Comparable amounts for 1983 (\$36,346 thousand), 1984 (\$34,871 thousand), and 1985 (\$9,000 thousand) are excluded above.

Medicaid assists States in providing medical care to their low-income population by granting Federal matching payments under title XIX of the Social Security Act to States with approved plans. The 1985 appropriation request reflects the impact of legislative proposals to be effective October 1, 1984. These proposals, such as mandatory copayments, extension of the Omnibus Budget Reconciliation Act expenditure reductions, and the impact of medicare and AFDC proposals, will save \$1,067 million in 1985.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under sections 217(g), 229(b) and 1844 of the Social Security Act, sections 103(c) and 111(d) of the Social Security Amendments of 1965, and section 278(d) of Public Law 97-248, **[\$17,682,000,000]** \$19,904,000,000. There are a number of legislative proposals that affect the Federal Supplementary Medical Insurance (SMI) Trust Fund. These proposals would:

1. Index the SMI deductible to the Medicare economic index.
2. Delay entitlement to benefits to the first day of the first month following attainment of age 65.
3. Establish competitive bidding for laboratory services and durable medical equipment.
4. Freeze physician reimbursements for one year at 1984 rates.
5. Increase competition in the selection of medicare contractors and eliminate the separate carrier for the Railroad Retirement Board.
6. Modestly increase the SMI premium effective January 1, 1985.

Title XVI of the Social Security Act established the Federal Supplemental Security Income (SSI) program for the aged, blind, and disabled. In 1984, the supplemental security income program provided a minimum income of \$314.00 per month for an eligible individual and \$472.00 per month for an eligible couple.

SSI recipients received a general benefit increase of \$20 in July 1983 and a cost-of-living adjustment in January 1985. Legislation is proposed for 1985 to improve SSI program administration.

ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV-A and -D, X, XI, XIV, and XVI, of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), **[\$6,292,000,000]** **\$4,871,025,000** (in addition to the **[\$1,718,000,000]** **\$2,073,000,000** already appropriated), to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, **[such sums as may be necessary]** **not to exceed \$1,000,000,000**, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For making payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the first quarter for fiscal year **[1985]** **1986**, **[\$2,073,000,000]** **\$1,812,840,000**, to remain available until expended: **[Provided, That the Secretary of Health and Human Services shall transfer to the Secretary of Agriculture for payment to States for administrative costs in connection with certification of AFDC households under the Food Stamp Act of 1977, such amounts as may be agreed upon between them]** **Provided, That States shall require all employable applicants and recipients for aid to families with dependent children to engage in the activities specified in section 402(a)(35) of the Social Security Act, and shall require all employable recipients to engage in employment activities such as those described in section 409 of the Act or section 20 of the Food Stamp Act of 1977, as a condition of receiving assistance: Provided further, That States shall adjust, in accordance with methods prescribed by the Secretary, the shelter and utilities portion of the need and payment standards applicable to an assistance unit that shares its household with others: Provided further, That in calculating the eligibility of and benefits for a dependent child, States shall include the needs and income of all parents and their other minor children (except those receiving supplemental security income or otherwise excluded under part A of title IV of the Social Security Act) living with the dependent**

child, and shall exclude the needs of an employable caretaker relative with no dependent child under age sixteen: Provided further, That a minor who has never been married, and the dependent child for whom the minor is responsible, shall be eligible for aid under title IV-A of the Social Security Act only if the minor is living in his parent's (or guardian's) place of residence, unless the State determines that a compelling basis (established in accordance with criteria of the Secretary), other than establishing eligibility for, or increasing the amount of, aid payable under that title, exists for the minor's living elsewhere, and in such a case, payment may be made to a concerned person on behalf of the minor and dependent child: Provided further, That no State shall be entitled, for fiscal year 1985, to reimbursement, from amounts appropriated under this or any other Act, in excess of the amount resulting from applying the rate prescribed by section 403(a)(3)(C) of that Act with respect to expenditures under section 402(a)(19) or 445(f) of that Act. (Department of Health and Human Services Appropriation Act, 1984; legislative action required.)

This appropriation makes grants to States for the Federal share of State expenditures for aid to families with dependent children (AFDC) and related activities.

1. *Maintenance assistance.*—Aid to families with dependent children and related programs provide funds for needy persons. Selected program statistics are shown below.

2. *Research and evaluation.*—Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the assistance payments program.

3. *Administrative expenses.*—The administrative costs budgeted for the assistance payments program provide for Federal direction of the various grant programs that provide maintenance assistance to the needy.

The budget estimates for 1985 include savings from legislation that will be proposed to continue to reform AFDC as a temporary assistance for those who are unable to provide for themselves and create new opportunities for work and work experience. These reforms are estimated to save Federal funds totaling \$.6 billion in 1985.

The Child Support Enforcement program assists States in assuring that absent parents meet their responsibility in providing support for their children. This goal is accomplished through locating absent parents, proving paternity, establishing child support obligations and enforcing their collection.

Child support payments made by absent parents on behalf of recipients of Aid to Families with Dependent Children (AFDC) go to the State or local child support enforcement agency for distribution. The Federal share of the child support collections is deducted from Federal payments to States for AFDC. These collections appear as an offset in the Assistance Payments appropriation.

1. *State and local administrative costs.*—Federal grants for State and local administration of the program are made to States having approved plans.

2. *Research and evaluation.*—Projects are supported to improve State and local program administration.

3. *Federal administrative costs.*—The Federal Office of Child Support Enforcement provides services to State and local governments designed to increase collections.

4. *Reimbursable administrative costs.*—The Office of Child Support Enforcement operates the Federal Parent Locator Service. The Kidnapping Prevention Act of 1980 (Public Law 96-611) authorizes States to use the service to locate parents who have taken their children from the custody of the other parent without court permission.

The budget estimate for 1985 includes savings from proposed legislation to restructure the Child Support Enforcement program to improve cost effectiveness and efficiency of State operations. Total Federal savings from this proposal are estimated to be \$19 million in 1985. An additional \$23 million in savings from other proposed improvements in child support operations are reflected in the Assistance Payments appropriation as increased collections from absent parents or reduced AFDC benefit costs.

Direct program.—The old-age and survivors insurance (OASI) program provides income to retired workers, their dependents, and survivors. The program is financed by payroll taxes paid by employers, employees, and self-employed individuals.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was

\$32,400 in 1982, \$35,700 in 1983, \$37,800 in 1984 and is expected to increase to \$39,900 in 1985.

1. *Benefit payments.*—Benefits are based on average taxable earnings, indexed for inflation.

2. *Administration.*—This activity reflects the costs of administering this program.

3. *Payment to railroad retirement account.*—Since 1951, almost \$22 billion in annual payments from the OASI trust fund have helped finance the rail industry pension fund. The annual OASI payment includes funds for some benefits which are not, in turn, paid to railroad workers and their families.

Reimbursable program.—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs and certain other services administered by SSA with full reimbursement to the trust fund (including interest when appropriate).

The disability insurance (DI) program protects individuals and families by providing income to insured disabled workers (and their dependents). This program is financed by payroll taxes paid by workers, employers, and self-employed individuals.

1. *Benefit payments.*—Disability insurance benefits are made to certain disabled individuals and their dependents:

Automatic cost-of-living benefit increases are the same as for the OASI program.

2. *Administration.*—This activity reflects administrative and other nonbenefit expenses attributable to the DI program.

3. *Payment to railroad retirement account.*—Annual adjustments are made between the DI trust fund and the railroad retirement fund. This adjustment is computed on the same basis as the payment from the OASI trust fund which is described in the preceding section.

1. Administration for children, youth, and families.—A level of \$1,075,059 thousand will provide comprehensive Head Start services to approximately 430,000 children in full-year programs. Handicapped children will make up at least 10% of enrollment. Funds for Head Start nutrition formerly funded by the Department of Agriculture's Child Care Feeding program are reflected in the 1985 request. In 1985, child abuse discretionary research is included in Human Resources Research and Demonstration.

A level of \$6,720 thousand will support grants to eligible States to help them identify, treat, and prevent child abuse and neglect. A level of \$10,504 thousand will support grants to States for projects designed to deal with the immediate needs of runaway and homeless youth and their families.

2. Administration on aging.—A level of \$773,421 thousand will support formula grants and discretionary projects to support the development and operation of community based services to meet the needs of older persons, especially those with the greatest economic and social needs. Funds for activities formerly funded by the Department of Agriculture's Elderly Nutrition program are reflected in the 1985 request.

3. Administration for developmental disabilities.—A level of \$53,800 thousand will support grants to States to augment existing services for developmentally disabled persons and to administer effective protection and advocacy systems. A level of \$10,400 thousand will support special projects and university affiliated facilities.

4. Administration for Native Americans.—A level of \$28,000 thousand will support grants to help Native American populations achieve social and economic self-sufficiency.

5. White House conferences on aging.—All funds for White House conferences have been appropriated and will remain available until expended.

7. Federal administration—Human development services.—A level of \$64,245 thousand will support administrative expenses to carry out Office of Human Development Services programs.

1. **Foster care.**—This program supports maintenance assistance for children who must be placed outside the home. An average of 98,000 children are served monthly.

2. **Adoption assistance.**—This program supports subsidies for families adopting children with special needs.

3. **Child welfare services and training.**—These funds support States' efforts to support and keep families together, to reunify children with their families and, where this is not possible, to find adoptive homes for children. Legislation will be proposed to repeal the separate authority for training grants and permit States to include training in their services programs.

4 and 5. **Adoption opportunities and Child welfare research and demonstration.**—In 1985, these activities will be financed in Human resources research and demonstration.

Note.—Excludes \$292 thousand in 1985 for activities transferred to Department of Labor, Employment and Training Administration, Program administration. Comparable amounts for 1984 (\$4,228 thousand) and 1983 (\$4,189 thousand) are included above.

The work incentive (WIN) program was designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program of employment, training, and support services. Training was administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures have been federally matched at the rate of 90%. In 1985, separate WIN funding will be unnecessary. Under the President's 1985 budget proposals, AFDC applicants and recipients will be required to participate in job search and other employment-related activity as a condition of AFDC eligibility. Funding for administrative costs will be provided by the Department of Health and Human Services under the AFDC program's regular 50 percent matching rules. In addition, States can use Social Services Block Grant resources and Job Training Partnership Act resources for other work-related activity for AFDC recipients.

1. *Grants to States.*—Includes registration, appraisal and employability planning, job search, training, child care services, adjudication of the work test, and WIN demonstrations. In 1985 the WIN program will be phased out with unexpended carryover funds.

2. *Program direction and evaluation.*—This activity provides for the administration and evaluation of the WIN program and WIN demonstrations. Resources for administration will be divided between the Departments of Labor and Health and Human Services in 1984.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and thrift insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the Department's activities, as set forth below:

1. *Housing programs* cover the Department's major housing subsidy programs except for those activities under the public housing and Indian housing programs which are administered by a new organization. The mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities, are also included under this heading. Other activities included under this heading are community disposal operations, the Office of Interstate Land Sales Registration, and manufactured home inspection and monitoring, and the new rental development grant program.

2. *Public and Indian Housing programs* cover public housing management and development activities (including modernization) and provision of Indian Housing assistance. Also included is the financing activity related to the sale of bonds and notes for those activities.

3. *Government National Mortgage Association (GNMA)* covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

4. *Community planning and development* covers the Community development grant and Urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This organization is responsible for the new rental rehabilitation grant program and the Urban homesteading program as well as the closeout of projects under the Planning assistance grant (section 701) program, Rehabilitation loan (section 312) program, terminated categorical community development programs and the liquidating programs which include the liquidation of the new communities fund.

5. *Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Other major divisions within the Department include Fair Housing and Equal Opportunity, and Departmental Management.

Day-to-day administration, processing, and funding decisions for programs of the Department of Housing

and Urban Development are carried out in offices located within the geographical boundaries of 10 regions.

The subsidized housing programs schedule reflects both budget authority to enter into contracts for subsidized housing and an appropriation for payments required to liquidate contracts under the separate programs as described below.

Total reservations in 1985 are estimated at \$9,103.0 million which will be utilized primarily to fund about 150,594 subsidized housing units. This includes provision for 100,000 incremental units in 1985—of which 87,500 units represent vouchers, 10,000 are to be in support of section 202 housing for the elderly and handicapped and 2,500 units for Indian housing. New budget authority of \$6,243.4 million combined with the estimated \$2,754.7 million recovery of annual contribution reservations from prior years together with \$22.3 million in permanent authority is sufficient to meet reservation requirements. The recovery of \$1,839 million of rent supplement budget authority will be sufficient to meet \$5.0 million of rent supplement amendment needs and to allow a rescission of \$1,834.0 million.

Section 413 of the General Provisions section (title IV) contains proposed legislation to make indefinite appropriations available in 1985 and subsequent years to liquidate contractual obligations under the various subsidized housing programs as follows:

1. *Lower income housing (section 8).*—For 1985, the budget proposes to implement the recently authorized housing voucher program on a full-scale basis. All subsidies for section 8 new construction or substantial rehabilitation will be discontinued except for 10,000 units financed under the section 202 loan program. All other activity in 1985 will be directed toward existing housing

General and special funds—Continued

SUBSIDIZED HOUSING PROGRAMS—Continued

HOUSING PAYMENTS—Continued

and will make use of the more cost-effective voucher subsidy mechanism. The new subsidy will be based on the concept of providing housing vouchers to eligible low-income households which will permit them to find safe, decent housing in the private rental market. While the subsidy will be based on the difference between an established rent payment standard for each market and a fixed percentage of family income, tenants will be given much greater freedom to determine how much of their income they actually spend to obtain standard housing.

In addition, program administration will be much less complex under the housing voucher approach and the actual subsidy costs will also be lower. A total of 91,000 units are expected to be reserved under the section 8 housing voucher program in 1985 including 87,500 incremental units and 3,500 units that are currently receiving some other form of HUD subsidy.

In addition, an estimated 160,000 units receiving assistance under the current section 8 existing program will be converted to the voucher program in 1985 as current tenants leave the program and new tenants enter. These vouchers will utilize the authority previously reserved under the section 8 existing program and will therefore not require additional authority in 1985.

The budget also includes section 8 assistance for 5,000 loan management units, 5,000 property disposition units and for the conversion of 37,094 units currently receiving subsidies under the section 23, rent supplement and rental assistance payments programs. A total of 148,094 units will receive subsidy commitments under the section 8 program in 1985.

2. *Public and Indian housing.*—Under this program, local housing agencies have engaged in the development and operation of projects designed for occupancy by low-income households, including Indians. Subsidies were provided under this program to cover the cost of financing the development, acquisition, leasing, and/or modernization of these projects. Additional subsidies are also available to cover operating deficits of these projects (see Payments for the operation of low-income housing projects discussed below). No new development activity is planned for the regular public housing program in 1985 because of the development of a more cost-effective substitute, the section 8 housing voucher program.

The 1985 budget includes \$390.9 million of budget authority to support 2,500 units of Indian housing. In addition, the budget proposes to provide \$1,550 million to support \$760 million of capital costs in the comprehensive improvement assistance program to continue the program of modernization of low-income housing projects. The budget proposes to provide \$907 million of budget authority for interest rate adjustments to existing annual contributions contracts to support \$1,200 million of sales of low-income housing project obligations to the Federal Financing Bank. Finally, the budget provides \$320.8 million of budget authority for amendments of public and Indian housing projects and

lease adjustments under the section 23 program. A total of \$3,168.7 million of budget authority is requested in support of the public housing program in 1985.

Rental rehabilitation and development grants.—The Housing and Urban-Rural Recovery Act of 1983 authorized a program of assistance grants to States and localities to stimulate the rehabilitation of older multifamily units and the development of new construction in areas where an insufficient supply of units may exist.

The 1985 budget assumes the transfer (supplemental requested) of \$615 million of available unutilized budget authority in 1984 from the annual contributions for assisted housing account to two new programs—the Rental rehabilitation grant program and the Rental development grant program. The \$615 million transfer will provide \$150 million for rehabilitation grants in both 1984 and 1985. It will also support \$200 million of Rental development grants in 1984 and \$115 million in 1985.

In addition to the transfer of budget authority in 1984, housing vouchers and also section 8 existing units will be made available to support the Rental rehabilitation grant program in 1984. Vouchers will also be provided to support the program in 1985.

3. *Rent supplement.*—Rent supplement payments are made to owners of certain private housing on behalf of qualified low-income tenants. In 1985, the Department will make reservations to convert 30,638 rent supplement units in insured projects to section 8. Amounts to be recaptured from these conversions will be used to provide amendments for certain rent supplement units in projects under contract in 1985. The balance of the amounts recaptured from the conversions, \$1,834 million in budget authority in 1985, will be rescinded.

4. *Homeownership and rental housing assistance (sections 235 and 236).*—For 1985, no new activity is planned under the section 235 program, which provides homeownership subsidies for lower income families. The commitment phase of the program expired on November 30, 1983. Subsidy payments will continue to be made pursuant to existing contracts.

The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 Rental housing assistance program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants.

This Act also authorizes additional rental assistance payments to assist low-income tenants in projects assisted under section 236. In 1985, the Department will make reservations to convert 1,456 rental assistance payment units in insured projects to section 8. Amounts to be recaptured from these conversions will be used to provide amendments for certain rental assistance payment units in projects under contract in 1985. The balance of the amount recaptured from the conversions, \$164.8 million in budget authority in 1985, will be rescinded.

College housing grants.—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

Funding is provided for essential repairs to correct deficiencies resulting from deferred maintenance. No appropriation is requested for 1985. However, an estimated carryover balance of \$6.2 million, together with an estimated \$40 million from the Rental housing assistance fund, will be available in 1985 and \$39.5 million is estimated to be used to provide financial assistance to approximately 133 projects.

Beginning in 1984, a technical change is being made to the budget presentation to reflect the transfer of unobligated balances from the Rental housing assistance fund to the Troubled projects operating subsidy program. In 1983 and prior years, funds authorized for transfer to this account from the Rental housing assistance fund were classified as obligations to the Rental housing assistance fund. This change in presentation eliminates the current double counting of obligations and also correctly highlights the cost of the troubled projects program.

This demonstration program is testing whether contracting directly with local public housing agencies and section 202 housing for the elderly or handicapped sponsors to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social services programs. Congregate services can include meal services and essential supportive services. These three- to five-year contracts commenced in 1980 and will be evaluated over the life of the contracts. No additional resources are requested for 1985 since current funds are sufficient to evaluate the relative efficiency of this HUD program.

Pursuant to the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, inspections and investigations are conducted to enforce Federal manufactured home construction and performance standards. Manufactured home producers are required to have their building plans approved by an agency acceptable to HUD prior to manufacture. Appropriated funds that were enacted to initiate the Mobile home standards program are estimated to be disbursed fully by the end of 1984.

RENTAL DEVELOPMENT GRANTS*

*See Part II for additional information.

The budget proposes supplemental language for the Rental development grants program authorized by section 17 of the United States Housing Act of 1937. Under this grant program, assistance would be provided to States and units of local government to enable the development of rental properties in areas experiencing severe shortages of rental housing. Language is being proposed to transfer \$315 million in budget authority from the annual contributions for assisted housing account in 1984 in support of the development program. Of this amount, \$200 million will be made available for 1984 and \$115 million will be made available for 1985.

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Housing and Community Development Amendments of 1979 and the Housing and Community Development Act of 1980, authorizes a program to establish and enforce appropriate construction standards for the construction, design and performance of manufactured homes to assure their quality, durability and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. These fees are deposited in a special fund administered by the Department. Beginning in 1984, a portion of the fee receipts will be transferred to the Salaries and expenses account to help defray the administrative expenses of the program.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases

or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, not exceeding \$1,000, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and help finance the administrative expenses incurred in program operations. During 1984, the schedule of fees will be changed to provide additional receipts to offset a larger portion of the program costs. However, the \$1,000 limit will remain unchanged. The balance of the administrative expenses is included under the Department's Salaries and expenses account.

TITLE III—CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for [1984] 1985 for such corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government. (*Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984.*)

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), [\$252,974,000] \$387,683,000, to remain available until expended.

During [1984] 1985, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During [1984] 1985, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed \$50,900,000,000 of loan principal.

During fiscal year [1984] 1985, gross obligations for direct loans of not to exceed [\$56,390,000] \$65,448,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved.

[Any fee charged in accordance with a contract by a contractor to recover indebtedness owed to the United States may be payable from the amount collected by such contractor, up to such amount as may be owed such contractor, in accordance with section 13(b) of the Debt Collection Act of 1982 (Public Law 97-365).] (*Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984.*)

The FHA fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

The Mutual mortgage insurance fund provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The Cooperative management housing insurance fund, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

The General insurance fund provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The Special risk insurance fund provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged to the appropriate insurance fund by the mortgage insurance program. During 1985, it is estimated that applications for single-family and mortgage insurance covering 936,000 units will be received and that mortgage insurance will be written covering 584,000 single-family and multifamily units. In addition, it is estimated that approximately 40,331 single-family and multifamily units will be acquired by the Department during 1985 and that 40,180 single-family and multifamily units will be sold. More detailed activity information follows in the "Program Highlights" table shown below.

Insurance reserves from operations reflect the interest earned on mortgage notes and the income and expenses applicable to acquired properties.

Insurance reserves from operations at the end of 1985 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about \$6.3 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1985 is as follows:

STATUS OF INSURANCE RESERVES FROM OPERATIONS

(In millions of dollars)

As a result of the continued deficits in the FHA fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include faster foreclosures of properties in default and faster sales of acquired properties to reduce holding costs.

In 1983, the Department continued the sale of purchase-money mortgages and assigned mortgage notes. Sales are expected to generate \$143 million of proceeds in 1984 and \$109 million in 1985.

For 1984, a new Temporary mortgage assistance payments program is being implemented that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This new program is viewed as a viable alternative to the Home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the FHA fund.

Budget program.—The budget proposes an appropriation of \$388 million to restore the net realized losses from the sale of property and notes covered by the General insurance and Special risk insurance funds.

Financing.—In 1983, \$20.5 million of debentures were issued and \$149.4 million were redeemed. There was

\$10 million borrowed and \$87.4 million repaid to the Treasury in 1983. It is estimated that a net of \$110 million will be repaid to the Treasury in 1984 and \$215 million will be repaid in 1985.

Operating expenses.—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA fund. Expected savings from (1) completion of reviews of federally-performed commercial activities, and (2) cash management improvements are included in the budget.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

In [1984, \$666,400,000] 1985, \$500,000,000 of direct loan obligations may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), utilizing the resources of the fund authorized by subsection (a)(4) of such section, in accordance with paragraph (C) of such subsection: *Provided*, That such commitments shall be available only to qualified nonprofit sponsors for the purpose of providing 100 per centum loans for the development of housing for the elderly or handicapped, with any cash equity or other financial commitments imposed as a condition of loan approval to be returned to the sponsor if sustaining occupancy is achieved in a reasonable period of time: *Provided further*, That the full amount shall be available for permanent financing (including construction financing) for housing projects for the elderly or handicapped: *Provided further*, That the Secretary may borrow from the Secretary of the Treasury in such amounts as are necessary to provide the loans authorized herein: *Provided further*, That notwithstanding any other provision of law, the receipts and disbursements of the aforesaid fund shall be included in the totals of the Budget of the United States Government.

[Title I of the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984 (Public Law 98-45), is amended by inserting before the period at the end of the paragraph under the heading "Housing for the elderly or handicapped fund" (97 Stat. 219, 220) the following: "*Provided further*, That notwithstanding section 202(a)(3) of the Housing Act of 1959, loans made in fiscal year 1984 shall bear an interest rate which does not exceed 9.25 per centum, including the allowance adequate in the judgment of the Secretary to cover administrative costs and probable losses under the program".] (*Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984; Supplemental Appropriations Act, 1984.*)

The Housing for the elderly or handicapped fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the Section 8 lower income housing assistance payments program is used in conjunction with the Section 202 program. Applications under the two programs are processed simultaneously. For 1985, a \$500 million loan limitation is proposed which will provide financing for approximately 10,000 units.

The program and financing schedule for this account revises the format which has been used in previous years. This year's schedule provides a breakdown of the Federal government's liabilities between administrative commitments and obligations. The amounts reflected in the administrative commitments portion of the schedule reflect outstanding Section 202 fund reservations, whereas, the costs and obligations portion reflects commitments which have reached the initial loan closing stage of processing.

Financing.—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of

participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, up to 80%, but not to exceed \$50,000, of the start-up costs are funded through these "seed money" loans. Sponsors are required to demonstrate their financial capacity by providing 20 percent from their own funds which is repaid from the initial proceeds of the section 202 construction loan.

The proposed program level for 1985 will be funded from available balances and loan repayments and will finance 47 direct loans for selected projects that receive permanent financing under the Section 202 Housing for the elderly or handicapped program.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program. Prior to that time, collections were used for the payment of tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

Beginning in 1984, a technical change is being made to the Budget presentation. In 1984, excess collections authorized for transfer to the Troubled projects operating subsidy program will be treated as a transfer of unobligated balances and will no longer be classified as obligations of the Rental housing assistance fund.

Payments are provided to assist public housing agencies (PHAs) and Indian Housing Authorities (IHAs) to meet certain deficits in the operation of PHA-owned and IHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD.

The operating subsidy estimates for 1985 are based upon the Performance Funding System (PFS). The estimates continue to reflect increased tenant payments resulting from the impact of implementing various provisions included in the Housing and Urban Development Amendments of 1981 (Public Law 97-35). The estimates also reflect recently enacted legislation changing the definition of adjusted tenant income (Public Law 98-181) as well as lower utility consumption estimates based on existing and anticipated energy conservation

improvements. Requirements also are expected to be reduced as a result of a policy to limit subsidy payments on vacant units.

The Low-rent public housing loan fund supports public housing authority (PHA) construction, acquisition, and modernization activities until the projects can be financed on a long-term basis. The fund is used to provide direct Federal short-term loans to PHAs, as authorized by Section 4 of the United States Housing Act of 1937, as amended: (1) during the early stages of a development or modernization project and prior to the issuance of federally guaranteed PHA short-term notes (the proceeds of which are used to repay the direct loans and to finance development and modernization needs); and (2) when private market conditions preclude PHAs from issuing new or refinancing outstanding guaranteed short-term notes. These loans are made from available working capital in this fund and from up to \$1.5 billion of borrowings from the Treasury. These commitments to provide direct Federal loans, when necessary, impose a substantial contingent liability that grows with the amount of outstanding loan approvals (guaranteed short-term notes, direct loans, and other commitments for direct loans).

Payments to amortize the indebtedness incurred by the PHAs for these purposes are provided from the housing payments appropriation (in the Subsidized

housing programs account) to liquidate contract authority under existing Annual Contributions Contracts (ACCs). In 1985, it is proposed that these obligations be liquidated through permanent, indefinite appropriations.

Long-term refinancing is necessary (1) to provide permanent financing for long-term public housing projects, (2) to reduce the contingent liability of the Federal Government for the guaranteed notes, and (3) to reduce Federal exposure to short-term interest rate fluctuations. Prior to 1974, projects were permanently financed through the sale of long-term bonds to the public. Between 1974 and 1980, no long-term refinancing took place and financing of projects was accomplished through sales of guaranteed PHA short-term notes to the public. In 1980, long-term financing resumed through sales of PHA obligations to the Federal Financing Bank (FFB). Budgetary resources have been provided to make periodic payments directly to the FFB of amounts reflecting the interest rate differential between originally estimated short-term tax-exempt financing and the long-term FFB instruments (which have an interest rate of one-eighth of one percent higher than the Treasury borrowing rate). Beginning in 1985, the Department plans to continue to sell PHA obligations to the FFB which will require amending existing ACCs to cover the interest differential. In 1985, appropriations for interest rate adjustments sufficient to support \$1.2 billion in refinancing are proposed in the Annual contributions for assisted housing account together with language that will reserve those funds for this purpose. The status of loan approvals, reflecting refinancing activity, follows:

The fund is authorized to make loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

SPECIAL ASSISTANCE FUNCTIONS FUND

The Secretary shall transfer all assets acquired and liabilities incurred pursuant to section 305 of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1720), to the management and liquidating functions fund established pursuant to section 306 of such Act (12 U.S.C. 1721); Provided, That on October 1, 1984, each outstanding obligation issued by the Secretary of Housing and Urban Development to the Secretary of Treasury pursuant to section 305(d) of such Act, together with any promise to repay the principal and unpaid interest which has accrued on each obligation, and any other term or condition specified by each such obligation, is cancelled.

¹ Represents losses on sales of loan assets.

Special assistance functions.—The Association was authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans. This legislation was repealed in November, 1983. The Association will now only honor existing commitments. Funds are currently available to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is admin-

istered with the use of processing facilities of the Federal National Mortgage Association.

Budget program.—Mortgage purchases, representing deliveries from commitment contracts in prior years, are estimated at \$1.8 billion in 1984 and \$466 million in 1985, and sales of these mortgages are estimated at \$1.8 billion in 1984 and \$1.9 billion in 1985. No new commitments are planned for 1985. The Department proposes to request forgiveness of Treasury borrowing in 1985. The assets and liabilities of the revolving fund will be transferred in 1985 to the Management and liquidating fund for liquidation.

Financing.—Funds for mortgage purchases are obtained from principal liquidations through either repayments on portfolio mortgages or sale of tandem purchases, and borrowing from the Treasury. A portion of the mortgage portfolio was financed by sale of participation certificates. This amounted to \$1.2 billion in prior years and there will be a remaining liability of \$246.4 million offset by \$96.2 million on deposit with the trustee in anticipation of scheduled retirements in 1985. Funds for operating costs, mainly interest expense and discounts required on tandem mortgage sales, are obtained from mortgage earnings and from appropriations for the difference between interest expense on participation certificates and the income from related mortgage investment earnings.

Operating results.—Through September 30, 1983, losses of \$80.9 million for participation sales have been offset by appropriations. Other losses from below-market interest rate loans, tandem costs, interest on Treasury borrowings and asset sales amounted to \$6,358.7 million. Of this amount, \$6,277.7 million is carried as an impairment of capital.

The special assistance functions are expected to result in losses estimated at \$1,467.7 million in 1984 and \$1,717.7 million in 1985.

Appropriations for insufficiencies under the participation sales fund will cover \$1.2 million of 1984 losses and \$450 thousand of 1985 losses.

The following table shows the derivation and financing of the interest insufficiencies on outstanding participation certificates:

Emergency mortgage purchase assistance.—The Emergency Home Purchase Assistance Act of 1974 added section 313 to the National Housing Act, authorizing standby authority to purchase mortgages. This authorization was repealed in November 1983.

Budget program.—The last release of commitments to purchase mortgages took place in September 1976. Outstanding purchase commitments will continue to be honored, and purchases will amount to \$3.0 million in 1984. This will eliminate all outstanding commitments to purchase mortgages under the program. The Department proposes to request forgiveness of Treasury borrowing in 1985. The fund will be liquidated in 1985 by the transfer of all assets and liabilities to the Management and liquidating funds account.

Financing.—Funds are obtained from Treasury borrowings, mortgage principal liquidations, and mortgage interest payments.

Operating results.—Losses are estimated at \$290 million in 1984 and \$283 million in 1985, primarily from the differences in prices paid to purchase the below-market interest mortgages and the prices that are ob-

tainable when such mortgages are sold at market yields.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand, or purchased under contracts made before November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

Budget program.—Appropriation language will be proposed to transfer in 1985 the assets and liabilities of the Special assistance functions and Emergency mortgage purchase assistance funds to the Management and liquidating functions fund for liquidation. Treasury debt under these funds is proposed for forgiveness in 1985.

Financing.—These functions are financed principally by Treasury borrowings, portfolio liquidations, and, in the sales of portfolio mortgages and participation certificates in mortgage pools.

Operating results.—Net income of \$19.2 million and \$21.7 million is estimated for 1984 and 1985, respectively.

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured, FmHA-insured, or VA-guaranteed mortgages.

GNMA guarantees the timely payment of principal and interest on the guaranteed securities. Actual losses for 1983 and estimated losses for 1984 and 1985 are presented below.

(In thousands of dollars)

	1983 actual	1984 estimate	1985 estimate
Mobile home pools	15	70	70
Single-family pools		105	105
Project pools	55	525	525
Total	70	700	700

Budget program.—Program activity is summarized in the following table.

(In thousands of dollars)

	1983 actual	1984 estimate	1985 estimate
Commitments issued	64,224,800	68,250,000	68,250,000

Securities outstanding	152,338,701	186,621,128	220,861,128

Financing.—In addition to an application fee, guarantee fees and other charges are assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee.

Operating results.—Fee collections and other income are expected to exceed expenses by \$227.8 million in 1985. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title V of the Energy Security Act of 1980 authorized the creation of the Solar Energy and Energy Conservation Bank for the purpose of encouraging energy conservation and the use of solar energy by providing funds to subsidize loans and grants for the installation of energy conservation and solar energy improvements in single and multi-family residences, and agricultural and commercial buildings.

In 1983, the Bank provided funds to States and territories which had submitted innovative proposals for utilization of the funds with ongoing energy conservation or solar energy programs. In 1983, all of the 1982 appropriation was obligated, as directed by court order, as well as a portion of the 1983 appropriation. The remainder of the 1983 appropriation will be obligated in 1984 along with the 1984 appropriation. No appropriation is requested for 1985.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and

States for the funding of local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between entitlement cities and urban counties and States and small cities.

Guaranteed loans.—Guaranteed loan assistance under section 108 has been provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses. No guarantee commitments are proposed for 1985.

Budget program.—An appropriation of \$3,468 million is proposed for 1985. Outlays are estimated at \$3,900 million in 1984 and \$3,900 million in 1985.

URBAN DEVELOPMENT ACTION GRANTS

For grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), pursuant to section 103 of that Act, \$440,000,000, to remain available until September 30, [1987] 1988. (Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984.)

Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties, without payment, to units of local government for use in an urban homesteading program. In addition, the Act authorizes the Administrator of Veterans Affairs and the Secretary of Agriculture to transfer their unoccupied, single family properties for use in such programs.

The Housing and Urban-Rural Recovery Act of 1983 amended section 810 to permit the transfer of HUD-owned multifamily properties to units of local government for homesteading on a demonstration basis in 1984 and 1985. This Act also amended section 810 to permit a demonstration in 1984 and 1985 to determine the feasibility of providing assistance to State and local governments in purchasing one- to four-family properties for conveyance to lower income families.

Budget program.—An appropriation of \$12 million is proposed for 1985 and will be used to support single family properties. This amount includes up to \$1 million for continuation and evaluation of the demonstration to assist State and local governments in purchasing one- to four-family properties. Supplemental language is being proposed to permit implementation of this demonstration in 1984. Within the 1984 appropriation, \$3 million has been made available for the multifamily homesteading demonstration. To the extent these funds are not required in 1984, they will be available for the multifamily demonstration in 1985.

RENTAL REHABILITATION GRANTS*

*See Part II for additional information.

