some of the Board's safety objectives to insure action is taken on certain transportation safety problems not being addressed by Government or industry.

5. *Administration.*—This activity provides administrative support to assure accomplishment of Board programs through financial management, personnel management and training, procurement and facilities services, automated data processing services, equal employment opportunity, and other administrative support.

6. *Administrative law judges.*—These judges conduct hearings on appeal from the suspension, amendment, modification, revocation, or denial of any operating certificate or license issued by the Secretary of Transportation under the Federal Aviation Act of 1958.

The National Transportation Safety Board is mandated by Congress to investigate all catastrophic transportation accidents and therefore, has no control over the frequency of costly accident investigations. The emergency fund provides a funding mechanism by which periodic accident investigation cost fluctuations can be met without delaying critical phases of the investigations.

The major activities of the Corporation include the establishment, provision of technical services to, and expansion of neighborhood housing services and apartment improvement programs in older, declining residential neighborhoods; identifying, evaluating, and supporting neighborhood preservation projects which show promise as strategies for reversing neighborhood decline; replicating successful neighborhood preservation projects; and, promoting a national secondary market for local NHS revolving loan funds.

The Corporation receives both Federal and non-Federal funding to finance its program activities. The program and financing schedule above reflects only direct Federal appropriations to the Corporation. For 1984, \$15,512,000 is requested. The following business-type tables reflect the total program activity of the Corporation and include all sources of financing, both Federal and non-Federal.

1. *Nuclear reactor regulation.*—The primary objective of nuclear reactor regulation continues to be the assurance of public health and safety and the environment in the design, siting, construction and operation of nuclear power reactors. In 1984, there will be increased regionalization of Nuclear Reactor Regulation (NRR) programs, with some of these programs being administered by the NRR Headquarters Office and the five NRC Regional Offices. Increased emphasis will continue in 1984 on the licensing of nuclear power plants to ensure that the NRC licensing process does not unnecessarily delay plant fuel load and startup testing. Other major goals include: Continued progress in reducing the inventory of licensing actions, improved training and testing of reactor operators, resolving safety issues, and emphasis on important human factors areas. NRC will continue to place special emphasis on the regulatory activities necessary for the cleanup of the TMI-2 nuclear powerplant. The study and resolution of important generic safety issues will be pursued based on their safety significance priority.

2. *Inspection and enforcement.*—The purpose of the Inspection and Enforcement programs is to ensure that nuclear reactor facilities and materials under NRC jurisdiction are constructed, operated and used in a manner which protects the public health and safety and the environment, and that prompt and vigorous enforcement action is taken against licensees who do not comply with NRC regulations. The Inspection and Enforcement program is conducted by the NRC headquarters Office of Inspection and Enforcement and NRC's five Regional offices. The headquarters office has responsibility for inspection policy and program development and appraisal (including third party inspection programs), assessment of regional implementation of the inspection program, appraisal inspection to determine licensee and Regional performance, escalated enforcement actions, evaluation of licensee events, response to incidents, management of the NRC Operations Center, emergency preparedness, specialized technical training for all of NRC, and the NRC Quality Assurance (QA) Program. The Regional offices implement the NRC inspection program by conducting inspections, initiating and taking certain enforcement actions, conducting systematic assessment of licensee performance, performing emergency preparedness annual reviews, responding to incidents by dispatching personnel to the site in question, and providing technical support to the Office of Investigations. Increasing emphasis will be placed on QA efforts and Construction Appraisal Team inspections. The increased number of operating reactors will require additional inspections in the Regions.

3. *Nuclear material safety and safeguards.*—The principal function of Nuclear Material Safety and Safeguards program (NMSS) is to direct the NRC activities in the programmatic areas of the fuel cycle and material safety, safeguards, and waste management. These programs involve the health and safety licensing of all

domestic NRC-regulated activities, except reactor operations, and the domestic safeguards licensing of all licensees, including reactors. In 1984, the achievement of program goals will be increasingly a joint undertaking between NMSS Headquarters Offices and Regional Offices. Resources are required to support the environmental assessments of former licensee sites and waste burial grounds, review and evaluate proposed DOE remedial actions for former Atomic Energy Commission industrial contractor sites, implement the U.S./International Atomic Energy Agency treaty on safeguards, develop a capability to review DOE's application for a high-level waste repository, and ensure that uranium recovery facilities are constructed, operated, and decommissioned in a manner that protects the public health and safety. Emphasis will be placed upon developing final amendments to the low-level waste disposal regulation (10 CFR Part 61). In order to improve the responsiveness of uranium recovery facility licensing, the NRC has transferred that function to a field office in Denver, Colorado, where it will be more accessible to the uranium recovery facilities.

4. *Nuclear regulatory research.*—The 1984 Nuclear Regulatory Research program will continue to support a broad base technology to develop engineered data on basic safety issues and an independently verified source of safety and environmental information to be used together with data furnished by applicants as a basis for licensing and regulatory decisions. Work will continue on focusing risk assessment research to those issues that pose the highest risk and efforts will be expanded to evaluate an increasing range of accident sequences and improved reliability models for operating reactors. The Thermal Hydraulic research effort will produce and refine methods to assess reactor safety using experimental data and "best estimate" analytic codes to predict and verify operationally observed behavior of reactors during complex system transients. Reactor and facility engineering activities will provide a basis for evaluating reliability and safety margins of components and structures, investigating the integrity of primary systems, providing safety information on pressurized thermal shock, and anticipating problems associated with nuclear generating systems. Human engineering efforts will continue on the examination of the basic human factors data underlying the contribution to risk from operator actions. Work in severe accident phenomena and mitigation will be directed toward resolution of safety questions associated with accidents beyond the current design basis, possible fission product releases and core cooling requirements. NRC will participate in the LOFT International Consortium in 1984 in accordance with the terms of a multilateral agreement. In the area of high-level waste management, engineering efforts are underway to evaluate how waste forms will interact with the geological, hydrological and engineering systems involved. In advanced reactors, efforts are underway to provide NRC with an independent capability for a CRBR licensing standard for advanced liquid metal and high temperature gas cooled reactor concepts.

The Office of the Federal Inspector for the Alaska Natural Gas Transportation System was created pursuant to Reorganization Plan No. 1 of 1979, and formally established on July 1, 1979, by Executive Order No. 12142. The broad mission of the Agency is to oversee the construction and initial operation of a 4,837-mile, joint U.S.-Canadian pipeline system to transport Alaska natural gas from Prudhoe Bay to the Chicago and San Francisco areas in the lower 48 States. Specifically, the Federal Inspector is charged with reviewing project sponsor designs and cost estimates to ensure safe and efficient construction practices; coordinating and expediting the issuance of all Federal permits and authorizations; and enforcing all Federal statutes relevant to the construction project, including those related to environmental protection.

The budget for the agency supports five major programs and executive direction and administration functions:

1. *Permits and compliance.*—This activity includes coordinating and expediting the issuance of Federal permits required for pipeline construction, as well as developing standards and procedures for the enforcement of laws governing the project. The permits and compliance program was abolished at the end of 1982, and its responsibilities transferred to the Field Surveillance program.

2. *Audit and cost analysis.*—The Office reviews project cost estimates, evaluates sponsors' management systems, and audits expenditures incurred by project sponsors for certification into the rate base.

3. *Environmental review.*—The Office analyzes project design and reviews construction in order to ensure compliance with all applicable environmental protection regulations.

4. *Engineering review.*—This activity includes review of engineering cost estimates, quality control programs, engineering and construction designs and plans, and development of construction standards and guidelines.

5. *Field surveillance.*—This activity encompasses the operations of the Omaha, Anchorage, and Fairbanks offices. These offices are primarily responsible for permitting activities and on-site monitoring of construction activities in the field to assure compliance with applicable Federal regulations.

6. *Executive direction and administration.*—These functions include overall management and fiscal control of agency operations, analysis of major policy and economic issues affecting the pipeline project and the agency, and legal support.

This schedule projects the effect of the administration's reform proposal for the Health Benefits Program. Under this proposal, Government contributions for health benefits would be based on the average Government contribution in 1983 indexed in future years by a general price index. Enrollees selecting plans that cost less than the Government contribution would receive a rebate equal to the difference between the plan premium and the Government contribution. Catastrophic coverage would be provided in all cases, and carriers would be encouraged to offer many benefit levels to meet the full range of employee and annuitant health insurance needs.

PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND*

* See Part III for additional information.

For financing the unfunded liability of new and increased annuity benefits becoming effective on or after October 20, 1969, as authorized by 5 U.S.C. 8384, and annuities under special acts, to be credited to the Civil Service Retirement and Disability Funds, \$3,908,490,000: Provided, That annuities authorized by the Act of May 29, 1944, as amended (2 C.Z.C. 181), and the Act of August 19, 1950, as amended (33 U.S.C. 771-775), may hereafter be paid out of the Civil Service Retirement and Disability Fund.

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

1. *Payment of annuities under special acts.*—These annuities are paid to persons who were employed on the construction of the Panama Canal or to their widows; and benefits are paid to widows of former employees of the Lighthouse Service. Numbers of recipients are as follows:

	Sept. 30, 1982	Sept. 30, 1983	Sept. 30, 1984
Panama Canal annuitants	105	86	71
Lighthouse Service widows	239	225	212

2. *Payment of Government share of retirement costs.*—The Civil Service Retirement Amendments of 1969 provide for financing of the current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

3. *Transfers for interest on unfunded liability and payment of military service annuities.*—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund of an amount equivalent to: (1) interest on the unfunded liability, and (2) annuity disbursements attributable to military service. The Office of Personnel Management, at the end of each year, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress.

The Office of Personnel Management tests inductee candidates for the Department of Defense (DOD), performs training activities and miscellaneous services for Federal agencies and conducts full field security investigations for other departments and agencies on a reimbursable basis.

Fees collected by the President's Commission on Executive Exchange are credited to the Revolving Fund and are available for the Commission's use. The Commission conducts an educational program for Federal and private sector executives.

Budget program.—1984 workloads are expected to increase slightly over 1983 levels except for DOD test sessions.

This schedule reflects the effect of a legislative proposal which is being developed to: (1) bring a number of the Retirement System's benefit provisions into closer parity with private sector practice, and (2) increase payroll revenues so that they begin to approach the cost of benefits provided. The benefit provisions to be addressed in the proposal include permanent reform of

the manner in which cost-of-living adjustments are made and reductions in some retirement benefits. Employees may continue to retire as early as age 55; however, an actuarial reduction will be made in the retirement benefit. Revenues will be increased through gradual increases in employee and employer contributions.

