DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

Sec. 101. Appropriations to the Treasury Department in this Act shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishing of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

Sec. 102. None of the funds appropriated by this title shall be used in connection with the collection of any underpayment of any tax imposed by the Internal Revenue Code of 1954 unless the conduct of officers and employees of the Internal Revenue Service in connection with such collection complies with subsection (a) of section 805 (relating to communication in connection with debt collection), and section 806 (relating to harassment or abuse), of the Fair Debt Collection Practices Act (15 U.S.C. 1692).

Sec. 103. Not to exceed [1] 5 per centum of any appropriations in this Act for the Department of the Treasury may be transferred between such appropriations. However, no such appropriation shall be increased or decreased by more than [1] 5 per centum and notice of any such proposed transfers shall be [approved] given in advance [by] to the Committees on Appropriations of the House and Senate.

[Sec. 104. None of the funds made available by this Act may be used to place the United States Secret Service, the United States Customs Service, or the Bureau of Alcohol, Tobacco and Firearms under the operation, oversight, or jurisdiction of the Inspector General of the Department of the Treasury.] (*Treasury Department Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, section 101(m).*)

TITLE V—GENERAL PROVISIONS

THIS ACT

Sec. 501. Where appropriations in this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans' Administration; to travel of the Office of Personnel Management in carrying out its observation responsibilities of the Voting Rights Act; or to payments to interagency motor pools where separately set forth in the budget schedules.

Sec. 502. No part of any appropriation contained in this Act shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Office of Personnel Management as still qualified to perform the duties of his former position and has not been restored thereto.

Sec. 503. No part of any appropriation made available in this Act shall be used for the purchase or sale of real estate or for the purpose of establishing new offices inside or outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

Sec. 504. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 505. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection,

except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

[Sec. 506. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of any hand or measuring tool(s) not produced in the United States or its possessions except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States or its possessions cannot be procured as and when needed from sources in the United States and its possessions, or except in accordance with procedures prescribed by section 6-104.4(b) of Armed Services Procurement Regulation dated January 1, 1969, as such regulation existed on June 15, 1970: *Provided*, That a factor of 75 per centum in lieu of 50 per centum shall be used for evaluating foreign source end products against a domestic source end product. This section shall be applicable to all solicitations for bids opened after its enactment.]

[Sec. 507. None of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949 shall be obligated or expended after the date of enactment of this Act for the procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of guards, elevator operators, messengers, and custodians, except that such funds may be obligated or expended for the procurement by contract of the covered services with sheltered workshops employing the severely handicapped under Public Law 92-28.]

[Sec. 508. No funds appropriated in this Act shall be available for administrative expenses in connection with implementing or enforcing any provisions of the rule TD ATF-66 issued June 13, 1980, by the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms on labeling and advertising of wine, distilled spirits and malt beverages, except if the expenditure of such funds is necessary to comply with a final order of the Federal court system.]

Sec. [509] 506. (a) The General Services Administration shall not sell, lease, transfer, or otherwise dispose of any portion of the approximately twenty-six acres of Fort DeRussy, Hawaii, lying southwest of Kalia Road, which includes the Hale Koa Hotel, the Armed Forces Recreation Center, and beachfront area.

(b) However, notwithstanding any other provision of law, including any limitation on appropriations in this or any other Act which, but for this provision, limit the obligation or expenditure of funds for the sale, lease, rental, or excessing of Fort DeRussy, Honolulu, Hawaii, the Secretary of the Army (hereinafter referred to as the "Secretary") is directed to sell and convey to the State of Hawaii or the city and county of Honolulu through the General Services Administration, at the fair market value as determined by, and upon such terms and conditions as are acceptable to the Administrator of General Services, the remaining approximately forty-five acres of Fort DeRussy lying northeast of Kalia Road, which comprises the three United States Army Reserves Centers and miscellaneous facilities. The exact acreages and legal descriptions shall be determined by the Secretary.

(c) The Secretary is authorized to acquire land and design and construct such facilities as are necessary to replace those on the land to be sold pursuant to subsection (b). The Secretary is also authorized to relocate activities currently located at Fort DeRussy to such replacement facilities.

(d) Notwithstanding any other provision of law, the General Services Administration is authorized to make funds available for the acquisition of land and replace facilities authorized to be acquired or constructed pursuant to subsection (c) and to pay associated relocation costs, and funds are hereby made available for this purpose.

(e) The proceeds of the sale authorized in subsection (b) shall be covered by the Administrator of General Services into the Treasury as miscellaneous receipts.

(f) A conveyance under subsection (b) shall provide that all of the land conveyed shall remain the property of the State of Hawaii, or the City and County of Honolulu, Hawaii, as the case may be.

[Sec. 510. None of the funds appropriated in this Act may be used for administrative expenses to close the Information Resources Management Office of the General Services Administration located in Sacramento, California.]

[Sec. 511. None of the funds made available by this Act for the Department of the Treasury may be used for the purpose of eliminating any existing requirement for sureties on customs bonds.]

【Sec. 512. None of the funds made available by this Act shall be available for any activity or for paying the salary of any government employee where funding an activity or paying a salary to a government employee would result in a decision, determination, rule, regulation, or policy that would prohibit the enforcement of section 307 of the 1930 Tariff Act.】

Sec. 【513】 507. None of the funds made available by this Act shall be available for the purpose of transferring control over the Federal Law Enforcement Training Center located at Glynco, Georgia, out of the Treasury Department.

Sec. 【514】 508. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

Sec. 【515】 509. No part of any appropriation contained in this Act shall be available for the payment of the salary of any officer or employee of the United States Postal Service, who—

(1) prohibits or prevents, or attempts or threatens to prohibit or prevent, any officer or employee of the United States Postal Service from having any direct oral or written communication or contact with any member or committee of Congress in connection with any matter pertaining to the employment of such officer or employee or pertaining to the United States Postal Service in any way, irrespective of whether such communication or contact is at the initiative of such officer or employee or in response to the request or inquiry of such member or committee; or

(2) removes, suspends from duty without pay, demotes, reduces in rank, seniority, status, pay, or performance of efficiency rating, denies promotion to, relocates, reassigns, transfers, disciplines, or discriminates in regard to any employment right, entitlement, or benefit, or any term or condition of employment of, any officer or employee of the United States Postal Service, or attempts or threatens to commit any of the foregoing actions with respect to such officer or employee, by reason of any communication or contact of such officer or employee with any member or committee of Congress as described in paragraph (1) of this subsection.

Sec. 【516】 510. Except for vehicles provided to the President, Vice President and their families, or to the United States Secret Service, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than twenty-two miles per gallon. The requirements of this section may be waived by the Administrator of the General Services Administration for special purpose or special mission automobiles.

Sec. 【517】 511. No funds appropriated by this Act shall be available to pay for an abortion, or the administrative expenses in connection with any health plan under the Federal employees health benefit program which provides any benefits or coverages for abortions.

Sec. 【518】 512. The provision of section 【517】 511 shall not apply where the life of the mother would be endangered if the fetus were carried to term.

【Sec. 519. Effective September 30, 1987, none of the funds made available by this Act or any other Act with respect to fiscal year 1987 and any other fiscal year may be used to store, to maintain or to protect more than 128,000,000 troy ounces of silver deposited in the National Defense Stockpile. The Administrator of General Services, or any Federal officer assuming the Administrator's responsibilities with respect to management of the stockpile, shall use all proceeds generated from the disposal of silver to purchase, no later than October 1, 1988, stockpile materials to meet National Defense Stockpile goals and specifications in effect on October 1, 1984.】

【Sec. 520. No later than October 1, 1988, the Administrator of General Services, or any Federal officer assuming the Administrator's responsibilities with respect to management of the stockpile, shall use

all funds authorized and appropriated before January 1, 1985 from the National Defense Stockpile Transaction Fund to evaluate, test, relocate, upgrade or purchase stockpile materials to meet National Defense Stockpile goals and specifications in effect on October 1, 1984.】

【Sec. 521. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of stainless steel flatware not produced in the United States or its possessions, except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of stainless steel flatware produced in the United States or its possessions, cannot be procured as and when needed from sources in the United States or its possessions or except in accordance with procedures provided by section 6-104.4(b) of Armed Services Procurement Regulations, dated January 1, 1969. This section shall be applicable to all solicitations for bids issued after its enactment.】

【Sec. 522. None of the funds appropriated by this Act may be obligated or expended in any way for the purpose of the sale, lease, rental, excessing, surplusage or disposal of any portion of land on which the Phoenix Indian School is located at Phoenix, Arizona without the specific approval of Congress.】

【Sec. 523. None of the funds appropriated by this Act may be obligated or expended in any way for the purpose of the sale, excessing, surplusage or disposal of lands in the vicinity of Bull Shoals Lake, Arkansas administered by the Corps of Engineers, Department of the Army without the specific approval of Congress.】

【Sec. 524. The Administrator of the General Services Administration, under section 210(h) of the Federal Property and Administrative Services Act of 1949, as amended, shall acquire, by means of a lease of up to 30 years duration, space for the United States Courts in Tacoma, Washington, at the site of Union Station, Tacoma, Washington.】

【Sec. 525. The United States Courthouse located at 223 Park Avenue Southwest in Aiken, South Carolina, shall be known and designated as the "Charles E. Simons, Jr., Federal Courthouse". Any reference in any law, regulation, document, record, map, or other paper of the United States to such courthouse is deemed to be a reference to the "Charles E. Simons, Jr., Federal Courthouse".】

【Sec. 526. The Director of the Office of Management and Budget shall include in the area designated as the Wichita Metropolitan Statistical Area the County of Harvey, Kansas.】

【Sec. 527. (a) The Director of the Office of Personnel Management (hereafter in this section referred to as the "Director") shall pay out of the Civil Service Retirement and Disability Fund, an annuity of \$1,500 per month to Gladys Pyle of Huron, South Dakota, who served as a United States Senator from November, 1938, to January, 1939, and is not otherwise eligible to receive an annuity on the basis of her services as a Senator.

(b) The annuity provided under subsection (a)—

(1) shall commence on the first day of the month in which this joint resolution is enacted; and

(2) shall terminate on the date of the death of the said Gladys Pyle.

(c)(1) The Director shall administer the provisions of this section.

(2) Sections 8340, 8346, 8348(a), and 8348(f) of title 5, United States Code, shall apply with respect to the annuity provided under the subsection (a).】

【Sec. 528. In the administration of the provisions of section 603 of this Act, during fiscal year 1987, Erna Avari Patrick of Columbia, South Carolina shall be considered to have satisfied the requirement of clause (3) of such section.】 (Treasury, Postal Service, and General Government Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, section 101(m).)

This appropriation finances research and development through contracts, grants, and intergovernmental agreements. These activities provide the scientific basis for EPA's regulatory actions.

Air.—Research will provide the data base needed to review the national ambient air quality standards, and establish new source performance standards and emission standards for hazardous air and mobile source pollutants.

Water quality.—Research in water quality includes gathering scientific data pertaining to toxic pollutants, developing guidelines for establishing site-specific water quality standards, support to the National Pollution Discharge Elimination System, and assessing the impact of various wastes when dumped into the ocean. Research is also performed in the municipal wastewater area.

Drinking water.—Includes research to evaluate the health effects of drinking water contaminants, methods to treat these contaminants in a cost-effective manner, and research to support the Agency's ground water protection activities.

Hazardous waste.—Research activities include providing hazardous waste measurement methods and protocols, assessing the risk from exposure to hazardous wastes, and developing the necessary data to revise and implement treatment, storage and disposal standards and regulations pursuant to recently enacted legislation.

Pesticides.—Activities provide scientific data to support the pesticides program by means of health and environmental exposure studies, the development of exposure protocols, and the quality assurance program.

Biotechnology research is also included in these activities.

Radiation.—Activities include radiological monitoring and surveillance services for the Department of Energy nuclear testing program at the Nevada Test Site.

Interdisciplinary.—Activities provide support for the long term research program, risk assessment guidelines, technology transfer, and quality assurance.

Toxic substances.—Activities support the development of scientific and technological methods to understand, predict and manage the entry and movement of chemicals into the environment and to determine the effects of these chemicals on both human health and the environment.

Energy.—Activities support the development of a sound technical energy resource data base. Particular emphasis is placed on understanding and assessing the causes and effects of acid rain.

This appropriation includes funds for contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities.

Air.—The air program performs activities related to the achievement of air quality standards. These objectives are met by providing: (1) financial and technical assistance to State and local governments; and (2) direct Federal action where State or local governments are unable to meet the requirements of Federal law. Emphasis in 1988 will be directed primarily at the implementation of the air toxics strategy through National Emission Standards for Hazardous Air Pollutants, the attainment and maintenance of National Ambient Air Quality Standards (NAAQS), and increased State participation as a way of achieving air quality objectives.

Water quality.—The water quality regulatory program has as its goal the protection and restoration of the Nation's waters. The program relies on a partnership between EPA and the States to meet the goals of the Act. The program encompasses the following major activities: (1) managing the municipal wastewater facilities construction grants program; (2) issuing and enforcing requirements of National Pollutant Discharge

Elimination System (NPDES) permits for industrial and municipal sources; (3) developing guidelines for issuance of dredge and fill permits; (4) assuring compliance with regulations; (5) monitoring of water quality; (6) developing water quality standards; (7) establishing technology-based and water quality-based effluent limits for point-source discharges; and (8) developing criteria for ocean disposal of industrial waste, municipal sludges and other dredged materials, and incineration at sea.

Drinking water.—The safe drinking water program protects the Nation's drinking water supplies from contaminants. This involves: (1) setting national drinking water standards that protect human health; (2) initiating enforcement actions for compliance with drinking water and underground injection control regulations; and (3) assisting States in implementing or directly implementing these regulatory programs.

Hazardous waste.—The hazardous waste program is designed to insure that hazardous wastes are managed in a manner that will protect public health and the environment. Continued emphasis will be placed on the development of regulations and standards to support new areas such as leaking underground storage tanks, small quantity generators, and corrective action for prior releases at solid and hazardous waste facilities. Similarly, the program will emphasize delegation of authority to the States and accelerate permitting and enforcement of hazardous waste regulations. State assumption of hazardous waste authorities will be encouraged through Federal financial assistance, regulations, and guidance.

Pesticides.—EPA is responsible for protecting the public health and the environment from unreasonable pesticide risks, taking into account the economic, social, and environmental costs and benefits from pesticide use. Major activities include: (1) review and registration of pesticide products; (2) developing and processing registration standards; and (3) enforcement of pesticide use rules, with emphasis on Federal/State cooperation.

Radiation.—The radiation program endeavors to eliminate adverse health and environmental effects by limiting exposure to radiation. Major activities include development and promulgation of standards, regulations and guidelines to reduce exposure from radiation sources. Also, the EPA will assist the Department of Energy in assessing risks associated with high levels of naturally occurring radon found in selective areas of the country.

Interdisciplinary.—The interdisciplinary program is composed of several activities which cut across media programs. This involves: (1) review of environmental impact statements (EIS) to insure that actions undertaken by Federal agencies do not adversely affect the environment, (2) Federal agencies compliance with statutes and regulations for pollution control, and (3) all legal aspects of the Agency's enforcement efforts.

Toxic substances.—The toxic substances program is responsible for protecting human health and the environment from unreasonable risks posed by chemicals. The program places a balanced emphasis on evaluation and control of new and existing chemicals. Nonregulatory approaches to obtain compliance will be used where appropriate. It also disburses funding appropri-

This appropriation provides funds for the implementation of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended by the Superfund Amendments and Reauthorization Act of

1986. This Act provides authority for responding to and cleaning up hazardous substance emergencies and uncontrolled waste sites.

There are four basic components to the Superfund program: Hazardous Substance Response Actions; Enforcement; Research and Development; and Management and Support. These components will be integrated and coordinated to insure the wisest use of Fund money in order to achieve the greatest possible cleanup.

Financial responsibility for the program will be shared by the Federal and State governments as well as industry. EPA will allocate funds from its appropriation to other Federal agencies to carry out the Act.

The Leaking Underground Storage Tank (LUST) Trust Fund, authorized by the Superfund Reauthorization Act of 1986 (Public Law 99-499), provides funds for

[LEAKING UNDERGROUND STORAGE TANK TRUST FUND]—Continued

the cleanup of contaminated groundwater as a result of leaking underground petroleum tanks. The Trust Fund is financed by a 0.1 cent a gallon tax on motor fuels, effective January 1, 1987.

EPA will develop and oversee the cleanup program, which will be implemented by the States. Funds will be allocated to the States through cooperative agreements, to clean up those sites posing the greatest threat to human health and environment. The Trust Fund will also cover administrative expenses necessary to carry out the program.

No new resources are requested in 1988 given that sufficient funding, approximately \$25 million, is expected to carry over from 1987.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments which approximate commercial rates for comparable space and services. Rent and other income to the fund is as follows:

The Federal Buildings Fund program consists of the following activities financed from rent charges:

Construction and acquisition of facilities.—Space is acquired through direct federally financed construction of facilities, extensions to existing buildings costing over \$500,000 and direct purchase of facilities. All costs directly attributable to Federal Buildings Fund construction projects for site acquisition and construction are also financed under this activity. The total cost of new commitments for direct federally financed construction and acquisition of facilities is estimated at \$125.5 million in 1987 and \$155.7 million in 1988.

Repairs and alterations.—Repairs and alterations of public buildings are funded under this activity. Protection of the Government's investment, health and safety of building occupants, transfer of agencies from leased space, and cost effectiveness are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and extensions estimated to cost less than \$500,000.

Design and construction services.—This activity consolidates funding for the full range of design and construction services including preparation of drawings and specifications, management and inspection of construction and repairs and alterations projects, other construction related costs and non-project related technical services. In the case of new construction projects and repairs and alterations projects over \$500,000, design work will be restricted to those projects reflected in the budget justifications for this activity or projects which have been specifically approved in appropriation acts.

Purchase contract payments.—Payments are made for liabilities incurred under purchase contract authority.

Intragovernmental funds—Continued

FEDERAL BUILDINGS FUND—Continued

LIMITATIONS ON AVAILABILITY OF REVENUE—Continued

Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975. The periodic payments cover principal, interest, taxes, and other requirements.

Rental of space.—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities. This program will provide an estimated 91.9 million square feet in 1987 and 92.3 million square feet in 1988.

Real property operations.—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, and miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision). The 1988 direct program compares with the 1987 program as follows (estimated square feet and expenses in thousands):

	1987		1988

Program direction.—Overall general management, including office automation, financial management, policy development, planning, program evaluation and administration, is funded under this activity.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the commercial rental charge.

are estimated at \$240.0 million at the end of 1988 with a stock turn of 3.4.

(b) Contracting for commercial-type items required by Federal agencies and other authorized users. These functions include requisition processing, inventory management, technical and local procurement support, the civilian agency catalog activity, and the selection of commodities for inclusion in the stores, special order, and the Federal supply schedules. Procurement volumes in 1988 are estimated as follows:

(In millions of dollars)

This appropriation provides for Government-wide direction and coordination of a worldwide supply distribution system, management of supplies and personal property; transportation and travel management; transportation audits; vehicle fleet management; and property management activities for utilization, rehabilitation, donation and sale of Federal property. The major objectives of these programs are to provide excellent supply support and services to customers while maximizing operational efficiency and continuing to reduce the cost of Government.

Supply.—The purpose of this activity is to provide and support a worldwide logistics supply system to contract for and distribute supplies and property to authorized users of the Federal supply system. This budget proposes \$143,520,000 in 1988 to support the following programs:

(a) A national distribution system of wholesale and retail facilities through which commercial-type commodities are received, stored and issued on a worldwide basis to customer agencies. The major objective of this program is to maintain the scope of supply support rendered to Federal agencies through increased productivity and efficiency. In 1986, the national supply system maintained priority effectiveness on all items at 89 percent and attained a sales level of \$4.5 billion. During fiscal year 1986 the Supply program closed three depots for annual savings of \$3.2 million and consolidated the customer supply centers from 18 locations to 12 with annual savings estimated to be \$1.6 million. The commodity management concept was fully implemented with seven Commodity Centers in full operation by the end of the fiscal year, resulting in annual savings of \$2.4 million. Other cost savings initiatives, including a reduction in overhead costs through the consolidation of regional management staffs, reduction in the inventory level and decreasing the number of items on schedule, were also accomplished.

In fiscal 1987 and 1988, the consolidation and modernization of supply facilities will continue. The success achieved in eliminating inefficient facilities and acquiring modernized facilities is largely dependent on automation and mechanization efforts to absorb additional workload within existing personnel resources limits. Sales volumes in 1988 are estimated to be as follows: stores' regular, \$869.0 million; stores direct delivery, \$102.7 million; and special orders at \$962.0 million. Inventory levels available for issue to customer agencies

(c) Contract management to assure that vendors fully meet all terms and conditions of contracts, and that the quality of materials purchased complies with the requirements of those contracts. Testing capability is maintained through commercial and Government laboratories. The Quality Approved Manufacturer's Program allows manufacturers with approved quality control systems to ship material to agencies without Government inspection.

Transportation.—The purpose of this activity is to provide a comprehensive and effective Government-wide program for transportation and travel management, transportation audits, operation and maintenance of motor equipment to meet agency requirements, and development and execution of the automotive procurement functions of the Government. This budget proposes \$16,780,000 to support the transportation programs.

The GSA/FSS transportation and travel management programs continue to provide support and dollar savings for Government agencies through negotiated airline city-pair contracts, Travel Management Centers (TMC), hotel/motel discounts, charge card/travelers check program, automated rate and routing processes, the small package express delivery program, audits of transportation claims by and against the U.S. Government, and the long-term vehicle lease contracts program.

Property management.—This activity manages and operates a Government-wide excess personal property program including the utilization, donation, and sale of property. It encompasses all Government agencies, and provides for utilization of excess property; donation of surplus personal property for public benefit purposes; sale of surplus and exchange/sale of personal property (except DOD property); and rehabilitation and reclamation of Government personal property to extend its useful life. The budget proposes \$16,449,000 in 1988 to support surplus property processed at an estimated value of \$1.2 billion.

Reimbursable operations.—This activity provides supply support services to other Government agencies on a reimbursable basis, principally involving (1) the special handling of items to be shipped to overseas destinations, (2) the provision of technical support services to the Government of Saudi Arabia for a joint U.S./Saudi Arabian project, (3) the provision of rehabilitated furniture to agencies at a reduced cost, (4) the printing

of the Federal Travel Directory through a reimbursable agreement with the Military Traffic Management Command, (5) the provision of administrative support associated with the Foreign Military Sales Program, and (6) the Department of Energy Methanol Fuel Testing Program. The budget proposes a level of reimbursable services of \$26,195,000 in 1988.

Legislation will be proposed to authorize full cost recovery for all management, operation, and overhead expenses of the Federal Supply Service to be financed in the prices charged for goods and services provided to other agencies. The costs of all activities other than Transportation Audit functions will be financed through the General Supply Fund and recovered through surcharges on goods and services and from the proceeds of property management sales. For non-contract Transportation Audit activities, legislation will be proposed to expand the activities currently authorized under the Expenses of Transportation Audit Contracts and Contract Administration account to include these in-house activities. Under this proposal, the Operating Expenses, Federal Supply Service appropriation will be eliminated. Full cost recovery pricing results in the true cost of supplies and services being represented as part of individual agency budgets and provides a more accurate total cost of individual agency programs.

Full cost recovery will provide a more effective means for matching resources to the level of goods and services required by customer agencies.

Public Law 99-88 provided that expenses of Transportation Audit Contracts and Contract Administration activities shall be financed from overcharges collected from carriers on transportation bills paid by the Government and other similar type refunds. Public Law 99-627 further provided prepayment audit authority for selected transportation bills, permanent authority to pay transportation audit contractors from carrier overpayments collected, and authority to transfer net overpayments collected to the Treasury. For 1988, contract audit and contract administration expenses are estimated at \$13 million. Total collections are estimated at \$55 million.

This fund finances, on a reimbursable basis, a national supply distribution system, a system of ordering supplies for direct delivery to agencies, and a system of interagency Federal Fleet Management Centers. This estimate provides for supplies and services to both military and civilian agencies.

Supply operations.—

Stores, regular.—Stock of common-use commodities is purchased in volume, stocked, and issued through supply facilities to Government agencies. Sales were \$902.0 million in 1986, and are estimated to be \$869.0 million in 1987 and 1988.

Stores, direct delivery.—Orders for store-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$67.6 million in 1986, and are estimated to be \$79.0 million in 1987, and \$102.7 million in 1988.

Special order.—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply facilities are purchased for direct shipment to using agencies. Sales were \$931.4 million

in 1986, and are estimated to be \$934.0 million in 1987, and \$962.0 million in 1988.

Export operations.—Stores and special order items are shipped to overseas customers. Receipts to the fund cover packing, transportation costs, and other reimbursable services. Sales were \$31.8 million in 1986, and are estimated to be \$28.0 million in 1987, and \$28.8 million in 1988.

Federal Fleet Management Centers.—Services are provided through a system of Fleet Management Centers. Sales were \$322.4 million in 1986, and are estimated to be \$376.5 million in 1987, and \$399.1 million in 1988. Vehicle mileage in the system was 1,085 million in 1986 and is estimated to be 1,169 million in 1987, and 1,254 million in 1988.

Administrative equipment.—Receipts from user charges were \$3.0 million in 1986, and are estimated to be \$3.0 million in 1987 and \$2.8 million in 1988.

Other revenue and expense.—Gains or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

This appropriation provides for the overall direction and coordination of comprehensive Government-wide programs for the management, procurement, and utilization of automatic data processing, telecommunications, and office information equipment and services. It provides for the development and coordination of Government-wide policies, procedures and regulations pertaining to ADP, telecommunications, and office information systems acquisition, management and utilization; provides for establishment of Government-wide automated data processing standards; provides information services to the public; and provides for the overall management of operations financed through the Information Technology (IT) Fund.

Federal information resources management.—This activity develops, plans and directs Government-wide programs governing the management and acquisition of Federal information resources. It also develops and monitors Government-wide policies and regulations, reviews Federal agencies' implementing programs, and conducts long-range planning and research relating to future Government-wide information resources management needs.

Central information services.—This activity manages and directs GSA's Government-wide information resources assistance programs, the GSA-wide ADP and office automation programs, and the provision of automated information resources within the Information Resources Management Service (IRMS), including the operation and maintenance of the Federal Domestic Assistance Program. It also develops and implements Government-wide information resources assistance policies related to software, hardware, data communications, office automation, records management, planning, and agencywide policies related to managing ADP and office automation resources.

Information resources procurement.—This activity directs, administers, and manages the Government-wide acquisition program for ADP and telecommunications equipment, software, services, and related items; procures circuit facilities, services, and terminal and special purpose equipment competitively; directs the devel-

opment of and implements new acquisition techniques and programs for ADP and telecommunications; maintains liaison with industry associations and State, local and foreign governments in ADP, and telecommunications matters; conducts specific economic analyses required by IRMS to achieve its program objectives; represents the Government before State telephone rate commissions when proposed rate changes are determined to have a large impact on Government costs; and manages reimbursable ADP and telecommunications procurement programs financed through the Information Technology Fund.

Office of telecommunications services.—This activity manages and directs activities of IRMS that relate to reimbursable telecommunications and regional ADP programs including the Federal Telecommunications System (FTS), Washington Interagency Telecommunications System (WITS), the acquisition of telecommunications services, and telecommunications marketing and user services programs. It also develops overall telecommunications and regional ADP objectives, long-range plans, comprehensive programs, and organization and operating methods needed to accomplish program objectives.

Information security oversight office.—This activity provides oversight for the information security program established by Executive Order 12356. This involves monitoring the information security programs of approximately 80 executive branch agencies. Major responsibilities include the conduct of on-site reviews and the development and promulgation of directives necessary for the implementation of the order. The Oversight Office establishes requirements for reports from agencies, analyzes data received together with data collected from on-site reviews, and advises agencies about any deficiencies or violations.

National security emergency preparedness program.—This activity provides a flowthrough funding mechanism for GSA's share of payments to the Department of Defense (DOD) in support of the National Communications Systems (NCS).

Note.—The activities previously financed under the General Services Administration, Information Resources Management Service, Federal Telecommunications and Automatic Data Processing Funds in 1986 are presented in these schedules and financed in this account in 1987 and 1988. Outlays are distributed by account above.

The Information Technology Fund was authorized by the Paperwork Reduction Reauthorization Act of 1986, as included in Public Laws 99-500 and 99-591, section 821(a)(1). The Fund was established as of January 1, 1987, and consists of the assets, liabilities and capital of the Federal Telecommunications Fund and the Automatic Data Processing Fund. The purpose of the fund is to help ensure that automatic data processing, telecommunications, and other information technologies are ac-

quired and used by the Federal Government in a manner which improves service delivery and program management, increases productivity, improves the quality of decisionmaking, reduces waste and fraud, and wherever practicable and appropriate, reduces the information processing burden for the Federal Government and for persons who provide information to and for the Federal Government.

The fund is available for expenses and for procurement for efficiently providing information technology resources to Federal agencies and for the efficient management, coordination, operation and utilization of such resources.

Levels of funding for capital investments and for operating capital are determined through the submission and approval process of planned cost and capital requirements to OMB by GSA pursuant to section 110(a)(1), Federal Property and Administrative Services Act of 1949, as amended by Public Law 99-591.

The Information Technology Fund finances, on a reimbursable basis, the following Government-wide information resources management assistance programs:

Network services program.—This program provides for a telecommunications system which enables personnel in each Federal agency to communicate directly with any other agency or commercial entity in the nation. The system provides day-to-day services and incorporates features which would be necessary in emergency situations. This has resulted in total cost avoidance of \$2.8 billion during the 24 year life of this system. In addition, this program finances reimbursable services in support of other agencies' dedicated requirements. FTS network calls are estimated at 310 million with related 1.4 billion calling minutes for 1986 and 320 million calls and related 1.5 billion calling minutes for 1987 and 1988.

Regional telecommunications programs.—Included in these programs are the provision of local telephone service to agencies, commercial toll calls, telecommunications technical services contracts which make available to Federal agencies telecommunications systems and design services through contracts with private sector vendors, the data program which provides a common unified data communications system to satisfy data communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media, and other miscellaneous programs such as teleconferencing and radio services.

Electronic services programs.—Provides for an effective communications security program for civil agencies in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Emergency Management Agency in the emergency and major disaster programs.