The budget proposes supplemental language for the Rental rehabilitation grants program authorized by section 17 of the U.S. Housing Act of 1937. Under this grant program, assistance will be provided to States

and cities to enable the rehabilitation of rental properties. This new program will be used in conjunction with the section 8 voucher program. In accordance with provisions of the Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181), budget authority of \$300 million is proposed for transfer from the account "Annual contributions for assisted housing" in 1984 of which \$150 million will be made available for each of fiscal years 1984 and 1985. This will support the rehabilitation of an estimated 30,000 units each year.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the Community development block grant program, authorized by the 1974 Act.

Budget authority reflected in 1983 was provided by Congressional action for certain closeout activities. No new budget authority is required for the program in fiscal years 1984 and 1985. However, a permanent indefinite appropriation to liquidate prior unfunded contract authority is available. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

MEMORANDUM

2299 U.S. contingent liability for guaranteed loans outstanding, end of year	46,439	45,289
--	--------	--------

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs. The section 312 rehabilitation loan program is proposed for termination in 1985 and the assets and liabilities of that fund are proposed for transfer to the Revolving fund (liquidating programs) in 1985. Although the section 312 rehabilitation loan program estimates are not reflected in this account, they will be included upon enactment of the transfer.

Financing.—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

Budget program.—Grants were distributed to new community developers under section 718 to supplement public facility projects in existing new communities. Public Law 96-7, dated April 9, 1979, rescinded all budget authority not administratively committed. Any amounts recovered subsequent to that date will be rescinded automatically. All remaining commitments are estimated to be disbursed by the end of 1984.

2299	U.S. contingent liability for guaranteed loans outstanding, end of year	47,189		
------	---	--------	--	--

The Housing and Urban Development Act of 1968, as amended, and title VII of the Housing and Urban Development Act of 1970, as amended, authorized Federal assistance to private and public new community developers. The program has provided for Federal guarantee of the obligations issued on behalf of new community developers.

The Housing and Urban-Rural Recovery Act of 1983 repeals the new communities authorizing legislation contained in title IV of the HUD Act of 1968 and title VII of the HUD Act of 1970. In addition, it cancels the New communities fund debt to the U.S. Treasury upon transfer of the assets and liabilities of the New communities fund to the Revolving fund (liquidating programs). The transfer and debt cancellation were accomplished on December 30 and 31, 1983, respectively.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out internally and through contracts with industry, nonprofit research organizations, educational institutions and through agreements with State and local governments and other Federal agencies.

In 1985, the Department will maintain its emphasis on improving the efficiency, effectiveness, and equity of HUD programs and on identifying ways of achieving cost reductions.

The fair housing assistance program provides funding to State and local agencies and community housing resource boards to aid in eliminating housing discrimination.

The budget proposes financial assistance of \$4.7 million for 100 agencies to assure prompt and effective processing of title VIII (Civil Rights Act of 1968) complaints. The budget also proposes funding of \$2.0 million for 100 community housing resource boards which assist HUD, realtors and builders in designing, implementing, and monitoring voluntary affirmative marketing agreements and programs.

This appropriation finances all salaries and related costs associated with administering the programs of the Department of Housing and Urban Development, including: housing and mortgage credit programs; community planning and development programs; equal opportunity, research, regulatory and insurance programs; departmental management, legal and audit services; and field direction and administration.

The results of the implementation of several management initiatives are reflected in this account. For example, in 1985 the Department will increase the utilization of private contractors and eliminate 62 positions currently occupied by staff who perform personnel functions. The savings that result from other management initiatives, such as better management of the Department's cash balances, are reflected in various accounts throughout this chapter.

This fund is the repository of gifts and bequests which the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. The provision of section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

TITLE IV—GENERAL PROVISIONS

【SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974 to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; or to payments to interagency motor pools where separately set forth in the budget schedules.】

SEC. 【402】 401. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 【403】 402. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 【404】 403. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 【405】 404. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. 【406】 405. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitation.

SEC. 【407】 406. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the Government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 【408】 407. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the

Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

【SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations without the approval of the Committees on Appropriations.】

SEC. 【410】 408. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. 【411】 409. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. 【412】 410. Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

【SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.】

SEC. 【414】 411. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 【415】 412. None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

SEC. 413. Section 1305 of title 31, United States Code, is amended by adding to the end thereof the following new paragraphs to provide for indefinite appropriations to be available currently and permanently:

“ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

“(7) to make payments required under contracts made under section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c).

“COLLEGE HOUSING GRANTS

“(8) to make payments required under contracts made under title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749 et seq.).

“RENT SUPPLEMENT PROGRAM

“(9) to make payments required under contracts under section 101 of the Housing and Urban Development Act of 1965, as amended (12 U.S.C. 1701s).

“HOMEOWNERSHIP AND RENTAL HOUSING ASSISTANCE

“(10) to make payments required under contracts under sections 235 and 236, respectively, of the National Housing Act, as amended (12 U.S.C. 1715z, 1715z-1).” (Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984.)

DEPARTMENT OF THE INTERIOR

LAND AND [WATER RESOURCES] MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is currently responsible for the conservation, management and development of 310 million acres of public lands, including 135 million acres in Alaska. Of these, 60 million acres in Alaska will ultimately be conveyed to other parties (Alaska Natives, the State of Alaska, and other agencies). The Bureau also has full responsibility for mineral leasing and supervising of minerals operations on the public lands and on some 370 million acres of Federal mineral estate underlying other ownerships.

1. *Energy and minerals management.*—The 1985 program provides for issuing leases for Federal minerals onshore including Alaska, and for the supervision of minerals development and exploration activities on Federal leases, including oil and gas, coal, geothermal, oil shale, tar sands, phosphates, sodium and potash. Emphasis in the 1985 budget is on intensifying the inspection and enforcement capabilities to verify production and assure proper operations on leases for both fluid and solid minerals, and to process applications for combined hydrocarbon leases in tar sands areas. Emphasis is also placed on improving surface management regulation compliance for mining on public lands and to initiate a hazardous materials waste inventory and abatement strategy. BLM is also responsible for the mineral resource evaluation, economic evaluation and regulation and supervision of minerals operations on both Federal lands and Indian lands under terms of Secretarial Order No. 3087, as amended.

2. *Lands and realty management.*—Land and realty actions include processing rights-of-way applications for energy-related development; processing land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act; processing State indemnity selections, land exchanges, Recreation and Public Purposes Act and other lands and realty cases; review of public land withdrawals, revocation of withdrawals and new withdrawal processing; and sale of lands under the terms of the Federal Land Policy and Management Act and in Nevada, under the Burton-Santini Act. BLM is also responsible for the system of public land records, some of which date back nearly 200 years. BLM is involved in a multi-year process to improve and automate the land records in support of both resource and minerals program needs.

3. *Renewable resource management.*—Includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, protection, preservation and sustained yield management of the natural resources on the public lands.

4. *Planning and data management.*—Includes such activities as resource management planning, development of land use plans, and automated data management.

5. *Cadastral survey.*—Provides for identification of land boundaries and legal property descriptions to facilitate land management programs.

6. *Firefighting and rehabilitation.*—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires.

BUREAU OF LAND MANAGEMENT—Continued

General and special funds—Continued

MANAGEMENT OF LANDS AND RESOURCES—Continued

7. *Technical services.*—Provides for enforcement of laws and regulations governing the management, use, and protection of public lands.

This activity also provides engineering services including survey and design, development of specifications, contract administration, construction cost estimating, maintenance scheduling, transportation system management, facility evaluation, sign shop operation, and maintenance for buildings, roads, and trails.

8. *General administration.*—Includes executive management, equal employment opportunity programs, and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities and includes certain Bureau-wide fixed costs such as SLUC, postage and FTS charges.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, and dismantlement of temporary structures and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to \$10,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the United States Bureau of Land Management; miscellaneous and emergency expenses of enforcement activities authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed \$10,000: *Provided*, That appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed to the General Fund of the Treasury from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended on a reimbursable basis for surveys of Federal lands of the United States and for protection of lands for the State of Alaska: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within thirty days after receipt of a final grazing allotment decision [or ninety days after the effective date of this Act in the case of reductions ordered during 1979, whichever occurs later]. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secretary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within two years after the appeal is filed: *Provided further*, That appropriations herein made shall be available for paying costs incidental to the utilization of services contributed by individuals who serve without compensation as volunteers in aid of work of the Bureau to protect, improve, develop, or manage the public lands; and that within appropriations herein provided, Bureau officials may authorize either direct procurement of or reimbursement for expenses incidental to the effective use of volunteers such as, but not limited to, training, transportation, lodging, subsistence, equipment, and supplies: *Provided further*, That provision for such expenses or services is in accord with volunteer or cooperative agreements made with such individuals, private organizations, educational institutions, or State or local governments: *Provided further*, That subject to valid existing rights, no appropriation herein made shall be used by the Secretary of the Interior for the processing or issuance of prospecting permits in certain lands in the Mark Twain National Forest, Missouri, which comprise approximately 17,562 acres, as generally depicted on a map entitled "Irish Wilderness—Proposed", dated December 1981. (Public Law 98-146, making appropriations for the Department of the Interior and related agencies, 1984.)

The Oregon and California Grant Lands appropriation provides for the BLM management of 2.1 million acres of revested railroad and wagon road lands located in Western Oregon for permanent forest production under the principle of sustained yield. Starting in 1985, funds for the management of O. & C. lands contained within the National Forests will be requested directly by the Forest Service.

1. *Construction and acquisition.*—Provides for the acquisition of 40 road easements to commercial timber areas. No construction projects are planned in 1984.

2. *Maintenance.*—Provides for maintenance of access roads, operation and maintenance of recreation facilities, and maintenance of management facilities.

3. *Renewable resource management.*—Provides for reforestation, stand improvement, mortality salvage, commercial thinnings, forest genetics, timber management, protection, and other resource management actions on these Western Oregon forested lands. BLM's planned timber sales in 1985 will be 1.2 billion board feet with an estimated value of \$165 million.

4. *Planning and data management.*—Provides for preparation and updating of land use plans and for automated data processing costs.

Rattlesnake NRA and Wilderness Area.—Represents the monetary value of bidding rights issued under the authority of Public Law 96-476 and the estimated value of adjustments to those rights as required by section 7 of the Lee Metcalf Wilderness and Management Act of 1983. The bidding rights may be used as monetary credits against that portion of bonus payments, rentals or royalty payments paid under the Mineral Leasing Act of 1920 as amended, into the Treasury of the United States and retained by the Federal Government on any Federal coal lease won or otherwise held by the holder. The value of unused bidding rights increases at a rate set quarterly by the Secretary of the Treasury, pursuant to section 11 of the Debt Collection Act of 1982 (31 U.S.C. 3717).

Cranberry Wilderness Area.—Represents the estimated value of coal deposits and other mineral interests and rights within and contiguous to the Cranberry Wilderness Area in West Virginia and required to be acquired pursuant to section 4 of Public Law 97-466.

An estimated \$14,500 thousand of these monetary credits will be outstanding at the end of 1984 and an estimated \$23,500 thousand at the end of 1985.

The appropriation is derived from receipts from grazing of livestock on public lands, and grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive orders. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i, 1701). In 1985, range improvement funds will be used exclusively for on-the-ground development and project survey and design. Responsibility for maintenance of existing and future improvements has been shifted to livestock operators.

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under sections 209(b), 304(a), 304(b), 305(a), and 504(g) of the Act approved October 21, 1976 (43 U.S.C. 1701), and sections 101 and 203 of Public Law 93-153, to be immediately available until expended []: *Provided, That, pursuant to this Act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, the amounts collected under section 304 of the Act of October 21, 1976, and sections 101 and 203 of Public Law 93-153 and appropriated under this heading shall be sufficient to meet the actual cost, including direct and indirect costs, to the United States, as determined by the Secretary, of the application processing and other activities, including the full cost of preparation of environmental impact statements, required in connection with the application for which such charges are made: Provided*

further, That, pursuant to this Act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, no funds other than those appropriated under this heading, or otherwise available under the provisions of subsection 307(c), may be used to meet the costs determined by the Secretary, in his discretion, to be reasonable under section 304(b) of the Act of October 21, 1976. (43 U.S.C. 1701, 1719, 1734, 1735, and 1764; 30 U.S.C. 185; 87 Stat. 576; 87 Stat. 584; Public Law 98-146, making appropriations for the Department of the Interior and related agencies, 1984.)

1. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

2. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

3. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

4. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

5. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

6. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

7. *Payments to States from grazing receipts, etc., public lands within districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

8. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

9. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191) and from leases of potash deposits (30 U.S.C. 285) on public lands. Start-

ing in 1984, distribution of mineral leasing receipts is the responsibility of the Minerals Management Service (MMS) and amounts appear in that section of the budget.

10. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

11. *Expenses, road maintenance deposits.*—Public Law 94-579, approved October 21, 1976, permanently appropriated certain moneys to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and moneys collected are available for necessary road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only. (43 U.S.C. 1701 et seq.)

12. *Payments to Nevada from receipts on land sales.*—Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada; proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (5%) and the county in which the land is located (10%).

13. *Payments from proceeds, sale of water.*—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229).

The Minerals Management Service supervises exploration for and development and production of oil, gas, and other minerals on the Outer Continental Shelf (OCS) lands; performs assessments to ensure compliance with the National Environmental Policy Act (NEPA); and collects royalties, rentals, and bonuses due to the Federal Government and Indian lessors from minerals produced on Federal and Indian lands.

1. *Outer Continental Shelf (OCS) Lands.*—The program provides for: (1) performance of environmental assessments to insure compliance with the National Environmental Policy Act (NEPA) and oil spill trajectory analyses to support the leasing program; (2) conduct of lease offerings; (3) classification of OCS lands for resource potential for oil, gas, and nonenergy minerals; (4) evaluation of tracts offered for lease by competitive bidding; (5) assurance that the Federal Government re-

ceives fair market value for leased lands; (6) regulation and supervision of mineral prospecting, development, and production operations on the OCS lands; (7) development and maintenance of estimates of OCS oil and gas reserves; and (8) provision of information concerning oil and gas activities to affected State and local governments.

The decrease in 1985 reflects reductions in the acquisition of geological and geophysical data and in the workload associated with data analysis made possible through the use of revised techniques for bid evaluation. Additional reductions reflect ongoing regulatory streamlining. These reductions are partially offset by increased funding for technology assessment activities.

2. *Federal and Indian Lands.*—In 1983 this function and related funding were transferred to the Bureau of Land Management.

3. *Royalty Management.*—The Royalty Management program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses owed the Federal Government from minerals produced on Federal, Indian, and allotted lands. The program includes an automated accounting system which ensures that all royalties are properly collected. The program will also provide comparisons of production reported from leases to sales reports, thereby providing an exception mechanism not previously available. The new Royalty Management fiscal accounting system that was initiated in 1981 will be fully operational in 1984. The production accounting system will begin initial operation in 1984 and continue toward full operation during 1985.

The increases in Royalty Management are proposed to provide funding to States and Indian tribes for cooperative audits, to increase in-house audit capability, and to replace the computer hardware system.

States receive at least 50% of the revenues from mineral leases on public lands, but all of the costs of collecting these revenues are borne by the Federal Government. In 1985, it is proposed that the cost of royalty management activities be deducted from Federal onshore mineral leasing revenues before these revenues are distributed.

4. *General Administration.*—General administrative expenses provide for management, executive direction and coordination, administrative support, Federal building space and general support services.

Alaska is paid 90% (50% from leases in the National Petroleum Reserve—Alaska) and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on both public domain and acquired lands. Costs for collecting these receipts are now borne by the Federal Government. In 1985, it is proposed that the costs of collecting these revenues be shared by all recipients by deducting royalty management costs before these revenues are distributed.

1. *State regulatory program grants.*—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Act. As of September 30, 1983, 25 States with actual or planned coal mining facilities had approved state programs.

2. *Federal regulatory programs.*—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, for the provision of technical assistance to States and for the administration of the Federal coal program in thirteen States without approved permanent enforcement programs.

3. *General administration.*—This activity includes: the Offices of the Director and Assistant Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, and Regulatory and Issues Management; and the Divisions of Planning and Budget, Financial Management, Personnel, and Management Services. Also financed are certain categories of office-wide expenses most readily accommodated in a single budget line item, including office rent, telephones, and postage. The amount requested for this activity represents only that portion of the total General Administration expenses which are attributable to the Regulation and Technology appropriation. The remainder have been requested from the Abandoned Mine Reclamation Fund.

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out the provisions of title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, including the purchase of not more than 21 passenger motor vehicles, of which 15 shall be for replacement only, to remain available until expended, **[\$229,228,000] \$291,701,000** to be derived from receipts of the Abandoned Mine Reclamation Fund: *Provided*, [That pursuant to Public Law 97-365, the Department of the Interior is authorized to utilize up to 20 percent from the recovery of the delinquent debt owed to the United States Government to pay for contracts to collect these debts: *Provided further*,] That of the funds made available to the States to contract for reclamation projects authorized in section 406(a) of Public Law 95-87, administrative expenses may not exceed 15 percent.

[For an additional amount for "Abandoned Mine Reclamation Fund", \$42,000,000, to remain available until expended, to be derived from receipts of the Abandoned Mine Reclamation Fund to provide for the acquisition of private homes and businesses and nonprofit buildings occupied or utilized continuously since September 1, 1983, and the lands on which they are located, excluding all mineral interests, and the relocation of families and individuals residing in the Borough of Centralia and the Village of Byrnesville and on outlying properties who are threatened by the progressive movement of the mine fire currently burning in and around the Borough of Centralia:

Provided, That all acquisitions made by the Commonwealth of Pennsylvania under the authority provided herein shall be at fair market value without regard to mine fire related damages as was properly done by OSM in its prior acquisitions of Centralia properties. These activities must comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601, et seq.), but shall not constitute a major action within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332): *Provided further*, That no funds may be used to pay for the actual construction costs of permanent housing: *Provided further*, That the Federal discretionary share shall not exceed 75 percent of the cost of such acquisition or relocation: *Provided further*, That any funds remaining available following completion of these acquisition and relocation activities may be made available to the Commonwealth of Pennsylvania to undertake other approved reclamation projects pursuant to section 405 of the Surface Mining Control and Reclamation Act of 1977: *Provided further*, That funds made available under this head to the Commonwealth of Pennsylvania shall be accounted against the total Federal and State share funding which is eventually allocated to the Commonwealth.] (30 U.S.C. 1201, 1231-43, 1302; Public Law 98-146, making appropriations for the Department of the Interior and related agencies, 1984; Supplemental Appropriations Act, 1984.)

1. *State reclamation program grants*.—Each State with an approved reclamation program is entitled, subject to appropriation, to receive 50 percent of Abandoned Mine Reclamation Fund revenues derived from operating mines in that State. With grants, States assume primary responsibility for addressing problems such as subsidence, underground fires, open shafts and acid drainage in accordance with priorities set forth in

the SMCRA. It is estimated that the request level will be sufficient; however, it is anticipated that favorable consideration will be given to a supplemental request should States demonstrate a need for and capability to administer additional funds.

2. *Federal reclamation programs.*—This activity includes fee collection and assistance to States in developing reclamation programs as well as abandoned mine lands reclamation projects (including the Rural Abandoned Mine program administered by Soil Conservation Service) undertaken directly by the Office of Surface Mining and other Federal agencies. The program level for 1985 will provide for addressing emergency projects, for conducting the fund management responsibilities and for providing to the States technical assistance on reclamation projects.

3. *Small operator assistance payments.*—This activity provides for payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed mining operation and analysis of test borings or core samplings. It is estimated that unobligated balances from prior year appropriations will be sufficient for 1985.

4. *General administration.*—This activity includes the same items as described for the General Administration activity in the Regulation and Technology appropriations. The funds for this activity represent only that portion of general administration expenses which are attributable to the Abandoned Mine Reclamation Fund.

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, derived from the revenue of the Boulder Canyon project. The 1985 estimates are summarized by source as follows (in thousands of dollars):

¹ The construction program includes \$897 thousand from the State of California for construction on the San Luis unit of the Central Valley Project.

Work in the Construction program is for the purpose of developing and managing water for irrigation, municipal and industrial use, salinity control, dam safety, and flood control in the 17 western states. Funding under this program provides for transfers to the Lower Colorado River Basin Development Fund and Upper Colorado River Basin fund. The Lower Colorado River Basin Development fund provides for the development and construction of the Central Arizona project. The Upper Colorado River Basin fund supports water supplies in the Upper Colorado River Basin area.

In 1985 construction will begin on two projects and will continue on 71 projects. Preconstruction activities will be underway on four projects, and work will begin on one drainage and minor construction project and six new safety of dams projects.

Under the Small Reclamation Projects Act (43 U.S.C. 422a), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided to continue construction on eleven projects for improving existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and purchasing maintenance equipment.

Under the Distribution Systems Loans Act (43 U.S.C. 421a), loans can be made to organizations for the construction of irrigation and municipal or industrial water distribution systems on authorized Federal reclamation projects. Work will continue on three projects in 1985.

This appropriation finances studies of potential projects for the conservation and utilization of water and

related land resources and includes plan formulation investigations, general engineering and research activities, advance planning work, and water research.

1. *Plan formulation investigations.*—These include 42 project investigations, of which nine are new starts and 13 are individual units of the Colorado River Water Quality Improvement Program, and 11 special investigations throughout the 17 Western States to formulate resource development plans for river basins or specific projects.

2. *General engineering and research.*—Studies are directed toward developing new construction materials, better planning tools, and design and construction techniques. Included are studies of atmospheric water resources to increase precipitation by cloud seeding.

3. *Advance planning.*—This program provides for detailed studies of three ongoing and six new projects that are viable for implementation but require additional work toward finalizing a definite plan.

4. *Water research.*—Water research activities formerly conducted by the Office of Water Research and Technology (OWRT) have been transferred to the Bureau of Reclamation. The OWRT was dissolved by Secretarial Order on August 25, 1982.

The general administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's offices in Washington, D.C. and Denver, Colo., and seven regional offices. In 1985, funds for acquisition of equipment to be utilized bureauwide are included within this appropriation. This equipment includes centralized automated data processing hardware and software. The Denver Engineering and Research Center and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund, the Colorado River Dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391), and the Act of December 21, 1928 (43 U.S.C. 617a), and the Act of July 19, 1940 (43 U.S.C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the head "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (*Energy and Water Development Appropriation Act, 1984.*)

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed [17] 16 passenger motor vehicles of which [16] 13 shall be for replacement only; purchase of one additional aircraft; payment of claims for damages to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expenses of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiations and administration of interstate compacts without reimbursement or return under the reclamation laws; for service as authorized by 5 U.S.C. 3109, in total not to exceed \$500,000; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriations Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the [Act] Acts of August 21, 1935 (16 U.S.C. 461-467) and June 27, 1960 (16 U.S.C. 469): *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amount provided for [appraisal and special] plan formulation and advance planning investigations, and general engineering and research under the head "General Investigations".

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United

States pursuant to laws administered by the Bureau of Reclamation.

GEOLOGICAL SURVEY

Federal Funds

General and special funds:

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions, and other areas as authorized by law (43 U.S.C. 31, 1332 and 1340); classify lands as to their mineral character and water [and power] resources; give engineering supervision to power permittees and Federal Energy Regulatory Commission licensees; administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate data relative to the foregoing activities; **[\$367,080,000] \$382,312,000. Provided, That [\$49,113,000] \$50,177,000 shall be available only for cooperation with States or municipalities for water resources investigations: Provided further, That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality: Provided further, That the Geological Survey is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private[: Provided further, That in fiscal year 1984 and thereafter, all receipts from the sale of maps sold or stored by the Geological Survey shall be available for map printing and distribution to supplement funds otherwise available, to remain available until expended]. (43 U.S.C. 31 (a), (b), 50, 1340; Public Law 98-146 making appropriations for the Department of the Interior and related agencies, 1984.)**

The Geological Survey provides basic scientific data and information concerning water, land, and mineral resources.

1. *National mapping, geography, and surveys.*—The national mapping program produces and makes available cartographic and geographic information, multipurpose maps, and various base and special purpose maps, and basic cartographic and geographic data in printed and digital format.

The 1985 level of funding continues to provide digital cartographic data required by 1987 to prepare for the 1990 census.

The decrease shown for 1985 is related to reductions in intermediate, small-scale and other special mapping, modernization of mapping technology, and the Earth Resources Observation System (EROS), cartographic and geographic information services and side looking airborne radar data acquisition.

2. *Geologic and mineral resource surveys and mapping.*—The continuing national program of geologic research and investigations both onshore and offshore produces: (1) improved methods and instruments for mineral and energy resource assessments; (2) geologic, geophysical, and geochemical maps and analyses; (3) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being continually modified; (4) information on geologic hazards such as earthquakes, volcanoes, landslides, and land subsidence, and (5) data and analysis for use by other Federal and State agencies in the management of public lands and in national policy determinations.

The 1985 request provides for a redirection of specific funds within the geologic framework program to be matched by State offerings in the undertaking of cooperative research that will result in the production of geologic maps of the Nation's land mass, offshore areas, and important mining districts.

Decreased funding for 1985 is related to reductions in geologic hazards surveys, land resource surveys, mineral resource surveys, and energy geologic surveys.

3. *Water resources investigations.*—The continuing national program of water resources investigations has the objective of appraising the Nation's water resources and insuring that the water data necessary to develop and manage them efficiently and effectively are available when needed. The program produces data and information on the inability, suitability, and use of water to support decisions on water planning, water management, energy development and enhancement of the quality of the environment.

The 1985 request redirects funds from the Federal coal hydrology program to the cooperative coal hydrology program. Decreased funding in 1985 is proposed in the Federal, cooperative, and energy hydrology programs.

No funds are requested in 1985 for State Water Research and Development Institutes to carry out the provisions of the Water Research and Development Act of 1978 (Public Law 95-467).

4. *Earth sciences applications.*—This budget activity has been deleted and the functions and related resources have been transferred to other activities in this account.

5. *General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support to the Bureau as a whole.

6. *Facilities.*—This activity finances the operation and maintenance costs, facilities management needs, and related special support services necessary for the operation of the national center headquarters complex and major field centers.

Reimbursements from non-Federal sources are from States and municipalities for cooperative mapping, geologic surveys, and water resources investigations; proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from friendly countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for special-purpose mapping, investigations, and computer services performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

Barrow area gas operation exploration and development.—The 1984 program for the operation and maintenance of the South and East Barrow gasfields which provide natural gas to the village of Barrow as well as to other Native communities and Federal installations at or near Point Barrow, Alaska is funded from available unobligated balances. These gasfields will be turned over to a unit of local government by October 1, 1984, assuming necessary legislation is enacted. Unobligated balances from the Exploration of National Petroleum Reserve in Alaska account are proposed for transfer to this account in 1984 to be available for effecting the agreement with the local community to assume responsibility for the gas supply system.

Exploration of the National Petroleum Reserve in Alaska.—The National Petroleum Reserve in Alaska program was designed to continue the Navy's exploration program of the Reserve, to continue supplying natural gas to the native community and Government installations at or near Point Barrow, Alaska, and for environmental restoration of the Reserve. The exploration program has been completed and closeout activities are scheduled for 1984 completion. Unobligated balances from this account are proposed to be transferred in 1984 to the Barrow Gas Operations account in order to assist in funding the agreement to transfer responsibility for the gas supply system to the local community.

1. *Minerals research*—(a) *Health and safety technology*.—This program provides technology that will reduce occupational illnesses, accidents, and disasters associated with mining. Health research addresses instrumentation and control technology to reduce levels of respirable dust, noise, toxic gas products, and radiation found in mine air, and to develop ventilation systems that provide the proper quality and quantity of air flow in underground mines. Safety hazard reduction research investigates and develops means to help control fires and explosions; methane occurrence and migration; industrial hazards, including electrical problems; ground control, including roof support systems; post disaster survival and rescue; and explosives and blasting agents.

(b) *Conservation and development*.—The program investigates mining techniques which improve domestic mineral recovery. Priority research concerns in 1985 are: in investigation of premining conditions, determination of mineralogy and grade of deposits, and the behavior of rock under mining-induced stress; in mineral extraction technology, improvement of shaft design, fragmenting and hauling ore, in situ leaching and borehole mining, and support of backfills; and in conservation of resources, drainage from acid mines, mine subsidence prediction, and mine waste control techniques.

(c) *Minerals and materials research*.—Research is conducted to develop basic information on fundamental scientific and engineering principles of minerals processing that will support and enhance the mineral industry's efforts to improve productivity, increase energy efficiency and be more environmentally acceptable, and also to investigate new or alternative techniques which increase production of strategic, critical, and other essential minerals from low-grade or complex domestic ores.

2. *Minerals information and analysis*—(a) *Minerals information*.—This program provides a reliable data base, including the automated Minerals Information System, for analysis of national minerals problems by collecting, interpreting, and disseminating worldwide information relating to the production, consumption, and availability of nonfuel minerals. The program maintains information on the production and consumption of approximately 100 mineral commodities, and also on the minerals and related industries of about 160 countries.

BUREAU OF MINES—Continued
General and special funds—Continued
MINES AND MINERALS—Continued

(b) *Mineral data analysis.*—In-depth economic, technical, and policy studies that address the worldwide supply and demand for nonfuel minerals are conducted in this program. The Minerals Availability System, a computerized data base system, develops and utilizes methodologies for evaluation of mineral deposits based on quantifiable technical, economic, and social data. The program also includes mineral land assessments on certain Bureau of Land Management (BLM) and U.S. Forest Service lands, carried out jointly with the U.S. Geological Survey.

3. *Mineral institutes.*—As in 1983 and 1984, no funds are requested for this program in 1985 because other sources of public and private support are adequate to meet program objectives.

4. *General administration.*—The general administration program finances executive guidance and administrative services for the Bureau of Mines.

5. *Construction and rehabilitation.*—Construction of the administrative facility at Bruceton, Pa., will be completed in 1985.

Drainage of anthracite mines.—This program was transferred to the Office of Surface Mining in 1982. Program outlays are included in the Abandoned Mine Reclamation Fund account. The additional transfer of \$991,000 in 1983 to the Bureau of Mines' Mines and Minerals account was made pursuant to Public Law 97-257 for the construction of the administrative facility at Bruceton, Pa.

ADMINISTRATIVE PROVISIONS

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private [*Provided*, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts]. The authorized purpose of the Helium Act Amendments of 1960, Public Law 86-777, (50 U.S.C. 167), is to provide for the current and foreseeable future requirements for helium for essential Government activities. The program involves the conservation, production, sale, and distribution of helium and requires significant activities in the following areas:

(a) Acquisition, construction, operation, and management of helium plants, gasfields, helium storage fields, pipelines, and fleets of helium tank cars and semi-trailers.

(b) Searching for and evaluating new sources of helium-bearing natural gas and negotiating contracts for supplies of helium-bearing natural gas.

(c) Establishing reserves of helium.

(d) Experimentation and research to discover new helium supplies and to improve methods of helium production, purification, transportation, liquefaction, storage, and utilization.

Income from helium sales, services, and rentals of containers is estimated to provide the required funding for program cash outlay through 1984.

During 1985, the Bureau of Mines will produce and sell about 250 MMcf of Grade-A helium at its Exell Helium Plant in the Texas panhandle to meet the needs projected by DOD, NASA, DOE, and other helium-using Federal agencies. Approximately 100 MMcf, or 40 percent, will be liquefied for shipment. Additionally, the Bureau is expecting to purify about 100 MMcf of stored helium for redelivery to private industry as a contract service. Thus, the total Grade-A helium output is expected to be about 350 MMcf.

All pure helium production and shipping operations have been consolidated in the Exell-Amarillo area to assure that the Bureau's helium production capacity is adequate to meet Federal agencies' current and projected needs for helium at the lowest practicable costs.

1. *Habitat resources.*—The Service conducts investigations, provides technical and planning assistance, and recommends fish and wildlife conservation measures on land and water resource development projects sponsored, licensed or assisted by the Federal Government. Research is conducted to evaluate long-term effects of environmental contaminants on fish and wildlife resources.

2. *Wildlife resources.*—The Service assists in the enhancement and management of the Nation's wildlife resources to assure that their populations are available for the use and enjoyment of the public. The Service maintains the national wildlife refuge system consisting of 417 units, 149 waterfowl production areas, and 58 wildlife management areas, containing about 89.9 million acres; directs and coordinates national migratory bird programs; enforces Federal game laws and regulations; conducts research to improve wildlife management capabilities; and provides direct and extension assistance in the reduction of wildlife-caused damages.

3. *Fishery resources.*—The Service assists in the development, management, and protection of interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on Service lands.

4. *Endangered species.*—The goal of this program is to prevent species from becoming extinct and, wherever possible, to return them to the point where they are neither endangered nor threatened.

5. *General administration.*—This activity provides overall policy formulation, direction, and administration for all matters related to the effective execution of fish and wildlife programs and operations.

1. *Park management.*—The Service administers 334 park areas comprising about 74.8 million acres of federally owned land located in 49 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam and the Northern Marianas. This activity includes: (1) overall management of park areas necessary to accommodate an estimated 258 million recreational visitors in 1985; (2) maintenance of buildings and other facilities required to accommodate visitor use, as well as to protect the Government's investment; (3) interpretive programs to enhance the visitors' park experience; (4) law enforcement to protect the visitors' well-being and reduce vandalism and other destruction to park resources; and (5) resource management necessary for the protection and preservation of the unique natural, cultural, and historical features in the National Park System.

The following tabulation shows the actual and estimated visits, and general and special fund revenues collected and to be collected by the National Park Service, including recreation fee revenues deposited to the Land and Water Conservation Fund:

Year:	Recreational Visits (in millions)	Revenues (in millions of dollars)
1981 actual	239	23
1982 actual	245	26
1983 estimate	246	31
1984 estimate	252	30
1985 estimate	258	47

2. *Forest fire suppression and presuppression of burned areas.*—This activity provides for the suppression and emergency presuppression of fires on or endangering lands administered by the Service, and for the rehabilitation of burned areas to conserve resources, and for the protection of park visitors.

3. *Park, recreation, and wilderness planning.*—This activity provides for studies, investigation, and planning programs to support and direct the overall development and management of park areas and to protect and manage park water resources.

4. *Statutory and contractual aid.*—The Service provides financial or other assistance in the planning, development, or operation of certain natural, historical, or recreation areas not operated by the National Park Service.

5. *General administration.*—This activity covers administrative support functions in the Washington and regional offices, GSA space rental, executive direction, ADP services, payments to the employees' compensation fund, and unemployment payments for former personnel.

Additional funds are requested to support development of integrated or compatible Department-wide fi-

financial management information systems. Additional receipts are expected as a result of increased franchise fees paid by park concessioners.

This account covers expenditures of funds appropriated in 1981 and prior years for State grants, Federal land acquisition and administrative expenses for the State grant program. In 1983 all appropriated but unexpended balances were transferred to the new appropriation accounts begun in 1982 for these same programs. Proposed legislation would eliminate the earmarking of receipts from recreation fees to the land and water conservation fund.

LAND ACQUISITION [AND STATE ASSISTANCE]*

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park System (16 U.S.C. 6). Beginning in 1984, substantial donations are anticipated for the restoration of the Statue of Liberty and Ellis Island.

2. *Preservation, Birthplace of Abraham Lincoln, National Park Service.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest therefrom is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Ky. (16 U.S.C. 211, 212).