The fund finances the cost of health benefits for: (1) active employees, (2) employees who retired after June 1960, or their survivors, (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246, and (4) the related expenses of the Office of Personnel Management in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each fiscal year are as follows:

	1982 actual	1983 estimate	1984 estimate
Active employees	2,365,000	2,345,000	2,325,000
Annuity holders	1,364,000	1,419,000	1,469,000
Total	3,729,000	3,764,000	3,794,000

In determining a biweekly subscription rate to cover program costs, 1% is added to the rates developed by health benefit carriers, for administrative expense, and 3% is added for a contingency reserve held by the

Office of Personnel Management (OPM) for each carrier. The OPM is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75% of the current unweighted average of the high option premiums of six large plans. For general schedule and wage-board employees, the Government's contribution is 60%.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Office of Personnel Management.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods. The contingency reserves are retained by the Office of Personnel Management and paid to carriers, as necessary, to defray future rate increases or to provide increased benefits.

This schedule projects the effect of the administration's reform proposal for the Health Benefits Program. Under this proposal, Government contributions for health benefits would be based on the average Government contribution in 1983 indexed in future years by a general price index. Enrollees selection plans that cost less than the Government contribution would receive a rebate equal to the difference between the plan premium and the Government contribution. Catastrophic coverage would be provided in all cases, and carriers would be encouraged to offer many benefit levels to meet the full range of employee and annuitant health insurance needs.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Office of Personnel Management in administering the program. Separate cost data is maintained for employees regular group life insurance and insurance for members of former beneficial associations. The "Federal Employees' Group Life Insurance Act of 1980" increases basic coverage for participants under age 45 and offers additional option coverages.

Budget program.—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

Life insurance in force (in billions of dollars):	1982 actual	1983 estimate	1984 estimate
On active employees ¹	160.5	166.9	177.3
On retired employees.....	18.3	19.0	20.2
Total.....	178.8	186.0	197.5
Number of participants (in thousands):			
Active employees.....	2,617.0	2,617.0	2,617.0
Annuity holders.....	1,363.0	1,407.0	1,451.0
Total.....	3,980.0	4,024.0	4,068.0

¹ Excludes equal amount of accidental death and dismemberment insurance.

Financing.—For non-Postal Service employees' premium costs for the regular program are met by withholding 25½ cents biweekly from the salaries of employees for each \$1 thousand of life insurance and a 50% matching by employer-agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities. The beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the year is as follows (in millions of dollars):

Held in special contingency reserves:	1982 actual	1983 estimate	1984 estimate
By basic program insurer.....	50	50	50
By beneficial association insurer.....	1	1	1
Held in trust by U.S. Treasury.....	4,682	5,293	5,930
Total reserves.....	4,733	5,344	5,981

The carrier-held contingency reserve for the basic program was reduced to \$50 million as of June 30, 1976, and it is expected to remain at this level in subsequent years. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The operations of the insurer for the regular and optional life insurance program to the end of each year follow (in millions of dollars):

Private plans.....	53,400	46,992	41,350
Total.....	71,179	62,934	41,350

Financing.—The fund is financed by contributions from those participants enrolled in the Government-sponsored plan and by Government contributions. The special contingency reserve with the carrier of the uniform plan is currently set at \$250 thousand at the end of the policy year.

Under the provisions of proposed legislation, enrollees in the uniform plan will be transferred to the Employees Health Benefits Fund effective January, 1984. Any remaining reserves will be transferred into the special reserves of the same carrier in the FEHB program.

The Panama Canal Act of 1979 established the Panama Canal Commission to operate and maintain the interoceanic waterway. The Commission is self-sufficient in its operations and makes payments to the Republic of Panama as specified in the Panama Canal Treaty of 1977.

Budget program—Transit operations.—The services performed by this activity are (in thousands of dollars):

	1982 actual	1983 estimate	1984 estimate
Maintenance of channels and dams.....	46,113	37,711	45,409
Navigation service and control.....	79,261	78,734	81,521
Lock operations.....	48,427	50,734	56,783
General repairs, engineering, and maintenance services.....	53,620	51,757	54,330

Security and protection services.....	12,280	11,197	12,586
Public service payments to Panama.....	10,000	10,000	10,000
Payments to Panama.....	71,194	64,995	65,560
General canal expense.....	23,384	22,609	20,057
Total operating expenses.....	344,279	327,737	346,246
Less intra-agency recoveries.....	—50,739	—48,377	—50,907
Net operating expenses.....	293,540	279,360	295,339

Annuity payments to Panama are for certain public services to be provided by Panama, a fixed annuity of \$10 million, and an annuity based on net tonnage of vessels transiting the canal. These payments are prescribed in paragraph 5 of article III and paragraph 4(a) and 4(b) of article XIII of the Panama Canal Treaty of 1977.

Vessel traffic volume and other indices of workload are as follows:

	1982 actual	1983 estimate	1984 estimate
Ship transits (over 300 net Panama Canal tons)	14,142	13,234	13,225
Tolls (in thousands of dollars).....	325,589	314,409	329,400

Capital obligations for 1984 include the following major projects: replacement of a tugboat, replacement of a dump scow; replacement and addition of transit equipment, and the replacement of launches and launch engines.

Supporting services.—The services performed by these support activities are (in thousands of dollars):

	1982 actual	1983 estimate	1984 estimate
Supply and logistical services.....	37,036	37,471	39,821
Utilities.....	45,849	54,016	56,778
Other supporting services.....	14,827	17,593	18,671
Total operating expenses.....	97,712	109,080	115,270
Less intra-agency recoveries.....	—42,285	—45,836	—49,830
Net operating expenses.....	55,427	63,244	65,440

Capital obligations for 1984 include several projects for electric power and communication systems improvements.

Administrative and general expense.—This category includes the overall direction and administrative expenses of the Commission; the costs of the employee health benefits program; early retirement costs; the annuitant welfare program; death and disability payments; and the cost of health and education services provided to Commission employees and dependents at Department of Defense facilities. Also included is the interest expense on the investment of the U.S. Government in the Canal. The interest expense is a component of the Agency's deposit into the U.S. Treasury and serves to reduce the investment of the Government in the Canal and consequently the interest cost in subsequent years.

Reimbursement to General Fund.—This amount represents the unreimbursed balance of the Panama Canal Commission's 1980 appropriation from the General Fund. This reimbursement is made possible by the proposal to abolish the special "Panama Canal Commission Fund." An appropriation from the General Fund will eliminate the Commission's need for working capital at the start of each year.

1. *Relocation assistance.*—The Corporation provides assistance to business and household tenants displaced from their existing locations within the project area, in accordance with statutory requirements and the Corporation's goal of minimizing the disruption caused by redevelopment activities. Relocation activities began in 1979 and continue in areas as redevelopment occurs.

2. *Public improvements.*—Pennsylvania Avenue and adjoining public areas are being progressively reconstructed and improved, creating a thoroughfare having new sidewalks, curbs, lighting, landscaping, and street furniture. These improvements occur concurrently with private development of the area.

3. *Historic preservation.*—Buildings of architectural merit will be restored and retained. The Corporation will act cooperatively with property owners and interested parties to achieve the Corporation's historic preservation objectives.

4. *Development rights, demolition, parks, accrued interest, taxes, and studies.*—Various costs associated with completing the program are funded in this activity.

This appropriation of \$400,000 thousand is for the purpose of reimbursing the Postal Service for loss in revenue associated with carrying certain categories of mail at free and reduced rates. Deferred until 1985 are the 1982, 1983, and 1984 authorizations for transitional appropriations to cover payments to the employees' compensation fund for injuries to postal employees which occurred prior to July 1, 1971, and the remainder of the \$372,796,423 in earned and unused annual leave balances due postal employees on June 30, 1971, from the former Post Office Department.

The estimates for 1984 and beyond assume that the administration will propose legislation to reduce the payment to the Postal Service fund.

The transactions of the Postal Service appear in Part IV of the Appendix under Off-Budget Federal Entities.

This appropriation is a Federal subsidy to the rail industry pension for costs not financed by the railroad sector. The American taxpayer subsidy annually exceeds \$800 per rail employee.

Subsidy for windfall payments.—When first authorized in 1974, the windfall subsidy appropriation was estimated at \$250 million annually for 25 years, or a total subsidy of \$6.25 billion. In 2 years, the annual windfall subsidy estimate increased by 45% and, within 5 years, the Railroad Retirement Board reported that the original 1974 estimate had doubled to \$500 million and would continue to increase if there were any inflation after 1980.

The Carter administration, faced with increasingly large projected subsidy costs, sought to limit to \$350 million annually the general taxpayers' liability to subsidize this rail industry pension, a position also reflected in the March revisions to the 1982 budget. Based on their collectively-bargained agreement and assuming a \$350 million subsidy appropriation, rail labor and management successfully sought congressional restructuring of the rail industry windfall in Public Law 97-35. The rail sector sought to limit windfall payments to the appropriated subsidy amounts rather than rely on the rail industry funded retirement account. This extended the subsidy well beyond the year 2000.

The administration proposes to retain the \$350 million windfall subsidy appropriation as proposed in the last three executive budgets.

The Board administers special unemployment and sickness insurance for unemployed railroad workers. Administrative expenses are financed from employer unemployment taxes.

1. *Maintenance of rail earnings accounts.*—Unemployment and sickness benefits are based on individual records of rail earnings and daily wage rates.

2. *Processing of rail unemployment insurance claims.*—Workers' claims for unemployment compensation are filed with employers and certified for payment through the headquarters office. Unemployment claims are projected to decline by 20% from 1983 to 1984, as indicated in the following table:

WORKLOAD

Sickness claims	473,721	451,886	438,680	367,000	353,000

3. *Processing of rail sickness claims.*—These claims are filed by mail and certified for payment through the headquarters office. Sickness claims are also projected to decline, as indicated in the preceding table.

4. *Rail claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. Savings of unemployment benefits of approximately \$975 thousand are expected in 1984 from the placement of approximately 1,950 claimants in jobs outside of the railroad sector.

5. *Administration.*—The costs of administration are shared between this and the rail pension program on an allocated basis, which is periodically revised for actual experience.

Railroad retirees generally receive the equivalent to a social security benefit and a rail industry pension collectively bargained like other private pension plans but embedded in Federal law. About 400,000 individuals also receive a "windfall" benefit.

Income.—Railroad retirement account revenues are derived from pension contributions by railroad employers and employees; interest on investments; annual appropriations to subsidize windfalls; and, payments from the Federal old-age, survivors and disability insurance trust funds. The railroad retirement system has an annual financial interchange with social security. Under this arrangement, social security paid railroad retirement over \$20 billion, with annual payments exceeding \$2 billion. It was designed by the rail sector to help finance the rail industry pension, placing social security in the same position in which it would have been if railroad employment had been directly covered by social security.

Retirement, disability, and survivor benefit payments.—Estimates reflect the increases in benefit rates provided by law.

Administrative expenses.—These expenses are subject to annual limitations in appropriation acts (see Limitation on Administration).

Payment to Federal hospital insurance trust fund.—That portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad beneficiaries are made from that fund.

The Board administers the rail industry pension based on collectively bargained agreements which are incorporated in Federal statute.

1. *Maintenance of rail earnings accounts.*—Eligibility for retirement and the amount of rail benefits paid are based on individual rail earnings records.