Multiple award schedules program.—This program provides the contractual vehicle for Federal agencies to acquire services and equipment from private sector ven-

dors participating in certain GSA multiple award schedule contracts. This program is designed to simplify and expedite the procurement process for services by allowing agencies to purchase against existing GSA multiple award schedule contracts.

Federal Data Processing Centers (FDPC).—The Centers provide GSA's Government-wide information resources assistance programs in the areas of software, hardware, data communications, office automation, records management, and planning services; and in the collection and dissemination of Government-wide data. They provide technical assistance in the efficient and effective management and use of information resources and serve as sources of expertise for information resources management and technology for the Government. Additionally, they provide tools, techniques, handbooks, and assistance to facilitate the exchange of experience and knowledge throughout the Government.

Contract services program (CSP).—CSP provides ADP services to Federal agencies through regional contracts with private sector vendors. Services provided include systems analysis and programing; systems design and definition of equipment and systems requirements; computer output microfiche production; data conversion services; and office automation systems analysis and microcomputer support. Contracts are tailored to local market conditions and needs of specific Federal agencies. Overall contract administration, central guidance, and policy direction are provided by GSA.

Equipment lease program.—This program finances the multiyear lease of ADP equipment by the IT Fund for subsequent leaseback to Federal agencies and administers the leaseback of ADP equipment purchased by the Fund as a result of the Opportunity Buy Program.

Excess ADP equipment program.—This program finances the screening of excess Government-owned ADP equipment and, where there is a known user or high potential for reutilization, the activities involved with acquiring, reassigning and relocating the equipment with a new user.

Capital investment.—Provides for the purchase of information technology equipment where an initial capital outlay will result in the most efficient and cost-effective operation of the Federal Telecommunications System and the least cost provision of services and facilities to Federal user agencies. It also provides for the purchase of other information technology equipment for the fund's programs when purchase yields the maximum cost avoidance and is clearly in the best economic interest of the Government. The purchase of personal computers and augmentations to existing operating equipment is funded as appropriate.

Through 1987 this appropriation will fund the staff for the acquisition, administration and disposal of National Defense Stockpile inventories; administration and disposal of the Defense Production Act inventory; and utilization and disposal of excess and surplus real property.

The estimate for 1988 is for activities related to the Real Estate Policy and Sales program. Beginning in 1988, the operating expenses of the National Defense Stockpile program will be derived by reimbursement from the National Defense Stockpile Transaction Fund (NDSTF). New obligational authority for the stockpile activity will be requested in the NDSTF account. In 1988 and 1989 these programs will provide for the storage, maintenance and inspection of stockpile materials, disposal of those stockpile materials excess to objectives and the acquisition and upgrading of materials needed to meet objectives, the appraisal of real property, and continuing emphasis on reuse of existing real property to extend its useful life.

National defense stockpile.—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations. Furthermore, this activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specification, and quality. This activity supports the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market.

Real estate policy and sales.—This activity promotes maximum utilization of real property by Federal agencies and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer, as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, necessary environmental and cultural analy-

ses, disposition and predisposition reuse planning, and real property utilization surveys.

REAL PROPERTY RELOCATION

For expenses not otherwise provided for, \$47,000,000, to remain available until expended, necessary for carrying out the functions of the Administrator with respect to relocation of Federal agencies from property which has been determined by the Administrator to be other than optimally utilized under the provisions of section 210(e) of the Federal Property and Administrative Services Act of 1949, as amended: Provided, That such relocations shall only be undertaken when the estimated proceeds from the disposition of the original facilities approximate the appraised fair market value of such new facilities and exceed the estimated costs of relocation. Relocation costs include expenses for and associated with acquisition of sites and facilities, and expenses of moving or repurchasing equipment and personal property. These funds may be used for payments to other Federal entities to accomplish the relocation functions.

This new appropriation covers relocation costs involved in moving agencies from valuable underutilized property, targeted for public sale, to facilities deter-

mined to be more economically suitable to their needs. The sale of these valuable underutilized properties would provide significant revenue to the Treasury and would far outweigh the relocation costs involved.

NATIONAL DEFENSE STOCKPILE TRANSACTION FUND

For the year ending September 30, 1987, in addition to the funds previously appropriated for the National Defense Stockpile Transaction Fund, pursuant to 50 U.S.C. 98a and g(a), (2)(c), and 50 U.S.C. 100a, notwithstanding the provisions of 50 U.S.C. 98h, an additional \$5,000,000 is appropriated, to be available until expended, for a grant for construction of a strategic materials research facility at the University of Massachusetts at Amherst. For the year ending September 30, 1987, in addition to the funds previously appropriated for the National Defense Stockpile Transaction Fund, pursuant to 50 U.S.C. 98 a and g(a), 2(c), and 50 U.S.C. 100a, notwithstanding the provisions of 50 U.S.C. 98h, an additional \$5,000,000 is appropriated, to be available until expended, for a grant for construction of a strategic materials research facility at the University of Nevada at Reno. Notwithstanding any other provision of law, funds previously made available to the fund before January 1, 1985, may be used for evaluating, testing, relocating, and upgrading stockpile materials to meet current stockpile goals and specifications. During fiscal year 1988, not to exceed \$36,080,000, in addition to amounts previously appropriated, all to remain available until expended, may be obligated from amounts in the National Defense Stockpile Transaction Fund, for the acquisition and upgrading of strategic and critical materials under section 6(a)(1) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)(1)), transportation, storage, and other incidental expenses related to such acquisition and upgrades, development of current specifications of stockpile materials and the upgrading of existing stockpile materials to meet current specifications (including transportation, when economical, related to such upgrading), testing and quality studies of stockpile materials, studying future material and mobilization requirements for the stockpile, and other reasonable requirements for management of the stockpile, including relocation, operating, and management expenses incident to operating the stockpile under section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)), as amended by Public Law 99-661.

Further, for the foregoing purposes for fiscal year 1989, \$151,946,000, in addition to amounts previously appropriated, all to remain available until expended, may be obligated from amounts in the National Defense Stockpile Transaction Fund. Of the foregoing amount for fiscal year 1989, not to exceed \$31,946,000 shall be available for reimbursement to the "Operating Expenses, Federal Property Resources Service" account for operating expenses budgeted under that account to remain available until expended. (Independent Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, section 101(m).)

The National Defense Stockpile Transaction Fund provides for the financing of the following activities:

Acquisition and upgrade of materials.—This activity finances the acquisition and upgrade of strategic and critical stockpile materials, and all related expenses such as transportation, development of specifications, testing, quality studies, and relocations of materials.

Stockpile operating expenses.—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations. Furthermore, this activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specification, and quality. This activity supports the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market. These funds are available for reimbursement to the "Operating Expenses, Federal Property Resources Service" appropriation account.

Research grants.—In 1987, this activity finances the construction of strategic materials research facilities at the University of Massachusetts and at the University of Nevada.

This appropriation provides for policy direction and coordination of all GSA programs by the Administrator, his Deputy, 11 Regional Administrators and Congressional and Public Affairs; agencywide acquisition policy, planning and coordination; and agencywide administrative, financial, and management support services on a centralized and integrated basis.

Executive direction.—Directs the execution of all functions assigned GSA by the Federal Property and Administrative Services Act of 1949 as amended, and the reorganization plans of the President. Provides liaison with the Small Business Administration on national minority business proposals and contracts, assuring they receive a fair share of the agency's business. Responsible for GSA customer relations and public information activities, and directing and coordinating interaction between agency officials and Members of Congress.

Comptroller.—The Comptroller provides for overall GSA financial and budgetary policy and liaison activities with Congress, OMB and other Federal agencies and program supervision for the GSA Office of Finance and Office of Budget. Centralized budgeting, financial management, and accounting are provided to the GSA services and staff offices. In addition, provides accounting services to Department of Justice in defense of Indian tribal claims against the U.S. Government.

Administration.—This activity is responsible for the planning, implementation, and coordination of all activities of GSA related to personnel management, in-

cluding labor management relations, training, equal employment opportunity, organization improvement, cost reduction, productivity measurement and the procurement of management consulting services by contract. Ensures implementation of audit reports from the Office of Inspector General and the GAO, and physical security surveys to prevent misuse and theft of GSA assets. Responsible for Government-wide initiatives assigned to the GSA Administrator (e.g., Reform 88, A-76, the President's Council on Management Improvement (PCMI) and the Grace Commission). Administers the Congressional Furnishings program for the U.S. Senate and the House of Representatives. This activity also includes the Regulatory Information Service Center which compiles and analyzes the data on both Government-wide and agency-specific regulatory activities. Coordinates all activities of GSA related to administrative management, and the management of the GSA printing and distribution program.

Board of Contract Appeals.—In accordance with the Contract Disputes Act of 1978, the Board has jurisdiction over any dispute relating to a contract for the provision of goods and services to the Government, inclusive of, but not limited to, disputes clause cases concerning contract performance; appeals of disappointed bidders; and proposed debarment or suspension actions. In addition, the Board serves as an administrative trial court for resolution of ADP bid protests under the Competition in Contracting Act, Title VII of the Deficit Reduction Act (Public Law 98-369).

Legal services.—This activity provides legal services for real property, personal property, automated data and telecommunications, transportation and public utilities, stockpile acquisition and disposal, and finance and administration.

Acquisition policy.—Oversees the implementation of GSA-wide acquisition, supply, and storage management policies, and insures implementation through surveillance and performance of acquisition management reviews. This office is the primary point of contact with the Office of Federal Procurement Policy; administers the Federal Procurement Regulations; and prepares legislation for the agency acquisition program.

Field administration.—Oversees the General Services Administration's regional operations, which administer the regional EEO and Customer Affairs programs. Oversees the Contract Clearance and Procurement Review and the Business Service Center programs which are reimbursably funded.

This appropriation provides agencywide audit and investigative functions to identify and correct management and administrative deficiencies within GSA which create conditions for existing or potential instances of fraud, waste and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide professional advice to GSA contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of GSA operations. Inspections services provide detailed technical evaluations of GSA operations. The investigative function provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

The Consumer Information Center Fund, a revolving fund established by Public Law 98-63 on July 30, 1983, provides for an efficient operation of the Consumer Information Center's activities. Previously, these activities were funded from a direct appropriation with the cost of distributing agency publications funded by reimbursements from the participating agencies. The revolving fund assumed all of the liabilities, obligations and commitments of the Consumer Information Center account. Under the revolving fund, the Consumer Information Center's activities are financed from moneys deposited to the fund, consisting of annual appropriations from the general funds of the Treasury, reimbursements from agencies, fees collected from the public and other income incident to Consumer Information Center activities.

Administrative expenses.—The Consumer Information Center helps Federal departments and agencies release consumer information collected as a by-product of the Government's program activities. The Consumer Information Center maintains close working relationships with more than 30 Federal agencies in order to identify, develop, promote and make accessible to the public Federal consumer information. In addition, the Consumer Information Center promotes public awareness of this information through publication of the quarterly *Consumer Information Catalog*, and through various media services.

Publications distribution.—The Consumer Information Center bills agencies and in turn reimburses the Government Printing Office for the costs of distributing free publications to the public.

Special programs.—The Consumer Information Center carries out special projects supporting the program's mission. The projects are funded by fees collected from the public and by other revenue and income in the Fund.

Central blueprinting, duplicating, and distribution services are financed by a working capital fund (40 U.S.C. 293). As authorized by the Joint Committee on Printing, U.S. Congress, GSA has established and operates 11 printing plants to meet the needs of GSA and other Government agencies. These activities are under continuous review to assure that the method of printing is the least costly alternative to the Government.

**GENERAL SERVICES ADMINISTRATION—
GENERAL PROVISIONS**

SEC. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); and (2) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff) and such appropriations or funds may be so transferred, with the approval of the Office of Management and Budget.

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

SEC. 3. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 4. Not to exceed [1] 3 per centum of funds made available in appropriations for operating expenses and salaries and expenses, during the current fiscal year, may be transferred between such appropriations for mandatory program requirements. Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate [for approval].

SEC. 5. Funds in the Federal Buildings Fund made available for fiscal year [1987] 1988 for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary for mandatory program requirements. Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate [for approval].

SEC. 6. Funds hereafter made available to the General Services Administration for the payment of rent shall be available for the purpose of leasing, for periods not to exceed thirty years, space in buildings erected on land owned by the United States. (*Independent Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, section 101(m).*)

This appropriation provides for research and development activities of the National Aeronautics and Space Administration. The elements of the program and the work to be performed during 1988 are described below:

Space Transportation Systems Capability Development.—The principal activities include efforts related to the Spacelab, the upper stages that will place satellites in high altitude orbits not attainable by the Shuttle, the engineering and technical base support at NASA centers, payload operations and support equipment, development of the joint U.S./Italy Tethered Satellite System, building of the orbital maneuvering vehicle, and advanced programs study and evaluation efforts.

The Spacelab is scheduled to resume missions beginning in 1989 based upon mission development and planning efforts in 1988.

For Space Transportation System upper stages, the two stage Interrial Upper Stages will be modified to accommodate planetary spacecraft, and additional upper stages will be procured for Tracking and Data Satellite missions and several NASA scientific missions.

Development of the Tethered Satellite System will continue in 1988, for first flight in 1990. The development of the Orbital Maneuvering Vehicle (OMV) will also continue in 1988, with the first flight planned for early 1992. The OMV will retrieve spacecraft and provide remote satellite servicing and other operations beyond the reach of the Space Shuttle or the Space Station.

Space Station.—The space station will provide permanently manned, space-based facilities for the Nation's science and applications programs, and for commercial exploitation of space, while exploring advanced technologies potentially useful to the economy.

In 1988, development efforts will continue. Definition work on the flight telerobotic system will also continue.

Scientific Investigations in Space.—Space Science and Applications programs perform basic research to expand our knowledge of the Earth and its space environment, to explore the far reaches of the universe, and to conduct research and experiments to encourage the application of space technology to needs on Earth.

RESEARCH AND DEVELOPMENT—Continued

Physics and Astronomy.—Research is being conducted to investigate the environment of planets, the interplanetary medium, and distant space. Preparations will continue for launch of the Hubble Space Telescope in early fiscal year 1989. Planning activities will continue in 1988 for future Spacelab missions which were re-phased due to the Challenger accident. Development of the Gamma Ray Observatory will continue for planned launch in 1990. Also, development of several ongoing Explorer class satellites will be continued.

Planetary Exploration.—This program encompasses the scientific exploration of the planets, comets, asteroids, and the interplanetary medium to provide increased knowledge of the origin and evolution of the solar system. Development will continue in 1988 on major flight projects initiated in prior years. The Galileo and Ulysses missions will be reconfigured to accommodate a Space Shuttle launch with Inertial Upper Stages. Integration and testing of the Magellan spacecraft will start in preparation for launch in 1989. The design and development of the Mars Observer will continue.

Life Sciences.—This program provides for the research and technology required to meet the goals of ensuring human health, safety, and productivity in space. In 1988, emphasis will be placed on research on the effects of long-term exposure to weightlessness and development of flight experiments for use on the Space Shuttle.

Space and Terrestrial Applications:

Space Applications.—The major programs in space applications are observations of the Earth and its environment, materials processing, space communications and information systems. Major activities in 1988 include research to better understand mechanisms that affect Earth processes, continued development of Space Shuttle payloads, and ground-based research in areas well suited to take advantage of microgravity conditions.

Development will continue on major flight projects initiated in prior years. The Upper Atmospheric Research Satellite is scheduled for launch in 1991. The Ocean Topography Experiment (TOPEX) is scheduled for a 1991 launch as part of a collaborative mission with France. Design and development activities will be initiated on the Global Geospace Science (GGS) mission to obtain coordinated measurements of the interaction of the Earth's magnetic field and the solar wind. GGS is the United States' contribution to an international solar terrestrial physics program, which includes spacecraft from the Japanese and European space agencies.

In space communications, research and analysis will continue to support development of advanced component and device technology for communications satellite systems. Development work will be terminated on the advanced communications technology satellite demonstration flight.

Information systems activities in 1988 will provide analysis and technology to address concerns of the science community for improved access to and manipula-

tion of data from space science and applications missions.

Commercial Programs.—These programs include technology utilization and commercial use of space.

The technology utilization program is designed to transfer aerospace technology from NASA's research and development base to nonaerospace sectors of the U.S. economy. During 1988, NASA will continue its efforts to help foster the dissemination of new technology developed by the Agency's programs.

The commercial use of space is designed to increase private sector awareness of the opportunities in space. Private industry will be encouraged to invest and participate in high technology research and development using the unique characteristics of space.

Space Research and Technology.—In 1988, work directed toward providing the broad base of technology underlying the conduct of future space missions will continue, as well as an enhanced effort in automation and robotics.

In 1988, efforts will increase to provide the broad base of technology underlying future space missions. Specifically, a significant effort will be initiated to strengthen the technology base for continued U.S. leadership in space, and to enable efficient, reliable access to space.

Transatmospheric Research and Technology.—A joint NASA/DOD program will explore new approaches for cost-effective hypersonic flight in the atmosphere with the capability to accelerate to orbit. The program will pursue research and advanced technology development in the area of hypersonic flight, cooperatively with DOD, and is expected to lead to a transatmospheric flight research vehicle in the early 1990's.

Aeronautical Research and Technology.—This program conducts research and develops technology for future U.S. military and civil aircraft.

Major thrusts of 1988 activities include: continuing advancement in both basic aeronautical disciplines and systems research; maintaining and operating specialized facilities essential to aeronautical research; and pursuing technological advances in critical areas of high risk and potentially high payoff to the Nation. These activities will continue to provide a strong research and technology base in the aeronautical disciplines of fluid and thermal physics, applied aerodynamics, materials and structures, controls and guidance, human factors, information sciences, propulsion and power, flight systems, and systems analysis and studies. Systems technology efforts will continue in a variety of areas including rotorcraft, high-performance aircraft, supersonic aircraft, advanced propulsion systems, and numerical aerodynamic simulation.

Safety, Reliability, and Quality Assurance.—This activity will enhance the safety and technical execution of NASA programs through the establishment of a new Technical Assessment Program incorporating an agency-wide problem reporting, trend analysis, and corrective action system.

Supporting Activity: Tracking and Data Advanced Systems.—This program provides advanced studies to ensure capability for tracking, data acquisition, communications, and data processing support required by all

NASA flight projects in accomplishing their mission objectives. Research and development activities will provide tracking and data acquisition support systems for future flight programs.

This appropriation provides for production and operational activities for the Space Transportation System; and for tracking, telemetry, command, and data acquisition support of all NASA flight projects. The elements of the program and the work to be performed during 1988 are described below.

Space Transportation Systems:

Shuttle production and capability development.—The Space Shuttle is the primary launch vehicle to meet a wide variety of scientific and governmental requirements and obligations.

In 1988, the principal activities are focused on returning the Space Shuttle safely to flight. Modifications and redesigns identified in the post-Challenger accident review process will be continued on the solid rocket boosters, orbiters, main engines, and external tank. The recommendations of the Rogers Commission will be implemented to enhance the safe and effective operation of the Shuttle fleet. The orbiter logistics program will continue to provide hardware to support the flight rate build-up when Shuttle flights resume in 1988. Work on the replacement orbiter will continue, with delivery scheduled for 1991.

Operations.—This activity provides the standard operational services for the Space Shuttle. Space Shuttle flights are planned to resume in 1988. Four flights are planned for 1988, and nine are planned for 1989. In 1988, the Shuttle operations program will support flight preparation, training, mission planning, and hardware and payload processing activities for flights planned in 1988 and 1989.

Supporting Activity: Tracking and Data Advanced Systems.—This program, using ground-based and satellite (tracking and data relay satellite system) components, provides vital tracking, telemetry, command, and data acquisition support to meet the requirements of all NASA flight projects. In addition to NASA flight

projects, support is provided on a reimbursable basis for projects of the Department of Defense and other Government agencies, commercial firms, and other countries and international organizations engaged in space research endeavors. In 1988, funding is also included to provide a replacement tracking and data relay satellite spacecraft for the one lost in the Challenger accident.

CONSTRUCTION OF FACILITIES

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Aeronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, **[\$166,300,000] \$195,500,000**, to remain available until September 30, **[1989] 1990: Provided**, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriations Act, when any activity has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and facility planning and design: **Provided further**, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriations Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: **Provided further**, That the Administrator may authorize such facility lease or construction, if he determines, in consultation with the Committees on Appropriations, that deferral of such action until the enactment of the next appropriations Act would be inconsistent with the interest of the Nation in aeronautical and space activities. *(Additional authorizing legislation to be proposed.)*

Note.—Public Laws 99-500 and 99-591, section 101(g), provide funds to the extent and in the manner provided for in the conference version of H.R. 5813, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987.

This appropriation provides for contractual services for the design, repair, rehabilitation, and modification of facilities; the construction of new facilities; the purchase of land and equipment related to construction and modification; the initiation of environmental compliance activities agencywide; and advanced design related to facilities planned for future authorization. The principal projects in the 1988 program are described below:

Space transportation systems.—This activity includes funds for space flight and space station facilities at various locations.

Scientific investigations in space.—This activity provides for completion of the construction of a spacecraft systems development and integration facility at the Goddard Space Flight Center, Greenbelt, MD.

Aeronautical Research and Technology.—This activity includes modifications to vacuum systems for the hypersonic propulsion facility at Langley Research Center, Hampton, VA; construction of additions to the research analysis center and modifications of fan and compressor research test facilities at the Lewis Research Center, Cleveland, OH; and completion of the construction of an integrated test facility at the Dryden Flight Research Facility.

Supporting activity.—The estimates for this activity include modifications for utility reliability at the Goddard Space Flight Center, Greenbelt, MD; construction of communications development antenna at Goldstone, CA; repair, rehabilitation and modification of facilities, not in excess of \$750 thousand per project, minor construction of new facilities and additions to existing facilities, not in excess of \$500 thousand per project at various NASA installations and at Government-owned plants operated by contractors; initiation of environmental compliance activities agencywide; and for facility planning and design.

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of eight NASA field installations.

Programwide support and management are provided by NASA headquarters, Washington, DC.

The budget levels proposed in this account for 1988 and later years reflect management reform efforts now underway or planned.

In 1988, funding is included to provide 625 additional full-time equivalent people to meet the challenges faced in the Shuttle program; the Space Station program; the safety, reliability and quality assurance program; internal auditing; and NASA headquarters management oversight.

Payment of Government share of retirement costs.—The Civil Service Retirement Amendments of 1969 pro-

vide for financing of the current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

Transfers for interest on unfunded liability and payment of military service annuities.—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund of an amount equivalent to: (1) interest on the unfunded liability (\$7,956 million), and (2) annuity disbursements attributable to military service (\$2,123 million). The Office of Personnel Management, at the end of each year, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress.

Payments for contribution deficiency.—The Federal Employees' Retirement System Act of 1986, Public Law 99-335, extended CSRS interim coverage for post-1983 employees until January 1987. Employees contribute only 1.3 percent of their basic pay to the various Federal retirement systems for interim coverage which carries forward deficiencies to those systems into fiscal year 1987. The Office of Personnel Management will notify the Secretary of the Treasury of the deficiency for each fiscal year with respect to the Civil Service Retirement and Disability Fund, and an amount equal to the deficiency will be credited to the fund before the close of the fiscal year.

Payments for spouse equity.—The Civil Service Retirement Spouse Equity Act of 1985, Public Law 98-615, provides for the payment of survivor annuities to eligible former spouses of annuitants who died between September 1978 and May 1986 and who did not elect survivor coverage. The law authorizes the Office of Personnel Management to notify the Secretary of the Treasury of the amount of such annuities paid each fiscal year and directs the Secretary to credit this amount to the Civil Service Retirement and Disability Fund.

Transfers for payment of FERS supplemental liability.—Under provisions of the Federal Employees' Retirement System (FERS) Act of 1986, Public Law 99-335, the Secretary of Treasury is required to make annual payments to finance the supplemental liability as calculated for the new FERS. The supplemental liability will be financed by 30 annual payments beginning in fiscal year 1988. Since covered populations are tentative, the estimated amount will be recalculated during fiscal year 1988.

The Office of Personnel Management tests inductee candidates for the Department of Defense (DOD), performs training activities and miscellaneous services for Federal agencies, and conducts background security in-

vestigations for other departments and agencies on a reimbursable basis.

Fees collected by the President's Commission on Executive Exchange are also credited to the revolving fund and are available for the Commission's use.

Budget program.—1988 training activities will emphasize greater use of private sector training sources by Federal agencies to strengthen their training programs.

This fund is used to pay annuities to retired employees or their survivors; to make refunds to former employees for amounts withheld and to beneficiaries of employees who died before retirement or before the annuities equaled the amount withheld; and, to pay administrative expenses of the Office of Personnel Management and the Merit Systems Protection Board in administering the program. On June 6, 1986, the President signed the Federal Employee's Retirement System Act of 1986, Public Law 99-335, which established the Federal Employee's Retirement System (FERS). FERS is a three-tiered pension program designed along the lines of the best private sector plans. Using Social Security as a base, it provides an additional Basic Benefit based upon the length of Federal service (generally one percent of average salary per year) as well as a savings plan. The basic benefit element of this new plan is effective January 1, 1987, and is included within the Civil Service Retirement and Disability Fund. Generally, the Plan covers all employees hired after December 31, 1983, and employees currently covered under the CSRS who elect to join FERS during the July 1, 1987, to December 31, 1987, Open Season. Pertinent statistics as of the end of the year are shown below:

This schedule reflects the effect of a legislative proposal to: (1) provide COLA's at the percentage change in

the CPI minus 1 percent, unless the CPI falls below 3 percent, in which case the COLA would be the lesser of the actual CPI increase or 2 percent; (2) amend the Federal Employee's Retirement System Act of 1986 (Public Law 99-335) to eliminate the lump sum distribution of CSRS and FERS retirement contributions, and (3) phase-in increased Postal Service and D.C. Government contributions to cover the dynamic normal cost of CSRS retirement benefits.

The fund provides for the cost of health benefits for: (1) active employees; (2) employees who retired after June 1960, or their survivors; (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246; and (4) the related expenses of the Office of Personnel Management in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Num-

bers of participants at the end of each fiscal year are as follows:

	1986 actual	1987 est.	1988 est.
Active employees	2,348,000	2,348,000	2,348,000
Annuitants.....	1,499,300	1,539,300	1,579,300
Total.....	3,847,300	3,887,300	3,927,300

In determining a biweekly subscription rate to cover program costs, one percent is added for administrative expense, and three percent is added for a contingency reserve held by the Office of Personnel Management (OPM) for each carrier. The OPM is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75 percent of the current unweighted average of the high option premiums of six large plans. For general schedule and wage-board employees, the Government's contribution is 60 percent.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Office of Personnel Management.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods.

The Office of Personnel Management maintains a contingency reserve, funded by employee and Government contributions, that may be used to defray future cost increases or provide increased benefits. OPM makes payments to carriers from this reserve whenever carrier-held reserves fall below levels prescribed by OPM regulations.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Office of Personnel Management in administering the program. Separate cost data is maintained for employees regular group life insurance and insurance for members of former beneficial associations. The Federal Employees' Group Life Insurance Act of 1980 increases basic coverage for participants under age 45 and offers additional option coverages.

Budget program.—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

	1986 actual	1987 est.	1988 est.
Life insurance in force (in billions of dollars):			
On active employees ¹	206	212	218
On retired employees.....	23	23	23

Annuitants.....	1,382	1,412	1,442
Total.....	3,993	4,023	4,053

¹ Excludes amount of accidental death and dismemberment insurance.

Financing.—For non-Postal Service employees, premium costs for the regular program are met by withholding 18 cents biweekly from the salaries of employees for each \$1 thousand of life insurance and a 50 percent matching contribution by employer-agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities. The beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the year is as follows (in millions of dollars):

	1986 actual	1987 est.	1988 est.
Held in reserve:			
Contingency reserve.....	50	50	50
Beneficial association program reserve.....	1	1	1

Total reserves.....	7,452	8,130	8,824

The contingency reserve for the basic program was reduced to \$50 million as of June 30, 1976, and it is expected to remain at this level. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The Small Business Administration (SBA) provides assistance to small businesses and to victims of physical disasters. These efforts are conducted through the following activities:

Finance and Investment.—The salaries and related administrative expenses for all SBA financial assistance activities are provided through this appropriation account. Funds for the Agency's guaranteed loan and investment programs are financed through the business loan and investment fund. All business financing programs are proposed for consolidation into three programs: General Business Assistance, Development Company Assistance and Investment Company Assistance.

Procurement Assistance.—The programs under this activity are aimed at assuring that small business receives a fair share of Government procurements. In addition, SBA maintains a Procurement Automated Source System, which is used by Federal agencies and prime contractors to identify small businesses for contract opportunities.

Minority Small Business and Capital Ownership Development.—This activity provides assistance to minority small business concerns—primarily in the area of Federal procurement—and evaluates overall Agency performance in promoting minority business development. The business development program assists in the establishment or expansion of firms that are owned by minority or other disadvantaged business persons and that have the potential to develop

into viable competitive businesses in a reasonable period of time. In addition, the minority business development programs of the Department of Commerce will be transferred and consolidated into the Small Business Administration, including \$24 million for grants to fund Minority Business Development Centers.

Business Development.—Through the Small Business Institute and Small Business Development Center programs, along with counseling services, training programs, and publications, small business owners/managers are assisted in their goal of improving the management and efficiency of their businesses. This activity also includes the specialized assistance afforded veterans through our Veterans' Affairs office and to women business owners through our Women's Business Ownership office. The budget proposes a reduction in the statutory limitation of \$65 million to \$45 million for the Small Business Development Centers. In addition, a gradual phase-out of the SBDC program over the next three years is being requested. This budget also requests a reappropriation of \$4.1 million of fiscal year 1987 appropriated SBDC funds to extend availability through fiscal year 1988. As a result, no new SBDCs will be funded in 1987, and resources will be focused on the support of existing SBDCs.

Special Programs.—The Associate Deputy Administrator for this function will exercise direction over International Trade and the National Advisory Council. These offices focus their responsibilities towards the effective management and operational efficiency in assuring that specialized attention and proper emphasis to the emergent need of the small business community are represented. In addition, the International Trade function will increase its focus on coordinating government wide resources rather than duplicating existing Federal assistance to the small business community.

Advocacy.—This office is responsible for the development and implementation of a Small Business Administration Advocacy program, including the representation of small business interests, the analysis of the effects of federal laws, regulation and activity on small business, the development and utilization of a small business data base to aid in this analysis and liaison with small business and small business organizations and the public.