3. *Jefferson National Expansion Memorial, contributions.*—Pursuant to the act of May 17, 1954 (68 Stat. 98-100), as amended, the Secretary of the Interior was authorized to construct upon the Jefferson National Expansion Memorial National Historic Site, St. Louis, Mo., an appropriate national memorial to those persons who made possible the territorial expansion of the United States. Contributions are accepted from the city of St. Louis or other non-Federal sources.

National Park Service, "Operation of the National Park System".....	600	600	600

1. **Education.**—The Bureau of Indian Affairs provides support for the education of Indian children through direct operation of schools, support of tribally operated schools, and financial assistance to public schools serving Indian children.

The Budget assumes transfer of the remaining BIA schools in Alaska to the State as part of the continuing cooperative effort between the Bureau and the State to establish a single system of education. The number of children attending Federal, tribal, and public schools is shown below:

Number of pupils:	1983 actual	1984 estimate	1985 estimate
Federal and tribal schools.....	42,535	43,193	42,982
Public schools.....	170,030	175,000	175,000

The Bureau also assists Indian adults by providing financial assistance to students for higher education studies, by direct support of some tribally operated post-secondary institutions, and by offering continuing education programs in many communities. The number of participants in these programs is indicated in the following table:

Continuing education participants:	1983 actual	1984 estimate	1985 estimate
Higher education scholarships.....	15,058	13,430	13,204
Adult education enrollments.....	12,891	11,325	11,325
Post-Secondary.....	1,701	1,862	1,905
Tribally controlled community colleges.....	3,080	3,829	3,915

2. **Indian services.**—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects, and a new program for small tribes to acquire and maintain needed core-management capability. Also included are activities associated with the Navajo-Hopi settlement.

3. **Economic development and employment program.**—This activity is designed to stimulate reservation economies, and to help Indian people participate fully in those economies.

Business enterprise development is encouraged and assisted through programs of technical and financial aid, with emphasis on enterprises owned and operated by Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans for resource and business enterprise development, housing, public utility facilities, education, and other purposes. Individual Indians are assisted in qualifying for, finding and occupying jobs on and near reservations consistent with their needs, capabilities, and desires. Roads are maintained to provide for the movement of people and goods as needed for the well-being of the community.

4. **Natural resources development.**—This activity is designed to provide for the conservation, development and utilization of Indian land, water, and related resources. Resources are surveyed and inventoried, and agriculture and forestry development is assisted.

5. **Trust responsibilities.**—This activity entails the protection of Indian rights and property, particularly those related to land and natural resources, and the management of assets held in trust for Indian tribes and individuals.

6. *Facilities management.*—This activity provides for the maintenance and operation of Bureau facilities and the provision for GSA owned or leased facilities.

7. *General administration.*—These functions include executive direction, administrative services, safety management, employee compensation payments, construction management, and education program management.

Reimbursable programs are provided primarily for operation, maintenance and repair of federally owned quarters financed by payroll deductions from employees occupying such quarters; programs funded by other Federal agencies; operation of the North Star III shipping operation in Alaska (operated in the Miscellaneous Trust account prior to 1981); reimbursements from States for school lunches for Indian children; and for miscellaneous goods and services provided to others.

The planned distribution of budget authority requested in 1985 as compared to funds for 1983 and 1984 follows, (in thousands of dollars):

Direct program:	1983 actual	1984 estimate	1985 estimate
1. Tribe/agency operations.....	270,212	253,426	258,622
2. Area office operations.....	32,481	28,503	29,092
3. Central office staff operations.....	29,101	26,604	27,481
4. Field program operations.....	622,333	521,240	540,177
Total direct program.....	954,127	829,773	855,372
Reimbursable program (total revenues).....	49,087	52,300	52,300
Total available.....	1,003,214	882,073	907,672

¹ Includes \$53,298 thousand for housing activities and \$50,000 thousand for one-time jobs bill activities.

Tribe/agency operations are primarily programs in which tribes formally participate in setting funding priorities. Tribe/agency programs include law enforcement, economic and natural resources development, and other activities similar to those conducted by a State or local government.

Central and area office staff operations represent funding for program management, executive direction and administrative services.

Field program operations support those national programs, such as education, facilities management, rights protection and welfare, which are the unique responsibility of the Bureau because of its special relationship to Indians and Indian tribes.

This fund, established by the Indian Financing Act of 1974, provides a source of financing for Indians who cannot borrow from other Government credit agencies or from ordinary commercial lenders because of their low economic status, isolated geographic location, lack of bankable security, or other reasons. Loans are made to tribes and other Indian organizations for relending to individual members and groups of members, and to finance tribal business enterprises. Loans are also made to tribes for use by them in obtaining expert assistance to prepare and argue claims pending before the Court of Claims. Direct loans are made for any purpose that will promote the economic development of the borrower, including loans for educational purposes.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

Under the terms of the 1947 Trustee Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior. The United States seeks to terminate the trusteeship and, to accomplish this, has signed a compact of free association with the governments of the Marshalls, Palau, and the Federated States of Micronesia.

Note.—Excludes \$1,000 thousand in 1985 for activities transferred to "Resource Management," U.S. Fish and Wildlife Service. Comparable amounts for 1983 (\$1,000 thousand) and 1984 (\$1,000 thousand) are included above.

1. *Departmental direction.*—The Office of the Secretary provides top departmental direction. The Office for Equal Opportunity administers the Department's responsibilities in equal opportunity programs. Other secretarial offices provide public liaison services, coordination of correspondence, legislation, congressional liaison and minority programs.

2. *Program direction and coordination.*—Six assistant secretaries advise and assist the Secretary on policy matters for promoting the domestic welfare and the conservation and development of the country's resources, Indian affairs, and responsibilities to the territories of the United States, and all phases of Departmental policy, budget and administrative activities.

3. *Policy, budget, and administration.*—This activity provides for implementation of program and budget policy, economic analysis, environmental review, financial management, personnel, administrative services, library and information services, and security operations.

4. *Hearings and appeals.*—Provides the quasi-judicial and appellate responsibilities of the Department of the Interior. Administrative law judges and formal boards of appeals render decisions in cases pertaining to: (a) contract disputes; (b) Indian probate matters; (c) public and acquired lands and their resources; (d) submerged offshore lands of the Outer Continental Shelf; (e) surface mining; (f) personnel grievances; (g) environmental impacts; (h) enforcement of the importation and transportation of rare and endangered species; (i) environmental quality; (j) uniform relocation assistance and real property appeals; and (k) Alaska Native claims appeals.

5. *Aircraft services.*—This activity serves as the aviation policy office for the Department to improve aviation safety and aviation cost effectiveness. This activity is proposed for direct funding in 1985, offset by reductions in the Working Capital Fund.

6. *Central services.*—This activity provides for general administrative expenses including space, postage, FTS, employee workmen's compensation and unemployment compensation payments, etc., for the offices financed by this appropriation.

7. *Alaska subsistence grant.*—This activity is included in the Fish and Wildlife Service, "Resource Management" account in 1985.

Budget savings will be realized in 1985 by implementing Department-wide management initiatives, including utilization of commercial travel services.

Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior and for the emergency rehabilitation of burned-over lands under its jurisdiction and for emergency actions related to potential or actual earthquakes or volcanoes, and for emergency reclamation projects under section 410 of Public Law 95-87, and shall transfer, from any no year funds available, to the Office of Surface Mining such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act, such funds to be replenished by a supplemental appropriation which must be requested as promptly as possible: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That no appropriations made in this title shall be available for acquisition of automatic data processing equipment, software, or services in excess of \$1,000,000 systems life cost, without prior approval of the Secretary.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 1535 and 1536 of title 31, U.S.C.: *Provided*, That reimbursements for costs and supplies, materials, equipment and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; [with not more than \$15,000 to be paid to any one company or individual;] hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

[SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N816 and the row of blocks numbered N817 of the Universal Transverse Mercator Grid System.]

[SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the preparation for, or conduct of, pre-leasing and leasing activities (including but not limited to: calls for information, tract selection, notices of sale, receipt of bids and award of leases) of lands within:

(a) An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), located in the Atlantic Ocean, bounded by the following line: from the intersection of the seaward limit of the Commonwealth of Massachusetts territorial sea and the 71 degree west longitude line south along that longitude line to its intersection with the line which passes between blocks 598 and 642 on Outer Continental Shelf protraction diagram NK 19-10; then along that line in an easterly direction to its intersection with the line between blocks 600 and 601 of protraction diagram NK 19-11; then in a northerly direction along that line to the intersection with the 60 meter isobath between blocks 204 and 205 of protraction diagram NK 19-11; then along the 60 meter isobath, starting in a roughly southeasterly direction; then turning roughly northeast, north, and west until such isobath intersects with the northern boundary of block 974 of protraction diagram NK 19-6; then along the line that lies between blocks 930 and 974 of protraction diagram NK 19-6 in a westerly direction to the first point of intersection with the seaward limit of the Commonwealth of Massachusetts territorial sea; then southwesterly along the seaward limit of the territorial sea to the point of beginning at the intersection of the seaward limit of the territorial sea and the 71 degrees west longitude line.

(b) The following blocks are excluded from the described area: In protraction diagram NK 19-10, blocks numbered 474 through 478, 516 through 524, 560 through 568, and 604 through 612; in protraction diagram NK 19-6, blocks numbered 969 through 971; in protraction diagram NK 19-5, blocks numbered 1005 through 1008; and in protraction diagram NK 19-8, blocks numbered 37 through 40, 80 through 84, 124 through 127, and 168 through 169.

(c) The following blocks are included in the described area: In protraction diagram NK 19-11, blocks numbered 633 through 644, 677 through 686, 721 through 724, 765 through 767, 809 through 810, and 853; in protraction diagram NK 19-9, blocks numbered 106, 150, 194, 238, 239, and 283; and in protraction diagram NK 19-6, blocks numbered 854, 899, 929, 943, 944, and 987.

(d) Blocks in and at the head of submarine canyons: An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (45 U.S.C. 1331(a)), located in the Atlantic Ocean off the coastline of the Commonwealth of Massachusetts, lying at the head of, or within the submarine canyons known as Atlantis Canyon, Veatch Canyon, Hydrographer Canyon, Welker Canyon, Oceanographer Canyon, Gilbert Canyon, Lydonia Canyon, Alvin Canyon, Powell Canyon, Munson Canyon, and Corsair Canyon, and consisting of the following blocks, respectively:

(1) On Outer Continental Shelf protraction diagram NJ 19-1; blocks 36, 37, 38, 42-44, 80-82, 86-88, 124, 125, 130-132, 168, 169, 174-176, 212, 213.

(2) On Outer Continental Shelf protraction diagram NJ 19-2; blocks 8, 9, 17-19, 51-52, 53, 54, 61-63, 95-98, 139, 140.

(3) On Outer Continental Shelf protraction diagram NK 19-10; blocks 916, 917, 921, 922, 960, 961, 965, 966, 1003-1005, 1009-1011.

(4) On Outer Continental Shelf protraction diagram NK 19-11; blocks 521, 52, 565, 566, 609, 610, 653-655, 697-700, 734, 735, 741-744, 769, 778-781, 785-788, 813, 814, 822-826, 829-831, 857, 858, 866-869, 873-875, 901, 902, 910-913, 917, 945-947, 955, 956, 979, 980, 989-991, 999.

(5) On Outer Continental Shelf protraction diagram NK 19-12; blocks 155, 156, 198, 199, 280-282, 324-326, 369-371, 401, 413-416, 442-446, 450, 451, 489-490, 494, 495, 530, 531, 533-540, 574, 575, 577-583, 618, 619, 621-623, 626, 627, 662, 663, 665-667, 671, 672, 706, 707, 710, 711, 750, 751, 754, 755, 794, 795, 798, 799.

(6) On Outer Continental Shelf protraction diagram NK 19-9; blocks 559-561, 603-607, 647-651, 693-695, 737-739.

(7) On Outer Continental Shelf protraction diagram NK 20-7; blocks 706, 750, 662, 618, 574.

(e) Nothing in this section shall prohibit the lease of that portion of any blocks described in subsection (d) above which lies outside the geographical boundaries of the submarine canyons and submarine canyon heads described in subsection (d) above: *Provided*, That for purposes of this subsection, the geographical boundaries of the submarine canyons and submarine canyon heads shall be those recognized by the National Oceanographic and Atmospheric Administration, Department of Commerce on the date of enactment of this Act.

(f) Nothing in this section shall prohibit the Secretary of the Interior from granting contracts for scientific study, the results of which could be used in making future leasing decisions in the planning area and in preparing environmental impact statements as required by the National Environmental Policy Act.

(g) References made to blocks, protraction diagrams and isobaths are to such blocks, protraction diagrams, and isobaths as they appear on the map entitled Outer Continental Shelf of the North Atlantic from 39° to 45° North Latitude, (Map No. MMS-10), prepared by the United States Department of the Interior, Minerals Management Service, Atlantic OCS Region.]

[SEC. 109. No funds provided in this title may be expended by the Department of the Interior for the leasing of the following areas located in the Eastern Gulf of Mexico Outer Continental Shelf:

(a) Blocks in an area commonly known as the seagrass beds included in Official Protraction Diagram NH 16-9, Apalachicola: 35, 36, 79-81, 122-125, 165-169, 209-213; Official Protraction Diagram NH 17-7, Gainesville: 1, 2, 45-47, 89-93, 133-138, 177-183, 225-227, 270-272, 315-317, 360-362, 404-406, 449-450, 493-495, 539, 583-585, 628-630, 672-675, 716-719, 760-764, 804-808, 850-853, 894-897, 938-941, 984-987; and Official Protraction Diagram 17-10, Tarpon Springs: 17-23, 61-67, 106-111, 150-155, 194-199, 239-244, 283-288, 328-332, 372-377, 416-421, 460-464, 505-508, 549-552, 593-596, 637-640, and 682;

(b) Blocks in an area commonly known as the Florida Middle Ground included in Official Protraction Diagram NH 16-12, Florida Middle Ground: 251, 295, 339-340, 342, 383-386, 427-430, 471-474, 515-518, and 560-561;

(c) Blocks in an area within the 20-meter isobath south of 26° N. latitude included in Official Protraction Diagram NG 17-7, Pulley Ridge: 37-43, 82-87, 126-131, 171-175, 215-219, 259-263, 303-307, 347-351, 392-395, 436-439, 480-483, 524-527, 568-571, 612-615, 656-659, 700-703, 744-747, 788-791, 833-835, 877-879, 921-923, 965-967, 1009-1011;

(d) All submerged lands within 30-nautical miles of the baseline from which the territorial sea is measured: *Provided*, That the western boundary of the area is a line extending south from the line dividing blocks 404 and 405 in Official Protraction Diagram NH 16-9, Apalachicola to a point 30-nautical miles from the baseline from which the territorial sea is measured. In addition, from the boundary between blocks 404 and 405 as described in the preceding sentence, westerly to a line extending north and south dividing blocks 38 and 1 in Official Protraction Diagram NH 16-9, all submerged lands within 20-nautical miles of the baseline from which the territorial sea is measured. The limitation with regard to this subsection on the use of funds shall not apply if any State-owned tide or submerged lands within the area described in this subsection are now or are hereafter subject to sale or lease for the extraction of oil or gas from such State lands; and

(e) For those tracts offered for lease in Sale #79 which are located south of 26° N. latitude, the following lease stipulations shall apply:

(1) No exploratory drilling activities will be approved by the Department of the Interior until the Department of the Interior has accumulated 3 years worth of physical oceanographic and biological resource data; and

(2) Lessees will be required to perform biological surveys prior to approval and initiation of exploration or drilling operations and to work in cooperation with the Department of the Interior on the monitoring of any subsequent drilling activities.]

SEC. [110] 107. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.

SEC. [111] 108. Notwithstanding any other provision of law, appropriations in this title shall be available to provide insurance on official motor vehicles, aircraft, and boats operated by the Department of the Interior in Canada and Mexico.

[SEC. 112. None of the funds in this Act shall be expended for the sale or lease of coal on public lands, except for emergency leasing as defined in 43 CFR 3425.1-4, lease modifications as defined in 43 CFR 3432, and lease exchanges as defined in 43 CFR 3435 or as specified in Public Law 96-401, until the Commission on Fair Market Value Policy for Federal Coal Leasing has submitted its report to the Con-

gress and ninety days have subsequently elapsed: *Provided*, That notwithstanding any other provision of this section, the following Federal coal maintenance tracts may be leased: the Paonia D Coal Bed Tract (not to exceed 5,000 acres), and the Colstrip Acre C and Colstrip Maintenance Tract (not to exceed an aggregate total of 1,721 acres): *Provided further*, That the Paonia Tract may not be leased prior to February 1984, and the Colstrip tracts may not be leased prior to August 1984.]

[SEC. 113. No funds provided in this title may be expended by the Department of the Interior for the lease sale of tracts in Lease Sale numbered 80 within the following areas:

(1) an area of the Department of the Interior Southern California Planning Area bounded by the following line on the California (Lambert) Plane Coordinate System: From the point of intersection of the international boundary line between the United States and Mexico and the seaward boundary of the California State Tidelands west along said international boundary line to the point of intersection with the line between the row of blocks numbered 28 west and the row of blocks numbered 27 west; thence north to the northeast corner of block 20 north, 28 west; thence northwest to the southwest corner of block 29 north, 35 west; thence north along the line between the row of blocks numbered 36 west and the row of blocks numbered 35 west to its intersection with the seaward boundary of the California State Tidelands; thence easterly along the seaward boundary of the California State Tidelands to the point of beginning;

(2) a portion of the Department of the Interior Southern California Planning Area which lies both: (a) east of the line between the row of blocks numbered 53 west and the row of blocks numbered 52 west, and (b) north of the line between the row of blocks numbered 34 north and the row of blocks numbered 35 north, on the California (Lambert) Plane Coordinate System;

(3) the boundaries of the Channel Island National Marine Sanctuary, as defined by title 15, part 935.3 of the Code of Federal Regulations; and

(4) the boundaries of the Santa Barbara Channel Ecological Preserve and Buffer Zone, as defined by the Department of the Interior, Bureau of Land Management Public Land Order numbered 4587 (vol. 34, page 5655 Federal Register March 26, 1969).

This section shall not affect the authority of the Secretary of the Interior to approve any plan, or to grant any license or permit, which is restricted to scientific exploration or other scientific activities, or other preleasing activities necessary up to the point of sale.]

[SEC. 114. Notwithstanding the matching grant requirements of the provisions of section 6(f) of the Land and Water Conservation Fund Act, 16 U.S.C. 4601-8(f), funds appropriated to or expended by the Teton Disaster Relief Organization, are available for projects funded and authorized under the Land and Water Conservation Fund grant program.]

[SEC. 115. Notwithstanding section 507(b)(14) of the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87), cross-sections, maps or plans of land to be affected by an application for a surface mining and reclamation permit shall be prepared by or under the direction of a qualified registered professional engineer or geologist, or qualified registered professional land surveyor in any State which authorized land surveyors to prepare and certify such maps or plans.]

SEC. 109. Appropriations made to the Department of the Interior in this title shall be available to enter into contracts with any person or organization for collection services to recover indebtedness owed the United States, and to pay for the reasonable cost of such collection services from amounts collected. (Public Law 98-146, making appropriations for the Department of the Interior and related agencies, 1984.)

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 202. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 203. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency, or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 204. Appropriations in this title shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 205. The cost of foundation treatment, drainage, and instrumentation work planned or under way at Twin Buttes Dam, Texas, shall be nonreimbursable under Federal reclamation laws. (*Energy and Water Development Appropriation Act, 1984.*)

TITLE III—GENERAL PROVISIONS

[SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.]

SEC. [302] 301. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

[SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.]

SEC. [304] 302. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. [305] 303. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.

SEC. [306] 304. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [307] 305. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. [308] 306. Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312, and except for land in the State of Alaska, and lands in the national forest system or *public lands* released to management for any use the Secretary of Agriculture or the Secretary of the Interior deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in

effect or hereinafter enacted, and except to carry out the obligations and responsibilities of the Secretary of the Interior under section 17(k)(1) (A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226), none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further*, That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of [national forest or public land wilderness areas, or any lands designated by Congress as wilderness study areas,] any Federal lands within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety Sixth Congress (House Document numbered 96-119), or within any wilderness study areas designated by Congress or within any Bureau of Land Management wilderness study areas, that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. [Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or other nonsurface disturbing methods.] *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of any Federal lands within any component of the National Wilderness Preservation System which is closed by law to leasing where the oil or gas resources underlying such lands are being

drained through oil or gas wells on adjacent lands: Provided further, That any oil and gas leases issued for such lands adjacent to producing oil and gas fields, or to areas prospectively valuable or for such lands subject to drainage, shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or by other nonsurface disturbing methods.

SEC. [309] 307. None of the funds provided in this Act shall be used to evaluate, consider, process or award oil, gas or geothermal leases on Federal lands in the Mount Baker-Snoqualmie National Forest, State of Washington, within the hydrographic boundaries of the Cedar River municipal watershed upstream of river mile 21.6, the Green River municipal watershed upstream of river mile 61.0, the North Fork of the Tolt River proposed municipal watershed upstream of river mile 11.7 and the South Fork Tolt River municipal watershed upstream of river mile 8.4.

[SEC. 310. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless such assessments and the basis therefor are presented to the Committees on Appropriations and are approved by such committees.]

[SEC. 311. Employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment except as provided by law.]

[SEC. 312. Funds provided for land acquisition in this Act may not be used to acquire lands for more than the approved appraised value (as addressed in section 301(3) of Public Law 91-646) except for condemnations and declarations of taking, without the written approval of the Committees on Appropriations.]

SEC. [313] 308. Notwithstanding any other provisions of law, the Secretary of the Smithsonian Institution, the Secretary of the Interior and Secretary of Agriculture are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the presuppression, detection, and suppression of fires on any units within their jurisdiction. In addition, any contracts or agreements with the jurisdiction for fire management services listed above which are previously executed shall remain valid.

[SEC. 314. Except as expressly provided for by law, none of the funds appropriated by this Act shall be obligated to dispose, except by exchange, of any Federal land tract until such time as the agency responsible for administering the disposal of the tract has specifically identified the tract as no longer being needed by the Federal Government; inventoried the tract as to its public benefit values; provided opportunity for public review and discussion of the tract proposed for disposal; and provided 30 days advance notice of the tract proposed for disposal and of the plans for carrying out such disposal to the congressional delegation of the State or States in which the tract proposed for sale is located and to the appropriate congressional committees for immediate printing in the Congressional Record: *Provided*, That neither the Act of July 31, 1958, as amended (72 Stat. 438, as amended; 7 U.S.C. 1012a; 16 U.S.C. 478a) nor the Act of June 14, 1926, as amended (49 U.S.C. 869 et seq.) shall be subject to the provisions of this section.]

[SEC. 315. No part of any appropriation contained in, or funds made available by this Act, shall be available for any agency to pay to the Administrator of the General Services Administration a rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) which is in excess of 14 per centum higher than the rate per square foot established for space and services by the General Services Administration for the fiscal year 1982.]

SEC. [316] 309. The Congress finds that the Forest Service's proposal of March 15, 1983, to consider six million acres of the national forest for possible sale has met with considerable opposition; and the national forests are an important part of the national heritage of the United States; and the national forests provide and protect important resources; and the national forests provide unique opportunities for recreation; and it is inconsistent with past management practices to dispose of large portions of our national forests. It is, therefore, the sense of the Congress that it is not in the national interest to grant the authority to sell significant acreage of the national forest until such time as the Forest Service specifically identifies the tracts which are no longer needed by the Federal Government; inventories the tracts as to their public benefit value; provides opportunities for public review and discussion of the tracts; and completes all necessary environmental assessments of such sales.

[SEC. 317. Notwithstanding any other provision of law, the Secretary of the Interior is authorized and shall seek to acquire the private

lands described in section 505(a) of the Act of November 10, 1978 (92 Stat. 3467), by crediting a surplus property account, to be established in the name of each landowner, in the amount of the acquisition price for such landowner's lands. The National Park Service shall update the existing appraisals for the parcels and, based on the approved appraised values, shall negotiate with the landowners for acquisition prices. Each owner may, using such credits in his surplus property account, bid, as any other bidder for surplus property, wherever located, in accordance with the Federal Property and Administrative Services Act of 1949. The Administrator of the General Services Administration shall establish each landowner's surplus property account and shall adjust the credits in such accounts to reflect successful bids under this section. Title to the lands described in this section shall pass to the Government at the time of establishment of the surplus property accounts. The credits in any of the surplus property accounts may be transferred or sold in whole or in part at any time by the landowner to any other party, thereby vesting such party with all the rights of the landowner, and after such transfer, the landowner shall notify the Administrator of the transfer. At any time the Secretary may purchase the balance of any surplus property account subject to the availability of appropriated funds.】

【SEC. 318. Notwithstanding any other provision of law, the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") is hereby authorized to convey to Mitchell School District in Scotts Bluff County, Nebraska, all right, title, and interest, except as provided herein, to a tract of land consisting of 20 acres, more or less, more particularly described as the west half southwest quarter northwest quarter section 17, township 23 north, range 55 west, sixth principal meridian. Conveyance of such rights, title, and interest shall be upon the condition that the Mitchell School District shall simultaneously convey without cost, an easement right on certain of the above-described lands to the Pathfinder Irrigation District for the purpose of operating and maintaining irrigation canals, laterals, or drains-related storage works of the North Platte project, a Federal reclamation project. The Mitchell School District shall pay the fair market value of the lands as of the date of the conveyance, including administrative costs, as determined by the Secretary. In determining the fair market value of the lands, the Secretary shall recognize the existence of the easement right to be granted to the Pathfinder Irrigation District and shall not include the value of any improvements made on or to the lands by the Mitchell School District or its predecessors. Withdrawals from the public domain as they pertain only to the lands described in this paragraph under Secretarial Orders of February 11, 1903, and July 24, 1917, for purposes of the North Platte

project, are revoked by conveyance of the rights, title, and interests as set forth in this paragraph.】

【SEC. 319. Section 3 of Public Law 96-315 is hereby amended by adding the following new subsection:

"(f) Up to 15 additional permits shall be granted to those persons meeting any one of the following conditions:

(1) A resident as of July 1, 1982, who held a valid Fish and Wildlife Service access permit for improved property owners at any time during the period from July 29, 1976, through December 31, 1979.

(2) Anyone in continuous residency since 1976 residing in the area bounded on the north by the refuge boundary and on the south by a straight line passing through a point on the east-west prolongation of the centerline of Albacore Street, Whaleshead Club Subdivision, Currituck County, North Carolina.

(3) Any permanent full-time resident as of April 1, 1983, not otherwise eligible who can substantiate to the Secretary of the Interior that access is essential to their maintaining a livelihood."】

【Funds available to the Department of the Interior and the Forest Service in fiscal year 1984 for the purpose of contracting for services that require the utilization of privately owned aircraft for the carriage of cargo or freight shall be used only to contract for aircraft that are certified as airworthy by the Administrator of the Federal Aviation Administration as standard category aircraft under 14 CFR 21.183 unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services.】

【Subsection (d) of section 109 of the Act entitled "An Act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes" (Public Law 98-146), is amended by striking out "The limitation with regard to this subsection on the use of funds shall not apply if any State-owned tide or submerged lands within the area described in this subsection are now or hereafter subject to sale or lease for the extraction of oil or gas from such State lands; and" and insert in lieu thereof "The limitation with regard to this subsection on the use of funds shall not apply to submerged lands within 30-nautical miles off any Florida land mass located south of 25 degrees north latitude; and".】 (*Public Law 98-146, making appropriations for the Department of the Interior and related agencies, 1984; Supplemental Appropriations Act, 1984.*)

1. *Program direction and policy coordination.*—The Attorney General, aided by the Deputy Attorney General, Associate Attorney General, and other Department policy-level officials directs and supervises the programs

and activities of the Department. Increased resources for 1985 will enable the Department to begin automation efforts to improve the administrative and financial systems through the redesign, upgrade, and integration of JMD automated systems.

2. *Administrative review and appeals.*—This activity includes the Office of the Pardon Attorney and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives and reviews all petitions for clemency. The Executive Office for Immigration Review contains the Immigration Judge function formerly in the Immigration and Naturalization Service and the Board of Immigration Appeals. This new office was established January 1, 1983 to improve the immigration hearing and appeal process. The requested increases will allow EOIR to augment its ADP system and to address a portion of its workload increase. Workload for the activity follows:

3. *Federal justice research program.*—This program supports applied research projects on broad systemic issues affecting the total Federal civil and criminal justice system.

4. *State and local drug grants.*—This is a program to aid State and local law enforcement agencies in the exchange of intelligence information. No funding is requested for 1985 because these activities are a State and local responsibility.

5. *Organized crime drug enforcement.*—This program is composed of the Governors Project and the annual report. The Governors Project is an effort to enlist the aid of the Nation's Governors in achieving the overall goal of reforming State and local criminal justice systems while the annual report details statistical data collected on Task Force cases.

The Working capital fund, established January 2, 1975 (28 U.S.C. 527), finances on a reimbursable basis those administrative services which can be performed more efficiently on a centralized basis at the Department level. For 1985, the Department proposes to establish a national telecommunications network for data transmission. This network will improve data transmission while reducing the impact of anticipated telecommunications cost increases.

The United States Parole Commission makes decisions to grant or deny parole to Federal prisoners serving sentences of one year or more, sets conditions of parole, supervises parolees and mandatory releasees, re-commits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976. A major Parole Commission program is the establishment and application of guidelines and rules for parole decisionmaking so that the duration of terms of imprisonment throughout the Federal system will be equitable.

In 1985, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the Commission conducts ongoing research programs, and administers its responsibilities under the labor and pension laws.

Enforcement of antitrust, and kindred laws.—This division administers and enforces the antitrust and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act, which prohibits combinations and conspiracies among competitors to set prices collusively or otherwise to restrain trade; (2) section 2 of the Sherman Act, which prohibits combinations and attempts to monopolize interstate trade; (3) section 7 of the Clayton Act, which prohibits corporate mergers and acquisitions that tend to lessen competition substantially or tend to monopolize; and (4) various statutory provisions that require regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts and the maintenance of competitive conditions.

The Government is represented in each of the 94 judicial districts by a U.S. attorney and a U.S. marshal.

1. *U.S. attorneys.*—The U.S. attorneys are responsible for the prosecution of criminal offenses against the United States, the representation of the Government in civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The 1985 estimates provide for a vigorous criminal prosecution program aimed at stopping illegal drug trafficking.

2. *Bankruptcy matters.*—The estimates reflect the administration's proposal to discontinue the pilot U.S. trustees program at the end of 1984 unless specific action is taken by Congress to continue it. The Department's recommendations on bankruptcy matters are contained in a report due to Congress in January, 1984.

3. *U.S. marshals.*—The U.S. marshals have custody of all unsentenced Federal offenders until released by the courts or confined in prison. They also act as agents of the courts in the service of process and execution of warrants, and provide protective services to the courts and to key Government witnesses. The 1985 estimates include additional resources, in part, for FIST operations, expenses related to prisoner transportation, and U.S. Marshal training. New initiatives, in part, include a Threat Analysis Group in the Witness Security program and a fugitive unit in INTERPOL-U.S. National Central Bureau.

Reimbursable program.—Federal funds in 1985 are derived primarily from the U.S. Air Force for ICB missile transportation security services provided by the United States Marshals Service, the Bureau of Prisons for the transportation of prisoners, and the Department of State for security details at the United Nations. Non-Federal funds are derived from State and local agencies

1. *Care of U.S. prisoners in non-Federal institutions.*—Under this program, the U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Approximately 76,500 prisoners will be boarded in approximately 750 jails at an average cost of \$47.05 per offender day in 1985.

2. *Cooperative agreement program.*—Agreements are negotiated with State and local governments for renovating, constructing, and equipping facilities that detain Federal prisoners.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice exercises little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

1. *Fact witnesses.*—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

2. *Protection of witnesses.*—The U.S. Marshals Service is responsible for the protection of witnesses and their dependents; subsistence costs of protected witnesses and their families are paid from this fund. This program is designed to assure the safety of Government witnesses whose testimony on behalf of the Government places them or their families in jeopardy.

3. *Expert witnesses.*—Provides for the payment of fees and expenses associated with the preparation and presentation of testimony by technical and scientific experts in legal proceedings involving the United States.

4. *Mental competency examinations.*—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States. Reports and court testimony relating to the examinations are included in these fees.

Reimbursable program.—Non-federal funds are derived by reimbursement from State and localities to cover the costs, in whole or in part, of maintaining those State or local organized crime witnesses and their families who have been accepted into the witness protection program.

1. *Prevention and conciliation of community disputes.*—The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices based on race, color, or national origin which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1985 request will provide CRS with resources to continue to focus on racial disputes in the areas of law enforcement, immigration, corrections, education, employment, housing, community development, and Indian rights, among others. In 1985, CRS also anticipates continuing response to conflicts involving Indo-Chinese refugees as well as the Ku Klux Klan. CRS will continue to monitor and will help communities to forestall threats of urban civil disorder.

2. *Reception, processing and care of Cubans and Haitians.*—This activity will be administered by the Community Relations Service and provides for the reception of Cuban and Haitian entrants; their transportation to initial holding centers; and processing and care while they undergo medical and security screening and await resettlement or deportation.

Comparable amounts for 1983 (\$93,502 thousand) and 1984 (\$86,183 thousand) are included above.

This program includes a coordinated interagency task force enforcement effort to combat organized crime and drug trafficking, as well as a special Presidential commission and a project to enlist the 50 State governors in a united campaign against the drug trade. The administration has created 12 new regional task forces (in addition to the South Florida Task Force) that will cover most of the United States. Another task force will be created in 1985. The Organized Crime Drug Enforcement (OCDE) program was originally funded as a separate appropriation within the Department of Justice. This was done to ensure central control of the program and to provide some initial flexibility in the assignment of related resources. With the necessary mechanisms of control now established, the OCDE program will be funded by direct appropriations to the participating agencies in 1985. Direct funding is shown in the respective budgets of the Federal Bureau of Investigation, the Drug Enforcement Administration, the United States Marshals, and the U.S. Attorneys. The Presidential Commission on Organized Crime will receive a separate appropriation within the Department of Justice.

5. *Presidential Commission on Organized Crime.*— This commission was established by Executive Order 12435 and is composed of 20 Presidential appointees. It is responsible for conducting a national and region-by-region analysis of organized crime, evaluating existing

law enforcement efforts and making recommendations for new legislation.

Note.—Includes \$35,440 thousand in 1985 for activities previously financed from Department of Justice, Interagency Law Enforcement, Organized crime drug enforcement. Comparable amounts for 1983 (\$50,839 thousand) and 1984 (\$34,863 thousand) are excluded above.

As the chief investigative arm of the Department of Justice, the mission of the Federal Bureau of Investigation (FBI) is a multifaceted one, requiring the investigation of violations of over 200 categories of Federal statutes.

The overall objectives of the FBI are to have a significant impact toward reducing criminal activity, to investigate civil matters in which the Federal Government has an interest, and to provide information to the executive branch relating to national security.