2. *Processing rail applications.*—This activity includes processing annuity claims under the Railroad Retirement Act of 1974. Based on amendments enacted in Public Law 97-35, benefit computations were greatly simplified.

3. *Maintenance of rail beneficiary rolls.*—This activity includes all work related to the placement, continuance, and removal of persons on the annuity rolls. RRB administers social security benefits and railroad retirement pensions to 405,000 recipients, social security benefits only to 154,700 recipients and railroad retirement pensions only to 465,000 recipients. As in past years, the number of persons on the rolls receiving annuity payments will decrease modestly from 996,320 at the end of 1982, by 2.2% to 974,000 at the end of 1984.

4. *Medicare.*—This activity includes on a reimbursable basis processing applications for the Social Security and Health Care Financing Administrations of the Department of Health and Human Services to establish eligibility for health and medical insurance benefits under title XVIII of the Social Security Act for rail beneficiaries.

5. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs. The Board will adopt new approaches to improve service to beneficiaries, such as toll-free telephone service and the use of self-administered applications forms.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure.*—To insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale are required to file registration statements with the Commission at its home or regional offices. Issuers having total assets and security-holder populations of specified sizes are also required to furnish comparable information on a continuing basis in annual and other periodic reports, in proxy solicitation materials, and in tender offers and acquisition reports. Commission staff review these filings to insure full and fair disclosure and to prevent fraud and misrepresentation.

2. *Prevention and suppression of fraud.*—Suspected fraud and manipulation in the purchase, sale, and trading of securities, illegal distributions of unregistered securities, and other unlawful conduct is prevented, minimized, or eliminated by investigating complaints, questionable trading activities, and other indications of possible violations of the Federal securities laws. In addition, remedies through civil, criminal and administrative legal actions are sought as appropriate.

In 1984 the Selective Service System will continue to register men as they reach age 18, conduct a non-registrant identification program to insure compliance with the law, and maintain a data base of registrant records. The System will continue to develop enhancements to ensure its capability to respond rapidly and efficiently from its standby posture.

1. *Mobilization readiness.*—This activity includes all facets of National and Regional operational planning, maintenance of automated registration information, a comprehensive training program for the Selective Service Reserve Forces, a training program for the standby local board members, and administrative functions. The processing procedures of the Registrant Information Management System will continue to be tested and refined to insure that it can fully satisfy the emergency manpower needs of the Armed Forces.

2. *Reserve program.*—This activity involves the preparation of the Reserve and National Guard officers for mobilization assignments in specific positions with the Selective Service System. Special focus of the program is on the exercise of the mobilization plans to ensure a high readiness capability in the event of mobilization.

The Small Business Administration (SBA) provides assistance to small businesses and to victims of physical disasters. These efforts are conducted through the following activities:

1. *Procurement and technical assistance.*—The programs under this activity are aimed at assuring that small business receives a fair share of Government procurements. In addition, SBA maintains a Procurement Automated Source System, which is used by Federal agencies and prime contractors to identify small businesses for contract opportunities.

2. *Management assistance.*—Through the Small Business Institute and Small Business Development Center programs, along with counseling services, training programs, and publications, small business owners/managers are assisted in their goal of improving the management and efficiency of their businesses.

3. *Finance and investment.*—The salaries and related administrative expenses for all SBA financial assistance activities are provided through this appropriation account. Funds for the Agency's guaranteed loan and investment programs are financed through the business loan and investment fund.

5. *Minority small business and capital ownership development.*—This activity provides assistance to minority small business concerns—primarily in the area of Federal procurement—and evaluates overall Agency performance in promoting minority business development. The business development program assists in the establishment or expansion of firms that are owned by minority or other disadvantaged business persons and that have the potential to develop into viable competitive businesses in a reasonable period of time. In addition, section 7(j) (1) through (10) of the Small Business Act, as amended, provides authority to contract for professional management training and support to assist the socially and economically disadvantaged entrepreneur.

Financial assistance.—The Small Business Administration (SBA) guarantees loans to small businesses that are unable to obtain private financing. Those loans must be of such value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. Under the guaranty plan, the SBA agrees to purchase the guaranteed portion of the loan only upon default. In addition to providing financial assistance to the general small business community, particular emphasis will be given to the following groups:

Businesses owned by socially and economically disadvantaged individuals;

Businesses that employ or are owned by handicapped individuals;

Small energy-oriented firms seeking to finance plant facilities and the acquisition of supplies and equipment necessary for specific energy measures;

State and local development companies for plant construction, conversion, or expansion, including the acquisition of land;

Small business concerns located in urban or rural areas with high proportions of unemployed or low-income individuals or owned by low-income individuals.

Investment company assistance.—A primary function of Small Business Investment Companies is to provide a source of needed equity capital or long-term loans to new or expanding small businesses. The Small Business Investment Act, as amended, authorizes the SBA to purchase or to guarantee the timely payment of all principal and interest, as scheduled, on debentures issued by such companies. In addition, the SBA is authorized to purchase preferred securities (shares of non-voting stock or other securities having similar characteristics) from small business investment companies operating under authority of section 301(d), which specifies that the investment policy of such companies will

be to make investments solely in small concerns owned and operated by disadvantaged persons.

Financing.—Appropriations are authorized to provide additional capital to the extent required to carry out authorized functions. A capital appropriation of \$249 million is requested for 1984. The Agency will continue its intensive debt collection program which will result in an additional \$55 million and \$110 million in loan repayments, over and above the normal amortization, for fiscal years 1983 and 1984, respectively.

Operating results.—The fund will continue to operate at a deficit. Interest and fee income will not be sufficient to cover interest, other expenses and a provision for estimated loan losses.

Public enterprise funds—Continued**BUSINESS LOAN AND INVESTMENT FUND—Continued****DISASTER LOAN FUND—Continued**

This fund finances disaster loans made pursuant to section 7(b) of the Small Business Act, as amended.

Physical disaster loans.—Under this program, loans are made at favorable terms to property owners for rehabilitation of property damaged by natural disasters such as floods, hurricanes, tornadoes, earthquakes, etc. In 1984, approvals are estimated at \$440 million.

Financing.—Appropriations are authorized as capital to the extent required to carry out the authorized functions. However, a capital appropriation for this fund is not required for 1984. The Agency will continue its intensive debt collection program which will result in an additional \$65 million in loan repayments, over and above the normal amortization, for 1983 and 1984.

The lease guarantees program was designed to provide prime space for those small business firms which couldn't compete with prospective tenants with AAA ratings. This program had been incurring excessive losses and had not been an important form of assistance to small businesses. As a result, the program is limited to paying claims resulting from defaulted leases approved in prior years.

	1982 actual	1983 est.	1984 est.
SBA contingent liability for bond guarantees	763,788	1,080,000	1,080,000

It is estimated that surety bond guarantees will be made in connection with 14,000 contracts totaling \$1,200 million in 1984. SBA, which insures up to 90% of these contract dollars, will undertake improvements in this program to reduce the high loss rates which have occurred in recent years.

Appropriations are authorized to the extent required to carry out the authorized function. In addition to the unobligated balance carried forward from 1983, an appropriation is being requested for this fund of \$9 million for 1984.

Public Law 94-305, approved June 4, 1976, established this fund to alleviate the adverse impact of pollution regulations on small businesses. The Small Business Administration may, whenever it determines that small business concerns are to be at an operational or financial disadvantage with respect to the planning, design, or installation of pollution control facilities or the financing thereof, guarantee the payment of rentals or other amounts due under qualified contracts.

It is proposed that \$150 million in loan or contract repayments will be guaranteed by SBA in 1984. These

loans or contracts will be financed from the proceeds of an estimated 135 taxable State and municipal bonds.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology (including living animal exhibits); acquires and preserves for reference and study purposes millions of items of scientific, cultural, and historic importance; conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; presents performances of American arts and crafts; undertakes education programs at all levels; and participates in the exchange of scholarly information.

The Institution is responsible for the operation and maintenance of 12 major exhibition buildings, as well as the Museum of African Art buildings; a zoological park and animal conservation and research center; a preservation and storage facility at Silver Hill, Md.; two natural preserves, in Panama and on the Chesapeake Bay; an astrophysical observatory on Mount Hopkins, Ariz.; and, supporting administrative, laboratory, and storage areas. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, is expected to total approximately 26 million in 1984. Millions more will view traveling exhibitions.

In 1984, emphasis will be placed on continued strengthening of the security of the collections and information management, providing support for ongoing, original research, and maintenance of the Institution's physical plant. There will be continued attention devoted to caring for and maintaining the collections, including the provision for meeting a further portion of the equipment and operating requirements of the Museum Support Center that will be completed early in 1983.

1. *National Air and Space.*—The National Air and Space Museum was completed and opened to the public on July 1, 1976. Necessary repairs to the building's facade and terrace will continue.

2. *Museum Support Center.*—Construction of the Museum Support Center was initiated in 1981. Construction is ahead of schedule and will be completed in early 1983. These facilities will provide additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators. Space presently used for storage will be returned to its intended use for public exhibition.

3. *Quadrangle development.*—Construction will continue in 1984 in the Quadrangle to include a permanent home for the Museum of African Art and a center for Eastern art together with space for educational activities. The Quadrangle is located south of the Smithsonian Institution Building. Federal funds will be matched by gifts and the Institution's Trust funds.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. Each year the Center conducts a major open international competition for a limited number of fellowships. The scholars and the scholarly work they produce constitute the memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is directed by its congressional statute to raise both public and private funds and the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution.

Budget program—1. Natural resources.—TVA concentrates its efforts on programs in navigation, flood control, water and air quality, recreation, fisheries, wildlife development, and forest resources.

(a) **Water resources.**—Includes operation and continuing development of the navigation channel from Paducah, Ky., to Knoxville, Tenn.

For flood control, TVA operates a system of multipurpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs. As a result, flood crests are reduced along the Tennessee River and its tributaries and also the lower Ohio and Mississippi Rivers.

TVA also works to enhance fisheries and aquatic ecology, manage regional water resources, and develop area rivers, streams, and lakes.

(b) **Land and forest resources.**—TVA conducts programs that promote the growth and use of timber resources in the Tennessee Valley, to enhance the region's wildlife, and to provide opportunities for recreation.

(c) **Resource management.**—The program contains three major areas of effort: Environmental and energy education, environmental protection of public lands and waters under TVA trust, and regional air quality management. Valley mapping and demonstrations of remote sensing are provided in support of these three areas as well as other TVA activities.

(d) **Land Between The Lakes.**—Work will continue on development of this 170,000-acre area in western Kentucky and Tennessee situated between TVA's Kentucky Reservoir and the Corps of Engineers' Barkley Reservoir.

2. **Economic and community resources.**—TVA strengthens the region's economic base by providing technical assistance to cities and towns that will allow them to reduce the impediments to economic development.

3. **Agricultural resources development.**—The Valley agricultural development program works largely through the State land-grant universities and their extension organizations to demonstrate solutions to agricultural problems.