Consistent with the Administration's government-wide initiative on user fees and as part of the effort to make many of the Small Business Administration's programs self-sustaining we are proposing increases in revenues through additional guaranty fees on the credit programs and user fees for non-credit programs. Under the user fee proposals, beneficiaries of SBA programs, rather than the taxpayers, will share the cost of the services provided.

General Business Assistance.—The Small Business Administration (SBA) guarantees loans to small businesses that are unable to obtain private financing. These loans must be of such value or so secured as to reasonably assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. Under the guaranty plan, the SBA agrees to purchase the guaranteed portion of the loan only upon default. In addition to providing finan-

cial assistance to the general business community, particular emphasis is given to the following groups:

Businesses owned by socially and economically disadvantaged individuals;

Businesses that employ or are owned by handicapped individuals;

Small business concerns located in urban or rural areas with high proportions of unemployed or low-income individuals or owned by low-income individuals; and

Small business concerns owned and operated by veterans, especially Vietnam-era veterans.

Investment Company Assistance.—A primary function of small business investment companies is to provide a source of equity capital or long-term loans to new or expanding small businesses. The Small Business Investment Act, as amended, authorizes the SBA to purchase or to guarantee the timely payment of all principal and interest, as scheduled, on debentures issued by such companies. The 1988 request proposes the elimination of SBA's ability to purchase the preferred stock from small business investment companies, under authority of Section 301(d) of the Small Business Investment Act. Additional guarantee authority is requested for these companies to obtain financing from private markets.

Development Company Assistance.—Utilizing its authority under the Small Business Investment Act, the SBA makes loans through State and local development companies to small businesses. Through these programs, the SBA promotes economic development and job creation or maintenance by stimulating the flow of long-term financing to small business concerns for projects that involve fixed assets. These projects are designed to create or retain a meaningful number of jobs in the communities affected, with a special emphasis on distressed areas.

FY 1988 Proposal.—This request proposes the elimination of all direct lending, with the exception of Minority Enterprise Small Business Investment Company (MESBIC) loans. In addition, it proposes the establishment of only three types of guaranty lending: (1) General Business Assistance, (2) Development Company Assistance, and (3) Investment Company Assistance. The program will, however, still emphasize lending to businesses owned by socially and economically disadvantaged individuals and other borrowers requiring special emphasis.

This request also proposes increases in guarantee fees in all credit programs. The charging of guarantee fees is consistent with the Administration's government-wide user fee initiative under which the direct beneficiaries of federally-provided services, rather than taxpayers, share the cost of the programs. Increased guarantee fees, together with improved credit management and debt collection policies, will help reduce the cost of these programs and contribute towards eventual self-sufficiency.

Activities conducted under the Lease guarantees and Pollution control equipment contract guarantee revolving funds are proposed to be consolidated into this account. Since no new activity is projected for either account other than liquidating existing obligations, the consolidation would simplify SBA's accounting requirements and improve its internal controls.

This fund finances disaster loans made pursuant to section 7(b) of the Small Business Act, as amended.

Physical Disaster Loans.—Under this program, loans are made to individuals and businesses at favorable terms and conditions for uninsured losses of property, both real and personal, damaged by natural disasters such as tornadoes, floods, hurricanes, etc.

The budget proposes that starting in fiscal year 1989, the SBA will no longer make loans to those borrowers who can demonstrate that credit is available elsewhere. This transition year is provided to allow these individuals and businesses to secure adequate insurance coverage.

The lease guarantees program was designed to provide prime space for those small business firms who could not compete with prospective tenants with AAA ratings. This program had been incurring excessive losses and has not been an important form of assistance to small businesses. As a result, the program is limited to paying claims resulting from defaulted leases approved in prior years.

This submission proposes the consolidation of the inactive lease guarantee revolving fund into the business loan and investment revolving fund.

Public Law 93-386, the Small Business Amendment Act of 1974, established this fund to finance the surety bond guarantees program.

The Small Business Administration will guarantee a portion of the losses sustained by a surety company as a result of the issuance of a bid, payment, and/or performance bond to a small business concern.

In fiscal year 1988, the Small Business Administration is proposing to increase its level of financing to respond to the increased demand for this program. To offset the cost of this increase and the other program expenses we propose to increase the existing surety and contractor fees.

------	--	---------	---------	---------

Public Law 94-305, approved June 4, 1976, established this fund to alleviate the adverse impact of pollution regulations on small businesses. The Small Business Administration may, whenever it determines that small business concerns are to be at an operational or financial disadvantage with respect to planning, design, or installation of pollution control facilities or the fi-

nancing thereof, guarantee the payment of rentals or other amounts due under qualified contracts.

As a result of the decision to eliminate the tax exempt provisions associated with the Pollution Control Guaranteed program, the level of activity has decreased significantly. Additionally, with the Administration's emphasis on transferring those programs that more appropriately can be delivered by State agencies, we are proposing the termination of this program. However, funds will be necessary to honor the "full faith and credit" of those guarantees currently outstanding. Therefore, this submission is also proposing to consolidate this fund into the business loan and investment fund.

This appropriation provides for the payment of compensation benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Compensation is paid to veterans for disabilities incurred in or aggravated during active military service. Death and Indemnity Compensation (DIC) is paid to survivors of service persons or veterans whose death occurred while on active duty or as a result of service-connected disabilities.

The Administrator may pay a clothing allowance to each veteran who wears or uses a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Administrator, tends to wear out or tear the clothing of such veteran.

The "Veterans' Benefits Improvement and Health-Care Authorization Act of 1986" increased compensation rates for veterans, DIC rates for spouses and children, and the veterans' clothing allowance by 1.5 percent effective December 1, 1986.

Caseload and cost tables are shown below and reflect the 1.5 percent rate increase:

Legislation will be proposed to index compensation benefits to the annual change in the Consumer Price Index. If enacted, this proposal would guarantee a full and timely cost-of-living adjustment (COLA) to all compensation beneficiaries, including DIC spouses and children. The increase which would be effective with the payments made on January 1, 1988, is expected to be 3.5 percent.

PENSIONS

This appropriation provides for the payment of pension benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Pension benefits may be paid to veterans or their survivors. Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Income support is provided at established benefit levels.

Veterans who are under the age 55 and who begin receiving pension during the test period, February 1, 1985 to January 31, 1989, will be evaluated to determine whether a vocational goal is reasonably feasible. Those for whom a vocational goal is feasible are eligible, during the test period, for a temporary program of vocational training.

Automatic annual cost-of-living increases comparable to annual social security increases are provided for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. These increases, effective with payments made on January 1, are based on the same percentage as social security benefits are increased. The January 1, 1988 increase is expected to be 3.5 percent.

This appropriation finances the education and training of veterans and servicepersons whose service was, at least in part, between February 1, 1955 and December 31, 1976 (post-Korean conflict veterans and Vietnam era veterans). It also finances educational assistance allowances for certain peacetime veterans and for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicepersons who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation, specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. The funding level in 1988 will be \$135.9 million less than in 1987. This is due primarily to the decline in the number of Vietnam-era veterans eligible for benefits and the legislative proposal that would have the Department of Defense fund all program costs for the All-Volunteer Force Educational Assistance Program (New GI Bill).

Education and training.—The 1988 decrease in Vietnam era veteran and serviceperson trainees is attributable to veterans having used their entitlement or reaching their delimiting date.

The following table provides a comparison of trainees and costs for the three types of trainees included in education and training.

NUMBER OF TRAINEES AND COST

Vietnam era veterans:	1986 actual	1987 est.	1988 est.
Number of trainees	307,637	233,600	182,900
Average cost per trainee	\$2,109	\$2,155	\$2,106
Total cost (in thousands)	\$648,797	\$503,500	\$385,170

Sons and daughters:

Average cost per trainee	\$2,310	\$2,372	\$2,374
Total cost (in thousands)	\$111,690	\$102,489	\$91,646
Spouses and widow(ers):			
Number of trainees	5,877	5,200	4,700
Average cost per trainee	\$1,874	\$1,954	\$1,952
Total cost (in thousands)	\$11,012	\$10,160	\$9,176

Special assistance to disabled veterans.—Service disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment.

Specially adapted housing grants, up to a maximum of \$35,500, are provided to certain severely disabled veterans. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to \$6,000.

An allowance, up to a maximum of \$5,000, is provided to certain service-disabled veterans and servicepersons toward the purchase price of an automobile. Adaptive equipment and the maintenance and replacement of such equipment is also provided.

The following table shows a caseload and cost comparison for these beneficiaries.

All Volunteer Force educational assistance (New GI Bill).—Public Law 98-525, enacted October 19, 1984, established two new peacetime educational programs: An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve. Under current law, the Readjustment benefits appropriation pays the basic benefit allowance for the peacetime veterans. A small number of veterans are expected to begin training in 1987. Supplementary educational assistance for peacetime veterans and the basic benefit allowance for reservists are financed by payments from the Department of Defense and the Department of Transportation.

The following table shows a caseload and cost comparison for these beneficiaries under existing legislation:

Debt Collection Activity.—Public Law 97-365, the Debt Collection Act of 1982, authorizes the VA to employ the services of private collection agencies (PCAs) to aid in the collection of delinquent debt. The PCA's receive a percentage of what is collected. Payment amounts for these services are based on a GSA Federal supply schedule, and the age and amounts of the debt collected.

Legislation will be proposed to fund the All-Volunteer Force Educational Assistance Program (New GI Bill) basic benefit allowance through the Department of Defense rather than through the Readjustment benefits appropriation. The Veterans Administration will continue to administer the program. In addition, legislation

will be proposed in the Department of Defense's budget to establish a permanent education assistance program, funded by the Department of Defense and administered by the Veterans Administration. In 1988, it is estimated that the program would cost an additional \$20 million for reservist education benefits.

Military and naval insurance.—Payments are made to the U.S. Government life insurance fund for certain World War I veterans for extra hazards of military service and for claims on war risk insurance issued to servicemen and veterans of World War I.

National service life insurance.—Payments are made to the national service life insurance fund for certain World War II veterans for: (a) the extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for national service life insurance; (c) death claims on policies under waiver of premiums while the insured was on active duty.

Payments are also made to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the number of policies and the amount of insurance in force is expected to continue in 1988 as indicated in the following table (dollars in thousands).

In 1988 increased costs are associated with: (1) operational requirements of new facilities; (2) payroll increases; (3) increased cost of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies and operating supplies; and (4) enhancements for the decentralized hospital computer program (DHCP).

These increased costs are offset by: (1) a one percent reduction in employment due to productivity increases; (2) savings associated with enhancements to DHCP; and (3) funding that anticipates that no-cost care would be provided to all service-disabled veterans who request it, as well as to former prisoners of war and veterans exposed to certain toxic substances and radiation. No-cost care would also be provided to veterans of wars prior to World War II and those receiving VA pensions. Among other veterans, funding would be provided for no-cost care for all earning less than \$25,000 per year (for a veteran with one dependent; \$20,000 for a single veteran); funding would not be provided for the care of those whose annual incomes exceed these levels. The VA may continue to furnish care to non-service disabled veterans with incomes above \$25,000 in locations where resources remain available.

Maintenance and operation of VA facilities—

VA hospital care.—Costs for 1988 are estimated to increase by \$136,956 thousand for operating the medical, surgical, and psychiatric bed sections in 172 VA hospitals.

Estimated operating levels are:

	1986 actual	1987 est.	1988 est.
Patients treated	1,327,728	1,342,198	1,313,701
Average daily census	56,940	55,440	53,962
Average employment (including education and training)	137,954	135,786	131,519
Ratio average employment to census	2.42	2.45	2.44

Nursing home care.—An increase of \$69,097 thousand in 1988 is estimated for operation of nursing care beds in 120 facilities.

Estimated operating levels are:

	1986 actual	1987 est.	1988 est.
Patients treated	23,940	24,582	26,318
Average daily nursing patient census	10,482	11,174	11,643
Average employment (including education and training)	13,241	14,104	15,017

Domiciliary care.—In 1988, an increase of \$8,675 thousand is estimated for the care of domiciliary members in 16 facilities.

Estimated operating levels are:

	1986 actual	1987 est.	1988 est.
Patients treated	13,250	13,335	13,290
Average daily member census	5,767	6,061	6,040
Average employment (including education and training)	2,303	2,399	2,395

Outpatient care.—An increase of \$54,572 thousand is estimated in 1988 for the cost of outpatient medical and dental care provided by staff and by physicians and dentists participating under a fee basis arrangement for certain eligible veterans.

Medical research.—This program is comprised of institutional and special research. In addition to the broad spectrum of biomedical research projects, priority is given to research on agent orange and conditions that frequently occur among veterans such as aging, alcoholism, schizophrenia, delayed stress disorders, and spinal cord injury and tissue regeneration. Cooperative studies include surgical treatment of angina pectoris, adjunct treatment of diabetes, and relative potency and side-effect liability of new and marketed sedatives. This budget request includes \$3,950 thousand for continuation of an Agent Orange Epidemiological Study being conducted by the Centers for Disease Control, Department of Health and Human Services. In 1987, \$20 million in budget authority was transferred on a one-time basis from the Department of Defense to fund an experimental cooperative research program.

Rehabilitation research.—This program is dedicated to the development and application of science and technology to improve the care of the physically disabled veteran through prostheses for the amputee, improved

wheelchairs for the paralyzed, and better joint functions for the arthritic. It also includes care for those with visual, hearing and speech disorders.

Health services research.—This program provides support for health services projects at VA medical centers for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans.

Medical, hospital, nursing home, and domiciliary administration.—Central office staff elements will continue to provide executive direction of all agency medical programs through program development, implementation, and administration of policies, plans, and objectives.

Postgraduate and inservice training.—Program assisted Department of Medicine and Surgery and certain other VA personnel in maintaining and upgrading their knowledge and skills. In 1987, funding for this program was transferred to the Medical care appropriation and to the Medical, hospital, nursing home, and domiciliary administration program within this appropriation to support the continuing education needs of employees whose salaries are paid by each of the two appropriations.

Health professional scholarship.—To assist in the recruitment and retention of staff, this program provides grants for tuition, stipend, and other educational expenses for eligible students in programs leading to a degree in nursing or physical therapy.

GENERAL OPERATING EXPENSES—Continued

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits (DVB); operation and maintenance of 109 national cemeteries by the Department of Memorial Affairs; and top management direction and administrative support, including data processing, fiscal, personnel, and legal services through agency-level staff offices.

Veterans benefits.—Determines eligibility and adjudicates all claims for compensation, pensions, educational assistance, housing loan assistance, and insurance awards. Beginning in 1987, greater efficiencies will be achieved as a result of an initiative to modernize the data processing and telecommunications capabilities of DVB. A summary of program objectives and anticipated workload is included in the following paragraphs:

Veterans services.—Provides information, advice, and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors.

LOAN GUARANTY REVOLVING FUND

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary to carry out Loan Guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title), \$389,800,000, to remain available until expended.

During [1987] 1988, the resources of the loan guaranty revolving fund shall be available for expenses for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title): *Provided*, That the unobligated balances, including retained earnings of the direct loan revolving fund, shall be available, during [1987] 1988, for transfer to the loan guaranty revolving fund in such amounts as may be necessary to provide for the timely payment of obligations of such fund, and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer.

During [1987] 1988, with the resources available, gross obligations for direct loans and total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the "Loan guaranty revolving fund".

Note.—Public Laws 99-500 and 99-591, section 101(g), provide funds to the extent and in the manner provided for in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987.

The purpose of the VA home loan guaranty program is to facilitate the extension of mortgage credit on favorable terms by private lenders to eligible veterans. In the event of foreclosure, the Federal guaranty protects lenders against losses up to a maximum of the lesser of 60 percent of the mortgage amount or \$27,500.

Budget program—

Acquisition of homes.—The number of acquisitions is expected to decline while the average cost is expected to increase for 1988.

Financing.—Receipts in 1988 are estimated to be \$14.1 million more than 1987. Revenue from funding fees, vendee loan sales, and selling properties for cash and on terms are estimated to account for 93 percent of total collections. In 1988 this account will redeem participation certificates held in trust by Government National Mortgage Association for the VA loan guaranty revolving fund. Additional budget authority of \$146,046 thousand is requested for this purpose to adjust for the shortfall of reserves in the fund.

MEMORANDUM

2299	U.S. contingent liability for guaranteed loans outstanding, end of year	—587,807
------	---	----------

Legislation is being proposed that would increase the loan origination fee from 1 to 2.5 percent on June 1, 1987. In 1988, this legislation would increase funding fee collections by \$360.8 million. In addition, legislation will be proposed providing guidelines for the disposal of acquired properties. If enacted, between 40 and 60 percent of the properties would be sold on a vendee loan basis. The remaining properties would be sold for cash.

DIRECT LOAN REVOLVING FUND

During [1987] 1988, within the resources available, not to exceed \$1,000,000 in gross obligations for direct loans is authorized for specially adapted housing loans (38 U.S.C. chapter 37).

Note.—Public Laws 99-500 and 99-591, section 101(g), provide funds to the extent and in the manner provided for in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987.

Budget program—

Direct loans to veterans.—Direct loans are made to certain totally disabled veterans to supplement grants authorized to assist the veteran in acquiring suitable housing units, with special features made necessary by the nature of their disabilities.

In 1988, six direct loans in the amount of \$191 thousand are expected to be closed.

	1986 actual	1987 est.	1988 est.
Loans approved:			
Number	2	6	6

Average per loan	\$29,750	\$31,667	\$31,834
Amount (in thousands)	\$119	\$190	\$191

Direct (vendee) loans.—A vendee loan is established when a VA-owned property is sold on terms to a veteran or a non-veteran.

	1986 actual	1987 est.	1988 est.
Direct (vendee) loans (in thousands)	\$660	\$966	\$940

Cash advances and repurchases, vendee loans.—Small cash advances are occasionally made to borrowers to cover taxes, hazard insurance and necessary repairs. These amounts are added to the current loan balance.

Note.—The Veterans Administration insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

This fund finances the payment of claims on nonparticipating life insurance policies issued and currently is open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. Administrative expenses are paid from the General operating expenses appropriation.

Operating costs—

Death claims.—Represents payments to designated beneficiaries.

All other.—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

Capital investment.—A policyholder may borrow up to 94 percent of the value of his policy.

The trend in the number and amount of policies in force is indicated in the following table (dollars in thousands):

	1986 actual	1987 est.	1988 est.
Number of policies.....	183,953	181,690	179,140
Insurance in force.....	\$1,668,196	\$1,647,132	\$1,623,533

Financing.—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund.

Operating results and financial condition.—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess

of assets. The deficit is expected to reach an estimated \$227 million by September 30, 1988.

Note.—The Veterans Administration insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

This fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: (1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) nonservice disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other Government insurance.

Budget program—

Death claims.—Represents payments to designated beneficiaries.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—This represents payments to the General operating expenses appropriation for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

Policy loans made.—A policyholder may borrow up to 94 percent of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

Legislation will be requested to repeal the authority permitting the Veterans Administration to make education loans, effective October 1, 1987. The VA Education Loan Program has experienced excessively high default rates. Congress has previously acted to repeal loans available to most veterans. Full repeal of this program would reduce debts owed the government and reduce obligations by \$40 thousand in 1988.

This fund provides loans up to \$620 to veterans enrolled in a program of vocational rehabilitation who are temporarily in need of additional funds to meet expenses.

Budget program.—Interest-free direct loans are granted to veterans in vocational rehabilitation training. The loans are repaid over a period of 10 months by offsets from benefit payments.

Financing.—With initial capitalization through an appropriation, the fund is financed solely by repayments. Administrative expenses are borne by the general operating expenses appropriation.

Operating results.—The following table presents operating results:

This revolving fund, established pursuant to the Veterans Omnibus Health Care Act of 1976, Public Law 94-581, provides a mechanism for the furnishing of rehabilitative services to certain veteran beneficiaries who are receiving medical care and treatment from the Veterans Administration.

Funds to operate the various rehabilitative activities and provide for the therapeutic work for remuneration for patients and members in Veterans' Administration health care facilities are derived from contractual arrangements with private industry or nonprofit entities. This is a self-sustaining fund, and therefore no appropriation is required to support these activities.

Under the provisions of 38 U.S.C. 5021, the Supply fund finances, on a reimbursable basis, the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support by the Office of Federal Procurement Policy.

Budget program.—The fund provides financial support for: (1) maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) operation of a service and reclamation program operating out of the supply depots; (4) centralized periodical procurement; (5) a marketing center or central buying office; and (6) a publications depot that provides forms for VA installations on a centralized basis.

The supply fund does not finance costs for the operation and administration of supply activities at VA field stations. These costs are charged directly to applicable appropriations.

Intragovernmental funds—Continued
SUPPLY FUND—Continued

Financing.—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving goods and services. For 1988 Supply fund sales are estimated to reach \$824 million. Average inventory needed to support those sales will be \$120 million.

Operating results.—The fund operated at a profit of \$3.5 million in 1986. The new total of retained earnings is \$49.3 million, which has been used to finance inventory growth. Operating expense as related to sales was 4.8 percent.

This account consists of voluntary contributions by eligible servicepersons and matching contributions provided by the Department of Defense. The fund provides educational assistance payments to participants who entered the service after December 31, 1976, and are pursuing training under chapter 32, title 38. U.S.C. Public Law 96-342, the Department of Defense Authorization Act, 1981, added two educational assistance programs for certain individuals who enlisted or reenlisted in the Army, Navy, Air Force or Marine Corps after September 30, 1980 and before October 1, 1981. Section 901 of that act is a non-contributory program with educational assistance provided by the Department of Defense. Section 903 authorizes the Department of Defense to make monthly contributions for certain post Vietnam-era participants. Public Law 98-525, enacted October 19, 1984, precluded new enrollments into this program during the period July 1, 1985 to June 30, 1988. Public Law 99-576, enacted October 28, 1986, closed the program permanently for new enrollments but does provide a grace period for new enrollments of eligible servicepersons until March 31, 1987. The estimated activity in the fund follows:

This fund was established in 1940 for the World War II servicemen's and veterans' insurance program. Over 22 million policies have been issued under this program. Activity of the fund reflects a rising claim workload. The trend in the number and amount of policies in force is shown as follows (dollars in thousands):

	1986 actual	1987 est.	1988 est.
Number of policies	3,007,746	2,917,830	2,829,240
Insurance in force	\$21,678,912	\$21,836,998	\$21,627,365

The status of the fund, excluding noncash transactions, is as follows (in thousands of dollars):

	1986 actual	1987 est.	1988 est.

This fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$11,322 million as of September 30, 1987 to \$11,583 million as of September 30, 1988. The actuarial estimate of policy obligations as of September 30, 1987, total \$11,262 million, leaving a balance of \$60 million for contingency reserves.

The fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from interest on investments and payments from the Veterans insurance and indemnities appropriation. Effective January 1, 1983, premiums were discontinued since reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from \$246 million as of September 30, 1987, to \$219 million as of September 30, 1988, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of September 30, 1987, totals \$241 million, leaving a balance of \$5 million for contingency reserves.

Note.—The Veterans Administration insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

This fund finances the payment of claims on life insurance policies issued before January 3, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951. No new policies can be issued. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

Budget program—

Death claims.—Represents payments to designated beneficiaries.

Cash surrenders.—A policyholder may terminate his or her insurance by cashing in the policy for its cash value.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (dollars in thousands):

	1986 actual	1987 est.	1988 est.
Number of policies.....	357,148	337,710	320,320
Insurance in force.....	\$3,162,200	\$3,041,484	\$2,913,708

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the total revenue of the fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

Volunteers in Service to America.—The service-learning programs will assist secondary and post-secondary educational institutions to establish and maintain service-learning activities for both students and their communities. In 1988, the VISTA program will provide 2,400 volunteer service years to assist communities working to resolve local poverty-related problems in the areas of literacy, youth (child abuse, runaways, etc.), refugees, food banks, and other agency emphasis areas.

Citizen participation and volunteer demonstration programs.—These programs stimulate and encourage the innovative use of volunteer services and provide community groups with small grants for project development. In 1988, these grants will aid the expansion of private volunteer activities and programs addressing drug abuse, illiteracy, and families in crisis.

Older American volunteer programs.—These programs provide opportunities for people aged 60 and over to volunteer their services to the community in many socially useful activities and by working with the emotionally disturbed, the mentally retarded and physically disabled, the infirm, and the isolated and infirm elderly. In 1988, approximately 23,800 Foster Grandparent volunteers will serve about 61,000 children. Emphasis will be on preventing institutionalization of children and on returning children to communities. The Retired Senior Volunteer program will support 392,000 part-time volunteers providing service in the areas of literacy, health, nutrition, education, the problems of troubled youth, refugee assistance, crime prevention, and other community services. Approximately 7,000 volunteers in the Senior Companion program will provide long-term care services to about 24,400 frail and elderly Americans.

Program support.—Costs of program direction and administration are financed by this activity.

The Conference assists the President, the Congress, and the Federal departments and agencies in improving administrative procedure. It conducts studies of the efficiency, adequacy, and fairness of the procedures that the agencies and departments use to determine the rights, privileges, and obligations of private persons. The Conference issues formal recommendations for improvements and then encourages their implementation.

In addition to its research activities, the Conference also arranges for the interchange among administrative agencies of information useful in improving administrative procedure and, on an ongoing basis, furnishes assistance and advice on matters of administrative procedure to the agencies, Congress, and others.

The Conference receives funds from other Federal agencies for special projects carried out by the Conference pursuant to agreements with these agencies.

The Advisory Committee on Federal Pay was appointed in accordance with the Federal Pay Comparability Act of 1970. The Committee assists the President in carrying out the policy of comparability in pay between major Federal statutory pay systems and private enterprise. The Committee reviews the annual report of the President's pay agent and considers the recommendations of representatives of Federal employees and other officials of the Federal Government. The Committee then prepares for the President an independent report with its findings and recommendations.

The Committee meets jointly throughout the year with the President's pay agent and the Federal Employees Pay Council in an attempt to reach early resolution of issues between them. It provides advisory opinions on unresolved issues.

The Architectural and Transportation Barriers Compliance Board was established by Section 502 of the Rehabilitation Act of 1973 to ensure compliance with the Architectural Barriers Act of 1968. Its primary role is to carry out a compliance program to ensure accessibility and usability of most Federal and Federally-funded buildings by physically handicapped persons. In 1988, the Board will continue to process, investigate, and resolve complaints of noncompliance. In 1986, 91 complaints were received. Emphasis is on voluntary, amicable resolution of access issues.

The Board also develops Federal minimum accessibility guidelines and requirements for the standards under the Architectural Barriers Act, and provides technical assistance to public and private organizations affected by Federal accessibility regulations.

Public Law 99-661 established the Barry Goldwater Scholarship and Excellence in Education Foundation to operate the scholarship program that is the permanent Federal tribute to the former Senator from Arizona. The Foundation will foster and encourage excellence in science and mathematics by awarding scholarships and fellowships to outstanding graduate and undergraduate students who intend to pursue careers or advanced degrees in science or mathematics. The Foundation may also award honoraria to outstanding individuals who have made significant contributions to improve the instruction of science and mathematics in secondary schools.

A board of directors will be appointed during 1987. The board will establish procedures to select award recipients, determine the size and number of awards, and appoint an executive secretary to perform the administrative operations of the Foundation. The Foundation is expected to make its first awards for the 1988-1989 school year.

The Commission engages in studies concerning areas in which there may be denials of civil rights and reports on these matters to the President and the Congress. Hearings by the Commissioners are held to investigate and obtain information about denials of civil rights. Conferences and open meetings are held by staff and State Advisory Committees to gather data and issue reports providing information about civil rights problems. In addition, appraisals of Federal agencies' civil rights programs are made and complaints alleging discrimination are referred to the proper Federal agencies.

The Commission provides liaison with private groups, public groups, and the media to provide civil rights information to Government officials, organizations, and the public. This is sometimes accomplished through the issuance of Commission publications. It also provides a library resource to support civil rights research, studies, hearings, and other Commission activities, and makes this information available to the general public.

For 1988, the administration is requesting an appropriation that provides for a transition from the reduced level appropriated in 1987 to a full-funding level planned for 1989.

The Committee for Purchase From the Blind and Other Severely Handicapped was established by the Wagner-O'Day Act of 1938, as amended. Its primary objective is to increase employment opportunities for the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. In 1988, 17,500 blind and handicapped individuals are projected to be employed in 355 producing workshops. The committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and makes rules and regulations necessary to carry out the purposes of the Act. The committee proposes to have 2,220 items on its procurement list, and estimated workshop sales of \$304 million.

The committee staff supervises the selection and assignment of new commodities and services, assists in establishing prices, reviews and adjusts these prices, verifies the qualifications of workshops, and monitors their performance.

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity, and protecting participants against abusive trade practices, fraud, and deceit. The object of commodity futures trading regulation is to enable the markets to better serve their designated functions of providing a price discovery mechanism and a means of offsetting price risk. By properly serving these functions, the futures markets serve the public interest by contributing toward better planning, more efficient distribution and consumption, and more economical marketing.

Market surveillance, analysis and research.—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors to insure orderly markets. Contract terms and conditions are reviewed to insure conformity with current cash marketing conditions and adequate deliverable supplies. This program also systematically investigates the functioning of markets and market users and develops better tools to assist in detecting and preventing price distortions.

Enforcement.—The enforcement program is responsible for detecting, investigating, and litigating violations of the Act or regulations. These violations may include actual and attempted market manipulations, cheating and defrauding customers, and abusive trading practices such as fictitious trading, wash trading, and pre-arranged trading. This program may seek redress through the administrative process or by injunctive actions in the Federal Courts.

Under current authorizing legislation, the Corporation for Public Broadcasting has two major activities: (1) direct payments to public television and radio stations to be used at their discretion for purposes related primarily to program production or acquisition; and (2) support for the production and acquisition of radio and television programs for national distribution. In addition, the Corporation assists in the financing of several system-wide activities, including national satellite interconnection services and the payment of music royalty fees, and provides limited technical assistance, research, and planning services to improve system-wide capacity and performance.