These objectives result in the FBI's being actively involved in a wide range of investigations, including traditional law enforcement investigations (bank robbery, kidnaping, fugitive, bank embezzlement, etc.), in-

vestigations involving more modern phenomena (organized crime, white-collar crime, civil rights violations, antitrust violations, etc.), and investigations of hostile intelligence activities within the United States. In addition, on January 28, 1982, the Attorney General ordered that the Drug Enforcement Administration (DEA) report to the Director of the FBI and that the FBI be given concurrent jurisdiction with DEA over Federal drug violations.

Substantial increases are requested in 1985 that will enable the FBI not only to address these expanding responsibilities, but also to properly equip its agent workforce.

The activities through which the mission is accomplished and workload data are as follows:

1. *Criminal, security, and other investigations.*—This activity includes all field investigations of the Federal Bureau of Investigation. These investigations are conducted by FBI Special Agents in 59 field offices and more than 416 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar crime, organized crime, terrorism and foreign counterintelligence. A major enhancement to the Organized Crime program is planned in 1985. In addition, the FBI, in 1985, will expand its role in the Organized Crime Drug Enforcement (OCDE) program by participating in a new OCDE task force in Florida. Other investigative areas are civil rights, fugitive, general government crimes, personal crimes, civil and general property crimes, applicant and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as preemployment background inquiries and name checks.

This activity also includes resources devoted to national program supervision, coordination, and management of FBI investigations.

Arrests.....	11,087	11,310	11,404
Convictions.....	7,237	7,540	7,603

2. *Investigative support.*—Investigative support consists of training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment. Major capital investments are planned to upgrade the FBI's inventory of investigative equipment and to continue the implementation of its long-range ADP plan. For example, a funding increase of approximately \$28 million is requested for critical equipment, research and the construction of a new building at the FBI Academy to house FBI engineering and technical research facilities. Regarding ADP-related investments, an increase of \$33 million is planned which will improve the management of case information, agent time and other investigative resources, primarily through the continued implementation of the Field Office Information Management System.

3. *State and local assistance.*—The FBI supports State and local law enforcement by providing training, laboratory, identification, and informational services. Emphasis is being placed on the training of State and local police instructors to enable their agencies to become more self-sufficient and, thereby, allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations within the United States but most courses are conducted at the FBI National Academy in Quantico, Va.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal justice information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over six million records relating to wanted and missing persons, stolen property, and criminal histories. For 1985, \$2 million is planned for upgrading the design of the NCIC system. The UCR program collects data from more than 13,000 law enforcement agencies and provides this information to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1985, approximately 6.9 million fingerprint cards will be processed. Processing of noncriminal fingerprint checks for State and local agencies and banking institutions is on a reimbursable basis.

Note.—Includes \$33,955 thousand in 1985 for activities previously financed from Department of Justice, Interagency Law Enforcement, Organized Crime Drug Enforcement. Comparable amounts for 1983 (\$26,357 thousand) and 1984 (\$33,501 thousand) are excluded above.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. At the Federal level, DEA is the lead drug law enforcement agency. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities; and enforcement coordination and intelligence-gathering activities with foreign government agencies.

Cooperation among Federal law enforcement agencies is extensive, especially within the 12 Organized Crime Drug Enforcement (OCDE) task forces. Because of the success of these task forces, an additional one will be established in Florida. DEA's involvement is integral to this nationwide coordinated enforcement strategy. When coupled with the expansion of DEA/FBI cooperative efforts, overall drug enforcement capabilities will be significantly strengthened in 1985.

Program changes totaling \$6,249,000 are proposed to provide necessary funding for anticipated cost recoveries associated with the establishment of an additional drug task force and to strengthen the Foreign Cooperative Investigations program, the Diversion Control program, the Intelligence program, and the ADP and Telecommunications program.

The means by which DEA performs its mission are summarized by the following activities;

1. *Enforcement of Federal law and investigations—(a) Domestic enforcement.*—This activity aims to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs. The

measures below indicate the level of activity performed by this program.

Reimbursable program.—A reimbursable program providing primarily for the training of foreign drug law enforcement officials is conducted by DEA and funded by the Department of State. Schools are held each year, both in the United States and host countries. During 1983 and 1984, the Organized Crime Drug Enforcement program operated through reimbursable funding. In 1985, DEA will be provided with direct funding to continue its participation in this program.

Note.—Excludes \$26,557 thousand in 1984 for activities transferred to Department of Justice, Legal Services, Community relations service. The comparable amount for 1983 (\$27,377 thousand) is included above.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

1. *Enforcement.*—This activity contains most of the resources dedicated to both preventing illegal entry into the United States and facilitating the entry of qualified persons. This includes inspection of applicants for admission, patrol of the border, and the location of undocumented aliens who are in the United States following illegal entry or violation of status after legal entry. Apprehensions are made through inspection of farms and ranches by investigation of information about the location of undocumented aliens and through investigative case work. (A new case management system, instituted in 1983, will change the method of counting and tracking cases.) Also included are the resources for the Service's nationwide anti-smuggling program, as well as the processing of undocumented aliens who have been located. Also included in this activity is the prompt removal of those aliens.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

4. *Program direction.*—This activity provides resources for the overall administration and management of the Service. Savings will be achieved in this program activity through a realignment of the roles and responsibilities of personnel in the central and regional offices.

5. *Reception/processing/care.*—This activity provides for the reception of Cuban and Haitian entrants; their transportation to initial holding centers; and processing and care while they undergo medical and security screening and await resettlement or deportation. Also included are funds for medical services and care for the entrants, both within the centers and in the community for those who are resettled. This activity was transferred to the Community Relations Service in 1984.

This appropriation will provide for the custody and care of an average of 31,533 offenders and for the maintenance and operation of 45 penal institutions, 5 regional offices and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other units for short periods of time. An average of 4,032 sentenced prisoners will be in contract facilities in 1985.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced for Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

1. *Inmate care and custody.*—This activity covers the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Resources and Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of confining sentenced Federal offenders in contract State and local facilities. In 1985, resources are requested to activate a 500-bed Federal Correctional Institution in Phoenix, Arizona; to advance purchase equipment for the Alien Detention Center, Oakdale, Louisiana; to activate new housing units at eight existing institutions; to provide adequate hospital guard service; to house an additional 750 short-term aliens in contract detention facilities; to improve institution security; and to provide for an anticipated increase in the average daily population.

2. *Inmate programs.*—This activity finances the costs of academic, social, and occupational education courses, institutional programs for the treatment of drug addiction, and psychological services. In 1985, resources are requested to activate a 500-bed Federal Correctional Institution at Phoenix, Arizona; to advance purchase equipment for the Alien Detention Center, Oakdale, Louisiana; to activate new housing units at eight existing institutions; and to provide for an anticipated increase in average daily population.

3. *Institution administration and maintenance.*—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions. In 1985, resources are requested to activate a 500-bed Federal Correctional Institution at Phoenix, Arizona; to advance purchase equipment for the Alien Detention Center, Oakdale, Louisiana; and to activate new housing units at eight existing institutions.

4. *Community corrections.*—This activity provides for the care of Federal prisoners in contract community residential centers. During 1985, major programs will operate at current levels.

5. *Program direction.*—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel. During 1984, major programs will operate at current levels.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving

correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations.

The National Corrections Academy will offer training to local correctional personnel working in prisons, community corrections and jails. The Academy will train over 3,500 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

1. *Planning and site acquisition.*—This activity reflects the costs of efforts to obtain suitable sites for approved construction projects, including site purchase and development and facility design. In 1985, funds are requested for the planning and site acquisition of a Federal Correctional Institution to be located in the southeastern United States.

2. *New construction.*—This activity represents costs associated with the construction of new facilities in order to reduce overcrowding and provide a safe and humane environment for staff and inmates. In 1985, construction will begin on a Federal Correctional Institution in the northeastern United States.

3. *Modernization and repair of existing facilities.*—This activity includes rehabilitation and renovation of buildings, necessary modifications to accommodate new correctional programs, rehabilitation or replacement of utilities systems, and repair projects at existing facilities. In 1985, funds in the amount of \$6.5 million will be available for approximately 400 minor repair projects at existing institutions. An additional obligation of \$1.5 million will be incurred for the Oxford, Wis., lease/purchase agreement. Also, \$7.1 million is requested to continue the modernization of the penitentiary at Leavenworth, KS, \$7.7 million is requested to continue the conversion of the penitentiary at Atlanta, GA; \$14.9 million is requested to increase capacity by 758 at seven institutions and \$8.2 million is requested to renovate other existing facilities.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide additional industrial employment opportunities at existing and planned institutions.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The proposed Justice Assistance Act of 1984 provides authority for limited financial and technical assistance to States and local units of government to reduce crime and juvenile delinquency, and to provide emergency assistance for local law enforcement. The Act also continues the National Institute of Justice and the Bureau of Justice Statistics to encourage basic and applied research and to gather and disseminate accurate and comprehensive justice statistics. The Juvenile Justice and Delinquency Prevention Act of 1974, as amended, places within the Office of Juvenile Justice and Delinquency Prevention responsibility for the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. The juvenile justice program is being terminated because the principal objectives of the program have been achieved to the extent which is practicable. The Office of Justice Assistance provides staff support and coordinates the activities of the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, and the Bureau of Justice Statistics as well as administering the State and local assistance programs and the Public Safety Officer Benefits program.

1. *Research, evaluation, and demonstration programs.*—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile

justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and the dissemination of the results of such research efforts.

2. *Criminal justice statistical programs.*—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations.

3. *State and local formula grants.*—This program provides funds to the States with each receiving a base amount of \$250,000 and the remainder allocated according to relative population. Grant funds may only be used for programs which are of proven effectiveness or which have a high probability of improving the criminal justice system and focus primarily on violent crime and serious offenders. Financial as well as technical assistance incentives are offered to jurisdictions to replicate approaches that have been shown to work elsewhere and that States and localities would not otherwise be able to undertake.

4. *State and local discretionary grants.*—This activity provides funds for training and technical assistance to grantees and criminal justice personnel. National or multi-state projects and demonstration programs related to the same priority objectives authorized for the formula grants will also be funded. Twenty percent of the funds appropriated for State and local assistance are available for the discretionary grant program.

5. *Juvenile justice formula grants.*—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency. No new budget authority will be provided in 1985 since the majority of the Administration's goals have been met in this area.

6. *Juvenile justice programs.*—These programs support the development and implementation of new approaches, techniques, and methods with respect to juvenile delinquency programs. No new budget authority will be provided in 1985 since the majority of the Administration's objectives in this area have been addressed.

7. *Public safety officers' benefits program.*—Funds are used to pay \$50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty.

8. *Crime control programs.*—This activity provides for expenditures from past Law Enforcement Assistance Administration programs which were not authorized by the Justice System Improvement Act of 1979. Also included are programs which were authorized by the Justice System Improvement Act of 1979 and are being terminated: criminal justice formula grants program, national priority grants program, general criminal justice grants program, training, and crime prevention programs.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. A total of not to exceed \$50,000 from funds appropriated to the Department of Justice in this title shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

SEC. 202. Notwithstanding any other provision of law or this Act, materials produced by convict labor may be used in the construction of any highways or portion of highways located on Federal-aid systems, as described in section 103 of title 23, United States Code.

SEC. 203. Notwithstanding section 501(e)(2)(B) of Public Law 96-442, funds appropriated to the Department of Justice in this title may be expended for assistance to Cuban-Haitian entrants as authorized under section 501(c) of said Act.

[SEC. 204. No part of the funds appropriated in this title for the Department of Justice may be used to represent the Tennessee Valley Authority in litigation in which the Authority is a party unless the Department is requested to provide representation in such litigation by the Authority.]

[SEC. 205. (a) Subject to subsection (b) of this section, authorities contained in Public Law 96-132, "The Department of Justice Appropriation Authorization Act, Fiscal Year 1980", shall remain in effect until the termination date of this Act or until the effective date of a Department of Justice Appropriation Authorization Act, whichever is earlier.]

[(b)(1) With respect to any undercover investigative operation of the Federal Bureau of Investigation which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counterintelligence—

(A) sums authorized to be appropriated for the Federal Bureau of Investigation for fiscal year 1984 may be used for purchasing property, buildings, and other facilities, and for leasing space, within the United States, the District of Columbia, and the territories and possessions of the United States, without regard to section 1341 of title 31 of the United States Code, section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated

paragraph under the heading "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3324 of title 31 of the United States Code, section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Services Act of 1949 (63 Stat. 395; 41 U.S.C. 254 (a) and (c)),

(B) sums authorized to be appropriated for the Federal Bureau of Investigation for fiscal year 1984 may be used to establish or to acquire proprietary corporations or business entities as part of an undercover investigative operation, and to operate such corporations or business entities on a commercial basis, without regard to section 9102 of title 31 of the United States Code,

(C) sums authorized to be appropriated for the Federal Bureau of Investigation for fiscal year 1984, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions, without regard to section 648 of title 18 of the United States Code and section 3302 of title 31 of the United States Code, and

(D) the proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation, without regard to section 3302 of title 31 of the United States Code, only upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, a member of the Undercover Operations Review Committee established by the Attorney General in the Attorney General's Guidelines on FBI Undercover Operations, as in effect on July 1, 1983) and the Attorney General (or if designated by the Attorney General, a member of such Review Committee), that any action authorized by subparagraph (A), (B), (C), or (D) of this paragraph is necessary for the conduct of such undercover operation. Such certification shall continue in effect for the duration of such undercover operation, without regard to fiscal years.】

【(2) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under subparagraphs (C) and (D) of paragraph (1) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited in the Treasury of the United States as miscellaneous receipts.】

【(3) If a corporation or business entity established or acquired as part of an undercover operation under subparagraph (B) of paragraph (1) with a net value of over \$50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation, as much in advance as the Director or his designee determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.】

【(4)(A) The Federal Bureau of Investigation shall conduct a detailed financial audit of each undercover investigative operation which is closed in fiscal year 1984,

(i) submit the results of such audit in writing to the Attorney General, and

(ii) Not later than 180 days after such undercover operation is closed, submit a report to the Congress concerning such audit.】

【(B) The Federal Bureau of Investigation shall also submit a report annually to the Congress specifying—

(i) the number, by programs, of undercover investigative operations pending as of the end of the one-year period for which such report is submitted,

(ii) the number, by programs, of undercover investigative operations commenced in the one-year period preceding the period for which such report is submitted, and

(iii) the number, by programs, of undercover investigative operations closed in the one-year period preceding the period for which such report is submitted and, with respect to each such closed undercover operation, the results obtained. With respect to each such closed undercover operation which involves any of the sensitive circumstances specified in the Attorney General's Guidelines on FBI Undercover Operations, such report shall contain a detailed description of the operation and related matters, including information pertaining to—

(I) the results,

(II) any civil claims, and

(III) identification of such sensitive circumstances involved, that arose at any time during the course of such undercover operation.】

【(5) For purposes of paragraph (4)—

(A) the term "closed" refers to the earliest point in time at which—

(I) all criminal proceedings (other than appeals) are concluded, or

(II) covert activities are concluded, whichever occurs later,

(B) the term "employees" means employees, as defined in section 2105 of title 5 of the United States Code, of the Federal Bureau of Investigation, and

(C) the term "undercover investigative operation" and "undercover operation" mean any undercover investigative operation of the Federal Bureau of Investigation (other than a foreign counterintelligence undercover investigative operation)—

(i) in which—

(I) the gross receipts (excluding interest earned) exceed \$50,000, or

(II) expenditures (other than expenditures for salaries of employees) exceed \$15,000, and

(ii) which is exempt from section 3302 or 9102 of title 31 of the United States Code, except that clauses (i) and (ii) shall not apply with respect to the report required under subparagraph (B) of such paragraph.】 (*Department of Justice and Related Agencies Appropriation Act, 1984.*)

NOTES

Includes \$519 thousand in 1984 and nothing in 1985 for activities transferred to Department of Labor, Departmental Management, Salaries and expenses. No comparable amount for 1983 is included.

Includes \$292 thousand in 1985 for activities previously financed from the Department of Health and Human Services, work incentives. Comparable amounts for 1983 (\$4,189 thousand) and 1984 (\$4,228 thousand) are excluded above.

1. *Comprehensive employment and training.*—Provides leadership, policy direction, and administration for a decentralized system of block grants to States for job training, the Job Corps youth training program, and services to special target groups.

2. *Employment security.*—Provides policy direction and management for the administration of the nation-

wide public employment service system and the unemployment insurance services in each State; for the settlement of trade adjustment petitions; and for a system of collecting and analyzing labor market information.

3. *Financial control and management systems.*—Provides for the formulation and execution of the budget, fiscal management, audit control, debt collection, internal control, contracting services, statistical and data processing management systems, personnel direction, facilities and space management, and contractor and grantee property management.

4. *Executive direction and administration.*—Provides general management and administrative functions, including: research and evaluation, performance standards and publications development. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

5. *Regional operations.*—Provides for administration and management of ETA programs in the regions. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

6. *Apprenticeship training.*—Promotes apprenticeship as a method of skill acquisition across a broad range of occupations and industries through a Federal-State apprenticeship administrative structure.

Note.—Excludes \$20,000 thousand in 1985 for activities transferred to Department of Labor, Employment and Training Administration, State unemployment insurance and employment service operations. Comparable amounts for 1983 (\$20,000 thousand) and 1984 (\$20,000 thousand) are included above.

This account provides for a flexible and decentralized system of Federal and local programs of training and other services for economically disadvantaged persons, designed to lead to permanent gains in employment. Such programs are authorized by the Job Training Partnership Act. Beginning July 1, 1984, the account is forward funded on a July to June cycle.

1. *Grants to States.*—Includes block grants to provide financial assistance to States and territories to design and operate training programs to meet their training and employment needs, grants to operate the summer youth employment and training program, and grants for programs to meet the needs of workers displaced from their jobs due to technological and other changes in the economy. Persons eligible for trade adjustment assistance will be provided training, job search, relocation assistance and related services under JTPA, title III, dislocated worker discretionary authority. Seventy percent of block grant funding will be used for training, including remedial education and basic skills, institutional training, and on-the-job training.

2. *Federally administered programs.*—Provides program support for Job Training Partnership Act activities and training assistance through nationally administered programs for special segments of the population that have particular disadvantages in the labor market. Among groups to be served are Indians and other native Americans, migrant and seasonal farmworkers, and veterans. Also included is the Job Corps which provides training in both basic literacy and arithmetic skills and vocational skills for youth aged 14-21 who have severe educational and economic disadvantages, primarily through a national network of residential centers. In 1984 about 107 centers operated by the Departments of Agriculture and the Interior and private profit and non-profit contractors will serve about 80,000 economically disadvantaged, unemployed, and out-of-school youth.

2. *Employment service.*—The public employment service is a nationwide system providing no-fee employment services to individuals who are seeking employment and employers who are seeking workers. State employment service activities are financed by allotment to States distributed under a demographically based funding formula established under the Wagner-Peyser Act, as amended. The 1984 appropriation includes funding for the Employment Service for the program year beginning July 1, 1984, and ending June 30, 1985. Each year thereafter the Employment Service will be financed for the program year.

Employment service activities serving national needs including interstate job listings, labor certification of aliens and the Targeted Jobs Tax Credit program are conducted through specific reimbursable agreements between the States and the Federal Government under

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. Advances made to the Federal employees compensation account in the Unemployment trust fund, advances made to the extended unemployment account in the Unemployment trust fund to finance Federal supplemental compensation benefits, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable. All other advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, without interest, to the general fund of the Treasury.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient. No appropriation is required for this account in 1985 since sufficient funds are available from 1984 to meet 1985 requirements.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax, are also paid. Temporary Federal Supplemental Compensation benefits are financed with Federal general revenues. The Federal tax pays the costs of Federal and State administration of unemployment insurance and veterans employment services, and 97% of the costs of the employment service.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. Benefits paid are reimbursed to the Federal Employees Compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

This wholly-owned government corporation administers programs of mandatory termination insurance to prevent loss of pension benefits under covered private, defined-benefit pension plans if plans terminate or if multiemployer plans are unable to pay benefits. Terminated plans are taken over by the Corporation. The Corporation assumes control of their assets, administers them in a trust fund held in a private bank, and takes responsibility for paying benefits. The Corporation also provides repayable assistance to insolvent multiemployer plans when necessary to pay benefits and to forestall termination and subsequent Corporation responsibility to pay benefits.

Plans terminated during year:	1983 actual	1984 estimate	1985 estimate

With insufficient assets.....	102	102	102
Government trusteeships at end of year.....	894	996	1,098
Regulations issued.....	10	23	21

1. **Administration.**—Provides executive direction, financial planning and control, legal support, program development and operations and other support functions.

2. **Benefit payments.**—Checks are issued when due to pay status participants and other beneficiaries in plans which have terminated.

	1983 actual	1984 estimate	1985 estimate
Payees in government trusteeships receiving monthly benefits from the corporation.....	32,600	61,800	68,700
Checks issued.....	365,980	541,400	933,100

3. **Financial assistance.**—If multiemployer-sponsored plans become insolvent the Corporation gives repayable loans to enable the plans to continue paying benefits. Financial assistance to an insolvent plan is made only

after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

Financing.—Sources of financing are per capita annual premiums from ongoing covered plans, assets from terminated plans, investment income, and amounts due the Corporation from the sponsors of terminating plans (employer liability). Also, the Corporation is authorized to borrow up to \$100 million from the U.S. Treasury. No borrowing is anticipated for the budget year. Terminations of single employer plans have exceeded expectations. The budget contains a request to Congress to increase the premium single employer plans must pay on each covered participant.

Operating results.—The following tables show the status of the Corporation's trust funds and the Corporation's operating results.

1. *Enforcement of wage and hour standards.*—This activity works to obtain compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Prevailing wages are determined and employment standards enforced under various Federal procurement acts. In 1985, approximately 416,000 persons are expected to be aided under the Fair Labor Standards Act, through assessing employers for underpayments and securing agreements to pay the workers. Through the special minimum wage program, 430,000 persons will be aided by certificates issued and employment authorized. In Government contracts, 37,300 persons will be aided through assessing employers for underpayments and securing agreements to pay the workers. Under the Migrant and Seasonal Agricultural Worker Protection Act program, approximately 82,600 persons will be aided through enforce-

ment of employment standards for migrant and seasonal agricultural workers.

2. *Federal contractor EEO standards enforcement.*—The Office of Federal Contract Compliance Programs (OFCCP) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, relating to the hiring and promotion of physically and mentally handicapped individuals, is included in this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1985, about 5,450 compliance reviews, 1,100 complaint investigations, and 3,700 other compliance actions will be taken with respect to contractor employment practices.

3. *Federal programs for workers' compensation.*—Under this income maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

4. *Executive direction and support services.*—This activity includes planning, personnel management, financial management, research and Federal/State liaison programs, management systems implementation, and data processing operations. Major goals in 1985 will include continued efforts to eliminate internal fraud, waste, and abuse; the improvement of management information, automated data processing, and program and fiscal accountability; and legislative and regulatory improvements. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

sions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes loss of job time. Workers suffering non-controverted, traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

2. Longshore and harbor workers' compensation benefits.—Under the Longshoremen's and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

This schedule reflects the Administration's legislative proposal to change the payment date for cost-of-living adjustments under the Federal Employees' Compensation program (FECA). The payment date for COLA adjustments will move from April to January. This change will bring the FECA COLA adjustment payment date in line with that being proposed for Federal retirement programs.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, in the form of an excise tax on mined coal tonnage. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition the fund pays all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, the Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1981, \$1,510 million; 1982, \$1,793 million; 1983, \$2,151 million; 1984, \$2,542 million; and 1985, \$2,954 million.

A 1984 supplemental, now estimated at \$28 million, will be required to meet a larger than anticipated number of monthly benefit and medical payments and higher interest costs. The higher interest costs reflect larger advances from the Treasury as decreases in coal production have resulted in lower coal tonnage tax receipts. The supplemental will be transmitted when estimates of need are firmer.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act (33 U.S.C. 944; 31 U.S.C. 725).

These trust funds are available for payments of additional compensation for second injuries. When a second injury, when combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

1. *Safety and health standards.*—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious employee injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically sound; and (4) the standard is cost-effective when compared with alterna-

tive regulatory proposals providing equal levels of protection.

2. *Enforcement.*—The Occupational Safety and Health Act of 1970 provides for enforcement of Federal standards in States declining to assert jurisdiction and for grants to assist States in administering and enforcing State standards. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities and by encouraging the voluntary protection efforts of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, the investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and inspections for serious health and safety hazards.

3. *Technical support.*—Technical assistance is provided on all aspects of standards setting, variances, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. The economic and environmental impacts of proposed standards are analyzed.

4. *Compliance assistance.*—This activity contributes to the balanced use of the authority provided by the Act through a variety of employer and employee assistance activities. Under cooperative agreements, State agencies are reimbursed for 90% of the costs of providing free onsite consultation to employers upon request. Grants are awarded to assist organizations to develop their capacity to provide occupational safety and health training for workers and employers. Employers are encouraged to establish voluntary labor-management and self-inspection protection programs. This activity also provides leadership and assists agencies in implementing job safety and health programs to protect Federal workers. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

5. *Safety and health statistics.*—Statistics on occupational fatalities, injuries, and illnesses are collected and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

6. *Executive direction and administration.*—These activities include executive direction, planning and evaluation, management support, legislative liaison, inter-agency affairs, and administrative services. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

1. *Enforcement.*—Enforcement of the Federal Mine Safety and Health Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, recommendations to reduce working hazards, and on-site education and training assistance.

2. *Assessments.*—This activity assesses civil monetary penalties for violations of safety and health standards.

3. *Educational policy and development.*—This activity develops and coordinates MSHA's mine safety and health education and training policies and provides classroom instruction at the National Academy for MSHA personnel, other Government personnel, and the mining industry. States are encouraged to develop training programs through grants and technical assistance.

4. *Technical support.*—This activity provides technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or improve mining practices. It also collects and analyzes data relative to the cause, frequency, and circumstances of accidents.

5. *Program administration.*—This activity provides for general administrative functions and collection of

civil monetary penalties. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

NOTES

Includes \$143 thousand in 1985 for activities previously financed from Department of Labor, Labor Management Services Administration, Salaries and expenses. Comparable amounts for 1983 (\$0 thousand) and 1984 (\$140 thousand) are excluded above.

Excludes \$9,778 thousand in 1985 for activities transferred to Department of Labor, Departmental Management, Assistant Secretary for Veterans Employment and Training. Comparable amounts for 1983 (\$8,935 thousand) and 1984 (\$9,721 thousand) are included above.

1. *Executive direction.*—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

2. *Legal services.*—Includes enforcement of Federal labor statutes and legal advisory, legislative, and litigation services related to the statutes administered by the Department.

3. *International labor affairs.*—Integrates all international labor programs and foreign economic policy within the Department; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

4. *Administration and management.*—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment and provides for consistent and constructive internal labor-management relations throughout the Department.

5. *Adjudication.*—Conducts formal hearings and renders timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices, and other labor-related areas.

6. *Promoting employment of the handicapped.*—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically and mentally handicapped persons.

7. *Women's bureau.*—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Na-

tion's economy; and encourages the advancement of women workers.

8. *Veterans employment service.*—Policy direction of Veterans employment and training programs will be framed in 1985 under the Assistant Secretary for Veterans Employment and Training.

9. *Civil rights.*—Ensures full compliance with title VI of the Civil Rights Act of 1964 and other regulatory nondiscrimination provisions in programs receiving financial assistance from the Department of Labor and promotes equal opportunity in these programs and activities.

The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

The Office keeps the Secretary and the Congress fully and currently informed about fraud and other serious problems, abuses, and deficiencies in departmental programs and operations; recommends corrective action; and reports on the progress made in correcting the problems. The office provides policy direction and conducts, supervises, and coordinates all audits and investigations; recommends policies for and conducts, supervises, or coordinates other activities in the department and between the department and other Federal, State, and local government agencies whose purposes are to (a) promote economy and efficiency, (b) prevent and detect fraud and abuse, and (c) identify and prosecute people involved in fraud or abuse.

The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

1. *State administration.*—The Disabled Veterans Outreach Program (DVOP) provides intensive employability development services to secure permanent employment for veterans with service-connected disabilities and the most disadvantaged Vietnam-era veterans. Local Veterans Employment Representatives (LVER's) provide job development, placement, and supportive services directly to veterans, and act as functional supervisors of the services provided veterans by other local office staff to ensure compliance with the performance standards for services to veterans.

2. *Administration.*—Identifies policies and programs to serve and meet employment and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services. Provides information and processes complaints to help veterans, reservists, and members of the National Guard obtain employment rights provided by law. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions.

Foreign service consultations.—Overseas regional conferences and consultations with labor attachés and economic officers provide a useful forum for discussion of regional problems which influence foreign policy; enable the overseas officers to be currently informed concerning U.S. objectives and developments affecting their work; facilitate development of new methods for implementing U.S. objectives in labor and employment and training areas; and enable Washington officials to inform the overseas officers concerning reporting needed by the Department of Labor to fulfill its responsibilities.

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (29 U.S.C. 563):

1. **Administrative management services.**—Provides a broad range of administrative services, including procurement, contracting, printing, mailing, messengers, motor pool, accounting, payroll and voucher payments, and supply and property management. The 1985 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions and administrative systems reform.

2. **Field services.**—Provides centralized services from the Department's 10 regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services.

3. **Facilities management.**—Manages the Frances Perkins Building, which is the Department's headquarters, under the terms of an agreement with the General Services Administration.

4. **Penalty mail and telecommunications.**—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

Financing.—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Operating results.—The fund ended 1983 with a net operating income of \$7.3 million. These amounts were collected to finance computer purchases and the changeover to the Department's management of facilities maintenance operations of the Frances Perkins Building. Unneeded balances of \$5,475 million accumulated in prior years from charges to finance data auto-

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
U.S. Information Agency, "Salaries and expenses."

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes. (*Department of Labor Appropriation Act, 1984.*)

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.]

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.]

SEC. [503] 501. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. [504] 502. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. [505] 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. [506] 504. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. [507] 505. The Secretaries of Labor, Education, and Health and Human Services are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. [508] 506. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [509] 507. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. [510] 508. The Secretaries of Labor, Education, and Health and Human Services are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. [511] 509. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 512. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretaries of Labor, Health and Human Services, and Education who under title 5, United States Code, section 101 are exempted from such limitations.]

SEC. 510. Upon the adoption of the Compact of Free Association, amounts appropriated by this Act for Federal financial assistance to the Trust Territory of the Pacific Islands shall be available only for the Republic of Palau, but only in amounts that such Republic would have received had the compact not been adopted. (*Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1984.*)

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State.

1. *Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional and regional bureaus of the Department. Public affairs, congressional affairs, and inspection, audit, and investigation activities are included.

2. *Diplomatic relations with foreign countries.*—This includes representation of the United States and its citizens abroad, primarily for political and economic negotiations and for reporting and analysis.

3. *Diplomatic relations through international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities. Included are resources to support U.S. missions to international organizations abroad, as well as domestically-located missions to the United Nations and the Organization of American States.

4. *Conduct of consular affairs.*—Activities included are overseas and domestic visa and American citizen services. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports, emergency assistance to American citizens abroad, and passport fraud detection and investigation.

5. *Technical support programs.*—These encompass data processing efforts, personnel and physical security, training and development programs, worldwide tele-

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for the interest on the unfunded liability and disbursements attributable to military and naval services—a full 100 percent in each year.

These funds are used for payment of the U.S. share of the expenses of eleven international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Pacific Salmon Commissions regulate their respective fisheries, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control, and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments.

CONTRIBUTION TO UNITED STATES-INDIA FUND FOR CULTURAL, EDUCATIONAL AND SCIENTIFIC COOPERATION

There is established in the Treasury an account to which shall be credited \$110 million worth of Indian rupees, which are owned by the United States in India or owed to the United States by the Government of India and which the Secretary of the Treasury determines are excess to requirements of the United States. The balance in the account shall be invested as determined by the Secretary of the Treasury and amounts earned from investment shall be credited to the account. All amounts earned from investment, but none of the initial capitalization of the account, shall be made available for payment to the board or other entity authorized by Public Law 98-164 for the purposes thereof, without fiscal year limitation, and funds made available to the Department of State may be used to administer the payments to such board or entity.

This one-time appropriation of U.S.-owned excess Indian rupees will be utilized to create a fund, the earnings from which will provide the U.S. share of a proposed binational foundation that will make grants for cultural, educational, and scientific programs of mutual interest to India and the United States.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 301. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

SEC. 302. Funds appropriated under this title shall be available for expenses of international arbitrations and other proceedings for the international resolution of disputes arising under treaties or other international agreements, including international air transport agreements, and arbitrations arising under contracts authorized by law for the performance of services or acquisition of property abroad.

SEC. 303. Funds appropriated under this title shall be available, except as otherwise provided, for salaries and expenses of personnel and dependents as authorized by the Foreign Service Act of 1980 (94 Stat. 2071); allowances and differentials as authorized by subchapter III of chapter 59 of 5 U.S.C.; services as authorized by 5 U.S.C. 3109; expenses as authorized by section 2 (a), (c), and (e) of the State Department Basic Authorities Act of 1956; and hire of passenger or freight transportation.

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Title 23 U.S.C. ("Highways") and other supporting legislation provide authority for the various programs of the Federal Highway Administration designed to improve highways throughout the Nation. The 1982 Surface Transportation Assistance Act (STA Act) provided authorizations from 1983 through 1986 in general, and made several significant changes to the Federal-aid highways program.

In summary, the 1985 budget contemplates \$14,783.8 million in budget authority and \$13,255.6 million in outlays. The following table compares 1985 program level (obligations) with those of prior years.

The Sandhill Crane Wildlife Refuge appropriation, enacted in the 1979 Department of Transportation Appropriations Act, provided \$4 million for the acquisition of land in Jackson County, Miss., to be administered by the Secretary of Interior as a wildlife refuge for the Mississippi Sandhill Crane. The entire appropriation was transferred by FHWA to the U.S. Fish and Wildlife Service in 1979. The 1983 unobligated funds transferred

back to FHWA represent funds which are no longer required and which are expected to lapse in 1984.

Under the 1973 Highway Act, States and localities may withdraw previously approved Interstate segments and apply the authorized funds to substitute transit or highway projects. Legislation enacted for 1982 and 1983 provided funding for highway substitute projects from general funds. The 1982 Surface Transportation Assistance Act provided contract authority out of the Highway Trust Fund for 1983 through 1986. The contract authority for this program is part of the "Federal-Aid Highways" account.

The Appalachian Development Highway System is designed to improve the accessibility of Appalachia, to reduce highway transportation costs to and within Appalachia, and to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. The budget proposes to phase out the program by 1987, providing \$80 million in 1985 and \$40 million in 1986 for highway construction and program administration.

FEDERAL-AID HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION) (TRUST FUND)

For carrying out the provisions of title 23, United States Code, which are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 148, not otherwise provided, including reimbursements for sums expended pursuant to the provisions of 23 U.S.C. 308, [11,600,000,000] \$12,800,000,000 or so much thereof as may be available in and derived from the Highway Trust Fund, to remain available until expended: *Provided*, That, (a) notwithstanding section 157 of title 23, United States Code or any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year [1984] 1985 shall not exceed [12,600,000,000] \$13,875,000,000, except that this limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, projects covered under section 147 of the Surface Transportation Assistance Act of 1978, section 9 of the Federal-Aid Highway Act of 1981, subsections 131 (b) and (j) of Public Law 97-424, section 118 of the National Visitors Center Facilities Act of 1968, section 320 of title 23, United States Code, or section 157 of title 23, United States Code.