4. **National fertilizer development.**—The National Fertilizer Development Center in Muscle Shoals, Ala., is active in four program areas: Research and development, introduction, ammonia from coal technology, and acid hydrolysis of hardwoods.

Research and development consists of basic chemical and agronomic research and development of fertilizer products and processes. This is accomplished in cooperation with the Department of Agriculture, the land-grant universities, and industry.

Introduction is conducted with the land-grant universities and the fertilizer industry. It includes small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms.

The ammonia-from-coal technology demonstration facility is now complete. The operational phase will include developmental production and evaluation of the process performance and economics.

5. *National energy demonstrations.*—The construction of the atmospheric fluidized bed combustion coal boiler is now complete. The operational phase will include evaluation of the process performance and economics.

6. *Power program: Power supply and use.*—TVA is the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States. Income from power operations, net of interest charges and depreciation, and other operating expenses is estimated at \$463,877 thousand in 1984.

The power generating facilities presented in the capital investment table are financed from power proceeds and borrowings.

7. *General services.*—Operating costs for general service activities include bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies.

Financing.—Amounts estimated to become available in 1984 are to be derived from (1) the requested appropriation of \$75,229 thousand; (2) nonpower revenues and receipts of \$53,373 thousand; and (3) power revenues and receipts of \$4,751,940 thousand. In addition, the budget program anticipates financing from borrowing authority of \$808,242 thousand backed by future revenues. A summary of the application of appropriations follows:

Operating results and financial conditions.—Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1984 are estimated at \$104,200 thousand—\$84,200 thousand as a dividend (return on the appropriation investment in the power program) and \$20,000 thousand as a reduction in the appropriation investment in the power program. Outstanding borrowings for the power program are expected to increase by \$1,000,000 thousand during 1984.

Total assets are estimated to increase by \$1,193,800 thousand during 1984. A total of \$1,226,513 thousand of the increase in assets is in the power program and \$32,713 thousand is in nonpower programs. The estimate of liabilities at September 30, 1984, is \$859,433 thousand more than the estimate at September 30, 1983. This increase primarily reflects the proposed borrowings in 1984. Total Government equity at September 30, 1984, is estimated to be \$334,367 thousand greater than that at September 1983. This change includes the requested appropriation for 1984 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

The United States Information Agency conducts the international communication, educational, cultural and exchange programs of the United States. The Agency advises the President, the National Security Council, and the Secretary of State on the above areas, and assists in the development and execution of a national policy on international communications.

Agency operations are largely financed from this appropriation and the related special foreign currency appropriation and consist of the following major elements:

1. *Overseas missions.*—The Agency operates 208 posts in 124 countries. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

2. *Broadcasting service.*—This service consists of the Voice of America and the Television and Film Service. The Voice of America produces radio broadcasts in English and in 41 languages. Programs are broadcast from transmitters at 5 domestic and 14 overseas locations. The Television and Film Service acquires and produces programs for distribution overseas and for direct telecasts via satellite.

3. *Educational and cultural affairs.*—This activity covers educational and cultural exchanges between the United States and over 140 countries and support for binational centers and U.S.-operated libraries and reading rooms abroad.

4. *Program coordination, production, and support.*—This activity serves primarily to support overseas missions by coordinating program planning and by producing, acquiring, and adapting various program materials for their use.

5. *Democracy and public diplomacy initiatives.*—This activity consists of efforts to strengthen democratic institutions around the world through grants to key organizations.

6. *Agency direction and management.*—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole.

The 1984 request for the account Salaries and expenses will maintain Agency programs essentially at current levels. Added operating costs, principally overseas employee wage-scales and inflationary increases for rents, utilities, diesel fuel, and other overseas goods and services, are estimated at \$26,000 thousand. Additional increases of \$107,000 thousand will provide funds to expand and improve Voice of America broadcasts and engineering operations, overseas missions activities, research, television programs, the Youth Exchange Initiative program, and representation allowances, to fund United States participation in the 1985 Tsukuba Expo and the 1986 Vancouver Expo, and to expand the democracy and public diplomacy initiatives.

This appropriation, together with the balances available from prior years, is used for payment of local program expenses in U.S.-owned foreign currencies in those countries where the Department of the Treasury has determined that the supply of such currencies is in excess to the normal requirement of the U.S. Government. For 1984 these "excess currency" countries are Burma, Guinea, India, Pakistan, and Poland. The appropriation requested in 1984 will maintain Agency programs in these five countries at essentially current levels.

The Center for Cultural and Technical Interchange between East and West is a national educational institution administered on behalf of the United States Information Agency by a public, nonprofit educational corporation under a grant from the Agency. The Center

promotes better relations and understanding between the United States and the nations of Asia and the Pacific through cooperative programs of research, study, and training, which bring qualified persons from the countries of the area to work jointly on problems of mutual concern.

The funds requested in 1984 will maintain the Center's programs at current levels and will provide for 1,670 participant awards for an average of three months each.

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception and purchase and installation of necessary equipment for radio transmission and reception, \$47,959,000, to remain available until expended. (Additional authorizing legislation to be proposed.)

Note.—Although a regular appropriation for this account for 1983 had not been enacted at the time this budget was prepared, a continuing resolution (Public Law 97-377) provides funds through September 30, 1983.

1. Acquisition and construction of facilities.—In 1984 the Agency will begin a multiyear effort to modernize and expand the technical transmission capability of the Voice of America. In recent reviews of the operations of U.S. Government-funded radios, serious deficiencies in the Voice's capability to meet current public diplomacy objectives were cited. To eliminate these deficiencies and provide an operationally effective global network that is a critical element of the public diplomacy programs of the Agency, VOA will: rehabilitate and modernize all stations, expand selected operational sites and construct additional new facilities. To meet this challenge the Agency will perform comprehensive engineering reviews and analyses in fiscal year 1983 and fiscal year 1984. This engineering effort is essential for the formulation of plans for the VOA's global network and will restore its primacy in international broadcasting. The 1984 estimates will provide \$23 million in major construction, for the systems engineering effort and architectural and facilities design for Sri Lanka and Bot-

swana and additional sites in the Middle East, Far East, Western Mediterranean and Europe.

2. *Maintenance and improvement of existing facilities.*—This program provides \$2 million for the continuing repairs and improvements required to maintain the VOA's global network. The 1984 estimates will also provide new budget authority of \$4.4 million to continue rehabilitation of Washington Plant studios, to modernize the Washington Plant's power distribution system and to construct a VOA-owned satellite network to feed programs from Washington to domestic relay stations and from the U.S.-based correspondent bureaus to Washington.

3. *Advanced engineering and technical development.*—This category provides \$0.5 million for our continuing program in engineering development, equipment design and radio propagation techniques specifically applicable to the VOA. It also includes \$0.5 million for the costs of initial steps in developing an automated worldwide monitoring system, \$2 million for a Worldwide Operations and Network Control Center to establish real time two-way communications for the global network, \$3 million for initial automation of selected sites and \$12 million for the continuation of systems analyses initiated in 1983 that are the precursor to the implementation of specific projects required to modernize and expand the global network.

4. *Land rentals.*—This activity provides for land rental payments for certain VOA facilities overseas and in the United States. These facilities include Rhodes and Kavala, Greece; Tangier, Morocco; and Marathon, Fla.

In 1984, the major task of the Association will be to report to Congress on Conrail's profitability for the June-October 31, 1983 period, as required in the Northeast Rail Service Act of 1981.

Except for the Central of New Jersey suit, the responsibility for defense against legal challenges filed by estates of the reorganized railroads has been completed.

¹ Conrail accounts receivable were substituted for debentures.

These funds have been provided for the U.S. Railway Association to purchase debentures and series A preferred stock issued by the Consolidated Rail Corporation. The Corporation utilizes these funds along with internally generated funds and funds from private sources to undertake major rehabilitation of plant and equipment and to cover losses that occur during the initial phase of operations. There was a one-time payment in 1982 to finance Conrail's work force reduction termination pay.

The Association purchased \$1 billion in Conrail debentures prior to 1978. Since reaching the \$1 billion level, purchases of securities have been in the form of series A preferred stock and these purchases amounted to \$2,280 million at the end of 1982. However, full recovery of this investment is unlikely.

No 1984 funding is requested. It is believed that the assistance provided through 1982 will be sufficient to enable Conrail to become permanently self-sustaining.

PART II

SCHEDULES OF PERMANENT POSITIONS

II-1

EXPLANATION OF SCHEDULES

Part II contains detailed schedules of permanent positions that are furnished to the Congress pursuant to the Budget and Accounting Act of 1921, as amended, excluding waivers thereunder granted by the Appropriations Committees.

Most civilian employees in the Federal Government are included in one of the following pay systems: Executive level, senior executive service, general schedule, or Foreign Service. The salary ranges for the grades in each of these systems are shown in the following tables. The ranges are those that became effective in October 1982, pursuant to Executive Order 12387 of October 8, 1982, adjusted to reflect the executive pay increases contained in Public Law 97-377 of December 21, 1982. Pay rates for wage-board positions included in the "ungraded" positions are established on the basis of prevailing rates, which vary from area to area.

Note.—In the general schedule grades and certain other positions, the pay scales shown in the schedules may be exceeded when pay rates in the private sector for comparable occupations in one or more areas or locations are substantially above the statutory rates. In such cases, the Office of Personnel Management has authority to permit a higher entrance level (not to exceed the maximum pay step prescribed by statute)

and add a corresponding number of steps above the stated pay range.

The following pages display schedules of permanent positions for each of the three branches of Government. The schedules relate to positions occupied, or to be occupied, by full-time employees with permanent appointments, including positions established without time limit or for a limited period of a year or more. These schedules cover all permanent positions of the organizational element(s) identified, regardless of the source from which financed, and include positions to be filled by reimbursable details to other agencies, and positions financed by allocations from other agencies.

Authorized positions that are funded as of the end of the year are counted, whether filled or unfilled at that time; positions abolished during the year are not counted. Each schedule contains a listing of the grades of authorized positions and the total number in each grade as illustrated below:

Grades are reflected in the stub column; the most commonly used grade series, general schedule, is abbreviated "GS- . ." Salary ranges are shown only when the grades are unique to a single agency or bureau (for example, physicians and nurses schedules within the Department of Medicine and Surgery, Veterans Administration) or where a grade is identified only by title. In the latter case, the title of each grade and the basic salary range is listed. Classification systems with the same salary ranges as the general schedule are so noted. A subtotal line is shown for executive level posi-

tions as well as for each separate series of positions, the number of unfilled positions to arrive at the total
whenever more than one line entry is shown in these employment in permanent positions at the end of the
categories. Two additional lines provide for deducting year.

PART III

SUPPLEMENTALS AND RESCISSIONS

III-1

EXPLANATION OF REQUESTS

This part contains supplemental appropriations requests for 1983 being proposed for congressional consideration in this budget. Requests for supplemental appropriations are usually made after enactment of regular appropriations. In cases where programs are funded under a continuing resolution, some requests are included to supplement the funding available under the resolution. Information is also included on proposals to rescind budget authority for 1983.