The appropriation for the Corporation for Public Broadcasting is enacted two years in advance. For 1988, an appropriation of \$214 million was enacted in 1986. Although public broadcasting is an important national resource, a funding level of \$214 million is incompatible with the urgent need to reduce Federal spending. The Administration is, therefore, requesting that, of the \$214 million appropriated for 1988, \$44 million shall be

available for 1990 only, and that, of the \$228 million appropriated for 1989, \$88 million shall be available only for 1990. The table below illustrates the 1988-1990 funding levels for the Corporation for Public Broadcasting:

The Federal payment of \$425.0 million is to reimburse the government of the District of Columbia for the net cost of the Federal presence. Beginning in 1988, in order to promote efficiency and accountability, the District of Columbia will treat Federal establishments of the Judicial, Legislative, and Executive branches of government like private customers for the water and sewer services that they receive from the District of Columbia Government. Thus, in lieu of a lump sum appropriation to the District for these services, the Federal establishments will make payments directly. This appropriation also includes a contribution of \$52.1 million which represents the Federal share of payments to District of Columbia retirement funds for police officers, fire fighters, teachers and judges. Finally, this appropriation includes a payment of \$30.0 million to assist in financing St. Elizabeths Hospital as part of a six-year plan to transfer administrative and financial responsibility from the Federal Government to the District.

The Equal Employment Opportunity Commission (EEOC) is the Federal agency responsible for enforcement of: the Age Discrimination in Employment Act of 1967; title VII of the Civil Rights Act of 1964; the Equal Pay Act of 1963; and, in the Federal sector only, section 501 of the Rehabilitation Act of 1963. These acts prohibit employment discrimination based on race, sex, religion, national origin, age, or handicap status. The Equal Employment Opportunity Commission is also responsible for carrying out Executive Order 12067 which promotes coordination and minimizes conflict and duplication among Federal agencies which administer statutes or regulations involving employment discrimination.

2299	U.S. contingent liability for guaranteed loans outstanding, end of year	4,785,088	5,487,888	6,165,888
------	---	-----------	-----------	-----------

The purpose of the Export-Import Bank is to aid in financing and promoting U.S. exports.

To accomplish its objectives, the Bank's authority and resources are used to: assume commercial and political risks that exporters or private institutions are unwilling or unable to undertake; overcome maturity and other limitations in private sector export financing; assist U.S. exporters to meet foreign officially sponsored export credit competition; and provide leadership and guidance in export financing to the U.S. exporting and banking communities and to foreign borrowers. The bank is also actively assisting small- and medium-sized businesses to increase their exports by publicizing the Bank's programs.

In 1987, Congress appropriated \$100 million for a special fund to counteract predatory export financing practices. This fund will promote efforts by the United States to eliminate through negotiations unfair export financing, \$200 million is proposed for 1988.

A limitation of \$1.0 billion for direct loans and of \$10 billion for loan guarantees is proposed for 1988.

The Farm Credit Administration examines and regulates a coordinated agricultural credit system of farm credit banks and associations which lend to farmers, ranchers and their cooperatives.

The System is comprised of 12 Federal land banks, 12 Federal intermediate credit banks, 13 Banks for cooperatives, the Farm Credit System Capital Corporation, various System service organizations and approximately 370 Federal land bank associations and production credit associations.

Assessments based upon estimated administrative expenses are collected from institutions in the Farm Credit System and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Farm Credit Administration Board.

Commissioners.—This activity includes the top adjudicatory, policymaking, planning, and decision-making for the Commission's basic functions.

Mass media.—This activity licenses and regulates broadcasting (AM, FM, TV) and its associated auxiliary services. This activity also is responsible for regulating cable television and its associated auxiliary services. In 1988, the mass media activity will continue to authorize existing audio and video services to the public in the most expeditious manner possible.

Common carrier.—This activity regulates the service offerings, facilities, rates and practices of interstate and international common carriers. In 1988, this activity will continue to authorize new services' entry into the common carrier services and to monitor the restructuring of the telecommunications industry.

Private radio.—This activity includes the licensing, regulation and enforcement of seven major radio services: aviation, marine, land mobile, microwave, general mobile, amateur, and restricted permits.

Field operations.—This activity performs licensing, enforcement, and public service at various field locations throughout the United States and its territories.

Science and technology.—This activity acts as the staff adviser on broad scientific and technical matters and coordinates non-Federal spectrum allocation. Additionally, this activity is responsible for the operation of the agency's equipment testing and certification program.

Support.—This activity provides the Commission with expert advice, assistance, and centralized staff support.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. The deposit insurance ceiling protection has been \$100,000 since March 31, 1980. In order to accomplish its varied functions in the protection of bank depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. The major portion of the Corporation's operations consists of the examination of State banks that are not members of the Federal Reserve System and liquidation activities attendant to insured banks that have closed.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the Treasury of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1987 and 1988.

In order to facilitate deposit assumptions and mergers, or to assist operating banks, the Corporation is authorized to purchase notes issued by the assuming or acquiring bank, or in the case of direct assistance, notes issued by the operating bank. The above schedule reflects the outstanding principal amounts of these notes, projected repayments based on the notes agreements, and estimated additional disbursements and repayments during 1987 and 1988.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of September 30, 1986, the deposit insurance fund amounted to \$18.8 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The estimates for 1987 and 1988 in these statements make provision for losses and expenses which might occur by reason of the closing of any bank after September 30, 1986.

Civil defense.—The civil defense programs feature an Integrated Emergency Management System approach. The programs are designed to develop generic evacuation and in-place protection plans and functional emergency capabilities to mitigate, prepare for, respond to, and recover from emergencies caused by natural, technological, and attack-related hazards.

Comprehensive emergency preparedness planning.—This program provides for the enhancement of State and local governments' capability to prepare for, respond to, and mitigate disasters and emergencies. Program activities include analyses, needs assessments, technical guidance and financial support designed to assist State and local governments in developing a comprehensive approach to preparedness planning. A primary instrument for implementing CEPP is the disaster preparedness improvement grant program. These annual grants provide up to \$25,000 to States on a 50/50 match basis for improving or maintaining disaster

assistance plans. All but a few States are participants in this program.

Radiological emergency preparedness.—This program provides assistance to State and local governments through the issuance of guidance, review and approval of plans, and evaluation of exercises. The program is focused on improvement of State and local capabilities to cope with radiological accidents at commercial nuclear power plants, other fixed nuclear facilities, nuclear materials license holders and transportation of radioactive materials.

Federal preparedness.—The goals of the Federal preparedness activity are to achieve Government readiness to ensure that the Nation will be able to respond to, manage, and recover from peacetime or wartime national security emergencies and to enable Government, at all levels, to cope with the consequences of accidental, natural, and man-caused occurrences.

Training and fire programs.—This activity prepares Federal, State and local officials, their supporting staff, and the public to meet the responsibilities and challenges of domestic emergencies through planning, mitigation, preparedness, response, and long-term recovery. Educational programs are provided through the Emergency Management Institute and the National Fire Academy. In addition, the U.S. Fire Administration concentrates on providing a Federal focus on identifying problems with which the Nation's fire and rescue services must deal, finding solutions to these problems, and supporting State and local fire protection and emergency rescue efforts.

Flood plain management.—This activity involves the operation of a program that combines mapping, regulatory, and technical-assistance efforts for the purposes of responding to known flood hazards and mitigating their effects through a comprehensive approach to the management of flood plains. This activity will be funded through the National Flood Insurance Fund in 1988.

al board for the purpose of determining how the program funds are to be distributed to individual localities. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the U.S.A., the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., and the American Red Cross shall each nominate a representative to sit on the national board, and the Director of the Federal Emergency Management Agency shall designate a representative from each of these organizations to sit on the national board. The Federal Emergency Management Agency shall also designate a representative to sit on the national board, and the representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for ~~[\$70,000,000]~~ \$80,000,000 to the national board [within thirty days after enactment of this Act] for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations and through units of local government.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with the Federal Emergency Management Agency. (Additional authorizing legislation to be proposed.)

Note.—Public Laws 99-500 and 99-591, section 101(g), provide funds to the extent and in the manner provided for in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987.

This program provides grants to voluntary organizations at the local level to supplement their programs for emergency food and shelter.

In 1988, the Emergency Shelter Grants Activity within the "Shelter Programs" appropriation in the Department of Housing and Urban Development will be folded into this program. To assure the same level of funding in 1988 as in 1987, the consolidated program will be funded at \$80 million, which is equal to the combined funding level of these two programs in 1987.

The National Insurance Development Fund provided the funding source for two programs authorized by the Urban Property Protection and Reinsurance Act of 1968, as amended: (1) The FAIR (Fair Access to Insurance Requirements) Plan/Riot Reinsurance Program, and (2) the Federal Crime Insurance Program. The Supplemental Appropriations Act, 1985 (Public Law 98-181) did not extend authority for the Riot Reinsurance Program beyond November 30, 1983. The Federal Crime Insurance Program has been extended until September 30, 1987. The budget estimates assume there will be no new policies issued subsequent to those dates. However, there will be operating expenses associated with unexpired policies and the close-out of contractor activities.

Insurance claims.—Claims reflect insurance payments in the program.

Operating expenses.—Expenses are incurred by fiscal agents in issuing policies, settling claims, and maintaining accounting and statistical records.

One-time payments to States.—In 1986, Congress appropriated \$10 million for payment to assist States in establishing an alternative to the Federal Crime Insurance Program. A total of eleven States, representing over 5,000 crime insurance policies, accepted \$1.521 million and will withdraw from the program during 1987.

Administrative expenses.—This represents the administrative cost of operating the programs.

Interest expense.—This represents interest on Treasury borrowings needed to defray underwriting and loss expenses of the crime insurance program.

Financing.—Claims and expenses are estimated to be paid from premium income and Treasury borrowings.

Operating results.—Claims and expenses are expected to exceed premium income resulting in a decrease in the reserves of the fund. The deficits have been reduced by major rate increases and rating changes.

Note.—Includes \$53,092 thousand in 1988 for activities previously financed from "Salaries and Expenses" and "Emergency Management Planning and Assistance."

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities which enact and enforce appropriate flood plain management measures. Communities must participate in the program within one year of the time they are identified as flood prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes.

Under the emergency program, structures in identified flood-prone areas are eligible for limited amounts of coverage at subsidized insurance rates. Under the regular program, studies must be made of different flood risks in flood-prone areas to establish actuarial premium rates. These rates are charged for insurance on new construction. Coverage is available on virtually all types of buildings and their contents in amounts up

to \$245 thousand for residential and \$550 thousand for other types.

Significant indicators of program size are as follows:

	1986 actual	1987 est.	1988 est.
Policies in force	2,075,567	2,241,612	2,453,000
Insurance in force (billions of dollars)	134	146	186

Budget program—Insurance underwriting expense.—Cost of initiating and maintaining flood insurance policies is estimated at \$175,765 thousand in 1988.

Loss and adjustment expense.—Insured flood losses and associated loss adjustment expense is estimated at \$341,473 thousand in 1988.

Interest expense.—Interest on Treasury borrowings needed to defray underwriting and loss expenses is estimated at \$2,537 thousand in 1988.

The following activities are proposed for transfer to the National Flood Insurance Fund from other appropriations in FEMA's budget:

Flood studies and surveys.—These studies are estimated at \$36,460 thousand in 1988.

Flood hazard reduction.—This activity, which includes the state assistance program, is estimated at \$4,020 thousand in 1988.

Purchase of property.—This activity provides for the acquisition of property that has received severe or repeated flood damage and is estimated at \$2,720 thousand in 1988.

Salaries and expenses.—This activity provides for salaries and related expenses of all Federal staff administering the National Flood Insurance Program and is estimated at \$9,892 thousand in 1988.

Financing.—The Administrator is authorized to borrow up to \$1 billion to carry out the program. The program is financed through premium income and appropriations to repay borrowing.

Operating results.—Cumulative loss for this program is projected to be \$1.4 billion at the end of 1988. This deficit has been partially financed through appropriations of \$1.2 billion.

The Director of FEMA is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or

facilitating the work of the Federal Emergency Management Agency. Property and the proceeds thereof are used as nearly as possible in accordance with the terms of the gift or bequest.

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies for and supervises the operation of the 12 Federal home loan banks, the system of Federal savings and loan associations, the Federal Savings and Loan Insurance Corporation, and the Federal Home Loan Mortgage Corporation. It is also responsible for the examination of Federal savings and loan associations and for the examination and supervision of State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation.

Budget program.—The Board's budget program consists of several activities:

Supervision of Federal home loan banks and applications processing.—The Board supervises the operations of the 12 Federal home loan banks. Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

Examination and supervision of Federal and State-chartered thrift institutions.—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal home loan bank system which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively, with the respective State authorities.

Executive direction and staff services.—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

Analysis of operations.—Analyses are made of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

Administrative services.—These consist of accounting, budgeting, and financial reporting; internal budget control; and fiscal organization and management. Also included are general housekeeping, data processing, and operating services.

The 12 Federal home loan banks seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Section 11(i) of the Federal Home Loan Bank Act authorizes the banks to borrow from the Treasury up to \$4 billion outstanding at any one time.

The amounts shown in the schedules for the activities discussed above for 1988 include administrative expenses under an annual limitation, and certain additional expenses not under a limitation. Administrative

expenses are estimated to increase from \$28.4 million in 1987 to \$30.2 million in 1988.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations, Federal mutual savings banks, and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protec-

tion, which insures each saver in a member association against financial loss up to a statutory limit of \$100 thousand, may be provided either through the prevention of default or the payment of insurance to savings accounts holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of an association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as a receiver, or co-receiver upon the request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under the direction of the Federal Home Loan Bank Board, which provides administrative services. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

Home Loan Bank Board in 1988 in return for services and facilities from the Board.

Contributions and provision for contributions to insured thrift institutions.—This item is the estimated amount needed in 1988 to prevent the default of insured institutions.

Liquidation and other expenses.—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agreements, the disposition of assets purchased from, and loans to insured institutions to prevent default.

Interest on notes payable.—This is interest paid on promissory notes issued by the Corporation for the purchase of either Income Capital Certificates or Net Worth Certificates. The certificates are issued by qualifying insured institutions with low net worth in order to improve or maintain their capital position.

Financing.—The original capital of \$100 million has been completely repaid to Treasury, together with an additional \$43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of \$750 million outstanding at any one time. No borrowing under this authorization has ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1 percent of the total amount of the accounts of its insured savers.

Operating results.—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of \$3,637.1 million as of September 30, 1986. Total revenues and other receipts since 1934 of \$15,339.3 million have been applied as follows:

Legislation will be proposed to recapitalize the FSLIC fund. A separate Financing Facility will be created and capitalized from earnings of the Federal Home Loan Banks (FHLBs). The Facility is created to isolate its transactions from the other transactions of the FHLBs, in order to protect the latter from higher borrowing costs. The Financing Facility would issue bonds and use the proceeds to purchase FSLIC stock. The Financing Facility would not have guarantees from the Treasury or FSLIC, and it would use the existing staff resources of the FHLB system. FSLIC would raise between \$10 and \$15 billion from the sale of stock over five years and use these resources to accelerate its efforts to close those unprofitable and insolvent thrifts that pose a growing financial threat to the fund.

The Authority serves as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations Statute, decides major policy issues, prescribes regulations, and disseminates information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the Federal Labor Relations Authority gives full recognition to the role of the Federal Government as an employer.

Authority members.—The Authority adjudicates labor-management disputes in the Federal sector including: appeals on negotiability issues; exceptions to arbitration awards; appropriate units for the purposes of exclusive recognition; eligibility of labor organizations for national consultation rights and unfair labor practice complaints.

Workloads are reflected in the following table:

The Federal Maritime Commission regulates the domestic offshore and international waterborne commerce of the United States. In addition, the Commission has responsibility for the licensing of ocean freight forwarders and for insuring that vessel owners or operators establish financial responsibility for death or injury to passengers or other persons on voyages to and from U.S. ports, and indemnification of passengers for the nonperformance of transportation. Major program areas for 1988 will concentrate on developing a program to computerize the filing of tariffs; pursuing an active enforcement program designed to identify and prosecute violators of the shipping statutes; collecting and analyzing data on the impact of the 1984 Shipping Act and beginning the preparation of the report required under section 18(c) of the Act; and completing various stages of automation.

other than those involving rail and air transportation, whenever such disputes threaten to cause a substantial interruption of interstate commerce or a major impairment of the national defense. The Service also makes mediation and conciliation services available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service provides mandatory mediation and, where necessary, impartial boards of inquiry to assist in resolving labor disputes involving private nonprofit health care institutions. The workload shown below includes assignments closed in both the private and public sectors.

The Thrift savings fund is composed of individual accounts maintained by the Federal Retirement Thrift Investment Board on behalf of the individual Federal employees who have contributed to the fund. All Federal employees are eligible to contribute to the fund. However, only those employees covered by the Federal Employees Retirement System will have their contributions matched by the employing agency in accordance with the formulas prescribed by law. It is estimated that 40 percent of those employees covered by the Civil Service Retirement and Disability System will elect to switch to the Federal Employees Retirement System to be eligible for agency matching contributions and other benefits. Within certain restrictions imposed during a phase-in period, the individual employee is entitled to select how contributions are distributed among three investment funds: a Government securities investment fund, a fixed income investment fund, and a common stock index investment fund. The estimated status of these three separate funds is shown below:

[Provided, That the funds appropriated in this paragraph are subject to the limitations and provisions of sections 10(a) and 10(c) (notwithstanding section 10(e)), 11(b), 18, and 20 of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374): Provided further, That (a) The Federal Trade Commission shall submit to the Committee on Commerce, Science, and Transportation of the Senate, to the Committee on Energy and Commerce of the House of Representatives and to the Appropriations Committees of the Senate and House of Representatives the information specified in subsection (b) of this section every 6 months during fiscal year 1987. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during such fiscal year, and such report may be included in the annual report. A separate report containing such information shall be submitted 6 months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.**

(b) Each such report shall list and describe, with respect to instances in which predatory pricing practices have been suspected or alleged—

- (1) each complaint made, orally or in writing, to the offices of the Commission;
- (2) each preliminary investigation opened or closed at the Commission;
- (3) each formal investigation opened or closed at the Commission;
- (4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;
- (5) each complaint issued by the Commission;
- (6) each opinion and order entered by the Commission;
- (7) each consent agreement accepted provisionally or finally by the Commission;
- (8) each request for modification of an outstanding Commission order filed with the Commission;
- (9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and
- (10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include copies of all such consent agreements and complaints executed by the Commission referred to in such report. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The descriptions required under this subsection shall be as complete as possible but shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public. The report shall include any evaluation by the Commission of the potential impacts of predatory pricing upon businesses (including small businesses.) *(Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, section 101(b); additional authorizing language to be proposed.)*

The Federal Trade Commission is charged by law with ensuring that competition in the marketplace is vigorous, free, and fair. This is accomplished by eliminating threats to fair and honest competition from all sources, both public and private.

Maintaining competition.—The Commission's efforts within this mission are aimed at fostering and preserving our competitive system with the goal of maximizing consumer welfare. In addition to enforcing the antitrust laws against private sector restraints on competition, the Commission also scrutinizes regulatory policies that unduly restrain competition, and tries to exert a pro-competitive influence in the development of such policies.

Consumer protection.—The Commission is charged with eliminating unfair or deceptive acts or practices affecting commerce. The goal of the consumer protection mission is to improve market performance so that consumers can make informed choices when exercising their purchasing power. To accomplish this goal, the Commission will remove harmful private and public restrictions on market performance; encourage business to provide consumers with accurate and useful information; and reinforce market forces that enhance consumer welfare.

Economic activities.—This mission has four major functions: conducting research on the performance of the industrial economy; providing economic support to the Commission's antitrust and consumer protection efforts; advising the Commission on the impact of governmental regulation on competition in various industries; and developing economic reports on industrial structure and performance.

Public Law 93-642 established the Harry S Truman Scholarship Foundation to operate the scholarship program that is the permanent Federal memorial to the 33rd President of the United States. The Foundation awards scholarships for up to four years to qualified college students who demonstrate outstanding potential for and interest in careers in public service at the local, State, or Federal level.

Legislation was enacted in 1986 that raised the former \$5,000 cap on annual award levels to \$10,000,

allowing the Foundation to raise awards. The Foundation announced an award cap of \$7,000, effective for awards for school year 1987-88. However, the Foundation reserves the right, and intends if necessary, to adjust award levels or the number of scholars, or both, to avoid any decline in the value of its trust fund.

In 1988, the Foundation will conduct its twelfth annual competition to select up to 105 new Truman scholars and will continue to assist in the placement of graduating Truman scholars in public service positions.

Scholarship awards.—This activity is comprised of scholarships awarded to cover eligible educational expenses.

Program administration.—This activity covers all costs of operating the program, including annual program announcement, interview and selection of Truman scholars, calculation and disbursement of scholarship awards, monitoring of student progress, and placement assistance.

The Advisory Commission on Intergovernmental Relations (ACIR) is an independent, bipartisan body with twenty-six members representing different levels of government. The Commission and its staff examine Federal, State and local trends, events, and programs having an intergovernmental impact. Proposed legislation and executive actions are reviewed to determine their overall effect on the Federal system. The Commission also identifies emerging problems of Federal-State-local relations and assists States and localities in anticipating and meeting problems caused by various intergovernmental overlaps and conflicts, and makes recommendations concerning the workings and structural arrangements of governmental units and allocation of responsibilities and revenues among the various levels of government. The recommendations and published reports growing out of the Commission's work are submitted to the executive and legislative branches of Federal, State, and local governments for appropriate action.

Continuing and annual projects of the Commission include assessing changing public attitudes on government and taxes; developing a "representative tax system" for all 50 States; analyzing fiscal disparities; publishing an annual catalog of Federal aid; surveying and identifying trends in State and local finances; monitoring key intergovernmental legislation of Federal, State, and local governments; and providing educational and technical assistance to Federal, State, and local governments regarding Commission recommendations.

Nonrecurring projects currently under Commission study include more effective intergovernmental welfare system, state-by-state analysis of proposals to reform the individual income tax, fiscal discipline, the role of the national judiciary in the federal system, federal preemption of state and local laws and authority, alternative approaches to providing local public services, rethinking local self-government in a federal system, and analysis of intergovernmental aid formulas.

Appropriations finance the personnel and personnel-related expenses incurred in the basic day-to-day operation of the Commission.

In 1988, the Appalachian Regional Development programs will be discontinued. Of funds available in 1987, \$10 million will be carried over to 1988 and allocated to other Federal agencies in 1988 and subsequent years to close out Appalachian regional development non-highway projects. The Department of Commerce will be responsible for closeout activities associated with this account.

Appalachian Development Highway System.—The Appalachian Development Highway System program will also be discontinued in 1988. The Federal Highway Administration will be responsible for closeout of this program.

Appalachian Housing Fund.—The Appalachian Housing Fund has been discontinued; housing grants are funded under the Appalachian regional development program appropriation.

Appalachian Regional Commission.—The Appalachian Regional Commission will be responsible for closeout of its own activities and for initial closeout actions in the Appalachian regional development programs and for orderly transition of these programs to the Federal Highway Administration and to the Department of Commerce.

The Washington Metropolitan Area Transit Authority (WMATA) is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and construct the Metro-rail rapid transit system and to operate the bus/rail transit system in the National Capital area. The rail system extends from the District of Columbia into the participating jurisdictions of Maryland and Virginia.

This WMATA account provides the annual Federal share of interest payments on outstanding WMATA bonds sold in support of the rail construction program. The WMATA bonds, totaling \$997 million, are guaranteed by the Federal Government. In September 1979, the WMATA and the Department of Transportation approved an Initial Bond Repayment Participation Agreement providing for an overall two-thirds Federal and one-third local sharing of the interest and principal costs of the bonds. In August 1982, this agreement was reaffirmed in a supplement to the agreement. The 1988 request represents the Federal share under the terms of the agreement.

The U.S. International Trade Commission is an independent agency created by act of Congress. The Commission's current powers and duties are provided for by the Tariff Act of 1930; the Trade Act of 1974; the Trade Agreements Act of 1979; the Agricultural Adjustment Act; section 1911 of the Financial Institution Regulatory and Interest Rate Control Act of 1978, 12 U.S.C. 635a-2; and the Trade and Tariff Act of 1984.

The Commission conducts investigations and, where appropriate, makes determinations and recommendations, or takes action, in cases where (1) serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; (2) imports of goods sold at less than fair value may injure an industry; (3) foreign governments, organizations, or individuals, may have subsidized imports into the United States; (4) unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry or restrain and monopolize trade and commerce in the United States; or (5) imports of agricultural products may materially interfere with certain programs of the Department of Agriculture.

The Commission advises the President as to the probable economic effect on the domestic industry and consumers, of modification of duties and other barriers to trade which may be considered for inclusion in any proposed trade agreement with foreign countries. Further, the Commission, at the request of the President, the Congress, or on the Commission's own motion, undertakes comprehensive studies and provides reports on key issues relating to international trade and economic policy matters.

General and special funds—Continued
SALARIES and EXPENSES—Continued

The Commission, in cooperation with the Secretary of the Treasury and the Secretary of Commerce, establishes for statistical purposes an enumeration of articles imported into the United States and exported from the United States, and seeks to establish comparability of such statistics with statistical programs for domestic production.

The Commission also issues a publication containing U.S. tariff schedules and related matters and considers questions concerning the arrangements of such schedules and the classification of articles.

Pursuant to section 175 of the Trade Act of 1974, the budget estimates for the Commission are included without revision by the President.

The Interstate Commerce Commission is responsible for the regulation of interstate surface transportation. Consistent with the downward trend in the regulation of surface transportation which grew out of the regulatory reform legislation of 1980 and 1982, the Commission has reduced staff by 60 percent since 1981.

Motor program.—This includes the regulation of rates, the granting of operating authorities, the regulation of mergers and acquisitions, and the planning, analysis, and policy development associated with these activities as they relate to the Interstate Commerce Act as amended by the Motor Carrier Act of 1980, the Household Goods Transportation Act of 1980, the Bus Regulatory Reform Act of 1982, and the Surface Freight Forwarder Deregulation Act of 1986. The activities of interstate motor freight, buses and water carriers are monitored, and enforcement actions are instituted to ensure compliance with regulations intended to protect the public interest and promote an adequate and efficient transportation system.

Rail program.—This encompasses the regulation of rates and of mergers, acquisitions, construction and abandonment of railway lines, as well as the planning, analysis, and policy development associated with these activities as provided for in the Interstate Commerce Act, as amended by the Staggers Rail Act of 1980. Staff ensure compliance with railroad regulations in order to protect the public interest.

General management and administration.—These activities provide support services, including data processing, budget and financial management, personnel, procurement, and contracting services.

Legislation will be proposed to abolish the Interstate Commerce Commission and to deregulate completely the interstate motor freight, freight forwarders, buses and water carriers by October 1, 1987. The enactment of this legislation would eliminate a major portion of ICC's workload. The remaining activities would be transferred to the Departments of Justice and Transportation and the Federal Trade Commission.

Once a railroad ceases operations due to a lack of cash or a court order, the Commission may direct other railroads to provide service over the track of the railroad which ceased operations and may compensate the directed rail carrier for its services. The responsibility for this activity would be transferred to the Department of Transportation, as part of the proposal to sunset the ICC.

Legislation will be proposed to sunset the ICC and transfer remaining functions to the Departments of Justice and Transportation and the Federal Trade Commission. Payments for Directed Rail Service will transfer to the Department of Transportation.

Public Law 99-500 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. The same law provided advance appropriations of \$10 million for 1988 and \$10 million for 1989 to establish the Foundation's trust fund. These funds will be invested by the Secretary of the Treasury in U.S. Treasury securities and interest earned will be available for carrying out the activities of the Foundation. Public Law 99-500 also appropriated \$3.2 million, to become available in 1988, for grants to four specified law schools to establish constitutional law resource centers.

The Foundation is authorized to award fellowships of up to \$12 thousand to individuals selected for their academic achievement and their potential to become secondary school teachers of social studies and American history. No funds are available for fellowships until at least \$10 million in private contributions have been received. No fellowships are anticipated in 1988.

Funds for program administration in 1988 will cover costs of planning and fundraising for the new fellowship program.

The Japan-United States Friendship Act of 1975 established the Japan-United States Friendship Trust Fund and created the Japan-United States Friendship Commission to make grants from the Fund for the promotion of scholarly, cultural, and artistic activities between Japan and the United States. The Commission is authorized to make expenditures from the appropriated income of the fund and, in an amount not to exceed 5% annually of the principal of the fund, to pay the ex-

penses of the Commission and to make grants in support of studies, fellowships, scholarships, book collections, art programs, and other cultural and educational activities, primarily in the United States. The Commission received a contribution in May 1981 of \$2 million from the Government of Japan to be used for the purposes of the Act. This should be fully expended in 1987.

The Legal Services Corporation (LSC) funds State and local agencies that provide free civil legal assistance to the poor. LSC is a private, non-profit corporation which is outside the Federal Government and acts independently of related social and community services programs. Grantees are involved both in cases for individual clients and in broader "law reform" activities.

The Administration proposes that the Corporation not be reauthorized and that no further Federal funding be provided.

The Merit Systems Protection Board performs the adjudicatory functions necessary to maintain the civil service merit system. These include hearing appeals on adverse actions, reduction in force actions, and retirement. The Board will report to the President on whether merit systems are sufficiently free from prohibited personnel practices to protect the public interest.

Board workloads are reflected in the following table:

The Special Counsel is empowered to investigate prohibited personnel practices in Federal agencies and political activities prohibited by the Hatch Act, and to administratively prosecute offending employees and agencies before the Merit Systems Protection Board. The Special Counsel may also transmit "whistleblower" allegations to the agency head concerned and require an agency investigation and a report to the Congress and the President when found appropriate.

Many cases that are referred to the Office are resolved without recourse to formal proceedings before the Board. Efforts to obtain such informal resolutions will continue in 1987.

The National Archives and Records Administration provides for basic operations dealing with management of the Government's archives and records, operation of Presidential libraries, and for the review for declassification of security classified information.

In 1988, records in the National Archives and Federal records centers will total approximately 17.1 million cubic feet. The number of reference services expected to be provided will total 30.7 million.

Records centers.—In 1988, agencies will transfer 1,418 thousand cubic feet of inactive records to the records centers. The records centers will dispose of 1,033 thousand cubic feet of records in 1988, and 26.8 million reference services will be provided.

Archives and related services.—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies, the public, and the number of documents sent by Federal agencies to be published in the Federal Register. For 1988 the number of reference services is estimated at 3.9 million and the number of Federal Register pages to be processed will be 670,000.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security. In 1988, 13.4 million pages will be reviewed for declassification.