(b) For fiscal year [1984] 1985 the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31, [1983] 1984, no State shall obligate more than [35] 40 per centum of the amount distributed to such State under subsection (b), and the total of all

State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, [1984] 1985, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during the fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and the Federal Lands Highway Programs.

[EMERGENCY RELIEF]

[Notwithstanding sections 125, 129, and 301 of title 23, United States Code, an additional \$20,000,000 shall be available from the Highway Trust Fund for the emergency fund authorized under section 125 of title 23, United States Code: *Provided*, That the Secretary shall give first priority to making funds available to repair or replace the Mianus Bridge on I-95 in Connecticut: *Provided further*, That the Federal funds provided herein shall not duplicate assistance provided by any other Federal emergency program, compensation received from Connecticut bridge insurance policies, or any other non-Federal source: *Provided further*, That regulations issued under section 125, title 23, United States Code, shall apply to the expenditure of such Federal funds: *Provided further*, That such funds shall not be available until the State of Connecticut enters into an agreement pursuant to section 105 of the Federal-Aid Highway Act of 1978 which covers the Mianus Bridge.] (*Department of Transportation and Related Agencies Appropriations Act, 1984.*)

[ACCESS CONTROL DEMONSTRATION PROJECT]

[Section 150(d) of the Federal-Aid Highway Act of 1978 is amended by striking out the period at the end thereof, and inserting the following: “: *Provided, however*, That sums shall not lapse until September 30, 1985.”.] (*Department of Transportation and Related Agencies Appropriations Act, 1984.*)

Financial assistance is made available to States under the following programs for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs. To avoid the proliferation of programs exempt from routine funding controls, a Federal-aid highways obligation limitation of \$13.875 billion, covering all Federal-aid programs except emergency relief, is proposed for 1985.

1. *Interstate construction.*—Of the 42,500-mile system, 40,753 miles were open to traffic as of June 30, 1983. Emphasis will be on completing the Interstate by the early 1990's.

2. *Interstate 4R.*—To preserve the Nation's investment in the Interstate highway system, a major expansion of the Interstate program of resurfacing, restoring, rehabilitation, and reconstruction has been undertaken.

3. *Interstate substitutions.*—Provides financial assistance to States and localities which withdraw previously approved Interstate segments and apply authorized funds to substitute highway projects.

4. *Primary system.*—Provides financial assistance to States for highway construction, reconstruction and related planning for the primary highway system.

5. *Secondary system.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the secondary and urban systems in rural and small urban areas (with populations of 50,000 or less). Assistance is also provided for forest and public lands highways.

6. *Urbanized area transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the urban system in urbanized areas (with populations of more than 50,000). In addition, funds can be used for capital expenditures for buses and other public transportation facilities.

7. *Bridge program.*—Provides financial assistance to States to replace or rehabilitate bridges with deficiencies that are hazardous to the safety of motorists.

8. *Consolidated safety programs.*—Provides financial assistance to States for safety improvements to the highway systems, including hazard elimination, pavement marking, and rail highway crossings.

9. *Administration and research.*—Provides for executive and general administrative and research expenses of Federal-aid highways. These funds are expended under the limitation on general operating expenses.

10. *Other.*—Provides for emergency relief, 85% minimum allocation, Federal lands, and other miscellaneous programs.

The improvements in the Federal-aid highway program highlighted above are designed to focus Federal involvement and funding generally on the programs of highest Federal interest (e.g., Interstate), and to increase flexibility to the States to use Federal-aid program funds to address their particular needs and priorities. The preeminent Federal interest in completing and preserving the Interstate is reflected in the program and funding changes enacted in the 1982 Surface Transportation Assistance Act for this highway system.

This limitation provides for the Salaries and expenses of the Federal Highway Administration. The 1985 estimate includes reductions to reflect estimated productivity increases stemming from the Administration's management reform initiatives.

1. *Program direction and coordination.*—(a) Provides overall direction and coordination of the highway transportation program; (b) provides legal services for all programs; (c) plans and directs public affairs programs; and (d) develops and recommends policies and standards, and ensures compliance with the civil rights and equal opportunity procedures by the Federal Highway

Administration and by recipients of grants-in-aid administered by the Federal Highway Administration.

2. *General program support.*—(a) Formulates policy, multiyear and long-range plans and goals for highway programs, and data and analyses for current and long-range programing; (b) conducts direct and contract research and development relating to traffic operations, new construction techniques, and the social and environmental aspects of highways; (c) provides administrative support services for all elements of the Federal Highway Administration; and (d) provides on-the-job training for employees of the Federal Highway Administration and training opportunities for other highway-related personnel. To allocate costs more efficiently, the budget proposes to charge non-federal personnel trained by the National Highway Institute half of the cost of instruction. Such personnel currently are trained without charge.

3. *Highway programs.*—(a) Provides engineering guidance to Federal and State agencies and to foreign governments, and conducts a program to encourage use of modern traffic engineering procedures to increase the vehicle-carrying capacity of existing highways and urban streets; (b) assists States, other Federal agencies, and certain foreign countries in right-of-way acquisition and develops procedures for highway location selection and consideration of environmental impacts; and (c) finances construction skill training programs for disadvantaged workers hired by contractors on federally aided highway projects.

4. *Field operations.*—(a) Provides staff advisory and support services in field offices of the Federal Highway Administration; and (b) provides program and engineering supervision of the several highway programs through 9 regional and 52 division offices.

The Highway Safety Act of 1970 authorized grants to States and communities for implementing and maintaining highway-related safety standards.

The 1982 Surface Transportation Assistance Act provided a \$10 million program level for 1985 and authorizations for this program through 1986.

This appropriation, established in 1975, seeks to identify, correct, and evaluate those critical elements that contribute to loss of life, disabling injuries, and property damage on American highways. The emphasis of research is to provide workable and timely solutions to a set of critical safety problems. This program attempts to meet the increasing demands for solutions to urgent safety problems, such as traffic management in construction and maintenance zones and new longer range initiatives in safety hardware, driver aids, and system performance measurement.

Funds appropriated for this account are transferred to the General operating expenses limitation, where the program is administered in conjunction with other research and development programs of the Federal Highway Administration.

MOTOR CARRIER SAFETY GRANTS

For necessary expenses to carry out the provisions of section 402 of Public Law 97-424, **[\$8,000,000] \$16,000,000**, to be derived from the Highway Trust Fund and to remain available until September 30, **[1987] 1988.** (Department of Transportation and Related Agencies Appropriations Act, 1984.)

The Motor Carrier Safety Grant program, authorized by the 1982 Surface Transportation Assistance Act, provides grants to States to enforce safety standards of intra- and interstate trucking under Federal jurisdiction. States become eligible for funds by adopting Federal truck safety standards. Uniform safety standards both enhance the coordination of enforcement activities and simplify the safety requirements of interstate trucking parties.

The budget proposes a 100% increase over 1984 to reflect the administration's priority on highway safety.

Federal grants for enforcement of commercial motor vehicle safety standards may not be used to maintain efforts already undertaken by State governments. The purpose of the grant program is to raise the level of enforcement, not to substitute Federal for State and local dollars.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General fund to the Highway trust fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law.

The status of the fund is as follows:

Miscellaneous Trust Funds contains the following programs financed out of the highway trust fund and reimbursed by the requesting parties.

1. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways.

2. *Technical assistance, U.S. dollars advanced from foreign governments.*—The Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. Currently, these services are being rendered in Costa Rica, Saudi Arabia, and Kuwait.

3. *Contributions for highway research programs.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment.

4. *Advances from State cooperating agencies.*—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Federal Highway Administration.

The Federal-Aid Highway Act of 1968 authorized \$300 million for the establishment of a right-of-way revolving fund. This fund is utilized to make cash advances to the States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs.

The initial legislation for this program required the States to construct the highway and reimburse the revolving fund within seven years from the date of the advance. The 1973 Highway Act extended the required time limit on construction to 10 years and the 1976 Highway Act extended the time limit indefinitely, if deemed necessary by the Secretary.

In 1985, gross obligations will be limited to \$50 million, with increased funds for Federal-aid highways provided in the Surface Transportation Assistance Act and greater emphasis on rehabilitation rather than new construction. The proposed limitation should be sufficient to fund all worthwhile projects.

1. **Rulemaking programs.**—Covers rulemaking activity relative to the promulgation of Federal motor vehicle safety standards for new and used motor vehicles, tires, and equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; international harmonization of standards; and regulatory reform.

2. **Enforcement programs.**—Provides for the enforcement of programs described under the rulemaking activity, including manufacturer compliance with motor vehicle safety and automotive fuel economy standards, investigation of safety-related motor vehicle defects, and surveillance of odometer tampering.

3. **Highway safety programs.**—Provides for technical assistance to the States in the conduct of their highway safety programs; demonstration programs emphasizing alcohol countermeasures and safety belt usage to reduce highway fatalities and injuries; and operation and improvement of the national driver register. The involvement of the private sector, including corporate groups, associations and citizen groups, is being stimulated and encouraged. In this manner, the impact of

federal funds and efforts are increased through leveraging.

4. *Research and analysis.*—Provides motor vehicle safety and highway safety research and development in support of all NHTSA programs, including the collection and analysis of data to identify safety problems, develop alternative solutions, and assess costs, benefits, and effectiveness. Research will continue to improve vehicle crashworthiness performance, accident avoidance characteristics of cars, trucks and motorcycles, and support for increasing safety belt usage and alcohol control. The budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

5. *Office of the Administrator.*—Provides for overall executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

6. *General administration.*—Provides for planning, program evaluation, and basic administrative and supporting services for programs of this administration.

Note.—The activities financed under the State and Community Highway Safety (Liquidation of Contract Authorization) account in 1983 and 1984 are presented in these schedules and are proposed to be financed in this account in 1985. Budget authority and outlays are distributed by account above.

1.a. *Safety formula grants.*—Grant allocations are determined on the basis of a statutory formula established under 23 U.S.C. 402. Individual States use this funding in areas which have the greatest potential for achieving safety improvements and reducing traffic fatalities and accidents. Activities are centered predominantly on efforts to control the drinking driver; stimulate activities to improve child passenger safety and increase safety belt usage; increase traffic law enforcement; improve the quality of emergency medical services, principally through additional training of State and local personnel; and improve the collection and analysis of traffic accident data.

1.b. *Safety formula grant administration.*—Under 23 U.S.C. 402, up to 5 percent of amounts authorized for safety formula grants are permitted to be used for reimbursement to the operations and research account for grant administration. Funds of \$4.9 million are required to cover the expenses of administering Federal grant activity in 1985.

2. *School bus driver training.*—Grant allocations were determined on the basis of a statutory formula established under 23 U.S.C. 406. Funds were distributed to States for school bus driver training.

3. *Alcohol safety incentive grants.*—Grant allocations will be made under 23 U.S.C. 408, to those States which adopt and implement effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol. These grants will be made in accordance with established criteria and will only be used to implement and enforce such programs. Public Law 97-364 establishes a two-tier grant system. The first tier, i.e., basic grant, amounts to 30 percent of each State's apportionment under the safety formula grant program (section 402 program) if the State meets specified minimum criteria. The second tier is a supplemental grant of up to 20 percent of the State's apportionment if it qualifies for the base grant and implements additional specified alcohol traffic safety measures. In 1985, the total program level will increase by 16 percent, consistent with State abilities to use the funds.

4. *Safety education and information.*—Pursuant to the Surface Transportation Assistance Act of 1978 as amended, pilot projects will be implemented during 1984 and 1985 to demonstrate and evaluate programs to achieve maximum measurable effectiveness through the use of television and radio in reducing traffic accidents, injuries and deaths.

1. *Executive direction and administration.*—Executive direction provides for the salaries and related expenses of the Office of the Administrator, Chief Counsel, Civil Rights and Public Affairs. Together with the Office of Policy, these offices resolve national problems confronting the railroad industry and provide top level support to the Federal Railroad Administrator. The Office of Administration consists of salaries and related expenses and contractual support for day-to-day operations. Included are the Office of Personnel and Training, Management Systems, Procurement, and Financial Services.

2. *Policy support.*—This office will continue to put emphasis on planning and developing a consistent body

1. *Local rail service assistance.*—This program provides formula grants to all States for rail planning and for track rehabilitation of light density lines. No funding is requested for 1985 because States with serious rail issues have developed their own programs.

2. *Administration and special projects.*—This program provides for contract funds and salaries and related expenses to administer Federal assistance programs, labor-management activities, railroad rehabilitation and improvement financing funds, grants to the National Railroad Passenger Corporation and the Conrail labor protection program.

3. *Loan guarantee defaults.*—Interest due to the Department of Treasury on rollover of promissory notes issued in prior years will be paid off in a 1984 supplemental request.

4. *Washington Union Station.*—In 1984, the Department of Transportation expects to assume responsibility for leasing Washington Union Station. In 1985 funds will be used for rental, maintenance, operation and security services of that facility.

1. *Federal enforcement.*—This program provides salaries and related expenses for safety field operations designed to reduce the number of railroad related accidents/incidents. Federal inspectors monitor railroads for compliance with Federal laws with specific emphasis on passenger and hazardous material routes. In addition, this staff provides training to Federal, State and railroad industry personnel on related safety enforcement activities, including programs dealing with the problem of alcohol and drug abuse. Budgeted field positions for 1985 will remain at the 1984 level of 379.

2. *Automated track inspection program.*—Two sets of FRA's automated track inspection vehicles have been transferred to Conrail and Amtrak under licensing agreements. Negotiations are in progress with other railroads interested in licensing the cars upon expiration of the present licenses. All licensees of the cars are required to make the data from automated inspections available to FRA track inspectors.

3. *Safety regulation and program administration.*—This program funds the salaries and related expenses of safety headquarters personnel, data gathering and dissemination, planning and evaluation activities and administration of the State grants-in-aid program. The ongoing responsibility of this program is to issue new or revised standards, procedures, and regulations to provide a safer railroad environment. This program also administers technical training and management of rail-highway grade crossings.

4. *Grants-in-aid for railroad safety.*—This program assists States in paying salaries and expenses incurred for State safety inspectors on a 50-percent cost-sharing basis. No funds are requested in 1985.

1. *Conrail labor protection.*—In 1985, \$15 million is requested to provide protection to Conrail employees who are deprived of employment as a result of the actions taken under authority of the Regional Rail Reorganization Act, as amended, and the Northeast Rail Service Act of 1981. In addition, a supplemental appropriation of \$10 million is requested for 1984.

2. *Conrail title V labor benefits.*—The Northeast Rail Service Act of 1981 terminated labor protection benefits under title V of the Regional Rail Reorganization Act

and authorized a new Conrail labor protection program by reimbursing Conrail and other carriers for protection costs incurred prior to October 1, 1981, the effective date of the repeal. No funds are requested in 1985.

3. *Rock Island labor protection.*—This program provides benefits for former Rock Island Railroad employees as authorized in the Rail Safety and Service Improvement Act of 1982. The 1984 appropriation provided one-time only funding for this program.

1. *Construction.*—This program provides for the upgrading of rail passenger service between Boston, MA, and Washington, DC. Activity in 1985 will remain high as construction continues on projects obligated in earlier years. Major construction projects that will continue into 1985 include Boston South Station, Providence Station, Boston Service Facility, Wilmington Service Facility, catenary installation at the Washington Service Facility, installation of signal systems, right-of-way improvements jointly funded with the Massachusetts Bay Transit Authority, final bridge work in New Jersey and Connecticut, and parking garages at New Haven, Wilmington, and New Carrollton stations. \$2.2 billion has been appropriated for this program through 1984. No additional funding is required for this account, because any additional capital investment, and maintenance work on the corridor will be the responsibility of the National Railroad Passenger Corporation (Amtrak).

Reimbursable program.—Collections are made from Federal and non-Federal agencies for cost-shared improvement projects, such as stations.

2. *System engineering/program management and administration.*—System engineering involves system modeling, standards, design, and requirements criteria. Program management provides construction management including monitoring, supervising, inspecting and evaluating. In 1985 the primary effort will involve completing and auditing a number of projects being closed out. Subsequently, all remaining Northeast corridor Improvement Program work scope and responsibility will be transferred to the National Railroad Passenger Corporation (Amtrak).

3. *Public grade crossing elimination.*—No funds are requested for this program in 1985; however, outlays will continue from prior year appropriations.

¹ Adjustment reflects the write-off of amounts disbursed by the Department of Transportation to pay off Amtrak's debt to the Federal Financing Bank.

The National Railroad Passenger Corporation (Amtrak) is a federally-owned private corporation. Federal assistance is provided through the Department of Transportation in the following manner:

1. *Operating grants and State assisted routes.*—In 1985, funds will permit operation of the current system. The operating grant increase reflects Amtrak's assumption of certain program management activities and maintenance of way previously funded under the Northeast Corridor Improvement Program. The ratio of revenues to costs, excluding capital costs, is expected to be 58 percent.

2. *Labor protection and capital grants.*—In 1985, funds will permit station service facility and rolling stock upgrading as well as joint funding with States of right-of-way improvements.

3. *Loan guarantee default.*—In 1984, DOT borrowed from the Treasury to pay off a loan the Federal Financing Bank had made to Amtrak, which Amtrak was unable to pay. A supplemental request is being made in 1984 to repay the Treasury borrowing and accrued interest.

The Emergency Rail Facilities Restoration Act authorized the Secretary of Transportation to make loans for the purpose of restoring or replacing railroad facilities, equipment, or services damaged or destroyed as a result of the natural disasters that occurred during June 1972 and provided that no loan application could be approved later than June 27, 1973. The program was terminated in 1974. On October 1, 1978, the unexpended balance was returned to the general fund of the Treasury. Activity in 1983 reflects deferred interest on outstanding loans.

Public enterprise funds:

This appropriation provides for grants and contracts for the purpose of developing, testing, and demonstrating new equipment, techniques, and methods (analytical, operational, and managerial), and improving mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants to public and private,

nonprofit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation. In addition, grants are provided to enhance the effective utilization of human resources and to ensure the participation of minority business enterprises in the transit industry. In 1985, the cost of DOT training for non-DOT personnel will be shared with the beneficiaries.

equipment, employment of new technology, and technical planning assistance. Operating assistance expenses include transit fare, service and operating cost subsidies to operators of both publicly and privately owned mass transportation systems.

As established by the Surface Transportation Assistance Act (STAA) of 1982, 97.07 percent of the appropriation for Formula Grants is to be apportioned by legislative formulas to urbanized areas of fifty thousand or more in population (Section 9); and 2.93 percent of the funds are to be apportioned by a legislative formula based on population to nonurbanized areas with populations under fifty thousand (Section 18).

The authorization for Section 5 of the National Mass Transportation Assistance Act of 1974 terminated at the end of 1983. No new obligational authority is requested since the program was replaced by the new Section 9 program. Some unobligated Section 5 carryover is expected to be available in 1985.

1. *Urban Formula Grants.*—This activity will provide funds to urbanized areas for fixed guideway and bus capital projects, as well as for operating expenses and the planning of projects. Funds under this program are apportioned by separate legislative formulas to urban areas over 200,000 population and to urbanized areas of less than 200,000 population. Of the total amount apportioned under the Section 9 urban formula program, no more than \$545.5 million will be provided for operating assistance. These funds will be apportioned by urbanized area population as a percentage of the levels permitted by the STAA, i.e., 50 percent for areas of 1 million and above, 75 percent for areas between 200 thousand and 1 million, and 100 percent for areas of less than 200 thousand.

2. *Nonurban formula grants.*—This activity will assist States, local public bodies, nonprofit organizations and operators of public transportation services in providing public transportation to residents of nonurbanized areas. No limitation on operating assistance is proposed for this activity in 1985.

Trust Funds

DISCRETIONARY GRANTS (LIMITATION ON OBLIGATIONS)

Total obligations for grants under the contract authority authorized [for fiscal year 1984] in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), shall not exceed [\$1,225,000,000] \$1,100,000,000. Provided, That notwithstanding any other provision of law, total amounts of contract authority authorized for fiscal year [1984] 1985 in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, shall be available for obligation through fiscal year [1987: Provided further, That no funds shall be made available for the proposed Woodward light rail line in the Detroit, Michigan area until a source of operating funds has been approved in accordance with Michigan law: Provided further, That the Woodward line restriction shall not apply to alternatives analysis studies] 1988.

LIQUIDATION OF CONTRACT AUTHORIZATION

For payment of obligations incurred in carrying out section 21(a)(2) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), administered by the Urban Mass Transportation Administration, [\$242,000,000] \$450,000,000, to be derived from the Highway Trust Fund and to remain available until expended. The Surface Transportation Assistance Act of 1982 establishes the Mass Transit Account in the Highway Trust Fund, and finances it with the equivalent of one cent per gallon of motor fuels taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations for liquidating cash are authorized to be made from the mass Transit Account to meet expenditures for mass transit capital investments.

The status of the fund is as follows (in thousands of dollars):

1. *Urban formula grants.*—For 1983 only, funding from the Mass Transit Account was authorized to provide grants allocated on the basis of a legislative formula to State and local agencies for mass transportation capital activities in urban areas. Effective in 1984 and subsequent years, funding will be derived from the general fund under the account Formula Grants.

2. *Non-urban formula grants.*—For 1983 only, funding from the Mass transit account was authorized to provide grants allocated by a legislative formula based on population to nonurbanized areas with populations below 50,000. For 1984 and subsequent years, funds for this program are provided under the account formula grants.

3. *Discretionary grants.*—In 1984 and subsequent years, funding from the Mass transit account of the Highway trust fund will provide discretionary grants for purposes such as rehabilitation, construction, and modernization of transit facilities and equipment, innovative transit demonstration projects, and technical planning.

Note.—This account has been adjusted to reflect management savings resulting from consolidation of administrative support services, efficiency reviews of Government commercial activities and reductions in printing plants.

1. *Operations*—(a) *Operation of traffic control system*.—This activity covers the operation of a national system of air traffic management in the United States, its territories and possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 24 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at major civil airports to guide traffic movements at and in the vicinity of the airports. A system of domestic and international flight service stations provide weather and other information to pilots and relay traffic control data between ground controllers and pilots.

(b) *Installation and materiel services*.—This activity covers procurement, contracting and materiel management programs; administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leased space for which payment is made to General Services Administration (GSA); and other logistics support functions.

(c) *Maintenance of traffic control system*.—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; operational leased communications; and technical oper-

ation and maintenance of a national network of air navigation aids and traffic control facilities in the United States, and its territories and possessions.

(d) *Administration of aviation standards program*.—This activity exists to promote flight safety of civil aviation by assuring: the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards. In addition, this activity covers the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program, and to ensure the medical fitness of personnel in the national airspace system.

(e) *Development direction*.—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development appropriation.

(f) *Administration of airports program*.—This activity includes the following work programs: (1) administration of an airport grant program for airport planning and development; (2) maintenance of the national plan of integrated airport systems; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; and (5) safety certification of airports serving air carriers utilizing aircraft with a seating capacity of more than 30 passengers.

(g) *Direction, staff and supporting services*.—This activity covers administrative and housekeeping functions such as administrative supplies, communications, and payrolls at Oklahoma City, Atlantic City, and regional offices. Included also for these locations are activities for direction and management, public affairs, international aviation, legal, accounting, budget, civil rights, personnel management, labor relations, communication control, data systems, and management systems. Also included are centrally managed items, such as Federal employees compensation payments, unemployment compensation, and penalty mail.

(h) *Centralized training*.—This activity funds the cost of instructor staff and related services, supplies and equipment, student travel and per diem costs, and cost of planning, supervising and directing training for the agency's predominantly technical workforce. The training is conducted generally on a centralized basis at the FAA Academy located at Oklahoma City and the FAA Management Training School at Lawton, Oklahoma.

(i) *Headquarters administration*.—This activity was funded as a separate appropriation in 1984, but is being proposed as an activity within this appropriation in 1985. It provides administrative services at the headquarters location of the Federal Aviation Administration including procurement, executive direction, communications control, public affairs, legal, planning/policy, accounting, budget, civil rights, international aviation, personnel management, labor relations, management/data systems, and centralized training.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Dulles International Airports which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

In 1984, a completed management initiative resulted in the contracting out of the custodial functions at the airports. This action resulted from an OMB Circular A-76 cost comparison analysis which found contracting out to be more economical. To alleviate critical staffing shortages, 31 of the 35 vacated custodial positions have been converted to other uses, primarily police. Washington National is expected to produce an operating profit of \$16.9 million and Dulles International an operating profit of \$131 thousand, resulting in a combined operating profit of \$17 million. The deduction of \$7.8 million in depreciation and interest for the two airports results in a net profit of \$9.2 million.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

The following table reflects activity at the airports:

This appropriation finances construction of major improvements and expansion of facilities at Washington National Airport and Dulles International Airport. Projects are undertaken whenever necessary to ensure the capability of these airports to adequately, safely, and efficiently meet air travel needs of the public.

At Washington National Airport, funds are requested to rehabilitate airport buildings, airfield facilities, utility systems and airport roads.

At Dulles International Airport, funds are included to construct parking facilities and rehabilitate airport roads.

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

Income to the fund is derived from premium deposits for premium insurance coverage issued, income from authorized investments, and binder fees for nonpremium coverage issued. The binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exist indemnity agreements under which the DOD and DOS agree to reimburse the Department of Transportation for all payments on account of losses to air carriers sustaining damage to their aircraft by an insured peril with respect to the aircraft operating under contract to DOD and DOS.

Administrative costs are paid from the Aviation Insurance Revolving Fund, into which are credited receipts from premiums, salvage, and interest on assets of the fund (49 U.S.C. 1536).

The Tax Equity and Fiscal Responsibility Act of 1982 (26 U.S.C. 9502) provides for the revenues received in the Treasury from the 8% passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet obligations for airport planning and development and noise compatibility planning and programs; facilities and equipment; research, engineering and development; and a portion of operations.

¹ Reappropriated in accordance with provisions of Public Law 97-369.

The Airport and Airway Improvement Act of 1982 (Public Law 97-248, as amended) authorizes the Secretary of Transportation to incur obligations for grants, airport planning and development, and noise compatibility planning and programs through 1987. Obligations in 1985 are proposed to be \$987 million, the newly authorized 1985 amount provided in the Airport and Airway Improvement Act of 1982, as amended by the Surface Transportation Assistance Act of 1982.

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)

For necessary expenses, not otherwise provided for, for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities, including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; construction and furnishing of quarters and related accommodations of officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available, and the lease or purchase of [six] three aircraft; to be derived from the Airport and Airway Trust Fund and to remain available until September 30, [1988] 1989, [\$750,000,000] \$1,657,000,000: Provided, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities. Under this appropriation, the Federal airway system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs, such as aircraft for flight inspection of facilities, and related training, and experimental facilities for the engineering and development program. The operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

The funding requested for 1985 is in accordance with the Federal Aviation Administration's comprehensive plan for modernizing and improving air traffic control and airway facilities services.

Budget activities include:

1. *Air route traffic control centers.*—Long-range radar, communications and automation equipment provide air traffic controllers information on aircraft positions at distances up to 185 miles.

2. *Airport traffic control towers.*—Terminal area radar, communications and automation equipment aid air traffic controllers in handling air traffic at distances up to 60 miles.

3. *Flight service facilities.*—Flight service stations and associated facilities provide flight assistance to pilots, particularly general aviation pilots.

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)—
Continued

4. *Air navigation facilities.*—Very high, medium and low frequency facilities are used to define airways and air routes and provide distance, direction and weather information to pilots. Precision landing systems, distance measuring equipment and visual lighting aids assist pilots in making final approaches to airport runways.

5. *Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations.

6. *Aircraft and related equipment.*—This activity includes the procurement, modification and/or replacement of aircraft and equipment both to inspect the accuracy and other characteristics of navigation and traffic control aids from the air and to conduct research and development activities.

7. *Development, test and evaluation facilities.*—This activity provides for leasing and improvements of the plant and facilities at the Federal Aviation Administration Technical Center in Atlantic City, N.J.

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase its productivity and capacity to meet the expected air traffic demands of the future. These efforts are based upon exploiting current technology and applying system engineering techniques to the development and integration of new equipment into the total system. The agency also administers aviation medical research aimed at increasing the personal effectiveness of air traffic controllers.

These programs are conducted under the direction of the agency's technical personnel, and through contracts with qualified private firms, universities, individuals and other Government agencies.

1. *Air traffic control.*—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the surveillance of aircraft by tracking radars and control center processing of flight information received from pilots, airline dispatchers, flight service stations and the surveillance system through a national communications network. The high-speed or real-time, computerized

processing of this data for the direct use of air traffic controllers is a key to increasing system productivity.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

2. *Advanced computer.*—This activity modernizes the air traffic control system by providing for an advanced automation system to accommodate air traffic services forecasted demands in the post-1990's. This system will increase air traffic control system capacity, reliability, functional capability, and productivity. Program efforts include design, development, and testing of a host computer and advanced automation system.

3. *Navigation.*—This activity provides for modernization, expansion, and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation. The requested 1985 funds will support research and development activities for enroute navigation to assess candidate navigation systems for use in the post-1995 period.

4. *Aviation weather.*—This activity provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of doppler weather radars and weather processors, and research into hazardous weather phenomena in terminal areas will be emphasized.

5. *Aviation medicine.*—This activity provides for conducting aeromedical research directed toward identifying and eliminating those physiological and psychological factors harmful to personnel engaged in operating the traffic control system or which may jeopardize flight safety.

6. *Aircraft safety.*—This activity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft by assuring the design, flight performance, and airworthiness of aircraft. Development of systems and devices to prevent and deter sabotage in the civil air transportation system will also continue. Funds requested for 1985 will continue research in fire safety, including cabin fires, and complete the development and testing of anti-misting fuels. Also continuing is research in transport, general aviation, and flight safety.

7. *Environment.*—Principal efforts under this activity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system. In 1985, research will continue into air pollution and noise control, primarily associated with certification and enforcement requirements.

The Airport and Airway Improvement Act of 1982 authorizes use of the airport and airway trust fund as the source of financing a portion of FAA's operating costs. In 1985, the trust fund would finance \$1,763 million of these expenses. Of the \$1,763 million, \$500 million is partial restoration of trust fund reimbursement foregone in 1984 due to appropriations below the authorization for facilities and equipment reduction. Based on views expressed by aviation industry contributors to the trust fund, the administration is proposing to recoup this \$500 million consistent with its proposal

Funds for operating expenses represent 61.4 percent of the total Coast Guard program level. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas. Amounts requested for the activities described below reflect savings and/or cost avoidances to be achieved through new, or ongoing, management initiatives including consolidation of various support functions such as military personnel offices and accounting systems and increased utilization of contracting out of support activities and maintenance of aids to navigation.

1. *Search and rescue.*—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert capable of responding to notice of a distress incident.

WORKLOAD DATA

	1983 actual	1984 estimate	1985 estimate
Responses to search and rescue cases:

Property loss prevented (in thousands).....	614,500	600,000	580,000

2. *Aids to navigation.*—A network of manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. In 1985, a pilot program to contract for the maintenance of aids to navigation in a selected portion of the coastal and intercoastal waterways will be conducted. Administrative control is exercised over the construction, maintenance, and operation of bridges across navigable waters of the United States.

3. *Marine safety.*—The Coast Guard reviews plans and specifications for the construction or alteration of merchant vessels; conducts periodic inspections; investigates casualties; and sets standards, procedures, and practices under which merchant marine personnel are licensed and regulated. The Coast Guard operates a boat safety standards program and provides boater information and support of the Coast Guard Auxiliary and the individual State boating safety programs.

4. *Marine environmental protection.*—Under various laws, international agreements, and conventions, the Coast Guard is charged with the prevention of damage to the marine environment, response to pollution incidents, and the enhancement of environmental quality. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways.

WORKLOAD DATA

5. *Enforcement of laws and treaties.*—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction. Fisheries enforcement involves living marine resources, while general law enforcement concerns drug smuggling, illegal immigration, hijacking/theft of vessels and other unlawful activities.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating expenses appropriation where estimated costs of a program are \$125 thousand or less, or where renewals and replacements involve less than 75 percent of the original facility. Most of the facilities financed by this appropriation are multi-mission in nature and are required by the Coast Guard in the performance of its operational and regulatory missions.

In 1984, this appropriation was increased by \$300 million transferred from the Department of Defense. These additional funds are being used to accelerate modernization of the 378-foot high endurance cutters, initiate a replacement program for older patrol boats, complete the C-130 airframe program and construct the shore facilities needed to support related activities.

For 1985, this appropriation will provide for continuing ongoing new vessel/boat procurements including the 270-foot medium endurance cutters and the 140-foot icebreaking tugs. Major emphasis will be focused on vessel renovation and modernization of seagoing buoy tenders, 210-foot medium endurance cutters, and 378-foot high endurance cutters. The short-range recovery helicopter procurement program will continue and the final phase of the C-130 airframe procurement will be funded. Construction, replacement, and/or renovation programs at selected multi-mission shore facilities and aids to navigation will also continue.

Coast Guard Reserve Forces provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested will provide a Ready Reserve of 17,500, including a Selected Reserve of 12,500.

1. *Initial training.*—This activity encompasses direct costs of initial training for three categories of nonprior service trainees.

2. *Continuing training.*—Direct costs of officer and enlisted drills and annual active duty for training are programed under this activity.

3. *Operation and maintenance of training facilities.*—All costs for the operation and maintenance of Reserve training facilities are programed under this activity.

4. *Administration.*—This activity encompasses all administrative costs of the Reserve Forces program.

5. *Miscellaneous services for other accounts.*—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

The Coast Guard's Research and Development program seeks to maintain and expand the technological base in areas crucial to the successful execution of the Coast Guard's operational and regulatory missions. The R&D program includes the development of techniques, methods, hardware, and systems which directly contribute to increasing the productivity and effectiveness of operating forces. Tests and evaluations are carried out in conjunction with research and development. The 1985 program will provide for: development of improved search and rescue capability, including support for replacement of patrol boat (WPB) capability; development of improved aid to navigation performance techniques; development of improved commercial vessel safety and recreational boating safety knowledge bases to support establishment, modification, or discontinuance of various regulations and standards; development of systems and procedures for control and cleanup of pollutant spills; development of techniques to support law enforcement efforts; and research, development, test, and evaluation in broad program, energy, and multi-mission project areas.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, onshore facility, or offshore facility do not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators.

MARITIME ADMINISTRATION

The programs administered by the Maritime Administration (MarAd) are authorized by the Merchant Marine Act, 1936, and other related acts. The Agency promotes the development and maintenance of an American merchant marine for commercial and defense needs; grants subsidy aid for operation of vessels by American flag operators; conducts maritime research and development; insures construction loans and mortgages for construction or conversion of vessels; maintains in a standby condition Government-owned fleets; and trains cadets to become licensed merchant ship officers.