PROPOSED SUPPLEMENTAL REQUESTS

Supplemental requests are shown as separate sections.

Section I.—Supplementals proposed in this budget for various purposes other than increased pay costs are presented in this section and usually include: suggested appropriation language, the related budget schedules, and the reasons for the requests. In some cases, language is proposed to reduce mandatory program levels (entitlements, for example) included in authorizing legislation. In such cases, separate budget schedules are not shown, but the reduced funding levels that would

result are reflected in the regular budget schedules for the account in Part I. In other cases, language is proposed to reduce enacted guaranteed loan limitations; the reduced commitment level is reflected in the regular schedule for Status of Guaranteed Loans for the account in Part I.

Section II.—Requests for pay supplementals in this section are in the form of suggested appropriation language. The amounts contained in the appropriation language also appear as separate line entries in the regular program and financing schedules in Part I.

RESCISSION PROPOSALS

Section III.—Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. Included in this part—for rescission proposals being made in conjunction with this budget—are related budget schedules, references to the special message being sent to the Congress, and explanations of the proposals.

Relation of obligations to outlays:				
71.00	Obligations incurred, net		1,134	
90.00	Outlays		1,134	

This proposed supplemental appropriation would provide the first annual installment to finance the unfunded liabilities resulting from salary increases effective in October 1982, authorized by Executive Order 12387.

OVERSEAS PRIVATE INVESTMENT CORPORATION

(Appropriation language now requested, existing legislation)

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law (including not to exceed \$35,000 for official reception and representation expenses), and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for fiscal year 1983.

During fiscal year 1983 and within the resources and authority available, gross obligations for the amount of direct loans from the Direct Investment Fund shall not exceed \$15,000,000.

During the fiscal year 1983, total commitments to guarantee loans shall not exceed \$120,000,000 of contingent liability for loan principal.

Status of Direct Loans (in thousands of dollars)

Identification code	71-4030-1-3-151	1982 actual	1983 est.	1984 est.
Position with respect to limitation on obligations:

MEMORANDUM

2299	U.S. contingent liability for guaranteed loans, outstanding end of year	20,000	20,000
------	-------------------------------------------------------------------------------	--------	--------

This supplemental request would establish a ceiling for official reception and representation expenses to include specific business promotion expenses that were not included in previous ceilings. The change, which does not increase the total expended for such activities, would allow more efficient management and improved administrative control over the Corporation's resources. This request would also increase authorities for direct loans to \$15 million and investment guarantees to \$120 million. This would enable the Corporation to provide increased support for private sector initiatives related to economic development abroad.

Department of Agriculture**OFFICE OF INTERNATIONAL COOPERATION AND DEVELOPMENT****SALARIES AND EXPENSES**

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and Expenses, Office of International Cooperation and Development," to provide for the Caribbean Basin Initiative, \$500,000.

This request would provide funds to reimburse owners of fishing vessels for amounts of fines, fees and other direct charges which were paid by owners to a foreign country to secure the release of their vessels and crews. This account is being transferred in 1983 from the Treasury Department to the State Department.

FEDERAL HIGHWAY ADMINISTRATION

FEDERAL-AID HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION)
(TRUST FUND)

(Supplemental now requested, existing legislation)

For an additional amount for "Federal-aid Highways", \$300,000,000, or so much as may be available in and derived from the Highway Trust Fund, to remain available until expended: *Provided, That section 104(a) of the Highway Improvement Act of 1982 is amended by deleting \$12,100,000 and inserting \$11,600,000.*

74.49	Contract authority		300,000	300,000
90.00	Outlays			

This supplemental appropriation would provide the additional liquidating cash as contingency to implement the report language accompanying the 1983 Appropriations Act. Such language directed the agency to discontinue imposition of the 36 month payback period for Advance Construction Interstate projects and to make full payment upon request by a State. The proposed reduction in the 1983 obligation limitation is part of the President's effort to restrain deficit growth in 1984 and later years. Also, funding reduction is primarily intend-

ed to offset unrequested increases associated with programs of State and local concern, rather than Federal concern.

NATIONAL HIGHWAY TRAFFIC SAFETY
ADMINISTRATION

HIGHWAY TRAFFIC SAFETY GRANTS

(Supplemental now requested, existing legislation)

For an additional amount for "Highway traffic safety grants", \$3,000,000, to remain available until expended, to be derived from the Highway Trust Fund.

74.49	Obligated balance, end of year: Contract authority		3,000	3,000
90.00	Outlays		3,000	

This supplemental appropriation would provide the liquidating cash required to cover outlays in 1983 for initial year obligations for the newly enacted Alcohol safety incentive grant program and the safety education and information program.

FEDERAL RAILROAD ADMINISTRATION

ADMINISTRATION, RESEARCH, AND SPECIAL PROJECTS

(Supplemental now requested, existing legislation)

For an additional amount for "loan guarantee defaults—Rail service assistance", \$1,356,000 for payment to the Secretary of the Treasury for debt reduction, to remain available until expended.

Relation of obligations to outlays:				
71.00	Obligations incurred, net			
90.00	Outlays			

This supplemental appropriation is requested to liquidate the principal due on two promissory notes covering borrowings from the Department of the Treasury. The

promissory notes totaled \$1,356,000 for loan defaults of the Chicago, Rock Island and Pacific.

SETTLEMENTS OF RAILROAD LITIGATION

(Supplemental now requested, existing legislation)

For liquidation of promissory notes pursuant to section 210(f) of the Regional Rail Reorganization Act of 1973 (Public Law 93-236) as amended, \$18,499,000, to remain available until expended.

	Relation of obligations to outlays:			
71.00	Obligations incurred, net			
90.00	Outlays			

This supplemental appropriation is requested to liquidate promissory notes covering borrowings from the Department of the Treasury. These borrowings are used to redeem Certificates of Value relating to properties of the Reading Railroad and the Penn Central Transportation Company and their subsidiaries and affiliates transferred to Conrail in 1976.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING FUND

(Supplemental now requested, existing legislation)

For an additional amount for "Railroad rehabilitation and improvement financing funds", \$7,100,000 to remain available until expended, for payment to the Secretary of Treasury for debt reduction.

Program and Financing (in thousands of dollars)

Identification code	69-4411-1-1-401	1982 actual	1983 est.	1984 est.

43.00	Appropriation (adjusted)			
	Relation of obligations to outlays:			
71.00	Obligations incurred, net			
90.00	Outlays			

This supplemental appropriation would liquidate the promissory note covering borrowings from the Department of the Treasury for a loan default by the Delaware and Hudson of \$7,100,000.

URBAN MASS TRANSPORTATION ADMINISTRATION

MASS TRANSPORTATION CAPITAL FUND

(Supplemental now requested, existing legislation)

For payment of obligations incurred in carrying out Section 21 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), administered by the Urban Mass Transportation Administration, \$55,000,000 to be derived from the Highway Trust Fund and to remain available until expended: Provided, That total obligations in fiscal year 1983 for grants under "Mass Transportation Capital Fund" shall not exceed \$555,000,000.

Program and Financing (in thousands of dollars)

74.49	Obligated balance, end of year: Contract authority		55,000	55,000
90.00	Outlays		55,000	

The supplemental appropriation would provide cash to liquidate obligations coming due during fiscal year 1983. These obligations are being incurred under contract authorizations made available in the recently enacted Surface Transportation Assistance Act of 1982. An obligation limitation is proposed for 1983.

FEDERAL AVIATION ADMINISTRATION

OPERATIONS

(Supplemental now requested, existing legislation)

For an additional amount for "Operations", \$45,000,000, for payments to lenders and other administrative expenses required as a consequence of any aircraft purchase loan guarantee executed pursuant to the Act of September 7, 1957, as amended (49 U.S.C. 1324 note), to remain available until September 30, 1984.

	Relation of obligations to outlays:			
71.00	Obligations incurred, net		45,000	
90.00	Outlays		45,000	

This proposal would provide funds for the Federal Aviation Agency to settle aircraft purchase loan defaults, representing an unbudgeted cost of \$45 million. These defaults are a result of three air carriers failing

OPERATIONS—Continued

to make payment of principal and/or interest to lenders on the scheduled payment dates. Enacted Operations appropriation language authorizes timely payment of such obligations. However, additional 1983 budget authority is necessary to cover outstanding expenses associated with these three defaults.

AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM

(Appropriation language now requested, existing legislation)

Notwithstanding any other provision of law, the Secretary of Transportation may hereafter issue, notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of Transportation may prescribe. Such obligations may be issued to pay any amounts required pursuant to the guarantee issued under the Act of September 7, 1957, as amended (49 U.S.C. 1324 note). The aggregate amount of such obligations shall not exceed \$250 million by September 30, 1984. Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under his subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States.

This language would permit the Secretary to issue notes to Treasury to finance future requirements for Federal payment of defaults arising under the Act of 1957. Subsequent requests for appropriations will be necessary in each case to liquidate the notes.

COAST GUARD

NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(Supplemental now requested, existing legislation)

"For payment of obligations incurred for recreational boating safety assistance under Public Law 92-75, as amended, \$5,000,000, to be derived from the National Recreational Boating Safety and Facilities Improvement Fund and to remain available until expended. During fiscal year 1983 total obligations for recreational boating safety assistance shall not exceed \$5,000,000, and no obligation may be incurred for improvement of recreational boating facilities.

GENERAL SERVICES ADMINISTRATION**FEDERAL BUILDINGS FUND****LIMITATIONS ON AVAILABILITY OF REVENUE**

(Limitation increase now requested, existing legislation)

In addition to the aggregate amount heretofore made available for real property management and related activities in fiscal year 1983, \$8,102,000 shall be made available for such purposes and shall remain available until expended for the construction and acquisition of facilities, as follows:

Payment of Construction Claims:

Florida: Fort Lauderdale, Courthouse and Federal Office Building and Parking Facility, \$442,300.

Georgia: Atlanta, Courthouse and Federal Office Building, \$7,075,000.

Mississippi: Hattiesburg, Courthouse and Federal Building, \$213,100. Jackson, Federal Office Building, \$125,600.

South Carolina: Columbia, Federal Building and U.S. Courthouse, \$246,000.

Provided, That the immediately foregoing limits of costs may be exceeded to the extent that savings are effected in other such projects but by not to exceed 10 per centum: Provided further, That claims against the Gov-

ernment of less than \$10,000 arising from direct construction projects, acquisition of buildings, and purchase contracts projects pursuant to Public Law 92-313 be liquidated with prior notification of the Committees on Appropriations of the House and Senate to the extent savings are effected in other such projects: Provided further, That any revenues and collections and any other sums accruing to this fund during fiscal year 1983, excluding reimbursements under section 210(f)(6) in excess of \$1,932,748,500 shall remain in the fund and shall not be available for expenditure except as authorized in Appropriation Acts.