National Historical Publications and Records Commission.—This Commission coordinates and provides technical assistance to archival planning and assessment projects in many States and also offers a specialized reference service to Federal, State and local and nongovernment institutions that are publishing significant portions of records from official government files. The Commission also lends its endorsement and support to those specific projects that further the basic objectives stated in its legislation.

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act of 1934, as amended.

The Administration's activities consist of: (a) chartering new Federal credit unions, (b) supervising established Federal credit unions, (c) making periodic examinations of their financial condition and operating practices, and (d) providing administrative services. The operating fund is reimbursed for the insurance fund's share of the agency's administrative expenses by the insurance fund. The reimbursement percentage, which is reviewed and adjusted periodically, is currently at 50 percent. Data relating to activities are shown below.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

Budget program.—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions. The fund also reimburses the operating fund for its share of the Agency's administrative costs. The reimbursement percentage which is reviewed and adjusted periodically, is currently at fifty percent.

The extent of the program is estimated as follows:

Item:	1986 actual	1987 est.	1988 est.
Number of insured credit unions	14,701	14,600	14,500
Shares of insured member institutions as of Dec. 31 of the previous calendar year (in millions of dollars)	109,000	133,000	150,000

It is estimated that approximately 4,920 State-chartered credit unions will be enrolled in the program by the end of 1988.

Financing.—For calendar year 1987, the credit union's required annual insurance premium of one-twelfth of 1 percent of their total member share accounts has been waived. However, as a result of Public Law 98-369 (July 18, 1985), each insured credit union is required to deposit and maintain in the insurance fund 1 percent of its member share accounts. The fund is structured to be entirely self supporting through the moneys paid by member credit unions. The moneys received plus the income generated from their investment are expected to cover all administrative and financial costs, as well as increase the fund balance proportionate to insured share growth. It is anticipated that the nearly fourfold increase in the insurance fund generated from the 1 percent deposit will eliminate the need to assess the annual premium except in years of catastrophic credit union losses. The fund has \$100 million in borrowing authority from the Treasury for use in unforeseen emergencies.

Operating results.—Anticipated net income of \$95,500 thousand will be retained in the fund, raising the balance for unforeseen emergencies to \$1,993 million by the end of 1988.

The National Credit Union Central Liquidity Facility was established under Public Law 95-630. It began operations on October 1, 1979. The Central Liquidity Facility provides loans to member credit unions for seasonal and emergency needs.

The two primary sources of funds for the Facility are stock subscriptions from credit unions and borrowings from the Federal Financing Bank. Credit unions, which choose to become members of the Facility, are required to purchase stock equal to one-half of 1 percent of their assets. One-half of the subscription in stock is forwarded to the Facility and deposited in the fund. The remaining half of the subscription remains on call in the credit union in investments as approved by the NCUA Board.

The Facility may borrow funds from any source to relend to member credit unions. This amount of borrowings is limited to twelve times the amount of capital stock subscriptions by the authorizing statute (Public Law 95-630). In 1988, an appropriation limitation on new loans of \$600 million is proposed, of which it is currently anticipated that \$72 million will be used.

The National Institute of Building Sciences is a non-profit, nongovernmental corporation authorized by the Housing and Community Development Act of 1974. The purpose of the Institute is to support the development and maintenance of nationally recognized building performance criteria for maintenance of life, safety, health, and public welfare. In 1984, the Institute received a payment from the Federal Government and a National

Institute of Building Sciences Trust Fund was established. Until 1990, the Institute can receive up to \$500,000 of interest generated by the trust fund annually if matching funds of an equal amount are raised from the private sector.

NATIONAL LABOR RELATIONS BOARD

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, [\$129,960,000] \$141,580,000: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

Note.—Public Laws 99-500 and 99-591, section 101(i), provide funds to the extent and in the manner provided for in the conference version of H.R. 5233, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1987.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1986 was 33,780 unfair labor practice cases and 7,859 representation cases. Estimates for unfair labor practice cases are 35,664 for 1987 and 36,969 for 1988. Representation case estimates are 8,426 for 1987 and 8,794 for 1988.

Field investigation.—Charges of unfair labor practices and petition for elections to resolve representation disputes are investigated by regional office personnel. Over 94 percent of the unfair labor practice cases and about 82 percent of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases and the avoidance of litigation.

Administrative law judge hearing.—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1986 there were 686 hearings closed, 51 proceedings adjusted after close of hearing, and 687 decisions issued. The estimate for 1987 is for 737 hearings to be closed, 2 adjusted after hearing, and 746 decisions. The estimate for 1988 is for 763 hearings to be closed, 2 adjusted after hearing, and 772 decisions.

Board adjudication.—In an unfair labor practice case a judge's decision becomes a Board order if no exceptions are filed. About 30 percent of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed requires contested Board decision. In 1986, 857 such Board decisions were issued; the estimates for 1987 and 1988 are 900 and 1,000 respectively. In representation cases, regional directors initially decide the issues by Board delegation. In 1986 regional directors issued 1,147 such decisions; and the estimate is 1,393 for 1987 and 1,451 in 1988. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1986 the Board issued 147 representation decisions; the estimates for 1987 and 1988 are 158 and 165 respectively. The Board also ruled on 257 objection and challenge questions in election cases in 1986; it is estimated that 205 such rulings will be required in 1987 and 214 in 1988.

Securing compliance with Board orders.—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1986 a total of 202 Board decisions of all kinds required such litigation; the estimate for 1987 is 281, and for 1988 it is 291.

Mediator services.—The Board mediates disputes over wages, hours, and working conditions for some 650 rail and air carriers and approximately 700,000 employees in the two industries.

The Board also provides technical assistance to enable labor and industry representatives to explore informally the relevant economic and noneconomic

problems that condition collective bargaining in the railroad and airline industries.

Voluntary arbitration and emergency disputes.—When the parties fail to resolve their disputes through mediation, they are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint emergency boards to investigate and report on the disputes under section 160 of the Railway Labor Act (RLA). Such reports usually serve as a basis for resolving the disputes.

The Northeast Rail Service Act of 1981 amended the Railway Labor Act by adding a new emergency dispute procedure covering disputes between a publicly funded and operated commuter carrier and its employees. The 1981 act requires the Board to appoint the public members of factfinding panels on Conrail.

Adjustment of Railroad Grievances.—Railroad employee grievances resulting from disputes over the interpretation or application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board (NRAB). The divisions of the Board are composed of an equal number of carrier and union representatives compensated by the party or parties they represent. Public Law 89-456 provides for the adjustment of disputes involving grievances resulting from interpretation or application of bargaining agreements in the railroad industry otherwise referable to the NRAB. Beginning in fiscal year 1988 referee salary and expenses will be paid by the parties.

Administrative direction and support for the public law boards, special boards of adjustment, and the NRAB are provided by Federal employees who are compensated by the National Mediation Board.

NATIONAL SCIENCE FOUNDATION

Federal Funds

General and special funds:

RESEARCH AND RELATED ACTIVITIES

For necessary expenses in carrying out the purposes of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875), [title IX of the National Defense Education Act of 1958 (42 U.S.C. 1876-1879),] and the Act to establish a National Medal of Science (42 U.S.C. 1880-1881); services as authorized by 5 U.S.C. 3109; maintenance and operation of aircraft and purchase of flight services for research support; acquisition of one aircraft; hire of passenger motor vehicles; not to exceed [2,500] \$6,000 for official reception and representation expenses; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); rental of conference rooms in the District of Columbia; and reimbursement of the General Services Administration for security guard services; [\$1,406,150,000] \$1,635,000,000, to remain available until September 30, [1988] 1989: *Provided*, [That of the funds appropriated in this Act, not more than \$85,060,000 shall be available for astronomical sciences: *Provided further*, That of the funds appropriated in this Act, or from funds appropriated previously to the Foundation, not more than \$76,500,000 shall be available for program development and management in fiscal year 1987: *Provided further*,] That contracts may be entered into under the program development and management [limitation] activity in fiscal year [1987] 1988 for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year: *Provided further*, That receipts for scientific support services and materials furnished by the National Research Centers and other National Science Foundation supported research facilities may be credited to this appropriation: *Provided further*, That to the extent that the amount appropriated is less than the total amount authorized to be appropriated for included program activities, all amounts, including floors and ceilings, specified in the authorizing Act for those program activities or their subactivities shall be reduced proportionally. (Additional authorizing legislation to be proposed.)

Note.—Public Laws 99-500 and 99-591, section 101(g), provide funds to the extent and in the manner provided for in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987.

The major research program activities of the Foundation are:

Mathematical and physical sciences.—Research in this activity is directed at increasing understanding of natural laws and phenomena. It includes research in mathematics, astronomy, physics, chemistry, and materials science. Studies deal with a broad range of significant science areas such as new amorphous materials and materials of limited dimensionality, organometallic chemistry and catalysis, the fundamental forces and constituents of physical matter, studies of galaxies, planets, and stars, and new mathematical structures and techniques. Provision of modern research instrumentation and facilities and support of young scientists is stressed in all programs.

Engineering.—Research supported by this activity aims to increase U.S. engineering capability and strength, and focus that capability and strength on areas which are relevant to national problems and long-term needs. Topics supported include: electrical, communications, and systems engineering; chemical, biochemical, and thermal engineering; mechanics, structures, and materials engineering; science base development in design, manufacturing, and computer integrated engineering; fundamental research underpinning emerging and critical engineering systems; and cross-disciplinary research, including Engineering Research Centers.

Biological, behavioral, and social sciences.—This activity supports research in cellular biology, molecular biology, behavioral and neural sciences, environmental biology, and social and economic sciences. Research covers: inquiry into the mechanisms underlying the

ways living organisms develop, grow, reproduce, maintain themselves, and age; studies in environmental biology, including the behavior of biological communities and ecological and physiological adaptations of populations to natural environments; attempts to understand the biological, environmental, and cultural factors that underlie the behavior of human beings and animals, with explicit emphasis on nervous system structure and function; and analysis of the underlying forms and processes affecting economies, organizations and societies, as well as the development of scientific data bases and the improvement of measurement methodology.

Geosciences.—This research advances knowledge of the properties and dynamics of the planet Earth. The program includes studies of geologic forces and their history; ocean dynamics and resources; the influence of the Arctic; and, the physics and chemistry of the atmosphere.

Scientific, technological, and international affairs.—This activity facilitates international scientific cooperation; provides policy-oriented data, information and analysis; and supports cross-disciplinary activities that strengthen the Nation's scientific and engineering research base. Programs cover small business innovation research; cooperative scientific activities between the U.S. and advanced and developing countries; policy research and analysis; science resources studies; and special research initiation and improvement activities.

Computer and information sciences and engineering.—Research is directed at "information processing" in the broadest sense of the term, ranging from fundamental theory to systems engineering. In addition, significant attention is devoted to advanced computer and communication facilities and services for the general U.S. scientific and engineering research community. Research activities include fundamental computing research, information systems applications, and microelectronics information processing systems. Service activities include access to national supercomputer centers and support for national research networking, and the research and development required to make them maximally productive.

Program development and management.—This activity provides for the operation, support, management, and direction of all NSF programs and activities and includes necessary funds to develop, manage, and coordinate these program activities.

The special foreign currency program utilizes U.S.-owned excess currencies in certain foreign countries to support cooperative scientific projects, seminars, and the travel of U.S. and foreign scientists involved in mutually beneficial efforts. Payments for this program are made in foreign currencies which the Department of the Treasury determines to be excess to the requirements of the United States. This program will be terminated at the end of FY 1987.

The major science and engineering education activities of the Foundation are:

Research career development.—Promotes the future strength of the Nation's scientific endeavors by awarding graduate research fellowships to some of the most promising graduate students in science and engineering, and by supporting enrichment activities for talented high school students.

Materials development and informal science education.—Promotes improvement in science and mathematics education for the Nation's schools through the development of instructional materials for students and teachers, and through development of programs of informal science education using museums, the media and other out-of-school organizations.

Teacher preparation and enhancement.—Focuses on upgrading the quality of faculty and the teaching of science and mathematics across the Nation. Supports projects for pre-professional programs, continuing education, and professional development of teachers, and the Presidential Awards for Excellence in Science and Mathematics teaching. Supports development of resource centers at institutions with significant minority enrollment and other model programs for women, minorities and the handicapped.

Research, studies and program assessment.—Supports research to better understand the process of teaching and learning, and supports studies and analyses to provide a systematic and current understanding of the condition of science and mathematics education in the United States.

The National Transportation Safety Board, as an independent nonregulatory agency, is charged with promoting transportation safety through the investigation of accidents, the conduct of special studies, the development of recommendations to prevent accidents, the evaluation of the effectiveness of other Government agencies in preventing transportation accidents, and the review of appeals on actions taken against transportation certificates and licenses.

Policy and direction.—This activity provides Board-wide policy and program guidance, the determination of probable cause of transportation accidents, the issuance of safety recommendations, the approval of accident reports, the final review of appeals involving airman and seaman certificates and licenses, the implementation and direction of policies and programs, liaison with the Congress and other Government agencies, and legal and public affairs advice and services.

Accident investigation.—This activity provides for the management of accident investigations, the development of their probable cause, the development of rec-

ommendations, and the preparation of reports on aviation, railroad, highway, marine, pipeline, and hazardous materials accidents.

Technology.—This activity provides specialized advice and services for the Board's accident investigation, accident prevention, and safety promotion activities in the areas of human, vehicular, environmental, and operational factors. It develops recommendations, provides laboratory support, and conducts special investigations.

Safety programs.—This activity provides oversight of other transportation agencies through the conduct of evaluations of their safety programs. This activity also provides oversight of transportation systems through the conduct of safety studies. In addition, it manages the development and follow-up of the Board's safety recommendations and the Board's responses to Notices of Proposed Rulemaking. It provides statistical analysis of transportation accident and incident data, and it acts as program manager for some of the Board's safety objectives to insure action is taken on certain transportation safety problems not being addressed by Government or industry.

Administration.—This activity provides administrative support to assure accomplishment of Board programs through financial management, personnel management and training, procurement and facilities services, automated data processing services, equal employment opportunity, and other administrative support.

Administrative law judges.—These judges conduct hearings on appeal from the suspension, amendment, modification, revocation, or denial of any operating certificate or license issued by the Secretary of Transportation under the Federal Aviation Act of 1958.

The National Transportation Safety Board is mandated by Congress to investigate all catastrophic transportation accidents and, therefore, has no control over the frequency of costly accident investigations. The emergency fund provides a funding mechanism by which periodic accident investigation cost fluctuations can be met without delaying critical phases of the investigations.

identifying, evaluating, and supporting neighborhood preservation projects that show promise as strategies for reversing neighborhood decline; replicating successful neighborhood preservation projects; and, promoting a national secondary market for local NHS revolving loan funds.

The Corporation receives both Federal and non-Federal funding to finance its program activities. The program and financing schedule above reflects only direct Federal appropriations to the Corporation. For 1988, \$18,669,000 is requested. The following business-type tables reflect the total program activity of the Corporation and include all sources of financing, both Federal and non-Federal.

Nuclear reactor regulation.—The primary objective of the Nuclear Reactor Regulatory Program is to regulate the safe operation of nuclear power reactors including the review of applications and issuance of licenses for nuclear power reactors. This program is carried out to ensure that the design, siting, construction and on-going operations are conducted in a manner which adequately protects the public health and safety and the environment. The program's emphasis continues to shift from reviews of applications for nuclear power plant construction to the review of plant operation and maintenance of over 100 existing, licensed nuclear power reactors. This program also involves the evaluation and resolution of technical issues that provide necessary improvements in reactor safety; the licensing of reactor operators; the review, evaluation and approval of standard plant criteria and designs; the review and evaluation of advanced reactor concepts and designs that are proposed by the Department of Energy and/or private industry; and the regulatory oversight of the cleanup operations at Three Mile Island Unit 2.

Inspection and enforcement.—The primary objective of the Inspection Program is to ensure that nuclear reactors, fuel facilities and material licensees under Nuclear Regulatory Commission jurisdiction are constructed, operated and used in a manner which protects the public health and safety and the environment. Enforcement action is taken against licensees who do not comply with the Nuclear Regulatory Commission's regulations. In addition to routine periodic inspection on specific areas of licensee operation or construction, the inspection program also systematically assesses the performance of reactor and fuel facility licensees. Emphasis is placed on understanding the reasons for licensee performance, sharing the information with the licensee and focusing agency inspections accordingly. A formal assessment report is issued for each licensee every twelve to eighteen months. In addition, the Nuclear Regulatory Commission maintains an emergency Operations Center, to receive calls of reportable events and to determine the appropriate immediate action.

Nuclear material safety and safeguards.—The primary objective of the Nuclear Material Safety and Safeguards Program is to ensure that all non-reactor activities and all safeguards activities regulated by the Nuclear Regulatory Commission are conducted in a manner which adequately protects the public health and safety and the environment. This program regulates activities ranging from very complex operations, such as the disposal of high-level radioactive waste in deep geologic repositories, the manufacturing of reactor fuel and the production of medical radiopharmaceuticals, to relatively simple operations, such as the use of

small quantities of radioisotopes in medical diagnostics. The Safeguards Program is designed to ensure that licensee activities are adequate to deter and protect against threats of radiological sabotage and threats of theft or diversion of special nuclear material both at facilities and during transport. The Nuclear Material Safety and Safeguards program affects almost 10,000 licensees across the United States.

Major emphasis during 1988 will continue to be placed on implementation of the Uranium Mill Tailings Radiation Control Act of 1978, the Nuclear Waste Policy Act of 1982, and the Low-Level Radioactive Waste Policy Act of 1980, as amended in 1985.

Nuclear Regulatory Research.—The primary objective of the Nuclear Regulatory Research Program is to provide independently verified safety information which forms a sound technical basis for rulemaking and regulatory decisions regarding the licensing and safe operation of nuclear power reactors and other nuclear facilities. The research program emphasizes the early identification of potential safety problems with operating reactors and the development of criteria for the safe disposal of nuclear waste.

The research program is conducted in the following six major areas: aging and degradation of materials in nuclear power reactors; complex operational reactor coolant accidents and events; consequences and risk of severe accidents; risk and reliability research; seismic analysis; and nuclear waste disposal.

Payments to Panama	66,960	68,497	69,551
General canal expense	19,532	20,546	20,380
Total operating expenses	323,173	330,825	334,719

Less intra-agency recoveries	-34,817	-31,214	-32,290
Net operating expenses	288,356	299,611	302,429

Annuity payments to Panama are for certain public services to be provided by Panama, a fixed annuity of \$10 million, and an annuity based on net tonnage of vessels transiting the canal. These payments are prescribed in paragraph 5 of article III and paragraph 4(a) and 4(b) of article XIII of the Panama Canal Treaty of 1977.

In 1988, the Transit Reservation System, which is designed to finance partially the capital program, is projected to generate \$7.0 million. Vessel traffic volume and other indices of workload are as follows:

	1986 actual	1987 est.	1988 est.
Ship transits (over 300 net Panama Canal tons)	12,023	12,260	12,365
Tolls (in thousands of dollars)	322,734	333,000	339,000

Capital obligations for 1988 include the following major projects: replacement of one tugboat, replacement of two diesel cranes, replacement and addition of transit equipment, installation of a fire protection system at locks facilities, replacement of transformers containing PCB at locks facilities, and other improvements to transit facilities.

Supporting services.—The services performed by these support activities are (in thousands of dollars):

	1986 actual	1987 est.	1988 est.
Supply and logistical services	35,976	35,972	36,728
Utilities	37,682	39,470	40,510
Other supporting services	17,439	11,763	11,638
Total operating expenses	85,097	87,205	88,876
Less intra-agency recoveries	-23,966	-22,525	-23,570
Net operating expenses	61,131	64,680	65,306

Capital obligations for 1988 include several projects for electric power and communication systems improvements.

Administrative and general expense.—This category includes the overall direction and administrative expenses of the Commission; the costs of the employee health benefits program; special retirement costs; the annuitant welfare program; death and disability payments; and the cost of health and education services provided to Commission employees and dependents at Department of Defense facilities. Also included is the interest expense on the investment of the U.S. Government in the Canal. Interest collected since January 1986 and thereafter is being paid into miscellaneous receipts of the U.S. Treasury. In 1988 the Panama Canal Commission is proposed to be converted to a revolving fund agency. This proposal follows this presentation.

The limitation on administrative and general expenses provides for salaries and expenses associated with the overall direction and administrative expenses of the Commission.

Executive Direction.—Executive direction provides for the management planning, direction and control of overall Commission activities and operations. Provides for Congressional liaison through the Secretary's Office in Washington, and implements policies and directives of the Commission's Board.

Operations Direction.—Operations direction provides for the bureau-level direction and coordination of the non-administrative operations of the Commission. Included in this function are the costs associated with administering the director's offices for the various non-administrative Commission operating activities including the Marine Bureau, Engineering and Construction Bureau, and General Services Bureau.

Financial Management.—The Financial Management function is responsible for the development of financial, accounting and rate-making policies; development of fi-

ancial systems and procedures; maintenance of the general books of account and the preparation of financial statements and reports; establishment of systems of internal control; collection, custody and disbursement of funds and related fiscal matters; and financial planning and manpower control.

Personnel Administration.—This function has the overall agency responsibility for personnel administration and management, and the joint personnel program that provides staffing services for participating federal agencies in the Panama Canal area on a cost-sharing basis.

Reimbursement to Department of Defense for education and hospital services.—Commission's cost for hospital and education services provided to eligible Commission employees, their dependents and certain other personnel. Also provides for a limited number of scholarships to attend the Panama Canal College.

Employer's contributions to Federal Employees Health Benefit Act (FEHBA).—Commission's share of premium costs for employees' health benefits insurance.

Employment Costs.—Included in this activity are certain employment costs of the Commission which are general in nature and not identifiable with other specific activities. The estimates include provisions for employees' states travel, repatriation and certain other statutory costs required by the U.S. Government.

The limitation on capital investment provides for projects in the capital program in the following areas:

Transit operations.—Capital obligations include replacement of one tugboat, replacement of two diesel cranes, replacement and addition of transit equipment, installation of a fire protection system at locks facilities, replacement of transformers containing PCB at locks facilities, and other improvements to transit facilities.

General support.—Capital obligations include replacement of overaged motor vehicles, improvements to Commission buildings and facilities and other replacement and addition of miscellaneous equipment.

Utilities services.—Capital obligations include several projects for electric power, water and communications systems improvements.

PAYMENT TO THE POSTAL SERVICE FUND*

*See Part II for additional information.

For payment to the Postal Service Fund for meeting the liabilities of the former Post Office Department to the Employees' Compensation Fund pursuant to 39 U.S.C. 2004 and for revenue forgone on free and reduced rate mail, pursuant to [subsections (b) and] subsection (c) of section 2401 of title 39, United States Code; [\$650,000,000] \$71,795,000: Provided, That mail for overseas voting and mail for the blind shall continue to be free: Provided further, That six-day delivery and rural delivery of mail shall continue at the 1983 level: Provided further, That none of the funds made available to the Postal Service by this Act shall be used to implement any rule, regulation, or policy of charging any officer or employee of any State or local child support enforcement agency, or any individual participating in a State or local program of child support enforcement, a fee for information requested or provided concerning an address of a postal customer: Provided further, That none of the funds provided in this Act shall be used to consolidate or close small rural and other small post offices in the fiscal year ending on September 30, 1987: Provided further, That

(a) Section 2254 of title 18, United States Code, is amended by adding after subsection (b) the following:

“(c) The Postal Service may carry out a forfeiture under this section if the violation involves the mails. The Postal Service shall exercise the authority of the Attorney General under subsection (b) of this section with respect to such forfeiture.”

(b) Section 2003 of title 39, United States Code, is amended—

(1) in subsection (b)(5), by striking out “and”;

(2) in subsection (b)(6), by striking out the period at the end and inserting “; and” in lieu thereof;

(3) by inserting at the end of subsection (b) the following:

“(7) amounts (including proceeds from the sale of forfeited items) from any civil administrative forfeiture conducted by the Postal Service under title 18.”; and

(4) in the first sentence of subsection (e)(1), by striking out “under this title” and inserting in lieu thereof “as provided by law”.

(c) Section 2254 of title 18, United States Code, is amended—

(1) in subsection (a) by inserting before the period at the end of paragraph (1) “, and any property, real or personal, tangible or intangible, which was used or intended to be used, in any manner or part, to facilitate a violation of this chapter”;

(2) in subsection (b) by striking “Attorney General,” and inserting “Attorney General or the Postal Service,”; and

(3) by adding at the end the following new subsection:

“(d) The authority of the Postal Service under subsection (b) shall be exercised only where the conduct with respect to which such seizure or forfeiture occurs includes use of the mails in violation of this chapter.”]. (Postal Service Appropriations Act, 1987 as included in Public Law 99-500 and 99-591, section 101(m).)

The Budget is patterned on the recommendations made by the Postal Rate Commission in its June 1986 Study of the Revenue Forgone Appropriation. It virtually eliminates the Revenue Forgone Appropriation while it continues lower rates for most religious and charitable mailings. The proposal establishes separate subclass pricing for these reduced-rate payers; and, it continues a small appropriation for the former Post Office Department worker compensation liabilities and free mail for the blind and overseas voters.

The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

Programs.—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Section 2005 of title 39, United States Code, authorizes the Postal Service to borrow by issuing obligations which may not exceed \$10 billion outstanding at any one time. In any one fiscal year, the net increase in amounts outstanding may not exceed \$1.5 billion in obligations issued for the purpose of capital improvements and \$500 million for the purpose of defraying operating expenses. As of September 30, 1988, it is expected that the total debt instruments issued and outstanding pursuant to this authority will amount to \$5.852 billion.

Operating.—Estimated receipts will total \$35.7 billion in 1988. This includes \$34.0 billion from mail and services revenue, \$268 million from investment income, \$40 million from appropriations and \$1.4 billion representing the estimated net impact of potential new rates in 1988.

This appropriation is a Federal subsidy to the rail industry pension for costs not financed by the railroad sector. The American taxpayer subsidy annually approaches \$1,000 per rail employee.

Subsidy for windfall payments.—When first authorized in 1974, the windfall subsidy appropriation was estimated at \$250 million annually for 25 years, or a total subsidy of \$6.25 billion. In two years, the annual windfall subsidy estimate increased by 45 percent and, within five years, the Railroad Retirement Board reported that the original 1974 estimate had doubled to \$500 million and would continue to increase if there were any inflation after 1980.

The Carter administration, faced with increasingly large projected subsidy costs, sought to limit to \$350 million annually the general taxpayers' liability to subsidize this rail industry pension, a position also reflected in the March revisions to the 1982 budget. Based on their collectively-bargained agreement and assuming a \$350 million subsidy appropriation, rail labor and management successfully sought congressional restructuring of the rail industry windfall in Public Law 97-35. The rail sector sought to limit windfall payments to the appropriated subsidy amounts rather than rely on the rail industry funded retirement account. This extended the subsidy well beyond the year 2000.

FEDERAL PAYMENTS TO THE RAILROAD RETIREMENT ACCOUNTS

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for unnegotiated checks, \$3,100,000, to remain available through September 30, 1989, which shall be the maximum amount available for payments pursuant to section 417 of Public Law 98-76 [Provided, That these funds shall remain available through September 30, 1988].

Further, for the foregoing purposes for fiscal year 1989, \$3,100,000, to remain available through September 30, 1990, which shall be the maximum amount available for payments pursuant to section 417 of Public Law 98-76.

Note.—Public Laws 99-500 and 99-591, section 101(i), provide funds to the extent and in the manner provided for in the conference version of H.R. 5233, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1987.

The Board administers a separate rail sector fund for unemployment and sickness insurance payments. Administrative expenses are financed from employer unemployment taxes.

Maintenance of rail earnings accounts.—Unemployment and sickness payments are based on individual records of rail earnings and daily wage rates.

Processing of rail unemployment insurance claims.—Claims for unemployment compensation are filed with employers and certified for payment through the headquarters office. Unemployment claims are projected to decline by 63 percent from 1983 to 1988, resulting in a proportionate reduction in workloads and staffing requirements. The budget proposes to increase rail sickness and unemployment insurance administrative resources and staffing above the levels justified by declining workloads, to enhance the prevention and detection of waste, fraud, and abuse.

Processing of rail sickness claims.—These claims are filed by mail and certified for payment through the headquarters office. Sickness claims are also projected to decline by 15 percent, from 345,400 in 1985 to 294,000 in 1988.

Rail claimant placement services.—The Board conducts an employment service for unemployment benefit claimants.

Administration.—The costs of administration are shared between this and the rail pension program on an allocated basis, which is periodically revised for actual experience.

Income.—Railroad industry pension fund revenues are derived from pension contributions by railroad employers and employees; interest on investments; various temporary subsidies; and payments from the Federal old-age, survivors and disability insurance trust funds.

The railroad retirement system has an annual financial interchange with social security. Under this arrangement, social security paid railroad retirement some \$24 billion, with annual payments exceeding \$2 billion. It was designed by the rail sector to help finance the rail industry pension, placing social security in the same position in which it would have been if railroad employment had been directly covered by social security.

Retirement, disability, and survivor benefit payments.—Estimates reflect the increases in benefit rates provided by law.

Administrative expenses.—These expenses are subject to annual limitations in appropriation acts (see Limitation on Administration).

These proposals would: (1) make uniform the treatment of rail pension payments for cost-of-living adjustment purposes; (2) freeze cost-of-living adjustments on rail pensions for 1 year; (3) extend Federal/State unemployment insurance coverage to railroad employment; (4) require the railroad retirement system to pay the full normal costs of Railroad Retirement Board employees' civil service retirement benefits to the civil service retirement trust fund; (5) require the rail sector to finance 25 percent of full windfall costs; (6) require the Secretary of Health and Human Services to conduct continuing disability reviews for railroad retirement disability beneficiaries; and (7) raise rail pension contributions 1.5 percent on January 1, 1988, with a subsequent 1.5 percent increase on January 1, 1989.

LIMITATION ON ADMINISTRATION

For [expenses] necessary expenses for the Railroad Retirement Board, not more than [\$57,756,000] \$55,389,000, to be derived from

the railroad retirement accounts: **Provided**, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 1,217 full-time equivalent employees: **Provided** **further**, That \$500,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: **Provided further**, That notwithstanding any other provision of law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228a-r) **[.]**: **Provided further**, That for purposes of the second sentence of 5 U.S.C. 8334(a)(1), the contributions from this account and from the railroad unemployment insurance administration fund shall equal the full normal costs of civil service retirement benefits, less employee contributions, as determined by the Office of Personnel Management.