The following table shows the funding for the MarAd programs for which detail is furnished in the budget schedules:

Funds were appropriated in 1983 which are being used for acquisition of four vessels for the National Defense Reserve Fleet. The appropriated funds were more than necessary to cover acquisition, trade-in, and lay-up expenses for the four vessels. The remaining funds are being transferred to the research and development appropriation to offset a portion of the 1985 funding request. No funds are requested in 1985.

The Merchant Marine Act of 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing essential ocean-shipping services. A strong U.S. Merchant Marine is important to the national security and to the development of its foreign commerce. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs. The 1985 request provides funds for existing operating-differential subsidy contracts. No new contracts are included.

The major objective of the research and development program is to develop methods, equipment, and systems to make the U.S. shipbuilding and ship operating industries more efficient, competitive, and productive.

In 1985, the research and development program will focus on basic research projects in four major program areas as follows:

1. *Advanced ship development.*—This program involves projects to achieve greater productivity in the building of ships and projects directed toward the development of new and improved ship machinery.

2. *Advanced ship operations.*—This program supports improving the efficiency, competitiveness, and safety of U.S.-flag ship operations through the development of advanced management operating techniques using computerized systems, improving fleet control by means of advanced navigation/communication systems, improving cargo handling methods and equipment, and improving intermodal cargo movement.

3. *Research facilities.*—This program provides for research facilities operations, and investigation and simulation of new problems related to ship operations, safety, and design.

4. *Advanced maritime technology.*—This program investigates advanced technological concepts and requirements, and formulates and conducts specific systems analysis and systems development projects.

1. *Maritime education and training*—(a) *Merchant Marine Academy*.—This activity provides for operating the Merchant Marine Academy at Kings Point, N.Y. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Approximately 230 officers will graduate in 1985.

(b) *State marine schools*.—Assistance is provided to States in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers. This assistance involves direct payments to the State schools, student incentive payments to cadets, and maintenance of vessels provided for use as training ships. An estimated 700 officers will graduate from these schools in 1985.

(c) *Additional training*.—This activity provides for costs of administration of the Merchant Marine Academy and State marine school programs at the bureau level, and for the conduct of supplementary training courses required for merchant marine personnel.

2. *National security support capability*.—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and na-

tional emergency and for emergency preparedness activities.

3. *Operating programs*—(a) *Development of waterborne transportation systems*.—This activity provides for direct technical and administrative costs of programs for development and construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives.

(b) *Use of waterborne transportation systems*.—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation.

(c) *General administration*.—This activity provides for overall executive direction and general administrative functions of the Maritime Administration. Reductions in directly funded staffing reflect planned increases in the use of contracted services and other management efficiencies.

¹ This amount is available if needed in the interest of national security.

The Merchant Marine Act of 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. merchant marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) established a limitation on MarAd obligations guaranteed and outstanding at any time under Title XI of the Merchant Marine Act amounting to \$9.5 billion. For 1985, appropriation language is proposed to impose an annual limitation of \$900 million on new guaranteed loan commitments. Of that amount, \$300 million will be held in reserve, to be used only if needed in the interest of national security.

The estimated level of new commitments and guaranteed construction loans and mortgages, and the estimated aggregate level of guarantees in force and commitments outstanding are shown in the following table:

COMMITMENTS FOR CONSTRUCTION LOAN AND MORTGAGE GUARANTEES

Budget program.—Administrative expenses incurred in the operation of the Federal ship financing fund are paid from income to the fund. Reimbursements to the Operations and training appropriation are anticipated at \$4,400 thousand in 1984 and 1985. The estimate also includes \$4,000 thousand for expenses incidental to protection of vessels acquired primarily through defaults. Direct loans in the form of advances to operators to forestall possible defaults and to satisfy claims on defaulted mortgages are estimated at \$25 million in 1984 and \$20 million in 1985. In 1984 the estimate includes \$60 million as a contingency against possible defaults.

Financing.—The fund receives income from insurance premiums on construction loans and mortgages, fees, and interest on U.S. Government securities and mortgages held directly.

The Maritime Administration is authorized to reactivate, operate, deactivate, and charter merchant vessels. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States; and to process advances received from Federal agencies.

Budget program.—The 1985 program anticipates an increased level of maintenance and upgrading of the Ready Reserve Fleet and activation and operation of ships as directed by the Navy. Beginning in 1984, Marad will act as agent for the Navy in the acquisition of additional ships. Projected acquisition costs are \$31 million in 1984 and 1985.

Financing.—Expenses are principally financed by reimbursements from Federal agencies.

The Maritime Administration is authorized to insure against loss or damage from marine war risks until commercial insurance can be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program. Authority to underwrite insurance expires September 30, 1984. An extension of the authority will be sought.

Budget program.—It is estimated that during 1985 insurance coverage will be provided for approximately 615 U.S.-flag ships, 2,250 Lighter Aboard Ship (LASH) and Seabee barges, and 75 foreign-flag ships owned by U.S. citizens. The program also includes provision for second seamen's war risk insurance covering the crews of 18 vessels under contract with the Military Sealift Command.

Financing.—The War risk insurance revolving fund was established under 46 U.S.C. 1288. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income.

The Saint Lawrence Seaway Development Corporation is a wholly owned Government Corporation responsible for the operation, maintenance, and development of the U.S. portion of the St. Lawrence Seaway between Montreal and Lake Erie. Corporation objectives are to continue to operate the system in a safe, reliable and efficient manner from funds received from user charges. Structural repair and maintenance programs during the winter down time period ensure continuity of operations during the navigation season. The Corporation's 1985 budget reflects the activities to accomplish these objectives as follows:

1. *Administrative expenses (limitation).*—This program provides for management and administration of the Corporation, and includes finance, legal, civil rights, procurement, personnel administration, and other related support services.

2. *Operations.*—This program provides for operation of all facilities and for planning and development activities. Operations are conducted on a 24-hour day, 7-day week basis throughout the navigation season with maintenance functions being performed throughout the year.

3. *Replacements and improvements.*—This program provides for necessary replacement of aging equipment, machinery, and tools in addition to continuing work on improvements. The Corporation also expects to continue a cooperative program with the Canadian Seaway Authority and the U.S. and Canadian Coast Guards to develop an all-weather navigation system for the St. Lawrence River.

On the basis of the toll levels for the 1984 navigation season and traffic projections agreed to by the U.S. and Canadian entities, the Corporation estimates its revenues for 1985 will be \$11.5 million.

During the fiscal year, the Corporation proposes to utilize \$10.9 million for operations and \$0.6 million for replacements and improvements. Of the \$10.9 million to be applied to operations, \$9.1 million will be used for operations and maintenance and \$1.8 million for administrative expenses.

The Research and Special Programs Administration serves as a research, analytical, and technical development arm of the Department for multimodal research and development, as well as special programs. Particular emphasis is given to pipeline safety and transportation of hazardous cargo by all modes of transportation. Responsibilities of the Administration are carried out under the following activities:

1. *Operations.*—Provides for salaries and expenses and for central supervisory and management functions, including a management information system necessary for overall planning and direction. Provides for management and execution of transportation programs involving passenger and cargo security, facilitation services, national emergency plans/preparedness, and management of the Transportation Safety Institute. Provides for hazardous materials and pipeline safety regulatory and enforcement programs.

2. *Research and development.*—Provides for research to support the hazardous materials and pipeline safety regulatory programs, to complement research programs

of other operating administrations, and to stimulate industry efforts to advance transportation technology.

3. *Grants.*—Provides for grants-in-aid to State agencies of up to 50% of the actual costs of conducting a gas pipeline safety program as authorized by the Natural Gas Pipeline Safety Act of 1968.

The Working Capital Fund finances research, evaluation, and analysis activities at the Transportation Systems Center (TSC) in Cambridge, MA. TSC performs multidisciplinary research for each of the operating administrations and the Office of the Secretary. Work at TSC is funded through negotiated agreements which define the programmatic activities desired by each of the funding organizations.

It appears that it is no longer appropriate that TSC continue as a Federal entity. DOT currently is studying how and whether the research activities undertaken by TSC will be discontinued, decentralized, or continued at TSC under private sector operation.

1. *General administration.*—This appropriation finances the costs of policy development and central supervisory and coordinating functions necessary for the overall planning and direction of the Department. It covers the immediate secretarial offices as well as those of the assistant secretaries and the general counsel. Also covered are staff assistance and supervision of general management and administration in the Department. In addition, the Office of the Secretary provides services on a reimbursable basis for technical assistance to transportation projects, and participation in intergovernmental planning groups.

2. *The Minority Business Resource Center.*—This activity provides contractual support for the Center, which now operates in the Office of the Secretary to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of the restructuring of the Nation's railroads and other modes of transportation.

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

1. *Transportation policy and planning.*—This research provides the foundation for development of transportation policy, for coordination of national level transportation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

2. *Special programs.*—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, technology sharing, and evaluation of departmental programs.

3. *University research and internships.*—This activity provides assistance to colleges, universities and their students to conduct research in the field of transportation. Special emphasis is placed on assisting historically Black colleges and universities in taking part in transportation research and aiding minority students in preparing for careers in transportation.

The working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed by the operating administrations and offices being served. This account has been adjusted to reflect management savings resulting from efficiency reviews of government commercial activities and reduction in printing plants.

The activities of the working capital fund have been consolidated as follows:

1. *Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

2. *Support services activities* include imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; facilities and space management; and security service.

3. *Library services* include information retrieval and security services.

4. *Transportation computer activities* include computer time-sharing services and the transportation computer center. This activity will be contracted out to achieve greater efficiencies.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 303. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 304. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

SEC. 305. None of the funds provided under this Act for Formula grants shall be made available to support mass transit facilities, equipment, or operating expenses unless the applicant for such assistance has given satisfactory assurances in such manner and forms as the Secretary may require, and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours shall not exceed one-half of the rates generally applicable to other persons at peak hours: *Provided*, That the Secretary, in prescribing the terms and conditions for the provision of such assistance shall (1) permit applicants to continue the use of preferential fare systems for elderly or handicapped persons where those systems were in effect on or prior to November 26, 1974, (2) allow applicants a reasonable time to expand the coverage of operating preferential fare systems as appropriate, (3) allow applicants to continue to use preferential fare systems incorporating the offering of a free return ride upon payment of the generally applicable full fare where any such applicant's existing

fare collection system does not reasonably permit the collection of half fares, and (4) allow applicants to define the eligibility of "handicapped persons" for the purposes of preferential fares in conformity with other Federal laws and regulations governing eligibility for benefits for disabled persons.]

SEC. [306] 305. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

SEC. [307] 306. None of the funds provided in this Act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

- (1) School street crossing in Groton, Connecticut; and
- (2) Broadway Extension crossing in Stonington, Connecticut.

SEC. [308] 307. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 309. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation.]

SEC. [310] 308. None of the funds contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 311. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. 312. (a) Neither the Secretary of the department in which the Coast Guard is operating or any other officer or employee of the United States shall approve any project or take any action which would interfere with the reasonable needs of navigation on the Columbia Slough, Oregon.]

(b) For purposes of subsection (a) of this section, any bridge which is to be constructed across the Columbia Slough, Oregon, after the date of enactment of this section shall be deemed to provide for the reasonable needs of navigation on the Columbia Slough, Oregon, if such bridge provides at least thirty feet of vertical clearance Columbia River datum and at least eighty feet of horizontal clearance, as determined by the Secretary of the department in which the Coast Guard is operating.]

SEC. 313. (a) The City of Gadsden, Alabama, and its successors and assigns are hereby released from all the terms, conditions, reservations, and restrictions contained in the deed dated May 25, 1962, by which the United States conveyed certain real property to the city of Gadsden, Alabama, for airport purposes, insofar as such terms, conditions, reservations, and restrictions relate to the real property described in subsection (b) of this section.]

(b) The real property to which the first subsection of this section applies is the real property located in Gadsden, Alabama, which was conveyed to the city of Gadsden, Alabama, by the United States by the deed dated May 25, 1962, and which is described as follows: Commence at the northeast corner of section 19, township 12 south, range 7 east, thence run south along the east line of section 19 a distance of 1,495.93 feet more or less to a point; thence deflect 90 degrees 04 minutes right and run in a westerly direction a distance of 1,038.85 feet more or less to a point, said point being the point of beginning; thence deflect 90 degrees 03 minutes right and run in a northerly direction a distance of 1,152.45 feet to a point, thence deflect 90 degrees 00 minutes right and run in an easterly direction a distance of 38.1 feet to a point; thence deflect 90 degrees 00 minutes left and run in a northerly direction a distance of 62.0 feet to a point; thence deflect 90 degrees 00 minutes right and run in an easterly direction a distance of 329.7 feet to a point; thence deflect 90 degrees 00 minutes left and run in a northerly direction a distance of 298.47 feet to a point on the south right-of-way line of Rabbit Town Road; thence deflect 80 degrees 43 minutes left and run in a westerly direction along the south right-of-way line of Rabbit Town Road a distance of 738.2 feet to a point; thence deflect 99 degrees 15 minutes left and run in a southerly direction a distance of 1,448.75 feet to a point; thence deflect 91 degrees 07 minutes left and run in an easterly

direction a distance of 81.0 feet to a point; thence deflect 91 degrees 30 minutes right and run in a southerly direction a distance of 185.2 feet to a point; thence deflect 89 degrees 28 minutes left and run in an easterly direction a distance of 279.08 feet to the point of beginning. Being a portion of the northeast quarter of section 19, and a portion of section 18, township 12 south, range 7 east, lying south of the Cherokee Indian boundary line in Etowah County, Alabama.】

【SEC. 314. The Congress intends and directs that the proposed rulemaking to adjust the annual passenger ceiling at Washington National Airport be held in abeyance for at least 60 days from the date of enactment of this Act.】

【SEC. 315. None of the funds provided in this Act for the Department of Transportation shall be used for the enforcement of any rule with respect to the repayment of construction differential subsidy for the permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, until 60 days following the promulgation of any such rule.】

【Notwithstanding any other provision of law, the enforcement of any rule regarding the repayment of construction differential subsidy for the permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, shall be held in abeyance for at least 60 days from the date of enactment of this Act.】

【SEC. 316. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.】

【SEC. 317. No funds appropriated under this Act shall be expended to pay for any travel by the Administrator of the Federal Aviation Administration as passenger or crew member aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: *Provided*, That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator within 6 hours local time of the desired time of arrival: *Provided further*, That this limitation shall not apply to costs incurred by any flight which is essentially for the purpose of inspecting, investigating, or testing the operations of any aspect of the Federal Aviation Administration system designed to aid and control air traffic, or to maintain or improve aviation safety: *Provided further*, That this limitation shall not apply to costs incurred by any flight in Department of Transportation aircraft which is necessary in times of emergency or disaster, or for security reasons, or to fulfill official diplomatic representation responsibilities in foreign countries: *Provided further*, That written certifications shall be issued quarterly on all flights initiated in the previous quarter subject to this limitation and shall be made readily available to Congress and the general public.】

【SEC. 318. Section 120(j) of title 23, United States Code, is amended by inserting after the word "Representatives" the following: "; and for funds allocated under the provisions of section 155 of this title and obligated subsequent to January 6, 1983."】

【SEC. 319. None of the funds in this or any other Act shall be used by the Federal Aviation Administration for any facility closures or consolidations prior to December 1, 1983: *Provided*, That the Federal Aviation Administration shall, no later than October 1, 1983, submit to the appropriate committees of the Congress a detailed, site-specific, and time-phased plan, including cost-effectiveness and other relevant data, for all facility closure or consolidations over the next three years: *Provided further*, That, in the instance of any proposed closure or consolidation questioned in writing by the House or Senate Committees on Appropriations or by any legislative committee of jurisdiction, no such proposed closure or consolidation shall be advanced prior to April 15, 1984, in order to allow for the timely conduct of any necessary congressional hearings.】

【SEC. 320. Section 145 of Public Law 97-377, approved December 21, 1982, is amended (1) by designating the existing text thereof as subsection (a), and (2) by adding at the end thereof the following new subsection:】

【“(b) The amendment made by subsection (a) of this section shall be effective as of 5 o'clock ante meridian eastern daylight time, August 3, 1981.”】

【SEC. 321. (a) The Congress finds that—

(1) in this Nation there exist millions of handicapped people

with severe physical impairments including partial paralysis, limb amputation, chronic heart condition, emphysema, arthritis, rheumatism, and other debilitating conditions which greatly limit their personal mobility;

(2) these people reside in each of the several States and have need and reason to travel from one State to another for business and recreational purposes;

(3) each State maintains the right to establish and enforce its own code of regulations regarding the appropriate use of motor vehicles operating within its jurisdiction;

(4) within a given State handicapped individuals are oftentimes granted special parking privileges to help offset the limitations imposed by their physical impairment;

(5) these special parking privileges vary from State to State as do the methods and means of identifying vehicles used by disabled individuals, all of which serve to impede both the enforcement of special parking privileges and the handicapped individual's freedom to properly utilize such privileges;

(6) there are many efforts currently underway to help alleviate these problems through public awareness and administrative change as encouraged by concerned individuals and national associations directly involved in matters relating to the issue of special parking privileges for disabled individuals; and

(7) despite these efforts the fact remains that many States may need to give the matter legislative consideration to ensure a proper resolution of this issue, especially as it relates to law enforcement and placard responsibility.】

【(b) The Congress encourages each of the several States working through the National Governors Conference to—

(1) adopt the International Symbol of Access as the only recognized and adopted symbol to be used to identify vehicles carrying those citizens with acknowledged physical impairments;

(2) grant to vehicles displaying this symbol the special parking privileges which a State may provide; and

(3) permit the International Symbol of Access to appear either on a specialized license plate, or on a specialized placard placed in the vehicles so as to be clearly visible through the front windshield, or on both such places.】

【(c) It is the sense of the Congress that agreements of reciprocity relating to the special parking privileges granted handicapped individuals should be developed and entered into by and between the several States so as to—

(1) facilitate the free and unencumbered use between the several States, of the special parking privileges afforded those people with acknowledged handicapped conditions, without regard to the State of residence of the handicapped person utilizing such privilege;

(2) improve the ease of law enforcement in each State of its special parking privileges and to facilitate the handling of violators; and

(3) ensure that motor vehicles carrying individuals with acknowledged handicapped conditions be given fair and predictable treatment throughout the Nation.】

【(d) As used in this section the term "State" means the several States and the District of Columbia.】

【(e) The Secretary of Transportation shall provide a copy of this section to the Governor of each State and the Mayor of the District of Columbia.】

【SEC. 322. Notwithstanding any other provision of law, the limitation on total obligations for Federal-aid highways and highway safety construction programs for fiscal year 1984 contained in title I of this Act shall be reduced by \$80,000,000.】

【SEC. 323. None of the funds appropriated by this Act or any other Act may be obligated or expended before October 15, 1983—

(1) to adopt, to issue, or to carry out a final rule or regulation, a final revision, addition, or amendment to regulations, or a final statement of policy based on any proposed rule, or regulation, any proposed revision, addition, or amendment to regulations, or any proposed statement of policy of which a notice was published in parts III-VI of the Federal Register on March 30, 1983 (48 F.R.

13,342 to 13,381) or in parts III through VI of the Federal Register on July 14, 1983 (48 F.R. 32,275 to 32,312); or

(2) to adopt, to issue, or to carry out any final rule or regulation, any final revision, addition, or amendment to a regulation, or any final statement of policy which effectuates the purposes of any proposed rule, regulation, revision, addition, amendment, or statement of policy referred to in clause (1).】

SEC. 309. On October 1, 1984, the receipt account "Panama Canal Commission Fund" shall be terminated, and any unappropriated balances of receipts under such account as of that date shall be covered into the General Fund of the Treasury. Effective October 1, 1984, receipts of the Commission shall be credited to the miscellaneous receipts of the Treasury.

SEC. 310. References in the Panama Canal Act of 1979 (22 U.S.C. 3601-3871) to "revenues deposited in the Panama Canal Commission fund" shall mean "receipts of the Panama Canal Commission deposited in the Treasury." (Department of Transportation and Related Agencies Appropriation Act, 1984; additional authorizing legislation to be proposed.)

SEC. 311. No funds under this Act shall be used by the Interstate Commerce Commission to pay the rent for any space or facilities for the national organization of the State commissions and their representatives, nor shall the Administrator of General Services assign space and facilities to said organization on a preferential basis.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.

【None of the funds provided in this Act for the Maritime Administration shall be used for enforcement of any rule with respect to the repayment of construction differential subsidy for permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, as amended, until June 15, 1984.】

Note.—The activities previously financed under Department of the Treasury, Office of the Secretary, International Affairs in 1983 are presented in these schedules and are financed in this account in 1984 and 1985. Budget authority and outlays are distributed by account above.

The Office of the Secretary serves as the principal policy formulation and implementation arm of the Secretary of the Treasury.

1. *Secretarial policy and program development.*—The Secretary has primary responsibility for formulating and recommending domestic and international financial policy, economic policy, and tax policy; managing the public debt; developing automated information processes; and participating in the formulation of broad fiscal policies that have general significance for the economy.

2. *Inspector General.*—This activity is responsible for maintaining a comprehensive audit and internal investigation program. It is organizationally independent and reports directly to the Secretary and the Deputy Secretary.

3. *International affairs.*—The programs conducted within this activity are designed to provide the necessary analysis for and to implement international monetary and development financing policy. Additional staff support is provided in areas concerned with international investment, trade and balance of payments issues.

4. *Departmental policy and administrative services.*—This activity provides central administrative policies and guidance to the entire Department; the direct administrative support required for the Office of the Secretary operations; and computer support and services.

5. *Buildings maintenance and operations.*—This activity provides for maintenance and operation of the main Treasury Building and the Annex, including utilities and custodial and craftsmen services. In addition, this activity provides for all telecommunications facilities and services and the Federal buildings fund payment for all space occupied by the Office of the Secretary outside of the Treasury Building and the Annex.

6. *Repairs and improvements.*—This activity provides the funding for major repairs and improvements to the Treasury Building and Annex.

1. *Matching funds in primaries.*—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to an amount

equal to the contributions each has received on or after the beginning of the calendar year immediately preceding the election year.

2. *Nominating conventions of parties.*—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive \$3 million each, plus a cost-of-living increase.

3. *Candidates for general elections.*—The eligible candidates of each major party in a Presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures.

The Secretary of the Treasury is authorized to deal in gold and foreign exchange and other instruments of credit and securities as deemed necessary, consistent with U.S. obligations in the International Monetary Fund (IMF), regarding orderly exchange arrangements. An Exchange Stabilization Fund, with a capital of \$200

million is authorized by law for this purpose (31 U.S.C. 5302). All earnings and interest accruing to this fund are available for the purposes thereof. Transactions in special drawing rights (SDR's) and U.S. holdings of SDR's are administered by the fund. U.S. drawings from the IMF are also advanced to the fund.

The principal sources of the fund's income have been profits on foreign exchange transactions and interest on foreign exchange swap transactions and on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

Due to the impracticability of forecasting fund transactions in foreign currency and foreign investment, projections are not provided for those items. However, as an offset to actual data and projections made in the budget for interest paid on U.S. Government securities, data for the interest income on fund holdings of U.S. Government securities is provided for 1983 and projected for 1984 and 1985. Holdings of U.S. Government securities amounted to \$2,514 million on September 30, 1983. The interest earnings on these securities is estimated to increase these holdings to \$2,735 million in 1984 and \$2,954 million in 1985. As required by Public Law 95-612, the fund no longer is used to meet administrative expenses.

¹ Pursuant to the Special Drawing Rights Act of 1968, Special Drawing Rights (SDR) allocated to or otherwise acquired by the United States are resources of the Exchange Stabilization Fund (ESF). SDR, once allocated, are permanent resources unless cancelled (which requires an 85 percent majority decision of the total voting power of the Board of Governors of the International Monetary Fund), the Special Drawing Account is liquidated, the International Monetary Fund is liquidated, or the United States chooses to withdraw from the Fund or terminate its participation in the Special Drawing Account. Except for payment of interest and charges on SDR allocations to the United States, the payment of the Exchange Stabilization Fund liability related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The Special Drawing Rights Act also authorizes the Secretary of the Treasury to issue Special Drawing Rights certificates to the Federal Reserve Banks in return for dollar deposits in amounts equal to the value of the SDR held. The certificates may be issued to finance the acquisition of SDR from other countries or to provide resources for financing ESF operations.

This trust fund was established by the State and Local Fiscal Assistance Act of 1972 with amendments added in 1983 to provide general revenue sharing payments to only local governments to supplement revenue sources. Payments to recipients are made at least quarterly. It is anticipated that the fourth quarter payment for each year will continue to be paid within the first 5 days of the succeeding year, as provided by law.

During 1983, 39,209 units of general purpose government were eligible to receive revenue sharing funds: 3,106 counties, 19,044 municipalities, 16,726 townships, and 333 Indian tribes and Alaskan villages.

In 1984 and 1985 it is anticipated that approximately the same number of units of general purpose government will be eligible to receive Revenue Sharing funds.

The distribution formulas seek to match payments and local fiscal responsibilities by taking into account each jurisdiction's population, per capita income, and tax effort. Recipients may use the funds for any purposes that are legal purposes for uses of their own locally generated revenues.

The Federal Law Enforcement Training Center provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the participating organizations. Center personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center for common and specialized law enforcement training and for research in law enforcement training methods and curriculum content. The 1985 estimate provides for law enforcement training; maintenance, repair, alteration and minor construction of facilities; planning and curricula development for the Center; and operation of living quarters and food service. In addition, the Center has a substantial reimbursable program to accommodate the needs of the participating organizations and for State and local law enforcement personnel.

This appropriation provides for the costs of adapting the former Glynco Naval Air Station, near Brunswick, Ga., for the permanent location of the Federal Law Enforcement Training Center. Because of the flexible nature of facilities, the campus-like training center will be able to accommodate in excess of 1,300 resident students. The total estimated cost to this appropriation for the facilities, equipment, and services is \$45.9 million.

2. *Government-wide accounting*.—This activity includes maintaining a system of central accounting and reporting; disclosing the monetary assets and liabilities of the U.S. Treasury; and providing for the integration of Treasury cash and funding operations with the financial operations of disbursing and collecting officers of all Federal agencies. Periodic reports are prepared under this function to show budget results, other financial operations, and the financial status of the Government.

In addition, this function includes the check payment and reconciliation operation with volume and related productivity as follows:

3. *Banking and cash management*—(a) *Cash management*.—This activity is involved in the development, implementation, and maintenance of efficient and effective management of the Government's cash resources. It provides guidance to the system for advancing Federal funds under various grant programs and other programs through letters of credit; designates and supervises banks as Government depositories; controls U.S. foreign currency transactions to afford the best currency availability to the Government; develops applications for the use of electronic funds transfer for Government collections and payments; manages the direct deposit marketing program; and develops regulations and legislative authority for the implementation of Reform 88 cash management initiatives.

(b) *Federal Reserve bank operations*.—This activity provides for reimbursements to the Federal Reserve banks for maintenance of Treasury tax and loan accounts, Treasury general account processing, Automated Clearing House Services, and the U.S./Iran Claims Tribunal. Fee payments are made to commercial depositories for FTDs processed under the Tax and Loan Investment program, and the Treasury in turn earns interest on funds held on deposit.

4. *General financial services*.—This activity provides financial services for numerous accounts, including the four Social Security Trust Funds, the Unemployment Trust Fund, D.C. Government Loan accounts, Synthetic Fuel Development Account, Airport and Airway Trust Fund and nearly 30 smaller accounts. In addition, this activity provides for payment of international and other claims, and the administration of the Government Losses in Shipment Act.

In any month when the Railroad Retirement Board finds that the balance in the railroad retirement account is insufficient to pay annuity amounts due to be paid, the Secretary of the Treasury shall transfer to the credit of the railroad retirement account such additional amounts upon notification by the Board. Amounts advanced to the Board may not exceed certain estimat-

ed receipts of the railroad retirement account, and amounts must be repaid to the general fund with interest within 10 days of such receipts.

Because of certain increased taxes and other benefits deriving from the Railroad Retirement Solvency Act of 1983, it is not expected that loans to the Board will continue under this account.

Legislation will be proposed to eliminate a \$250 thousand trust fund, paying \$10 thousand in interest annually, which was established for the American Printing House for the Blind in 1879. Administration of the annual interest payment, which now amounts to less than 1 percent of the direct Federal appropriation to this institution, is no longer cost-effective. The corpus of the trust fund would be transferred to the general funds of the Treasury.

The Energy Security Act established the U.S. Synthetic Fuels Corporation (SFC) to provide financial assistance for the production of synthetic fuels. Payments are made by the Secretary of the Treasury to the SFC as funds are required to meet the SFC's disbursement needs.

Appropriations are made to the Energy Security Reserve in the Treasury. The authority of the SFC to incur obligations will be limited by the level of appropriations to the Secretary of the Treasury.

This fund is for use by the U.S. Treasury in making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorers of the checks through reclamation procedure by this office. Benefits from these early settlements are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

Esther Cattell Schmitt gift fund.—Public Law 87-467 (76 Stat. 88) authorized the acceptance of the gift made to the United States by the will of Esther Cattell Schmitt. The income received from the gift to the United States is paid by the Secretary of the Treasury to beneficiaries named in provisions of the will.

National defense conditional gift fund.—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles other than money are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

Pershing Hall memorial fund.—The Secretary of the Treasury may invest the principal of the Pershing Hall memorial fund in interest bearing U.S. bonds. Earnings are paid to the American Legion for use in the maintenance of Pershing Hall in Paris, France (36 U.S.C. 491).

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency*.—Total deliveries of currency for 1984 and 1985 are estimated to be 5.4 and 6.0 billion notes. During 1983 the Bureau delivered 4.6 billion Federal Reserve notes.

(b) *Stamps*.—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1984 and 1985 are 36.8 and 34.8 billion stamps, respectively. In 1983, the Bureau delivered 38.1 billion stamps.

(c) *Securities*.—This program encompasses the production of a wide variety of bonds, notes, and debentures

for the Bureau of Public Debt and certain other agencies of the Government.

(d) *Commissions, certificates, etc.*—This program is comprised primarily of Presidential and Department of Defense commissions and certificates, White House invitations, and identification cards for various Government agencies. It represents a small portion of the Bureau's total workload.

2. *Space utilized by other agencies.*—Other agencies are charged for services provided in the space occupied in the Bureau's buildings.

3. *Other miscellaneous services.*—A wide variety of miscellaneous services are performed by Bureau personnel for other agencies, which are charged on an actual cost basis.

4. *Purchase of operating equipment.*—This category consists of new purchases and replacement of printing equipment and other related printing items.

5. *Plant alterations and experimental equipment.*—This category encompasses alterations made on the Bureau's buildings and purchases of experimental equipment.

The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656, August 4, 1950 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 1983 resulted in an accumulated retained earnings of \$20.5 million.

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

1. *Processing and accounting for—(a) Savings securities.*—This activity is concerned with the issuance, servicing, and retirement of savings bonds and notes and retirement-type securities, including: (1) The maintenance and servicing of individual accounts of owners of series H and HH bonds and the authorization of interest payments, and (2) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. These functions are performed directly by the Bureau of the Public Debt, by the Federal Reserve Banks as fiscal agents of the United States, and by the 44,000 qualified agents which issue and redeem savings bonds and notes.

(b) *Marketable and special securities.*—This activity is concerned with all securities of the United States, other than savings and retirement securities, including securities of Government corporations for which the Bureau of the Public Debt provides services. Functions performed relate to the issuance, servicing, and retirement of these securities, both directly by the Bureau and through the Federal Reserve Banks, as fiscal agents, including: (1) The maintenance and servicing of individual accounts of owners of registered securities and book-entry Treasury bills; (2) the authorization of interest and principal payments; and (3) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. Beginning in 1985, the Bureau will eliminate all new issues of definitive securities by offering notes and bonds in full book-entry form only. The Bureau is developing in conjunction with the Federal Reserve a new Treasury Direct Access System for new issues of notes and bonds in book-entry form and phasing out the in-house Treasury Bill System to provide for a single

direct access system for all Treasury marketable securities.

2. *Promoting the sale of savings bonds.*—This activity consists of sales promotion efforts, using press, radio, other advertising media, and organized groups, augmented by concentrated sales campaigns emphasizing payroll savings plans. These functions are performed by the U.S. Savings Bonds Division, a separate organization within the Department of the Treasury.

Note.—Internal audit and security is included in "Processing tax returns," "Examination and appeals," and "Investigation, collection, and taxpayer service" as an overhead item in 1984 and 1985.

This appropriation provides for overall planning, direction and management of the Internal Revenue Service.

1. *Executive direction.*—This activity sets policies and goals, provides the research and planning necessary for sound and effective tax administration, and provides leadership and direction for the Service.

3. *Management services.*—This activity provides Servicewide policy guidance for managing the human, logistical and financial resources needed to fulfill the Service's tax administration mission in a cost effective manner while complying with relevant public laws and administrative procedures. It also provides for development of tax forms and instructions and for centralized administrative operations.

Note.—Taxpayer service is included in the account "Investigation, collection, and taxpayer service" in 1984 and 1985.

This appropriation provides for processing tax returns and related documents, and maintaining accurate, current taxpayer accounts by means of an automated system.

1. *Returns processing and revenue accounting.*—This activity provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of those payments, processing and accounting for revenue collections and Federal Tax Deposits (FTD's), and verification through an automated master file system of the accuracy of information provided by the taxpayer. It provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible non-filers for investigation, and assistance in the selection of tax returns for audit. This activity also prepares statistical information and provides for computer operations at the ten service centers, and district offices.

2. *Computer services.*—This activity provides ADP support to process tax returns, maintain account records and aid tax enforcement and productivity management.

Note.—Tax litigation was included in "Salaries and expenses" in 1983. Employee plan and exempt organizations was included in "Investigations and collections" in 1983.

This appropriation provides for the examination of tax returns and the administrative settlement of taxpayer appeals of examination findings. Funds are requested for 1984 to continue the Service's ability to assure evenhanded application and adequate enforcement of the tax laws and to maintain a satisfactory rate of voluntary compliance with the internal revenue

laws. It also provides for monitoring employee pension plans, determining qualifications of organizations seeking tax-exempt status, and examining tax returns of exempt organizations.

1. *Examination.*—This activity encourages voluntary compliance with the internal revenue laws through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers.

2. *Appeals and tax litigation.*—The appeals portion of this authority provides for an independent administrative review of contested tax assessments and adjustments with the objective of settling tax controversies without litigation. When settlement is not possible, the tax litigation portion of the activity provides for the handling of Tax Court litigation and for the coordination of the Service's legal position in order to assure consistency.

3. *Employee plans and exempt organizations.*—This activity monitors private pension plans to insure compliance with the Employee Retirement Income Security Act of 1974, as amended, and the Tax Equity and Fiscal Responsibility Act of 1982, determines whether organizations seeking tax-exempt status meet certain tests to qualify, and examines tax returns of those organizations to insure compliance with such an exemption and to insure payment of unrelated business income taxes. It also examines the returns of private foundations to insure payment of proper excise taxes.

This appropriation provides for enforcing statutes relating to detection and investigation of criminal violations of the Internal Revenue laws, collecting unpaid accounts, securing unfiled tax returns and payments, providing assistance to taxpayers and preparing technical rulings.