Relation of obligations to outlays:				
71.00	Obligations incurred, net		342,269	
90.00	Outlays		342,269	

This supplemental request would provide for mandatory payments to the Civil Service Retirement and Disability fund. Under the provisions of the Civil Service Retirement Amendments of 1969, unfunded liability generated by new statutes must be financed in 30 equal annual installments, with the first payment due as of the end of the fiscal year in which each new liberalization, extension of coverage, or increase in pay is effective.

The majority of this request consists of the first of 30 annual payments for the October 1982 pay adjustment for the General Schedule and Wage Board employees. The balance represents recomputations of payments for previous wage and salary adjustments and legislation affecting special groups, e.g., Air Traffic Controllers. Recomputations are frequently needed as the populations affected by salary adjustments are estimated at the time the initial payment is requested.

(Appropriation language, now requested, existing legislation)

Pursuant to section 1304(e) 1(i)(ii) of title 5, United States Code, not more than \$12,000 shall be available for the entertainment expenses of the President's Commission on Executive Exchange.

This proposal would provide a limitation on entertainment expenses for the President's Commission on Executive Exchange as required by law.

PANAMA CANAL COMMISSION

OPERATING EXPENSES

(Supplemental now requested, additional authorizing legislation required)

For payment to the Republic of Panama, pursuant to Article XIII, paragraph 4(c), of the Panama Canal Treaty of 1977, such amounts as may be necessary in any fiscal year, to be derived from the Panama Canal Commission Fund.

Program and Financing (in thousands of dollars)

Identification code	95-1203-1-2-403	1982 actual	1983 est.	1984 est.

90.00	Outlays		375	

This request would enable the Panama Canal Commission to comply with provisions of the Panama Canal Treaty of 1977 that require that operating surpluses of the Canal be paid to the Republic of Panama. The amount requested is subject to adjustment pending completion by the General Accounting Office of an audit of the financial statement of the Commission. By diplomatic note, the United States has agreed to make the required payment to Panama by April 30, 1983.

SMALL BUSINESS ADMINISTRATION

BUSINESS LOAN AND INVESTMENT FUND

(Supplemental and Requested, Existing Legislation)

For an additional amount for the Business Loan and Investment Fund, \$210,000,000, and in the language under this head in Public Law 97-377, delete, "and for additional capital", the first time it appears through the end of the sentence.

For additional amount for "Business Loan and Investment Fund", \$178,600,000, of which \$158,500,000 shall be derived by transfer from "Department of Commerce, Economic Development Administration, Economic development assistance programs" and \$20,100,000 shall be derived by transfer from "Department of Commerce, International Trade Administration, Operations and administration".

This supplemental request would permit the Voice of America to automate the processing and distribution of news and engineering operations to explore the use of advanced technologies and to construct facilities needed to enhance its news operations. These changes are part of the President's announced program to modernize this country's international radio system.

General Provisions

Any statutory provisions requiring the maintenance of a specified number of full-time permanent Federal employees, or prohibiting actions to reduce employment levels, or otherwise establishing requirements for personnel levels of the Department of Energy or any of its offices or programs or activities, are repealed.

This proposed appropriation language would enable Energy Activity (previously referred to as the Department of Energy) to manage its personnel resources to meet program needs, based on considerations of program efficiency and effectiveness and the appropriateness of using Federal employees.

SECTION III—RESCISSION PROPOSALS

Funds Appropriated to the President

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

(Rescission proposal)

Program and Financing (in thousands of dollars)

Program by activities:				
	1. Appalachian Development Highway System.....		- 15,133

74.40	Obligated balance, end of year		15,133	11,133
90.00	Outlays			- 4,000

This rescission proposal is for budget authority provided in the law making further continuing appropriations for 1983 (Public Law 97-377) for the Appalachian highway program. If approved, about \$100 million would be available in 1983 for this program, the same level as in 1982.

90.00	Outlays		- 1,927	

The Congress provided \$1,927,000 in 1983 appropriations to initiate/plan for three construction items

whose total cost is expected to require at least \$30 million.

Two of the construction items—the Small Farm Experiment and Demonstration Station and the Forage Seed Production and Research Center—would add at least 15 scientist-years of research facility capacity to the Agricultural Research Service System even though the research facility system has been operating at the 82-83 percent capacity range since 1978. This rescission is proposed to assure that more effective use is made of existing research facilities and resist efforts to construct new research facilities.

The third item, for the Old West Veterinary School, is intended to assure that adequate numbers of food-animal veterinarians are trained and available in the Old West Region. Data show that there is an adequate national supply of veterinarians. The distribution of graduate veterinarians, however, is predominately influenced by income level and work location. Constructing this facility, therefore, cannot be expected to remedy any shortage in the region and would be highly cost-inefficient.

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

This program was initiated in 1962 to accelerate the installation of conservation measures and to alleviate unemployment in rural areas through the accelerated conservation work. Reviews of the program conducted in previous years have not been able to demonstrate satisfactorily that statistically significant economic progress toward program objectives has been made. Therefore, this rescission is proposed to phase out the program by the end of 1983.

90.00	Outlays		— 7,885	— 105,812

Funds appropriated for activities within the Compensatory education for the disadvantaged account are proposed for rescission as part of the administration's continuing effort to reduce Federal spending. The proposed rescission totals \$133,925,000. At the reduced level \$3,033,969,000 will remain available for Chapter 1 programs to be distributed as follows: \$2,562,753,000 will support Grants to local education agencies; \$434,880,000 will be available for the State agency programs, \$30,576,000 will be provided for State administration; and \$5,760,000 will remain available for Chapter 1 evaluation and studies. No funds will remain for the High school equivalency and the College assistance migrant program.

Funding for Follow through, Training, and advisory services; General aid to the Virgin Islands, territorial teacher training, and part of the funding for women's educational equity; Ellender fellowships, and the Secretary's discretionary funds are proposed for rescission in 1983. States and outlying areas may use their block grant funds to support most of the activities authorized in the separate categorical programs. This rescission will reduce Government spending and will continue the policy of simplifying program administration and funding.

74.40	Obligated balance, end of year	38,000	
90.00	Outlays	—31,000	—38,000

This rescission is proposed because the carryover of 1982 resources plus the 1983 appropriation are expected to be greater than 1983 program requirements. The 1983 program level is expected to be lower than earlier estimates because of a decline in the rate of inflation in public housing operating costs and increased income from non-Federal sources.

This rescission proposal would eliminate a portion of the capitalization funds appropriated by Congress. The rural telephone bank's lending level would not be affected since borrowing would be increased as a result of this proposal.

PART IV

OFF-BUDGET FEDERAL ENTITIES

IV-1

EXPLANATION OF ESTIMATES

Part IV contains detailed budgets and explanatory statements of certain Federal entities that are not included in the budget totals. These budgets and statements are made available as auxiliary information.

Public Law 93-32 removed from the budget totals the governmental financing of rural electric and telephone systems administered by the Department of Agriculture.

The Board of Governors of the Federal Reserve System provides its administrative budget for inclusion without further review. In conformance with its accounting system, the figures for the Board are on a calendar year basis.

Public Law 97-35 established the SPR petroleum account for the purpose of acquisition, transportation, and injection of petroleum products into the strategic petroleum reserve. The law specifies that account transactions shall not be included in the budget totals.

The Federal Financing Bank was created by the Federal Financing Bank Act of 1973. The bank is authorized to make direct loans by making commitments to purchase and sell, and purchasing and selling on terms and conditions determined by the bank, any obligation that is issued, sold, or guaranteed by a Federal agency.

The Federal Financing Bank is administered by the Department of the Treasury.

The budget presentation of the Postal Service reflects its conversion to independent status consistent with the Postal Reorganization Act of 1970. The activities of the Postal Service, but not the Federal subsidy (which is included in Part I), are excluded from the budget totals and presented here.

The United States Railway Association, established by the Regional Rail Reorganization Act of 1973, is a Government corporation. Part of the financing activities of the Association is presented here, while the administrative expenses of the Association and the purchase of Conrail securities are included on-budget in Part I.

The United States Synthetic Fuels Corporation was established by the United States Synthetic Fuels Act of 1980. Although the activities of the Corporation are off-budget, all the Federal funds provided to the Corporation are included in the budget totals in the Department of the Treasury.

¹ The limitation on loan guarantee commitments is in total. No annual limitation is made on FFB versus private lenders; however, most loans under the REA guarantee are made by the FFB, as reflected in these schedules.

² Sales of certificates of beneficial ownership (CBO's) are reflected as reductions of loans outstanding and corresponding increases in guaranteed loans. This treatment results from the provisions of 7 U.S.C. 1932(d)(6). These transactions are not reflected in the direct or loan guarantee limitation levels.

The Rural Electrification Administration conducts two capital investment programs: (1) The rural electrification program to provide electric service to farms and other rural establishments; and (2) the rural telephone program to furnish and improve telephone service in rural areas.

Insured electric and telephone loans financed from the Rural Electrification and Telephone Revolving Fund (RETRF) under the authority of the Rural Electrification Act of 1936, as amended, bear interest at a 5% rate. Some loans may be made at a lesser rate. RETRF loans must be repaid within a period not to exceed 35 years. REA also guarantees loans made by the Federal Financing Bank (FFB) and other qualified lenders at rates agreed upon by the lender and the borrower.

Loans from the RETRF are financed from available receipts or, when necessary, by interim Treasury borrowings. Loans made from the RETRF are held in a pool as security for certificates of beneficial ownership (CBO's) which are sold to investors.

1. *Rural electrification.*—This capital investment program is financed through REA insured loans and guarantees of loans made by other qualified lenders for the construction and operation of generating plants, electric transmission, and distribution lines or systems in rural areas.

The Rural Telephone Bank (RTB) was established by Public Law 92-12, approved May 7, 1971, which amended the Rural Electrification Act of 1936, as amended. The RTB provides a supplemental source of financing for the REA telephone program. Public Law 92-234, approved June 30, 1972, amended the act to permit the Secretary of the Treasury to purchase the bank's debentures. This has minimized the bank's borrowing costs. The bank charges an interest rate based on the average cost of money to the bank, but not less than 5% per annum. The weighted average interest rate on cumulative loans through September 30, 1982, was 7.91%. During the first quarter of 1983, loans were made at 11.50% interest.

Equity capital of the bank consists of class A stock purchased by the United States, classes B and C stock purchased by bank borrowers, organizations eligible to

become borrowers and organizations controlled by borrowers, and retained earnings. The maximum borrowing authority of the bank by law is limited to 20 times its paid-in capital and retained earnings. Total available borrowing authority of the bank for 1983 is estimated at \$9.5 billion. For 1984 it is estimated at \$9.8 billion.

Bank loans totaled \$185 million in 1982. After almost 11 years in operation, loans to 496 borrowers have been approved, totaling over \$1.694 billion. Telephone bank loans are estimated at \$185 million for 1983 and \$185 million for 1984.