Note.—Public Laws 99-500 and 99-591, section 101(i), provide funds to the extent and in the manner provided for in the conference version of H.R. 5233, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1987.

Maintenance of rail earnings accounts.—Eligibility for retirement and the amount of rail benefits paid are based on individual rail earnings records.

Processing rail applications.—This activity includes processing annuity claims under the Railroad Retirement Act of 1974. Based on amendments enacted in Public Law 97-35, benefit computations were simplified. Coupled with the continued decline in railroad retirement applications and automation of previously manual procedures, the Board's workload devoted to this activity is expected to continually decrease each year. The table below shows the continued decline anticipated in major workloads.

	1986 actual	1987 est.	1988 est.

Total dispositions (excluding partial awards)	97,469	98,600	95,500
Pending, end of year	25,579	21,979	18,479

Maintenance of rail beneficiary rolls.—The Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

As shown below, the Board projects this workload will continue to decline, as the number of beneficiaries on the rolls continues to decline.

	1986 actual	1987 est.	1988 est.
Total beneficiaries	940,583	928,000	916,000

Medicare.—This activity includes on a reimbursable basis processing applications for the Social Security and Health Care Financing Administrations of the Department of Health and Human Services to establish eligibility for health and medical insurance benefits under title XVIII of the Social Security Act for rail beneficiaries.

Administration.—The cost of administration is shared between the rail pension, social security, and the railroad unemployment insurance programs.

In recognition of the continuing decline in virtually all its major workloads, the Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

In addition to rail social security, rail industry pensions and special windfalls, the Railroad Retirement Board pays supplemental annuities to rail workers retiring at age 60 with 30 years of creditable rail service or at age 65 with 25-29 years of creditable service. Monthly benefit amounts are calculated from a base of \$23, adding \$4 for every year of service over 25, up to a maximum monthly benefit of \$43. Employers finance benefits on a pay-as-you-go basis by a cents-per-hour tax, currently established at 22½ cents per hour.

All railroad retirees receive the equivalent of a social security benefit, and they may also receive other additions including rail industry pension payments, windfall payments, and supplemental annuities. Social security benefits for former railroad employees are funded by the social security trust funds, and rail industry pension payments are the responsibility of the rail sector. The combination of both these payments in a single trust fund gave rise to serious concerns that social security payments to railroad retirees might be jeopardized by the continuing financial problems of the rail industry pension fund. To ensure and protect the integrity of social security benefits to railroad retirees, the Railroad Retirement Solvency Act of 1983 mandated that beginning in 1985, the financing and payment of Federal

social security benefits be separated from the rail industry pension trust fund.

The primary purpose of the Commission is to protect the interests of the investing public.

Full disclosure.—To insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale are required to file registration statements with the Commission at its home or regional offices. Issuers having total assets and security-holder populations of specified sizes are also required to furnish comparable information on a continuing basis in annual and other periodic reports, in proxy solicitation materials, and in tender offers and acquisition reports. Commission staff review these filings to insure full and fair disclosure and to prevent fraud and misrepresentation.

Electronic filing project (Edgar).—In 1984, the SEC began a pilot project that has successfully tested the feasibility of receiving, analyzing and disseminating full disclosure filings electronically. Through the end of 1986, the pilot has received approximately 12,000 filings electronically.

In early 1987, the SEC plans to select a contractor to develop an operational system. The operational system will provide the Commission with a capability for electronic receipt, analysis and dissemination of most of the full disclosure filings currently filed in paper. Transition from the pilot to the operational system will occur during 1987. The operational contract will be for eight years. The total cost from appropriated funds for the life of the contract is estimated to be \$46.5 million with the greatest expenditure, \$20 million, required in 1988.

Prevention and suppression of fraud.—Suspected fraud and manipulation in the purchase, sale, and trading of securities, illegal distributions of unregistered securities, and other unlawful conduct is prevented, minimized, or eliminated by investigating complaints, questionable trading activities, and other indications of possible violations of the Federal securities laws. In addition, remedies through civil, criminal and administrative legal actions are sought as appropriate.

In 1988 and 1989 the Selective Service System will continue to register men as they reach age 18, conduct a non-registrant identification program to insure compliance with the law, and maintain a data base of registrant records. The System will continue to enhance its capability to respond rapidly and efficiently from its standby posture.

Mobilization readiness remains one of the System's major objectives. Activities in support of this objective include all facets of National and Regional operational planning, maintenance of automated registration information, a comprehensive training program for the Selective Service Reserve Forces, a training program for the standby board members, and administrative functions. The processing procedures of the Registrant Information Management System will continue to be

tested and refined to insure that it can fully satisfy the emergency manpower needs of the Armed Forces.

The reimbursable program funds reserve and National Guard officer training for mobilization assignments in specific positions with the Selective Service System. Special focus of the program is on the exercise of the mobilization plans to ensure a high readiness capability in the event of mobilization.

In 1988, registration improvement activities will continue to concentrate on target cities in the geographical areas where the registration shortfalls are the greatest. Public awareness efforts, enhanced compliance, Federal and State legislation requiring registration for employment, and student financial assistance all contribute toward improved compliance with the law.

The Smithsonian Institution conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; acquires and preserves for reference and study purposes over one hundred million items of scientific, cultural, and historic importance; maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology (including living animal exhibits); presents performances of American arts and crafts; undertakes education programs at all levels; and participates in the exchange of scholarly information.

The Institution is responsible for the operation and maintenance of 12 major exhibition buildings; a zoological park and animal conservation and research center; the Museum Support Center and other collections storage and preservation facilities at Silver Hill, MD; two natural preserves, in Panama and on the Chesapeake Bay; an astrophysical observatory on Mount Hopkins, AZ; and supporting administrative, laboratory, and storage areas. The Quadrangle, south of the Smithsonian Institution Building, is scheduled to open to the public in 1987. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, is expected to total approximately 27 million in 1987. Millions more will view traveling exhibitions.

In 1988, emphasis will be placed on strengthening research capabilities; reinforcing the Institution's safety programs; improving the maintenance of the physical plant; and providing collections management support. Resources are also included for program planning and development for the commemoration of the Columbus Quincentenary.

This account encompasses repairs, alterations, and improvements; additions, renovations, and restorations of a long-term nature and utility; construction of minor new temporary and permanent buildings or facilities; and facilities planning and studies. In 1988, funds are sought to continue comprehensive programs to keep Smithsonian facilities, including roofs, facades, and terraces, in good repair and efficient operating condition; provide for the safety and security of visitors, staff and collections by upgrading existing and installing new fire detection and suppression systems; remove hazardous materials such as asbestos; upgrade heating, ventilating and air-conditioning systems to provide the proper environmental conditions for the National Collections and to improve energy efficiency; and provide for the needs of disabled visitors and staff. Other restoration and renovation improvements necessary to meet the research, exhibition, educational and conservation program objectives of Smithsonian organizations are also included.

National Air and Space.—The National Air and Space Museum was completed and opened to the public on July 1, 1976. Necessary repairs to the building's facade and terrace will continue.

Museum Support Center.—The Institution accepted beneficial occupancy of the Museum Support Center in early 1983. These facilities will provide additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators. Space presently used for storage will be returned to its intended use for public exhibition.

Quadrangle.—The construction and equipping of this new facility will continue in 1987 in preparation of the public opening.

Hirshhorn Museum and Sculpture Garden.—The unobligated balance of the construction account for the Hirshhorn Museum, returned to the Institution by the General Services Administration in 1985, will be used to correct defects related to the original construction of the building.

Smithsonian Tropical Research Institute.—To design and construct a scientific laboratory and research conference facility.

Smithsonian Astrophysical Observatory.—To design and construct a base camp at the Fred L. Whipple Observatory, Mt. Hopkins, AZ.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. Each year the Center conducts a major open international competition for a limited number of fellowships. The scholars and the scholarly work they produce constitute the memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is directed by its congressional statute to raise both public and private funds, and the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution.

The Tennessee Valley Authority (TVA) was created in 1933 as a Government-owned corporation for the unified development of a river basin comprised of parts of seven States. Its program in 1988 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

The following table provides detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

Budget program—natural resources.—TVA concentrates its efforts on programs in navigation, flood control, dam safety, and maintenance of the waterway.

Water resources.—Includes operation and continuing development of the navigation channel from Paducah, KY, to Knoxville, TN.

For flood control, TVA operates a system of multi-purpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs. As a result, flood crests are reduced along the

Tennessee River and its tributaries and also the lower Ohio and Mississippi Rivers.

Dam safety modifications and maintenance activities ensure that the waterway system meets Federal safety guidelines in the event of severe flood conditions and maintenance is performed to keep the system in good and safe operating condition.

Land and forest resources.—This program consists of operation of dewatering areas associated with TVA's reservoir system.

Resource management.—The program contains two major areas of effort: Protection of public lands and waters under TVA trust; and valley mapping and demonstrations of remote sensing in support of TVA activities as well as the regional mapping needs of the U.S. Geological Survey.

Land Between The Lakes.—Work will continue on the development on this 170,000-acre area in Western Kentucky and Tennessee situated between TVA's Kentucky Reservoir and the Corps of Engineers' Barkley Reservoir.

Agricultural Institute.—TVA's agricultural programs are being targeted and packaged so that responsiveness and flexibility to current issues can be more easily accomplished. The primary functions of the institute will be to identify problems related to agricultural development and environmental quality, marshal skills and other resources from Federal, State, local and private organizations to demonstrate practical solutions to problems, and disseminate information and encourage adoption by others.

National fertilizer development.—The National Fertilizer Development Center in Muscle Shoals, AL, is active in two program areas: Research and development and technology development.

Research and development consists of basic chemical and agronomic research and development of fertilizer products and processes. This is accomplished in cooperation with the Department of Agriculture, the land-grant universities, and industry.

Technology development is conducted with the land-grant universities and the fertilizer industry. It includes small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms.

Limited operation of the pilot test facility will continue research into improving the yield and economics of producing ethanol from the acid hydrolysis of hardwoods.

Power program: Power supply and use.—TVA is the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States. Income from power operations, net of interest charges and depreciation, and other operating expenses is estimated at \$569,300 thousand in 1988.

The power generating facilities presented in the capital investment table are financed from power proceeds and borrowings.

General services.—Operating costs for general service activities include bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies.

Financing.—Amounts estimated to become available in 1988 are to be derived from (1) the requested appropriation of \$72,773 thousand; (2) nonpower revenues and receipts of \$73,045 thousand; and (3) power revenues and receipts of \$5,561,400 thousand. In addition, the budget program anticipates financing from borrowings of \$314,500 thousand backed by future revenues. A summary of the application of appropriations follows:

Operating results and financial conditions.—Only the power program and fertilizer introduction are intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1988 are estimated at \$98,800 thousand—\$78,800 thousand as a dividend (return on the appropriation investment in the power program) and \$20,000 thousand as a reduction in the appropriation investment in the power program. Outstanding borrowings for the power program are expected to increase by \$314,500 thousand during 1988.

Total assets are estimated to increase by \$526,659 thousand during 1988. A total of \$561,700 thousand of the increase in assets is in the power program. This is offset by —\$35,041 thousand in nonpower programs. The estimate of liabilities at September 30, 1988, is \$65,391 thousand more than the estimate at September 30, 1987. Total Government equity at September 30, 1988, is estimated to be \$461,268 thousand greater than that at September 1987. This change includes the requested appropriation for 1988 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

The United States Information Agency conducts the international communication, educational, cultural and exchange programs of the United States. The Agency advises the President, the National Security Council, and the Secretary of State on the above areas, and assists in the development and execution of a national policy on international communications.

Agency operations are largely financed from this appropriation and consist of the following major elements:

Overseas missions.—The Agency plans to operate 206 posts in 127 countries in 1988. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

Voice of America.—This activity produces radio broadcasts in English and in 41 languages. Programs are broadcast from transmitters at 4 domestic and 13 overseas locations.

Educational and cultural affairs.—This activity covers the staff that administers educational and cultural exchanges between the United States and over 140 countries. It also provides program and support costs for the President's International Youth Exchange program, American-sponsored schools abroad, binational centers, U.S.-operated libraries and reading rooms abroad and other educational and cultural activities. Grant costs for Academic and Visitor Exchanges, and the Humphrey Fellowship, Private Sector, and Congress-Bundestag exchange programs are funded separately in the Educational and Cultural Exchanges account.

Program coordination, production, and support.—This activity serves primarily to support overseas missions by coordinating program planning and by producing, acquiring, and adapting various program materials for their use.

Television and film service.—This Service acquires and produces programs for distribution overseas and for direct telecasts via satellite. This activity also includes the Agency's new television service, **WORLDNET**, which has opened a new era in worldwide communication.

Agency direction and management.—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole.

The 1988 request for this account will provide funds to cover added operating costs, principally overseas employee wage scales and inflationary increases for rents, utilities, diesel fuel, and other overseas goods and services and full-year costs of the new Federal Employee Retirement System. Additional increases will provide funds to continue the operation of recent Agency initiatives, including Agency support for the U.S.-U.S.S.R. cultural accords signed in Geneva in November, 1985, transmitter operations for the television station in Berlin (RIAS-TV), and **WORLDNET** television.

This appropriation, together with the balances available from prior years, was formerly used for payment of local program expenses in U.S.-owned foreign currencies in those countries where the Department of the Treasury had determined that the supply of such currencies was in excess to the normal requirements of the U.S. Government. Beginning in 1986, new appropriations for these payments in excess of available balances were budgeted for in the Salaries and expenses account.

This appropriation provides funding for programs authorized by the Mutual Educational and Cultural Exchanges Act of 1961, as amended, including academic exchanges and grants for foreign leaders and professionals to make short-term visits to the United States. USIA operates a variety of cooperative exchange programs with the private sector. It also arranges special programs for selected foreign individuals and groups visiting the United States under other than U.S. Government sponsorship.

The Agency also manages other exchange related activities funded from the Agency's S&E appropriation, i.e.: international youth exchange, Board of Foreign Scholarships, student support, studies of the U.S. and libraries, reading rooms, cultural centers and related resources.

The staff costs to operate the exchange programs funded by this appropriation are included in the salaries and expenses account.

Academic and visitor exchanges.—This activity consists of academic exchange of American and foreign graduate students, teachers, scholars and specialists; and officially invited international visitors as well as important foreign visitors who are not U.S. Government-sponsored.

Hubert H. Humphrey fellowships.—This activity provides for one year of graduate training to promising mid-career professionals from third world countries.

Private sector programs.—This activity supports traditional and other exchange programs conducted by non-governmental organizations.

Congress-Bundestag Exchange Program.—This activity provides mutual full scholarships for year-long academic homestay programs between Germany and the United States. This project is co-funded with each country providing half of the necessary funds to support these exchanges.

The 1988 request essentially will maintain programs at existing levels.

The National Endowment for Democracy is a private, nonprofit corporation established in the District of Columbia to encourage and strengthen the development of democratic institutions and processes internationally, including activities which promote individual rights and freedom, through private sector initiatives, exchanges, training programs, and other activities.

The National Endowment for Democracy Act provides that the U.S. Information Agency will make an annual grant to the Endowment to enable the Endowment to fulfill the purposes of the Act. The Endowment does not carry out programs directly but provides funding for activities of the Free Trade Union Institute of

the AFL-CIO, the National Chamber Foundation of the U.S. Chamber of Commerce and other private organizations and groups. The 1988 estimates will enable the Endowment to expand programs begun during its initial years of operation.

The Voice of America: Radio Marti Program was created by the Radio Broadcasting to Cuba Act (Public Law 98-111). The programs are transmitted via the present Voice of America transmitter facility at Marathon, Florida.

The objectives of the Radio Marti Program are: (1) to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers; (2) to be effective in further-

ing the open communication of information and ideas through use of radio broadcasting to Cuba; (3) to serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news; and (4) to function in accordance with all Voice of America standards, and to broadcast programs which present a variety of views.

Program operations.—These funds provide for program operations which include personnel compensation, research, transmission costs and other programming requirements. The Radio Marti Program began broadcasting at 5:30 a.m., May 20, 1985, from studios in Washington, D.C. The program currently broadcasts 17.5 hours each day, seven days per week.

Acquisition and construction of facilities.—In 1987, the funds provided will complete the upgrading of the transmitter site at Marathon, Florida, and construction of permanent broadcast studios in Washington. No additional funds are requested in 1988.

EAST-WEST CENTER—Continued

The Center for Cultural and Technical Interchange between East and West is a national educational institution administered on behalf of the United States Information Agency by a public, nonprofit educational corporation under a grant from the Agency. The Center promotes better relations and understanding between the United States and the nations of Asia and the Pacific through cooperative programs of research, study, and training, which bring qualified persons from the countries of the area to work jointly on problems of mutual concern.

No increase is requested for 1988. Although mandatory cost increases will occur, the Center anticipates that they will be offset by additional revenues generated from outside sources.

The funds requested in 1988 will provide for 2,190 participant awards for an average of ten weeks each.

Acquisition and construction of facilities.—In 1988, the Agency will continue the multi-year effort of modernizing and expanding the technical transmission capability of the Voice of America (VOA). This effort responds to reviews of the operations of U.S. Government funded radios, which found deficiencies in the VOA's capability to meet current public diplomacy objectives. To eliminate these deficiencies and provide an operationally effective global radio network that is a critical element of the public diplomacy programs of the Agency, VOA will continue to rehabilitate and modernize existing stations, expand selected operational sites, and construct additional new facilities. The 1988 appropriation will provide \$79,500 thousand for this program.

Maintenance and improvement of existing facilities.—This program will provide \$10,000 thousand in 1988 for the continuing repairs and improvements required to maintain the VOA's existing global radio network.

Advanced engineering and technical development.—This category will provide \$500 thousand for the continuing program of engineering development, equipment design and radio propagation techniques specifically applicable to the VOA.

The United States Institute of Peace (USIP) was established by Congress to conduct and support research and scholarship in the fields of peace, arms control, and conflict resolution.

The USIP Board of Directors took office, selected a staff, and began operation in February 1986. In 1987 program activity includes conducting a survey of the field of peace studies, awarding its first grants and scholarships, and sponsoring a student essay contest. The funds requested in 1988 will permit USIP to continue its research and scholarship programs at levels consistent with the state of program planning and administrative experience during this early stage in its existence.

USRA was created as a temporary agency in 1973 to oversee the formation of Conrail, monitor its performance, and act as a conduit for Federal assistance. These activities have been completed and, pursuant to the Conrail Privatization Act, USRA will be abolished on April 1, 1987. Conrail is currently a profitable corporation operating without government subsidy that is being returned to the private sector.

Two other USRA accounts, Payments for Purchase of Conrail Securities and Regional Rail Reorganization Program, have been transferred to the Department of Transportation and are shown under the Federal Railroad Administration.

PART II

SUPPLEMENTALS AND RESCISSIONS

II-1

EXPLANATION OF REQUESTS

This part contains supplemental appropriations requests for 1987 being proposed for congressional consideration in this budget. Requests for supplemental appropriations are usually made after enactment of regular appropriations. In cases where programs are funded under a continuing resolution, some requests are included to supplement the funding available under the resolution. Information is also included on proposals to rescind budget authority and to rescind or otherwise reduce the availability of other budgetary resources.

PROPOSED SUPPLEMENTAL REQUESTS

Supplemental requests are shown as separate sections.

Section I.—Supplementals proposed in this budget for various purposes are presented in this section and usually include: suggested appropriation language, the related budget schedules, and the reasons for the requests. In some cases, language is proposed to reduce mandatory program levels (entitlements, for example) included in authorizing legislation. In such cases, separate budget schedules are not shown, but the reduced funding levels that would result are reflected in the regular budget schedules for the account in Part I. Language is also included to propose reductions in enacted direct loan and guaranteed loan limitations. A status of direct loans or status of guaranteed loans schedule will

show the changes in credit activity resulting from the lower limitation.

Section II.—Requests for pay supplementals in this section are in the form of suggested appropriations language. The amounts contained in the appropriations language also appear as separate line entries in the regular program and financing schedules in Part I.

Section III.—Requests for supplementals for increased retirement contributions due to enactment of the Federal Employees' Retirement System (FERS) Act of 1986, Public Law 99-335, are shown in the same manner as pay supplementals. Proposed appropriations language for the FERS requests is presented in this section and the amounts requested are identified on separate line entries in the Part I program and financing schedules.

RESCISSION PROPOSALS

Section IV.—Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. Included in this part—for rescission proposals being made in conjunction with this budget—are related budget schedules, references to the special message being sent to the Congress, and explanations of the proposals.

FOREIGN AGRICULTURAL SERVICE

(Supplemental language now requested, existing legislation)

Funds appropriated to the Foreign Agricultural Service shall be used to offset increases in overseas support costs.

This proposal would allow the Foreign Agricultural Service (FAS) to apply currently available funds to compensate for the reduced purchasing power of the dollar overseas. During the past year, the dollar has declined sharply against most European currencies and the Japanese yen. The result has been a drop in the purchasing power of the dollar, that has increased operating costs in Europe by approximately 25 percent, and in Japan by almost 50 percent. In addition, this proposal would allow FAS to use funds to fully reimburse the State Department for the cost of providing administrative support for FAS attache and counselor offices (the reimbursement to the State Department has also increased due to the reduction in the value of the dollar overseas), as well as to comply with the Congressional directive to replace foreign nationals in the U.S. Embassy in Moscow with American nationals.

OFFICE OF THE GENERAL SALES MANAGER

(Supplemental language now requested, existing legislation)

Not to exceed an additional \$705,000 may be transferred from the Commodity Credit Corporation to the General Sales Manager.

This supplemental request would provide the funding necessary to support the additional workload resulting from the enactment of the Food Security Act of 1985.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

(Supplemental language now requested, existing legislation)

For an additional amount for "Salaries and expenses", \$24,000,000: *Provided*, That not to exceed \$24,000,000 of the above amount may be transferred to this account from the Commodity Credit Corporation Fund.

This supplemental request would provide additional Commodity Credit Corporation transfer authority to cover increased Agricultural Stabilization and Conservation Service (ASCS) administrative costs in fiscal year 1987 related to major workload increases in ASCS county offices to carry out record commodity loan making and forfeiture activity, commodity certificate issuance and redemption activity, newly authorized disaster payments, and 1987 crop advance payments.

COMMODITY CREDIT CORPORATION

COMMODITY CREDIT CORPORATION FUND

(Supplemental now requested, existing legislation)

For reimbursement to the Commodity Credit Corporation for net realized losses sustained or anticipated, but not previously reimbursed, such sums as may be necessary are available in this and subsequent years, as authorized by the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12).

Relation of obligations to outlays:			
71.00 Obligations incurred, net.....		24,705	
90.00 Outlays		24,705	

This proposal would provide funds to reimburse the Commodity Credit Corporation (CCC) for net realized losses. This request is needed to finance near record 1987 CCC outlays that, without the requested supplemental, would exhaust CCC borrowing authority by the middle of 1987. This request would also finance increased Agricultural Stabilization and Conservation Service administrative costs of \$24 million related to major workload increases in ASCS county offices to carry out record commodity loanmaking and forfeiture activity, commodity certificate issuance and redemption activity, newly authorized disaster payments, and 1987 crop advance payments. This request would also finance increased Office of the General Sales Manager administrative costs of \$705 thousand related to the implementation of the Food Security Act of 1985.

RURAL ELECTRIFICATION ADMINISTRATION

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

(Supplemental language now requested, existing legislation)

In appropriation language under this head in the Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, delete the language preceding the second proviso and substitute: During fiscal year 1987, and within the resources and authority available, gross obligations for the principal amount of direct loans made pursuant to section 305 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 935), shall not exceed \$541,574,000; during fiscal year 1987, commitments to guarantee loans pursuant to section 306 of that Act may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed \$402,018,000.

The Administration is proposing this supplemental as part of its effort to reduce the cost of REA direct loan assistance programs. Most borrowers, starting in fiscal year 1988, will be eligible for a proposed program of 70 percent REA guarantees of privately originated loans. Since most current REA direct loan borrowers also borrow privately, this will ensure they have access to private credit to meet their needs while reducing unnecessary Federal outlays to lower the deficit.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

The proposed language is part of the efforts to reduce the size and scope of Federal programs and their adverse impact on the management of future fiscal policy and deficit targets. The most efficient way to manage both local housing and community facilities is to rely upon the American private credit market, not Federal loans and grants. Housing vouchers are available to assist low-income rural families in need of improved housing.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

The proposed supplemental is part of the Administration's efforts to reduce the size and scope of Federal programs and their adverse impact on the management of future fiscal policy and deficit targets. The Administration believes that the most efficient way to manage both local housing and community facilities is to rely upon the American private credit market, not Federal loans and grants.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

FOOD AND NUTRITION SERVICE

SPECIAL MILK PROGRAM

(Supplemental now requested, existing legislation)

For an additional amount for "Special Milk Program," \$3,426,000.

Program and Financing (in thousands of dollars)

Identification code	12-3502-1-1-605	1986 actual	1987 est.	1988 est.
Program by activities:				
10.00	Total obligations (object class 41.0)		3,426	
Financing:

74.40	Obligated balance, end of year.....		-3,031	
90.00	Outlays.....		395	3,031

These funds are needed to pay for additional half-pints of milk to be served in fiscal year 1987 as a result of amendments made to section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1772), by Public Law 99-661 which expanded eligibility for the program.

FOREST SERVICE

HIGHWAY CONSTRUCTION: MOUNT ST. HELENS NATIONAL MONUMENT

(LIQUIDATION OF CONTRACT AUTHORITY)

(Supplemental now requested, existing legislation)

For payment of obligations incurred for the Mount St. Helens National Volcanic Monument road, \$9,915,000, to be derived from the Highway Trust Fund.

This supplemental provides funds to liquidate obligations incurred by the Forest Service for a road being constructed in the Mount St. Helens Volcanic National Monument.

GENERAL PROVISIONS—DEPARTMENT OF AGRICULTURE

(Supplemental language now requested, existing legislation)

Section 622 of the Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, is amended by adding the following at the end thereof: All costs of such projects attributable to flood control shall be subject, in fiscal year 1987 and thereafter, to the flood control cost-sharing provisions of the Water Resources Development Act of 1986 (Public Law 99-662), and at least twenty percent of the total benefits of each such project must be for agricultural flood control.

This language would make the flood control cost-sharing provisions of the recently enacted Water Resources Development Act of 1986 applicable to similar projects initiated in 1987 by the Department of Agriculture, Soil Conservation Service (SCS). It would also require that 1987 new starts undertaken by the SCS have at least 20 percent of their total benefits be for agricultural flood control.

2112	Unused expiring balance of limitation		165,625	
2150	Total guaranteed loan commitments			

This proposal would provide funds to close out discontinued grants and loans programs that are assigned to the Secretary of Commerce.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

**NATIONAL OCEANIC AND ATMOSPHERIC
ADMINISTRATION**

FEDERAL SHIP FINANCING FUND, FISHING VESSELS

(Supplemental language now requested, existing legislation)

During fiscal year 1987, commitments to guarantee loans may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed \$50,000,000.

IMPACT AID

(Supplemental language now requested, existing legislation)

Funds appropriated under the heading "School Assistance in Federally Affected Areas" in Public Law 98-8 that are available for obligation shall be available until expended for the purposes of sections 14(a) and 14(b) of Public Law 81-815.

This language would allow funds appropriated by the "Jobs Bill" of 1983 that are now available for obligation or that become available for obligation in the future to be used for urgently needed school construction projects to serve students residing on Indian lands. Most of these funds were originally obligated for construction projects eligible under the terms of the Jobs Bill. In some cases, more funds were obligated than were needed to complete the construction projects. By the time the excess funds were recovered, it was not possible to use them to meet the purposes of the Jobs Bill.

This supplemental funding, when added to the 1987 appropriation, would finance all anticipated costs of the 1987 Pell grant program plus all unfunded Pell costs from prior years. Specifically, \$62 million is required for unfunded 1987 costs and \$225 million is required—in addition to the \$100 million already provided in 1987 for shortfall retirement—for unfunded costs from 1986 and prior years. The Guaranteed student loans account funds proposed for transfer are in excess of the needs of

STUDENT FINANCIAL ASSISTANCE—Continued

that account because of unanticipated declines in interest rates and related loan interest subsidy costs.

Although the Higher Education Act requires issuance of a final Pell grant payment schedule by February 1, the Secretary will delay issuance until April 1 to allow consideration of this supplemental request by the Congress. If supplemental funds are not assured by that date, a final payment schedule will be issued that is based on reduced awards (i.e, reflects a linear reduction) in amounts estimated to save \$287 million and thus operate within the level of funds appropriated.

GUARANTEED STUDENT LOANS

(Supplemental language now requested, existing legislation)

Notwithstanding sections 428A(b) and 428B(b) of the Higher Education Act, loans made under section 428A or 428B for periods of enrollment beginning on or after July 1, 1987 shall be limited to the student's cost of attendance minus estimated financial assistance, without annual or cumulative limits, provided that a borrower may also borrow additional amounts necessary to pay interest costs accruing during periods of authorized deferments. Notwithstanding section 428A(a) of the Higher Education Act, eligibility for loans made under section 428A for periods of enrollment beginning on or after July 1, 1987 shall include all students and their spouses, provided that a spouse is not eligible for deferments under section 427(a)(2)(C) or 428(b)(1)(M) or for loans which, when combined with the estimated financial assistance of the student, including loans made to a parent under section 428B, exceed the student's cost of attendance.

Notwithstanding section 428(a) of the Higher Education Act, no Federal payments shall be made to reduce student interest costs associated with loans made for periods of enrollment beginning on or after July 1, 1987 under section 427 or 428. Notwithstanding section 427A of the Higher Education Act, the applicable interest rate to be charged on loans made for periods of enrollment beginning on or after July 1, 1987 under section 427 or 428 shall be, through the second year of the repayment period, the average of the bond equivalent rates of 91-day United States Treasury bills auctioned during the twelve months ending on November 30 preceding the award year for which the loan is made, rounded to the nearest whole percent, and thereafter the rate shall be agreed to by the borrower and the lender and shall further be either fixed, in which case it shall be subject to a maximum rate of the average of the bond equivalent rates of 91-day United States Treasury bills auctioned during the twelve months ending on November 30 preceding the calendar year in which the third year of repayment begins, rounded to the nearest whole percent, plus 2.75 per centum, or variable, in which case it shall be subject to a maximum rate of the average of the bond equivalent rates of 91-day United States Treasury bills auctioned during the twelve months ending on November 30 preceding the year for which the rate is being determined, rounded to the nearest whole percent, plus 2.75 per centum. Notwithstanding section 438 of the Higher Education Act, the rate of special allowance paid on loans made for periods of enrollment beginning on or after July 1, 1987 under section 427 or 428 shall, when added to the applicable interest rate on such loans, assure lenders a total annual yield equal to the average of the bond equivalent rates of 91-day United States Treasury bills auctioned during each quarter plus 2.75 per centum, provided that no special allowance shall be paid on such loans after the second year of repayment. Notwithstanding sections 425(a) and 428(b) of the Higher Education Act, the sum of loans made to a student under sections 427 and 428 for periods of

enrollment beginning on or after July 1, 1987 shall not exceed \$2,500 annually, or result in a cumulative total of more than \$12,500, for an undergraduate student, or \$5,000 annually, or result in a cumulative total of more than \$25,000, for a graduate student, provided that a student shall be permitted to borrow in excess of such limits as necessary to pay interest costs accruing during periods of in-school, grace, or authorized deferments.