1. *Tax fraud investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of Internal Revenue laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

2. *Collection.*—This activity has the responsibility for collecting unpaid accounts and securing delinquent returns; developing and implementing programs to prevent accounts from becoming delinquent and preventing nonfiling; and determining and analyzing the reasons for and the types of nonfiling.

3. *Taxpayer service.*—This activity aids voluntary compliance with Federal tax laws by informing taxpayers of their responsibilities and by providing services and information through various media which assist them in meeting their obligations. Inquiries concerning tax laws, IRS notices and procedures and tax account problems are resolved.

4. *Enforcement, litigation and rulings.*—This activity provides legal advice and assistance to field enforcement activities, furnishes non-tax legal services and issues rulings and opinions as to the application of tax laws.

The Energy Tax Act of 1978 authorized a solar-wind business energy credit beginning October 1, 1978. There will be instances where a solar-wind business credit will exceed the amount of tax liability owed on the return resulting in either an offset to another tax liability of the filer or a refund. This account provides for those

funds which are required to cover the offsets (to other liabilities) or make payments to businesses when solar-wind credits exceed the tax liabilities owed as provided by Public Law 95-618.

Public Law 96-223 repealed the refundable credit for solar or wind property for taxable years beginning after December 31, 1979. Funds will be required through 1985 to cover offsets or make payments resulting from amended returns filed, the examination of returns filed, and other returns filed for the years covered by the statute.

As provided by law, there will be instances wherein the earned income tax credit will exceed the amount of tax liability owed, resulting in an additional payment to the tax filer. The Earned Income Credit was originally authorized by the Tax Reduction Act of 1975 (Public Law 94-12) and made permanent by the Revenue Adjustment Act of 1978 (Public Law 95-600).

Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections which must be refunded. Since enactment of the Economic Recovery Tax Act (Public Law 97-34) and the Tax Equity and Fiscal Responsibility Act (Public Law 97-248), the rate of interest changes every six months to reflect the prime interest rate then in effect. An 11% rate will be in effect until April 1, 1984. Public Law 97-248 also provides for daily compounding of interest.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The

remainder, if any, would revert to the parties legally entitled to it.

ADMINISTRATIVE PROVISION—INTERNAL REVENUE SERVICE

SECTION 1. Not to exceed two per centum of any appropriation made available to the Internal Revenue Service for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation.

SEC. 2. Not to exceed fifteen per centum, or \$15,000,000, whichever is greater, of any appropriation made available to the Internal Revenue Service for document matching for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation for document matching.

The Secret Service is responsible for protection of the President and other officials, investigating counterfeiting of currency and check forgeries, protection of the White House and various other buildings within Washington, D.C.

1. *Protection, investigations and uniformed activities.*—The Service must provide for the protection of the President of the United States, members of his immediate family, the President-elect, the Vice President, or other officer next in the order of succession to the Office of the President, and the Vice President-elect, and the members of their immediate families unless the members decline such protection; protection of the person of a visiting head of a foreign state or foreign government and, at the direction of the President, other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad; the protection of persons who are determined to be major Presidential or Vice Presidential candidates unless such protection is declined; upon request of a Presidential or Vice Presidential candidate of a major political party, as determined by the Secretary after consultation with the advisory committee, the Secretary may authorize the U.S. Secret Service to furnish protection to the spouse of such major Presidential or Vice Presidential candidate, except that such protection shall not commence more than 120 days prior to the general Presidential election; the protection of the person of a former President and his wife during his lifetime, the protection of the person of the widow of a former President until her death or remarriage, and minor children of a former President until they reach 16 years of age, unless such protection is declined. The Service is also responsible for investigation of counterfeiting of currency, specie, and securities; forgery and altering of Government checks and bonds; thefts and frauds relating to Treasury electronic funds transfers; and other criminal and noncriminal cases.

The Secret Service Uniformed Division protects the Executive Residence and grounds in the District of Columbia; any building in which White House offices are located; the President and members of his immediate family; the temporary official residence of the Vice President and grounds in the District of Columbia; the Vice President and members of his immediate family; foreign diplomatic missions located in the Washington metropolitan area and such other areas as the President may direct on a case-by-case basis.

The Treasury Security Force is responsible for safeguarding paper currency and other Government securities and obligations that are contained in the Main Treasury Building and its Annex in Washington, D.C.

The Comptroller of the Currency was created for the purpose of establishing and regulating a national banking system. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665) provided for the chartering and supervising functions in this connection. The income of the bureau is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations.

The Administrator of National Banks charters new banking institutions only after investigation and due consideration. Supervision of existing national banks is aided by the required submission of periodic reports and detailed onsite examinations, the latter conducted by a staff of approximately 2,100 national bank examiners. At the present time there are approximately 4,800 national banks with more than 23,000 operating branches and total assets of \$1,325 billion.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank, and applications from banks to establish branches. The Comptroller of the Currency promulgates rules and regulations for the guidance of national banks and bank directors.

Government account series	20,419,445
Marketable and other issues	92,720,027

DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

SEC. 101. Appropriations to the Treasury Department, in this Act shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishings of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

SEC. 102. Not to exceed two per centum of any appropriations in this Act for the Department of the Treasury, may be transferred between such appropriations. However, no such appropriation shall be increased or decreased by more than two per centum and any such proposed transfers shall be reported promptly to the Committees on Appropriations of the House and Senate.

SEC. 103. Section 505 of the Tariff Act of 1930, as amended (19 U.S.C. 1505), is further amended by adding a new subsection (c) to read as follows: "(c) Notwithstanding any other provision of law, duties determined to be due on a liquidation or reliquidation shall be due upon that date, and unless payment is received by the appropriate customs officer within 25 days therefrom, shall be considered delinquent and bear interest from the date of liquidation or reliquidation at a rate determined by the Secretary of the Treasury."

Section 520 of the Tariff Act of 1930, as amended (19 U.S.C. 1520), is further amended by adding a new subsection (d) to read as follows: "(d) Where a determination is made to reliquidate an entry pursuant to a protest filed under section 514 of this Act, an application for relief under subsection (c)(1) of this section, or any order of an appropriate court, interest shall be allowed on any amounts paid as increased or additional duties under section 505(c) of this Act at the annual rate established pursuant to that section and determined as of the date of liquidation or reliquidation. Such interest shall be calculated from the date of payment to the date of refund or the date of filing of a summons under 28 U.S.C. 2632, whichever occurs first."

SEC. 104. Notwithstanding any other provision of law, the capitalization limitation contained in 31 U.S.C. 322 for the Capital Fund in the Office of the Secretary is hereby repealed.

This appropriation finances research and development through contracts, grants, and intergovernmental agreements. These activities provide the scientific basis for EPA's regulatory actions.

1. *Air*.—Research will provide the data base needed to review the national ambient air quality standards, and establish new source performance standards and emission standards for hazardous air and mobile source pollutants.

2. *Water quality*.—Research in water quality includes gathering scientific data pertaining to toxic pollutants, developing guidelines for establishing site-specific water quality standards, support to the National Pollution Discharge Elimination System, and assessing the impact of various wastes when dumped into the ocean. Research is also performed in the municipal wastewater area.

3. *Drinking water*.—Includes research to evaluate the health effects of drinking water contaminants, methods to treat these contaminants in a cost-effective manner, and research to support the Agency's ground water protection activities.

4. *Hazardous waste*.—Research activities include providing hazardous waste measurement methods and protocols, assessing the risk from exposure to hazardous wastes, and developing the necessary data to revise and implement treatment, storage and disposal standards and regulations.

5. *Pesticides*.—Activities provide scientific data to support the pesticides program by means of health and

environmental exposure studies, the development of exposure protocols, and the quality assurance program.

6. *Radiation*.—Activities include radiological monitoring and surveillance services for the Department of Energy nuclear testing program at the Nevada Test Site.

7. *Interdisciplinary*.—Activities provide support for the long-term research program, risk assessment guidelines, and quality assurance.

8. *Toxic substances*.—Activities support the development of scientific and technological methods to understand, predict and manage the entry and movement of chemicals into the environment and to determine the effects of these chemicals on both human health and the ecosystem.

9. *Energy*.—Activities support the development of a sound technical energy resource data base. Particular emphasis is placed on understanding and assessing the causes and effects of acid rain.

This appropriation includes funds for contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities.

1. *Air quality.*—The air program performs activities related to the achievement of air quality standards. These objectives are met by providing: (1) financial and technical assistance to State and local governments; and (2) direct Federal action where State or local governments are unable to meet the requirements of Federal law. Emphasis in 1985 will be directed primarily at the attainment and maintenance of National Ambient Air Quality Standards (NAAQS) and increased State participation as a way of achieving air quality objectives.

2. *Water quality.*—The water quality regulatory program has as its goal the protection and restoration of the Nation's waters. The program relies on a partnership between EPA and the States to meet the goals of the Act. The program encompasses the following major activities: (1) managing the municipal wastewater facilities construction grants program; (2) issuing National Pollutant Discharge Elimination System (NPDES) permits for industrial and municipal sources; (3) developing guidelines for issuance of dredge and fill permits; and (4) assuring compliance with regulations.

3. *Drinking water.*—The safe drinking water program protects the Nation's drinking water supplies from contaminants. This involves: (1) setting national drinking water standards that protect human health; (2) initiating enforcement actions for compliance with drinking water and underground injection control regulations; and (3) assisting States in implementing or directly implementing these regulatory programs.

4. *Hazardous waste.*—The hazardous waste program is designed to insure that hazardous wastes are managed in a manner that will protect public health and the environment. The major emphasis of the program will be delegating program authority to the States and implementing hazardous waste regulations. State assumption of hazardous waste authorities will be encouraged through Federal financial assistance, regulations, and guidance.

5. *Pesticides.*—EPA is responsible for protecting the public health and the environment from unreasonable pesticide risks, taking into account the economic, social, and environmental costs and benefits from pesticide use. Major activities include: (1) review and registration of pesticide products; (2) developing and processing registration standards; and (3) enforcement of pesticide use rules, with emphasis on Federal/State cooperation.

6. *Radiation.*—The radiation program endeavors to eliminate adverse health and environmental effects by limiting exposure to radiation. Major activities include development and promulgation of standards, regulations and guidelines to reduce exposure from ionizing and nonionizing radiation sources. In 1985, the program will concentrate its regulatory efforts on standards for airborne radionuclides, and decommissioning of nuclear facilities.

7. *Noise.*—No activities are planned in 1984 or 1985.

8. *Interdisciplinary.*—The interdisciplinary program is composed of several activities which cut across media programs. This involves: (1) review of environmental impact statements (EIS) to insure that actions undertaken by Federal agencies do not adversely affect the environment, (2) Federal agencies compliance with statutes and regulations for pollution control, and (3) all legal aspects of the Agency's enforcement efforts.

9. *Toxic substances.*—The toxic substances program is responsible for protecting human health and the environment from unreasonable risks posed by chemicals. In 1985, the program will place a balanced emphasis on evaluation and control of new and existing chemicals. Nonregulatory approaches to obtain compliance will be used where appropriate.

This appropriation provides funds for the implementation of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This Act provides authority for responding to and cleaning up hazardous substance emergencies and uncontrolled waste sites.

There are four basic components to the Superfund program: Hazardous Substance Response Actions; Enforcement; Research and Development; and Management and Support. These components will be integrated and coordinated to insure the wisest use of Fund money in order to achieve the greatest possible cleanup.

Financial responsibility for the program will be shared by the Federal and State governments as well as industry. The trust fund established by the Act is financed mainly by industrial taxes with some contribution from general funds. EPA will allocate funds from its appropriation to other Federal agencies to carry out the Act.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments (standard level user charges—SLUC) which approximate commercial rates for comparable space and services. SLUC income was \$1,828.3 million in 1983 and is estimated at \$1,890 million for 1984 and \$2,214 million for 1985.

The following table details the financing for the Federal Buildings Fund in 1984 and 1985.

The Federal Buildings Fund program consists of the following activities financed from standard level user charges:

1. *Construction and acquisition of facilities.*—Space is acquired through direct federally financed construction of facilities, extensions to existing buildings, costing over \$500,000 and direct purchase of facilities. All costs directly attributable to Federal Buildings Fund construction projects for site acquisition and construction are also financed under this activity. The total cost of new commitments for direct federally financed con-

struction and acquisition of facilities is estimated at \$146.2 million in 1984 and \$89.9 million in 1985.

2. Repairs and alterations.—Repairs and alterations of public buildings are funded under this activity. Cost effectiveness, overall appearance, state of repair, and operating efficiency are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and extensions estimated to cost less than \$500,000.

3. Purchase contract payments.—Payments are made for liabilities incurred under purchase contract authority. Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975. The periodic payments cover principal, interest, taxes, and other requirements.

4. Rental of space.—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities. This program will provide an estimated 88.1 million square feet in 1984 and 81.7 million square feet in 1985.

5. Real property operations.—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, and miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision). The 1985 direct program compares with the 1984 program as follows (estimated square feet and expenses in millions):

	1984		1985	
	Square feet	Expenses	Square feet	Expenses
Cleaning	180.2	191.5	176.6	197.2
Utilities	211.2	232.2	209.1	244.6
Maintenance	178.8	115.4	175.1	124.5
Other building services	260.0	57.8	256.6	66.0
Protection	268.5	52.5	265.0	55.5
Contracting		7.1		7.2
Total		656.5		695.0

6. Program direction.—Overall general management including long- and short-range planning and administration of all programs under the jurisdiction of the Public Buildings Service.

7. Design and construction services.—Beginning in fiscal year 1985 this activity will consolidate funding for the full range of design and construction services including preparation of drawings and specifications, management and inspection of construction and repairs and alterations projects, other construction related costs and non-project related technical services. In the case of new construction projects and repairs and alterations projects over \$500,000 design work will be restricted to those projects reflected in the budget justifications for this activity or projects which have been specifically approved in appropriation acts.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the standard level user charge.

This appropriation provides for Government-wide direction and coordination of a worldwide supply distribution system, management of supplies and personal property; transportation and travel management; vehicle fleet management; and property management activities for utilization, rehabilitation and donation of Federal property. The major on-going objectives of these programs are to reduce the cost of Government, maximize efficiency of operations and provide excellent service to all customers. To this end, the strategic objectives in 1985 are to accelerate the GSA/FSS "Customer Base Expansion Program" designed to reach out to Federal agencies on both a local and national level in a professional, businesslike manner.

Separate legislation has been proposed to authorize the application of full cost recovery to the General Services Administration's personal property programs. Under this funding concept, customer agencies would pay prices calculated to recover the full cost of providing goods and services.

1. *Supply.*—The purpose of this activity is to provide and support a worldwide logistics supply system to contract for and distribute supplies and property to authorized users of the Federal supply system. This budget proposes \$140,550,000 in 1985 to support the following programs:

(a) A national distribution system of wholesale and retail facilities through which commercial-type commodities are received, stored and issued on a worldwide basis to customer agencies. This includes operation of programs for: requisition processing; inventory manage-

ment; commodity management and logistics data management and the civilian agency catalog activity. The major objective of these programs is to increase the scope of supply support rendered to Federal agencies through increased productivity and efficiency. In 1982, FSS reduced the number of supply depots from 16 to 12 and achieved a reduction in space of 1.2 million square feet at an annualized savings of \$3.3 million. Further consolidations were accomplished in 1983, from 12 down to 8 depots achieving a reduction of 1.6 million square feet at an annualized savings of \$2.4 million. As a result of an A-76 cost comparison study, total contractor performance at the Franconia Depot began on December 1, 1983. Thus far FSS has closed 12 self-service stores and diverted the resources to open 7 customer supply centers designed to accept mail, phone, and walk-in orders for consumable retail supplies. The wholesale distribution operation consists of sales shipped to customer agencies from 8 depots; a fuel yard located in Washington, D.C. and items issued to agencies through self-service stores and Customer Supply Centers. Sales volumes in 1985 are estimated to be as follows: stores' regular, \$1,021.4 million; stores' direct delivery, \$492.0 million; and special orders at \$635.0 million. Inventory levels available for issue to customer agencies are estimated at \$272 million at the end of 1985 with a stock turn of 3.7.

(b) Contracting for commercial-type items required by Federal agencies and other authorized users. These functions are carried out by 11 buying offices and 4 National Commodity Centers responsible for designated commodities which are: tools, furniture, automotive and general office and scientific products. This program selects commodities for inclusion in the stores, special order, and Federal supply schedules by determining the most economical and effective method of supply. New innovations in procurement procedures such as the use of commercial item descriptions, contract renewal and options to extend (3-year contract authority), the conversion from multiple award schedules to single award schedules, and the Color Code Identification Program "Color Banding" have enhanced the GSA/FSS competitive procurement program. The primary goal of the contracting program is to capture a greater portion of the Government market for common use goods and services by diverting Federal agency purchases from the open market to GSA supply sources. The goal in 1985 is to increase procurement volumes to \$6.9 billion. Procurement volumes in 1985 are estimated as follows:

[In millions of dollars]	
Stores Stock	1,323
Special Order	635
Schedules	4,962

(c) Contract management to assure that vendors fully meet all terms and conditions of contracts, and that the quality of materials purchased complies with the requirements of those contracts. In 1982 FSS streamlined its quality assurance operations for the purpose of placing greater reliance on the private sector thus reducing the cost of Government. As a result of this initiative, GSA/FSS closed 6 testing laboratories with a yearly operating cost of \$3.3 million. Routine laboratory capability is now maintained through commercial testing

and by other Government agencies. A greater emphasis has been placed on the manufacturer's quality control systems and on product reliability through the Quality Approved Manufacturers Program. In 1985 contracts administered are expected to be 6,575 and the dollar value of materials inspected to be \$1,350 million.

2. *Transportation.*—The purpose of this activity is to provide a comprehensive and effective Government-wide program for transportation and travel management, operation and maintenance of motor equipment to meet agency requirements, and development and execution of the automotive procurement functions of the Government. This budget proposes \$11,916,000 to support the transportation programs.

The GSA/FSS transportation and travel management programs continue to provide support and dollar savings for Government agencies through negotiated airline city-pair contracts, Amtrak discounts, Travel Management Centers (TMC), Hotel/Motel discounts, Long-term vehicle lease contracts program, Centralized Maintenance Control Centers, and the Federal Fleet Management consolidation program.

3. *Property management.*—This activity manages and operates a Government-wide excess personal property program including the utilization, donation, and sale of property. It encompasses all Government agencies, and provides for utilization of excess property; donation of surplus personal property for public benefit purposes; sale of surplus and exchange/sale of personal property (except DOD property); and rehabilitation and reclamation of Government personal property to extend its useful life. The opening of the Personal Property Centers resulted from the success of the Furniture Reclamation Center established in 1982. The Centers centralize operations for handling Federal agencies excess and surplus personal property pending disposition. Centralization significantly reduces storage space requirements Government-wide; provides rapid disposition of excess and surplus property; and reduces duplicative handling of such property. The budget proposes \$14,778,000 in 1985 to support increased quality of personal property activities and dollar savings to the Government agencies.

In 1985, transfers of excess personal property are expected to be \$720 million, transfers of surplus property are estimated at \$490 million; and sales proceeds are estimated to be \$73 million.

Reimbursable operations.—This activity provides supply support services to other Government agencies on a reimbursable basis, principally involving (1) packing and packaging of items to be shipped to overseas destinations, (2) provision of technical support services to the Government of Saudi Arabia for a joint U.S./Saudi Arabian project, (3) providing rehabilitated furniture to agencies at a reduced cost, (4) printing of the Federal Travel Directory through a reimbursable agreement with the Military Traffic Management Command, and (5) provision for administrative support associated with the Foreign Military Sales Program. The budget proposes a level of reimbursable services of \$27,874,000 in 1985.

This fund finances, on a reimbursable basis, (1) a national supply distribution system and a system of ordering supplies for direct delivery to agencies; (2) a system of interagency motor vehicle pools and (3) the purchase of administrative equipment for using activities. This estimate provides for supplies and services to both military and civilian agencies.

Separate legislation has been proposed to authorize introduction of industrial funding to the General supply fund.

1. *Supply operations*—(a) *Stores, regular*.—Stock of common-use commodities are purchased in volume, stocked, and issued through supply facilities to Government agencies. Sales were \$884.8 million in 1983, and are estimated to be \$984.1 million in 1984, and \$1,021.4 million in 1985.

(b) *Stores, direct delivery*.—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$173.0 million in 1983, and are estimated to be \$362.0 million in 1984 and \$492.2 million in 1985.

(c) *Special order*.—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply facilities are purchased for direct shipment to using agencies. Sales were \$503.6 million in 1983, and are estimated to be \$535.0 million in 1984 and \$635.0 million in 1985.

(d) *Export operations*.—Stores and special order items are shipped to overseas customers. Receipts to the fund cover packing, transportation costs, and other reimbursable services. Sales were \$29.7 million in 1983, and are estimated to be \$31.0 million in 1984, and \$32.4 million in 1985.

2. *Property management and disposal operations*.—This program has been discontinued due to increased level of contracting through commercial sources.

3. *Motor pools*.—Services are provided through a system of interagency motor pools. Sales were \$247.3 million in 1983, and are estimated to be \$261.2 million

in 1984, and \$281.5 million in 1985. Vehicle mileage in interagency motor pools was 937 million in 1983 and is estimated to be 963 million in 1984 and 972 million in 1985.

4. *Administrative equipment*.—Administrative equipment is purchased and charged on an accrual basis to using activities. Receipts were \$3.3 million in 1983, and are estimated to be \$3.9 million in 1984 and 1985.

Other revenue and expense.—Gains or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Note.—Includes \$2,154 thousand in 1985 for the Catalog of Federal Domestic Assistance programs previously financed by the Office of Management and Budget.

This appropriation provides for the overall direction and coordination of comprehensive Government-wide programs for the management, procurement, and utilization of automatic data processing, telecommunications, and office information equipment and services. It provides for the development and coordination of Government-wide policies, procedures and regulations pertaining to ADP, telecommunications, and office information systems acquisition, management and utilization; provides for establishment of Government-wide automated data processing standards; provides information services to the public; and provides for the overall management of operations financed through the Automatic Data Processing (ADP) Fund and the Federal Telecommunications (FT) Fund.

1. *Federal information resources management.*—This activity develops, plans, and directs Government-wide programs for the management and acquisition of Federal information resources and for improving Federal records and information management programs including policies and regulations relative to these programs.

2. *Central information services.*—This activity manages and directs data and information systems; provides data and information services; operates programs for the improvement of Government-wide software; and provides near-term planning, applied research and development, engineering, operation, and management of the Federal Telecommunications System (FTS). Provides technical assistance to agencies on a reimbursable basis on records management and information storage problems.

In 1985, responsibility for publication of the Catalog of Federal Domestic Assistance Programs will be transferred from the Office of Management and Budget to the General Services Administration.

3. *Information resources procurement.*—This activity provides for the overall management, control, and coordination of Government-wide programs and activities relating to the procurement of ADP and telecommunications equipment, software, maintenance, and related supplies and services; the implementation of Govern-

ment-wide ADP resources sharing programs; and the management of reimbursable ADP and telecommunications procurement programs financed through the Automatic Data Processing (ADP) Fund and the Federal Telecommunications Fund.

4. *Regional information services.*—This activity is the focal point for OIRM regional activities; provides for the overall management, control, and coordination of Government-wide programs and activities relating to the operation, maintenance, and utilization of local telecommunications equipment and services; provides for the management of reimbursable programs financed through the Federal Telecommunications Fund; and provides assistance to the public through the Federal Information Centers.

5. *GSA information systems.*—This activity develops and oversees GSA policy concerning the acquisition, development, and use of automated information systems, equipment, and facilities within the guidelines established by the Executive Steering Committee for Information Resources Management; it ensures that the GSA ADP Strategic Plan is kept current; and that initiatives undertaken are consistent with the plan; and develops and enforces standards and procedures to be used by GSA organizations in the acquisition, development, and use of automated information systems, equipment, and facilities. In addition, this activity provides, on a reimbursable basis, internal common use ADP and data communications support and services.

The Consumer Information Center Fund, a revolving fund, was established by Public Law 98-63 enacted on July 30, 1983 to provide for a more businesslike operation of the Consumer Information Center's activities. Previously, these activities were funded from a direct appropriation with the cost of distributing agency publications funded by reimbursements from the participating agencies. The new fund assumed all of the liabilities,

obligations and commitments of the Consumer Information Center account at the time of enactment. All activities of the Consumer Information Center, beginning with 1983 and thereafter, will be reflected in the new account entitled "Consumer Information Center Fund." Under the revolving fund, the Consumer Information Center's activities are financed from monies deposited to the fund consisting of annual appropriations from the general funds of the Treasury, reimbursements from agencies, user fees collected from the public and other income incident to Consumer Information Center activities. Revenue generated by the reimbursable activities of this fund is expected to increase from \$2.6 million in 1983 to \$3.8 million in 1984 to \$5.7 million in 1985.

1. *Consumer Information Center Operations Program.*—The Consumer Information Center helps Federal departments and agencies release consumer information collected as a by-product of the Government's program activities. The Consumer Information Center maintains close working relationships with more than 30 Federal agencies in order to identify, develop, promote and make accessible to the public Federal consumer information. In addition, the Consumer Information Center promotes public awareness of this information through publication of the quarterly *Consumer Information Catalog*, and through various media services. In 1985, the Consumer Information Center will implement a new marketing program designed to promote and expand public awareness of other types of information, in addition to consumer information, that is available from the Federal government. This effort will be done on a reimbursable basis and will be targeted to specific segments of the public.

2. *Publications Distribution Program.*—The Consumer Information Center bills agencies and in turn reimburses the Government Printing Office for the costs of distributing free publications to the public.

This fund finances, on a reimbursable basis, a tele-communications system for the Federal Government which is a major operating component of the national communications system.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from appropriations and funds of any agency or organization for tele-communications services and facilities made available to them.

The estimate for 1985 provides for a continued increase in the volume and quality of communications services provided to executive agencies of the Government. Total sales for 1983 were \$665.7 million and are estimated at \$749.9 million in 1984, and \$798.2 million in 1985.

1. *Voice program.*—Provides for a telephonic system which enables personnel in each Federal agency to communicate directly with any other agency in the Nation. The system provides day-to-day services and incorporates features which would be necessary in emergency situations. In addition, this program finances reimbursable services in support of other agencies dedicated requirements. Total sales for 1983 were \$616.4 million and are estimated at \$694.2 million in 1984 and \$739.5 million in 1985. Intercity Federal Telecommunications System calls were 279 million in 1983 and are estimated at 300 million in 1984, and 320 million in 1985.

2. *Data program.*—Provides a common unified communications system to satisfy record communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. Total sales for this program are projected to decrease from \$38.1 million in 1983 to \$36.4 million in 1984 and \$32.2 million in 1985.

3. *Circuit procurement program.*—Provides for centralized procurement of dedicated circuits and related equipment for civil agencies to obtain the benefits of multiple tariff offerings of commercial carriers, while at

the same time permitting each agency to maintain operational control over its own circuits. Sales were \$2.5 million in 1983, and are projected at \$2.0 million for 1984 and \$2.0 million for 1985.

4. *Special programs.*—Provides for an effective communications security program for civil agencies in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Emergency Management Agency in the emergency and major disaster programs. Total sales for 1983 were \$8.7 million and are estimated at \$17.3 million in 1984 and \$24.5 million in 1985.

5. *Capital outlays.*—Provides for the purchase of telecommunications equipment for the Voice, Data, Circuit Procurement and Special Programs. These purchases of equipment are made when the results to Federal user agencies will be the most efficient and cost-effective operation. Capital outlays were \$7.8 million in 1983 and are estimated to be \$18.8 million for 1984 and \$5.8 million for 1985.

Operating results and financial condition.—At the end of 1981, the net investment in the fund is \$36.8 million, composed of \$36.5 million appropriated, \$0.3 million donated assets capitalized. Following the close of each year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

The Automatic Data Processing Fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer, or otherwise of ADP equipment, maintenance of equipment, procurement and/or development of software programs with Government-wide application, procurement of a wide range of ADP services through national and regional contracts with private sector vendors and operation of service centers, and related functions.

The estimate provides for an increase in revenue during 1984 and 1985. Sales are estimated to increase from \$147.5 million in 1983 to \$203.2 million in 1984 and \$214.5 million in 1985.

1. *Teleprocessing services program.*—This program provides the mandatory means by which Federal agencies acquire teleprocessing services from private sector vendors who participate in the multiple award schedule contracts. The program is designed to simplify and expedite the procurement process for time-sharing services by allowing agencies to purchase against already existing GSA scheduled contracts.

2. *Federal Data Processing Centers program.*—FDPC's are operated either by GSA or by other agencies under delegation of authority from GSA. They provide a full range of ADP services to all Federal agencies, including interactive time sharing; computer systems conversion support; general purpose software; language and software validation; and systems for data collection.

3. *Contract services program.*—Provides ADP services to Federal agencies through regional contracts with pri-

vate sector vendors for systems analysis and programming, computer-output-microfilm (COM) production, hardware maintenance and data conversion. The contracts are tailored to local market conditions and needs, while the overall effort has central program and policy direction.

4. *Lease program.*—This program finances the multi-year lease of ADP equipment for subsequent leaseback to Federal agencies; acquires excess Government-owned ADP equipment where there is a known user or where the equipment has a high potential for reutilization; and administers the leaseback of ADP equipment purchased by the Fund as a result of the Opportunity Buy Program.

5. *Opportunity buy program.*—This program finances ADP equipment purchases when special discounts with time limitations and other arrangements become available and agencies are unable to take advantage of these cost reduction opportunities due to budget cycle limitations. When such offers yield a high rate of return, achieve a significant cost avoidance, and the agency cannot reprogram funds to make the purchase, the offer is considered by the Opportunity Buy Program for purchase through the ADP Fund.

Operating results and financial condition.—At the end of 1983, the net investment of the fund is \$43.3 million, composed of \$30.0 million appropriated, \$12.9 million donated assets capitalized, and \$0.4 million reserve for unanticipated discontinuance of equipment. Following the close of each year any surplus earnings after making provision for prior year losses are deposited in miscellaneous receipts of the Treasury.

This appropriation provides for basic operations dealing with management of the Government's archives and records, operation of Presidential libraries, and for the review for declassification of security classified information.

In 1985, records in the National Archives and Federal records centers will total approximately 16.3 million cubic feet. The number of reference services expected to be provided will total 27.7 million.

1. *Records centers.*—In 1985, agencies will transfer 1,182 thousand cubic feet of inactive records to the records centers. The records centers will dispose of 1,177 thousand cubic feet of records in 1985, and 23.7 million reference services will be provided.

2. *Archives and related services.*—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies and the public and the number of documents sent by Federal agencies to be published in the Federal Register. For 1985 the number of reference services is estimated at 4.1 million and the number of Federal Register pages to be processed will be 700,000.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security. In 1985, 4.0 million pages will be reviewed for declassification.

3. *National Historical Publications and Records Commission.*—This Commission coordinates and provides technical assistance to archival planning and assessment projects in many States and also offers a specialized reference service to Federal, State and local and nongovernment institutions that are publishing significant portions of records from official government files. The Commission also lends its endorsement and support to those specific projects that further the basic objectives stated in its legislation.

4. *Information security oversight office.*—This office makes available to the public as much information as possible regarding the affairs of Government while, at the same time, providing maximum protection for the national security information. In 1985, 100 inspections of information security programs will be conducted; a total of 200 reviews of agency regulations, systematic review guidelines and classification guides will be performed, implementing directives will be prepared and promulgated and seminars and symposia will be conducted to promote better understanding of the program.

This appropriation funds staff for the acquisition, administration and disposal of National Defense Stockpile inventories; administration and disposal of the Defense Production Act inventory; and utilization and disposal of excess and surplus real property in 1985.

The estimate for 1985 provides for storage, maintenance and inspection of stockpile materials, disposal of those stockpile materials excess to objectives and the acquisition of materials needed to meet objectives, the appraisal of real property, and continuing emphasis on reuse of existing real property to extend its useful life.

1. *Stockpile management.*—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations.

2. *Stockpile transactions.*—This activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specifications, and quality. These activities support the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market.

3. *Real property.*—This activity promotes maximum utilization of real property by Federal agencies, and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer, as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, necessary environmental and cultural analyses, disposition and predisposition reuse planning, and real property utilization surveys.

The Government owned William Langer Jewel Bearing Plant at Rolla, North Dakota is the only facility of its kind in the United States which has the capability to produce all types of jewel bearings in quantity.

In 1984 operations for the pilot production of dosimeters were started. The objective of this program is to improve the laboratory design of the dosimeter and develop detail specifications to permit acquisition by mass production techniques from the private sector firms. In 1985 it is estimated that 2,000,000 jewel bearings and related components will be produced and sold.

Note.—Includes \$818 thousand in 1985 for the Federal acquisition program previously financed by the Office of Federal Procurement Policy. (1983—\$756 thousand).

This appropriation provides for policy direction and coordination of all GSA programs by the Administrator, his Deputy, 11 Regional Administrators and Congressional and External Affairs; agencywide acquisition policy, planning and coordination; and financing of administrative services on a centralized and integrated basis for all GSA programs.

1. Executive direction.—Directs the execution of all functions assigned GSA by the Federal Property and

Administrative Services Act of 1949 as amended, and the reorganization plans of the President. Maintains close coordination with Small Business Administration on national minority business proposals and contracts, assuring they receive a fair share of departments' business. Formulates agency policy regarding management improvement initiatives.

2. *Comptroller.*—Centralized budgeting, financial management, and accounting are provided to the GSA services and staff offices. In addition, provides accounting services to Department of Justice in defense of Indian tribal claims against the U.S. Government. Also provides contract audit for transportation bills and claims against the Government by commercial carriers.

3. *Administration.*—This activity is responsible for the planning, implementation, and direction of all activities of GSA related to personnel management, including labor management relations, training, equal employment opportunity, position management and personnel documents.

4. *Policy and management.*—Directs the GSA mobilization, emergency relocation and national civil defense planning program, including coordination of support services and assistance to other agencies. Oversees implementation of audit reports from Office of Inspector General and the GAO, and physical security surveys to prevent misuse and theft of GSA assets. Coordinates all activities of GSA related to administrative management, and the management of the GSA printing and distribution program.

5. *Board of contract appeals.*—In accordance with the Contract Dispute Act of 1978, the Board has jurisdiction over any dispute relating to a contract for the provision of goods and services to the Government, inclusive of, but not limited to, disputes clause cases concerning contract performance; appeals of disappointed bidders; and proposed debarment or suspension actions.

6. *Legal services.*—Covers the field of real property, personal property, archives and records, automated data and telecommunications, transportation and public utilities, stockpile acquisition and disposal and finance and administration.

7. *Acquisition policy.*—Oversees the implementation of GSA-wide acquisition, supply, and storage management policies, and insures implementation through surveillance and performance of acquisition management reviews. This office is the primary point of contact with the Office of Federal Procurement Policy; administers the Federal Procurement Regulations; and prepares legislation for the agency acquisition program. In 1984, this Office will be assuming the functions of the Federal Acquisition Institute.