Administrative support for the general operations of the bank are provided on a part-time basis by REA employees and the Office of the General Counsel, without cost to the bank, as provided for in the enabling legislation. Certain administrative expenses, such as expenses of the elected members of the Board of Directors, postage fees and the audit by the General Accounting Office, must be borne by the bank.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

This fund was established in 1982 pursuant to the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35). The Act established an "SPR Petroleum Account" to provide for the acquisition, transportation, and injection of petroleum products and for their potential drawdown and distribution. Further, it provided that the account, the deposits and withdrawals, and any associated receipts in case of a drawdown and distribution shall not be counted in the totals of the budget of the U.S. Government. The 1984 budget provides \$583,100,000 to purchase approximately 16 Mbbl of crude oil for delivery in 1985.

¹ Reflects proposed reclassification of Rural Housing Insurance fund loan asset sales as agency debt (\$26,571,267 thousand) at the beginning of 1984.

The Federal Financing Bank (FFB) was created on December 29, 1973, to assure the coordination of Federal and federally assisted borrowing from the public and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions.

The Bank has become the vehicle through which most Federal agencies finance their programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and loan assets. The major exceptions to date are Title XI ship mortgage bonds and Government National Mortgage Association asset sales.

During 1982 the Federal Financing Bank made gross guaranteed loan originations and loan asset purchases of \$32.5 billion, as well as \$2.9 billion in investments in Federal agency debt. In the absence of the Bank, the majority of these agency borrowers would have issued their obligations in the market at a cost higher than that charged by the FFB.

The following table reflects the composition of the FFB account by agency and program in thousands of dollars. Budget authority is equal to gross purchases of loan assets or guaranteed loan originations. Outlays equal budget authority less the repayment of principal.

¹ Reflects a transfer from New Communities Administration to Revolving Fund (liquidating programs); legislative action required.

² Includes \$2,376,499 thousand in budget authority for rollovers.

At the first meeting of the Board of Directors of the Bank on May 23, 1974, the Board approved a policy of borrowing from the Treasury Department on an interim basis. These borrowings were to be periodically repaid by the sale of FFB securities in the market. On July 23, 1974, the Bank auctioned \$1.5 billion of 244-day Federal Financing Bank bills dated July 30, which matured on March 31, 1975. In a later meeting on June 5, 1975, the Board of Directors decided that the Bank would borrow all funds from the Treasury Department matching the terms and conditions of its borrowings from the Treasury with the terms and conditions of its loans.

FFB purchases of Federal agencies' debt is not reflected in the budget totals because borrowing and the repayment of borrowings between Federal agencies and the Treasury are not budgetary transactions. These transactions are reflected as borrowing in the accounts

of the particular agencies. In 1984 the Rural Housing Insurance Fund loan asset transactions are proposed to be reclassified as agency debt. The use of the FFB permits these agencies to borrow at lower rates than would occur if the agencies went to the market. This was a major reason for the creation of the Bank. They are financed by an equal amount of FFB borrowings from Treasury, which are an addition to the borrowings recorded in the statement of financial conditions. The extent of these FFB investments is reflected below:

Note.—1982 figures do not include finally approved audited data.

The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

Programs.—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Public enterprise funds—Continued

POSTAL SERVICE FUND—Continued

Since 1973, transactions of the Postal Service Fund and the assets and liabilities of the U.S. Postal Service no longer appear within the totals of the U.S. budget. The schedules presented here reflect summary data on postal operations.

Section 2005 of the Postal Reorganization Act authorizes borrowing authority of \$10 billion with a yearly limitation of \$2 billion, of which not more than \$500 million may be used to cover operating expenses. As of September 30, 1984, it is expected that indebtedness outstanding pursuant to this borrowing authority will amount to \$2.337 billion.

Operating.—Estimated receipts will total \$24.7 billion in 1984. This includes \$24.2 billion from mail and services revenue, \$135.0 million from investment income, \$760 million from appropriations and miscellaneous other income of \$21.0 million.

The United States Railway Association is authorized by the Regional Rail Reorganization Act, as amended, to borrow funds and make loans to certain railroads. These borrowings are guaranteed by the Secretary of Transportation and are limited to an aggregate of outstanding obligations of \$395 million. Two types of loans are currently authorized: (a) Loans related to the implementation of the system plan developed by the Association for restructuring the bankrupt railroads in the Northeast and Midwest, and (b) loans to defray obligations of the reorganized railroads which were incurred prior to the conveyance of their rail properties but which were unpaid after the conveyance to the Consolidated Rail Corporation on April 1, 1976. In the past year, settlement of valuation cases resulted in the repayment of \$41.7 million in loan principal and \$9.1 million in accrued interest. No new loans will be made in 1984.

Congress in 1980 enacted the Energy Security Act creating the Synthetic Fuels Corporation (SFC). The Corporation is intended to assist private industry to

finance the development of synthetic fuels from coal, oil shale, and other energy resources. Private sector firms will plan, construct, operate and or own the synthetic fuel plants, but will receive financial assistance from the Corporation in the form of purchase agreements, price guarantees, guaranteed loans, and direct loans.

The legislation creating the Corporation provides that the Corporation's budget not be included in the totals of the U.S. budget. However as the Corporation requires funds to make payments to private firms, it will receive funds from the Secretary of the Treasury. An on-budget account has been established for this purpose. As funds are provided from the Secretary of the Treasury to the Corporation, outlays will be recorded in the Federal budget.

Although the Corporation will enter into obligations of a significant amount in its early years, it is not expected to make large cash payments until the production of synthetic fuels actually begins later this decade.

In 1982, the unobligated and uncommitted balances of budget authority appropriated to the Department of Energy for the interim alternative fuels program was transferred to the Energy Security Reserve account in the Treasury as soon as the SFC was declared to be operational by the President. Also, \$6,212,000,000 appropriated in 1980 to the Energy's Security Reserve account for the SFC, became available. Total resources available to the SFC in 1983 are \$14.9 billion.

In addition, in 1982 the SFC assumed responsibility for certain contracts and agreements initiated by the Department of Energy under interim authority. These contracts transferred to the SFC after it was declared to be fully operational.

Activities of the Corporation are expected to greatly increase in 1983 as the Corporation moves into awarding financial assistance, monitoring assisted projects while continuing to solicit and evaluate new proposals. As of December 2, 1982, three projects were expected to

be issued letters of intent, a significant step toward awards of financial assistance. In addition, the Board of Directors authorized commitment of 131(u) cost sharing funds to one of those projects. Maximum obligations authority anticipated for the three is \$557 million. Four other projects continued in negotiations.

The Corporation will evaluate proposals received in response to current and future solicitations. The outcome of current negotiations and future evaluations cannot be predicted with any degree of accuracy. Therefore the estimates included here do not necessarily represent the actual level of Corporation commitments.

OTHER MATERIALS

V-1

EXPLANATION OF OTHER MATERIALS

This section includes the following material:

(a) a list of advance appropriations, as required by section 601 of the Congressional Budget Act of 1974, a list of appropriations with advance funding provisions, and a list of appropriations with forward funding provisions.

(b) a statement of amendments and revisions to 1983 budget authority requests that were transmitted to the

Congress after the 1983 budget but prior to the transmittal of the 1984 Budget, as required by section 601 of the Congressional Budget Act of 1974.

(c) a statement of the amounts of appropriations requested for Offices of Inspectors General, as required by section 3 of the Federal Managers' Financial Integrity Act of 1982 (Public Law 97-255).

ADVANCE APPROPRIATIONS, ADVANCED FUNDING, AND FORWARD FUNDING FOR 1984

I. Advance appropriations are provided for use in a fiscal year, or more, beyond the fiscal year for which the appropriation act is passed. Advance appropriations in 1984 appropriations bills will provide funding for programs beyond 1984. Since these appropriations are not available until after 1984, the amounts will not be included in 1984 budget totals, but will be reflected in the budget totals for the fiscal year requested.

Section 601 of the Congressional Budget Act of 1974 (Public Law 93-344) requires inclusion in the budget of "information with respect to estimates of appropriations for the next succeeding fiscal year for grants, contracts, or other payments under any program for which there is an authorization of appropriations for such succeeding fiscal year and such appropriations are authorized to be included in an appropriation act for the fiscal year preceding the fiscal year in which the appropriation is to be available for obligation." In fulfillment of this requirement, the table below lists those accounts authorized to receive, in 1984, advance appropriations for 1985 and later years. The listing is in two parts: Part A shows the amounts of advance appropriations included in the 1984 budget. Part B is a listing of accounts for which advance appropriations are authorized, but not requested in the 1984 budget.

A. Accounts for which advance appropriations are included in the 1984 budget:

Department of Health and Human Services:¹
Assistance payments program (42 U.S.C., sec. 601) \$1,758,454 thousand for 1985.
Child support enforcement program (42 U.S.C., sec. 651) \$102,750 thousand for 1985.
Grants to States for medicaid (42 U.S.C., sec. 1396) \$5,552,000 thousand for 1985.
Office of the Inspector General (State Medicaid fraud control units) (42 U.S.C., sec. 1396) \$9,000 thousand for 1985.
Corporation for Public Broadcasting: \$130,000 thousand for 1984; \$85,000 thousand request pending for 1984; \$75,000 thousand requested for 1986.

B. Accounts authorized to receive advance appropriations but for which none are requested in the 1984 budget:

Department of Agriculture:
Food program administration (42 U.S.C. 1752).
Food donations program (Public Law 93-29, sec. 210).
Child nutrition programs (42 U.S.C. 1752).
Department of Health and Human Services:
Child Welfare block grant (Public Law 96-272).
Services to selected groups (Public Law 97-35, sec. 657, Public Law 97-115, sec. 209; Public Law 93-112, sec. 4(a)).
Department of Transportation:
Urban mass transportation fund (49 U.S.C. 1603).
Education activities. The following activities are authorized to receive advance appropriations (20 U.S.C. 1223):
Compensatory education for the disadvantaged.
Impact aid.
Special programs and populations.
Indian education.
Bilingual education.
Education for the handicapped.
Rehabilitation services and handicapped research.
Vocational and adult education.
Student financial assistance.

Guaranteed student loans.
Higher education.
College housing loans.
Educational research and statistics.
Libraries.
Special institutions.
Educational, research, and training activities overseas (special foreign currency program).

II. Advance funding is authority provided in appropriation acts to obligate and disburse funds during a fiscal year from a succeeding year's appropriation. The funds so obligated increase the budget authority for the fiscal year in which obligated and reduce the budget authority of the succeeding fiscal year. Essentially, this is a device for avoiding supplemental requests late in the fiscal year for certain entitlement programs should the appropriations for the current year prove to be too low. The table below lists those accounts for which advance funding authority is requested in the 1984 budget.

Department of Health and Human Services:
Grants to states for medicaid.
Special benefits for disabled coal miners.
Supplemental security income program.
Assistance payments program.
Child support enforcement program.
Office of the Inspector General.
Department of Labor:
Federal unemployment benefits and allowances.
Special benefits.
Black lung disability trust fund.