Notwithstanding section 438(c) of the Higher Education Act, no origination fee shall be charged to borrowers for periods of enrollment beginning on or after July 1, 1987 under section 427 or 428. A borrower for award year 1987-88 under section 427 or 428 shall pay to the Federal Government a guarantee fee, equal to nine per centum of the amount of such loan, to cover Federal default and other program administrative costs, and a borrower for award year 1987-88 under section 428A or 428B shall pay to the Federal Government a guarantee fee, equal to two per centum of the amount of such loan, to cover such Federal costs.

Appropriation language.—This language would modify certain Guaranteed Student Loan (GSL) program requirements beginning on July 1, 1987, resulting in reduced 1987 program costs. Specifically, this language would: eliminate specific loan limits in the PLUS and Supplemental Loans for Students (SLS) programs and extend SLS eligibility to dependent undergraduates and to spouses of all students; eliminate the Federal payment of interest on behalf of the student during in-school, grace, and deferment periods; modify the borrower's interest rate for regular GSL's to tie it more closely to changing credit market conditions; reduce the special allowance paid to lenders for regular GSL's; restore regular GSL loan limits to levels in effect in prior years; and eliminate the requirement for students to pay an origination fee but charge regular GSL borrowers a nine-percent guarantee fee and PLUS and SLS borrowers a two-percent guarantee fee to cover Federal default and other administrative costs. The resulting savings are reflected in the budget schedules in Part I, not in the schedule shown above.

Program and financing schedule.—This schedule reflects the effects of a supplemental proposed under the head "Student financial assistance", not of the supplemental language proposed above. Funds proposed for transfer are in excess of the needs of this account because 1987 costs are substantially lower than previously anticipated, primarily because of declining Treasury bill rates and related loan interest subsidy costs. The proposed transfer, therefore, would have no impact on program operations.

COLLEGE HOUSING LOANS

(Supplemental language now requested, existing legislation)

Under the heading, "College Housing Loans" in the conference version of H.R. 5233, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1987, as enacted by Public Laws 99-500 and 99-591, delete the phrase that reads, "During the fiscal year 1987 and within the resources and authority available, gross commitments for the principal amount of direct loans shall be \$60,000,000." and substitute the following: During fiscal year 1987, no new direct loan commitments may be made.

74.10 Receivables in excess of obligations, end of year			28,423
74.98 Obligated balance, end of year: Fund balance		60,000	25,577
90.00 Outlays			-6,000

Status of Direct Loans (in thousands of dollars)

Position with respect to appropriations act limitation on obligations:			
1111 Limitation on direct loans to the public		-60,000	
1150 Total direct loan obligations		-60,000	
Cumulative balance of direct loans outstanding:			
1210 Outstanding, start of year			
1231 Disbursements: Direct loan disbursements			-6,000
1290 Outstanding, end of year			-6,000

This language would prohibit any new loan commitments from being made in 1987. There is no demonstrated need for Federal subsidies for general-purpose construction of college and university facilities. Available cash resources of the fund, in excess of program operating costs, would be used to amortize outstanding debt to the Treasury.

Department of Energy

GENERAL PROVISIONS—DEPARTMENT OF ENERGY

(General Provision language now requested, existing legislation)

SEC. 509. Notwithstanding section 208 of the Urgent Supplemental Appropriations Act, 1986 (Public Law 99-349), the executive branch may expend funds in fiscal years 1987 and 1988 to prepare or review studies regarding the possible transfer out of Federal ownership, management, or control, in whole or in part, the facilities and functions of the Southeastern Power Administration. The results of these studies, together with any recommendations for further action, shall be reported to the Congress. No other actions to implement such a transfer may be taken without the authorization of the Congress.

This proposal would allow the Department of Energy to study the possible divestiture of the Southeastern

Power Administration (SEPA) and would also allow other executive branch agencies to review the results of the study. The objective of the proposed study would be to assess the feasibility of divestiture of SEPA including the identification and analysis of divestiture alternatives that are responsive to regional and customer needs, without causing significant increases in power rates. In undertaking the proposed study, the Department of Energy will consult with Southeastern's existing power customers, and with the Tennessee Valley Authority (TVA) concerning the Cumberland Basin projects in Tennessee and Kentucky. The Department will identify customer and regional impacts, as well as possible impacts on TVA, as part of the study. The results of the study will be reported to the Congress, and no implementation of divestiture would begin until after subsequent Congressional authorization. The proposed study would be funded from appropriations and would not be charged to Southeastern's customers.

These reappropriation proposals represent an integral component of the Administration's policy to fund the National Institutes of Health (NIH) at a strong, stable, and sustainable level. The reappropriation proposals would result in NIH funding about 19,100 grants in each of the years 1987 and 1988, at an average cost level in excess of the 1986 average.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

GENERAL PROVISIONS—DEPARTMENT OF HEALTH AND HUMAN SERVICES

(Appropriation language now requested, existing legislation)

In Sec. 202 of the conference version of H.R. 5233, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1987, as enacted by Sec. 101(i), delete "6,200 new and competing" and insert in lieu thereof "19,000".

This language is proposed to enhance flexibility and maintain stability for the total number of research program grants awarded by the National Institutes of Health.

(General provision language now requested, existing legislation)

SEC. 212. For the purpose of increasing the Department of Health and Human Services Acquired Immune Deficiency Syndrome activities, the Secretary may transfer up to \$100,000,000 from discretionary funds otherwise available in fiscal year 1987: Provided, That the amount transferred from any single appropriation shall not exceed 1 percent of the total funds available for obligation in fiscal year 1987 under that heading: Provided further, That written notice of any such transfers shall be given at least thirty days in advance to the Committees on Appropriations of the House and Senate.

This language is proposed to expedite mid-year allocations for research and education opportunities concerning Acquired Immune Deficiency Syndrome that may emerge in 1987.

HOUSING PROGRAMS

SUBSIDIZED HOUSING PROGRAMS (HOUSING ASSISTANCE)

(Supplemental now requested, existing legislation)

Of the budget authority made available under this head in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987, as enacted by section 101(g) of Public Laws 99-500 and 99-591, for section 8 authority provided for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701g), the unreserved balances remaining as of the date of the enactment into law of this Act, but not to exceed \$267,186,540, shall be available for obligation only after October 1, 1987.

Of the appropriations made available under this head in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987, as enacted by section 101(g) of Public Laws 99-500 and 99-591, for modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371), the unreserved balances remaining as of the date of the enactment into law of this Act, but not to exceed \$436,940,000, shall be available for obligation only after October 1, 1987.

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 236 of the National Housing Act (12 U.S.C. 1715z-1), is further reduced in fiscal year 1987 by not more than \$2,699,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 170s), is further reduced in fiscal year 1987 by not more than \$14,420,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

The Section 8 Contracts Authority proposed for carry-over supports 2,000 section 202 units. Since 10,000 section 202 units will be sufficient to meet program needs in 1987, the remaining 2,000 are proposed for availability in 1988. In conjunction with this proposal, the budget proposes a reduction in the section 202 loan limitation for 1987 and a corresponding increase in 1988 to cover loans needed for 2,000 section 202 units. The proposed carryover of \$436,940,000 in Public and Indian Housing Modernization funds is requested to provide for program levels at \$1 billion for 1987 and 1988. These amounts represent sufficient funding levels that can be productively utilized over the two years.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

The program for conversions of Rent Supplement and Rental Housing Assistance (Section 236) units to section 8 was completed in 1986. However, recaptures will continue for projects for which section 8 units have been converted, but the Rent Supplement and RAP contracts have not yet been canceled. The supplemental language for Rent Supplement and Rental Housing Assistance is proposed to recover any recaptured authority as a result of the canceled contracts.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

(Appropriation language now requested, existing legislation)

Of the amount provided under this heading in the conference version of the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987 enacted by (Public Laws 99-500 and 99-591), the limitation of direct loan obligations which may be made under section 202 of the Housing Act of 1959, as amended (12) U.S.C. 1701(q), is reduced to \$501,930,000.

This proposal would fund availability into 1988. The proposed loan limitation for section 202 elderly and handicapped housing for 1987 is sufficient for a program level of 10,000 units, and to address the expected capital amendment requirements for units reserved in prior years.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts these proposals, appropriate actions will be taken to implement the law.

PUBLIC AND INDIAN HOUSING PROGRAMS

PAYMENTS FOR THE OPERATION OF LOW-INCOME HOUSING PROJECTS

(Supplemental now requested, existing legislation)

Notwithstanding the provisions of section 9(d) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), unobligated balances remaining as of the date of enactment into law of this Act, but not to exceed \$85,338,000, made available under this head in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987, as enacted by section 101(g) of Public Laws 99-500 and 99-591, shall remain available for obligation until September 30, 1988, and shall not be available for obligation until October 1, 1987, and shall be used by the Secretary in accordance with section 9(a) of the United States Housing Act of 1937, as amended.

These funds will not be needed to carry out the 1987 program because of lower utility and other costs. Therefore, it is proposed that these unobligated funds be made available in 1988.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until

after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

This proposed supplemental request would fund additional unsentenced prisoner inmate days in contract facilities. The U.S. Marshals Service is experiencing an increase in the number of prisoners held in contract facilities and in the length of time they are in the Service's custody. This is a result of the Comprehensive Crime Control Act of 1985, especially the implementation of the bail reform provision. Additionally, a

This proposed supplemental would cover the higher than anticipated telecommunications tariffs.

The change in appropriation language reallocates the uncontrollable increases of \$541 thousand allowed to the Community Relations Service (CRS) in the 1987 Appropriation Act. The funding levels by budget activity do not accurately reflect the intent of providing funds for uncontrollable increases. Of the \$541 thousand, the budget activity consisting of the prevention and conciliation of community disputes was allocated \$36 thousand, and the reception, processing, and care of Cuban-Haitian entrants budget activity was allocated \$505 thousand. It appears that an error was made in the distribution of this increase between these two budget activities as the prevention and conciliation activity had requested \$560 thousand, and the reception, processing, and care activity had requested \$30 thousand. This redistribution would correct this error and provide the prevention and conciliation activity with an additional \$475 thousand in uncontrollable increases and the reception, processing and care activity its full uncontrollable request of \$30 thousand.

UNITED STATES TRUSTEE SYSTEM FUND

(Supplemental now requested, existing legislation)

For the payment of initial operating expenses of United States Trustees, incurred by the United States Trustee System Fund as authorized by the Bankruptcy Judges, United States Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554), \$16,436,000: *Provided, That deposits to the Fund are available in such amounts as may be necessary to pay refunds due depositors.*

This proposal would reduce new resources for Wagner-Peyser Act grants to States beginning July 1, 1987 and provide authority to redistribute prior year excess unexpended balances. When combined with savings resulting from State initiatives and resources to be provided by the new worker adjustment program, the proposal should permit almost all States to continue to support at least the same levels of activity as in prior years.

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts this proposal, appropriate actions will be taken to implement the law.

This proposal would provide sufficient cash for the liquidation of contract authority provided in Public Law 99-570, the Anti-Drug Abuse Act. Budget authority of \$16.2 million provided in Public Laws 99-500 and 99-591 would be converted to liquidating cash. With this change the program would operate at a level of \$50 million as provided in Public Law 99-570. There would be no Executive Branch action to defer or otherwise restrict the funds currently available until after legislation is enacted. When legislation is enacted, appropriate actions would be taken to reduce the program in accordance with the law.

FEDERAL RAILROAD ADMINISTRATION

SETTLEMENTS OF RAILROAD LITIGATION

(Supplemental now requested, existing legislation)

For the settlement of promissory notes pursuant to section 210(f) of the Regional Rail Reorganization Act of 1973 (Public Law 93-236), as amended, \$95,879,000, to remain available until expended, together with such sums as may be necessary for the payment of interest due to the Secretary of the Treasury under the terms and conditions of such notes.

This supplemental appropriation would repay borrowings from the Department of the Treasury. The borrowings paid for the properties of the Penn Central Transportation Company and their subsidiaries and affiliates transferred to Conrail in 1976. Because Treasury lends these funds at the current interest rate, the request also includes an appropriation to cover interest that is accruing each day until the notes are repaid.

RAILROAD REHABILITATION AND IMPROVEMENTS FINANCING FUNDS

(Supplemental now requested, existing legislation)

For payment to the Secretary of the Treasury for debt reduction, \$12,500,000, to remain available until expended, together with such sums as may be necessary for

the payment of interest due to the Secretary of the Treasury under the terms and conditions of such debt.

This supplemental appropriation is requested to repay promissory notes on borrowings that financed interest owed on notes issued in 1986 for a loan to the Milwaukee Road, Inc. Because Treasury lends these funds at the current interest rate, an appropriation to cover interest that is accruing each day until the notes are repaid is also requested.

FEDERAL AVIATION ADMINISTRATION

OPERATIONS

(Including transfers of funds)

For an additional amount for "Operations", \$50,000,000, to be derived by transfer from the unobligated balances of "Interstate Transfer Grants—Highways".

This proposal would provide funds for several operational requirements, including leased telecommunication services, training for air traffic controllers, permanent change of station moves for flight service station specialists, and software maintenance services at the Federal Aviation Administration (FAA) technical center. These requirements were not anticipated when the FAA submitted its regular 1987 budget request last year.

GRANTS-IN-AID FOR AIRPORTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(AIRPORT AND AIRWAY TRUST FUND)

(Supplemental now requested, existing legislation)

For an additional amount for liquidation of obligations incurred for airport planning and development under section 14 of Public Law 91-258, as amended, and under other laws authorizing such obligations, and obligations for noise compatibility planning and programs, \$42,000,000, to remain available until expended.

This proposed supplemental would liquidate obligations incurred for airport planning and development under section 14 of Public Law 91-258, as amended and other law authorizing such obligations, and obligations for noise compatibility planning and programs.

MARITIME ADMINISTRATION

FEDERAL SHIP FINANCING FUND

(Supplemental now requested, existing legislation)

For payment to the Secretary of Treasury for debt reduction, \$1,375,000,000, to remain available until expended, together with such sums as may be necessary for the payment of interest on said amount to the Secretary of Treasury. During fiscal year 1987, no new commitments for guaranteed loans will be made.

90.00 Outlays		73,000	

This proposed supplemental would repay the Treasury debt incurred through 1986 by the Federal Ship Financing Fund and related interest. The debt is the result of Treasury borrowings that were necessary to meet U.S. Government loan guarantee commitments. The proposed supplemental would also terminate new loan guarantee commitments.

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION

OPERATIONS AND MAINTENANCE (TRUST FUND)

(Supplemental now requested, existing legislation)

For necessary expenses for operation and maintenance of those portions of the Saint Lawrence Seaway operated and maintained by the Saint Lawrence Seaway Development Corporation, \$6,000,000 to be derived from the Harbor Maintenance Trust Fund, pursuant to Public Law 99-662.

This proposal would restore funding of Corporation activities. Prior to April 1, 1987, these activities were funded from toll revenues. As a result of the passage of Public Law 99-662, the Corporation's toll revenues must be deposited in a newly created Harbor Maintenance Trust Fund, effective April 1, 1987. That law also provides for financing operations and maintenance expenses with appropriations from the Trust Fund.

This supplemental would provide for the renovation of the Treasury Annex and the establishment of the Office of Depreciation Analysis in the Office of the Assistant Secretary for Tax Policy. The renovation of the Treasury Annex will restore the historic exterior facade and renovate the interior office area to today's standards, and allow all the Departmental Offices' per-

sonnel currently housed in leased space to be accommodated in either the Main Treasury Building or in the restored Treasury Annex. Establishment of an Office of Depreciation Analysis, as mandated by the Tax Reform Act of 1986, would allow the Department to undertake studies of depreciation that would be used to change an asset's class life.

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

(Supplemental language now requested, existing legislation)

For an additional amount for "Space flight, control and data communications", such sums as may be necessary to complete the Space Shuttle recovery, to be derived by transfer from "Research and development".

There will be no Executive Branch action to defer or otherwise restrict the funds currently available until after Congressional enactment of this proposal. If and when Congress enacts these proposals, appropriate actions will be taken to implement the law.

CONSTRUCTION OF FACILITIES

(Supplemental language now requested, existing legislation)

For an additional amount for fiscal year 1987 for "Construction of facilities", to be derived by transfer of not to exceed one-half of one per centum of the funds appropriated to "Research and development" or "Space flight, control and data communications": Provided, That these funds, together with \$10,000,000 previously appropriated for a construction project, shall be available to construct, expand, and modify laboratories and other installations at any location: Provided further, That all such funds may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment.

This proposal would provide the Administrator with necessary flexibility to reallocate appropriated amounts in 1987 to meet critical milestones and correct technical problems required to reestablish the Space Shuttle operational fleet. The proposal would also give the Administrator discretionary authority to effectively perform the agency's laboratory and test facility construction program by permitting a limited reallocation from other accounts.

Small Business Administration

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

Of the funds made available under this head in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1987, as included in Public Laws 99-500 and 99-591, for Small Business Development Centers, not to exceed \$4,116,000 shall remain available for this activity until September 30, 1988.

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
Program by activities:			
10.00 Business development (total obligations) (object class 25.0)		-4,116	4,116
Financing:

24.40 Unobligated balance, end of year		4,116	
25.00 Unobligated balance lapsing		4,116	
50.00 Budget authority (reappropriation)		4,116	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		-4,116	4,116
90.00 Outlays		-4,116	4,116

This supplemental request would extend the availability of funds appropriated in 1987 for Small Business Development Centers to the end of 1988.

Veterans Administration

COMPENSATION

(Supplemental now requested, existing legislation)

For an additional amount for "Compensation", \$80,200,000, to remain available until expended.

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1986 est.
Program by activities:			
Compensation:			
Veterans:			
00.03 World War I		287	
00.04 World War II		27,524	
00.05 Korean conflict		7,134	
00.06 Vietnam era		18,696	
00.07 Peacetime service		10,529	
00.91 Total veterans		64,170	
Survivors:

74.40 Obligated balance, end of year		-5,000	
90.00 Outlays		75,200	5,000

This request would provide the additional funds required to implement "The Veterans' Benefits Improvement and Health-Care Authorization Act of 1986" that increased compensation benefits to veterans, Death and Indemnity Compensation for spouses and children, and the veterans' clothing allowance by 1.5 percent effective December 1, 1986.

MEDICAL CARE

(Supplemental language now requested, existing legislation)

Of the funds provided under this heading in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987, as enacted by Public Laws 99-500 and 99-591, \$44,178,000 shall remain available until September 30, 1988, to fund central procurement contracts for the acquisition of automated data processing equipment and contracts for major systems support in amounts not less than \$1,000,000 for the Decentralized Hospital Computer Program and the Integrated Hospital System.

This appropriation language would extend the availability of funding for automated data processing equipment and support contracts from one year to two years. The extension would enable the Veterans Administration to make more efficient use of these funds by providing needed flexibility in the procurement of large, complex systems.

MEDICAL AND PROSTHETIC RESEARCH

(Supplemental language now requested, existing legislation)

Of the funds provided under Research, development, test, and evaluation, Defense agencies in the Department of Defense Appropriations Act, 1987, as included

in Public Laws 99-500 and 99-591, the \$20,000,000 that was transferred to this account as authorized by section 235 of Public Law 99-661, the National Defense Authorization Act for fiscal year 1987, shall remain available until September 30, 1990.

This language would extend the availability of funding for research projects to be conducted by the Veterans Administration.

GENERAL OPERATING EXPENSES

(Supplemental language now requested, existing legislation)

Of the funds provided under this head in the conference version of H.R. 5313, Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1987, as enacted by Public Laws 99-500 and 99-591, \$17,925,000 shall remain available until September 30, 1988, to fund contracts in amounts not less than \$1,000,000 for the acquisition of automated data processing equipment and services to support the modernization program of the Department of Veterans Benefits.

This supplemental request would extend the availability of funding for automated data processing equipment and support contracts from one year to two years. The extension would enable the Veterans Administration to make more efficient use of these funds by providing needed flexibility in the procurement of large, complex systems.

**Other Independent Agencies
ACTION**

(Supplemental language now requested, existing legislation)

The amount included under this head in the Omnibus Drug Supplemental Appropriations Act of 1987 as included in Public Laws 99-500 and 99-591 shall remain available until September 30, 1988.

This language would make the 1987 appropriation for strengthening and expanding the efforts of community-based volunteer groups working to prevent drug abuse available through 1988. This extended availability has previously been provided for numerous other drug abuse prevention programs.

AMERICAN BATTLE MONUMENTS COMMISSION

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", \$1,424,000.

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.

Relation of obligations to outlays:			
71.00 Obligations incurred, net		24,559	
90.00 Outlays		24,559	

This supplemental proposal would provide funds to offset the depreciation of the dollar and enable Radio Free Europe/Radio Liberty to continue operations at the current level throughout 1987.

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", \$375,000: *Provided, That in the appropriation language under this head in the Departments of Commerce, Justice and State, the Judiciary and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591, insert a period after "\$7,500,000" and delete the language that follows.*

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
95-1900-1-1-751			
Program by activities:			
10.00 Total obligations		375	
Financing:

Relation of obligations to outlays:			
71.00 Obligations incurred, net		375	
72.40 Obligated balance, start of year			56
74.40 Obligated balance, end of year		-56	
90.00 Outlays		319	56

This supplemental appropriation would provide for an additional 40 positions needed to resume Commission work discontinued in 1987 due to funding constraints. The requested deletion in the appropriations language would remove restrictions on the availability of Commission funding, thereby enabling essential Commission work to continue while maintaining 1987 staff levels significantly below 1986 levels.

The proposed reduction in the Export-Import Bank's direct loan program is part of overall efforts to reduce government credit programs and to reduce the deficit. Recently, the Bank has had large amounts of unused authority. This proposal reduces excess authority, while still providing for the requirements of U.S. exporters.

PANAMA CANAL COMMISSION

OPERATING EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Operating expenses," \$8,013,000, to be derived from the Panama Canal Commission Fund, of which \$6,000,000 shall be available to cover the cost of removing a landslide at the Panama Canal, and \$2,013,000 shall be available for payment to the Republic of Panama, pursuant to article XIII, paragraph 4(c) of the Panama Canal Treaty of 1977.

Relation of obligations to outlays:			
71.00 Obligations incurred, net.....		79,177	
90.00 Outlays.....		79,177	

This supplemental appropriation is requested to fund compensation paid to postal employees for injuries which occurred prior to July 1, 1971, while employed by the Post Office Department, which remain liabilities of the U.S. Government. The requested amount would cover the amount billed by the Department of Labor for compensation payments made during 1984 and 1985. The amount appropriated would then be reimbursed to the Department of Labor.

UNITED STATES INFORMATION AGENCY

SALARIES AND EXPENSES

(Supplemental now requested, existing legislation)

For an additional amount for "Salaries and expenses", \$8,098,176, of which \$598,176 shall be used for purchase of Pakistani Rupees from the special account for the Informational Media Guarantee Program to carry out the provisions of section 1011(d) of the Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1442(d)).

74.00 Obligated balance, end of year		-1,389	
90.00 Outlays		6,709	1,389

This proposal would provide \$7.5 million to offset exchange rate losses that have severely affected the purchasing power of the dollar abroad and \$598 thousand for a new U.S.-Pakistan Fund for cultural, educational, and scientific activities. This fund would use special foreign currency, derived from the Information Media Guaranty Program, to support the newly formed National English Language Institute in Pakistan.

RADIO BROADCASTING TO CUBA

(Supplemental now requested, existing legislation)

For an additional amount to carry out the provisions of section 7 of the *Radio Broadcasting to Cuba Act, as amended (22 U.S.C. 1465(e))*, \$993,000, to remain available until expended.

Program and Financing (in thousands of dollars)

BUILDINGS AND FACILITIES
 (Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	12-1401-5-1-352	1986 actual	1987 est.	1988 est.
Program by activities:				
10.00	Total obligations (object class 32.0)		-28,000	
Financing:				
40.00	Budget authority (appropriation rescission proposal R87-1)		-28,000	
Relation of obligations to outlays:				
71.00	Obligations incurred, net		-28,000	
72.40	Obligated balance, start of year			-17,000
74.40	Obligated balance, end of year		17,000	
90.00	Outlays		-11,000	-17,000

This proposal would rescind certain facility planning and construction funds not requested in the budget. Remaining funds would be used to support the construction of two previously planned facilities and to initiate the planning studies and design of four additional projects.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

RURAL CLEAN WATER PROGRAM
 (Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	12-3337-5-1-304	1986 actual	1987 est.	1988 est.
Program by activities:

74.40	Obligated balance, end of year			5,660
90.00	Outlays			-340

RURAL CLEAN WATER PROGRAM—Continued

Under the experimental Rural Clean Water Program (RCWP), a total of \$70 million was appropriated in 1980 and 1981 to develop and test means of controlling agricultural nonpoint source water pollution in rural areas. Twenty-one projects were approved, for which full funding over the 3- to 10-year life of the project areas was estimated to be \$70 million. In 1986, unobligated Rural Clean Water funds were reserved to assist Chesapeake Bay clean-up efforts, supplementing other funds provided by the Congress in the Clean Water Act. Since related funds did not become available under the Clean Water Act, RCWP funds will not be needed for this purpose and are therefore proposed for rescission.

AGRICULTURAL CONSERVATION PROGRAM
(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
12-3315-5-1-302			
Program by activities:			
10.00 Cost-sharing and technical assistance to farmers (total obligations) (object class 41.0)		-114,356	-50,000
Financing:			
21.40 Unobligated balance available, start of year			50,000
24.40 Unobligated balance available, end of year		-50,000	
40.00 Budget authority (appropriation rescission proposal R87-3)		-164,356	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		-114,356	-50,000
72.40 Obligated balance, start of year			-61,686
74.40 Obligated balance, end of year		61,686	36,686
90.00 Outlays		-52,670	-75,000

Responsibility for the maintenance of the productivity and profitability for the individual farm is primarily the responsibility of its owner, who has an economic stake in preserving its productivity. This proposal reduces areas consistent with the Administration's policy in shifting the responsibility of financing the costs of installing conservation measures back to State, local, and private sources and focusing Federal financial assistance on the most seriously eroding areas.

WATER BANK PROGRAM
(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
12-3320-5-1-302			
Program by activities:			
10.00 Total obligations (object class 41.0)		-8,166	
Financing:			
40.00 Budget authority (appropriation rescission proposal R87-4)		-8,166	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		-8,166	
72.40 Obligated balance, start of year			-7,078
74.40 Obligated balance, end of year		7,078	6,240
90.00 Outlays		-1,088	-838

This proposal would rescind excess funds in the Water Bank Program. The major program thrust for

waterfowl habitat protection is in the Department of Interior, which has a dedicated source of funding for waterfowl habitat preservation authorized by the Migratory Bird Conservation Act. Also, the "swampbuster provision" of the Food Security Act of 1985 would deny farm benefits to producers who convert wetlands to crop use in the future, except where the impact of the action is found to be minimal.

EMERGENCY CONSERVATION PROGRAM
(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
2-3316-5-1-302			
Program by activities:			
10.00 Total obligations (object class 41.0)		-10,000	
Financing:			
40.00 Budget authority (appropriation rescission proposal R87-5)		-10,000	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		-10,000	
72.40 Obligated balance, start of year			-2,500
74.40 Obligated balance, end of year		2,500	
90.00 Outlays		-7,500	-2,500

This proposal is consistent with the Administration's policy in shifting the responsibility for financing the costs of installing conservation measures back to State, local, and private sources and focusing limited Federal financial assistance on the most seriously eroding areas. Also, losses resulting from natural disasters could be indemnified by insurance carriers.

FARMERS HOME ADMINISTRATION

RURAL WATER AND WASTE DISPOSAL GRANTS
(Rescission proposal)

Program and Financing (in thousands of dollars)

Identification code	1986 actual	1987 est.	1988 est.
12-2066-5-1-452			
Program by activities:			
10.00 Total obligations (object class 41.0)		-79,500	
Financing:			
40.00 Budget authority (appropriation rescission proposal R87-6)		-79,500	
Relation of obligations to outlays:			
71.00 Obligations incurred, net		-79,500

74.40 Obligated balance, end of year		77,910	65,985
90.00 Outlays		-1,590	-11,925

The proposed rescission is part of the Administration's efforts to reduce the size and scope of Federal programs and their adverse impact on the management of future fiscal policy and deficit targets. The Administration believes that the most efficient way to manage both local housing and community facilities is to rely upon the American private credit market, not federal loans and grants.

This account funds the acquisition of private lands and interests for public outdoor recreation purposes. Additional acquisition of private lands by the Federal Government will be postponed in 1987 in order to: (1) minimize reducing the current taxable land base for State and local government revenue purposes, (2) permit the Forest Service to concentrate its attention and limited resources on maintaining and improving

their current extensive land base, and (3) help achieve the deficit reduction goals of the Balanced Budget and Deficit Control Act of 1985.

This proposal would rescind Congressionally-provided funds for grants to firms adversely affected by increased imports. The fact that a firm has been harmed by import competition should not in and of itself constitute justification for special government assistance. U.S. trade laws provide remedies against unfair import competition.

The public telecommunications facilities program provides grants to plan for and construct non-commercial broadcasting facilities in areas not served by public television and radio. Over 95 percent of the United States currently receives public broadcasting. This rescission would eliminate the funds available for grants from the 1987 appropriation while allowing for an orderly phase out of the program.