8. *Operations.*—Major responsibilities of this activity are contract review and clearance; contract assurance and compliance; small and disadvantaged business counseling; and processing EEO complaints. It is also responsible for overall management of field offices.

This appropriation provides agencywide audit and investigative functions to identify and correct management and administrative deficiencies within GSA which create conditions for existing or potential instances of fraud, waste and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide contracting officials with GSA professional advice on accounting and financial matters relative to the negotiation, award, administration, repricing and settlement of contracts. Internal audits review and evaluate all facets of GSA operations. Inspections services provide detailed technical evaluations of GSA operations. The investigative function provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

Central blueprinting, duplicating, and distribution services are financed by a working capital fund (40 U.S.C. 293). As authorized by the Joint Committee on Printing, U.S. Congress, GSA has established and operates 11 printing plants to meet the needs of GSA and other Government agencies. These activities are under continuous review to assure that the method of printing is the least costly alternative to the Government.

**GENERAL SERVICES ADMINISTRATION—
GENERAL PROVISIONS**

SEC. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); and (2) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff) and such appropriations or funds may be so transferred, with the approval of the Office of Management and Budget.

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

SEC. 3. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 4. Not to exceed 3 per centum of funds made available in appropriations for operating expenses and salaries and expenses during the current fiscal year, may be transferred between such appropriations for mandatory program requirements. Any transfers proposed shall be submitted to the Committees on Appropriations of the House and Senate for thirty calendar days prior to their implementation.

SEC. 5. Funds in the Federal Buildings Fund made available for fiscal year 1985 for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary for mandatory program requirements. Any transfers proposed shall be submitted to the Committees on Appropriations of the House and Senate for thirty calendar days prior to their implementation.

Note.—A regular 1984 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-151) provides funds through September 30, 1984.

------	---	---------	--

This appropriation provides for the following research, development, procurement and operations activities of the National Aeronautics and Space Administration:

1. Space Transportation Systems

(a) *Capability Development.*—The principal activities include efforts related to the Spacelab, the upper stages that place satellites in high altitude orbits not attainable by the shuttle, the engineering and technical base support at NASA centers, payload operations and support equipment, advanced programs study and evaluation efforts, and the development and first flight of the U.S./Italy tethered satellite system.

The European Space Agency (ESA) developed space-lab successfully completed its first mission in December 1983. Dedicated missions are scheduled for 1984 and 1985 involving spacelab pallets and other minor structures.

Efforts on Space Transportation System upper stages will be pursued further. In 1985, two Centaur/STS upper stages will be delivered for the 1986 launches of the Galileo and the International Solar Polar Mission. Development of the common NASA/USAF Centaur/STS will continue. Additional Centaur vehicles are being procured for the Venus Radar Mapper and Tracking and Data Relay Satellite Missions.

The Tethered Satellite System, scheduled for initial flight in late 1987, will provide a new capability for

conducting space experiments in regions remote from the Space Shuttle orbiter, especially in the upper atmosphere.

(b) *Operations.*—This activity has been moved to the new account entitled, "Space Flight, Control and Data Communications".

(c) *Space station.*—The President has proposed that the United States proceed with the definition and design of a space station. Planned for launch in the early 1990's, a U.S. space station will provide space-based facilities to allow for enhancement of the Nation's science and applications programs, and for development of capabilities for commercial exploitation of space, while exploring advanced technologies potentially useful to the economy.

In 1985, preliminary design, definition studies and advanced technology developments will be pursued.

One of the main objectives of the definition and design period will be to clarify future costs and capabilities of any potential station configuration. In particular, emphasis will be placed on insuring that potential station configurations can be readily adaptable to changing future national requirements.

2. Scientific Investigations in Space

The Space Science and Applications programs support the study of the Earth and its space environment, the solar system, the galaxy and the universe, and the research and selected technology developments to encourage the application of space technologies to needs on Earth.

(a) *Physics and Astronomy.*—Research is being conducted to investigate the Earth's environment, the Sun and the interplanetary medium, the galaxy and distant space, as well as the interrelationships among these areas and the processes that control them.

The major activities in 1985 include: completion of the fabrication of the major Space Telescope structures, and initiation of integration activities on the entire system; major fabrication of the subsystems of the Gamma Ray Observatory; and the continuation of Shuttle/Spacelab instrument development and mission management activities including development of sounding rocket-type payloads to be flown on the Shuttle. Spacelab 2 is scheduled for launch in early 1985. Work is also continuing on several Explorer projects to continue research thrusts started in prior years.

(b) *Planetary Exploration.*—This program encompasses the scientific exploration of the planets and their satellites, comets and asteroids, and the interplanetary medium to increase knowledge of the origin and evolution of the solar system.

During 1985, the Galileo spacecraft flight acceptance program will be completed; this final phase of testing will demonstrate the spacecraft system compatibility with the planned mission to Jupiter which is scheduled for 1986. The International Solar Polar Mission spacecraft, after completing its system test phase, will be placed in storage in Europe; however, launch vehicle integration activities will be continued during 1985 with final decisions being made for the 1986 launch strategy and the mission navigation plan. The Venus Radar Mapper spacecraft design and development activities will be continued during 1985 leading to the pre-

liminary design review. In addition, the Mars Geoscience/Climatology Orbiter mission design and development activities will be initiated. This mission, scheduled for launch in 1990, will perform geochemical and climatological mapping of Mars.

Studies will be conducted during 1985 on future candidate missions. Analysis of data from past planetary missions will also continue, including data from the Voyager and Pioneer Missions.

(c) *Life Sciences*.—This program will continue to provide for the research and technology required to meet the goals of ensuring human health, safety, well-being, and performance in space; using the space environment to advance knowledge in Earth medicine and biology, and understanding the origin and distribution of life in the universe.

During 1985, the life sciences flight experiments development activities will continue, leading to a series of reflyable dedicated life sciences Shuttle/Spacelab missions, the first of which is scheduled for launch in late 1985.

3. Space and Terrestrial Applications

(a) *Space Applications*.—The major programs in space applications are observations of the Earth and its environment, materials processing, space communications and information systems. Major solid Earth observation activities in 1985 include evaluation and technique development of Shuttle Imaging Radar-B data for geological mapping in the land and ocean environment, multi-spectral linear array technological activities and geodynamics studies of global tectonic plate deformation.

Environmental observation activities focus on utilizing space technology to understand the Earth's atmosphere, oceans, ionosphere and magnetosphere. In 1985, Shuttle/Spacelab payload development efforts will continue along with definition activities on advanced instruments such as the Imaging Spectrometer Observatory and the Shuttle Atmospheric Moisture Temperature Sounder. In addition, instruments to be flown on the Tethered Satellite System will be in the development phase leading to the first test flight of the Tethered Satellite System in 1987.

Development will be initiated in 1985 on the Upper Atmospheric Research Mission (UARM) to conduct research on the Earth's upper atmosphere with the goal of understanding it well enough to assess its susceptibility to chemical change.

UARM will provide a unique data set for evaluation of the influence of the composition and dynamics of the upper atmosphere on tropospheric weather and climate.

Development will also be initiated on the Scatterometer to be flown on the Navy's Remote Ocean Sensing System, which will be used to measure wind velocity on the surface of the ocean. NASA, the National Oceanic and Atmospheric Administration (NOAA) and the Navy will use data obtained by the Scatterometer to calculate ocean currents and other measurements that will improve our understanding of the momentum coupling of the atmosphere and ocean.

Materials Processing activities in space (also known as microgravity science) in 1985 will involve the investigation of the processes and phenomena which would be most enhanced by the absence of gravity.

Space Communications, research and analysis will continue to support development of advanced component and device technology for communications satellite systems.

Information Systems activities in 1985 will provide direction and technology to address concerns of the science community for improved access to and efficient manipulation of the massive amounts of data derived from space science and applications missions.

(b) *Technology Utilization*.—This program is designed to transfer aerospace technology from NASA's research and development base to nonaerospace sectors of the U.S. economy. During 1985, NASA will continue its efforts to help foster the dissemination of new technology developed by the Agency's programs.

4. Space Research and Technology

The overall goal is to advance the technology base which provides for the continued preeminence of the United States in space. In 1985, work directed toward providing the broad base of technology underlying the conduct of future space missions will continue.

5. Aeronautical Research and Technology

This program contributes to U.S. preeminence in civil and military aviation through research at the leading edge of aeronautics, by maintaining the excellence of its research centers by assisting the transfer of technology research results to U.S. aeronautical industry, and by continuing to provide support to other government agencies and U.S. industry.

Major thrusts of 1985 activities include: continuing advancement in both basic aeronautical disciplines and systems research; maintaining and operating specialized facilities essential to aeronautical research; and pursuing technological advances in critical areas of high risk and potentially high payoff to the Nation. These activities will continue to provide a strong research and technology base in the aeronautical disciplines of aerodynamics, propulsion, avionics and flight controls, human-vehicle interaction, and materials and structures; and generic systems research activities in the major classes of aeronautical vehicles, such as subsonic aircraft, rotorcraft, and high performance aircraft. Systems technology efforts will continue in a variety of areas including rotorcraft, high-performance aircraft, and numerical aerodynamic simulation.

6. Supporting Activity: Tracking and Data Acquisition

These programs provide tracking, data acquisition, communications, and data processing support required by all NASA flight projects in accomplishing their mission objectives. Research and development activities will provide tracking and data acquisition support systems for future flight programs.

This appropriation provides for production, capability development, and operational activities for the Space Transportation System. The elements of the program and the work to be performed during 1985 are described below.

1. *Space Transportation Systems:*

(a) *Shuttle production and capability development.*—The Space Shuttle is the key element of a versatile Space Transportation System that is available to a wide variety of national and international users.

This program provides for the national fleet of Space Shuttle orbiters including main engines, launch site and mission operations control requirements, initial structural and operational spares, production tooling, and related supporting activities. In January 1985, Columbia (OV-102) will undergo an eight-month modification process that will strengthen the internal structure and provide Columbia with greater vehicle load-carrying capability. Atlantis (OV-104) is scheduled for delivery in December 1984. Discovery (OV-103) is presently planned to be used for the first West Coast launch in October 1985.

In 1985, the principal activities in addition to the production and modification of the orbiters are: a major emphasis on continued development and testing of the Space Shuttle's main engines to increase their durability and reliability at full power level; fabrication of engines and spare components to support the orbiter fleet, the continuance of the lay-in of spares to support the planning flight rate, the ongoing fabrication of the various major structural spares such as the wings, vertical stabilizer, crew modules, payload bay doors and aft thrust structure, and the completion of development work on a filament wound composite motor case for the solid rocket booster that will provide for increased performance capability for selected missions. The use of larger main parachutes is being explored to reduce the water impact velocity on the solid rocket boosters. For the external tank, emphasis continues on cost-reduction/producibility/production readiness efforts as the production rate build-up increases.

Another principal activity is launch and mission support. The first line of facilities at the Kennedy Space Center developed earlier to support launch processing and checkout of the Shuttle vehicle is being enhanced. A second line of facilities is being procured to service the increased number of orbiters and to achieve and sustain a level of up to 20 East Coast launches per year.

(b) *Operations.*—This activity provides the standard operational support services for the Space Shuttle and the expendable launch vehicles. Within Shuttle oper-

ations, external tank and solid rocket booster flight hardware is produced, recurring operational spare hardware is provisioned, overhauled and repaired; and the manpower, propellants, and other materials are furnished to conduct both flight and ground (launch and landing) operations. The Space Shuttle operations program provides for the launch of NASA, Department of Defense, other U.S. Government, domestic commercial and international missions. The 1984-1987 planned launch schedule is for eight flights in 1984, twelve flights in 1985, fifteen flights in 1986, and twenty-one flights in 1987. The first West Coast launch is scheduled for early 1986.

In 1985, the continued flight rate buildup will require the maintenance and operations of all activities for successful Shuttle flights: onboard avionics software, the mission control system, the training and flight proficiency aircraft and simulators for crew training.

The NASA expendable launch vehicle programs (Scout, Delta, Atlas Centaur, and Atlas F) will be completely funded on a reimbursable basis in 1985. The Delta programs will continue to support the last six launches currently scheduled: four government missions, one foreign mission and one commercial mission. The Atlas Centaur program has seven remaining launches: four international missions and three government missions. The Delta and Atlas Centaur vehicles are candidates for commercialization. Proposals from commercial entities on these programs are currently being evaluated.

7. *Supporting Activity: Tracking and Data Acquisition.*

This program using ground-based and satellite (tracking and data relay satellite system) components provides vital tracking, telemetry, command, and data acquisition support to meet the requirements of all NASA flight projects. In addition to NASA flight projects, support is provided on a reimbursable basis for projects of the Department of Defense and other Government agencies, commercial firms, and other countries and international organizations engaged in space research endeavors.

Support is provided for the Space Shuttle flight program, sounding rockets, balloons, research aircraft, earth orbital and planetary missions, and deep space probes.

In addition to providing support to NASA flight programs in 1985, the program will provide for continuing network consolidation upgrades, modernization program, payments for Tracking and Data Relay Satellite Systems service, and funding for other elements of the Space Network as selected stations in the Ground Network are phased out.

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Aeronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, **[\$135,500,000] \$160,000,000**, to remain available until September 30, **[1986] 1987: Provided**, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriation Act, when any activity has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construc-

tion of new facilities and additions to existing facilities, and facility planning and design: *Provided further*, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: *Provided further*, That the Administrator may authorize such facility lease or construction, **[with the approval of]** *if advance notice is given to the Committees on Appropriations if he determines that deferral of such action until the enactment of the next appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities.*

[For an additional amount for "Construction of facilities", \$20,000,000, to remain available until September 30, 1986, for partial funding of the construction of facilities at the John F. Kennedy Space Center for the Solid Rocket Booster assembly and refurbishment contractor and for warehousing to be used by the Shuttle processing contractor: *Provided*, That with the funds appropriated under the "Space flight, control and data communications" account in the 1984 Housing and Urban Development-Independent Agencies Appropriation Act (Public Law 98-45), NASA may enter into a contract with Morton Thiokol, Inc., to amortize the Thiokol Casting Pit Covers over a twelve-year period for a total cost of not to exceed \$23,000,000 under the authority granted under Public Law 98-45.] (42 U.S.C. 2451, et seq.; Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984; Supplemental Appropriation Act, 1984; additional authorizing legislation to be proposed.)

This appropriation provides for the contractual services for the design, repair, major rehabilitation, and modification of facilities; the construction of new facilities; minor construction; the purchase of land and equipment related to construction and modification; and advanced design related to facilities planned for future authorization. The principal projects in the 1985 program are described below:

1. *Space transportation systems.*—This activity includes funds for Space Shuttle facilities at various locations.

2. *Scientific investigations in space.*—This activity includes the additions to cargo hazardous service facility at the Kennedy Space Center, Fla.; and construction of biomedical facility at the Ames Research Center, Moffett Field, Calif.

3. *Space research and technology.*—This activity includes repairs to test stand 500.

4. *Aeronautical research and technology.*—This activity includes the construction of the numerical aerodynamic simulation facility at the Ames Research Center, Moffett Field, Calif.; and modifications to 8-foot high temperature tunnel at Langley Research Center, Hampton, Va.

5. *Supporting activity.*—The estimates for this activity include the construction of addition to the network control center at the Goddard Space Flight Center, Greenbelt, Md.; construction of earth and space science laboratory at the Jet Propulsion Laboratory, Pasadena, Calif.; construction of a 34-meter antenna, Madrid, Spain; repair, rehabilitation and modification of facilities, not in excess of \$750 thousand per project, minor construction of new facilities and additions to existing

facilities, not in excess of \$500 thousand per project at various NASA installations and at Government-owned plants operated by contractors; and for facility planning and design.

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of NASA installations.

Responsibility for space transportation systems activities is located at the John F. Kennedy Space Center, Kennedy Space Center, Fla.; Lyndon B. Johnson Space Center, Houston, Tex.; Marshall Space Flight Center, Huntsville, Ala.; and the National Space Technology Laboratories, Bay St. Louis, Miss. Space station activities will involve most NASA centers. The scientific investigations in space and space and terrestrial applications activities are concentrated principally at the Ames Research Center, Moffett Field, Calif.; Goddard Space Flight Center, Greenbelt, Md.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; Lyndon B. Johnson Space Center; Marshall Space Flight Center; and the National Space Technology Laboratories.

The space research and technology activity is conducted at the Ames, Goddard, Langley, Lewis, Johnson, and Marshall Centers.

Aeronautical research and technology work is conducted at the Ames, Langley, and Lewis Research Centers.

Programwide support and management are provided by NASA headquarters, Washington, D.C. Support activities for tracking and data acquisition requirements are performed at the Goddard Space Flight Center.

The budget levels proposed in this account for 1985 and later years reflect economies from management reform efforts now underway or planned.

2. *Payment of Government share of retirement costs.*—The Civil Service Retirement Amendments of 1969 provide for financing of the current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes: (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

3. *Transfers for interest on unfunded liability and payment of military service annuities.*—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund of an amount equivalent to: (1) interest on the unfunded liability (\$9,748 million), and (2) annuity disbursements attributable to military service (\$1,958 million). The Office of Personnel Management, at the end of each year, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress. The unfunded liability on which the interest payment is computed is based on static economic assumptions, i.e. no inflation, which cause the liability to be understated. A more realistic estimate of the unfunded liability is made under Public Law 95-595 which requires dynamic assumptions which include future inflation. For 1982, the static unfunded liability on which interest was paid in 1983 was \$193.4 billion as opposed to the more realistic estimate under Public Law 95-595 of \$514.8 billion.

4. *Payments for contribution deficiency.*—The Social Security Amendments of 1983 make employees hired after December 31, 1983 subject to Social Security taxes. The Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983, Public Law 98-168, pro-

vides that such employees will contribute only 1.3 percent of their basic pay to the various Federal retirement systems for interim coverage and that the appropriate agencies shall determine the amount of the contribution deficiency at the end of 1984, 1985, and 1986. The Office of Personnel Management will notify the Secretary of the Treasury of the deficiency for each fiscal year with respect to the Civil service retirement and disability fund, and an amount equal to the deficiency will be credited to the fund before the close of the fiscal year.

The Office of Personnel Management tests inductee candidates for the Department of Defense (DOD), performs training activities and miscellaneous services for Federal agencies and conducts full field security investigations for other departments and agencies on a reimbursable basis.

Fees collected by the President's Commission on Executive Exchange are credited to the Revolving Fund and are available for the Commission's use.

Budget program.—1985 workloads are expected to remain level with the 1984 program.

This schedule reflects the effect of an administration legislative proposal to: (1) revise the manner in which cost-of-living adjustments to retirement benefits are determined and change their payment date to January; (2) eliminate retirement benefits payable to adult students; (3) bring minimum retirement benefits into conformance with those offered in social security program; and (4) increase payroll deductions by one percentage point in 1985 and 1986. These changes will more closely align CSR benefits with those found in the private sector.

The fund finances the cost of health benefits for: (1) active employees; (2) employees who retired after June 1960, or their survivors; (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246; and (4) the related expenses of the Office of Personnel Management in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each fiscal year are as follows:

	1983 actual	1984 estimate	1985 estimate
Active employees	2,305,000	2,305,000	2,305,000
Annuitants.....	1,336,000	1,376,000	1,420,000
Total.....	3,641,000	3,681,000	3,725,000

In determining a biweekly subscription rate to cover program costs, one percent is added to the rates developed by health benefit carriers, for administrative expense, and three percent is added for a contingency reserve held by the Office of Personnel Management (OPM) for each carrier. The OPM is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75 percent of the current unweighted average of the high option

premiums of six large plans. For general schedule and wage-board employees, the Government's contribution is 60 percent.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Office of Personnel Management.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods.

The Office of Personnel Management maintains a contingency reserve, funded by employee and Government contributions, that may be used to defray future cost increases or provide increased benefits. OPM makes payments to carriers from this reserve whenever carrier-held reserves fall below levels prescribed by OPM regulations.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Office of Personnel Management in administering the program. Separate cost data is maintained for employees regular group life insurance and insurance for members of former beneficial associations. The Federal Employees' Group Life Insurance Act of 1980 increases basic coverage for participants under age 45 and offers additional option coverages.

Budget program.—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

Life insurance in force (in billions of dollars):	1983 actual	1984 estimate	1985 estimate
On active employees ¹	160.5	164.7	171.3
On retired employees.....	19.8	20.3	20.7

Annuitants.....	1,285	1,317	1,345
Total.....	3,779	3,811	3,839

¹ Excludes amount of accidental death and dismemberment insurance.

Financing.—For non-Postal Service employees, premium costs for the regular program are met by withholding 24 cents biweekly from the salaries of employees for each \$1 thousand of life insurance and a 50% matching by employer-agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities. The beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the year is as follows (in millions of dollars):

Held in special contingency reserves:	1983 actual	1984 estimate	1985 estimate
By basic program insurer.....	50	50	50
By beneficial association insurer.....	1	1	1
Held in trust by U.S. Treasury.....	5,262	5,902	6,594
Total reserves.....	5,313	5,953	6,645

The carrier-held contingency reserve for the basic program was reduced to \$50 million as of June 30, 1976, and it is expected to remain at this level. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The operations of the insurer for the regular and optional life insurance program to the end of each year follow (in millions of dollars):

The Small Business Administration (SBA) provides assistance to small businesses and to victims of physical disasters. These efforts are conducted through the following activities:

1. *Procurement and technical assistance.*—The programs under this activity are aimed at assuring that small business receives a fair share of Government procurements. In addition, SBA maintains a Procurement Automated Source System, which is used by Federal agencies and prime contractors to identify small businesses for contract opportunities.

2. *Management assistance.*—Through the Small Business Institute and Small Business Development Center programs, along with counseling services, training programs, and publications, small business owners/managers are assisted in their goal of improving the management and efficiency of their businesses.

3. *Finance and investment.*—The salaries and related administrative expenses for all SBA financial assistance activities are provided through this appropriation account. Funds for the Agency's guaranteed loan and investment programs are financed through the business loan and investment fund.

5. *Minority small business and capital ownership development.*—This activity provides assistance to minority small business concerns—primarily in the area of Federal procurement—and evaluates overall Agency performance in promoting minority business development. The business development program assists in the establishment or expansion of firms that are owned by minority or other disadvantaged business persons and that have the potential to develop into viable competitive businesses in a reasonable period of time. In addition, section 7(j) (1) through (10) of the Small Business Act, as amended, provides authority to contract for professional management training and support to assist the socially and economically disadvantaged entrepreneur.

Financial assistance.—The Small Business Administration (SBA) guarantees loans to small businesses that are unable to obtain private financing. Those loans must be of such value or so secured as reasonable to assure repayment. No loan may be made unless the

financial assistance is not otherwise available on reasonable terms. Under the guaranty plan, the SBA agrees to purchase the guaranteed portion of the loan only upon default. In addition to providing financial assistance to the general small business community, particular emphasis will be given to the following groups:

Businesses owned by socially and economically disadvantaged individuals;

Businesses that employ or are owned by handicapped individuals;

Small energy-oriented firms seeking to finance plant facilities and the acquisition of supplies and equipment necessary for specific energy measures;

State and local development companies for plant construction, conversion, or expansion, including the acquisition of land;

Small business concerns located in urban or rural areas with high proportions of unemployed or low-income individuals or owned by low-income individuals.

Small business concerns owned and operated by veterans, especially Vietnam-era veterans.

Investment company assistance.—A primary function of Small Business Investment Companies is to provide a source of needed equity capital or long-term loans to new or expanding small businesses. The Small Business Investment Act, as amended, authorizes the SBA to purchase or to guarantee the timely payment of all principal and interest, as scheduled, on debentures issued by such companies. In addition, the SBA is authorized to purchase preferred securities (shares of non-voting stock or other securities having similar characteristics) from small business investment companies operating under authority of section 301(d), which specifies that the investment policy of such companies will be to make investments solely in small concerns owned and operated by disadvantaged persons.

Financing.—Appropriations are authorized to provide additional capital to the extent required to carry out authorized functions. A capital appropriation of \$312 million is requested for 1985. The Agency will continue its intensive debt collection program which will result in an additional \$55 million and \$78 million in loan repayments, over and above the normal amortization, for 1984 and 1985, respectively.

Operating results.—The fund will continue to operate at a deficit. Interest and fee income will not be sufficient to cover interest, other expenses and a provision for estimated loan losses.

This fund finances disaster loans made pursuant to section 7(b) of the Small Business Act, as amended.

Physical disaster loans.—Under this program, loans are made at favorable terms to property owners for rehabilitation of property damaged by natural disasters such as floods, hurricanes, tornadoes, earthquakes, etc. In 1985, approvals are estimated at \$440 million.

Financing.—Appropriations are authorized as capital to the extent required to carry out the authorized functions. However, a capital appropriation for this fund is not required for 1985. The Agency will continue its intensive debt collection program which will result in an additional \$120 million and \$97 million in loan repayments, over and above the normal amortization, for 1984 and 1985, respectively.

The lease guarantees program was designed to provide prime space for those small business firms which couldn't compete with prospective tenants with AAA ratings. This program had been incurring excessive losses and had not been an important form of assistance to small businesses. As a result, the program is limited to paying claims resulting from defaulted leases approved in prior years.

Public Law 93-386, the Small Business Amendment Act of 1974, established this fund to finance the surety bond guarantees program.

The Small Business Administration will guarantee a portion of the losses sustained by a surety company as a result of the issuance of a bid, payment, and/or performance bond to a small business concern.

SBA contingent liability for bond guarantees.....	567,380	1,200,000	1,115,000

It is estimated that surety bond guarantees will be made in connection with 13,000 contracts totaling \$1,240 million in 1985. SBA, which insures up to 90% of these contract dollars, will undertake improvements in this program to reduce the high loss rates which have occurred in recent years.

Appropriations are authorized to the extent required to carry out the authorized function. In addition to the unobligated balance carried forward from 1984, an appropriation is being requested for this fund of \$10 million for 1985.

MEMORANDUM

2299 U.S. contingent liability for guaranteed loans outstanding, end of year	314,310	564,310	714,310
--	---------	---------	---------

Public Law 94-305, approved June 4, 1976, established this fund to alleviate the adverse impact of pollution regulations on small businesses. The Small Business Administration may, whenever it determines that small business concerns are to be at an operational or financial disadvantage with respect to the planning, design, or installation of pollution control facilities or the financing thereof, guarantee the payment of rentals or other amounts due under qualified contracts.

It is proposed that \$150 million in loan or contract repayments will be guaranteed by SBA in 1985. These loans or contracts will be financed from the proceeds of an estimated 135 taxable State and municipal bonds.

This appropriation provides for the payment of compensation benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Compensation is payable as either a disability benefit or a survivorship benefit. Criteria for entitlement are based on a veteran's disabilities incurred in or aggravated by active military service, death while on active duty, or death resulting from service-connected disabilities.

The Administrator may pay a clothing allowance to each veteran who wears or uses a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Administrator, tends to wear out or tear the clothing of such veteran.

This appropriation provides for the payment of pension benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Pension benefits may be paid to a veteran or his survivor(s). Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Income support is provided at established benefit levels.

Although the 1985 caseload is decreasing, the average cost is increasing. This is due to the "Veterans and Survivors' Pension Improvement Act of 1978," effective January 1, 1979, which reformed the pension program and provides automatic annual cost-of-living increases comparable to annual social security increases for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. These increases are effective on December 1 by the same percentage as social security benefits are increased. The December 1, 1985 increase is expected to be 4.3%.

Legislation is being proposed to authorize the Military retirement fund to pay the benefits for the Reinstated Entitlement Program for Survivors beginning in 1985. In addition, the legislation proposes the following increases in 1984 and 1985:

Provide a 3.5 percent cost-of-living adjustment to spouses in receipt of Dependency and Indemnity Compensation (DIC) under the Compensation and Pension appropriation, effective April 1, 1984.

Provide a 4.3 percent cost-of-living increase to spouses effective April 1, 1985.

Provide a 15 percent increase in subsistence allowance paid to dependents in training under chapter 31, title 38, U.S.C., effective January 1, 1985.

Under section 156, Public Law 97-377, any such increase must also be granted to beneficiaries under this program.

This appropriation finances the education, and training of veterans and servicepersons whose service was, at least in part, between February 1, 1955 and December 31, 1976 (post-Korean conflict veterans and Vietnam era veterans). It also finances educational assistance allowances for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicepersons who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation; specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. With fewer eligible people remaining for Vietnam era training, and with a supplemental appropriation in 1984, the funding level in 1985 will be \$305.4 million less than in 1984. This decrease would be partially offset if the Congress increases monthly subsistence allowances as proposed in the following budget schedule.

1. *Education and training.*—The 1985 decrease in Vietnam era veteran and serviceperson trainees is attributable in part to more veterans reaching their delimiting date and termination of GI bill benefits for persons entering the military after December 31, 1976. These decreases are partially offset by enactment of Public Law 97-72 which granted a 2-year extension of the delimiting period for needy and educationally disadvantaged Vietnam era veterans, effective January 1, 1982, Public Law 97-306 which added an extra year to this extension, and Public Law 98-77 which extended

this program to veterans in certain associate degree courses. In 1984, an additional 8,800 Vietnam era veterans will train in these courses and will receive an average assistance of \$2,273.

The following table provides a comparison of trainees and costs for the three types of trainees included in education and training, and reflects the enactment of the 1984 supplemental appropriation.

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment.

Specially adapted housing grants, up to a maximum of \$32,500, are provided to certain severely disabled veterans. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to \$5,000.

An allowance, up to a maximum of \$4,400, is provided to certain disabled veterans and certain persons on active duty toward the purchase price of new automobiles. Adaptive equipment and the maintenance and replacement of such equipment is also provided.

The following table shows a caseload and cost comparison for these beneficiaries.

[VETERANS JOB TRAINING]

[For an additional amount for payment of expenses as authorized by the Emergency Veterans' Job Training Act of 1983 (Public Law 98-77), \$75,000,000, to remain available until September 30, 1986.]

[SEC. 126. For payments to defray the costs of training and provision of incentives to employers to hire and train certain wartime veterans who have been unemployed for long periods of time as authorized by law (the Emergency Veterans' Job Training Act of 1983, Public Law 98-77), \$75,000,000, to remain available until September 30, 1986: *Provided*, That not more than \$25,000,000 of the amount appropriated shall be available for transfer to the "Readjustment benefits" appropriation for educational assistance payments under the provisions of section 18 of Public Law 98-77. Any unused portion of the amount so transferred may be returned to this appropriation at any time, but not later than December 31, 1984.] (*Supplemental Appropriations Act, 1984; Public Law 98-151, making further continuing appropriations for the fiscal year 1984.*)

Budget program.—This program was established by the Emergency Veterans' Job Training Act of 1983, approved August 15, 1983, as Public Law 98-77. In 1984, 20,000 unemployed veterans of the Vietnam or Korea era will enter on-the-job training in fields for which there is a demonstrated demand for labor. This appropriation will pay one-half of the salary of each trainee up to \$10,000 and a total of \$130,000,000 will be obligated for this purpose in 1984. In addition, \$20,000,000 will be transferred to the Readjustment benefits appropriation to provide education benefits to 8,800 veterans who are eligible for a 2-year delimiting date extension under section 18 of Public Law 98-77.

Financing.—A total of \$150,000,000 was appropriated in 1984, of which \$20,000,000 was transferred to Readjustment benefits. No appropriation will be needed in 1985 since the economic conditions which the Emergency Veteran's Job Training Act of 1983 purposed to relieve will have been alleviated.

1. *Military and naval insurance.*—Payments are made to the U.S. Government life insurance fund for certain World War I veterans for extra hazards of military service and for claims on war risk insurance issued to servicemen and veterans of World War I.

2. *National service life insurance.*—Payments are made to the national service life insurance fund for certain World War II veterans for: (a) the extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for national service life insurance; (c) death claims on policies under waiver of premiums while the insured was on active duty.

Payments are also made to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the number of policies and the amount of insurance in force is expected to continue in 1985 as indicated in the following table (dollars in thousands).

In 1985 increased costs are associated with: (1) workload increases for new VA nursing homes; (2) operational requirements of new facilities; (3) uncontrollable payroll increases; and (4) increased cost of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies and operating supplies.

1. Maintenance and operation of VA facilities—(a) VA hospital care.—Increased cost over 1984 is \$311,297

thousand for operating the medical, surgical, and psychiatric bed sections in 172 VA hospitals.

Estimated operating levels are:

	1983 actual	1984 estimate	1985 estimate
Patients treated	1,280,468	1,278,840	1,279,779
Average daily census	64,992	64,880	64,930
Average employment (including education and training)	142,167	143,937	145,446
Ratio average employment to census	2.19	2.22	2.24

(b) Nursing home care.—An increase of \$52,919 thousand in 1985 is estimated for operation of nursing care beds in 113 facilities.

Estimated operating levels are:

	1983 actual	1984 estimate	1985 estimate
Patients treated	16,478	16,600	18,129
Average daily nursing patient census	8,849	9,155	9,998
Average employment (including education and training)	10,159	10,510	11,577

(c) Domiciliary care.—In 1985, an increase of \$5,069 thousand is estimated for the care of domiciliary members in 16 facilities.

Estimated operating levels are:

	1983 actual	1984 estimate	1985 estimate
Patients treated	14,067	13,132	13,132

3. *Grants for State home care—(a) Domiciliary.*—An increase of \$1,561 thousand in 1985 is estimated for the cost of domiciliary care of veterans in State homes. The 1985 cost estimates reflect increased rates resulting from Public Law 98-160.

	1983 actual	1984 estimate	1985 estimate
Average daily member census	4,489	4,551	4,544
Members treated	8,875	8,950	8,936

(b) *Nursing home.*—An increase of \$17,438 thousand in 1985 is estimated for the cost of nursing care of veterans in State homes. The 1985 increase is a result of a 702 census increase over 1984 and the increased per diem rates established by Public Law 98-160.

1. *Medical research.*—This program is comprised of institutional and special research. In addition to the broad spectrum of biomedical research projects, priority is given to research on agent orange and conditions that frequently occur among veterans such as aging, alcoholism, schizophrenia, delayed stress disorders, and spinal cord injury and tissue regeneration. Cooperative studies include surgical treatment of angina pectoris, adjunct treatment of diabetes, and relative potency and side-effect liability of new and marketed sedatives. This budget request includes \$8,650 thousand for continuation of an Agent Orange Epidemiological Study being conducted by the Centers for Disease Control, Department of Health and Human Services.

2. *Rehabilitation research.*—This program is dedicated to the development and application of science and technology to improve the care of the physically disabled veteran through prostheses for the amputee, improved wheelchairs for the paralyzed, and better joint functions for the arthritic. It also includes care for those with visual, hearing and speech disorders.

3. *Health services research.*—This program provides support for health services projects at VA medical centers for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans.

The major construction request emphasizes correction of life/safety code deficiencies in existing VA medical facilities. Six projects involve fire and safety improvements, five correct electrical deficiencies, and another corrects seismic deficiencies. Many replacement, modernization, and other construction projects also make numerous safety improvements. Additional funds are included to remove asbestos when it is encountered during renovation.

This budget also proposes to establish a design fund for working drawings and related activities associated with major construction projects being considered for future budgets.

The request continues a program of nursing home construction sufficient to attain a level of 13,100 oper-