III. Forward funding is authority provided in an appropriations act to obligate funds in one fiscal year for the financing of ongoing programs of grantees during the succeeding fiscal year. The budget authority for such programs is included in the budget totals for the year in which it is appropriated. This device is often used for education programs, so that grants can be made prior to the start of the school year. The language providing forward funding for education programs will specify that amounts appropriated will not be available until some time into the year of the appropriation (e.g., July 1, 1984) and in most cases will specify that such amounts will remain available until the end of the succeeding fiscal year. The table below lists those accounts for which forward funding is requested in the 1984 budget.

Education activities:
Compensatory education for the disadvantaged.
Special programs and populations.
Education for the handicapped.

In the training and employment area, forward funding is occasionally provided in the form of financing operations for a program year which differs from the fiscal year. Obligations made in one fiscal year thus assure operations of the program part way through the next fiscal year. The 1984 budget includes an allowance

¹ The accounts listed for the Department of Health and Human Services for which advance appropriations are requested for 1985 also are requesting advance funding (see section II).

for a subsequent request to Congress to permit activities under the Job Training Partnership Act and the Wagner-Peyser Act (grants to support the State Employment Service) to be financed for a calendar year. The 1984 appropriation would thus forward fund the first quarter of fiscal year 1985 (October through December 1984). The table below lists those accounts for

which such forward funding is expected to be requested for 1984.

Department of Labor:

Employment and Training Administration.

Training and Employment Services.

State Unemployment Insurance and Employment Services
Operations.

STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR 1983

(Between the Transmittal of the 1983 and 1984 Budgets)

A statement of all amendments to or revisions in budget authority requested between submission of the 1983 budget and the 1984 budget is presented below. This statement is being included in the budget in accord with section 201 of the Budget and Accounting Act, 1921, as amended by section 601(g) of the Congressional Budget Act of 1974.

The modifications to requests for 1983 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the budget requests transmitted in January, 1982. If appro-

priations had been enacted, the President proposed either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified in part A of the following listing. The President's proposals for rescission are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register.

PART VI

GOVERNMENT-SPONSORED ENTERPRISES

VI-1

GOVERNMENT-SPONSORED ENTERPRISES

Part VI contains detailed budgets and explanatory statements of certain Government-sponsored enterprises. All of these enterprises were established and chartered by the Federal Government and are sponsored by a Government agency, although they are privately owned and generally privately financed. These budgets are not reviewed by the President; they are presented as submitted by the enterprises. This section includes:

- (a) Federal National Mortgage Association.
- (b) Banks for cooperatives.
- (c) Federal intermediate credit banks.
- (d) Federal land banks.
- (e) Federal home loan banks.
- (f) Federal Home Loan Mortgage Corporation.
- (g) Student Loan Marketing Association.

VI-2

The Federal National Mortgage Association is a mortgage finance corporation supervised by the Department of Housing and Urban Development.

The banks for cooperatives, Federal intermediate credit banks, and Federal land banks are supervised by the Farm Credit Administration.

The Federal home loan banks and the Federal Home Loan Mortgage Corporation are both supervised by the Federal Home Loan Bank Board.

The Student Loan Marketing Association (SLMA) is a corporation to assist in financing college student loans. It is currently sponsored by the Department of Education.

The Federal National Mortgage Association (FNMA) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

FNMA purchases mortgages at market prices pursuant to commitments issued to sellers through a variety of programs. It finances these purchases primarily through the issuance of debt securities. FNMA's debt instruments are characterized as "Agency Issues" in the securities market, but not in the Federal Government Budget.

The common stock of the Corporation is owned by the public, is fully transferable and is listed on major stock exchanges.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in July 1982 and should not be construed as an official forecast of the Corporation's position.

The Corporation has three separate authorities to borrow money from private sources. It may issue subordinated obligations. It may, in addition, borrow amounts not in excess of the sum of net equity and subordinated obligations outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 30. These borrowings usually take the form of debentures and short-term discount notes. Finally, FNMA may issue securities guaranteed by the Government National Mortgage Association which are fully backed by pools of mortgages. There is no statutory limitation on the amount of those obligations of obligations that may be outstanding.

For the years ended September 30, 1981 and 1982, income and retained earnings were as follows (in millions of dollars):

	1981	1982

The pools of mortgages supporting the mortgage-backed securities are not assets, nor are the outstanding securities liabilities of the Federal National Mortgage Association, and the mortgages in the pools supporting the securities are owned by the holders of the securities, in accordance with accounting practices for private corporations. However, in order to be consistent with the concepts of the United States Government, they are presented as assets and liabilities, respectively, in these schedules. On the schedule of Status of Direct Loans for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from the Corporations's perspective, these items are "Amounts issued" and "Amounts passed through to the holders of securities", respectively.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in July 1982 and should not be construed as an official forecast of the Corporation's position.

The 13 Banks for cooperatives are under the general supervision of the Farm Credit Administration. They

finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds issued by the banks are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971, Public Law 92-180, as amended.

The 12 Federal intermediate credit banks are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks become mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The Federal land banks, through the 520 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily

from the sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The 12 Federal Home Loan Banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1982, the banks extended credits of \$45.5 billion and received repayments of \$42.2 billion. Advances outstanding on September 30, 1982, totaled \$67.6 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On September 30, 1982, \$60.8 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined by Board policy (total deposits were at \$14.2 billion on September 30, 1982) and funds paid for the purchase of capital stock by member institutions, amounting to \$6.1 billion at the end of 1982. Funds not immediately used for advances to members are invested until such times as needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a portion of the Board's administrative and other costs.

The Federal Home Loan Mortgage Corporation (FHLMC, the Mortgage Corporation) is a government-chartered, privately owned corporation created under the Emergency Home Finance Act of 1970. Congress chartered the Mortgage Corporation to provide mortgage lenders with an organized national secondary market into which they could sell originated conventional mortgage loans, so lenders can obtain sufficient funds to meet housing credit demand.

The corporation's Board of Directors is composed of the members of the Federal Home Loan Bank Board and its common stock is owned by the Federal Home Loan Banks. Authority for the corporation to issue preferred stock was approved on October 6, 1982 in Public Law 97-289, to "enable the Mortgage Corporation to contribute to a housing recovery by allowing it to increase its purchases of newly-originated mortgages during the hoped-for housing recovery in 1983 (and) . . . to continue its highly successful SWAP program at current levels should this need continue." (House floor debate, Public Law 97-289; October 6, 1982.) All of the corporation's expenses are paid from its own income and are not included in the budget of the United States.

Through the Mortgage Corporation's programs, lenders originate mortgage loans and then sell these loans to FHLMC. The corporation, after purchasing mortgage loans from individual mortgage lenders, groups the mortgages into pools ranging from \$1 million to \$100 million in mortgage loans. The corporation then packages these pools in the form of conventional mortgage pass-through securities, called mortgage "Participation Certificates" (PCs). A "PC" represents an undivided ownership interest in a group or pool of residential mortgage loans as purchased by the corporation. The timely payment of interest and full return of principal on the mortgages underlying PCs is guaranteed solely by the Mortgage Corporation and not by the Federal Home Loan Bank System or the full faith and credit of the U.S. Government.

The corporation's conventional mortgage loan purchase and mortgage pass-through securities' sales operation allows the corporation to act as a conduit to facilitate the flow of investment dollars from capital market investors to mortgage lenders and ultimately to homebuyers in the form of available mortgage credit. A recent addition to the corporation's program mix offers lenders the opportunity to "swap" old below-market rate mortgages held in their portfolios for Mortgage Corporation PCs. Upon "swapping" or converting mortgages to PCs, lenders can use PCs as collateral for borrowing from small savers (such as through retail repurchase agreements or "repos").

The 20 percent limitation on the purchase by the corporation of loans older than 1 year was removed by Public Law 97-110 which was enacted December 26, 1981. Over the past year, this "swap" program, formally known as the Guarantor Program, has accounted for most of the corporation's business. The corporation expects that mortgage purchase volume under the swap program as it relates to below-market rate portfolio mortgages will decline as mortgage originations increase.

The forecast data contained in this material has been developed based on certain economic assumptions and estimates which are reviewed and revised periodically, and should not be construed as an official forecast of the corporation's position.

The Student Loan Marketing Association (SLMA), a private corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to lenders engaged in the Guaranteed student loan program.

SLMA provides liquidity through direct purchase of insured student loans from eligible lenders and by warehousing, which provides lenders with capital advances when they are secured by insured student loans or by Government issued or backed securities. SLMA is authorized to make direct loans to borrowers for purposes of loan consolidation; at the request of appropriate State and Federal officials, to make direct loans to students in capital shortage areas; and to advance funds to States which will provide loans to students. Public Law 97-35 authorized SLMA to provide a secondary market for noninsured loans; at the request of the Secretary of Education to serve as a guarantee agency in support of loan availability; to purchase and underwrite student loan revenue bonds; and to provide such additional services as determined by its Board of Directors to be supportive of the credit needs of students.

Operations.—At September 30, 1982, SLMA had \$3,047,590 thousand outstanding in warehousing advances. It is expected that volume will reach an adjusted level of \$3,685,198 thousand by September 30, 1983, with continued activity in 1984. SLMA expects to purchase \$1,637,000 thousand in loans in 1983, and have a net increase of \$1,434,349 thousand in 1984, to reach a level of \$5,696,108 thousand as of September 30, 1984. At September 30, 1982, SLMA had entered into agreements to purchase during the next 179 months up to \$815 million insured student loans if such loans are offered for sale. At September 30, 1983, SLMA expects to have outstanding \$900 million of such agreements to purchase.

SLMA is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary

market for federally insured loans to graduate health professions students.

Financing.—SLMA is authorized, with the approval of the Secretary of the Treasury, to issue nonguaranteed debt obligations. The Secretary of Education is authorized by the Education Amendments of 1980 to guarantee as to principal and interest such obligations issued prior to October 1, 1984. In March 1981, the Federal Financing Bank agreed to lend to SLMA up to \$5,000,000 thousand. At September 30, 1982, \$5,000,000 thousand was outstanding. In May 1981, SLMA began to issue nonguaranteed debt obligations and now obtains funds for its programs solely from the sales of these securities. At September 30, 1982, SLMA nonguaranteed debt outstanding consisted of \$941,438 thousand in discount notes, \$301,237 thousand in short-term debt obligations and \$650,000 thousand in intermediate-term debt obligations.

Management.—At its annual meeting in May 1982, the shareholders of SLMA elected a board of directors to serve until May of 1983. The shareholders of SLMA are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, seven public directors including the chairman were appointed by the President.

The forecast data with respect to operations are based on certain specific assumptions by management, including the continued successful development, implementation, and financing of authorized programs. The board of directors has not yet reviewed or approved these financial estimates. Accordingly, such data should not be relied upon as an official forecast of the corporation's future business.