Most construction funds appropriated under this program are used for grants to local educational agencies that have increases in enrollments because of Federal activities or decreases in local property tax bases due to Federal ownership of property and the exemption of that property from local taxation. The remainder of the funds are used for the repair of buildings originally built with Federal funds and to which the Federal Government still holds title. The rescission of funds appropriated for construction activities is proposed as part of the President's program to eliminate unnecessary Federal spending, to help control the Federal deficit, and to direct Federal support to priority programs. The activities proposed for rescission are duplicative of or similar to other Federal, State, or local programs.

This rescission proposal covers eight small categorical programs. These programs duplicate the assistance provided under broader or more flexible authorities such as Chapter 1, Chapter 2 State block grants, the Teacher training and improvement program, and the Magnet schools assistance program. In several cases, such as Women's educational equity and Follow through, the programs have outlived their usefulness as specific activities. The rescission includes funds appropriated for 1987 for seven programs. In addition, available unobligated balances appropriated in 1985 and 1986 for the Excellence in education program would be rescinded. In all cases, the programs can be considered nonessential uses of Federal resources during this time of fiscal restraint.

Funding for the State grant program is proposed for partial rescission. The revised amount provides an increase to offset the cost of inflation. Funding for preschool State grants is proposed for partial rescission to remove unnecessarily high one-time payments based on estimates of additional children served, while still allowing an award of \$300 for each child who received services. Funding for grants for infants and families is proposed for full rescission because this new program is not targeted on those most in need and because many other Federal, State, local and private programs—including private and public health insurance—make health and social services available to handicapped infants and their families. Funding for deaf-blind projects within the special populations activity is proposed for partial rescission because under the Education of the Handicapped Act States are responsible for providing direct services to most of this very small population. Funding for early childhood education grants within the special populations activity is proposed for partial rescission because the 1986 amendments eliminated the separate program of State planning, development, and implementation grants. Special education personnel de-

velopment funding within the training and information activity is proposed for partial rescission because of inadequate evidence tying changes in the quality and quantity of special education personnel to the funding provided under this program and because of the availability of other funds for similar purposes.

This proposal would rescind funds for various rehabilitation programs. For most programs, funding would be maintained at or above the 1986 level, a level adequate for Federal contributions to these activities. The new supported employment formula grant program would not be funded since supported employment activities are already conducted under the special demonstration programs. Funding for recreation programs would be eliminated, because these programs are more appropriately supported by voluntary organizations and local governments. The Indian program would be funded by a set-aside equal to one-eighth of one percent of the State grant program beginning in 1987. Funding for Indian grants under service and demonstration projects, that duplicates the new set-aside, would be terminated. The training program would be funded at the 1986 level because available data on personnel shortages do not support appropriation increases. Evaluation would be funded at the level needed for new evaluation contracts.

This proposal would rescind a portion of the funds for vocational education basic grants, including funds for Indian and Hawaiian natives programs, all funds for community-based organizations, consumers and home-making education and bilingual vocational training, a portion of the funds for State councils, and all funds for national program demonstration projects. The rescission in the basic grant program is necessary to help achieve deficit reduction targets, while protecting other higher priority programs. However, title II, part A, which authorizes vocational education opportunities for six special populations, would be funded at a level slightly higher than in 1986. Categorical funding for community-based organizations, consumer and home-making education and bilingual vocational training is not necessary, since activities under these programs are allowable under the basic grant program. Bilingual education is also provided by programs funded under the Bilingual Education Act. Funding for State councils would be maintained at the 1986 level. Demonstration projects funding would be rescinded to prevent the initiation of new projects at this time of fiscal restraint.

This proposal would rescind funds in student aid programs of grant, work, and loan assistance to reduce Federal funding to levels consistent with overall budget constraints and with limited Federal responsibility in this area. Grants to schools for work study and supplemental grant programs are not needed given the availability of direct aid to students in the form of the Pell grant and Guaranteed Student Loan programs. Loan capital contributions would be eliminated because of the excessive, unnecessary borrower subsidies in the current direct loan program. The goals of the State student incentive grant program have been achieved; the program no longer requires Federal financial support.

Rescissions are proposed for the following activities:
Other aid for institutions—

Program development.—A partial rescission for the Fund for the Improvement of Postsecondary Education is proposed to focus support on potentially exemplary projects which respond to identified, needed improvements in postsecondary education. Federal funding is no longer necessary for the international education and foreign language studies, cooperative education, and law school clinical experience programs. Such programs are now securely established in postsecondary curriculums. Specific Federal-level needs in international education and foreign language studies can be met with related programs of the Departments of Defense and State and the U.S. Information Agency. A new program, innovative projects for community services, is essentially to develop a student aid program and thus unnecessary, since other general student financial aid is available from the Department.

Special grants.—These activities, including assistance to Guam, the Robert A. Taft Institute of Government, Welch Hall at Eastern Michigan University, the Wagner Institute of Urban Public Policy, the Kansas Educational Satellite Video Communications Center, the Carl Albert Congressional Research and Studies Center, and the Technology Transfer Institute, are narrow in purpose and nonessential.

Aid for students—

Special programs for the disadvantaged.—A partial rescission is proposed to focus resources on providing direct services for students. Grants would be available to postsecondary institutions which participate in the special services and upward bound programs.

Other support services.—The veterans' education outreach program has outlived its original purpose of assisting postsecondary institutions in responding to the special needs of Vietnam-era veterans. Federal funds are no longer necessary for the legal training for the disadvantaged program which receives support from private sources.

Scholarships and fellowships.—The graduate and teacher fellowship programs duplicate support available under the Department's general student financial aid programs and through the National Science Foundation and National Endowment for the Humanities.

This rescission is proposed because (1) Federal support for public library construction has accomplished its goal of increasing access to library services—over 96 percent of the population now has access to such services; (2) the number of literacy projects in local public libraries reported by the States more than doubled between 1980 and 1984 without the aid of the new library literacy programs indicating that this program is not necessary to increase the number of literacy projects in public libraries; and (3) training, demonstrations and research library support duplicates other Federal programs, substitutes Federal for ample non-Federal resources, and provides money to many well-financed institutions.

The purpose of Energy supply, research and development activities is to: (1) support long-term research and development on a mix of technologies that have the potential to provide adequate supplies of energy at reasonable costs, and (2) fund other research programs which provide significant benefits to the Government and the public. The proposed rescission consists of unnecessary Congressional addition in Solar Energy research (\$9.4 million) Electric Energy Systems research (\$3.7 million) and university construction projects which include: the Center for New Industrial Materials, Energy Research Complex, Center for Science and Tech-

nology, Center for Science and Engineering, Center for Nuclear Imaging Research, St. Christopher's Hospital for Children, Center for Excellence in Education, Center for Molecular Medicine and Immunology.

This account funds research and development activities in coal, petroleum and unconventional gas. The amount proposed for rescission consists of various projects which we believe are in excess of the funds required to conduct the fossil energy research and development program. Some of these projects support the development of fossil energy technologies beyond the proof-of-concept stage. The administration believes that further development of these technologies should be the responsibility of the private sector.

90.00	Outlays		-7,504	-142,576

This rescission proposal would continue funding for the Community Development Grants program at a level similar to that proposed in the 1987 Budget. A \$2.6 billion program level provides a level of funds that balances this program's objectives against the need for fiscal restraint. In addition, the Administration will propose to strengthen the targeting of this program to ensure that these Federal resources are allocated to more accurately reflect the relative level of needs of the communities.

The funding level of \$638.8 million remaining after this rescission of \$19.0 million is sufficient to fund the staffing levels and associated support required to manage and administer the Departmental program activity anticipated during 1987.

The proposal would remove a requirement that one specific program activity in the Department maintain a minimum staffing level. This level is in excess of budgeted needs and distorts staffing patterns.

This rescission proposal affects the three major grant programs authorized under the Job Training Partnership Act (JTPA): the block grant to States for training, the summer youth employment and training program, and the title III dislocated worker assistance program. This rescission of JTPA grants resources returns the financing levels for the block grant and summer youth employment programs to approximately their 1986 post Gramm-Rudman-Hollings levels, and reduces the dislocated worker assistance program to \$25 million. These reductions are proposed because of large unexpended balances in all three programs and because program changes proposed for the summer youth employment and dislocated worker assistance programs will permit more efficient targeting of resources to those most in need of assistance. The amount remaining for the dislocated worker assistance program, which is sufficient to finance services from July 1, 1987 through September 30, 1987 preparatory to the implementation of a replacement program, will be allocated at the Secretary of Labor's discretion.

This proposal would reduce 1987 budget authority to be used for increasing Customs Service staffing levels. With the acquisition of high-technology equipment and other automated procedures, current Customs personnel can maintain highly selective inspection, examination, and enforcement practices that encourage both efficiency and effectiveness, thereby negating the need for additional staffing increases.

90.00 Outlays	-12,000	-11,000	

This proposal would rescind funds for the Advanced Communications Technology Satellite flight demonstration of advanced communications technology. This is part of the administration's effort to avoid possible competition with the private sector and to minimize Government subsidies for activities more appropriately and effectively undertaken by the private sector.

EXPLANATION OF OTHER MATERIALS

This section includes the following material:

(a) A list of advance appropriations, as required by the Congressional Budget Act of 1974 (31 U.S.C. 1105(17)), including those resulting from multi-year appropriations requests, a list of appropriations with advance funding provisions, and a list of appropriations with forward funding provisions.

(b) A statement of amendments and revisions to 1987

III-2

budget authority requests that were transmitted to the Congress after the 1987 Budget but prior to the transmittal of the 1988 Budget, as required by section 601 of the Congressional Budget Act of 1974.

(c) A statement of the amounts of appropriations requested for Offices of Inspectors General, as required by section 3 of the Federal Managers' Financial Integrity Act of 1982 (Public Law 97-255).

ADVANCE APPROPRIATIONS, ADVANCE FUNDING, AND FORWARD FUNDING FOR 1988

I. Advance appropriations are provided for use in a fiscal year, or more, beyond the fiscal year for which the appropriation act is passed. Advance appropriations in 1988 appropriations Acts will provide funding for programs beyond 1988. Since these appropriations are not available until after 1988, the amounts will not be included in 1988 budget totals, but will be reflected in the budget totals for the fiscal year requested. In certain cases, these amounts represent the second or a subsequent year request for appropriations on a multi-year basis.

The Congressional Budget Act of 1974 (31 U.S.C. 1105(17)) requires inclusion in the budget of "information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation." In fulfillment of this requirement, the table below lists those accounts authorized to receive, in 1988, advance appropriations for 1989 and beyond and cites the authorizing statute. Also listed in Part A are accounts presented on a multi-year basis that have no specific legal authority. The listing is in two parts: Part A shows the amounts of advance appropriations included in the 1988 budget. Part B is a listing of accounts for which advance appropriations are authorized but not requested in the 1988 budget.

A. Accounts for which advance appropriations are included in the 1988 budget:

- Funds Appropriated to the President: Assistance for the Nicaraguan democratic resistance (Public Law 99-145, sec. 1405) \$110,000 thousand for 1989.
- Department of Defense—Military: all accounts (Public Law 99-145, sec. 1405) \$317,224,603 thousand for 1989.
- Department of Defense—Civil: Payment to military retirement program (Public Law 99-145, sec. 1405) \$11,494,000 thousand for 1989.
- Department of Energy:
 - Atomic energy defense activities (Public Law 99-145, sec. 1405) \$8,500,000 thousand for 1989.
 - Clean Coal Technology, \$100,000 thousand for 1989.
- Department of Health and Human Services, except Social Security:
 - Federal subsidy for St. Elizabeths Hospital, \$24,000 thousand for 1989.
 - Retirement pay and medical benefits for Commissioned Officers, \$100,350 thousand for 1989.
 - Grants to States for Medicaid (42 U.S.C., sec. 1396) \$30,870,000 thousand for 1989 and \$8,500,000 thousand for 1990.¹
 - Payments to Health Care Trust Funds, \$30,306,000 thousand for 1989.
 - Payments to Social Security Trust funds, \$93,291 thousand for 1989.
 - Special benefits for disabled coal miners (30 U.S.C., sec. 921) \$862,590 thousand for 1989 and \$220,050 thousand for 1990.¹

- Supplemental security income program (42 U.S.C., sec. 1381) \$12,102,224 thousand for 1989 and \$2,684,000 thousand for 1990.¹
- Family support payments to States (42 U.S.C., secs. 601 and 651) \$10,107,868 thousand for 1989 and \$2,673,942 thousand for 1990.¹
- Interim assistance to States for Legalization (Public Law 99-603, sec. 204) \$930,000 thousand for 1988, \$655,000 thousand for 1989, \$744,000 thousand for 1990, and \$733,000 thousand for 1991.²
- Central Intelligence Agency: Payment to the Central Intelligence Agency retirement and disability fund (Public Law 99-145, sec. 1405) \$144,500 thousand for 1989.
- Corporation for Public Broadcasting: Public broadcasting fund, \$214,000 thousand for 1988 and \$228,000 thousand for 1989.
- Federal Emergency Management Agency:
 - Salaries and expenses; defense-related activities (Public Law 99-145, sec. 1405) \$74,217 thousand for 1989.
 - Emergency management planning and assistance; defense-related activities (Public Law 99-145, sec. 1405) \$193,197 thousand for 1989.
- Intelligence Community Staff (Public Law 99-145, sec. 1405) \$25,123 thousand for 1989.
- Railroad Retirement Board: Federal payments to the railroad retirement accounts, \$3,100 thousand for 1989.
- Selective Service System: Salaries and expenses (Public Law 99-145, sec. 1405) \$26,959 thousand for 1989.

B. Accounts authorized to receive advance appropriations but for which none are requested in the 1988 budget:

- Department of Agriculture:
 - Food program administration (42 U.S.C., sec. 1752).
 - Food donations program (Public Law 93-29, sec. 209).
 - Child nutrition programs (42 U.S.C., sec. 1752).
- Department of Education. The following activities are authorized to receive advance appropriations (20 U.S.C. 1223 and 29 U.S.C. 703):³
 - Compensatory education for the disadvantaged.
 - Impact aid.
 - Special programs.
 - Indian education.
 - Bilingual education.
 - Immigrant education.
 - Education for the handicapped.
 - Special institutions for the handicapped.
 - Rehabilitation services and handicapped research.
 - Vocational and adult education.
 - Student financial assistance.
 - Guaranteed student loans.
 - Higher education.
 - Higher education facilities loans and insurance.
 - College housing loans.
 - Howard University.
 - Education research and statistics.
 - Libraries.
 - Education and research overseas (special foreign currency program).
- Department of Health and Human Services:
 - Family social services (Public Law 96-272).
 - Human development services (Public Law 97-35, sec. 657, Public Law 97-115, sec. 209).

¹ These accounts, for which advance appropriations are requested, are also requesting advance funding (see section II).

² Amounts identified for 1989 through 1991 may be adjusted based on reestimating at the time the budget is submitted for each year. However, the annual amount cannot exceed \$1 billion pursuant to Public Law 99-603.

³ These statutes erroneously refer to "advance funding". Since these statutes describe and clearly intend to provide advance appropriations, the affected accounts are listed here, section I.

II. Advance funding is authority provided in appropriations acts to obligate and disburse funds during a fiscal year from a succeeding year's appropriation. The funds so obligated increase the budget authority for the fiscal year in which obligated and reduce the budget authority of the succeeding fiscal year. Essentially, this is a device for avoiding supplemental requests late in the fiscal year for certain entitlement programs, should the appropriations for the current year prove to be too low. The table below lists those accounts for which advance funding authority is requested in the 1988 budget.

Department of Labor:
 Federal unemployment benefits and allowances.
 Special benefits.
 Black lung disability trust fund.

III. Forward funding is authority provided in an appropriations act to obligate funds in one fiscal year for the financing of ongoing programs of grantees during the succeeding fiscal year. The budget authority for such programs is included in the budget totals for the year in which it is appropriated. This device is often used for education programs, so that grants can be made prior to the start of the school year. The language providing forward funding for education programs will specify that amounts appropriated will not be available until some time into the year of the appropriation (e.g., July 1, 1988) and in most cases will specify that such

amounts will remain available until the end of the succeeding fiscal year. The table below lists those accounts for which forward funding exists or is requested in whole or in part in the 1988 budget.

Department of Education:
 Compensatory education for the disadvantaged.¹
 Special programs.¹
 Education for the handicapped.
 Vocational and adult education.

¹ No new authority is being requested in the 1988 budget for these accounts, for which forward funding has been enacted previously.

In the training and employment area, forward funding is provided in some accounts by providing appropriations for a program year that starts in the fiscal year of the appropriation and extends into the following fiscal year. Program years running from July 1 to June 30 are authorized for training programs under the Job Training Partnership Act, State Employment Service operations under section 6 of the Wagner-Peyser Act, and senior citizen employment programs under Title V of the Older Americans Act. The table below lists those accounts for which such forward funding is requested in the 1988 budget.

Department of Labor:
 Training and employment services.
 Community service employment for older Americans.
 State Unemployment Insurance and Employment Services Operations.

STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR 1987

(Between the Transmittal of the 1987 and 1988 Budgets)

A statement of all amendments to or revisions in budget authority requested between transmittal of the 1987 budget and the 1988 budget is presented below. This statement is being included in the budget in accordance with the Congressional Budget Act of 1974 (31 U.S.C. 1105(d)).

The modifications to requests for 1987 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the budget requests transmitted in February 1986. If appropriations had been enacted, the President proposed

either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified in part A of the following listing. The President's proposals for rescissions are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register.

PART B. REQUESTS FOR RESCISSION OF BUDGET AUTHORITY

There are no rescissions currently pending before the Congress. Rescission proposals associated with the 1988 budget request are shown in Part II of this appendix.

APPROPRIATIONS REQUESTED FOR OFFICES OF INSPECTORS GENERAL

A statement of the amounts of appropriations requested for the Offices of Inspectors General for Federal departments or establishments is provided. This statement is submitted in accordance with section 201 of the Budget and Accounting Act, 1921, as amended by section 3 of the Federal Managers' Financial Integrity Act of 1982, Public Law 97-255. The following table shows the amount of budget authority requested for 1988 for the Offices of Inspectors General.

PART IV

GOVERNMENT-SPONSORED ENTERPRISES

IV-1

GOVERNMENT-SPONSORED ENTERPRISES

Part IV contains detailed budgets and explanatory statements of certain Government-sponsored enterprises. All of these enterprises were established and chartered by the Federal Government and are sponsored by a Government agency, although they are privately owned and generally privately financed. These budgets are not reviewed by the President; they are presented as submitted by the enterprises. This section includes:

—The Student Loan Marketing Association (SLMA); a corporation to assist in financing college student loans. It is sponsored by the Department of Education.

- The Federal National Mortgage Association; a mortgage finance corporation supervised by the Department of Housing and Urban Development.
- The banks for cooperatives, Federal intermediate credit banks, and Federal land banks, supervised by the Farm Credit Administration.
- The Federal Home Loan Banks and the Federal Home Loan Mortgage Corporation, supervised by the Federal Home Loan Bank Board.

The Board of Governors of the Federal Reserve System provides calendar year data for its administrative budget for inclusion without further review. The Board's budget schedules and statements are provided here for information.

¹ Amortization of discount on purchased loans.

The Student Loan Marketing Association (Sallie Mae), a shareholder-owned corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to lenders engaged in the guaranteed student loan program (GSLP).

Sallie Mae provides liquidity through direct purchase of insured student loans from eligible lenders and through warehousing advances, which are loans to lenders secured by insured student loans or by Government or agency securities. In capital shortage areas, Sallie Mae is authorized, at the request of appropriate State and Federal officials, to make insured loans directly to students and to advance funds to States that will provide loans to students. Sallie Mae is also authorized to provide a secondary market for noninsured loans; to serve as a guarantee agency in support of loan availability at the request of the Secretary of Education; to purchase and underwrite student loan revenue bonds; and to provide certain additional services as determined

by its board of directors to be supportive of the credit needs of students generally.

Sallie Mae is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary market for federally insured loans to graduate health professions students.

Operations.—The forecast data with respect to operations are based on certain general economic and specific GSLP loan volume assumptions and should not be relied upon as an official forecast of the corporation's future business.

Financing.—Between 1974 and early 1982, Sallie Mae borrowed through the Federal Financing Bank. The Secretary of Education was authorized by the Education Amendments of 1980 to guarantee principal and interest on such obligations issued prior to October 1, 1985. Under an agreement with the Department of the Treasury reached in early 1981, Sallie Mae began borrowing directly in the private capital markets. Its last borrowing through the FFB and its last issuance of federally guaranteed obligations occurred in January 1982. Its obligations today have certain characteristics, provided by charter, which give them "agency" status, but they are not federally insured or guaranteed.

Management.—At its annual meeting in May 1986, the shareholders of Sallie Mae elected a board of directors to serve until May 1987. The shareholders of Sallie Mae are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, seven public directors are appointed by the President, who also names the chairman from among the 21 members.

The 1988 Budget proposes legislation that would impose a fee on new securities issued after September 30, 1987. The purpose of this fee is to reimburse the Federal Government for the borrowing advantage this enterprise enjoys as a result of its special relationship with the Government. Sallie Mae would be charged a fee on net new securities issuances, defined as:

- any increase above the level of Sallie Mae securities outstanding on September 30, 1987, plus
- the lesser of:
 - Sallie Mae debt issued prior to 1988 rolling over in 1988 and beyond, or

—repayments and prepayments of direct loans made prior to 1988.

This fee will begin at .10 percent (10 basis points) in 1988, rising to .125 percent (12.5 basis points) in 1989, and .15 percent (15 basis points) in 1990 and beyond.

The Federal National Mortgage Association (Fannie Mae) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

Fannie Mae purchases mortgages at market prices pursuant to commitments issued to sellers through a variety of programs. It finances these purchases through the issuance of debt securities. Fannie Mae's debt instruments are characterized as "Agency Issues" in the securities market, but not in the Federal Government's budget.

The common stock of the Corporation is owned by the public, is fully transferable and is listed on major stock exchanges.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in November 1986 and should not be construed as an official forecast of the Corporation's position.

The Corporation has three separate authorities to borrow money from private sources. It may issue subordinated obligations. It may, in addition, borrow amounts not in excess of the sum of net equity and subordinated obligations outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 30. These borrowings usually take the form of debentures and short-term discount notes. Finally, Fannie Mae may issue securities guaranteed by the Government National Mortgage Association which are fully backed by pools of mortgages. There is no statutory limitation on the amount of those obligations that may be outstanding.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage-backed securities are considered to be owned by the holders of these securities. Consequently, on the books of the Federal National Mortgage Association (Fannie Mae), these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the U.S. Government consider these mortgages and mortgage-backed securities to be assets and liabilities, respectively, of Fannie Mae. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the schedule of Status of direct loans for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from the Corporation's perspective, these items are "Amounts issued" and "Amounts passed through to the holders of securities", respectively.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in November 1986 and should not be construed as an official forecast of the Corporation's position.

Administration-proposed legislation.—The Administration believes that because of Fannie Mae's government-sponsored status, its securities enjoy an interest rate advantage in the credit markets. This gives Fannie Mae a significant competitive advantage relative to private mortgage conduits. In 1982, the President's Housing Commission concluded that Fannie Mae and other Federal and government-sponsored housing agencies impeded the growth of private mortgage conduits and recommended that the Administration seek to privatize them. In 1983, the President's Private Sector Survey on Cost Control (Grace Commission) reached the same conclusion and made a similar recommendation. The Administration supports the privatization of the Fannie Mae and is studying ways of transitioning Fannie Mae to completely private status. Privatization of Fannie Mae (and Freddie Mac) would eliminate the major hurdle private mortgage conduits face in playing a significant role in the nation's housing credit markets.

While Fannie Mae continues to enjoy its Federal agency status, private mortgage conduits will continue to have difficulty competing with it. In order to mitigate the effects of this unfair competition, the Adminis-

tration is proposing legislation to prohibit Fannie Mae and Freddie Mac from purchasing mortgages in the top quartile of the home price distribution in any housing market (but not to exceed \$153,100—an amount that would not be indexed). This will limit Fannie Mae's continued encroachment on the market served by private mortgage conduits for as long as Fannie Mae maintains its association with the Federal government. As long as Fannie Mae maintains its ties to the Federal government, the Administration will continue to evaluate the competitive effects of Fannie Mae's high leveraging ratio on private mortgage conduits.

The 13 banks for cooperatives are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds issued by the banks are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971, Public Law 92-180, as amended.

The 12 Federal intermediate credit banks are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks become mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The Federal land banks, through the 438 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from the sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The Federal land banks presently operate under authorities contained in title I of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 12 Federal Home Loan Banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1986, the banks extended credits of \$165.6 billion and received repayments of \$152.3 billion. Advances outstanding on September 30, 1986, totaled \$99 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On September 30, 1986, \$88.1 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined

by Board policy (total deposits were at \$25.9 billion on September 30, 1986) and funds paid for the purchase of capital stock by member institutions, amounting to \$9.2 billion at the end of 1985. Funds not immediately used for advances to members are invested until such times as needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a portion of the Board's administrative and other costs.

The Federal Home Loan Mortgage Corporation (Freddie Mac) was created under the Emergency Home Finance Act of 1970. Congress chartered Freddie Mac to provide mortgage lenders with an organized national secondary market in which to sell conventional mortgages and obtain additional funds to meet new demands for mortgages. Freddie Mac serves as a conduit to facilitate the flow of investment dollars from capital market investors to mortgage lenders, and ultimately to homebuyers in the form of more affordable mortgage credit.

Freddie Mac is a publicly-chartered corporation whose preferred stock is owned by savings institutions across the Nation. Freddie Mac is managed by a Board of Directors, the same members of the Federal Home Loan Bank Board, that are appointed by the President with the consent of the Senate. All of Freddie Mac's expenses are paid from its own income.

After purchasing mortgage loans from individual mortgage lenders, Freddie Mac groups the mortgages into pools, which are then sold in the form of mortgage pass-through securities, called Mortgage Participation Certificates (PCs). A PC represents an undivided ownership interest in a pool of residential mortgage loans as purchased by Freddie Mac. The timely payment of interest and full return of principal on the mortgages underlying the PCs is guaranteed solely by Freddie Mac. This guarantee is backed by corporate reserves to cover default losses on individual mortgages and not by the Federal Home Loan Bank System or the full faith and credit of the U.S. Government.

Freddie Mac offers lenders the opportunity to either sell their mortgages for cash or "swap" them for PCs. "Swap" PCs enable lenders to restructure their portfolios by offering these PCs directly to investors, using them as collateral for borrowings or retaining them for sale later. This provides lenders with greater liquidity when the need for more mortgage credit arises. Since the beginning, Freddie Mac has been recognized as a pathfinder for the mortgage finance industry, committing its resources to identifying the needs of the industry and developing quality mortgage programs to meet those needs. Both the conventional mortgage PC and the Collateralized Mortgage Obligation (CMO), introduced by Freddie Mac in 1983, demonstrate Freddie Mac's commitment early on to pioneering improvements in the mortgage finance industry. The CMO is a bond-like security with several maturity classes secured by a pool of mortgages. The CMO has been successfully replicated by others in the marketplace and, as a result, has provided another restructuring tool for lenders as well as attracted new investors and capital to mortgage finance.

When the 15-year single family mortgage became increasingly more popular with borrowers, Freddie Mac pioneered the first mortgage pass-through security backed by these mortgages to ensure their continued affordability. Freddie Mac has sold over \$22.3 billion of this new security since its introduction in 1984.

In 1985, Freddie Mac also introduced the first pass-through security exclusively backed by newly originated multifamily mortgages. The multifamily PC represents Freddie Mac's on-going commitment to providing additional financing for multifamily housing through

FEDERAL HOME LOAN MORTGAGE CORPORATION—Continued

the sale of multifamily mortgage pass-through securities. This was also the first time a mortgage pass-through security was sold exclusively to international investors.

Freddie Mac continued to pioneer the international markets throughout 1985 and into 1986 by targeting the CMOs to the special investment needs of foreign investors. With both the multifamily PC and the CMOs, Freddie Mac has successfully tapped \$734 million in additional funds internationally in order to provide affordable mortgage credit to American homebuyers.

In 1986, Freddie Mac responded to another mortgage finance industry need when it introduced a mortgage pass-through security backed by adjustable rate mortgage ("ARMs"). The ARM security, along with Freddie Mac's ARMs purchase programs, provides lenders with greater flexibility in originating and selling ARMs into the secondary market.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting PCs are considered to be owned by the holders of these securities. Consequently, on the books of Freddie Mac, these mortgages are not shown as assets. However, the budget philosophy of the United States Government includes these mortgages and mortgage pass-through securities as assets and liabilities, respectively, of Freddie Mac. For the purposes of this document, therefore, they

are presented as assets and liabilities in the accompanying schedules. On the Status of Direct Loans schedule for mortgage pass-through securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from Freddie Mac's perspective, these amounts represent "Sales of PCs" and "Amounts passed through to PC holders," respectively.

Administration-proposed legislation.—The Administration believes that because of Freddie Mac's government-sponsored status, its securities enjoy an interest rate advantage in the credit markets. This gives Freddie Mac a significant competitive advantage relative to private mortgage conduits. In 1982, the President's Housing Commission concluded that Freddie Mac and other Federal and government-sponsored housing agencies impeded the growth of private mortgage conduits and recommended that the Administration seek to privatize them. In 1983, the President's Private Sector Survey on Cost Control (Grace Commission) reached the same conclusion and made a similar recommendation. The Administration supports the privatization of Freddie Mac and is studying ways of transitioning Freddie Mac to completely private status. Privatization of Freddie Mac (and Fannie Mae) would eliminate the major hurdle private mortgage conduits face in playing a significant role in the nation's housing credit markets.

However, while Freddie Mac continues to enjoy its Federal agency status, private mortgage conduits will continue to have difficulty competing with it. In order to mitigate the effects of this unfair competition, the Administration is proposing legislation to prohibit Freddie Mac (and Fannie Mae) from purchasing mortgages in the top quartile of the home price distribution in any housing market (but not to exceed \$153,100—an amount that would not be indexed). This will limit Freddie Mac's continued encroachment on the market served by private mortgage conduits for as long as Freddie Mac maintains its association with the Federal government.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the Act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The information presented pertains to Board operations only. This information has been prepared in accordance with OMB guidelines; accordingly it may differ from other financial material published by the Board of Governors. Expenditures made on behalf of the Federal Reserve banks for production, issuance, retirement, and shipment of Federal Reserve notes are not included, since they are reimbursed in full by the Federal Reserve banks.
